Every school day since 1936, WLS has used its facilities to increase the educational opportunities of Midwest school children. In 30,000 classrooms in eight states, one million youngsters group around their radios daily and listen to "WLS School Time."

Of the schools tuning in, 75% are rural— 47% one-room schools, 28% village

"School Time" lessons in geography; music, health, and current events are designed to give rural children increased educational advantages. In its ten years, "School Time" has won approval from leading educators throughout the nation.

Inspiration and information for rural pupils fits naturally into the general pattern of WLS public service. Whether it be assistance to an individual, aid to a community, or service to the growing family of Midwest farm listeners, WLS responds promptly, effectively, continuously.

People of Midwest America depend upon WLS for entertainment, for such business helps as the market reports, for fulfillment of their spiritual and educational needs. They have confidence in us . . . a confidence built up in 21 years of service to better living.

The WLS Educational Department is under the direction of Arthur C. Page, Associate Editor of Prairie Farmer and Farm Program Director of WLS. A former rural teacher, Virginia Pickens, B.A., University of Syracuse, and B.Ed., New York State Teachers College, conducts "WLS School Time."

Time to RE-CONVERT

Your Sales Plan for New England

OLD selling habits need reconverting, too . . . a change of pace to meet a changed economy and new buying habits.

Effective radio selling isn't based on the hit-ormiss method. Today, to effectively SELL New England requires the use of a medium which enjoys the greatest local acceptance.

The Yankee Network via its locally accepted stations thoroughly covers these New England buying centers. Each of YANKEE'S 23 hometown stations hits the spot where it does the most good.

THAT REPORTED impending promotion of FCC Chairman Paul A. Porter to White House as assistant to President Truman can be stricken from the records. It was in cards and discussed in highest places, but concluded finally that it was more important to retain him in highly important FCC post, particularly during critical licensing and expansion period. Attractive outside offers may have set off speculation. Chances are he will remain at FCC until present work load is fully under control—which will entail at least a year.

WHEN POWEL CROSLEY Jr., ex-owner of WLW Cincinnati and Crosley Corp., begins promoting his new midget car early next year, he'll make other motor manufacturers take notice. Ralph H. Jones Co., Cincinnati, headed by C. M. (Chip) Robertson Jr., is Crosley Motors agency with substantial record not only in network but in spot. Radio expected to do bulk of exploitation job.

KFBB GREAT FALLS, Mont., CBS regional outlet, will change hands soon. F. A. Buttrey, present owner and chain food store operator, has entered tentative contract to sell to Fred Birch, head of building construction company and civic leader, for slightly under \$300,000. Papers now being drawn for FCC.

MUTUAL will sign up with NAB shortly. So will stockholder stations such as WOR, WGN and Yaukee. ABC also indicates interest. CBS and NBC already are members. Network fees may be reduced. Rub is whether network members of board will be continued.

PLENTY of action indicated at MBS for 1946. Well-heeled with 25% budget increase for programs and personnel given him by board earlier in month, President Edgar Kobak is shooting for next year as network's biggest expansion and development. Next board meeting will be March 5-6 when Mr. Kobak will present plans for reorganization, probably combination of old-line and cooperative operation with no owned outlets.

DON'T LOOK for appointment of NAB's new labor relations director until early next year. It's likely proposition will be considered by NAB board at its Jan. 3-4 meeting in Los Angeles, at which pattern will be set and employer-employe relations committee headed by John Elmer, WCBM Baltimore, can move forward.

LOOKS LIKE NAB convention, slated for "early spring", is indefinitely postponed again with prospects indicating nothing before fall. ODT still doesn't want big conventions, with GI travel pressure still on and hotels generally can't accommodate NAB's 1200 minimum requirements. New Orleans had nod, but NAB Secretary C. E. Arney Jr. can't get to first base on accommodations. If no convention, at (Continued on page 102)

Upcoming

Dec. 17-18: NAB Code Committee, Palmer House, Chicago.

Dec. 20: Transfer of KQW San Jose, Cal. to CBS, before FCC. Room 6121 New Post Office Bldg., Washington, D. C., 10:30 a.m.

Dec. 28: NAB FM Executive Committee, Palmer House, Chicago.

Jan. 3-4: NAB Board of Directors, Roosevelt Hotel, Hollywood.

Jan. 30: RMA Board of Directors, Stevens Hotel, Chicago.

Bulletins

WAR and Navy departments have sent a communication to Budget Bureau asking that Foreign Broadcast Intelligence Service of the FCC be transferred to the War Dept. as of Jan. 1 and that FCC continue the operation until that time. Commission ordered service liquidated as of Dec. 13 after House refused to grant necessary appropriations. Actual monitoring operations ceased Dec. 5.

FRIDAY afternoon meeting of representatives of Western Electric Co. management with those of the Western Electric Employes Assn. will be resumed this afternoon (Dec. 17) at WE headquarters in New York. Union's members have authorized a strike if their demands for a 20% increase are not met. See earlier stery, page 94.

FCC QUESTIONED CLOSELY

MEMBERS of House Appropriations Subcommittee on Independent Offices understood to have questioned FCC delegation closely last week when Commission appeared in executive session to support budget request of \$6,000,000 for fiscal year ending June 30, 1947 [Broad-CASTING, Dec. 3]. Entire Commission headed by Chairman Paul A. Porter, was closeted with Congressmen in all-day session. Indications were economic-minded subcommittee would recommend the \$6,000,000 figure be pared.

Standard Stations

THE NUMBER of standard commercial stations authorized in U. S. passed the 1,000 mark Friday when the FCC granted eight construction permits for new stations.

Commission actions brought to 40 number of grants made since resumption of normal licensing operations Oct. 8. Then there were 961 commercial stations; total now is 1,001. However, previous grants included four in two small communities which could hardly support more than one station each [BROADCASTING, Dec. 3]. Last week two more grants were made for stations in Brawley, Cal., a town of 11,718 population.

Outstanding among actions were three involving use of clear channels. A construction permit was issued to KEVR Seattle, operating on 1090 kc, to increase power from 250 w

Business Briefly

KNOX DROPS NEBBS ● Knox Co., Los Angeles (Cystex) will drop The Nebbs on Mutual 4:30-5 p.m. Sunday following Jan. 6 broadcast. Substitute not announced but company will continue sponsorship of Sunday afternoon 4-5 hour on network. First half-hour is occupied by Murder Is My Hobby for Mendaco. Agency, Raymond R. Morgan Co., Hollywood.

STERLING SHIFT • Sterling Drug, New York, transfers Double Danderine hair tonic from Sterling Products Division to R. L. Watkins Co. division, effective Jan. 1. Advertising for product in 1946 includes two of Stella Dallas programs on 137 NBC stations, Momday through Friday 4:15-4:30 p.m. Agency, Dancer, Fitzgerald & Sample, New York.

FRIGIDAIRE ON CBS ● Frigidaire Division General Motors Corp., Dayton, Jan. 13 starts for 52 weeks *Frigidaire Hollywood Star Time Theater* on full CBS network, Sun. 2:30-3 p.m. Agency, Foote, Cone & Belding, N. Y.

DIGEST FOR HALL ● Hall Bros., Kansas City (Hallmark greeting cards), Jan. 13 starts for 52 weeks Readers Digest-Radio Edition on full CBS network, Sun. 2-2:30 p.m. Agency, Foote, Cone & Belding, N. Y.

SMELLOVISION

DEVICE to transmit odors in synchronization with television broadcasts has been developed by Hans E. Laube, Swiss engineer-chemist who has experimented with synchronizing smells with motion pictures. Details remain secret, Mr. Laube revealing only that it works on electronic principles. Smell transmitter, he said, is operated by one man in television broadcast studio. Smell receivers which are added to each television receiving set are capable, he said, of producing more than 2,000 different aromas.

LOOK TO NASHVILLE...

Manufacturers and retailers looking toward postwar prospects in the South have their eyes on Nashville . . . for Nashville has set the pace for the South with four years of record-breaking gains in population, income and retail sales. It is Tennessee's only A-1 city, and one of sixteen A-1 cities in the nation. The rich Nashville market area, with over a million prosperous buyers, is covered adequately and economically by WSIX—Nashville's outlet for both the American and Mutual networks . . . We will be glad to furnish full particulars on request. Write us—today!

WSIX offers:

- Top shows of both American and Mutual networks which guarantee an unusual share of the radio audience in this area.
- 2. A powerful signal at low frequency—your assurance of a wide coverage at a very low cost per radio listener.

Add it all up—entertainment, coverage and reasonable rates
—WSIX has what it takes to put across your sales message.

SPEEDY is the word for the comeback of WCNC Elizabeth City, N. C., following the fire which completely destroved the transmitter house and equipment Nov. 16. On the morning of Dec. 6 station was back on the air. While off the air, a new transmitter house was built and installed, a new console installed, and other technical equipment given a complete going over. Three of the days were spent waiting for FCC permission to resume operation. Edd Harris, manager. pushed the work along, aided by Grether Bros. of Norfolk, and C. Ross Askey, WCNC chief engineer.

Lt. Stapleton (l) interviews Capt. Lillyman

to raise an American flag over conquered Tokyo, and Capt. Frank Lillyman, reputedly first American to land in Europe on D-Day. They interviewed each other.

Others from the city to broadcast on the show were Brig. Gen. LeGrand A. Diller, public relations officer with Gen. MacArthur since 1941; Vadeboncoeur, WSYR commentator, who is said to have first used the expression, "Remember Pearl Harbor"; Gen. Pedro Del-Valle, Marine Corps general who commanded the artillery at Pearl Harbor; and several Syracusans at Pearl Harbor interviewed by NBC's Jim Wahl, who was at Pearl when the base was attacked.

Sellers of Sales

ACK of all trades, master of many is a thumb-nail description of Beatrice Gumbinner, radio head of Lawrence C. Gumbinner Advertising Agency, New York.

A fourth generation New Yorker, Bea was born in the city in 1915. She attended Mrs. Wharton's

She attended Mrs. finishing school for a year and a half, then left because she didn't like it and joined New York U. for a half year.

As a youngster, when other children played at being nurses or doctors, Bea pretended she was an advertising executive. She grew up to see her childhood dreams come true.

When she left school in 1934 she joined her brother's advertising agency as "assistant to the

office boy." Eventually, she worked up to the position of stenographer. She left the agency for two years but couldn't stay away and returned to become assistant to Harry Deutsch, then radio director of the agency. In 1939 when he left the agency, Bea took over and became and still is radio head. Her

duties in that position are many and varied. She buys radio time for the agency's accounts. She does most of the commercial writing by herself, including radio scripts, as well as spot announcements. She personally services the clients on detailed campaigns.

detailed campaigns.

Miss Gumbinner at present is

handling radio for

handling radio for Norwich Pharmacal Co., Lyons Cigarettes and "Puppies." the agency, she reveals, is expecting several more accounts to use radio in 1946.

Her hobbies include horse-back riding and dogs. She owns a smooth haired terrier called Boy. He is 10 years old and has been with her since he was seven weeks old. Knitting, too, occupies some of her spare time. During

the war she knitted countless sweaters and socks for soldiers. She also knits her own stunning tailored suits.

She is a member of the Radio Executives Club of New York and the Tumble-weed Riding Club in Bayside.

BEATRICE

Broadway Hosiery Shops Prove It!

Broadway Hosiery Shops, whose modernly appointed stores are located throughout Northern New Jersey, must have <u>complete</u> coverage in America's fourth largest market. So, in August, 1929, these famous shops bought six 15-minute, livetalent programs per week over WAAT.

For SIXTEEN years "The Broadwayites", Vocalists and Orchestra, have aired their smart interpretations of current musical "hits" in 5,012 consecutive programs! And now, having just renewed for the 17th uninterrupted year of broadcasting over New Jersey's First Station, The Broadway Shops continue to delight hundreds of thousands of listeners with 6-half-hour programs every week, because they know:

WAAT delivers
more listeners per dollar
in America's 4[™] Largest Market*
than any other station—
including all 50,000 watters!

*Do you realize this market contains over 3½ million people; more than these 14 cities combined: Kansas City, Indianapolis, Rochester, Denver, Atlanta, Toledo, Omaha, Syracuse, Richmond, Hartford, Des Moines, Spokane, Fort Wayne.

Free & Peters since September, 1935

Bless our souls—it's

A. Leo Bownan!

One of the things we have always aimed at here at F&P is the acquisition of men whose general business experience would qualify them to understand and really assist in the problems of business men. So when Leo Bowman decided he wanted to join up with F&P, we grabbed him (and his business experience) for our Chicago Office, where he served two years, before we sent him back to his home town as Manager of our San Francisco* Office.

That's a typical example of the reason why all of our top-notch men are more than walking rate-books. Among us, we share many years of varied experience in radio, advertising, financial organizations, newspapers, utilities, department stores, automotive industries, etc., etc., etc. When you ask us for an opinion or some information on almost any problem — or about any industry — we can usually get a more or less expert answer for you from our own organization.

Free & Peters believes that the best contact the radio industry can maintain with you agencies and advertisers is to offer you the daily services of the best, most experienced, most capable men obtainable. That's the way we work in this group of pioneer radio-station representatives.

RCA Fires Blast at Color Television

Columbia Counters Claims Made By Sarnoff

By BRUCE ROBERTSON

RCA-NBC AND CBS, who don't see eye-to-eye on television, have lowered their siege guns to point blank range and are fighting in the open now.

Last week, in a presentation that was quietly planned behind the scenes, RCA took a group of selected guests to Princeton, N. J. There engineers of the manufacturing company demonstrated color

Other important stories concerning telecasting may be found on pages: 22, 26, 30, 82, 99.

television on the mechanical principle and improved black-and-white video on the electronic principle. They concluded that black and white is ready for the home—that color is five years away.

Kesten Counters

Paul W. Kesten, CBS executive vice president, who did not attend the demonstration, countered from New York immediately with: "The demonstration is a splendid answer to the Columbia challenge of April 1944 that all manufacturers focus their technical skills on perfecting color television. We are delighted to know that one of the country's big manufacturers has gone so far toward color television in the high frequencies."

Of RCA's five year estimate, Mr. Kesten commented, "That is a very safe estimate. It is from three to four years longer than we believe it will take."

RCA's move, despite protestations by Brig. Gen. David L. Sarnoff that he did not wish to engage in an altercation with those who believed color television would come "this evening or tomorrow," previously was intended to answer the CBS contentions that the network had experimented successfully with color video in high frequencies.

The RCA demonstration of color at Princeton was conducted in the high frequencies. It was conducted on the mechanical principle, using spinning filters of the basic hues. In these respects, it compared with the demonstrations heretofore presented by CBS. RCA used live tal-

ent. Most CBS demonstrations have employed slides or film.

What CBS will do to counter the RCA barrage may be known within two weeks, when the former has scheduled its first public demonstration of the discoveries it announced before the FCC in October. [Broadcasting, Oct. 15].

Both RCA demonstrations were conducted by beamed radio, not by line.

Transmissions of black and white were made from WNBT New York, NBC's station atop the Empire State Bldg., to Princeton Inn, a distance of 47 miles. The color video was transmitted from RCA Laboratories to the Inn, two and one-half miles.

Stereoscopic pictures in color were introduced during the demonstration. The three-dimensional effect was attained by use of special polarized camera filters with spectators viewing the images through polarized glasses. Dramatic effects employed to highlight the three dimensional feature included pictures of cigarette smoke floating toward the camera lens, creating the illusion at the receiving end that it was drifting into the room.

The televised pictures in black

Button, Button

RCA's President Sarnoff in addressing guests at the Princeton demonstration compared color in relation to video with buttons added to a coat. He agreed that the combination makes a better product, but added, "Only those in the button business think that they've made a new suit of clothes by the addition."

and white were brilliant enough to be seen in a fully lighted room. RCA engineers said this advance was made possible through development of improved Kinescopes. Black and white images were reproduced on screens as large as a newspaper page and, according to observers, were as faithful in reproduction as present-day motion pictures.

The demonstration, conducted by Dr. E. W. Engstrom, director of research at the Laboratories, showed the differences between prewar and present video reception. A pre-war receiver equipped with a 12-inch tube and a mirror top

was placed beside one of the new receivers possessing the wartime-improved tube. As lights were brightened in the room, the post-war receiver continued to show a picture with high definition and clarity; the pre-war receiver's picture darkened and became indistinct.

Most vivid pictures were produced on the direct viewing models.

Sarnoff Speaks

Addressing the assembled guests att the demonstration, Gen. Sarnoff, president of RCA, said:

"Our research men have built a practical all-electronic television system for the transmission and reception of excellent pictures in black and white. There is every reason why television should go ahead as a service to the public."

He pointed out that the FCC had allocated frequencies for commercial television. He said further technical advances in the art would be forthcoming from the laboratories, but asserted that to await those developments would be denying the art to the American public now.

In this observation, of course, he (Continued on page 101)

U.S. May Seek Treaty at NARBA Parley

Meet Takes On Added Importance as Cuba Demands Changes

By SOL TAISHOFF

A FULL DRESS "treaty conference" of North American nations, to consider revision of the so-called "Havana Treaty," controlling standard broadcast allocations among the North American nations, is possible in Washington in early January, it was learned authoritatively last week.

Originally planned as an "engineering" session, to consider demands of Cuba for additional standard band facilities, the projected conference may take on full diplomatic status, in view of the expiration of the Havana Treaty on March 29 under its own terms. Tentatively, the conference—likely to run two weeks—is scheduled for the first week in January. Such a proposal has been made telegraphically by the State Dept. to the signatory nations—Canada,

Mexico, Cuba, Haiti. Dominican Republic, Newfoundland and the Bahamas.

Last Friday the FCC informally urged the State Department to retain the conference on an "interim agreement" level, with any exceptions to the five-year-old treaty to be accomplished through diplomatic exchanges. This would obviate the need of Senate ratification and would hold only until a formal conference is held. This was proposed. it was learned, on the ground that insufficient time remains to prepare for a full-scale treaty revision by early January even if reduced to minimum changes. At the State Dept. it was said final determination as to whether a new treaty or an interim agreement would be sought will depend upon developments this week.

Only Canada Has Replied

Thus far, only Canada has replied and has agreed to the early January date. Because Cuba was instrumental in forcing the original engineering conference, having

made its demands at the Third Inter-American Radio Conference in Rio de Janeiro last September, it was expected it promptly would accede to the suggested date. Whether Mexico would agree to such short notice appeared questionable, but State Dept. officials are hopeful the other nations will accept promptly.

The Havana Treaty became effective on March 29, 1941 for a fiveyear period. It resulted in the shifting of approximately 800 of the some 900 standard stations then on the air in the United States and provided for substantially increased clear and duplicated facilities for Canada, Mexico and Cuba.

Acquiescence to the Cuban demands would result in serious complications to standard broadcast service in the United States and possibly in Canada and Mexico, engineers pointed out. Use of directional antennas would be entailed in virtually every instance, but it was recalled that following the 1941 reallocation necessitated by the Havana Treaty, a number of

(Continued on page 100)

LaGuardia Praises Radio, Hits Press

Mayor Tells People They Can Rely On Newscasts

By EDWIN H. JAMES

THE SPECTER of a pudgy forefinger waggling in front of its face haunted the New York press last week after Mayor Fiorello H. La-Guardia, long-time angry critic of newspaper policies, gave tit-fortat to four newspaper and magazine writers who baited him Dec. 7 on Mutual's Meet the Press.

Scarcely three questions had been fired at the Mayor when newspapermen listening in knew by the trajectory of his replies that Radiophile LaGuardia's pouting eyes were looking through sights which were zeroed in on his favorite target. Radiomen comfortably sat back to hear him larrup the press, praise radio.

Lawrence E. Spivak, editor of the American Mercury, drew the Mayor's first fire, which ricochetted toward New York publishers. Asked Mr. Spivak: "... you seem to have put the fear of God into the City Hall reporters and their editors... Can you explain why?"
"Oh, I don't think I put the fear
of God into the reporters," said
the Mayor. "Their publishers did
that."

The Mayor's complaint: Somewhere between his office and the printing press stories have become distorted. "I give the facts straight, and they (reporters) get it straight, and they report it straight, but when I read it in the papers it isn't that way."

Bridled Dorothy Thompson, grayhaired omniscience of the column world: ".. the idea that the publisher comes down and looks at every newspaper story and slants it... It's nonsense. It's slanted by the reporter, if it's slanted at all."

"That," said the Mayor, "hasn't been my experience." Columnist Thompson stood her ground. "I'll tell you how I know," Mr. LaGuardia continued. "I know what I told the reporters. I know that the reporters have reported it accurately, and I happen to know the views of the publishers of the papers."

The explanation, Miss Thompson said, did not satisfy her, but before she could pursue the point, Tex McCreary, onetime New York Mirror staffman now on terminal leave

as a lieutenant colonel in Army public relations, interposed. "Have you ever been misquoted?" he asked.

The Mayor's affirmative was strong.

"When?" asked Mr. McCreary. The Mayor's answer was this time a wild shot: "Oh, yesterday and maybe tomorrow morning."

Talk swung then to the Mayor's understanding of the responsibilities of a free press. Said he: "A free press must be a truthful press. I (have) said that a democracy cannot survive without a free press... that an owner hasn't the right to use the news columns in order to inject his particular views on any particular issue or subject."

From PM's managing editor, John Lewis, came the next poser: How can the people protect themselves against "publishers who use freedom of the press as freedom of falsehoods?"

"Very elementary, Doctor Watson," cracked the Mayor. "Not buy their papers."

"Yes," said Mr. Lewis, "but a lot of us are like Will Rogers. All we know is what we read in the papers; so how do we know what the truth is?"

"Listen to the radio," said the

Newspaperman McCreary was not sure the truth could be found on the air. Radio, he said, is "at the mercy of a politically appointed Federal commission." What he wanted to know was: Could a system operating under control of such a commission offer better guarantee of freedom of expressing an idea than a competitive press?

"Yes," said the Mayor, "because after all the commission is the creature of law, and law is enacted by the representatives of the people in Congress . . And the fact remains, sir, that if I get up and make a statement—attack any individual — that radio commission will force that station to give an equal time . . . to an opponent. If a newspaper makes a false statement with a great big eight-column headline, and it's all wrong, you'll find about 10 days later, a little

Sawyer Resigning

CHARLES SAWYER, U. S. Ambassador to Belgium, announced Thursday after a conference with President Truman that he would resign shortly to resume private law practice in Cincinnati [CLOSED CIRCUIT, Nov. 26]. Mr. Sawyer, who took the diplomatic post in 1944, operates WING Dayton and WIZE Springfield, O., as well as several newspapers in Ohio. He formerly was vice president and general counsel of the Crosley Corp., Cincinnati, and was Democratic National Committeeman from Ohio for several years.

bit of a column: 'We're very sorry to say that we were in error.' And nobody can find it."

Next question was: Will Mr. La-Guardia give opponents a chance to answer whatever charges he makes on his *Liberty*-sponsored ABC show which begins Jan. 6?

"Why, of course," he said.
"On your program?" asked An-

nouncer Bill Slater.
"Why, of course."

Mr. Lewis wanted to know if the Mayor thought that radio stations.

—which "aren't supposed to have editorial policies"—should adopt them

"I don't know about a station having an editorial policy," said the Mayor. "I know one network that's going to have expression of opinion of one individual after Jan. 1."

"And that will be free expression, will it, Mayor?" asked Mr. Lewis. "I'll tell the world it will," said the Mayor.

NAB Not to Boost Membership Dues

EMBARKED on a program greatly expanding its service to broadcast stations, NAB will be able to operate next year without increasing dues to be paid by the membership.

This fact developed during the Dec. 13-14 meeting of the association's finance committee at Washington headquarters. The committee will recommend to the board of directors that present dues be continued in 1946.

Operating budget of the NAB will be considerably increased, should the board accept committee recommendations. It will total about \$650,000 for 1946. The association was able to operate this year with a surplus despite opening of the expansion program Oct. 1 with naming of Judge Justin Miller as president and A. D. Willard Jr. as executive vice-president. The board will meet Jan. 3-4 in Los Angeles.

New services already in operation include the expanded Department of Broadcast Advertising under Frank E. Pellegrin. J. Allen Brown, former general manager of WFOY St. Augustine, Fla., is serving small market stations and Hugh M. Higgins, recently of Army Air Forces, is in charge of sales promotion. A third assistant in charge of retail advertising is to be appointed in the near future.

New activities are planned by the Dept. of Public Relations, which is under direction of Edward M. Kirby, public relations counsel retained by the NAB. The department will be expanded in Washington and New York to provide more extensive facilities for

(Continued on page 86)

MBS SCHEDULES 70,000 MI. HOOKUP

STANDARD OIL Co. (N. J.) and associated companies will sponsor a Christmas morning program of conversations between American servicemen who are still abroad and their families at home. Program will be broadcast on Mutual 10:05-11 a.m. Christmas morning. Two-way conversations between members of our armed forces in England, France, Germany, Hawaii, Guam, Philippines and Japan and their families in various points in the U. S. will make up the program, involving some 70,000 miles

of wire and radio hookups, believed to be the most extensive special events program ever broadcast. More than 60 radio engineers will be used to make the various necessary connections.

Bill Slater will m.c. on the program. The sponsor's commercials will be kept free of sales talk and will be completely institutional in tone. Marschalk & Pratt, New York agency which handles the Esso Reporter broadcasts, is in charge of arrangements on this Christmas day broadcast.

"He's gone surplus property nuts! He just can't resist a bargain!"

Investment Required for FM Surveyed

FCC Finds Equipment Costs Less Than In 1944

(Table of Costs Page 86)
EQUIPMENT for an FM station can be purchased at prices ranging from \$6,420 to \$85,110, depending on power of station, and can be delivered by manufacturers in five to fourteen months from date of order, according to a survey last week by the FCC.

Results of the survey were released simultaneously by Sen. Glen H. Taylor (D-Ida.) who requested the study be made for the Senate Small Business Committee. Sen. Taylor declared the findings should encourage small businessmen to enter FM and urged prospective applicants to file for licenses while frequencies are still available.

Costs Less Than Realized

"The survey reveals," he said, "that the cost of equipping a station is far less than most people realize, and that radio broadcasting is well within the reach of small business enterprise, farm groups, cooperatives, labor unions, and educational institutions."

Pointing out that manufacturers' estimates for cost of principal equipment for a 250 w station average less than \$10,000, to which must be added such expenses as real estate, construction and studio furniture before a station can operate, Sen. Taylor said, "this low cost for the static-free, high fidelity FM transmitting equip-

ELLIOTT ROOSEVELT VP OF NEW STATION

CALL LETTERS will be assigned shortly to a new 250-w station on 1450 kc, granted Dec. 6 by the FCC to Camden (Ark.) Radio Inc. [BROADCASTING, Dec. 10], in which Elliott Roosevelt, son of the late President, is a 5% stockholder and vice president.

W. E. Hussman, former business manager of Texarkana Newspapers Inc., the News-Times Publishing Co., El Dorado, Ark., and the New Era, Hot Springs, and vice president of Arkansas Dailies Inc., Memphis advertising agency, is president and 45% stockholder of the Camden firm. B. T. Fooks, head of a soft drink manufacturing firm bearing his name, a 20% holder, also a vice president. Leon Wilson, formerly of the News-Times Publishing Co. and Southern Newspapers Inc., Hot Springs, is 7% owner and director-treasurer; Lamar Smead, Camden attorney, owns 10% and is secretary. Other stockholders are Dr. R. R. Dobbins, local physician, 3%, and J. D. Reynolds, oil man, 10%.

Mr. Wilson said firm incorporated with \$10,000 in stock and that Mr. Roosevelt had paid his subscription in full.

ment means that it is possible for ownership in the FM band to be widely dispersed.

"Nothing would be more unhealthy for the future of free speech and open and fair discussion of public issues than to allow the control of this new FM broadcasting to become concentrated in the hands of a few people," he continued, expressing hope that many newcomers would be attracted to FM to provide diversified service to the country.

In addition to the major items of equipment, Sen. Taylor listed the following additional factors

COST of equipping FM stations, surveyed by FCC, was reported last week to be less than popularly believed and Well within reach of small business, farm, labor and other groups.

which must be considered in planning a station: real estate, studio and transmitter furnishings, tower construction, and engineer and attorney fees.

Based on reports received last month from principal equipment makers, the survey reveals that the limiting time factor in establishing an FM station is the transmitter delivery date. Initial deliveries on old orders will be made between January and August but an order for a 250 w transmitter placed last month cannot be filled until June. it was shown.

Principal Items Cheaper

Principal items of equipment for operating a station in the new band, the Commission pointed out, "will cost substantially less even under postwar conditions than the estimates made for such equipment in the old 42-50 mc band in 1944."

Estimated costs for the six major items of broadcast equipment for a 250 w station ranged from a minimum of \$6,420 to a maximum of \$14,500, or a median of \$9,508. The items include transmitter, antenna (excluding supporting structures), control console, remote pickup (wire lines), turntable and monitor. Median estimate for a 1 kw station is \$14,758, for 3 kw \$17,858, for 10 kw \$27.308. and for 50 kw \$80,558.

Estimated costs of a 250 w transmitter ranged from a low of \$3,800 to a high of \$5,940, or a median of \$4.500. For a 1 kw transmitter the median is \$9,200, for 3 kw \$12.300. for 10 kw \$21,750, and for 50 kw \$75,000.

The median estimate for three selected items of broadcast equipment (transmitter, antenna and control console) for 1 kw station was given by the FCC survey as \$12,700, as compared with the average estimate of General Electric Co. in 1944 for the same items of \$20,000. On a 3 kw station the current median estimate is \$16,350 as compared to the 1944 average cost of \$26,250; on 10 kw \$25,800 compared with the 1944 price of \$30,-000; and on 50 kw \$79,050 compared to \$102,000.

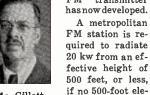

The Commission survey showed considerable variation in delivery dates given by transmitter manufacturers. Only two were able to make delivery on November orders for 250 w units before next June while a third cannot fill orders before early 1947.

FCC Requirements Create 'Real Need' For 5-KW FM Transmitter, Gillett Says a reasonable transmission line effi-

By GLENN D. GILLETT Consulting Radio Engineer

DUE especially to the FCC's rules for metropolitan stations a real

need for a 5-kw FM transmitter has now developed.

Mr. Gillett

vation is available. In much of the United States it will be difficult to find sites where an effective antenna elevation of more than 500 feet is available.

The average maximum antenna gain proposed for turnstile antennas commercially available is about 5. Usually, the transmission line efficiency between the antenna and the transmitter will run in the neighborhood of 80%. Thus a transmitter power of 5 kw is required. With this antenna gain and ciency an effective antenna height of about 800 feet must be securel before the FCC requirements for a metropolitan FM station can be met with a 3-kw transmitter.

A 5-kw FM transmitter, with a permissible overload capacity of 10%, would give a maximum available power of 5.5 kw. This value is the geometric minimum between the 3 and 10-kw transmitter ratings now offered commercially.

A 3-kw transmitter will cost in the neighborhood of \$12,500 and a 10-kw transmitter about \$22,500. On this basis a 5-kw should cost about \$16.500.

The increased cost of operating a 10-kw transmitter as compared to a 3-kw transmitter will run between \$5,000 and \$10,000 per year, depending on the hours operated; whereas a 5-kw transmitter should cost on the same basis only between \$2,000 and \$4,000 more a year to operate than a 3-kw.

If we assume that half the metropolitan FM stations allocated

Walter J. Neff

MR. NEFF

WALTER J. NEFF, partner in Neff-Rogow, New York advertising agency, until last November, and former sales manager of WOR New York, died suddenly Dec. 9 on his farm at East Otis, Mass., of a heart attack.

Mr. Neff had disposed of his interest in Neff-Rogow to his associate, William Rogow, former WOR salesman, last November and had retired to his farm, Neff Acres, in the Berkshires. The funeral was held last Wednesday at Lee, Mass.

One of the best-known figures on the commercial side of radio, Mr. Neff was a native of Detroit. He had started in radio in 1922 as a singer with the pioneer WWJ Detroit. In 1924 he joined WAHG, now WABC New York, as broadcast director and in 1926, with the late Tex Rickard, he launched WMSG as official mouthpiece of Madison Square Garden. Before joining WOR in 1928 as an announcer, he was program director of WMCA New York. He became head of WOR sales in 1934.

Neff-Rogow was launched in 1936 by the two WOR executives. The agency specialized largely in radio. Among its top accounts are Abraham & Straus, Brooklyn; J. W. Beardsley's Sons, Newark; W. Beattseys Stores, New York; Filtrex Co., Elizabeth, N. J.; Joseph Martinson & Co., New York; Melville Shoe Corp., New York; Sears Roebuck & Co. Boston; Young's Hat. Stores, New York.

Mr. Neff is survived by his wife, Claire, who was his secretary while at WOR, and a son.

in Area One, and that there are as many more in the rest of the United States who could effect such savings by the use of a 5-kw transmitter instead of a 10, the total saving would amount to about three-quarters of a million dollars initially, and as much more each year thereafter. That ain't hay.

Time-Change Headache Is Studied

Affiliates of NBC, ABC Launch Separate Campaigns

NATIONWIDE attack on the daylight saving time headache, scheduled to recur next April when a large number of cities will advance time an hour, began to take shape last week as two unconnected campaigns got under way.

First step was agreement of American affiliates in District 2 of the network, meeting in Detroit, that the problem must be approached from a national viewpoint. They decided to start contacting other network affiliates to bring them into a coordinated drive.

Second action was circulation of a roundup questionnaire on the subject by a group of NBC affiliates. This questionnaire has been sent to all network affiliatess

National Basis

The American affiliate group-Network Stations Planning & Advisory Committee-met at the call of H. Allen Campbell, WXYZ Detroit, the chairman. Daylight time occupied a good share of the session, culminating in the suggestion that Mark Woods, American president, meet with other network heads to give the affiliates the benefit of their combined thinking on the subject. Mr. Woods attended the meeting, along with other network executives.

The American stations felt that one big network affiliate group, operating on a national basis, would be able to make its voice heard. Past complaints about network operation on daylight time during the summer were unorganized and little progress was made in attacking the problem. Independents will be invited to join with affiliates.

Similar sentiment has been developing among other affiliate groups at meetings with officials of other networks. From one of these meetings came the roundup questionnaire, which was drafted independently of the American affiliate

Third Plan

The questionnaire explains that in an effort to seek a solution of the problem the group was surveying affiliates of all networks to obtain industry data and suggestions. From this material may be devised a formula for national handling of daylight saving. The questionnaire asks if the community remains on standard time the entire year or uses daylight saving time in the summer; if station is satisfied to have its schedule conform to New York City's change in time; if station would prefer all network programs to be broadcast on standard time regardless of time status at place of origin; if station has lost revenue in the past because of daylight time; population and radio homes in primary area; suggestions for handling of the time change problem.

A third plan was in the discussion stage in Detroit last week, where suggestion was offered that all stations in the city get together. A meeting had been planned by Detroit stations last October but it never was held.

Network executives agree that the problem is messy for affiliates, but explain that it is difficult for them to operate on standard time when New York and Chicago go on daylight saving time. They take the position that the public governs the situation, and they suggest that the confusion is basically due to the fact that metropolitan centers are not on uniform time.

Affiliates are getting seriously concerned as they draw plans for spring operations. Free from the time-change mess since 1941, they now see what they are up against when programs must be juggled in April. The profitable participating programs in the early hours of the day will be hit hard by the time shift in cities not on daylight time. Sponsors buying the dinner hour periods often object to an hour shift in their time, and affiliates are quick to explain that many of them didn't return to the station in the autumn during past years.

Equally annoying is the summer shift of children's programs from 5-6 to 4-5 p.m. in standard time cities, throwing schedules further out of gear.

Perhaps 80% of the stations in

SEMI-ANNUAL snarl for broadcasters, agencies and sponsors came* up before war when many cities switched from standard to daylight time and back again. Recurrence is due in spring now that wartime clock advance in time has been dropped. Stations looking over spring plans suddenly find sad situations developing. Move is under way to bring together affected interests, with net affiliates providing main impetus.

the country are adversely affected by the time juggling, some managers believe. Revenue loss often reaches as high as 25 to 35%. Furthermore, sale of program time on a 52-week basis becomes difficult when spring and autumn adjustments are necessary.

Two main approaches to daylight saving are under consideration. First is the possibility of enacting legislation, national or state, specifying uniformity in time the year round. Thus if all the nation switched to daylight time in April,

Court Rules Licensees Must Retain Control of Programs

LICENSEES are bound, by law, to retain full control over programs, the U.S. District Court for New Mexico has ruled.

In a summary judgment in the suit of Albuquerque Broadcasting Co., licensee of KOB, against the Board of Regents, New Mexico College of Agriculture & Mechanic Arts, Judge Colin Neblett ruled that KOB could not legally grant the college demands for specific blocks of time. His decision is expected to affect time-brokerage and stations which are committed to allocate specific blocks of time to former owners.

Appeal Likely

Attorney General Clyde C. Mc-Culloh of New Mexico who, with Harry L. Bigbee, asistant attorney general, represented the college, said an appeal likely would be filed. W. Theodore Pierson of the Washington law firm, Pierson & Ball, represented KOB, assisted by Sen. Carl A. Hatch (D-N.M.)

and A. T. Hannett of Mechem & Hannett, Albuquerque.

Judge Neblett ruled that under the Communications Act and FCC rules and regulations KOB as a licensee "has the sole and exclusive right and duty to exercise its independent judgment and discretion to control, supervise, and direct the use and operation" of the station in the public interest.

The KOB case is one of several

in which stations have assigned blocks of time to either former owners or others. Under the summary judgment the assignment of such time blocks is contrary to law and to FCC regulations. Other stations believed affected by the ruling are those which sell blocks of time to brokers.

In 1920 the college started KOB and operated it until 1931, when the station was leased to the Journal Co., publisher of the Albuquerque Journal, but the college re-

Kansas Farmers Think Radio Does Unqualifiedly Good Job

THREE out of four adult listeners in Kansas believe that radio is doing an unqualifiedly "good job," according to the Kansas Radio Audience of 1945 study conducted for WIBW Topeka. The survey has just been published by WIBW. It was conducted by Dr. F. L. Whan, U. of Wichita.

The Whan figures confirm general findings of the FCC that farmers are pretty well satisfied with their broadcasting service and that they prefer newscasts above all other program types [BROADCAST-

ING, Dec. 3].

A preliminary survey of the Kansas audience was conducted for WIBW by Dr. Whan last winter. It covered postwar plans of Kansans and listening habits. The new survey is based on later study of 6,383 homes during April and May.

Gradual increase in Kansas listening since the 1942 war-year low figure is shown by the figures. though average listening is still somewhat under the pre-war figure of 1940. The study shows that farm women listen 4.71 hours a day, men 3.38; village women listen 4.20 hours, men 3.30; urban women listen 4.72 hours, men 3.52.

Age of listener does not greatly affect the amount of time the average adult listens on weekdays, though middle-aged women and older men reported the greatest amount of listening.' The adult audience is found nearly equally uniform at all times, from the standpoint of age of listener. At any hour an important segment of each type of audience is listening to the radio, Dr. Whan finds.

From a third to a half of the women and a fifth to a third of the men plan their daytime activity so they may hear certain programs, it is found. From half to three-fourths of both men and women arrange to be home certain evenings of the week to hear programs they like.

In analyzing program preferences, Dr. Whan finds a steady high interest in news broadcasts and programs featuring comedians. A significant decrease in interest in audience participation and variety shows is indicated, along with constantly falling interest in serial drama; significant increase in interest in complete drama, classical and old-time music and devotionals.

Good Listening in Morning

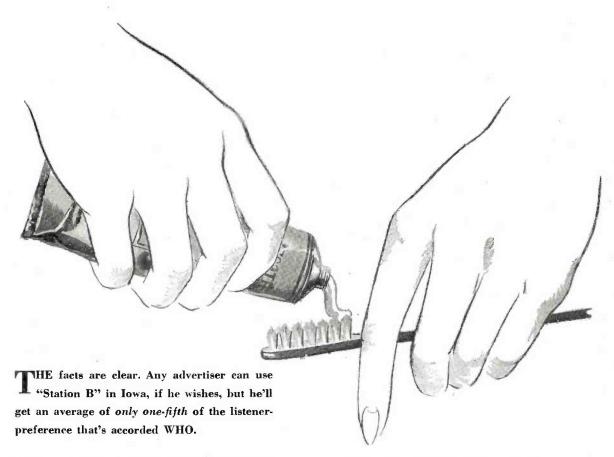

Some sentiment was shown against serial dramas, with both men and women indicating there is too much such radio fare. Figures range from 3.9% of farm women objecting, to 14.4% for urban men.

In their attitude toward spot announcements, it was found that at any specific half-hour period in the early evening the audience is two or three times as large as at other periods of the day. However during daylight hours the audience is constantly changing from one set of homes to another; during evening, shift is not so pronounced.

Thus, says Dr. Whan, the total number of homes reached by a series of announcements in the morning or afternoon may not be much smaller than the number reached by a like series of announcements in the evening. This is especially true of the farm audience.

Fewer than 3.1% of all ques-(Continued on page 95)

Broadcasters Posed With Patton in Paris

TRAGEDY which befell General Patton in Germany stunned millions of Americans, but it struck with full impact for this group of broadcasters. This picture was made on the steps of the George Hotel in Paris on Aug. 18, during the broadcasters mission to ETO. The camera of Mark Woods, ABC president was used. The meeting was impromptu—Gen. Patton was entering the hotel as the broadcast mission, which had lunched with Brig. Gen. Paul Thompson, chief of the Army's Information and Education Division in Europe, was leaving. A news conference quickly was arranged, short-snorters were signed and stories were

told during a pleasant, unscheduled half-hour. Shown, bottom row (1 to r): ABC President Woods, Leonard Reinsch, Cox Radio Stations and President Truman's radio adviser; Martin Campbell, WFAA Dallas; Gen. Patton; Justin Miller, NAB president; Clair R. Mc-Collough, Mason-Dixon Group; John E. Fetzer, WKZO Kalamazoo. Back row (1 to r): Col. Ed Kirby, escorting officer; Col. Harry S. Wilder, WSYR Syracuse; William S. Hedges, NBC vice president; Jack Alicoate, Radio Daily; Joseph H. Ream, CBS vice president; Sol Taishoff, BROADCASTING; Robert D. Swezey, MBS vice president and general manager; Morrie Novik, WNYC New York.

FM Shifts to High Band in Two Weeks

Stations Will Broadcast To Fewer Listeners Than Before War EXISTING FM stations are required to begin regular operations on the 88-108 mc band by Jan. 1. Despite difficulties in obtaining

FM WILL make its debut in its new spectrum location in two weeks—with a smaller audience than it had before the war.

A spot check of FM licensees, conducted last week by BROAD-CASTING, indicates that the majority will make the Jan. 1 deadline set by the FCC for the commencement of regular operations in the high band (88-108 mc). Many of the stations will continue to broadcast in the old 42-50 mc band; some will switch over entirely to the new band, even though the number of listeners will be practically nil.

A number of stations which had been shut down for the changeover to their new frequencies will resume broadcasting with neither an audience to listen nor receivers available. They expect that many of the owners of low band sets will have their receivers converted to tune in their stations but there was no indication that manufacturers would produce converters for the limited number of old band sets in use.

While no effort was made to inquire into program plans, in view of the delicate situation caused by the Petrillo edict prohibiting duplication of live music on FM stations operated by standard broadcasters, it was learned that a number of stations are considering using recordings only as long as the FM

EXISTING FM stations are required to begin regular operations on the 88-108 mc band by Jan. 1. Despite difficulties in obtaining equipment to effect the changeover, most stations will meet the deadline. Some will abandon the old band entirely and will have few listeners.

audience is limited by unavailability of receivers. Network owned stations are still in process of changeover and have not announced their plans when they resume operations.

Set Production Lagging

Progress of receiver manufacturers in producing FM sets was behind that of broadcasters in switching frequencies and of equipment manufacturers in turning out converters for dual operation. A number of stations were able to obtain equipment to start operations in both bands weeks ago. Others are planning to start equipment tests within the next two weeks.

It appeared probable that FM sets in volume would not be available until spring at the earliest. OPA price ceilings, labor troubles, technical difficulties in producing sets for the new band were given as the principal reasons delaying production. One large manufacturer has produced a few sets for demonstration purposes but has been able to furnish dealers only dummy models. Prices on FM sets are still undetermined.

Although existing FM stations

were supposed to have begun equipment tests by Dec. 1 on the high band, FCC reports indicated that not more than 10 of the 53 licensees and permittees were able to meet that deadline. Difficulty in obtaining equipment for the conversion has delayed most of the stations, necessitating granting of extensions. Most stations indicated however, they would be on the air

within a few weeks after the Dec. 1 date.

From direct inquiries to stations and from information given the Commission, it appeared last week that the following stations will be operating in the high band by Jan. 1 or soon afterward:

WEAF-FM, New York NBC

WHNF New York, FM affiliate of WHN.

WBAM New York, FM affiliate of WOR.
WQXQ New York, FM affiliate.

President Given Power to Reorganize FCC as Congress Passes Revised Bill

REORGANIZATION of the FCC is possible under a revised Reorganization Bill (HR-4129), passed last week by Congress and giving President Truman broad powers to revamp the entire executive and independent offices branch of Government.

Under the bill—a compromise between the McCarran bill (S-1120) and Manasco bill (HR-4129), the President may not limit the powers of quasi-judicial agencies (such as FCC) but generally he would be given approximately what he requested last summer.

Exempt from reorganization are the Interstate Commerce Commission, Federal Trade Commission, Securities & Exchange Commission, National Mediation Board, National Railroad Adjustment Board, Railroad Retirement Board and the civil functions of the Army Corps of Engineers.

Should the President desire to

reorganize the FCC, Federal Deposit Insurance Corp., U. S. Tariff Commission or Veterans Administration, he must submit a separate plan for each. None can be included in an overall reorganization.

Administration forces won another victory in a provision which makes any reorganization plan effective 60 Congressional days after it is submitted unless both Houses pass a concurrent resolution in opposition.

Under the McCarran bill, as reported by the Senate Judiciary Committee, the FCC and 13 other agencies were exempt, whereas the original Menasco bill provided that separate reorganization plans must be submitted for the FCC and several other agencies.

The Senate passed the measure Thursday after similar House action. Whether the President plans an FCC reorganization is not known, although he had asked that no agencies be exempt.

Spider kills snake with web!

That was a whale of a news story a couple of years ago.

It seems the snake made a pass at its natural prey in the web....got caught in the silky mesh and couldn't get out. Then the spider went to work on that snake ... and really tied him up!

That's another example of the way that many times the little guy hangs one on a big fellow.

We've got a little radio station down here in Baltimore. It's the successful independent, W-I-T-H. But

did you know that this station delivers more listenersper-dollar-spent than any other outfit in this big fivestation town?

It's a fact ... and there are facts that prove it. Glad to show them to you ... particularly at budget time.

Tom Tinsley, President

PUBLIC, GIMBEL'S VIEW VIDEO RESULTS

Though TV Aids Shoppers,
—Technique Disappoints—

Store Concludes Improved
— Equipment Is Needed—

THE PUBLIC feels that television is a marvelous postwar dream come true, but viewers of the display at Gimbel's Dept. store in Philadelphia were disappointed in actual production technique. These results were pointed out in a report just released on an RCA poll conducted on the experiment, reputedly the first of its kind. The test ran from Oct. 23 to Nov. 14.

Over 250,000 people viewed the display, from the 20 RCA telesites located throughout the store. Of those answering questionnaires, 88.9% consider store television an aid to shopping. Close to 70% indicated that it was the first time they had seen television.

Merchandise was shown as it actually appeared on counters, and was also shown in use to demonstrate what purposes it could serve the customers. As to the length of the show, a majority thought it was "OK." A majority preferred more entertainment than merchandise displays.

The answer to the question of whether the expense of television is justified by sales, can be determined only when sales statistics are available.

Telesites were specially built, unlighted enclosures, containing 20 to 40 folding chairs. Gimbel's and RCA used radio and newspaper ads, car cards, displays, direct mail, booklets and other media to publicize the display. RCA engineers supervised the installation, serviced receivers, handled all operation.

The poll was used only on merchandise shows, including four hair shows, one for curtains, two for pots and pans, one for hats, and three toy shows. There was also a straight entertainment show, Uncle. Wip. Telecasts were shown every half hour on the half hour.

"Arming" the personnel around the telesites with answers to possible questions of the video viewers, RCA prepared questions and answers, including:

When will RCA have a home television set on sale? Perhaps within six months.

What will it cost? Perhaps \$200 for a table model ... \$300 for a console with radio ... \$400 for a large screen console television radio-phono combination. Prices, as yet, are indefinite.

What size picture? The \$200 and \$300 units will be direct view . . . \$400 will project picture onto a screen. . . .

Is a special antenna required? Probably. . . .

Will they be sold on the installment plan? Yes.

Will Gimbel's carry them? Yes. When will RCA radio sets be on sale? Within a couple of weeks.

Will RCA produce Walkie-Talkies? Probably—but not for six months or so.

What about color television?

FINAL summary of lessons learned by Gimbel Brothers-Philadelphia from its intra-store television experiment Oct. 23-Nov. 14 [Broad-CASTING, Dec. 10] was released last week. Gimbel's chief conclusion: Before stores may get the most dollar value out of television, telequipment must improve.

No insurmountable engineering problems are in the way, however, the report stated. Chiefly needed are larger screens and more sensitive cameras which require no elaborate lighting. When these become available, Gimbel's thinks that intra-store television can be economically and successfully operated.

Looking Forward

For better merchandise promotion, Gimbel's looks forward to perfection of color transmission. Merchandising experts, acute to color value in salesmanship, were limited in their choice of items to be presented in the black and white transmissions during the experiment. But although the experts winced at these restrictions, customers seemed not as critical.

One question persistently asked after conclusion of the experiment was: What was the cost of the demonstration and what relation did the cost have to sales?

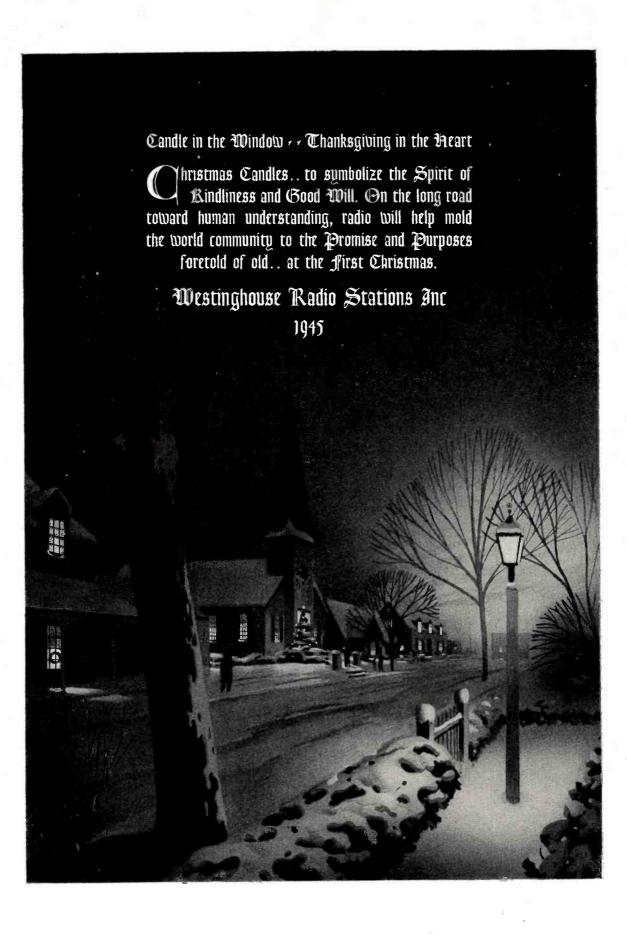

Gimbel's reported the question was hard to answer. Without quoting figures, the store described the cost as "abnormally high." Reasons were: (1) Neither Gimbel's nor RCA-Victor had experience in the use of the new medium, and (2) equipment available for the test suffered the ailments of old age, needed careful and consistent checking to operate smoothly.

The store listed three main mistakes which were made in the experiment: Insufficient time was given to rehearsals; (2) too few of the demonstrations illustrated what the merchandise did for a cuscustomer; (3) not every item shown was priced.

WLIB Wins Award

AWARD by American Association of the United Nations for best coverage by a New York independent station of the San Francisco Conference was given Friday to WLIB Brooklyn. Clifford Evans, WLIB director of news and special events, accepted citation at an association meeting at Town Hall. WLIB highlighted its coverage of the conference with daily program report on San Francisco which featured late news and a guest speaker who explained what conference meant to him as an individual citizen.

Home receivers capable of receiving color telecasts seem unlikely for some years yet. The possibility is just a laboratory idea at the moment...

The care and feeding of

WOR vice president Maddux (seated) smilingly comments on new contract as sales director Gene Thomas looks on. In moment he will release "flash" that alerts all departments to cooperative follow-through on new show.

2 Norm Livingston (right), director of program operations, analyzes audience advantages of time-period selected. Daytime program director Gene King (left) points out WOR's excellent competitive standing through the years.

5 "The stant is this" Publicity chief Charlie Oppenheim (center) approves as Murry Salberg, trade news editor, tells how story on new show will break in trade press. Marjorie Sable slants story for newspapers.

Noted for its razor-sharp engineering standards, WOR's master control room gets show on air with perfect precision. Just checking up as Charlie Thropp pulls vital plug is Charlie Singer, assistant chief engineer.

a program...

The commercial's transcribed. Here, studying it for timing, pace and performance is WOR's executive producer and editor, Bob Simon (right). Continuity writers Keith Thompson and Lois Green assist.

4 Sponsor's show will cash in on WOR's steady, continuing barrage of magazine, direct mail and newspaper advertising. Joe Creamer, advertising and promotion director, scans recent work with assistant, Lenore Hershey.

Chain-link departmental cooperation at WOR poises the powerful resources of a great station

behind every sponsor's show

EVERY WEEK during the 52 weeks of every year, approximately 15 new and renewal contracts are signed by sponsors and their agencies for WOR, New York. Almost immediately following the signing of any one contract, a "flash bulletin," or pink sheet, is sped on its way to the desk of every WOR departmental head. The moment a pink sheet is received, the silent but ceaseless activities of more than a hundred variously trained and gifted WOR specialists are directed at making the WOR sponsor's program one of the most economical, audience-building advertising ventures of his career. WOR herewith presents, in words and pictures, a portion of

the chain-link cooperation that plays a major part in making WOR commercially-sponsored shows outstanding favorites among thousands of people in one of the greatest listening territories on the Eastern Seaboard.

MUTUAL

FIRST STATION IN WEST MICHIGAN

On January 4 WKBZ goes MUTUAL!

This change to MUTUAL joins WKBZ with the other Western Michigan stations—WKLA, Ludington, WATT, Cadillac and WTCM, Traverse City. A 100% MUTUAL GROUP.

With the 150,000 population served by WKBZ in the GREATER MUSKEGON area it increases the Mutual market to 300,000 people in Western Michigan.

Working together thru MUTUAL, WE can do a point-of-sale job that will capture sales for your product in this new, enlarged and more secure market.

Harold Stassen, Mary Margaret McBride, Samuel Gale of General Mills, FCC Commissioner Clifford J. Durr, and NAB Executive Vice-President A. D. (Jess) Willard as speakers [Broadcasting, Dec. 10]. Radio officials and entertainers participated.

Belief Video Belongs Upstairs Prompts Recall of Application

EXPRESSING the belief that "the proper place for television is in the higher band of frequencies," Metropolitan Television Inc., New York, last week withdrew the application for a New York video station to operate on Channel 8, 162-168 mc., it had filed in 1940. Company, owned jointly by two New York department stores, Abraham & Straus and Bloomingdale Bros., expressed its intention to conduct experiments in the frequencies between 480 and 920 mc. Company operates WABF New York, an FM station which has been on the air since November 1942.

Color Ultimate Objective

A letter to the FCC, written by I. A. Hirschmann, vice president of Metropolitan, expressed agreement with a Commission order pointing out that "the 13 television channels which are available for television below 300 mc are insufficient to make possible a truly nationwide and competitive television system." The letter continued that from the inception of the FCC's allocation studies, Metropolitan has believed that television belonged in the higher frequencies.

"This opinion is reflected by the fact that in 1940 we applied for Channel 8, 162-168 mc, which was then not even designated for commercial use and whose propagation characteristics had long been investigated by the physicist, Dr. Frank G. Kear, who acts as engineering consultant to the company," Mr. Hirschmann wrote. "Our technical staff has pursued the study and on the basis of ex-

tensive information are convinced that the place for television transmission is more properly in the higher band of frequencies, namely from 480 to 960 mc."

The belief that "color television is the ultimate objective for public service" was expressed by Mr. Hirschmann, who stated that "certainly, the coloration of nature will be demanded instead of monochrome, once such coloring is available for broadcasting."

Commenting on Metropolitan's action, Lawrence Lowman, CBS vice-president in charge of television, said:

"Ever since CBS first proposed full color television in the higher frequencies we have felt that department stores in particular would be quick to appreciate the tremendous merchandising potentials of this new medium. Clear pictures in full color, for instance, will show the consumer at the television receiver, not only the pattern of a garment, but the color and texture of the fabric, reveal the detail and design to optimum advantage. Metropolitan Television is to be congratulated on its accurate appraisal of color television as, in Mr. Hirschmann's own words, 'the ultimate objective for public service.' '

Mrs. Anna Ayer Fry

ANNA AYER FRY, 69, widow of Wilfred W. Fry, former president of N. W. Ayer & Son, and daughter of Francis Wayland Ayer, founder of the firm, died Dec. 9 at the Pennsylvania Hospital, Philadelphia, after a short illness.

Retailers Knock Professional - Wrangling on Television Plans

THREE New York retail store executives raised sharp objection to the profusion of professional discussion of telecasting's present and future plans, which they said was leaving the potential customer bewildered. The executives spoke at a panel meeting of the American Television Society, Dec. 11 at New York's Sheraton Hotel.

"There's been too much talk by men who know too much about color telecasting and the third dimension," said Lawrence Moore, merchandise manager of Frederick Loeser Co. "A consumer being offered an ordinary television set will decide to wait until he can get one which has color and third dimension."

Create Consumer Demand

As Mr. Moore, J. M. Winer, president of Dynamic Electronics Inc., New York, and James J. Dingivan, vice-president and general manager of Arnold Constable, see it, the television industry's main objective now is to create a consumer demand for receivers which are already off the drawing boards.

"I think," said Mr. Dingivan, "that we should do more talking together before we do more talking to the public."

Mr. Moore believes that demonstration telesets are needed now in stores to clear the buying public's mind of misconceptions about the quality of telecasting, to stimulate a purchasing urge that may be near the bursting point when receivers actually reach the market.

Merchandising methods which the three stores will use to sell sets differ. Dynamic Electronics will pursue the blue-stocking trade of Manhattan, concentrate on highpriced sets, said Mr. Winer.

Mr. Dingivan's Arnold Constable will aim at the same level, selling

No Dec. 25 Commercials

NO COMMERCIAL English language network broadcasts in Canada on Christmas Day-that policy has been decided by Canadian Broadcasting Corp. and will apply to both Trans-Canada and Dominion networks, while CBC English-language owned stations will not use any commercial broadcasts at all that day. Decision does not affect CBC French network or individual CBC French stations in . Quebec, where only those periods required for special broadcasts will be claimed for network time. CBC will present special Christmas Day schedule for all its stations.

Christmas Plans

GENE EMERALD, variety program m.c. of KRNT Des Moines, is campaigning for presentation of gifts through established agencies to children of servicemen who were war casualties. Station also plans servicemen and veterans hos-

television sets "on the basis of pride of possession, as we now sell our furs."

Mr. Winer and Mr. Dingivan

Mr. Winer and Mr. Dingivan both requested set manufacturers to give strong consideration to the beauty of instruments they build. Their customers want looks as well as technical quality.

Mr. Moore was less interested in

One thing which buyers should be guaranteed is proper servicing for their sets, he insisted. Free service should be provided for future frequency changes. Further, a prospective buyer is entitled to know whether a receiver will work in his home. For that purpose tests should be conducted in his home to establish whether a set would work there or, if not, what additional equipment would be needed to make it work.

Chairman of the panel was Dave Wagman, radio and television sales manager of Bruno Inc., New York. Richard Manville, research consultant, presided at the meeting.

CBS Cancels TV Plans For Garden Basketball

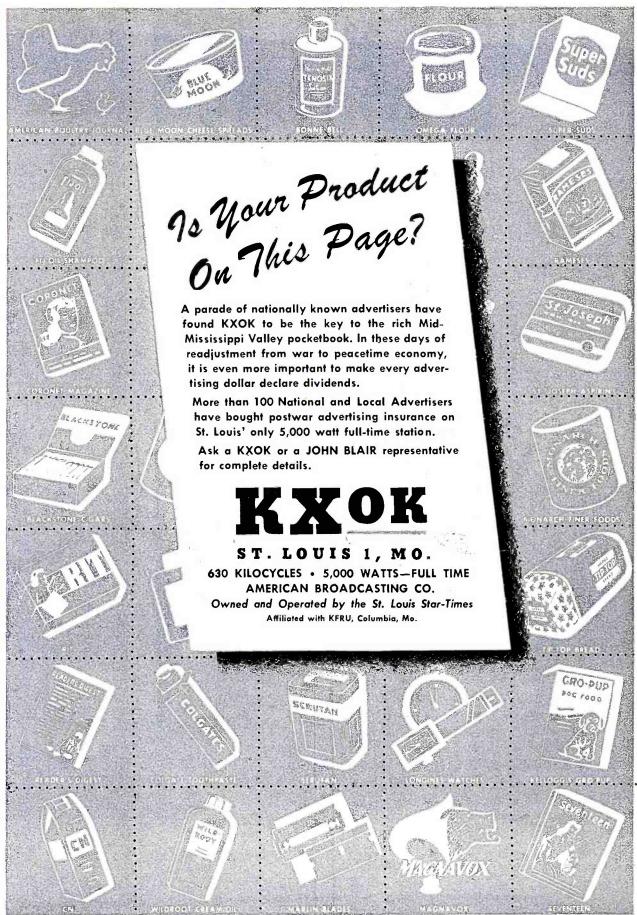

PLANS OF CBS to televise basketball games from Madison Square Garden, originally scheduled to begin last Wednesday, have been postponed until equipment for such remote pickups can be put into shape. Apparatus acquired by CBS before the war has been used in the network's television laboratory during the war years and a preliminary test from the Garden Dec. 8 proved it unsatisfactory.

Cancellation of the remote pickups eliminates what otherwise would have been duplication video coverage of the basektball games as NBC is also televising them. It may also keep CBS out of what might have been an embarrassing necessity for explaining the duplication as the network recently protested against duplication of broadcasts by public officials on two or more networks.

MILLER IS CHAIRMAN OF PARALYSIS DRIVE

MARCH of Dimes campaign will open Jan. 14 and close Jan. 30, President Roosevelt's birthday, with Justin Miller, NAB president, as chairman of the National Radio Division Committee, according to Basil O'Connor, president of the National Foundation for Infantile Paralysis.

Co-chairmen are: Edgar Kobak, MBS; Clarence Menser, NBC; Adrian Samish, American; Davidson Taylor, CBS. Radio promotion will include transcriptions featuring name talent, announcements and live network programs.

BOGGS IS APPOINTED NEW WLOL MANAGER

NORMAN BOGGS, sales manager of WGN Chicago, has resigned to become general manager of WLOL Minneapolis, effective Jan. 14, Ralph Atlass, treasurer and controlling stockholder of WLOL, announced last week.

Mr. Boggs has been with WGN since 1937, starting as salesman, and was appointed sales manager in February 1945, after heading the WGN New York sales office for four years. He succeeds E. S. Mittendorf, who resigned because of ill health. Mr. Mittendorf was formerly general manager of WIND Chicago and became manager of WLOL in 1943. He plans to return to Arizona where he has a home and business interests.

WLOL, operated by Independent Merchants Broadcasting Co., operates on 1330 kc with 1 kw and has applications for 5 kw and an

BACKSTAGE at the opening broadcast of Exploring the Unknown, broadcast from Mutual's Longacre Theater are (1 to r): Sherman H. Dryer, producer; Robert D. Swezey, Mutual vice-president and general manager; Norman A. Schuele, advertising manager of Revere Copper & Brass Co., sponsors; Maubert St. Georges, president of St. Georges & Keyes, agency owning show. Program is heard Sunday 9 p.m. (EST).

FM grant pending before FCC which Mr. Atlass said are expected to be acted on in the near future.

"We regret Mr. Mittendorf's decision to retire and are deeply grateful for the quality of leadership he brought to WLOL and

Northwest radio," Mr. Atlass declared. In appointing Mr. Boggs as general manager of the MBS affiliate, Mr. Atlass said the station was obtaining "one of the most successful young executives in the industry."

YOUNG & RUBICAM, New York, has realigned its talent department assignments so that some of its radio executives will be able to devote more time to creation of show ideas and program development work. Reorganization, according to Harry Ackerman, vice-president in charge of radio program operations, is as follows:

Hobe Morrision and Robert Weenolsen will handle all service on all accounts except those involving daytime radio. Mr. Weenolsen will supervise accounts handled by Program Managers William Forbes and Max Wylie. He will also become talent man and radio contact on the Bristol-Myers operation, replacing Len Holton, who has been freed of all service activities to become a part of the program development group. Cy Pitts also joins the development group. Mr. Morrision will be talent supervisor on accounts handled by Joe Moran and George McGarrettt, program managers.

Mary Hanrahan will handle all talent operations on daytime radio, transcriptions and spots. Jimmy O'Neill, recently returned from the service, is story consultant and will also be a member of the program development group.

SALES DRIVE BEGUN BY WESTINGHOUSE

INTENSIFIED campaign has been started by Westinghouse to boost sales of home appliances, with Roger H. Bolin, advertising manager for Westinghouse Electric Appliance Division, announcing five appointments to his staff.

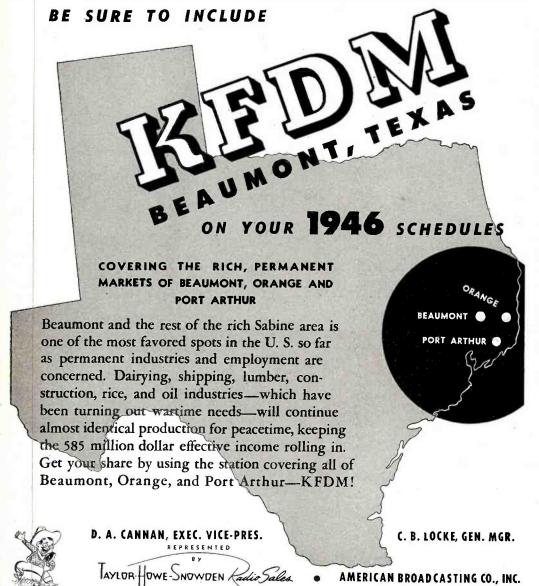

J. R. Clemens, formerly in charge of product advertising, except for the East Springfield, Mass., plant, and J. W. Endriss, formerly a staff member of the advertising department, were named assistant managers of appliance advertising.

Others named were: E. J. Hegarty, for 25 years with Westinghouse in sales, advertising and promotion, new manager of sales training; K. A. Donelson, formerly in charge of advertising budgets and records at Mansfield, O., head-quarters, new operations manager; J. G. Baird, associated with the company's store modernization program, new sales promotion manager.

Woulfe Elected

HENRY F. WOULFE has been elected vice-president and general manager of the Pepsodent division of Lever Bros. Co., succeeding Charles Luckman as operating head of the division. Mr. Luckman is now executive vice-president of Lever Bros. Mr. Woulfe has been with Pepsodent since 1927.

KYW Philadelphia will broadcast annual Christmas concert by inmates of Eastern State Pententiary in Philadelphia and the County Prison at Holmesburg for 12th consecutive year.

SEASON'S

GREETINGS

As the holiday season approaches, we bid farewell to the year that is past with thankfulness for the definite and encouraging progress it has brought. Such success as has fallen to our lot, we owe to the many advertisers whom we have had the privilege of serving; and we take this opportunity to express the hope that the services we have rendered them may also have contributed to their success. With the hope that the New Year may be for all of us a year of continued progress, we extend to our advertisers and their agencies, and to all who may chance to read this, our sincere wishes for a joyous holiday season.

THREE VETS APPLY FOR NEW STATION

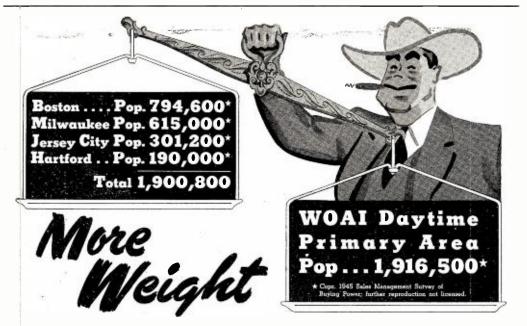

THREE veterans of World War II—all radio veterans too—are incorporators of Radio Asheville, which Dec. 10 applied to the FCC for authorization to construct a 250 w station on 1450 kc at Asheville, N. C.

Paul H. Chapman, Greenville, S. C., who was with WFBC Greenville, prior to his four years of Army service, is president-treasurer and would be station manager. Zeb Lee, Asheville, vice president, was announcer of WISE Asheville and WPTF Raleigh, prior to entering the Army, in which he served in the radio phase of public relations. He would be program director. Obra W. Harrell, back as engineer at WAGA Atlanta, after service in the Navy, is secretary and would be chief engineer.

Call letters of WCRA are requested and the applicants proposes to use ABC.

OFFICIALS of Chicago Pure Milk Association were guests of WLS Chicago at a luncheon marking 500th broadcast of *Pure Milk News* on the station. Shown (1 to r): Seated, Arthur Moore, editor, *Prairie Farmer*; Art Lauterbach, manager, Pure Milk Assn.; Lloyd Burlingham, news commentator on the show; Wilbur J. Swayer, president of association. Standing: Peter Cooke, WLS sales department; Glenn (Pop) Snyder, WLS vice-president and general manager.

In any market, it's the folks that count—the potential customers for the goods you want to sell!

Outweighing in number the combined population of Boston, Milwaukee, Jersey City and Hartford are the prosperous Texans who have their homes in WOAI's daytime primary area—a

NEW FILM STUDIOS BEING CONSTRUCTED

CONSTRUCTION of a modern radio center for WILM Wilmington, Del., was started last week.

George Sutherland, WILM general manager, said new quarters will include general offices, sales and promotion offices, client and audition rooms, rehearsal rooms and music library, news rooms and studios, and are expected to be ready by Feb. 1. New technical equipment of latest RCA design, he said, will be installed.

First-floor space and a large, twofloor auditorium in the Wilmington
Odd Fellows' building have been
secured. Observation windows centered off a large reception room
will permit constant view of all
studio operations. Another feature
will be an observation gallery looking down into the large audienceparticipation studio. Facilities and
space for FM broadcasting also are
provided. WILM, basic Mutual outlet in Wilmington, operates on 1450
ke with 250 w power. It has applied to FCC for 10 kw power.

N. Y. State Radio Group Has Promotion Meeting

NEW YORK STATE Radio Bureau last Monday at the Roosevelt Hotel held a discussion on the type material it is sending out to New York stations ament promoting state government activities. It was suggested that identification of state officials by name be eliminated and officials referred to by titles only.

NYSRB was originally set up after a meeting between Gov. Thomas Dewey and the NAB public relations committee of District 2, headed by Robert Soule, WFBL Syracuse. Bureau is part of the state publicity organization under the Dept. of Commerce. Thomas C. Stowell is director of the radio bureau. Harold Keller, deputy Commissioner of Commerce, heads all state publicity.

Following were present at the luncheon: M. P. Catherwood, State Commissioner of Commerce; Mr. Keller; Mr. Stowell; Mr. Soule; John McNeil, WJZ; Arthur Hull Hayes, WABC; George Lewis, WHN; Murray Jordan, WLIB; Morris Novik, WNYC; Leon Goldstein, WMCA; Henry Greenfield, WEVD; Ted Scott, WNEW; Mrs. Eleanor Sanger, WQXR; Tony. Provost, WEAF.

International Greetings

FOR the 11th year, WMAL Washington and the American Broadcasting Co. will broadcast the International Children's Christmas Party, presenting children from the embassies and legations in Washington sending Christmas greetings to their lands. Joe Kelly of Quiz Kids will be m.c. of the show, 2:45-3:30 p.m., Dec. 21, broadcast from Wardman Park Hotel, Washington.

"...in the Public Interest..."

KNOW YOUR PUBLIC OFFICIALS

a feature

on the <u>New</u>

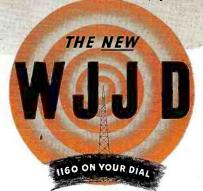

WJJD

In the public interest, key government officials . . . Governor . . . Mayor . . . Attorney General . . . whatever their office . . . are invited to report to the people who elected them, by the New WJJD. Not as politicians—as public servants. And the more than 10,000,000 who live within our coverage area have every inducement to listen.

For each Wednesday, the New WJJD takes a choice parcel of time, gives it top talent and production, and devotes it to the fine public service series "Know Your Public officials", broadcast in cooperation with the Illinois League of Women Voters.

Note that, please: choice time . . . top talent . . . top production. That's what the new ownership of WJJD gives to all its public service shows. 16 percent of our total operating schedule now goes to programs "in the public interest."

A Marshall Field STATION REPRESENTED NATIONALLY BY LEWIS H. AVERY, INC.

Delay on OPA Price Factors Eliminated, Bowles Declares

SPEEDY handling of price factors for radio receivers has eliminated delay in set production attributed to Government red tape, OPA Administrator Chester Bowles said last week.

Answering complaints that OPA is not getting out price lists fast enough, Mr. Bowles said that parts and sets were priced last October. OPA is giving practically weekly service to manufacturers who request prices, he added.

Mr. Bowles referred inquiries about adjustments in pricing to Harvey C. Mansfield, assistant director of the Consumer Goods Division. Mr. Mansfield said that constant adjustments are needed as manufacturers of parts and finished receivers make changes and improvements in their lines.

Asked about failure of manufacturers to provide the expected production for the holiday trade, Mr. Mansfield said that after the war there was a lull due to cancellation of war contracts. Army priority for morale radios consumed quantities of components, he explained, affecting all manufacturers. Labor difficulties and other problems contributed to the delay.

Some 1945 prices are comparatively close to 1941 prices, Mr. Mansfield said, though comparison is difficult since only one small factory is turning out the same line produced before the war. Others are making different models, with style changes, component improvements due to technical lessons learned during war experience. Few expensive consoles are coming out because of the wood shortage, he

Mr. Bowles said that prices for export lines will be in line with comparative domestic prices.

Emerson Radio & Phonograph Corp., New York, will deliver 100,-000 sets to dealers by Jan 1, according to Benjamin Abrams, president. After OPA approval of prices the previous week Emerson shipped 30,000 sets. Prices range from \$20 to \$40, with production at a rate of 2,500 a day and scheduled to reach 10,000 a day during the first quarter of 1946.

Stewart-Warner Corp. will have at least 10,000 plastic table models in dealers' hands before Christmas, according to F. A. Hiter, senior vice-president. Production of 5,000 sets a day is contemplated.

GOVERNOR and Mrs. Raymond E. Baldwin of Connecticut sold \$199,025 in Victory Bonds in a ten hour radio-telephone campaign conducted at the stu-dios of WTIC Hartford Friday, Dec. 7.

Farnsworth Production Now Booked for 1946

PRODUCTION at Farnsworth Television and Radio Corp., Fort Wayne, Ind., will run at capacity through 1946 on orders already booked, E. A. Nicholas, the firm's president, has reported to stockholders.

In his report, Mr. Nicholas quoted a net profit of \$500,845, after estimated taxes, for the six months ended Oct. 31, compared with \$592,921 for the corresponding period last year. Profit decline, it was said, resulted from termination of virtually all of the company's war contracts.

Mr. Nicholas said that despite the sudden end of the war the company's reconversion program was begun without delay. According to another announcement from the company, the Farnsworth Chicago distribution branch has moved from 540 North Michigan Ave. to new offices and showrooms in suite 535-B of the American Furniture Mart, 666 Lake Shore Drive.

NEW YORK · CHICAGO · SAN FRANCISCO

World-famous Zion National Park with its great White Throne, shown here, is just one of Utah's spectacular scenic attractions that people everywhere want to see. Tourist trade, in the last prewar year, was worth approximately \$30,000,000 to Utah. It should grow far beyond that figure in the great travel years ahead, and add further strength to Utah's economic soundness.

Local Advertisers Know KDYL Brings Results

Whatever the source of Utahus' income-

whether from tourist trade or mining or farming or manufacturing — they all have this in common: a preference for the NBC shows and the local features brought to them by KDYL. That's why this station gets results for advertisers.

Jack Benny Tops Hooper on Coast

Hope Second, McCarthy Third In November Ratings

JACK BENNY was the favorite artist with Pacific Coast listeners during November, according to the November Pacific report of C. E. Hooper Inc., which gave him a rating of 27.6. Bob Hope was second with 25.3 and the Charlie McCarthy Show was third with 22.6.

Report shows an average evening audience rating for November of 8.4, an increase of 0.2 from October and 0.7 less than that for November 1944. Average evening sets-in-use was 31.1, up 0.6 from October, down 2.7 from a year ago. Average evening available audience was 76.3, an increase of 1.5 since October, an increase of 0.4 from a year ago.

Average daytime audience rating was 3.5, down 0.1 from October, down 0.6 from a year ago. Average daytime sets-in-use was 15.0, a gain of 0.5 from October, a gain of 0.4 from a year ago. Average daytime available audience was 67.5, up 0.6 from October, up 1.5 from a year ago.

Following the three leaders, the remainder of the first 15 programs in order of the Pacific Coast ratings are: Fibber McGee and Molly, 22.1; Fred Allen, 21.8; Great Gildersleeve, 21.2; Walter Winchell, 19.2; Mr. District Attorney, 17.8; Screen Guild Players, 17.4; Blondie, 17.0; Radio Theater, 16.0; Bandwagon, 15.5; Aldrich Family, 15.5; Hildegarde, 15.4; Take It Or Leave It, 15.3.

Sylvania Buys Wabash

SYLVANIA Electric Products Inc., New York, has acquired the Wabash Appliance Corp., Brooklyn, manufacturers of photoflash and incandescent lamps. Wabash is merging Jan. 1 with the Wabash Photolamp Corp. and Birdseye Electric Corp. to become a whollyowned but independently-operated Sylvania subsidiary. Personnel, products and brands remain unchanged.

"BEACH UMBRELLA" silhouetted against the sky is the antenna of U. S. Marine Corps radar portable unit, designed for beachhead use. Weighing only 400 pounds, the unit can be dismantled and packed in four 100-pound cases. It was developed by Westinghouse.

U. S. Programs Still Top Ratings List in Canada

U. S. NETWORK PROGRAMS lead in popularity in Canada according to December national radio evening report of Elliott-Haynes Toronto, released Dec. 8. Fibber McGee and Molly remain Canada's favorite program with rating of 37.6 and sets in use at 47.0, followed by Edgar Bergen and Charlie McCarthy with rating of 33.7, Radio Theater with rating of 32.8, Album of Familiar Music 23.0, Bob Hope 21.0, Bing Crosby Music Hall 20.7, Treasure Trail 20.6 (Canadian origination), NHL Hockey 19.4 (Canadian origination), Waltz Time 17.4, and Green Hornet 17.2 (Canadian origina-

Five leading French-language shows for December are Railliement du Rire with rating of 37.1 and sets in use 50.3, followed by Un Homme et Son Peche 34.8, Secrets du Dr. Morhanges 30.9, En Chantant dans le Vivoir 30.4 and Cafe Concert 29.7.

RELIGIOUS FREEDOM IS CITED BY MILLER

FREEDOM of religion and freedom of radio walk hand-in-hand, Judge Justin Miller, NAB president, said in a talk delivered on CBS Dec. 9, 11:05-15 a.m. in connection with Universal Bible Sunday. Take one away from the other, he warned, "and we shall walk into the entrapments of tyranny and oppression.

"The microphone has given the Man of God entire nations for his parish," Judge Miller said. The sick, the shut-ins, the blind and the halt are now in attendance at Divine Service even though they be bed-ridden. Those in remote places, those above the earth or below it—these, too, are within hearing of God's Word at the switch of a radio dial.

"We have but to look to Europe to see what havoc the state-inspired broadcasts of hate and untruth brought upon a woe-begone people who now desperately need our help and sympathy in their climb back to Christian ideals and practices. Here in America every radio tower strives to be a Tower of Babel in reverse. It strives to preach the same language of truth and brotherhood. It strives to permeate the leavening bread of toleration, in bringing together men and women of diverse backgrounds, religions, economic and social status through common denominators of interest and aspiration."

Signed With Autry

CASS COUNTY KIDS, consisting of Fred Martin, Jerry Scoggins, and Bert Dodson, and featured on WFAA Dallas, have been signed for permanent spot on CBS Gene Autry show. William Wrigley Jr. Co., Chicago, is sponsor.

Nylon Certificates

CBC Board Denies New U. S. Net Ties

Opinion Favoring Review Is Drawn in CBS Case

NO NEW AFFILIATIONS with United States networks will be permitted by Canadian Broadcasting Corp., it has been ruled by CBC board of governors, according to an announcement made on Dec. 7 by A. D. Dunton, new CBC chairman, in connection with denying CJAD Montreal affiliation for CBS programs.

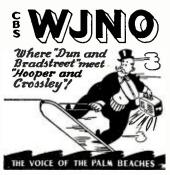

CJAD, new English-language station for Montreal, operated by J. Arthur Dupont, former CBC commercial manager in Quebec, was to have shared the CBS franchise with CKAC Montreal, with CKAC stressing musical programs which could be adapted to French announcements and CJAD carrying English variety programs from CRS

The CBC board has decided that the whole question of U. S. network affiliations with Canadian private stations be reviewed and no new affiliations be permitted. Mr. Dunton stated that English listeners in Montreal will not be deprived of CBS programs but did not state which station would carry these. The CBC stations in Montreal, CBF and CBM, share with CFCF Montreal the NBC and American Network franchises. CKAC has the CBS franchise.

CJAD officially opened Dec. 8 despite the CBC ruling on which its entire program schedule had been planned. It is equipped with 1,000 w Northern Electric transmitter on 800 kc, uses RCA Victor record library, and Press News and British United Press news services.

Guthartz Stipulation =

FEDERAL TRADE COMMISSION announced last week that Max L. Guthartz, also known as Max Guthart, trading under several firm names including Engineering Radio Co. and Eng. Radio Co., Brooklyn, had agreed to quit representing that his radio devices will have any favorable effect on radio receptivity. Stipulation also covered several other alleged misrepresentations, among which was a claim that a scalp preparation he offers is an effective remedy for baldness.

CBS Will Record Foreign Reports for News Series

PICKUPS from abroad may be justified when the importance of the news over-balances the poor qualities of signals from abroad, according to Paul White, news and special features director of CBS.

In revamping the World Today series, broadcast on CBS Monday through Saturday, 6:45-7 p.m., EST, the network has announced that all domestic pickups will of course be live, adding: "Some foreign pickups may also be livewhen the quality of the signal at broadcast time or the importance of the story justifies it. However, arrangements will be made to record foreign reports before and at the time when the signal is best." This represents a reversal in CBS policy, which heretofore has permitted the use of recorded broadcasts on the network only under emergency conditions.

THAT'S SMOKING, southern style, with Prince Albert. Pipes and cake are in honor of *Grand Ole Opry's* 20th birthday, with over 3,900 hours on the air, celebrated at WSM Nashville. FOOD BROKER FINDS RADIO GETS RESULTS

ONE food broker who uses radio, Kuehn-Hall Co., St. Paul reports surprising success with Grocery Store Grab Bay over KSTP.

Aired five days a week, from different Twin City grocery stores and transcribed, show is done by Randy Merriman, KSTP mc who recently completed a USO tour in the Pacific theater, with Glenn Harris announcing.

The pair, together with a recording engineer and full transcription equipment, move into the stores about 2 p.m. daily, and spend about an hour interviewing customers, make a quarter hour transcription and play it back at 5:15 p.m. the same day.

Four products get top billing on the program, Skippy Peanut Butter, Brite-ize Cleaner, Dromedary Ginger Bread Mix and Rumford Baking Powder, all distributed locally by the Kuehn-Hall firm.

Straight commercials are almost always eliminated, with ad lib institutional and mentions found to be most effective as products are distributed to persons interviewed. Store banners, special product displays, window cards and a special "Kuehn-Hall Hostess" who assists performers on each show are among the merchandising ideas contributing to the effectiveness of the program. Sponsor has assigned a detail man to contact stores and set up displays in advance. In addition to effectiveness in selling sponsored products, show acts as outstanding merchandiser and good will builder with local merchants. It has proven particularly effective in introducing products not stocked by local stores.

Southwell to WCBW

JOHN SOUTHWELL, former television director of Young & Rubicam, New York, once with BBDO, New York, has joined WCBW, CBS video station, as a program director. Capt. Bob Benedick, AAF retired former cameraman and director at WCBW, has returned to station as director of mobile operations. Jerry Faust, engineer-actor, has joined WCBW staff as an assistant director. WCBW started series of basketball telecasts from Madison Square Garden Dec. 12, with Bob Edge handling commentary.

Feely Appointed

FRANK J. FEELY, manager of Western Electric Co.'s Specialty Products Shops in New Jersey, has been named manager of the company's electronic components manufacture. These manufacturing operations will be moved into a new plant to be built in 1946 at Allentown, Pa. Mr. Feely, with the company 25 years, has been responsible for much of Western Electric's production of radar and other electronic equipment for the armed forces since 1942.

NBC Syndicated Programs...

Network-caliber Shows that Build Local Prestige

NBC Syndicated Programs have a great record of building great audiences in cities throughout the nation because they're powered by the same top quality of talent...writing...direction... that's packed into NBC's great network shows.

And each client gets exclusive rights to his show in his sales-territory . . . shares the expense with other advertisers in non-competitive areas. That's what makes the cost so small it's almost negligible.

No wonder NBC Recorded Programs are picked for prestige . . . sought-out for sales . . . by national advertisers who want to spot certain markets . . . regional advertisers whose distribution nixes the use of networks . . . local advertisers who want network-caliber shows for a nominal cost.

With such outstanding programs as The Playhouse of Favorites, The Haunting Hour, Art Van Damme Quintet with Louise Carlyle and 5-Minute Mysteries, no wonder so many advertisers will welcome, look and leap at IDEA: 1946.

WRITE, WIRE OR PHONE FOR AUDITION RECORDS.

THE PLAYHOUSE OF FAVORITES... a prestige program with a solid commercial appeal... presents vivid dramatizations of the world's favorite stories... such as Dickens' Tale of Two Cities... Melville's Moby Dick... Jane Austen's Pride and Prejudice. Stories of adventure, haunting romance, sparkling comedy, are vehicles for famous stars like Will Geer, Wendy Barrie, Frances Hefflin. Schedule: 1 half-hour a week. Now available: 52 weeks of broadcasting.

THE HAUNTING HOUR . . . builds regular listener-tingling interest with original psychological mysteries . . . thrillers . . . crime crusade themes. It creates true-to-life characters, presents sociological and psychological problems. Top-flight writers originate imaginative scripts for such big radio-and-stage names as Eddie Nugent, Jean Gillespie. Each story complete in itself. Schedule: 1 half-hour a week. Now available: 52 weeks of broadcasting.

ART VAN DAMME QUINTET WITH LOUISE CARLYLE... a jet-propelled musical that "jumps with rhythm right out of this world." Pop songs... jazz classics... memory tunes... hits... interpreted by Art Van Damme and his famous swing accordion... Louise Carlyle with the warm, vibrant voice loved by millions of nation-wide network listeners... and a solid-sending quintet. Schedule for this traffic-stopper: 3 quarter-hours a week. Now available: 26 weeks of broadcasting.

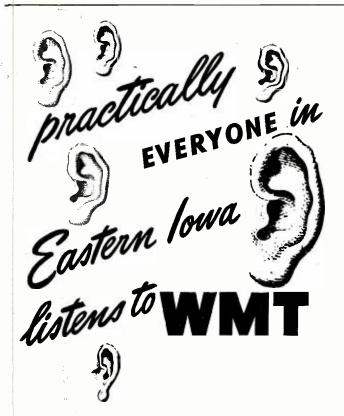

5-MINUTE MYSTERIES... packs all the appeal of a lengthy mystery program into 300 hair-raising seconds, for the sponsor who wants more than a spot announcement but less than a quarter-hour of radio time. New complete-in-5-minutes scripts by top writers are played by stars recruited from network shows. An original delayed-solution technique offers unusual commercial advantages. Schedule: Three five-minutes a week. Now available: 87 weeks of broadcasting.

Extension of Farm Broadcast Activity Is Urged in Resolution to NAB Board

of agricultural broadcasting activities within the NAB was urged at the Dec. 4-5 meeting of the Agricultural Directors Committee, held in Chicago [BROADCASTING, Dec. 5]. The committee passed a resolution laying out a program for immediate action.

Back of the resolution was the expressed desire to bring about closer relationship among commercial farm broadcasting, farmers, U. S. agencies and farm groups as well as advertising agencies and station management. Higher level of farm broadcasting is sought, along with use of the medium to promote understanding of farm problems.

The following program was recommended to the NAB board of directors:

directors:

1. The preparation of a brochure on agricultural broadcasting, stressing the factors contributing to a well-rounded and complete agricultural service by broadcasting stations; such presentation to be prepared for use by management and possible distribution to advertising agencies, listeners and others interested in farm broadcasting.

2. To develop closer working relations with the U. S. Dept. of Agriculture, other governmental agencies dealing with agricultural education and research.

3. To arrange periodic regional discussions or clinics, bringing together broadcasting management, farm radio broadcasters, representatives of the U. S. Dept. of Agriculture, other governmental agencies dealing with agricultural education and research, farm organizations, farmers and ranchers and others interested

in farm broadcasting; to examine the possibilities of extending the service of radio broadcasting to agriculture over commercial stations.

4. To establish for convenience of station management, a guide for determining qualifications of competent agricultural broadcasters.

5. To examine the NAB Standards of Fractice as they apply to agricultural broadcasting.

In addition, your committee to maintain and extend the services of agricultural broadcasting recommends the ultimate establishment of:

1. An agricultural committee member for each of the Seventeen Districts of the National Association of Broadcasters to work with station management in the respective areas.

2. To plan for the establishment within the NAB, of an agricultural director.

Members of the committee fol-

Members of the committee follow: Larry Haeg, chairman, WCCO Minneapolis; Art Page, WLS Chi-Cago; Bill Mosier, KJR Seattle; Bill Drips, NBC Chicago; Herb Plambeck, WHO Des Moines; Layne Beaty, WBAP Ft. Worth.

'Kyser Kollege' First

COLGATE - PALMOLIVE - PEET Co. Kay Kyser's Kollege of Musical Knowledge on NBC was first full program to be broadcast from an American military base during the period of World War II, the National Archives of the U.S. Government has announced. Transcription of first broadcast on Feb. 26, 1941, from the Marine base at San Diego, Cal., has been requested by Archives for posterity. Agency is Ted Bates Inc., New York.

Texas is one of the greatest states in importance. A vast industrial development is underway, comparable to Texas' great cattle, farming, sheep raising, citrus, shipping, mining, and oil and gas activities.

So great are distances in Texas that folks in the Panhandle can be skiing in sub-zero temperature when grape-fruit is ripening under an 80 degree sun in the Rio Grande Valley. Covering this vitally rich Southwest market, which includes an important part of Oklahoma, is the Lone Star Chain.

In addition to being economical and thoroughly effective, the Lone Star Chain is flexible. The chain consists of seven outstanding stations, but arrangements can be made to carry your programs on two or more of the basic stations plus any combination of the supplementary stations. Another advantage of the Lone Star Chain is that your program can be tailor-made for Texas. And this is important, if you want real results.

AVAILABLE IN COMBINATION WITH WATE, WATERBURY REPRESENTED BY RAMBEAU Business Leaders plan for

A The American Air Filter Co., Inc. plans . . .

RECONVERTING for good business ahead will be no problem for American Air Filter Company, Inc. We manufactured approximately \$25,000,000.00 of war material, but we were fortunate in being able to produce during the war all of our standard lines of air filters and dust collecting equipment, which were furnished to practically every war plant in the country. Our direct war material included ship sections and deck structures for LST and Destroyer Escorts, tank ventilation units, airplane carburetor filters and aluminum balks, which is the roadway for the M-4 floating bridge. The demand for the highest efficiency in air cleaning and dust collecting equipment used in war plants necessitated a continual expanding research program, which enabled us to develop superior products, which are now available for peace-time demands.

One of our principal developments during the war was the electronic air filter, which has the highest efficiency in dust removal yet developed. This device will remove smoke, which is actually made up of minute solid particles.

During the war our production totaled about eight times the pre-war volume, and after cancellation of war contracts we are still operating at approximately three times the prewar level. While there was some cutback in our total employment following V-J Day, we are rapidly building up our force again, and within the not too distant future hope our total employment will exceed our highest war level.

W. M. REED, President

☆ The Logan Company plans . . .

HE Logan Company is definitely no "war baby." Established in 1776, as the Dow Company, its name was changed in 1925 but the operation is still the same.

We have divided our production into four divisions which enables us to avoid slack periods of employment. These four divisions are: conveyors, bedding, builders' iron (all except structural) and light metals (fire screens, etc.). By simply transferring our workers from one division to another we are able to maintain steady employment. During the war most of our material was produced for priorities and Government contracts. For this work we employed 550 people.

We have had very few conversion problems, with none at all in our conveyor division which accounts for practically 50% of our total production. There are slight problems in the bedding, builders' iron and light metals divisions but the solution of these will only require approximately 30 days when we are given a governmental go-ahead.

As soon as we get into full production we will employ around 600 people.

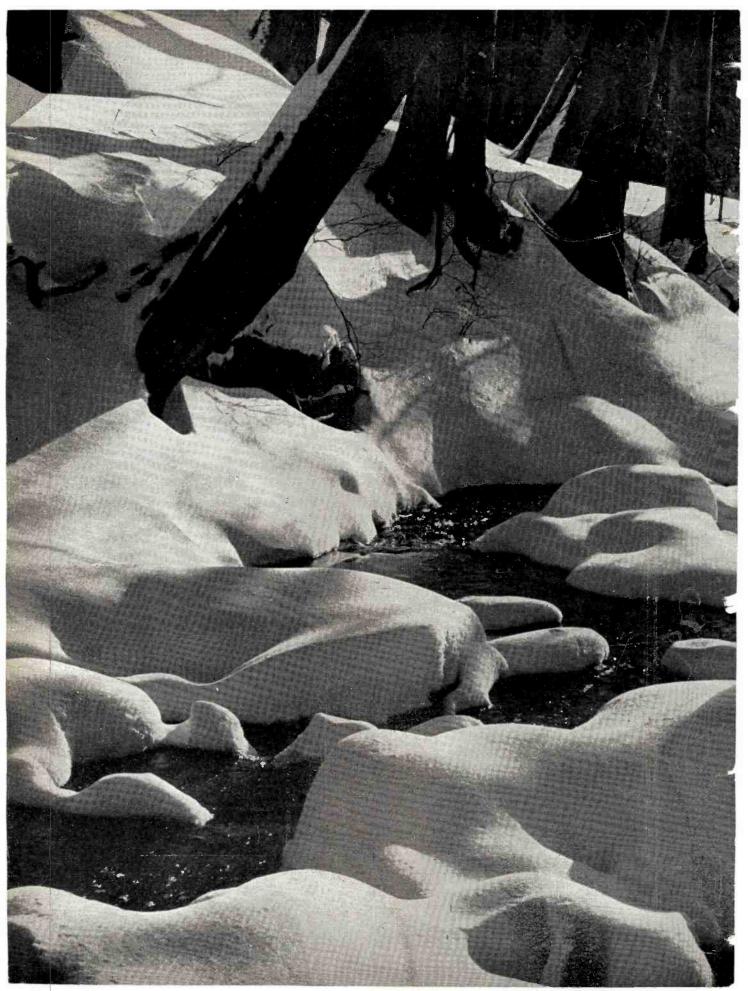

R. S. LOGAN, President

Merry Christman and Hoppy New Year

PAUL H. RAYMER COMPANY

Orchid for Guess-Who?

IT HAS NOT been the custom of this journal to say a ce things about Commissioner Clifford J. Durr of the FCC. Mostly because we disagree with most of his viewpoints he has expressed about American broadcasting.

We may be feeling the holiday spirit prematurely this year. At all events, it's a pleasure to observe the Commissioner's honesty and consistency.

He practically never says anything with which we agree. That is consistency.

He practically always says out loud what he conjures in his secret mind. That is honesty. Both virtues dignify him as a gentleman. Both virtues are worthy of emulation.

Now, if we could conjure up some way of leading him out of the wilderness and of converting him to the righteous cause which is Radio by the American Plan our satisfaction would be complete (well, nearly). For his holiday reading we commend the BBC editorial on this page, and perhaps President Truman's "Radio as free as the press" letter of last July.

A REVISED Government reorganization bill, which would empower President Truman to regroup, transfer or merge independent agencies, has been devised by House and Senate conferees. FCC now is among agencies which can be reorganized only under a separate legislative proposal. But it is not exempt. Whatever administration leaders may have in mind, it is to be hoped nothing will be done to remove FCC from its independent status to a political one under some other department or agency.

Wise Council

IN THE FOUR months that have elapsed since V-J Day when the last enemy of democracy capitulated, all the world has learned that emergency conditions didn't stop with the laying down of arms.

In radio that has been clearly demonstrated. While certain wartime restrictions have been relaxed or eliminated, the changeover to a peace-time economy is still ahead.

Thus the decision of the Advertising Council to continue its voluntary allocation activities, perpetuating the splendid plan developed perforce during the war, is a welcome one. Sponsors will be provided copy which they can accept or reject. Most of the peacetime public service messages will continue to originate from within the Government.

The service which the Council performed during the grim years, in sifting through multitudinous requests and releasing them on specific, scientific schedule, relieved broadcasters, ponsors and Government of many man-hours of conversation and conflict.

Even though the grueling war pace is over, we hope all in radio will get behind the peace-time Council operations with the verve and vigor the effort deserves. The job done under its auspices is one of the unsung phases of advertising's contribution in the great struggle.

Busy as a BBC?

THE FOLLOWING is an Associated Press dispatch from London, dated Dec. 5:

"The cost of the British Broadcasting Corporation for the year ended March 31, 1945, was \$17,155,252.00."

The cost of American broadcasting system—including four major networks, five regional networks and 875 standard stations—during 1944 was \$185,025,760.00 (FCC figures). In other words, American broadcasting costs considerably more in one month to operate than the BBC expends in a year.

And what does this expenditure mean? It means jobs—for writers, producers, musicians, performers, announcers, executives, for all manner of personnel employed in the art.

Moreover the figure, based on some 26,000 fulltime employes, does not include the thousands of executives, timebuyers, producers, script writers, announcers, musicians and technicians employed by advertising agencies, sponsors, program producers, transcription firms and other industries which actually are an integral part of the American system.

Is this, then, a system of broadcasting to be condemned—the system that attracts listeners through its virtues, and not through a tax? Is this a system to accept without challenge the loosely-phrased and uninformed criticism of such as Chairman Cannon of the House Appropriations Committee?

It was Chairman Cannon, whose frequent statements on full employment are well known, who said he preferred a state-owned system like the BBC to a private-owned system of broadcasting like America's. Did he know that he was speaking against the very principles he has expounded?

And even more intriguing than such a comment from a man in such a position is another dispatch, in which Harold J. Laski, chairman of the Executive Committee of the Labor Party in England, describes British radio as "a part of big business."

Mr. Laski goes on to say that the BBC is stunted by a policy of "for heaven's sake, let no one of any importance be offended to the slightest degree."

British listeners for years have complained about the dullness of the BBC program fare. Now there's a new basis of complaint, according to Wireless World. With the European war over eight months, says this technical journal, "complaints as to the poor quality of BBC transmissions are coming in thick and fast from many parts of the country." The journal continues that those who have tolerated six years of wartime conditions are now "out of patience with a system that sometimes fails even to afford intelligible speech."

Excessive use of recordings—another wartime hangover—also is cited by Wireless World. "The greatest asset of broadcasting is its power of presenting living actualities and failure to exploit this power is a psychological error of the first magnitude."

We can be thankful that in this nation, where free radio is practiced, offense is withheld from no one, regardless of the relative measure of his importance. Free radio is a check and balance against the evils of that importance. Free radio can speak without favor—and it can give meaning to the well-known economic principle that employment means prosperity.

Our Respects To -

LEONARD HAROLD MARKS

ULLY conscious of the surging swell of radio as it sweeps on to new and greater horizons, Leonard Harold Marks, assistant to the general counsel of the FCC, is traveling with the tide. In less than three years with the Commission, this personable young man—he is not yet 30—has taken on some heavy assignments and has become one of the ace radio lawyers in the government.

As anyone who sat in at the Crosley-Avco transfer or numerous other proceedings would have observed, Leonard Marks is alert, concise, impressive. His presentations are complete; his approach efficient. He knows his law and his radio. And he has a broad understanding of the problems.

He feels that radio has grown up a great deal in the last decade and that the time has arrived to give tangible recognition to that growth. He believes that licensees generally have developed an increasing recognition of their responsibilities as the importance of radio as a social force has been demonstrated so often in recent years.

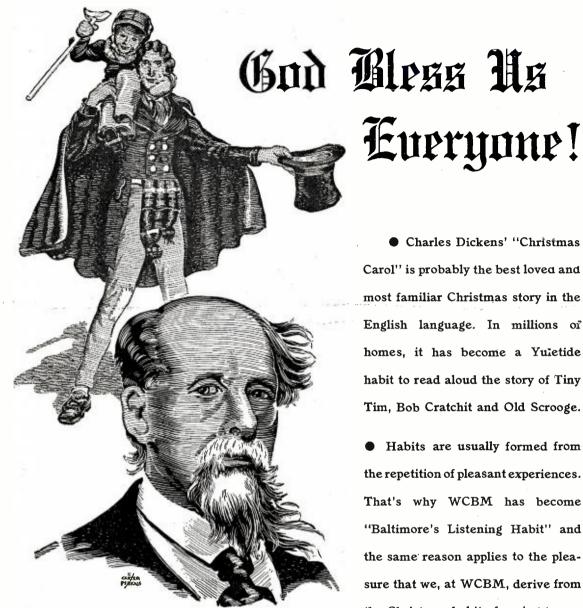

Mr. Marks thinks the Communications Act of 1934, under which present policies are based, could stand some clarification in light of the changes that have taken place since the law was enacted. He points out that revocation of a license as penalty for violation of the rules, while infrequently imposed, is a much more serious thing today than when the law was written and that perhaps a system of fines, with provision for court review, would be fairer and just as effective.

Prices paid for stations today, he adds, would have been considered fantastic by the framers of the Communications Act. The Crosley-Avco case is a conspicuous example, he points out. Yet, the Commission must be guided by a 1934 law in passing on transfers. Revision of the Act might well incorporate an up-to-date policy for dealing with station sales.

Leonard Marks has a record for fine performance. Bern in Pittsburgh March 5, 1916, he was second in his graduating class at the U. of Pittsburgh where he took his A. B. in 1935 and where he was elected to the Hall of Fame as a member of Omicron Delta Kappa, scholastic fraternity. He majored in political science, writing a thesis on outmoded parliamentary practices in Congress.

Aspirations for a journalistic career found expression in college activities. He was managing editor of both The Life, college yearbook, and The Panther, monthly magazine. In addition, he became associate editor of the Pitt News, the college newspaper. Incidentally, he paid his college expenses by adapting campus jokes for industries and selling them to trade

Baltimore's Listening Habit

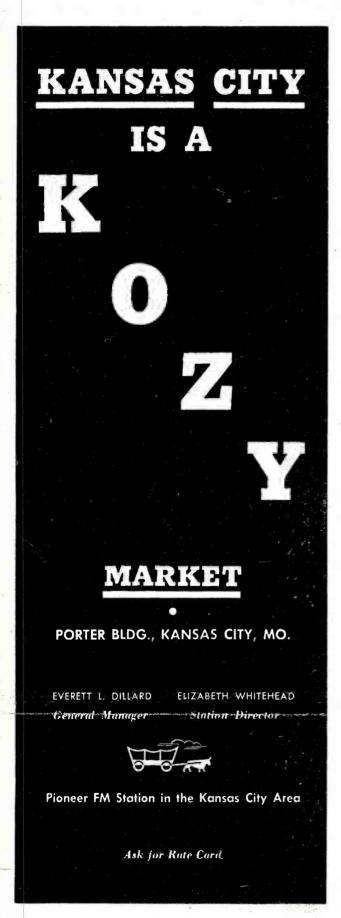

MUTUAL BROADCASTING SYSTEM

John Eimer

Free & Peters, Inc.

George H. Roeder

- Charles Dickens' "Christmas Carol" is probably the best loved and most familiar Christmas story in the English language. In millions of homes, it has become a Yuletide habit to read aloud the story of Tiny Tim, Bob Cratchit and Old Scrooge.
- Habits are usually formed from the repetition of pleasant experiences. That's why WCBM has become "Baltimore's Listening Habit" and the same reason applies to the pleasure that we, at WCBM, derive from the Christmas habit of saying to you with Tiny Tim, "God bless us everyone."

Respects

(continued from page 54)

magazines for two dollars an item. In 1935 he entered the university law school, graduating in 1938 with a straight A average, finishing first in his class and receiving the Order of Coif for meritorious achievement. His treatise, "The Law of Tenancy by the Entireties" was good enough to haunt him later in a court case which he lost when his opposing counsel referred to it for a significant citation.

Appointed a faculty fellow upon graduation, Mr. Marks squeezed in an hour a day teaching at the university for the next four years while getting his practical law experience with the firm of Reich & Miller. After an apprenticeship of six months during which he tried a case a day as defense counsel appointed by the court, he went to work on commercial cases. He handled many cases turned over to him by other lawyers, particularly those involving labor and taxation cases. His experience in this field has given him a high appreciation of the value of specialization—something he believes cannot be given too much emphasis in government administration.

Mr. Marks headed for Washington in July 1942 when he joined the legal division of OPA. He transferred to FCC in February 1943 as senior attorney in the Law Dept., becoming chief of the New Facilities Section in June 1944. He was promoted to his present post in March 1945. Last year he gave a course in Law of Domestic Rela-tions at National U., a subject which, as a young bachelor, he relates with amusement, he is eminently qualified to teach.

One of these days, Leonard Marks is likely to join the busy ranks of Washington radio lawyers who practice before the Commission rather than under it. But it would not be surprising if he later enters the field of politics. He was raised in an atmosphere of politics, his father having been 'town constable" in a local Pittsburgh ward for some 35 years. As a boy, he helped in getting out the votes, driving people to the polls, organizing campaigns. While a student he attended both national conventions.

At home in his apartment in the Dorchester House, Mr. Marks may be found on an evening reading from the works of Charles Lamb, his favorite author. For lighter reading, he particularly enjoys the "Tut and Mr. Tut" stories of Arthur Train. For exercise, he likes tennis.

BBC Spends 17 Million

BRITISH Broadcasting Corp. spent £4,288,813 (\$17,155,252) in the year ended March 31. Of that total £1,474,612 went to artists, speakers and other program talent; £452,295 for performing rights; £68,621 for news royalties, and the rest for engineering, taxes, rents.

Prefer to Attend

TELEVISION will keep few people from attending major sports events when they are telecast, judging by the United Press "The Man in the Grandstand" question Dec. 11. Of the replies, most indicated they would prefer to see the game itself, with two indicating they might see fewer games but wouldn't stay away most of the time.

ANDERSON NAMED NEW WKBZ MANAGER

Mr. Anderson Mr. Ashbacker

GRANT F. ASHBACKER, owner and general manager of WKBZ Muskegon, Mich., announced last week that he had appointed Leonard A. Anderson, Western Union superintendent at Grand Rapids, to take over general managership of WKBZ on Jan. 1.

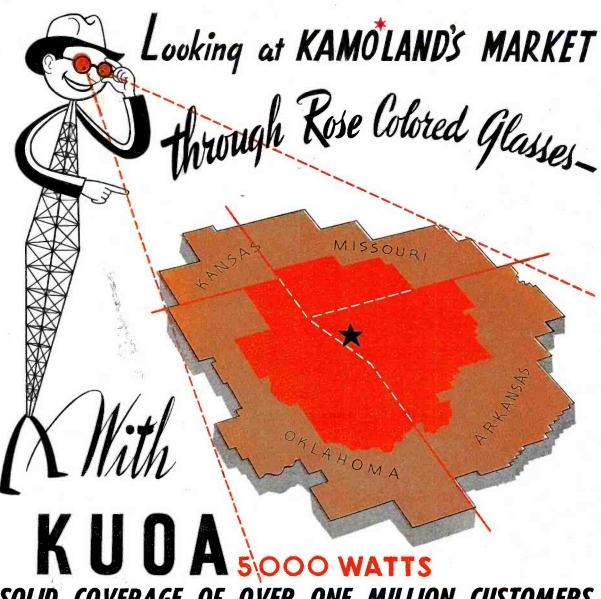

Mr. Ashbacker, continuing as president of Ashbacker Radio Corp., licensee of WKBZ, said he plans to devote his time to development of a new FM station in Muskegon, for which a construction permit has been issued, and to develop better facilities and secure increased power for WKBZ, now operating with 250 w. Other plans, he said, include installation of another station in that area and setting up of Western Michigan Network "on a business basis." Network now operates from WKBZ with lines to WKLA Ludington and WTCM Traverse City.

Mr. Ashbacker won a Supreme Court decision two weeks ago in his efforts to secure 1230 kc with 250 w for his Muskegon station, now on 1490 kc [Broadcasting, Dec. 10]. In addition to WKBZ, Mr. Ashbacker owns half interest in Ludington Broadcasting Co., licensee of WKLA.

Mr. Anderson, new WKBZ general manager, was Western Union manager at Muskegon in 1935-36. For the past three months he has been at Western Union executive offices, New York, working on a new system for revision and issuance of operating instructions to all WU offices in the U.S.

Miss Noble Married

MISS JUNE NOBLE, daughter of Mr. and Mrs. Edward John Noble of New York, was married Dec. 8 to Lt. David Shiverick Smith, USNR. Mr. Noble is chairman of the board of American Broadcasting Co.

SOLID COVERAGE OF OVER ONE MILLION CUSTOMERS

Yes, when your sales-message is directed to the 1,220,958 people in the KAMO*LAND market area, you're going into the homes, stores and offices which control annually over \$200,000,000 in buying power . . . a "rosecolored" sales-picture, indeed.

You see, KUOA is the ONLY radio station in its primary area which reaches easily into over 200,000 radio homes in four great states—

The Voice of . . . *

National Representatives: The Walker Company

Kansas, Arkansas, Missouri and Oklahoma!

Through the voice of KUOA, then, your products or services will get "first call" in the radio homes of this rich market area-resulting in your ultimate goal-INCREASED SALES. Let KUOA help you develop this outstanding market.

A 5000 WATT STATION

Siloam Springs, Arkansas

5000 Watts -- 1290 Kilocycles

A BRIEF REPORT FROM THE MOUNTAIN

Plans for Earle C. Anthony Co.'s new FM station are rapidly nearing completion. It will be located at the crest of Mt. Wilson, about half a mile from the world-famous Wilson Observatory. The proposed FM station will consist of three station will consist of three buildings to be constructed at a cost of \$126,000 including technical equipment. When Mt. Wilson was selected as the site for the new FM station, KFI's Chief Engingers, H. L. Blatterman and Curtis Mason conducted extensive measurements throughout the area. Their interesting findings were presented at an open hearing on FM and Television held by the FCC in Washington early this year. We can modestly say that the Commission was pleased with these gentlemen's efforts which, by way, represented the first of such tests to be made at an altitude of 5,728 feet and at 43.7 and 100 megacycles. Seymour Johnson has been appointed FM and Television Facilities Engineer.

> A LITTLE FUN IN THE MORNING

Jack Latham who reports the do-Jack Latham who reports the do-ings in the movie capital on KFI's daily program called "Hollywood Fan Magazine" (Monday thru Fri-day 10:30 a.m.) dropped by the other day with a bright one. When RKO's star, Walter Slezak, made a guest appearance on "Hollywood Fan Magazine" recently, he threw the boys into a panic when he stated his greatest ambition as an actor was to play the life of sixteen year-old Sonny Wisecarver!

FASTEST GROWING AFTERNOON AUDIENCE IN INDIANAPOLIS

Proof that WIBC's rapid rise to top position in Indianapolis afternoon listening audiences is no "flash in the pan" is the steady climb this station has earned since April.

In this period, WIBC, and only WIBC, has enjoyed a consistent month to month gain totaling 8.1. Good programming, and an alert consciousness of the public interest have combined to make WIBC "tops" in listeners' favor, and "tops" in advertising investment for this area.

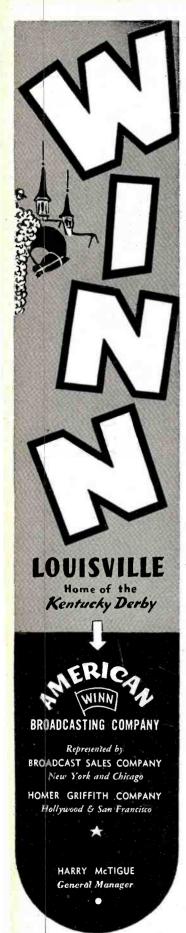

Ask your Blair man for further facts.

NBC Xmas Video

NBC Xmas Video
TWO CHRISTMAS programs on NBC
television were presented on its video
station, WNBT New York, Dec. 9. "The
Strange Christmas Dinner", adapted
from the story by Margaret Cousins in
this month's issue of Good Housekeeping Magazine, told the story of a modern Scrooge. "The Television Christmas
Shopper", public service program, gave
a preview of popular merchandise for
the family now available in leading department and gifts stores.

SOOO WATTS DIRECTIONAL OVER NEW YORK America's Leading oreign Language Station

MILE HIGH FARMER

They don't all listen, but mail from 25 states and 2 Canadian provinces proves that a lot of them do. That's important because 57% of the population is rural in KOA's vast bailiwick.

And the varied fare "Hal" Renollet serves them suits not only cattlemen and ranchers but proprietors of the small, rich farms in the "sure-crop" area—that ½ of all the irrigated land in the U. S. which is within reach of KOA's 50,000-watt signal. Mail from the womenfolk, too, shows that the recipés, homemaking hints and handicraft ideas that Hal dishes out are more than welcome.

What they like best is that Mr. Renollet is one of them. Core of many a broadcast is a transcribed interview, made at stock show, farm or ranch. On this and many counts, "Mile High Farmer" is a unique farm radio service, and it pleases . . .

-- No wonder KOA's **FIRST!**

Francisco. Gillette Safety Razor Co.,
Boston, sponsors both contests on MBS.

For Fastest Delivery

SHIP EARLY IN DAY! Thus you avoid end-of-day pile-up at airports. Early shipment often means same day delivery to points from 500 to 1000 miles away. From coast-to-coast overnight.

YOUR SHIPMENT travels 3 miles a minute between airports with special pick-up and special delivery at both ends in all major U. S. towns and cities. Rapid air-rail service to 23,000 other domestic points. Service direct by air to and from scores of foreign countries.

TYPICAL RATES shown in box are, on an average,

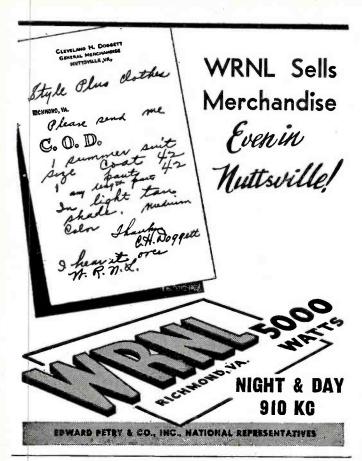

101/2% lower than prewar rates. As Air Express operations have increased in efficiency, savings have been passed on to the shipper, making this service a better business buy than ever.

In private life he is Frank Zwygart; Mrs. Zwygart and their two children will remain in Cincinnati until the end of the spring school term.

How are you Fixed for Vitamin A?

PAUL H. RAYMER CO. National Representative

Carrots are an excellent source of Vitamin A and Vitamin A improves vision, promotes growth.

Many advertisers are getting their business Vitamin A from the **Beeline**, which improves their sales vision and definitely promotes growth.

The **Beeline** with its 42 primary counties is the only combination of stations that properly can cover the California Central Valley plus Western Nevada.

WHAT THE Beeline 15... not a regional network but a group of long established key stations, each the favorite in its community... combined for national spot business.

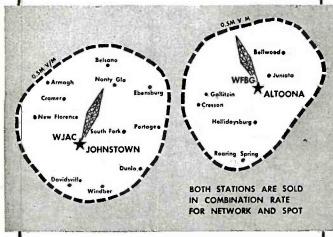

See the McClatchy **Beeline** rate listing, first under California in Standard Rate and Data.

Programs

Combining four separate broadcasts into a full hour and a half audience Into a full hour and a half audience participation program, new idea in programming started on CBS Pacific stations Dec. 9, Sunday 2:30-5 p.m. (PST). "Money on the Line", with Jerry Lawrence as m.c., is initial half-hour series. Featuring five soon-to-be-wed couples, "Your Hope Chest" follows with Jimmy Wallington as m.c. Third program is "Answer Auction", 25-minute quiz show with contestants bidding for their questions. Harry Mitchell is m.c. Final five-minute segment, "Winner Take All", features winners from preceding three shows, with \$200 cash jackpot. George Allen, program director of Columbia Pacific network, produces series. duces series.

New on WPEN

New on WPEN

SIX new programs have been started by WPEN Philadeiphia during past week. Recorded classical music series "Philadeiphia Philharmonic" is heard Monday through Saturday. Late evening Monday through Friday series "Conversation at Midnight" presents salon, concert and operetta music and selected verse and prose. Juvenile "Heigh-De-Ho" program, heard 7:05-8 am, weekdays, is patterned after column of same name for high school folk in Evening Bulletin. Prizes for guessing top tunes of the week are awarded on six weekly "Brady Beats the Band".

Second Series

Second Series
Second Series
Second Series of "Candles in
the Dark" religious program on WNEW
New York will be devoted to customs
and practices of Protestant Church.
First period dealt with Jewish customs
and lore. New series "Candles of
Knowledge" starts Dec. 20 and will be
presented in cooperation with Protestant Council of New York City.

Junior Forum

PRO and con views of high school students on public problems will be heard on "Junior Town Meeting of the Air", new series to be aired weekly starting Jan. 10 by KYW Philadelphia. Moderator is to be former Supreme Court Justice Owen J. Roberts. Program is scheduled Thursday 9:15-9:45 a.m.

Ski Series

NEWS of the ski world, ski club activities and equipment notes are commented on by Chuck Wright on "Ski Headlines", new WTHT Hartford, Conn., program heard Monday, Wednesday and Friday evenlings. Snow conditions, weather forecasts and transportation information is included with interviews

Hockey Broadcasts

SUNDAY home hockey games of the New York Rovers in the Eastern Ama-teur Heckey League started on WHN New York Dec. 16 as sustaining feature. Series ends March 6. Station also broadcasts home games of New York Rangers in National Professional Hockey League.

OPA Benefits

HOW OPA functions and helps consumer, business, labor, and returning veteran in fight against inflation is told in new dramatic series "The Most for Your Money" started on Associated Broadcasting Corp. Dec. 16 as weekly Sunday evening quarter-hour.

On American Pacific

WITH a mythical "Dinty's Theater Restaurant" as locale, new weekly half-hour variety program started on American stations Dec. 5. Joaquin Garay, owner of San Francisco Copacabana Club, portrays himself, and Berton Bennett is Dinty.

Light Views of News

ALAN SCOTT, recently discharged Naval commander previously with WCAU Philadelphia and WGN Chicago, will discuss the day's news in humorous vein in a new Mutual series "Once Over Lightly", starting Dec. 17 in Monday-Friday 1-1:15 p.m. spot.

Children's Symphony

SCHEDULED to extend into May, "Philadelphia Children's Symphony" was aired by WPEN Philadelphia for first time Dec. 8 as Saturday morning hour program. On alternate weeks the Phila-

delphia Orchestra and the WPEN Symphony Orchestra perform. Talented children appear as guest soloists on program originated before young folks audience at University of Pennsylvania

Stories Dramatized

PRODUCED in cooperation with Junior League, "High Adventure" program has been started by WWI New Orleans. Series dramatizes children's books and stories, is aired in Saturday morning quarter-hour spot.

Jobs for Vets

IN COOPERATION with Veterans Adm. and U. S. Employment Service, WCOV Montgomery, Ala, is presenting daily quarter-hour "Veterans Program" to welcome home and secure positions for returned service veterans.

Children at Zoo

FROM the National Zoological Park WMAL Washington is now presenting quarter-hour "Sunday at the Zoo". Children are interviewed and youngsters with most original reaction to the animals receive prize.

Overseas Sports Show

WEEKLY resume of sports in Canada now is broadcast overseas by Foster Hewitt via CBC Dominion network and international service for Canadian troops. Interviews and question box are included.

WINS Characters

NEW TWICE-WEEKLY program "Are You a Character?" started on WINS New York Dec. 13. Lou Dahlman inter-views a variety of characters on each broadcast.

Mass Broadcast

MIDNIGHT MASS from the Grotto in the Franciscan Monastery in Washing-ton will be broadcast Christmas Eve over WMAL Washington. Mass will be described by a priest.

Mystery Shorts

FAST-MOVING 10-minute mystery series, "Retribution", started on American Pacific stations on Dec. 5.

Farm Show

COUNTY farm agents, organizations and farmers appear on "RFD 1070", new Saturday 1-1:30 p.m. program heard on WIBC Indianapolis.

WBKB Shows Varied

WBKB Chicago brought subjects ranging from housing to pleas for aid for polio victims before the video camera last week. In an interview Dec. 11 with Joe Wilson, commentator, Conrad (Connie) Hilton, president of Hilton Hotels of America, discussed plans for alleviating the nation's housing situation. The 8 p.m. portion of the evening's telecast presented a special plea for support of the Sister Kenny National Foundation. Program titled And They Shall Walk, featured a demonstration of the Sister Kenny technique for aiding polio patients. Johnny Neblett, of So the Story Goes, was guest on the weekly Wednesday telecast of Treasury Hour, sponsored by the Treasury Department to help boost Victory bond sales.

Toronto Meet

TORONTO Radio Executives Club is holding its Christmas luncheon on Dec. 20 at King Edward Hotel. Guest speaker will be Lorne Greene who will describe forthcoming establishment of Academy of Radio Arts and introduce staff of the first Canadian school for teaching radio broadcasting [BROADCASTING, Nov. 19].

WCAU again demonstrates its true value and the great power of radio . . .

WARRISTON

AREA OFFICE

1405 Locust Street, Philedelphia - Pennsylvania.

November 7, 1945

WCAU Broadcasting Company 1622 Chestnut Street Philadelphia 3, Pa.

Gentlemen:

I would like to express my sincere appreciation for the contribution made by WCAU to the United States Employment Service.

The most recent contribution of service by WCAU is the weekly "Jobs for Veterans" program. Seventy-seven of the eighty veterans who have so far appeared on the broadcast have been placed in work they desire. The value of this public service is also reflected in the interest both industry and business are exhibiting in the broadcast.

I wish to express the gratitude of this agency to WCAU for the cooperation extended to the United States Employment Service in promoting the vital phases of its programs.

Cordially yours,

Levy anderson

Speakers included Secretary of Agriculture Clinton P. Anderson.

American Broadcasting Co. Is 'ABC'; Associated Changes Name—Now 'ABS'

AMERICAN gets the "ABC" tag; Associated becomes Associated Broadcasting System, which may be abbreviated to "ABS."

Out-of-court settlement of Associated Broadcasting Co.'s suit against American Broadcasting Co. over use of the "ABC network" identification was announced last week in a joint statement by Mark Woods, president of American, and Leonard A. Versluis, president of Associated. American reportedly paid Associated \$25,000 for the symbol.

A stipulation by both parties for dismissal of the suit is expected to be filed in Chicago early this week.

Associated originated the suit last Aug. 10 before Federal District Court in Grand Rapids, Mich. The court dismissed it, acknowledging the defendant's contention that it (American) was not doing business in Michigan and therefore the court lacked jurisdiction.

Associated countered by carrying its arguments to U. S. Federal Court in Chicago on Oct. 2, asking that American be enjoined from

United Nations Meeting

DAVID SARNOFF, RCA president, served as chairman at a panel discussion on international communications held Friday at Town Hall, New York, under the auspices of the American Assn. for the United Nations. Panel participants were: Alfred J. McCosker, Mutual chairman of the board; Lyman Bryson, CBS director of education; Robert Saudek, manager of ABC public relations; Claude Jaegger, AP assistant general manager; Harry Flory, UP foreign news editor and director of communications.

use of "ABC" as its network designation. A week later Associated filed a motion for a temporary injunction to restrain American from using the symbol until the court delivered its opinion. This hearing was continued—first to Nov. 7 and then to Dec. 3. On Nov. 30, attorneys for both networks appeared before Judge Michael Igo to plead a further continuance on the grounds that neither was prepared to argue the case. The court then set Jan. 25 as date for the hearing.

Runyon & Guggenheim Form Radio Video Firm

RUNYON & GUGGENHEIM Enterprises, new Hollywood firm specializing in radio and television productions for United States and Latin America, has been established by Jack W. Runyon and Robert Guggenheim Jr. Firm also handles idea development and business management. Headquarters are at 6331 Hollywood Blvd. Telephone is Hempstead 4133.

Mr. Runyon, until recently, held post as director of radio for Coordinator of Inter-American Aifairs, Hollywood office. He was formerly New York radio director of Ted Bates Inc., and Buchanan & Co. Prior to that he was for 13 vears radio director of the former Lord & Thomas. Mr. Guggenheim, released from Navy as lieutenant, most recently had been in charge of broadcasting censorship on West Coast for Office of Censorship. Prior to Navy service, he was producer of KNX Hollywood. Previously, he had been an associate producer of 20th Century-Fox.

WE'RE PESSIMISTIC ABOUT LITTLE HOPE (Ky.)!

With a name like that what chance has a town got? But for the Louisville Trading Area, now, WAVE has more than hope—it has facts! For instance: Here will find a concentration of more industry, more buying power than in the remainder of Kentucky combined. And we're able to offer it at a low price because we don't spend dough on the power to reach such despondent settlements as Little Hope. Shall we tell you more?

Peter Hand Brewery Co. Moves Account to BBDO

PETER HAND BREWERY Co., Chicago (Meister Brau beer) moves from Mitchell Faust Adv. Co., Chicago, to Batten, Barton, Durstine & Osborn, Chicago, effective March 1. Account, which has an estimated local billing of a quarter of a million dollars annually, now broadcasts six half hours weekly and two quarter hours six times a week. Shows and their latest Hoopers are as follows: Crime Files of Flamond, 9.6; Country Sheriff (no Hooper yet); Mystery House, 6.9; Bulldog Drummond, 8.5; Casa Cugat, 1.2; all half hours on WGN Chicago; Easy Aces, 6.7, WGN quarter hour show; Casa Cugat (no Hooper available), quarter hour 6 times weekly on WKZO Kalamazoo; and Boston Blackie, 3.9, half hour, WMAQ Chicago. Effective Dec. 29 Boston Blackie will move from WMAQ to WGN, Bulldog Drummond, replacing which is being taken over as network show by Tums. Mitchell Faust has handled the account for approximately 11 years and as a result of the showing of programs it is expected that the shows will continue as they are under the new

No Congressional Action Likely on Copyright Bill

LITTLE hope of Congressional action on a bill to amend the copyright laws by requiring protection on acoustic recordings played on juke boxes was seen on Capitol Hill last week. The bill (HR-3190), introduced last May 11 by Rep. Buckley (D-N.Y.) "by request", languishes in the Patents Committee where no action is scheduled.

Rep. Buckley, declining to identify those who requested he introduce the measure, said he did not plan to push for action, although he has received several inquiries lately regarding the legislation. The bill would demand the copyright laws by striking out a portion excluding reproduction of musical composition "by or upon coinoperated machines" except where admission is charged to the places where such machines are operated.

The Buckley Bill would make it unlawful to use, without permission of the copyright owners, any copyrighted musical composition for an "acoustic recording" or of any duplicated recording thereof on a disc, film, tape, wire, record or other device or to "publish or vend" such recordings acoustically to the public for profit. The measure also would prohibit reproduction of acoustic recordings on "any transmitting or communicating apparatus", without copyright owner permission and payment of fees.

THOMAS J. LIPTON Inc., "Inner Sanctum" program on CBS breaks its mystery format tradition on Christmas night to present Helen Hayes in a half-hour narration of "The Littlest Angel", 9-9:30 pm. on CBS. Agency is Young & Rubicam, New York.

International Communications Should Be Under One Organization, Says Porter

FCC CHAIRMAN Pau A. Porter is convinced that U.S. international communications companies must be "integrated" into one organization.

That's his personal view based on a 12-day British Commonwealth-U.S. Telecommunications Conference in Bermuda [BROADCASTING, Dec. 10], he told a news conference last Monday—the first he has held since he became Commission chairman Dec. 21, 1944.

Mr. Porter said the Bermuda Conference "represents the greatest advancement in international communications since the establishment of direct radio circuits." The Conference accomplished: (1) direct communications to principal points of the British Commonwealth of nations, and (2) a rate pattern that represents downward adjustments, he declared.

Mr. Porter elaborated on the signed agreement, as Dec. 7 by the State Dept., declaring that the "old system of the tight British communications policy of monopoly has doned." That was brought about, he explained, by understandings between the delegates.

"From the standpoint of the U.S. and commercial carriers and external communications policy, we achieved at Bermuda everything possible," he said. "The concessions were all one way. We had nothing to offer or trade with."

Mr. Porter said he didn't know just how integration of American carriers should be accomplished, but he felt personally that the U.S. must effect some sort of a unification. He said Canada has a privately-owned company while in the British Empire telecommunications are under public ownership.

He said he was "more convinced that the conservation of frequencies and the most effective use of cables are desirable. Domestically international communications are competitive; internationally they're not," he added.

The U.S., he said, agreed to only one circuit each to Australia, New Zealand and India, new served by both RCAC and Mackay. Chairman Porter said the FCC soon would hold hearings to determine which of the two companies will be

permitted to retain the single circuits to each of the three countries.

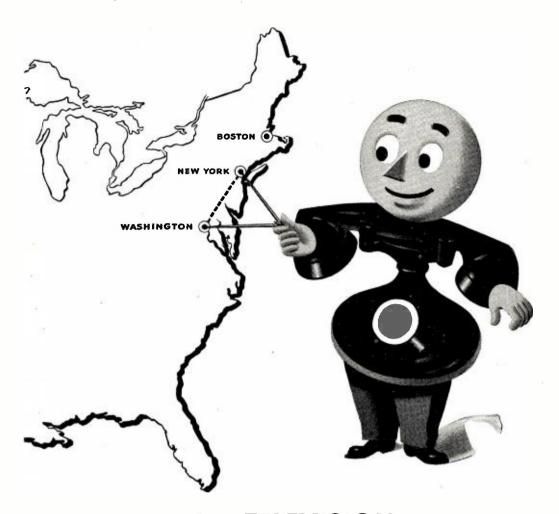

The Bermuda Conference will result in "great savings" to users of international communications, he added. Agreement signed by the delegates, yet to be formally ratified by the foreign departments of the British Commonwealth of Nations and the U.S. State Dept., becomes effective "on or before April 1, 1946."

Chairman Porter said he didn't think radio communications would replace cable, particularly across the Atlantic, as suggested before the Senate Interstate Commerce subcommittee on international communications early this year. The committees on cables at the Bermuda Conference recommended modernizing the underseas systems with submarine repeaters and variaplex operations.

Recommendations should be made at the next world telecommunications conference looking towards standardizing teletype equipment, the FCC chairman said. Hotold about a demonstration conducted in Bermuda by Maj. Gen. Frank E. Stoner, in which communications were established almost immediately with Manila, London, Washington and other points.

Clark Tours

RAY CLARK, chief newscaster and director of special events of WOW Omaha, has completed a five-week speaking tour of 29 cities in five states in the WOW area, relating experiences as WOW war correspondent in the Pacific. He averaged more than three appearances daily, addressing school and college audiences in addition to his regular evening speeches. In almost all the cities he conducted his Noonday Forum by direct wire to WOW the series on which he had reported his visits with more than 300 Midwest servicemen during his four months overseas. Speaking tour was arranged for the Victory Loan drive in response to requests from civic and patriotic groups who wanted to hear his war experi-

NETWORK FOR TELEVISION

Coaxial Cable Link in Initial Tests

Bell System coaxial cable carried television of the Army-Navy football game from Philadelphia to New York on December 1. This was an experimental preview of long distance television by cable.

Beginning in January, coaxial cable between Washington and New York will be regularly scheduled for experimental television use.

Each coaxial tube, with present amplifying and terminal equipment, can transmit

a television signal, or 480 simultaneous telephone messages. For several years the Bell System has been using coaxial cable to carry telephone conversations over certain intercity routes. Within the next few years upwards of 7000 miles of coaxial cable will be constructed.

The Bell System is installing a network of facilities suitable for television which will ultimately span the country from coast to coast and from north to south.

BELL TELEPHONE SYSTEM

SEEING RED British Set Makers Eager For BBC Green Light-

"AMERICA will step in and beat us" if no green light is given for set manufacture in Britain, says Charles Harmer, British television industry spokesman. He promised television sets costing between \$120 and \$160, with price cuts at the end of the first year. Manufacturers are ready for the domestic and export market, he stated, if only the government gives its o.k.

Director General of the BBC W. J. Haley, said that he was still not certain when television broadcasting would resume in England. He blamed the shortage of men and equipment for current delays in production.

IMPROVED HEALTH BROADCASTS URGED

NEED FOR showmanship in programming health broadcasts, which currently feature "paper-crackling doctors . . . still talking about the common cold in the same dull way," was urged upon a conference of the New York Tuberculosis and Health Assn. Dec. 12 by Seymour Siegel, program director for WNYC New

Mr. Siegel, recently released from Navy service, said that upon renewing his association with health broadcasts he got the feeling: "This is where I came in." He stated that "imagination, production and good writing" were essential in health programs if health authorities wanted to keep listeners tuned in.

AER Northeastern Directors

STATE directors of the Northeastern Region, Association for Education by Radio, met Dec. 8 at Hotel Sheraton, Newark, home of WAAT Newark, with Irving R. Rosenhaus, station president and general manager, as host. Present were (clockwise) Max J. Herzberg, principal, Weequahic High School, Newark; Miss Luella Hoskins, Red Cross; Dr. G. A. Nolan, supervisor, business and distributive education, Wilmington, Del.; Miss Ruth Doerr, radio assistant, Philadelphia public schools; Mr. Rosenhaus; Mrs. Gertrude Broderick, U. S. Office of Education, secretary of Federal Radio Education Committee; Robert Hudson, second vicepresident, AER, and education department, CBS; Mrs. Frances Pierre, WAAT; Robert Beede Macdougal, AER Northeastern Region president and director of educational activities, WAAT; Edmund A. Cortez, U. of New Hampshire; Leon Levine, assistant director of education, CBS.

Microwave Relay System Is Requested For New Chicago and Milwaukee Link

CONSTRUCTION of a microwave radio relay system between Chicago and Milwaukee to handle television, sound radio programs or long-distance telephone calls was proposed last week by American Telephone & Telegraph Co., which filed application with the FCC for authority to build and operate the system on an experimental basis.

The company announced that the system, which it hopes to have ready for tests by the spring of 1947, would cost \$500,000. Plan is for initial employment of the system for television transmissions in cooperation with telestation WMJT Milwaukee or with other television broadcasters who may want to use it during experimental stages. First experiments will be on frequencies in the 4,000 mc range.

AT&T expects such systems to be important to future communications in combination with the nation-wide network of coaxial cables now being laid. Currently another radio relay system is under construction between New York and Boston. The company predicted that Bell System television networks would consist of inter-connected coaxial cable and radio relay channels.

The Chicago-Milwaukee relay system, it is hoped, will be finished before completion of a project to link Chicago with eastern cities by coaxial cable.

AT&T reported the Bell System proposes to add 1,500 miles of coaxial cable yearly to its services.

Terminals for the Chicago-Milwaukee relay system will be at the Illinois Bell Telephone Co.'s long distance center in Chicago and at the Wisconsin Telephone Co.'s toll building in Milwaukee Three radio repeater stations will be built at 25-mile intervals between, one at

Barrington, Ill., another just across the Illinois border from Wilmot, Wis., the third near Prospect, Wis.

Station antenna towers 120 feet high will insure clearance for the straight-shooting microwaves since ground along the route is fairly

Many in Benny Contest

HEAVY response to the \$10,000 "I Can't Stand Jack Benny" contest, announced by the comedian on his Lucky Strike show on NBC Dec. 2, was reported last week as letters from listeners poured in at a 25,000-per-day-clip. By midween nearly 150,000 eager customers had joined the scramble to lambast the comedian and, incidentally to try for one of the Victory Bond prizes. Contestants must tell in 50 or fewer words why Benny is their anathema. Benny is putting up money for the prizes.

"Dis guy should use WFDF Flint during the rainy season."

TELEFAX ILLUSTRATED NEWS

New FM-FAX Station Nearing Completion

"Skyrocket" Antenna Erected for WGHF, New York

There is now visible evidence of an entirely new kind of post-war broadcasting station, which may be seen from the sidewalks of New York, in the vicinity of 10 East 40th Street. Here Capt. W. G. H. Finch, USNR, has erected an antenna that resembles a skyrocket on top of one of the city's highest buildings. Crowds have paused to view this new phenomenon, with questions ranging from developments of the atomic bomb to projected trips to the moon.

This antenna was developed for Capt. Finch by Dr. Andrew Alford, past chairman of the antenna committee of the Institute of Radio Engineers. From it, Finch's new FM station WGHF will broadcast both audio and facsimile, which is radioed writing—newspapers, magazines and illustrated bulletins sent, complete with pictures, to homes within a radius of 50 miles.

receiving

Illustration at top shows a Faxogram which can be written out like a telegram and illustrated with photos or sketches, and dispatched complete in a minute or two between fixed or mobile points, as by telephone or palice radio. By telefaxing to a special stencil, it is now possible to have hundreds of received copies struck off quickly by copying machine—halftones included. The Air Press illustrates how news can be broadcast to hames; a sheet 8½" x 11", fully illustrated, with all sorts of newspaper features and cartoons, and printed advertisements, can be broadcast in about two minutest

The time is one month nearer when Finch Facsimile Telefax equipment will be sending—at high speed—printed or written and illustrated messages between any two points on the earth which can be connected by either a radio circuit or a wire. The Finch patent structure has been declared the strongest and most comprehensive in Facsimile. Write for particulars.

NEW YORK CHICAGO HOLLYWOOD

Massachusetts Stations Argue, What Is Construction Permit?

WHAT constitutes a construction permit?

This question is raised by WCOP Boston in a petition filed with the FCC defending its right to build a transmitter house and an antenna base in anticipation of authority to increase power and move its transmitter site. A competitive station, WLAW Lawrence, which is also seeking higher power, has charged that WCOP is in violation of the Communications Act by commencing operations without a construction permit.

In a motion to dismiss the WLAW complaint, Philip J. Hennessey Jr., of Segal, Smith & Hennessy, counsel for the Cowles station, points out that the preliminary work done by WCOP at its new site at Lexington is to gain time in the event the permit is granted of the permit is not issued he declares, the loss will be station's.

Necessary Prerequisite

Acquisition of the site, the motion explains, was a necessary prerequisite to an application for increased power inasmuch as a definite location must be specified for the erection of a directional antenna. But if there had been a building on the site suitable for housing a transmitter, it argued, it could not be held that construction of a station had "begun."

Erecting a building which "may or may not" be used for a transmitter or installing concrete footings which "may or may not" used for antenna towers, it held, cannot mean "construction of a ra-dio station." It recalled that in numerous cases existing structures have been used for housing transmitter and supporting antenna and and that the Commission has never suggested that permittees could not use such structures on grounds construction was started before the permit was issued.

The motion further asserts that WLAW's complaint offers no basis for participation in any proceedings on WCOP's application. The statement by Hildreth & Rogers Co., licensee of WLAW, that it is applying for an increase from 5 kw to 50 kw and that it proposes to cover the same area as WCOP is not only "insufficient to constitute the petitioner a party in interest in the WCOP application", the motion concludes, "but the petition is obviously an attempt to hinder and delay and obstruct action on the WCOP application."

In its complaint to the FCC filed by Geo. O. Sutton, counsel for Hildreth & Rogers, WLAW asks that the WCOP application for increase of power from 500 w night, 1 kw day, to 5 kw day and night be designated for hearing. It points out that the WCOP application states that "If the construction permit is granted, the construction will be commenced within 60 days

of the granting thereof . . ."
WLAW contends that Section 319(a) of the Communications Act of 1934 requires the issuance of a construction permit before construction of a station is begun and prohibits the Commission from issuing a license unless a construction permit has first been granted. The finding by the Commission that public interest will be served by the erection of a station, it holds, 'necessarily precedes the construction contemplated by the appli-

In support of its complaint, WLAW submitted photographs showing the progress of construction on transmitter buildings and tower foundations at the new WCOP site. The WCOP application, it claimed, is "at variance" with evidence disclosed by these photographs.

The WLAW complaint and the WCOP answer are being studied by the Commission. A decision on the case is expected upon the completion of engineering examination of the WCOP application, filed Sept. 24. It appeared probable that the issue in question will be definitely ruled out.

Mutual Benefit

CHICAGO was assured of one large production program remaining through 1946 as Mutual Benefit Health and Accident Associa-tion, Omaha, Neb., renewed its Freedom of Opportunity program over full Mutual network, for third successive year effective January 13. Ralph Rosenthal, account executive of Arthur Meyerhoff & Company, Chicago, said program would switch from Friday, 7-7:30 p.m. CST to Sunday, 9-9:30 p.m. CST, effective after the Dec. 28th broadcast. Freedom of Opportunity, which is sold as a package, is produced and aired from WGN Chicago. Dan Orth is the sales executive for Mutual.

ACR Net Figures

AMERICAN CABLE & RADIO Corp. and subsidiaries show a consolidated net income of \$1,474,527 after operating expenses, maintenance, depreciation and provision for taxes during the first nine months of 1945. Figure is slightly below the net of \$1,487,069 for the same period of 1944. Gross operating revenue of ACR was \$14,-649,521 this year compared with \$14,987,352 last year for the nine month period. Radiotelecommunication revenues increased from \$2,381,076 to \$3,137,136, due primarily to reestablishment of direct circuits with a number of European countries and Japan and to an increased volume of commercial messages.

COX THANKS RADIO FOR AIDING DRIVES

WITH conclusion of the Victory Loan campaign, H. Quentin Cox. consultant to the Radio Section of the Treasury's War Finance Divi-

Mr. Cox

sion, has extended to stations and networks a warm tribute for their efforts on behalf of the eighth loan.

Mr. Cox left Washington last Wednesday with Mrs. Cox and their infant boy driving back to

Portland, Or e., via the southern route. He has been on leave since Aug. 13 as assistant manager of KGW Portland. He is a director of the Pacific Advertising Assn. and vicepresident of District 3, PAA.

In adding his tribute to that by Ted R. Gamble, National Director of War Finance [BROADCASTING, Dec. 10], Mr. Cox said:

"Cooperation generously given by all broadcasting stations and networks during the Victory Loan drive proved to be an important factor in the campaign. I would like to thank all who have donated their time and facilities to the Radio Section, making possible broadcasting's notable service.

"Records gathered by the Radio Section show that the industry's support of the Victory Loan established a new record in the use of Treasury-prepared materials, a fitting conclusion to the series of eight Bond campaigns.

"NAB's role in keeping stations informed of industry participation has been of great value in bringing about successful conduct of the wartime financing program."

CBC Restriction Settled

CONTROVERSY between Canadian Broadcasting Corp. and Department of Justice regarding the CBC carrying reports of disturbances in penitentiaries, one of which was banned from broadcast by Department of Justice, has been cleared by Davidson Dunton, new CBC chairman, in an announcement on Dec. 7. He stated that in future there would be no restriction on carrying of news by CBC on penitentiary disturbances. Department of Justice had insisted on stopping newscast in order to prevent disturbances in other peniteniaries where inmates had radios.

WNBT Doubles

WNBT, NBC video station in New York Dec. 10 started operating on a 6-day 17½ hour weekly schedule, doubling its time on the air in less than a year. Sports from Madison Square Garden are partly responsible for increase.

CBC Shortwave

CBC Shortwave
CANADIAN BROADCASTING Corp. has
added a third frequency to its daily
shortwave broadcasts to Europe and in
December began CKCX on 15.19 mc
from 7 a.m. 4 p.m. EST. Transmissions
are tuned to Europe in English, French.
German, Dutch and Czech. CKNC, 17.82
mc, is used 7 a.m. 2 p.m., and CHOL
11.72 mc, 3-6 p.m.

Music...Our Common Heritage carries a real meaning for

Christmas...1945

DECK the halls with boughs of holly, fill the air with joyous song — Christmas, 1945! And what a Christmas it will be — the first real Christmas in five long years.

A Holy day as well as a holiday, its celebration at times reverent, at times gay, Christmas has a two-fold significance — commemorating the birth of peace, and celebrating the seasonal customs of many people. The ordinary festivity of a usual Christmas season takes on added glow with the happy reunions of family and friends.

Music has always been the most natural expression of the true Yuletide spirit. Hymns and carols have been handed down through the years until it becomes impossible to imagine Christmas without them.

Our heritage of song gives everyone the means to share and spread the brotherhood and fellowship of Christmas.

"In the People's Cause" PORTLAND, OREGON **CBS Affiliate** FREE & PETERS, Inc., Nat'l Rep.

They Like Our Style

We say, with apologies to none, that we sincerely believe WAIR to be one of the best sales-producing stations in the entire south. There is an intensity of popularity in the large area we cover.

stations and broaden the public relations policy.

Among projects understood to be under consideration is the opening of a Hollywood liaison office. This would meet complaints of West Coast broadcasters that they are thousands of miles away from an NAB office, with little personal association contact.

Refurnishing of the New York office of NAB is under considera-tion. Present facilities are described as inadequate and the association has long desired to provide modern quarters.

Expected within the near future is appointment of a recognized labor relations expert to take charge of the authorized Employe-Employer Relations Dept. The NAB board last February directed the formation of such a department and reaffirmed its action at its Oct. 1-2 meeting. A budget of \$60,000 is authorized.

Addition of an FM Dept. following merger with FM Broadcasters Inc. does not involve a serious budget problem since FM station membership is financed under the merger agreement. Since they are generally operating at a loss, however, they pay only the \$5 monthly minimum. This subject may come before the board meeting.

With some 800 members on its rolls, NAB anticipates further expansion of the list as new stations are granted in the AM field along with grants in FM, television and other new branches of the broad-

Committee members who attended the two-day meeting were: Campbell Arnoux, chairman, WTAR Norfolk; Clair R. McCollough, WGAL Lancaster, and John J. Gillin Jr., WOW Omaha. NAB executive staff was represented by President Miller and Secretary-Treasurer C. E. Arney Jr.

Frank G. Smith

FRANK G. SMITH, 71, founder and retired head of Smith, Sturgis & Moore, Inc., New York advertising agency, died Dec. 9 at his home in New York. Mr. Smith was assisant to J. Walter Thompson of J. Walter Thompson Co. for 10 years prior to forming his own firm, Smith, Sturgis & Moore. He leaves a widow and a son, William Phillip Smith, who is radio director of Charles W. Hoyt Co., New York.

Aiken Rejoins KOIN

FRED AIKEN has returned to the engineering staff of KOIN Portland, Ore., after three years in the Marine Corps. A master technical sergeant, he served 20 months in the Pacific.

Nedick's Sponsor

NEDICK'S STORES INC., New York (restaurants) sponsors broadcasts of all collegiate basketball games from Madison Square Garden on WHN New York. starting Dec. 12. National invitation championship tournament broadcast on WHN in March will also be sponsored by Nedick's. Agency: Weiss & Geller, New York.

CBS Pay Raise

NEGOTIATIONS on 20% wage increase agreement effective Jan. 1, 1946, have been completed by CBS Hollywood and Screen Office Employes Guild, covering office employes of KNX, Hollywood network outlet. Contract also includes union shop provision, 15% adjustment for those earning in excess of new minimum wage scale, with 10% increase on promotions and an improved vacation clause. About 100 employes are involved.

Zenith Convention

ZENITH RADIO Corp. distributors' convention will be held at the Edgewater Beach Hotel in Chicago Dec. 18-19, according to H. C. Bonfig, Zenith vice president in charge of household radio. Representatives from 77 distributors will attend, and will be shown the complete line of Zenith's new models. "Every set," said Mr. Bonfig, "has been completely re-engineered to include research developments of the past five years."

Lyons Renews Plea For Sale of WNYC

Says Responsible Firm Has Offered \$2,000,000

IN A LETTER addressed to the New York City Board of Estimate on Dec. 13, James J. Lyons, president of the Borough of the Bronx, renewed his plea for the sale of the municipally owned station, WNYC, for \$2,000,000 to a "responsible concern" which he said had made that offer.

The "responsible concern" referred to is Theodore Newhouse, publisher of a number of newsperpers in Long Island, New Jersey and upper state New York. In April 1945, Mr. Lyons originally proposed the sale of WNYC, to the board which was then considering the executive budget of fiscal year 1945-46, but the proposal was defeated, 11-5.

In renewing his proposal for the sale of the station, Mr. Lyons suggested the elimination of the \$99,180 appropriation in the budget for WNYC.

"The offer has been renewed by the same responsible concern," his letter continued. "I do not know what the attitude of the incoming administration is on the operation of a city-owned radio station. Personally, I feel that there is no more reason for a municipality to operate a broadcasting station than to operate a newspaper. The Federal Government does not operate a broadcasting station. I do not think any state or any other city operates a broadcasting station.

"The proposal affords ample time to broadcast any essential city business. The station and all other stations would be available to the mayor in cases of emergency. The bidder for the station also agrees to re-employ all persons now employed on station WNYC."

Mr. Lyons suggested that his proposal not be added to the calendar until Jan. 1946, so that the new administration might consider it.

KQW Hearing

FCC HEARING on the proposed purchase of KQW San Jose by CBS, scheduled to get under way today, last week was postponed by the Commission to Thursday, Dec. 20 at 10:30 a.m. Reason for postponement was not given, but it was known that Clifford J. Durr, one of the four commissioners to hear the case, has a speaking engagement ir Charleston, S. C. tonight. Proposed sale would transfer KQW from Ralph R., Sherwood B. and Mot Q. Brunton and C. L. McCarthy to CBS for \$950,000 cash [Broad CASTING, June 25, Dec. 10].

AFRA Expands

AFRA is planning to take over the offices adjoining its New Yorl headquarters at 2 W. 45th St. nearly doubling its present space Work will start soon.

Do you sell in Canada?

Is your job merchandising . . . you should have a new look at the rich, *stable* Canadian market! Is your job radio time buying . . . you should review the facilities for reaching this rich *responsive* market!

And when you think of Canada, remember that the one province of ONTARIO REPRESENTS MORE THAN 40% OF CANADA'S BUYING POWER! Remember, too, these additional factors . . .

INFLUENCE! CFRB is Canada's most influential station . . . this is a FACT and not a boast. As the most popular station and that with the biggest coverage, CFRB is in a position to influence more people . . . more sales. This is demonstrated by the number of advertisers who send their messages over CFRB. Check the list . . . we'll be glad to send it.

POPULARITY! People know CFRB as the station where their favourites are! This reputation has been built up over years of maintaining a policy of widely varying programmes . . . most of the shows, by actual listenership ratings, most of the people want to hear. Added to this is the fact that CFRB is the basic CBS outlet in Toronto.

COVERAGE! The facts of CFRB's coverage are clearly shown in the reports of the Bureau of Broadcast Measurement, of which this station is a charter member. Check these reports . . . CFRB has the largest primary coverage of any station in Ontario, largely concentrated in the rich, thickly-populated, southwestern area. And CFRB operates on 10,000 watts, day and night.

For further information, write CFRB, Toronto, or contact Adam J. Young Jr., Incorporated, New York, Chicago

FM BROADCAST TRANSMITTER

Ready for delivery

MODEL 250 BCF 88-108 MEGACYCLES

TEMCO proudly presents this outstanding achievement in FM engineering—the result of 10 years of pioneering in custom-built, superlative communication equipment.

HIGHLIGHTS OF THE TEMCO 250 BCF

- Normal rated output power 250 watts. Maximum rated output power 375 watts.
- Continuous monitoring of the carrier frequency by a center frequency deviation meter calibrated directly in cycles.
- An exciter unit heart of the transmitter—characterized by tuning simplicity accomplished by employing only 4 stages to raise the primary oscillator frequency to the carrier frequency.
- A new circuit of technically ad-

- vanced concept which maintains a high degree of center frequency stabilization without introduction of distortion.
- Peak efficiency and great dependability are obtained by the use of new miniature V-H-F tubes in the exciter.
- Improved design in the IPA and PA stages eliminating tank radiation, feedback, radio frequency and high voltage potentials from the tank circuits and transmitter frame.

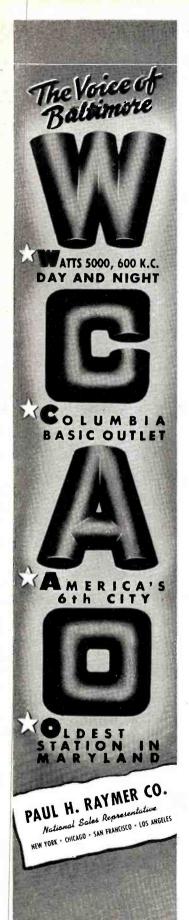

*A limited quantity of the TEMCO Model 250 BCF will be available for January delivery. Orders will be filled in rotation as received. ACT NOW. Place your order at once.

The WNEW

"MAKE-BELIEVE BALLROOM"

with MARTIN BLOCK

Still leads them all!

According to the September Pulse report. WNEW's (N. Y.) "Make-Believe Ballroom" during the across-the-board hours of 10-11:30 a.m. and 5:30-7:30 p.m. has a better average rating for the 14 quarter-hours than any other station in its area during the same period.

Current average ratings for the other four leading N. Y. stations are: WABC. 3.4; WEAF, 3.4; WOR, 2.7; WJZ, 2.6. WNEW's is 4.4.

Gould, Kuff Form New Ad Agency in Baltimore

PURNELL H. GOULD and I. Harold Kuff have formed a new advertising agency in Baltimore. Both were recently released from the Army. Mr. Gould, with rank of major, set up the Mosquito and Pacific Ocean Networks for the Armed Forces Radio Service while in the Army. He was later named chief of the broadcast service section at AFRS Hollywood. Prior to the war he was commercial manager of WFBR Baltimore, and previously with WBAL.

Mr. Kuff is a former advertising manager of Hecht Bros. department store in Baltimore. As Sgt. Kuff in the Army, after service overseas, he was transferred to the 40th Infantry Special Service Section to supervise all entertainment and recreation. Occupancy of the agency's quarters, 2100 St. Paul St.. Baltimore, is expected Jan. 1.

Consulting Practice

HOWARD S. FRAZIER, who has resigned as NAB director of engineering, will operate a general radio management consulting practice and not an engineering practice as incorrectly indicated in a headline announcing his entry into business [BROADCASTING, Dec. 10]. He will handle station management and organizational studies, station appraisals, rate studies, program policy recommendations and market evaluations as well as serve as merchandising consultant to equipment manufacturers. Mr. Frazier is serving NAB in an advisory capacity until projects now under way are completed.

GET ACQUAINTED luncheon given by Gayle V. Grubb, new manager of KGO San Francisco, was attended by many Bay Area radio executives, including: (seated, 1 to r) Russell Horgan, KYA assistant manager; C. L. McCarthy, KQW manager; William Pabst, KFRC manager; John Elwood, KPO manager. Standing (I to r) Jerry Akers, KSAN manager; Stanley Breyer, KJBS commercial manager; Phil Lasky, KROW manager; Glenn Shaw, KLX manager; Mr. Grubb; Ray Hamilton, KSFO manager. Luncheon was at Commercial Club.

CHICAGO RADIO'S greatest headache—exodus of top talent and programs to New York and Hollywood, was discussed Dec. 12 at weekly luncheon meeting of Ra-Management Club. Guest Speaker Linnea Nelson, chief timebuyer for J. Walter Thompson Co., New York, stated that Chicago broadcasters must offer more than "just AFRA scale" if it wishes to keep existing talent.
"After all," she stated, "radio

talent is just people trying to get ahead, and so far New York and Hollywood offer the most inducements." As a remedy she suggested development of more local talent

and programs.

M. Lewis Goodkind, vice president and treasurer of Goodkind. Joice & Morgan, Chicago agency, said that Chicago radio should build "more and better transcrip-tion shows" as one possible solution to problem. Harlow Roberts, club president, pointed out that "there are more employed radio people in Chicago than any time since 1938 and that many good shows are available to replace those that have moved on."

Deplores FBIS Demise

ABOLITION of the FCC Foreign Broadcast Intelligence Service because Congress cut the Commission's national defense appropriation for the 1946 fiscal year, was deplored on the floor of the House last Wednesday by Rep. John C. Kunkel (R-Pa.). He termed the Congressional action, due to House pressure, as "short-sighted and actually dangerous to national welfare." Every other principal power has a monitoring service, even larger than that of the U.S. before its liquidation, he asserted. "If this country hopes to participate on even and equal basis in international affairs with Russia, Great Britain and the other major power's," he declared, "it is vitally necessary to continue this monitor-

Chicago Talent Exodus ANDERSON & ASSOC. Management Club Topic RADIO CONSULTANTS

FORMATION of the consulting radio engineering firm of H. V. Anderson & Assoc., with offices New Orleans and affiliated quarters in Wash-

ington, was an-nounced last week by H. V. Anderson, executive vice-president of Baton Rouge Broadcasting Co. and an engineering consultant for the past two decades.

Mr. Anderson

Mr. Anderson has established headquarters at 715 American Bank Bldg. (Raymond 0111) in New Orleans. Effective Jan. 1 the firm will affiliate with Chambers & Garrison, new Washington consulting engineering firm.

Mr. Anderson went on inactive status last September after three and a half years in the Navy with rank of lieutenant commander. He participated in developmental work in connection with airborne radar at the Navy laboratories at Massachusetts Institute of Technology and in Philadelphia. He also served for a year aboard carriers in the Pacific. Mr. Anderson will continue his supervision of WJBO Baton Rouge, as well as its FM station, WBRL.

Johnson Sales Up

ERSKINE JOHNSON, Hollywood news reporter, broadcasting Monday through Friday, 4-4:15 p.m. as a Mutual co-op program, has been sold locally by 126 stations, B. J. Hauser, manager of the network's cooperative program department, announced last week. This makes Mr. Johnson's program the second ranking Mutual co-op show, Mr. Hauser said, passed only by the news commentary of Fulton Lewis jr. which is currently sponsored locally on 187 Mutual stations. Mutual co-op station sales have reached a new total of 584, Mr. Hauser said.

FM Shifts

(Continued from page 20)

stations W3XL Washington, D. C., and W2XRY New York-have been operating in the high band for some months. The Washington station, which has abandoned the old band, estimates that at least 400 receivers in the Capital can tune in the frequency. Everett Dillard, owner of W3XL and KOZY Kansas City, explained that there are a considerable number of Hallicrafter sets in the area which encompass both the old and new bands and that some old band sets have been converted by their owners, most of whom are engineers employed by the government.

Small Audience

A number of stations have been operating or will soon begin operations with less of an audience than the Dillard experimental station. WDUL Superior, Wis., owned by the Head of the Lakes Broadcasting Co., which claims to have been the first to shift to the high band, has been operating since Sept. 5 with only a handful of sets in its area. The station operates only on its new 92.3 mc frequency. WOZY will also operate exclusively on the high band.

The Stromberg Carlson station, WHFM Rochester, was apparently the first to begin dual operation, starting broadcasting on 98.9 mc with 50 w power on Oct. 15 while continuing on the old band at 45.1 mc. It has been gradually stepping up its power and expects to reach its full 20 kw assigned power by midsummer. The company has been tieing in broadcasting operations with receiver development.

Closely following WHFM in high band broadcasting was the Milwaukee Journal station, WMFM, which began testing on 92.3 mc with 500 w power on Oct. 19. It had expected to reach 3 kw power last week.

Two other stations began testing on the high band shortly after they received their new FM assignments which were issued Sept. 12. These were WEHS Chicago, owned by WHFC Cicero. Ill., and WABW

Joseph Hershey McGillvra, Inc.
National Representatives

First Radar Grant

FIRST grant for civilian application of radar was issued last week by the FCC. The Commission authorized Raytheon Mfg. Co., New York, to conduct experiments aboard the SS Kalakala, a ferry operating on Puget Sound, Wash., to determine the value of radar for commercial marine navigation. The authorization is for 90 days.

Indianapolis, owned by Associated Broadcasters Inc.

While most stations will get on the air around the first of the year, some will probably require more time to effect the changeover or will be delayed because of weather conditions, as in the case of WMTW Mt. Washington, N. H., which is hampered by icy conditions at its transmitter site. Some stations, which have been silent during conversion, were unable to set a date for resuming operations. Others reported they had not yet received promised deliveries of equipment and were uncertain when they could begin. In a few cases. stations said their conversion was under study.

Westinghouse Plans

Characteristic of replies to inquiries on progress in meeting the Jan. 1 deadline was the answer of Westinghouse Radio Stations Inc., which owns five FM stations (WBZ-FM KYW-FM WBZA-FM KDKA-FM WOWO-FM). The company reported that it received an extension of time in meeting equipment tests, having experienced some delay in obtaining crystals. However, it expected to begin tests by Dec. 15.

Westinghouse is installing converters and will be on dual operation at the Jan. 1 deadline for program operations. It intends to continue on that basis as long as it is permitted. As with other stations, the company will be unable to start high band broadcasting in full transmitter power or authorized antenna height but expects to reach its assignments within six months.

Nary Promoted

E. R. NARY, veteran of 30 years service with Westinghouse Electric Corp., and lately manager of manufacturing for Baltimore divisions, has been appointed assistant to Westinghouse Vice President Walter Evans. He will be concerned with operations of the industrial electronics and x-ray divisions in Baltimore and the home radio division at Sunbury. Pa.

284th for Mutual

KGCX Sidney, Mont., 1000 w on 1480 kc, joins Mutual Dec. 20 as the network's 284th outlet.

Lea Plans to Report Out Bill Aimed Toward Curbing Petrillo's Activities

TAKING HEART from House passage of the Hobbs anti-rack-eteering bill (HR-32) Wednesday, despite stiff opposition from labor forces, Chairman Clarence F. Lea (D-Cal.) of the House Interstate & Foreign Commerce Committee this week plans to report out his bill (HR-4737) to curb James Caesar Petrillo's activities in broadcasting.

Returning Dec. 9 from Paris, where he was a guest on the first TWA Washington-Paris flight, Rep. Lea called a subcommittee meeting last Thursday to work on strengthening his bill [BROADCASTIING, Dec. 10]. Although House action before Christmas recess isn't likely, in view of President Truman's urgent request for authority to set up fact-finding boards in labor disputes, Mr. Lea said he hoped to report out HR-4737 this week, Congress plans to recess on Friday, returning about Jan. 3.

Tests on labor legislation in the House last week left both sides claiming victories when the Rules Committee presented rules to bring up the May-Arends bill (HR-3937) to repeal the Smith-Connally Act and abolish the National Labor Relations Board, and the Hobbs bill (HR-32) to include labor unions in the anti-racketeering law. The May-Arends bill rule was defeated Tuesday 20-182.

On Wednesday, however, the House by an overwhelming voice vote, adopted the rule to bring up the Hobbs bill. House leaders indicated the Hobbs bill would not be taken up, however, until after Congress had acted on the President's fact-finding legislation. At his news conference Wednesday the President expressed hope that the bill would be passed by Christmas. Leaders of Congress were not so optimistic.

Proponents of the Lea bill to curb Mr. Petrillo's hold over broadcasting were heartened at the overwhelming vote on the Hobbs bill rule. It indicated, they pointed out, that the House is eager to protect legitimate business and organizations from labor racketeers. A similar bill passed the House in 1943 but died in the Senate.

Craig Board Member

EDWIN W. CRAIG, vice president of WSM Nashville, and president of the National Life and Accident Insurance Co., Nashville, last Wednesday was elected a member of the board of directors of the Institute of Life Insurance. At meeting held at the Waldorf-Astoria, New York, public relations were termed "a major function of top executives."

People never get SICK of listening to WJW because we follow tested RECIPES in programming. That's why mornings and afternoons throughout the week... Monday through Friday... WJW delivers more daytime dialers per dollar in Cleveland than any other station.

Nearly 2,000,000 Listeners

... more people than live in the entire state of Rhode Island! Day and night WLAW sells to these residents of Industrial New England—a responsive market where annual retail sales alone approximate \$650,000,000.

tained the license. In 1935 the FCC wrote the college that after reading the contract for lease there was "serious doubt of the legality of the entire transaction".

When the station's license came up for renewal the FCC designated it for hearing. Meanwhile the college contracted to sell KOB to Albuquerque Broadcasting Co., headed by T. M. Pepperday, also president of the Journal Co. The FCC granted consent to transfer in June 1936.

Contract Terms

Under terms of the sale contract the college was to have been given one hour daily, non-cumulative time, a half-hour before 6 p.m. and the other half-hour after 6 p.m., particular broadcast time to be selected at the option of the college. Another clause in the contract, however, provided that licensee would have complete control of operation and unlimited supervision of programs.

On June 30, 1945, the college regents transmitted a demand to KOB for these periods: 8:30-9 p.m. daily except Monday and Thursday; 5:30-45 p.m. daily except Sunday; 10-10:30 a.m. Sunday in addition to 2½ hours per week already being utilized under the sale contract.

KOB, through Pierson & Ball, filed complaint in the New Mexico Federal District Court for declaratory judgment charging (1) the station could not legally accede to the demands, and (2) the contract did not give the college the right to make demands.

Holding that there was no "genuine issue" as to material facts and no controversial question, the court issued the following declaratory judgment:

judgment:

1. That the demand of the defendant, dated June 30, 1945. for the scheduling of its programs for specific time was rightfully refused by the plaintiff; that under the Federal Communications Act of 1934, as amended, and under the rules and regulations, restrictions and conditions made and imposed upon the plaintiff by the FCC, the plaintiff has the sole and exclusive right and duty to exercise its independent judgment and discretion to control, supervise, and direct the use and operation of Station KOB in the interest of the listening public and to choose and select programs and allocate time for the broadcast of programs which will best serve the interests of the listening public, and is prohibited by law from assigning said right or delegating the said duties voluntarily or involuntarily, directly or indirectly, to any person or party, including the defendant.

2. That the plaintiff under its license

2. That the plaintiff under its license from the FCC is obligated to broadcast under the rules, revulations, terms and restrictions imposed upon it by the FCC and that had the plaintiff acceded to the demand of the defendant for specific time as set forth in said demand under date of June 30, 1945, the plaintiff would have violated its duties under its license.

der its license.

3. That the defendant is without right under the contract annexed to plaintiff's complaint and marked "Exhibit A" to require the plaintiff to turn over any period or periods of time the defendant elects to demand without furnishing advance information on the program to be broadcast and without recognizing that it is the sole right and duty of the plaintiff under its license from the FCC to exercise its independ-

LEGION of Merit is presented Col. Edward M. Kirby (1) by Maj. Gen. Alexander Surles at the War Dept. Col. Kirby was cited for "exceptionally meritorious conduct in the performance of outstanding services as chief, Radio Branch, War Dept. Bureau of Public Relations, from May 1942 to Sept. 1945." He is now public relations counselor in New York and Washington.

Western Electric Workers Ask Aid Sympathy Strike of Telephone

Sympathy Strike of Telephone Union Members Possible

POSSIBILITY of a sympathy strike speading among members of the National Federation of Telephone Workers was seen last week as Western Electric Employes Assn., representing 16,000 Western Electric Co. workers in New York and New Jersey, enlisted NFTW's support after rejecting a renewed company offer for a 15% wage increase.

WEEA members voted Nov. 28 to strike unless their demands for 20% raises were met. Last week WEEA solicited help with which it is allied, with Joseph A. Beirne, NFTW president, sent a telegram from his Washington, D. C., headouarters to C. G. Stoll, Western Electric Co. president, requesting a meeting. Much hinged on the outcome of the meeting, which was still in progress as BROADCASTING went to press.

The company announced its representative at the meeting would be Stanley Bracken. vice president in charge of manufacturing, and not President Stoll. Union representatives were Mr. Beirne, Frank J. Fitzsimmons, president of WEEA. and Henry Mayer, New York attorney for the union.

Under its own rules the telephone workers union will make an effort to settle the differences before calling sympathy strikes among its 47 locals and 250,000 workers.

R. C. OSTRANDER, former sales manager of KFPY Spokane, Cline Advertising Service, as account executive.

ent judgment as to the time when defendant's programs shall be scheduled and broadcast in the interest of the listening public.

and broadcast in the interest of the listening public.

4. Any party may at any time hereafter apply for consequential relief herein in accordance with the terms of the Federal Declaratory Judgment Act of June 14, 1934.

5. That the plaintiff recover its costs in this behalf expended.

Time Change

(Continued from page 18)

there would be no problem. Opposition to daylight time generally comes from farm groups, boards of education and theatrical interests, and this opposition would be loud if legislation were sought.

Second suggestion is that the NAB, ANA and AAAA study the problems as a whole and draw up an integrated program. Operation of radio on standard time, just as railroads do in summer, has been suggested.

NAB Board on Record

NAB board last October discussed the question and went on record as favoring all efforts to attain uniformity in time.

With two network affiliate groups now working separately to arouse industry sentiment, the subject is expected to remain alive during the winter after a quiescent four-year interval.

Representing American affiliates at the network's District 2 meeting in Detroit last week, besides Mr. Campbell, were: Leonard A. Versluis, Hy M. Steed, WLAY Grand Rapids; Stanley R. Pratt, WSOO Sault Ste. Marie; Harry McTigue, WINN Louisville; J. M O'Hara, WMAN Mansfield, O.; Jack Kelly, WCOL Columbus; William M. O'Neil, Lawrence Webb, WJW Cleveland; Robert Sampson, WSAI Cincinnati; Howard Lane, Marshall Field stations; Art Shawd, WTOL Toledo; Marshall L. Rosene, WSAZ Huntington, W. Va.; Hugh A. Giesel, WBCM Bay City, Mich.; Ford Billings, WHOT South Bend; John R. Atkinson, WHBV Anderson, Ind.; Robert T. Mason, WMRN Marion, O.; Howard Loeb, WFDF Flint; Herman Radner, WIBM Jackson; Fred W Wagenvoord, WJIM Lansing; Phil Wood, WFMJ Youngstown; Dan E. Jayne, E. P. Mills, WELL Battle Creek; J. P. Williams, WING Dayton; Adna Karns, WIZE Spring field; C. Bruce McConnell, Robert E. Bausman, WISH Indianapolis; George Smith, WWVA Bernard Berk, Wheeling: S. WAKR Akron; Mark Woods, John H. Norton Jr., Otto Brandt, Archie Grinalds, Ted Oberfelter, American network.

Marshall Field First

MARSHALL FIELD & Co., Chicago, holds top priority for television equipment for intrastore use manufactured by General Electric, George S. Peterson, district manager for GE electronics department revealed last Thursday. During the war General Electric adopted a plan of accepting orders for postwar television installation and Marshall Field was first to enter into a contract. Store officials said no detailed plans for intrastore video have been made yet. but they indicated interest in the media as a sales tool.

PROMINENT agency executives at the annual meeting of the American Assn. of Advertising Agencies Council, held Dec. 11 in Chicago, included (1 to r): Arthur R. Mogge, vice chairman of the Central Com-

mittee; Fred R. Gamble, AAAA president; Richard Compton, AAAA chairman; Fairfax Cone, chairman of Central Committee; Sid Wells, AAAA secretary; Hugh Feltis, BMB president.

Whan Survey

(Continued from page 18)

tioned agreed on any one suggestion for the improvement of radio service, though 77 different items were mentioned by one or more of the 5,276 persons answering the question.

Four out of 10 answered "yes" when asked if some announcements annoy them, but there was little agreement. No more than 1.7% of the women agreed on any single commercial as annoying and no more than 1.8% of the men agreed.

Asked to name specific commercial announcements, the following were found most annoying, in this order: Rinso White, Lucky Strike, Lifebuoy, Super Suds, Whizz, Dentyne, Carter's pills, Staley's Pig Mamma, Nutrena, Oxydol, Helzberg's, Pepsodent, Duz, Lady Esther, Pepsi Cola, B. C. Headache, Swan, Philip Morris, Sweetheart lard. Highest percentage figure was 4.6% of annoyed women listeners who mentioned Rinso White, or 1.7% of all women listeners.

By types, those who objected sentioned, in order: Singing commercials; liquor, wine or beer; "all commercials"; soap advertisements; serial stories, "too many commercials"; patent medicine; tobacco; transcribed commercials; vitamins; jazz music. Highest percentage figure was 3.3% of annoyed women listeners, or 1.3% of all women listeners, who mentioned singing commercials.

Of Kansas farm families, 42.9% are having reception difficulties with stations heard regularly: figure for village families is 39.3%, for urban families 30.9%. Having no difficulty are 34.2% of farm families, 38.5% of village families and 50.5% of urban families. Reporting they haven't noticed reception difficulty with stations heard regularly were 22.9% of farm families, 22.2% of village families and 18.6% of urban families.

The survey points out that at least one-fourth of the state in day-time and one-half the state in nighttime lies outside the primary service area of any station. No clear-channel station of any type lies within Kansas and the nearest clear is in a different time zone.

New Allocation Plan Draws Full Support, Young Declares

AS A RESULT of wartime results, advertising has become an instrument for social as well as private ends in peacetime, James W. Young, chairman of the AAAA Council, declared at the Advertising Council's annual meeting in Chicago Tuesday.

Mr. Young was prevented from attending by illness. His speech was read by Charles G. Mortimer, advertising director of General Foods and chairman of the AAAA Executive Committee.

First major project outside of Government for the council came from the National Safety Council of Chicago, which enlisted its help in "making a fullscale attack on the frightful death rate from preventable accidents."

Treasury Assignment

"The Advertising Council is underway," Mr. Young asserted. "Our first big assignment has come from Secretary of the Treasury Vinson who has asked us to take over completely the direction of promotion for the Treasury's long range program of peacetime bond selling."

Three important lessons were learned by advertising agencies as a result of war experience, he said. He described them as power of advertising when all its forces combine; its effectiveness in solving important national problems; knowledge that for business, as for an individual, best public relations is public service.

Single exception to the last example, he declared, is network broadcasting. "In this form the advertiser becomes a producer of the medium itself, and as such he acquires some of the responsibilities and interest of a medium owner. The public standing and goodwill of the medium is in his hands."

Mr. Young said the council has asked advertisers to support it with a continuation of a modified version of the wartime allocation plan, and that "the response is overwhelmingly favorable."

Mr. Mortimer said the radio ad-

vertiser's job is to sell both his company and his products and the part both play in serving the public.

"Advertising which performs a public service will enable the advertiser to sell more products," he declared, and cited programs improving public health and housing as examples.

Richard Compton, chairman of AAAA; said advertising had helped to preserve Government during the war and that its job today was to preserve industry. Afternoon session of radio and media panel with Otto Stadelman, vice-president of Needham, Louis & Brorby as chairman, discussed the Chicago radio situation.

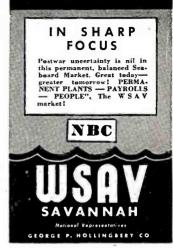

Ray Jones, executive chairman of Chicago AFRA, told members Chicago radio employed more people today than in 1938. He said, "It is only natural for good radio talent to gravitate to New York and Hollywood where both salary and opportunities are greater."

Fairfax Cone, of Foote, Cone & Belding, presided over the meeting as chairman.

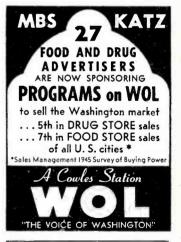

CAB CHANGES PLAN OF ADMINISTRATION

GLEN BANNERMAN, president and general manager of the Canadian Assn. of Broadcasters, will not be reappointed when his current term ends Feb. 28, after five years as the first paid CAB president. CAB is returning to its former system of honorary president and permanent secretariat. Officials gave no explanation of the change.

During Mr. Bannerman's tenure CAB adopted the ethics code; standardized stations rate structures; developed standard method of measuring coverage, resulting in formation of the Bureau of Broadcast Measurement; developed better relations among industry elements, and brought closer relations with U. S. broadcasters through

BMB Study Ready

BMB TECHNICAL Research Committee has approved bids on editing, coding, tabulating and mailing for the first bureau study as submitted by Industrial Surveys Co. and Reuben H. Donnelly Corp., and has recommended their acceptance by the BMB board. Committee authorized the BMB staff to proceed with the completion of details on the proposed contracts, prior to board action.

NAB Group Plans Study of Standards

Proposed Revisions on Agenda For Code Committee Meet

REVISION of the NAB Standards of Practice, drawn up at the Aug. 6-7 NAB Board of Directors meeting, will be considered Dec. 17-18 by the NAB Code Committee, meeting at the Palmer House, Chicago.

ing at the Palmer House, Chicago.

Up for argument will be proposals to revise the standards governing news broadcasting. Proposed are further restrictions on advertising copy in five-minute news broadcasts, fixing the limit at 75 seconds. E. R. Vadeboncoeur, vice president of WSYR Syracuse and chairman of the NAB Radio News Committee, will offer committee views on news standards along with ideas he has developed in his experience as a newscaster and commentator.

Recommendations to the NAB board will be considered, especially in connection with exceptions to the Standards of Practice section covering commercial programs and length of commercial portion, including participation programs. A recommendation may be made on five-minute newscasts. Also up for discussion will be reports of the Small Market Stations Committee and the Sales Managers Executive Committee.

Hitchhiker and cowcatcher plugs will be considered. Possible recommendations covering this subject will be considered. Meeting agenda winds up with general discussion of the standards and suggestions for further revision.

Chairman of the committee is Herbert Hollister, KANS Wichita. Other members are Edgar L. Bill. WMBD Peoria; Arthur B. Church, KMBC Kansas City; Henry P. Johnston, WSGN Birmingham; Merle S. Jones, WOL Washington; Ed Yocum, KGHL Billings; Jan Schimek, CBS; William S. Hedges, NBC. Attending for the NAB headquarters staff will be A. D. Willard Jr., executive vice president; Edward M. Kirby, public relations counsel; Willard D. Egolf, special counsel. Board liaison committee consists of Paul W. Morency, WTIC Hartford, chairman; Hugh Terry, KLZ Denver; Campbell Arnoux, WTAR Norfolk.

RFC Retains Surplus Agents But Plans Improved Handling

SALES plan for war surplus radio and electronic equipment, which Surplus Property Administration had threatened to revoke, will be retained on a modified basis. Action was taken last week at a conference between executives of the Radio Manufacturers Assn. and SPA along with Reconstruction Finance Corp. RFC is U. S. sales agency for surplus producer and consumer goods.

RMA and U. S. officials were named members of a joint committee which will screen the 230 manufacturers now acting as private agents for RFC. These firms have been warehousing, inspecting, repairing and selling radio equipment for RFC, receiving a 10% sales commission. Details of the agency contracts also will be reinspected.

Danger of Dumping

Revocation action was dropped when RMA pointed out the danger that large syndicates would obtain quantities of radio equipment and dump it on the market RMA reminded that the highly technical items must be handled by experts and that a government-operated sales system would be inefficient and produce less revenue. Manufacturer agents now inspect and repair equipment.

RFC had received complaints that cities, civic agencies and veterans were having difficulty obtaining surplus property. RMA reminded that U. S. regulations actually give such purchasers priority before surplus ever reaches manufacturer agents. Radio surplus has been small thus far but enormous quantities, running into billions, may be released in the near future.

Sam H. Husbands, RFC director, declared he favored continuance of the RFC-industry program on a more efficient basis.

Bond Geddes, RMA executive vice president, presented the argument for retention of the agent contract plan in the absence of A. S. Wells, Wells-Gardner Co., chairman of the RMA Reconversion Committee. Other RMA representatives at the conference included: M. F. Balcom, Sylvania Electric Products, RMA tube division chairman; Ernest Searing, International Resistance Co., parts division; W. J. Halligan, Hallicrafters Co., set and transmitter divisions; L. W. Teegarden, RCA: R. B. Kennett, Tung-Sol Lamp Works; J. G. Mayer, Hallicrafters Co.; A. L. Milk, Sylvania Electric Products; J. J. Clune, National Union Radio Corp.; E. H. Fritschel, General Electric Co.; Herman Krissman, Belmont Radio Corp.; G. E. Oliver, P. B. Rawley, Raytheon Corp.; Fred F. Ball, Crosley Corp.; F. S. Boland, Federal Telephone & Radio Corp.; James D. Secrest, RMA director of publications. Taking part also were Nathan L. Silverberg and Charles E. Cohn, of Standard Arctutur.

On the joint committee representing SPA-RFC are: Stuart K. Barnes, executive director, Office of Defense Supplies; R. C. McCurdy, assistant director, SPA Electronics Division; W. E. Unzicker, RFC assistant treasurer; G. A. Schwarz, assistant to director of RFC Office of Surplus Property; C. F. Baldwin Jr., executive assistant to Mr. Husbands.

Mr. Wells will appoint a committee of five representing all segments of the radio industry to be committee members. A sixth member will represent communications interests which have agent contracts.

WAJR Wins Promotion Award Given by Gillette

(See picture on page 76)

WAJR Morgantown, W. Va., gawe best local promotion to broadcasts of 1945 World Series, sponsored by Gillette Safety Razor Co. on Mutual, according to results of contest in which WAJR received first prize—a portable typewriter.

first prize—a portable typewriter.
Additional merchandise prizes
were awarded to: WEBR WIBX
WIBC CKLW WAZL WIEJ WHB
WIP WGRC WHEB KTHT WCSC
WHK WEIM CKOC.

Mutual reports that promotion activities of the stations, based on a kit provided by the MBS audience promotion department, was more consistent and showed higher degree of showmanship than in previous years. Average World Serie Hooper rating of 26.2 was highes since 1942.

Westinghouse Electric Makes 5 Appointments

FIVE APPOINTMENTS within the advertising department of Westinghouse Electric Corp., Mansfield, O., have been made as initial step in preparing for extensive advertising. Appointments include J. R. Clemens, assistant manager of appliance advertising, in charge of product advertising, promotion and sales training; P: W. Endriss, assistant manager of appliance advertising, in charge of full line advertising programs, consumer education and the advertising and promotion of insecticide dispensers; E. J. Hegarty, manager of sales training, in charge of development of production, and testing of wholesale and retail sales training plans; K. A. Donelson, operations manager, office manager of advertising department; and J. G. Baird, sales promotion manager, in charge of full line sales promotional activities for department and furniture stores.

Satellite Standard

ACTUAL test by a broadcasting station of a satellite transmitter tied to the station by a 2 w FM relay circuit on an ultra-high frequency, using equipment developed during the war, is foreseen as a result of action taken last week by the Subcommittee on Satellite Transmitters of the Radio Manufacturers Assn.

Engineering wrinkles in this form of unattended transmitter, by vhich coverage of standard broadast stations could be greatly increased with a minimum of interference, were worked out at the committee meeting held in Philadelphia. Leading transmitter engineers were present.

Three Bands Proposed

Three bands are proposed for relay signals to unattended satellite transmitters. These are approximately 950-960 mc; 1750-2100 mc; 5650-7000 mc. Of these, the second band is believed to be the one most likely to be selected by engineers, though ultimate development of the art may make the highest band desirable.

Equipment for satellite relays is being tested in the laboratory of one manufacturer, but further development awaits field tests.

Two sets of engineering standards are proposed. First covers the Satellite Control Channel (SCC), including high-frequency transmitter and high-frequency receiver and their antennas, including the signal between the main broadcast station transmitter delivered to the satellite control transmitter. Second set of standards covers the satellite broadcast transmitter itself, which picks up this relay signal and rebroadcasts it to the listener.

These standards are for guidance of experimenters at the present state of the art.

15-20 Mile Range

Relay transmitters could be operated successfully up to 15 or 20 miles with only 2 w power, using highly directive antennas.

The committee felt that power of satellite transmitters themselves should come within four ranges: 10-50 w continuously variable; 50-250 w; 250-1000 w; 100-5000 w.

Attending the meeting, held at the Hotel Philadelphian, were: Howard S. Frazier, NAB, committee chairman; R. H. Lindsay, Western Electric; L. E. Littlejohn, WFIL Philadelphia; Paul F. Godley, Paul F. Godley Co.: I. R. Weir, H. B. Fancher, J. F. Wilcox, GE; Curtis B. Plummer, FCC; Ogden Prestholdt, CBS; Nils Oman, L. E. Thompson, J. M. Young, RCA; E. J. Coxey, E. M. Ostlund, Federal Telegraph & Radio Corp.; W. H. Forster, Philco Co.; G. H. Wintermute, Sperry Gyroscope Co.; Ross Bevelle, WWDC Washington; R. H. Daugherty, AT&T. Messrs. Fancher, Wilcox, Thompson and Ostiund were guests of the committee.

RMA Group Sets Future of Shortwave in U.S. **Expected To Be Decided Soon**

THE FUTURE of international shortwave broadcasting from the U. S. likely will be determined shortly, but all indications point to continued operation of the nation's shortwave outlets by private licensees under State Dept. auspices, with the Government purchasing program time.

William B. Benton, assistant Secretary of State in charge of Public Affairs, met in New York Friday with the seven licensees of the country's 36 shortwave outlets. Don Francisco, vice president of J. Walter Thompson Co. and former director, Radio Division, Office of Coordinator of Inter-American Affairs, submitted to the licensees a proposal for future operations.

At a conference of industry leaders with State Dept. officials Thursday it was learned that the State Dept. feels this country must take all steps possible to overcome in other countries the distortions and misconceptions about America. Considered one of the most important and potent media in this program of education is radio.

British Plans

Already Great Britain has announced elaborate plans for worldwide news service and broadcasts. Russia, likewise, has been stressing propaganda, particularly by shortwave broadcasting.

How international broadcasting shall be accomplished still must be

worked out. Many proposals have been submitted to the State Dept. There are divergent views as to how this medium shall be controlled, programmed and owned. One thing is definite. The State Dept. has assembled enough evidence to convince its officials that international broadcasting must be continued "in the interests of the peoples of the United States".

The State Dept. hopes to carry out its project in a five-point program:

- (1) Through news and feature work, which can legitimately fall to the State Dept. Large areas in various parts of the world are without the regular news wire reports. In these, State Dept. hopes to disseminate news.
 - (2) Through broadcasting.
- (3) Through motion pictures. State Dept. proposes to supplement activities of the film industry; plans to produce some shorts to augment private production.
- (4) Through libraries in all parts of the world. In Italy there is a great demand for material in the U.S. library, now conducted under State Dept. supervision.
- (5) Through exchange of students; in 1946 State Dept. expects 10,000 students from foreign lands to attend schools in America; in return 10,000 Americans will attend schools in other countries; by 1947 the goal is 20,000 students.

Bob Hope Voted Best in Fame Poll; Allen, McGee, Crosby Tied for Second

UBIQUITOUS Bob Hope, who for the past five years has apparently amused more radio editors, columnists and critics than any other comedian, has been voted "Champion of Champions" again in Motion Picture Daily's 10th annual fame poll, it was announced Dec. 12.

Hope not only was voted the highest program classification in the poll-"Champion of Champions"-but won the choice of America's best comedian. His Pepsodent show was voted the best comedy program of 1945.

Winners in some classifications are as follows, listed in the order of their ratings in the poll:

Champion of Champions

Bob Hope (NBC); Fred Allen (NBC), Fibber McGee and Molly (NBC), Bing Crosby (NBC) (tied); Lux Radio Thea-ter (CBS), Edgar Bergen-Charlie Mc-Carthy (NBC) (tied).

Most Promising Star of Tomorrow Jack Smith (CBS); Jo Stafford (CBS), Marlin Hurt (CBS) (tied); Danny O'Neil Comedian

Bob Hope (NBC); Fred Allen (NBC); Ed Gardner (NBC), Edgar Bergen-Charlie McCarthy (NBC) (tied); Jack Benny (NBC).

Comedienne Joan Davis (CBS); Fanny Brice (CBS); Gracie Allen (NBC).

Comedy Team

Fibber McGee and Molly (NBC): Jimmy Durante and Garry Moore (CBS);

Amos and Andy (NBC), George Burns and Gracie Allen (NBC) (tied).

Master of Ceremonies Bing Crosby (NBC); Harry Von Zell (CBS-NBC); Bob Hope (NBC).

Male Vocalist (Popular) Bing Crosby (NBC); Dick Haymes (CBS); Perry Como (NBC).

Male Vocalist (Classical)

John Charles Thomas (NBC); Nelson Eddy (CBS); James Melton (CBS). Female Vocalist (Popular) Dinah Shore (NBC); Jo Stafford (CBS); Frances Langford (NBC).

Female Vocalist (Classical) Gladys Swarthout (NBC); Patrice Munsel (CBS); Lily Pons (guest per-

Munsei (Commentator

H. V. Kaltenborn (NBC); Raymond Swing (ABC); Lowell Thomas (NBC). Sportscaster Bill Stern (NBC); Ted Husing (CBS); Harry Wismer (ABC).

Symphonic Orchestra

New York Philharmonic Symphony (CBS); Boston Symphony (ABC); NBC Symphony (NBC).

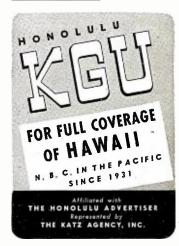

Daytime Program Fred Waring Show (NBC); Broches (ABC); House Party (CBS). Breakfast

Dramatic Program Lux Radio Theater (CBS); Theater Guild on the Air (ABC); Textron Theater (Helen Hayes) (CBS).

Comedy Show
Bob Hope (NBC); Fibber McGee and
Molly (NBC); Fred Allen (NBC).

WANTED

Manager for **Television** Station

The man we're looking for will have had several years experience as the manager of a successful radio station in a large metropolitan center. He'll know programming . . . talent . . . production - as well as the commercial and management side of broadcasting. He'll be long on energy, ideas and imagination and probably very short on television experience. We'll supply that. For the right man this is a ground-floor opportunity in a tremendous new industry. Write, outlining your experience in detail. Negotiations in confidence, if you wish. Our organization knows of this advertisement.

BOX 574, BROADCASTING

RMA Discounts CIO Hold-back Claim New TV Recording

OPA Authorizes Parts Delivery: Union Sees Wallace

By RUFUS CRATER

REPLYING to union charges that production and delivery of goods are being deliberately held back by electrical manufacturers, Radio Manufacturers Assn. spokesmen 'eclared last week they had no ridence of any such hold-back and did not believe the union's charges.

RMA officials ascribed the delay in delivery of radios primarily to OPA pricing delays, noting that United Electrical, Radio and Machine Workers (CIO), which made

Miscellaneous

Wanted to rent, wire laying plow, urgently needed. Station WSPA, Spartanburg, S. C.

the charges, had in its own statement put some of the blame on OPA slowness. They said set makers could not have started deliveries until late November, when first OPA set prices were issued, because of OPA regulations prohibiting the manufacturer from shipping sets before he received OPA prices.

Rushing by Plane

Meanwhile, OPA late Friday announced that parts manufacturers may deliver under old orders until Jan. 15 at ceiling prices in effect prior to Dec. 3, 1946. Move was to expedite parts delivery to set makers, said OPA.

Now manufacturers are rushing sets by airplane in an effort to catch some of the Christmas market, the RMA spokesmen declared. They said they doubted, however, that the manufacturers would be able to catch much of the holiday

A UE-CIO delegation, putting into effect a resolution adopted last month by union representatives from 76 cities [BROADCAST-ING, Nov. 19], met with Secretary of Commerce Henry Wallace last Tuesday to present their charges and demand "immediate investigation of the electrical industry.'

The meeting with Secretary Wallace preceded by two days a strike vote conducted by UE-CIO among its estimated 200,000 members in General Electric Co., Westinghouse Electric Corp., and General Motors (Electrical Division) in plants throughout the U.S. First returns late Friday indicated overwhelming support for a strike.

Union officials previously agreed no strike would be called in 1945 [BROADCASTING, Dec. 10], explaining "the time for a strike, if it' comes, is when such action aids UE rather than the companies." In the conference with Secretary Wallace, Albert J. Fitzgerald, UE-CIO general president, said delay in delivery of electrical goods could not be fastened on the union because UE-CIO "has not had strikes in the electrical industry."

UE-CIO Charges

UE-CIO contended "the electrical industry has engaged in a deliberate hold-back of radios, washing machines, refrigerators and other appliances from the Christmas trade" because "for every dollar of profit from products sold during 1945, manufacturers will make four times as much in 1946 because of the repeal of the excess profits tax."

"In addition," Mr. Fitzgerald said, "because of their campaign to abolish OPA price ceilings, electrical manufacturers are holding back their products now, hoping to reap huge profits later."

RMA contended it is apparent that although manufacturers may

be in a position to profit by delay. actually production was impossi-ble until late November. OPA Regulation 599, they noted, prohibits shipment of sets until OPA prices have been issued, and requires the manufacturer to affix retail price tags.

They pointed out that OPA's first parts prices were issued two months after V-J Day; that another month or six weeks were required before individual adjustment were secured: that the formula for pricing sets was not received until Oct. 30, and that the first set prices were issued the week of Nov. 23.

"Therefore," they declared, "radio set makers could not start delivery until the latter part of No-

Fact that manufacturers, now that production is possible, are "rushing sets by airplane" for the Christmas trade was seen as evidence of industry's desire to get sets to the public as quickly as possible.

Senators Absent

UE-CIO said union employes of Westinghouse, GE, GM, and RCA comprised the delegation which met with Secretary Wallace. Sens. James E. Murray (D.-Mont.) and James M. Mead (D.-N.Y.) were listed in a union release as attending the meeting, but authorities later reported the Senators were unable to be present. Sens. Mead and Murray head the committees which UE-CIO asked to be assigned to the requested investigation-the Special Committee to Investigate the National Defense Program and the Senate Education and Labor Committees, respective-

UE President Fitzgerald, reporting on surveys he asserted the union made in several cities, said results "prove beyond the question of a doubt that tens of thousands of radios, refrigerators, electric irons and other electrical appli-ances could have been placed on the market prior to Christmas."

He said "in numerous instances companies are producing fairly rapidly and are, in many cases, storing their products rather than placing them on the market." But in most cases, he declared, "the appliance manufacturers have deliberately held back production, falsely blaming shortage of parts to 'labor trouble' or conversion difficulties."

Gifts for McNeill

CHRISTMAS RUSH is on for Don McNeill of American's Breakfast Club as postmen stagger in with big sacks of gifts from thousands of fans. Accumulation thus far includes books, pens, glassware, money clips, cigarette lighters, pastry, ducks, turtles, and a threepiece zoot-suit. Articles of value are being turned over to charity and relief organizations.

Machine Discussed

American Television Society Hears Report From Cuff

TELEVISION programming on both coasts was discussed by four authorities at a monthly meeting of the American Television Society Dec. 13 at the Barbizon-Plaza Hotel, New York.

Development of a new, and as yet unnamed, machine to record, visually and audibly, television programs, was reported by Samuel H. Cuff, general manager of DuMont station, WABD New York. Machine records on a 16 mm film. One use for it which Mr. Cuff envisions is reproduction of programs for widespread distribution throughout the country.

Lessons Learned

Bob Emery, president of Television Producers Assn. and television director of WOR New York, summed up lessons he had learned from the Brownstone Theater productions. Big problem, he said, is to find a cast which knows both radio and stage acting. "If you've got good writers and material, you don't need complicated camera work," he said. Mr. Landsberg spoke of the

necessity of holding television audiences' attention for long periods, a technique made possible by coordinated programming.

The problem of injecting commercials into television programs was discussed by Paul Mowrey, director of television for American Broadcasting Co.

Benson & Rixon Names BENSON & RIXON Co., Chicago clothier, has placed advertising account with Sydney S. Lovitt Co., Chicago. Radio is said to be considered.

A. A. Porter Resigns
ARTHUR A. PORTER has resigned as
managing director of Canadian Institute of Public Opinion, a Gallup subsidiary, to head research department of
Leo Burnett Co., Chicago agency.

Howard Joins Browne FRANCIS HOWARD, formerly of Mer-rill Kremer Inc., Memphis, and pre-viously with sales promotion department of American in New York, has joined the copy department of the Burton Browne Advertising Agency, Chicago.

New on WRBM

New on WBBM
Two new public service programs have been added on WBBM Chicago. "Your Chicago" returned Dec. 15 3:30-3:45 p.m., presented in cooperation with Chicago Park District. "Wake Up and Live" dramatizing problems of Chicago needy, is aired with cooperation of 200 social agencies.

Pontius Returns

Pontius Returns

DON PONTIUS. member of Mutual
Chicago sales staff until entering service in 1943, has returned as successto Charles Goodman in MBS Chicago
co-op sales. Goodman shifts to west
coast office.

James M. Steinman, owner of "I
Went a Home" show broadcast for
short time on WCFL Chicago, has joined
Sydney S. Lovitt Co., Chicago agency.

Vet Tie-in

British Music

SERIES of recorded musical programs entitled "English Music Hall," designed to give Americans vivid cross-section of British dance music and specialties, starts on WNEW New York, 6-6:30 p.m. on Dec. 23.

NARBA Parley

(Continued from page 15)

stations in this country suffered ruinous interference largely from Cuban stations. In several instances it became necessary for the stations to assist the Cuban licensees through provision of consulting engineering advice and even of equipment.

The Cuban proposal submitted at Rio takes cognizance of the directional situation. The precise position of Cuba is not too clearly projected in this proposal, but it is construed as an indication that Cuba not only "demands" the duplicated assignments but expects assistance from stations in the United States and possibly Canada in the way of equipment and installation.

After setting forth its "demands" for the score of assignments, the Cuban proposal, translated from Spanish, reads:

Insofar as the use of the said channels requires expensive installations useful only for the specific frequency of the station that will use it, the Cuban Administration finds no justification to compel its broadcasting station the construction of such installation unless the stations would be protected through Regional Agreements or understandings with the neighbor nations with which it would have to share these channels, economically reasonable length of time, against changes.

Prior to the Rio conference, proposals had been made for extension of the North American agreement, but Cuba protested on the ground that she did not have adequate facilities [BROADCASTING, Oct. 8]. Altogether, Cuba asked for new assignments on some 20 additional channels, mainly below 1000 kc, most of them with power of from 15 to 50 kilowatts. Canada had proposed a two-year extension of the North American Regional Broadcasting Agreement (NARBA) and the United States a one-year extension Cuba insisted, however, upon a new agreement.

Little Chance of Unanimity

During the last fortnight it has become evident that there is little chance of unanimous agreement on extension of the treaty under its present terms. As a consequence, it has been concluded that it would be desirable to work out a revision of the treaty with a view to extension for a normal five-year term. Such a revised treaty would require ratification by the Senate.

Thus, instead of naming an engineering delegation, made up largely of FCC technical representatives for the conference, it would mean that President Truman would be called upon to appoint a formal delegation at policy level. Both the State Dept. and the FCC would be represented on the delegation. FCC Chairman Paul A. Porter presumably would be an American member and possibly chairman. Commissioner E. K. Jett, then FCC chief engineer, was a top figure at the Hayana conference in 1937 at

Eisenhower Named

NAMED last week as a member of the three-man committee by President Truman to make a fact-finding study of the General Motors labor dispute was Milton Eisenhower, president of Kansas State College and former deputy director of OWI in charge of administration. Brother of General "Ike", Mr. Eisenhower has been long identified with radio, both with OWI and previously with the Dept. of Agriculture where he was director of information. He figured prominently in the creation of the National Farm and Home Hour program of the department on NBC in 1928 and frequently appeared on the program.

which the treaty was drawn and logically would be on the American delegation.

The State Dept. probably would be represented by an assistant secretary, most likely William L. Clayton, who is in charge of Economic Affairs. George P. Baker, director of the Office of Transport & Communications Policy, probably would be a delegate or top technical adviser. Francis Colt deWolf, chief of the Telecommunications Division, and Harvey B. Otterman, assistant chief, in immediate charge of NARBA affairs, unquestionably would be advisers. George P. Adair, FCC chief engineer; John A. Willoughby, chief of the Broadcast Branch, and Marion H. Woodward, chief of the FCC's International Division, also are likely selections as kev advisers.

The conference agenda probably will be devised this week, assuming acceptances are in. Invitations then will go out telegraphically. It is not expected that the agenda will go far beyond the proposal advanced by Cuba. Other signatories. of course, will have an opportunity to present proposals. The original plan for the engineers conference was to adopt an interim agreement, probably embodying the present NARBA, with amendments to take care of the immediate needs of the signatory nations. That limitation as to scope still is likely.

Both the FCC and State Dept. are anxious to have the treaty discussions completed prior to the opening of the clear channel hearings on Jan. 14. Because of time element occasioned by the March 29 expiration of the original treaty, the department is desirous of completing the sessions as quickly as possible to procure Senate ratification before the expiration date.

In addition to the Cuban proposal, the Bahamas Government has advised the department that it wishes to be assured of its retention of the 640 kc channel, which is a clear I-A frequency used in the United States by KFI Los Angeles.

It made no further proposals.

Cuba, in its proposal [text in Oct. 8 issue], asked the right to use the 690 kc channel on a I-A basis. The frequency now is used by CBF Montreal with 50 kw and by KGGF Coffeyville, Kan., using 1 kw day and 500 w night. Cuba also asks for four channels with power up to 50 kw, four with 20 kw, two with 10 kw and four with power from 500 to 5,000 w in the standard band below 1000 kc as well as assignments above 1000 kc.

Channels Asked by Cuba

Specific channels sought by Cuba, together with U. S. stations now assigned to each frequency but exclusive of stations of other nations on the continent are:

690 kc as clear channel by Class I-A station with 50 kw.

580 kc with from 5 to 10 kw with directional antenna. (Regional occupied by KMJ Fresno, WDBO Orlando; WILL Urbana, KSAC Manhattan; WIBW Topeka; KALB Alexandria, La.; WTAG Worcester, WIAC San Juan, P. R.; WCHS Charleston, W. Va.)

600 kc up to 20 kw with directional. (Regional occupied by KFSD San Diego; WICC Bridgeport; WMT Cedar Rapids; WCAO Baltimore; WSJS Winston-Salem; KSJB Jamestown, N. D.; WREC Memphis; KROD El Pàso.)

640 kc, 50 kw outlet as Class II station with directional and protection provided under NARBA standards. (Clear channel—dominant station KFI Los Angeles, plus daytime or limited time WOI Ames, Ia.; WHKK Akron; WNAD Norman, Okla.)

730 kc—same conditions as 640. (Clear channel—dominant station XEQ Mexico City, plus daytime WPIK Alexandria, Va.)

740 kc—same conditions as 640. (Clear channel—dominant stations in U. S. KTRH Houston; KQW San Jose, Cal.)

800 kc—same conditions as 640. (Mexican-Canadian clear channel.)

860 kc—Class II station with power limitation of 20 kw. (Clear channel with CFRB Toronto as dominant station, plus KTRB Modesto, Cal., and WSON Henderson, Ky., daytime.)

910 kc—same conditions as 860. (Regional occupied by WRNL Richmond; WSUI Iowa City, Ia.; KLX Oakland; KPOF Denver; KFKA Greeley, Colo.; WABI Bangor, Me.; WFDF Flint; WCOC Meridian, Miss.; WGBI Scranton; WQAN Scranton; WJHL Johnson City, Tenn.; KRRV Sherman, Tex.; KALL Salt Lake City, and KVAN Vancouver.)

920 kc—same conditions as 860. (Regional occupied by KARK Little Rock; WGST Atlanta; WBAA West Lafayette, Ind.; WJAR Providence; KFPY Spokane; WMMN Fairmont, W. Va.; KFXJ Grand Junction, Colo.; KFNF Shenandoah, Ia.; WTTM Trenton; WBBB Burlington, N. C.; KUSD Vermillion, S. D.)

950 kc-Class II station with maximum power of 10 kw. (Re-

Mutual's Best 17 -

MUTUAL has sent to radio editors a list of what network believes to be its top sustaining shows for consideration by editors for listing in poll of best radio programs for past year. Total of 17 programs of all types have been listed.

gional occupied by WWJ Detroit; WSPA Spartanburg; WORL Boston; KJR Seattle; KPRC Houston; WPEN Philadephia; WAAF Ch² cago, and KFEL Denver.)

960 kc—same conditions as 950 kc. (Regional occupied by WBRC Birmingham; KROW Oakland; WELI New Haven; WSBT South Bend; KMA Shenandoah, Ia.; WDBJ Roanoke.)

1030 kc—same conditions as 950 kc. (Clear channel—dominant station WBZ Boston, plus synchronized WBZA Springfield, Mass.; KOB Albuquerque, now holding special service authorization on 770 kc, and KWBU Corpus Christi, Tex.)

1060 kc—same conditions as 950 kc. (Clear channel—dominant station KYW Philadelphia.)

As to the following channels, Cuba asks the right to Class II station with power of some 500 to 5,000 w using directional antennas, but asks for assignments on only four of the seven channels specified:

660 kc (clear channel—dominant station WEAF New York, plus KFAR Fairbanks, Alaska, and KOWH Omaha and KSKY Dallas, daytime stations.)

670 kc (Clear channel occupied by WMAQ Chicago.)

720 kc (clear channel occupied by WGN Chicago.)

760 kc (clear channel dominant station WJR Detroit plus KGIT Honolulu.)

770 kc (clear channel—dominant station WJZ New York, plus day-time stations WLB Minneapolis; WCAL Northfield, Minn.; WEW St. Louis, and limited time KXA Seattle.)

880 kc (clear channel—dominant station WABC New York, plus daytime WHB Kansas City.)

890 kc (clear channel—dominant stations WLS and WENR Chicago, plus daytime WHNC Henderson, N. C.)

School Listeners
PLANS are underway for the establishment of listener groups from schools throughout the nation for the new ABC series, "Symphonies for Youth," starting on Jan. 12. Los Angeles public school system is distributing material and information to schools. Program will be broadcast by Los Angeles Philharmonic Orchestra, Sat. 1-1:45 p.m.

harmonic Orchestra, Sat. 1-1:45 p.m.

Adopt European Schools
VOLUNTARY "adoption" of four European schools by listeners to the Martha Deane show on WOR New York was announced last week. Plan to contribute food, clothing and school supplies to the schools was suggested initially by members of the radio audience who had heard Dr. Howard E. Kershner, chairman of the overseas committee of the Save the Children Federation, describe conditions of Europe's children. Schools to which supplies are now being sent are at Gamvik, Norway; Calais, France; Meppel, Holland; and Houffalize, Belgium.

RCA Television

(Continued from page 15)

was countering the contention of DBS that television should await full development in color before seing offered to the public. CBS nas demonstrated its color video, using the mechanical filter principle, in many exhibitions since 1937.

The Princeton demonstrations, oth of color and black and white, eatured live talent.

RCA, Gen. Sarnoff told the gathring, will not be satisfied with plor television until it has percted an electronic system of smitting consonant with the juality now evident in black and vhite transmission.

Gen. Sarnoff said that the mehanical system for reproducing olor pictures is essentially the ame as that which the motion picure industry tried out and abanloned in 1911.

Protesting that he did not wish o carry on a controversy with those 'who believe that color television vill be ready tonight or tomorrow norning," he said. "We haven't idded color to television. We've idded television to color."

Acknowledging that there will be osolescence, both in transmitting and receiving equipment, with the progress of the science, he comnented: "We do not fear obsoles-:ence-we welcome it. That is why American industry continues to reearch and to make progress."

Using as an example a television eceiver that cost \$250, Gen. Saroff said that the obsolescence actor in such an instrument over ı period of five years would cost he owner less than two cents an perating hour, if he has service from two or more stations.

Gen. Sarnoff, when asked why here were so few television aplications on file with the FCC. hald the answer was simply one of noney. He predicted, "No broadaster will get rich on television in the next five years." He said, however, that there would be reward n time for those who could afford to survive the five year development period.

Transmitters in 1946

It was announced by Frank M. Folsom, RCA executive vice president in charge of the Victor Division, that new television transmitters will be available in the autumn of 1946. Television home receivers, he said, would begin comg off the RCA lines in the spring 1946. Consoles will provide standard and FM reception, world wide shortwave and video, he added.

The Princeton demonstration of color video employed a directional beam transmitter and parabolic annna. The power was 1/20 of a att, noted by the engineers as infinitesimal when compared to 50 kw audio transmitters now employed. Low power output was ascribed to the development of a new electron tube refined during wartime experimentation. The carrier frequency employed was 10,-900 mc, 20 times higher than any

NAB PROGRAM DEPT. PLAN BEING DRAWN

FORMAT for the proposed NAB Program Department, developed last week by the NAB Program Managers Executive Committee at a two-day meeeting at the Hotel Roosevelt, New York, will be submitted to Judge Justin Miller, NAB president.

Meeting a demand among station groups for association assistance in programming, the new department would be staffed by competent personnel and operate with a budget of perhaps \$40,000. Recommendation is to be submitted by President Miller to the NAB Board of Directors at its Jan. 3-4 meeting in Los Angeles.

Named to complete work on the department plan was this subcommittee: Harold Fair, WHO Des Moines, chairman; Ralph W. Hardy, KSL Salt Lake City; Eugene Carr, WHBC Canton, O.; Henry W. Slavick, WMC Memphis, ex-officio member.

heretofore used in telecasting.

Cameras employed the new Image Orthicon tube [BROADCAST-ING, Nov. 12] which is 100 times more sensitive to light than the pre-war camera tube employed by RCA. Mr. Folsom told visitors, "It 'sees' by candlelight, and can pick up any event or scene that the human eye can see comfortably. It makes possible round-the-clock programming of special events."

The newest RCA cathode-ray tubes were used. The fluorescent screen on which the image appeared in black and white is backed up with a very thin coating of aluminum which acts as a mirror preventing loss of light inside the tube. This principle, engineers stated, improves picture brilliance and

Receiving sets employing this equipment will cost from \$200 to \$300, it was announced by Mr. Folsom. They will possess screens ranging in size from 41/2 by 6 inches to 6 by 8 inches. The allwave receivers, to be produced in consoles after early manufacturing is under way, will cost \$500 and will be equipped with a 16 by 22 inch screen, he said. The receivers, with no moving parts, will be as simple to operate as today's audio sets, he noted.

Meanwhile, NBC has plans under way for expansion of their television operations, it was announced to the Princeton guests by Niles Trammell, network president. The WNBT transmitter in New York will be modernized. Stations will be built in Washington (1946), and later in Los Angeles, Cleveland and Chicago, if FCC grants licenses. A New York-Washington network will be operated in 1946, Mr. Trammell said, and between New York and Boston in 1947. Present coaxial cables that are being laid, it was contended at the meeting, are adequate for black and white, but do not provide a channel

wide enough for color in motion.

Mr. Trammell visualized a future nationwide network television system which used not only coaxial cable but automatic radio relay stations and Stratovision. He used "Stratovision" in his comment-a word coined by Westinghouse Radio Inc. to designate the new airborne transmission relay system upon which it is experimenting in cooperation with the Glenn L. Martin Co., manufacturers of airplanes.

RCA's executive vice president in charge of the laboratories, Dr. C. B. Jolliffe, said that in the lower frequencies allocated for commercial transmission, transmitters can be built to operate with at least 5000 w up to 33 mc. New antennas can be built, he observed, to make the effective power of 5,000 w transmitters the equivalent of 20

to 50 kw output. L. W. Teegarden, general manager of the RCA Victor tube and equipment department, said the following schedule for tube manufacture had been established: seven inch tube, available April 1; 10 inch tube, March; 15 inch tube, July 1.

KSUN Shift Approved; Three in Pending File CONSENT was granted by FCC

last week to voluntary assignment of license of KSUN Lowell, Ariz., from Copper Electric Co. Inc. to Carleton W. Morris as individual.

No money is involved.

At same action Commission placed in pending file the applica-tions of KELD El Dorado, Ark., KXA Seattle, Wash., and KFQD Anchorage, Alaska, for transfer of control and voluntary assignments of license until such time as the Commission adopts procedure rules contemplated by AVCO-WLW decision, or until applicants indicate an "election to follow procedure outlined in Public Notice of October 3, 1945." Notice relates to WLW transfer and proposed transfer procedure.

Eyeing Waring

SEVERAL national accounts in the Midwest are interested in the idea of sponsoring NBC's most expensive daytime property, the Fred Waring program, according to an NBC Chicago spokesman. Reputed to cost the network \$18,000 a week as a sustainer, program is being offered on a participating basis, each day to be sponsored by an individual advertiser. Thus each advertiser could sponsor Waring for about \$500,000 a year, instead of the \$2,000,000 a year total for both time and talent for the package. Waring contract, expiring Jan. 1, will be renewed at least until February on the month-to-month option provided in the contract.

Marr CBS Attorney

NED MARR, released from Navy with rank of lieutenant commander, has been appointed resident attorney for CBS Hollywood. Prior to service, he was associated with Los Angeles District Attorney's office, City Attorney's staff and with County Counsel's department.

'I' Out of 'Irate'

SIMPLIFIED which station officials say will take the "i" out of "irate" for busy executives has been prepared by KVOO Tulsa. The new card is designed to show at a glance the cost of time periods from announcements to an hour, classified according to cost per number of periods bought and part of day in which they come. Station officials say with their new card a timebuyer will not be required "to perform mental mathematical nip-ups to figure out how much time he will get for how much money."

Taylor Chairman

DEEMS TAYLOR, composer and president of ASCAP, last week was named chairman of the program committee for the Roosevelt Memorial Concert to be given under auspices of the National Foundation for Infantile Paralysis at the Waldorf-Astoria, New York, Jan. 30.

Levaur Appointed

SAMUEL B. LEVAUR, for the past 18 years associated with the country's major electrical appliance organizations, has been appointed sales manager for television receivers of Allen B. DuMont Laboratories, Passaic.

Sun Bowl Broadcast
NEW YEAR'S Day football game between New Mexico and Denver U. from
the Sun Bowl at El Paso will be broadcast on ABS. Play-by-play description
will be broadcast by Larry Munson.

Wise Starts Drake
WILLIAM H. WISE & Co. Inc., New
York (books and magazines), on Jan. 6
starts for 52 weeks Galen Drake on approximately 35 ABC stations, Sun. 3:153:30 p.m. Agency: Huber Hoge & Sons,
New York.

WBYN Sustainer WBYN Sustainer
NEW SUSTAINING program starts on
WBYN Brooklyn on Dec. 17, featuring
"Songs for You" by Dick Edwards, recently discharged from Naval Aviation, and new to radio. Program will
be heard five times weekly, 10-10:30 a.m. as sustaining feature.

DYNAMIC ELECTRONICS, N. Y. (Pfanstiehl Needles) started a spot announcement campaign on Dec. 1, three times weekly, for 13 weeks on the following New York stations: WQXR WLIB WOV. Agency: Sternfield-Godley Inc., York.

Venezuelan Office Venezuelan Office
EDWARD W. H. LUMSDEN of McCannErickson Inc., New York, has left for
Caracas, Venezuela, where he will open
a branch office for company. This will
be McCann-Erickson's eighth office in
Latin America since company entered
that field 11 years ago.

Sodus Starts on WOXR

SODUS CREAMERY Corp., Long Island City, is starting "Luncheon Concert" on SODUS CREAMENT COLD. COLORT' ON WOXR New York for 52 weeks starting "Luncheon Concert" on WOXR New York for 52 weeks starting Jan. I. Program will be heard daily for noon quarter-hour, 12:45-1 p.m. Agency is Charles W. Hoyt Co., N. Y.

Joiner Honored

COL. TALLEY D. JOINEE, N. W. Ayer & Son, Philadelphia, account executive, has been awarded the Legion of Merit for exceptionally meritorious conduct in the performance of outstanding service. Col. Joiner until Sept. 1945 when he joined the agency, was executive officer and later deputy director of Office of Dependency Benefits.

Brass Rail Shows

BRASS RAIL Inc., New York (restaurants), started "Melodies of Old Vienna" on WQXR New York on Nov. 30, 5:05-5:25 p.m. and one-minute spot announcements Fridays and Saturdays on station. Agency: Blackstone Co., N. Y.

Quaker Subscribes
QUAKER OATS Co., Chicago, is now
subscribing to the Arthur C. Nellson
Co., Chicago, index service. Company's
service will be based on expanded Neilson sample of audimeter homes beginning Jan. 1.

At Deadline...

BARTLEY HEADS FIRM SEEKING HOUSTON STATION

ROBERT T. BARTLEY, director of the NAB FM Dept., is president and treasurer of KHTN Corp. Inc., Houston, applicant for a 5 kw fulltime station in that city, operating on 610 kc. He is owner of 750 shares of common stock, 1 preferred. Gerald Harrison, vice-president, holds 150 preferred. T. Benjamin Adams, holding no stock, is secretary.

Mr. Harrison was Yankee Network station relations director up to 1944. He now is owner of 10% preferred stock of WMAS Springfield. Mass., and WLLH Lowell. Carl S. Wheeler, no business connection, holds 150 shares of preferred in KHTN Corp. His mother, Gertrude A. Wheeler, has 299 shares of preferred. She owns 40% of preferred stock of WMAS and WLLH. Albert S. Moffatt holds 150 preferred shares of KHTN Corp. He owns 10% preferred and all common stock of WMAS and WLLH.

ELECTRICAL EMPLOYES VOTE IN FAVOR OF STRIKE

UE-CIO headquarters in New York announced Friday Smith-Connally strike vote among 200,000 electrical appliance employes of General Electric Co., Westinghouse Electric Corp. and General Motors Corp. (electrical division) in 16 states on Dec. 13 had resulted in overwhelming "yes" vote in favor of strike action (story on page 99). Union said voting totaled 112,993 with 94,343 favoring strike. UE-CIO in telegrams Friday to Westinghouse and GE requested firms to "engage in continuous negotiations to arrive at a satisfactory agreement to the union's demands for the \$2 a day wage increase,"

RADIO LUXEMBOURG TO RESUME COMMERCIALLY

RADIO LUXEMBOURG returns to commercial operation about Jan. 1, Jacques LaCour-Gayet, managing director of Compayne Luxembourgeoise de Radio-Diffusion, original owner, announced in New York Friday. U. S. Armed Forces returned station to private owners Nov. 11. M. LaCour-Gayet said station "will be very glad to accept American advertisers," adding, "I am full of admiration for American radio and its beautiful programs." Radio Luxembourg, now on 100,000 w, returns to prewar 200,000 w power when equipment is available.

BARBER HEADS MMA

WALTER C. BARBER, Compton Adv., New York, last week was elected president of Media Men's Assn. of New York. Others elected: Daniel Pykett, of Arthur Kudner Inc., first vice president; Sidney Schaefer, Buchanan & Co., second vice president; Robert Erath, Kenyon & Eckhardt, treasurer; Harold Stearns, Duane Jones Co., secretary; William Schink, G. M. Basford Co., sergeant-at-arms; Harry Parnas, Cecil & Presbrey, and Archer Beyea, Export Adv. Agency, executive board members, and Daniel Gordon, Ruthrauff & Ryan, executive board chairman.

GITTINGS SUCCEEDS EGAN

THEODORE R. GITTINGS, assistant vice president of Western Union since 1943, last week was elected vice president in charge of public relations, succeeding Joseph L. Egan, who become president Dec. 15.

RADIO AT WHITE HOUSE?

WHITE HOUSE will have complete radio-television studio facilities under a plan sent to Congress last week by President Truman seeking \$1,650,000 to enlarge and improve the executive offices. The plans, while not divulged in detail, would provide for an addition to the West Wing of the Executive Mansion which would include an auditorium studio acoustically treated for radio with lighting sufficient for television pickup and other electronic innovations for aural and video broadcasting.

There would be seating accommodations for 300. It is assumed that in addition to broadcasting it would be used for news conferences and group gatherings, in lieu of the President's Oval Roomoffice. Improved news facilities also are understood to include adequate booth accommodations for direct network pickups and broadcasts from Executive Office. J. Leonard Reinsch, radio adviser to the President and managing director of the James M. Cox stations, is believed to have participated in drafting of the radio studio plans, along with representatives of major networks.

People

JUSTIN MILLER, NAB president, was admitted Friday to the bar of the U. S. Court of Appeals of the District of Columbia, over which he presided as associate justice before resigning to accept NAB post.

EDGAR KOBAK, MBS president, visited Secretary of Commerce Henry Wallace last Friday. primarily on postwar small business development. He was to confer with President Truman Saturday morning.

E. R. NARY, with Westinghouse 30 years, last week was named assistant to Walter Evans vice president in charge of radio and relate activities.

NATHAN HALPERN, formerly executive assistant to Cass Canfield, director of U.S. Information Service, appointed executive assistant at CBS headquarters in New York.

CARLYLE E. YATES, recently discharged from the Navy with the rank of lieutenant commander and formerly assistant to the general counsel of RCA, has been appointed assistant general counsel of NBC. Edmund Souhami, recently Army lieutenant who before war was engaged in private legal practice in copyright field, has been named NBC senior attorney.

WILLIAM B. LEWIS, vice-president and dio director of Kenyon & Eckhardt, New York. elected to board of directors.

KENNON JEWETT, copy chief of William H. Weintraub & Co., New York, appointed vice president.

NICHOLAS GASSAWAY and EMIL H. MARK, formerly account executive and copy writer, respectively, with Michel-Cather, New York, resign to establish new agency, Gassaway, Mark & Co., 238 Water St., N. Y.

1,000 STATIONS

(Continued from page 4)

President is Lee B. Weathers, who has substantial interest in Shelby Daily Star. Recently, WPIK Alexandria, Va., started operation as daytime station on this frequency.

A new regional station for Austin, Tex., was granted to Austin Broadcasting Co., for operation on 1300 kc with 1 kw power, unlimited time. Grant was made possible after Raoul Cortez, who had been granted daytime station on this frequency for San Antonio, agreed to accept 1350 kc. President of Austin company is John B. Connally, who holds 50% interest. Remaining stock is held by 10 others.

The Commission also designated 10 applications for new stations for hearing.

The Commission also designated 10 applications for new stations for hearing.

New station authorizations were: Marietta Broadcasting Co., Marietta, O., 1490 kc, 250 w. unlimited; Western Carolina Radio Corp., Shelby, N. C., 730 kc, 250 w. daytime; Austin Broadcasting Co., Austin, Tex., 1300 kc, 1 kw, unlimited, DA for nighttime use; Mrs. Lois Daniels, Brawley, Cal., 1490 kc, 250 w. unlimited; Broadcasting Corp. of America, Brawle; Cal., 1300 kc, 1 kw day, 500 w night, unlimited; Cal., 1300 kc, 1 kw day, 500 w night, unlimited; Arkansas Airwaves Co., North Little Rock, Ark., 1450 kc, 250 w. unlimited; Southwest Broadcasting Co., Pulaski, Va., 1230 kc, 250 w. unlimited.

Pulaski, Va., 1230 kc, 250 w. unlimited; Dairyland's Broadcasting Service Inc., Marshfield, Wis., 1450 kc. 250 w. unlimited.

Designated for hearing were: Kankakee Daily Journal Co., Kankakee, Ill., 1320 kc, 1 kw, daytime; Sunland Broadcasting Co., El Paso, Tex., 1340 kc, 250 w. unlimited, to be consolidated with El Paso Broadcasting Co. and Seaman & Collins, seeking san facilities in same locality; Southeastern Broadcasting System, Sanford, Fla., 1400 kc, 250 w. unlimited (to be consolidated with hearing on application of Hazlewood Inc., scheduled for Feb. 19 in Deland. Fla.); Peoples Broadcasting Co., Lancaster, Pa., consolidated with Lebanon Broadcasting Co., Lebanon. Pa., both for 1270 kc, 1 kw, daytime only; Peninsular Broadcasting Corp., Coral Gables, Fla., consolidated with Everglades Broadcasting Co., E-banon. Ps. Lauderdale. Fla., and Paul Brake, Miami, all for 1450 kc, 250 w. unlimited.

WLW

ANNOUNCES ANOTHER STEP FORWARD IN STATION AUDIENCE MEASUREMENT

with

NIELSEN

RADIO INDEX

This month, another chapter is added to the WLW story of progress in station audience measurement. Now—when FACTS about coverage and listening are increasingly vital, WLW becomes the first radio station anywhere to make available to its clients, its management, and its program department, the Nielsen Radio Index...mechanical measurement of minute-by-minute listening in an accurate cross-section of homes in the WLW Merchandise-Able Area.

This is the fifth step in WLW's march toward FACTUAL time-buying information:

1940-Merchandise-Able Area established

1941—Hooperatings adopted

1942-Cost Allocation System developed

1943-First rural coincidentals

1945-NIELSEN RADIO INDEX adopted

This is the Nielsen Audimeter, which records every dial change, every minute of listening, 24 hours a day, year in and year out. It measures FACTS.. with perfect accuracy.

With the start of the new year, this additional information about listening in the WLW area will enable us not only to show you the WLW story more accurately measured by standard yardsticks, PLUS new yardsticks never before available to us... but also to improve station operation and programming beyond even the high standards for which the Nation's Station is famous.

ONE has higher standards for tube performance than RCA transmitter designers; and any tube—especially a new design — has to be mighty good before these top-flight engineers will consider it.

In designing the new BTA50-F 50-KW transmitter, RCA transmitter engineers had these major objectives:

1. They wanted SIMPLICITY

9C22's with their air-cooled radiators and high power capability reduced the number of tubes required and provided the convenience and simplicity of air cooling.

2. They wanted EFFICIENCY

9C22's proved to be particularly suitable

for a 50-kw, high-level, class-B-modulated transmitter with its attendant high efficiency. Push-pull tubes in both the modulator and r-f output stages provide conservative and efficient operation.

3. They wanted DEPENDABILITY

The big rugged filaments of the 9C22's are built to last. Each tube in class-C telephone service is capable of a maximum output of 38 kilowatts. Therefore, operating a pair conservatively at 50 kilo-

watts' output provides dependability plus.

4. They wanted ECONOMY

Four 9C22's cost less than the six tubes used in the former transmitter design and, incidentally, take less filament power.

Whatever your problem, transmitters or tubes, AM, FM, or Television, it will pay you to consult your nearest RCA broadcast specialist. Or write to RCA, Commercial Engineering Department, Section 62-101, Harrison, N. J.

The Fountainhead of Modern Tube Development is RCA
