RADIO SOLUTIONS FROM THE WORLD LEADER.

The complete spectrum of radio solutions is available only from Broadcast Electronics – the global leader in radio broadcasting technology for over 50 years.

TRANSMISSION SOLUTIONS

The BE line of highly reliable transmission products, flexible and HD ready, are backed by the industry standard in engineering and customer service.

STUDIO SOLUTIONS

BE studio systems, including the market-leading AudioVAULT and new AudioVAULT FleX, deliver cutting edge digital storage, playback, traffic management, and production tools unmatched in the industry. Flexible, affordable, and supported 24/7, BE studio systems lead the industry.

DATACASTING SOLUTIONS

BE solutions for datacasting, song tagging, and seamless social media tools provide your station with additional profit opportunities at the smallest of investment.

Tomorrow's Radio Today

Learn more about bolstering your bottom line with powerful radio solutions from Broadcast Electronics. Contact us at bdcast.com, or send us a tweet at <http://twitter.com/followbe>. 

STX LP

Scalable 1kW to 5kW FM transmitter, rack ready with integrated exciter at a very affordable price.

AudioVAULT FleX

Suite of powerful automation and audio management studio tools with infinite expandability.

TRE

The ultimate in datacasting message management for RDS, HD Radio™ and the Web.

omt
technologies

Maintaining a facility is an ongoing process. Unfortunately, the past two years have proven to be challenging times for most stations, and some of that maintenance has been put on hold. As some indicators show the economy picking up, some stations are acting on the upswing and picking up projects that were put on hold. Other stations have put projects on hold as long as they could and have to pick up again. In either case, it's worthwhile to review the choices you made several months ago to see if new options are available. The *Radio* magazine Buyers Guide is just the tool to help you do this.

Like we do every year, we have updated all our listings to provide the most accurate information we can provide. Look through the equipment categories to find the manufacturers that provide what you're looking for, then use the directory to make contact.

And the print version you're holding is just the start. We have also updated our online buyers guide at RadioBuyersGuide.com. The all-new online directory has been updated as well, and the online information is updated continuously.

We have also designed the online directory to provide even more information. Soon we'll include links to products, Field Reports and even product comparisons. We're also making it mobile friendly so you can access it on the go.

Save this Buyers Guide for quick reference from your desk all year, and access the online version for the latest updates. Either way, you have the right tools to complete your project.

Broadcasters General Store

Your Leading
Source of
Broadcast
Equipment &
Services

Family owned and operated since 1979, Broadcasters General Store has supplied equipment to the broadcast industry ranging from legendary stations to the smallest facilities. Whether it's a complete studio rebuild or a handful of connectors, BGS takes care of everything!

**Your
one-stop
destination
for radio!**

Axia's Livewire is the worldwide standard for Audio over Ethernet, with more than 2,000 systems installed around the world and 30+ hardware and software partners - like BSI and 25/Seven - whose products integrate directly with Axia consoles and networks. So your studios go together faster, cost less and work better than ever before.

ON THE AIR

SANITIZED FOR YOUR PROTECTION

SOME WORDS SHOULD BE OBSCENE AND NOT HEARD

Eventide Broadcast Delays are designed to keep profanity off your air, and angry listeners, embarrassed advertisers, and the FCC off your back. We invented the obscenity delay and have a solution for stations large and small that provides up to 80 seconds of the highest quality revenue and license-protecting delay.

Our new HD compatible BD600, 24-bit delay, comes standard with AES/EBU, and provides up to 80 seconds of memory — twice as much as other delays. There are fully adjustable Delay and Dump functions, and a Sneeze function which “edits” audio entering the delay, allowing the host to sneeze, cough, or make a short comment without being heard on air.

The BD600 offers two different methods of delay buildup and

reduction: Eventide’s catch-up and catch-down system, and an exclusive fast-entry-and-exit feature which allows starting a broadcast with the delay already built up to a safe amount and ending it with a rapid reduction of delay.

For HD, the BD600 offers MicroPrecision Delay™ mode which allows up to 10 seconds of delay to be adjusted in real time in 100 nanosecond increments. This is useful for synchronizing analog and digital signals while on-air, without audible artifacts, to maintain a seamless user experience.

Whatever your size, whatever your format, you can’t expect to protect the integrity of your air and the foundation of your business without an Eventide Broadcast Delay in your rack.

ACCESS Portable Stereo BRIC IP/POTS Codec

Since 1961, Comrex Corporation has been manufacturing highly innovative and dependable solutions for broadcasters. The ACCESS Portable codec continues that tradition into our 50th year. Used by broadcasters worldwide to cover breaking news, live sporting events and every kind of unique remote broadcast possible, ACCESS utilizes BRIC Technology to deliver high quality, low latency audio over a wide variety of IP data circuits such as DSL, broadband cable, Wi-Fi, 3G, 4G, BGAN, VSAT and others. Learn more by visiting <http://remotes.comrex.com>

Step up to a Crown

CROWN BROADCAST

- FM Transmitters from 30 watts to 10kW with optional built-in audio processor
- FM Translators with built in receivers
- Frequency agile from the front panel
- 5-Year warranty
- Compact—small footprint
- 2011 Introduction of low power HD Transmitter solution for small to mid-size stations.

Current Crown Users—You can take advantage of Crown Broadcast's exclusive unit upgrade program. With this program you will be able to send in your current functioning Crown product and have the unit renewed to like-new condition complete with 2-year warranty. You can also have the units powered up from 30w to 300w and from 100w to 300w. Upgrades are also available for the receiver board and audio processor. This program allows for a long-term investment in your current product without the investment in a new product.

Telos Systems Hx1 & Hx2 Digital Hybrid Telephone Interface

Hx1 and Hx2 digital telephone hybrids have raised the bar on hybrid technology. Engineered with Telos' advanced digital signal processing, the Hx1 and Hx2 harnesses, controls and sweetens calls from even the most chaotic sources. The latest OSP algorithms tame even mobile calls. Audio processing from Omnia automatically manages levels and EQ. Built-in Auto-Answer, caller disconnect detection, ingenious audio-leveling and anti-feedback routines for enhanced open-speaker applications, call screening and line-hold features, and front-panel send and receive audio metering are all standard on the Hx.

Broadcast Electronics, Inc. manufactures a complete line of broadcast products, including transmitters for AM, FM and HD Radio and program automation systems. A global company that has influenced every major radio milestone since 1959, BE continues to lead the development of digital radio and to bring new services to radio as a key innovator of datacasting applications for social networks and mobile devices.

QUICK! I GOTTA CONNECT MY IPOD/ CD/LAPTOP/FLASH RECORDER/ TV CAMERA/CASSETTE DECK/WHATEVER!

MULTIPOINT CONNECTS 'WHATEVER' TO YOUR STUDIO!

It happens all the time....someone rushes into your studio and wants to connect their 'whatever' to your studio!

It could be pro gear or consumer. It could be analog or digital, AES or S/PDIF. Does it need XLRs, or a 1/4" phone plug, or a 3.5mm mini-plug, or a phoro plug? Stereo or mono?

MultiPort to the rescue! It provides a central place to connect just about anything to your studio. Easily plug in professional or consumer gear, analog or digital, without needing converter boxes, adaptors, patch cords, or last-minute wires strung from the back of your rack. There's even a USB jack for easy access to your studio PC, and mono Mic outputs for videocams.

Install a MultiPort in your studio, and eliminate one more hassle in your day. Whatever, indeed!

WE BUILD SOLUTIONS.

DIGITAL SOLUTIONS. ANALOG SOLUTIONS. FUNCTIONAL. RELIABLE. AFFORDABLE.

You've got more than callers on the line.

HX SINGLE AND DUAL LINE HYBRIDS

Telos is the world leader in broadcast telephone technology. We invented the first adaptive digital hybrid, and we've been reinventing it ever since. Take the new Hx1 and Hx2. With the most advanced signal processing ever, these POTS hybrids deliver consistently superior performance, regardless of telephone line characteristics. Your callers will sound amazing, even those on mobile phones.

VX MULTI-STUDIO VoIP SYSTEM

VX is the world's first VoIP broadcast phone system. With its powerful Ethernet backbone, VX is scalable from a few studios to dozens and connects to everything: POTS, T1, or VoIP. Lines are easily shared between studios. VX also features our most advanced audio processing ever. Each incoming line has its own individual hybrid, allowing multiple calls to be conferenced and aired simultaneously with superior clarity and fidelity.

NX MULTI-LINE SYSTEM

The Nx6 uses our latest digital hybrid technology for great sound, even with cell-phone callers. It handles up to six POTS or ISDN phone lines, and connects to your console via analog, AES/EBU or Livewire IP-Audio. Nx provides Caller ID, of course, and a range of hardware and software phone controllers your operators will love. Need more lines? Check out the Nx12. Handles twice the number of phone lines, and can serve two independent studios simultaneously.

Read what our users say...

KJDL, Lubbock, TX

"I like (Xtreme) a lot! Once we got things together we never have any problems. (Xtreme) is a 9 out of 10 for usability. It didn't take me long to figure out, I picked up most of the major (features) in the first day. (The Xtreme) is user-friendly for all involved."

Jessie Walker, Program Director

DMS Broadcasting, San Francisco, CA

"When we started, we were jumping into something we knew nothing about! We called your tech support & within a day they had a solution. It was miraculous. They helped us get wired up & set up. (Tech Support) had a positive & upbeat attitude. They went above & beyond!"

David Trudrung, General Manager & Co-owner

WDHC, Berkley Springs, WV

"We are absolutely pleased. I especially like the game scheduling feature, it works great for Mountaineer West Virginia University games. I rate it a 9 ½ because we can schedule 2 games simultaneously & flip flop when there are rain delays. It works great for sports talk!"

Mike Hurst, Engineer

KSVL, Yerington, NV

"I love (Xtreme)! We've been running (Xtreme) for a year & a half every single day & we give it a 10! It's easy to learn & use. Good support & it's dependable!"

George Lemait, Station Manager

KSMZ, Alexander, AR

"Xtreme has more flexibility, sounds better & has fewer problems than our stations running (other automation systems). It's easier to program & a 9 compared to other programs out there."

Scott Gray

and MANY more...

Join the hundreds...

... of others on air with Digilink-Xtreme, the best automation system in Radio. Full featured, it is easy to install, use, and maintain. Best of all, it is easy to buy. SANDIES

ON ON AIR AIR
MODEL 343

Think IP Audio is hard? Think again.

Meet the new Axia console system.

IP Audio: Powerful. Flexible. Cost-effective. But configuring the network switch can be time consuming. Even intimidating. Until now.

Meet the new Axia PowerStation. The first IP console system with the network switch built right in. In fact, everything's built in. Audio. Logic. DSP engine. Power supply. And that powerful Ethernet switch for easy expansion. Uses Gigabit to link to other studios. Configuration time? Minutes, not hours. Nothing new to learn: plug in audio and power - you're ready for air. Simple, right? It's the fastest, easiest IP Audio ever.

PowerStation simplifies the IP Audio console by putting everything you need in a single box - including the switch. Nothing's easier.

Why compromise? Axia is the most trusted name in IP Audio. Proven reliability in the real world. With over 2,000 consoles on-air, day after day, 24/7. Speaking of 24/7, Axia provides round the clock support (not that you'll need it). Easy and reliable. But don't just take our word for it; ask an Axia client. They're not hard to find.

Axia. Easy, risk-free IP.

We're Ready For CAP (so you can be, too)

SAGE DIGITAL ENDEC

01/28/10 39136141

MENU WEEK MSG

Get ready to add CAP to your Emergency Alert System capabilities:

- AES/EBU Digital Audio
- LAN/Internet connectivity
- Web browser based control and monitoring
- More logging, emailing, and remote control options
- Free downloadable upgrade to final version of CAP 1.2

Questions?
Call us:
914-872-4069

The Digital ENDEC is a drop-in replacement for the classic ENDEC, but new users love it too.

The Sage Digital ENDEC - your one-box solution for CAP and EAS.

RECEIVERS

OUTSTANDING specifications and pricing on professional quality receivers for **EAS**, monitoring and translators.

The **AFC3** is a three receiver rack mount that is configured to your **EAS** or monitoring specific application. Each receiver has internal frequency selection (PLL) switches, front panel controls and indicators, and rear panel connections.

Price: Approximately \$1,300 (depending on receiver choice)

Select three receivers from our FM or FM/SCA, NOAA Weather, Public Service and/or AM Monitor/Receivers. All receivers are PLL (synthesized) designs using the latest state of the art components and are available as stand alone receivers as well as in AFC3 combinations.

SkimmerPlus

Skimming, Logging and Air Checks with ease.

SkimmerPlus Features

- Creates high-quality and highly compressed files simultaneously
- Supports multiple professional audio formats, such as PCM MP2, and MP3
- Supports recording from triggers
- Automatically manage hard drive space
- Up to 24 record decks available
- Individually customizable title bars and record features for each deck
- Create and save event logs for fully customizable unattended recording
- Control over record break points for long-term recording
- Central skimming for multiple-station clusters

Web Server Features

- Access mic checks from the Internet with Web Interface
- Emailing of ftp links or audio files from Web Interface
- Supports user account creation
- Easily browse recordings with an intuitive web design
- Listening to last week's records is just a calendar's click away

Advanced Wattchman Monitor®/Alarm

For Analog and Digital Broadcasting

The Model 81094 is the first in a series of Internet/Intranet accessible Advanced Wattchman® Wattmeter/Alarm systems that will monitor both forward and reflected power in two transmission lines with only one controller. Unlike previously available systems that needed one controller for each transmission line, the Advanced Wattchman® will monitor two lines (4 ports). The front panel display shows power on both systems simultaneously. Operating conditions may also be displayed on a PC from any location on the Internet/Intranet.

It is designed to work with a series of specialized line sections from 7/8" to 6-1/8" and standard Coaxial Dynamics elements for either analog or digital applications.

It Speaks for Itself.

The ASI5211. Not another dumb card. With a microphone input, including a low noise pre-amp and 48V phantom power supply, on-board DSP, increased analog I/O level of +24dBu and a new GPIO that adds two opto-isolated inputs and two normally open relay outputs, the ASI5211 is one smart card. And considering it's price, the same as cards without all these features, it's one smart choice, too. For information, call +1-302-324-5333 or email salesasi@audioscience.com.

ASI 5211 features:

- +24dBu balanced analog and AES/EBU I/O
- 24bit A/D and D/A converters
- 16, 24, and 32bit PCM formats
- Up to 4 cards in one system
- Mic input with 48V phantom power
- Parametric Eq and Compressor/Limiter
- 2 in, 2 out GPIO
- Windows XP, 7 and Linux drivers

making things sound better

"Op-X is very functional and easy to use. One of the best features is the log merge. On our old system it took minutes and with Op-X it takes seconds."

-John O'Dea, Ops Mgr
WNNK-FM, Harrisburg, PA

- Modular Operation in Op-X allows for a tiered system at a fraction of the cost of its competitors.
- Each studio client is capable of accessing all Audio Server modules on the network.
- Remote voice-tracking allows for creation of content for remote studios also running Op-X.
- The revolutionary design of Op-X's clock builder turns the previous task of scheduling satellite programming into a few simple clicks.
- Share serial devices from any machine using the Op-X Serial Server.
- Importing logs now gets its own module that takes confusion out of the process.
- Engineers will enjoy Op-X because it's easy to install, maintain, and has automatic backup features.

AUTOMATION

SIMPLE • POWERFUL • REDUNDANT

Not since Axia audio-over-IP was introduced to the broadcast industry have we at BGS been so excited! It is with great enthusiasm we'd like to invite you to take a look at the new Op-X Radio Automation delivery system for any single or multi-station cluster. Op-X's versatility allows it to operate seamlessly with either Axia IP-Audio networks or legacy audio consoles.

Pinching shouldn't be painful.

Our competition may have led you to believe that you know them, or that you can trust them. But the plain truth is that they just want your cash, and lots of it!

In a time when cash is scarce, a better concept in sales, perhaps a more progressive one, is to work for a smaller profit and pass the savings along to the customer.

Realize the savings you can put in your pocket.

Call, click, or stop by Progressive Concepts today!

Remote Control Power!

Sicon-8 - Web & Dial-up Remote Control

The Sicon-8 lets you control your site via Internet with its internal Web server, via telephone, auto-answering cell phone or our free software. Setup is a breeze using the Siconcontroller software that also includes scripting, e-mail alerts, multi-site management, virtual metering & more!

Includes
Action
Sequences!

DT-232 - Multi Purpose Dial-up Controller

An inexpensive dial-up remote control with amazing capabilities! Gives you DTMF access to 4, programmable relays that respond to any DTMF tone or sequence. Serial data outputs in your, user-defined, format for interfacing to virtually any piece of hardware. Accepts ASCII Input from its serial port to generate tones. Includes free setup & control software.

Silence Sentinel - Silence Monitor w/Web

Silence Sentinel ushers in a new era of analog audio monitoring. Monitor your audio from any Web browser. When silence is detected, it can perform user-programmed automated, sequences of actions & can also respond to user control via the network or via external status inputs.

Get info on these & other great remote control products at www.circuitwerkes.com

Your low cost solution to monitoring audio and EAS receivers!

- Dependable in normal studio operations and in complicated facilities.
- Flexible communication package sets up emails and text messages for customized contact lists.
- Monitors 8 analog and 8 status channels, and 8 outputs.
- Can be expanded to 24 channels.

Whether providing scheduled, detailed, dead air reports for local management, or as it's currently being used to monitor one of the industry's largest satellite teleports, The Studio Hawk is a power-packed product exceeding expectations.

FCC Certified FM Stereo Transmitters

GET ON-THE-AIR. STAY ON-THE-AIR!

- ✓ 50W RF output continuous duty!
- ✓ Auto protect, auto soft fail, auto restore!
- ✓ Automatic battery backup!
- ✓ Digital display of all parameters!
- ✓ Simple to install!

What's the bottom line? To stay on the air! The PX50 was designed with that in mind! Auto monitoring of all parameters, with automatic power reduction and restore on VSWR and temperature errors! No more down time AND no more trips to the tower site! Plus the PX50 is FCC Certified under parts 2, 73, & 74 (PF3PX50) and Industry Canada approved (IC: 4318A-PX50) so you never have to worry about non compliance! Make your life easy with the PX50 from Ramsey!

THE ORIGINAL... "STATION-IN-A-BOX"

Since the introduction of our "Station-In-A-Box" hundreds have been put in service worldwide! From temporary locations, rapid deployment installations, to emergency broadcast facilities, there is no quicker way to get on the air!

Custom designs include full audio production and control, record and playback of CD's, CD-R's, MP3's, MD's, and cassettes. Quick deployment antennas with LMR cable make installation a breeze. When you simply have to get on the air anywhere, rely on the proven and original "Station-In-A-Box" from Ramsey!

This index is a service to readers. Every effort is made to ensure accuracy, but Radio magazine cannot assume responsibility for errors or omissions.

Do your traffic and automation systems work together?

WideOrbit delivers seamless traffic and automation integration.
With WideOrbit you can:

- ✓ Make same-day/live log changes directly from traffic
- ✓ Automatically reconcile spots when they broadcast
- ✓ View scripts for live spots on your studio screen and automatically reconcile the spots in traffic
- ✓ Automatically delete commercials in automation from traffic
- ✓ Automatically synchronize run dates between traffic and automation
