# ELECTROLINE

Over 50 Years of Quality, Service and Value

## Improve *Your Network's* Performance

### DOCSIS<sup>TM</sup> -HMS Transponder

The Electroline DOCSIS<sup>TM</sup> -HMS Transponder is the ultimate transponder for managing, monitoring and controlling HFC network devices. It integrates DOCSIS<sup>TM</sup>, SNMP and HMS standards for the first time ever. It is universally compatible with all your network equipment and software, freeing you from proprietary equipment and expenses. And it features CableLabs<sup>®</sup> certification.

### RF Signal Management

Electroline's RF Signal Management Headend Equipment offers performance, configuration flexibility and easy serviceability. Over ten years of field-proven success demonstrates the advantage of deploying these products in your headends.

### ULTIMA Addressable Tap

The Electroline ULTIMA Addressable Tap is a subscriber management tool that is compatible with any cable billing system, providing a cost-effective solution for controlling subscriber services and reducing theft.

### CLEARPath<sup>TM</sup> Ingress Management

The Electroline CLEARPath<sup>TM</sup> solution is a scalable combination of intelligent headend equipment and field-deployed return path switches that provides highly efficient, comprehensive ingress management.

## Improve *Your Bottom Line*

with Electroline's Innovative Network Management Tools

# How to use this Guide

**Y**ou're holding in your hands the broadband industry's most complete and authoritative guide to companies that offer products and services to the industry. For well over a decade, *CED* magazine has published this Guide as an added value for being a loyal *CED* reader.

Ever since its inception, we've strived to make this Guide the most accurate, complete and useful tool for people who need information about the products and services that relate to their jobs. This year is no different. We've worked painstakingly to update listings, add new companies and delete old ones. We continue to make improvements to the "look and feel" of the Guide, with an eye toward making it easier to use and navigate.

The first section provides a comprehensive listing, in alphabetical order, of companies that serve the broadband market. Each listing includes the company name, address, telephone and fax numbers, Web site and e-mail addresses.

*The Guide is organized by specific product type and is further broken out by manufacturers, distributors and repair centers for each product category*

In the tabbed sections that follow, the Guide is organized by specific product type and is further broken out by manufacturers, distributors and repair centers for each product category, where applicable.

Of course, in this electronic age, you can also find this Guide on the Web at [www.CEDmagazine.com](http://www.CEDmagazine.com).

The Guide wouldn't be possible without the extraordinary efforts of the *CED* staff. We contacted each and every company listed in the Guide to get updated information. Companies that didn't respond to repeated efforts to contact them were dropped; however, if you know of any company that was overlooked or mistakenly deleted, please contact us: Buyers' Guide Editor, *CED* magazine, P.O. Box 266007, Highlands Ranch, CO 80163-6007; or fax new information to us at (303) 470-4890.

One final note: please be aware that many of the product, service and company names included in the Guide are registered trademarks, service marks, etc. For the sake of ease of use and overall readability, those notations have not been included.

 AML Wireless Networks designs, manufactures, installs and services a wide range of RF signal transmission systems. Since 1969, AML Wireless has been a leading supplier of wireless applications for networks carrying video, data and voice applications. The company's technology solutions are deployed in all of the large MSO networks in North America, many of the smaller MSO and PCO networks, and numerous international applications. The company's product line includes a complete line of analog and digital microwave radios with two-way capabilities, multiple frequency plans, point-to-point and point-to-multipoint applications, employing AML, T-1, E-1 or IP solutions. AML is also introducing a 5.8GHz wireless DOCSIS extension solution to enhance the Internet rollout plans of cable-based Internet providers.

ARRIS is a global communications technology  
 company which develops advanced cable tele-  
 phony solutions and delivers converged services  
 across the broadband local access network. ARRIS  
 is breaking the sight, sound and information bar-  
 riers with innovative broadband local access net-  
 works and high-speed data and telephony systems  
 for the delivery of voice, video and data to the  
 home and business. From the network to the sub-  
 scriber, ARRIS provides complete solutions that  
 add reliability and value.

Aurora Networks is a manufacturer of advanced  
optical transport systems for broadband networks.  
The company's technology and unique two-way  
digital architecture enables system operators to  
dynamically provision bandwidth and economically  
scale networks to increase capacity as needed.  
Aurora's equipment supports a variety of archi-  
tectures, including traditional HFC, next-genera-  
tion Passive HFC and FTTH networks.

Auspice provides cable operators with a real-time  
systems integration and operations automation  
software that automates support processes for  
broadband services, including: Provisioning; event-  
monitoring; correlation and root cause analysis;  
bandwidth utilization management; intelligent  
trouble-ticketing; proactive network health man-  
agement; customer service visibility portals and  
more. Deployed since 1999, Auspice's TLX plat-  
form and OpsLogic Solution Suite enables broad-  
band providers to automate their best NOC, cus-  
tomer care and field service practices, resulting in  
higher service assurance, revenue assurance and op-  
erating margins. Auspice delivers linearly scalable,  
easy-to-extend automation solutions.

PERSONNEL: Vin Bisceglia, CEO/Chair.; Jeff Binder, Pres.; Tom Jokerst, CTO; Conrad Clemson, Sr. VP Technical Operations; George Kajos, VP Engineering; Sean Rooney, VP North America Sales; Gregg Grigaitis, VP Customer Broadbus is a leading provider of carrier-class, next-generation video-on-demand (VOD) solutions for the cable television industry. Broadbus delivers a high-density, highly scalable and DRAM-based server built to support today's VOD and SVOD services, as well as the future demands of Television on Demand (TOD). The DRAM-based architecture enables Broadbus' B-1 Video Server to simultaneously ingest and stream massive amounts of video content—utilizing industry standard commodity components. Additionally, the B-1's decoupled design permits targeted configuration and independent scaling of storage and streaming.

## Confluent Photonics

**Confluent Photonics** .....(603) 893-4906  
 Fax: .....(603) 251-2432  
 E-mail: .....info@confluentphotonics.com  
 Web: .....www.confluentphotonics.com  
 5 Industrial Way, Salem, NH 03079  
 PERSONNEL: Nick Economou, CEO; Ian Turner,  
 Pres./COO; Grant Watkins, VP of Business  
 Development; Greg Cappiello, CTO; Kevin  
 McIntyre, VP of Engineering  
 Confluent Photonics offers cost-effective solutions  
 for relieving bottlenecks in cable TV optical-trans-  
 port. Ideally suited for increasing the bandwidth of  
 existing HFC networks, Confluent's fully passive,  
 exceptionally robust, outside plant DWDM solu-  
 tions are compatible with all existing network ar-  
 chitectures. Providing a cost-effective way to  
 achieve node splitting and return path aggregation,  
 these solutions are much less expensive than the  
 alternative of installing new fiber cable. In addition,  
 these solutions are quick and easy to install, enabling  
 the delivery of advanced services to both residen-  
 tial and business subscribers.

 Corning Cable Systems leads the way with solutions  
 that advance the network. Whether service  
 providers are deploying a fiber homerun architec-  
 ture, Passive Optical Network using couplers/splitters,  
 or a Wavelength Division Multiplexing archi-  
 tecture, Corning Cable Systems provides the  
 essential elements. To connect broadband's future  
 with tomorrow's demanding marketplace, partner  
 with Corning today.

PERSONNEL: Steve Fox, Pres.; Jan Fox, VP  
 Fox Electronics distributes products for more than 90 manufacturers of cable television and audio/video equipment and systems. The company's services include competitive pricing, system design assistance, and support for everything it sells. In addition, Fox Electronics is an OEM. Its products include local commercial insertion system troubleshooting test equipment, relay transport over audio, video AGC, and VBI line deletion. The company has a new QoIP commercial cue and relay/GPI transport system over IP.

**PERSONNEL:** Tom Searcy, Pres.  
 MagicBox Inc. manufactures character generators for cable, closed circuit, and satellite TV applications. Systems are used on PEG access channels, information channels, and advertising channels to generate revenue. Both the Avelin and VIP systems are IP addressable and easy to use. The Avelin plays video in a window, has dramatic transitions, four independent crawl regions, True Type font support, flexible scheduling, and MPEG playback support. Call or e-mail for free video.

MultiPower's True UPS power supplies allow broadband networks to upgrade to reliable, transfer-free powering. Confluent Power Processing technology was developed for power nodes with battery or generator backup; specifically, for networks deploying telephony and data services. Pole-mount and ground-mount cabinets supporting up to eight batteries, and specialized node cabinets are available. MultiPower distributes Sonnenschein-process Gel Batteries through more than 100 outlets nationwide. A unique line of non-standby power supplies is also available.

### PTL Test Equipment

**PTL Test Equipment Inc. ....(561) 747-3647**  
**Fax: .....(561) 575-4635**  
**E-mail: .....PTLTE@bellsouth.net**  
**Web: .....www.PTLTEST.com**  
**612 N. Orange Ave., Ste. D-10, Jupiter, FL 33458**  
**PERSONNEL:** Paul Legris, Pres.; David Chavez,  
 Sales/Mktg. Dir.; Kathy Legris, Office Mgr.;  
 Katherine Marzullo, Mktg. Mgr./Sales Asst.  
 PTL primarily buys-sells-leases-trades new and  
 refurbished test equipment of all brands and  
 models. Most items have been pre-owned by end-  
 users or were demo units from manufacturers.  
 Some items are new "overstock" products from end  
 users or manufacturers. All equipment is inspected,  
 repaired, and cosmetically refurbished (if neces-  
 sary). This equipment is then calibrated and guar-  
 anteed to meet or exceed original factory speci-  
 fications. PTL provides a warranty to assure all  
 equipment it sells is in sound condition and meets  
 customer expectations. Dependable equipment at  
 significant savings.

Scientific-Atlanta Inc. is a \$1.7 billion company  
 that's changing the way consumers interact with  
 their televisions and is a leading supplier of trans-  
 mission networks for broadband access to the home,  
 digital interactive subscriber systems for video, high-  
 speed Internet, voice-over-IP networks, and world-  
 wide customer service and support. Scientific-Atlanta  
 is applying over a half-century of innovation to to-  
 day's convergence of the PC and the TV and help-  
 ing to extend multimedia broadband applications to  
 new platforms via the set-top.

SeaChange International Inc. is a supplier of digital video systems. The company creates powerful server and software systems that manage, store and distribute professional quality digital video. SeaChange's products are based on a scalable, distributed software architecture and standard technology components to continually deliver improvements in digital video cost-performance. As a result, SeaChange enables broadband, broadcast, satellite and new media companies to streamline operations and reduce costs, allowing for expanded services, new applications and increased revenues. SeaChange is headquartered in Maynard, Mass. and has product development, support and sales offices throughout the world.

 10281 Renaude-LaPointe, Anjou, QC H1J 2T4, Canada

PERSONNEL: Daniel Babeux, GM; Julie Guimont, Mktg. Comm. Coord.

Sunrise Telecom Broadband is committed to meet demanding test and measurement needs. Whether testing requirements involve QAM digital video, DOCSIS cable modems, analog video, headend performance monitoring, remote troubleshooting, system sweep, or FCC proof of performance testing, look to Sunrise Telecom Broadband to provide a comprehensive selection of instrumentation that is keeping pace with today's evolving technologies. The company's solutions incorporate innovative test methods, intuitive user interfaces, and thorough product training.

## A-Zlistings

### Wireless Bypass

Wireless Bypass .....(603) 870-6275  
 Fax: .....(603) 870-6279  
 E-mail: .....sales@wireless-bypass.com  
 Web: .....www.wireless-bypass.com  
 43 Northwestern Dr., Salem, NH 03079

PERSONNEL: Katie Cook, Sales/Mktg.  
 The Wireless Bypass Wireless Line Extension (WLE) system is a two-way radio link used for wireless transport of DOCSIS payloads between the cable plant and difficult/expensive-to-reach commercial premises. The system consists of two transceivers: a plant-side device ("hub"), and a customer premise-side device ("CPE"). The system carries the entire DOCSIS payload, unchanged, upstream and downstream between the hub and the CPE. At the hub, the DOCSIS channel is modulated on to the radio carrier and the upstream signals are demodulated and injected back into the cable plant. At the CPE transceiver, the DOCSIS channel is converted to/from VHF, for distribution to and from cable modems.

# Get Down to Business

## with Commercial Services

Launch T1 services on HFC – with no outside plant changes  
BroadLAN™ Platform

Use existing spare fiber to deliver commercial services  
point to point  
Prisma® CWDM Media Converter Platform

Deliver TDM voice and data over a single fiber-based  
IP network  
Prisma IP™ Platform

In addition to passing millions of homes, today's HFC cable networks also pass many of the 7.2 million small and medium businesses (under 100 employees) across the US. With millions of potential commercial services customers so close to your cable system, you can "mine" more value from your existing network and capitalize on a golden business opportunity to increase revenue.

The need is there. Your HFC network is in place. We have the products and systems, plus a dedicated commercial services organization to help you add T1 and dedicated Internet access services that millions of businesses need – and are willing to pay for.

**Contact us today. We can show you how to get down to business and boost your revenue.**

Contemplate the  
**possibilities**  
of an all-digital on-demand world

The possibilities are virtually unlimited. With the ability to efficiently deliver more of what the customer wants – when they want it – an IP-based, all-digital, on-demand network has the potential to revolutionize the cable experience. As a result, operators can significantly strengthen customer relationships and increase lifetime customer value.

After spending years building, upgrading and extending HFC networks, cable operators face a world-altering opportunity with an equally sizeable challenge. Is it really possible to reach this IP-enabled future – with its promise of superior flexibility, scalability and operational efficiencies – while preserving what is already in place?

As a leading provider of digital headend, HFC and fiber-deep solutions, Harmonic has long anticipated the IP future. We provide products for greenfield IP applications as well as solutions for seamlessly integrating IP into legacy environments. This enables operators to continually harvest the best IP has to offer and, at the same time, maximize the return on their existing infrastructure, whether Harmonic-based or not.

In fact, our pioneering work in IP-enabled content-on-demand service delivery has earned Harmonic the coveted title of "biggest contributor to the future of content delivery" from a leading industry publication.

Call us or visit [harmonicinc.com/all-digital](http://harmonicinc.com/all-digital) to find out how we can turn possibilities into reality.

## New Equipment Rebuild Quote More Than Expected?

*MSOs are utilizing **CableServ Amplifier Upgrades®** as a solution to add revenue-generating bandwidth on channel-locked systems, but at a fraction of the cost of purchasing and installing new equipment.*

### **What is a CableServ Amplifier Upgrade®**

A CableServ Amplifier Upgrade® expands the capabilities of your existing GI/Motorola, C-COR, Philips, Scientific Atlanta and other Amplifiers by increasing the forward and return bandwidth while retaining amplifier spacing, and activating the return path utilizing CableServ's Hybrid Equipped Return Amplifier and Return Kits. Forward path bandwidth upgrades include 450 to 550, 550 to 625, 550 to 750 & 750 to 860 MHz.

### **Feel Comfortable with CableServ**

CableServ's core business is upgrading amplifiers. Over our ten years of engineering and employing amplifier upgrade solutions, we have developed an extensive inventory of tried and tested amplifier upgrade solutions. We are structured to deliver amplifier upgrades, armed with a skilled CATV team, state-of-the-art network analyzers, and a 40,000 square foot engineering and manufacturing facility.

**750 -> 860 MHz**

750 MHz Line Extender Upgraded to 860 MHz  
No Re-Spacing Required

**Call CableServ and ask for your CableServ Amplifier Upgrades®  
Introduction Package. 1-800-668-2033**

**CableServ Amplifier Upgrades®**  
**A Fraction of the Cost of a New Equipment Rebuild™**

# EMERGENCY BACKUP

## *Power On Demand*

When a power outage occurs and you need emergency backup power, Alpha offers the AlphaGen Portable DC Generator.

Alpha Technologies' portable generator is a convenient, easily transportable, lightweight solution for operators who need immediate backup power at critical locations. Generator quality reliability in a portable size package.

### AlphaGen™ Portable 3.0kW DC Generator

- ▶ Selectable 36/48 VDC output
- ▶ Super quiet operation
- ▶ Oversized gas tank

# TRILITHIC

Maintaining tomorrow's technologies demands more than today's familiar answers. For more than two decades, we have built our business and our customers' confidence by meeting measurement challenges through innovative engineering.

Trilithic's forward thinking has created the industry's most widely used leakage management equipment, the highest-speed return path maintenance systems and the first cost-effective return path testers for installers. Now, using DSP technology and virtual instrumentation, we're setting new industry benchmarks.

Our history of technical advancements is your assurance that when you are confronted with future testing demands, Trilithic will be ready to meet them.

# What's Most Important In BroadBand Real Estate?

# LOCATION, LOCATION, LOCATION.

## Introducing **ConQuest** Toneable Conduit™

*The Accurate, Reliable, Low-Cost Solution For  
Detecting and Locating Broadband Assets – Including  
All Dielectric Fiber Cables and Empty Conduit*

### FEATURES

- High strength 18 gauge copper clad steel tone wire
- Moisture resistant polymer coated tone wire
- Embedded in the wall of the HDPE conduit
- Internally reinforced HDPE wall

### BENEFITS

- Saves installation \$\$\$\$
- Accurately detectable over various depths and lengths
- Easy wire removal from reinforced wall
- Works with standard conduit connectors

## Picture Perfect

**When the job demands optimum picture clarity, professionals demand Arrow Insulated Staples.**

UV resistant insulators guard against impedance and assure long-lasting cable integrity. UL Listed insulated staples for the ARROW T59™ Staple Gun are available at electrical suppliers, home centers, and hardware stores where you will also find a full line of UL Listed non-insulated staples and guns.

You'll find  
our prices  
reasonable,  
our reasoning  
priceless.

Keeping track of all the satellite and fiber optic communications products out there is a full time job.

That's why so many people come to **DAWN**CO. They count on us for everything from satellite antennas, receivers, LNBs, and position controllers to fiber optic broadband links, satellite links and data links.

We offer the broadcast TV, cable TV, radio and educational fields high quality equipment at down-to-earth prices.

**DAWN**CO formerly known as Dawn Satellite.

But more than equipment, we offer expertise. We can examine your situation and your budget, and recommend exactly what you need. You save both time and money by making the best possible buying decision.

Call a **DAWN**CO expert with your questions by simply dialing **800.866.6969**. Use the same number for our free catalog, or find it all on the web at [www.DAWNCO.com](http://www.DAWNCO.com).

**DAWN**CO

Reasonable prices, priceless reasoning.

## CED presents the **ARCHIVED** online event of the year

The Cable Television & Broadband Expo 2004 is a virtual trade show in every sense of the word, with wide-ranging exhibits and a full conference program.

And you can visit it **FREE** for the next six months—  
as an interactive online archive.

No special software. Just your regular web browser. Our proven virtual trade show platform even works fine with a dial-up connection. Of course, it blazes over broadband!

All the new product information, demos, literature and white papers are still waiting for you in the exhibit hall booths. You can even e-mail your requests to company representatives with a click of the mouse.

It's everything you want in a trade show, but without the travel hassles, expense, long lines-or aching feet.

Every conference session—including the audience Q&A—is ready for your on-demand viewing...

- High-Speed Data—Are you headed for tiers, or tears?
- Voice Services—Putting Some Muscle on the Backbone
- Tomorrow's VOD Today
- Making Sense of the Home Networking Explosion
- Cable and the Consumer Electronics Industry
- Getting Active with Interactive TV
- Home Grown or Store Bought: How to Get into the VoIP Game
- Taking High-Speed Data to the Next Level: Content

Register and visit the show today at  
[www.cableandbroadbandexpo.com](http://www.cableandbroadbandexpo.com)

# ITs NOT TOO LATE!

If you missed the show—or any  
of it—visit the online archive.

# Expand your HSD Footprint

**And Get Your Share of the \$100 Billion Commercial Services Market**

Businesses, MDU's and vertical markets like hotels, airports and universities are all sources of new and incremental high-speed data revenue. Now, you can extend your

brand—and maximize the full potential of your broadband data network, easily and economically—with proven applications from ARRIS TeleWire Supply®.

## WI-FI/WLAN SOLUTIONS

Highly secure and reliable wireless networking products from Colubris Networks™ for WLAN, VPN and "Hot Spot" applications.

## MDU/HOTEL DATA NETWORKING

coaXmedia® allows you to provide high speed data access over existing in-building coaxial (TV) cable without expensive wiring upgrades.

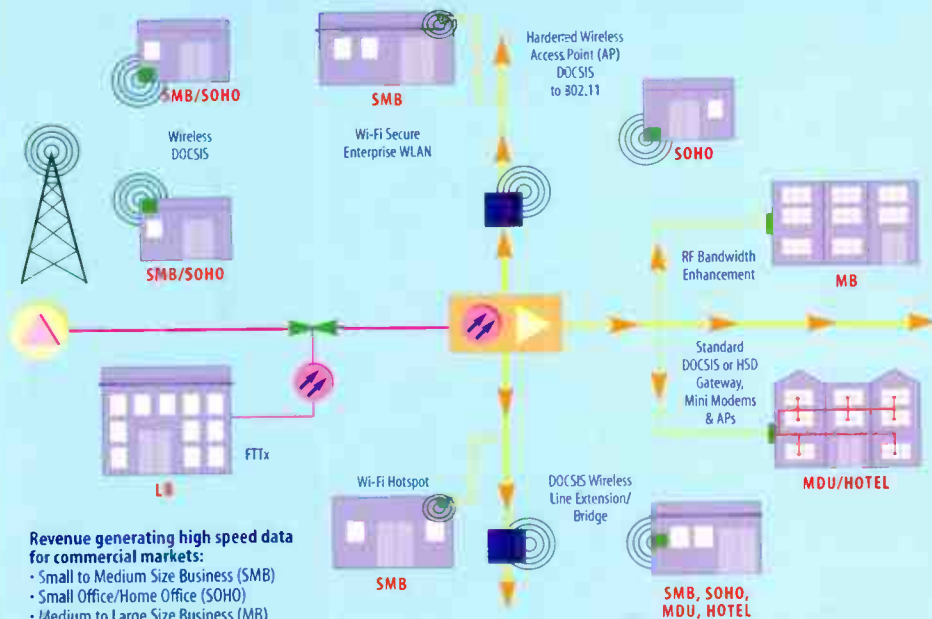

## WIRELESS DOCSIS® PLANT EXTENSION

Wireless DOCSIS plant extension technology from ARCWAVE enables you to easily and cost effectively extend your network into uncovered areas.

## Integrated Commercial Services Platform (ICSP)

Our Integrated Commercial Services Platform (ICSP) enables broadband operators to easily implement network solutions that are best suited to your unique applications.

By leveraging our access to multiple manufacturers and developers, we can provide creative solutions that maximize ROI potential for each opportunity using the most current technologies available.

Satisfaction is always in stock™

# When you're searching for reliable Signal-to-Noise ratios... ask the Masters.

## Performance that takes you to a higher place.

At Noise Com we're always hard at work creating state-of-the-art noise solutions to give you the repeatable measurements you're looking for. For example, our UFX-EbNo Series carrier-to-noise generators are known for their use of the accurate substitution calibration method. Now we've "raised the bar," again. Utilizing true RMS power measurement technology developed by Boonton Electronics, the new EbNo Series delivers performance rarely contemplated—up to 40 GHz!

## Put us to the test today!

There's no need to go to the ends of the earth to find the ultimate truth in noise testing equipment. When you need answers, ask the Masters of Noise™—Noise Com. For more information about our UFX-EbNo Series carrier-to-noise generators, please call us at 201-261-8797. For your C/N application notes, visit [www.noisecom.com/C/N](http://www.noisecom.com/C/N).
