

# NOW, SCANNING OVER 6000 FREQUENCIES IS AS EASY AS USING A PUSHBUTTON PHONE.

Introducing the incredible, new Bearcat 210.

The exciting, new Scanner Radio with the space-age, computer control center that brings in every available public service frequency with pushbutton ease.

Bearcat's new 210 is as easy to program as a pushbutton phone. You can select any of the public service bands (all the available local frequencies) simply by pushing buttons.

Simply punch in the frequency numbers on the computer control center keyboard. Hit the Enter button. And you're programmed.

A large, flashing, digital readout panel shows you each frequency you've selected.

The Bearcat 210 patented search capacity lets you explore the endless world of every available public frequency out there, too.

Best of all, you're no longer limited to a given band or set of frequencies. The new Bearcat 210 is synthesized. Space-age circuitry lets you forget crystals forever.

Let's look at some Bearcat 210 features. And facts.

**5 BAND COVERAGE**—Includes Low, High, UHF and UHF "T" public service bands, the 2-meter amateur (Ham) band, plus other UHF frequencies.

**SCANS 20 CHANNELS PER SECOND**—In half a second, the Bearcat 210 scans all 10 channels.

**CRYSTAL-LESS**—Space-age circuitry with 5 custom designed chips. You never have to buy a crystal.

**TRACK-TUNING**—Patented track tuning provides full-band coverage on every band.

**AUTOMATIC LOCK-OUT**—Locks out channels and "skips" frequencies not of current interest.

**AC/DC**—Mobile mounting bracket included.

**SELECTIVE SCAN DELAY**—Adds a two-second delay to prevent missing transmissions when "calls" and "answers" are on the same frequency.

**AUTOMATIC SEARCH**—New, patented feature searches out any active local public service frequency automatically. For more police, fire, marine, emergency calls. And much more.

## THE NEW BEARCAT 210

THE MOST EXCITING THING THAT'S HAPPENED  
TO SCANNING SINCE SCANNERS.
