The Mozart Operas on Records
a discography
CLASSICS THAT MADE THE HIT PARADE

DETAILS OF THE PROGRAM
"Classics that Made the Hit Parade" includes these popular symphonic themes:

- Borodin . . . . Polovtsian Dances from Prince Igor (Stranger in Paradise)
- Tchaikovsky . . Symphony No. 5 in E (Moon Love)
- Waldteufel . . . Espana Waltz (Hot Diggity)
- Chopin . . . . Polonaise No. 6, in Ab Major (Till the End of Time)
- Tchaikovsky . . Piano Concerto No. 2 in C Minor (Full Moon and Empty Arms)
- Rachmaninoff . . Fantasia Improptu in C# Minor (I'm Always Chasing Rainbows)
- Tchaikovsky . . Romeo and Juliet Overture (Our Love)

DETAILS OF THE OFFER
This exciting recording is available in a special bonus package at all Audiotape dealers. The package contains one 7-inch reel of Audiotape (on 1½-mil acetate base) and the valuable "Classics that Made the Hit Parade" program (professionally recorded on Audiotape). For both items, you pay only the price of two reels of Audiotape, plus $1. And you have your choice of the half-hour two-track stereo program or the 55-minute monaural or four-track stereo versions.

See your Audiotape dealer now.

-a new bonus reel from Audiotape

Some of our greatest popular songs—hits like "Full Moon and Empty Arms," "Till the End of Time," "Stranger in Paradise"—took their melodies from the classics. Eight of these lovely themes—in their original classical setting—are the basis for "Classics that Made the Hit Parade," a program with strength, variety, and, of course, rich melodic beauty.

This unusual program, professionally recorded in sparkling full fidelity on Audiotape, is available RIGHT NOW from Audiotape dealers everywhere. (And only from Audiotape dealers.) Ask to hear a portion of the program, if you like. Then, take your choice of a half-hour of two-track stereo, or 55 minutes of four-track stereo or dual-track monaural sound—all at 7½ ips. Don't pass up this unique opportunity.

Beautiful... Small... and wonderfully better!

...it's the new Jensen

TR-30 TRI-ETTE* 3-WAY LOUDSPEAKER SYSTEM

We believe you will agree that the new Jensen TR-30 TRI-ETTE is the finest small speaker system produced regardless of cost. Superior quality precisely engineered components, brilliantly matched and balanced, provide the ultimate in home speaker performance. And you have the choice of styling that includes smart Danish in warm Walnut, subtle Contemporary in clean Limed Oak, the elegance of Traditional Mahogany, authentic Provincial in lustrous Cherry or a special unfinished utility model to paint or stain as you choose... excellent for custom building-in, too. Furniture models are finished on all four sides providing the versatility of horizontal or vertical placement. The accessory matching base creates a small-scaled consolette if you prefer. See and hear the TR-30 TRI-ETTE soon... it's wonderful for mono hi-fi... superb as a stereo pair.

TR-30 TRI-ETTE furniture models—$159.50 (without base)
Unfinished model $134.50 Consolette base $9.95

CHOOSE FROM FIVE "DECORATOR GROUP" FURNITURE STYLES

- DANISH-Walnut
- PROVINCIAL-Cherry
- TRADITIONAL-Mahogany
- CONTEMPORARY-Oak
- GUMWOOD-Unfinished

TR-30 TRI-ETTE FEATURES NEW COMPONENTS

Featuring a new advanced-design 12" FLEKAI'R™ woofer with powerful SYNOTX-6™ magnet and low distortion full 1" travel... precisely coordinated with the BASS-SUPERFLEX™ enclosure to carry bass down lower and better than ever before. Advanced design improved compression midrange and supertweeter units for smooth, balanced, extended response. Be sure to see and hear the TR-30... you'll make a wonderful discovery!

AUTHORItatively Speaking

As a schoolboy in Vienna, Joseph Wechsberg spent most of his pocket money buying tickets for the Staatsoper, where he was a near-permanent occupant of a seat in the Fourth Gallery. Since that time Mr. Wechsberg's finances have, we suspect, bettered (he's the well-known authority on good living whose byline appears frequently in the New Yorker, Esquire, and other publications); and his view of opera has become considerably more intimate— in fact, he's a welcome visitor behind the scenes. Which happy circumstance results for us in a personally conducted tour of the Mecca of all opera lovers everywhere: see "Inside La Scala," p. 56.

Texas-born Paul Moor has lived in Europe since 1949, for the most part in Germany, where he is now Berlin correspondent for Time-Life International. Consequently he has formed acquaintance with other Americans who live abroad, including those who earn their living through the arts. In "Our Operatic Experiences in Germany" (p. 50), he writes of their experiences in European opera houses. But don't expect a Tom Wolfe tale of "you can't go home again": Mr. Moor himself was back in the Lone-Star State not long ago— among other things, to attend the golden wedding anniversary of his parents.

"Bliss thee! thou art translated..." And what happens to opera libretti in the hands of well-meaning translators (see p. 53) is no less strange than poor Bottom's metamorphosis. Charles Cadworth, Curator of the Pendleton Library in the University School of Music (Cambridge), obviously takes great delight in the grotesqueries committed. We think you will too.

This month High Fidelity also takes great pleasure in presenting two of its own, in the persons of Nathan Broder and Charles Fowler. Mr. Broder—associate editor of the Musical Quarterly, university lecturer, author, but probably best known to readers of this magazine as a member of its Editorial Board and regular monthly record reviewer—gives us a critical discography of Mozart operas (p. 56). Mr. Fowler—high fidelitarian from way back, co-founder and former publisher of this journal, now part of its Publication Policy committee—shares with us his expert knowledge on the selection and use of microphones (p. 60).
the only tape formulation that captures the full dynamic range of music at no extra cost!

exclusive with
SOUNDCRAFT TAPES

In the year since their introduction, Soundcraft Tapes with FA-4 frequency adjusted formulation have won unprecedented acclaim from professional and home recordists. The ability of these tapes to capture more of the full dynamic range of sound...to reproduce subtler "highs" with full clarity, was instantly hailed as a major improvement in tape recording—and a particular boon in 4-track and slower speed applications. Whether your equipment is new or old—you will never enjoy its full capabilities until you hear your first reel of Soundcraft Tape with FA-4!

November 1960
"Over and above the details of design and perform-
ance, we felt that the Citation group bore eloquent
witness to the one vital aspect of audio that for so
many of us has elevated high fidelity from a casual
hobby to a lifelong interest: the earnest attempt to
reach an ideal—not for the sake of technical show-
manship—but for the sake of music and our demand-
ing love of it."

A truly remarkable commentary about a truly remarkable
group of products—the Citation Kits by Harman-Kardon.
Mr. Reid's eloquent tribute to Citation is one of many
extraordinary reviews of these magnificent instruments. We
are proud to present a brief collection of excerpts from Cita-
tion reviews written by outstanding audio critics.

"When we first heard the Citations our immediate reaction
was that one listened through the amplifier system clear back
to the original performance, and that the finer nuances of
tone shading stood out clearly and distinctly for the first time
... bass is clear and firm, and for the first time we noted that
the low frequency end appeared to be present even at low
volumes without the need for the usual bass boost ... The kit
is a joy to construct." C. G. McProud, Editor, Audio Magazine

"The unit which we checked after having built the kit, is
the best of all power amplifiers that we have tested over the
past years ... none have had distortion that was quite as low
as we found in this new Citation II ... the amplifier should
provide the very finest in hi-fi stereo reproduction ..."
William Stocklin, Editor, Electronics World

PRESENTING THE 1961 CITATION LINE FEATURING

The CITATION I
Stereophonic Preamplifier

Control Center

Here is the first brilliant expression of the advanced design concepts which sparked the new Citation Kit line—the incomparable Citation I, Stereophonic Preamplifier Control Center. The Citation I consists essentially of a group of circuit blocks termed "active" and "passive" networks. The "active" networks are treated as one or two stage amplification units, flat over an extremely wide frequency range and each is surrounded with a feedback loop. This results in levels of distortion so low as to prove unmeasurable. The "passive" networks provide precise equalization with no phase shift.

The use of professional step type tone controls overcome the limitations of continuously variable potentiometers. Each position on a step control is engineered to perform a specific function—which is absolutely repeatable when necessary. The many professional features and philosophy of design expressed in Citation I permit the development of a preamplifier that provides absolute control over any program material without imparting any colora-
tion of its own. Citation I—$159.95. Factory Wired
—$249.95. Walnut Enclosure, Model WC1, $29.95.

The CITATION II
120 Watt Stereophonic Power Amplifier

This remarkable instrument has a peak power output of 260 watts and will reproduce frequencies as low as 2 cycles virtually without phase shift, and frequencies as high as 100,000 cycles without any evidence of instability or ringing. At normal listening levels the only measurable distortion comes from the laboratory test equipment. Video output pentodes are used in all low level stages for exceptional wide frequency response and low distortion. Multiple feedback loops for increased degree of usable feedback (30 db overall) result in lower distortion without sacrificing sta-
bility. The power supply consists of four silicon diode rectifiers, choke, heavy duty electrolytics and potted power transformer for precise regula-
tion and long life. The use of rigid component boards, heavy duty components, special Cable Harness assure the kit builder that the unit he constructs will be the exact duplicate of the factory built instrument. Because of its absolute reliability and exceptional specifications the Cita-
tion II has gained widespread acceptance among professionals as a laboratory standard. The Citation II—$159.95. Factory Wired—$229.95. Metal Enclo-
 sure, Model AC1—$7.95.

CIRCLE 73 ON READER-SERVICE CARD

The CITATION III
Professional FM Tuner

Citation III is the world's most sensitive tuner. But more important—"it offers sound quality never before achieved in an FM tuner. Now, for the first time Harman-Kardon has made it possible for the kit builder to construct a completely professional tuner without reliance upon external equipment. To meet the special requirements of Citation III, a new FM cartridge was developed which embodies most of the critical tuner elements in one compact unit. The cartridge is completely assembled at the factory, totally shielded and perfectly aligned— eliminating the difficult problems of IF alignment, oscillator adjustment and lead definition.

The Citation III's front end employs the revolu-
tionary Ruvinter tube which furnishes the lowest
noise figure and highest sensitivity permitted by the state of the art. A two-stage audio circuit pat-
terned after the Citation II is employed. By utilizing a high degree of feedback and providing a fre-
quency response of 18 decibels above and below the range of normal hearing, the Citation sound quality is maintained and phase shift is eliminated. The Citation III is styled in charcoal brown and gold to match all the other Citation instruments.

Citation III—$149.95. Factory Wired—$229.95.
Walnut Enclosure, Model WC1—$29.95.
"OF MUSIC AND OUR DEMANDING LOVE OF IT."

"Its listening quality is superb, and not easily described in terms of laboratory measurements. Listening is the ultimate test and a required one for full appreciation of Citation...there is a solidity, combined with a total ease and lack of irritation which sets this amplifier apart. The more one listens to the Citation II, the more pleasing its sound becomes. Anyone who will settle for nothing less than the finest will be well advised to look into the Citation II."

Hirsch-Houck Labs, High Fidelity Magazine

"At this writing, the most impressive of amplifier kits is without doubt the new Citation line of Harman-Kardon...their design, circuitry, acoustic results and even the manner of their packaging set a new high in amplifier construction and performance, kit or no."

Norman Eisenberg, Saturday Review

"Specifications published by the manufacturer are so astonishing that our sister publication, Electronics World, has subjected them to critical examination and found performance wholly consistent with claims...Nothing can faze it...we have heard this particular amplifier loaded with four big speaker systems glide over the steepest orchestral hurdles without the slightest trace of strain...The realism of the virtually distortion-free music was nothing less than startling. Our initial amazement soon gave way to an easy, relaxed enjoyment that was sustained for hours without a trace of that tension known as "listening fatigue." Here was a sound system that fulfilled the most difficult of all high fidelity requirements: to provide an awareness only of music, and oblivion of technicalities."

Herbert Reid—Hi Fi Stereo Review

THE NEW CITATION III PROFESSIONAL FM TUNER

The CITATION IV
Stereophonic Preamplifier
Control Center

The new Citation IV is a compact stereophonic preamplifier designed in the best Citation tradition. It offers performance and features rivaled only by Citation I. Square wave fracings at 20 and 20,000 cycles reveal no difference between the response of the Citation IV and the signal generator.

The Citation IV provides separate bass and treble tone controls for each channel which may be switched out of the circuit completely to eliminate phase shift and transient distortion inherent in all tone controls. D.C. on all heaters and the use of low noise resistors in critical places reduce thermal agitation and hum. A zero to infinity balance control allows complete cut-off for either speaker. Military type terminal boards make for rigid, professional appearance and facilitate construction. The control over program material provided by the new Citation IV enables the user to perfectly recreate every characteristic of the original performance. The Citation IV is handsomely styled in charcoal brown and brushed gold. The Citation IV—$119.95. Factory Wired—$189.95. Walnut Enclosure, WC1—$29.95.

The CITATION V
80 Watt Stereophonic Power Amplifier

The Citation V is a compact version of the powerful Citation II. Designed with the same lavish hand, it is conservatively rated at 40 watts RMS per channel with 95 watt peaks at less than 0.5% distortion.

The availability of rated power at the extreme ends of the frequency range enables the amplifier to effortlessly drive any of today's most inefficient speakers. It clips clean without breakup. The output stage consists of two 7581's per channel operating conservatively in a fixed bias, ultra-balance circuit. A bias meter is provided to statically and dynamically adjust each pair of output tubes. The power supply consists of four silicon diodes (hermetically sealed) and heavy duty electrolytics for excellent B+ regulation and long life. This results in instantaneous recovery time and superb transient response.

Here is an all new power amplifier which truly reflects the Citation approach to audio design: no compromise in quality regardless of cost. The Citation V is styled in charcoal brown and brushed gold. The Citation V—$119.95. Factory Wired—$179.95. Metal Enclosure, ACV—$79.95.

For complete information on the new Citation Kits, including reprints of independent laboratory test reports, write to: Dept. H11, Citation Kit Division, Harman Kardon Inc., Plainview, New York. All prices slightly higher in the West.

You can entrust your treasured records to the Glaser-Steers GS-77, secure that they will be treated with all the care you would want them to receive. Handling your records manually, you may not even do as well, for the automatic GS-77 has no human frailties — is not inclined to fumble, and can't leave fingerprints.

The GS-77 is seemingly endowed with an uncanny intelligence. It seems to know better than to let one record drop on another that's moving. It seems to sense that the momentary grinding between the two record surfaces will damage the delicate grooves, and irreparably deteriorate the quality of reproduction.

And so, the GS-77 behaves in this manner: when one record has been played, the turntable immediately stops turning; the next record drops gently onto the stationary disc; and the turntable does not resume its motion until the stylus is in the lead-in groove, ready for play. And, it does this all in only 9 seconds. "Turntable Pause" protects and preserves the quality in your stereo and mono records. Everything else about the GS-77 works to preserve that quality so that it can be faithfully reproduced through your high fidelity music system. Priced at $59.50, the GS-77 is the world’s only record changer with "Turntable Pause". Its modestly priced companion, endowed with many of the quality features found in the GS-77 is priced at $47.50. See them and hear them at your high fidelity dealer today, or write: GLASER-STEERS CORPORATION 155 Oraton St., Newark 4, New Jersey A subsidiary of American Machine & Metals, Inc. In Canada: Alex L. Palermo’s Foresighted Massimo

Opera in Sicily has a contemporary spirit.

Last year, when Maria Callas’ marital legal troubles caused her to cancel some performances with the Dallas Civic Opera, a young Italian singer named Eugenia Ratti was flown to Texas to make her United States debut as Rosina. It was a great success, and this season Miss Ratti will reappear in the same city in another opera that has brought her luck in Italy: Donizetti’s La Figlia del reggimento, a work that hasn’t been heard in America since the days when Lily Pons sang it at the Met. The production of La Figlia is being imported, courtesy of Neiman-Marcus, from Palermo’s Teatro Massimo. This is not the first time that Palermo has collaborated with Dallas, and despite architectural and national differences, the two organizations have much in common.

I was, in fact, at the Palermo opening of La Figlia two years ago, and I remember the scene in Miss Ratti’s dressing room after the final curtain. She was holding a bouquet of roses in one hand and gesturing dramatically with the other.

“Where else,” she asked emphatically, “where else would they give us an unknown a chance like this?” In her eyes there were tears of excitement and gratitude.

The young singer had just finished singing the taxing, gratifying role of Maria for the first time in her career. It was also the first time the opera had ever been given in this theatre. Perhaps because the Teatro Massimo is young itself (opened in 1897, the most recently inaugurated of Italy’s major opera houses), it has shown in the last few seasons a courageous partiality not only towards young singers, but towards young conductors, directors, and designers—as well as a taste for out-of-the-ordinary programming.

The physical appearance of the Teatro Massimo, at first glance, seems improbable. There you are, in the capital of Sicily, an island of long history and rich tradition. Palm trees grow along the streets, where crumbling baroque palaces house pensioni on the former piano nobile and pharmacies on the ground floor. Splendid Norman monuments survive, with exotic traces of Saracen influence. The last thing you expect to see is a bit of Louis Napoleon’s Paris; yet that is what the Massimo at first suggests. Art nouveau lamp posts decorate the entrance and Baroque-like lions flank the broad staircase leading up to the imposing foyer, where you get your first glimpse of the neo-Pompeian (or is it neo-Aidaian?) interior, with its huge proscenium in heavy, dull gold and its flat ceiling with panels of nymphaeums or muses in faded pastels.

The history of the building and its construction might have been written by a nineteenth-century librettist; it is that complicated and full of intrigue. The project apparently originated with King Francesco II in 1856, but it was dropped a few months later when Garibaldi and his “thousand” landed at Marsala. Four years later, when the city was proudly a part of the new realm of Italy, a public competition was organized for plans for a house worthy of the capital’s new status. At this point the story of the Massimo assumes a certain opera buffa quality.

Who was to judge the entries? First somebody suggested Charles Garnier, whose Opéra in Paris, still under construction, was considered the very last word in modern opera houses. But the French were highly unpopular in Italy just then, so the Palermotani sent Garnier to the devil and decided to pick themselves a German jury. They announced the names in 1867: Gottfried Semper (the designer, with Wagner, of the Bayreuth Festspielhaus), Eduard van der Null (one of the architects of the Vienna Opera), and Karl Friedrich Schinkel (a theatre architect from Berlin). After the jury had been invited to meet, the Palermo committee found out to its immense surprise that both Van der Null and Schinkel had died (the latter more than a quarter-century earlier). Semper, however, was alive; and with the help of some Italian architects, he presided over the selection of a local man.

FISHER FM-200

0.5 Microvolt Sensitivity! Sensational MicroTune!
SIX IF Stages! Golden Cascode Front-End! FIVE Limiters!

The FISHER FM-200 represents a major revolution in tuner design! For the first time ever high fidelity enthusiasts can now have a tuner with 0.5 Microvolt sensitivity for 20 db of quieting with 72 ohm antenna! For the first time ever a tuner with a capture ratio of only 1.5 db, the finest ever achieved, eliminating all unwanted background noise! For the first time ever a tuner with a Golden Cascode Front-End, SIX IF Stages and FIVE limiters, resulting in selectivity and sensitivity of a quality never before achieved and giving complete freedom from interference and noise! For the first time ever, a tuner with FISHER MicroTune, the invention that makes absolutely accurate FM tuning child's play! Now even the most unskilled user can select and tune FM stations for maximum signal and minimum distortion! $229.50

Quality FM Tuner At Moderate Cost
THE FISHER FM-50

- Distortion-Free Wide-Band circuitry assures high fidelity reception of strong and weak signals, maximum stability and selectivity! - Four IF Stages! - MicroRay tuning indicator for precise FM tuning and Tape Recorder level indicator! - Local-Distant switch! $129.50

Professional Standard FM Tuner
THE FISHER FM-100

- Golden Cascode Front-End and Four Wide-Band IF stages for uniform frequency response (20 to 20,000 cps) and less than 0.5% harmonic distortion! - Remarkable sensitivity insures optimum reception of even distant stations! - Automatic interstation noise suppression! $169.50

PALERMO

Continued from page 10

G. B. Filippo Basile, whose sumptuously bearded bust now adorns the foyer of the theatre.

As soon as the design was chosen, there began a kind of Thirty Years' War among Basile, the city, the press, and the workmen. Everything cost more than had been estimated: work was suspended several times, and once came to a stop for six whole years (1882-88). Basile died in 1891, with his mammoth creation still unfinished, though he had meanwhile successfully built theatres in other Sicilian cities. His son carried on the job, and at last, in 1897, the Massimo opened with a gala performance of Verdi's Falstaff, then four years old.

The theatre is one of the biggest in Europe. Its stage is the largest in Italy (in Europe, only Paris and Vienna surpass it); the house holds 2,228 people in its ample orchestra and five tiers of boxes crowned with a magnificently decorated royal box. Operagoers can also offer silent thanks to Professor Basile for the roomy bar.

Being of such recent date, the Massimo is a little hard up for tradition, but Palermo does have its distinctions. Several composers are associated with the city, notably Wagner, who composed a part of Parsifal on a harmonium in his room at the Albergo delle Palme. To Sicilians, however, the most important composer of all is Vincenzo Bellini, born in their second city, Catania; and in the years since the war, the Massimo has taken the lead in the revival of this composer's lesser-known operas. After a fine revival of his I Capuletti ed i Montecchi a few years ago, the 1958 season was inaugurated with a splendid production of Il Pirata, beating La Scala's production to the draw by several months. The 1959 season opened with Bellini's even more rarely performed Beatrice di Tenda, the composer's next-to-last opera, which was not only a fiasco at its first production but had never had a success in its few revivals since. The Massimo's edition, however, was a triumph, hailed by the public and by visiting critics alike.

The last three seasons—under the supervision of Baron Lepoldo de Simone and the artistic direction of Maestro Corrado Tramonti—have been particularly adventurous and successful. In addition to Il Pirata, the 1958 repertory featured the first Sicilian performance of Ravel's L'Enfant et les sortilèges, with an all-French cast. During the same season, an Italian cast sang in Latin for Stravinsky's Oedipus Rex, an opera occasionally performed in Italy on the concert stage but seldom in the opera house. From the stark modernity of Stravinsky, the Massimo turned to Gian-Carlo Menotti at his frostiest, with The Old Maid and the Thief, also being given in Sicily for the first time.

For those a little weary of endless repetitions of standard repertory, the 1959 season...
The Result Is Perfection

MOST POWERFUL RECEIVER IN THE WORLD!

MOST EFFICIENT IN THE WORLD!

FEATURING THREE SIX-POUND MAGNET STRUCTURES!

WHEN THE COMPONENTS ARE BY

FISHER

THE 800

- Twice as sensitive as any competitive stereo receiver—and easily the most powerful, with a conservative rating of 60 watts distortion-free music power! The 800 incorporates the famous Golden Cascade front-end for outstanding FM sensitivity! The AM signal is of FM calibre! Unlimited flexibility for every application, including Center Channel, Tape Monitoring and Multiplex Stereo! $429.50

THE XP-3

- New FREE-PISTON Three-Way Speaker System. Exclusive six-pound FISHER encapsulated magnet structure and two-inch voice coil used on all three speakers makes the XP-3 the world's most efficient compact system! Achieves unexcelled bass and transient response and performs with total absence of parasitic coloration. Frequency Response: 30 cps to beyond audibility.

Unstained Birch $219.50
Mahogany, Walnut and Cherry $224.50

PALERMO
Continued from page 12

was equally appealing. After Beatrice di Tenda, an evening of one-act operas offered Hindemith’s Hin und Zurück, Stravinsky’s Mavra, and Falla’s El Retablo de Maese Pedro, all Sicilian premieres. Another important event was a production of Rimsky-Korsakov’s Ivan the Terrible, for which Herbert Graf was summoned from the Met and Nicola Benois, the designer, from La Scala. The 1960 season was distinguished especially by the Palermo debut of soprano Joan Sutherland (who will not be heard at La Scala until this winter) in the Lucia which brought her such a resounding success at Covent Garden.

Not only does the Massimo offer the Palermitani a varied operatic fare (and it is significant that the “parure,” lower-priced nights are always better attended than the chic openings), but it has also engaged Italy’s most imaginative choreographer, the Hungarian-born Aurel Milloss, to prepare the corps de ballet and present a ballet evening every season. Innovations have resulted. In 1959, for instance, the daring Milloss presented a ballet called The Sonata of Anguish, to Bela Bartok’s Sonata for Two Pianos and Percussion. The Palermo audience was partly stunned and partly delighted. In any case, this ballet—and the Stravinsky Capriccio which followed—started arguments.

Good theatre thrives on such controversy—and also on fresh talent. The grateful exclamation of Miss Ratti, after her Figlia del reggimento, is thoroughly justified. Unlike most opera houses, the Massimo is extraordinarily hospitable to unknown artists, including foreigners. Four or five seasons back, it hired Thomas Schippers to conduct Tales of Hoffman, before this young American had become a regular conductor at the Met. The star of the Offenbach was the then equally unknown American soprano Franca Duval, who later created the title role of Menotti’s Maria Golovin at the Brussels Fair and repeated it on Broadway and at the New York City Center. The Beatrice di Tenda of 1959 was remarkable also for its cast. An opera that requires two excellent sopranos, in Palermo it was ideally sung by the Spanish artist Consuelo Rubio (familiar to City Center audiences, but unknown in Italy) and the Italian soprano Iva Ligabue, just beginning what is clearly going to be a brilliant career, in which her more recent performances at Glyndebourne are another important step. The same welcome extended to performers has also brought to the Massimo the best of the young designers and directors of the new generation currently enlivening Italian opera.

For the artists themselves, the important thing about Palermo is that it’s exciting to work there. “Things may be better organ-

...a convenient method of acquiring, systematically and with expert guidance, a stereo record library of the music you enjoy most—at tremendous savings!

If you now own a stereo phonograph, or plan to purchase one in the near future—here is a unique opportunity to obtain SIX brand-new 12" long-playing stereo records for only $4.98!

And what a tremendous selection you have to choose from—49 records in all! Whether you prefer classical or popular music, Broadway hit shows or jazz—you're sure to find six stereo records to suit your musical taste.

TO RECEIVE YOUR 6 STEREO RECORDS FOR ONLY $4.98—simply fill in, detach and mail the handy postage-free card provided. Be sure to indicate which one of the Club's two musical Divisions you wish to join: Stereo Classical or Stereo Popular.

HOW THE CLUB OPERATES: Each month the Club's staff of music experts selects outstanding recordings for your library. These selections are fully described in the Club's music magazine, which you receive free each month.

You may accept the monthly selection for your Division...take any other records offered (classical or popular)...or take NO record in any particular month.

Your only obligation as a member is to purchase five selections from the more than 200 Columbia and Epic records to be offered in the coming 12 months. Thereafter, you have no further obligation to buy any additional records...and you may discontinue your membership at any time.

FREE BONUS RECORDS GIVEN REGULARLY. If you wish to continue as a member after purchasing five records, you will receive a Columbia or Epic stereo Bonus record of your choice free for every two selections you buy—a 50% dividend.

These records you want are mailed and billed to you at the regular list price, generally $4.98 (Classical $5.98), plus a small mailing and handling charge.

THIS SPECIAL 5th ANNIVERSARY OFFER may never be repeated. Mail the postage-free card today to receive SIX stereo records for only $4.98!

NOTE: Stereo records must be played only on a stereo phonograph.

COLUMBIA RECORD CLUB now makes this extraordinary offer to new members

REVIEWS LIKE THESE...
...hint at the performance of new

New Amplifiers...

ASR 680 — an extremely clean, beautifully designed stereo amplifier. Continued power: 36 watts (18 watts per channel) • Music power: (IHFM standard): 44 watts (22 watts per channel) • Total harmonic distortion: 0.4% at 18 watts per channel • Intermodulation distortion: 0.1% at rated output (4:1 ratio, 60 and 7,000 cps) • Frequency response: ± 0.5 db, 20-20,000 cps • Separate channel clutch-type bass and treble controls • Scratch filter (18 db/oct); Rumble filter "Twin T" filter, null at 20 cps • Loudness contour switch; Balance control; Channel reverse switch; Program selector; Master gain control • DC on pre-amp heaters for low noise; A plus B center speaker terminals.

Suggested Audiophile net: $159.95

ASR 220C — an unusually versatile medium power stereo amplifier • Music power: 24 watts (12 watts per channel) • Music power: (IHFM standard): 28 watts (14 watts per channel) • Total harmonic distortion: 0.7% at 12 watts per channel • Intermodulation distortion: 2% at rated output (4:1 ratio, 60 and 7,000 cps) • Frequency response: ± 0.5 db, 20-20,000 cps • Separate channel clutch-type bass and treble controls • Scratch filter (18 db/oct); Rumble filter "Twin T" filter, null at 20 cps • Magnetic phono pre-amp with new, low noise tubes • A plus B center-speaker terminals.

Suggested Audiophile net: $119.95

New Speaker Systems

Three new, wide range speaker systems. A new elliptical tweeter with a heavily silver-plated voice coil prevents harshness caused by cone breakup in conventional circular speakers. Woofers of extra-heavy cone stock are capable of long, linear excursions for outstanding low frequency power handling without distortion. Tweeter level switches included on all models. Enclosures are carefully matched to the woofer.

Suggested Audiophile net: $159.95

The PR-500 Turntable...
"...a single speed (33 1/3-rpm) turntable with an integrally mounted arm...employs a somewhat unconventional drive system which results in a totally inaudible rumble level, and low wow and flutter. The arm is simple yet effective, with a mounting system which makes the unit relatively insensitive to shock and vibration."

"The arm tracks well at the lowest stylus forces recommended by the cartridge manufacturer."

"The hum field surrounding the PR-500 is very low, and no difficulty should be experienced from this source even with poorly shielded cartridges."

"...the Stromberg-Carlson PR-500 performs in a manner comparable to that of the most expensive turntables and arms, yet sells for much less."

"The PR-500 is an excellent value at $69.95."

Hirsh-Houck Laboratory — High Fidelity Magazine, May '69.

For the sheer joy of listening..."There is nothing finer than a Stromberg-Carlson"

CIRCLE 122 ON READER-SERVICE CARD

High Fidelity Magazine
The FM-443 Tuner...

"The Stromberg-Carlson FM-443, one of the least expensive FM tuners on the market, approaches the performance of more expensive equipment. It is therefore an especially good value for anyone who wants to obtain the highest level of performance in a moderate-priced system."

"The distortion at 100% modulation is about 1% for signals stronger than 10 microvolts."

"The sensitivity measurement of the FM-443, according to IHFM standards, is amazing. Its usable sensitivity is 3 microvolts, a figure not usually found in tuners in this price range. This high sensitivity has not been obtained at the expense of IF bandwidth."

"The tuner sells for $79.96."

Hirsch-Hoebck Laboratory—High Fidelity Magazine, June '60

The ASR-880 Amplifier...

"... a compact integrated stereo amplifier rated at 32 watts per channel. Noteworthy... it exceeds its rated power substantially over most of the audio range, has excellent power-handling capabilities at both ends of the spectrum."

"Each channel delivered 50 watts at 2% harmonic distortion, or 48 watts at 1% distortion. This is unusual in an amplifier rated at 32 watts..."

"The distortion of the ASR-880 is very low at usual listening levels when correctly operated. It has a rare combination of very high gain and very low hum. The amplifier has a number of special features, such as center channel output and a very effective channel-balancing system, as well as the usual stereo control functions found in all good amplifiers."

"Only 0.6 or 0.7 millivolts at the phono inputs will drive the amplifier to 10 watts output per channel. At normal gain settings... the hum level is better than 70 db below 10 watts even on phonograph input. This is completely inaudible."

"With a listening quality matching its laboratory response, the Stromberg-Carlson ASR-880 must be considered a very good value at its $199.95 price."

Hirsch-Hoebck Laboratory—High Fidelity Magazine, Sept. '60

Stromberg-Carlson components like these:

**New Tuners**

FM-443A—an improved version of the highly rated FM-443. New, high-accuracy, precision dial. Precision components in de-emphasis network, giving improved frequency response: 20-25,000 cps ± 1 db. Sensitivity: 3.5 microvolts for 20 db quieting. Improved local-distance control in IF stage for lowest distortion and best signal-to-noise ratio on both local and distant stations. Total harmonic distortion; less than 1% full deviation. Suggested Audiophile net: $79.95

SR-445A—a combination of the FM-443A and an entirely new, wide-band AM section. FM specifications: identical to FM-443A. AM frequency response: Broad: 25 to 5,000 ± 1 db. Sharp: 25 to 2,500 cps ± 1 db. AM noise level: 60 db below 1 volt output. AM harmonic distortion: less than 1% at 100% modulation. Separate tuning indicators for AM and FM. Suggested Audiophile net: $139.95

All the new Stromberg-Carlson components have so many impressive features, you'll find a visit to your Stromberg-Carlson dealer most rewarding. He will be glad to demonstrate either an individual component or a complete Stromberg-Carlson Component Ensemble. See him or write: Stromberg-Carlson, 1419—011 North Goodman Street, Rochester 5, New York.

"REK-O-KUT"—the safest word you can say to your dealer

For sixteen years, Rek-O-Kut has been synonymous with quality and integrity in the design of turntables. As other brands have risen, fallen and even completely disappeared, Rek-O-Kut has won consistent acclaim as the overwhelming choice in its field. In performance ratings and engineering contributions to the art of turntable design, Rek-O-Kut has compiled a record unchallenged by any other turntable producer. Now, this tradition is again emphasized by the introduction of the magnificent new N-34H StereoTable...a professional quality two-speed (33⅓ and 45 rpm) turntable. Quiet power is furnished by a Rek-O-Kut hysteresis synchronous motor and an efficient new belt-drive system. Speeds can be changed even while the table is rotating, merely by pressing a lever.

The N-34H is a symphony of crisp, clean lines accentuated by the unusual deck design. Mated with the new tapered base, the N-34H becomes one of the proudest and most beautiful components ever to grace a home music system. Insist on seeing it at your dealer's.

A NEW DIMENSION IN TURNTABLES—12¼" x 19"

DESIGNED TO FIT NARROW CABINETS AND BOOKSHELVES!

SPECIFICATIONS: Noise Level: —53db below average recording level; Wow and Flutter: 0.15%; Drive: Nylon, neoprene-impregnated endless belt, 2-Speeds, 33⅓ and 45 rpm. Simple lever-action changes speeds.

YOUR NEEDLE IS DESTROYING YOUR LP'S

(if it isn't a Fidelitone Pyramid Diamond)

Ordinary ball point needles contact record micro-grooves at only two microscopic points. This causes a tremendous concentrated pressure that accelerates record wear, and reduces the life of quality reproduction.

Fidelitone's new Pyramid Diamond, shaped like the original recording stylus, allows more surface contact between needle and record. This distributes the tone arm weight over a larger surface area, and lowers unit area pressure. Your LP records will last many times longer.

HERE'S WHY...

Recording Stylus               Ordinary Needle               Pyramid Diamond

Fidelitone's new Pyramid Diamond is shaped similar to the styli that recorded the original sound. It perfectly follows every contour created by the recording stylus.

In an unmodulated, or low frequency groove, the recording stylus (A) cuts a groove (W-1) wide enough to let an ordinary ball point needle (C) and the Fidelitone Pyramid Diamond (B) track the centerline of the groove accurately, and contact all recorded sound impressions.

As the groove is modulated by high tones, the groove width (W-2) narrows. This causes the ordinary ball needle (C-1) to rise and "pinch out" the record groove. It bridges modulation crests, mottacks centerline and produces muffled sound impressions. The Pyramid Diamond (B-1), because of its new shape, stays smooth on the record groove, smoothly glides along the centerline positively driven by the groove walls.

B.. A.. W-1

BALL POINT DIAMOND               PYRAMID DIAMOND

And the new shape of the Pyramid Diamond allows more surface contact between needle and record, substantially reducing contact pressure. This greatly increases needle and record life.

See your record dealer or hi-fi specialist today. Demand the Fidelitone Pyramid Point. You owe it to your records and your listening pleasure.

For the complete story on the revolutionary new Pyramid Diamond, or the name of your nearest dealer, write Fidelitone, Chicago 26, Illinois.

LONDON—The long pause on Wagner in Decca-London quarters had begun to look cataleptic. At last it is broken. Early this fall, John Culshaw (head of classical a & r) and his recording team left for the Vienna Sofiensaal, scene of their Rheingold triumph, to record Tristan und Isolde, a project that occupied fifteen sessions spread over three weeks. Cast: Birgit Nilsson as Isolde, Regina Resnik as Brangäne, Solti conducting the Vienna Philharmonic.

And the Tristan? For months—years, in deed—London officials have been courting Europe for a likely Heldentenor. In Munich, Culshaw heard Fritz Uhl. Uhl is about thirty years old and has been singing at the Munich Opera for three or four years. Culshaw flew him to London. For two days he and his technicians listened to Uhl's singing of Tristan and Siegmund excerpts with piano accompaniment in the Broadhurst Gardens studio, sometimes with microphone, sometimes independently of it. The playback seems to have pleased everybody. If Uhl acquires himself in Tristan as expected, we may expect to hear him some day in Decca-London's resumed Ring enterprise. Culshaw says he's prepared to spend five years recruiting a satisfactory cast before moving on from Rheingold to a definitive Walküre.

For Act III of Tristan, by the way, Weland Wagner has lent Bayreuth's unique "wooden trumpet," an instrument of the alpenhorn type, which, as specified in a Wagner footnote, is to be played in preference to the routine cor anglais for the joyous tune that signals the sighting of Isolde's ship.

Tenor Corelli. Walter Legge of EMI came back recently from Milan, having supervised a Pagiariotto with Lucina Amara, Tito Gobbi, a new baritone called Canissi (of whom he speaks warmly)—and tenor Franco Corelli, of whom more in a moment. The recording is not expected in the shops until next year. While halting in London, Legge blueprinted various home recordings, including Bartók's Music for Strings and Percussion which is listed for Von Karajan and the Philharmonia Orchestra; and a Traviata, which will be sung at King's Hall, probably this fall, by Maria Callas and Giuseppe Taddel, under Giulini (to be issued on Angel in the States).

Having perfected his blueprints, Legge packed again for Milan to watch over Maria Callas' new Norma (stereo) under Serafin's direction. Others in the Norma cast are Christa Ludwig, Nicola Zaccaria—and Franco Corelli.

It looks as if Corelli is going to be a recurring name on EMI labels. Victor Olof, the H.M.V. a & r manager, had an avuncular talk with Corelli in Biffi's restaurant, on the Scala doorstep, last year. The outcome was a long-term, exclusive contract—"with one or two options, however." Everybody at EMI uses exactly the same phrases about Corelli. He is described as the best young tenor in the world; charming and modest; rather nervous in temperament, preferring to listen to playback albums; a great critic of himself.

Due to open the Milan season with Callas in December and to appear also at the Metropolitan, Corelli is doing better at twenty-eight than I had calculated when he was twenty-five. I have been looking up my notes of his Covent Garden debut, as Cavadarrossi, in 1957: "Franzically handsome. Aware of it. Before 'Recodita armoria' he tossed his hat buoyantly to the sacristan. When grilling by Scarpa, leagued indifference, flicking imaginary specks from his lapels and cuffs. At the news of Marengo, fell on his knees and laughed helplessly. Clung desperately to his F sharp and A sharp in 'Vittoria,' and had tenuto fancies in the gallery clapping wildly before releasing them."

Beecham and Love in Bath. Reports from Sir Thomas Beecham's convalescent quarters agree that much of the old ebullience is back. He lives surrounded by scores and tape players, his head full of recording projects for the Royal Philharmonic Orchestra.

His next disc, Love in Bath (Angel), a suite of numbers selected from Handel operas and restored by Sir Thomas himself, is due out in January or February. The history of the suite and of the recording alike is checked. In its first form it was known as The Great Elopement. Beecham assembled and scored it during his wartime years in America. His original intention was that, like its predecessor The Gods Go a-Begging, it should accompany ballet action. He himself wrote the story and scenario, which tells how, in eighteenth-century Bath, Elizabeth Lindley, singer and beauty, afflicted to a life long bachelorhood, eloped with her papa's conversation—with young Richard Brinsley Sheridan, future author of A School for Scandal. The score was first heard in America over the air, and a few days later was performed at a Rochester Philharmonic concert in April 1945. Apart from certain additions, the present version of the suite is substantially the same as that of fifteen years ago. Why Beecham changed its title to Love in Bath is not clear.

**NOTES FROM ABROAD**
Continued from page 24

Recorded originally in 1958, the tapes were duly passed. Not so the pressings. When these were played to Beecham at Cap Ferrat, he found certain movements lacking in charm or dramatic point. "It won't do," he pronounced. Re-recording was put in hand. Further delays were entailed by unforeseen debates and negotiations over copyright. When it reaches your record shops, *Lose in Bath* will have been two years en route.

Russian Visitors. After appearing here (their first visit to Britain) at the Edinburgh Festival and at three London concerts, the Leninograd Symphony Orchestra was caught on the wing by Deutsche Grammophon. While in London they shuttled by bus between their Kensington hotel and Wembley Town Hall for nine sessions under Eugene Mravinisky and Gennadi Rozhdestvensky. The project included stereo recordings of Tchaikovsky's Symphony No. 4, Rococo Variations, and Romeo and Juliet Fantasy-Overture; Khachaturian's Gayne Suite; and the Schumann Cello Concerto, with Mstislav Rostropovich playing solo.

Postscript. The Columbia-Angel *Norma* (see above) is now taped and being edited. Piano rehearsals began on September 1 and the last recording session was held twelve days later.

Further note about Christa Ludwig: Adalgisa was to have been sung by the Italian contralto Lazzarini, who, however, fell ill and canceled out. Walter Legge sent one of La Scala's experienced coaches to Salzburg, where Miss Ludwig was scheduled for six festival performances. He worked with her for ten days. When she reached Milan her singing of Adalgisa is said to have made the local *maestri* exclaim admiringly. A *Cavalleria rusticana* recording had been listed to follow immediately but has been deferred, since one of the leading singers was not *au point* with his role.

There seems nothing at all in rumors of Scala cancellations by Maria Callas. Present arrangements are that she and Corelli open the season on December 7 with a Donizetti rarity, *Polibo*. With the *Norma* recording safely out of the way, Miss Callas had a cordial meeting with Signor Giringhelli, the Scala *sovrintendente*, and received from him the bristling difficult *Polibo* vocal score which most of the world (Miss Callas included) had never laid eyes or hands on before. She said: "I must rest. Tomorrow I go to sail a boat on the Mediterranean. After that I take the mud bath cure on Ischia. But I shall have *Polibo* with me all the time."

there are mixers ... then, there are the fabulous

new CustoMixers
designed and built by OLIVER BERLINER, internationally known sound systems authority

At last professional MONOPHONIC and STEREOPHONIC mixer amplifiers for Motion Picture and Public Address Systems, Broadcasters and Recordists ... the CustoMixers incorporate features not found in any other mixers, regardless of size or cost; with quality equal or superior to anything in their price range.

The incredible UltrAudio CustoMixers, custom-built because you select only the facilities needed to meet your personal requirements, are styled to compliment the most discriminating home or studio decor, and are perfect for portable or permanent installation. All CustoMixers incorporate the amazing professional LINE-ATEN® Straight-Line volume controls and Plug-In amplifiers and transformers.

COMPARE THESE EXCLUSIVE CustoMixer FEATURES:
• Every control and indicator is Straight-Line for easier operation of multiple mixers and easier viewing of settings and levels.
• All input transformers and Shock-Mounted preamplifiers plug-in. Buy only those items you need. Virtually failproof ... no need to repair; just replace in seconds and you're back "on-the-air" with a spare.
• Plug-in accessory TONE GENERATOR. (Remove any preamplifier, plug in Oscillator to put sustained tone on the output line for level setting. Remove Oscillator; replug preamplifier.)
• Input impedances 50 to 600 ohms and hi-z, low or high level.
• Output impedances 50 to 600 ohms and hi-z; illuminated standard vu meter on each output line.
• 5¼x19 inch front control panel for standard rack, carrying case or console mounting. Fused silicon rectifier power supply.
• Separate output connection for stereo or monophonic headphones, monitor amplifier and public-address system feed.
• Extremely light weight with easy-on-the-eyes military specification rugged finish, beige with white lettering.
• Unique replaceable designation strips indicate use of each mix position.

Model M-5: Five independent mixing positions plus master gain control. Phono equalizing and cueing switches on front panel for mixers 2 & 3. A 600ohm pad switch enables mixer-1 to accept a high level, low impedance source. Single channel output.

A 2-channel fully stereophonic mixer (shown in optional carrying case) with two mix positions and a master gain control per channel. Special "MIX" switch permits all mix positions to feed both channels simultaneously with sub-master on each channel. Model D-4.

SOUNDTALK

Protect your heads

REALLY EXCELLENT RECORDING depends on two heads... the one you use in selecting equipment, tape and methods and the one on your recorder, which needs tender care. You can use one head to protect the other by making sure you use "SCOTCH" Brand Magnetic Tapes.

ABRASIVE ACTION of some tapes on the head can cause wear resulting in a frequency drop of as much as a full octave. That can't happen if you use "SCOTCH" Brand Tapes with patented Silicone Lubrication, which lasts the life of the tape. "SCOTCH" Brand is the only tape that has it!

MAXIMUM HEAD PROTECTION is assured, but there is nothing gummy to attract dust or clog the head gap. No mechanical polishing is involved in the making of "SCOTCH" Brand Tapes, so there is no need to worry about breakdown of oxide quality. And Silicone Lubrication is impregnated throughout the coating... nothing haphazard or temporary about it.

MUTUAL ADMIRATION of tape and head results. Tape glides over the head without abrasion. The head doesn’t gouge or scratch the tape, which keeps lubricating the head, and so on to longer tape life and better tape recording.

SILICONE LUBRICATION plus the finest uniform high potency oxides have made "SCOTCH" Brand Tapes the standard of the broadcast industry. You cannot buy better tapes.

"SCOTCH" BRAND TAPES are made by the 3M Company, whose pioneering research leads the magnetic tape field. This is the only company able to meet the fantastic standards of Video Tape. Play the favorite...

NOTES FROM ABROAD
Continued from page 26

den, where he was director of the Opera House between 1934 and 1942. Recording activities for Deutsche Grammophon play a prominent part in linking Böhm, who likes to call himself a “disciple of Strauss,” with Dresden, where Salome, Elektra, and Der Rosenkavalier were first performed. When he had completed his DGG recording of the last-named in December 1958, his final words to the members of the orchestra, the Sächsische Staatskapelle, were: “Whilst working with you I felt as if I had left you only a fortnight ago.”

In fact, Böhm had not been in Dresden since he gave up the directorship there in order to take on similar duties in Vienna, not without taking along a number of prominent singers such as Elisabeth Höggen and Martha Robs. Dresden was further depleted of many of its well-known artists when the Opera House was bombed in 1944 and still more so when the establishment of the Iron Curtain led many singers to move from Eastern Germany to the West.

It looks as if Deutsche Grammophon is bent on making Dresden a recording center for Strauss’s operas. Rehearsals for a complete recording of Elektra under Böhm’s baton started during the second week of October. The singers, of course, came from the West, but the genius loci was duly represented by the orchestra. Böhm says: “There are passages in the scores of Richard Strauss which at the first reading cause difficulties to almost every orchestra in the world; yet to the Dresden musicians these very passages come most naturally.” Incidentally, Böhm’s praise seems to be affirmed by recent efforts to give the Staatskapelle standing on this side of the Iron Curtain too; in Salzburg last summer I was given to understand that Dresden’s orchestra would be scheduled for next year’s Festival.

No complete recording of Elektra has been made in Europe since Cetra issued its two discs from the Maggio Musicale Fiorentino with Anny Koenzmann in the leading role and Mitropoulos conducting. That, of course, was at the beginning of the LP era. Assembling a cast for the new stereoaphonic version presented problems, but finally DGG officials in Hamburg were able to relax. Inge Borkh is Elektra (she did a few scenes on the RCA Victor label, it will be remembered); for the role of Chrysothemis, Mari- anne Schech, who sang the Marschallin in DGG’s Der Rosenkavalier, was chosen; Jean Madeira sings Klytemnestra. The part of Orest is taken by Dietrich Fischer-Dieskau.

Fischer-Dieskau Avalanche. I still remember one of the first recitals Fischer-Dieskau gave in Vienna, a number of years ago, to a public that only half filled the Mozartsaal. Word of the young baritone’s talents got round very quickly, and his reputation is now...
“Yes, son... and you can use it as a 24 watt mono or stereo amplifier, or to convert the other amplifier I gave you last Christmas to Stereo!”

It’s the DB212 we’re talking about! A unique STEREO AMPLIFIER CONTROL CENTER by BOGEN-PRESTO, designed to bring good cheer (and greater value) to one and all with its unique 3-way adaptability.

As a conventional stereo amplifier it provides 12 watts per channel, more than enough power for most home speakers. Or, the two channels, electrically combined by the flick of a switch, make the DB212 a 24 watt monophonic amplifier capable of handling the lowest efficiency speaker. And, for higher powered stereo or conversion of existing mono systems, one channel of the preamplifier can drive an external amplifier, while its 24 watt amplifier operates on the other channel.

The DB212 also features low distortion (less than 1%), equalized tape-head inputs, switched hi-lo filters, separate recorder outputs, speaker phasing switch, and more. A value-packed component, this BOGEN-PRESTO top quality amplifier will add spice to holiday listening for many Christmases to come. Available in gold or grey at $119.95 less enclosure.

Our youngster above adamently demands superior FM-AM reception despite weak stations, crowded wave bands, and local interference. That’s why Santa selected the ST442 STEREO FM-AM TUNER, esthetically and technically compatible with the DB212. High sensitivity (better than 1µV on FM and 3µV on AM) assures noise-free reception even in the weakest signal areas. Flat to ± 0.5 db from 20 to 18,000 cycles, the ST442 even exceeds the broadcast bandwidth capabilities of FM Stations. Visual meter tuning, distortion controlling circuits (AFC and AGC on FM, AVC on AM), low impedance cathode followers for long amplifier connections, and provision for adaption to stereo multiplex, are just some of the features that contribute to BOGEN-PRESTO quality, designed to protect the high-fidelity investment and to ensure listening pleasure. Available in gold or grey at $149.50 less enclosure.

For more information on the DB212 and the ST442 plus many other fine tuners, amplifiers, and turntables, write for free literature:

NOTE FROM ABROAD

Continued from page 28

international. Yet he does not often appear
on the stage outside Berlin. Some time ago
he confided to me: "I dislike the idea of
squeezing myself into a ready-made produc-
tion of an opera; I believe in steady work
with an ensemble under the firm guidance of
good producers and conductors." Although
lately F. -D. seems to have made some con-
cessions in this respect, the idea of adapting
his individual interpretation to the spirit of a
genuine ensemble is still dear to him. Hence
his numerous recording activities, which
cover a wide range of roles.

Early in the fall Fischer-Dieskau appeared
before the microphones in DGG's Berlin
studios to sing Count Almaviva in
Le Nozze di Figaro, a part which earned him
much praise at the last Salzburg Festival.
Deutsche Grammophon hopes that its Figaro
will match its DG success (DG standing this
time for Don Giovanni, which earned a
"Grand Prix" in Paris). Ferenc Fricsay is the
conductor; Renato Capucchi and Frun-
gard Screifeld impersonate Figaro and Su-
nana; Maria Stader sings the part of the
Countess and Hertha Tüpper is Cherubino.

In spite of the wide acclaim for the earlier
Don Giovanni, some of the German singers
in the cast were rightly rebuked for their
rather slapdash pronunciation of the Italian
text. Newly established cooperation be-
tween DGG and La Scala is bound to im-
prove matters as far as recordings of Italian
operas by the German firm are concerned.
DGG has just recorded a new Ballo in
Maschera in Milan—with Antonietta Stella
(Anchena), Ettore Bastianini (Renato), Adri-
ania Lazzarini (Ulrica), Gianni Poggi (Ric-
cardo), and Giuliana Tavolacci (Oscar).
The conductor is Gianandrea Gavazzeni.

Resuscitating Soler, I don't mean Martin y
Soler, from whose opera Una cosa rara
Mozart quoted a few bars in Don Giovanni;
but his Spanish contemporary Padre An-
tonio Soler (1729-1783), whose piano music
the American pianist Frederick Marvin
unearthed from Iberian archives. Although
Marvin's recordings of twenty-one sonatas
and the Fundango on two discs for Decca
have not yet been released in Europe, he
will play Soler's sonatas and piano quintets
(along with the Berlin baritonic Quartet) in
a number of German concert halls this fall,
as well as in Copenhagen and Oslo. And the
two radio stations in West Berlin (RIAS and
Sender Freies Berlin) will record a number of
the quintets, to be broadcast during the
winter.

Marvin hopes to do even more to reestab-
lish Soler's reputation. He has been granted
a Fulbright Fellowship which will enable
him to return to Spain and continue his
researches. His immediate aim: to add some
of Soler's chamber music to his five-volume
dition of the Piano Works which Mills
Music Ltd. of London has brought out.

**THE BASIC IDEA: SYSTEMATIC**

Most music-lovers certainly intend to build up a truly representative record library, but, unfortunately, almost always they are haphazard in carrying out this aspiration. Systematic collection not only means that they will ultimately build up a record library of which they can be proud, but that they can do so at an immense saving.

The one-year membership offer made here is a dramatic demonstration. In the first year it can represent a saving of as much as 40% over the manufacturer's nationally advertised prices.

After purchasing the six additional records called for in this trial membership, members who continue can build up their record libraries at almost a one-third saving through the Club's Record-Dividend plan; that is, for every two records purchased (from a group of at least 100) made available annually by the Society's members receive a third RCA Victor Red Seal record free.

A cardinal feature of the plan is guidance. The Society has a Selection Panel whose sole function is to recommend "must-have" works. The panel includes: DEEMS TAYLOR, Chairman; composer and commentator; JACQUES BARZUN, author and music critic; SAMUEL CHOTZIFON, General Music Director, NBC; JOHN M. CONLY, music editor, The Atlantic; AARON COPLAND, composer; ALFRED FRANKENSTEIN, music editor, San Francisco Chronicle; DOUGLAS MOORE, composer and Professor of Music, Columbia University; WILLIAM SCHUMANN, composer, and president of Juilliard School of Music; CARLTON SPRAGUE SMITH, former Chief of Music Division, New York Public Library; G. WALLACE WOODWORTH, Professor of Music, Harvard.

**HOW THE SOCIETY OPERATES**

Every month three or more 12-inch 33⅓ R.P.M. RCA Victor Red Seal records are announced to members. One is singled out as the record-of-the-month and, unless the Society is otherwise instructed (on a simple form always provided), this record is sent. If the member does not want the work he may specify an alternate, or instruct the Society to send him nothing. For every record members pay only $4.98 for stereo (at an IMMENSE saving). (Please note: there is a small charge for postage and handling which is added.)

A MAJOR IMPROVEMENT in the MATCHLESS BOZAK MIDRANGE SPEAKER

Now Makes ALL Bozak Three-Way Systems Better Than Ever!

All Bozak Three-Way Speaker Systems now incorporate the new B-209A Midrange, featuring a revolutionary and altogether different diaphragm. The result is an overall excellence of musical performance beyond anything previously attained!

The new speaker is a radically improved version of the matchless B-209, hitherto generally accepted as the best midrange in musical reproduction. To its many exceptional qualities there has now been added an instantaneously precise transient response that is simply unequalled. The speaker retains every subtlety and nuance of all vocal and instrumental music, and must be heard to be appreciated. Ask a Bozak Franchised Dealer for a demonstration.

TO OWNERS OF BOZAK SPEAKER SYSTEMS:
Arrangements are being made with Bozak Franchised Dealers under which you can have your speakers brought up to the minute at nominal cost. See your dealer for information.

www.americanradiohistory.com
The Missing Ingredient

IF THERE IS ONE THEME that is popular among music critics and other writers on opera these days, it is this: what's the matter with America? In Europe, we're constantly reminded, towns of moderate size (Graz, for example, or Darmstadt, or Rovigo) are able to offer opera seasons of fair length and considerable variety. Why not in America? If German cities smaller than Wichita, Kansas, can offer opera, drama, and operetta eleven months of the year, why can't Wichita manage three months a year?

It's a valid question. Most of the concerned pundits have one of two solutions. The first is to educate the public to opera. The second is to make opera palatable to Mr. Average American—by translating it, updating it, Broadway-izing it, or by pretending it isn't opera at all. Opera will presumably be "popular" either when the potential consumer is sufficiently enlightened to savor the grand and noble, or when the grand and noble has been sufficiently diluted to be easily swallowed.

Possibly the push for popularity is unreasonable. Opera originated and flourished as an aristocratic art, as the design of any traditional opera house will illustrate, and it will very probably survive without the endorsement of the American millions. Just the same, it is quite legitimate to ask why America lacks a European-style operatic structure.

Perhaps it is gratuitous to reply that the missing ingredient is the operas. It's worth repeating, just the same, for all our other operatic problems are really peripheral to the one of developing a native repertory. In Germany, France, Italy, Russia, and even (to a lesser extent) in Poland and Czechoslovakia, there exists a group of native works for the lyric stage that forms the basis for day-in, day-out repertory. Not all of these works are masterpieces, but many of them are close enough to merit repeated performances for native audiences. Naturally, foreign works are given too—always in translation during the winter and in the original at summer festivals and "international" seasons.

The existence of even a small group of durable American operas would go far toward easing many of our difficulties. Consider the matter of decentralization. Before opera in America can be termed healthy, it must support seasons of fair length by basically resident companies in more than just one of its cities. But as long as producers are forced to depend on the limited pool of imported talent to mount an entire slate of works in varied foreign styles, decentralization is essentially impractical. The Metropolitan maintains what amounts to three separate companies of performing personnel, but that is because it is an international house—one of not more than five or six in the world. It would be ridiculous to try to organize a company in Cedar Rapids or Des Moines along Metropolitan Opera lines, just as it is ridiculous to demand that the Met act as popularizer or avant-garde spearhead.

Decentralization is making some headway, to be sure. Apart from expanded activities in New Orleans, Washington, Dallas, and other cities, there are recent signs of awareness in places like Kansas City and Seattle. But none of these towns is going to have a resident company of even Darmstadt stature until there is a core of native operas on which to center its efforts. Attempts to decentralize opera through head-on attack are certainly laudable, but grass-roots American repertory companies dependent almost exclusively on foreign works in translation face an uphill struggle. Try suggesting to a European general manager that he schedule an entire season without a single native work!

Unhappily, the development of new composers for the lyric stage is not something we can control very efficaciously. We can establish this organization, or create that post, and hope that it will have thus and such desirable effect. The fact remains that American composers will start turning out playable operas as soon as they're able, not before; and there isn't a great deal we or they can do to hurry the process along.

This is not to say that the sincere and energetic efforts of various groups and people on behalf of "The Cause" should be discouraged—they are all to the good. Assuredly, a larger proportion of funds (those administered by the State Department as well as those available from foundations and private industry) should go to the creators of opera than to its interpreters; after all, there's small sense in training mobs of singers if we have no steady employment to offer them. We should at least admit for sober discussion the taboo subject of subsidizing both composer and performing company, if only on a civic level. And recording companies might even consider the advisability of commissioning operas.

We should, in short, face up to the fact that the growth of a real American operatic culture depends directly on the emergence of first-rate American opera composers.

Conrad L. Osborne

As HIGH FIDELITY sees it
TOSCANINI once said that there exists no “second” opera house on earth; every important house considers itself the world’s first. But the Maestro himself never had any doubt that “his” house, the Teatro alla Scala in Milan, was the greatest of all. Certainly the “Theatre at the Stairs,” called after a flight of stairs that no longer exists, is the most famous. The number of great composers and artists intimately associated with it, its record of historical first nights, and its annual dividends by way of fine performances make La Scala the bluest of the blue-chip opera houses. Its only two serious competitors are New York’s Metropolitan and Vienna’s Staatsoper. But the Met has not yet become an integrated part of America’s musical theatre—most Americans would think in this connection of a Broadway musical, Gershwin, or My Fair Lady. And Vienna’s Staatsoper, which shares with La Scala the distinction of being a national shrine with a great tradition, doesn’t always demonstrate the high artistic principles that keep the fires of operatic passion burning between the Piazza della Scala and Via Giuseppe Verdi.

There are many political parties in Italy’s parliament and in Milan’s municipal government, but all Italians and particularly all Milanese are fierce partisans of La Scala. I know quite a few who never attend a performance but take a personal and proprietary interest in the house; they are happy to help make up its deficit, which is the real test of love. A first night at La Scala is the
greatest artistic and social event in Italy, and there are as many as twenty first nights every season.

From the outside, La Scala is a rather shabby brown masonry box that could do with a new coat of paint. Only the Met looks worse. As a piece of real estate La Scala can't compare with the noble edifices of the Staatsoper or the Paris Opéra. Inside, however, you are in a different world, a fairyland—gray and white Carrara marble, chandeliers and mirrors, columns and carpets, statues of Toscanini, Puccini, Verdi, Rossini, Bellini, Donizetti, and others. With its beautifully dimensioned five rows of boxes, the auditorium conveys a sense of warmth and intimacy despite its size. (There is space for three thousand people; the Metropolitan has a capacity of 3,800, Vienna of 2,200.) La Scala doesn't give you the sense of cold elegance that you feel at the Opéra or the cavernous impression of the Met. It is a lived-in opera house, and there is immediate contact between stage and audience.

La Scala's acoustics are the world's best, on a par with those of Bayreuth (which, however, isn't a regular opera house). When American bombers badly damaged La Scala on August 16, 1943, some Milanese feared that Giuseppe Piermarini's great eighteenth-century structure might never be resurrected. La Scala's management wisely used the old blueprints, again putting in two wooden ceilings, and rebuilt the old house down to the last detail. It's a bewitching place. When the electric clock above the stage shows "IX" (9 p.m.), the overhead lights dim, and for a few moments one light remains on in each box, which is a miraculous effect. You settle back in your seat with a sense of elation and anticipation. Opera is a tricky business, depending on many intangibles, but you have a better chance at La Scala than anywhere else to hear a carefully rehearsed, powerfully staged, beautifully sung and well-conducted performance that has style, artistic unity, and complete integration of all components.

A well-run opera house can never be a democracy. To fuse the various artistic personalities and high-strung individualities into a veritable ensemble there is need of the strong hand and the pure heart of an idealistic fanatic who also happens to know the value of money. Dr. Antonio Ghiringhelli, La Scala's Sovrintendente (general manager), is what the Viennese call an Opernmarr, an amateur who is crazy about opera. (Egon Hilbert, the present Vienna Festival Intendant, is another one.) Ghiringhelli came into La Scala after World War II "for a few months" to coordinate the speedy reconstruction of the bombed house. He has been there for the past fifteen years. A fifty-year-old, silver-haired bachelor who has no family, few friends, and practically no interests outside opera, Ghiringhelli comes from a poor family in nearby Varese. As a boy he sold newspapers and carried out telegrams; later he made a fortune as an industrialist. Then he fell, as he says, "under the magic spell of Toscanini." Since then, he's carried on a passionate love affair with La Scala. He goes there every day around noon and is still there after midnight. He is always there during the performance, watching from his box, or in his small backstage office, and everybody knows it. He gets on well with his artists and is respected by everybody.

Ghiringhelli works in Toscanini's former office under a picture of the Maestro, and he carries on in the great Toscanini tradition. "Toscanini," says Ghiringhelli, "was a great artist and a great manager. He rose from the ranks to become a general. He knew that the bloodstream of an opera house must always be flowing and that one must always build for the future." Ghiringhelli is advised on musical matters by a committee of three maestri: Victor de Sabata (now living in semiretirement in Santa Margherita), Ildo Brande Tizetti (best known as the composer of Murder in the Cathedral), and Francesco Siciliani. It is Ghiringhelli, however, who makes the final decisions on policies, programs, casts, and all administrative and financial matters.

Every season La Scala produces sixteen different operas. Six of them are popular favorites chosen from about thirty durable box-office successes. Aida, La Traviata, and Rigoletto are La Scala's all-time hits. Italian opera naturally comes first. An unwritten tradition dictates that every season at least one work by Rossini, Bellini, Donizetti, Verdi, and Puccini must be performed, as well as one each by Mozart and Wagner. The sure-fire hits which conveniently fill the house are not repeated year after year as elsewhere, but only every five or six years. La Scala doesn't make it easy for itself. In exceptional cases, when a particular star is available, an opera may be repeated in successive seasons. Last season they repeated the new Turandot of the year before, "because we were lucky to have Mme. Nilsson," says Ghiringhelli.

In addition, La Scala performs annually three works

---

*Milan's most famous edifice seen from its busy piazza.*
of great sixteenth-, seventeenth-, and eighteenth-century music; also three masterpieces that have not yet achieved popularity in Italy (last season they were Parsifal, Berlioz's Trojans, and Humperdinck's Hansel and Gretel); and four—repeat, four—new, contemporary works, two by Italian and two by foreign composers. No other musical theatre on earth has such an ambitious program. (The Met rarely performs modern operas, Vienna produces one every season. La Scala is the world's most progressive-minded opera house, but still there are professional avant-gardists and critics in Milan who attack Ghiringhelli for his "conservative attitude.") In addition, La Scala also puts on two new ballets every year. "Never one with bad music," says Ghiringhelli. "Stravinsky, Prokofiev, De Falla, Ravel. Toscanini used to say that the dance must not kill the music."

There are also to be taken into consideration the productions of the Piccola Scala, which performs six infrequently played historical masterpieces, two from the seventeenth, two from the eighteenth, and two from the nineteenth century. La Piccola Scala was opened in 1951 in a nearby building to bring to life a favorite idea of Toscanini, who had always dreamed of a small, intimate house of about five hundred seats where some very old and some very new operas could be given for small groups of connoisseurs. Last year La Piccola Scala put on Pergolesi's La Finta 'Nunzorato, Paisiello's Barberie di Sirigia, Cimarosa's Le Astuzie femminili, Egk's Revisor, Malipiero's Sette Canzoni, Stravinsky's Mavra, Rota's Notte di un nebrasteno. Ghiringhelli intends to build a special orchestra for the small house and to present more performances there.

Ghiringhelli is a perfectionist who hates any attempt at improvisation and is devoted to the principle of long-term planning. Performances are prepared down to the last detail two years ahead. There are several reasons, however, for the superlative finish of many Scala productions. The most important is the absolute, unlimited power given to conductors in all musical matters. Until Toscanini came, at the close of the last century, La Scala was mainly known as a singer's house. Now it is definitely a conductor's house, a turn of affairs which is another Toscanini legacy. (You can't get away from Toscanini when you are inside La Scala. His spirit is everywhere. His disciples are all around.) The conductor selects his cast, asks for a certain amount of rehearsal time, studies the work, and conducts all performances. Except in an emergency no conductor would take over a performance rehearsed by a colleague. Except for illness, the same singers remain in the cast, even to the secondary parts. Thus a new Scala production never degenerates into mere repertoire "routine," with the fifth or sixth performance conducted by an inferior man, sloppily sung and badly acted by unrehearsed singers. Last year's conductors were Bruno Bartoletti, André Cluytens, Gianandrea Gavazzeni, Herbert von Karajan, Rafael Kubelik, Dimitri Mitropoulos, Nino Sanzogno, Hermann Scherchen, and Antonino Votto. Votto, a Toscanini disciple and now the oldest of the Old Scala Hands, is as strict a disciplinarian as the Maestro was. At La Scala the conductor conducts the works he loves and does best, and nor because there happens to be no other conductor available that night.

The amount of rehearsing depends on the difficulties involved and on other considerations (for instance, the number of performances planned), but La Scala has one hundred and fifty rehearsals for about twenty works, more than any other house. Operas produced by Lucino Visconti, who is famous for his painstaking attention to detail and for the grandeur of his productions, are often rehearsed for thirty or forty days. A reading rehearsal and individual rehearsals are followed by chorus rehearsals, ensembles, whole acts with piano, later with orchestra, and so on. Rehearsals never stop; even after the twelfth or thirteenth performance the producer or conductor is apt to schedule another rehearsal to keep the performance at its original level. There can't be Sunday every day at an opera house, but La Scala has a great many Sundays during its season.

Celebrated singers who have performed their favorite parts many times elsewhere often admit, with some puzzlement, that they always learn something new at La Scala. Some even admit that they sing better there. Maria Callas has certainly performed more impressively at La Scala than at any other house. At La Scala there is an intuitive feeling for drama without which there can be no good opera. And there is awareness of singing as a great art. Scala conductors are forceful men who mold their ensemble into complete unity. The greatest singers have learned some painful lessons here. Unless they are willing and able to fit in, vocally, dramatically, and otherwise, they will not be asked to come back.
Trained singers often have trouble in acquiring the mysterious Scala finish, a combination of clear enunciation, pure style, perfect phrasing, and faultless singing in the great bel canto tradition.

The sounds of beautiful music are heard eleven months every year at La Scala. Preparations for the new season start on November 15. The opera season begins on December 7 and runs through June 2. Performances take place on all days except Monday and Friday, when they shift to La Piccola Scala. During June there is a symphony season, followed in July by another opera season at popular prices for workers. August is (paid) vacation month for everybody. During the first two weeks in September recordings are made. Afterwards there is another symphony season until November 15, and at that time the new cycle begins. Owing to this extensive schedule La Scala has no trouble in keeping its orchestra of 107, Italy's best and best-paid, its great chorus of one hundred, its not-yet-so-great ballet of sixty, its expert technical staff of about a hundred, its ten comprimari, and about thirty administrative employees. The four hundred people who work for La Scala enjoy the sort of social security, health and pension benefits that are standard practice in Italy's industries. Everybody gets thirteen monthly salaries a year and is pensioned at the age of sixty-five. The average orchestra and chorus member makes about $200 a month, which is considered good money in Italy.

The financial background of La Scala is as unique as everything else about this house. When Toscanini gave La Scala its new Constitution in 1921, he decreed that above all La Scala must always keep its artistic and economic autonomy. There must be no outside interference whatsoever. ("No one ever worked here who was recommended by a minister or senator," says Ghiringhelli.) Toscanini wanted neither a privately backed house (like the Met) nor the straight state opera type (like Vienna or Paris), and he demanded that the autonomy of La Scala be made into a law so there would be no hustling for money from one year to the next. Such a house can be managed only by people with a perfect sense of artistic responsibility and deep civic attachment, and it can exist only in a city which is truly devoted to its opera house.

La Scala sells over 500,000 tickets a year and takes in more money than all other twelve Italian opera houses together. Unlike the Met, La Scala receives not one lira from private patrons. (Such gifts would not be recognized as deductions by Italy's income tax collectors.) Half of La Scala's expenditures is covered by ticket sales. In comparison, other Italian opera houses recover from ten to twenty per cent of their expenses. La Scala's fifty per cent deficit is (cheerfully) made up by the city administration of Milan (through a small tax on movie tickets and other entertainment), and by the provincial government (through a tax on the national football pool). "There must be a balance between what the public pays and what the city and province contribute," says Ghiringhelli. A fifty-fifty balance seems eminently fair.

Of the 160 performances given every year by La Scala and by the Piccola Scala, 75 at La Scala and 25 at the Piccola Scala are subscription performances. But even the unsubscribed performances are nearly always sold out. An American tourist arriving in Milan in the afternoon has not much of a... Continued on page 149

Our Operatic Expatriates

America has produced some of today's finest operatic talent, but a good many of these singers can be heard only in Europe. Guess why!

BY PAUL MOOR

My appointment was with Frau Lang, first soprano of the Hamburg State Opera. I arrived a few minutes early at the stage entrance of the beautiful, controversially "modern" opera house, where the Pförtner regaled me with an account of Frau Lang's most recent triumphs. "We're proud of her in Hamburg," he said. "And so young, too—but even so she shares the same repertory as Frau Ebers." And Clara Ebers, who belongs to a substantially older generation of German opera stars, is a top name not only in Hamburg but in the opera houses of Munich, Berlin, Vienna, and elsewhere on the Continent.

Promptly at the appointed time, Frau Lang appeared with a smile and greeted me in good English. As soon as she and the Pförtner had exchanged a few remarks in German, she turned to me and said, "Where shall we go? Do you know Hamburg? There's a pleasant little café just across the street, if you don't have any place special in mind."
We crossed the street. As we waited for the heavy traffic to open up, I noted the unpretentiousness of Frau Lang’s appearance. Here was not the flamboyant, narcissistic diva of the old school, but a simple person wholly without “side,” in spite of her great successes in Hamburg, where since 1955 she has been a regular member of the company, and in other leading European opera houses where she has frequently sung guest appearances.

When we entered the café, the face of every waiter, waitress, and cashier lit up with welcome when they looked our way, and as we moved towards the rear to find a free table, every one of these people bowed—not with obsequiousness, but with genuine affection and esteem. “Schön guten Tag, Frau Lang,” “Wie geht es Ihnen, Frau Lang?” and so on, they greeted her, to all of which Frau Lang replied informally and graciously. This sort of special treatment for opera stars is routine in Central Europe, but I couldn’t help reflecting how many, or rather how few, places there are in the United States where such attention would be a matter of course.

I also wonder, in writing this, how many American readers have even yet heard of Frau Lang, whose reputation in Hamburg has already, in the course of only five years, brought her invitations from the top houses in Europe, including one from Herbert von Karajan and the Vienna State Opera. It is indicative of Frau Lang’s present success that she had to decline the Karajan offer simply because her schedule was too full. But at the moment, for the purposes of this article, the most interesting thing about the first soprano of the Hamburg State Opera is that Frau Lang is actually Miss Edith Lang, born, reared, and to a decisive extent trained, in Chicago, Illinois, U.S.A.

West Germany at the present time has the highest concentration of opera companies of any country in the world, with over fifty resident ensembles performing, in most cases, eleven months out of the year. In several of these companies every third singer is a foreigner, and of the foreigners Americans are far and away the biggest contingent. A German opera company today without one or two resident American singers is a rarity, and it is nothing unusual to find four or five. The Hamburg State Opera, possibly the best German company, last year carried the names of six Americans as regular members of the company. They included such established singers as Astrid Varnay, of the Metropolitan and Bayreuth; Anne Bollinger, the Idaho beauty whom Lotte Lehmann trained to win the Metropolitan Auditions of the Air; Lawrence Winters, who made his debut in Broadway’s ex-GI show Call Me Mister; and James Pease, also of Covent Garden and Glyndebourne. But Hamburg and other German cities have also become headquarters for many less well-known American singers who have been forced by circumstance to quit their homeland in order to exercise their art and earn a living. An informed estimate places the number of such Americans, in Germany alone, at around a hundred. When Westminster Records taped Douglas Moore’s The Devil and Daniel Webster in Vienna, its musical director, Kurt List, had no difficulty recruiting the entire cast—principals and chorus—from among American singers resident in Central Europe.

Heinz Joachim, music critic for the leading West German daily, Die Welt, says that due to war and its aftereffects, standards of German singers have sunk and those of foreign singers risen. “This rise,” Joachim says, “is especially true of the U. S. A., which, with its hundred and eighty million inhabitants and its staggering number of highly qualified applicants can make any headway on an American operatic stage. It’s no accident that most of the foreign singers in our opera houses today are Americans.”

The life of an American opera singer abroad is not, of course, one long unadulterated success story. At a major German house, for instance, with a good contract and good parts, he will probably start at 1,000
Marks a month, which is exactly $238.09. Yet more than a few American singers who have earned up to $500 a week in summer stock or television in the United States have accepted such beginning contracts in Germany with alacrity. The reason is, quite simply, that such a contract represents an opportunity for them to sing, to put into active practice the ability they have spent long years developing and trying to perfect. As for the money—well, you don't get rich at the New York City Opera on $75 a week, either. There is another important aspect; as one young American soprano put it, "If you're good, in Germany you'll be recognized. For a number of reasons—the managerial monopolies, and so on—you can't say the same thing about the United States."

Two American singers who have become recognized in Germany in the past few years are Evelyn Lear, soprano, of New York, and Thomas Stewart, baritone, of San Saba, Texas. Both are regular members of the Städtische Oper in West Berlin—a situation which is very convenient, since in private life Miss Lear is Mrs. Stewart and the mother of two young Stewarts. Miss Lear is an intelligent, musical singer (Cherubino, Giulietta, Octavian) endowed with good looks and a solid knowledge of what she wants out of a work of music. Mr. Stewart is a strapping, affable man whose open personality enables him to range amply from the psychological subtleties of Golaud and Renato on stage to such regional idioms as "Dang it" or "That simply scared the fool out of me" off. The couple met at Juilliard, where both studied. After they married, they earned relatively high fees, for brief periods, in television, night clubs, and summer stock. After a time, though, they came to the conclusion that the United States offered them no opportunity to make their livings as serious singers. They applied for, and received, Fulbright fellowships, and headed for Germany. Stewart was promptly engaged by the opera in West Berlin beginning with the 1958/59 season, and his wife was signed the following May. A year later they have each scored wild successes farther afield: Mr. Stewart as Amfortas in Parsifal at Bayreuth and Mrs. Stewart in Allan Berg's Lulu at the Vienna festival.

Both Evelyn Lear and Tom Stewart have by now become familiar figures in Berlin's musical community, accorded the affection which the city gives its musicians without any consideration of their origin. They were lucky in finding a delightful house at an extremely reasonable rental, and, what with their added income (about equal to their operatic earnings) from radio dates in Berlin and elsewhere in West Germany, each of them now tools about town in his own automobile. Since German opera houses are government-run, after fifteen years the Stewarts will be entitled to very decent pensions, which they can draw anywhere in the world. Both have won the respect and good will of their German colleagues, who have been lavish in scattering recommendations for them. Thanks to such felicitous circumstances, Miss Lear recently was chosen to do the last four Strauss songs with Sir Adrian Boult in London; and when illness prevented Dietrich Fischer-Dieskau from doing a Brahms Requiem in Berlin last winter, it was "I lerr Stay-vart" whom the conductor immediately invited to take his place. Thirteen-year-old Bonni and eleven-year-old Jan Stewart attend Berlin public school, and already are almost completely bilingual.

The only thing unusual about the Stewarts is that both are singers; otherwise they are reasonably representative of this sizable, amorphous colony of involuntary American expatriates. California-born Keith Engen, formerly of the United States Navy and now a pillar of the Bavarian State Opera in Munich, has even developed such a reputation in Germany that for audiences there he has altered his name to Keith: whereas they used to call him Kite, now they at least say Keet. Milan is home base of Chloé Owen, originally of Tennessee, an outstanding lirico spinto of unusual musicianship and intelligence. Miss Owen made brilliant debuts in Berlin in Lohengrin and Mathis der Maler and has appeared and recorded repeatedly with Munich's youthful Bach specialist Karl Richter. Larry Winters has developed such a following that the fortnightly Berliner Kulturspiegel gives his guest appearances almost unprecedented star billing: "Lawrence Winters in... . . ." Winters, a Negro, jokes about not making up for the roles he is given but making down—and, incidentally, says he has never once encountered racial prejudice in a German opera house. (One hears the same from American Jewish singers.) Two other American Negroes whose superlative attainments have won them secure positions are the soprano Lenora Lafayette (a protégée of Duсолин Giannini) and the contralto Lucretia West; surely these are two of the most sumptuous, opulent voices in the world today.

The list goes on and on and on. Most of these American singers are in Germany, but far from all. Would the Vienna State Opera of 1960 be complete without such Viennese favorites—Americans all—as Teresa Stich-Randall, Jean Madeira, and Eugene Conley? Is any Carmen more discussed in Paris than Gloria Lane? In recording such a typically, completely British opera as Peter Grimes, was it not noteworthy that the composer selected an American, Claire Watson, for the feminine lead and another, James Pease, for the leading baritone? These artists are a far cry from the beard-and-sandal St. Germain des Prés set, for whom expatriation is its own justification. I have never, in the course of coming to know a number of American operatic expatriates, encountered a single one who professed not to miss the United States; some of them missed it badly. But reality is reality. Evelyn Lear sums it up succinctly: "Certainly I feel myself an American—I always will. But I am also an artist, and I'm happy only when I'm active in my profession."
An uncharitable disquisition on the horrors perpetrated by translators of opera librettos.

"Bless Thee! Thou Art Translated"

by CHARLES CUDWORTH

When during the remarkable events of A Midsummer Night's Dream poor Peter Quince sees his old friend Sweet Bully Bottom suddenly bedecked with the head and ears of an ass, his horrified astonishment is as nothing compared with the shocked chagrin of a composer who encounters his best work in a bad translation. Sweet Bully Bottom himself, you may remember, was something of a music lover although unexpectedly modest in his musical claims: "I have a reasonable good ear in music—let us have the tongs and the bones. . . ." Bottom's creator himself poked gentle fun at amateur players and the doggerel they rehearsed, but how much more fun he might have had if he had lived on into the palmy days of Italian opera.

Since Shakespeare's time a mountain of sorry verse has been foisted on the opera lover (and the concertgoer) in the sacred name of music. And when that "verse" has to be rendered into a tongue different from the original—well, we can indeed echo Quince's "Bless thee! thou art translated." Mind you, there are some translators who are masters of their craft, and often improve on their originals; such a one was Edward J. Dent, whose English versions of Mozart's operas are models of their kind. But, as often as not, the job of translating "words for music" has been left to pitiable hacks, who have understood neither the words nor the music, and who have written in a curious kind of English that can only be labeled "Translatorese."

One of the greatest sufferers at the translator's pen was Giuseppe Verdi. Luckily his knowledge of English was slight. Otherwise he might have been considerably alarmed at such oddities as this apparently innocent stage direction in the English version of Aida: "The Egyptian troops, preceded by trumpets, defile before the king." Again, one Aida character makes the strange statement: "And bootless proved my flame," while another poses the leading forensic question: "Hast thou consulted the will of Isis?" My own favorite snippets of second-hand Verdiiana come not from an opera, however, but from the English version of his Requiem, in which occurs the startlingly candid admission: "Hark! the trumpets sounds appalling!"; a little later comes this plaintive Mendelian plea: "With the sheep, Lord, deign to mate me. From the he-goats separate me. . . ."

Puccini also fared rather badly at the hands of some of his translators. It may surprise you to learn that Tosca, in spite of living c. 1800, had distinct premonitions of our own age of scientific marvels; at one exciting point in the opera she is obviously thinking of elevators: "They are going . . . going down . . . down!" She also gives a realistic preview of space flight: "We shall soar high above the globe terrestrial!" Best of all, perhaps, is Cavaradossi's original style in invective: "Tremble, Scarpia, thou butcherly hypocrite!"

Another work which has some curiously modern echoes is Rossini's Semiramide, in which one character inquires, possibly suggesting our tabloids, "What paper is it that Which with thy tears thou waterest. And dost with horror view?" Later on we find strong advice for union members: "Be firm, of nothing else now think, but
strike!" In another version of *Semiramide* the heroine takes the hero by the hand, "and arrests him with tenderness." The same translation also emblazes one of the most topsy-turvy of all pieces of Translatorese: "It is now three lustrums Since of the husband The dreadful shade When all is darkness The unworthy wife Is ever menacing." There is a similarly buffling item in Sarti's *Giulio Sabino*: "He has buried himself along with his infants" — a feat comparable with that of Gilbert's Lord High Executioner engaged in cutting off his own head.

Like Bottom himself, many operatic characters tend to mixed metaphors. Nasolini's Merope, for example, laments that "Heaven is deaf to my tears," and also complains that her heart "pants" (by analogy perhaps with the words of the psalmist, but to him it was the "hart" that panted, not the "heart"). In Gounod's *Romeo and Juliet* too we have a real Bottomism: "O beelt-brows, that blush for me!" But best of all I like these two fragments from Meyerbeer's *Huguenots*: that intriguing meteorological phenomenon, "The sky today rains females in a shower . . . ," followed a little later by the slightly salacious "Youth and beauty here may rest Or sport beneath the shady vest."

Some translations of *Carmen* are especially worthy of remembrance. There's that chorus of Dragoons which comments, very impolitely, it seems to me: "Oh what a sight these people are, Oh what a sight!" And as a musician I cannot restrain my pleasure in the couplet: "Guitars, the worse for being cracked, By nimble fingers were attacked!" In fact, operatic choruses, although admittedly lacking in originality (they'd always rather repeat what someone else has just said than think up something for themselves), are often blunt to the point of rudeness. We all know that hunting people, the world over, tend to be self-centered, so perhaps it's only natural for the Chorus of Huntsmen, in *William Tell*, to sing disparagingly of "The tiresome voice of the monotonous shepherd." Operatic arias may be overlong and operatic court life may be boring, but it seems a little tactless when the courtiers in *Lucrezia Borgia* sing, very pointedly: "I shall sleep—When he has finished, awake me."

Clumsy stage directions, of course, can lead to any amount of unseasonable mirth, and operatic stage directions tend to be even more mirth-provoking than those found in what is sometimes still referred to as The Legiti-
that baffling chorus "The heavens are telling," but these aberrations fade into insignificance compared with the English text of The Seasons. Like many other human affairs, it all begins in Spring, when "From those craggy rocks the snow In livid torrents melted runs . . ." and the husbandman prays that "By sol'ning dewts Let earth be wetted." Then comes the invitation to "See the lucid air" and give thanks with "From thine abundant meals Hast thou re-past ed us." Later, with night coming on "To gloomy cells repairs of fun'ral birds The lurid tribe." But do not despair; before long, "With rosy steps young day pours in," Summer catches up with us; "The sun shoots thro' th' air serene and calm His mighty blaze in torrents down . . . Of gleaming and re- reflected rays a dazzling deluge reigns; Distressful nature sinks. . . ." But still, we can always retreat to where "lofty roofs of aged oak refrigerant shelter yield." Autumn brings the Vintage Festival to "brim the panting cup"; "There's scraping the fiddle Is squeezed the bag" (and not the sort of bag you're thinking about, either); "See skipping the boys And frisking the youth"; "Then let us sing in chorus full The bright and cheerful juice of grape" and "brim the panting cup," Autumn also brings a bit of shootin', complete with dog—such a clever dog, too: "See how the spaniel sweeps the grass And stooping draws along the turf." Unfortunately, Winter is upon us: "By frost cemented stands the lake," and the poor traveler has a dreadful time. When he does at last find shelter, he becomes more than a little infantile and "Springs With joyful panting breast to gain The welcome cot." Meanwhile "Old mothers spin on the dis- taff, On rotary wheels the daughters," perhaps because they are mystified by the direction "Get the wheel a- going Make it snore a-turning."

Rather later in the nineteenth century, when Wagner began to cast his spell on English ears, his alliterative, pseudo-saga style of verse writing posed a difficult problem for the translators. They solved it, to their own satisfac- tion at least, by going all out to imitate him. The re- sult is Translatorese of the rippest quality. The Ring is undoubtedly the best source of such collectors' items, but even such a work as Tristan can provide one or two fine examples, as in the following brief dialogue:

Tristan: "The ship—dost thou see it?"

Kurvenal (eagerly): "O rapture! Transport!"

As for The Ring, the shape of lines to come already occurs in Rhinegold, when Alberic says "Delightfully deep is Loki." In The Valkyrie, Siegmund, having flung himself down before Hunding's fire, calls out "A draught! A draught!" (Someone seems to have left the door open; however, Siegmund soon reassures us with the informa- tion that his sinews are firm.) The fun really gets going in Siegfried. When that "sapient dwarf" Mime begs Sieg- fried to "Trust me, dearie" one might be excused for wondering if that callow young man has gotten mixed up with a barmaid. Mime goes on to warn Siegfried about "Fafnir the wicked worm" and follows up his description with the dread warning "Potent poison He pours with his breath" (Dragons don't go in for deodorants, appar- ently). Nevertheless, S., nothing daunted, goes on to fight the dragon. Somewhat alarmed by the size of the beast, he bursts out, rather as if Fafnir were proprietor of a supermarket "An extravagant frontage You turn on me." Finally, Siegfried manages to kill the dragon, and eventually goes off to win his promised bride Brünn- hilde. Unexpectedly enough, that tough young divinity behaves more like a coy Victorian miss than the hefty heroine we have been led to expect, and she even has poetic horrors at the prospect of a fate worse than death, when sex, in the shape of young Siegfried, raises its ugly head: "Dismallest blackness Dazes my sight . . . In vaporous mists Fouly up-forces a gridly fear. . . ." In spite of all this, that "Babe of prowess," Siegfried, is still ardent and declares "Now bounds my blood In blissfullest blaze. . . ." Indeed, by now he is so worked up that in spite of being a "high-minded boy" he forgets all about grammar, to say nothing of poetry: "My glances are feasting With feverish thirst I feel my own burning Till the eyes' refreshment they taste of. . . ." I could go on, but I'll conclude my remarks on Siegfried with Waylinda's naïve inquiry, which has all the marks of Madison Avenue: "Are you annoyed by a gnome?"

Excerpt of this. Let me end with two quotations from sober musicological prefaces, just to prove that it isn't operagoers alone who suffer from Translatorese. Here is a preface to the modern edition of an old Italian concerto: "The concerto that we are publishing was discovered by . . . and was revealed in an execution conducted by the same at the Conservatory in Florence . . . For the violin part we had the peculiar cooperation of the violinist G.M." And here is the now almost classic description of Vivaldi's Concerto "in Tromba marina": "Violins 'in tromba marina' . . . represent a specialty which has not reached us. It is generally believed that said wording means only violins imitating the full and coarse sonority of a sea syphon; instrument that, not withstanding its picturesque name, was not a wind instrument and had nothing to do with the sea, but consisted of a long har- monic case, pyramid like very pointed, almost as tall as man . . . The wording 'tromba marina' applied to violins, might be in reference to the brilliant style, some- what rude, in which these instruments are treated; just as it happens in the orgiastic concert cited above. The definition is still uncertain." Finally, may I conclude with one more paragraph from an Italian source, making it my own apologia, as well as its author's: "However, this catalogue, more than putting in evidence abuses per- petrated up to now, has among its most cherished aims also that of preventing new possible arbitrages since they are always detrimental to art and would, from now on, be readily noticed by everybody. . . ."
The Mozart Operas on Record

By Nathan Broder

It has taken one assiduous operagoer and Mozart fan, living in as metropolitan a music center as New York City, some fifteen years to see fully staged performances of all of Mozart’s mature operas except La Clemenza di Tito. Four of these works were seen at the Metropolitan Opera, over a long period of time; the Met seldom produces two Mozart operas in the same season. For Idomeneo our operagoer had to travel to a rare revival at the Berkshire Music Festival in Lenox, Massachusetts, and for Die Entführung to an equally rare if less distant revival at the Juilliard School. Now take a look at the list of Mozart operas on records that follows. Anyone with the price can have the music of all six of the operas in question (again without Tito, which, by the way, doesn’t deserve quite this neglect) in performances every bit as good as one is likely to hear at the Met and sometimes better. I am not, let me hasten to say, trying to intimate that a recorded performance is preferable to a good live one. I am simply saying that a good recorded performance is far better than no live one.

There are seven Don Giovanni now available on discs. This is a larger number of complete recordings than any other full-length opera in the standard repertory has been accorded, except Bohème, Tosca, and Butterfly. A fair conclusion to be drawn from this fact, I think, is that the musical taste of record buyers as a class must be considerably higher than that of operagoers as a class.

I shall not be so presumptuous as to try to characterize these masterpieces in a few words. Whole books have been written about them. Whole books have been written merely on the subject of staging these works. I assume that most users of this discography are familiar with the mature operas. For those who are not, I recommend Edward J. Dent’s Mozart’s Operas as the best detailed study in English and Section V of Alfred Einstein’s Mozart as the best summary treatment of the subject.

The order of the album listing at the end of each entry is not intended to be a qualitative one. In only two cases where there is more than one edition—Bastien und Bastienne and Figaro—is the choice of the best version clear-cut, in my opinion.

All performances are sung in the original language unless something is said to the contrary, and librettos in that language with an English translation are provided unless otherwise indicated. The operas are listed in order of composition.
La Finta semplice, K. 51

La Finta semplice was written in Vienna in 1768 and first performed the following year in Salzburg. The libretto, mostly by Carlo Goldoni, is far from that lively author's best, and a mature Mozart would probably not have bothered with it. But to the twelve-year-old boy (and his proud and ambitious father) it represented a chance to show the Imperial Court at Vienna what he could do. There is no use pretending that the outcome, Mozart's first real opera, is a masterpiece. But here and there are touches that point to the future master, like Cassandro's aria "Ella vuole ed io torner," whose text, with its heightened high-spirited boy; or Rosina's "Amoretti," which in spirit anticipates some of the lyric moments in Cosi fan tutte; or Cassandro's "Uribnio non son io," with the violins reeling around in their ritornel as drunk as the singer; or the pantomime bit in Act II, where for music, subduel and poetic sense is a much higher level than the silly scene being enacted. Elsewhere Mozart does what any competent but uninspired adult composer of the time would have done, and does it in a smooth and highly professional manner.

The singers in the only available version vary from adequate to very good: in the latter class belong Walter Raminiger, Edith Orazev, and George Maran. Paukgartner turns in a very good performance of his better conducting jobs. All of the secco recitative is omitted, most of the coloratura sections in Rosina's arias are excised, and several of the other numbers are cut; the singers sometimes sing an octave higher or lower than what is written. None of this, however, is very serious under the circumstances. The violin tone is rather coarse, but otherwise the sound is acceptable.

—Dorothea Siebert (s), Rosina; Edith Orazev (v), Donna; Karin Kämmer (t), Ninnetti; George Maran (t), Fracasso; August Garech (t), Don Polidoro; Alzos Pernerstorfer (bs), Don Cassandro; Walter Raminiger (bs), Simone. Camerata Acaudemica of the Salzburg Mozartum, Bernhard Paulgartner, cond. EPC SC 6021, two LPs.

Bastien und Bastienne, K. 50

The late George Jean Antheil once pointed out that it was possible for a performance to be awkward and at the same time utterly enchanting—witness the dancing of a little girl. The description seems to me an apt one for Mozart's performance in this little work. It was composed only a couple of months after La Finta semplice, but it was not written to impress the Court. Rather, it was commissioned by Dr. Mesner (the same who later became famous as a hypnotist) for performance in his own little theatre: it was not a three-act piece with a large cast of principals, each of whom had to have his own aria, but a one-act affair with only three characters. The plot is simple to the point of childishness, the characters naïve country folk, and the language the twelve-year-old composer's native tongue. The awkwardness resides in a certain lack of variety in mood and pace—most of the sixteen numbers are in a moderate two-four or three-four meter. But within this limited sphere the boy writes some charming melodies. Many of them, as was to be the case whenever Mozart set German texts, have a folksike flavor. The most elaborate number for Colas, a distant and bucolic ancestor of Don Alfonso, the wise old philosopher of Cosi fan tutte, is one in which he pretends to be casting a magic spell; here Mozart mockingly imitates some of the gestures of the big opera seria. All in all, the music has more character than does that of La Finta semplice.

The Decca performance is delightful. Rita Streich is an ideal Bastienne, and her colleagues second her ably. In the Cetra version, which is sung in Italian, three numbers are omitted, another is cut, is not in the same league with Streich, and by a strange error Bastien and Bastienne sing a whole aria (No. 13) in unison when they are supposed to alternate; moreover there is some distortion in the sound towards the end of the disc, and no libretto is supplied. Nevertheless, this version is not without virtues, notably a tender and serious approach, a rather strong tenor, and a more dramatic rendition of Colas' conjuring aria.

—Rita Streich (s), Bastienne; Richard Holm (t), Bastien; Toni Blankenheim (bs), Colas. Munich Chamber Orchestra, Christoph Stepp, cond. DECCA DL 9860, L.P.

—Gianna Galli (s), Bastienne; Amilcare Blaflard (t), Bastien; Otello Borgonovo (bs), Colas. Orchestra Sinfonica di Torino della Radiotelevisione Italiana, Arturo Bassi, cond. CETRA 1263, L.P.

Idomeneo, K. 366

Idomeneo is often dismissed as an opera whose twenty-five-year-old composer merely followed closely the footsteps of Gluck—a type of work obsolescent in Mozart's time. It is true that the libretto is that of an old-fashioned opera seria, with a subject from Greek legend, stereotyped characters, and a cracking plot—the kind of libretto that Mozart never touched again until, in the last year of his life, he had to set la Clemenza di Tito. It is also true that this opera more than any other of Mozart's does show the influence of Gluck: in the importance given to the chorus, in the unusually numerous accompanied recitatives. But the music lover who is persuaded by such facts to ignore Idomeneo will miss some remarkable music. An opera that boasts several powerful and moving choruses, at least two arias of exquisite beauty (Ilia's "Se il padre perde" and "Zeffiretti lusingheri"), and a great quartet, as well as the aforementioned accompanied recitatives, many of which are extraordinarily trenchant and expressive—an opera like that does not, it seems to me, belong permanently on the shelf.

The single recorded performance is in most respects excellent. Sena Jurinac as Ilia is in fine form; her voice is extremely attractive, tender or heroic according to the occasion, and with good round top tones. Leopold Simoneau as Idamante is his usual dependable self, providing skillful, solid singing of flexibility and pleasing quality. Elektra's big, dramatic arias are sung with power and sweep by Lucille Udovick; in her more lyric music the slightly metallic quality evident when she sings forte disappears. The singing of Richard Lewis as Idomeneo is musically but not as firmly supported or as accurate in intonation as it might be; there seems to be more than the point of technique.

—Sena Jurinac (s), Ilia; Lucille Udovick (s), Electra; Richard Lewis (t), Idomeneo; Leopold Simoneau (t), Idamante. Glyndebourne Festival Chorus and Orchestra, John Pritchard, cond. ANGEL 3574, three LPs.

Die Entführung aus dem Serail, K. 384

Here there is no clear-cut superiority of one album above the others. All are strong in some respects and weak in others, but none of the three is poor. On balance, I should think that the Beecham set for Angel might come out ahead by a few points. There is first of all Sir Thomas, himself, who is for the most part in excellent form here. His style is more temperate and more deliberate than those of the other conductors considered here and this, coupled with his usual care in phrasing, results in a deepening of the emotional quality of the sections in question. Despite the fact that this opera is a romp, certain portions of the text must have stirred Mozart deeply. The accompanied recitative preceding the duet of Belmonte and Constanze, for example, is one of those portions: the situation, in which the two lovers resign themselves to imminent and certain death, evoked music of extraordinary expressiveness, even for Mozart. Beecham gives such passages their full value. On the other hand, he does a few things that are difficult to justify, such as adding accents in Blonde's "Welche Wonne," or slowing up now and then in Omin's "Hut wie wirich triumphieren," or shifting "Marten aller Arten" from the second act to the third.

Simoneau, the Belmonte, is another asset of this performance. He sings with smooth and well-focused tone, and with nuance. One of the finest things in the set is his ecstatic "O wie ängstlich." The Pedrillo, too, Gerhard Unger, is Continued on page 125
The past summer saw an impressive portion of London Records' array of musical and technical talent gathered in Vienna (naturally) for the taping of a new Die Fledermaus. Besides getting the job done, everyone involved had a ball—as the photos here clearly show.

The bubble blower on the left is a London engineer, impersonating an obstreperous Viennese coffee-making machine. The lady with pencil and script is Regina Resnik (Orlofsky), in search of a Russian mood, while to the right is Andre Mattoni, chief assistant to conductor Von Karajan, preparing to deliver a line in the last act. At bottom, pre-recorded prison noises prove too much for Erich Kunz (Frosch), to the delight of Eberhard Waechter (Frank).
At the left is Herbert von Karajan, caught during a pause in recording the second act. The lighthearted couple below are Walter Berry (Falke) and Erika Käth (Adele), enjoying a minor rehearsal mishap involving Kunz and an exploding beer glass. A large noise, but no casualties reported.

The goateed man with can and iron is London's Christopher Raeburn, producing hissing steam for that troublesome coffeemaker. Above is T. A. McEwen (r), Manager of London's Classical Division, on a busman's holiday, matching high C's with tenor Giuseppe Zampieri (Alfred).
BY CHARLES FOWLER

A MIKE

OR TWO

AROUND THE HOUSE

Wherein is a reason or two to own microphones — together with expert, detailed guidance on what kinds to get for your particular purposes.
Do you need a microphone?

Before you hastily answer, "Of course not, I don't even have a tape recorder," think of some of the many things you could do with a mike. If you did have one, you could use it for . . .

Well, how about getting the neighbor's dog under control at midnight, without getting out of bed? Simply roll over, speak gently into the microphone, using whatever well-chosen epithets you think appropriate, and the sound, issuing from your patio speaker, will shatter the stillness of the night as well as some of your neighbor's windows and cause his animal to pause—at least momentarily. For that matter, you could call your own dog, without getting up from the easy chair. (The fact that he is already in, asleep on the living-room rug, does not affect the validity of this application.) You could also rig up a microphone near the bird's nest outside the kitchen window, to hear the little ones chirping. Or if you have your own little ones, put the microphone in the nursery.

Naturally, owning a tape recorder makes having a microphone more logical. In fact, it is difficult to buy a nonprofessional tape recorder without getting a microphone. The question then becomes: should you buy another microphone? Unless your recorder is used only for the most rudimentary live recording, the answer should almost certainly be yes. You can get noticeably better results by using a microphone designed to make full use of the capabilities of your recorder and at the same time to handle the type of recording work in which you are most interested.

Let's start a discussion of microphones and of which ones to use for what purposes with a review of tape recorders, since this is part of the problem.

Tape recorders can be divided into three and a half categories. Category No. 1 is professional equipment. It is easy to identify because it costs a young fortune, probably operates at 15 inches per second as well as 7½ ips, and can accept the big 10½-inch NAB reels holding 2,400 feet or more of tape. Category No. 2 is the semi-professional group. Such equipment costs between $300 and $1,000 (for stereo models). Most operate at 7½ ips; some at this speed plus a second one, either slower or faster. Most accept nothing larger than 7-inch reels. The familiar Ampex 600 series is typical. Recorders in category No. 3 can be identified by the fact that they include in the case a loudspeaker (or two, sometimes, though usually the second speaker required for stereo is at least in a separable part of the case). Naturally, there are amplification components in the package to drive the speakers. The half category sits between No. 2 and No. 3 and consists of tape decks (transport mechanisms with or without electronic accessories) designed specifically for use in conjunction with component high-fidelity systems.

As is the case with all attempts at neat classification, there are exceptions. Never mind; we are setting up

This Shure microphone is a typical ribbon-type strongly directional. Medium price.

This dynamic type, also from Shure Brothers, has a cardioid-shaped polar response.

Altec's dynamic microphone is omni directional and has good frequency response

Professional in quality, Altec's "Lipstick" is very small and unobtrusive. High price.

This Electro-Voice preamp is used with 50-ohm dynamic microphones. It adjusts output, bass, and treble, is battery operated.
general categories only relative to microphone selection.

The microphone characteristic of these different categories is impedance. Units in the first category use low impedance microphones. Units in category No. 3, almost without exception, use high impedance microphones. The other categories are mixed.

Impedance? For the purposes of this article, it will suffice to say that impedance is the resistance a device offers to the flow of alternating electric current, which is what sound becomes when it strikes, and actuates, a microphone diaphragm. That’s what a microphone is, basically—a diaphragm, or something similar to it, which moves when sound strikes it. The motion is converted to alternating electric current.

Classifying mikes according to their electrical characteristics would divide them into low and high impedance units. The practical application of this specification is simply this: a high impedance microphone cannot be used with a long wire connecting it to a tape recorder. A low impedance model can. The length of the connecting cable upsets high frequency response. Too long a cable cuts highs. To give a specific example: according to data in a booklet about microphones from Electro-Voice, it takes 920 feet of connecting cable, between mike and tape recorder or preamplifier, to cause a loss of one decibel at 10,000 cycles with a microphone having an impedance of 50 ohms. With a microphone having an impedance of 250 ohms, the same loss results with a cable 190 feet long. Both of these mikes are considered low impedance units. With a high impedance mike, as little as ten feet of cable could cause this much loss. Therefore, if you intend to use the microphone more than ten to twenty feet from its tape recorder (or an electronic connection of some sort), a low impedance model must be used, unless you are willing to sacrifice some fidelity.

Yet the tape recorders that most people are likely to have fall into category No. 3, which we said are designed almost without exception for high impedance microphones. Why? In a nutshell: because of cost. In a moment, we'll classify microphones in another way, by types, and we'll find that most of the inexpensive ones have high impedances. Most of the expensive ones are low impedance; that's just a characteristic resulting from their design.

Another characteristic of inexpensive, high impedance mikes is that they put out a lot of electricity. This is an advantage in several ways. It makes them more sensitive to sound. They are less troubled by hum and noise in the wires and electronic circuitry. And since they do have a high electricity output, the design and construction of the tape recorders with which they are to be used can be simplified.

High impedance microphones are also apt to have less adequate frequency response than those with low impedance. There is no direct relation between response and impedance insofar as design is concerned; it just happens that way. It is possible for a high impedance mike to have wide frequency response, but it's not usual.

Professionals use low impedance microphones because they can then use long connecting wires, which—among other advantages—lessen the danger of the mike's picking up noise from the tape recorder itself. And, by coincidence, the designs that produce good frequency response operate at low impedance. Some types have such a low impedance that it has been raised by electronic means to the desired 50 to 250 ohms.

Some microphones, by the way, can operate at both high and low impedance. A switch on the mike provides this selection.

If you have a recorder of the high impedance type and want to use a low impedance microphone, the answer is a matching transformer. Transformers can be inexpensive, with moderately good fidelity, or expensive and provide fine fidelity. The prices range from $3.00 to about $30. This is another reason why manufacturers of recorders in category No. 3 avoid low impedance arrangements; they would have to supply the transformer.

Yet they should, really. Time was, a few years ago, when the average home tape recorder in this class had such poor frequency response that using a better microphone wouldn't make any significant difference. Today, recorders in this group have improved remarkably, and a good mike is well worth the investment in improved sound.
The different types of microphones—dynamic, ribbon, capacity, etc.—and their relevant characteristics can be set forth in tabular form. So doing lets us consider another and much more important aspect of microphonedom: directional characteristics. This is not related to impedance, and not much related to type. It’s related to design.

You’d think, to listen to them, that loudspeakers spewed sound out in all directions. This is not true; most are directional and noticeably so, if you listen carefully. It is particularly true of the high frequencies; directionality increases with frequency. Precisely the same is true of microphones. Depending on design, they pick up sounds not from all directions equally but according to a pattern that is carefully plotted by their manufacturers and is available as a published specification.

The drawings shown here are of the polar response, as it’s called, of a microphone classified by its manufacturer as omnidirectional. This mike picks up about equally well from all directions a sound having a frequency of 500 cycles. It still does well at 1,500 cycles, but at 5,000 cycles it is far from omnidirectional and at 10,000 cycles it has become decidedly directional. The charts, by the way, are copied from the published specifications for this microphone, which indicate a commendable degree of honesty on the part of the manufacturer.

Directional characteristics of a microphone are important to the recording enthusiast. It is a rare microphone indeed that is truly omnidirectional at all frequencies. The very fact that the diaphragm has to be enclosed in some kind of case precludes true all-frequency omnidirectional acoustics; the case interferes. And actually, although omnidirectional may sound like a real achievement and therefore highly desirable, it is more often than not a hindrance to good recording. It takes a high degree of skill, and good acoustic surroundings, to make successful recordings with an omnidirectional mike. Why? Because such a mike picks up reverberation (and also the noise) of a room as well as the desired sound. To position such a microphone properly, one should start near the musicians (or vocalists, or whatever) and move away slowly until exactly the right balance between direct sound and reverberation or reflected sound is achieved.

It might be well to add here that many microphones have a presence peak in their response—that is, they catch the middle highs better than the rest of the frequencies. In many cases, this is deliberate. Remember that the reverberation characteristics of a room emphasize low frequency sounds and speed the decay of high-frequency sounds. Thus, for recording purposes, most rooms tend to be dull, and a presence peak produces results more pleasing to many people. In an acoustically correct recording studio, on the other hand, such a peak in a microphone would be intolerable.

Almost any degree of directionality is available. Microphones that are quite strongly

**NOTES:** all classifications, remarks and specifications above are "in general"; exceptions can be found in everything.  
1) Directionality can be controlled by structure of housing.  
2) Dynamics normally have low i.e., 50 to 150 ohm impedance but many are available with effectively high impedance through use of built-in transformers.  
3) Sometimes more or less mono-directional.  
4) Condenser mikes require power supply and preamp; output of preamp is normally of low impedance and high level.

to new and important
high-fidelity equipment

EQUIPMENT REPORTS

AT A GLANCE: The Grado Laboratory Series tone arm is designed for balance in both vertical and lateral planes. It has a quickly removable cartridge holder, and no soldering is required in the installation of either the arm or cartridge.

Tracking error and bearing friction are low. The grounding system of the arm is carefully designed to minimize any hum pickup. Made of walnut and aluminum, the arm is both attractive and easy to handle. This tone arm is available in three versions: (a) as a universal tone arm, $39.50; (b) with a matched custom cartridge, $69.50; (c) with a matched master cartridge, $85.

IN DETAIL: Although the Grado Lab. Series tone arm bears certain superficial resemblances to the standard Grado arm in its materials and bearing designs, it differs from the standard model in many important respects.

The arm itself is slimmer than the original Grado, and the pivots are supported by a sturdy aluminum extrusion. The lateral pivot is a steel rod with a sharp point which bears on a hardened insert in the base. The vertical pivots engage the arm near its lower edge, thus placing them nearly in the plane of the stylus and record. This pivot position is desirable in reducing wow from warped records.

There is relatively little overhang in the rear of the arm. This, in itself, has no effect on the arm’s performance, but it does make for a more compact and generally easier-to-use design. A sliding counterweight balances the mass of the cartridge. It is fitted with several removable weights so that it can always be used without requiring excessive overhang, regardless of the weight of the cartridge.

A unique feature of this arm is its lateral balance weight, which slides on a rod fastened to the extrusion containing the pivots. The weight does not move vertically, but follows the lateral motion of the arm. When the vertical component of the cartridge’s own weight has been counterbalanced, the lateral component is eliminated with the sliding weight of the arm. Then, with the arm fully balanced, it remains stable no matter in which way the turntable is tilted. All the downward tracking force is from a multi-turn coil spring in the arm, which is pressed down by an adjustment screw on the pivot housing.

The cartridge fits onto a plastic “carriage” or mounting plate. This carriage, in turn, is fitted to the arm and held in place by a knurled nut on the top of the arm. The four wires are presoldered in place and fitted with sleeve-type clips which mate with the pins on Grado cartridges (and on many other types as well). Thus no soldering is needed for the cartridge installation. At the end of the plastic cartridge mount are flexible fingers with contacts at their ends. When the cartridge is screwed into the arm, these fingers make electrical contact with corresponding points in the body of the arm. The cartridge can be slid along the length of the carriage until its stylus lines up with reference marks on the side of the plastic carriage. At this point, assuming the arm is correctly installed, correct overhang will be assured and the tracking angle error will be a minimum, regardless of the cartridge type.

The four-conductor shielded cable in the Grado arm is unusual for its lightness and flexibility. It is composed for four strands of very fine enameled solid wire, woven

Grado Laboratory Series
Tone Arm
with a light metallic braid. The entire cable is not more than \( \frac{3}{16} \) in. in diameter. No cloth or insulation other than the coating on the wires is used. This wire can be dressed in a loop and offers very low resistance to the motion of the arm.

The arm base mounts in a single \( \frac{3}{16} \)-in. diameter hole. The rubber disc which supports the base is slightly thicker on one side than on the other, so it can be rotated to tilt the arm one way or the other until the stylus is exactly perpendicular to the record surface, when viewed from the end of the arm.

An interesting feature is the steel arm rest. Cemented to the bottom of the arm is a small ceramic magnet, which is attracted to the rest when the arm is placed in it. This secures the arm firmly when it is not in use.

The Grado Lab. Series arm comes with a pair of shielded phono cables with molded-on plugs for ready connection to preamp input jacks. At the "turntable end," they come preconnected to a terminal strip with five screw-type terminals. Four screws are for the signal leads coming from the arm, and the fifth is for grounding the shield around those leads. This shield is pregrounded to the cartridge case, and to all metal portions of the arm, such as the finger lift, thus insuring against any increase in hum when the arm is handled.

The four leads from the arm are simply inserted under the screw heads on the terminal strip and the screws tightened. The ground lead goes to the fifth screw. Again, no soldering is needed.

We found the Grado arm quite easy to install. Only three \( \frac{3}{16} \)-in. holes (one for the shielded cable) are needed. The arm comes with a simple though accurate lever-type stylus force gauge, which uses pennies as counterweights. The entire installation can be completed in a few minutes.

The handling ease of the Grado arm makes it a pleasure to use. Needless to say, no drag or friction can be felt. The listening quality is as good as the cartridge will allow, and it is evident that the arm has a minimum of effect on cartridge performance, which is as it should be. We did notice—happily—a pronounced reduction in the degree of acoustic feedback at high volume levels in our system (a chronic trouble) when using the new Lab. Series arm. It seems likely that the excellent balance of the arm reduces its susceptibility to motor board vibrations from the speaker system.

Some care is needed in inserting the cartridge holder to insure that all the fingers are making contact. Unnecessary removal of the cartridge is to be avoided, we suspect, to minimize the likelihood of a poor contact.

The tracking error was zero at 6 in. and a \( 2\frac{1}{2} \)-in. radius, and reached a maximum of \( 2\frac{1}{2} \) degrees at a 3- to 4-in. radius. This is quite satisfactory, particularly with the error approaching zero towards the inner grooves of a record, where the effects of tracking error are most serious.

**AT A GLANCE:** The Quad is a full-range electrostatic loudspeaker, covering from slightly below 50 cps to well above the limits of audibility. Having no heavy cone or voice coil, it possesses very low mass and correspondingly a transient response. The price is $300.

The Quad has several limitations of a technical, aesthetic, and economic nature that may limit its general acceptance. In our opinion, however, it represents, by a wide margin, the closest approach to truly natural reproduction of sound in the bone that we have yet heard.

**IN DETAIL:** An electrostatic speaker differs from the usual dynamic speaker by not using a voice coil in a magnetic field to move a paper cone. Instead, a very thin plastic film, with a conducting metallic coating, is located near a grid of parallel wires or mesh. The two electrodes form the plates of a capacitor. When an electric charge is put on a capacitor, a force is developed which tends to move the two electrodes together. In the simplified case being described, a steady DC polarizing voltage can be used to establish an initial condition in which the flexible film is drawn partially towards the

www.americanradiohistory.com
open grid. If an AC signal is superimposed on the DC, the film will alternately move toward and away from the stationary electrode. The displacement of the air by the moving film produces the sound which we hear.

In order to obtain low distortion at large signal amplitudes, all good quality electrostatic speakers are of the push-pull type. The reasons for this, as well as the various construction techniques, are beyond the scope of this report.

To obtain a sufficiently strong electrostatic field, the electrode spacing must be small. This precludes large excursions of the radiating membrane, and in fact the physical properties of the materials of which these membranes are constructed do not permit large excursions. For this reason, most electrostatic speakers are tweeters, confining their response to frequencies above 1,000 cps, since only very small amplitudes are required from a reasonably sized membrane at these frequencies.

The British-made Quad has extended its frequency range downward by employing a large radiating area. It is 34 in. x 28 in., and practically all of this area is involved in radiating sound. At the higher frequencies, the radiation is from a narrow vertical strip in the center of the speaker, to minimize directional effects.

The electrode spacing is also greater than is customary in tweeters, and a much higher polarizing voltage is used. The result is a frequency response extending to below 50 cps with reasonably low distortion. The efficiency of the Quad is somewhat higher than that of some of the better American electrostatic tweeters, and the manufacturer recommends using a good quality 15-watt amplifier (such as the Quad amplifier). It is worth mentioning that this is one speaker which probably should not be used with a very high-powered amplifier, since the speaker has a definite upper voltage limitation making powers in excess of 30 watts inadvisable, even momentarily.

The surface of the Quad is slightly curved outward (towards the listener), for better projection in the listening area. It is mounted on three short legs. The high voltage power supply is built in, as is a matching transformer designed to be driven from the 16-ohm output of the amplifier.

Unlike other types of speakers, the Quad should not be installed closer than two feet to a wall, or three feet to a corner. The bass performance is degraded by such improper positioning. As may be imagined, this large and uniquely designed speaker assumes considerable prominence when it is standing in the clear, undisguised as a piece of furniture or anything else but what it is—a radiator of sound. For this reason, those interested in décor more than fine sound may regard it as not readily adaptable to the usual living room. In stereo pairs this visual problem may be further accentuated.

The instruction booklet accompanying the Quad is quite specific in limiting its application to rooms of less than 5,000 cubic feet. Our experience suggests that it will perform to best advantage in rooms considerably smaller than that, and in fact will do a fine job in a room too small to accommodate any conventional speaker. Unlike cone radiators, the electrostatic speaker is literally a window opening on the concert hall, and one can listen to it in comfort at a two-foot distance as well as at twenty feet or more.

In using a Quad some modification of listening habits will probably be necessary for people accustomed to conventional speakers. This speaker should not, and cannot, be subjected to the room-shattering levels beloved by some audiophiles. To do so is to invite breakup and distortion well below the level where the windows rattle. The Quad should be listened to at natural levels. When it is heard somewhat above normal level, the effect is that of being transported towards the orchestra; softer levels move the listener to the rear of the auditorium. This effect is very real, and we have not experienced it to anything like this degree in conventional speaker systems.

The Quad sounds quite different from any other speaker we have heard. It is crisp and taut at all frequencies, including the midranges and bass. There is not a trace of the boom or boxiness present to some degree in most conventional speakers. The separation of instruments in the orchestra, even in monophonic reproduction, is strikingly superior to anything we have previously heard. Any doubts as to its bass performance were dispelled when records having large bass drum sounds were played. A comparison against the best cone speakers we could muster showed that the cone speakers had much more apparent bass below 50 cps. A thump from the bass drum shook the room in a most satisfying manner. Switching to the Quad eliminated the strong, room-filled bass which we had come to equate with the best in high-fidelity sound. The drum sounded just like a large bass drum—no more, and no less. The absence of bass hangover and excitation of room resonances probably had a lot to do with this naturalness. Others who heard our Quad were equally impressed in its favor.

Having established by listening that this was a superior speaker we were curious to see what our measurements would show. Frequency response, taken out-of-doors, follows the contour of our microphone calibration rather closely. A line drawn through

Tone burst at 2.85 kc.

ON OFF ON OFF

Tone burst at 5 kc.
the centers of the many small peaks and dips in the response lies within 5 db of the microphone response from 60 to 15,000 cps. More important is the absence of any of the huge holes or peaks often found on lesser speakers. The low frequency radiation shows a slow, smooth decline starting at a few hundred cycles, but without the sudden change of slope characteristic of box speakers having a system resonance.

Bass frequency distortion is not outstandingly low between 50 and 80 cps, and rises sharply below 50 cps, which we consider to be the effective lower limit of the speaker’s response. At moderate levels and with some increase in distortion, a useful output can be obtained at 45 cps. Obviously, this speaker will not reproduce the lower pedal notes of the pipe organ as well as some conventional systems may, but this is probably the only type of music with which it shows any limitation. On bass transients, such as those produced by drums or keyboard instruments, the loss of extremely low frequencies is more than compensated for by the lack of resonance and hangover.

The polar response (not plotted) is a smooth cardioid pattern, down about 10 db at 45 degrees off center axis. The Quad booklet shows a 70-degree effective angle in the horizontal plane, and our measurements confirm this. We measured it at 7 kc, but polar response of the Quad changes relatively little with frequency. This no doubt also contributes to its listening quality.

Tone burst patterns revealed one frequency at which ringing occurred (2.85 kc). At all other frequencies, however, the tone burst pictures were virtually ideal, resembling the 5-ke burst shown.

The Quad should be listened to carefully, and preferably in one’s own home, before buying. Don’t be surprised if the result is a feeling of dissatisfaction with your present speaker system.

H. H. LABB.

AT A GLANCE: The Knight-Kit 83 YU 777 is a dual 30-watt stereo power amplifier of remarkably high quality. It is sold in kit form, with two printed boards containing most of the components. The chassis is handsomely chromed, and a metal dust cover is available. Distortion and hum level of this amplifier are extremely low, combined with very high gain and power output. It is conservatively rated in all respects. Price, without cover, is $84.50; metal cover is $6.50.

IN DETAIL: Although the amplifier sections are on two printed boards, the kit builder must mount all components to the boards and then solder. In our opinion, construction of this amplifier is not a project for a novice, unless he is adept at soldering. Careless soldering on a printed board can cause more trouble than in conventionally wired circuits.

Each amplifying channel has a pair of EL37 output tubes, rated at 30 watts output in the tapped-screen output configuration used. Each tube has a jack in its cathode circuit for balancing the currents with an external millimeter. Each amplifier has its own level control, a feature particularly desirable in view of their rather high gain. About 0.5 volts — less than many preamplifiers normally deliver — will drive them to full output.

A number of “deposited carbon” resistors are used in the low level circuits, in the interests of low noise through these stages. Precision 1% resistors are also provided for accurate circuit values in the phase inverter and feedback stages. A common power transformer is used for both channels, but the filter resistors and capacitors are entirely separate. This thoroughly decouples the two amplifiers from each other. A pair of slow-heating GZ-34 rectifiers are used, eliminating warm-up surges on the components.

The two channels may be paralleled for mono operation by a switch on the chassis. The output terminals are strapped together in this mode of operation. A very effective means is provided for exactly matching the gains of the two channels when they are operated this way, an important detail not always found in dual power amplifiers. One channel of the Knight-Kit amplifier is designed with slightly higher gain than the other. To balance them, you temporarily connect a speaker between the two amplifier outputs and press a test button. This injects a 120-cps signal into both channels. The gain of the more sensitive amplifier then is reduced until the level of the buzz is at a minimum. This indicates that the two gains are matched. The outputs may now be paralleled.

The performance of the Knight-Kit amplifier proved to be a pleasant surprise. Although it is rated at 30 watts per channel or 60 watts for both, we found IM distortion to be only 0.3% at 45 watts from one channel and 0.35% at 90 watts from both chan-

Allied Knight-Kit

60-Watt Stereo Amplifier

November 1960
At 2% IM (the usual point for rating maximum power) the output was over 100 watts. At any listening level distortion was unmeasurable. The 20-cps harmonic distortion was only 0.2% up to 10 watts, and reached 1% at about 20 watts. The IHFM power bandwidth rating of this amplifier is 20 to 20,000 cps at 15 watts and 1% distortion (per channel).

Hum and noise were 85 to 90 db below 10 watts output in each channel, which is far too low to hear and difficult to measure. The amplifier was stable with capacitive loads of less than 0.15 mfd, which suggests its suitability for use with some electrostatic speakers. Frequency response was as flat as one expects a basic power amplifier to be, down less than 1 db at 20 and 20,000 cps.

In listening tests, each channel of the Knight-Kit amplifier was at clean-sounding as it measured, and had sufficient power to drive any speaker system. Our few criticisms of this amplifier are directed at some design details in the metering and balancing circuits. Plugging a meter into one jack, then another, and then repeating this procedure several times while adjusting the balance control proved a cumbersome process. Actually, there is no means to adjust the absolute operating currents through each of the output tubes and therefore no need to measure them. What is measured here is the relative balance of the output tubes. While the amplifier will perform quite satisfactorily with slight unbalance at this stage, careful balancing is essential to obtaining the extremely low distortion levels measured in our tests; and the prescribed balancing procedure does permit the user to achieve this balance. The meter jacks themselves were fragile, and liable to crack on installation. Finally, the manual correctly cautions against inserting a plug into a jack unless a meter is connected to the other end of the plug. The reason for this caution is to avoid opening the output circuit which could place a sudden overload on the output tubes. Yet the same thing can happen, if only for an instant, even when the plug is inserted correctly. And if the plug fails, possibly after long periods of use, the open circuit and resultant overload could conceivably damage an output tube.

In any case, the need for a better designed jack is, in itself, no major fault. The overall features and performance of this amplifier left us very favorably impressed.

H. H. Labs

AT A GLANCE: The Ampex 970 is a complete portable tape recorder with built-in stereo monitoring speakers. It has separate record and playback amplifiers and heads, and therefore can be used to monitor programs as they are being recorded. Equipped with both 7.5-ips and 3.75-ips tape speeds, and both half-track and quarter-track playback heads, the Ampex 970 offers high flexibility and good performance. Weight is 43 lb., price $750.

The Ampex 960 is similar to the 970, except for the omission of playback power amplifiers and speakers.

IN DETAIL: Although many preamplifiers have provision for monitoring a signal from the tape recorder output while the recording is being made, the Ampex 970 is one of the surprisingly few machines designed for home use which have the three heads and separate record and playback preamplifiers necessary for this type of operation.

In addition, there are separate sets of recording level controls for the radio (high level) inputs and for the microphone inputs. The two inputs are mixed, which allows for still more flexibility in combining several inputs. A variety of special effects may be produced by re-recording the output of one track, delayed by the time difference between the record and playback heads, onto the other track. This procedure can provide an echo chamber effect of almost any desired degree. Other special types of recordings include sound-on-sound (adding to an already recorded tape without erasing it), and language or music instruction tapes, where the instructor is recorded on one track and the student on the other.

The playback preamplifiers have their own level controls. A control labeled (not very informatively) SELECTOR contains a pair of concentric switches that perform unrelated functions. The inner knob contains the on-off power switch, and three positions marked MONITOR, SINGLE, and STEREO. In the MONITOR position, the incoming signal is fed to the built-in speakers for monitoring. In the SINGLE and STEREO positions the
speakers reproduce the outputs of the playback amplifiers, and the over-all operation of the recorder is changed from stereo to mono or vice versa. The outer knob switches the recording level meter (only one is provided) between the two channels, or to read the single recording level for mono recording. Although this seems a bit inconvenient, recording gains are normally set up at the beginning of a recording session and are not likely to be changed during recording, nor is the relative balance of left and right signals likely to change much once the proper conditions have been established.

A bar-handled switch places the tape in motion for either record or playback. A button, mounted flush with the surface of the recorder panel, must be depressed while the tape transport knob is actuated in order to make a recording. It is quite impossible to erase a tape unknowingly.

A second knob places the tape either fast-forward or rewind. In any mode of operation, a stop button is used to bring the tape to a halt. All transport switches return to their off position when the stop button is pressed. Although there is no tendency for over-run or tape spillage, the tape coasts to a stop rather slowly when a rewind or fast-forward operation is being completed. This makes it somewhat awkward to return to a previously logged spot without several “passes,” since the tape usually overshoots or undershoots the mark.

A button between the reels is pulled out for 7.5 ips and pushed down for 3.75 ips. A small button protruding from the tape head cover shifts the heads for quarter-track operation. Tape spillage is prevented by a shut-off device which turns off the tape drive if there is no tension supplied by the take-up reel (a situation normally occurring when the tape has passed completely through the machine, but also resulting if the take-up reel is obstructed in any way).

Playback equalization and frequency response of the Ampex 970 were measured with an NCB Alignment Tape, recorded with the NARTB characteristic. Frequency response proved to be smooth from 50 to 10,000 cps, being slightly up at the low end and down at the high frequency end. Test tones were recorded and played back on the machine, at a level 20 db below the indicated maximum level on the meter. The combined record/playback response was within 2.5 db from 25 to 12,500 cps at 7.5 ips tape speed, and 25 to 3,500 cps at a 3.75-ips tape speed.

The signal-to-noise ratio, referred to the maximum indicated recording level, was 45 db (7.5 ips, half-track) and 40 db (3.75 ips, half-track). Quarter-track figures were 3 db less satisfactory in both cases. These measurements, though indicating satisfactory performance for home use, did not seem consistent with our listening appraisal of the recorder. A clue to the matter was the low audio output from the playback amplifiers when a “maximum level” signal was recorded—about 0.3 to 0.4 volts. Distortion measurements showed that harmonic distortion in the reproduced output, at 1,000 cps, reached 2% only at a level 10 db over the meter maximum value. Most home recorders are rated at the point where harmonic distortion reaches 2 or 3%.

Using this as the basis for signal-to-noise ratio measurements, the values improve by 10 db, making them quite respectable.

Incidentally, a signal only 4 db over maximum will “peg the meter,” so it appears that any recordings made within the range of recording meter indications will be very good from the standpoint of distortion. Distortion falls to a small fraction of a per cent at “on scale” recording levels.

Mechanically, the Ampex 970 is as good as it is electronically. Wow and flutter are 0.017% and 0.027% respectively at 7.5 ips. At 3.75 ips wow does not exceed 0.1%.

Worthy of mention is the unique “Stereograph” or slide-rule instructions for operating the recorder. Practically any type of recording or playback function is listed across the top of the slide rule. When the slide is moved to line up an arrow with the desired mode of operation, all the correct control settings are shown through windows on the rule. On the reverse side there is a larger window, which reveals hints on interconnection and other aspects of the recorder’s operation. Even though this gadget may at first seem more formidable than the recorder itself, it can be very useful.

As is generally the case with recorders having built-in playback power amplifiers and speakers, the quality of sound emanating from the monitor speakers cannot even remotely suggest the performance potential of the machine. Patently, these playback channels can prove a convenience for on-the-spot monitoring of recordings but the stereo effect from the speakers, facing sideways and spaced about 30°, cannot compare with the sound possible from better speakers better spaced.

To summarize, the Ampex 970 is an outstandingly fine instrument in respect to distortion, signal-to-noise ratio, and tape speed constancy. Although its frequency response at 3.75 ips is so limited that we would question its value for playing four-track stereo tapes at that speed, at 7.5 ips its response is smooth and more than adequate for any high-fidelity needs. The slight loss in response above 10 kc is more than outweighed by the low end response, which holds up better than that of any other comparable recorder we have tested.

H. H. Labs.

November 1960

69
AT A GLANCE: The Rolls A.E.8-3b is a small integrated speaker system of the ducted-port bass reflex type. Although it can claim no new or advanced design features, its single 8-in. woofer and 3-in. cone tweeter produce a pleasingly balanced, musical sound which we believe superior to many competitively priced speaker systems and indeed to some systems costing over twice as much as the Rolls’ modest $89.

IN DETAIL: The Rolls speaker, though certainly compact, is not one of the so-called bookshelf types. It stands on four legs, with its top 24½ in. from the floor. It is 14¾ in. wide and 12¼ in. deep. The port opening is underneath the speaker cabinet.

Instead of opening directly from the interior of the enclosure, as in the ordinary bass reflex enclosure, the port of the Rolls is separated from the cabinet interior by a tube, or duct. This has the effect of lowering the cabinet resonant frequency, which accounts for the satisfactory low frequency performance of this small speaker with its conventional driver units.

The small dimensions of the cabinet prevent any low frequency resonances from developing within it, and the internal resonances occur in the 1,000- to 2,000-cps region. These are well damped with an internal lining of ½-in. thick Fiberglas.

According to the manufacturer, the acoustic crossover from front radiation to port radiation occurs at 120 cps. The crossover to the tweeter is at 7,500 cps. The nominal speaker impedance is 8 ohms, and the power rating is 20 watts of program material.

The cabinet, incidentally, is covered with a wood-grain formica or similar veneer, in walnut, mahogany, blond, or maple finishes. It is said to be practically damage proof and is certainly very attractive.

Prior to performing any tests on the Rolls speaker, we spent many hours listening to it and comparing it to other speaker systems. From the beginning we were struck by the pleasing balance between highs and lows, and the freedom from unnatural coloration. The quality was good enough for the speaker to be used as half of a stereo pair with a three-way system employing a very good electrostatic tweeter, without requiring any tone control juggling and without degrading the sound significantly.

Our frequency response measurements, taken out-of-doors, do not show the Rolls to be unusually smooth or unusually rough. We would judge it to be about average, with variations of perhaps ± 6 db from 80 to 15,000 cps. Our high frequency response tests were not carried above 11 kc, but all indications are that response is maintained to at least 15 kc.

The low frequency harmonic distortion begins to climb below 80 cps, and we would consider 60 cps to be the lower usable limit of the Rolls speaker, allowing for normal bass reinforcement when used indoors.

The high frequencies are beamed quite sharply, as the 7-kc polar curve shows. This was one of the more sharply directional speakers we have tested.

A fairly clear clue to the good listening qualities of this speaker came in making tone burst measurements. These are a good qualitative indication of a speaker’s transient response, and provide the best correlation we have found between a test measurement and the subjective qualities of a speaker. The middle frequencies are not particularly good in this respect, as the 1.3-kc tone burst picture shows. This is representative of the worst response we obtained in testing this speaker. On the other hand, at higher frequencies (such as 11.5 kc), the tone burst pictures are clean and free from distortion.

In most of the region above 2 or 3 kc, this is the type of response obtained. Certainly no one of these tests shows the Rolls speaker as being superior in any single aspect, but in the aggregate they suggest a unit better than average in this price range. Listening tests are even more flattering than any of the measurements, largely due, we believe, to better than average transient response, freedom from spurious responses, and a generally smooth overall response.

NEXT MONTH’S REPORTS

Sony Stereorecorder 300 Tape Recorder

II. H. Scott 399 Stereo Tuner/Amplifier

Karg CT-2 FM Tuner ... and others

High Fidelity Magazine
JUSSI BJOERLING left two major recordings in the "icebox" at the time of his death in September. One is the Verdi Requiem, recorded in Vienna this June, which RCA Victor has just issued. The other is Madame Butterfly, recorded in Rome in August 1959, which Capitol will release in January.

Two complete opera recordings were scheduled for Bjoerling's 1960 summer agenda, but neither got very far. One was a stereo remake of La Bohème with Victoria de los Angeles for EMI-Capitol. Everyone concerned had agreed to this project in principle, but it bogged down in a maze of scheduling problems.

The other undertaking, Un Ballo in maschera, which Bjoerling was to have recorded for London Records, progressed further. The tenor arrived in Rome early in July along with the other members of the cast (Nilsson, Simionato, Stahlmann, and MacNeil), the conductor Georg Solti, and John Cudahaw and his team of engineers. It has always been Solti's practice to require a sizable amount of preliminary piano rehearsal for his opera recordings, but Bjoerling did not want to go along with this method of working. He knew his role, he said, and would be prepared to sing in customary form when the tapes started rolling. Solti insisted. At length, an uneasy truce was arranged in which Bjoerling agreed to arrive half an hour before each session for a short piano rehearsal with the conductor.

The first session in which Bjoerling took part proceeded with reasonable smoothness. Observers are agreed that Solti went out of his way to be polite to the great tenor, and in this atmosphere of near-cordiality the Act I and Act II ensembles were taped. They proved to be the last recordings Bjoerling ever made. At his next session Bjoerling was asked to run through his Act I aria, "La rivedrà nell'estasi," during the preliminary rehearsal period. He refused—on the grounds that he knew this short aria as well as anyone present. Solti was adamant, feeling that the most familiar piece of music merited rehearsal.

In this clash of artistic temperaments (doubtless aggravated by Bjoerling's poor health), London Records had to choose between conductor and tenor. Bjoerling went home to Sweden the next day, the cast broke up (perhaps to be reassembled in 1961, with Bergonzi as tenor), and the rest of us are left to speculate about the recording that might have been. Bjoerling fans can console themselves with the news that Capitol intends to reissue most of his old (i.e., 1936-48) recordings of Swedish origin.

A miscellany of opera arias will come out in January, to be followed shortly thereafter by an LP of songs and operetta excerpts.

LAST DECEMBER we reported on the operatic plans of Columbia Records' new artist-and-repertoire chief, Schuyler Chapin. Since then, no operas have been issued on the Columbia label, and when we met Mr. Chapin recently we asked him what had happened. The opera project, we were assured, is still very much on his mind.

"You see," he told us, "we thought we would approach the problem scientifically. We did considerable market research to measure the potentialities of the opera album business. It lasted many months, and when it was completed we were back just about where we had started. We learned that the only sure sellers were the old standards. Occasionally something off the beaten track might hit the jackpot (as London's Rheingold did), but you couldn't count on it.

"Well, as I told you before, we're dead set against recording old standards just for the sake of loading the market with another Aida. But we also can't indulge our repertoire convictions to the point of losing a lot of money. In this business you've got to have your head in the clouds and your feet in the box office. At length we decided to go ahead and record the operas that made artistic sense to us, provided—and here's the sticking point—we can at least break even in the process."

The first item on Columbia's operatic agenda is Stravinsky's fairy tale opera Le Rossignol, to be recorded under the composer's direction in Washington, D.C., this month. Stravinsky has apparently made several significant changes in the score, which dates from 1909-13.

Next, if all goes well, comes La Juive, by Jacques Halévy, a mid-nineteenth-century French opera which had a considerable vogue at the Metropolitan and Chicago Civic Opera companies between the wars, but which has been almost totally neglected for twenty-five years. The role of Eduard, in which Caruso and Martinelli did some of their most notable singing, will be taken by Richard Tucker; Eileen Farrell will follow in the footsteps of such potent predecessors as Rosa Raisa and Rosa Ponselle in the role of Rachel; and the conductor will be Leonard Bernstein, who has a particular affection for this opera.

But note the "if" clause above. The recording of La Juive hinges on holding down costs to manageable proportions. Schuyler Chapin is now in Europe investigating possible locales for the sessions. Provided it makes economic sense, work on La Juive will begin some time next spring.

THANKS TO the postwar renaissance of interest in pre-Verdi Italian opera, we are being given a chance to reevaluate (or, more accurately, to evaluate) a whole repertory of previously "dead" operas. Of these, none has been deader until recently than Il Barbiere di Siviglia by Giovanni Paisiello, who in his day (1740-1816) was an immensely successful, internationally admired composer. Paisiello died certain of his lasting fame, but he had not reckoned on a young composer named Rossini, who with a single stroke drove Paisiello's most popular creation into oblivion almost overnight.

Well, here is Paisiello's Barber brought back to life again, and the first thing we shall want to know is how it compares with Rossini's version of the same story.

Paisiello composed his Barber in 1782 in St. Petersburg for the Tsarina Catherine, who had been much impressed by a performance of the play by Beaumarchais. Consequently, it is not surprising that Giuseppe Petrosellini's libretto hews much more closely to Beaumarchais than does Cesare Sterbini's text for Rossini. Figaro's first entrance provides an excellent case in point. Rossini, of course, uses the occasion for one of the greatest of all bravura arias, "Largo al factotum." Paisiello and Petrosellini, on the other hand, place a paper and pencil in Figaro's hand, and in his opening aria ("Diamo alla voja il bando"), have him improvise a song—exactly what Figaro does on his first appearance in the play. Beaumarchais's delightful scene for Barthole and his two impossible servants, to give another example, does not turn up in Rossini at all, except in the vestigial character Ambrogio; in the Paisiello version, it becomes an uproarious trio, with one servant (the dullard Brightboy) yawning almost uninterrupted, the second (the senile Youthful) sneezing continuously, and Bartolo maintaining an incessant scolding patter. Altogether I think it fair to say that from a dramatic standpoint Paisiello's opera is the better of the two. Its characters are more completely filled out than Rossini's, its plot more subtly woven, its libretto more stylish.

To be sure, comparisons can be somewhat misleading here, for we judge the Rossini opera largely on the basis of the tasteless, anything-for-a-laugh performance it is gen-
erally accorded—Rossini's Barber has disappeared almost as completely as Paisiello's. And, of course, there is the matter of the music. It is not hard to see why Rossini's work, with its string of inspired arias and ensembles, so quickly replaced Paisiello's in the public affection. The pleasing little serenade sung by Paisiello's Almaviva sounds a bit prosaic after the melting beauties of 'Ecco ramandai' and 'Se il mio nome,' and the Calzamaglia aria of Paisiello's Basilio, evocative as it is of slander's storm, is not the malevolent tuer de force that Rossini gave to his Basilio. Nevertheless, if the listener will accept Paisiello's music on its own terms, he will find this score full of charm and wit. The melodies fall very easily on the ear, and as in Mozart, the working of them contains countless unexpected little turns that keep the theatrical pot bubbling. Everything is done with the simplest of materials, but done with precision and dramatic shrewdness.

Mercury's production is a model for future projects of this kind (and let's hope that the Barber is only a beginning). A critic, naturally, must find something to complain of, and in this instance it is possible to complain of the cuts. They are not lengthy, and they are mostly in recitative, but they include sections that are important dramatically, and a third record would have been worth the price to retain them. Otherwise, there is simply nothing wrong with this recording. Fasano and his Virtuosi di Roma are of course in their special métier here, and they play magnificently. The talented and—to judge from her photos—beautiful Graziella Scutti makes a tender, provocative Rossina; particularly instructive is the way she points the secco recitative—every line counts. Nicola Monti puts his pure, flowing tenor to its best natural use as Almaviva. Panerai's sturdy, ringing baritone and intelligent characterization make him a first-rate Figaro—how much more ingratiating he is in a part like this than when he is battering his way through the high-lying dramatic roles! Capecchi again demonstrates the range of his art with a fine portrait of Bartolo, and Mario Petri deals as well as anyone might with the very high tessitura of Basilio's aria. The two servants (Florindo Andrelli and Leonardo Monreale) are superb.

Mercury's engineering is the best I have yet heard from that company—clear, natural sound with not a trace of distortion in either the mono or stereo version. The accompanying booklet, with notes and libretto, is handsome and informative. Altogether, this is a prize—don't miss it.

PAISIELLO: Il Barbier de Savignia

Graziella Scutti (s), Rosina: Nicola Monti (t), Count of Almaviva; Florindo Andrelli (t), Youthful and An Alcaldes: Rolando Panari (b), Figaro: Renato Capecchi (bs), Dr. Bartolo: Mario Petri (bs), Basilio: Leonardo Monreale (bs), Brightboy and A Notary: Virtuosi di Roma, Renato Fasano, cond.

Richter's First Beethoven, and Three Others

by Harris Goldsmith

EVERY great artist (and Sviatoslav's Richter is unquestionably great) has many facets to his make-up. One of them, however, usually tends to dominate the others. Hence, Toscanni was noted for his driving force, although his interpretations were also tender and compassionate. Bruno Walter, despite his abundant energy, is primarily regarded as a genial conductor.

But Richter's numerous recordings present a somewhat enigmatic picture. The pianist has been revealed as a classicist, romanticist, extrovert, introvert, impulsive thunderer, and deliberating minimalist. Each of the qualities is, in turn, equally prominent, but none emerges as a prime characteristic of his playing. His recordings cover so wide a range that they seem to represent separate personalities. I believe that this exciting variety in Richter's playing, combined with his unusual sensitivity and already legendary technique, accounts for his preeminence among Soviet pianists.

Of the four releases reviewed here, three are of transcendent quality and one is a comparative dud. The unsuccessful disc is the Rachmaninoff performance. Richter's interpretation is authentically romantic, though his rendition is more similar to Moisewitsch's delicately crafted one than to Rachmaninoff's own. I find his tempo too erratic, and rather on the lethargic side, though the singing quality of his tone is captivating. Unfortunately, the low price of the record is largely offset by the quality of the reproduction, which is shallow, congested and garbled by artificial echo. The effect is not enhanced by the vibrato-ridden playing of the Leningrad Orchestra. At any rate, Richter has recorded the same work for Deutsche Grammophon, and since that version has good sound and contains a bonus of six Rachmaninoff Preludes, it is well worth the extra money.

The pianist's first Beethoven recording is a revelation. The Pathétique Sonata is performed with intensity and profundity. Approaching the work as a dramatist and colorist, Richter plays with enormous brio and with considerable projection of the piece's forward thrust. His performance here remains a singing one, avoiding the four-square inflexibility that has been erroneously touted as "German Tradition." Along with this cantabile emphasis goes a subtle rubato, plastic but strong. The pianist's variation of tempo, especially in the last movement, may cause some eyebrows to be raised, but the spirit of his convincing interpretation is unmistakably Beethovenian. The Baguettes are recorded the same sort of treatment, but since these pieces are shorter and more rhapsodic, the freedom of tempo and phrasing is less apparent and more conventional-sounding. These performances eclipse even such admirable competition as Denis Matthews' of the complete sets (I have not heard Schnabel's version of Op. 126), not so much by any greater pianistic ability as by their sheer perception and personality. For instance, Richter's slower tempo in Op. 126, No. 4 conveys a tranquil nobility that makes Matthews' rendition sound constrained and restless, and in Op. 126, No. 4 (a particularly wonderful piece, incidentally!), Richter's playing is stormy and brooding while Matthews, by comparison, is merely metronomic and forthright. Another instance is the Prokofiev sonata, which has humor, melting lyricism, and a touch of irony in this reading. By a judicious inflection of tonal color, Richter imparts a
From Bernstein and the Philharmonic—

Ives’s Second Symphony, Grandly Conceived

by Alfred Frankenstein

Let us begin by rising, facing the East, and bowing three times to F. Charles Adler, the Vienna Symphony Orchestra, and the Society of Performing Artists, which put out records under the label SPA. They recorded Ives’s Second Symphony many years ago. For a long time it was the only obtainable record of a big symphonic work by this composer; now it is rendered obsolete, but one recalls it with pleasure and gratitude.

The Second Symphony is one of Ives’s most endearing, melodious, richly colored, and grandly constituted works, and represents perhaps the most successful fusion he was ever to make between his favorite type of thematic material and the European symphonic tradition. It is full of old New England hymn tunes, Civil War marches, sentimental Victorian ballad melodies, patriotic songs, and reminiscences of improvisation in the organ lofts of small Connecticut churches, but in form, texture, warmth, and grandeur of build it belongs to the tradition of Schumann and Brahms. Its fourth movement—a slow introduction to a fast finale—reminds one mightily of the so-called “Cathedral Scene” in the Rhenish Symphony of Schumann; and, just as Schumann turns from the grandeur of a solemn service in the Cathedral of Cologne to the bustling folk life of the Rhineland, so Ives turns from the visionary revelations of his organ playing to Stephen Foster, country fiddlers, and Columbia, the Gem of the Ocean.

This, then, is the first American symphony to set beside Schumann and Brahms, and it is still one of the noblest, most beautiful, and most entertaining. Bernstein gave it the first performance it ever had, in 1951, just fifty years after it was completed. His interpretation possesses that charm and blandishment which are uniquely his. No conductor of the present day possesses a more markedly personal style, especially in the performance of slow movements. Bernstein is an irresistible lyricist, even when, as here, one sometimes feels he is indulging in a bit of schmaltz, the lovely F major tune which

November 1960
forms the second theme of the first movement in this symphony is marked molto allegro, not con sentimento, but Bernstein plays it that way and I must admit, gets away with it. The recording is absolutely superb, in both mono and stereo. Everything tells, nothing is buried in the mass of the sonority, and yet the disc abounds, as it should, with massive sonorities of the grandest and most colorful kind.

The record sells for a dollar more than most because it is accompanied by a six-page, full-size brochure called "The Ives Country." This contains twenty-four photographs of the composer, his family, his home, and so on, and is by far the most extensive Ives iconography ever published. For this reason it is all the more regrettable that it is printed in a hideous ox-blood color which completely wrecks whatever photographic quality the plates had to begin with.

There are very interesting notes on the symphony, by Bernstein himself and by David Johnson. Bernstein exaggerates, however, in the long list of symphonic works which, he claims, are quoted in this one.

Many of these "quotations" are merely accidental resemblances of the kind that occur in the work of every great composer. It is true, for instance, that in Ives's third movement one may find these three notes:

![Musical notation]

and that in the second movement of the first symphony of Brahms one may find these three:

![Musical notation]

But the notes of the tonic chord in descending order and in an unaccented part of the bar amount to a quotation, then everybody who has ever written a symphony has quoted from everybody else.

Both Johnson and Bernstein observe that the symphony ends with a wild, 11-note tone cluster, but neither points out the one note which is omitted from it. It is B, the home-base tone for the first movement, and the one note which, according to the "classic" laws, ought to be present in the symphony's final chord, Rêveille, a call to wake up, sounds in the trumpets just before this final tone cluster. Its meaning could not be clearer.

- COLUMBIA K1 5489. LP. $5.98.
- COLUMBIA KS 6155. SD. $6.98.

Two Don Giovannis, Each a Happy Event

There are some opera-Henry Goodman or Carmen, for instance-in which a first-class performance in the title role is enough to raise an otherwise routine production to brilliance. There are many more in which two fine singers can and often do mean the difference between failure and success. Sometimes, indeed, in these latter operas only one singer may do the trick, as we saw last season at the Metropolitan when Birgit Nilsson singlehandedly made an exciting event of Tristan again. But Mozart is more demanding, in this respect as in others. Especially in Don Giovanni he poured glorious music into every role. There are shorter parts than others among the eight in that opera, but there are no minor parts. A third-rate Masetto, a hoarse or quavery Commendatore can ruin important scenes. And even one of the other six characters has arias to sing that are, musically and technically, among the most difficult, as well as the most beautiful, in the repertory.

It is therefore not surprising that completely satisfying performances of Don Giovanni are rare and a completely satisfying recording nonexistent. Nevertheless, each of the available recordings (the five sets already in the catalogues are discussed on p. 127 of this issue) has strong assets. This is especially true of the two latest ones.

The new RCA Victor recording has strength in several departments. Miss Nilsson makes a remarkably fine Anna. The voice has a rather individual, and to me appealing, color and the ease with which it attacks high notes, as in "Non mi dir," or dwells in high regions, as in the duet with Ottavio near the beginning, is a joy to observe. Rapid runs are executed accurately and usually with assurance; only in the sixteenth-note roulades of "Non mi dir" is there a certain lack of confidence. Musically, the style is unexceptionable. Elvira, too, is very well sung here. Miss Price has developed the power and technique to do justice to almost all of Elvira's music; at the same time her voice has a womanly quality that helps make Elvira a sympathetic, as well as pathetic, character. She is as concerned with the musical quality of the secco recitative allotted to her as with that of the set numbers. There are a few moments when the lower part of her range does not have the presence it might, but whether this is a fault of the voice or of the recording setup I cannot tell. Miss Ratti's voice sounds light and lacks some of the sensuousness that belongs in the part, but it is a sweet voice, skillfully handled. Siepi is uneven. Much of the time, as in the trio in Act 2, the succeeding serenade, "Là ci darem," the champagne song, he is in good form. In other places, like the finale of Act 2, his singing is less secure, the pitches uncertain. Corena's Leporello and Vallerti's Ottavio are thoroughly acceptable performances; if they do not have any especially individual character, neither do they have any marked stylistic or technical weaknesses. Arnold van Mill makes a competent Commendatore. Blankenburg's Masetto does not go very far in reflecting the emotions of the character but his is one of the most attractive voices I have ever heard in this role.

Leinsdorf does a fine job here. The fast sections are spirited; the slow ones do not drag. There are a few flyspecks: a couple of passages in the second finale where singers and orchestra are not quite together; another, in the sextet, where orchestral nuances are flattened out. I am not sure that the tam-tam crash in the finale is needed. But he makes up for these by including the duet for Leporello and Zerlina, "Per queste sue mani," together with its surrounding recitative, which was among the new portions Mozart wrote for the first Vienna performance and which is not in any of the other.

by Nathan Broder

High Fidelity Magazine
orded versions. The duet is an extremely
in jesturing, if not quite up to the rest
of the work. This version is consequently
the most complete ever recorded, containing
every note (except for a tiny snippet of
recitative) in Einstein's edition of the score.
This is also excellent. Balance is care-
fully calculated. As one example among
many that could be cited: in "Batti, batti" voice,
solo cello, woodwinds, and strings are
so disposed that everything is heard in
the right relationship in a luminously trans-
parent texture. There is much spaciousness
and sensible separation. There is also some
clearly audible and effective "movement."

The new Angel set is noteworthy for a
very musical conductor and a strong line-up
of ladies; it also has some minor-league sing-
ing from the men. Let us take the points up
in that order. Giuliani, in the recorded per-
fomances I have heard him conduct, has
impressed me as not only an able technician,
but a musician seeking to convey the essence
of what he is playing with color and flexibil-
ity. The present recording makes it clear
that he also has a flair for the dramatic.
After Leporello's aria, a taut excitement is
maintained throughout the opening scene.
It is hard to spoil the finale, but few con-
ductors bring in the trombones there with
such golden tones and with so imposing,
unemphatic, an effect. Throughout the work
Giulini does not miss a single instrumental
point.

Miss Sutherland has been creating con-
siderable stir in England, and her work here
indicates why. She does not hit her stride
until "Or sai chi l'amore," but there she shows
power and the ability to encompass all of her
high-lying music with accuracy and without
faltering or losing quality of tone. In the first
part of "Non mi dir" her singing is ravish-
ingly beautiful; in the allegretto section her
coloratura is clean, rhythmic, and on pitch.
She makes positive contributions to most of
the ensembles in which she participates. I
am happy to report that Miss Schwarzkopf
is in top form here. Her Elvira is a noble
and unhappy lady, not a nag. The style is
big and confident. In "Ah chi mi dice mai"
the high A flats and B flats are firm: "Ah
fuggi il traditor" is strong and passionate; the
wonderful accompanied recitative preceding
"Mi tradi quell'alma ingrata" is sung with
poignant beauty, and the aria itself is ex-
tremely well done. Miss Scuttì makes a
pleasing Zerlina, as she did in the Epic re-
cording; her voice sounds a bit thin, but it is
not sharp, and she handles it in very musical
fashion.

The Don Giovanni is unfortunately not
in a class with these artists. Waechter sings
the serenade nicely, but elsewhere when he
is not crooning ("Là ci darem"), he shouts
(the champagne song). In the recitative he
heavily underlines every point. He gives the
impression not of an aristocratic libertine,
but of a petulant and rather foolish man.
The Leporello, Giuseppe Taddei, also over-
acts and shouts in the recitative. In his set
numbers he is less clownish, and in the grave-
yard scene he is convincing. Luigi Alva re-
veals in "Il mio tenore" a large chest-capacity
and a good high A, but otherwise his con-
tribution is workmanlike rather than dis-
tinguished. Cappuccilli as Masetto displays
considerable feeling in "Ho capito," but he
too has a tendency to yell. Frick, the Com-
mandatore, is the only one of the men who
is thoroughly satisfactory. His singing, espe-
cially in the finale, is splendidly imposing
and resonant.

The quality of the stereo is variable. In
some numbers the voices and some of the
instruments seem to be on one track and the
rest of the instruments on the other.

This is a particular problem here because
there is not a great deal of difference in
timbre between the voices of Waechter and
Taddei or Sutherland and Schwarzkopf.
Consequently when both voices of one of
these pairs come out of one speaker, the
peculiar advantage of stereo is not being
put to use. In other numbers, however, nota-
ably the quartet in Act I and the sextet, the
voices are separated, and effectively.
The sound in general is clear and well bal-
anced.

MOZART: Don Giovanni

Birgit Nilsson (s), Donna Anna; Leontyne Price
(s), Don Ottavio; Heinz Blanken-
bürg (b), Masetto; Cesare Siepi (bs), Don Giovanni;
Fernando Corena (bs), Leporello;
Arnold van Mill (bs), Conductor. Vienna State
Opera Chorus; Vienna Philharmonic Or-
chestra, Erich Leinsdorf, cond.

- RCA Victor LSC 6410. Four SD. $17.98.

Joan Sutherland (s), Donna Anna; Elizabeth
Schwarzkopf (s), Don Ottavio; Grazziella Scuttì
(s), Zerlina; Luigi Alva (t), Don Ottavio; Piero
Cappuccilli (b), Masetto; Eberhard Waechter
(bs), Don Giovanni; Giuseppe Taddei (bs), Leporello;
Carlo Hobart (bs), Conductor. Philharmonia
Chorus and Orchestra, Carlo
Maria Giulini, cond.

- Angel AL 605. Four L.P. $19.98.
- Angel S 6065 D/L. Four SD. $23.98.

CLASSICAL

BACH: Tocca and Fugue in D minor, S. 565; Tocca, Adagio and Fugue in C, S. 564; Passacaglia and Fugue in C
minor, S. 582; Fantasia and Fugue in G
minor, S. 542.

Fernando Germani, organ.

- Capitol G 7225. 1 L.P. $4.98.
- Capitol SG 7225. SD. $5.98.

Four masterworks are played here on the
organ in the Royal Festival Hall, London.
German's performances are marked by vital
rhythm and imagination. He conveys the
excitement of the more improvisational sec-
tions, such as the D minor Tocca, and the
grandeur of the other pieces without fussiness or exaggeration. His registrations,
indeed, are for the most part confined to
the fundamental stops that are common to
organs of various periods and styles. Exce-
sionally moving and impressive is the Passa-
caglia here, owing in part to Germani's skilful
treatment of dynamics. The sound in both
versions is first class. N.B.

BALES: The American Revolution

Peggy Zabawa, soprano; Jule Zabawa, bar-
tone; Cantata Choir of the Lutheran Church
of the Reformation; National Gallery Or-
chestra, Richard Bales, cond.

- Columbia Ls.1002. SD. $11.

This is the first release in Columbia's elab-
orate new "Legacy" series; but it is the third
of its albums having to do with the music of
American history as performed at the Na-
tional Gallery in Washington by Mr. Bales
and his orchestra. The score is actually a
pastiche of eleven different compositions ar-
ranged by Bales, and such shape as it has is
dictated by historical rather than musical
considerations.

The first and longest piece in the series is
James Hewitt's sonata The Battle of Trenton,
which belongs in a great tradition of which
far too few examples have been recorded.
Hewitt's sonata is a very amusing specimen
of the tradition, and Bales's orchestral ver-
sion of it is very skilfully brought off. From
the purely musical point of view, however,
the high point of the collection is Francis
Hopkinson's song Beneath a Weeping Wil-
low's Shade, beautifully sung by Miss

November 1960
The recording is gorgeous, and the performance has that irresistible, blandishing warmth which has put Bernstein where he is. At the same time, Bernstein’s worst fault is frequently demonstrated here—that of taking a tempo so fast that the shape of a melodic line has no chance to register. Reiner still has the edge so far as this particular work is concerned.

BEETHOVEN: Concerto for Piano and Orchestra, No. 2, in F sharp minor, Op. 27, No. 2 (“Moonlight”) by Wilhelm Backhaus, piano; Vienna Philharmonic Orchestra, Hans Schmidt-Iserstedt, cond. [● London CS 6188. SD. $5.98.]

The idea of coupling a popular sonata with a less celebrated concerto strikes me as a good one—particularly when the concerto performance is as immediately ingratiating as this one. The Beethoven Second (it’s really the First, but we needn’t go into that) can give a unique impression of being midway between Mozart and the Beethoven we know best. Backhaus and his collaborators find this distinctive character in the music, and project the concerto as successfully as they do the other four in the now complete series of Beethoven piano concertos.

As for the new Moonlight, I am sure you will find it among the most rewarding of the two dozen versions that are now currently in print.

R.C.M.

BEETHOVEN: Concerto for Piano and Orchestra, No. 3, in C minor, Op. 37 by Clara Haskil, piano; Lamoureux Orchestra, Igor Markevitch, cond. [● Emi LC 3726. LP. $4.98. • Emi SD 1097. SD. $5.98.]

Elegance is the quality primarily in evidence here. Miss. Haskil is a specialist in this music. You may prefer a more vigorous reading, such as Backhaus provides in the set that remains my favorite; but in polish, nuance, and the consistent development of an interpretative approach these artists assert their viewpoint effectively. The recording is good, but the Backhaus disc has an edge in engineering.

R.C.M.

BEETHOVEN: Sonata for Piano, No. 8, in C minor, Op. 13; Bagatelles for Piano, Op. 33; Nos. 3 and 5; Op. 119: Nos. 2, 7, and 9; Op. 120: Nos. 1, 4, and 6

Sviatoslav Richter, piano.

[● Artia ALP 162. LP. $4.98.]

For a feature review including this recording, see p. 74.

MACLEISH: J. B. Original Cast in Pulitzer Prize-winning play. 2 L.P.'s.

- Columbia ML 5438. LP. $4.98.
- Columbia MS 6112. SD. $5.98.

Bernstein is one of several conductors who have exploited the Seventh as an effective "knock 'em dead" vehicle for touring purposes, but when one gets down to a careful examination of the performance we have on this disc, it fails to stand up. The main trouble is a lack of a long line, due to the shifting rhythmic foundation and the generally episodic treatment of the work. Exaggerated accents, heavy ensemble textures, and a lack of subtlety account for the rest. The recorded sound, however, is good.

R.C.M.

BENNETT: Commemoration Symphony ("Stephen Collins Foster"); Symphonic Story of Jerome Kern

Mendelssohn Choir of Pittsburgh (in the Foster); Pittsburgh Symphony Orchestra, William Steinberg, cond.
- Everest SMHR 3063. LP. $4.40.

Pieces d'occasion seldom seen to achieve greatness nowadays; and although Robert Russell Bennett's elaboration on Foster tunes (purportedly styled in the manner of the Troubadour's contemporaries) may have effectively served to celebrate the City of Pittsburgh's bicentennial festivities, its interest for other listeners is likely to be limited to a momentary admiration for the orchestra's ingenuity in tackling a tricky and basically impossible problem. The Kern Story already enjoys considerable popularity, but it too merely encrusts some of the richest American melodic jewels in luxurious settings which more often distract from than enhance their inherent appeal.

In any case, Steinberg has scant feeling for the idiom here, so he is reduced to precisely impersonal readings which, like the prosaic singing of the Mendelssohn Choir and its frankly undistinguished soloists (in the overcrowded vocal medley of the symphony's finale), communicate no enthusiasm at all. It is probably this over-all lack of fervor, rather than any deficiency in the moderately stentorian, immaculately clean recording, which also accounts for the relative lack of total body and aural appeal.

R.D.D.

BLOCH: America, an Epic Rhapsody

American Concert Choir; Symphony of the Air, Leopold Stokowski, cond.
- Vanguard VRS 1056. LP. $4.98.
- Vanguard VSD 2065. SD. $5.95.

Those who have been around awhile will remember this. The work won a large cash prize offered by Musical America in 1928.

The judges were Stokowski, then conductor of the Philadelphia Orchestra; Serge Koussevitzky of Boston, Frederick Stock of Chicago, Walter Damrosch of New York, and Alfred Hertz of San Francisco. Each of these five conductors performed it during the third week of December in the year men talked. It proved to be a panoply, gassy, inflated, ridiculous score which no one has bothered to look at since; at the time, everyone was disposed to laugh, with Bloch well, and forget the whole thing as speedily as possible.

Well, here it is on records for the first time, followed by a little speech of Bloch's in his high-pitched voice. The disc is part of a series called "Landmarks of American Music" and is sponsored by something called West Projects, Inc. Unfortunately, West Projects, Inc. does not go into the real question: how did it happen that a composer who had done great things and was to do many more turned out a piece so totally lacking in creative spark as soon as he started working for a prize? How did it happen that five men who really knew something about the orchestral literature selected a thing so shallow and obvious? What ghastly corruption of taste was at work on all sides of this of the music, such as the opening pages of the first movement and the second chorus? The third, have greater freedom and emotional expanse in this performance, but in terms of over-all continuity and proportion the older recordings have a slight edge. By all evidence, Serkin's temperamental make-up is hypersensitive, and I suspect that the pianist's "inner metronome" conflicted with the slow tempos adopted here. Some of the phrasing, as a result, is slightly awkward, and there is a tendency (on Ormandy's part as well as Serkin's) to anticipate ritards and crescendos. However, it should be noted that these are minor lapses and do not significantly detract from a basically superior reading.

I prefer the sound of the stereo pressing because Serkin's tone is leaner and more centralized. The monophonic disc is certainly acceptable, but a shade overblown for my taste.

H.G.

BRAHMS: Concerto for Violin, Cello, and Orchestra, in A minor, Op. 102; Tragic Overture, Op. 83

Zino Francescatti, violin; Pierre Fournier, cello (in the Concerto); Columbia Symphony Orchestra, Bruno Walter, cond.
- Columbia ML 5493. LP. $4.98.
- Columbia MS 6138. SD. $5.98.

The Messiaen, Fournier, Francescatti, and Walter recognize that, besides being a nineteenth-century classicist, Brahms was also one of the greatest composers of romantic music. Nowhere has he sung more eloquently than in the second subject of the first movement or in the whole of the Judurne of his Double Concerto. And songfulness is the keynote of this performance. Throughout, there is a feeling of relaxation, as if all the participants were enjoying themselves to the fullest extent and were in no hurry to reach the final double bar.

The resultant glow is irresistible. Fine as is the other stereo performance of the Double Concerto by Oistrakh, Fournier, and Allaine, it cannot match this new one for warmth, brilliance, or quality of reproduction. Francescatti plays with a richer, sweeter tone than Oistrakh, and even Four- nier's sounds rounder and richer here. Columbia's microphone placement is closer than America's, the sound is brighter, and the two soloists are realistically separated just to left and right of center, which gives the stereo version a slight advantage over the otherwise highly commendable monophonic one.

Walter's reading of the Tragic Overture is somewhat restrained, which I have ever heard. Broad tempos again emphasize the lyric qualities inherent in the score; yet the middle section, so often dragged when the work is played in this fashion, moves along at a pleasing pace. Here Galliera is outstanding at every turn.

P.A.

BRAHMS: Concerto for Piano and Orchestra, No. 2, in B flat, Op. 83

Rudolf Serkin, piano; Philadelphia Orchestra, Eugene Ormandy, cond.
- Columbia ML 5491. LP. $4.98.
- Columbia MS 6156. SD. $5.98.

Since the new Serkin-Ormandy Brahms Second differs from its predecessors to a remarkable degree, devotees of the earlier sets had better hear it before buying. There is greater relaxation on this disc; in this reading, monumental breadth and calm introspection prevail, instead of nervous drive and luminescent virtuosity. Certain sections

Walter: for the Brahms of romantic sound.

performance; and is it likely to happen again? American composers were not soon established in the orchestral repertoire in 1928; now they are, and that, one hopes, makes a difference. The only value of this release is that it shows us how far we have come.

A.F.

BRAHMS: Symphony No. 2, in D, Op. 73

Vienna Symphony Orchestra, Wolfgang Sawallisch, cond.
- EMI LC 3722. LP. $4.98.
- EMI RC 1093. SD. $5.98.

The reproduction is highly satisfactory, and the orchestral execution is good (except for the failure of the trumpet to enter at the very close of the first movement). But

SRI Stereo"
Sawallisch's leadership is undistinguished and, in the end movements, decidedly on the stiff, heavy side. As a stereo Second, this one cannot compare with those by Klemperer and Kubelik.

P.A.

BRAHMS: Symphony No. 4, in E minor, Op. 98
Vienna State Opera Orchestra, Vladimir Golschmann, cond.
- Vanguard SRV 116. L.P. $1.98.
- Vanguard SRV 116SD. SD. $2.98.

A workmanlike account. There is nothing especially distinctive about Golschmann's reading; it is orthodox and, at the modest price, quite acceptable. The strings seem a shade thin in the monophonic version but amply full and well distributed in the unexaggerated stereo edition.

P.A.

CHOPIN: Ballades (4)
Philippe Entremont, piano.
- Columbia ML 5442. L.P. $4.98.
- Columbia MS 6118. SD. $5.98.

It is unfortunate for Entremont that his disc comes out hard on the heels of Rubinstein's recording of the Chopin Ballades. Despite the young French pianist's sensitive handling of slow sections, a singing tone, and some provocative stressing of inner voices, he is no match for the mature Polish artist. Nor, despite the greater warmth in his playing, is his version as satisfactory as Graffman's recent recording, which has an analytical approach and precision of execution to recommend it. The piano sound is praiseworthy natural.

Charles Rosen, piano.
- Epic LC 7029. L.P. $4.98.
- Epic BC 1090. SD. $5.98.

Charles Rosen's playing on this disc is rather erratic. Most of the time, he is an intelligent, musically player and a fine technician, but the general high level of his pianism takes a few disconcerting nose-dives here. He is at his best in the Mazurkas, which are played with flexibility and rhythmical flair. The balance and continuity is present in the Nocturnes, but not the personal involvement with the music. Of the larger works, the Scherzo and Polonaise are both given tidy, well-proportioned readings that are nevertheless rather small-scaled and pedestrian. All of the pianist's undeniable quality mysteriously desert's him in the F minor Ballade, which is technically foggy, totally bleak, and lacking in structural comprehension. The piano sound is fine, although slightly hard in tone.

H.G.

Sergio Fiorentino, piano.
- Roulette R 7504. L.P. $3.98.

This disc includes the two additional preludes which are usually omitted from the standard recorded collections. The posthumous one is a buoyant salon piece of no great consequence, but Opus 45 has a plaintive, brooding inwardness that places it on a level with the best of the great Opus 28 set.

Sergio Fiorentino is a fleet, virtuosic technician and he is obviously capable of delicately graded tonal shading. He seems, however, overly concerned with tone color and pedal effects for their own sake, and he doesn't incorporate them into a really satisfying musical statement. Given decent engineering, the interpretations would, perhaps, convey more than is apparent on this record, which is hollow in tone, full of distortion, and plagued with preecho.

bored live. At hand are the composer's very first two works in this form, both offered for the first time on discs. Both were written in 1865, and both are overloaded with thematic ideas not too well organized. But the germ of future masterpieces are to be found here—the darker aspects in the Symphony in G minor, the brighter ones in the Symphony in B flat, whose second movement is particularly appealing. Ninham gets about the maximum out of these scores, and with the exception of a wobbly-toned solo oboe, the orchestra plays well. The recorded sound is full and generally pleasing.

Though these two symphonies are inferior to Dvořák's more mature works, they provide an interesting historical background and prove that there is still something of merit under the musical sun that hasn't been recorded to death.

P.A.

DVOŘÁK: Symphony No. 4, in G, Op. 88; Carnival Overture, Op. 92
London Symphony Orchestra, Antal Dorati, cond.
- MERCURY SG 90236. SD. $5.98.

The only thing that can be said about this record is that it is loud. Dorati rides roughshod over the music, stopping neither to phrase nor to allow for any subtle nuances. Though the stereo treatment is quite good, it is wasted on an insensitive reading.

P.A.

LABOR OF LOVE
We are sometimes rudely reminded that producing records is a business. But it never stops being also a labor of love. Perhaps this is so because the performances we record are also a "labor of love." There is for example Mogens Woldike's affectionate shaping of every phrase in Haydn's Mass in Time of War, and Mischa Elman's tender and penetrating treatment of three 18th century concertos, by Bach, Vivaldi and Nardini. There is the happy collaboration of violinist Paul Makanowitzky with conductor Vladimir Golschmann in Vivaldi's La Cetra (you'll also love the price of this Bach Guild special). Also, the haunting beauty of the voice of Joaquin Baez as she re-lives each folk song she sings, makes us proud to assist at the recording debut of a new star. In the same dedicated spirit the Vanguard engineers work out a Lab Test Record that will be a public service to all owners of stereo outfits.

CIRCLE 135 ON READER-SERVICE CARD

Marcel Dupré, organ.
- MERCURY MG 50228. L.P. $4.98.
- MERCURY SR 90228. SD. $5.98.

The eminent French organist, Marcel Dupré, has been making a series of records on the Cavalli-Coll organ in the Gallery of the Church of St. Sulpice in Paris, of which this constitutes Volume 3. Though St. Sulpice was not Franck's church, its organ was built by the same man who constructed the instrument at Ste. Clotilde. Franck was one of the few nineteenth-century composers to leave exact instructions about the registration desired for the performance of their music. Since his indications were based on the instrument he knew best, the Cavalli-Coll organ at Ste. Clotilde, it should be possible to reproduce his ideas best on an instrument constructed by this same builder, and that is what has been attempted here.

There can be no question of the sincerity and devotion of Dupré's performances, but they are not of a nature to excite or stimulate the listener. Possibly the main reason for this is the music itself. Neither the Grande pièce symphonique nor the Fantaisie is inspired by Franck, the former being an especially ponderous work. But 'Dupré' elects to play them both at rather slow tempo and quite heavily, while the faster passage work in the Grande pièce symphonique is occasionally uneven. There is a further difficulty: the organ is not absolutely in tune, a flaw which shows up most obliquely in the Pastoraale.

The monophonic version is superior to the stereo, having a sharper sonic focus—though both are quite lifelike.

This recording of the Fantaisie, however, suffers in comparison with the one by Pierre Cochereau on the organ at Notre Dame (Omega); on that disc the focus was sharper, the sound a bit brighter, and the interpretation more animated and interesting.

P.A.

GERSHWIN: Concerto in F; Rhapsody in Blue
André Previn, piano; Andre Kostelanetz and His Orchestra.
- COLUMBIA CL 1495. L.P. $3.98.
- COLUMBIA CS 8286. SD. $4.98.

GERSHWIN: Rhapsody in Blue; An American in Paris
Jésus María Sanromá, piano (in the Rhapsody); Pittsburgh Symphony Orchestra, William Steinberg, cond.
- EVERETT SDBR 3067. SD. $4.98.

Neither of these discs serves Gershwin as well as could have been expected. Previn and Kostelanetz invest the end movements of the Concerto with fine clarity and much spirit, but the middle movement is overphrased, and there is too broad a jazz vibrato in the solo trumpet. As for the Rhapsody, it is rather rauschen and unevenly played, with an excruciating cut of about thirty-five measures in the middle. Disappointing, too, is the quality of the sound, especially that of the piano, which emerges in both versions with a particularly

CIRCLE 23 ON READER-SERVICE CARD
about the Rhapsody. His conception of the Rhapsody is slower, more serious, and more analytical than either Previn's or List's. Steinberg, however, who sounds a trifle self-conscious in his accompaniment for the Rhapsody, is even more so in An American in Paris, and the whole work is played with a stiff literalness that suggests the conductor was more concerned with the instrumental trees than with the jazz-oriented forest. Gershwin is obviously not the Pittsburghers' dish of tea.

P.A.

GINASTERA: Overture to the Creole Faust — See Still: Sabló.

GRIGNY: Organ Music

Robert Lockhart, organ

* Tone 2. LP. $4.98.

Nicolas de Grigny (1672-1703) published in 1699 a volume of organ music, containing a Mass and verses on five hymns. It is from this collection, which the young Bach copied out for himself, that the present selection is taken. The first side offers the five verses on the Kyrie of the Mass and two of those on the Gloria. This is noble music, of a spiritual quality, and the third of the Kyrie verses—Cuncta est in ardua —seemed to me particularly lovely. It does not lend itself well to continuous listening because much of it has a sameness of texture—a florid line or lines over a slow-moving, sustained bass. In the hymn verses, on Side 2, the music is no less fine and the textures are more varied. Here, it was especially struck by the Point d'orgue sur les grands jeux, in which Grigny sends his melodies cavorting over the firm rock of a bass tone sustained throughout. The performance, on an organ rebuilt by M. P. Miller in 1936 in the Hyde Park Baptist Church, Chicago, is good, and so is the recording.

N.B.

GROFE: Grand Canyon Suite; Concerto for Piano and Orchestra

Jesús María Sanromá, piano; Rochester Philharmonic, Ferde Grofé, cond.

* * * EVEREST SD 1044. SD. $4.98.

The Grand Canyon Suite is too well known to warrant special comment at this late date; the Piano Concerto makes its initial appearance on this disc. It is little more than a gushing mass of treacly banalities peppered with a few dominant ninth chords and other pop-tune clichés. In this instance, the capable performances deserve better music. The sound is spectacular.

H.G.

GUARNIERI: Three Dances—See Still: Sabló.

HANDEL: Acis and Galatea (excerpts)

Maria Harvey (s). Galatea: Richard van Vroozen (b), Actéon, David Cruze (bs), Polyphemus. Oberlin College Choir and Camerata Academica des Salzburger Mozarteums, Bernhard Paumgartner, cond.

* * * EPIC LC 3728. LP. $4.98.

* EPIC BC 1095. SD. $7.98.

With Oiseau-Lyre's splendidly performed, almost complete Acis available on two records, this highlight version has little to offer. The Camerata Academica plays very well, and Handelians may be interested in comparing the individual tempos adopted by Paumgartner and Bautz. But of the soloists, only Richard van Vroozen is up to scratch, and even he is never more than pleasant—no match for Pears. Galatea's aria just jog along, and the bass who takes the part of Polyphemus will destroy his basically sound voice in short order unless given some expert advice. Oberlin's choir, which performed the score with the Camerata under the Conservatory's "Salzburg Plan," sings with fair tone, good musicianship, and a rather jarring midwestern American accent. Sound in the stereo version is quite clear and spacious—I have not heard the monophonic.

C.L.O.

HARKNESS: Barcelona Suite; Gift of the Magi

in Audio, Edward Tatnall Canby says this regarding the Dual-1006:

"The MOST STARTLING thing

ABOUT THE DUAL-1006 is its unique method of record-indexing . . . using roller-feeler guides in the tonearm to find the lead-in groove for each record." BUT OF PRIME SIGNIFICANCE is the fact that this indexing concept eliminates the need for any mechanical connections to the tonearm. When cycling, the tonearm is engaged only by a slip-clutch; during play it floats completely free. This ensures professional tonearm and turntable performance regardless of how you choose to play any of your records . . . manual single play, automatic single play, or automatic changer. (And this is the only machine that permits all three!) As Electronics World says, "Make sure the dealer demonstrates this one for you." $79.95 at authorized dealers.

CIRCLE 52 ON READER-SERVICE CARD

high fidelity magazine
The Patrician 700 is the most effective recreator of great music that has ever been made. And, while the exciting aspects of its physical design and performance are interesting to many, they should not and need not be misunderstood by those whose backgrounds lie in the creation and appreciation of music rather than in the means of reproducing it. For, if the Patrician 700 can reproduce with distinction the more esoteric sounds of earthquake, railroad train or thunderstorm, so can it recreate the sound of the big bass drum, the mighty pipe organ and the majestic sweep of the full symphony orchestra as can no other loudspeaker. It is for this reason that every music lover will be thrilled by the effortless ease with which the Patrician 700 handles large masses of sound, and the order it reveals in complex sonic tapestries—where lesser reproducers can present only chaos.

The world's greatest loudspeaker system is a fitting companion to the world's greatest music. Ownership of the Patrician 700 is an appropriate expression of devotion to the music you love.

Designed around the tremendous new Electro-Voice thirty-inch woofer, (1) the unparalleled might of the Patrician 700 in the region of deepest bass is a thing of fascination in itself, but this is only one facet of its truly fabulous overall performance. A premium quality 12" speaker, (2) heavily damped magnetically and mounted in a separate, literally padded sub-enclosure, delivers solid and precise reproduction of midbass frequencies from 100 to 700 cps. The sound of the magnificent T350, (3) recently brought to a new height of excellence through closer specialization of its design to the requirements of the treble range, is outstandingly smooth, distortionless and free from peaks or unnatural colorations. The T350 very high frequency driver (4) adds a wonderful transparency to the clarity established in the midrange, maintaining its beautiful, shimmering sound undiminished to the limits of audibility, and having significant response as high as 40 kilocycles. In both the treble and high frequency ranges, E-V diffraction horns spread brilliance evenly over the whole listening area, illuminating the finest musical detail through perfect accuracy of reproduction.

True audiophiles need not restrict their enjoyment of owning this remarkable instrument to the purchase of the complete system—they can build the enclosure themselves, buy the individual components separately, or experiment with the development of their own original system. Incorporating these components, A booklet thoroughly describing the Patrician 700 is available on request.

You can order factory blueprints of the system direct from Electro-Voice for $2.00. Or you can write for a special bulletin on the uses of the 30 W woofer which details enclosure and system design information.
Another in the series "Landmarks of American Music" sponsored by West Projects, Inc. Rebekah Harkness' Barcelona Suite has, we are told, been performed with great success in Tucson, Arizona, and that, apparently, makes it a landmark. Both works are such as any composer of background music for television turns out by the mile, but there are some pleasant tunes in Gift of the Magi, which is the score for a ballet based on O. Henry's famous story of that name. It is quite impossible, not knowing the score, to tell if music of this kind is well played or not; the recording seems to be quite good.

A.F.

HAYDN: The Creation
Mimi Coertse, soprano; Julius Patzak, tenor; Dezso Ernster, bass; Singverein of the Gesellschaft der Musikfreunde, Vienna Orchestra, the Vienna Volksoper, Jascha Horenstein, cond.
- Vox PL 11452. Two L.P. $9.96.

In no respect, unfortunately, does this recording compare favorably with the other two now in the catalogues. There are sections that are nicely done—the soprano aria "On Mighty Pens Uplifted" is one—but the general approach is lacking in finesse, none of the soloists is particularly distinguished, and the performance as a whole gives only fleeting glimpses into what Haydn was really after. Even technically the recording is not impeccable; there is a perceptible drop in pitch from the D major cadence of Uniel's zero recitative to the D major opening, immediately following, of his "In Splendor Bright." The work is sung in German; no printed text is supplied.

R.B.

HAYDN: Symphony No. 103, in E flat ("Drum Roll"), Symphony No. 104, in D ("London")
Lamoureux Orchestra, Igor Markevitch, cond.
- Epic LC 3725. L.P. $4.98.
- Epic BC 1096. SD. $5.98.

HAYDN: Symphony No. 103, in E flat ("Drum Roll"), Symphony No. 94, in G ("Surprise")
Philharmonia Hungarica, Antal Dorati, cond.
- Mercury SR 90208. SD. $5.98.

Neither of these discs really can compete with the Beecham performances in his complete edition of the Salomonos. Dorati's performances are leaden, studied, and quite without the vivacity and grace the music requires. Markevitch gives No. 103 a moderately effective reading that smells slightly of Eau de Cologne, but his interpretative intrusions in the London Symphony are as vague in intention as they are ineffective. The engineering of both discs is of only average quality.

R.C.M.

IVES: Symphony No. 2
- Columbia KL 5489. L.P. $5.98.
- Columbia KS 6155. SD. $6.98.

For a feature review of this recording, see p. 75.

LISZT: Concerto Pathétique, for Piano and Orchestra (arr. Burmeister); Spanish Rhapsody (trans. Darsas)
Istvan Antal, piano; State Symphony Orchestra, Victor Vaszy, cond. (in the Concerto); Radio Symphony Orchestra, Gyorgy Lehel, cond. (in the Rhapsody).
- Parliamnet PLP 124. L.P. $1.98.

The Concerto Pathétique, composed by Liszt for two pianos, was a recasting of a Grand Solo de Concert, for piano and orchestra, which in turn was a recasting of a Grosses Konzertstuck, for piano solo. According to the record notes, Richard Burmeister, a pupil of Liszt, freely reconstructed the Concerto Pathétique into a work for one piano and orchestra, as a vehicle for his concert tours. Nowhere along this complicated path has anything of consequence emerged, for the music, as it appears here, is clumsy, bombastic, tiresome, relieved only by a typically sentimental slow section, which gives Mr. Antal a chance to show how fine a pianist he can be. The work would make a suitable accompaniment to a silent film melodrama.

The excellent, if superficial, Spanish Rhapsody is moderately well known in its original solo version and in Buson's arrangement for solo piano and orchestra. The version for orchestra alone (by a Hungarian composer) as played here is colorful enough.

MERCURY RECORD CORPORATION
745 FIFTH AVENUE • NEW YORK 22, N.Y.

MERCURY living presence

London Symphony Orchestra, Sir Malcolm Sargent, cond.
• • • EVEREST SDBR 3053. SD. $4.98.

This is far more than just the sixteenth currently available recorded version of Pictures from an Exhibition. As a demonstration of how far the art of recording has progressed, it is one of the most convincing discs I have encountered. Moreover, the wonderfully spacious sound conveys a sensitive, transparent interpretation. And for once The Great Gate of Kiev comes as a glorious climax, without a trace of sonic distortion. Stereo addicts can have their gimmicked percussion, trains, auto races, and the like. For demonstrating or testing any stereo system, I'll cast my vote for this new, unbelievably lifelike Pictures.

P.A.

ORFF: Carmina Burana
Janice Harsay, soprano; Rudolph Petrik, tenor; Harve Presnell, baritone; Rutgers University Choir; Philadelphia Orchestra, Eugene Ormandy, cond. • • • COLUMBIA ML 5498. LP. $4.98. • • • COLUMBIA MS 6163. SD. $5.98.

Ormandy's performance is notably straightforward, emphasizing the tunefulness of the piece rather than its more sensational qualities. This, in other words, is an almost "classical" Carmina Burana, enhanced by superb recording and the most legible and eye-catching printing of the text in any American recorded edition. The principal soloist, Mr. Presnell, sings his part with rather more rubato than is necessary; he was "discovered" in Hollywood and here seems intent on finding his way back there as fast as possible.

A.F.

Ruggiero Ricci, violin. • • • LONDON CS 6163. SD. $4.98.

If nothing else, this must be one of the longest microgroove records ever made. Normally, the traversal of the complete twenty-four caprices occupies four disc sides; here the whole thing is complete on two sides, with Side 1 running to 36:47 and Side 2 to 32:21. The main concern, however, is the music. Ricci doesn't rush in order to get it all in one disc, yet one sometimes has the feeling that he could have been a trifle more relaxed. He could also have been more careful about his intonation, which often gets thrown off kilter in the faster, more complex passages. The spirit of Paganini's virtuosity and display is certainly omnipresent in Ricci's playing; but I find the recent Capitol two-disc album by Michael Rabin more pleasingly accurate in intonation, as well as highly satisfactory in performance. Though the sound is good, stereo for this work adds little.

CIRCLE 47 ON READER-SERVICE CARD
RAVEL: Quartet for Strings, in F
Prokofiev: Quartet for Strings, No. 2, in F, Op. 92

Carmirelli Quartet.
- London CM 9251. LP. $4.98.
- London CS 6174. SD. $5.98.

A notably warm, robust, and well-recorded Ravel, and a very good Prokofiev too. A.F.

RESPIGHI: Fontane di Roma; Pini di Roma
Chicago Symphony Orchestra, Fritz Reiner, cond.
- RCA Victor LM 2436. LP. $4.98.
- RCA Victor LSC 2436. SD. $5.98.

Whether the present choice of repertory is the conductor’s own or that of his recording company, it turns out to be an almost classic example of miscasting. Although the scores of these showpieces are “read” with the customary Reiner precision, crystalline clarity of details, and tremendous—but always perfectly controlled—power, the music itself never has sounded more emptily rhetorical. For the poetry and “atmosphere” that alone can redeem these works, one must turn to the far more sympathetic and evocative Gounod’s Fountains and Stokowski’s Pines. Technically, too, the latter recordings (Capitol and United Artists respectively) are more satisfactory overall, for the RCA Victor engineers seem to have lost the magic touch that has distinguished their earlier (and later) series in Chicago’s Orchestra Hall. At its lower levels the extremely wide-range stereo disc boasts superbly rich, “floating” sonorities, but there is scant depth, and in the climaxes the high strings and brass are painfully intense and strident (qualities which must be attributed to the “master” recording rather than to the disc processing, since they are equally apparent in the simultaneously released 4-track tape version, FTC 2012, 37 min., $8.25). These passages are more tolerable in the apparently less heavily modulated LP disc, but that seems tonally contrived even in the second pressing (distinguished by the matrix number K2 RP474 68 on the Fountains side), which was hastily issued to replace the original “58” edition. R.D.D.

SCHOENBERG: Verklärte Nacht, Op. 4
Loeffler: A Pagan Poem, Op. 4
Symphony Orchestra, Leopold Stokowski, cond.
- Capitol, SP 8433. SD. $5.98.

There ought always to be a Stokowski recording of Verklärte Nacht in the catalogues, just as there ought always to be a Beecham recording of the Pragaque Symphony or a Monteux recording of La Mer. This most obviously beautiful of Schoenberg’s works is, to be sure, somewhat falsified by the string orchestra version; nevertheless Stokowski brings a passion and loveliness out of it which are incomparable. In fact, it was Stokowski’s 78-rpm recording of Verklärte Nacht which, more than any other single thing, was responsible for Schoenberg’s early reputation in this country, and one is happy to welcome the work back into the recorded repertoire in this interpretation.

It is now a quarter of a century since the death of Charles Martin Loeffler. He was a famous man in his time, but today he is almost totally forgotten, and only one short work of his has hitherto appeared in the LP lists. The Pagan Poem is based on the idyl of Theocritus called The Sorceress, wherein a young girl, deserted by her lover, tries, by means of magic, to lure him back. The work is scored for orchestra with obbligato parts for piano, English horn, and three trumpets, which are heard backgast most of the way. This arrangement seemed very tricky when A Pagan Poem was new; now, however, the work sounds merely academic, well made, and about to burst at any given moment into Vincent d’Indy’s Symphony on a French Mountain Air.

Loeffler’s piece had one very important if quite unexpected result, however. Roger Sessions once heard it in concert, got interested in the poem, and ended up by setting the entire immense, unabridged, uncowhierized thing for soprano and orchestra. This is the greatest American work yet written for voice and orchestra, and there is a gorgeous, little-known record of it, by Andrei Nosnian and the Louisville Orchestra, in the Louisville series. If you don’t know this work Continued on page 96

Name ......................................................................
Street ........................................................................
City, State ...................................................................
Istomin and Chopin: A. F.

**Schumann:** Concerto for Piano and Orchestra, in A minor, Op. 54

†Chopin: Concerto for Piano and Orchestra, No. 2, in F minor, Op. 21

Eugene Istomin, piano; Columbia Symphony Orchestra, Bruno Walter, cond. (in the Schumann); Philadelphia Orchestra, Eugene Ormandy, cond. (in the Chopin).

- Columbia ML 5494. LP. $4.98.
- Columbia MS 6159. SD. $5.98.

Istomin and Walter give the work a “Entusiasm” reading that stresses genial lilt and sailboat like grace. In contrast to this, the Fleisher-Szell conception—which I happen to prefer—has powerful phrase-tensions and architectural underlining that give their interpretation a decidedly Florentian impact. Walter’s contribution is magnificent. His Schumann conducting has an ideal Sturm und Drang surge and a golden tonal glow. (How about a complete set of the symphonies, Columbia?)

Mr. Istomin plays the Schumann with such admirable taste and restraint that I was rather shocked and disheartened by his Chopin performance overside. Chopin’s music has been subjected to prolonged abuse from pianists, and it is high time that they stopped declaring open season on it. Istomin’s fussily aberrations and salon rubato are as unsuitable for the honest simplicity of the F minor Concerto as a hot-fudge topping would be for pot roast. Ormandy accompanies well, but his orchestra is too large and the opening tutti is foreshortened. Excellent sound in both editions, with a little more fullness in the two-channel version.

H. G.

**Shostakovich:** Symphony No. 9, Op. 70

†Prokofiev: Lieutenant Kijé: Suite, Op. 60

London Symphony Orchestra, Sir Malcolm Sargent, cond.

- Everest SDHR 3054. SD. $4.40.

Shostakovich’s Ninth Symphony had a bad press when it was new because numerous symphonies are supposed to be big and noisy and dedicated to what H. L. Mencken used to call “The Uplift;” what, then, can you do with a composer who has written several big, noisy, heroic symphonies but whose ninth work in this form turns out to be his shortest, his most lighthearted and effulgent? You can call “off with his head!” as critics in Russia and elsewhere did in 1945—but fifteen years later the piece is still going strong and is one of the most completely delightful things Shostakovich has to his credit; nowhere is his mastery of the satiric and grotesque so perfectly displayed. This is the best record of it in current catalogue, both in performance and registration. As to the piece on the other side—everybody plays Lieutenant Kijé well, so why not one of the half dozen finest conductors in Britain?

A. F.

**Still:** Sahelji

†Guarnieri: Three Dances

†Ginastera: Overture to the Creole Faust

Eastman-Rochester Orchestra, Howard Hanson, cond.

- Mercury MG 50257. LP. $4.98.
- Mercury SR 90257. SD. $5.98.

The tremendous ferment now at work in Negro Africa is bound to have enormous cultural repercussions, and must certainly arouse curiosity regarding the present state of cultural affairs in that part of the world. Folkways has quite a few good records of African folk music and a disc of an extremely interesting American work, the Dahomey Suite, for oboe and piano, by Mieczyslaw Kolinski. William Grant Still’s trashy ballet will not do, however. The pieces on the other side are trash, too, but rather more sophisticated in their structure. Camargo Guarnieri’s Three Dances are on Brazilian folk themes and go through the standard paces. Alberto Ginastera’s Overture to the Creole Faust is actually a kind of tone poem based on the Faust of Estanislao de Campo. In this literary work an Argentine cowboy goes to Buenos Aires and attends a performance of Gounod’s opera. On his way home he tells a rustic friend all about it—and in this way De Campo retells the Faust legend and adds his own philosophic comment to it. Ginastera’s overture is full of themes from Gounod, some of them woven together with Argentine country dance material and some haphazard.
Epic Records seeks out the unique qualities of music, the most provocative and unconventional (listen to the explorations in sound of "Ping Pong Percussion" or the wild gypsy spirit of the Hungarian ballet troupe). Epic's recording artists reflect this vital repertoire—it is impossible to remain unstirred by the genius of Eduard van Beinum or the guitar-plucking glee of the Raunch Hands. The wonderful surprise of music is always yours on Epic Records.

"Weathers Technical Magic is Sound"

HIGH FIDELITY MAGAZINE
as well as oft-played popular favorites. The cruelly bombastic opera *Aida* is justifiably regarded by Verdi scholars with embarrassment and condescension. Its overture, however, is worth an occasional hearing, potboiler though it is. Much more attractive are the colorful ballet interludes in *I Vespri di Tebe* (written for the Paris production of the opera). Mackerras secures crisp, energetic playing from the orchestra; and although he doesn't pinpoint felicities in the music with the sensitivity of a Toscanini, he is much more attentive to the finer dynamic markings and instrumental blends than most conductors are in this not-so-subtle repertory.

**H.G.**

**VERDI: La Traviata**

Victoria de los Angeles (*s*), Violetta; Silvia Bertouzzi (*s*), Amina; Santa Clisan (*ms*), Flora Bervoix; Carlo del Monte (*f*), Alfredo; Sergio Teleseco (*t*), Gastone; Renato Ercoli (*t*), Giuseppe; Mario Sereni (*b*), Germont; Vico Polotto (*b*), Duphol; Silvio Massonc (*bs*), D'Olugny; Bonaldo Giannetti (*ds*), Dr. Germont. Pavarotti and Orchestra of the Royal Opera, Tullio Serafin, cond.

- **CAPITOL GAR 7221.** Three LP. $17.94.
- **CAPITOL GCR 7221.** Three SD. $20.94.

I have never been happy with Tullio Serafin's Angel recording of *La Traviata*, and while some of the difficulties can be traced to the unattractive singing of the principals, others are the Maestro's own responsibility. His Angel reading strikes me as jerky and diffuse, inordinately dragged out in some passages, precipitate in others (as in the big ensemble finale of Act III). His new effort is in better balance, and much less arbitrary-sounding, but it still does not have the tightness or incisiveness that seems to me essential. I might add that I say this as a devotee not of the Toscanini *Traviata*, but of the Monteux, which is far from a sleighdriver's interpretation.

The Los Angeles fans will want the recording come what may, and they won't be disappointed. As sheer singing, her Violetta couldn't be better, even in the florid Act I music which has given her some trouble in the opera house. Nevertheless, I listened straight through the opera dry-eyed, and had difficulty even paying proper attention during the key Violetta/Gerflmont scene. This is partly because the admirable Los Angeles restraint (is she never going to do the Marchallin for us?) is misplaced on many of these bars, and partly because Sereni does not really take command of his music. After an initial Metropolitan season in ill-chosen roles, this warm-natured baritone has settled into well-routined performances in lyric parts, but he is hardly a galvanic artist. Carlo del Monte nurses his slender resources along quite creditably, and comes up with an Alfredo preferable to Poggi's or Francesco Albanese's, although it's never exciting. Capitol's sound is top-notch, whether you prefer the monophonic edition or the stereo. I have a preference for the stereo edition, both for the greater clarity and depth in the ensembles and for the sense of distance imparted to the revelers' music in the last act—an excellent effect.

**Verdi's "Heart-Felt Impulse..."**

**VERDI REQUIEM MASS**

EUGENIO FERNANDI, Tenor
FLORENCIA COSSOTTINO, Mezzo-Soprano
SHAKEH VARTENISSIAN, Soprano
BORIS CHRISTOFF, Bass
TULLIO SERAFIN, conducting

"A heart-felt impulse...a crying need..." compelled Verdi to compose his Requiem Mass.

Maestro Tullio Serafin, the world's foremost interpreter of Verdi's music, captures this passion in a truly definitive recording of what many music lovers, including George Bernard Shaw, consider the greatest work of the Italian master. Featuring the Orchestra and Chorus of the Opera House, Rome, and four distinguised soloists.

Deluxe boxed album: 2 records, Latin-English libretto. (S)GBR 7227

DIE MEISTERSINGER VON NÜRNBERG, Overture & Dance of the Apprentices and Entry of the Masters
TRISTAN UND ISOLDE, Prelude & Liebestod
GÖTTERDÄMMERUNG, Siegfried's Funeral March

Also available by Klemperer, "the supreme interpreter of the classics"

THE COMPLETE BEETHOVEN SYMPHONIES
THE COMPLETE BRAHMS SYMPHONIES

CIRCLE 12 ON READER-SERVICE CARD

VIVALDI: Concertos: in G, P. 73; in D minor, P. 310, in D, P. 135 ("Del gardelino"); in G, P. 50; in G, P. 145; in G minor, P. 360, Sinfonia in B minor ("Al Santo Sepolcro"); Trio in C for Violin, Viola, and Continuo, in G; Sonata for Two Violins and Continuo, in F

New York Sinfonietta, Max Goberman, cond.

- Library of Recorded Masterpieces, Vol. 1: Nos. 5 (P. 73, 310, 155, Trio) and 6 (P. 50, 143, 360, Sinfonia, Sonatina, "Two S.D". $8.50 each on subscription; $10 each non-subscription.

Another interesting and varied batch of works, at least four of them (P. 50, 155, 310, 360) apparently not otherwise available on records. P. 310, a violin concerto, is a stum piece: the soloist is not supposed to use his E string at all, and for the finale he is instructed to tune his G string up to A. But in addition to tricks this finale has a good deal of feeling and some harmonic pungency. P. 155 and 360 are not concertos in the modern sense but pieces for flute, oboe, violin, bassoon, and continuo. The former (Of the Goldfish) has a chirpy, perky first movement that put me in mind of the ritornell of a Gilbert and Sullivan song. The slow movement of this work is for flute and bassoon alone. But a harpsichord has been added here, to good effect. Other sections that struck me as especially appealing are the jolly first movement of P. 73 and the fine one of P. 50. The most impressive piece of all is the Sinfonia. Unfortunately it is just this gem that is cut, some thirteen Adagio measures being excised—the only occasion in the whole series so far where the performances have not been completely faithful to the Ricordi scores, which are bound into each album. Once more, as in earlier volumes, the continuo is imaginatively realized, especially in P. 310 and 155.

Stereo is sometimes used effectively, as in the sonata, where the two violins are clearly separated. But at other times its possibilities seem to have been overlooked: a more noticeable division of the oboes in P. 73 and the first and second violins in the finale of P. 50 would have been advantageous. Except for portions of the Trio, where the flute is too far forward, and of P. 50, where the oboe is similarly dominant, the balances are good and the sound in general realistic.

N.B.

Elisabeth Grümmer, soprano; Gottlob Frick, bass. Chorus and Orchestra of the German State Opera (Berlin), Franz Konwitschny, cond.

- ANGEL 35844. LP $4.98
- ANGEL S 35844. SD. $5.98.

This recording can be recommended solely on the basis of Frick's work. This bass is one of the very few contemporary German male singers to employ what most of us regard as a "singing" tone, with at least some vibrato and forward roll, as opposed to the func-
REQUITAN D AND MISCELLANY

E. POWER BIGGS: "The Organ in America"

E. Power Biggs, organ.
- Columbia ML 5496. LP. $4.98.
- Columbia MS 6161. SID. $5.98.

When we think of historic organs, we almost always think of European cathedrals, but there are many elegant old organs in American churches and historical societies, as a photo spread in this magazine recently proved ("America Has Old Organs, Too," August 1960). E. Power Biggs here provides nine American compositions on seven of these instruments. Included among the nine compositions are James Hewitt's The Battle of Trenton (which sounds quite dull on the organ compared to Richard Bales's orchestral transcription of it in The American Revolution album), Billings's inevitable Chester, and Philip Philp's President's March, better known as Hail, Columbia. The best things here, however, are a fugue by the little-known but very able contrapuntist William Selby of Boston; a sonata by John Christopher Moller, in the Mooradian style; Oliver Shaw's priceless Victorian descriptive piece A Trip to Plymouth (from Providence, where the composer lived); and Charles Ives's Variations on "America."

This last is the most important thing in the set. We hear much about Ives the organist—in fact, the organ in the New England church is to the Ives organ as cut-off ears are to the legend of Van Gogh—but we hear little of Ives's own organ music, and this is the first sample of it to be recorded. Ives composed these variations in 1891, when he was sixteen years old, but the piece nevertheless contains brilliant passages and some of the grandest dissonances ever snorted by a Congregationalist keyboard.

The sounds of the seven organs involved have been perfectly recorded, and they are all enchanting to hear. All have the clear, firm, transparent timbre which is the true, classic organ tone, though some are almost as small as music boxes in their volume and timbre.
SPACIAL FIDELITY
BY RFL
single-cabinet
mono-stereo
speaker systems

This dramatic 5-minute test-demonstration will prove the most compelling musical experience you ever enjoyed outside a concert hall

Any Spacial Fidelity dealer will be happy to give you this exciting 5-minute demonstration. He will first select a famous, brand-name speaker system in his stock, or you may suggest one. He will then select a Spacial Fidelity system. Both will be connected to a high fidelity music system so that he can switch instantly from one to the other. Your dealer will then play a high fidelity monophonic record through the first speaker. After about one minute he will switch the music to the Spacial Fidelity system, so you can hear the difference. There will be no mistaking it.

So startling is this difference in performance between Spacial Fidelity and conventional speaker systems, that in similar test-demonstrations for random groups, eight out of ten listeners identified the monophonic performance of the Spacial Fidelity speaker system as stereo.

Your next question will probably be about stereo. Your dealer will point out that a Spacial Fidelity speaker system is actually a complete stereo reproducer in a single cabinet enclosure — and that if, at some later date, you convert your high fidelity system from mono to stereo, no additional speakers will be required. To demonstrate this point, he will play a stereo record or tape through the Spacial Fidelity speaker system.

If you have ever attended a concert, an opera, a musical — any live performance — you know the sensation, the unmistakable dimensional quality which the environmental surroundings impart to the music. Spacial Fidelity can offer you no more — only the delightful realization that you can now recreate this experience — at will — in the comfortable privacy of your own home.

The Classic (Illustrated) a stately decorator piece designed by Petruchelli — captures the luxurious warmth and elegance of the formal drawing room — magnificently handcrafted and superbly finished. Available in red or brown mahogany, $765. Other models from $225 to $795. Prices slightly higher in West.

Arrange today for a personal 5-minute test-demonstration of Spacial Fidelity. For the name of the dealer nearest you, and descriptive literature, write to: Dept. H.F.11

Johann Strauss II: Auf der Jagd; Fruhlingsstimmen; Blue Danube; Egyptian March; Perserum mobile; Joseph Strauss: Delirium; Ohne Sorgen; Transilvane; Johann and Joseph Strauss: Pizzicato Polka.

Vienna Philharmonic Orchestra, Willi Boskovsky, cond.
* • LONDON CS 6182. SD. $5.98.

Boskovsky conducts this attractive, lightweight music with elegance and sensitivity, and the Vienna Philharmonic’s playing here has a precision, delicacy, and graceful transparency all too often missing in its playing of more substantial fare. The only thing I can cavil at is that these performances are a shade overrefined and lacking in vigor. Compare this Blue Danube with Bruno Walter’s equally Viennese but more robust version and you will understand what I mean: in the present performances one listens with rapt admiration, but Walter’s infectious lilts makes you want to dance. Magnificently suave stereo sound. H.G.

COLLEGIUM MUSICUM (KREFIELD): Music of the Renaissance
Erika Merzger-Ulrich, soprano; Otto Pingel, tenor; Collegium Musicum (Krefeld), Robert Haas, cond.
* • LYRICHORD LL. 86. LP. $4.98.

The eighteen pieces on this disc extend in time from the middle of the fourteenth century to the beginning of the sixteenth and on the map from Burgundy through Germany and Italy to Spain. In addition to anonymous pieces there are compositions by Dufay, Binchois, Landino, Tromboncino, Pelelusa, De la Torre, and Escobar. Some are familiar, others are not. Together they present an interesting and generally lively sampling of the secular music of the period (Dufay’s Veni creator spiritus and Flous florum are the only sacred works here). Haas varies his performing media, using recorders, viols, lutes, and bells, and generally chooses animated tempos—perhaps a bit too animated in Binchois’s De plus en plus and Landino’s Gran pian’ agl’occhi, both of which love songs are more effective when the melodic line is curved more casually. Both singers are competent, and the sound is good

GIUSEPPE DE LUCA: Operatic Recital
Giuseppe de Luca, baritone.
* • ROCOCO R241. LP. $5.95.

This collection brings us a younger De Luca than is offered on Camden’s worthy reissue of Victor’s from the baritone’s Metropolitan days. The present compilation is drawn from the Gi&T and Fonitpia catalogues, and dates from the 1902-1907 period. The originals were, of course, all acoustics, and best by a fair amount of surface noise; the accompaniments are for piano only.

High Fidelity Magazine
De Luca's voice retained its characteristic quality from the outset of his recording career right up through the late Thirties. It was steady, pliable, colorful—and its possessor was a master of the noblest Italian singing tradition. Of unusual interest on this record are the elegantly sung Favorita excerpts, an exemplary “Vivace fuggitiva,” a feather-light rendition of the Pique Dame serenade, and an Ideale so finely turned as to rate with Battistini's. Mozart partitas find their “Deh veni alla finestra” lugubrious, though no one can deny the effectiveness of the vocalism qua vocalism. The De Luca versions of Nefastato’s arias from Damastoria are more adagio than one might suppose, the Italian translation notwithstanding. The only misfire here, for my taste, is “Bella siccome un angelo”—not because it is poorly sung, but because this unobtrusive little aria is treated as a grand scene, complete with long fermatas, a pretentious cadenza, and so on. It is probably close to what Donizetti had in mind, but it seems disproportionate. There are informative annotations by Keith Hardwick.

C.L.O.

JASCHA HEIFETZ: "Heifetz Encore!"

Jascha Heifetz, violin.

Heifetz's way with these short pieces is definitely that of a twentieth-century virtuoso. Whereas old-style violinists, such as Fritz Kreisler, stressed warmth and intimacy in their playing, he goes all out for high-powered precision and tonal glamour. Occasionally Heifetz's emphasis on physical virtuosity tends to make these miniature sound a trifle glossy and Hollywoodish, but I dare say no other contemporary violinist can equal his velvety purity of tone or the gossamer crispness of his attack. Some of the music is not very much, but the playing is magnificent.

The recordings are of varying vintages. The Saint-Saëns Humouranes was made around 1949 when William Steinberg was a principal accompanist for RCA Victor, and some of the selections recorded with Emanuel Bay may date back even further. The remaining items, made with Brooks Smith, are presumably of recent origin. The recorded sound is fairly consistent. Although it is sometimes rather thin, it is always agreeable. My copy had a few pre- and post-echoes on Side 1. Both pianists, incidentally, provide rather negative accompaniments.

H.G.

KROLL QUARTET: "Presenting the Kroll Quartet"

Kroll Quartet.
- Epic SC 6037. Two L.P. $9.98.
- Epic SCB 108. Two SD. $10.98.

A bit of folklore which flourishes among string players maintains that a quartet named after its leader is apt to be dominated by him to a greater extent than one labeled more impersonally. The Kroll, which

ACROSOUND presents the

ULTRA-LINEAR STEREO 120 KIT

60 full clear watts in each channel

KIT $159.50
Factory Wired $219.50

*Pat. Pending

Power reserve for even the most inefficient speakers with perfect stability for electrostatic speakers. Expenses have not been spared to bring you the most advanced Stereo amplifier kit . . . . easy and enjoyable to construct. The circuit is based on world famous Ultra-Linear II, an amplifier which has won acclaim as the most stable low distortion feedback amplifier devised. The Ultra-Linear 120 offers you the combination of this famous circuit, plus Acro designed and Acro manufactured output transformers with exclusive Hybrid* feedback winding for new highs in stereo listening.

Only the Acrosound Ultra-Linear 120 gives you these 6 features

METER
To conveniently set bias and check performance.

VARIABLE DAMPING
To get the best from your speaker.

PRINTED CIRCUIT
Locked-in performance with preassembled and tested printed circuit assembly.

HYBRID* FEEDBACK
An exclusive Acrosound circuit feature which provides for the high degree of stability inherent in this amplifier.

SILICON POWER SUPPLY
Full way bridge type Silicon rectifier power supply — providing an extremely light-weight, yet excellent regulated power supply.

ULTRA-LINEAR OUTPUT TRANSFORMER
Uses the famed Ultra-Linear transformer and circuit invented by Acro's Herbert L. Keroes and recognized as the best audio circuit known.

changed its name from the Coolidge in 1945 (five years after Elizabeth Sprague Coolidge first sponsored the ensemble at her Library of Congress chamber music series), could conceivably be cited in support of this theory: there is a driving, rather Prussian quality in the playing which, I suspect, emanates from the fiddle and the temperament of Mr. Kroll himself. He has shaped an alert ensemble which is, however, not so subtle as some, and it fared best in music which makes the least demand for nuance and shading of tonal color. Haydn's Lark, for instance, is a vivid affair. You are not likely to hear the clarke tread of the opening chords played with greater springiness—the cat almost pounces; and at the same time there is nothing prissy here. Even in so carefully articulated a passage as the grace-note measures of the Minuet the approach is thoroughly healthy. There is more warmth in other versions; the Vienna Konzerthaus Quartet, for one, is mellower and more benevolent, but in comparison to the present performance it sounds almost anemic.

The Kroll's Death and the Maiden does not match the Juilliard's—but then, whose does? Even the Budapest version has some rough edges beside the formidable finesse of that performance, and the Krolls, for all their vigor, do not achieve an equal degree of intensity and dramatic contrast. The Prokofiev First, while rhythmically very much alive, loses some of the emotional dimension to be found in the Endres Quartet performance, where an unexpected dolce in the score evokes not merely a quiet legato but an actual sweetening of tone. As for the Tchaikovsky, there is lyric grace aplenty. The folk tunes which abound in this work are sung out with spirit and fluidity, and the heavy-footed dance of the Trio is placed in good pianistic style. It would be hard to miss with this piece—which is no blemishment of the Kroll Quartet, but merely a commentary on the music's simplicity and directness.

I found both moon and stereo recordings somewhat shrill. The stereo does not make the mistake of spreading the sound too broadly, so you can take your choice of versions. The records, incidentally, are available separately, the Haydn/Schubert at LC 3690 and BC 1081, and the Prokofiev/Tchaikovsky at LC 3691 and BC 1082.

High Fidelity Magazine
JOSEPH ROSENBLATT: “Songs of My People”

Massevet: Elégie; Traditional: Schluf in Sisser Ruh; My Yiddishe Momme; Yohreis; Eili; Eili; Lamir sich iberbien; Ahein, ahein; Song ze rebenu; Shofar shel Moshier; Shir Hamaalos.

Cantor Joseph Rosenblatt, tenor.

HENRY ROSENBLATT: “Sings Liturgical Masterpieces”

Traditional: Sholom Aleichem; Ki K’shimo; Hida; M’chaleigt chayim; Chassidic Kaddish; Yi’sheve; Aqeyo; Tal; Shviet; Ma tov.

Cantor Henry Rosenblatt, bass-baritone.

These releases will probably be of interest to different people for different reasons. To some oldsters the voice of Joseph Rosenblatt, who died in 1933, may arouse nostalgic memories satisfied only by his singing of My Yiddishe Momme and the great lament Eili, Eili. But his singing should appeal also to aficionados of vocal culture in general. Although not exactly “high fidelity,” these selections from his recordings are clear enough to show why the vocal technique and quality of the great cantor have been compared to those of Caruso. For here is the same compact, closely knit tone—the only kind, somehow, which can ever be truly limpid; the same ability to step precisely from the middle of one note to the middle of the next; and the same equal capacity for staccato and legato. It is true—good singing is good singing.

The singing of Joseph Rosenblatt’s son, Henry, an eminent cantor in his own right, will probably be of greatest use to those interested in contemporary cantorial style. Perhaps I should say “styles,” for the Jewish liturgy has developed over a long period of time and a wide diversity of places. It ranges from the florid, almost wordless, intimate cry of the individual alone in the universe to the dancey, highly rhythmic impersonification of such numbers as the Chassidic Kaddish and the Yisn’chu. The range of ritual songs presented here sufficiently demonstrates that in the Jewish religion, joy is not apart from reverence. A fine scholar as well as a singer, Cantor Henry Rosenblatt is on sure ground in his interpretations, and is especially good in the light, rapid, intricate passages. On high, sustained notes his voice loses focus and tends to depart from pitch. Part of this may be due to the fact that he seems to have been too close to the mike. Vocally, Cantor Henry Rosenblatt is not in the same league with Cantor Joseph Rosenblatt, but who is? The organ accompaniments are of interest, as the notes beg us to observe, but the effect here is muddy and ill defined and in any event, the organ as an instrument of the dance is always slightly comic.

Here’s great news

The Sensational BOZAK

B-800 FULL-RANGE SPEAKER
(PATENT PENDING)

is yours for only $45.00!*

An 8-inch speaker of unique design, the B-800 provides unbelievably fine music and voice reproduction over a frequency range of 50 to 15000 cycles! Its clean bass, detailed midrange, and smooth highs combine to give exceptionally transient response and remarkably satisfying tone. It works beautifully from a small, infinite-baffle shelf enclosure, or can be mounted flush in an ordinary interior wall.

You’ll be proud to own the B-800! Now, at last, you can extend your music system to other parts of your home—bring Bozak musical sound to den, playroom, kitchen, bedrooms—at a truly moderate cost!

and,

THE BOZAK B-801

SPEAKER SYSTEM

a B-800 Full-Range Speaker Mounted in a Handsome, Well-Built Enclosure is only $89.50!* Your chance to own a Bozak Speaker System! Thousands who heard this instrument at the New York and other High Fidelity Shows were delighted with its musical quality and amazed at its price! You’ll agree that it’s the biggest bargain ever in really fine sound!

Consistent with the Bozak principle of providing for systematic growth, your B-801 can achieve a broader dispersion of highs through the addition of a Bozak B-200X Dual Tweeter. A cutout is provided for vertical or horizontal mounting of the B-200X, as shown in the adjacent photo of the enclosure with grille cloth removed.

Hear this great new speaker soon at a Bozak Franchised Dealer!

CIRCLE 98 ON READER-SERVICE CARD

www.americanradiohistory.com
For the past year or so, a series of highly amusing and sharply etched portraits of fairly familiar English citizens have been flitting across American film screens. All have been the creation of Peter Sellers, a young English comedian and mimic of extraordinary talent. These little masterpieces of observation, which present only a slightly exaggerated picture of some easily recognizable types, can hardly be called caricatures. Sellers is more often kind than caustic in his methods, and it is this absence of malice which makes his delineations so very funny.

Until now, these delights have been mainly visual, but with the arrival of this new Angel recording, we discover that Sellers has an equally wonderful ability to create a characterization merely with words. Or I should say, a combination of words, dialect, inflection, and a first-rate actor’s sense of timing.

The Angel disc offers the comedian in a veritable galaxy of comical vignettes, some funnier than others, as is the usual nature of omnibus recordings, but all certainly highly amusing. Sellers can be the perfect bumbling political candidate promising his constituents everything, yet nothing, in a speech that is as windy as it is platitudinous, and follow it up with the pathetic lament of a nine-year-old singer of pop songs, who feels he is “over the hill” because he has not had a record in the Top Twenty in three weeks. In a travelogue to end all travelogues, he gives a devastating take-off of the voice that for so many years accompanied the filmed journeys to exotic lands. Sellers confines his spiel to the beauties (?) of BalHAM, a London borough where nannies regale their charges with horror tales, the local handicraft is “toothbrushholesmanship,” and everything on the local café menu is “Off.” As Sellers recounts this grim tale, BalHAM is definitely a place to pass up.

“Very, Very Funny—and Without Malice”

“The Best of Sellers.” Peter Sellers, Irene Handl, Fred Flange; Orchestra, Ron Goodwin, cond. Angel 35884, $4.98 (LP); Angel S 35884, $5.98 (SD).
Some years ago, Sellers did a hitch with the RAF, being stationed in India. The exquisitely funny accent of the English-speaking Indian, which he has mastered to a T, is put to good use in an interview between a newspaperman and the producer of the Delhi version of *My Fair Lady*. In this, we discover that some song titles will be changed, with *Get Me to the Taj Mahal on Time* and *I've Grown Accustomed to Your Dhoti* being considered more appropriate for the Indian production than the originals.

The BBC, always a prime butt of English comedians, comes in for its share of Sellers' humor, with a sly poke at the sort of program of youthful reminiscences that used to belong to the late Sir Max Beerbohm. And a funnier session is the one lampooning panelists on a very arty program, in which it seems no member has been properly advised as to what he should discuss.

In *Shadows on the Grass* Sellers must play second fiddle to Irene Handl, who gives a really remarkable study of a vulgar, middle-class English widow getting acquainted with a Frenchman at a seaside resort she describes as "Private but not insulated, if you know what I mean." This is an unforgettable little cameo, in which the coyness, the gaucheit, and the pathetic desperation of a fading female are brilliantly caught. Yet with it all, it is very, very funny.

There are a number of other delights in this extremely amusing program, but I'm sure you will want to sample them for yourself. I promise you that you are not likely to be disappointed.

The stereo version makes very effective use of movement, particularly in *Shadows on the Grass*, where the Frenchman starts out in the left speaker, the woman in the right; as the pick-up progresses, he moves to join her right, and they exit, obviously arm in arm, up right center. It's a convincing illusion. My review copy of the stereo was afflicted with some strange squeaks, which may well be confined to this pressing.

---

The Excitement of a Band on Parade

"The Sound of a Marching Band: 120 Cadence." *Medallion Marching Band*, David Terry, cond. Medallion ML 7507, $4.98 (LP); MS 7505, $5.98 (SD).

What conductor David Terry and engineer C. R. Fine have done here is as simple as it is sensible: they have remembered that perhaps the most thrilling of all "live" aural experiences is hearing a first-rate band in rousing out-of-doors parade music, and they have exerted every possible executant and engineering effort to reproduce, as vitally as possible, not only the familiar sounds themselves, but also their natural ambience.

An unspecified but obviously big and virtuosic band plays a skillfully chosen and varied selection of well-known college and service marches interspersed with favorites by Sousa, Bagley, Alford, and Willson. The performances are as high-spirited and precise as I have ever heard on or off records. If an electronic metronome has been used, as claimed, to maintain throughout exactly 120 beats to the minute, it does nothing to inhibit the players' gusto or freeze their rhythmic resilience. Yet what gives this program its supreme distinction is the recording. Every technological resource (not excluding stereostic enhancements and channel switchings) is utilized, not as a display of electronic gimmickry, but as a flawlessly transparent, broadly panoramic medium which never calls attention directly to itself and manages to re-create every coloristic and dynamic detail of the music—even the intangible breeziness of the very air in which it was first formed.

Here we are spared the fruitless contest between art and science, and we can learn anew how fertile their harmonious marriage can be. The only thing "new" here may be our own personal response to so electrifying and dramatic an aural experience, but this is inexcusably more thrilling, as well as satisfactory, than any sonic eccentricity or synthesis ever can be. And the final proof of the wisdom of subordinating stereo techniques to music (and atmosphere) is that this extraordinary recording sounds no less invigorating when it is divested of its ingenious channel antiphonies and heard in monophony alone. There have been many fine band recordings, but surely none has matched the over-all dynamism, impact, and authenticity of this one. R.D.D.
Kern Sung with Love and Devotion

“Margaret Whiting Sings the Jerome Kern Song Book.”
Margaret Whiting; Orchestra, Russell Garcia, cond.
Verve MGV 4038, $9.96 (Two LP).

This may not be the “Jerome Kern Song Book,” but unless I miss my guess, we are hardly likely to get a more delightful presentation of some of Kern’s loveliest songs for a long, long time. From the thousand or more songs that Kern wrote for Broadway and Hollywood, Margaret Whiting has selected twenty-four, and done so in what seems to me the only sensible and honest way. She has chosen her numbers because they are personal favorites of hers, because she knows she can do them justice, and (with an eye on more possible sales returns) because they are nearly all songs the public knows and loves. Should you happen to find a particular favorite of yours missing from her program—and I’m sure you won’t be alone in that respect—consider the problems involved.

To please everyone, Miss Whiting would have had to increase the contents of this album at least fourfold, and even then there would be complaints.

As a singer of romantic ballads, Miss Whiting has long enjoyed an enviable reputation, and it is therefore no surprise to find her program replete with some of Kern’s most beautiful romantic songs, with Smoke Gets in Your Eyes, The Way You Look Tonight, All the Things You Are, Lovely To Look At, heading the list. These the singer handles with the greatest assurance and tremendous vocal style, and with the sort of affection that only a true artist brings to a song. Why Was I Born and Why Do I Love You, two of Kern’s most successful efforts at writing a sort of restrained torch song, are treated as sad laments, and with fine results. If her version of Why Was I Born does not quite erase memories of Helen Morgan’s wistfully pathetic rendition, it quite easily surpasses any other recorded version since. A very special Whiting favorite is Poor Pierrot, from Kern’s memorable score for The Cat and the Fiddle. Her devotion is stamped on every phrase of this lovely, and neglected, song, and I can assure Miss Whiting that Odette Myrtill never approached her tender account of this number.

When it comes to songs originally written in a lively tempo, such as She Didn’t Say Yes (also from The Cat and the Fiddle and not, as the record cover states, from Show Boat or I Won’t Dance), the singer tends to slow them down, which gives her program a certain monotony of tempo. Her account of I’m Old-Fashioned, although enlivened by Russell Garcia’s delightful arrangement, could be much sprightlier, and Dye Love Me from Sunny, originally written as a duet, would be improved by a gayer lilt than the singer brings to it.

But these are minor complaints against a very successful account of so many wonderful songs. It is perfectly obvious from Miss Whiting’s affectionate and utterly charming performances that the entire project was a labor of love. Since she has the ideal voice and style for these songs of a not-so-distant past, can’t someone induce her to select twenty-four more Kern songs to make up Volume Two? I, for one, hope so. And should the venture materialize, I hope Miss Whiting will insist on having Russell Garcia as her arranger and conductor. His excellent arrangements here, beautifully tailored to complement the singer’s style, constitute a major contribution to this excellent volume.

pulverizes old-time vaudeville tunes in a nightmare combination of what we have called "davy-stable" jazz with the latest channel-hopping and switching technology, is a gasser. For the many in the pandemonium, just listen to this treatment of THERE'LL BE A HOT TIME IN THE OLD TOWN TONIGHT: this the scarcely less monstrous RUMBA BANJO; MR. BONES, GEORGIA CAMP MEETING, AND DAISY BELL. Dixieland, slapstick, and rattlebox styles are outrageously parodied; and if laughing trombones, oom-pah tubas, honky-tonk pianos, etc. (to say nothing of klaxons and slide-whistles) never sounded like this in real life, it was only because they had hitherto lacked Mr. Frey's galvanic needle. It all makes for a trying test of one's sound (and visceral) system, but at least it never lacks the saving graces of immense gusto and brash humor.

The cha-cha disc, for all its incivility and insistence, is less startling and soon becomes (like most of its kind) insufferably monotonous if one isn't actually dancing to it.

R.D.D.

One of the better current spectaculars: notable for the conductor's effective if sometimes overelaborate arrangements of Mr. Porter tunes (What Is This Thing Called Love?, Love For Sale, Anything Goes, Easy To Love, and Get Out Of Town in particular); for the virtuosic performances by a 59-man orchestra; for extremely clean, stereoscopic, and pleasing moderate-level recordings and for its handsome album-folder including detailed personnel and technical notes. R.D.D.

This is a Gershwin (George) versus Gershwin (Ira), and definitely not a recording for the dedicated Gershwin Fr?es fan. But those who do not object to having these familiar Gershwin tunes serve as a peg on which Al Caiola can hang some really fascinating, occasionally eccentric, arrangements will have a great time. The music is scored for five guitars, a host of woodwinds, percussion and piano, and obviously written for maximum stereo effect. The separation is extremely wide, and there is a good deal of channel-switching between bands, so that it is never easy to pinpoint the position of any one instrument. The piano, for instance, opens right in THE MAN I LOVE, moves over left in Mine, reverts to right again in Savoy, finally coming to rest at left in Sooan. But out of this constantly shifting instrumental positioning comes one of the finest stereo sound I have heard, and since the music itself is of higher quality than most of that found in these sonic spectaculars, I recommend the disc most highly.

J.F.I.

"Just Say I Love Her,..." REMO CAPRA; ORCHESTRA, FRANK DE VOL, cond. COLUMBIA 1496, $3.98 (LP); CS 8287, $4.98 (SD).

By day, we are told, Italian-born Remo Capra plies his trade in New York as an engineer with an existing company; by night, he cruons into Columbia's studios. Capra's baritone proves to be pleasant and
A MIRACLE IN SOUND

After two years of research and development a speaker system we can unconditionally guarantee to be the finest bookshelf unit you have ever heard, REGARDLESS OF PRICE, or your money back.

Over 2500 test systems are now in use in private homes in the Ohio and Michigan area. The acceptance has been unbelievable. Never before a sound so realistic to so many people in so many different homes! These are the facts that enable A.E.S. to make this bold offer.

Response: 19-21,000 CPS
This unit will operate at maximum efficiency with amplifiers from 8 to 75 watts.
In limited quantity, and for a limited time only, $15.00 complete, plus shipping.

November 1960

CIRCLE 4 ON READER-SERVICE CARD
ingratiating, with a fugitive trace of accent for added charm. His interpretations of such as Day by Day, My Foolish Heart, and Once in a While may lack the suppleness of the full-time pro, but on the whole he emerges as a performer of superb promise. The LP equals its stereo cousin in virtually every important respect. O.B.B.

“The Sound of a Minstrel Show.” The Medallion Minstrel Men, John Krance, cond. Medallion ML. 7506, $4.98 (LP); MS 7506, $5.98 (SD). Medallion’s imaginative repertory men were really inspired when they came up with the notion of re-creating the music of the famous old-time minstrel shows, and they wisely have made no attempt either to resurrect or imitate the less viable verbal jokes and patter of the originals. There may be some anachronisms in the present scoring (surely there should have been some fiddling, and I doubt whether any actual show band ever mustered so large and varied a percussion section as this one), but the tones themselves are authentic throughout. There’s a lusty chorus, and the tenor and bass solos are wonderfully evocative of the old times and styles, as is the florid display trumpeting of Bernard Glow and Carl Poole in the inevitable Carnival in Venice showpiece. All the performances, indeed, are marked by infectious zestfulness with never a hint of parody. The recording is ultrabrilliant in both editions and surprisingly broadcast even in monophony, but of course it’s more expansive and realistic in stereo. R.D.D.

“Popular Piano Concertos of the World’s Great Love Themes.” George Greeley, piano; Warner Bros. Orchestra, Ted Dale, cond. Warner Bros. WS 1387, $4.98 (SD). These one-movement piano concertos follow the pattern established by Jack Pina and the Freddy Martin Orchestra, back in the days when Tonight We Love was standard, and inescapable, radio fare. Naturally enough, Tonight We Love reappears in this program along with the Love Music from Tristan and Isolde, and some trivia (Love Letters, My Love, Secret Love) which hardly qualify as “Great Love Themes.” By injecting just the right amount of schmalz into his interpretations pianist George Greeley manages to make them all sound quite attractive, and with the Warner Bros. Orchestra providing a rich-sounding orchestral support, the whole emerges as a decidedly pleasant concert of light music. J.F.I.

“Stagestruck.” Ralph and Buddy Bonds, organs. Epic LN 3710, $3.98 (LP); BN 574, $4.98 (SD). As someone allergic to the sound of one electric organ, I naturally expected my allergy to be compounded by the sound issuing from two of them at the same time. Oddly enough, it didn’t work out that way. In fact, I was most agreeably surprised by the sounds the Bonds Brothers manage to coax from their twin Baldwin organs. These organs, it seems to me, are more mellifluous and more sonorous than most electrics, and they are capable of greater tonal coloration. Both these assets are very prominent in this well-realized program of numbers from musicals of the past and present. A further advantage is the complete understanding that exists between the twin performers, and the high level of musicality that informs their performances, making this an excellent disc of background music, and an even better one for just plain listening. J.F.I.

“Swinging at the Opera.” Orchestra, Fred Karlin, cond. Everest SDBR 1097, $3.98 (SD). Al “Jazzbo” Collins’ notion of utilizing familiar opera airs as springboards for jumping-jazz performances is energetically worked out here by a skillful group (starring trumpeter Harry Edison, trombonist Bob Brookmeyer, and saxophonist Phil Woods). It gets off the ground buoyantly enough in a Lohengrin “Bridal Chorus” and Rigoletto Quartet. There are some interesting treatments, too, of “Là ci darem la mano” and the Aida Grand March, but here—and even more so elsewhere—the arrangements tend to become chaotic and the performances empty and raucous. Magnificently recorded throughout, this is an experiment that warrants a second attempt—more carefully planned and less intensely executed. R.D.D.

“German Army Chorus.” Soldier Chorus of The Training Battalion, Officer’s Training School 2, with 6th Music Corps of the German Federal Army, Capt. Gerhard Scholz, cond. London SW 99007, $4.98 (SD). Well, the Germans didn’t lose the musical

---

A mediocre tube is like a mediocre musician!

DON'T SETTLE FOR MEDIOCRITY... USE GENERAL ELECTRIC HI-FI TUBES!
war—and this record proves it. The robust, confident voices of an army chorus swell in martial vigor through Heinrich Marschner's, Faust, Lili Marlene, and other such favorites of the Waffen SS. No one can sing brassy anthems of this type quite like a German chorus, and London has here captured one of the best in splendid, sweeping stereo. The songs themselves are ardent and melodic, but old World War II hands will have the depressing feeling that they have already attended this concert. London provides texts, but no translations. O.B.B.

"Tonight at 8:30." Carol Lawrence; Orchestra, Peter Matz, cond. Chancellor CHL 5015, $4.98 (LP); CHL'S 5015, $4.98 (SD).

If Tonight at 8:30 is as firmly implanted in your memory as it is in mine as the title of an entertainment Noel Coward wrote for himself and the late Gertrude Lawrence, you may be disappointed to find that Carol Lawrence has not included a Coward song in her program. What you won't be disappointed in is the young star's quite captivating performances of the songs she has selected from Broadway shows for her solo recording debut. This is an ambitious and highly diversified program, ranging from Arlen's dainty Sleepin' Bee and the quiet reverie of Lazy Afternoon to the excitement of Something's Coming and the sly suggestiveness of Do It Again. Miss Lawrence handles all of them with the aplomb of a veteran, bringing to them a vocal artistry that is quite rare in these days of mediocre musical comedy singing. J.F.I.

"Good Housekeeping's Plan for Reducing Through Exercise and Sports." Julie Conway and Rosemary Rice, narrators; the Bob Prince and Tony Aless Quartet; Columbus CS 8280, $4.98 (SD).

"Learn to Play Bongos with Mr. Bongo." Ira Cook, narrator; Jack Costanzo and Ensemble. Liberty LRP 3177, $3.98 (LP).

My first encounters in a long time with didactic recordings impress me anew with their suitability for do-it-yourself attempts to learn practically anything. I have had no chance to test the bongo lessons, but I don't see how it's possible for anyone who seriously studies the present explicit directions and examples to fail to learn the basic techniques, at least to the extent of happily "playing along" with Costanzo's rather harsh-tossed ensemble, if not necessarily with the dexterity of "Mr. Bongo" himself. For the reducing and keeping-fit exercises ( lucidly explained, clearly illustrated, and made practically painless by the catchiest of rhythmic musical accompaniments), I had a most enthusiastic guinea pig who couldn't wait to seize the album from me, and who reported that the exercises themselves are "wonderful—but very exhausting." R.D.D.

"Gala Russe." Don Cossack Choir, Serge Jaroff, cond. Decca DL 10026, $4.98 (LP); DL 710026, $5.98 (SD).

One of the selections on this release, Cossacks in Captivity, showcases the organlike tonalities of the Don Cossacks at their best; another, the Orthodox Cherubim Hymn—sung with a melting tenderness—is deeply moving. Yet, the program is not wholly felicitous. A group of student songs miss the mark completely, and a kind of sameness affects the Cossack ballads. Perhaps, after his long and honored stint on the podium, it is graceless to suggest that conductor Serge Jaroff could better delineate his material. However, the fact remains that Back from the March, a somber account of a Cossack who kills his faithless wife, comes off as a lighthearted vocal gallop, complete with piercing whistles. Turgid over-all sound casts a shadow across both editions. O.B.B.

"Our Leader." Paul Miller, banjo; Ensemble. Fantasy 3287, $3.98 (LP).

"Saloon Favorites." Lou Stein, piano; Ensemble. Mercury MG 20271, $3.98 (LP).

A pair of raftish offbeat programs strictly for old-timers with vulgar tastes, but what a welcome relief from the suavities of most current pops! Miller's four-string banjo picking and strumming dominates the exuberant performances of the San Francisco Marching, Trotting, and Walking Band in a batch of tunes from the Twenties, augmented by happy revivals of the earlier Under the Bamboo Tree (1902), Golden Arrow (1906), and Cabaret Glide (1909), plus Miller's own ragtime-era evocations, Blues for Banjo and Goodbye Mr. Banjo. Lou Stein cavorts on his honky-tonk piano (one with more substantial tonal qualities than most) along with a similarly brash and casual sax, guitar, xylophone, and rhythm section in such old favorites as The Sheik of Araby, Ain't Misbehavin', Doodle Doo Doo, and...
Can you see the difference between these two needles?

Differences in needles may defy the eye but not the experienced ear. There is no visual difference in the above needles, but a world of difference in the sound qualities reproduced by them. Superficial similarities of size, shape or tip material do not determine a needle's effectiveness, but critical differences — inherent in the nature of the metal and the quality of workmanship — can and do effect the compliance of the shank and the frequency response transmitted.

Don't be misled by look-alike needles. Your Clevite "Walco" dealer has the needle that not only fits your cartridge... but is right for it, giving the compliance and frequency response your player must have for proper reproduction.

All Clevite "Walco" needles are fully guaranteed. When you buy a Clevite "Walco" exact replacement needle, you get the same quality and precision that is put into all Clevite "Walco" original equipment needles... needles that are specified and installed in the cartridges of virtually every leading manufacturer.

"THE LOOK OF PERMANENCE"

Prudent purchasers today are graduating from mass produced "hi-fi" products, with their built-in "planned obsolescence," to the definitively engineered and hand-crafted QUAD products.

The QUAD Mono-Stereo Amplifier, AM and FM Tuners, and Full Range Electrostatic Loudspeaker represent enduring investments in natural sound reproduction. Their engineering is world recognized as the most advanced, their workmanship the very finest.

QUAD products are sold only thru selected, franchised dealers—who also feature the superb SME Precision Pickup Arm and other advanced no-compromise products. Further information and dealers' names available by letter request.

"Robert Merrill and Vivienne della Chiesa Sing Vincent Youmans and Cole Porter." Everest LPR 9001. $4.98 (LP); SDBR 8001. $4.98 (SD).

I'm sure that everyone involved in this project went into it with the best of intentions, but somewhere along the way, things went sadly awry. Part of the blame for this catastrophe may be laid to Gordon Jenkins' pretentiously dull arrangements, but most of it can be placed squarely on the shoulders of the two vocalists. Although Merrill is in good voice, he shows little enthusiasm for his material, lumbering through the songs with astonishing disinterest. His partner, once a soprano, now boasts a rather unmusical contralto (or is it tenor?) voice which she uses without any distinction whatever. Her version of I Love Peru (her pronunciation) must be the least enthusiastic tribute to the

several more recent songs (I'll Get By and Stars Fell on Alabama) that respond almost as well to his scanty treatment. - R.D.L.

"Around Midnight." Julie London: Orchestra, Dick Reynolds, cond. Liberty LRP 3164, $3.98 (LP); LST 7164, $4.98 (SD).

Julie London, who for a long time threatened to become the only inaudible singer on records, has suddenly acquired a little more vocal power. The barely whispered singing style, doubtless designed to establish her as the femme fatale of the phonograph, is replaced by a more robust manner. I'm not suggesting that she has become a Teresa Brewer or Ethel Merman overnight, but at least it is possible, without effort, to hear what she is singing. And what she is singing here are some pretty fine standards, including expert versions of Black Coffee, Lush Life, and How About Me. If she is not quite as successful with the balance of the program, the difference is very slight. Credit Dick Reynolds with some superior arrangements and the Liberty engineers with equally excellent sound. - J.F.I.

The voice of Lourdes—born Lourdes Guer- rero in the Dominican Republic—will bring new and exciting palpitations to your speaker system. Rich and solid, yet flickering with dark Spanish fire, her vocal style capti- vates both the ear and the spirit upon first contact—and the captivation endures. The beauteous Dominican's recital, sung in Spain- ish, ranges from Amor a Tea for Two; per- haps her best number is Duerme. known to American audiences as Time for Tea. In any case, all shine with a new luster in Lourdes' interpretations. Outstanding engineering throughout. - O.B.B.

To judge from what little intelligible sound filters through these grossly overechoed grooves, Miss Francis seems to handle this array of staples—Airey, Magic Is the Moon- light, Malagueña—with intelligence and dis- cernment. However, the fullness of her voice never penetrates the sonic syrup; her Green Eyes, for example, sounds as if taped in a submerged bathysphere. - O.B.B.
City of Light on records. It is really difficult to imagine that these fine songs could have been made to sound any dreamier. J.F.I.

"Adventures in Paradise." Charles K. L. Davis; Orchestra, Hal Mooney, cond. Everest LPBR 5106, $3.98 (LP); SDHR 1106, $4.98 (SD).

There is no mystery as to why Charles K. L. Davis should stake out a claim that Hawaii is a synonym for Paradise; he was born there. To advance his claim, the young tenor offers a beguiling assortment of languorous songs from the Islands, plus one or two (Red Sails in the Sunset and Now is the Hour) which, given a Hawaiian inflection, do not seem to be out of their usual habitat. Davis' light tenor voice is the perfect instrument for implementing the appeal of these lovely ballads, and there is added appeal in Everest's superlative sound. J.F.I.

"Big' Tiny Little's Singing Honky-Tonk." "Big' Tiny Little, piano; Chorus and Orchestra, Charles Bud Dant, cond. Coral 57335; $3.98 (LP); 757335, $4.98 (SD).

Even though this recording is not labeled a "Sing Along With" session, it is obviously designed to entice the listener into joining the gang for thirty minutes of vocal fun. Few listeners will be able to resist the invitation. Most of the songs are reasonably familiar (Daddy, Lazy River, Marie, In a Shanty in Old Shanty Town, etc.), the arrangements uncomplicated, and the chorus work excellent—though possibly a bit restrained in view of the implied environment. Since the sound has been kept at a reasonable level, attending participants need have no fear that their contribution will be drowned out. The gusto of the pianist's playing gives a great deal of atmosphere to the proceedings. J.F.I.

"Kick Thy Own Self." Brother Dave Gardner, RCA Victor LPM 2239, $3.98 (LP); LSP 2239, $4.98 (SD).

For too many years the Southern epitome of a has been the pratfall. So the listener's delight doubles when beneath Dave Gardner's rich amalgam of Southern accent, ecclesiastical unctious, and hip patter glistens a humor sometimes subtle, sometimes broad. Gardner is primarily a raccoon, and his punch lines tend towards silliness rather than the belly laugh. True, Gardner is on the edges of the "sick" ranks, but basically his roots are deep in the humorous soil that produced Will Rogers. O.B.B.

"Nice 'N' Easy." Frank Sinatra; Nelson Riddle and His Orchestra. Capitol SW 1417, $5.98 (SD).

Sinatra is back, after a year's sabbatical, with a bouquet of fine songs, nearly all of which he has recorded previously, though not for his present company. Except for the offswinging title number (a new song), these are all slow, slow ballads, in which The Voice appears to be going back to its middle Columbia-Axel Stordahl period. There is the usual impeccable Sinatra phrasing and feeling for the lyric, but I thought the voice sounded tired, and there was occasional evidence of strain. The unusually restrained, though completely appropriate, support from the Riddle Orchestra is always helpful. J.F.I.
INTRODUCING ALTEC 707 STEREO AM-FM TUNER-AMPLIFIER

Advance with Altec to the new, true sound of music—the larger-than-life sound of stereo at its finest! The all-new Altec 707 Stereo AM-FM Tuner-Amplifier brings you Altec engineering at its best—the same engineering which has made Altec sound the universal standard of theatre and broadcast sound. Here is that all-in-one control unit every stereo enthusiast has demanded—but one which makes no sacrifice in circuitry or component performance. In the 707, there is no compromise with quality!

It took Altec speaker engineering to turn the trick—the kind which created the matchless sound of Cinerama and Todd-AO for theatres, the speaker used by almost all major broadcast and recording studios.

Enjoy the sure simplicity of professional controls, the unequalled performance of the 707 in your own stereo set-up. Compare the specifications, then listen to it at your Altec dealer's. Experience that great moment when you are introduced to the true sound of music—the Altec sound of music. Priced at only $387.00.

NOW AT LAST, a home-sized 800 cycle speaker with components similar to those used in the world-famous A7 Altec "Voice of the Theatre" system.

Visit your Altec professional high fidelity consultant and ask him to demonstrate the new 837A "Avalon" speaker system and the new 707 Stereo AM-FM Tuner-Amplifier, that will bring the full range and dynamics to your living room.

The 837A "Avalon" is a professional 2-way system with frequency response of 40-20,000 cycles. 25 watt capacity. Dimensions, 29¼” H by 35” L by 17¾” D.

Other complete speaker systems from $89.50.

Compare ALTEC advances and superior specifications at your ALTEC DEALER'S. ALTEC offers you the most complete line of quality stereo and mono high fidelity amplifiers, speakers, and systems in the world. Write for descriptive brochure. Address Dept. HF-7D.

THE ONLY STEREO RECORD THAT PLAYS ON ANY PHONOGRAPH

Yes, it's true! Now you buy the one and only DESIGN COMPATIBLE TWO-WAY STEREO RECORDS and you will have full fidelity sound on any monaural phonograph and full two-channel response on any stereo phonograph. The product of many years of engineering research in cooperation with Fairchild Recording Corporation and Keel Manufacturing, these DESIGN COMPATIBLE records end obsolescence at last... let you build one marvelous record library that is perfect for any type system and any phonograph for now and for the future. In addition the dilemma of not knowing whether to buy stereo or monaural records that previously confronted you when giving records as gifts has been eliminated. There is an exciting selection of new DESIGN releases waiting at your record shop. Buy them once—buy them now—and you are ready for the phonograph of today and tomorrow.

NOVEMBER 1960

Count Basie and His Orchestra: "Not Now, I'll Tell You When." Roulette 52044, $4.98 (LP); S 52044, $5.98 (SD).

Slick, smooth, monotonous, and showing strong evidence of hardening of the orchestral arteries—that is the over-all impression one gets from this set. The first side is promising, there is the airy Basie touch, with bassist Al Grey grooving up an Ellington atmosphere, some honest vitality by tenor saxophonist Billy Mitchell, and a muted trumpet. But then comes a stage show version of Of Man River and a second side that limp heavily most of the way. There are glimpses of the light-stepping Basie swing through the heavy mist, but they are only enough to be tantalizing.

Basso-Valdambrini Quintet. Verve 20009, $4.98 (LP).

Saxophonist Gianni Basso and trumpeter Oscar Valdambrini lead an Italian group which seems to take its cues from the latter-day manifestations of the cool school in the United States, Valdambrini sometimes suggests the languidity of Chet Baker, at other times he has the more forthright attack that one used to hear from Jon Eardley. Basso is a pleasant but undistinguished performer. The effect is one of low-keyed background music made a little heavier than should be by a monotonous rhythm section.

Art Blakey and The Jazz Messengers: "The Big Beat." Blue Note 4029, $4.98 (LP).

Blakey's jazz Messengers, at their peak during Benny Golson's brief incumbency as musical director, have slid down hill since Golson's departure. Although the group retains some vestiges of the quality that Golson drilled into it, its material has deteriorated badly. Trumpeter Lee Morgan and tenor saxophonist Wayne Shorter do reasonably well as soloists, and Blakey propels the rhythm section with his usual muscularity, but the tunes are routine. The only variation from the endless, anonymous chomp-chomp of almost all the pieces is an odd and urgent It's Only a Paper Moon.

Les Brown and His Band: "Jazz Song Book." Coral 57311, $3.98 (LP); 757311, $4.98 (SD).

Brown has spiced up the usually bland playing of his band by bringing in four guest soloists—Zoot Sims, Buddy DeFranco, Frank Rosolino, and Terry Gibbs—to play arrangements written by another guest, Bill Holman, as well as by his staff arrangers, Wes Henton, J. Hill, and Frank Constock. Holman's arrangements give Brown's ensemble more body and swing than it normally has (the contrast of the stage-show production writing of Constock is startling) and Sims, Gibbs, and De Franco provide strong solo voices. De Franco, in fact, sounds warmer and easier in this big-band setting than when playing with small groups. Even with this support, Brown's band is still not comparable to the major big jazz bands, but this disc has more jazz than Brown has offered in some time.

Dave Brubeck Quartet: "Bernstein Plays Brubeck Plays Bernstein." Columbia CL 1466, $3.98 (LP).

Howard Brubeck's Dialogues for Jazz Combo and Orchestra, with brother Dave's Quartet as the Jazz Combo and the New York Philharmonic as the Orchestra, is conducted by Leonard Bernstein on one side of this disc. Because this is a jazz-cum-symphonietto concerted grosso, Brubeck's piece invites comparison with the Sauter-Finegan-Chicago Symphony recording of Rolf Liebermann's Concerto for Jazz Band and Orchestra. It is strictly no contest, however, for both Howard Brubeck and Bernstein have an understanding of jazz that goes far deeper than that of Liebermann and Fritz Reiner (who conducted the Chicago). Even so, the Dialogues are carried almost entirely by what are, presumably, ad-lib sections played by the Brubeck Quartet, which is in its best form. Dave Brubeck holds to simple piano lines, Paul Desmond is in his airiest, swinging style on alto saxophone, and the usual dependable rhythm support is provided by Gene Wright, bass, and Joe Morello, drums. The Philharmonic brass shows commendable crispness during an interval with Desmond in the first section, but for the most part the symphony men play a subordinate role. On the opposite side of the disc the Brubeck Quartet tries its hand at some of Bernstein's show tunes with scarcely any success aside from a gently lyrical version of Maria from West Side Story.

Cab Calloway and His Orchestra: "Hi De Hi De Ho." RCA Victor 2021, $3.98 (LP); LSP 2021, $4.98 (SD).

Nostalgia, beware! This is a disc calculated to make you very unhappy. Calloway, singing in an excessively mannered and (to my ear) offensive fashion, ruins several of his early hits, including Minnie the Moocher, as well as some helpless ballads. The studio band accompanying him has no jazz qualities whatever.

The combined talents of Carter, Schaefer, and Cole Porter might, one suspects, have been used more effectively than they are on this disc. Carter has arranged five tunes from Can-Can and Schaefer five from Anything Goes. Both are played by quintets which include Carter, playing alto saxophone, and Schaefer on piano. Carter's arrangements are simple and functional, serving as uncluttered frames for his own elegant, clean-lined solos and Schaefer's slightly eccentric manner of digging into his piano parts. Schaefer's arrangements, on the other hand, tend to be gimmicky. There is so much emphasis on cleverness that the soloists are often lost in the shuffle although Carter manages to cut through Allez Vous Ein to create a gentle, moving solo. Of the three principals involved, only Carter comes through satisfactorily.

Ornette Coleman: "Change of the Century." Atlantic 1327, $4.98 (LP).

The latest serving of specialties by the current enfant terrible of jazz does little to clarify his cause. On one selection, Ramblin', Coleman's performance on alto saxophone is organized and stated sufficiently clearly to reveal the strong jazz feeling at the heart of his playing, and his trumpet, Don Cherry, also achieves a relatively positive approach. Otherwise, however, the seven selections which make up this disc (all Coleman originals, as usual) consist largely of spas tic, hoppish riffs and lunes expressed with the unattractive harshness that seems to be an essential characteristic of Coleman's work. In the midst of all this maundering, one cannot help but be impressed by the swinging vigor of Charlie Haden's bass playing.

Eddie Condon's All Stars: "Tiger Rag! and All That Jazz." World Pacific 1392, $4.98 (LP).

The situation facing us here is a set of tunes from the original Dixieland Jazz Band's repertory pounced out suddenly by a generally inappropriate group of Condonites and deadened even more by heavy, echoing recording. Trombonist Butch Catellal stands out as a beacon of light in this morass, but

Rex Stewart and Bud Freeman try to solve their problems by blowing as raucously as possible. The group copes successfully with only one tune—significantly, not an ODJB piece—Lazy River. Why they bothered to do the rest is beyond understanding.

Floyd Cramer: "Hello Blues." RCA Victor LPM 2151, $3.98 (LP).

Cramer's disc is mentioned here only as a warning. Victor lists its contents as "Swinging Blues for Boppers." Cramer, a pianist, plays stiff, diluted, commercial blues figures, totally lacking in sensitivity, accompanied by a saxophone ensemble in the Billy Vaughn idiom. No hop, no swing, no blues.

Miles Davis: "Sketches of Spain." Columbia CL 1890, $1.98 (LP).
The Spanish folk-derivations that make up this disc would seem to be the ultimate refinement of the technique that Miles Davis and arranger-conductor Gil Evans have explored earlier on Miles Ahead (Columbia CL 1041) and Porgy and Bess (Columbia CL 1274). The wailing, searing sound of Davis' trumpet is ideally suited to the mood and tone on which the five selections—Concierto de Aranjuez by Joaquin Rodrigo, Hall o' the Wisp from Manuel de Falla's El Amor Brujo, and three original developments of Spanish folk themes by Evans—are based. And the ominous, hanging background of sound in which Evans now habitually sets Davis' trumpet is extremely effective. Within this relatively narrow scope, Davis' playing is more consistently to the point than on any of his earlier discs. But all these selections are so much alike in performance that what can be an effective device when it is used sparingly is here driven doggedly into the ground. As he develops his skill along this specialized line, Davis seems to be withdrawing from jazz. In this set, he is moving in the direction of a form of concert music that has only a tenuous relationship to jazz.

There seems to have been little point in issuing this disc. Made up of Jack Wilson, piano, Evans, bass, and Robert Barry, drums, the trio shows that it has studied the Ahmad Jamal technique when it is used sparingly is here driven doggedly into the ground. As he develops his skill along this specialized line, Davis seems to be withdrawing from jazz. In this set, he is moving in the direction of a form of concert music that has only a tenuous relationship to jazz.

Jimmy Giuffre: "Western Suite." Atlantic 1360, $4.98 (LP).
The three selections which make up this disc (Western Suite takes up one side, the other is split between Topsy and Blue Monk) were recorded in December 1958, just before Giuffre gave up the trio composed of himself, Bob Brookmeyer, valve trombone, and Jim Hall, guitar. All three are rather too long (11:28, and 8:51 minutes, respectively) to be sustained by these three instrumentalists. The playing of both Giuffre and Brookmeyer has a drab, flat quality; and when this is joined to the dry, repetitive jazz style that characterized most of this trio's playing, the effect becomes extremely labored. This is particularly true of Giuffre's Western Suite.

Topsy and Blue Monk both start out promisingly but they soon deteriorate, mumbled aimlessly into the doodrums.

Benny Golson Quintet: "Gone with Golson." Prestige/New Jazz 8235, $4.98 (LP).

Golson is teamed with trombonist Curtis Fuller, who was briefly called one of Golson's colleagues in the Jazztet, and a strong rhythm section made up of Ray and Tom Bryant and Al Harewood on five varied selections. So varied, in fact, that it scarcely seems as though the two long, unraveled pieces that make up Side B could really have been played by the disciplined, full-bodied group that creates three striking selections on Side A. All three have the dark, tight voicing that is the hallmark of Golson's arrangements. Two are loosely hinged originals on which Golson, Fuller, and Ray Bryant produce solos that bristle with propulsive assurance while the third, a ballad, Autumn Leaves, is attacked with much more bounce than one ordinarily expects in a ballad. Both Golson and Bryant build solos bubbling with rugged piquancy on this tune. Why such a capable group should have been able to do so little with the material on the second side of the disc remains a mystery.

Johnny Griffin Orchestra: "The Big Soul Band." Riverside 331, $4.98 (LP); 1179, $5.98 (SD).

Tenor saxophonist Johnny Griffin's effort to use spirituals and spiritual-like material as the basis for big-band performances has biosomewhat bloomed and blossomed, chiefly because Griffin has found in Norman Simmons an arranger with original ideas who is not satisfied simply to sketch an outline and call it an arrangement. Simmons has steered clear of the currently omnipresent heavy gospel backbeat, relying instead on the more open, freer expression of exaltation associated with earlier spiritual performances. Within that area, he has managed a great deal of variety in tempo, attack, and shading. Griffin's solo work is contained and thoughtful without losing the full-bodied urgency he has shown in less well-organized circumstances and there are several complementary solos by Clark Terry, Matthew Gee, and Bobby Timmons. The basic idea of this album may be that it is not constructed to be carried much further, but it has at least two fine performances in Meditation and Nobody Knows the Trouble I've Seen and it serves to make known the highly promising arranging talents of Simmons.

The Bob Crosby band came as close as any big band ever has to catching the Dixieland idiom. Ted Heath isn't anywhere near the target on this disc. He has settled for sick, swing arrangements of tunes from the Dixieland repertory through which a small, two-beat group occasionally pokes its anxious head. The soloists, too, are in the swing tradition rather than Dixieland. It's all a waste of the real merits of Heath's band.

Claude Hopkins: "Yes Indeed!" Prestige/Swingville 2009, $4.98 (LP).

Hopkins, who led one of the outstanding big bands of the Thirties, still plays very pleasant
Ahmad Jamal Trio: "Jamal at the Pershing, Vol. 2," Argo 667, $4.98 (L.P.), January, 1958, the night following the recording session that produced But Not for Me. Argo 628, a disc that helped lift the group to world popularity. If that L.P. had its fascinations more than two years ago, the present one might have been equally well received then, too. For there is slick, quirkisome piano work by Jamal and Israel Crosby's powerful bass is a constantly lifting force. But in two years' time the Jamal repertoire of picking, teasing piano lines over a strong, steady rhythm has become so familiar that performances such as these no longer carry the sound of surprise, to use Whitney Balliett's apt phrase, that they once had. They remain, nonetheless, pleasant, lighthearted demonstrations of an airy brand of cocktail jazz.

"Jazz Scene 1 and Jazz Scene 2." Epic L.A. 16000 and L.A. 16001, $3.98 each (Two L.P.), Although the intent of these two discs appears to be to offer a capsule survey of jazz, their actual range is much more modest. Jazz Scene 1 covers the Thirties in performances by Bunny Berigan (his classic I Can't Get Started), Count Basie (with Lester Young), Art Tatum, Artie Shaw, Earl Hines, Roy Eldridge, and four Ellington small groups led by Johnny Hodges, Cootie Williams, Barney Bigard, and Rex Stewart. As a miscellany, this is a fine set of performances (notably the Basie Young Lady Be Good, Williams' fervently growling Delta Mood, and Bigard's joyous Cardian) but it is scarcely representative either of the Thirties—the Swing Era is caught only once, and glancingly at that, in Shaw's early Just You, Just Me—or, as the notes claim, of the "artists who have influenced jazz growth and the direction it would take." But while this disc has much to recommend it regardless of its asserted purpose, Jazz Scene 2 is another matter entirely. Not only does it offer a very limited report on modern jazz (its declared intent), but aside from a romping saxophone duet by Zoot Sims and Al Cohn and a buoyant piano solo by Ray Bryant, the performances are quite run-of-the-mill. They are played by Ahmad Jamal (in the days when his trio included a guitarist instead of his current drummer), Kenny Clarke, Herbie Mann, Phil Woods, Bengt Hallberg, Conte Candoli (whose name is misspelled four times in four tries in the notes), and the Mitchell-Ruff Duo.

Does a product happen along in the crowded high fidelity components field that warrants any extraordinary attention? There is, of course, an exception to every rule. In this case, the new DMS-900 magnetic stereo cartridge is the exception.

Here are a few of the findings from an exhaustive test made at our request by Hirsch-Houck Laboratories, a leading independent research organization:

"Tracks well at less than 2 grams . . . indicating it is easy on records."

"Channel separation superior to practically any cartridge we have tested . . . being maintained all the way up to 15 KC."

"Frequency response and output voltages of the two channels are well matched."

"Few cartridges have as symmetrical channel separation properties as does the DMS-900."

Ask your dealer to demonstrate the fabulous DMS-900—the new magnetic stereo cartridge that tracks feather light! With .7 mil diamond stylus, $34.50.
THE EAR THAT HAS HEARD EVERYTHING, HAS HEARD NOTHING UNTIL IT HEARS LARRY KERT SING LEONARD BERNSTEIN

Identification of a singer with a song generally makes for success. In the case of Larry Kert success is insured through identification not only with a song, but with the entire score of "West Side Story" in which he plays the male lead Tony.

This album includes selections not only from "West Side Story" but from "Wonderful Town", "Candide", "On the Town" and "Peter Pan". In this his first solo album Larry Kert gives to the public a truly fine rendition of Bernstein's best. Bernstein music, and Kert singing, the formula for wonderful entertainment.

Johnny Lytle Trio: "Blue Vibes." Jazzland 22, $4.98 (LP).

This is a debut recording for Lytle, a vibraphonist who has a strong feeling for melody and a lean, pulsing rhythm. Thus, on such an ethereal tune as "Autumn Leaves", on which he manages to be both gutsy and lyrical. He has, the liner notes tell us, been endorsed by Lionel Hampton. This is not surprising since he is very much in the Hampton vein, but without the tastelessness that afflicts so much of Hampton's playing. Lytle plays a bright, moving set of seven numbers with reasonable, helpful support from Milton Harris, organ, and Albert Heath, drums, who have the good sense to stay out of Lytle's way.

"Mainstream Jazz." RCA Camden 554, $1.98 (LP); $5 554, $2.98 (SD).

Having successfully launched and promoted the term "mainstream jazz" to identify the musicians associated with the period between traditional jazz and modern jazz, Stanley Dance now seems bent on running it into the ground. On one side of this disc, which he produced, the Mainstream Sextet plays three selections of interest whenever trumpeter Shorty Baker can be heard and occasionally when tenor saxophonist Jimmy Forrest and trombonist Dick Dickerson are to the fore. But despite their best efforts, the performances as a whole are flat and undeveloped. The other side is devoted to a single selection by a big band led by Andy Gibson—a series of solos which show that a mainstreamer with too much space to fill can hang himself just as effectively as modernists can.

Les McCann: "Plays the Truth." Pacific Jazz 2, $4.98 (LP).

McCann, a pianist (accompanied by Leroy Vinegar, bass, and Ron Jefferson, drums), is coming in a little late on the gospel funk lid to get much distance out of it. He is a capable pianist but here his work is quite derivative. When he ventures away from the down-home riffs, as he does on "I'll Remember April", he becomes involved in slowly coagulating crescendos in the Garner manner, but without the badly needed foundation of Garner's rhythmic impulse.

Jelly Roll Morton: "Rags and Blues." Riverside 140, $4.98 (LP).

The third set of solos extracted from Morton's Library of Congress recordings is a distinct letdown after Mr. Jelly Lord (Riverside 12-133) and Jelly Roll Morton Plays and Sings (Riverside 12-133). The first disc was devoted to Morton's own compositions and the best parts of the second were also his own works. This time he concentrates largely on pieces written by others. This might have been all right since his singing and playing almost always made everything come out "Jelly Roll style." His reason, however, for playing these selections on the Library of Congress recordings was to illustrate a point he was making in his commentary. That commentary has been removed on this disc and, with it, a great deal of the validity of the performances is removed, too. He builds Tiger Rag to a brilliant climax in the portion of his Library of Congress performance that is included on this disc and, taken by itself, it is satisfying work. But a large part of the interest in the origi-
Red Nichols and His Pennies: "Parade of the Pennies." RCA Victor LPM 1455, $1.98 (LP).

Red Nichols was over the peak of his career as band leader and on the road down in the selections that make up most of this album. They are the products of his 1939 big band, a time when he had abandoned the format which had brought him fame in the Twenties and was trying to compete with the swing bands. There are moments of nostalgic interest here—Nichols' brisk treatment of My Melancholy Baby and his once familiar theme, Wall of the Winds—but not even the most willing nostalgist can deny the generally routine quality of the arrangements, the utter wretchedness of many of the tunes, the saccharin of the singing, and the insanity of the attempts at comedy. Nichols' trumpet pokes through the surrounding trivialities from time to time, clean, precise, and coolly positive, as it was in the Twenties.

André Previn Trio: "Like Previn!" Contemporary 3575, $4.98 (LP).

The glibness and derivativeness which have often played too prominent a part in Previn's jazz recordings are not in evidence on this disc. Here he is an unambitious, relaxed, and charming performer. The fact that all of the tunes are his own compositions may have contributed to the pleasantly unpretentious nature of this set, for the pieces are quite melodic and easily does not try to make too much of them. They serve as suitable foundations for piano work that is generally light and lilting, seasoned with occasional dashes of casual muscle flexing. Bassist Red Mitchell is a bulwark of strength in support of Previn.

Pee Wee Russell: "Swinging" with Pee Wee." Prestige/Swingville 2008, $4.98 (LP).

Pee Wee Russell and Buck Clayton, heard here with the all-purpose rhythm section of Tommy Flanagan, piano; Wendell Marshall, bass, and Osie Johnson, drums, have made individual recordings in their long and honorable pasts that are better than anything heard on this disc. But still the general level of the set is high and it is a pleasure to hear so much straightforward swinging playing on one LP. Pee Wee is a charmer who twists every phrase and bends every note into fascinating designs, while Clayton punishes away endearingly even on those occasions when he has nothing particular to say. The tunes lean towards standards of the stripe of Wrap Your Troubles in Dreams, The Very Thought of You, and Lulu's Back in Town.

Bette St. Claire: "At Basin Street East." Seeco 456, $3.95 (LP).

There's a fine instrumental quartet to be heard in brief snatches on this disc—Stan Free, piano, Mundell Lowe, guitar, George Duval, bass, and Ed Shaughnessy, drums—but their talents are wasted on Miss St. Claire, a drag, earth-bound singer. This is the same group that used to back Chris Connor. Strange that they don't seem able to find a singer more worthy of their backing.

Jack Teagarden: "Jazz Maverick." Roulette 25119, $3.98 (LP); S 25119, $1.98 (SD).

A relatively wax collection from Teagarden and his current group. The material is a mixture of hard-shell standards (Tin Roof Blues, High Society, Riverboat Shuffle) and extremely dispensable new material. Teagarden's singing and playing is, of course, as unfurled as ever, but his cohorts show understandable signs of desperation or depression.

Tyree Glenn Quintet: "Let's Have a Ball." Roulette 25115, $3.98 (LP); S 25115, $4.98 (SD).

Glenn, who discovered the popular potential of a muted horn with rhythm section even before Jonah Johnson, weaves his wah-wah trombone way through a pretty tiresome set of performances made frustrating not only because they waste Glenn's real abilities, but even more because they make almost no practical use of his syncopating hand. Tommy Flanagan, Mary Osborne, Charlie Potter, and Jo Jones. Glenn also sings in rather aimless fashion—particularly unfortunate when he attempts Gene Austin's wonderful tune Take Your Shoes Off, Baby (and Start Running Through My Mind), a song almost totally neglected on records since Hot Lips Page sang and played it so memorably with Artie Shaw's band about fifteen years ago.

Bob Wilber: "New Clarinet in Town." Classic Editions CJ 8, $1.98 (LP).

Wilber's playing clarinet, is heard with two different groups—a quintet which includes Charlie Byrd, guitar, Dave McKenna, piano, George Duvinier, bass, and Bobby Donaldson, drums; the other group is made up of the quintet, plus a string quartet, and French horn. The selections are by a group of composers that suggests the breadth of Wilber's jazz interest—Django Reinhardt, Duke Ellington, Eddie Sauter, Dave Brubeck, and John Lewis, among others. Wilber's clarinet is firm and full through the disc (he is a wonderfully lyrical performer), and Byrd and McKenna inject several highly individualized solos. The selections involving strings have their inevitable troubles, but even they are generally charming and the disc as a whole is far superior to the general run of jazz releases.

FOR THE FIRST TIME

Great Folk Music

IN STEREO

recorded in the field by

ALAN LOMAX

SOUNDS OF THE SOUTH 1346

Broad survey of white and Negro folk music: spirituals, blues, old ballads, work and game songs from all over the South.

BLUE RIDGE MOUNTAIN MUSIC 1347

Picking, fiddlin' and singin' in the authentic "blue grass" style.

ROOTS OF THE BLUES 1348

Country blues, train blues, field hollers and levee camp songs from Alabama, Mississippi and Arkansas.

WHITE SPIRITUALS 1349

Lively hymns dating back to frontier America. Unusual are examples of the "lining hymn" and the songs of the Alabama "Sacred Harp" singers.

AMERICAN FOLK SONGS FOR CHILDREN 1350

Jingles, riddles, game songs, lullabies, silly tunes and silly rhymes that make up "The People's Mother Goose."

NEGRO CHURCH MUSIC 1351

The best of the older Negro church music; soul-stirring spirituals and gospel songs recorded in Southern church communities.

THE BLUES ROLL ON 1352

Supplements "Roots Of The Blues," concentrating on more modern types of the country blues, recorded in hankie tonks, prisons and the hill country.

The Mozart Operas on Records

Continued from page 57

satisfactory. Neither Lois Marshall, as Constanze, nor Ilse Hollweg, as Blonde, is quite up to her male companion. Miss Marshall’s singing may be described as neat and a little reserved; Miss Hollweg is a bit uncertain in “Durch Zärtlichkeit,” and the upper half of her register is of better quality than the lower. Osmin is nicely sung by Gottlob Frick but without any trace of the villainy that this character should exude. The sound is clear and faithful in the monophonic edition as well as in stereo.

The Decca performance has different values, which to some listeners may outweigh those of the Angel. Outstanding here are the women. Miss Streich not only makes an ideal Blonde, but the beauty of her voice and the skill with which she handles it throughout its wide range make hers the finest singing in all three sets. Maria Stader lends more color to the part of Constanze than does Miss Marshall; and if in the horrendously difficult “Mariern aller Arten” she sometimes scoops a bit and a few of the high Ds are a little smeary, she carries off the rest, scale passages and all, with accuracy and bravura. Ernst Häfliger as Belmonte provides some good legato singing, limited in color, with top notes that have rather too much of an admixture of fleshtone for my taste. Martin Vantin is quite acceptable as Pedrillo, and Josef Greindl occasionally suggests something of the character of his role, as in his exultant “Iha! wie will ich triumphiren.” Frickay holds everything together nicely, and the sound is as good as Angel’s LP version.

Wilma Lipp, the Constanze in the London set, begins unpromisingly but improves considerably as she goes on. In “Ach, ich liebe” the voice seems thin, dry, and lacking in warmth; although the high notes are good, others seem insufficiently supported. In “Traurigkeit werd mir zum Loos” there is more feeling and the singing is more secure. “Mariern aller Arten,” finally, is very well done. Walther Ludwig, as Belmonte, begins tight-throatedly and sometimes off pitch; but he too gets better as he goes on, and if he is not impeccable technically, he does sing musically. The voice of the Blonde, Emmy Loose, sounds a bit hard but otherwise acceptable, and Peter Klein, the Pedrillo, has trouble only with some of his high notes. Endre Koreh, as Osmin, has the right vocal color but he does not seem able to shade it much. Both he and Frick (Angel) make hash out of the fast triplets in “Iha! wie will ich triumphiren.” (Greindl, for Decca, manages to do a little better, but only by slowing up.) Krips is entirely capable. The “Turkish” instruments are more prominent in this London set than in the others, but the violin tone is streaked.

—Lois Marshall (s), Constanze; Ilse Hollweg (s), Blonde; Leopold Simoneau (t), Belmonte; Gerhard Unger (t), Pedrillo; Gottlob Frick (bs), Osmin. Beecham Choral Society; Royal Philharmonic Orchestra, Sir Thomas Beecham, cond. Angel, 3555 B/L, two LP; S 3555 B/L, two SD.

—Maria Stader (s), Constanze; Rita Streich (s), Blonde; Ernst Häfliger (t), Belmonte; Martin Vantin (s), Pedrillo; Josef Greindl (bs), Osmin. RIAS Symphony Chorus and Orchestra (Berlin), Ferenc Fricsay, cond. Decca DX 133, two LP.

—Wilma Lipp (s), Constanze; Emmy Loose (s), Blonde; Walther Ludwig (t), Belmonte; Peter Klein (t), Pedrillo; Endre Koreh (bs), Osmin. Chorus of the Vienna State Opera; Vienna Philharmonic Orchestra, Josef Krips, cond. London A 4301, three LP.

Le Nozze di Figaro, K. 492

The closest thing to a completely satisfactory recorded performance of a Mozart opera, or indeed of any opera, that I have heard is London’s Figaro, conducted by the late Frich Kleiber. A few staged performances stand out in one’s memory because for some reason—an inspired conductor, or something in the atmosphere, a kind of divine affinity—all the performers gave of their very best. In recordings, of course, such an occurrence is still more rare. As readers of this magazine are well aware, a recording of an opera is practically never a single “take.” Many passages are done over, and the final result is a splicing together of what are regarded as the best versions among many, done at different times, in different states of mind, with different degrees of readiness and control. It is therefore something of a miracle when an opera recording, made in a studio under such conditions, nevertheless has the impact of shining spontaneity, with a group of picked, topnotch artists alert and consistently in their best estate giving all they have in the service of one of the greatest masterpieces in their repertory.

It is such a miracle, it seems to me, that takes place in the London Figaro. Della Casa, Guettel, Denco, and Siepi are caught up in the electric current that flows from Kleiber’s baton and with great beauty of tone and faultless technique express the warmth and gaiety and sadness of this immortal comedy. To be sure, the performance is not perfect; Mirel Poell, the Count, is not on a par, technically or musically, with his colleagues; but this is the only flaw of any consequence that I could hear. Even the singing of the minor roles is better than average. The opera is recorded complete. The balances, between singers and between singers and orchestra, are just what they should be. The sound is ravishing, in both versions. A complete vocal score is provided with the monophonic set.

RCA Victor’s album, conducted by Leinsdorf, deserves careful attention on several counts. It contains a good deal of fine singing, especially by Della Casa, Roberta Peters, and the versatile and dependable Giorgio Tozzi. Although George London is not quite up to these, his Count is superior to Poell’s in the Kleiber set. The sound is excellent, and the stereo version is of special interest because it reflects the movement of the characters about the stage. This kind of “realism” is effective in some scenes but in others proves, it seems to me, to be a not unmixed blessing. When two or three sopranos are bunched together on one sound track, as is sometimes demanded by the exigencies of the “staging,” the listener unfamiliar with the work will not know who is singing what, and to those who have never seen a performance, much of the motion will be meaningless. Della Casa’s Countess is just as dignified and human and endearing as in the Kleiber set, Miss Peters’ Susanna, however, while wholly admirable from a technical point of view, seems to me to lack personality. The whole performance, indeed, is rather cool and impersonal at the start and takes a couple of acts to warm up fully. And while Leinsdorf does a thoroughly capable job, it seems to me to lack the penetration of Kleiber’s.

An outstanding feature of the Epic set, conducted by Karl Böhm, is the Susanna of Miss Streich. Her singing here is not only

NOVEMBER 1960
The new Dynakit Stereophonic Preamplifier has all the quality features which you require for the finest high fidelity reproduction. This handsomely styled control unit is a model of classical quality and contemporary simplicity.

**BEST IN EVERY WAY**

In either kit or wired form, the new Dynakit Stereo Preamp represents both the finest quality and the finest value available. It utilizes the basic circuitry of the famous Dynakit monophonic preamplifier without compromise of quality. This circuit has the lowest possible distortion, an absolute minimum of hum and noise, superior transient response, and every other attribute which can contribute to natural, satisfying sound quality. Dynakit's basic philosophy of simplicity of layout and control action, along with impeccable performance, is well exemplified in the design. Every useful function is incorporated, but the operation of the unit is not complex since the controls are arranged and identified in a functional manner. Operation of controls and switches is smooth, noise-free, and non-interacting. The unit is a pleasure to assemble, a pleasure to operate, and a pleasure to hear.

It is not necessary to spend a lot of money to have the best sound available. Dynakit equipment has no compromises in quality. It is designed to be the finest and to be used by those who are not satisfied with less than the best. We suggest that you listen to it at your Hi Fi dealer, or write for our brochure which gives complete specifications on all Dynakit high fidelity components.

**Best Performance**
- Frequency response within 1 db 10 cps to 20 kc. Distortion (either 1% or harmonic) less than 0.2%.
- Response and distortion unaffected by settings of volume control. Undistorted square wave performance demonstrates outstandingly fine transient performance.
- Noise and hum inaudible at normal listening levels.
- High gain permits operation with lowest level cartridges. (1 millivolt input gives 1 volt output on RIAA input.)

**Finest Quality Components**
- 10% tolerance components used in critical equalization-determining circuits. Tone control components matched to provide absolutely flat response at center settings. Highest quality plastic molded capacitors, low noise resistors, conservatively operated electrolytics, plated chassis and printed circuit boards lead to long life with unchanging specifications. One year guarantee on all components.

**Greater Flexibility**
- 7 stereo inputs (or 14 monophonic ones) provide for all present and future sources. "Special" input provides options for special equalization characteristics. Provision for tape head, tape playback amplifier, and monitoring tape recordings. Independent tone controls for each channel. Exclusive Dyna "Blend" switch to control stereo separation. Unique feedback scratch filter takes out the hiss and leaves in the music. Rear panel or outlets enable switching of other components with preamp on-off switch. Self-powered (with dc power supply) permits use with any amplifiers.

**Outstanding Appearance**
- Choice of bone white or charcoal brown textured finish cover. Solid brass, anchored front panel. Designed by Racul Ibergren, prominent industrial stylist. Requires only 13" by 3½" panel space and can be readily mounted on any thickness of panel with convenient PAS auxiliary mounting kit.

**Easiest Assembly**
- About 8 hour average assembly time—from one-to-one to one-fourth that of other kits. Assembly upttered by use of pre-assembled printed circuit boards plus ultra-simple and accessible layout of parts. Complete pictorial diagrams included plus step-by-step instructions so that no technical skill is required. Also available fully wired and individually tested.

High Fidelity Magazine
Despite some nice touches here and there, mostly on the part of the conductor, this performance seldom leaves the ground. Italo Tajao as Figaro and Jolanda Gardino, the Cherubino, offer some respectable singing, although the former does not resist the temptation to get hammy in "Non più andrai," but the others are less acceptable. In addition to the usual cuts, the Count’s big recitative and aria "Fédra, mentr’io sospiro" is omitted. The sound is a little coarse and dry (the recording was issued in this country about ten years ago), and the libretto is in Italian only.

—Lisa Della Casa (s), Countess; Hildegard Gueden (s), Susanna; Suzanne Danco (s), Cherubino; Alfred Poell (b), Count; Cesare Siepi (bs), Figaro. Chorus of the Vienna State Opera; Vienna Philharmonic Orchestra, Erich Kleeber, cond. London XIL.135, four LP; OSA 1402, four SD.

—Sena Jurinac (s), Countess; Rita Streich (s), Susanna; Christa Ludwig (ms), Cherubino; Paul Schoeller (bs), Count, Walter Berry (b), Figaro. Vienna State Opera Chorus; Vienna Symphony Orchestra, Karl Böhm, cond. Erato, three LP.

—Elisabeth Schwarzkopf (s), Countess; Irmgard Seefried (s), Susanna; Sena Jurinac (s), Cherubino; George London (b), Count; Erich Kunz (b), Figaro. Vienna State Opera Chorus; Vienna Philharmonic Orchestra, Herbert von Karajan, cond. ELECTROLA C 90292/94, three LP.

—Teresa Stich-Randall (s), Countess; Rita Streich (s), Susanna; Pilar Lorengar (s), Cherubino; Roland Panerai (b), Figaro; Heinz Rehfield (bs), Count, Orchestre de la Societé des Concerts du Conservatoire de Paris, Hans Rosbaud, cond. PATHÉ DTX 2060/61, three LP.

—Gabriella Gatti (s), Countess; Alda Noni (s), Susanna; Jolanda Gardino (ms), Cherubino; Sesto Bruscantini (bs), Count, Italo Tajao (bs), Figaro. Orchestra Sinfonica di Roma della Radiotelevisione Italiana, Fernando Previtali, cond. CETERA L.P. 1219, three LP.

**Don Giovanni, K. 527**

The two latest recordings of Don Giovanni are discussed in detail on p. 76 in this issue. Here, the other five in the current catalogue will be dealt with. A thoroughly satisfactory Don Giovanni does not exist on records. Nor does a thoroughly bad one. To try to imagine a completely first-class performance from sections of those already on discs might be fun, but—artists’ contracts being what they are—it would also be futile. Let us therefore cast an eye over the merits and faults of the available versions and decide, each for himself, which one we want to live with until a better one comes along.

Especially noteworthy in the Deutsche Grammophon set is the carefully thought-out and multicolored portrayal of the title role by Dietrich Fischer-Dieskau. He brings to his performance the nuance and attention to detail characteristic of the Lieder singer, yet he manages at the same time to convey much of the sweep and vitality of the role. Steady, rich-voiced singing is contributed by Karl Kohn as Leporello. Häßler’s Ottavio is another asset: both of his arias are done with skill and musicianship. The ladies in the cast are less consistent. Miss Jurinac as Anna produces much sensitive and fine-spun singing; as in "Non mi dir," the masked trio, and the opening scene; but sometimes, especially in "Or sai chi l’onore," the tone becomes metallic in its higher reaches. Miss Stader is much more uneven: while her "Mi tradi" is nicely done, elsewhere there is some unsteadiness and other evidences of a technique not functioning at its best. The Zerlina of Miss Seefried is pleasantly sung, though there could be a little more cream in the mixture. This is one of Pereno Previtali’s better conducting jobs. The sound is clear and properly balanced (except in the scene with the three orchestras, which seldom comes off in a recording) but stereo effects are not usually very noticeable.

The London recording does not attain the exalted level established in that company’s Figaro. Since the same five artists sing principal roles in both, one can only suppose that Kleeber inspired them to outdo themselves in the earlier operas. Nevertheless the Don Giovanni has considerable merit. Siepi makes a noble Don, though his portrayal lacks any hint of the superhuman nature of the part. All of the other men perform capably, if without special distinction. Miss Danco’s voice seems a bit light for Anna, and in "Or sai chi l’onore" it is not as firmly focused as elsewhere. Miss Della Casa’s Elvira is on the whole well sung; it is only in "Ah fuggi il traditore" that one feels the need of a more heroic tone. The Zerlina of Hildegard Gueden is wholly charming. Josef Krips keeps things moving nicely, but he sometimes overlooks nuances in dynamics. Strangely, the mono version seems to have a wider dynamic range than the stereo. A complete vocal score is supplied with the former.

Two singers stand out in the Pathé recording: Antonio Campo as the Don and Suzanne Danco as Elvira. Campe’s baritone has something of the dark quality of Pinza’s bass, but without the velvety surface that voice had in its prime. He uses it with accuracy and intelligence. Miss Danco’s Elvira is

The virtue of the Cetra set resides mainly in the conducting by Max Rudolf. This is one of the most dramatic and intense of the recorded performances. In the first-act finale the attempted attack on Zerlina stirs up real excitement, instead of the mild confusion that occurs in the other sets; the three orchestras are more clearly audible here, too. Add to this a more than usually imaginative Leporello by Tajo, and the tale of this set's merits is told. The Don of Giuseppe Taddei is uneven, and all the ladies, unfortunately, are second-rate, as is the sound.

Outstanding in the Epic recording is the splendid Elvira of Miss Jurina. Although in "Mi tradì" she seems to attack high notes with less than complete confidence, everywhere else her singing is strong, true, and heroic. It is her excellent work that sparks the trio "Ah, tacci, ingiusto core," and in other ensembles too she seems to inspire her colleagues to greater efforts. Ottavio is sung by Simonelli in his usual very fine fashion, and the Leporello of Berry is intelligent and pleasingly performed. Grazzella Scattini has the somewhat pointed type of voice that is better suited for Despina than for Zerlina, but she uses it well and achieves a good deal of tenderness in her two arias. George London of course has not yet been ready for the demanding role of the Don when this recording was made. He is short in forte, constructed in piano, and generally lacking in technical security and finish. Even less capable of doing justice to a major Mozart role is Hilde Zadek, the Anna. Not all the dynamic indications in the score are observed by the conductor, but this is one recording where all three orchestras in the first-act finale are clearly differentiated.

Cosi fan tutte, K. 588

The oldest of the available recordings of this opera is the Columbia version, sung in English. It came out in 1952 and was greeted by reviewers with a rather pointed lack of enthusiasm. In my opinion it deserved, and still deserves, better. Anyone who had the good fortune to see Alfred Lunt's production at the Met will remember what a delight it was, and the recording proves that not all the charm was visual. These are defects, to be sure: Fritz Stoehr’s tempo are sometimes too fast, his rhythm sometimes too rigid; Blanche Thebom has some poor moments, as in the second finale, where she

High Fidelity Magazine
land's some distance from the high A flat that is her goal; Lorenzo Alvary's English has a foreign accent (but is his "apple-cart" worse than the "qvellas" and "qvellar" heard in the other sets?), the ovation lacks dynamic nuance. But to offset these flaws there are a number of positive qualities. Miss Peters, to my mind, makes an excellent Despina, better than either of her opposite numbers: she has the pertness and her voice has the slightly sharp edge that belong to the role, and musically as well as technically she is completely successful here. Eleanor Steber almost throughout and Miss Thebom much of the time are in good form, singing steadily, accurately, and with agreeable quality. Richard Tucker turns in some good, solid singing, taking high G sharps and As without forcing, and Frank Guarrera uses his attractive voice with intelligence. As for the translation, by Ruth and Thomas Martin, it has always seemed to me an uncommonly good one. Let us not now rehearse the pros and cons of opera in English. My own feeling, for whatever it is worth, is that in a fast, volatile comedy like this one, more is gained than lost if the audience can follow every turn of the dialogue and plot.

The London set has lovely things in it. Böhm carries off many of the ensemble numbers beautifully—the mock tragedy, for example, of the farewell quintet in the first act, and the murmuring caress of the trio that follows. Schöffler is a rich-voiced philosopher, and Kunz, too, is easy on the ear, though his "Donne, mi la fac man tanti!" could be more pointed. Anton Dermota, acceptable throughout, makes his "Un' aura amorosa" exceptionally languorous and sensual. Miss Della Casa hits a ringing high B flat in "Come scoglio"; her triplet here are clean and her voice maintains its fine quality in various registers; she lacks only the furious bravura needed to give this showpiece its full effect. Her "Per pieta" is very fine. Miss Ludwig's voice sounds rather light-textured but clear and steady; and Miss Loose makes a competent but colorless Despina. This version is the most heavily cut of the three. Not only does it employ the customary excisions, but it is generous with new ones (among the latter, two pages in the quintet No. 6, in Donzelli's "Smanie implacabili," and in the duet No. 23, a larger slice than usual out of Fiordiligii's "Per pieta," Donizetti's entire aria "E amore un ladroncello," and a seven-page chunk out of the second finale).

The best all round performance seems to me to be the Angel. Karajan is no less stylish than his confrères, and he conducts with a verve that makes Svidrov seem in comparison sometimes a hard driver and Böhm sometimes a little slack. In addition to its thorough musicality this version conveys more decided than either of the others the impression that each singer has a complete understanding of his role and of every word in his part. Leo Otto is not as perfect a Despina as Miss Peters, and Miss Schwarzkopf is hardly more daredevil a singer here than Miss Della Casa, but all six vocalists perform steadily on a high plane. More im-

portant than the solos in this opera are the ensembles. All of these are beautifully balanced, and the orchestra—Mozart at his most sparkling—is always audible in the right relation to the voices. This is the most complete of the three versions, the only cuts being an area of Ferrando that was omitted by Mozart himself, and sections of recitative.

From the standpoint of sound the London stereo has more spaciousness than the monophonic versions and more clarity and definition than the Columbia, but not more than the Angel.

Die Zauberflote, K. 620

On my shelves of 78s a place of honor is occupied by the Glyndebourne recordings of Figaro, Don Giovanni, and Casanova; and by the Beecham Magic Flute. One by one the Glyndebourne sets have been supplanted by LPs of other performances; they continue to take up precious space only because for sentimental reasons I cannot bring myself to part with them. The Beecham Magic Flute, however, is another matter. Recorded in 1937 and issued then by RCA Victor, it retains in its currently available LP version (Electrola) certain values not to be found in the other two albums, good as the latter are in other respects.

To begin with there is Sir Thomas Beecham's contribution. Except for the overture, which is too comfortable (I used to play the Toscanini version instead), the whole conception shows deep insight. Musically, it has the vitality that comes when the surface is molded with a full knowledge of all the underlying elements that give it its shape. Dramatically, it paints vividly the myriad aspects of this kaleidoscopic fairy tale allegory. The singers are all well suited to their roles, and perform with much skill. Wilhelm Strienz's Sarastro seems to me the most richly sung of the three. At the appropriate moments Heinrich Tessenow's voice takes on a nastiness that is just right for his part. There is no point in trying to list all the felicities of the performance. It stands tip remarkably well. Even the sound is by no

High Fidelity Magazine
means hopeless, though it cannot of course compare with modern recording in clarity and realism. There is no dialogue, and Electrolyx does not furnish a libretto.

Neither of the other two performances is as consistently well directed as the Beecham. Böhm’s high competence is apparent everywhere except in some of the slow numbers or sections, where he seems to dawdle. The gifted and reliable Simonov makes an excellent Tamino, singing with full tone and, seemingly, no effort. Miss Green does him beautifully; she sings with lovely tone in lyrical arias. Miss Lipp is less impressive in the slower sections allotted to her than in the brilliant ones, which she carries off with considerable bravura. Berry’s Papageno is competently sung and conveys the humor of the role without crawling too much. The Sarastro of Kurt Bohme is a bit querulous in “In diesem heiligen Hause,” but steadier elsewhere. The three Ladies deserve mention; they are unusually good. The sound is satisfactory. There is no dialogue.

Frisays, in the Decca set, is not very imaginative. Sometimes he misses important dynamic nuances, like the small crescendos in “Dies Bildnis.” He is given much attractive singing by Miss Stader and Haléger as the two lovers; by Fischer-Deckau, whose “Ein Mutter und Weibchen” is even better than his “Der Vogelfänger hin und her”; and especially by Miss Streich, whose coloratura is very fine in both her big arias but who manages to get more of the requisite demonic quality into the first. The Sarastro of Gruendl is better in the low register than in the middle or top, and Martin Vantini’s Monostatos is acceptable if somewhat neutral in character. There is steadier singing by the three Boys here than by the trio of Ladies. The dialogue is spoken by a separate cast of actors. Sometimes, as in “Der Vogelfänger,” a soloist is too far forward, and in some cases the dynamic levels shift from one solo to the next, but otherwise the recording is good.

CIRCLE 28 ON READER-SERVICE CARD
The following reviews are of 4-track 7.5-ips stereo tapes in normal reel form.

Vienna Philharmonic Orchestra, Rafael Kubelik, cond.
- LONDON LCK 8005 (twin-pack). 77 min. $11.95.

BRAHMS: Symphony No. 3, in F, Op. 90
Southwest German Radio Orchestra (Baden-Baden), Jascha Horenstein, cond.
- SAMS/TANDERG S 84. 36 min. $8.95.

Horenstein's Third, which first appeared in a 2-track taping as well as a stereo disc from Vox in 1958, can be quickly dismissed as a routine performance, now hard-driven, now lethargic, which despite considerably improved processing and channel balancing remains sonically thick-textured. But notice should be taken of the deceptive box (if not reel) labeling; the disc-coupled Variations on a Theme of Haydn is not included here.

Kubelik's interpretation is also a broadly romantic reading in more orthodox Tetonian style, made to seem even more expansive by a repeat of the exposition in the first movement. The Viennese performance, however, is under better control and is much more attractive for its warmly rich sonics, admirably captured in unusually sweet and well-blended, if not particularly brilliant or stereosonic, recording. His Fourth, too, is leisurely and glowing, lacking only in arrestingly dramatic drive and forcefulness. Neither version can be ranked among the best available on discs, but the Fourth is the only 4-track taping and the Third the only alternative to Stokowski's superbly recorded but extravagantly idiosyncratic Everest reel, and in any case the present combination is an appealing one, particularly to listeners of conservative tastes.

DVORAK: Symphony No. 5, in E minor, Op. 95 ("From the New World")
Vienna State Opera Orchestra, Vladimir Golschmann, cond.
- SANGUARD VTC 1622. 39 min. $7.95.

Not all reviewers have liked Golschmann's New World as well as I did in its bargain-priced disc versions, but after rehearing it on tape I am more certain than ever of my pleasure in its straightforward lyricism and grace, while the exaggerated but luminous recording now sounds even better since the tape processors have somehow managed to combine here the greater tonal bite and solidity of the LP version with the delectable airiness of the SD. Even at its present nonbargain price, the work remains admirably serviceable, especially for those who have hitherto known the music itself only in live engagements, harder pressed, and more pretentiously scaled readings.

GEERSHWIN: Songs Book
Elia Fitzgerald; Orchestra, Nelson Riddle, cond.
- VENUE VSTC 215/19. Five 7-in. reels. 34/37 min. $7.95 each.

As a wholehearted admirer of both Gershwin and Elia Fitzgerald, I could barely restrain my impatience to hear this sumptuous set which was so enthusiastically greeted on the release of its disc versions. Perhaps I expected too much, or more probably I cherished too fondly the way Gershwin himself used to play many of these songs and the suave verve with which his best interpreters sang them when they first appeared. Anyway, I can only hope that my own disappointment in this edition is a strictly idiosyncratic reaction.

The fifty-three songs here (including several recorded for the first time) strike me as better than ever. Ira Gershwin's occasional text revisions are wholly in keeping, Miss Fitzgerald sings as enchantingly as always (although here only intermittently with full interpretative conviction), and the only flaws in the recording are occasional suggestions of soloist echo-chambering and an exaggeratedly heavy bass throughout. What I can't accept is the general slowing of tempos, rhythmic enervation, and the neutralizing effects of Nelson Riddle's "contemporary-styled" arrangements and small orchestral accompaniments. Granted that the soloist works frequent miracles with the lethargically paced "billards" far too much of the original lift and zest seems to me to be irretrievably lost. Unfortunately, too, the more effective performances here (i.e., those which seem to me to depart less radically from the characteristic spirit of the individual songs) are so widely scattered that it's hard to nominate any of the five reels as the "best," although if pressed I'd probably have to settle on Vol. 2 (VSTC 216) for its That Certain Feeling, By Strauss, and The Real American Folk Song Is a Rag in particular.

GILBERT & SULLIVAN: H. M. S. Pinafore (or, The Lass That Loved a Sailor)
Jean Hindmarsh (s), Joyce Wright (c), Gillian Knight (c), Thomas Round (t), John Reed (b), Jeffrey Skitch (b), Donald Adams (bs); DO'ly Carte Opera Chorus, New Symphony Orchestra, Isidore Godfrey, cond.
- VERVE VSTC 215/19. Five 7-in. packs. 34/37 min. $7.95 each.

Like probably many another nonfanatical G & S fan who knows the operettas better from recordings than from stage performances, I was extremely dubious about the wisdom of the present set's inclusion of the full spoken dialogue—that is, until the reels themselves started to unwind. I'm still not sure that the speech will continue to stand up as well as the music in repeated hearings, but on first acquaintance it fits in beautifully (despite—or for—its naiveté) with the songs themselves to make truly reliable home entertainment. A considerable part of the credit goes to the largely unfamiliar new members of the DO'ly Carte Company, who both speak and sing with ingenuous charm and a refreshing lack of mannerisms. Perhaps even more goes to the stereo recording's realization of theatrical presence, and to the discreet but invariably effective use of sound and movement effects. But the major honors surely go to the conductor, who stimulates his fine chorus and orchestra to uncommonly vivid, yet always well-controlled and proportioned, performances. Before deciding that you must have a minimum of Sullivan with a minimum of Gilbert, or that you'll remain faithful to your prestereo DO'ly Carte Pinafore with its more faithful cast, I urge you at least to sample the present set—it may surprise you as pleasantly as it has me.

GRIEG: Peer Gynt: Suite No. 1, Op. 46
Tchaikovsky: Swan Lake, Op. 20: Suite
London Philharmonic Orchestra, Kenneth Mackay, cond.
- RICHMOND RCE 40005. 35 min. $4.95.

A delectable "deeper," which must be recommended for far more than its inexpensiveness. Indeed I don't think I've ever heard a more poignant lyrical and delicate
Peer Gynt, nor one which better restores the freshness of its miniature tone poems. Alwyn's five Swan Lake excerpts are perhaps a bit overwrought at times and lack a large enough orchestra for the more dramatic moments, but his Danse des fées and Cardas are distinctively vivid and the treatment of the suite as a whole is more noteworthy balletic than that of many larger orchestras and better-known conductors. The recording too is beautifully airy and transparent, and from all reports on the original SD edition the processing here is notably superior.

Rudolf Serkin, piano; Philadelphia Orchestra, Eugene Ormandy, cond.

Columbia's belated though welcome acceptance of the 4-track medium could scarcely be demonstrated in a more distinctive début release than the present coupling. It should do more than any previous Mendelssohian release to redeem its composer from the quasi-salon status to which he has been so long relegated by interpreters and by the public. The normally reserved Serkin and Ormandy are startlingly passionate here in their determination to restore the intensity of feeling, sinewy strength, and rhapsodic virtuosity of these depreciated concertos. The composers too match the performers' enthusiasm and precision in an ideal choice of the coolest and boldest of stereogenic qualities, which avoid any suggestion of conventional romanticism, but which miss nothing of the superb playing's lucidity of texture and sensitive nuance of color and expressive details.

(For the benefit of tape addicts who have not yet converted to 4-track operation, it should be noted that Columbia is one of the few companies which have both maintained their earlier 2-track catalogue in print and are continuing to add to it by simultaneously releasing their current tapes in the older as well as newer format. The present work, for example, is also available in a 2-track reel under the order number GMB 78.)

MOZART: Overtures (8)

Don Giovanni; Die Entführung aus dem Serail; Le Nozze di Figaro; Cosi fan tutte; Titus; Der Schauspieldirektor; Idomeneo; Die Zauberflöte

Hamburg Pro Musica Orchestra, Harry Newstone, cond.

For more information, contact:

Forum FTH 601. 42 min. $6.95.

Although the conductor is presumably British, his readings as well as the present orchestral performances are emphatically Teutonic—which is to say that they are weightier, hard-driven in the fast passages and too romantically expressive in the slow ones. Even so there is such a varied wealth of Mozartean delights here, and such attractive snatches of woodwind playing, that I should still want to recommend the program, at least to nonconnoisseur listeners, if it were not so bottom-heavy and overreverently recorded, and moreover fatally plagued (quite exceptionally among current four-track tapes) with precesses.

RIMSKY-KORSAKOV: Scheherazade, Op. 35

Chicago Symphony Orchestra, Fritz Reiner, cond.

For more information, contact:

RCA Victor FPC 2017. 44 min. $8.95.

London Symphony Orchestra, Sir Eugene Goossens, cond.

Everest T4 3026. 43 min. $7.95.

At least two miracles must have come to pass in Chicago last February: in the same Orchestra Hall where only a few months earlier the same RCA Victor engineers failed to do full justice to Reiner's Respighi tone poems, they achieved here a luminously rich, immoderately transparent, bambacchi and bleaded recording as can be heard anywhere; more surprisingly, Reiner himself, who one would hardly imagine holding this Rimskian warhorse in special esteem, gives it one of the finest performances in his—or the phonograph's—entire repertoire. Best of all, he restores its quintessential character, which is not that of a showpiece, as such, but of a vividly colored Russian fairy tale for youngsters of all ages. There is virtuoso playing, of course, especially in the violin solos by Sulsky Harth and the rhapsodic cadenzas by the first-desk woodwind men, but the dominant feeling is one of sheer poetry and imaginative fantasy. The many veteran listeners who have long since come to think of this hackneyed symphonic suite as tiresomely naïve and showy will scarcely recognize it in so complete a metamorphosis. And the Chicagoans play it with such relaxed spontaneity, as well as sensuously plastic sonics, that their achievement is made to seem all the more miraculous when one learns (from producer Richard Mohr's remarkably candid and informative annotations) that the whole last movement, at least, was recorded in one uninterrupted or spliced "take."

Against such competition the normally admirable, if orthodox, Goossens performance seems only blandly expressive and often sluggish. Even its distinctively strong and clean recording is not enough to make one forgive once our ears have been so bewitched by the incomparable siren song of the Reiner version. One work is first-rate technically; the other is miraculous.

Continued on page 136

High Fidelity Magazine
Why Licia Albanese makes her personal recordings on tough, long-lasting tapes of MYLAR®

"An interpretation of an operatic role is a growing, living thing that changes from year to year," says famous Metropolitan Opera soprano Licia Albanese. "That's why I always use tapes of 'Mylar' when I study a role. These tapes never dry out or get brittle with age. So no matter how far in the future I play back and check my interpretations, I know they will be the same as the day I recorded them."

Today, only tapes of "Mylar" give you such long life and lasting fidelity. Only these super-tough tapes have a 300% safety margin against stretching and breaking. Only these superior tapes give you 50% or more extra playing time per reel without sacrificing strength.

The next time you buy a reel or cartridge of tape, look for these exclusive advantages. Then, like Licia Albanese, get your favorite brand, made with "Mylar" polyester film.

NOTE: NEW LOW PRICES ON HEAVY-DUTY TAPES OF "MYLAR" GIVE YOU THEIR ADVANTAGES AT A COST JUST A TRIFLE HIGHER THAN ORDINARY TAPES.

"Mylar" is Du Pont's registered trademark for its brand of polyester film. Du Pont manufacturers "Mylar," not finished magnetic recording tape. All manufacturers name tapes of "Mylar."
**SCHUMANN:** *Concerto for Piano and Orchestra, in A minor, Op. 54*

Van Cliburn, piano; Chicago Symphony Orchestra. Fritz Reiner, cond.

- *RCA Victor TPC 2042.* 30 min. $8.95.

The aptest one-word description of Cliburn's Schumann is "dreamy." For all its appropriately moments of power and sparkle, this reading is essentially an introspective poetic soliloquy of almost mesmeric sweetness. It is likely to seem too slow and too reserved to listeners accustomed to more outspoken or heroically romantic interpretations, but even then I personally prefer one which is more tautly organized and passionately eloquent (such as the memorable one by L. Piatto), this strikes me as a wholly legitimate and perhaps even more Schumannesque approach. At any rate, it is warmly persuasive, and it is accompanied and recorded with more sensitivity and sheer tonal beauty than probably any other version on record today. Certainly the enchanting combination of sonic authenticity and dream-world atmosphere is an incomparable realization of the stereo medium's finest potentials.

**TCHAIKOVSKY:** *Manfred, Op. 58 ("Symphony")*

London Symphony Orchestra, Sir Eugene Goossens, cond.

- *Everest T4 3015.* 48 min. $7.95.

Even a Toscanini was never able to convince the majority of listeners that Manfred is as fine a work as its composer felt it (or at least its brooding first movement) to be. The verdict might well have been different if Tchaikovsky himself had never written his only too similar, but more skilfully organized Pathétique Symphony, but as it is Manfred remains a kind of masterpiece manqué—which gives it a special appeal for some listeners who willingly endure its longueurs and lapses of inspiration to relish its great moments. Goossens is no Toscanini, of course, but he is no less obviously fascinated by this sprawling music and, if he is not always able to lend it conviction, he at least endows it with notable vigor and pageantry, and his fine orchestra is given the best of stereo's dramatic power.

**"Leroy Anderson Conducts Leroy Anderson."** Decca ST 78685, 38 min., $7.95.

Another batch of the perennially fresh favorites (Bagler's Holiday, Sandpaper Ballet, Phantom Regiment, Pink Plank, Plank, etc.), plus two newer ballet pieces drawn from the Goldilocks story (a festive Pyramidal Dance and Lady in Waiting Waltz), all done with the composer's own quite inimitable rhythmic vivacity and delicacy of coloristic nuance. Only moderately well recorded in the earlier Decca series, the "return" performances are now given Decca's best.

**"Bayanian Philippine Dance Company."** Monitor MOTOC 903, 39 min., $7.95.

Monitor gets off to a flying start in the tape with some of the most attractive and novel of recent ethnological documentaries: that representing the remarkably varied talents of the Bayanian Company directed by Lucrecia Kasulag, and its spirited "Rondalla," or little string orchestra, conducted by Juanito Gonzales. If you heard the company itself in its American tour sponsored by S. Huron, this program is an essential souvenir; if you missed the live appearances, it is a delectable introduction both to the curious Muslim and Polynesian influences in Philippine music (especially the gong and bamboo-stick-dominated Singkil, Hungbang Funeral Dance, Tanging Balla, Sultana, and the Bontoc War Dance with its poignant nose-flute soliloquy), and to the more conventional Spanish influences (in the Rondalla's gay Polkabal, Maglalatik, Ikik Ikik, etc.). Mostly instrumental, often with footstamping and hand-clapping accents, there are also occasional vocal solos and choruses in the Tagalog language.

Effective as these stereographic arrangements, performances, and recording seemed in their original SD release several months ago, the present lower modulation level and more warmly reverberant tapping reveals them in an altogether new light. The whole program now seems not only one of the most imaginatively scored of all the recent spectacles, but the most poetically and engagingly played. New attractions mark the subtle timbre differentiations in the multitudinous bongos themselves, the atmospheric flute and bass clarinet solos by Stanley Webb, and the no less glowing guitar, vibras, and piano passages by Tony Motola, Artie Marrotti, and Mor Wechsler respectively. Even the most fanatical of tape propagandists usually find it difficult to demonstrate the clear-cut superiority of their favorite medium over a first-rate stereo disc of the same master recording, but here the aural evidence is conclusive.

**"The Day of the Bullfight."** Sabicas, guitar; Orchestra, Kenyon Hopkins, cond. ABC-Paramount ATC 815, 38 min., $7.95.

Although the market for Sabicas' more orthodox flamenco guitar-and-dance programs remains intransigent, this ingenious departure from the norm should win him an even larger audience without alienating his established one. What he does here is to improvise an eight-movement suite depicting the scenes and moods of toreadores and aficionados during the day of the bullfight (Dawn, Selection of the Bulls, Street Scene, Fiestas, Lovers in the Night, etc.), each section of which is introduced by an atmospheric orchestral and sound-effects prelude. Sabicas' own playing is as virtuosic as ever, but even more rhythmic and varied than usual, and both he and his supporting forces are ultra-realistically and stereoscopically recorded.

**"Pete Fountain Day."** Coral STT 57313, 39 min., $7.95.

Presented by the New Orleans Jazz Club in actual performances at the Municipal Auditorium, the returned Welsk Orchestra clarinetist and his sidemen (Godfrey Hirsch, vibes; Merle Kaye, piano; Don Bagley, bass; and Jack Sperling, drums) combine the

This Christmas you can afford an Ampex
(Now priced from $349.50 to $595)

The work of science no longer is costly. Ampex prices are down, but the quality of its tape players and recorders remains brilliantly Ampex. At last these coveted instruments are within reach of every stereophonic high fidelity enthusiast.

The 970, in portable case with built-in speakers, records monophonic and stereo, plays single, 2-track, and 4-track tape. Price reduced from $750 to $595.

The 960, in portable case, records monophonic and stereo, plays single, 2-track, and 4-track tape. Reduced from $650 to $495. The 952, unmounted deck, records stereo, plays single and 2-track tape. Reduced from $595 to $450. The 902, unmounted deck, records monophonically, plays single and 2-track tape. Reduced from $449.50 to $349.50.

For listening, more than 1,000 pre-recorded tapes are available now—10 times as many as last year. And don’t forget the recording fun of starting a new kind of souvenir—the family album on tape for hours of pleasant playback.

Tape players and recorders by Ampex, world leader in magnetic recording, at your dealer everywhere. See and hear them today. Ampex Audio Company, Sunnyvale, Calif.

Pilot

ANNOUNCES

A

QUALITY

FM TUNER

$ 49.95

DIMENSIONS: 9 1/4" wide x 3 3/4" high x 6 1/2" deep

Only Pilot, the first manufacturer of FM tuners, could offer so much quality at such a modest price. The MARK II delivers performance that will amaze even the most critical audiophile. A value packed instrument, the MARK II features: ■ Complete power transformer operation ■ Wide band detector for 100% modulation with minimum distortion ■ New high gain 6GM6 and 6EW6 IF tubes ■ Separate logging scale ■ Shielded front end ■ Built-in line cord antenna ■ Multiplex output jack. Each MARK II is sweep aligned on the industry's most modern test equipment. In its handsome black and brass enclosure, the MARK II makes a handsome addition to any component system. Use the MARK II for FM reception through most TV sets, table radios, phonographs or tape recorders. See and hear the MARK II at your nearest authorized Pilot Dealer today. Write for complete technical specifications.

Pilot RADIO CORP. 37-02 36th STREET, LONG ISLAND CITY 1, N. Y.

High Fidelity Magazine
best of Dixieland gusto with the swinging verve of the early Goodman ensembles. An exuberantly fleet China Boy; the buoyantly jumping Ja-Da, I've Got Rhythm, and 'S Wonderful; and one of the most interesting and understated divan sections ever played on Tiger Rag are the high points here; but the program is a joy throughout, not least for brighter recording than usual in "on location" technology and for the promptness with which the enthusiastic audience applause is faded out.

If this Handelian introduction coupling had been released on tape at a demonstrator bargain price, I could recommend more heartily these technically fine recordings of Prohaska's precise and alert, but not notably illuminating, performance. The Water Music Suite and Appia's more pedestrian complete Fireworks Music. As it is, I wish the tape devotee's first meeting with these delectable works could be in more idyllic and entertaining expectation. He isn't likely to be at all disappointed here. He can hardly realize how much he's still missing.

"Here We Go Again!" The Kingston Trio. Capitol ZT 1258, 28 min., $6.98.

The sensational success of the Kingstonians' unique blend of folk and pop ballad techniques and materials can be better explained by a few moments' sampling of the present tape than by any verbal descriptions. Just listen to their far from authentic yet irresistibly attractive chanteys Across the Wide Missouri and Haul Away...oddly rhythms, bluesy Wanderer...catchily lilting Round About the Mountain and Oleanna...or the hauntingly poetic San Miguenaux...or the familiarly natural recording, these distinctive performances must exert a well-nigh compelling appeal.

"Livingston Masterpieces" Nos. 2 and 3. Various orchestras and conductors. Livingston (via SMI) 4T 102 2-3, 102 min. each, $10.95 each.

Two more triumphant reels in the 100-minute series which offers more (if more heterogeneous) music than probably any other classical tapings. The major items are Albert and the Manakine Chaloukovian Fifth (in Vol. 2) and Brahms First (in Vol. 3), but the former also is noteworthy for Gui's fine Schumann Manfred Overture, Grieg Peer Gynt Suite No. 1, and Borodin Polovtsian Dance, plus the apparently more recently recorded Nabucco and Marriage of Figaro Overtures by Carandis and Albert respectively; and the latter for Wolf's Havilin Military Symphony and Albert's Good Friday Music from Passion (both of which are new to tape, I think), as well as for the older Flying Dutchman Overture, False Triste, and Afternoon of a Faun by Gui and the Florence May Festival Orchestra. Performances and recordings naturally vary considerably at their best are very good indeed. I never fail to be amazed at how impressive the earliest Livingston stereo recordings (some of which go back to 1954) still remain for their spaciousness, realism, and vividness.

"Reunion with Chet Baker." Gerry Mulligan Quartet. World Pacific WPITC 1007, 36 min., $7.95.

Baker himself is strangely lackadaisical here, but since his trumpet solos are infrequent and he mostly supplies somewhat pallid counterparts to Mulligan's own assured and indefatigably jumping baritone sax, these often overly emphatic and repetitious performances achieve moments of commandingly, especially in Ornithology, Jersey Bounce, and My Heart Belongs to Daddy. Yet the main attraction here for Mulligan fans probably will be the marked improvements in channel differentiation and openess of the recording over the early stereo disc release.

Although the Duke himself participates in only three of the nine pieces here (Stowey Jones, Squeeze Me, and Going Up), this is perhaps an even more attractive and varied program than the earlier Ellington-Hodges Back to Back tape of last March, since Billy Strayhorn's piano playing is also an imaginative delight. Hodges is lyrically superb throughout, and there are magnifico solo contributions by Lawrence Brown, Roy Eldridge, Harry Edison, and others. In every respect this release is a sure candidate for any "best" permanent library as an outstanding example of relaxed, infectiously lilting, and endlessly inventive conversational jazz.

"Songs of the Fabulous Fifities" and "Till." Roger Williams, piano; Orchestra. Marty Gold and Hal Kamner, cond. Kapp KT 45008 (twinn-pack), 73 min., $11.95, and KT 41023, 37 min., $7.95, respectively.

Another big collection of recent cocktail hour favorites (topped by a catchy Mr. Sandman and Hey There, and the more romantic Moulin Rouge and Picnic themes), plus a shorter but more varied program in which Williams ranges deftly from the rich sentiment of Tammy, through dramatic variations on Jalousie, to poetic mood music versions of the Brahms A flat Waltz and Debussi's Clair de lune—all warmly recorded in luminous stereosonic.

Admirers of what tragically turned out to be the last of the great Rodgers & Hammerstein Broadway triumphs will surely yearn to trade in their already scratchy copies of the stereo disc edition for this more wear-resistant (as well as more cleanly channel-differentiated and theatrically realistic) taping in its companion 2-track version TOH 58. Others may find, however, that it reveals only too candidly the lack of spontaneity and overabundance of mannerisms which for many of us make the performances by Martin, Neway, Bikle, et al seem self-consciously constrained and largely lacking in the naive charm which the music at its best calls for—and which it has been given so far only in the Trapp Family's own album.

Stereo Integrated Amplifier AF4†

**AM Tuner HF704:** Matches HF 90. Selects "hi-fi" wide (20,000 cps @ -3 db) or weak-station narrow (20-20,000 cps @ -3 db) bandpass. Tuned RF stage for high selectivity & sensitivity. Precision-etronic® tuning. "One of the best available." — HI-FI SYSTEMS. Kit $39.95*. Wired $65.95*. Cover $3.95. Less cover, F.E.T. incl.

**FM/AM Tuner HF902:** Combines renowned EICO HF900 FM Tuner with excellent AM tuning facilities. Kit $59.95. Wired $94.95. Cover & F.E.T.

**AFA Economy Stereo Integrated Amplifier:** provides clean 4W per channel or 8W total output. Kit $38.95. Wired $44.95. Cover & F.E.T.

**HFS 3-Way Speaker System Semi-Kits:** include built-in 6½” veneered plywood (4 sides) cabinet. Bellows-suspension, fulloch excusion 12” woofer (22 cps). 8” mid-range speaker with high internal damping cone for smooth response, 35° cone tweeter, 2½ Cu. H. ducted-port enclosure. Kit $57.50. Wired $60.50. Walnut or mahogany.

**HFS 2-Way Speaker System Semi-Kits:** includes built-in 4½” veneered plywood (4 sides) cabinet. Bellows-suspension, fulloch excursion 8" woofer (45 cps, res.) & 3½” cone tweeter, 1½” co. H. ducted-port enclosure. System Q of ½ for smoothest free & best transient resp. 45-14,000 cps clean, useful resp. 16 ohms.

CIRCLE 58 ON HEADER-SERVICE CARD

HFD: 24” x 12½” x 10½”. Unfinished birch. Kit $47.50. Wired $56.50. Walnut or mahogany. Kit $59.50. Wired $69.50.

HFS1 Bookshelf Speaker System complete with factory-built cabinet. Jensen 8” woofer, matching Jensen compression-driver exponential horn tweeter. Smooth clean bass; crisp extended highs. 70-13,000 cps range, 4 ohms. HFD: 23” x 11” x 9”. Kit $39.95. Wired $47.95.

HFS2 Omni-Directional Speaker System (not illusions.) HFD: 36” x 15¼” x 11½”. “Fine for stereo” — MODERN Hi-Fi. Completely factor-built. Mahogany or walnut $139.95. Blond $144.95.

**New Stereo/Mono Automatic Changer/Player:** Jamped 4-speed, all record sizes, automatic changer and auto/manual player. New extremely smooth, low distortion moisture-proof crystal cartridge designed integrally with tonearm to eliminate mid-range resonances. Constant 4½ grams stylus force is optimum to prevent groove flutter distortion. No hum, turntable attractions, acoustic feedback, center-holare enlargement. Only 1½" x 13" x 10075: 0.7 ml, 3 ml sapphire, $49.75. F.E.T. and "Magnadaptor.”

**shown in optional Furniture Wood Cabinet W71:** Unfinished Birch, $9.95; Walnut or Mahogany, $13.95.

**shown in optional Furniture Wood Cabinet W70:** Unfinished Birch, $8.95; Walnut or Mahogany, $12.50.

by RALPH FREAS

Impressions. We recently asked a Veteran Observer of high fidelity shows what he thought of the September exhibit in New York. His arches evidently still ached from four days of strenuous show-going, because his comment was: “Same old stuff.”

“What about the . . .?”

“Just a minute,” cut in the V. O., “I didn’t mean it was a bad show. Compared to those of five years ago, this was a dazzer. In 1955, you’d find maybe one good amplifier—I mean, really good. Now, there are half a dozen. The worst—I should say ‘cheapest’—of amplifiers today are as good as the best five years ago. The same is true of tone arms, cartridges, tuners, and the rest. Whereas only one or two were really first-rate a few years back, today many have reached a high degree of excellence.”

Few visitors to the 1960 New York exhibit would dispute his view.

Tape Trends. Recorder manufacturers offer stereo “record” features in almost all new equipment. Most offer a patch cord enabling the user to transfer stereo discs to tape and one (Telecords) even includes a pair of microphones in the original purchase price.

In our view, a development that would affect strongly the amount of stereo recording done in the home is the settling of the FM multiplex question. A great many owners of stereo tuners can easily convert to whichever multiplex system the FCC adopts and they will easily be able to tape stereo broadcasts. Attention was focused on the Crosby Multiplexing System at the New York Show by virtue of a “closed circuit” FM stereo broadcast in the show building.

Down from the Bookshelf. Speaker systems, which have been getting smaller and smaller, may be reversing their trend. KLH now has a Model Nine with the impressive dimensions of (almost) six feet high, two feet wide, and three inches thick. The thickness figure is typographical error, and we hasten to point out that the Model Nine is a full-range electrotstatic speaker. It has a total radiating surface of 28 square feet (14 square feet in front and 14 in back) and will be sold only in pairs at $1,030 for the two. Electrostatics, well known for smooth response at high frequencies, are incapable of good low frequency response unless the radiating surface is substantial. KLH’s Model Nine goes very low—full output at 30 cps, according to the firm.

To the nonbookshelf speaker category add the Citation X. Like the tuner and amplifiers in Harman-Kardon’s Citation line, this speaker system owes its design (in part) to Stewart Hegeman, with an assist from Lowther Manufacturing Company.

The Citation X stands pillar-fashion and measures three feet high, twenty inches wide, and fifteen inches deep. The enclosure is a folded-horn design equivalent to a seven-and-a-half-foot length. The speaker mounting and cone design achieve an omnidirectional dispersion which, in practice, gives a pleasing stereophonic effect.

Altec-Lansing, while not offering a new, large speaker, has designed a large cabinet (the 854A-B) for their 605 speaker. They thus provide an enclosure which the user once had to construct from plans provided by the firm. The new cabinet sells for $99.

Heart of Quartz. A few years ago, a new type of tweeter appeared which used a tiny quartz tube or horn to reproduce frequencies above 3,500 cps. In practice, the unit worked extremely well but it failed at the marketplace because of cost (about $150) and longevity (the quartz cell deteriorated after about 300 hours of use).

An improved version, the Ionovac, is now being shown by the DuKane Corporation. The price for the complete tweeter has been lowered to $79 ($69 without cabinet) and the life of the quartz cell has quadrupled to 1,200 hours (almost two years of normal listening) after which the quartz may be inexpensively replaced. These improvements result from ultrasonic drilling of the tiny horn. DuKane also incorporates the Ionovac tweeter in several full-range speaker systems.

Cricket Concerto. One of the music-con-electronics events of New York’s High Fidelity Music Show was the “live versus recorded” concert sponsored by Acoustic Research and Dynaco. The concert featured the Fine Arts Quartet in the flesh and on tape. Auditors were asked to distinguish between the live portion of the performance and a prerecorded version played over a system consisting of an Ampex 350, a Dynakit PAS-2 preamp, two Dynakit Mark III amplifiers, and two AR-3 speaker systems.

Few could separate the live from the recorded portions.

In part, their confusion stemmed from the painstaking care taken in recording the Quartet. This was no ordinary recording. As AR’s Edgar Villchur explained it, there had to be a total absence of reverberation in the recording. The reason? In hearing the live portion of the program, an audience receives the natural reverberation of the hall. If there were any reverberation in the recorded section, they would hear hall reverberation on top of studio reverberation and could distinguish between the live and recorded versions. Villchur decided, therefore, to make the original recording out-of-doors, in “God’s anechoic chamber” as he poetically puts it.

Actually, the taping was done on the front lawn of his Woodstock, N. Y., home (see photo) where the Fine Arts Quartet encountered unexpected competition from hundreds of crickets. For the first time in their experience, the Quartet periodically swapped stringed instruments for Flit guns to complete the recording. And Villchur occasionally fired a shotgun into the air to silence momentarily birds of all species which watched, listened, and—worst of all—commented on the session from nearby trees.

HEATHKIT® HI-FI . . .
the gift that goes on giving pleasure year after year.

STEREO EQUIPMENT ENCLOSURE ENSEMBLE
Beautifully styled center cabinet and optional speaker wings are factory assembled, ready to use, in choice of finished or unfinished woods. Center unit houses changer. AM/FM tuner, stereo amplifier and optional sliding tape recorder drawer. Speaker wings available in 2 models— for 12" or 15" stereo speakers.

DELUXE AM/FM STEREO TUNER
Exciting new styling and advance design features rocket this Heathkit to the top of the Christmas value list. Featured are: complete AM/FM, Stereo reception plus multiplex adapter output; flywheel tuning; individual tuning meters; FM AFC and AM bandwidth switch. 25 lbs.

HI-FI RATED 50-WATT STEREO AMPLIFIER
In the inimitable style of the AJ-30 above, this complete stereo amplifier offers the ultimate in stereo control and mastery of tonal values. Jam-packed with special features including mixed-channel center speaker output; "separation," "balance" and "stereo reverse" controls. 31 lbs.

ACOUSTIC SUSPENSION SPEAKER SYSTEM KIT
It's "bookshelf" size belying its gigantic capabilities, this amazing unit outperforms speakers four times its size. A 10" acoustic suspension woofer and two "dispersed-array" cone tweeters deliver high-fidelity tone with fantastic brilliance over the entire range of 30-15,000 cps. Pre-assembled cabinets in choice of finishes. Measures 24" L x 111/2" D x 13 1/2" H. 28 lbs.

ECONOMY AM/FM STEREO TUNER KIT
Ideal suggestion for your Christmas hi-fi gift list . . . a low cost tuner with every design feature for superb AM, FM or stereo AM/FM listening. Separate "magic-eye" tuning indicators "zero-in" stations while 3-position AFC gives drift-free reception. Output provided for multiplex adapter. 14 lbs.

AUTOMATIC RECORD CHANGER KIT
Jam-proof mechanism . . . quick-change cartridge holder . . . "muting" switch . . . and "size selector" for intermixing 7", 10" and 12" records of the same speed! Holds up to 10 records, for hours of delightful stereo or mono listening enjoyment. Model AD-50 $49.95 to 154.95 depending on cartridge. Other models from 122.95. Send for FREE Heathkit catalog today!

MONOPHONIC PREAMPLIFIER KIT
The AA-60 is a monophonic hi-fi preamplifier control center . . . the heart of any good hi-fi system. 6 separate inputs: mag. phono, tape head, microphone, tuner, crystal phono, and auxiliary. Tape head input has XARTB equalization for direct playback from tape head. Features separate tone controls, input level controls, filament balance. 6-position function selector.

PORTABLE 4-TRACK STEREO TAPE RECORDER KIT
What better gift than this? . . . a compact portable tape recorder just waiting to record the caroling, frolicking, family joys of the holiday season! You'll thrill to the natural stereophonic sound of this unit that also serves as a hi-fi center with its versatile input accommodations and controls. Tape mechanism and cabinet are pre-assembled. 49 lbs.

a touch of Crosby...

The deft touch of Murray G. Crosby on electronic gear makes the everyday into something special. This is clearly evidenced by the introduction of two new high fidelity components—a super-sensitive FM tuner and a powerful 28-watt stereophonic preamplifier/amplifier. These twin units bring to home music enjoyment the technical achievement acquired through research and production of sophisticated military electronic equipment. And what makes Crosby’s entry into stereo hi-fi even more exciting is the combination of these skills with handsome, compact design at a fair price.

left: Model 680 stereo preamp/amplifier 28-watts — $119.95
Featuring push-button source selection, colored light mode indicators, exclusive circuit mono/stereo blend control, center-channel stereo output, tape monitor input. Compact size—13¼” w. x 4½” h. x 6¾” d.

right: Model 690 FM tuner — $99.95
Extremely high sensitivity, dial-variable amplified AFC, variable interstation noise-muting control, chassis ready for Multiplex. Compact size—13¼” w. x 4½” h. x 6¾” d.

Audio News

From Europe

Editor’s Note: This is the first in a series of reports on audio developments abroad prepared for us by our counterpart in Britain, The Gramophone. Subsequent transatlantic news reports will appear at regular intervals.

Audio at Earls Court: The first radio exhibition held in London took place in 1922. Each year since then (with the exception of the war years) the British public has flocked to see the new products on display.

The Radio Show now has its Audio Hall, though the more discriminating public regards the London Audio Fair (held in April each year) as the best shopwindow for new equipment. There were, however, several interesting innovations on view at the recent Radio Show, and many of them will be available in the U.S.A. by now.

New Acro Pickup: Under the Acro trademark, Cosmorecord, Ltd. has for years produced pickups and microphones using piezo crystal elements, some based on Rochelle salt and more recently on ceramic materials. Cosmorecord has now developed a revolutionary new pickup named the Hi-Light with a playing weight of one gram for mono and a separate cartridge with a 2-gram weight for stereo. Due to the very light pressures, wear on both stylus and disc is negligible. The stylus is an integral part of the pickup head, and the entire head is replaced when the stylus becomes worn. A most convincing demonstration was given with the turntable platform oscillating through about ±30° without any audible change. The firm also showed a new stereo crystal microphone which should have a ready sale because of the many stereo 2- and 4-track tape machines available. This microphone is designed on the basic British Hume- lein principle, giving full coincident-phase operation with the use of a pair of two-crystal pressure differential units in a neat streamlined housing.

Collaro and Garrard: Collaro exhibited a tape deck which, although basically designed for manufactured tape machines, is available in small quantities for people wishing to make up their own equipment. Named the “Studio” Tape Transcriber it has very low wow and flutter figures and can be supplied with a separate monitor or stereo playback head.

A new piece of turntable equipment, the Laboratory series Auto Turntable, Type A, was shown by Garrard. Besides having the characteristics of a transcription unit, it also plays records automatically. The turntable is a composite type, being a heavy non-magnetic machined casting with a built-in magnetic shield. Even with hum-sensitive pick-ups there is a negligible field of interference. Mounted on the base plate is the Garrard TPA12 precision counterbalanced pickup arm.

No Hole in the Center: For a number of years the General Electric Company has marketed an unusual loudspeaker using a metallic diaphragm with discrete depressions to smooth the response curve. By using two of these units in an acoustically corrected cabinet and connected so that the diaphragms operate in push-pull, a loudspeaker with low harmonic distortion is produced. In order to extend the frequency response to the limits of human hearing, one or two small pressure units with crossover networks are also used. Dr. Leakey and F. H. Britann, two research engineers of the G.E.C. Laboratories, this year demonstrated the use of a center speaker in stereo reproduction. The well-known hole-in-the-center effect was completely absent and, although several such systems are available in the States, the G.E.C. circuitry is new. We should hear more about it in the future.

New Approach from EMI: Electric and Musical Industries, the firm producing records for the His Master’s Voice, Columbia, and Capital labels, has introduced a new high-quality pickup for stereo records. The head operates on the variable reluctance principle, and the tip mass is stated to be as small as approximately 1 milligram with a high lateral compliance of $7 \times 10^{-6}$ cm/dyne. The arm, balanced both laterally and longitudinally, operates on a viscous damped single pivot. A new approach has been used in mounting the head relative to the arm. Instead of making the tracking error as small as possible, the head is angled for least possible tracing distortion. One can raise and lower the arm without shock because of a built-in damped lever.

The Stereomatic: Almost from the beginning of sound broadcasting the firm of Lustraphone has specialized in microphones—magnetic, moving coil and ribbon types. Last year this company introduced the VR/65 Stereomatic stereo ribbon microphone—two independent ribbon units mounted one above the other. The upper unit can be rotated through 100° relative to the lower unit and has a phase reversal switch.

Many technical reviewers who visited the last Audio Fair considered the Lustraphone demonstration of stereo recording one of the best of its kind ever heard. The Stereomatic costs $32.10 / $91, which considering its features cannot be regarded as expensive for a wide-range stereo microphone. However, by leaving out some of the facilities, but not changing the stereo performance, Lustraphone has now introduced the VR 65 NS model at $15.155 ($45). This brings it into the amateur recordist price range.

Reflectograph: One of the first semiprofessional tape recorders in Britain was the Reflectograph, which had an infinitely variable tape speed between 3 and 8 inches per second. In 1958 the company came under the wing of Multicore Sellers, Ltd. (the Managing Director of that company, Richard Arbib, having a ways been a keen musician and recordist). Knowing world markets, he set his engineers, headed by James Cunningham-Sands, the task of producing a range of professional machines at a reasonable price. At present there are four models, Model A is a 2-track recorder; Model B records on four tracks and plays 2- or 4-track stereo tapes with the aid of an external amplifier for the second track. Model C is a 4-track stereo recorder and reproducer. The latest addition, seen for the first time at Earls Court, is Model D which consists of deck and preamplifier and is designed for playing tapes for copying purposes. One of the unusual features of all these machines is the use of a single potentiometer to provide variable speed, fast forward and reverse winding. Demand for them is high in Britain and time may pass before they appear in America—but they’re worth the wait!
a Special Offer from Harper's magazine

Ever notice how Harper's magazine punctuates the conversation wherever you go? It does, if you travel in well-informed circles.

In fact, there may be no greater or more important magazine in our culture today than Harper's. A bracing and distinguished combination of imaginative writing and editing goes into every Harper's article, whether it's on art, politics, popular culture, religion, education, or unpopular culture.

Join the well-informed today. Take advantage of our special subscription offer.

Harper's magazine
49 East 33rd Street, New York 16, New York

I understand that a year's subscription (12 issues) to Harper's magazine is normally $6.00. But:

☐ I want to take advantage of your special subscription offer. Please send me the next 12 issues for only $3.87, and bill me later.

☐ I want to take advantage of your special, special subscription offer. I have enclosed my check for $3.87, so please send me the next 14 issues.

CIRCLE 75 ON READER-SERVICE CARD

High Fidelity Magazine
Many an owner of a monophonic high-fidelity system has his ear(s) cocked for the sound of stereo discs and wonders—since his system has not yet been "converted"—whether his next record purchase should be of the mono or stereo version. If the mono disc, won't something be missing when the step to stereo is taken? If the stereo disc, can it play on mono equipment—and if so, how?

The answer to the first question is: definitely yes. To the second: it depends—on the cartridge and how it is connected. A monophonic cartridge can be used for playing stereo records, but should not be. The lack of vertical compliance of a mono pickup, as well as its stylus diameter (.001-inch as compared to the .0007-inch required for the narrower stereo groove) can damage a stereo record.

But, does it make any sense to use a stereo cartridge in an otherwise monophonic system? Again, definitely yes. Such a cartridge may be hooked up to perform correctly with mono records; what's more, it permits you to buy stereo records and play them monophonically now and stereophonically later when that second amplifier and speaker are added.

In this transitional period between mono and stereo, stereo cartridges are already to be found in many single-channel systems. Stereo pickups have in fact all but replaced mono versions as available products; this, plus the eye-on-the-future attitude of present mono owners, would indicate that almost any new purchase of a cartridge these days would be of the stereo variety.

There are specific ways to make stereo cartridges, stereo records, and mono records all nicely compatible with each other as well as with the existing single-channel system.

The simplest solution is to connect the stereo cartridge to the leads in the arm as if it were a mono cartridge. This means connecting the "hot" or "signal" terminals for both channels to the same lead in the arm, and similarly tying the two "ground" terminals to another common lead. This wiring should then connect to a single shielded cable which carries the resultant mono signal to an input jack on the mono amplifier or preamp.

An important thing to watch for here is that the "hot" leads from the cartridge connect, via the center conductor of the shielded cable, to the center pin of the phono plug; and that the "ground" leads connect, via the braid or shield of the cable, to the outer portion of the plug. In this way, no "out-of-phase" condition could occur to reduce the available signal level.

Such a hookup will provide a mono signal from both mono and stereo records, and will not damage the latter. It does, however, suggest some future inconvenience when the system is later converted to stereo; for when a second amplifier is added, the cartridge must be rewired in the arm, and a second shielded cable provided. So, to do the trick better, why not arrange for such connections ahead of time, in such a way as to provide for clean mono sound now, and very little bother for stereo later? This means, of course, wiring the cartridge as if it were going to play stereo, but then "fooling it" into playing mono—thus, two sets of signal leads and their respective ground leads, and two shielded cables. Indeed, this is exactly the arrangement you will find in some new record players.

With such a wiring arrangement you have a choice of three dodges.

First, you can simply remove one of the output cables from the tone arm, and connect jumper wires across the two signal, and the two ground terminals under the turntable. This is, in effect, the same as wiring the cartridge for mono performance in the first place. Then, in the stereo future, you will have to remove the terminal jumpers and reconnect that second cable.

To avoid this bother, you can install a two-pole, two-position switch, wired—as in the drawing—to perform the functions of terminal-jumping, clipping, and reconnecting whenever desired. On one position, the switch combines both channels for mono, and removes one cable from the system. On the other "stereo" position, both channels are operative, each feeding through its own cable. This switch may be installed in any convenient spot as close to the turntable as possible.

A final solution, which is probably more convenient than any other, is to use a "Y connector" that combines the two cables into one. No clipping, no soldering, no switch mounting. "Y connectors" come in different plug-and-jack combinations to accommodate any installation. A type like the Lafayette MS-672, which has two plugs (for accepting the cables from a stereo-wired player) and one jack (for feeding into a mono amplifier) would probably be most suitable. These connectors are securely made, well shielded, and short enough so that their own length will not create additional problems of hum or high frequency loss. An inveterate do-it-yourselfer can fashion his own "Y connector"—but why bother when the ready-made version costs about 60 cents?

Changing from mono to stereo is made convenient via two-position switch...

. . . or wire a rotary switch as shown in above drawing to achieve the same end.

chance to get a ticket for the evening unless
the hotel porter or his travel agent helps him.
"Advance booking is accepted for stalls and
boxes," the official Scala pamphlet says.
"Requests indicating name and address
made by letter, with money order enclosed,
or by telegraphic money order or postal
order, must reach the Biglietteria del Teatro
alla Scala at least seven days before the per-
formance."

For first nights (prime) and galas, "evening
dress is requested in stalls and boxes," seats
sell for $16, plus eighteen per cent tax. After
the first night, prices drop to $8.00. Third-
performance ticket cost only $5.00. At
least forty performances are Serate per i
Lavoratori, "Workers' Nights," with the
most expensive ticket less than $1.00 and
standing room in the galleries for 30 cents,
less than the price of a cinema ticket. These
are not cut-rate evenings with minor artists.
The same stars sing that appeared on the
first night, and the same conductor is in the
pit. Workers buy their tickets either at their
factories or at the offices of the local labor
unions. "We try to get the workers and
their families and friends into boxes. We try
to create a worker's society on these nights,
just as there is the bourgeois society on first
nights. Sometimes as many as ten people
crowd into a box for six. We want everybody
here to feel that La Scala belongs to them.
We charge the industrialists plenty to be
able to sell cheap tickets to their workers."
So speaks ex-industrialist Dr. Antonio Ghi-
inghelli.

This admirable policy has resulted in an
tirely new audience in Milan. Workers
and small tradesmen go to La Scala with the
same feeling of anticipation as rich habitués,
and they show similar understanding and
excitement. La Scala today is, in fact, an
opera house for all the people. Ghiringhelli's
plan is to give more performances for im-
pecunious students. "We hope that some
day the young people of Milan will study
the history of La Scala in school," he says.
"And we want everybody in this city to
have a chance to hear most of the world's
great operas under this roof in the course of
the next ten years."

La Scala's audiences are the most discrim-
ingating and toughest on earth. They show
terrific enthusiasm when they appreciate a
performance but sit on their hands when
they don't like it. The most celebrated
singers are terrified of the devastating Milan
silence. Ghiringhelli has seen quite a few of
them in tears after getting the silent treat-
ment. Once in a while there is violent hissing
and booing, and there have been incidents
doff dignified first-nighters throwing pro-
grams, opera glasses, and even shoes against
the stage to show their utter disapproval.
No one can fool the people of Milan who
grow up with opera, have tradition and

(INACIÓN DERECHOS DE AUTOR - DE RESERVAS)
well without platforms that can be raised and lowered and parts of the stage that can be rolled back and folded. Such gadgets shorten intermissions, but Italians who know singing best feel that most singers need twenty minutes of intermission. “We are more concerned about the voices of our singers than about the patience of our audience,” says Ghiringhelli.

There are comfortable dressing rooms, and well-appointed offices. The backstage atmosphere during a performance is electrifying. Whereas bored stagehands often read papers or play cards, La Scala’s stagehands and technicians are fervid aficionados who hold their breath when a diva sings a difficult aria and cross their fingers before the tenor embarks upon the critical high C that will make or break him. So do ushers, wardrobe mistresses, and other employees. You can see them stand in the rear and listen with critical appreciation. They enjoy the opera as much as the $16 patrons in the stalls. Every one of them is proud of his house.

Everybody drops in at the Museum from time to time. The Museo della Scala was founded in 1910, and installed in several small marbled rooms just off the second-floor foyer. It was a brilliant idea. During intermission people walk through and refresh their sense of the past. Fortunately the relics were not hit by the bombs. There are scores by Donizetti, Bellini, Verdi, Puccini; letters and sketchbooks; the testament of Paganini; collections of costumes; miniature sets; the furniture of the room at the nearby Grand Hotel where Verdi died, and many other memorabilia dear to the hearts of opera lovers. And there is a reference library of fifty thousand volumes where musicologists come for research.

La Scala’s organization is not top-heavy with bureaucrats. The autonomy of La Scala is guarded by a Council of Administration. The Mayor of Milan is its president, and among its eleven members are Ghiringhelli, delegates of the municipality, the province, the musicians’ union, composers. Ghiringhelli’s deputy is Dr. Luigi Oldani, the secretary-general. There are seven artistic directors (for the orchestra, the chorus, the ballet, the production department, the maestri di scena, the backstage music, and an artistic secretary). Nicolas Benoit, one of La Scala’s stage designers, also is direttore di L’estimo scenico, a sort of production coordinator. The press department and a few members of the administrative staff complete the organization.

Though a great deal has been achieved in the recent past, Ghiringhelli is not satisfied. He hopes to improve the pension system, to

November 1960

PORTRAIT of a SYMPHONY
By Constantine Manos
Foreword by Aaron Copland

The unique magic of a symphony orchestra is captured for the first time in the pages of this spectacular volume.

Presenting 131 photographs, many of them occupying the full double-page spread of seventeen by eleven inches, PORTRAIT OF A SYMPHONY depicts the musicians, conductors, guest soloists, audiences and backstage life of one of the world’s leading orchestras, the Boston Symphony.

Here, with evocative text by photographer-author Manos, formerly official photographer of the Boston Symphony, is the subtle interplay of feeling and response among conductor, performers and listeners; the intense dedication of famed solo virtuosi Casals, Heifetz and Serkin, among others; the enormous range of expression of which a well-disciplined orchestra is capable.

Printed by sheet-fed gravure in Europe, PORTRAIT OF A SYMPHONY makes it possible at last for the music lover to experience, as Aaron Copland puts it in his Foreword, “the vicarious pleasure of finding oneself... alone in the presence of a great orchestra.”

At bookstores, $10.00

make the ballet more prominent, to be able to give more symphony concerts, and, generally, "to bring La Scala closer to the heart of our people." He is constantly worried about the problem of staging seventeenth-century opera in such a way that our modern audiences will understand it. He has to cope with the problems that bother all opera managers—a critical shortage of new operas, and of tenors and dramatic sopranos.

But Ghiringelli's and La Scala's most serious problem is the growing influence of the state. The Ministry of Tourism and Spectacles, created two years ago in Rome, is apparently making efforts to reach its tentacles around La Scala. The danger of "reorganization" hangs over the glorious house. Disturbing threats are voiced in faraway Rome (where, the Milanese say, they know nothing about opera) to lump together all Italian opera houses, and to appropriate state subsidies on a percentage basis. But La Scala refuses to be lumped.

Any interference by the government would mean the end of a noble, independent house with a great past and perhaps an even greater future," says Ghiringelli. This is exactly what Toscanini fought against. His heirs at La Scala are sworn to continue the fight to the very last high C.

Palermo

Continued from page 14

ized at the Met," Herbert Graf said, as he was preparing the Rimsy Ivan, "but this theatre has so much esprit..."

You feel the esprit the minute you walk backstage during a rehearsal. The staff—most of them young—are constantly alert. This is a far cry from the somnolent, sun-baked Sicily tourists imagine; here everyday is the sun. And when rehearsals end, late at night, more often than not the cast all troops over to the "Extra-bar." There sleepy waiters snap into action, producing carafes of strong Sicilian red wine as conversation flows rapidly. Singers discuss phrasing, conductor and director come to agreements about this or that fine point, and perhaps Maestro Tranonti and Baron De Simone drop in to say hello.

Sometimes they stay on, and the talk turns to plans for the future. The Massimo has a project afoot to organize, under the theatre's auspices, a National Ballet Academy—something that Italy sorely needs. Or, inevitably, everybody starts suggesting new operas that the Massimo should do; a wild assortment of names flies around the table; Busoni's Doktor Faust, Bellini's La Straniera, Hans Werner Henze's König Hirsch, Stravinsky, Berg, Poulenc. Britten... Given the time, the Massimo may very well do them all.

High Fidelity Magazine
Orchestra conducting Columbia Petrushka
Stravinsky: his own hand-drawn map of snapshots taken "Le sky's voice in about places and school works."
By way of further 60th birthday salutes to this celebrated American composer, Bernstein, the Philharmonic and some youthful cohorts present a first recording of Copland's school opera for school children, "THE SECOND HURRICANE."

Caplon: Four Dance Episodes From "Rodeo" / Billy the Kid / Leonard Bernstein conducting New York Philharmonic / MIL 5575 MS 6175

THE DUKE MEETS TCHAIKOVSKY
Blithe-spirited DUKE ELLINGTON and his aide-de-camp Billy Strayhorn meet a surprising new colleague - Peter Illitch Tchaikovsky. The result is a suave and witty commentary on that hardest of classics, "THE NUTCRACKER SUITE." In the Ellington book, "Waltz of the Flowers" becomes "Dance of the Flowers!!" The Nutcracker Suite/Duke Ellington and his Orchestra / CL 1541 CS 8341

THE COWBOY AND THE HURRICANE
Brisk as a prairie breeze is AARON COPLAND's brace of ballets - "RODEO" and "BILLY THE KID," newly coupled in high-stepping performances by Leonard Bernstein and the New York Philharmonic. By way of further 60th birthday salute to this celebrated American composer, Bernstein, the Philharmonic and some youthful cohorts present a first recording of Copland's school opera for school children, "THE SECOND HURRICANE."

Caplon: Four Dance Episodes From "Rodeo" / Billy the Kid / Leonard Bernstein conducting New York Philharmonic / MIL 5575 MS 6175

FROM BACH TO BOLERO
EUGENE ORMANDY and THE PHILADELPHIA ORCHESTRA move with wonderful agility from Bach's majestic Toccatas on one new record to Ravel's turbulent "BOLERO" on another.
J. S. Bach: Toccata and Fugue in D Minor, etc. / Eugene Ormandy conducting The Philadelphia Orchestra / MIL 5580 / MS 6180
Ravel: Bolero / Le Tombeau de Couperin; Alborado del Gronioso MS 6169* / MS 5569

WALTER AND MAHLER'S LIED
BRUNO WALTER, Mahler's great friend and most ardent advocate, penetrates to the poetic heart of his "LIED VON DER ERDE." The album cover photograph is a collage of Mahleriana in Dr. Walter's possession - including, appropriately, Mahler's spectacles. Mahler's vision is indeed Walter's. Another noble Walter mission is the furtherance of Anton Bruckner's music, through recordings such as this latest, of the 9th Symphony. Mahler: Das Lied von der Erde (The Song of the Earth) / Bruno Walter conducting New York Philharmonic / MIL 255 / MZS 617

PREVIN'S BROADWAY
ANDRE PREVIN is the guide to a bright new world - the Broadway jazz scene. Pianist-arranger Previn and a limber jazz trio swing subtly but powerfully in ten Broadway hit tunes.
Give My Regards to Broadway / Andre Previn and his Trio / CL 1530 / CS 8330

33 singles: A happy new note. Many of your favorite singers and their songs are now available too on neat 7-inch single records at your favorite speed — 33.

PERCUSSION IN STEREO
"PERCUSSION GOES DIXIELAND" and a number of other riotous directions in a brash new album by arranger-bandleader GARRY SHERMAN. Equally combustible is "Stereo Dialog for Brass" a free-wheeling exchange between trumpets and trombones. Percussion Goes Dixieland / Garry Sherman / CL 1537 / CS 8337

...always yours on COLUMBIA® RECORDS
... or Schubert or Brahms or Debussy. With the almost infinite variety of music now available on 4-track stereo tape, you can enjoy music to suit your tastes or moods with a minimum of interruptions. For example, with a 4-track Twin Pak you can enjoy the complete Swan Lake or Nutcracker Suite—all on one reel of 4-track stereo tape equivalent to the playing time of 2 stereo discs. Or with a two-reel set, you can enjoy complete operas like Aida or Madame Butterfly. All this because twice as much music is recorded on the same amount of tape. Thus economy, as well as quality, is another sound reason for switching to 4-track. Select from the wide variety of classical and popular music now at leading hi fi salons, music stores and tape machine dealers. For catalog, write: 1024 Kifer Road, Sunnyvale, California, UNITED STEREO TAPES
