

Driver's seat

6th largest city. If you want the green light on sales ... here's the way to do it: just make sure, mighty sure, that W-I-T-H is on your radio list. It belongs there ... so put it there!

In that picture you're looking over the engineer's shoulder from the cab of one of those new streamlined babies down near Harpers Ferry, W. Va.

You're in the driver's seat.

And the obvious thing we're about to say about Baltimore radio is this: you'll be in the driver's seat on sales if you put W-I-T-H on the list of stations you're making up.

W-I-T-H is the successful independent in this big 5-station town. And it delivers more listeners-perdollar-spent than any other station in this, the country's

N.I.T.H

and the FM Station W3XMB

Baltimore, Md.

Why get the wrong number?

Philadelphia listeners don't. They dial 950. We asked them recently to give the dial settings of local radio stations. More of them gave the right answer for WPEN than for any network

These are some of the reasons why so many Philadelphia listeners have got the habit of turning to 950 for information and entertainment. They know that 950 means WPEN and a

station in the city.

WPEN has won this recognition by giving listeners in the Philadelphia area the kind of programs they prefer. Ever since this station was acquired by *The Evening Bulletin*—the largest evening newspaper in America—its programming has been getting better and better. WPEN now puts on more good music, more special events, more shows with a Philadelphia flavor and appeal than ever before. good show at any hour. Advertisers know that WPEN means a good buy.

Published every Monday, 53rd issue (Year Book Number) published in February by BROADCASTING PUBLICATIONS, INC., 870 National Press Building, Washington 4, D. C. Entered as second class matter March 14, 1933, at Post Office at Washington, D. C., under act of March 3, 1879. BROADCASTING... at deadline

REPORTED BUT IMPOSSIBLE TO CON-FIRM: Neil H. McElroy, vice president in charge of advertising, Procter & Gamble, slated for presidency with present chief, Richard R. Deupree, moving to chairmanship of board; Howard Morgens, manager of advertising department, or A. N. Halverstadt, director of media, to succeed to advertising vice presidency; William Ittman, facilities director, to become director of media. This report picked up last week in New York, Chicago and Cincinnati but denied flatly at P&G headquarters in latter city.

ANY DAY now expect announcement of acquisition by Marshall Field Co. of KJR Seattle from Birt F. Fisher for \$700,000. Conversations in progress for weeks with delay entailed by legal terms and placement of earnest money. Since KJR is not corporately owned, transaction would be for assignment of license, with receivables and other quick assets remaining with seller. Acquisition of ABC outlet (950 kc 500 w) would give Field Enterprises its fourth station.

EDWARD PETRY & CO., top rated station representatives, about to uncork results of farreaching spot survey, after having easeled presentation to topdrawer timebuying agencies.

MONEY GIVEAWAYS which became rampant during prewar years and which are cropping up sporadically as dial setting lures are coming under closer FCC scrutiny. Disclosure in recent FCC proposed decision involving FM [BROADCASTING, June 17] seen as forerunner of intensified campaign by FCC to ferret out giveaways which border on lottery in connection with program renewals.

J. C. PETRILLO getting lax in his letter writing. AFM head hasn't even acknowledged cozy epistle sent him May 24 by Justin Miller in which NAB president asked him to cease stalling and live up to promise to negotiate with broadcasters on national music policy. Next development will be summoning of Industrywide Music Committee for July discussion.

Bulletins

WPIK Alexandria, Va., daytime station on 730 kc Friday granted increase in power from 250 w to 1 kw. Potomac Broadcasting Corp., licensee, expects to have new transmitter installed for operation by Aug. 1.

FCC FRIDAY adopted order setting aside action of April 10 granting Quincy, Ill., station on 1230 kc, 250 w unlimited hours to Illmo Broadcasting Corp. and designated for hearing with WIL St. Louis as party intervenor.

Business Briefly

P&G CHANGE ● Drama series The Fifth Horseman, based on atom bomb and effect on world, replaces Rudy Vallee on NBC July 4 Aug. 22, Thurs. 10:30-11 p.m. (EST) for Procter & Gamble (Drene). Don Ameche replaces Rudy Vallee Aug. 22 for coming season. Agency, Kastor, Farrell, Chesley & Clifford New York.

NOXZEMA SUMMER SHOW • Summer sustaining replacement for Mayor of the Town, CBS, Saturday, 8:30-8:55 p.m. for Noxzema Chemical Co., Baltimore, will be Danny O'Neil and Guests from July 13 through Aug. 31 Agency, Ruthrauff & Ryan, New York.

NBC TIME SHIFTS ● NBC Sunday schedule, effective July 7, changes by three show switches. 2:30-3 p.m. period dropped by Westinghouse Electric Corp. taken over by International Harvester Co.'s Harvest of Stars currently at 2-2:30 p.m. Latter time filled by RCA Music America Loves Best now at 4:30-5 p.m. Shifts leave 4-5 p.m. open for NBC to offer to Ford Motor Co. (See Closed Circuit).

'KOBBLER' SPONSORS ● Frederic W. Ziv Co., Cincinnati, announces transcribed Korn Kobblers for following new sponsors: A&B Beverage Co., Augusta, Ga., on WGAC five times weekly for 52 weeks; LeRoys Fruit Juices, St. Augustine, Fla., on WFOY St. Augustine, five weekly for 52 weeks; McGill Motors, Indiana, Pa., on WDAD, one time weekly for 52 weeks; Henry's Radio Service, Ocala, Fla., twice weekly for 52 weeks.

FCC Revamps Clear-Channel Day Policy

FCC Friday revamped policy governing clear channel daytime and limited time stations on Class I-A clear channels, placing in pending files applications for Class II stations outside 750-mile radius or 0.5 mv/m 50% skywave contour dominant stations and considering on merits those within 750-mile radius or 0.5 mv/m contour of dominants.

New procedure interpreted by Louis G. Caldwell, general counsel, Clear Channel Broadcasting Service, as opening way for complete breakdown of clear channels and limiting power to 50 kw. FCC policy superseding that announced Feb. 5 for Class stations.

(1) Commission will withhold action on applications for daytime or limited time

Applications under first category go to pending files until FCC decides clear channel issue; then "suitable notice will be afforded all interested persons and a period will be provided in which to file competing applications." All applications in conflict with 3.25 and 3.22 of FCC Rules & Regulations to be dismissed withou' prejudice.

Said Mr. Caldwell of new procedure: "Under the first category the Commission left the way open for complete breakdown of clear channels. Under the second category the Commission places obstacles in the way of higher power."

FCC announced following applications placed in pending files under new policy:

expected anytime. Principals will be Edward A. Foote, now with Alvord & Alvord, tax law firm, recently released from Navy as Lt. Comdr., and Sutherland G. Taylor, until February member of CBS legal staff specializing largely in FCC matters.

EXCLUSIVE motion picture rights to a relatively unknown radio character may be purchased by 20th-Century-Fox at reported \$500,-000. Studios reported interested in obtaining rights to *Tommy Timber Time*, ventriloquist program featuring former Grand Rapids Announcer Gordon Kibby. Kibby's "Cinderella" story amazing, if reports are true, because for

stations on I-A channels where proposed stations are outside 750-mile radius of dominant I-A outlet, using non-directional antenna, or outside 0.5 mv/m 50% skywave contour of dominant station, using directional.

(2) Commission will consider on merits applications for daytime or limited time stations inside 750-mile radius of dominant, using non-directional antenna, or within 0.5 mv/m 50% skywave contour of dominant station, using directional. Applications in this category not to be granted limited time, but will be considered and "may be conditionally granted for daytime operation only." • –

on WDGY

Mornings Different

Now

Listeners in Minnesota and bordering states received six hours of new radio entertainment on June 3 when WDGY completely reprogrammed its entire morning schedule. This new schedule is a carefully planned variety of nearly three and a half hours of all types of music, punctuated by well-edited news, weather information, stock, grain and livestock reports, and public interest features. It's the kind of programming that will invite listeners to dial WDGY and leave the dial set for six hours of light, pleasant and interesting radio variety. This represents another step in our studied effort to bring better listening to the nation's eighth market.

Old Favorite

... on "The Voice of St. Louis"

gain "The Land We Live In" steps up to receive new honors.

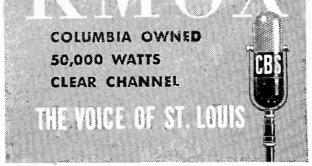

This time it's a distinguished civic service award from the St. Louis Jr. Chamber of Commerce, as well as an honorable mention from Ohio State University's 16th Institute for Education by Radio. These two trophies take their place beside a first prize plaque awarded to "The Land We Live In" in a 1939 nation-wide competition for "program and script excellence and for contribution to community service".

An old favorite with a colorful nine-year record, the program has been acclaimed repeatedly by civic leaders for its unfailing accuracy, and for its showmanly re-enactment of the stirring saga of the mid-Mississippi Valley.

Besides winning the plaudits of critics, "The Land We Live In" has won public appreciation for its sponsor, the Union Electric Company forging an ever-stronger link between the company and the thousands it serves.

A tribute to those who write and produce "The Land We Live In", these many honors reflect the creative skill available to *all* advertisers on "*The Voice of St. Louis*".

REPRESENTED BY RADIO SALES, THE SPOT BROADCASTING DIVISION OF CBS WITH OFFICES AT: NEW YORK, CHICAGO, LOS ANGELES, ST. LOUIS, SAN FRANCISCO, ATLANTA.

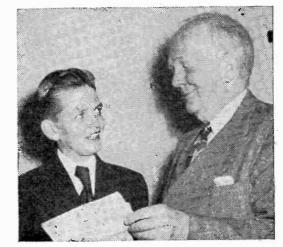

Feature of Week

YOUNGEST associate memberor active member for that matterof the Radio Correspondents Assn., Washington, will be McHenry Tichenor III, son of McHenry Tichenor, president-owner of KGBS Harlingen, Tex., and FM grantee.

In Washington last week with his parents to learn something about Government and radio regulation, young Mac, just 14 on June 2, made application for associate membership in the Radio Correspondents Assn. During school year Mac is featured on KGBS as *The Kid Reporter*, in his own news commentary, 11:45 a.m. to 12 noon.

"I broadcast high school news, give my own comments and occasionally interview some student, especially one who has won honors," said Mac. While in Washington he compared notes with Earl Godwin, ABC commentator, dean of Washington newsmen and past president of the Radio Correspondents Assn.

To Mr. Godwin Mac personally handed his application for associate membership. He carries an active working press card from the *Nevada State Journal*, Reno, a newspaper which his father once owned. His father at one time owned the *Valley Morning Star*, Harlingen. Mac is studying television, has learned how to handle a studio control job and generally makes himself useful at KGBS

Mac Tichenor, Earl Godwin

when he isn't in school. He is studying facsimile in the belief that by time he completes school facsimile will be a regular service.

In Washington he visited Congress, interviewed Rep. Milton West (D-Tex.), of Brownsville, on Mr. West's bill providing for an eight-year dam project on the Rio Grande river, which will provide expanded irrigation for the Valley; saw both Houses of Congress in session, and called on FCC Comr. Paul A. Walker, old friend of his father's from Oklahoma.

Young Mac has more than a son's interest in KGBS. He owns one share himself and has the promise of his father that he may enlarge his stockholdings at the proper time—providing, of course, FCC approves.

THEY ARE

OUR

LISTENERS

WANT TO

STAY WHERE

Some 33,000 families in the Washington region, it is estimated, are currently planning to buy new homes! The greatest demand, surveys show, is in the three-bedroom ... \$6,000 to \$10,000 range.

Yes... our listeners... the down to earth, hard-working, permanent people of Washington are on the march into the market. And how about you? If you'd like to sell your product at a low cost per sale ... WWDC is the way to do it.

MORE GOOD Housing News

It is estimated that 58% of those owning homes are planning extensive repairs and improvements. They range all the way from redecorating to installation of air-conditioning equipment. These facts are from the Planning Committee of the Washington Board of Trade, and the Opinion Research Corporation of Princeton, New Jersey.

Sellers of Sales

INETEEN years ago while he was looking for a job in Detroit, Emerson (Tim) Elliott was told to try an advertising agency (Campbell-Ewald). "What kind of business is that?" he asked.

In the nineteen years since then, Mr. Elliott, who is now vice president in charge of media for the agency's Eastern Division, has presumably learned the answer. He is responsible for such lush radio accounts

Mr. Elliott, it turned out, was quick to learn not only what an agency was, but how it operated. Soon he was moved to the media department. And in 1935 he was transferred to the New York Office.

In 1944 he was appointed vice president in charge of media of the Eastern Division.

The year 1927 was the turning point for Tim Elliott in more ways than one. That year he became an American citizen, started on his agen-

cy career, and mar-

ried his childhood

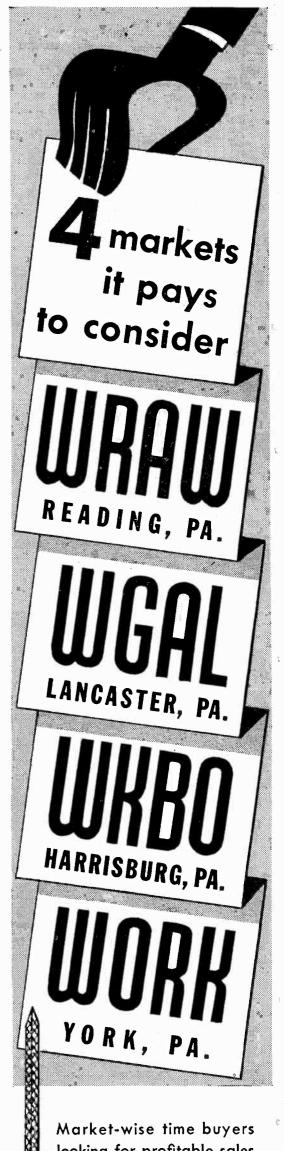

sweetheart, Hilda

Symonds. The Elli-

A TELEVISION DIRECTOR is *made* by the hit shows he creates. For obvious reasons ***** NBC television directors are credited with being tops in television.

Essentially men of vision and imagination, they got into television in its formative years. Born showmen, raised in show business, they bring to bear in NBC television productions the full weight of years of individual successful experience in the theatre, films, the sports world and in radio.

That previous experience—adapted through actual daily application to the stricter requirements of the television medium—is reflected in the consistent excellence of all NBC television productions.

What makes WNBT the best media buy in Television today?

At WNBT the experience, imagination and stagecraft of show-wise NBC television directors (and writers, camera crews, technicians and engineers) are backed by the finest television facilities in the business.

Whatever your television requirements—whether you produce your own shows with NBC experts ... whether your ideas are developed and produced by NBC ... or whether you sponsor programs built and telecast by NBC—WNBT offers short cuts and economies made possible by expert planning and the longest, continuous practical experience

in television.

Doubters Kayoed By Fight Telecast

IBEW Moveto Take Over Nearly Stops Show

By ROBERT K. RICHARDS

BILLY CONN wasn't the only fellow knocked out at Yankee Stadium last Wednesday night.

There was a clean left to the jaw scored against many of those who doubted that television is ready for the public.

Before an estimated video "ringside" audience of 100,000, NBC presented conclusive pictorial proof that television is ready. If, as has been estimated, 85,000 of those 100,000 do not now own television receivers, it is because they can't find any to buy.

Oddly enough this television pro-

gram, considered as routine by the production, engineering and executive staff of the network-which has been broadcasting bouts since 1939—was produced under the most trying circumstances the staff had ever faced.

IBEW Move

At the last minute-one hour before showtime-22 representatives of IBEW (AFL) walked into Yankee Stadium where NBC's 30man staff was making final preparations and announced they were present to "take over."

IBEW had moved in 24 hours earlier, actually. On Tuesday night, the union notified NBC and ABC that they were going to take such action unless the networks negotiated contracts immediately with them. Their thrust was against NABET, the national independent union to which engineers of these two networks belong. Network executives informed IBEW that their own technicians would handle the show, as scheduled, and maintained this attitude throughout negotiations.

INTERESTED IN TELECAST of Louis-Conn fight at Statler Hotel, Washington, Wednesday night were these guests of NBC (front row, l to r): Sen. Wallace H. White Jr. (R-Me.), Minority Leader; Sen. Theodore F. Green (D-R. I.); unidentified character; Speaker Sam Rayburn (D-Tex.); Rep. Eugene Worley (D-Tex.); Rep. James W. Wadsworth (R-N. Y.). Back row (1 to r): O. Max Gardner Undersecretary of the Treasury; Sen. Walter F. George (D-Ga.); A. D. Willard Jr., NAB executive vice president; Sen. Elbert D. Thomas (D-Utah); Lewis Deschler, House Parliamentarian; Rep. Frank A. Barrett (R-Wyo.); Rep. William T. Granahan (D-Pa.); Rep. Frank Buchanan (D-Pa.).

NBC video official that the IBEW would be on hand-"but as standbys."

When they arrived, however, their leader-Cullane-announced that his men were going to work on the show. Burke Crotty, field production chief of NBC television, informed the union representatives that he couldn't produce the program with a green crew. John F. Royal, NBC vice president in charge of television, was called from his ringside seat where a special telephone previously had been installed.

He discussed the problem with the IBEW men and was told that they would run the show or the power lines would be pulled. IBEW served a similar ultimatum on ABC, which was broadcasting, also under Gillette sponsorship, the audio blow-by-blow program from ringside.

ing television audience, as well as to the listening audience, explaining the situation if the production was not telecast. It was understood

that ABC was ready to cooperate with NBC in carrying the matter to the public if negotiations failed.

This behind-the-scenes activity probably was not apparent to any but the practiced viewers, who may have wondered why the early film shots in the television show were cut off in mid-reel. The two minute ten second delay had sabotaged the carefully prepared studio cues.

It must not have disturbed David Sarnoff, either. The president of RCA, long a proponent of television, certainly found satisfaction in the enthusiastic reaction to the production he observed at the Statler Hotel in Washington, where 800 high Government officials and members of Congress saw Louis and Conn in action.

Form City Coverage

In New York, 1500 special guests viewed the program in NBC's large Studio 8-H. The four-city coverage was fed from WNBT New York to Philco's WPTZ Philadelphia, GE's WRGB Schenectady

PRESS COMMENT ON TELEVISION **Consensus Was Video Made Every Seat** Equivalent to Stadium Ringside-

PRESS COMMENT on NBC television follows:

"In many ways it was better than ringside," said Howard Cowan, feature writer for the Associated Press. "The television spectator saw more than a fan sitting in the eighth row at the stadium can see. The camera gave a better view because it was on the level with the ring instead of below it." "The consensus was, 'this is the way to see the fight'," said Doug Kennedy, writing in the New York Herald Tribune. "No one was cold, no one was uncomfortably perched on hard wooden seats, and none had to jump from his seat at every flurry of blows by the fighters." "The images were in black and white of course and clear," said the United Press radio correspondent covering in New York. "The fight action appeared like that on a movie screen."

large NBC studio in Radio City, when as fine a television display as was ever attempted in this country was flashed on television screens," said Edmund Leamy of the New York World Telegram. "Television has shed its swaddling clothes. NBC television is to be congratulated." "The fight picked up by five cameras in the stadium came in clearly and it seemed as though you were sitting in an elevated chair about three or four rows away," said Paul F. Ellis, feature writer of the United Press. "Those at the fight may have been disappointed but not those via television." "The clearest thing about television is that it has changed from short to long pants," said Ben Gross, radio editor of the New York Daily News. "The camera work was excellent, and the close-

The IBEW attitude, however, was reported adamant. And at 7 p. m. Wednesday, their delegation marched into Yankee Stadium. A half hour earlier, Mike Jacobs, the fight promoter, had informed an

Relented at Last Minute

Mr. Royal, it is understood, stood by the network's resolution to produce the show with NABET engineers or not at all. At the last minute, IBEW's delegation relented. The show went on the air two minutes and ten seconds late. Meanwhile at NBC headquarters in the RCA building, many executives of the network breathed sighs of relief. They had been preparing policy announcements to the wait-

Video Broadcast

(Continued from page 15)

and Dumont's W3XWT Washington. The telecast was sent to Washington through Bell System's coaxial cable and to Philadelphia and Schenectady by radio relay. All cities reported perfect reception.

The cost of the production to NBC and the sponsor, Gillette, can only be estimated, since neither sponsor nor network is releasing figures.

Based on the average \$400,000 monthly operating cost of NBC television, and the unusually large crew employed in this particular production, it probably cost the network in the neighborhood of \$15,000. This was for the production alone and does not take into consideration elaborate entertainment offered guests by NBC in Washington.

The television rights, purchased from Promoter Jacobs, are said to have cost over \$100,000—but it is understood that this may have been a package price, including not only the championship bouts but other fights scheduled for the future.

If Gillette's contribution defrayed bare expense, then, its cost to reach 100,000 viewers through the new medium was between \$50,000 and \$100,000.

30 Men on Production

The production from the stadium was handled by 30 men under the immediate direction of Mr. Crotty, veteran NBC video producer. He was assisted by Garry Simpson and Noel Jordan. Technical field supervisor was Edwin C. Wilbur, assisted by Alfred Jackson. There were five cameras—three image orthicons, two with turret lens equipment; two orthicons. These and other equipment were manned by 23 technicians.

At the studio, Warren Wade, television program director, directed production. Remote-tostudio switches were handled by Albert V. Cole, with Al Protzman and Joe Conn, technical directors, guiding technical operations at the central twitching point. Special events coincident to the telecast were handled by NBC's video special events director, J. Harrison Hartley.

The entire production was supervised by Noran E. Kersta, television expert, NBC's video manager. (For on-scene review of production, see story, page 17). The demand for tickets at NBC New York and in Washington reached flood-tide by noon Wednesday. The scarcity of receivers, limited the number of viewers.

WASHINGTON TELEVISION SCENE Dignitaries Liked the Title Fight

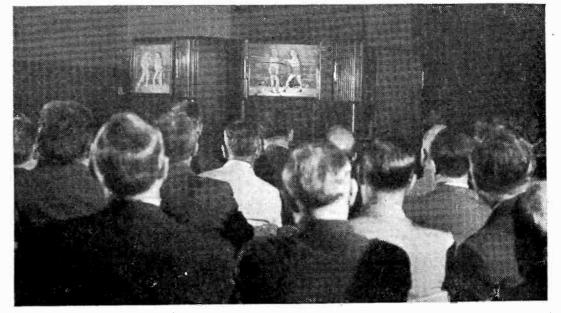

NBC Acts as Host to 800 At Video Show In Statler

A SUBSTANTIAL cross-section of Washington's officialdom, which doesn't know much about the intricacies of black-and-white versus color television, accepted the B-W type hands down Wednesday night after viewing the Louis-Conn fight relayed by coaxial cable from Yankee Stadium New York to the Statler Hotel in Washington.

Among the 800 NBC guests who sat in solid comfort around 21 receivers of various screen sizes and mainly of prewar vintage, were about 400 members of Congress and dignitaries representing practically all phases of Washington public life.

More than a quorum of the FCC membership and executive staff was there too and while there were no public expressions, it was evident that what they saw and heard constituted virtually unanimous acceptance of black-and-white lowband television by the most select audience ever to witness a telecast. Only a handful of those present, like FCC members and members of the Congressional committees dealing in radios had seen CBS color television.

B-W video had been given its greatest impetus since the visual art sprang from the laboratory a score of years ago. The reception was practically perfect. Every blow, every move about the ring was followed. Many of those present were congratulating themselves for

IN AIR-CONDITIONED comfort in Washington's Statler Hotel—courtesy of NBC—these viewers saw the Louis-Conn fight last Wednesday night. With such scenes duplicated in New York, Philadelphia and Schenectady, the public witnessed the first large-scale demonstration of a new era of luxury entertainment—with no women fainting, no scramble for seats and no dented fenders from crowded parking lots.

having avoided the event itself, with ringside seats at \$100 a throw.

Du Mont Showing

Supplementing the Statler party, a group of about 75 witnessed the telecast in a down-town office building picked up from the air from Du Mont's Washington experimental station W3XWT. By special arrangement with NBC W3XWT picked up the WNBT telecast for rebroadcast to the handful of set owners in Washington and environs. The reaction was the same—vociferous applause for the quality.

Hosts to the distinguished NBC Washington audience were Brig.

Gen. David Sarnoff, RCA president, Frank E. Mullen, NBC vice president and general manager, Frank M. Russell, NBC Washington vice president, and Carleton D. Smith, general manager of WRC, NBC's Washington station and of its upcoming television station. Gen. Sarnoff, who darted about the Statler banquet floor to get firsthand reactions, described the telecast as nothing unusual because of the development of the image orthicon, the new great white light which permits the modern RCA-NBC camera to pick up clear pictures by the illumination of a candle or match.

"Is this acceptable television?" asked Gen. Sarnoff, obviously alluding to the set-to with the network's chief competitor, CBS, over black-and-white low-band versus color high-band video.

He said the answer was evident --practically all concerned wanted to know when and how they could buy television sets, and most of them didn't ask how much.

If there was any unfavorable reaction, it was to the commercials. The still shots of Gillette razors and products were not specially prepared for the telecast. NBC ex_{ε} ecutives said there was no special styling, beyond the fact that films were made of slides used for the commercial message. To those who had seen other television commercials, it was thought they were both antiquated and crude and not commercial video at its best. In the audience were most of the top echelon of Washington's newspaper corps. They were startled at the quality and detail. They knew that a new medium of communication of intelligence was here and here to stay. One highly-placed Washington bureau manager said he was immediately whipping out (Continued on page 91)

It is estimated that there are 5000 sets within the greater New York area. A conservative estimate places at 15 the number of individuals who saw the production on each set. Another 2000 sets in Washington and Philadelphia, with an additional 300 in Sche-

"He's been that way ever since the sponsor complained about his enunciation."

Telecast Culminated Four Days Labor

NBC Staff of 28 Arranged Fight Equipment

THE LOUIS-CONN fight lasted only 8 rounds for the participants, but it lasted four days for the NBC video crew.

The installation at Yankee Stadium for the championship bout was begun last Monday. Four tons of equipment were moved into the stadium. This equipment included three image orthicon cameras, two orthicons, the monitors for each camera chain, a master monitor, a switching unit, an audio monitor and the myriad other smaller units required for the job.

Engineers had to rig up 1400 feet of camera cable, 1000 feet of mike cable and 2000 feet of coaxial cable for the assignment. The stadium pickup alone, without counting heads on the studio end of the job, required a crew of 28: two producers, two announcers, three telephone men and 21 engineers. Five engineers were on cameras; three on audio control; five on video control; one supervisor and his assistant; three transmitter engineers; and three setup men.

Directing the Show

This remote tangent of the historic NBC production was handled by Burke Crotty, veteran video producer. Warren Wade, NBC television program director, handled the studio assignment. Both worked under the general direction of Noran E. Kersta, television manager for the network.

Burke Crotty probably knows more about remote video production than any man in the business. He started with NBC 17 years ago as a mail room messenger and he has been with the video production group since 1939. It was in that year, incidentally, that he directed the first bout ever to be telecast —the Nova-Baer go, and it likewise was from Yankee Stadium.

"It was lousy," he remembers.

Canada Dry Places

CANADA DRY Ginger Ale Co., New York, has started sponsorship It was done with one camera at ringside and the camera of that day, as compared with the sleek new turret-lens image orthicon, was something like a kite compared to a jet propelled plane.

Working with Burke at the stadium was his assistant, Garry Simpson, an intelligent and capable director who will take over Burke's spot for four months in a couple of weeks when the veteran is hospitalized for an operation.

Engineering field supervisor was another NBC 17-year veteran, Edwin C. Wilbur, a large genius. He stands over six feet when he isn't stooping over to pick up several hundred pounds of equipment. His strength of shoulder and facility of mind are legend around the video camp. Eddie's assistant is a mustached, pleasant young scientist by the name of Alfred Jackson.

Industrious Workers

These men, and their fellow engineers, work at installing remote equipment like beavers work at building a dam—except that beavers knock off for rest now and then. They crawled along the towering stadium beams to anchor cable; they shinnied up and down the 30-foot camera stand to set up the orthicons. They are more than engineers. They are showmen, for they man the cameras and must have an intuitive sense of "right shots."

As Burke Crotty puts it, "Those guys are geniuses. If you say to 'em in a nice way, 'Look, can't we get Conn to carry a camera so we can catch the knockout punch?' they'd start looking for Conn."

The three image orthicons which did most of the job at the stadium were 145 feet from the ring-center. Two of them were equipped with the new turret lens. A cameraman must use both hands to follow a show like the Louis-Conn bout, and if he's handy with his feet, he's that much better off.

If the production man calls his camera and asks him to change lenses, he can do so with a twist of the wrist. That would be his

BURKE CROTTY, who directed Louis-Conn fight production at Yankee Stadium, examines one of the two new RCA Image Orthicon cameras equipped with turret-lens assembly.

right wrist, for he's using his left hand to pan the camera. His right hand, having changed the lens, must then grasp a knob on the right side of the rig to adjust the focus. Burke says that his best cameramen will be able to do this job in one and a half seconds after a little practice. Before the turret lens, it took several minutes.

The turret-lens assembly was used for the second time at the Louis-Conn scrap. The engineers and producers, however, hover over it like it was a rare Cezanne. "It's the best damned television engineering job that's ever come out," says Burke.

Two other cameras, one the original pilot model orthicon, were situated in the "cage"—a wire-enclosed platform suspended from the stadium's second tier. These cameras were about 235 feet from ringcenter. If you saw the fight through the forward cameras, you were getting a \$100 seat. From the rear cameras, you were seeing it from the \$50 section.

Many people, perhaps even some of the brass hats in Rockefeller Center, ask Burke and Eddie why they don't put cameras all around the ring. "Why not a camera right on the apron?"

Burke says, and it sounds logical, that people usually see a fight from one seat. Mike Jacobs won't let 'em run around the ring to get different views, even at \$100 a copy. So what television offers them is what

Highest Hooper Yet for Single Net Show Goes to ABC for Bout

J. C. SPANG JR., president of the Gillette Safety Razor Co., could be excused last Thursday morning for whistling while he shaved. First, it must be presumed, he could afford a new blade for his razor. Second, a record number of people had heard about Gillette the night before.

For an unannounced, but unquestionably impressive sum of money, Mr. Spang had bought the television and radio broadcasting rights to Wednesday night's world championship Louis-Conn fight. His investment, by. Thursday morning, seemed to be bringing rich returns.

Highest Hooper

The radio broadcast, carried exclusively in the U. S. on 205 ABC stations, scored the highest Hooperating ever received by any program on a single network, the highest ever received by any commercial show. The rating had been exceeded only by those accorded three wartime broadcasts of the late President Roosevelt over all four networks. fight was 63.6. But the Louis-Schmeling fight had been carried on two networks—NBC's Red and Blue.

The fight reached 45,000,000 Americans, but it also reached an undetermined number of listeners abroad. The International Dept. of NBC broadcast blow-by-blow description in Spanish, French and Portuguese to Latin America and France.

At the ringside was E. B. (Buck) Canel, NBC Spanish announcer, who broadcast on the following NBC Pan American network affiliates: XEW and network, Mexico; Radio Splendid and network, Argentina; Radio El Espectador and network, Uruguay; Station CB 114, Chile; TGW Guatemala City; YNPS Managua, Nicaragua, and WNEW San Juan, P. R.

Paul Gilson, U. S. representative of Radiodiffusion, Radiodiffusion, France and Rene Dreyfus described the fight for the French audience. Mario Cardoso and Carlos Cavalcanti, of NBC's Portuguese language section, described the bout for the Emissora Unidas radio chain of Sao Paulo, Brazil. Both French and Portuguese broadcasts were made from NBC television studios where the announcers viewed the telecast of the fight. Although the price which Gillette paid Mike Jacobs, president of the Twentieth Century Sporting Club, promoter of the fight, for its exclusive broadcast rights was unknown, the time charges for the 205-station hookup by ABC amounted to more than \$14,000.

of a half hour musical show called Canada Dry Caravan, Saturday 10:40 p.m. on XEW Mexico City and rebroadcast through recordings on stations in ten cities in Mexico. Program consists of a symphony orchestra of 40 musicians with Ernesto Roemer, conducting. Contract for 13 weeks was placed through J. M. Mathes Co., New York, on the XEW Network and stations in the following cities: Guadalajara, Orizaba, Puebla, Vera Cruz, Monterrey, Chihuahua, Acapulco, Ciudad Juarez, Celaya and Aguas Calientes.

In a special survey, C. E. Hooper Inc. reported that ABC's broadcast of the title flight had earned a 67.2 rating, had reached an audience estimated at 45,000,000.

No other fight had come within a left hook's range of approaching the radio audience which this one reached. The highest Hooperating for any other fight was 58.6 for the June 1938 heavyweight title bout between Joe Louis and Max Schmeling. A Cooperative Analysis of Broadcasting rating for that they would get if they were there.

Not Too Complicated

If you talk to Burke and Eddie and Garry long enough, you get a lot better picture of television than you get out of the press releases. "You can make this stuff too complicated," Burke says. "We can do it now. We can bring 30 men in here and a few tons of equipment and deliver a fight in your home. It will be a better job than you could do with your own eyes. Probably, because we have five cameras in focus on the scene all (Continued on page 91)

Radio Plan to Sell Surplus Projected

WAA Advertising Set-Up Includes \$650,000 **For Broadcasts**

FIRST extensive use of broadcasting in sale of surplus property is projected for the coming campaign of the War Assets Administration to unload with all possible speed large quantities of war surplus. If Congress approves an advertising budget estimate for WAA of \$16,000,000 covering the 12 months starting July 1 the agency will have about \$650,000 tentatively allocated to spot broadcasting.

In the planning stage at WAA is a national advertising campaign designed to explain the surplus disposal situation to the public. This campaign would be of an institutional nature and would use both network and spot time. The project is not included in the budget estimates now before a House appropriations subcommittee, it is understood, those estimates merely covering spot radio.

Must Inform Public

WAA top policy officials feel that the facts of surplus disposal are not understood by the public. They point out that the housewife, for example, wonders why she can't go to WAA and pick up cheap some items hard to find in stores. They feel that the priority system, set up by law, is not clear in the public mind nor is the fact that most surplus is sold to dealers, with the exception of veterans.

This is the first indication that WAA recognizes radio's value as an institutional as well as a direct-selling medium. Last November a coordinated network-regionallocal campaign was proposed to surplus disposal officials by Frank E. Pellegrin, NAB Director of Broadcast Advertising [BROAD-CASTING, Nov. 26]. At that time disposal was in charge of the Reconstruction Finance Corp. RFC expressed interest but still spent its advertising money for white space, catalogs, direct mail and other media.

Now that Congressional fingers are pointing to surplus disposal, WAA officials are anxious to have their story clearly explained to avoid misunderstanding that exists on Capitol Hill as well as throughout the country. Moreover they want to dispose of goods while the public buying power is high and surplus can be sold with least harm to normal production and distribution. WAA has speeded up its disposal system all along the line in an effort to move its huge stock of war leftovers. Plans call for scheduling by July 1 of 161 sales at disposal centers all over the country, centering at the 33 WAA regional offices. These sales call for disposal \mathbf{of} \$1,754,002,000 of war surpluses.

The 33 WAA regional directors operate with their own advertising budgets, provided by the Advertising Division in Washington which exercises policy control. These directors, however, have control over their advertising funds except where special problems involving policy are involved. Sales-at-Site Radio

Radio has not been used extens-

ively by these regional directors because sales are not made to the general public but to governmental units, tax-free institutions and wholesale-retail firms.

WAA officials in Washington believe regional directors will use radio in the sales-at-site campaign to create public interest in the disposal drive and to promote individual sales.

The original WAA advertising estimate for the fiscal year starting July 1 called for an expenditure of about \$550,000 for radio as part of an overall \$16,000,000 advertising budget for the year. Later this estimate was increased to approximately \$650,000.

As a practical matter of WAA operation the advertising budget probably will be used as circumstances dictate from day to day. This has been the case in the fiscal year about to expire, in which the surplus disposal agencies (first Reconstruction Finance Corp., next War Assets Corp. and now WAA) have operated with a flexible advertising budget ranging from \$10,000,000 to \$15,000,000.

The 1947 fiscal year budget is understood to specify a spot announcement item and a program item, with definite figures. These are considered purely tentative since advertising funds of necessity will be allocated to media as developments require.

Through Fuller & Smith & Ross

General WAA advertising is placed through Fuller & Smith & Ross, which serves as advertising counsel and handles billings. The agency handles a portion of the regional advertising but the greater part is placed direct by the regional directors.

Director of the WAA Advertising Division in Washington is Carl K. Hart, with William B. Hughes as deputy director. Both are practical advertising and merchandising men. Mr. Hart was in the advertising department of Macfadden Publications and Esquire magazine before entering the Air Forces where he rose to a lieutenant colonelcy. Mr. Hughes was a merchandising and industrial counsel in New York before joining

JUSTICE Bennett Champ Clark of the U.S. Court of Appeals for the District of Columbia, administered the oath of office to his life-long friend, FCC Comr. Paul A. Walker, in the Commission hearing room Thursday. Mr. Walker was unanimously confirmed June 15 by the Senate for another seven-year term. He's the only charter member of FCC still serving, having been named in 1934 by the late President Roosevelt (see Respects sketch, page 54).

the old WPB during the war.

WAA sales are conducted under strict priority rules specified by law. Priorities run in this order: Veterans, Federal agencies, state agencies, municipal agencies, taxfree institutions, wholesalers and retailers. Only items sold to the general public are aircraft, real property, and producers and capital goods.

AFM Local 802 Seethes With Discord

Court Action Arises On Election Said to Be Illegal

JAMES CAESAR PETRILLO last week may well have winced to perceive a kind of discord which strikes most sharply at his cauliflowered musician's ear. From his biggest, richest local-802 of New York—came the unmistakable clamor of an intra-union brawl.

The sounds were those of factionalism, and they portended a tumultuous struggle for power. Mr. Petrillo perhaps has wondered how strong his New York strong man, Jacob Rosenberg, president of 802 for the past 10 years, would prove to be if the dissidence, already disturbingly evident, grew bolder before next Dec. 5 when local elections will be held. The struggle for control of the wealthiest [see BROADCASTING, June 17] of the AFM locals burst to the surface, after long concealment beneath traditional AFM censorship, when one faction of the local hauled its incumbent officers into court, charging that the 1944 elections had been conducted illegally.

local's by-laws in the conduct of the next election.

But before the settlement was reached, the shrill cacophony of venomed argument rattled the courtroom windows. It was clear that the discord was not the sudden slipping of a reed or string. There had been more than one tune played on different keys within the local for several years.

The Source?

Who piped what tune in Local 802? The answer seemed clear. Jack Rosenberg, 10-year incumbent as president of Local 802, and Harry Suber, its treasurer of equal tenure, liked the old songs best. Fractious elements within the union claim these leaders got their score from Mr. Petrillo, their support from old-time members of 802. Mr. Rosenberg's attorney in last week's court case was Joseph Brodsky, who defended Earl Browder, then U. S. leader of the Communist Party, in the Government's prosecution of Mr. Browder for allegedly illegal entry into the U. S. Mr. Brodsky's connection with Local 802 may be somewhat more intimate than the usual association between attorney and client, dissident members of the local said last week. Anti-Rosenberg factions see the penmanship of Mr. Brodsky in the Official Journal, the monthly

magazine published by the local. Although his name appears nowhere on the paper's masthead, his voice in policy determination for the publication is loud indeed, these sources said.

First fiddle in the faction that plays out of key with Mr. Rosenberg's followers is played by Calmen Fleisig, a plaintiff in last week's action and unsuccessful candidate for president of Local 802 in 1944's elections. Mr. Fleisig has been labelled as "Fascist" by members of the Rosenberg camp.

Mr. Fleisig is nominal chief of the "Unity Group," a faction that claims to have 3,000 followers within the local. As evidence that the Unity Group regards itself as an organized body-within-a-body, it maintains its own club rooms at Carnegie Hall and at another building in New York's East Fifties.

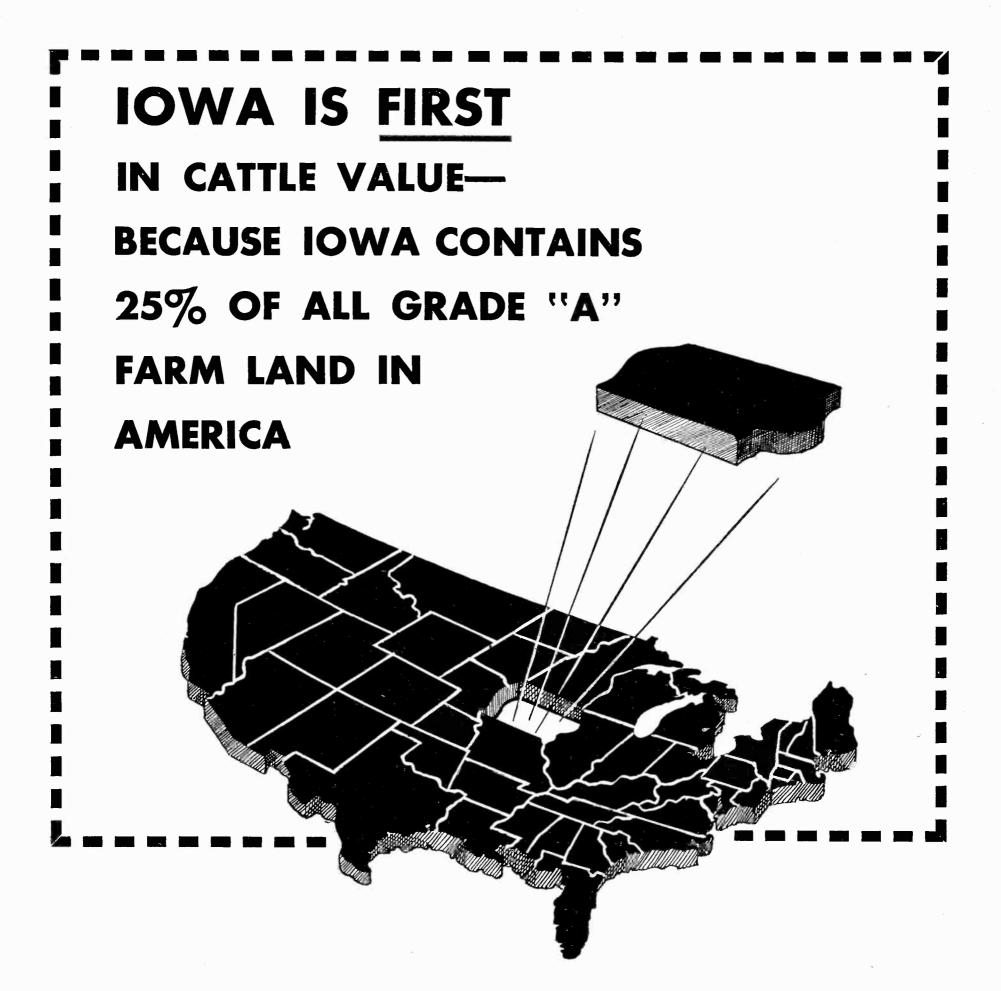

What the plaintiffs wanted was a declaration by the New York Supreme Court that the elections were null and void. What they got was a settlement with Mr. Rosenberg and the other officers who promised close adherence to the

Assails Rosenberg

Last week the suddenly bumptious Unity Group was making its jibes at Mr. Rosenberg outside union circles. Said some: Mr. Rosenberg derives his strength from longtime members of Local 802. At election time, they said, the oldsters emerge from their semiretirement to electioneer for Mr. Rosenberg with a degree of energy surprising for their years. It became known that at a regu-(Continued on page 90)

State Dept. Plans Shortwave Foundation

Proposed Group Principally Civilians

STATE DEPT. PLANS to recommend that Congress create an International Broadcasting Foundation to control all shortwave broadcasting from the U. S. were revealed last week at executive hearings of a Senate Appropriations subcommittee, it became known Thursday with release of the hearing record.

The proposed Foundation would be composed of 15 members, largely of civilians—probably licensees of the country's shortwave outlets —with the Secretary of State as a member. Funds would be provided by the Government.

At the same time officials of the World Wide Broadcasting Foundation, licensee of WRUL Boston and four other stations, charged that a State Dept. official threatened that the FCC would not renew World Wide's licenses July 1 unless the Foundation "cooperates" by assigning all of its time to the Government.

Amendment Written

As a result of the hearings, called at the request of Sen. Wallace H. White Jr. (R-Me.), Minority Leader, the Senate Appropriations Committee wrote into the State, Justice and Commerce 1947 appropriations bill (HR-6056), an amendment providing that the State Dept. may purchase no more than 75% of the effective broadcasting time of any shortwave outlet, without consent of the licensee.

The committee also recommended restoration to the State Dept.'s Office of International Information & Cultural Affairs, more than \$9,000,000 cut off by the House [CLOSED CIRCUIT, June 17].

The State Dept. and FCC plan to oppose the amendment when the appropriations bill reaches conference, it was learned.

A State Dept. spokesman said that no opportunity was given the Government to appear at the closed session Monday, at which officials of World Wide Broadcasting Foundation testified. The amendment would interfere with and impede the Department's proposed interim program pending Congressional action on the foundation, he added. An operational problem presents itself, it was explained, in that all of the shortwave frequencies used by the U.S. have been pooled to be used at the discretion of the State Dept. The spokesman pointed out that since all of the pooled frequencies are utilized by the Government there would be none available for private operation. This view was shared by FCC officials who said that no international shortwave frequencies are available, under the "pool" plan, for private operation. Should Congress adopt the proposed amendment, confusion would result, they said.

Under a long-range international shortwave broadcasting plan there would be a dearth of channels, the spokesman said, inasmuch as only 114 frequencies are available for shortwave broadcasting under international treaties, while 34 nations are beaming shortwave broadcasts to all parts of the world.

Dearth of Channels

Walter S. Lemmon, president; Dr. Harlow Shapley, board chairman, and Frank W. Wozencraft, counsel, of World Wide, told the Senate subcommittee that Tom Bracken, OIC legal adviser, threatened that if World Wide "did not cooperate with the Department of State we would not have access to our wave lengths after June 30."

All international shortwave licenses, which have been automatically renewed by FCC during the war, expire on June 30. All licensees except World Wide have signed contracts for State Dept. operation of their shortwave stations until June 30, 1947. World Wide filed application for renewal of its licenses Thursday.

Mr. Lemmon said he and Dr.

CREATION of an International Broadcasting Foundation of 15 members, mostly civilians, but including the Secretary of State, with financing by Government, will be proposed to Congress by State Dept. it was learned last week. Officials of World Wide Broadcasting Foundation, Boston (WRUL), charged State Dept. official threatened them with termination of license June 30 unless they "cooperate" by permitting Government to operate World Wide's shortwave transmitters.

Shapley offered to cooperate with the State Dept. but wanted to retain about six hours daily to resume the World Radio University, which was interrupted in November 1942 when the Government seized WRUL and its sister transmitters. Messrs. Shapley and Lemmon said they refused to renew a fulltime contract with the State Dept. They offered all but six hours.

Dr. Shapley testified: "Attorney Bracken said that the State Dept. wanted full control of all the shortwave stations until such time as Congress should decide what it wanted to do with respect to the proposed International Broadcasting Foundation. That is the new one. That is the Government corporation.

"Mr. Bracken pointed out that such a Foundation would be largely made up of civilians, and the Secretary of State, supported by Government funds." Dr. Shapley said he pointed out to Mr. Bracken that there was no reasonable point in asking that the important "freevoice international work of the World Wide Broadcasting Foundation" should be held up until Congress again "reaffirmed the basic principle of the freedom of speech."

Will Be Delayed

Mr. Bracken said it might be December or January before Congress could take care of the "proposed new broadcasting foundation," said Dr. Shapley, "and therefore that an extension of the contract for a year of 24-hour-a-day control was desired by the Department of State."

Dr. Shapley charged that Mr. Bracken said "World Wide would have no licenses on July 1. He said if we did not cooperate with the Department of State we would not have access to our wave lengths after June 30. He reiterated this point," continued Dr. Shapley.

Mr. Bracken denied to BROAD-CASTING that he made any threats, (Continued on page 89)

WINS Hearing Airs Equipment Deal

\$400,000 Credit Clause In Sale Debated Before FCC

WILL THE FCC approve an agreement betwe'en The Crosley Corp. (WLW) and Hearst Radio Inc. providing for a credit of \$400,000 to be taken out in transmitting equipment, if and when manufactured, in connection with the sale of WINS New York for \$2,100,000?

This was the principal question raised last Wednesday and Thursday before the FCC en banc during oral arguments on the Commission's proposed decision to deny transfer of the station to Crosley. The denial was based on a previous agreement calling for a cash price of \$1,700,000, plus \$400,000 in the form of time to Hearst for *Daily Mirror* newscasts over a period of 10 years. \$400,000 credit given Hearst for time while retaining the credit for equipment and that Hearst agrees to cooperate in furnishing local news to Crosley.

"What happens if you don't go into the manufacturing business?" asked Comr. Jett.

"That is a gamble the Hearst company is willing to take," Mr. Shouse replied. "The likelihood is against it."

"What is the consideration for that \$400,000?" asked Benedict P. Cottone, new general counsel of the Commission.

"It will eliminate one of the objections in the Commission's proposed decision," said Mr. Shouse.

Comr. Durr wanted to know if the \$400,000 credit for "if and when" equipment is not actually an allowance for local news "cooperation." Mr. Shouse thought the \$400,000 could "theoretically" be paid to Hearst. When Comr. Durr asked what was involved in that portion of the new agreement which calls for "cooperation" in providing local news, Mr. Shouse said: "It's a matter of exchanging favors." the \$400,000 credit "significant?"

William J. Dempsey, counsel for Crosley, explained that the sale price for the station is \$1,700,000 in cash, plus \$400,000 in credit for equipment if and when it is manufactured by Crosley.

Nebulous, Says Durr

Comr. Durr also pondered on the "consideration" involved for the \$400,000 credit. "This all seems to be in a very nebulous form," he said, "as to how much service the newspaper (Hearst) will give you and what the responsibilities are if they don't give it to you."

When Mr. Shouse pointed out that WLW has a "working arrangement" with the *Cincinnati Enquirer*, Comr. Durr interceded: "But we're concerned here with a specific contract—or a contract." Comr. Walker asked if the contract was "something in the nature of a gentleman's agreement." "That's right," Mr. Shouse replied.

Page 20 • June 24, 1946

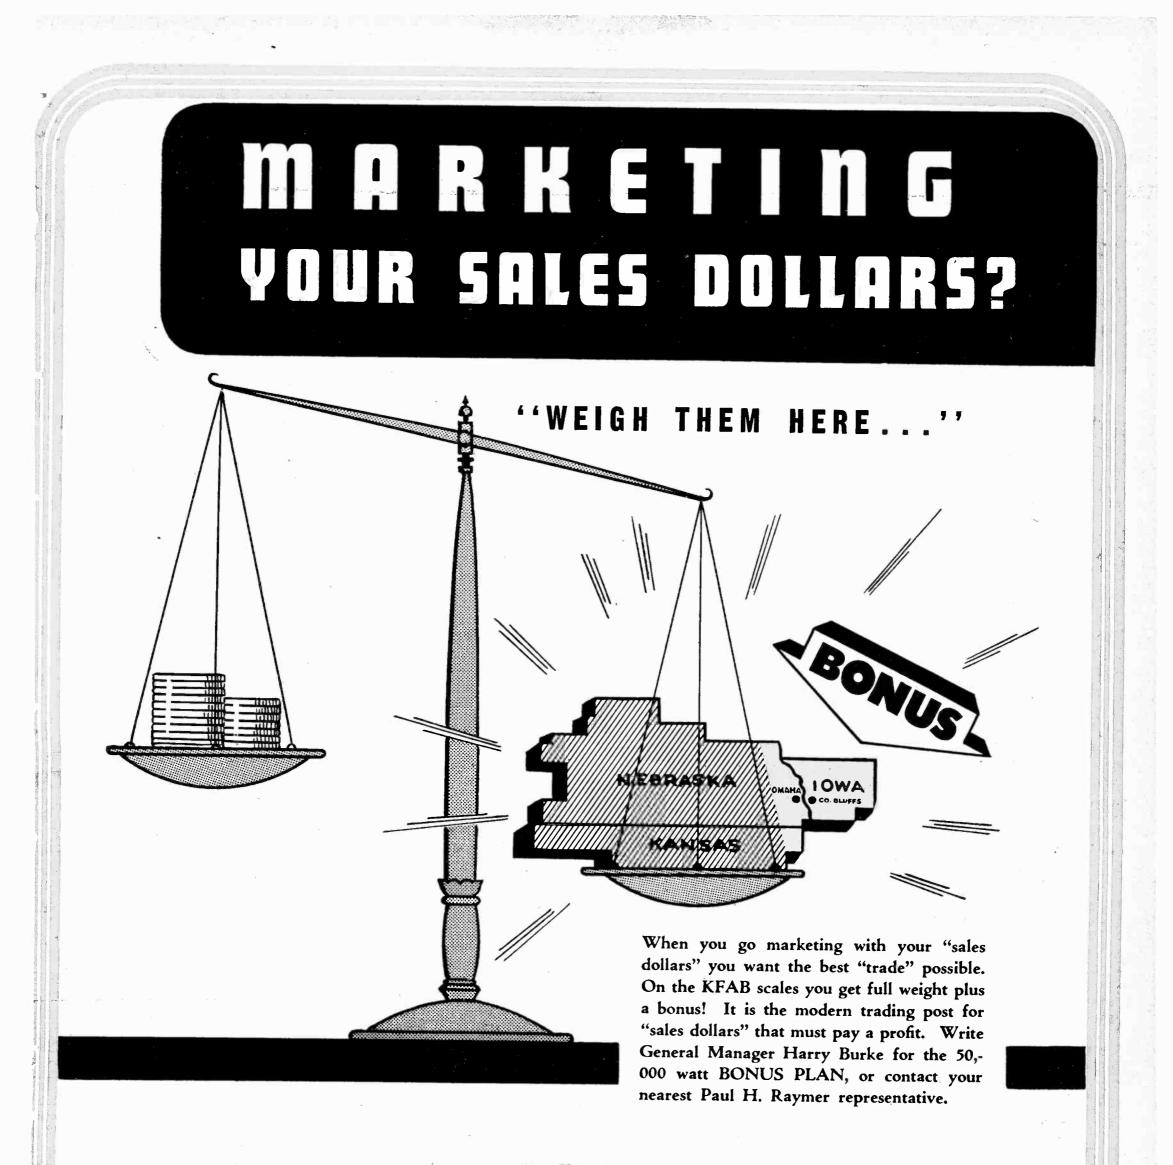

Shouse Questioned

In presenting a new purchase agreement to meet the Commission's objections to the transfer of the station, James D. Shouse, vice president of Crosley in charge of broadcasting, was subjected to more than five hours of questioning, principally by Comrs. Durr, Jett, Wakefield, Acting Chairman Denny, and Commission counsel. Mr. Shouse agreed with Chairman Denny's observation that the agreement, in effect, waives the

The possible relationship between the \$400,000 credit for equipment to be manufactured and the new provision calling for local news cooperation was brought up by Chairman Denny. In view of the news provision, he asked, is not "Does Crosley have any plans to manufacture transmitting equipment?" asked Comr. Durr.

"We do not," he said, adding that Crosley may produce equipment for its own use.

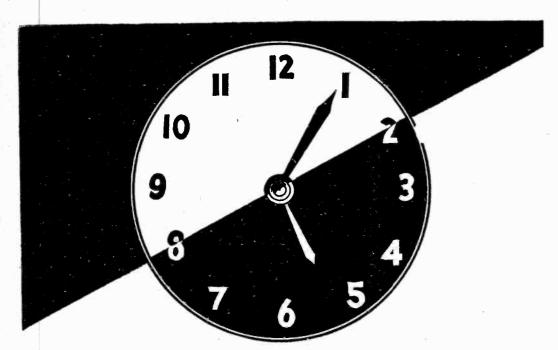

Pressed further by Comr. Durr, Mr. Shouse said that if Crosley were to manufacture equipment as a result of an order it received by (Continued on page 88)

Amazing WTAG Leadership Nighttime and Daytime

WTAG listening interest is positively amazing. The latest Hooper ratings show that the first 15 nighttime programs in the big and prosperous Worcester* market of 500,000 are heard over WTAG. Furthermore, in the 30 top rated nighttime programs, WTAG leads in 29, and 13 of the next 15 are heard over WTAG too. The daytime index is comparably high. Among the first 10, WTAG leads in nine, and in the second 10, this station leads in six. For advertisers WTAG brings quick and lasting results.

* Per capita retail sales in Worcester increased 11% in 1945 to a new all-time high of \$777. The U. S. average was \$550.

Detroit Stations Fill Breach As Tornado Causes Damage

ALL DETROIT broadcast stations joined in a combined public service effort when a tornado struck outlying areas of the city Monday evening and then caused loss of life and damage in Windsor, Ont.

Coming at a time many employes had gone for the day, stations quickly rounded up personnel for the flood relief activities.

No serious damage was caused to station property and most outlets were able to stay on the air with only minor interruptions. Remote crews sent to Windsor for on-the-scene pickups were handicapped by lack of power but brought back stories of the damage and suffering. In some cases they were able to join relief workers.

The tornado missed the WJR transmitter at Trenton, a few miles west of its path. Heavy winds and lightning were troublesome but not serious. A remote crew with truck and gasoline generator got to Windsor when customs officials waived regulations. John Denman, newsman, and Keith Kinney and Sidney Brechner, engineers, looked over the scene and abandoned all ideas of broadcasting to join relief workers.

Red Cross officials sent them to a spot where high-tension wires were being spliced under flashlights. The WJR truck provided floodlights for the job, remaining until daybreak. Mr. Denman went back to the studios with a report for the 8 a.m. CBS news roundup. Mayor Arthur Reaume, of Wind-

NAB PROGRAM BODY TO MEET JULY 1-2

CHARTING of the new program department to be set up within the NAB to strengthen industry standards will be started July 1-2 by the new NAB Program Executives Committee, formed under direction of the board of directors. Meeting, originally scheduled June 24-25, will be held at the Drake Hotel, Chicago.

NAB President Justin Miller, returning to Washington after several weeks on the West Coast, will preside at the first committee meeting. First business will be election of a committee chairman. Operational and policy details of the de-

sor, cited WJR for its assistance.

Jim Eberly, of WWJ, with two engineers, Ed Boyes and Ten Pennebaker, took remote equipment to River Rouge and transcribed interviews. At Windsor they were handicapped by lack of power. Transcribed material was edited and put on the air after they returned to the studio. The programs were repeated Tuesday night, with other newsmen adding material.

Candlelight Notes

On this program was Jim Var Kuren, of CKLW, who the night before had broadcast from a dark studio, reading scrawled notes with the aid of a candle. After the broadcast two calls were received offering homes to victims. WWJ CKLW and the Detroit News cooperated in soliciting clothing food and shelter.

WWJ was knocked off the ail three times, totaling a little over a minute. The station was kept or the air 58 minutes with an emer gency gasoline generator.

WXYZ provided a number of flood programs and fed a pickul to ABC at 10 Monday night, a: well as other special newscasts Its wire recorder was not avail able, being used for primary elec tion programs in the State. The station was on the air continuously and suffered no property damage

Complete coverage of tornade damage was given by WJLB though the station had difficulty in the hours immediately following the storm in getting on-the-spo broadcast material. Extra news casts were added Tuesday to cove results of damage. The station wa not damaged.

Station property of CKLW wa not seriously damaged, the station remaining on the air with emerg ency power until lines were re stored. Relief agencies used th station to summon assistance Candles were used for illumination and batteries were pressed int service for various station func tions.

MEET MR. BOICE

As new General Manager of Radio Station WEMP, Hugh Boice brings with him a wealth of radio, advertising and cultural background. He was born in La Grange, Illinois, 35 years ago. Graduate of Princeton, Class '33; Benton & Bowles Agency; Free & Peters, National Radio Representatives; Sales Manager WMBD, Peoria, represents his experience in the diversified field of broadcasting.

McDonald Says Video Cannot Flourish on Advertising Alone

ADVERTISING alone cannot cover high production costs of television, E. F. McDonald Jr., Zenith Radio Corp. president, writes in the current *Collier's* weekly. Con-

sequently t h e public will have to pay for its video programs, he says, and television will not become a reality in our lives, despite its advanced scientific progress, until the industry has devised a sound

Mr. McDonald

plan to finance its development. Commander McDonald contends that those who say that advertising will pay the cost are "televisionaries." If it is to be popular, he says, television must produce dramas as costly as Hollywood movies. He reminds that the entire production of new movies averages only about two hours of film per day, with the public paying five times as much for movies as the advertiser pays for maintaining the entire radio industry.

Three Methods

Three methods of obtaining box office revenue from the television public are offered: First, pipe programs via telephone wires, with subscribers paying a fee at the end of each month; second, use "pig squeal" interference and rent erasers to set owners; third, scramble signals and rent unscramblers to television set owners.

Recalling that television has been unsuccessfully launched as a commercial reality at least four times in 15 years, Commander Mc-Donald says: "Television is at once a science, an art form, and a business. As a science its development has been marked by brilliant achievement. Technically it has been acceptable for many years. The recent development of highdefinition full-color television has lifted it to a far higher state of technical excellence than that enjoyed by radio during its years of greatest expansion. So far as purely scientific development is concerned, there is no barrier to television's expanding at a rate comparable to radio. "Unfortunately, the economic or business side of television, and as a result the artistic side as well, have been sadly neglected. Because it is possible to send pictures through the air by radio waves, there has been an overwhelming tendency to think of television as just another form of radio, and to assume that its problems are identical with those of radio."

cheap, but there is no indication that television will be the same. The eye is much more fickle than the ear.

"But television, to hold interest at all, must present such superlative quality that it will draw the viewer from all other activity with never an inattentive pause.

"Television enthusiasts talk in terms of five or more stations per city. If there were five stations in one city, the cost of providing each with hours of daily entertainment produced to motion picture standards would be \$2,700,000,000 per year. This is more than American business spends on every form of advertising combined."

Commander McDonald reminds that his company operates W9XZV, television station that has been on the air "with a continuous schedule of programs using modern transmission standards longer than any other television transmitter in the country".

Full color television is about to come from this transmitter, he said. Zenith is not manufacturing black-and-white receivers for present bands because the sets will be obsolete in a year or two, he added. Company executives and engineers will view color service on Zenith experimental sets, he said, but they will not be placed on the market "until we are reasonably sure that television is on as sound a basis artistically and economically as it is technically."

Doubleday Video Aid

PLANS for close cooperation with television producers, stations, agencies and sponsors have been developed by Doubleday & Co. Inc., New York book publishers. Useful literary material and promotional tie-ups are being made available for telecasts by the publishing firm, after clearance of rights has been completed.

THE F. C. C. BLUE BOOK

One hundred and thirty-nine mimeographed pages in a blue paper binding. . . . "The Public Service Responsibility of Broadcast Licensees."

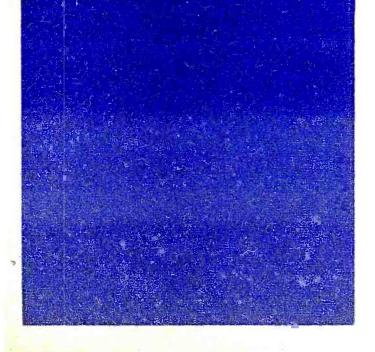

What is it — an indictment or an opportunity?

Let us choose to make of it an opportunity, but, if it be an indictment broadcasters may safely leave its fate to the greatest jury in the world, the American pople, whose judgment can be trusted. Let us now reaffirm our faith in American broadcasting as it is and as it can be under the free enterprise system, unhampered and unfettered by program censorship of any kind except that of honest decency which competent broadcasters themselves willingly impose.

Furthermore, let us honestly admit that there is much in American broadcasting of today that has been justly criticised and which is in need of change or improvement.

Let us change and improve, not by governmental decree or censorship, but through a continuation of radio's natural growth, inspired and directed by the listening public whose wishes are commands to broadcasters operating under the free enterprise system.

Let us remember that broadcasting "of the people, by the people, for the people . . ." can be preserved only so long as

the freedom to present is equal with the freedom to listen.

OKLAHOMA'S GREATEST STATION TULSA, 50,000 WATTS — NBC EDWARD PETRY AND CO., INC., NATIONAL REPRESENTATIVE

News Is the Station's Responsibility

Feature Stories Can Add Extra Appeal To Newscasts

By JOHN CAMERON SWAYZE

NBC Western Division Manager of News and Special Events Department, Hollywood

THE BIG STORIES are still serious these days but, oddly enough, a good bit of this piece is about the features that make up the brighter side of the news—stories which are sometimes overlooked by radio reporters.

Actually, they're great bets. They help balance the broadcast, often top heavy with critical lead stories. Looking ahead, when the sock headlines of today begin to fade, the wholesome, interesting yarns of American life will grab more space, and programs which have consistently been using these good bright features will be in a favorable spot. For them, the transition will be an easy and gradual switchover, calculated to hold listeners instead of lose them.

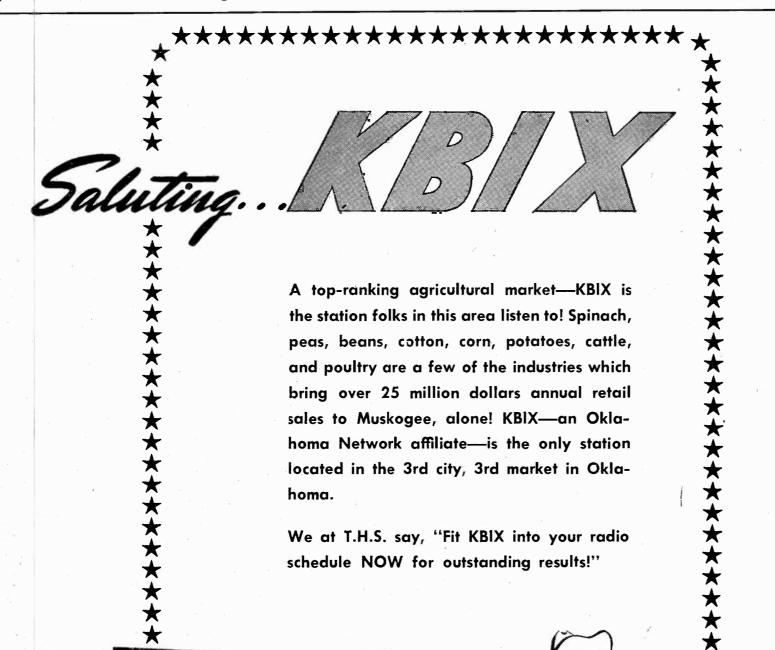

Actually, that should be fundamental. But when you twirl the dial and catch news programs on which the broadcaster rakes up divorces, penny ante crime and even distasteful stories of sex and suicide to fill out his time, it makes you think that perhaps the fundamentals have escaped some of the newsboys of the air.

Many stations have news every hour. Big news doesn't break fast enough to keep pace with this sixty-minute deadline. Unless watched carefully, the newsman's quest for material may lead to use of stories of low interest value and questionable taste. Better to baldly repeat what there is than to try to hop up the broadcast with items that are new only because they were too poor to have been used earlier. "Look to the features" is pretty solid policy for the on-the-hour boys with only a fiveminute stint, as well as for the fifteen-minute standard size news broadcast.

Aside From Good Sense

Aside from the practical good sense in using entertaining items on the bright side in preference to cheap sensationalism, there is another angle. That's the broadcaster's responsibility to the listener.

The use of lively features isn't any innovation. The war had scarcely ended when the press associations were calling on their bureaus for all they could dig up

BEFORE joining NBC Western Division as manager of news and special events department, John Cameron Swayze was on the news staff of KMBC Kansas City, from

1940 - 1945. For nine years previously he served on the Kansas City Journal as reporter and feature editor. He was an ac-

tive Kansas City committee man serving with many groups

Mr. Swayze aiming at community improvement. In recognition of his career and community service, Mr. Swayze has been honored with the Legion of Honor presented to former DeMolay members who have distinguished themselves.

and reporting an excellent reception from newspaper clients. They're just as good on the air.

For example, take the intriguing chronicle from St. Petersburg, Fla., about a man named Charlie Granderson who lost his clothing to a burglar who cleaned out the closet at his rooming house abode. Mr. Granderson was irked and decided to move. After some searching he found a place to his liking. It had just been vacated and the proprietor, apparently a plain spoken chap, explained the former occupant had been collared by the cops for stealing a watch.

Charlie took the room. He opened the closet, and there was his clothing, just awaiting his arrival. The late occupant had not only stolen a watch; he was the guy who had pinched Charlie's clothing!

Of course, not all the yarns have quite as Bob-Ripley-like an ending as that one, but they have the same basic interest of daily happenings in American settings from coast to coast.

Extra Sparkle

I'm a strong advocate of bright news for broadcasts, but not all of the perfectly wonderful stories that come over the wires or originate in your own backyard carry a smile with them. Take the one about Otis Surratt who, four days before last Christmas, was struck by a train. Mr. Surratt was married and had 12 children, one of whom was with him at the time of the accident. Surratt was thinking of them as the ambulance crew picked him up for a rush to the hospital. He turned to his 12-yearold son, who sat beside the stretcher. He handed him something. "Here is thirty dollars," he said, his voice strong for a moment. "I want you to buy everyone in the family a Christmas present."

Then he died.

I belong to the old-fashioned school that thinks the heart of a broadcast is the news itself and (Continued on page 50)

Alert

Alertness to constantly changing listener habits and program preferences — and

Treasury Reveals Broadcast Salaries

LaRoche Tops Net Executives; Crosby Leads Talent

SALARIES of more than a dozen executives in radio and affiliated industries for 1944 are revealed in a list published by the Secretary of the Treasury. The list shows amounts paid to officers and employes in the form of salary, commission, bonus or other compensation for personal service if the amount exceeds \$75,000.

John Blair, head of the representative organization bearing his name, had an income of \$91,554 consisting of \$12,000 salary, \$1,000 commission and \$78,554 bonus. Eugene F. McDonald Jr., president of Zenith Radio Corp., had an income of \$85,000 for the year ended April 30, 1945, consisting of \$55,-000 salary, \$30,000 bonus.

C. H. Campbell, of the Tribune Co., Chicago, had a total income of \$80,786. L. H. Rose of the same company had an income of \$111,-068. Henry P. Martin Jr., of the Register and Tribune Co., Des Moines, had an income of \$77,379 of which \$6,573 was salary and \$70,876 bonus. A. L. Lee, D'Arcy Adv. Co., St. Louis, was paid a salary of \$126,197. Joseph Pulitzer, of Pulitzer Publishing Co., St. Louis, was paid \$184,889, of which \$100,000 was salary and \$84,889 bonus.

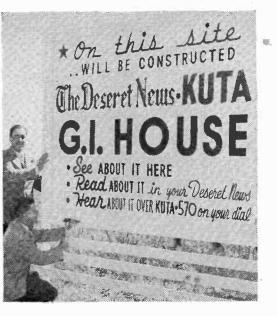

LaRoche Tops Nets

Chester LaRoche, former vice chairman of Blue Network Co., received \$85,000 in 1944 of which \$75,000 was salary and \$10,000 bonus. Niles Trammell, NBC president, received \$84,200 consisting of \$70,000 salary, \$14,000 bonus and \$200 "other." W. S. Gifford, AT&T, was paid \$210,150 with \$206,250 in salary and \$3,900 in other payments. C. P. Cooper, same company, received \$101,399, salary totaling \$99,999 and other payments \$1,400.

Walter Winchell, Hearst Corp., was paid \$62,400 in salary and \$34,841 bonus, totaling \$97,241. Bing Crosby received \$192,944 in salary from Paramount Pictures. R. C. Cosgrove, Crosley Corp., was paid \$50,000 salary and \$39,999 bonus, a total of \$89,999.

NO NBC TIME OPEN FOR MADDY MUSIC

IN ANSWER to a letter from Dr. Joseph E. Maddy, founder and director of the National Music Camp at Interlochen, Mich., suggesting resumption of NBC broadcasts from the music camp, Dr. James R. Angell, NBC public service counselor, replied that the NBC summer schedule was filled up.

The camp broadcast was banned in 1942 by James C. Petrillo, president of American Federation of Musicians, but on May 31 Dr. Maddy wrote to NBC suggesting the broadcasts again "now that the Lea bill has broken Mr. Petrillo's control over the broadcasting industry."

Although Mr. Angell refused to comment further he said in his letter to Dr. Maddy dated June 12, "We are naturally very sympathetic with the problem that you

THE KOKOMO DISPLAY SHOW, sponsored by WKMO Kokomo, Ind., as a non-profit, public interest feature, completed a three-day run at the Kokomo Armory before a total audience of over 15,000 people. WKMO presented a stage production each evening as well as three of their own featured broadcasts. WKMO staff members responsible for the project's success were (l to r): George Palmer, chief engineer; Chet Berhman, program director; Fred Campbell, announcer; William Randolph, news editor; John Carl Jeffrey, general manager; Frank Gregory, director of promotion; and Sid Collins, announcer. Joe Jordan, sportscaster, who also participated, is not pictured.

have been facing and with the development of the music camp at Interlochen. As our schedules are now set up for the summer, we do not see how we could fit in such a program as you have in mind. I trust you will be able to find other satisfactory avenues through which your interesting bands and orchestras can be heard on the air."

METAL WORKERS means dollars for the NASHVILLE market

Metal products, from heavy steel to lawn furniture, add to the 85 million dollars worth of industrial products made each year in the Nashville area. A wide variety of well-established factories employ thousands and help make this one of the nation's most stable market areas... Over one million people and retail sales of more than 356 million dollars yearly make a rich sales territory for your quality product. Get into this buying market with a message broadcast economically by WSIX.

Radio Week Group Selected by RMA Subcommittee to Draft Plans At July Chicago Meeting

CELEBRATION of National Radio Week in 1946, endorsed at the recent meeting of the Radio Manufacturers' Assn. in Chicago [BROAD-CASTING, June 17], has been placed by RMA in the hands of a subcommittee which will draft proposals for the event, likely to become a permanent institution.

Head of the RMA subcommittee, which will work in collaboration with the NAB, is John Gilligan, Philco Corp. Other members are W. B. McGill, Westinghouse Radio Stations Inc.; L. E. Pettit, GE, and George Faurie, Westinghouse Electric Corp.

Tentative plans for the event will be considered by the subcommittee at a meeting to be held July 16, slated for Chicago.

Last year's week was arranged jointly by RMA and NAB as a windup to radio's 25th anniversary. NAB was consulted about the 1946 project by Bond Geddes, RMA executive vice president and general manager, who conferred recently with A. D. Willard Jr., NAB executive vice president

Mr. Willard felt the industry would be eager to cooperate but indicated final decision would rest with the NAB board, which meets Aug. 6-8 at Estes Park, Col. While NAB made no commitment, the idea was advanced that a liaison group might be named to work with the RMA subcommittee pending action at the Colorado meeting.

Convention Activities

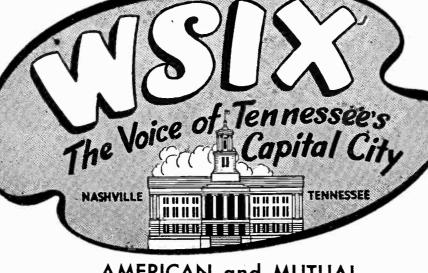

RMA has undertaken several promotion projects on the basis of action at its June 12-14 convention in Chicago. A subcommittee was named to prepare a code of industry advertising ethics and reemphasize Federal Trade Commission fair trade practice rules for the set industry. S. D. Mahon, Crosley Corp., is chairman of a subcommittee in charge of the project. Other members are Mr. Gilligan; John West, RCA; Stanley Manson, Stromberg-Carlson Co.

A third subcommittee was appointed to draft a promotion program to encourage use of radios in furnished room displays and other projects. Chairman is E. R. Taylor, Zenith Radio Corp. Other members are Seymour Mintz, Admiral Corp.; Victor A. Irvine, Galvin Mfg. Corp. The three subcommittees were appointed by John S. Garceau, Farnsworth Television & Radio Corp., who is chairman of the RMA Advertising Committee.

250 WATT THE TRANSMITTER

THE NEW G-E PHASITRON MODULATOR

This is the simple all-electronic modulation system which uses only 10 receiving-type tubes. The heart of this system is the G-E Phasitron. This tube, with its wide phase shift, allows a frequency multiplication of only 432 to produce a \pm 75-kc swing at the output frequency. Frequency conversions are unnecessary, thereby eliminating spurious responses. Important, too, is direct single-crystal control—independent of modulation.

FM TRANSMITTER with the phasitron circuit

• Simple Design

Only 9 r-f circuits and 10 r-f tubes from crystal to output frequency Direct crystal control with one crystal. Minimum number of components and controls.

• Easy-to-Get-At

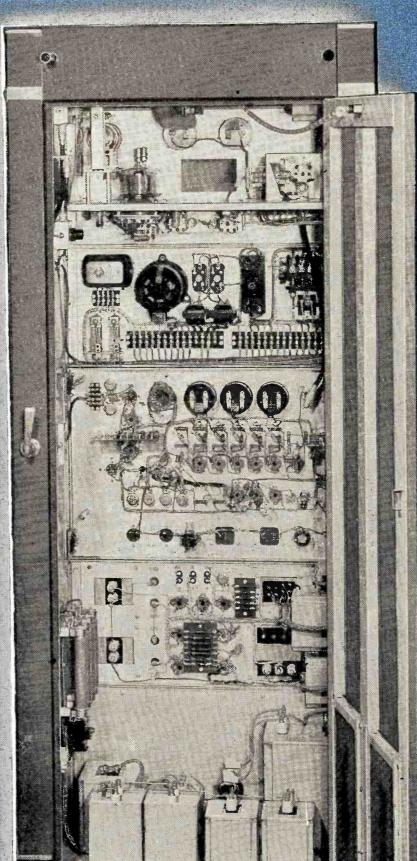

Vertical chassis construction. Full-length front and rear doors. Plenty of room to work in.

• Basic Unit For Any Power

Your transmitter today—your exciter tomorrow. Allows increase in power with no equipment obsolescence. Simplified inter-unit connections.

• Lower Price

For information on this outstanding transmitter and the complete line of G-E FM broadcast equipment, call your G-E broadcast sales engineer, or write: Electronics Department, General Electric Company, Syracuse 1, N.Y.

Listener Objects to Liberties Taken By Radio in Covering Rail Strike Crisis

EDITOR, BROADCASTING:

Subj.: Broadcasting license (not the FCC kind.)

You may recall that when you were in school and found errors in poetry or prose that the teacher told you it was permissible since it came under the heading of "poetic license". I note, after yesterday's coverage of the railroad strike, there has grown a definite trend to poetic license in the on-the-spot coverage of news events, which for a better name I choose to call "broadcasting license".

(Let me add here that I was a broadcast engineer for twelve years prior to going on active duty with the Navy, during which time I listened to a lot of on-the-scene broadcasts of news events.)

Yesterday, sensing a big news event in the making, I was at the Union Station here in Washington some 20 minutes before the 4 p.m., deadline for the strike. Through a lucky break a friend of mine was along with a small battery type portable radio with which we were able to listen to the different radio stations broadcasting from a point less than fifty feet from us. What we heard over the radio, and what we saw and heard with our own eyes and ears were two entirely different stories.

Origination Point

The broadcasters (although they said they were in the Main concourse) were set up at the end of track 16. They were separated from the rest of the public by a wide patch left for the mail trucks and also the large barrier forming the gates. In order to make the set-up complete, here is some more background:

crowded, in fact, it was very light.

Then, when the broadcasts were going on, we learned that it was "jammed with several thousand people awaiting the chance to board a train". I quickly started to count, and aside of a small crowd of less than fifty waiting for the 4:30 train, plus about a hundred waiting for the Southern train, I would say there were less than a thousand, and probably well less than 500 people in the concourse at the time. How did the broadcast-

er know? He was at a point where he could only see a small percentage of the area.

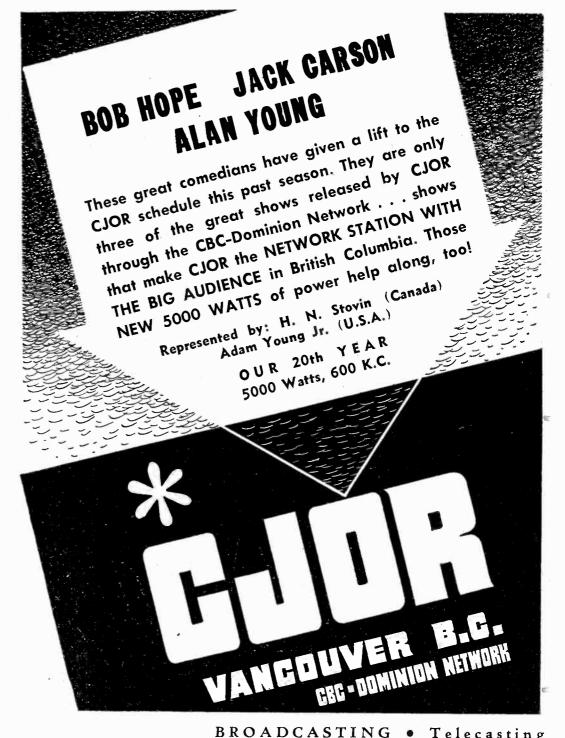

Another thing-he stated that when the word of the truce was passed over the loudspeakers that the crowd broke into a cheer. Actually what they heard was more of a sigh, and rather conservative at that.

I heard over Mutual similar coverage from other points, and while I was not there, I wonder if it was ballyhooed as much as it was here in Washington. (Mutual was not alone here, either.)

The point I am trying to make is this-if we are to do on-thespot broadcasts, let us keep them factual instead of trying to give them the "Orson Welles Man From Mars" touch. In times like this, when tension is high, the reporter should call the facts as he sees them, and if he cannot see them, like in this case, keep his mouth shut. In this particular case, there was probably a large crowd there in the concourse when he went through there about 3:45 and passed through the gate to track 17, but he overlooked the fact that three loaded trains pulled out before he went on the air.

Let us keep news events factual and truthful. Otherwise, radio could easily lay itself wide open to criticism from either side of a controversy that it was biased towards the other side.

CBS Labor Poll Result Undecided Validity of 23 Challenged Ballots to Determine

IT WILL take approximately three weeks for a decision to be handed down on the 23 challenged ballots which may or may not be deciding factor as to whether CBS white collar workers will be affiliated with the United Office & Professional Workers of America [BROAD-CASTING, June 17].

Procedure is for the regional labor relations board, in this case Meyer Reines, NLRB field examiner, to investigate the challenged ballots and send his report to the National Labor Relation Board which in turn decides which of those will be accepted or rejected.

If 9 votes of the 23 are accepted the UOPWA will represent the white collar workers. However, if the union does not get that amount for a majority, the NLRB will order a run-off election with UOPWA, IBEW and non-affiliation on the ballot. The IATSE, third union on the ballot, received but nine votes and therefore is out of the running.

Decision June 25

A decision will be made on June 25 on the 13 votes which were cast by television directors and assistants at the election on June 14 and were impounded by order of the NLRB. Ballots were impounded because William Collins, regional director for the American Federation of Labor, sent a request for freezing those votes to the NLRB for the "purpose of affording the American Federation of Labor an opportunity to effect a settlement of jurisdictional dispute between its two affiliates (Radio Director's Guild and International Alliance of Theatrical & Stage Employes) who are competing for designation as the statutory representatives of the employes in question."

Nevertheless the NLRB has designated that on June 25 the regional director of NLRB open and count the impounded ballots unless by that time IATSE or RDG shall have made proper disposition to the NLRB.

WITH SPORTS last week reaching an all-high in listener interest, WGFM, Schenectady FM outlet, added its bit June 14-15 with a creep-by-creep account of the Turtle Derby in Central Park of that city. In addition, the event which is slated to be an annual affair, was televised by WRGB Schenectady. WGFM announcers were George Michael (1) and Burrel Smith.

FARNSWORTH RADIO CENTER DEVELOPING

DESIGNED to provide northeastern Indiana with television, FM and improved AM service, Farnsworth Television & Radio Corp. is nearing completion of its new allpurpose studios in Fort Wayne. According to Farnsworth President E. A. Nicholas, facilities for all three services will be the most complete and modern in the country.

Final completion of the Radio Center has been delayed by government building restrictions, according to Mr. Nicholas, and "final completion is dependent on the removal or alleviation of CPA restrictions."

WGL, Farnsworth AM station, is already operating some programs from the new quarters and has applied to the FCC for an increase in power from its present 250 w to 1 kw fulltime on 1250 kc to better its coverage.

FCC hearings on the company's FM application is scheduled for June 27 in Fort Wayne. If granted, Mr. Nicholas said, Farnsworth will build its own FM transmitter and be in operation by fall.

Mr. Nicholas also revealed that television transmitting and receiving equipment is being field tested in the Fort Wayne area after receipt in May of an experimental video license from the FCC. Call letters are W9XFT and present transmitter is atop the Farnsworth plant. Output now is 1 kw and expected to be boosted to 5 kw by July 1. Commercial license will be sought later. B. R. Cummings, vice president in charge of engineering, is directing the development, installation and technical operation of equipment. Supervising operations of the Radio Center will be Capt. Pierre Boucheron, general manager of the Farnsworth broadcast division.

VETS IN NEW YORK FORM OWN AD GROUP

THE ASSN. of Veterans in Advertising, consisting of World War II advertising men and women, was formed June 13 at a meeting of 60 charter members at the Midston House, New York, where AVA is temporarily located with Veterans Guidance in Advertising and Selling Inc.

Membership will be composed of veterans of World War II in the New York area whose vocation is advertising or its related fields. Nucleus of the organization is taken from the thousand placed veterans of the Veterans Guidance in Advertising and Selling, Inc., and AVA has pledged itself to assist in the work of VGIAS and been accepted as the 29th participating organization of the group.

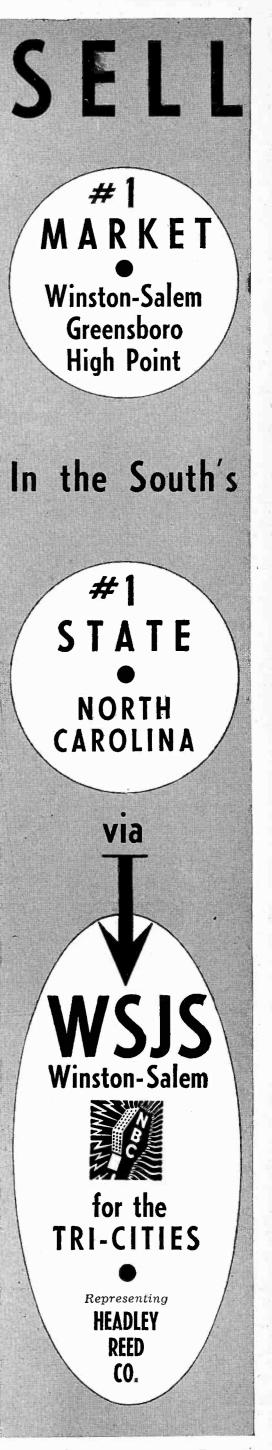

Officers elected are as follows: John W. Hamilton Jr., *Business Week*, New York, president; Horace E. Walsh, vice president; Bayard Patterson, secretary; and Samuel Wasserman, Kennedy Sinclair, New York, treasurer.

Elected to the board of governors were: Morton Gaffin, Best Foods, New York; Robert Koch, Morse International, New York; Emmett Dean, Better Business Bureau, New York; George Foley, Newell-Emmett, New York; and Robert Viano, an editor of *Pic* magazine, New York.

Committee chairmen appointed by Mr. Hamilton are: Tom De-Huff, Consolidated Edison Co., New York, membership; Al Blake, public relations; Walter Hendricks, RCA International, New York, finance; Powell Ensign, publicity department, NBC, New York, job promotion; David Ofner, Alco Gravure, Newark, housing; Don Button, Kerby Block Associates, New York, vocational guidance; Charles Brett, Richard Manville, New York, research; John Blazier, activities.

Reelection Campaigns Confront Wheeler, Lea

SEN. Burton K. Wheeler (D-Mont.), chairman of the Interstate Commerce Committee, in which radio legislation originates, returned to Montana last week to campaign for renomination in the July 16 primary. His opponent for the Democratic nomination is Leif

New Veterans Adm. Series Is to Feature Capsule Editions of Top Network Shows

TOP TALENT will star in the Veterans Administration's new 13-week transcribed series, *Here's* to Veterans, to be distributed within a few weeks. Series is made up of 15-minute editions of leading nighttime network programs, transcribed especially for VA, and featuring messages to veterans on benefits, insurance, etc. in place of commercial announcements.

Programs used are: Hit Parade, Frank Sinatra, Kate Smith, Danny Kaye, Great Moments in Music, Highways in Melody, Hildegarde, Kay Kyser, Saturday Night Serenade, Stairway to the Stars, Supper Club, Waltz Time and Fred Waring. In addition there are guest stars on several of the shows, including Carmen Miranda, Gene Kelly, Lisbeth Scott, and others.

Collaborating sponsors who agreed to the use of their programs are: Liggett & Myers, American Tobacco Co., Brown & Williamson Tobacco Corp., Celanese, Cities

Committee Will Help Safeguard Air Freedom INDUSTRY movement to protect freedom of broadcasting and cooperate with other media and groups interested in preserving basic democratic rights, will be set in motion by the NAB when the first meeting of the new Freedom of Radio Committee is held July 17-18 at the Waldorf-Astoria, New York.

Committee personnel is representative of all segments of the industry and is not confined to NAB members. NAB President Justin Miller will attend.

The project originated at the NAB board meeting held in Los Angeles last January. At that time the board heard details as conceived by Edward M. Kirby, then public relations counsel to the association. His recommendation was adopted.

Back of the idea is the fostering of the American concept of radio in all parts of the globe as distinguished from state controlled radio. Radio itself would be used to promote American radio's story.

Committee members are: Niles Trammell, NBC; Mark Woods, ABC; Frank Stanton, CBS; Edgar Kobak, MBS; Eugene Carr, WPAY Portsmouth, O., small stations; Henry P. Johnston, WSGN BirService, Philco, General Foods, Pet Milk, Chas. H. Phillips, Colgate-Palmolive-Peet, Peter Lorillard, and Pabst. Agencies are: Newell-Emmett; Foote, Cone & Belding; Anna Sosenko; Young & Rubicam; Hutchins; Kay-Ted; Gardner; Hummert; Ted Bates; Lennen & Mitchell; Warick & Legler.

Donation of talent services was approved by AFM and AFRA. Consent of the networks also was given, despite the fact that high Hooper programs of each network will be heard on rival network stations.

According to Joseph L. Brechner, radio service director of VA, and Charles E. Dillon, assistant director who supervised series and prepared the format, the package of 13 will be available to VA radio chiefs in Boston, New York, Philadelphia, Richmond, Atlanta, Dallas, St. Louis, Columbus, Chicago, Minneapolis, Denver, San Francisco and Seattle for distribution to stations.

Five hundred cuttings have been made of the series, and orders will be filled on a first request basis. Arrangements will be made to "bicycle" transcriptions to nearby outlets from stations carrying them, so that the fullest possible coverage may be obtained.

In New York the programs were transcribed in cooperation with the program producers under the direction of Don Weiss, radio chief of VA branch 2, and Lou Marks, of the VA's Washington staff. Dean McNealy, San Francisco radio chief for VA, handled transcription of the Hollywood shows. NBC transcription service did the cutting both in New York and Hollywood.

Initial arrangements with agencies and sponsors were made by Drew Dudley of the Office of Mobilization and Reconversion, and George Ludlum of the War Advertising Council, New York. Robert C. Coleson, Western representative of the Council, coordinated agency clearance in Hollywood.

Mildred said to Gloria...

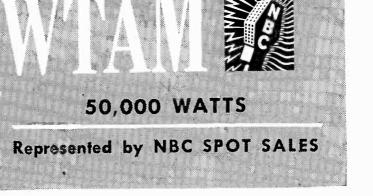

Lhat's the way Mildred Funnell and her associate Gloria Brown affect the many listeners of WTAM's Woman's Club of the Air. Each listener feels she is overhearing an intimate conversation. And she can't wait to relay to her friends the stimulating information she's absorbed.

Mildred, with WTAM since 1930, recently took over this popular morning program (8:00-8:30, M-F) with the firm belief that the Woman's Club of the Air should be just that-a club. For this reason, in addition to regular program features of interest to women, she and Gloria discuss and exchange ideas sent in by listeners. The result: listeners feel they have a part in the program.

To sponsors, this means exceptional responsiveness to sales messages. Mildred Funnell's sponsors belong to a club, too-a club composed of some of the most successful national and local advertisers. The secret password of this exclusive club is WTAM. You can become a member by calling NBC Spot Sales today.

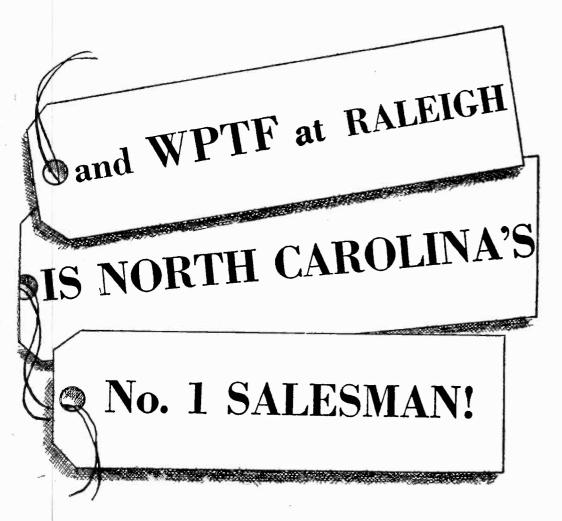

FIRST IN - CLEVELAND

THE NATIONAL BROADCASTING COMPANY

SUUM

In salaries and wages, North Carolina paces the South! According to latest available Department of Commerce figures, pay envelopes here contained nearly 430 million dollars, leading the next-ranking Southern state by more than 92 million dollars and nearly doubling the average for all nine other Southern states. Another proof of North Carolina's *buying power*!

WSPA Installing Transmitters, Towers' For Simultaneous AM and FM Operation

A NEW installation which will permit standard broadcasting with 5 kw power day and night and simultaneously inaugurate FM service is now being completed by WSPA Spartanburg, S. C. The project, according to Walter J. Brown, vice president and general manager, is "one of the most complete dual operations that has been perfected."

The station has installed a 421foot Lehigh tower, on top of which is an RCA super-turnstile FM antenna, bringing the overall height to 441 feet. In addition to supporting the FM antenna, the Lehigh tower will increase the WSPA daytime signal strength by 40% because of its height, according to engineering estimates.

To provide for the increased nightime power of WSPA from 1 kw to 5 kw, two 271-foot Truscon towers now being used by the station are being moved to new locations and will serve to provide the necessary directional pattern for nightime broadcasting.

Experienced Ground System

To provide for the new ground system, WSPA acquired 10 acres of additional land, increasing its transmitter site to 30 acres. Twenty-five miles of copper wire have been plowed into the ground and, in addition, the ground around the base of each tower has been covered with copper screens.

The station begins operations from its new antenna system in July and shortly afterward its FM adjunct takes the air. A GE transmitter will feed the FM antenna

PROMOTER WKWF Owner Campaigns —— To Restore Key West——

THE ANCIENT GLORY of Key West, Fla. now has a champion. He is Johnny Spottswood, owner of the new WKWF in Key West, and a native of the Keys for all of his 20 some years. There is a full page article in the Sunday June 9 Miami Daily News on Mr. Spottswood's efforts to restore the importance of Key West as a shipping center, naval base and to improve its transportation links with the mainland and Cuba. The young Mr. Spottswood opened his station in a blaze of glory when he obtained special permission of the FCC to go on the air before scheduled opening time to broadcast hurricane warnings in the October hurricane [BROAD-CASTING, Oct. 1, 1945]. Now he is using all his persuasion-and the station's voice-to bring back the old greatness to the once big shipping center of the South.

PRINCIPALS in the installation of the 421-foot Lehigh tower on Hogback Mountain (altitude over 3,000 feet) for the FM station of WSPA Spartanburg, S.C. (1 to r): Herbert C. Koeppe president of the Fredrick Tower Construction Co.; Walter J. Brown, vice president and general manager, WSPA; Harold Beckholt, chief engineer, WSPA.

over a specially mounted transmission line which will run up the side of the Lehigh tower to connect with the FM antenna. The FM transmitter will be installed alongside the 5 kw Western Electric AM transmitter.

ADVERTISING CLUB HAS NEW QUARTERS

THE ADVERTISING Club of New York, whose headquarters at 23 Park Avenue were damaged in a two-alarm fire June 13, has temporarily leased the five story building at 30 East 37th Street, New York, for its use until repairs are completed on the clubhouse.

Eugene Thomas, sales manager of WOR New York, who is president of the Advertising Club, expressed his thanks to the National Republican Club of New York City, the Harvard, Princeton, Lotus and other clubs in the city for offering their facilities to Advertising Club members.

The newly leased building was formerly used for the United Seaman's Service Club and previous to that was the Dartmouth Club and the Harvard Law Club.

Some institutions, business firms, newspapers and radio stations have become so integral a part of the public consciousness that they are accepted above all others as outstanding.

This is the reward for years of unfailing service to the community.

A recent survey recorded such public reaction in Chicago . . . 1622 personal interviews (848 men . . . 744 women) were made at 33 Chicago and 3 suburban locations asking for the names of five Chicago hotels, department stores and radio stations. WGN was named more frequently than any other radio station.

In answer to the question "Which do you consider to be Chicago's *outstanding* radio station?", WGN was voted first by a substantial majority of both men and women.

WGN has long been a Chicago favorite. On WGN the advertiser gets the normal program audience *plus* the established *station* preference.

LONDON LETTER-By William Pingrey U. S. Concerns Said Planning A Commercial 'Air Invasion'

THE London Sunday People said recently that "pirate American radio companies" had drawn up plans, and were investigating the possibilities of putting them in effect, for a "commercial 'air invasion' of Britain."

The paper said the proposals include regular broadcasts by a string of continental stations—and Iceland —and powerful transmiters on ships moored outside British territorial waters to relay commercial programs to British listeners.

Television returned to the millions in the London area—and a few further away—a fortnight ago after an absence of more than six years. Generally the service was lauded, though most critics pointed out room for improvement.

The most critical comment came from one expert, who said: "Transmission showed no improvement over pre-war efforts. There was the same softness around the edges, the same dark shadows . . ."

On the other hand, Maurice Gorham, director of television for the BBC, said "we are overjoyed at the results."

Referring to the televised Victory Parade on June 8—the first big telecast—he continued: "The pictures were in every way superior to those of the Coronation. It has given a great impetus to our projected outdoor programs . . ."

Most remarkable thing about the new television service was that a receiver picked up the telecast of the parade at Minehead, Somerset, 170 miles from London. W. F. Steel, radio engineer formerly in the RAF, built a special apparatus which picked up several minutes of good, clear pictures. He has had better success at other times when there was less local interference.

Telecasts are currently beamed from Alexandra Palace in London and intended to reach only 45 miles. However, the Postmaster-General in opening the service June 7 said it would shortly be extended to the

Birmingham area.

"The BBC, the Post Office and the radio industry together are resolved to build television into a great new public service," he said. "Preparations are now being made for the installation of a special cable to relay programs from London to Birmingham. If it proves successful further extensions will follow to other cities." \star

Simultaneous with resumption of television, Pye Limited—manufacturers of radio equipment—advertised sound and vision television table model at 35 pounds (\$140) plus purchase tax of \$31. It is only for limited deliveries.

The Radio Industry Council said autumn should bring a steady flow of television sets from the factories. "The industry," it added, "is determined that, in cooperation with the Television Advisory Committee and the BBC, this country shall continue to lead the world in television."

* * *

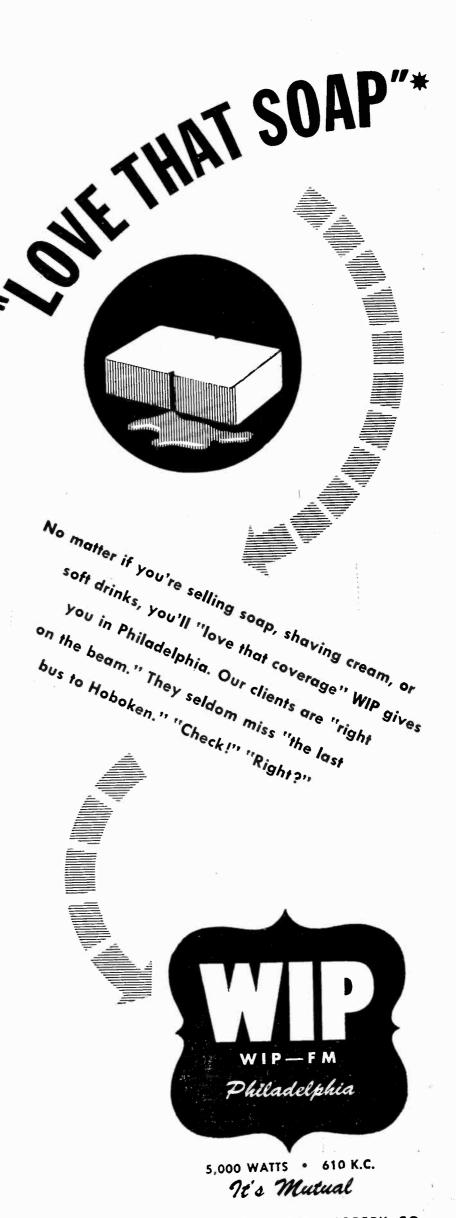

London newspapers are speculating as to the contents of the government White Paper expected soon on the BBC. It is expected to deal with the future of the Corporation whose charter is up for renewal at the end of the year. It is not, however, expected that the White Paper will call for an investigation, but may only extend the charter for one year, instead of 10, to allow for an inquiry.

J. Grenfell Williams, former lawyer in South Africa, has been appointed Director of the Colonial Service of the BBC. He joined the BBC in 1940.

Sir Frederick W. Ogilvie, director-general of the BBC from 1938-42, came out for competition in British broadcasting in a letter to the editor of the London Sunday Observer.

"Introduce competition into British broadcasting and it will bring threefold gain overnight," stated Ogilvie, now principal of Jesus College, Oxford U.

"It will bring, for the first time, freedom of choice to listeners. It will bring freedom of opportunity

More Dollars Per Dialer ...

KNOW Gives You More Dialers Per Dollar." to broadcasters—to speakers, artists, musicians, and all who seek their chance on the air. And it will bring the tonic of youthful rivalry to the BBC. The only possible losers will be cabinets and government departments, for which the existing monopoly system seems thoroughly convenient."

Asserting that one or two wavelengths would be sufficient for the BBC, he suggested that other bands go to a series of new and "independent corporations—for Britain as a whole, for Scotland, for Wales, for Northern Ireland, for three or four regions of England."

CAB Rating Service Suspends July 31

Hooperatings Offered Exclusive CAB Subscribers

TEMPORARY SUSPENSION of the 17-year old Cooperative Analysis of Broadcasting program rating service, effective July 31, was anounced last Tuesday by the CAB, which will "concentrate on research to develop the ideal program audience measurements needed and wanted by all parties."

Concurrently, C. E. Hooper, president of C. E. Hooper Inc., revealed an agreement concluded the day before whereby his organization will supply Hooperatings to exclusive CAB subscribers who desire a coincidental rating service following the CAB suspension.

The decision of the CAB to withdraw from the program rating field, for the present at least, follows a long-drawn conflict between CAB and Hooper for acceptance as "the" standard measurement, in which Hooper won a "moral victory" a couple of years back when CAB dropped its recall roster method in favor of the coincidental interview technique pioneered by Hooper. Since that time the larger radio advertisers and their agencies who with the networks were the main source of CAB support have complained with increasing vehemence about the excessive cost of maintaining two services which measured in effect the same thing in the same way.

Last Winter Threat

Last winter, when the networks threatened to cancel their memberships, the CAB appointed a threeman advertiser-agency-broadcaster committee to investigate the problem. The committee recommended that the CAB halt its rating service activities, devote itself to setting standards for private researchers and to developing an ideal service with ratings projectable to total audience, covering all broadcasts and providing consistent trends [BROADCASTING, April 8, 15].

The CAB membership voted to embark on the research program but to continue the rating service meanwhile, but authorized the board to suspend the ratings temporarily if it could not arrange for supplementary financing [BROAD- resentatives of radio, and will begin work next week, the CAB announcement stated. Periodic reports on the committee's findings will be furnished to CAB members. A revised dues schedule in line with the change in CAB operations will soon be announced.

CAB-Hooper Plan

The agreement between CAB and Hooper provides for CAB to arrange with its advertiser-agency members who have network programs and who currently subscribe only to CAB to receive "Network Hooperatings" from Aug. 1, 1946, to the termination of their CAB contracts or to May 31, 1947, whichever is earlier. Payment is to be made at the existing Hooper rates, with the difference between them and the CAB rates to be remitted to the CAB wherever the Hooper rates are higher, which is generally the case. After May 31, 1947, the letter of agreement states, Hooper "will have no further obligation to exclusive CAB network member-subscribers and CAB will be free to pursue its own course in any manner it deems right and proper."

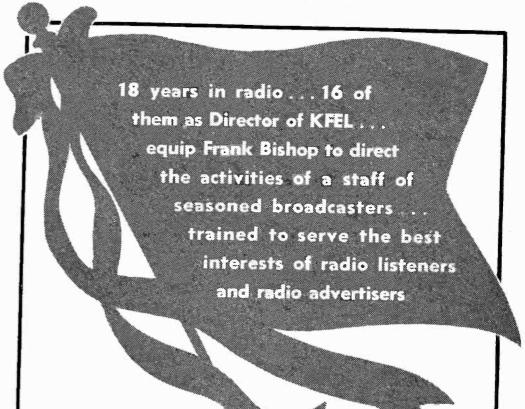

Under the arrangement, Hooper agrees to give its network reports to exclusive CAB members without network programs at a nominal fee of \$1 for the term of the agreement and to furnish all exclusive CAB members with copies of the Hooper July 1946 reports without charge. CAB network members, on request, may also get Hooper rating histories on their own programs for the past year without cost.

"Nothing herein contained," the agreement reads, "shall be construed as limiting in any manner whatsoever the right of any member-subscriber of CAB to subscribe to any radio rating service, at any time, and by whomsoever delivered, nor is this understanding to be construed as an endorsement by CAB of the relative values of exsisting radio rating services."

No Endorsement

George Allen, CAB secretary and general manager, said that while the CAB was recommending the Hooper service to its exclusive members, it was not endorsing any service. No arrangement has been made between CAB and A. C. Nielsen Co., which also offered to provide its service to CAB members, Mr. Allen said. It was explained that the minimum charge of the Nielsen service is in the neighborhood of \$20,000 a year, contrasted to the minimum CAB fee of \$300.

SPONSORED by WKY Oklahoma City, the Oklahoma City A Capella Choir took top honors at the Cotton Land Festival in Memphis, Tenn. After the 73-voice choir had won Oklahoma championship, WKY staged a concert to raise \$1,500 to send the organization to Memphis.

Census of Business and Manufacturers Budgets Are Cut by Senate Committee

PLANS for a 1946 census of business and a census of manufacturers, announced early this year by the Bureau of the Census, were given a setback last week when the Senate Appropriations Committee cut out a \$17,000,000 item to cover the two important business surveys.

Reporting out the State, Justice and Commerce Depts., appropriations bill for the fiscal year ending June 30, 1947, the Appropriations Committee said it "does not condone and will not abet the practice of extending the scope of statutory authority by administrative determination to cover functions not within the reasonable intent of the Congress in framing the statutes."

An item of \$10,000,000, approved

by the House in the overall appropriations bill (HR-6056), for a census of business, another for \$5,000,000 for the census of manufactures, and a third for \$2,000,000, to cover compilation of census reports were stricken from the bill by the Senate committee.

Principal Record

In a signed article in the June Domestic Commerce, publication of the Dept. of Commerce, William H. Mautz, assistant chief, Industry Division, Bureau of the Census, declared that the two censuses were conducted periodically from 1810 through 1939 and they "constitute the principal historical record of industry." Since 1939, however, there has been no comprehensive basic report covering

SALES DEPARTMENT conference for WPAY Portsmouth, Ohio, and WHBC Canton, Ohio, was held June 4-5 at Portsmouth's Hurth Hotel. Attending were (l to r): front row, Gervis Brady, commercial manager of WHBC; Robert Fehlman, WHBC manager; Eugene Carr, director of radio for Brush-Moore Newspapers Inc.; Lillian Warden, commercial secretary of WPAY; Paul Wagner, WPAY manager; Gerald Boyd, commercial manager of WPAY. Back row, Julius Glass, promotion director of WHBC; Robert Howard, WHBC sales representative; Don Price, Carl Bodner, Carl Mitchell, and Dick Pyle, all WPAY sales representatives; Bob Kuhn, promotion director of WPAY.

the many phases of general interest, he wrote.

"Business, Government, and other users of manufacturing statistics, therefore, have a very real need for a new set of bench marks for studying the changes that have taken place and to aid in determining future policies."

The business census, under HR-6056, would cover business and distribution. Both censuses were proposed under an Act of March 14, 1903 (5 U. S. Code, 604) but the Senate committee said in its report it could find "no specific authority in 5 U. S. C. 604 for collection of statistics dealing with business or manufactures."

The bill first will be voted on in the Senate and then will go to conference.

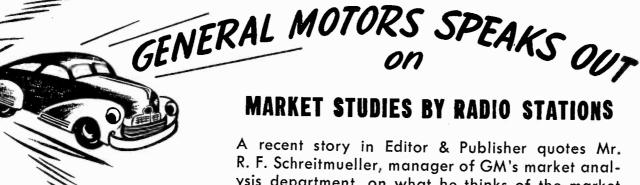

Adams Signs New WCCO Contract to July 1950

CEDRIC ADAMS, commentator, last week signed a new contract with WCCO Minneapolis-St. Paul, according to A. E. Joscelyn, WCCO manager. Contract runs to July 1950, and was drawn up to replace his current contract which expires July 1947. Contract will give him a total of 13 years at WCCO, and spikes rumors that he is leaving the station.

Mr. Adams does two newscasts daily, at 12:30 p.m., and 10 p.m., as well as a Saturday morning studio program. In a recent statewide Minnesota poll, Mr. Adams placed top among radio personalities. He is, in addition to his radio commentating, a columnist for the *Minneapolis Star-Journal*.

NBC Promotions

FIRST PROMOTIONS for returning war veterans by NBC Central

ysis department, on what he thinks of the market research done by newspapers, magazines and radio stations. Mr. Schreitmueller's opinions were taken from a letter of his that was presented to the Newspaper Advertising Executives' Association. Here are some of his more thought provoking statements:

"... such material should not be directed only to the advertising manager, but also to the sales organizations directly concerned with its use. Failure to recognize this need, says Mr. Schreitmueller, has been detrimental to linage."

"... There seldom was the opportunity for the men most directly concerned with the use of such material (the sales managers) pilation, its scope or to make suggestions for improvement..."

True, the sales manager is often a hard man to reach. But your one sure path to his desk is a consistent advertising campaign in Sales Management, the only publication specifically edited for the sales executives of national advertisers . . . the magazine that has more sales managers among its subscribers than all other publications in the sales-advertising field combined. ".It boils down to the wellknown but neglected fact that a known facturer's advertising exmanufacture usually follows his sales curve."

King Elected

ROBERT N. KING, director of research for BBDO, New York, was elected president of the Market Research Council at the annual meeting held at the Yale Club in New York June 21. Other officers elected were: vice president, Cornelius DuBois, director of research, Life magazine; secretary-treasurer, Dr. Lyndon O. Brown, Stewart, Brown & Assoc.; member of executive committee, Robert B. Brown, vice president in charge of marketing and research, Bristol-Myers Co.; Edward Battey Jr., vice president and director of Compton Adv., retiring president, becomes a member of the executive committee.

Retains Program

DESPITE reports to the contrary, American Home Products Corp., New York, will continue sponsorship of *Real Stories From Real Life*, 9:15-9:30 p. m., five times weekly, on Mutual, in addition to its recently acquired *Bob Burns Show*, through Ruthrauff & Ryan, for fall sponsorship. *Real Stories From Real Life*, handled by Dancer-Fitzgerald-Sample, New York, for Whitehall Pharmical Co., will take nine week summer hiatus, starting July 5.

News

(Continued from page 26)

not a fancy format. There are some carefully planned program make-ups that are excellent. But on some shows the boys get lost trying to make the news fit their inflexible format instead of vice versa.

Simplicity of language and clarity of expression are blessings. Too much detail should be avoided like the plague. Why throw in a bunch of place names that don't mean a thing to a listener?

Next Step

When you talk of stories on the brighter side, it's only a step to special events, the feature department of radio news. For a very considerable time part of the job of special events will probably be to bring first hand reports of new air developments, innovations in rockets, etc. But at the same time the department will have more and more of a chance to entertain, amuse and startle listeners.

Now, with all this talk about the brighter side, don't think I'm slighting the big news of the day. It's taken for granted everyone understands that's the meat and potatoes. The other is the salad and the trimmings that surround the main course to make it more inviting. I think the salad days in news and special events are getting nearer all the time. That's all. The main course is always the stellar attraction. There's just going to be more of a chance to brighten up the table again.

FULL SPEED AHEAD for FM transmitter production at a Newark, N. J. plant of the Federal Telephone & Radio Corp. First Federal FM transmitter off the line was delivered to KOWH Omaha, Neb. and is already on the air, according to the firm. On Tuesday, June 25, the company's engineers will discuss development of the new Federal square loop antenna at a luncheon at Washington's Hotel Statler. Norman E. Wunderlich, executive sales director will preside, and speakers will be R. F. Lewis, product engineering department, and A. G. Kandoian, Federal

Telecommunications Labs.

PIONEER IN VIDEO DIES IN ENGLAND JOHN L. BAIRD, 58, British television pioneer, died June 14 at his home at Bexhill, Sussex. He produced one of the first practical television units that would transmit instantaneously over a distance

either by wire or wireless. Among other inventions, he introduced the "noctovisor," an apparatus for seeing in the dark by invisible rays.

He was actively engaged in research with his own company, John L. Baird Television Ltd., until February when he was taken ill, and since 1941 had been technical advisor to Cable & Wireless Ltd.

In January 1926, Mr. Baird, then a poor young electrical engineer, demonstrated to the Royal Institution of Great Britain what is believed to be the first successful television showing. He transmitted a picture from one room to another. Heart of the transmitter was a perforated rotating disc which permitted light to fall in sequence on the object. Light-sensitive selenium, and later, photo-electric cells reacted to the reflected light, which was transformed into electrical impulses for transmission.

The Baird television system was in operation in England by 1928, aided by financing from Selfridge Department Store. In the same year, Mr. Baird successfully sent a television image 3,000 miles across the Atlantic, from his London laboratory to Hartsdale, N. Y. He also completed tests with colored discs to produce color television images. In 1929 BBC made an agreement with Mr. Baird to operate an experimental television station in London. In 1931 he came to the U. S. to promote his system. As the Marconi-Emi video system outclassed the Baird system, the BBC adopted the former in 1937.

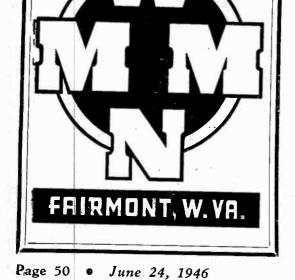

New Regulatory Group Seen for Canada Radio

POSSIBILITY OF AN impartial regulatory body being recommended for Canada by the Parliamentary Radio Committee now sitting, is likely, according to an opinion of the Ottawa bureau of Canadian Press (Canada's AP).

Such an impartial body to regulate both the government's Canadian Broadcasting Corp. and the independently-owned stations has been recommended by the Canadian Association of Broadcasters for some years and has been discussed by previous Parliamentary Committees. It would follow along the line of the Board of Railway Commissioners and the Air Transport Board. At present the CBC regulates all broadcasting, is also a competitor of the independent stations and operates all networks.

Canadian Press also believes the Parliamentary Radio Committee will recommend all broadcasting activities, licensing and responsibility for CBC, to be brought under one cabinet minister, instead of being divided as at present under two cabinet ministers.

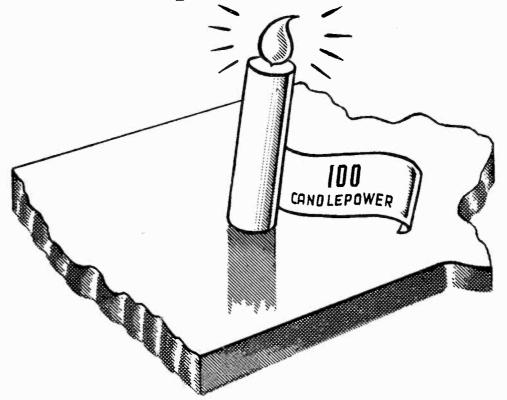

JACK HAMILTON, assistant to purchasing agent of Don Lee Broadcasting System, Hollywood, and Dorothy Stevens, formerly in network accounting department, were married on June 8.

Tv. K.O.

IF THERE WAS ANYONE at Yankee Stadium who saw the knockout blow more clearly than the estimated 100,000 "televiewers", it was Ed Joseph, the referee.

And that goes for the lads who paid \$100 a seat to huddle at ringside in the cool evening breeze.

Most of those who are behind the scenes in video, as well as those who saw it for the first time when the championship bout was staged, will confess that this was one of the art's most important milestones.

It portrayed a spectacle which attracted an enthusiastic audience. NBC in New York, in Washington, in Philadelphia and Schenectady turned away hundreds who tried to get into the exclusive assembly—limited by the scarcity of receivers.

Television, black and white or green or yellow, arrived. None who have worked with it for the last decade doubted that it would. But it arrived in the sense that those who did question its development were convinced.

The Louis-Conn bout was televised under the most difficult circumstances ever encountered by NBC video engineers and producers. One hour before show time, 22 representatives of IBEW (AFL) marched into the Stadium threatening to pull power lines unless they could "take over". They were attempting, with cruel timing, to move in on NABET, the national union to which the NBC engineers belong. As a result of this attempted coup, which failed, the production was put on the air without an opportunity to properly check cues.

The Gillette commercials, it is true, were not in harmony with the demands of the new medium. They were static and old fashioned. There is need for a technique using live pickups and animation. But this detracts nothing from the credit due Gillette as a video pioneer. Improvement will come with experience.

Those who saw the production as guests of NBC, of Dumont, of the other networks and of distributors and home-set owners, were adequately impressed. And perhaps most important of all, it was seen by high Government leaders, including some 400 members of Congress.

Certainly if there is any delay in the development of television now, it will be studied carefully by the eyes of the legislative body which holds such important power over the Certainly, there is ample basis for it. No medium is closer to the public than radio. It is an indispensible factor in the American living standard. There are more radios in use than bathtubs or telephones. We have national newspaper weeks, national health weeks and even national doughnut weeks.

The radio manufacturers and their distributors and dealers function as the circulation departments of stations and networks. Without the program provided by the broadcasters there would be no set sales. The two function hand in hand.

There have been complaints about lack of cooperation between manufacturers and broadcasters. The FM set situation is a current case in point. Broadcasters have called attention to the dearth of radio manufacturer program sponsorship, when the broadcasters supply the medium which makes their economic existence possible. These should be resolved. With the manufacturers and broadcasters collaborating on a continuing basis in the yearto-year observance of Radio Week the opportunity will be presented for mutual consideration of common problems. The manufacturer is interested in stimulating set sales; the broadcaster in stimulating audience. But both have larger missions. The problems of either actually are the problems of both.

We strongly endorse the plan for a permanent National Radio Week, to focus attention on the near miracle that radio has provided and is destined to provide. There should be no time lost in getting the plan under way through enlistment of the ready cooperation of civic groups, advertising clubs, and Federal, state and local organizations. The next step is NAB board action. Then the target date.

The story is easy to tell and sell: National Radio Week will show why every week is Radio Week for American listeners.

ATS Awards

RADIO's frenzy for collecting prizes has grown so acute of late that broadcaster's most dreaded dreams are no longer those in which he finds himself naked amid a host of strangers, but those in which he is suddenly bereft of his awards. We would regard this as an unimportant neurosis if it were not for the depressingly evident fact that the collector's mania seems not only virulent but also contagious.

A fortnight ago television succumbed to a bad attack of the award virus. American Television Society, in a ceremony that an outspoken spectator accurately described as an "award presentation to end all award presentations," passed out 24 plaques for "outstanding contributions" in 13 categories of video activity. Sympathetic with the ATS desire to give an encouraging pat on the back to the individuals and organizations that are struggling to prepare television for its undoubtedly great future, we nevertheless think that for its present state 24 awards for excellence are more than slightly ridiculous. To be honest about it, television just plain isn't that good as yet. We respectfully submit that future ATS awards committees would render much better service both to ATS and those whom it honors with its awards by limiting them to those achieving truly "outstanding contributions" instead of distributing them wholesale on a something-for-everybody basis.

Our Respects To ---

PAUL ATLEE WALKER

ONE PRESUMES that Paul Atlee Walker, dean of the FCC commissioners, is the sort of chap who calls the operator after each long distance conversation to get the charges.

At least, it would be understandable. For in his 12-year career as a member of the FCC, he has excelled particularly in the field of telephone regulation. He has excelled, indeed, to the glory of his own public career and to the gratification of millions of Americans.

It would be impossible to establish the precise indebtedness of the long-distance telephone user to Commissioner Walker. But there might be some indication in the statement by Walter Gifford, president of AT&T, that reductions in long distance rates had amounted to about \$200,000,000 by 1944.

This rate reduction was brought about as a result of an FCC investigation undertaken by authority of an act of Congress, signed by President Roosevelt March 18, 1935. The probe was suggested to the President by Commissioner Walker and he, with colleagues at the Commission, drafted the original measure. The FCC at that time was departmentalized, and Mr. Walker—as chairman of the telephone division—directed the AT&T study.

That this was a prodigious task is demonstrated by the fact that the final record included 8,441 printed pages of testimony and 2,140 exhibits. The result was agreement by the AT&T to a proposal which reduced longdistance rates by over \$12,000,000 annually.

This technical-knockout pattern of jurisprudence has typified Mr. Walker's career, since the days when he first gained recognition as a public administrator in his adopted Oklahoma. His normal procedure is to challenge, study, batter and arbitrate. And it must be acknowledged that his strategy has been effective, although his tactics at times have been frowned upon; as when Mr. Gifford warned, shortly before he capitulated, that the FCC should be "careful about casting unfair reflections upon his company."

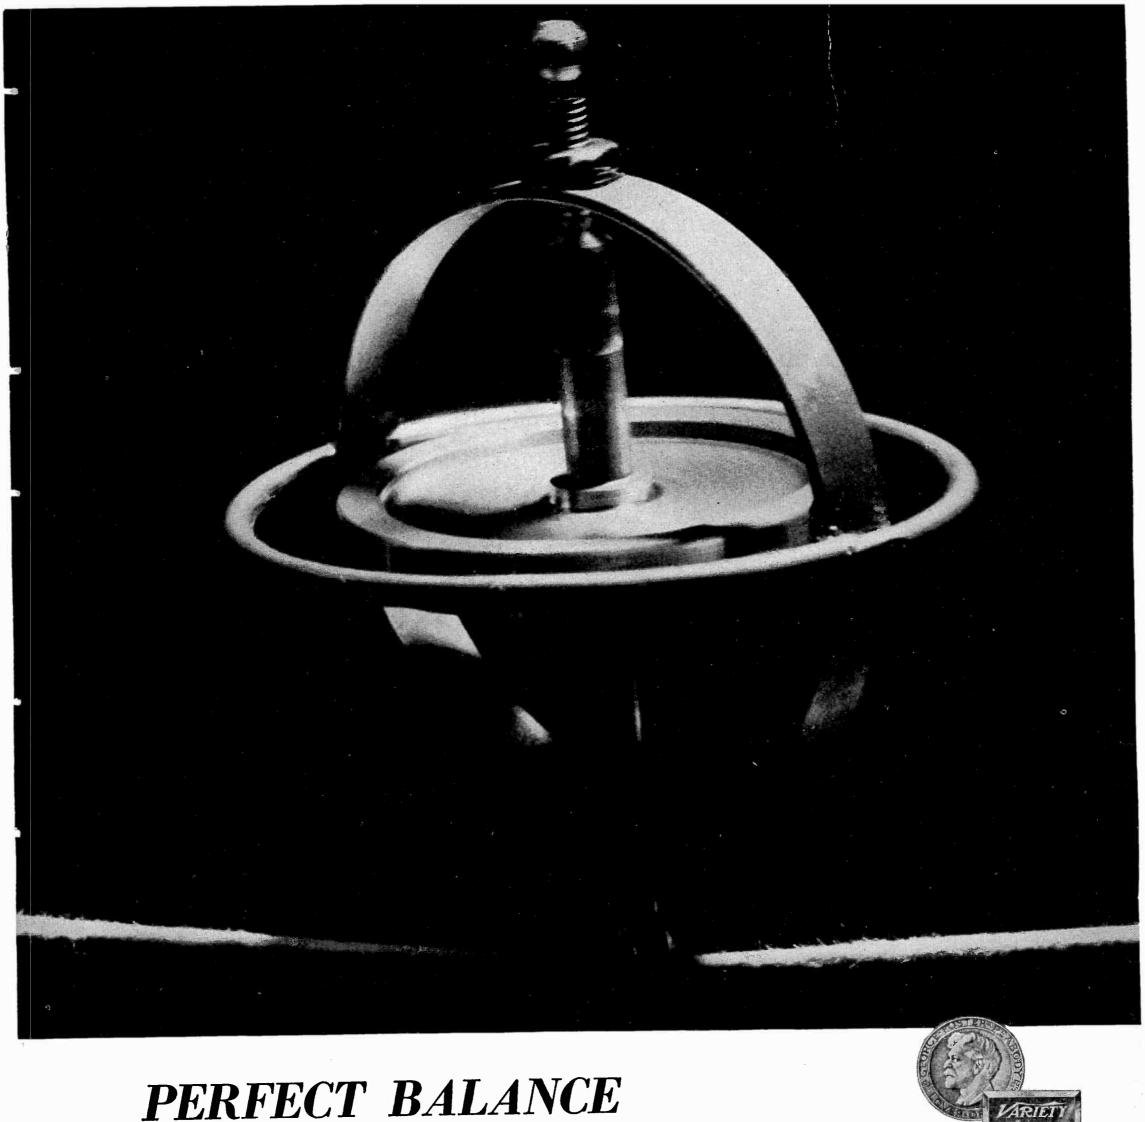

If he is a disciple of give-and-take, as is indicated, the Commissioner comes by the attribute honorably. He has been giving and taking all his life. He is one of the few remaining Federal officials who actually was born in a log cabin, and not one of the fabricated models you buy at Gimbel's. That was on Jan. 11, 1881 in Washington County, Pa. It was there that he studied in public schools. He matriculated at nearby Southwestern Normal. His higher education was interrupted frequently. He left Southwestern, out of funds to teach in a country school: \$30 a month for seven months. That's a total of (Continued on page 56)

destiny of communications.

'Radio Week' Annually

PLANS ARE under consideration for the establishment of National Radio Week, inaugurated last year to commemorate radio's 25th anniversary, as an annual event. Radio Manufacturers Assn. at its convention earlier this month went on record for it. NAB board of directors, at its meeting in August, will consider similar action, looking toward cooperation between the two representative trade associations in sponsoring annual observance.

Page 54 • June 24, 1946

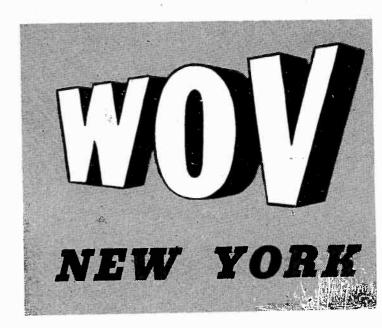

means a CONSTANT AUDIENCE

THE daily program schedule adhered to by WOV results in balanced broadcasting to two distinct metropolitan New York markets . . . two markets that combine, in their respective listening hours, to give this important station a continuous around-the-clock audience, night and day. In the daytime WOV overwhelmingly dominates metropolitan New York's tremendous Italian-speak. ing audience of 520,000 radio homes. And in the evening between the Hooper Hours of 7:30 and 10:00 p.m., WOV delivers the largest average metropolitan audience of any New York independent station . . . at less than half the cost of the next ranking station.

Respects

(Continued from page 54)

\$210, and somehow he saved \$200 of it. Meanwhile, in recognition of a commencement day address he had made against business monopolies, Mr. Walker was awarded a scholarship at the Chicago Institute, which later became Chicago U.

Impelled by a great academic urge, and by another more plebeian but no less imperative hunger, Mr. Walker devoted his spare time to clerking at Marshall Field's; tutoring; selling magazines; waiting table; and, in fact, turning an honest dollar wherever he found it possible. This furious activity, and the contiguous demands upon his time for study, led to a breakdown in his health. Consequently, he continued his career with Chicago U., in Deland, Fla., at the John B. Stetson U., then a branch of the Illinois institution. He entered his senior year in Chicago in the fall of 1904, ran out of funds again and took a teaching position (English, history and athletics) at Charleston, Ill., High School.

In 1905 he was elected principal

of the Shawnee, Okla., High School, and he remained there until 1908. But meanwhile he continued his studies at Chicago U. during summer sessions and won a Bachelor of Philosophy degree in 1909. He had resigned his teaching job to enter the new law school at the U. of Oklahoma. This was hasty action for a man who had known hunger, for the school did not open until one year after Mr. Walker's anticipated date. Consequently he migrated to Denton, Tex., for another term with his text books.

An education in law had by this time become such a consuming objective that probably no force, or combination of forces, could have deterred him. He was a member of the Oklahoma U.'s first law class—18 students. He was, in addition, a charter member of Phi Delta Phi, a legal fraternity; Sigma Alpha Epsilon, a social fraternity; Delta Sigma Rho, debating; and the Senate Literary Society. To these triumphs, he could and did add a Phi Beta Kappa key which, even today, hides the fourth button of his vest.

Having obtained with noted tenacity a philosophy degree and a law degree after some 12 years of

IN THIS IMPORTANT BUYING LAKE AREA!

To more than 500,000 listeners in Northeastern Wisconsin and Upper Michigan, WMAM is the only station clearly audible at all times — a singular situation for which we thank ground mineralization. Located at 570 on the dial, WMAM delivers virtually 5000 watt coverage at 250 watt rates! A complete wolf-trapping, Mr. Walker entered legal practice in Shawnee in 1912. He soon ran for and won election as a justice of the peace. This, his first successful campaign for public office, kindled his aspirations and he declared for county judge. He was defeated by 102 votes. Shortly after this reversal, he accepted an offer to become an attorney for the Oklahoma Corporation Commission. He took office in the State Capitol on Jan. 1, 1915.

Served Until April 1919

In this capacity, Mr. Walker served with distinction until April 1919. His record indicated that he had not changed his mind since 1899 when he delivered that commencement day address condemning monopolies. He fought capitalistic combines with a fervor that exceeded the demands of his position, and could only indicate an inner conviction that he was fighting for right.

In 1919, he became the first referee elected by the Oklahoma Supreme Court to hear cases in the absence of justices. He returned to the Corporation Commission in 1920 as counsel; in 1931 he was elected a commissioner. He was named by his colleagues to the chairmanship in January 1931.

As chairman, he was not always in harmony with his two voting colleagues on the three-man body. As a matter of fact, Mr. Walker was something of a dissenter, a reputation he might have carried with equal prominence on the FCC had he not been overshadowed by that Nomad of the Nay-Vote, Clifford J. Durr. As Corporation Commission chairman, he fought with vigor for the people's rights in utility rates.

It was this militancy which brought him to the attention of President Roosevelt in 1934. He was appointed for a five year term to the FCC, becoming a charter member of the body which was created by the Communications Act of 1934. He was reappointed to a seven-year term in 1939, and this term would expire June 30 of this year.

He was confirmed by the Senate June 15 for another seven-year term, after reappointment by President Truman. He was sworn in on last Thursday.

During his years of service at the FCC, Mr. Walker has distinguished himself in telephone reguman. He married Myra Evelyn Williams on June 2, 1914. They have four children: Robert William, an Annapolis appointee; Paul Jr., a law student; Julia and Virginia, the latter two married. The children are getting along now, and Mr. and Mrs. Walker give much thought these days to an Oklahoma dream: a place in the country. But it looks like it will have to be in Maryland or Virginia.

He has been, none can deny, a good and faithful servant for his state and for the nation. He served in World War I as an infantry enlistee. He attained a majority and subsequently was transferred to the Judge Advocate General's office. He and his family are devoted Presbyterians and he, for years, taught a regular Bible Class. As a personality, he appears to be neither naive nor complex. He, like many other of our public leaders, started working as a boy to make a living; and now that he has found the formula for doing that, he carries on his work by sheer momentum. Likely he would be unhappy if he spent all of his time on that farm he's seeking.

State Honor

His talents have been recognized by his adopted state. On Nov. 16, 1945, he was inducted into the state Hall of Fame by the Oklahoma Memorial Assn.

On that occasion Walter B. Emery, a former associate of Mr. Walker's, wrote a book about him. The book itself depicts faithfully Mr. Walker's chronological biography. It quotes, also, letters and speeches by the Commissioner. Among these is a letter, dated April 27, 1944, in which Mr. Walker states:

"(The FCC) has no power to require that a broadcaster use any particular program."

This was written two years before the FCC's Blue Book was issued. It can be presumed that Mr. Walker, who is not a man of fickle thought, continues in that conviction. He may yet find cause for dissent.

NMAM Marinette, Wis.

BRANCH STUDIOS: Iron Mt., Mich. • Sturgeon Bay, Wis. JOSEPH MACKIN: General Manager

National Representatives: Howard A. Wilson Co. Chicago • New York • San Francisco • Hollywood latory matters. He says today, "I envision so many developments in the telephone industry that it is only natural a good share of my interest lies there." He has, nevertheless, been a faithful arbiter in broadcast matters. He was elected last year to the vice chairmanship of the Commission, a formal action by his colleagues which recognized merely a situation which had existed for many years. He normally has been called upon to sit in the chairman's absence.

Mr. Walker is a devoted family

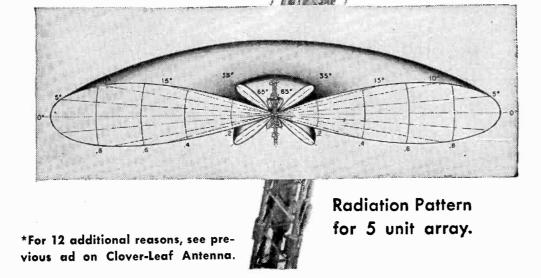

- 13. Light weight.
- 14. Easy to assemble-low erection costs.
- 15. Half wavelength spacing reduces side lobe energy.
- 16. No critical dimensions required to obtain maximum efficiency.
- 17. Wide vertical beam width for reliable coverage.
- 18. Designed for high wind and heavy ice loads.
- **19.** One design for all FM broadcast frequencies.
- 20. One design matches impedance of any coaxial line.
- 21. Simple de-icing elements no rf filters needed.
- 22. Built-in vertically polarized radiation suppressor.
- 23. Built-in second harmonic attenuator.
- 24. Built-in climbing steps.

LZ <u>more</u>* reasons why FM stations are choosing the *Western Electric* CLOVER-LEAF ANTENNA

The Western Electric 54A Clover-Leaf Antenna, designed by Bell Telephone Laboratories specifically for FM broadcasting in the 88—108mc band, radiates horizontally polarized waves in a highly concentrated, *circular* azimuth pattern.

Exhaustive tests on accurately scaled models confirm that the distribution of energy in azimuth is circular within ± 0.2 db and that the beam width is realized in practice to $\pm 1^{\circ}$. Advertised gain figures have been confirmed within 0.2 db.

For complete electrical and structural details, write to Graybar Electric Co., 420 Lexington Avenue, New York 17, N.Y.—or phone your

WTOD on Air June 15, Three Months After CP

A NEW RECORD is claimed by WTOD Toledo for fast time in putting a station on the air. According to Edward Lamb, Toledo attorney and president of Unity Corp., owner, application was filed Jan. 25, 1946. CP was granted Feb. 27. Construction of studios and transmitter house, tower and other equipment was completed June 1, and the station went on the air commercially June 15, three and a half months after CP was granted. Station uses a Raytheon transmitter.

Staff is mostly returned veterans. William H. Spencer, Army flyer, is station manager. Don Gehring, paratrooper, has been made continuity writer and traffic manager. WTOD is on 1560 kc, 1000 w. Walker Co. is national representative.

Hall Bros. Plans

CBS Radio Reader's Digest, sponsored by Hall Bros. (stationer) Kansas City, through Foote, Cone & Belding, Chicago, will not be dropped from network agency indicated last week. Program will move out of Sunday 1-1:30 p.m. (CDT) CBS slot "sometime in September" to take over Thursday, 9-9:30 p.m. segment formerly held by Island Venture for Wrigley which cancelled after June 20 broadcast. Summer replacement for Island Venture will be Caesar Petrillo Presents featuring WBBM-CBS staff orchestra conducted by brother of AFM president. Radio Reader's Digest may take summer hiatus in July, but final decision has not been made, agency indicated.

Fitch Replacement

ONE OF RADIO's pioneer radio programs, Vic and Sade, returns June 27 as summer replacement for Rogue's Gallery on Mutual, itself a replacement for the Cass Dailey Show on NBC, both sponsored by F. W. Fitch & Co. Replacement for Rogue's Gallery, Thursdays, 7:30-8:00 p.m. CDT., has been on the air almost continuously since 1932 as a five-aweek quarter hour strip. New sponsorship will be first time in show's history that it has been presented as a half-hour feature. Program will originate from WGN

JAMES C. HANRAHAN, Scripps-Howard Radio vice president, recently discharged from the Army as lieutenant colonel, has been awarded the Croix de Guerre with gold star by the French Governmentt. During the last 18 months of his four years of Army Service, Colonel Hanrahan was assistant chief of staff of the 83rd Infantry Division which invaded the Continent. Colonel Hanrahan will headquarter in Cleveland for Scripps-Howard Radio.

IRVING E. ROGERS, general manager of WLAW Lawrence, Mass., and publisher of the Lawrence Daily Eagle and The Evening Tribune, June 15 was host to "welcome home" dinner party honoring 39 veterans who have returned to the staffs of the papers and WLAW. Some 300 associates and guests attended party at which Mr. Rogers presented each veteran a \$100 savings bond. The families of three employes who were killed in action were presented \$500 bonds.

ALVIN O. BRAMSTEDT, president of KFAR Fairbanks, Alaska, is the father of a girl, Susan Ruth.

CHARLES SMITHGALL, manager of WAGA Atlanta, Ga., is on a two week trip to Washington and New York.

ALEXANDER MacGILLIVRAY, director of accounts and finance, RCA Victor Division of RCA, has been elected secretary of the Philadelphia Control of Controllers Institute of America for 1946-47. E. K. BAUER, who has acted as comptroller of WSAI Cincinnati since its sale

to the Marshall Field organization in Sept. 1944, has been appointed assistant to General Manager **ROBERT M. SAMPSON.** He will continue to supervise station's business affairs and will handle administration of sales activities. For a number of years Mr. Bauer was with Crosley Corp. in both manufacturing and broadcasting divisions.

JOHN PATTISON WILLIAMS, executive vice president of WING Dayton, Ohio, has been named on the public information committee for the Dayton 1946 Community Chest campaign.

ROBERT T. MASON, general manager of WMRN Marion, Ohio, has been given an honorary membership in the local Junior Chamber of Commerce in "public recognition of the cooperation and aid given this organization during the war years."

MAJ. GEN. PHILIP HAYES, newlyelected president of Tower Realty Co., of Baltimore, which plans to engage in all phases of broadcasting operation, was honor guest at a testi-

Mr. Bauer

monial dinner attended by some 400 leading citizens of Maryland at the Lord Baltimore Hotel June 17. General Hayes was in command of the Third Service Command until his retirement last week. Baltimore will be his permanent home and radio his primary activity.

PRESERVING THE VOICES of automotive pioneers as well as the events connected with Detroit's "Automotive Golden Jubilee," George Trendle (1), president of WXYZ Detroit and the King-Trendle Broadcasting Corp., presents a wire recorder spool of the description to George Mason, president of the Automotive Manufacturers Assn. and Nash-Kelvinator Corp. The spool will be sealed in a capsule for rebroadcast during the 100th anniversary of the automotive industry.

JOHN H. PART has been elected president of York Broadcasters Ltd., operating CHUM Toronto, succeeding R. T. FULFORD, president since founding of the company, who retired as president, but remains as vice president. Mr. Part has withdrawn from presidency of Mason's United Advertisers Agency, Toronto.

BILL STOVIN, manager of CJBQ Belleville, Ont., June 17 welcomed to Canada his war bride and baby son, who arrived on the Queen Mary June 14 from England.

Assumes NAB Post

EDWARD J. (Ted) HEFFRON, new executive assistant to NAB President Justin Miller and Executive Vice President A. D. Willard Jr., assumed his duties at the association's headquarters last Monday. Mr. Heffron formerly was executive secretary of the National Council of Catholic Men. His former associates presented him with a huge floral piece as he took over the NAB post.

DOMINATING 9 High Income Counties

FTC Hearings

FEDERAL TRADE COMMIS-SION June 17 held hearings in San Francisco on alleged misrepresentation by Procter and Gamble Co. of Teel, liquid dentrifice, and consequent disparagement of competitive tooth-pastes and powders. FTC same day held similar hearing in New York on Philip Morris & Co. alleged misrepresentation in sale of cigarettes and smoking tobacco.

Each week the writer of a timely book defends his views before WHN microphones and a jury of twelve in the studio theatre. "Judge" Sterling North, literary editor of the New York Post presides while guest "prosecutors" and "defense" argue it out in this battle of books. Broadcast Mondays, 8:00 to 8:30 P.M., the discussion's fast, furious and totally uninhibited.

"Books on Trial" typifies the sort of program planning and production which today distinguishes WHN service. Top power...top programs...top personalities at their entertaining best...you get them all on WHN—plus the potential of America's first market.

BROADCAST ADVERTISING AND SALES, 4 Albert St., Toronto, is new agency enfranchised by the Canadian Association of Broadcasters. Agency is owned by Don H. Copeland, a station executive in Toronto for more than 20 years, who until recently was with Dominican Broadcasting Co., that city

ADVERTISING STUDY PREPARED FOR ANA

A TWO-YEAR STUDY, prepared by McKinsey & Co., management, consultants, for the Assn. of National Advertisers, entitled Organization of the Advertising Function was published and distributed to ANA members last week.

It contains organization charts of 64 companies and is based on personal interviews with company chief executives, and other top management men, including advertising managers in 21 companies, plus comprehensive data supplied by other advertisers.

The study shows that management recognizes that advertising now has a broader function. As an example, it was pointed out that advertising was useful to bring about better understanding between employes and the company and to accomplish good community and stockholder relations. Interviews with chief executives indicated that they contemplate increased expenditures and broader utilization of advertising to help build volume and profits.

Weather Facts

NIGHTLY weather roundup broadcast from the U.S. Weather Bureau at Brain-ard Field, Hartford, Conn., is being aired by WTIC Hartford, Conn., 6:40 p.m.

On Greenwich Village

HISTORY, traditions and tales of Greenwich Village form background for "Meet Me in Greenwich Village," new series heard on WLIB New York, Mon-day through Friday 12:45-1 p.m. Wire recorder is used for interviews.

Covers Tournament

Station Purchases Pair **Of Postwar Transmitters**

WCBS Springfield, Illinois, now has not only one, but two postwar transmitters. In keeping with its postwar expansion policy, the station recently placed into operation a new RCA 250-L transmitter, replacing the one destroyed by fire last January. New equipment went into operation May 24th.

One week following the installation of the RCA equipment a new Collins transmitter, ordered shortly after the fire, arrived at the station. Both transmitters will be housed in the new WCBS transmitter building following completion of the structure in the fall.

Aid for Veterans

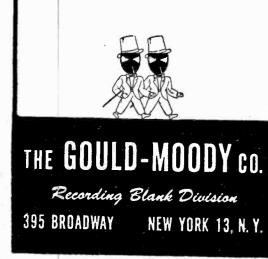

TO DEMONSTRATE a radio station's importance to its community, WIRA Fort Pierce, Fla., new station which began operations May 15, has conducted a campaign to raise money for the four most injured war veterans in that area. After seven broadcasts, totaling 5½ hours air time, \$8,477 was received from 679 different contributors.

Programs to Hospital

WNBZ Saranac Lake, N. Y., is providing its complete facilities direct to Sunmount Veterans Hospital, Tupper Lake, N. Y., as reception at the institution, peculiarly located in mountainous terrain, is exceptionally poor. Station has leased a telephone line between its transmitter and the hospital. ABC programs, as well as WNBZ broadcasts, are sent to the hospital from 7:30 a.m. to 10:30 p.m. Arrangements were made with the assistance of the New York State Elk's veterans committee and hospital authorities.

Lawsuit to London

EIGHT YEAR old lawsuit involving the Canadian Broadcasting Corp. and Gooderham & Worts Ltd., operators of former CKGW Toronto, is going to the Privy Council at London. Predecessor of the CBC, the Canadian Radio Broadcasting Commission, took over the operation of CKGW as its Toronto outlet in 1933, at a lease of \$12,000 a year with understanding that the CRBC would keep the station upto-date, and that license would be renewable for three year periods. When CBC built CBL Toronto, its first 50 kw outlet, about 1938, it terminated its lease on CKGW's 5 kw equipment at the transmitter site at Bowmanville, Ont. Gooderham & Worts has fought the lease termination through all the Canadian courts and now is taking it to the highest court in the British Empire at London.

Page 62 • June 24, 1946

Show on Road

SATURDAY night MBS origination of KWTO Springfield, Mo., "Korn's-A-Krackin'," June 29 starts series of 10 out-of-town appearances. The 55-min-ute program will originate from communities in Missouri, Kansas, Arkansas, and Oklahoma Ozarks.

Hires Switch

EFFECTIVE July 7 Charles E. Hires Co. "The Sunday Evening Party With Hires" will be broadcast by ABC in 6-6:30 p.m. period, moving up from 6:30-7 p.m. time.

WLIB Visits Coney Island

CARNIVAL atmosphere of Coney Island is theme of new series on WLIB New York, "Weekend at Coney Island." Aired Saturday and Sunday 12:45-1 p.m., program takes listeners on visit to the amusement park. Dick Bell roams park

INVERNESS Invitational 4-Ball Golf Tournament, resumed this year June 20-23 at Toledo, Ohio, was covered with 20 broadcasts by WSPD Toledo.

NBC Safety Series

SERIES of 10 half-hour dramatizations titled "No Happy Ending," emphasizing the importance of traffic safety starts June 29 on NBC, Sat. 5-5:30 p. m.

Participation Series

WEEKLY half-hour "Dinner at the Maxwell House" is being presented by WLAC Nashville, Tenn. Dinner guests are interviewed and quizzed. Prizes are awarded for correct answers.

MRS. ELEANOR ROOSEVELT, chairman of the UN Commission on Hu-man Rights, was heard June 22 on ABC, 2:45 p.m., in an address on "Humanity, an Urgency," at the Stamford Forum on World Peace.

Contracts for FM

CONTRACT for complete 10 kw FM station equipment has been placed by St. Louis U. with Federal Telephone and Radio Corp., Newark, N. J. Uni-versity is owner-operator of WEW St. Louis.

``BUT, DEAREST, A NERN STATION

SAID THAT EVERY AMERICAN HOME

SHOULD HAVE ONE."

Naturally, it's a necessity — if you want to make great organ music in your home. Listening to NERN stations generates other listening 'musts' which NERN believers accept as gospel truth. The moral is that the head-scratching breadwinner pictured above will immediately turn to his NERN station for new ideas on house alteration and expansion.

NERN COVERAGE

New England — where 97.4% of the population listens regularly to NERN. New England — where 8% of the nation's retailed goods are consumed annually. New England — where 11% of the capital resources of U.S. banks are held.

HARTFORD, CONNECTICUT

CELEBRATED OPERATOR of a steam shovel on the site of KOMO's proposed new building in Seattle was Comedian Bob Hope. In the cab with him is Martha Wright, guest vocalist on two Seattle appearances, while O. W. Fisher, president of KOMO Inc., stands on the front caterpillar.

Form Fit Signs

FORM FIT, Chicago (women's accessories), has contracted with Music Corp. of America for series of quarter-hour transcribed programs featuring Nancy Martin, which are to be offered to dealers in approximately 50 markets as gratis promotion. Dealers will pay for time on stations of their own choice.

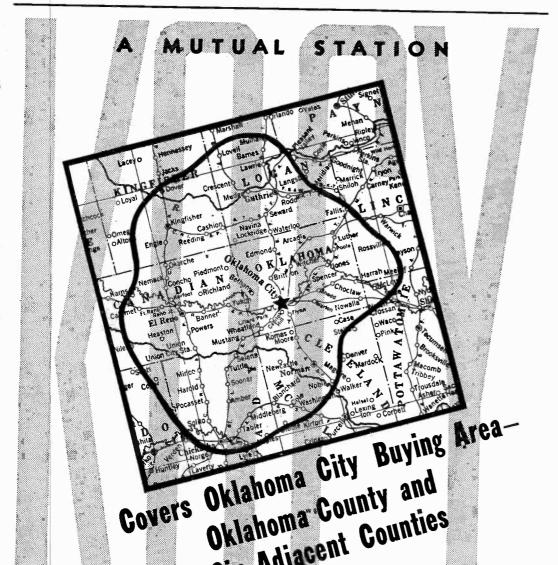

Lannett Co. Is Planning Ad Campaign for Anecal

LANNETT Co., Philadelphia, is planning national advertising campaign to include radio in behalf of its skin cream and new sun tan lotion, both known as Anecal. Schedule is to be completed within the next month, according to Abner J. Gelula & Assoc., Philadelphia, agency handling account.

Currently using 100 spots for summer season on each of the Atlantic City, N. J., stations, WBAB and WFPG, Lannett plans radio in Philadelphia and other markets. Firm is doubling production facilities and is to announce several new products in cosmetic line, for which radio is to be used along with other media. Promotion will be correlated with growth of production and distribution.

Phi Beta Award

AWARD for the best musical program on the air during the current season was presented to NBC's The Telephone Hour, Monday, 9-9:30 p.m., by Phi Beta, national professional fraternity of music and speech. Trophy was presented on the June 17 broadcast to Keith S. McHugh, vice president of the American Telephone and Telegraph Co., sponsor of the series, by Marion Bauer, noted music teacher and author.

"It's a <u>cozy</u> house, but sometimes I feel that the living room is a trifle cramped"

"Building Boners" just aren't made by people who listen to "The Question Before The House." Sponsored by the Hartford Electric Light Company over Station WTIC, through its agency, Baker, Cameron, Soby & Penfield, Inc., this program offers professional advice to present and prospective home owners, pointing out the problems and pitfalls of haphazard home planning and remodeling.

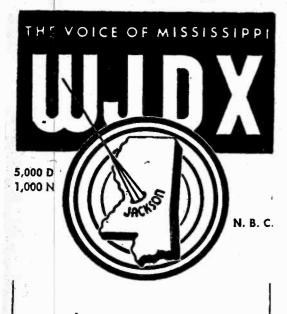

Thousands of letters and inquiries from listeners throughout Southern New England have been expertly answered on the air by "The Question Before The House," and in recognition of a job well done it was named a top public service program in its area by Billboard's 1946 Annual Radio Editors' Poll.

Such successful blending of salesmanship and public service is one of the reasons why Station WTIC is held in such high regard by its listeners. And when you consider where those listeners are . . . in the prosperous Southern New England Market . . . you know why Station WTIC is held in equal favor by its advertisers. Just Testing

CONFIDENCE in WIOD Miami was not rewarded a fortnight ago when the station threw a trusting listener completely off schedule. A WIOD fan reported to the station that he doesn't have an alarm clock, but keeps his radio on all night, tuned to the 610 kc of WIOD, so that when the station comes on at 6 a.m., he is awakened. But on June 11, he got up on his regular signal from WIOD, dressed and was about to have breakfast when WIOD signed off. He was confused, as he hadn't been listening to what was on the air at the time. He was even more confused when he looked at his watch and saw it was 3:50 a.m. After calling the station, he found that on the second Tuesday of each month, WIOD conducts a test for the FCC in the "wee small hours"-and that was it.

British Actors Equity Wants BBC Competitor

A COMPETITIVE broadcasting system to vie with BBC was suggested last week in London by British Actors Equity, according to the New York *Herald Tribune*. Means of establishing the rival system have not yet been devised, but the actors have appointed a committee to consider the best means of procedure. The competitor would be also Government-controlled, as the actors decided against commercial radio.

Reason for wanting the second system, said the *Tribune*, is a need for higher talent fees. The actors are protesting that to earn an equal amount on BBC that could be earned on the stage in a week, an actor must work for three weeks on the air or in television.

BILL SNYDER, former CBS Hollywood chief of guest relations, has been named manager of network's mimeograph and script department. He replaces VIOLET HELGREN O'KEEFE, who resigned after 10 years.

WBIR—ABC Knoxville, Tenn.
WLAP—ABC Lexington, Ky.
KFDA—ABC Amarillo, Tex.
WCMI—CBS Ashland, Ky. Huntington, W. Va.

CHRIS LYKKE, former city editor of San Francisco News and more recently Pacific Coast regional director of OPA, has established advertising and public relations offices in the Monadnock Bldg.. that city.

IMPERIAL RADIO PRODUCTIONS, Toronto, has been appointed Canadian representative for Carlton E. Morse's new program "Adventures by Morse." ADMIRAL Corp., Chicago, has appointed three regional managers to head newly created territories. They are: E. M. PERKINS, Boston, northeastern region, J. F. GILBARTE, Cleveland, central region; P. R. DYE, Milwaukee, midwestern region.

The Collins 6M... A Modern program amplifier for progressive broadcasters

If you are planning an up-to-date, forward looking broadcast station or recording studio, or if you are modernizing the one you have, the Collins 6M high fidelity program amplifier will fit into your plans. The thorough engineering that has gone into its design and development is evident in its outstanding performance in both AM and FM applications.

Utilizing choice quality components, conservatively operated, the 6M amply fulfills the requirements for dependable, continuous duty. The self-contained power supply will furnish power for the 6M itself and as many as five preamplifiers. One of the two meters indicates the 6M output in VU; the other measures the power supply voltage and the current drain of the 6M and preamplifiers.

Emphasizing high performance, accessibility, and reliability, the 6M will make a valuable and practical contribution to the quality of your station or studio. Write today for an illustrated bulletin.

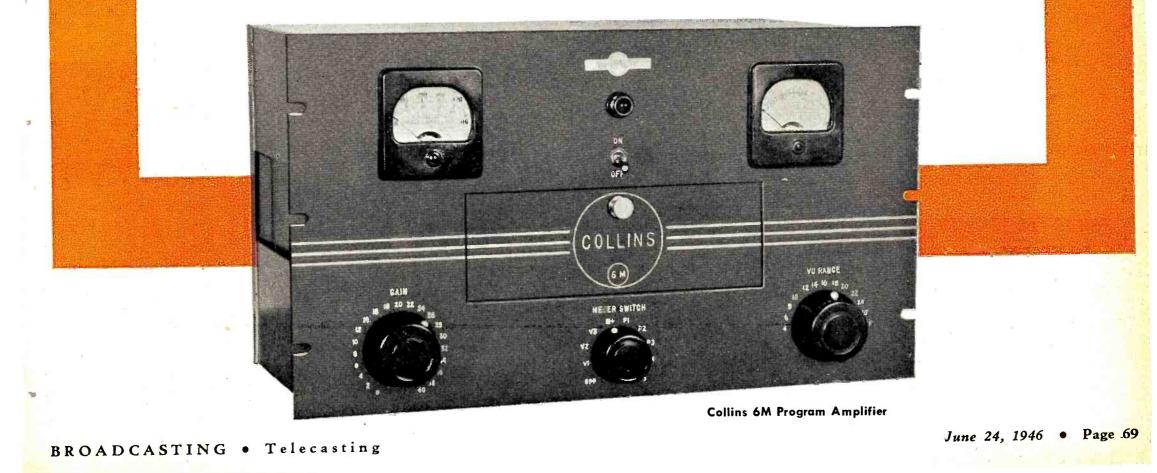

SPECIFICATIONS:

Frequency response: 30-15,000 cps \pm 1.0 db Noise level: - 60 db. from program level Distortion: Less than 1% at normal program level

FOR BROADCAST QUALITY, IT'S ...

THE PIANIST TAKES THE PRIZE

After the final broadcast of the 1945-1946 "KFI-HOLLYWOOD BOWL YOUNG ARTISTS COMPETI-TION" last Monday from 9:30-10 p.m., five eminent musical personages who had acted as judges for the series retired to a KFI Conference Room to choose the winning instrumentalist. Since November 15th, 1945, forty highly talented artists had appeared on the weekly concert broadcasts over KFI in competition for a paid solo performance in Hollywood Bowl with Leopold Stokowski on August 25th of this year. Considering the superb quality of the artistry of these youngsters, the judges found it no simple matter to pick the winner. In fact, it was only after some five hours of deliberation that the seventeen year old pianist, Lillian Magidow, was awarded the decision. She is a former pupil of Olga Steeb and is at present studying with Lillian Steuber.

The Committee of Judges also awarded a \$300 Scholarship to Shirley Kagan and a \$200 Scholarship to Andre Previn. Both are pianists. Miss Alta Grimes, cellist, received an Honorable Mention Award and thirteen year old Jack Browning, pianist, took top honors in the Junior Division of the YOUNG ARTISTS COMPETITION which was accompanied by a \$250 Scholarship. The program series is a Public Service presented jointly by Station KFI and the Hollywood Bowl Association.

LARENCE FRANCIS, chairman of the board of General Foods Corp., New York. June 25, 5:15-5:30 p.m. will be heard on CBS when he addresses the 40th appriversary meeting to appr the 40th anniversary meeting to com-memorate the Original Federal Food and Drugs Act of 1906. Subject of Mr. Fran-cis' address will be "The National Food Drug and Cosmetic Law, Instituted by the 1906 Act—Its Basic Value to the Food Industry." Presented under aus-pices of the American Bar and there pices of the American Bar and other organizations including the General Fed-eration of Women's Clubs and the National League of Women Voters, broadcast will originate in the meeting hall of the New York City Bar Assn.

A. MOODY & Co., Los Angeles (mat-tress manufacturer), July 2 starts spon-soring "Erskine Johnson In Hollywood" on KHJ Hollywood twice weekly and will expand to include other Don Lee Pacific stations following brief test. Agency is Lester C. Nielson Co., Los Angeles.

UTILITY APPLIANCE Corp., Los Angeles (manufacturer cooling and heating equipment), has purchased Gaffers & Sattler, Vernon, Calif., (stoves, refrig-eration), and Occidental Stove Co. Irv-ington, Calif. (stoves). Administration of three firms will be consolidated under Utility.

H. W. REYNOLDS, assistant general counsel of Colgate-Palmolive-Peet Co., has been appointed general counsel succeeding MASON TROWBRIDGE, who re-tires after 30 years with firm.

EDWIN B. DE MESQUITA after service with the Navy as lieutenant and be-fore that associate advertising director of the American Safety Razor Corp., New York, has returned to the firm and been appointed assistant to the executive vice president.

THE SQUIRT Co., Beverly Hills, Calif., (bottled grapefruit beverage), has ap-pointed Ruthrauff & Ryan, Hollywood, to service account. Spot radio will be used. New advertising and sales pro-motion program will be presented during Squirt bottlers annual convention in Miami on Nov. 18.

E. O. ANDERSON Co., Santa Monica. Calif., (Shontex shampoo, hair condi-tioner), expanding into midwest mar-ket, July 2 starts twice weekly participation in Gold Coast Rhythm on WBBM Chicago. Contract is for 13 weeks. Firm also sponsors twice weekly Fulton Lewis jr. on eight Don Lee Pacific stations. Agency is Barton A. Stebbins Adv., Los Angeles.

THE BORIS-CALIFORNIA Co., Hollywood, promoting new service of mer-chandising packed California food items to all world points, is planning an extensive fall campaign which will include spot radio along with other media. Agency is Henry H. Sterling Inc., Los Angeles.

CURRY ICE CREAM Co., Los Angeles (retail chain), in a 26 week campaign which started June 14 is using a weekly schedule of spot announcements on seven local area stations. Agency is Dan B. Miner Co., Los Angeles.

C. MERRILL HALVERSON, who prior to war operated his own San Francisco agency, has been appointed sales and advertising director of Carosanti Co., Los Angeles (perfume manufacturer).

BROOKS CLOTHING Co., Los Angeles

Adopted

JOSEPH MARTINSON & Co., New York (Martinson's coffee), June 17 for six weeks started 20 June 17 for six weeks success spot announcements weekly on Now York using the WQXR New York using theme "Love That Con Coffee, taken from the advertising slo-gan "Love That Soap," in Fred-eric Wakeman's latest novel, "The Hucksters." Agency is Al Paul Lefton Co., New York.

Missus" on 17 CBS western stations, Mon.-Wed.-Fri. 1:45-2 p.m. (PST). Agency is J. Walter Thompson Co., Chicago.

CHAMP LABORATORIES Corp., Toronto (proprietary), plans to extend weekly "Scrap Book" program in Sep-tember to a national list of Canadian stations. Until summer layoff program has been on CFRB Toronto. Agency is J. J. Gibbons Ltd., Toronto.

What's Philadelphia Doin' Out West?

UTAH

MONTANA

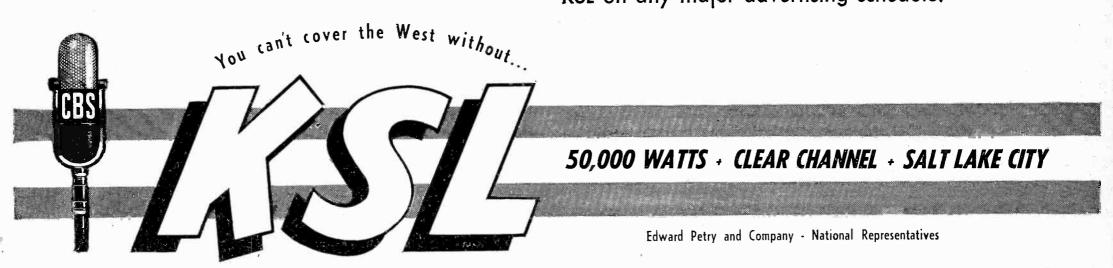

WYOMING

COLORADO

It's just a way of showing you that the 2,781,702 population of KSL's Primary and Secondary Listening Area is comparable to that of metropolitan Philadelphia. This proves that there's a whole of a lot more to the West than just "wide open spaces." When an advertiser uses KSL, he reaches not only the population of metropolitan Salt Lake City, but over 2,700,000 buyers throughout the 11 Western states. A market this size is important to any advertiser. It's just good business to include KSL on any major advertising schedule.

ARRL Field Day Test Set for Next Weekend THE BIGGEST test in the 14-year history of Field Day, sponsored by the American Radio Relay League, Hartford, Conn., is expected next weekend, June 22-23. Then the national association of amateur radio operators will conduct its first postwar nationwide test of amateur portable and mobile emergency radio equipment.

Participating amateurs will install units in various field positions by 4 p.m. of Saturday and will maintain operation until 6 p.m. Sunday. Test will take the form of competition with points granted for each radio contact and special credit allowed for handling of messages and/or the use of a transmitter whose output stage requires less than 30 w. In the last such test, in 1941, the winning group established 1,112 separate radio contacts.

Participation, according to F. E. Handy, League communication manager, will not only include organized club groups but also the individual hams of the Amateur Emergency Corps., an ARRL-sponsored emergency communications organization of amateurs.

Staff Elects

ANNUAL ELECTIONS of CKWX Employes Benevolent Assn., Vancouver, resulted in a new board composed of John Loader, sales staff; Ian Arrol, management and news; Pat Nicholson, continuity; Ellen Getty, office; Reo Thompson, announcers; Art Miller, engineers; Al Klenman, program engineers.

As proved by a recent Conlan Survey, WDAY is by far the most popular of all stations heard in Fargo's prosperous Red River Valley—more popular than all the others heard, *combined*!

HONORARY DOCTOR of law degree was conferred on David Sarnoff, president of RCA and chairman of board, NBC, by Forrest H. Kirkpatrick, dean of students, Bethany College, W. Va., at the college's 150th commencement exercises June 9. Mr. Sarnoff was principle speaker at the ceremonies, which were broadcast by WSTV Steubenville, Ohio.

Hope Still First, Winchell Advances From Tenth to Second in New Hooper

BOB HOPE continued in first place and Walter Winchell advanced from 10th place to second in the latest Network Hooper Ratings on evening programs issued June 15. Programs in the first 15, last report, and off the air for summer season include Jack Benny, Charlie McCarthy, and Amos 'n' Andy.

Average Evening Sets-In-Use was 23.9, down 1.2 from last report, down 1.8 from a year ago. Average Evening Rating was 7.6, down 0.5 from last report, down 0.4 from last year. Average Available Audience was 77, down 0.9 from last report, up 0.4 from same period last year.

Current Total Sponsored Hour Index was 72³/₄ as compared with

\$107,000 INTEREST IS REFUSED FLAMM APPEAL by Donald Flamm, one-

time owner of WMCA New York, from a New York Supreme Court decision denying him interest on a \$350,000 judgment he won against Edward J. Noble, chairman of the board of ABC, was denied last week by the Appellate Division of the Court.

Supreme Court Justice Dennis O'Leary Cohalan had refused to grant Mr. Flamm \$107,000 interest after a jury had awarded him the damages. Mr. Flamm charged in the trial that Mr. Noble had forced him to sell WMCA in 1941 by threats of political pressure.

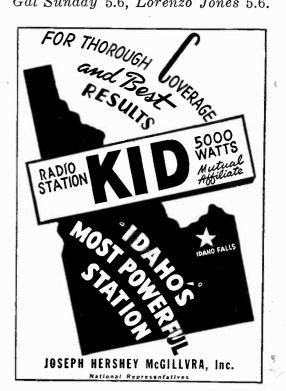

Mr. Noble's attorney, Franklin S. Wood, has announced that the $74\frac{1}{4}$ last report and $77\frac{3}{4}$ a year ago.

First 15 evening programs were: Bob Hope 26, Walter Winchell 20.1. Red Skelton 19.5, Fibber McGee & Molly 18.5, Radio Theatre 16.4, Fred Allen 16.3, Screen Guild Players 16.2, Mr. District Attorney 15.9, Take It Or Leave It 15.5, Kay Kyser 14.9, Jack Haley with Eve Arden 14, Judy Canova 13.4, Eddie Cantor 13.3, We, The People 12.8, Can You Top This 12.5, Your Hit Parade 12.5.

First on the list of top 10 weekday programs in the June 15 report was When a Girl Marries, followed by Portia Faces Life which jumped from 24th to second position since last report.

Average Daytime Sets-In-Use was 15, down 0.3 from last report. up 0.6 from last year. Average Daytime Audience Rating was 3.8. down 0.2 from last report, down 0.3 from last year.

Average Available Audience was 71.8, down 0.4 from last report, up 1.6 from a year ago. First 10 weekdav programs were as follows: When a Girl Marries 6.5, Portia Faces Life 6.4. Young Dr. Malone 6, Right to Happiness 6, Young Widder Brown 5.8, Stella Dallas 5.8, Ma Perkins 5.7, Just Plain Bill 5.7, Kate Smith Speaks 5.7, Our Gal Sunday 5.6, Lorenzo Jones 5.6.

NBC-Northwestern Schedule Institute

Six-Week Course on Radio To Start July 25

FIFTH ANNUAL NBC-Northwestern U. Summer Radio Institute opens a six week course in advanced radio training, July 25 at Evanston, Ill.

With 81 students enrolled, of which 36 are war veterans, the Institute will offer ten advanced courses and a special series of six evening lectures by outstanding men and women of the radio industry.

Opening lecture will be given by Fred Bate, manager of the NBC International Division. Miss Judith Waller, public service director for NBC Central Division, is co-director of the Institute.

Courses will be given by the following NBC Central Division employes: "Radio Station Promotion and Publicity," Emmons Carlson and Jack Ryan; "Radio Sales," Edward Cunningham; "Radio Announcing," Louis Roen; "Radio Continuity," Robert Guilbert; "News Broadcasting," Baskett Mose; "Music for Radio," Don Marcotte; "Radio Drama Writing," Bob Murphy; "Advanced Radio Production," Albert Crews; "Radio Program Planning," Richard Loughrin, and "Public Service Broadcasting," Miss Waller.

Creighton Sessions

MUTUAL PROBLEMS of educators and programmers will be discussed in Omaha at Creighton U.'s radio education institute July 12-13. Institute will be held in connection with the school's annual summer session.

Representatives of three major networks are scheduled to speak. They are: Robert W. White, director of ABC Central Division's public service department; E. W. Ziebarth, educational director and production manager of CBS WCCO Minneapolis; and James Mahoney, Mutual's Central Division manager of midwest station relations.

Independent stations will be represented by B. C. Corrigan, general manager of KOWH, Omaha.

Institute is to be under the direction of the Rev. R. C. Williams, S.J., director of radio education at Creighton.

IT WAS ADDED prestige for Mutual Commentator Richard Eaton (seated, right), when the Foreign Minister of Hungary, Janos Gyoengyosy (seated, left), was heard on his program June 12 over WOL Washington. According to Mr. Eaton, this was the first time that a Foreign Minister of Hungary had ever broadcast over the American radio. Attending the broadcast from the Embassy were (standing, 1 to r): Alexander Szasz, economic advisor; Evan Nagy, secretary; Stephan Borsody, counsellor.

ity and drama have been taught at the University since 1941 by Soren Munkhof, news chief of WOW Omaha. At present Mr. Munkhof is preparing a brochure on radio news writing at the invitation of the NAB. It will be published this summer.

KMOX Workshop

MEMBERS of the St. Louis Radio Council and teachers of St. Louis County are attending the June 17-28 radio workshop, sponsored by KMOX, that city.

Classes are being conducted Monday through Friday by KMOX personnel and touch all phases of broadcasting. Curriculum also includes participation in actual broadcasts, tours of KMOX departments at work and attendance at program rehearsals.

Workshop was formally opened June 17 by Wendell Campbell, general manager of KMOX, and Philip J. Hickey, Board of Education.

AUSTIN FENGER, chief of the news and special events department of KSFO San Francisco, has returned from the Pacific following completion of a series of broadcasts covering preparations for the atomic bomb tests.

Radio education has been part of Creighton's curriculum for more than 20 years, starting with its original presentation of *The Creighton University of the Air*, a program that eventually was carried on that area's stations of WOW, KOIL, KBON, KFAB and KOWH. At one time show was under direction of Alumnus Frank Pellegrin, now director of broadcast advertising for the NAB and also holder of a new station construction permit in Oak Ridge, Tenn.

A REAL PROPERTY OF

Four University of Maine students—this year's winners of the WGAN 4-H scholarships—being interviewed over WGAN by Richard Hallet, well-known Maine author.

Typical of radio station WGAN's interest in young people and their education are the four WGAN scholarships offered annually to students who have been or are 4-H Club members and now are enrolled in the University of Maine's College of Agriculture.

The awards are made on the basis of character, scholarship, financial need, and qualities of leadership—in recognition of real achievement in 4-H Club work. The winners are invited to Portland, as guests of WGAN, interviewed over WGAN, taken on a tour of the station, and shown other points of interest in and around Portland.

These scholarships are offered by WGAN to aid in the education of worthy students. And this is just one of the reasons why WGAN has the loyal support of such

FAST, ACCURATE, FIELD-STRENGTH MEASUREMENTS

FOR STANDARD AM BROADCAST FREQUENCIES

with FEDERAL'S FIELD INTENSITY METER

For radio broadcast station engineering consultants, service or field men-

 for measuring radiation patterns of directional antennas

for checking power characteristics of transmitters by radiation measurement

for locating the best area for installation of radio stations or antennas

Federal's compact, light-weight, field intensity meter, Type FTR-101C, is a sturdy and highly accurate instrument—readily portable and quickly set up for operation. It permits precision measurements of field strengths from 20 microvolts to 10 volts per meter, over a frequency range of 200 to 400 and 530 to 7000 kc. Built-in coils, changed by a single control switch, cover the entire range—no plug-in coils are used. To assure more rapid and accurate indications, a vacuum-tube voltmeter is used instead of a thermocouple instrument.

The antenna loop for the broadcast band is built into the cover, and is electrostatically shielded to prevent interference from body capacity. A single control tunes the loop and two oscillators in one operation.

Measurements may be taken from an automobile while it is in motion, by connecting the set to a rod antenna by means of a transmission-line adapter, available on order.

Easy to Carry!

Complete set weighs only 29 pounds, including power pack or light weight batteries. Ready for carrying, set is only 15 inches long, 11 inches high and 9 inches deep.

Easy to Set Up!

Meter can be unpacked, set up, and in service in a matter of seconds. The case is light enough to be mounted on a tripod for easier field operation, and includes a tripod socket for this purpose. It also has rubber feet and can be set on any

Long Road Ahead for Chinese Radio

Country Is Struggling To Restore Its Lost Communications

By BILL COSTELLO

CBS News Director, Far Eastern Division

CHINA may be the biggest news story in the Far East, but months will elapse before American networks can bring their listeners regular reports from correspondents on the scene. Chinese telecommunications were thoroughly wrecked by the Japanese, and it's a long road back.

The present blackout on shortwave voice transmission can't possibly be lifted before July, and it may be November before a reliable signal is available. That's the most optimistic view, and even that may not be realized unless the four major networks get behind present efforts and push.

Only CBS Represented

Right now, CBS is the only American network with a staff correspondent in China. NBC, ABC and MBS are represented by stringers who are seldom scheduled for pickups. In effect, radio has abandoned the field despite the paramount importance of Chinese developments in world politics; and the only apparent reason is that technical facilities are lacking.

Several months ago, Lieut. Gen. Albert Wedemeyer tried to relieve the situation by authorizing correspondents to use a small Army transmitter with a rated output of 3 kw. Actually this station, WLXJ, operates at about 11/2 kw, using Navy station KU5Q at Guam as a relay to San Francisco, and all the goodwill in the world on the part of Army technicians has not produced a good signal.

The Chinese Government assumes full responsibility for the news blackout because radio Chinese law makes all point-topoint communication a government monopoly and specifically prohibits foreigners from operating trans-

mitters. Even commercial traffic via RCA, Mackay, Press Wireless and Globe Wireless is handled through the Chinese Government Radio Administration (CGRA), the monopoly agency which operates as a branch of the Ministry of Communications.

The only overseas outlet from Shanghai last September was a 1000 w telegraphic transmitter with a maximum speed of 50 words a minute.

Since then the director of the Shanghai office, American-educated T. C. Loo, has been able to put several more slow-speed telegraphic circuits in operation, and has completely rebuilt a miscellany of parts to obtain his first highspeed transmitter.

Technicians Not at Fault

The fault does not lie with technicians in charge of the Shanghai office. They have shown both competence and ingenuity, and they have made a very creditable showing in moving press copy.

During May, this correspondent conferred with Chinese officials at all levels of authority in both Shanghai and Nanking. Their attitude has been sympathetic, and during the month a series of remedial steps were taken.

Signs of improvement begin to appear shortly after May 7 when the Shanghai Evening Post and Mercury published an interview with me saying: "It is an embarrassing fact that China is steadily losing prestige in the radio world. China is a permanent member of the United Nations Security Council; it is universally recognized as a major power; it is entitled to a prominent place in radio. Yet there are a number of nearby smaller nations offering better short-wave transmitting facilities. Even the defeated Japanese have retained a station in Tokyo which is superior to any in the Far East . . . The CBS news organization will necessarily have to operate in those countries where it has access to reliable technical facilities."

The following day the Shanghai Post warned editorially against the danger of stifling radio's voice, and said: "The decadent trend in China's radio should be instantly reversed. Instead of losing even her present poor position in the world of radio, China should without delay improve her transmission facilities and take a vigorious position of leadership in Far East radio as in all else."

a new 15 kw single sideband telephone transmitter from the Western Electric Co. This equipment, which is modern and highly efficient, may arrive in Shanghai by September with a factory expert to supervise installation and four factory-trained Chinese to maintain and operate it.

Two More Transmitters

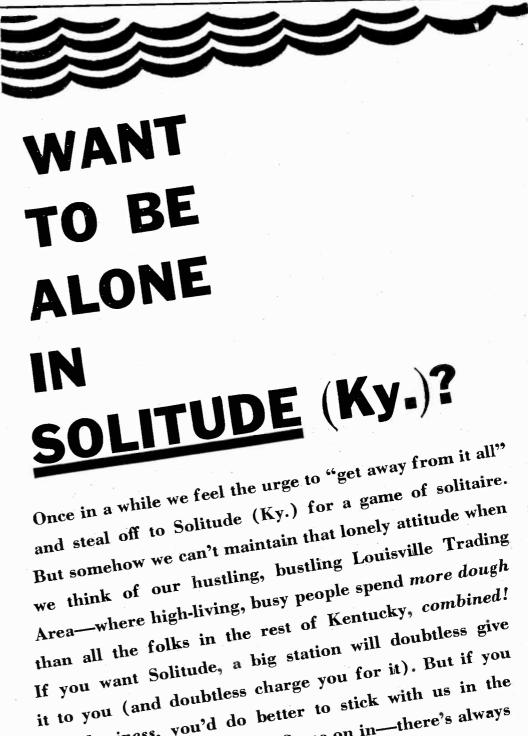

3. The Ministry has instructed its purchasing commission in Washington to negotiate for the purchase of two other voice transmitters of greater power.

4. Requests have been filed with the surplus property commission in Washington for the purchase of 300 smaller transmitters which are intended for use in the creation of a domestic communications network.

5. The Ministry of Communications has promised to expedite the construction of new directional antenna.

In addition, an UNRRA representative has been making a nationwide survey of pre-war telecommunications facilities and an estimate of rehabilitation costs.

In response to complaints, the (Continued on page 84)

want business, you'd do better to stick with us in the smoke and noise and traffic. Come on in—there's always

room for one more!

ILLE'S

"Let's see—I was listening to WFDF Flint—then I heard some static—"

Latest Developments

Since then, the following developments have occurred:

1. The Shanghai shops of CGRA have been ordered to rebuild from salvaged parts a 71/2 kw voice transmitter which may be available for overseas news broadcast some time in July.

2. The Ministry of Communications has approved the purchase of

FM Executive Committee of NAB Calls For Meeting in New York on June 25

RECENT surge of developments important to the future of FM is responsible for a meeting called for June 25 by Walter J. Damm, WTMJ Milwaukee, chairman of the FM Executive Committee of the NAB. Committee will meet at the Ambassador Hotel, New York, at 2 p.m. Last meeting was held May 8 during the four-day NAB board session.

Representing NAB headquarters at the meeting will be A. D. Willard Jr., executive vice president, and Robert T. Bartley, director of the FM Dept.

Of first interest is the FCC's proposed order reserving for a year every fifth FM channel under the tentative allocation plan for various areas [BROADCASTING, June 10]. Oral argument is scheduled July 12. A number of committee members have expressed concern over the order, asking clarification of its provisions and its effect on FM.

FCC's proposed order opening the 920-940 mc band for studio-totransmitter links will be discussed at the meeting. Announced a fortnight ago [BROADCASTING, June 10], the order involves equipment problems apparently not foreseen by the FCC, according to committee members. They observe that only one manufacturer has expressed ability to produce equipment operating on the band. A number of stations are operating with temporary grants on other frequencies. Possible use of even higher bands for transmitter links will be discussed. Feeling of Comr. Clifford J. Durr, of the FCC, that a cut-off date on common ownership of AM and FM stations serving the same general area [BROADCASTING, June 17] should be established is certain to come up for discussion by the committee, though it is recognized that the idea is still in the "gleam" stage.

discussion of the music problem and the effects of Petrillo's ban on FM pickups from AM stations. This question is handled by the Industry Music Commitee.

Members of the FM Executive Committee, besides Mr. Damm, are Wayne Coy, W3XO Washington (WINX); Gordon Gray, WMIT Winston-Salem (WSJS); Leslie C. Johnson, WHBF Rock Island; Paul W. Morency, WTIC Hartford; John Shepard 3d, WMTW Boston; Frank Stanton, CBS New York.

JOSEPH McCORMICK, released from the Navy as lieutenant commander, has joined WSNJ Bridgeton, N. J., and is supervising construction of new FM operations for station.

CARSON PINKLEY, former engineer of KGW Portland, Ore., and KDB Santa Barbara, has joined KCMJ Palm Springs, Calif., in similar capacity.

GLEN LOVE has been appointed chief engineer of CFNB Fredericton, N. B., replacing STAN CASSIDY, who resigned to open a radio shop. DON McDONALD has joined the transmitter staff of CKMO Vancouver, B. C.

HELEN OBSHARSKY, member of the WCAE Pittsburgh technical staff during the war, has rejoined staff for summer months.

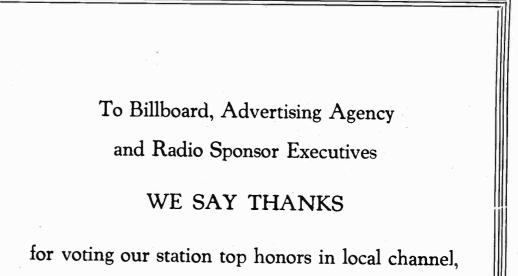

EUGENE C. PHILLIPPI, released from the Navy after service in the Pacific, has returned to KDYL Salt Lake City as control room engineer. An electrical technician mate first class, he helped engineer broadcast of first B-29 raid on Japan.

FRED AIKEN, control room technician at KOIN Portland, Ore., and **JEANNE SHEPARD**, KOIN violinist, were married June 4.

CAMERON G. PIERCE, district electronic and radio engineer of General Electric Co., has been assigned instructor of television course to be given by U. of California Extension Division in Los Angeles, starting June 24

Los Angeles, starting June 24. FEDERAL TELEPHONE AND RADIO Corp., Newark, N. J., has announced complete line of weather resisting, easily installed polyethylene insulated twin conductor FM and television leadin transmission lines, of 100, 200, and 300 ohm characteristic impedence. Leads have wide applications in amateur and home receiver fields.

CLARKE INSTRUMENT Corp., Washington, D. C., is producing complete equipment for adapting Esterline-Angus recorders for mobile recording of field intensity in making proof of performance measurements required for FM stations. Equipment consists of Type 101 speedometer tee, Type 102 recorder drive mechanism and all interconnecting cables.

VACTION return this month of Lucille Ball to her native Jamestown, N. Y. has been occasion for celebra-

tion and mutual promotion contest sponsored by WJTN Jamestown and Bigelow's, local department store. Special events broadcasts and appearances on Bigelow's three regular programs on WJTN were arranged. Contest, open only to girls 16 to 24, centered on theme "What I would like to do if I could spend a day in New York with Lucille Ball." Winner received all-expense trip with chaperon or husband to New York plus complete wardrobe. Metro-Gold-wyn-Mayer representative assisted in activities.

NBC Is Host THREE of NBC's General Mills Hour programs, "Guiding Light," "Today's Children" and "Woman In White," June 20 were presented before their first studio audience of the year dur-ing national convention of the General Federation of Women's Clubs in Chicago. Following the broadcasts, attended by 400 delegates of the women's tended by 400 delegates of the women's clubs at NBC studios in the Merchan-dise Mart, talks were presented by Irna Phillips, author of the programs; Carl Wester, producer; I. E. (Chick) Showerman, manager of the NBC Cen-tral Division, and Mrs. John J. Jen-nings, radio director of the Illinois Federation of Women's Clubs. The Grenadiers Day MORE than 12 000 boys and girls were

The Grenadiers Day MORE than 12,000 boys and girls were guests June 8 of WTMJ Milwaukee at free picnic and outing at State Fair Park, celebrating more than 14 years of broadcasting by station talent group, The Grenadiers Erec rides and refresh The Grenadiers. Free rides and refresh-

ments were provided. KCMO Letters TO FURTHER introduce "Mid America" character of KCMO Kansas City, station has mailed 5,000 letters with reprints of Mid-America attached.

Paper Tie-up

MUTUAL promotion tieup has been arranged between KFWB Hollywood and

San Fernando Valley Times whereby station gets newspaper advertising space and cooperative editorial aid. Station gives Al Rich, paper's radio editor, Saturday half hour for interview format with Valley celebrity residents.

Name Contest WINNING name in the contest con-ducted by ABC Central Division for its ducted by ABC Central Division for its juvenile program, formerly titled "Teen Town," is "Junior Junction." Title was submitted by Gertrude Hayes, Jersey City, N. J., who wins \$50 savings bond. Program is aired Sat. 9:30-10 a.m. (CDT).

Double Winners DUAL winners were named this year in WLW Cincinnati \$1,000 scholarship awarded by the College of Music of Cincinnati. Each granted a \$1,000 scholarship, Betty Lee Goetz of Cincinnati, dramatic soprano, and Virginia Howe of Dayton, Ohio, coloratura so-prano, will study at the college during 1946-47 school year.

Photos for Participants PHOTOGRAPH made of passerby ap-pearing on WEAF New York "You're on the Spot" street interview program is being mailed by the station to each person who participates in four-weekly early afternoon program early afternoon program.

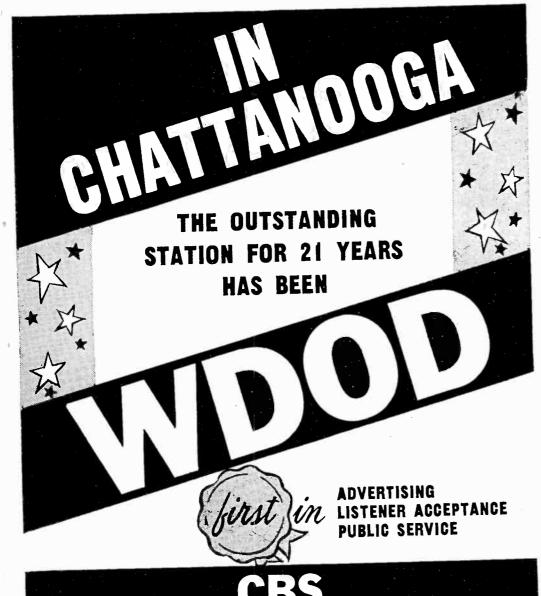

CKWX Open House

DURING Vancouver's Diamond Jubilee celebration the first two weeks of July, CKWX Vancouver will hold open house every afternoon for the public. Visitors will be taken on tours of the station and will be given a descriptive booklet, "Open House at Vancouver's CKWX."

KSAN Folder GREEN and white folder on the popularity of horse race programs and news presented by KSAN San Francisco has been distributed by the station. KSAN slogan of "85 listeners for a nickle;" climaxes copy theme.

Fire Sticks

BOSTON agency timebuyers last week

received from WCOP Boston fire magic sticks in colorful boxes which bore sticks in coloridi boxes which bore legend, "For a sales blaze place your radio advertising on Boston's new 5000 watt station, WCOP."

WPAG Reprint

REPRINT of full page ad run in local paper by WPAG Ann Arbor, Mich., on occasion of station's first anniversary has been distributed by WPAG as promotion piece. Review of service and awards is presented.

Ready for tour, ex-Colonei Schechter (c) gives last orders to ex-Sergeants Berns (l) and Raidt.

IT WAS almost like the old days last week when A. A. Schechter, onetime Army lieutenant colonel and now Mutual vice president in charge of news and special events, sent Bill Berns and Bill Raidt, both former sergeants under his command, on a jeep reconnaisance.

A year and a half ago he had sent them down the road to Manila when the residents of that city were not so friendly as the populations whom they would meet this time could be expected to be. Pair were starting on a cross-country reconnaisance to find out how veterans are faring in business.

Messrs. Berns and Raidt, who during the war were assigned to the then Colonel Schechter's radio section of General MacArthur's headquarters, will broadcast weekly reports Sat. 4:45-5 p.m., called Opportunity U. S. A. over Mutual. Pageant magazine also will carry stories of their tour.

Brown KGAK Manager; Day Promoted at KOA WILLIAM R. DAY has been named director of news and special events of KOA Denver, succeeding Stanley K. Brown, who resigned June 15 to become station manager of KGAK, new Gallup, N. M. 250 w outlet. Mr. Day previously was assistant director of news and special events.

In a further expansion move, Announcer William Ballance has been transferred to the news staff and George McWilliams, recently a member of the International News Service San Francisco bureau, has been added to the news department. Victor Blanks, released from the armed forces after three years' service, has rejoined the KOA announcing staff.

Video Equipment For Star by 1947 Washington Television Setup Ready by Year's End

TRANSMITTING equipment for the Washington television station to be operated by Evening Star Broadcasting Co. (WMAL) will be delivered by the end of the year, according to Kenneth H. Berkeley, WMAL general manager. Contract for the transmitter has been signed with RCA, represented by P. B. Reed, in charge of broadcasting and television sales for the RCA Washington office.

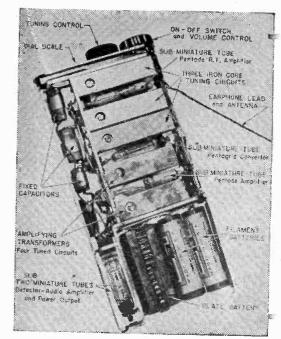

Contract covers 5 kw TT5A transmitter with 5 kw video and 2½ kw aural output; three image orthicon cameras and associated control consoles and audio equipment; specially designed mobile truck equipped with high-frequency relay equipment suitable for remotes or studio-transmitter link; TF6A RCA superturnstile television antenna. Decision has not been made on use of wire or air link. Cost of RCA equipment is understood to be about \$180,000.

Transmitter will be installed on the 75-acre campus of American U. at the intersection of Massachusetts and Nebraska Ave. in Northwest Washington. Cement-limestone building is to be constructed by WMAL. Architecture will be in keeping with the classic lines of the university buildings.

RCA will deliver one set of image orthicon camera and associated control equipment in early October, permitting WMAL to train its staff before other equipment is installed in January.

WMAL will apply to the D. C. Zoning Commission for approval of a 40-foot tower. The site is 360 feet above the surrounding terrain.

(WRC) recently was NBC granted approval by Civilian Production Administration for a \$15,-000 television building project at the Wardman Park Hotel in Washington. Project will provide necessary facilities for installation of a television transmitter. NBC will have studios in the hotel, with a 350-foot tower planned. Bamberger Broadcasting Service (WOR) plans a 400-foot tower at 40th & Brandywine, N.W. but is involved in a dispute with nearby residents despite approval of zoning officials. The residents are sponsoring legislation in Congress to prevent erection of radio towers in residential areas. DuMont operates an experimental television station (W3XWT) atop the Harrington Hotel, Washington.

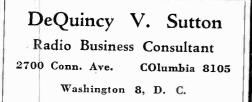

SIDE VIEW of the tiny five-tube superheterodyne receiver manufactured by Belmont Radio Corp. of Chicago. Weighing a total of 10 ounces, the set dimensions are three inches wide, ¾ inch thick and 6¼ inches high. Compactness is possible through development by Raytheon Mfg. Co. of sub-miniature tubes that weigh between .07 and .09 ounces and measure only 1 9/16 inches by .4 inches by .3 inch—approximately the crosssectional area of a cigarette.

WOMEN'S PROGRAM SUBJECTS DISCUSSED

PROGRAM topics of women broadcasters run the gamut from prenatal care to funeral services it was brought out at the second annual conference held by the New England group of NAB's Assn. of Women Directors, held June 15-16 at Hotel Wentworth-by-the-Sea, Portsmouth, N. H.

Eighty-seven women from the six New England states attended, along with Gov. Charles M. Dale of New Hampshire, Mayor Mary Dondero of Portsmouth, Dorothy Lewis, AWD national president; Margaret Cuthbert, NBC; Frances Farmer Wilder, CBS.

Elisabeth May Craig, Washington correspondent for Gannett papers, told the group that opportunities for service by women in radio were limited only by their desire to serve. Nicholas G. Trayfors, UNRRA director for Thessaly, Greece, described famine conditions in that country. Other speakers included Arthur T. Brush, advertising director of WFEA Manchester, N. H.; Carl Moore, WEEI Boston, and Bill Bradley, WHEB Portsmouth. Mr. Brush, speaking at the dinner meeting, complimented the members on the workmanlike way they handle their programs and termed them radio's best sellers.

(Continued on page 85)

Handsomely styled and ruggedly built for long hard service. Sloping front panels combine maximum visibility of controls with ease of operation. Strong steel-core handles snap flat when not in use.

TASY TO SET UP

FAST TO GET GOING

1-Channel and 3-Channel

These Remote Amplifiers by Raytheon get a program "on the air" in a hurry. Operators prefer them because they are light weight and easy to carry, easy to set up, simple to operate and ruggedly dependable.

Strikingly beautiful steel cabinets with sloping front panels, finished in durable two tone tan baked enamel. You will be proud to have them represent your station at remote pick-ups. Remember, more people see your remote equipment than your studio—and value your station accordingly.

Both models have the same electrical characteristics and equal or exceed all FCC requirements for FM transmission. Distortion is less than 1½% from 50 to 200 cycles and less than 1% from 200 to 15,000 cycles. Noise level of 60 DB or better. Frequency response 30 to 15,000 cycles. High overall gain of 86 DB permits use with high fidelity microphones. Finest quality Weston VU Meters with 4-in. illuminated dials are the same as those used in high fidelity studio equipment. This permits the remote operator to properly "ride the gain" at the source and all standard studio meters of network stations will show identical readings. We can deliver immediately. WRITE TODAY for information and prices.

The one channel model is entirely self contained with built-in power supply. Furnished either with or without 4" Weston VU Meter. Not supplied with a carrying case. Weighs only 20 lbs.

Entire chassis of both amplifiers and power supply instantly slides out of cabinets by merely turning four air lock screws on front panels. Provides complete accessibility to all components and wiring for emergency servicing. Supplied with either Cannon or Hubbell plugs.

Chinese Radio

(Continued from page 77)

Minister of Information, Dr. Peng Hsueh-pei, and the Minister of Communications, Gen. Yu Ta-wei, invited this correspondent to submit a memorandum outlining the needs of foreign correspondents, together with recommendations for the development of the necessary facilities. The following proposals were submitted to them May 24:

(a) CGRA should operate at least one 50 kw station or its equivalent in Shanghai, along with two or three secondary stations of less power in other major cities.

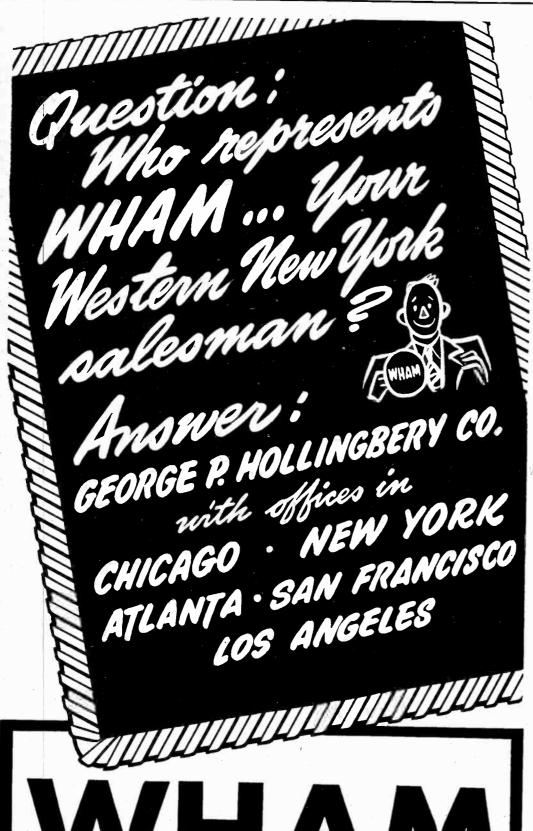

(b) Nanking, if it does not have

its own transmitter, should be connected with the Shanghai transmitter by a Class-A telephone circuit.

(c) In the development of lowpowered short-wave radio communications for domestic traffic, provision should be made for voice transmission which could be relayed through Shanghai to the U.S.

(d) Since foreign correspondents must broadcast at times fixed by network schedules in the United States, there should be an explicit regulation giving correspondents a No. 1 priority for time over all CGRA short-wave facilities.

In support of these recommendations, the memorandum pointed out

that network program supervisors will not order pickups unless signals from overseas are of high quality. For that reason, China needs at least one transmitter capable of competing with the best signals in the Far East. The ministries were especially impressed by the fact that radio news reports reach and mold the opinions of some 40 million American listeners. The memorandum concluded: "Radio may not appear to be the most conspicuous and urgent need of the moment in China, but from the point of view of world politics, its value can hardly be over-estimated."

Chinese officials admit frankly that, if their communications are to be modernized, it must be with American funds and equipment. China itself has no electrical industry capable of producing precision goods of this type.

Fear Restrictions

The fear among Americans is that, as soon as the Chinese get the equipment they want, they will impose so many restrictions on its use that foreigners will find it inaccessible.

Radio and newspaper correspondents are already protesting against a regulation effective July 1 providing they must obtain travel permits every time they move from one city to another. No such restriction is placed on the movement of Chinese correspondents in the United States. In addition, correspondents are required to obtain a certificate of registration and a special passport in order to be able to file copy.

The freedom of correspondents is also endangered by a new regulation giving police constables the right to search private homes at their own discretion and without a warrant. It is easy to see the abuses to which newsmen and their families might be exposed if their dispatches from Shanghai should displease someone in authority.

American correspondents in China will need the full support of their networks if they are to obtain, first, suitable technical facilities and, second, freedom from restrictions which may make their

PRESENTATION of the Exceptional Civilian Award was made June 14 to Carl E. Smith (r), vice president of the United Broadcasting Co. in charge of engineering [BROADCASTING, June 17]. Making the official award was Brig. Gen. C. H. Arnold, chief of the Office of Procurement & Distribution, who flew from Washington for the brief ceremony in the studios of WHK. UBC's station in Cleveland. Mr. Smith was requested by the War Dept. in 1942 and served in secret work as assistant director of the operational research staff

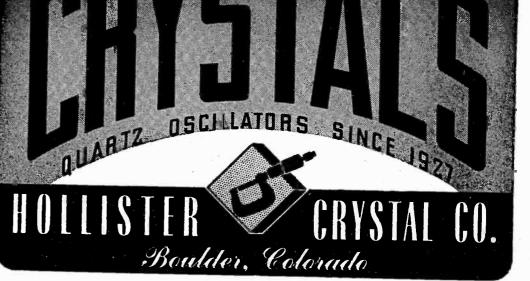

WJR Choral Clinic

TO DISCOVER new voices and stimulate choral singing in Detroit, WJR Detroit is sponsoring a Summer Choral Clinic. Classes, which are under the direction of Don Large and John McKenzie, meet twice weekly. Supplementing choral training provided in that city's public schools, clinic is open to high school students with good voices in all ranges and who have musical talent and reading ability. Instruction, which includes radio choral music and microphone technique, is given without charge.

work difficult or impossible. Unless the Chinese Government proves more cooperative than it has been thus far, the news capital of the Orient may shift from Shanghai to the rapidly reviving British crown colony at Hongkong.

WINS

(Continued from page 20)

bidding for a government project Mr. Hearst could prosecute the agreement but that if Crosley were called upon by the government to produce equipment for a special need and did so as a matter of cooperation, that would be another thing.

At this point, Comr. Wakefield suggested the parties prepare a new contract which would cover the questions raised. Mr. Dempsey said he would accede to the request to put everything in one document.

Plans for WINS

When the hearing resumed Thursday morning, the Commission inquired into Crosley's programming plans for WINS. The proposed decision also objected to sale of the station on the ground the purchase price would necessitate a high percentage of commercialization to realize a return on the investment.

Mr. Shouse said Crosley would do very well if at the end of the first year the station would be twothirds commercial, if at the end of the second year it would be 75%commercial, and if at the end of the third year it would be 80%commercial.

Questioned as to the interest in the Crosley radio operations of Aviation Corp. (Avco), which purchased the Crosley radio and manufacturing interests, Mr. Shouse said he had seen Irving Babcock, president of Avco, more than 20 times since the acquisition, and Victor Emanuel, Avco board chairman, six or seven times. He said both were "sincerely interested" in radio.

Comr. Durr then questioned Mr. Shouse about his speech in Estes Park, Col., before the National Editorial Assn. convention in which he urged publishers to be cautious before investing in FM [BROAD-CASTING, June 17].

Mr. Shouse said he thought FM would be competitive to AM broadcasting in New York in three years. "But I have serious doubts," he added, "that FM will ever replace AM broadcasting."

To further questioning, he said: "To the extent that the noise level is high, I think FM will go faster in New York than in other cities." In view of his attitude toward

SAVORY AVERY might well be the nickname of this future pork roast being presented Lew Avery (r), head of Lewis H. Avery Inc., national representatives of KMA Shenandoah, Iowa. Mr. Avery, to acquaint himself with KMA's primary area, spent a full day at a typical farm near Norwich, Iowa. Here Farm Owner Kenneth Miller presents a weiner pig, named "Avery" to his guest.

ule, he said \$550,000. He expected about \$700,000 from a 75% commercial schedule and \$950,000 from an 80% schedule. He said WINS now has revenues of \$583,000 from a two-thirds commercial schedule.

Vernon Wilkinson, FCC assistant general counsel, observed that it would be necessary for Crosley to double the present WINS rate to reach a sales figure of \$1,250,000 projected by Crosley for the station. Mr. Wilkinson asked how Crosley could double the rate in view of the falling off in advertising and the coming competition from FM stations.

Mr. Shouse thought Crosley could double the rate in five years.

Replying to a question by Comr. Jett as to the basis for his statement regarding FM, Mr. Shouse said: "It may be that I'm unduly prejudiced against FM because of my long association with WLW and the kind of a job we've been trying to do." However, he said, television was a factor in his attitude toward FM.

"I think television will push FM all around the board," he said.

He added that the so-called FM receivers sold before the war will act as a "psychological deterrent" to FM.

"Do you like high fidelity?"

asked Comr. Jett.

"No, I don't," he said. Comr. Jett said he had listened to "some very good high fidelity sets" in the last few weeks and asked whether Mr. Shouse had also listened to them.

Mr. Shouse said he hadn't listened to any of these sets.

Comr. Jett told Mr. Shouse he was due for "a big surprise" when he hears the new FM sets for automobiles as compared with the old AM sets.

"You haven't exposed yourself to the advantages of FM," said Chairman Denny, concluding the hearing.

WROK Gets 1st Prize In Schutter Promotion

WROK Rockford, Ill., managed by Walter M. Koessler, was awarded first prize in a nationwide contest for promotion and publicity of a sponsor's product by Schutter Candy Co., St. Louis, sponsor of *Counterspy* on ABC (Sunday, 4:30-5 p. m. CDT). Announcements by Schwimmer & Scott, Chicago agency, said WROK's award was based on originality and effectiveness of promotion and publicity and extended coverage with relative size of station considered.

The award carries a \$350 cash prize, plus a bronze plaque and certificate of merit. Promotion director of WROK is William Traum. Second prize of \$150 was awarded to WOWO Fort Wayne, Ind., Hilda Woehrmeyer, promotion director, and third prize of \$75 went to WGAC Augusta, Ga., with J. B. Fuqua promotion director. Additional prizes of \$25 each and certificates of merit were awarded to KXEL, WAYS, WSAZ, WMAN, WDEF, WHKY, KGFF, KABA, KOME, WFDF, KTOK, WSGN, WING, KCMO, WLOF, WISH, WREN. All are affiliated with ABC.

Three to Walker

THE WALKER Co., Chicago, has been appointed national representative for WTVM E. St. Louis, Ill., and WOSH Oshkosh, Wis., both owned by Myles H. Johns. Walker also was appointed to represent WRJN Racine, Wis.

FM, why was Crosley applying for an FM outlet in Columbus, where it has no AM station, Comr. Durr asked.

To Supplement WLW

Mr. Shouse said the service is planned to supplement WLW coverage and to help retain the Columbus market. He said he did not foresee appreciable profits from an FM station in Columbus for some time.

Asked by Comr. Durr what revenues he would expect from WINS on a two-thirds commercial sched-

5000 WATTS

Shortwave

(Continued from page 20)

direct or implied, but simply pointed out to Messrs. Shapley and Lemmon that a regulation was issued by the FCC whereby all shortwave licenses terminate June 30 or on the termination of contracts with the State Dept.

A State Dept. spokesman said, after reading the testimony of last Monday's closed session, that the Department had offered to cooperate with Mr. Lemmon by broadcasting World Radio University programs in conjunction with Government programs "if they met with our approval and fitted into our plans." He said that State Dept. now broadcasts a quarterhour weekly prepared by World Wide, a program called Beyond Victory, designed for Latin America and the Far East.

Members of the subcommittee, both Democrats and Republicans, criticized the State Dept. and FCC after hearing testimony of World Wide officials, although they agreed the Appropriations Committee had no jurisdiction over the FCC.

Sees No Authority

"My own view is that there is no legal authority whatsoever for the action the State Dept. is taking," said Senator White. He added it was "perfectly clear" from testimony of William B. Benton, Assistant Secretary of State, and a letter to Mr. Benton from Charles R. Denny Jr., acting FCC chairman, that "there is a very grave question in their own minds as to the authority for what they are doing."

Mr. Denny's letter, inserted in the hearing record by Mr. Benton, said, in part: "If Congress does not provide for the continued State Dept. operation beyond June 30 (of shortwave) then this Commission would on that date be confronted with the question of whether it should authorize a resumption of shortwave broadcast operations by the seven private corporations which were licensed prior to our entry into the war and whether additional private operations should be authorized."

Sen. Pat McCarran (D-Nev.),

OPERATING schedule of KFBK Sacramento, Calif., was threatened June 15 when a 5 a.m. fire almost completely destroyed the master control room. However, quick work by the fire department in extinguishing the blaze in 30 minutes and feverish patchwork by Norman D. Webster, technical director of the Mc-Clatchy Broadcasting Co., and KFBK Chief Engineer Stam Sronce, enabled the station to go on the air at 6:30 a.m., just 30 minutes past the usual sign on time.

subcommittee chairman; Sen. C. Wayland Brooks (R-Ill.) and Sen. Joseph Ball (R.-Minn.) echoed criticism of the State Dept. in seeking to continue control of shortwave operations in the absence of authorizing legislation.

An amendment proposed by Senator Ball was adopted by the committee as follows: "except that funds herein appropriated shall not be used to purchase more than 75 per centum of the effective daily broadcasting time from any person or corporation holding an international shortwave broadcasting license from the FCC without the consent of such licensee."

In its report on the overall appropriations bill the Senate Appropriations Committee said it had been advised by the State Dept. that unless the \$9,284,778 cut by the House is restored, the Government would have to eliminate shortwave broadcasting in its entirety. The committee said it felt that shortwave broadcasting should be continued.

Committee Concerned

"The committee is concerned about the type of information to be disseminated and expresses the hope that the Department will use every possible means to screen the programs," said the report.

The Senate committee also recommended that a \$4,150,326 appropriation for the State Dept.'s intelligence section, eliminated by

the House, be restored.

Mr. Benton had testified that of the \$19,284,778 appropriation requested, \$8,600,000 was earmarked for international shortwave broadcasting. He said: "It is unequivocably my feeling that the Federal Government should operate for the next year" when Senator McCarran asked if shortwave broadcasting should be "entirely controlled by the Federal Government."

Mr. Benton added that it was his opinion and that of Secretary Byrnes that "the long-range operation of international broadcasting should be taken out of the State Department."

Dr. Shapley testified that the Government now controls "something like a score of shortwave outlets," many of which are used "mostly for broadcasting time-filling recorded musical programs."

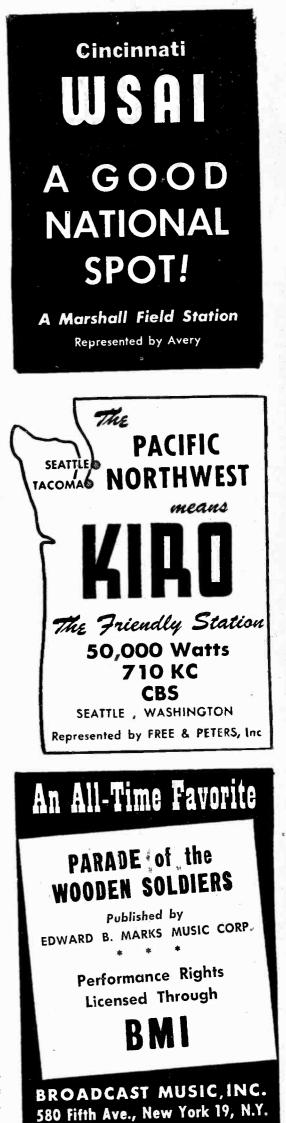

Mr. Benton inserted in the hearing record letters from Brig. Gen. David Sarnoff, president of RCA and NBC board chairman; Dr. Frank Stanton, president, CBS; Philip Reed, chairman, General Electric Co.; James D. Shouse, vice president in charge of broadcasting, the Crosley Corp., as well as the letter from Mr. Denny and one from Paul A. Porter, OPA Administrator, former FCC chairman.

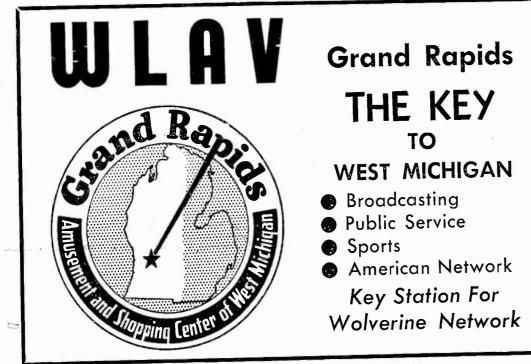

Sarnoff Comment

General Sarnoff wrote: "It does not seem that international broadcasting with all its national and international implications, constitutes a field for private competition, or even if it did, that it represents a field with adequate commercial revenue to provide the very large sums needed to render a public service of genuine world magnitude."

Dr. Stanton urged continuation of the present setup pending final determination of the status of international shortwave broadcasting, but said: "CBS believes that democratic shortwave international broadcasting is important to the U. S. in its world relations."

Mr. Reed said he believed that operation of shortwave "should be in private rather than in governmental hands" but because of the economics involved, he asserted: "In my judgment it would be a great mistake to discontinue the present foreign broadcasting activities ending careful study of the entire problem and adoption of a per-

manent plan."

Mr. Shouse wrote that Crosley believes the present setup should he continued. "I feel it extremely difficult to believe that private industry can, at the present time, assume the terrific operating loss which would ensue if international broadcasting were to be turned back to private industry."

Mr. Benton said: "This is why we cannot turn shortwave broadcasting back without money to these private operators. They will not put up enough money, and should not, to do the needed job."

(Continued from page 18)

lar monthly meeting of the local June 10 Mr. Rosenberg was booed from the meeting room at union headquarters. Addressing a regular meeting he was asked to give an informal report on the recent National Convention held in Florida. Mr. Rosenberg answered the questioner, Aaron Levine, an ex-G.I., in the Broadway patois, "Why don't you drop dead?" and he stalked from the room amid the boos and catcalls of aroused members.

Nor was the schism cemented to any degree when Mr. Rosenberg seconded a motion made at the National Convention of the AFM to repeal the international union bylaw allowing symphony musicians to hold their own intra-union caucuses. Mr. Rosenberg, seconding the motion, said the caucuses were the prey of "poisonous" influences.

Mr. Fleisig assailed this move as taking all democratic union rights from the members and centering all power in the hands of local leaders. "These local gauleiters will have complete control of all contracts, and members will have no recourse for question," he said.

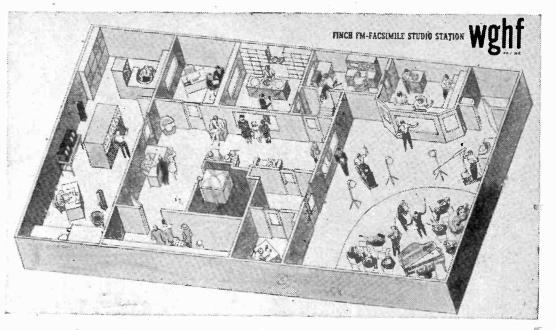

Petrillo Also Hit

Mr. Petrillo, high man on the AFM totem, comes in for his share of abuse from the dissenters also. The opinions voiced by these rankand-file members seem at odds with the accolades he received from the supposedly-representative delegates attending the National Convention.

The trial, coming nearly two years after the alleged irregularities, was something less than an anti-climax. It all began back in 1942, when a man named George Abrams, claiming that he was the representative of The Honest Balloting Assn., received several checks for running an election for the local. He did this although The Honest Balloting group has no provision in its constitution allowing such practice. It has been in the past interested primarily in civic elections.

In the 26 page complaint originally lodged by the 19 plaintiffs, there were allegations that perhaps Mr. Abrams had been a little less than diligent in his handling of the election. These allegations were

WGHF'S FM-FAX STUDIOS Finch Commercial FM Operation Started Saturday from Modern Quarters-

Overall view of the new WGHF FM-facsimile studios.

WGHF, New York's newest and modern FM station, went on the air officially and commercially last Saturday afternoon, 2 p.m. Station, owned and operated by Capt. W. G. H. Finch, USNR, operates on 99.7 mc with an area coverage of 8500 sq. mi.

WGHF currently is on a daily 2 to 5 p. m., 6 to 9 p. m. schedule. "Fine music, symphonies and emphasis on the classics will be the basic formula," said Capt. Finch. "Yet time will be divided between programs for special events, news and programs of interest to the public."

He also disclosed that WGHF will continue to regularly transmit facsimile of news, box scores and other printed material, better known as "Air Press." Latest in UP news is used for the fax, eight minutes being required for the transmission of a four-page paper, each page measuring 81/2 by 11 inches.

In commenting on the opening of WGHM, Acting Chairman Charles R. Denny, Jr., of the FCC said: "Please accept my best wishes upon the occasion of your inaugurating a

Carlton B. Short

CARLTON B. SHORT, 57, general manager of Times-World Corp., Roanoke, Va., to which WDBJ is licensed, died June 14 in his room at the Sheraton Hotel, Washington. Death was due to a heart attack. Mr. Short had been in Washington for a conference with OPA officials. He had been suffering for some months with a heart ailment. He was president of the Southern Newspaper Publishers Assn.

commercial frequency modulation broadcast service in New York City. The FM service which you and the other FM licensees throughout the United States will provide, represents from a technical standpoint the finest aural broadcasting which is obtainable in the present state of the radio art.

"I am sure that this new high fidelity and static free broadcast service is destined to have the widest public acceptance. Also the experiments which you and other licensees are about to undertake in the broadcast transmission of facsimile will no doubt play an important part in the development of that new art. I wish you success in, both of these undertakings."

Capt. Finch, famous as a communications expert and facsimile inventor and head of Finch Telecommunication Inc., first applied to the FCC for an experimental FM license in the fall of 1938. Granted with the call letters, W2XBF, he installed a 1 kw transmitter at 1819 Broadway in New York. In 1941 after receiving one of the original FM construction permits to operate in the then newly-created FM band, he began construction of WGHF atop 10 East 40th St., its present location.

Currently operating with power output of 1 kw, plans are under way for the installation of a 10 kw transmitter which has been on order and is expected to be delivered

BASIC AMERICAN NETWORK (Pacific Coast) SAN DIEGO, GALIF. Owned and Managed by JACK GROSS Represented by the BRANHAM CO.

Page 90 • June 24, 1946

dropped and never came up in the trial.

During the trial, plaintiff's counsel unsuccessfully attempted to draw from Harry Suber, local treasurer, that Mr. Abrams had received his payment before the election. But before the trial could really get under way a settlement was reached whereby the present incumbents promised to allow three prominent, disinterested citizens to establish rules for the election, and to allow The Honest Balloting Assn., which has undertaken to modify its constitution to allow

overseeing of union elections, to run the Dec. 5 balloting.

Settled for the moment though the present case might be, the sounds of discord lingered. It seemed a sure bet that Maestro Petrillo would have to swing a heavy baton if he would have Local 802 playing his old, sweet song in harmony by Dec. 5.

Granik Files APPLICATION for a 5 kw daytime station on 890 kc, a clear channel shared by WLS-WENR Chicago, was filed in Washington last week by Theodore Granik, director of the American Forum of the Air. Mr. Granik has received a grant for a metropolitan FM station under a proposed decision by the FCC. Chesapeake Broadcasting Co., which would be denied an FM grant under the Commission decision, has also applied for a 5 kw daytime on 890 kc.

Washington TV

(Continued from page 16)

a report to the head of his organization.

"That's communication of intelligence; that's journalism," he said, "and I'm going to tell Mr. B— so."

Among the dignitaries attending the Statler party were Supreme Court Justice Frank Murphy, Secretary of Commerce Henry A. Wallace, Secretary of the Navy James Forrestal, and the new Secretary of the Treasury John Snyder. Commissioners Denny, Jett, Walker and Wakefield were there with most of the FCC's department heads. The 400 members of Congress present represented practically all of the legislature remaining in town.

Various Types

The 21 receiving sets installed at the Statler, begged, borrowed and otherwise procured by Vice President Russell and his assistant, Gladys Murphy Borras, included both projection and direct viewing receivers, all prewar except eight postwar projection models. The direct viewing sets had an eleveninch by eight-inch screen, the projection, a twenty-two by eleven screen.

The Du Mont party was at the office of Roberts and McInnis, Washington law firm representing Allen B. Du Mont Laboratories and Television Broadcasters Association. Some of the comments heard from among the audience of 75:

MEN—"What's all this fuss about waiting for color? Why wait when we can get quality of picture?"

"I understand some of the ringside seats were sold by scalpers for \$500. I'd rather spend that \$500 for a television set, have a ringside seat at home and still have the set for use in the future."

"You say this is a prewar receiving set? How can you improve on this? This quality is every bit as good as 16 millimeter movies."

WOMEN—"How soon are these sets going to be available?"

"Where can we buy a television set?"

"I'm certainly surprised. From what I had heard, this so-called black and white—that's what you call this, isn't it—was fuzzy and something like the old silent movies we saw as children. Why, this is perfect!"

Statistically, NBC announced the Louis-Conn bout is the fifth championship match to be telecast by NBC under sponsorship of Gillette since September 1944. NBC also has televised more than 220 fights since 1939 of which more than half have been sponsored by Gillette.

ILLUSTRIOUS auditors of the fight telecast at NBC's Statler Hotel "lookparty" were Secretary of Commerce Henry A. Wallace (1) and RCA President David Sarnoff.

Phila. Businessmen See Fight Video at WPEN

USING the possible site of its own potential television studios, WPEN Philadelphia played host to a group of local businessmen for a video showing of the Louis-Conn fight, June 19.

Party was held atop the PSFS Building which now houses WPEN-FM. Guests included: Arthur Kaufman, Gimbel Bros.; Ed Lewis, Strawbridge & Clothier Store; Marcus Wechsler, N. Snellenberg & Co.; Walter Grosscup, Lit Bros.; Rom De Luca, Jacob Reeds's Sons; Charles Grakelow, City Director of Purchases and Supplies; Bernard Rose, Baltimore Markets; Walter P. Flynn, Sears, Roebuck; Thomas B. K. Ringe, attorney; Louis E. McAllister, architect; Douglas Braite, architect; Donald Cresswell, Philadelphia Savings Fund Society; Richard J. Seltzer, real estate; Benjamin Franklin James, Franklin Printing Co.; Pat Thornton, Thornton-Fuller Co.; Samuel Cook, Morris Kaplan, Penn Fruit Co.; David Krantz, Record Dealers Assn. Ferdinand Tartaglia, Tartaglia Inc.; Irving Garfinkel, Blauner's department store; G. B. Gow, Dewees store; William Geuting, Geuting shoes; Richard Balch, Appliance Dealer's Assn.; W. B. Walker, First National Bank; Herman Barr, Meyer Barr, Edward Siegel, Barr's jewelry; Robert McLean, William McLean, Harold Hadley, Reginald Beauchamp, George Eager, Albert Westhoff, Eugene Mac-Kinnon, Harry Hawkins, The Evening Bulletin; George Baker, Chi-

Fight Production

(Continued from page 17)

the time, and the production director can put any one of them on the air. There's a greater range of selectivity. But we have to make it more compact. We should be able to do this job with ten or twelve men and half the equipment. We will, in time. These engineers, I tell you, they can do anything."

This is a fellow who has, with his crew, put on 750 remotes for television: everything from boxing bouts to spelling bees.

The night before the fight, motion picture and still cameramen were measuring distances from ring-center to ringside, and from ring-center to camera location. This enables them to adjust their focus for light, distance and other compensatory factors in photography. The video boys just sight down the barrel and shoot. It's definitely wonderful.

They turned on two sets of the huge tier lights at the stadium that night to test the image orthicons under their powerful beams. They were on when the crowds surged into the stadium Wednesday.

The television picture on the kinescope was so clear, under this artificial light, that you could count the slats in the back of the chairs at the far side of the stadium.

This seemed terribly impressive to everybody but Eddie Wilbur. He looked up at the tier light and said, "Jees, look at those things. They're putting out 3000 kw."

That's a television engineer for you. He can give you a \$100 ringside seat at a championship bout while you loll in your easy chair with a highball—and he's amazed at a mazda lamp.

General Foods on CBS GENERAL FOODS Corp., New York (Sanka), Aug. 11 starts Adventures of the Thin Man on CBS, Sun. 6:30-7 p.m. Program was discontinued on CBS June 9 when General Foods sponsored program in behalf of Post Toasties. Agency is Young & Rubicam, New York.

SUMMER TIME

is Selling Time in Savannah. And WSAV sells at the lowest per person cost of any medium.

Industry Reviews Copyright Laws NAB Music Committee Will Meet July 15-16

MUSIC'S currently suppressed discord—the potentially dangerous copyright situation—will be given a preliminary going-over July 15-16 when the NAB Music Advisory Committee meets at the Waldorf-Astoria, New York. The committee is purely a license group, as distinguished from the Industrywide Music Committee concerned with AFM negotiations.

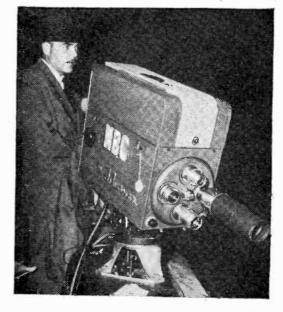

Though all—or almost all—has been melodious on the copyright front for some time, aside from routine discussion at NAB district meetings last winter, the industry is taking precaution not to be caught with its license grants down when current contracts with ASCAP expire Dec. 31, 1949.

The July meeting will be of an exploratory nature, with the committee going into all sides of the license situation to determine if any steps on behalf of the industry's copyright needs should be taken at this time. NAB desires to refresh recollection of broadcasters as to their rights under the contracts and to analyze methods used by stations in working out their copyright problems. The committee will prepare information on operations based on each of the eight types of ASCAP licenses.

As an important part of industry raw material, music deserves serious attention to prevent recurrence of the 1941 situation, when most stations operated some months without ASCAP music until the copyright pool yielded, the committee believes. Creation of BMI, a vital factor in ASCAP's repentance, led to permanent operation of industry's own copyright group.

Under the ASCAP consent decree, it must give stations a choice of license arrangements at the expiration of any contract year. The contracts provide arbitration in case of failure to agree. ASCAP is further required to submit its new terms by the middle of 1949.

Members of the Music Advisory Committee, of which President Justin Miller is chairman, are Joseph A. McDonald, ABC; Julius Brauner, CBS; Louis G. Caldwell, MBS; A. L. Ashby, NBC; Herbert Hollister, KMMJ Grand Island, Neb.; Campbell Arnoux, WTAR Norfolk; Theodore C. Streibert, WOR New York; Robert T. Mason, WMRN Marion, O.; Ed Yocum, KGHL Billings, Mont. John J. Gillin Jr., WOW Omaha, and J. Harold Ryan, Fort Industry stations, are board liaison members.

"RINGSIDE EYES" of NBC's video cameras gave thousands of viewers ringside seats at the Louis-Conn bout last Wednesday. Two Image Orthicons were equipped with the specially-designed turret for mounting four lenses—the first time turret lenses have been used for television, according to NBC. Bob Stanton, behind the new camera, is NBC television sports an-

nouncer who covered the fight.

WWSR, WDEV Are Acted on by FCC

CONSENT to involuntary assignment of license of two stations and the involuntary transfer of control of a third was approved by the FCC en banc last Thursday. In no instance was a monetary consideration of the AVCO procedure necessary, due to deaths of principals involved.

Two daytime regional stations-WWSR St. Albans and WDEV Waterbury, Vt.-were involved in Commission action, due to the death of Lieut. William G. Ricker, equal owner of both stations. In the former case, control of the outlet is acquired by Ernest C. Perkins as executor of the Estate. Mr. Perkins, through purchase, is owner of one share of stock in the Vermont Radio Corp; addition of approximately 49% as a result of the involuntary transfer, will give him a bare majority of control in WWSR. Station is authorized 1420 kc with 1000 w day only.

General manager and 50% partner of WDEV, Lloyd Squier and Mr. Perkins as executor of estate of William G. Ricker, are principals in WDEV assignment. Mr. Perkins, according to Commission action, receives equal interest in station [BROADCASTING, April 15]. WDEV operates on 550 kc with 1 kw daytime. In another decision, FCC approved transfer of one-third interest of WQAN to the Scranton Times, a copartnership of two, Elizabeth R. Lynett and Edward J. Lynett Jr. Assignment was necessitated by death of third partner, William R. Lynett. Scranton outlet is on 910 kc with 1 kw day and 500 w night, sharing time with WGBI Scranton [BROADCASTING, April 15].

Comment

(Continued from page 15)

up telecast of the action in the ring was sharply defined, better than we have ever seen."

Reporters in the nation's capital, more than 225 miles from the scene of the battle, declared that watching by television was like sitting at ringside.

"Amid cheers and wisecracks in a series of smoke-filled rooms, 800 of the country's top officials, including Cabinet members and a Supreme Court Justice, tonight saw the punch that kept Joe Louis the world's fight king," said the Associated Press in Washington, D. C.

Comparing with the first broadcast of a championship bout between Dempsey and Carpentier on July 2, 1921, and describing the progress of radio and television up to Wednesday's bout, the Washington Evening Star in its editorial page, termed it a foretaste of things to come in the industry.

William G. Terrell, radio editor of the Washington Daily News, said that the telecast thoroughly "sold" all the viewers in the Nation's Capital, adding that the video "was a pleasant relief from the usual tense, excited mouthful of verbage necessary to bring the fight to radio listeners."

John Crosby, writing on the video success in his New York Herald Tribune radio column, posed the question of television's possible effect on future attendance at such sporting events. He cited two possibilities: "First, the promoters may ban television entirely. The more likely eventuality, however, is that the promoters will join hands with broadcasters in some sort of arrangement profitable to both. If that happens it won't be long before the broadcasters, or the advertiser, is running the show."

Jim Gantz, former Philadelphia sports editor and now news director at KYW in that city, joined with Bill Duncan, *Philadelphia Inquirer*, in affirming that the cameras followed the action more accurately than could a spectator in the tenth row at the Stadium.

Jerry Gaghan of the Daily News, Charles Fisher of the Record and other Philadelphia newspapermen attending the showing in studios of KYW felt the telecast left little to be desired. Impressive, they further stated, was the technical progress attained in the field with a very bright future ahead for the art.

Video Broadcast

(Continued from page 16)

nectady, probably boosted the audience beyond the estimated 100,000 total. This was 25,000 more than the capacity of Yankee Stadium.

The realism of the spectacle was evident in the reaction of the groups to the telecast. In the fifth, when Conn slipped and fell to the canvas, cheers arose from the viewers as Joe Louis stepped back from his opponent, touching gloves before resuming the battle.

Evident, too, was surprised pleasure of novice viewers when they heard Bob Stanton, the NBC video announcer, broadcast the show. His technique differed entirely, of course, from the audio method to which radio listeners are accustomed. He spoke infrequently—usually to make an observation which brought chuckles from the audience, or to explain briefly a particularly intricate exchange of punches.

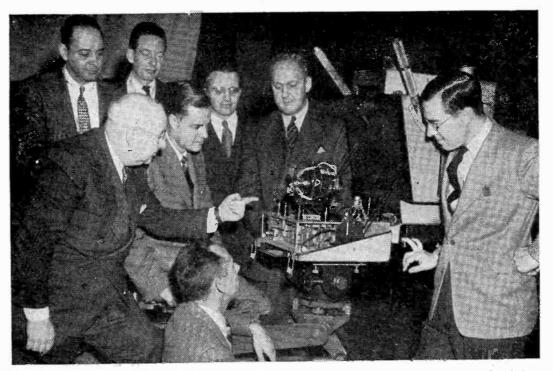

Interviews Celebrities

He worked not at ringside, but 145 feet from ring center on the camera stand. Before him he had a kinescope, into which he confessed he looked during part of the fight.

A new experiment in such renotes was undertaken Wednesday when Ben Grauer, announcer, went into the audience with a "beer mug," walkie-talkie type transmitter to conduct interviews with celebrities. The experiment, according to Production Chief Crotty, was "fair," and would be better the next time. Usually it was difficult for the camera to isolate Mr. Grauer and his interviewee in the milling ringside throng. Stadium police were constantly ordering him back from ringside, and it was estimated that he and his production man, Mr. Jordan, were removed from the celebrity scene about three times. They returned for more each time.

In NBC's Manhattan studios, special receivers were set up for French and Portuguese announcers who broadcast via shortwave to their native countries blow-by-blow descriptions from set-side. Another kinescope was made available to the press for direct video "stills."

At NBC and Dumont, special viewing rooms were equipped for company employes.

BRIEFING Young & Rubicam officials in advance of the new television news series sponsored by Gulf Oil Corp., a Y&R account, George Moskovics (pointing), commercial manager of WCBW, CBS video station, explains the functions of the camera. Y & R personnel (1 to r, in rear) are: Carlos Franco, direction of station relations; T. V. Smith, assistant account executive on Gulf; William Forbes, television director; Charles Cassidy, copy writer; Paul Richardson, account executive on Gulf; Harry Hartwick (fingers on camera), copy writer. Kneeling in foreground center is Wes McKee, Y&R producer assigned to the CBS Television News series.

Newspaper - Union Decision Awaited

OUTCOME of charges against two St. Petersburg, Fla., newspapers, scheduled to be heard today before an official of the National Labor Relations Board, may establish precedent in featherbedding practices of labor unions.

On complaint of the International Typographical Union, Local 860, the St. Petersburg Times, the Evening Independent and News Printing Inc., company organized by both papers, were to be cited on charges of "refusing to bargain and unfair labor practices."

Nelson Poynter, editor of the *Times* and majority stockholder in WTSP St. Petersburg, said the basic issues will be whether a newspaper has the right to demand arbitration and whether ITU can refuse to submit to arbitration its made-work featherbedding and limitations on production and then declare the union refuses to bargain because it insists on arbitration.

On Nov. 20, 1945, printers went on strike in St. Petersburg. Prior to the strike the newspapers operated under unilateral conditions of employment imposed by the union, leaving the newspapers no appeal in case of dispute. For two months the publications operated without printers and without strike breakers, photoengraving the newspapers. In January the publishers submitted their own unilateral conditions of employment with provisions for comprehensive standing committee and arbitration clauses. They offered all jobs in the composing room to printers on strike, along with struck work, priority and all the other basic requisites for a closed shop, said Mr. Poynter.

Thurman Arnold, former assistant U. S. attorney and member of the U. S. Court of Appeals for the District of Columbia, has been retained to represent the publishers. In a joint statement the St. Petersburg publishers denied violations of the Wagner Act, as charged by the union, said that if the union's featherbedding practices continue the general public would suffer.

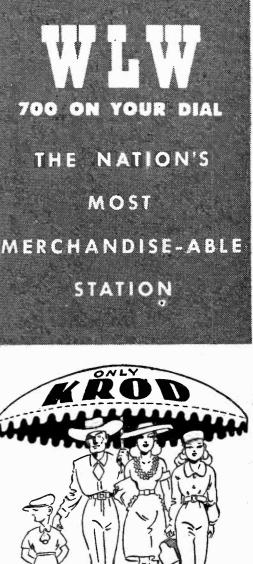

Considers Radio

BAPTIST CHURCH in Canada, in convention at Peterborough, Ont., has appointed a committee to consider coast-to-coast broadcasting of sermons on a sponsored basis. Convention was told that the Presbyterian Church in Canada has bought time on 60 Canadian stations during past year, that the Anglican Church spent about \$33,-500 for the same purpose and the United Church \$10,000.

Five From Chicago

NBC CHICAGO which has taken

Comments of those who were directly involved in the production did not reflect the enthusiasm of those to whom the show opened up a new vista of communication.

"It was routine," said Mr. Kersta.

"You can't beat these engineers," said Mr. Crotty, who handled the Nova-Baer fight from Yankee Stadium for television in 1939 (using one ringside camera).

But these were men who, with engineers like Mr. Wilbur, have worked day in and day out with video, paying little heed to alloca-

tions fights, competitive struggles and other corollary problems.

To those who were not veterans at video—the guests—the televised bout signalled the arrival of a new art. on the job of producing five of the network's summer replacements (Grand Marguee, Lights Out, Easy Money, Tales of Foreign Legion, Olmstead Playhouse) announced Thursday that Lights Out, featuring original scripts by Willis Cooper, would be heard 9-9:30 p.m. (CDT) July 6, instead of July 14 as previously announced. Jules Herbuveau, NBC Central Division production manager also announced Jim Ameche would come from Hollywood to star in Grand Marquee, replacing the Amos 'n' Andy Show, 8-9 p. m. (CDT), effective July 2.

Hon. Frank Silvernail B B D & O New York City

Dear Frank:

I've been doin' a little ponderin' ... got a set of figures here in front of me that I thought you'd be interested in. For instance,

it says here that Kanawha County (that's the center of the WCHS area) " with estimated retail sales of \$107 million in 1945, made the select \$100 million class for the second consecutive year and was the only West Virginia city to do so." Now you business folks can prob-ably get a lot more out of figures I can them than I can, but like I was tellin' Myrt a few nights ago (sometimes I sneak in word when she stops to catch her breath) you don't have to be too smart call this the "rich

to figure out why they call this the "r Kanawha Valley"!

Miller Sees Threat to Free Business

Press, Movies Affected Los Angeles Group Is Warned

CAUTIONING that "the political opportunist takes over when the sleepy citizen nods," Justin Miller, NAB president, warned a joint gathering of Los Angeles Advertising Club and Chamber of Commerce members June 18 that their interests were all at stake even though radio's current position may seem more obvious.

In his talk, titled "International Freedom of Speech—A Dilemma," he reasoned from the general confusion among nations to the specific domestic threats to radio as well as motion pictures and press. Developing this thought, he cited the paradox which has this country asserting worldwide need for "freedom of communication" and overlooking the "concerted movement to put communications under Government control" at home.

And Then Facsimile

Beyond the obvious difference, he denied any basic difference in reasoning for control of radio and not of press. Then he wondered what

Power Win

RIGHT on the nose to cash in on the all-time high Hooperating expected of the Louis-Conn fight was the FCC permission to WCOP Boston to commence program tests with its new 5,000 w signal, instead of the old 500 w signal. Immediately after news was received the station's promotion and publicity department went to work to let people know that fight reception would come in from WCOP with 10 times former power.

Sustainers Will Replace P&G Shows for Summer

PROCTER & GAMBLE Co., Cincinnati, July 1 takes summer hiatus for two of its quarter-hour CBS shows to be replaced by sustaining programs. The Jack Smith Show, Monday through Friday, 7:15-7:30 p.m., on behalf of Oxydol, will be replaced with Gordon MacRae, baritone, formerly in the 6:30-6:45 p.m. period. Latter period will be filled with a new sustaining series, Songs by Larry Carr. Summer replacement for the Lanny Ross Show (Ivory Soap), Monday through Friday, 7-7:15 p.m., will be Patti Clayton, who has been heard 6:15-6:30 p.m. Latter spot will be filled by In My Opinion, another CBS sustainer.

shape such opinions would take with arrival of commercial facsimile.

He reminded the assemblage that Congressional authority to regulate any medium springs from the Constitution and resultant threat to press or motion pictures is as great. Mr. Miller emphasized that Congress knows its limited power to control free speech or press but asserted that FCC had gone beyond its powers. In effect, he felt that their actions "have repealed the provision of the Constitution and of the Communications Act."

Mr. Miller concluded that Government bears watching since its only function "is to keep the mechanical channels open" abstaining from content control of communications save for obscenity or any tendency to incite to violence and crime.

* * *

At District Meeting

President Miller today addresses the 17th District meeting in Portland before going to Spokane where he will speak before the Chamber of Commerce at noon tomorrow and Pacific Advertising Assn. later in the day. Mr. Miller flies to Chicago June 26 for conferences with the NAB convention subcommittee before returning to Washington. July 1-2 he will attend a meeting of the new NAB Program Executives Committee in Chicago. Scheduled July 15-16 is a meeting of NAB Music Advisory Committee with a meeting scheduled the following two days by the NAB Freedom of Radio Committee. Both are in New York.

Aug. 6-8 he will attend the NAB board meeting at Estes Park, Col., and return to the West Coast for the Aug. 11 meeting of the NAE 15th District in Monterey, Cal.

Reception in honor of Mr. Miller was held June 17 by the Los Angeles Chamber of Commerce. Following day he addressed the luncheon group of the Ad Club and Chamber of Commerce. He was host at a luncheon Wednesday tendered to Eric Johnston, head of Motion Picture Producers Assn. and that evening addressed Southern California Broadcasters Assn. Week concluded with an off-therecord session Thursday with Los Angeles Chamber of Commerce Board of Directors.

Television Set Makers Fete Press, Workers Fight Night

MOST NEW YORK metropolitan television set manufacturers held parties for the press and for their workers the night of the big fight.

RCA, in addition to sets used at the NBC party, telecast the fight to employes in its Princeton, N. J., laboratories. This show used a standard-size movie. The event was held outdoors and was visible over an area of several acres.

The signals were fed through a control board and amplified in the lab television studio, and cast on the screen by a projector, which was situated 60 feet in front of the screen. A special 60,000 volt receiving tube-kinescope was constructed for the fight projection by Dr. D. W. Epstein of the laboratory staff.

CBS set up six sets, mostly RCA console models, throughout its tele-

clear picture, while the projection sets were less definitive.

Solomon Sagall, president of Telicon, and former managing director and founder of the Scophony Co. of England, declared that the telecast of the Louis-Conn fight "has ushered in the age of commercial television." "Television may have made several false starts in this country," he said, "but this time it is starting right and it is going to stay." Alluding to color television, Mr. Sagall went on to say that color television will eventually come, but the black-andwhite has a brilliant commercial future for "at least five years."

Telicon Corp., feeling that the public wants a large picture, announced that it will not bring out a set with anything smaller than a 10-inch viewing tube, and most of its production will be concentrated on sets with a 15-inch direct view picture, and a projecter picture of about two feet wide. Sets will make their debut at dealers sometime in the fall. Prices will range from approximately \$350-400 to \$1500. Viewtone Inc. displayed 14 of its sets, with 7 inch screens on table and console models, to over a thousand guests at a fight party in the Park Central Hotel, N. Y., Viewtone also had a number of other sets displayed throughout the eastern area where the fight was telecast.

Folks turn first to-

At the Telicon Corp. at 851 Madison Ave. over 200 members of the press and their friends crowded before four Telicon receivers to witness the telecast of the Louis-Conn bout. Two of the receivers were direct-view, one with 20-inch tube, the other a 15-inch, while the other two receivers were of the projection type with a 17x23-inch screen. The direct view set with the 20-inch tube cast a remarkably

Emerson Reveals Ketail Video Sets Console, Table Sets to Sell From About \$150 to \$250

EMERSON RADIO & Phonograph Corp. announced its entry into the television field last Thursday at a press preview of its first two postwar video receiver models—a chairside console including the standard broadcast band as well as the television sight and sound, which will retail at approximately \$250, and a table model video sight and sound receiver without the standard broadcast band, to retail at about \$150.

The chairside model, with a 10inch cathode ray tube slanted so as to be readily visible to a large number of viewers, includes 32 tubes and has a 12-inch speaker. Benjamin Abrams, president of Emerson, said that the company expects this to be its most popular television receiver model and that about 75% of Emerson's anticipated output of 8,000 to 10,000 video sets during the remainder of this year will be chairside models.

The \$150 table model has a 7inch vertical viewing cathode ray tube. Both models will receive the full range of channels allocated by the FCC to commercial television, 44-88 mc and 174-216 mc. The company is making a dipole receiving antenna which will be installed at a cost of \$30.

Delivery Next Month

Emerson's first television sets will go to dealers beginning next month with production gradually increasing through the summer and fall, Mr. Abrams said. At first, he stated, distribution will be limited to the New York area, subsequently extending to other cities as program service is available there.

Also displayed by Emerson was a new midget standard broadcast five-tube receiver, measuring only 6 by 5½ by 3 inches. Set, to be produced in colored plastic cases, perates on either AC or DC current and will retail for about \$20.

Asked about Emerson's FM receiver production plans, Mr. Abrams said that the company expects to turn out about 20,000 table models, retailing at \$79.95, and 15,000 console combination AM-FM models, retailing at \$175.

NAVAL ORDNANCE Development Award was given June 6 to the Wilmotte Mfg. Co., Washington, D. C., in recognition of distinguished service to research and development, and in particular for contribution to the Fire Control Radar Mark 29 [BROADCASTING, June 17]. Award was accepted by Raymond M. Wilmotte (r), president of the company, from Rear Admiral Malcolm F. Schoeffel, USN, deputy chief of Bureau of Ordnance. Eighty members of the Wilmotte firm received the award.

Woll Replacement Demanded by Lea Cites Petrillo Prosecutor's Father as Union Official

REMOVAL of J. Albert Woll, U. S. District Attorney, as Government prosecutor in the case against James Caesar Petrillo, growing out of his strike against WAAF Chicago [BROADCASTING, June 17], will be demanded of Attorney General Tom Clark, Rep. Clarence F. Lea (D-Calif.), chairman of the House Interstate & Foreign Commerce Committee, said last week.

Mr. Lea, author of the Lea Act, which Petrillo is charged with violating, said he would write the Attorney General, demanding that a member of the Attorney General's staff "not related to interested parties" represent the Government. Mr. Woll is the son of Matthew Woll, second vice president of the American Federation of Labor, parent organization of the American Federation of Musicians.

He told BROADCASTING a fortnight ago that he could see no reason why he should disqualify himself, merely because his father is an official of the AFL.

"It is unfortunate that the prosecuting attorney who must represent the Government in this prosecution should be so closely related to an official of the union." said Representative Lea. "I don't question Mr. Woll's integrity, but it would seem a natural inclination for him to lean towards the labor organization."

Joining Chairman Lea in opposing Mr. Woll as Government attorney was Rep. Clarence J. Brown (R-Ohio), who as a member of the Interstate Foreign Commerce Committee, worked hard for passage of the Lea Act. Mr. Brown, who is chairman of the Republican National Executive Committee, said the Chicago U. S. attorney, even though his sympathies might all be for the Government, should have assigned the case to an assistant because of his father's connection with the AFL.

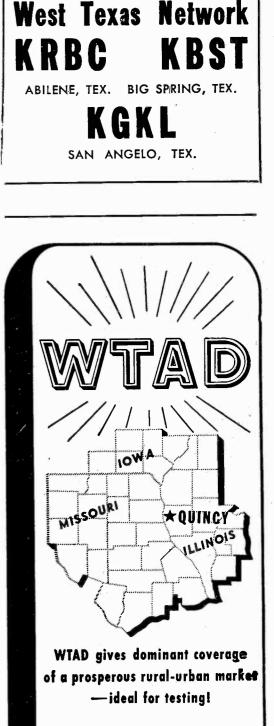

NAB Program Study

SURVEY of early morning programs throughout the country will be undertaken by the NAB Department of Broadcast Advertising to determine operating methods and

Even We Were Surprised

Everyone knew we would pull lots of letters on the latest mail-pull effort — but even we were surprised at the wide expanse of territory from which they came. It substantiates that these stations have the LISTENERS.

Get your products into the hands of those listeners. Ask John E. Pearson Company for rates and availabilities.

To Work Together TO ELIMINATE possibilities of a third trade association for television, NAB and Motion Picture Assn. aim to work closely in development of policy and solution of operating problems. This was discussed Wednesday at an informal luncheon in Hollywood tendered by Eric Johnston, MPA president, for Justin Miller, NAB pres-Ment, and attended by area radio and movie leaders.

THEY EAT IT UP!

—and it's mighty good eatin' the generous dish of good programming that characterizes this sales-producing station. A great station in a great markat—the combination that insures volume sales.

March Production Of Sets Is Higher Total Is 27% Above Mark For February, Census Shows

RADIO SET output totaled 916,701 sets in March, 27% above February and 90% of average monthly output in 1941, according to the Bureau of the Census. No FM sets or AM-FM combinations were reported to the bureau for February and March. Of 635,570 home radios, only 7,468 were console models, a ratio of 1 console to 60 table sets, as compared to the 1 to 6 ratio of 1941.

Output of 82,777 radio - phonograph combinations in March was a little above 1941 average but 197,354 battery operated sets represented only half 1941 monthly volume. Automobile sets totaled 102,823 in March, up substantially from February but only 54.6% of 1941 volume. Value of shipments of radios and electronic phonographs rose 39% in March, totaling \$20,000,000 as compared to \$14,-500,000 in February.

Output of television sets in February and March was described by the bureau as negligible. Bureau bases its reports on data from manufacturers and says they represent "substantially complete" coverage of the industry. Data are preliminary and will be revised later.

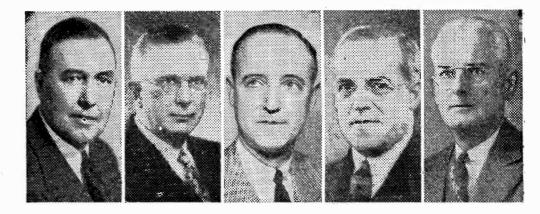

Radio Manufacturers Assn. plans to make available monthly set data, starting with figures for June. These reports are to be issued within a fortnight of the month's end, and are to give almost complete coverage.

HEARING TO RESUME ON CLEAR CHANNELS CONFERENCES between engineers of the broadcasting industry and the FCC were held last week in Washington to prepare testimony for the final phase of the clear channel hearings which begin July 1 in Washington.

Although every effort will be made to wind up the hearings within a few weeks, it was regarded doubtful that the voluminous data necessary for the proceedings will be completed. It was expected, therefore, that a recess may be taken after two weeks and the hearings adjourned until some time in September.

Acting Chairman Denny has

Executive Staff of Lever Bros. Is Reorganized by Luckman

NEW VICE PRESIDENTS (1 to r): Robert F. Elder (consumer research); John R. Gilman (advertising); Walter W. McKee (sales); Alexander B. Stewart (production); Arthur P. MacIntyre (finance).

HARDLY a fortnight after taking office as president of Lever Bros. Co., young (37), ambitious Charles Luckman last week was giving the giant American subsidiary of

life.

olive-Peet Co.

The top lieutenancy went to W. R. Veale, who started with Colgate-Palmolive-Peet in 1922 as a clerk in the advertising department, rose through advertising, sales and managerial positions to become manager of the company's U. S. soap department in 1935. Since 1938 he has been manager of Frankfort Distillers. Mr. Luckman last week made him vice president and general manager of Lever Bros. He was also elected to the board.

Another vice presidency went to Walter W. McKee, onetime Colgate-Palmolive-Peet executive who followed Mr. Luckman to the Pepsodent Co., became its vice president in charge of sales after the soap industry's wonder boy became Pepsodent's president. The McKee-Luckman friendship began when Mr. McKee was Colgate-Palmolive-Peet's manager for toilet articles in Cincinnati and Mr. Luckman was the company's district manager for soaps. Mr. McKee last week was named Lever Bros. vice president in charge of sales.

Lever Bros. since 1918, he became assistant advertising manager in 1924, associate advertising manager in 1927. To Mr. Gilman much credit has been given for the development of Lux Toilet Soap. He was in charge of all Lux advertising, including Lux Radio Theatre.

Alexander B. Stewart, vice president in charge of production. With Lever Bros. since 1924, Mr. Stewart was first a sales supervisor, later assisted in installing modern production systems. Since 1933 he has been assistant to the president with special responsibilities for production.

Arthur P. MacIntyre, vice president in charge of finance. With Lever Bros. since 1920, Mr. Mac-Intyre was first an accountant, became controller in 1922, treasurer in 1935.

KVI REPLACES KMO WITH MBS-DON LEE

AFTER nine years as a Mutual-Don Lee Broadcasting System affiliate, KMO Tacoma, Wash., will sever network connections in favor of independent operation, effective Aug. 1, according to Carl E. Haymond, KMO owner.

Simultaneously, Don Lee announced selection of KVI Tacoma to replace KMO and KOL Seattle.

Mr. Haymond stated that he had been offered a new Don Lee contract with the provision that he either purchase a Seattle station or move the KMO transmitter to cover both cities.

promised that a decision on the clears will be made in September, to enable the United States Government to submit its proposals to the North American Regional Broadcasting Conference in October.

It is expected that when the hearings resume, Louis G. Caldwell, counsel for the Clear Channel Broadcasting Committee, will ask that the executive board of the Regional Broadcasters' Committee be required to testify regarding an alleged campaign to "break down the clears." The other four executives elevated to vice presidencies were:

Robert F. Elder, vice president in charge of consumer research. With Lever Bros. since 1937, Mr. Elder was first director of research, later assistant to the president with special responsibilities in economics and merchandising. John R. Gilman, vice president in charge of advertising. With In making his decision, Mr. Haymond further explained, "We would have had to identify ourselves exclusively with Seattle, since from a business point of view, it is impossible for a Tacoma station to sell both markets inasmuch as Seattle overshadows Tacoma.

The new network outlet, KVI, which operates with 5 kw on 570 kc, is presently located midway between the two cities. Mrs. Vernice Irwin, president and general manager, admitted she would "probably move some of the station operations" to Seattle.

Felecommunication Revision Seen in June 27-28 Meetings

A TWO-DAY meeting of interested members with State Dept. and other Government officials, looking loward U. S. proposals for revisions of international telecommunications documents will be held in Washington June 27-28, the State Dept. announced last week.

Need for a world conference and a revision of the existing internaional telecommunications docunents is accentuated by reason of the great advancement in the art ince the drafting of the Madrid Convention in 1932 and the Cairo Radio Regulations in 1938 and by ievelopments and disruptions incilent to the war, said a spokesman.

Some 50 or more representatives of all phases of telecommunication in America are expected to attend the meetings. Beginning at 2 p.m. Thursday the sessions will be held in the Department of the Interior Auditorium, concluding Friiay afternoon.

Submit Proposals

Several firms and organizations directly interested in world telecommunications have submitted tentative proposals. Others are expected to offer suggestions during the conference, inasmuch as proposed radio regulations were delayed in mimeographing at State Dept. and will not reach industry members in time for complete study before the meeting this week.

Studies have been under way for a long time looking toward the revision of international telecommunications documents, said a Government official.

While many changes are anticipated, some are outstanding in importance. One will be a revision of the frequency allocation table, Article 7 of the Cairo Radio Regulations, which will make many changes in the allocation of bands of frequencies to the various services requiring them.

Another important change to be roposed will be a recommendation for creation of an International Telecommunications Union with permanent boards and committees which will be integrated by an Administrative Council, a permanent body designed to supervise and direct the day-to-day operations of .ne union.

According to the U.S. proposals

of international disputes in the field of frequency registration and an agency for the submission of expert advice to registering governments. Work on other permanent boards and committees is going forward.

A further important revision looking toward speedy solution of international problems in the telecommunications field is proposed. This is, in addition to the regularly accepted plenipotentiary and administrative conferences, a new type of conference known as an Administrative Conference With Limited Agenda, sometimes referred to in official circles as a "quickie."

Under the U. S. proposal international conferences could be set up with as little as three months' notice and would consider only a few current and urgent problems, thus avoiding the long delays incident to regular conferences, heretofore necessitated. Under present international documents, problems that arise must await world conferences, sometimes four years or more.

NEW License Hearing Postponed Until Aug. 5

AN FCC hearing of a renewal application for a license of WNEW New York, scheduled to be held in New York on June 18, has been postponed until Aug. 5. The reason for the postponement is that Arde Bulova, principal owner of WNEW New York, has not returned from a European trip.

In addition to fighting for renewal of its license, the station is resisting the efforts of the Missionary Society of St. Paul of the Apostle to take away its frequency. WNEW is also applying for an increase in power from 10 kw to 50 kw.

A minority stockholder, Richard O'Dea, is participating as an intervenor to inquire into certain financial transactions involving the Greater New York Broadcasting Corp., present licensee of WNEW, and the Wodaam Corp., licensee of WOV New York, also owned by Bulova, and previous licensee of

APPLEBY IS NAMED BUDGET DIRECTOR

D. Smith to be-

come vice presi-

dent of the Inter-

Mr. Appleby

was appointed as-

sistant director of

the bureau last

September when

he resigned as of-

national Bank.

Mr. Appleby ficer and director of Queen City

Broadcasting Co., operating KIRO Seattle, though retaining his stock in the station. He also is a third owner of KFPY Spokane and interested in a projected station in Boise, Ida.

Mr. Appleby had been in Government service 12 years as executive assistant to Secretary of Agriculture Wallace in 1933, remaining there until 1940. In 1941-42 he was chief of the U. S. food mission to Great Britain and served as chairman of the International Wheat Conference. In early 1944 he was named assistant director of the Budget Bureau, resigning that autumn to enter radio.

AWD Delegates to Call At White House Today

DELEGATION from the Assn. of Women Directors will call at the White House at 1:50 p.m. today just prior to a meeting of the Famine Emergency Committee. The group will present to ex-President Herbert Hoover a sheaf of telegrams from stations pledging cooperation in the food conservation program.

Alma Kitchell, WJZ New York and AWD president, will make the presentation. Accompanying her will be Mildred Bailey, WCOP Boston, vice president, and Dorothy Lewis, also a vice president and NAB coordinator of listener activity. AWD adopted its food conservation program early in the year before the famine committee was created.

A. D. Willard Jr., NAB executive vice president, will attend the committee meeting, representing NAB President Justin Miller who is on the West Coast.

one of the most important of these permanent boards would be a Central Frequency Registration Board composed of five regular and two alternate members, each from a different nation and who shall be of recognized qualifications in the radio field. This CFRB would undertake to coordinate on a scientific basis the registration of frequencies, which now is done merely as a recording activity by the Bern Bureau.

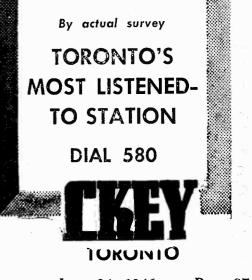

While the CFRB would act only in an advisory capacity, it would provide a forum for the settlement WNEW [BROADCASTING, May 27].

Outline NAB Meet

OUTLINE for the Oct. 21-24 NAB convention agenda will be drawn June 28 at a meeting of the NAB Convention Committee, to be held in Chicago. President Justin Miller will attend, as will C. E. Arney Jr., secretary - treasurer. Committee members are G. Richard Shafto, WIS Columbia, S. C.; T. A. M. Craven, WOL Washington, and Leslie Johnson, WHBF Rock Island.

Young man, 33, with excellent record as manager of a leading representative firm, and as commercial manager of a station desires to make a change. Would prefer California but will listen to any sound proposition. Replies held in confidence.

Box 454, BROADCASTING

10 Outlets Granted Sale of KTNM Tucumcari Is Sought; Seeds Plans Suit By FCC in Week Incorporation of WMLT Dublin Asked On Grove Action

KEEPING pace with the increased tempo of applicants for standard stations, the FCC last week authorized ten new standard outlets. Unusual aspect of Commission action was the issuance of grants to three applicants in Gadsden, Ala., a city of 37,000 (1940 census).

Outstanding among the latest recipients were grants to Mid-State Broadcasting Co. of Peoria, Ill., and Southern Illinois Broadcasting Partnership, Carbondale, Ill., au-+borizing use of the 1-A clear assignment of 1020 kc with 1 kw daytime operation only; Pursley Broadcasting Service of Mobile, Ala., which was granted 840 kc with 1 kw day, 1-A clear channel of WHAS Louisville; and the authorization on 740 kc to Central Florida Broadcasting Co., Orlando, Fla., operating with 1 kw day only.

Other grants were issued by the Commission to The Traveler Publishing Co., Inc., for a new station in Arkansas City, Kans., Midwestern Broadcasting Co. in Petoskey, Mich., and Electronics Corp. of Puerto Rico, for a local outlet in Mayaguez, P. R.

Peoria Grant

In granting the Mid-State application for Peoria, the Commission denied a petition by the then applicant to tender a grant to the Cabondale applicant on 1030 kc "in lieu of 1020 kc as requested." Midwestern, whose 1020 kc frequency was acknowledged by the Commission, is the licensee corporation of WTCM Traverse City, Mich., which operates on 1370 kc with 250 w fulltime. Mid-State is owned by some 12 stockholders, including: William J. Kutsch, president (28%); William A. Kutsch, vice president (24%) Casper F. Salm, treasurer (5%); Paul J. Hagerty, secretary (7½%); J. Chase Scully, assistant sec.-treas. $(2\frac{1}{2}\%)$; and John T. Urice, director (5%). Mr. Urice is an account executive with J. Walter Thompson Co., Chicago.

Mobile grant is to husband-wife equal partnership, C. L. and Louise Patterson Pursley. Mrs. Pursley is a 25% partner in WAPO Chattanooga, Tenn. Significant in the authorization of 840 kc to the applicant is the fact that it is the first Ime WHAS has shared its daytime hours on the Class 1-A assign-

TWO applications—one requesting a transfer of control and the other seeking incorporation under State charter-were filed with the FCC last week.

Hoyt Houck, Robert D. Houck and Walter G. Russell, each onethird owners of KTNM Tucumcari, N. M., sought Commission approval of their proposed sale to Robert B. McAlister, Pryde E. Hale and Grady Maples for a consideration of \$45,000. Station assignors asserted that by relinquishing control of KTNM it will be possible for them to devote their full time and efforts to an application for a 250 w outlet in Lubbock, Tex., of which they own 90%-30% each.

Messrs. Houck and Russell received Commission approval recently for an exchange of interests with Lonnie Preston, involving KTNM and KASA Elk City, Okla. [BROADCASTING, Feb. 18].

Under proposed assignment, Messrs. McAlister, Hale and Maples each will retain 33 1/3% interest. Mr. Hale, a Clovis, N. M., surgeon, will be a silent partner, McAlister and Maples participating actively in the operation of the

treasurer, 0.2%; James B. Austin, direc-tor, .2%; Frances Shirley, director; .2%, 1280 kc, 1 kw day only.

2%, 1280 kc, 1 kw day only. Orlando, Fla.—James Dandelake, vice president, chief engineer of Jackson Metal Co. and the Miller Electric Co. of Orlando, president, 25%; Naomi Mur-rell, vice president, 25%; William O. Murrell, secretary-treasurer, 25%; Mrs. J. M. Dandelake, assistant secretarytreasurer; 25%. 740 kc, 1 kw daytime

operation only. Mayaguez, P. R.—Santiago E. Caino, manager of local jewlry store, president, 33 1/3%; Jesus Aviles-Brunet, radio in-structor at the Mayaguez Radio School, secretary, 33 1/3%; Salvador Caino, merchant, treasurer, 33 1/3%. 1490 kc. 250 w unlimited.

Mobile, Ala.—C. L. Pursley, district representative of the Texas Oil Co., 50% partner; Louise Patterson Pursley. 25% owner of WAPO Chattanooga, 50%

partner. 840 kc, 1 kw day only. Gadsden, Ala.—General Newspapers Inc., Carmage Walls, president; John E. Marsh, vice president; Mrs. Claudia Haines, secretary-treasurer; Mrs. Myrtle Thompson, assistant sec.-treas. Charles E. Marsh of Washington, D. C., owns 250 shares of preferred stock and 1.844 shares of common. 1400 kc, 250 w unlimited hours.

limited hours.
Gadsden, Ala.—G. W. Covington Jr., sole owner; owns WCOV Montgomery.
570 kc, 1 kw daytime only.
Gadsden, Ala.—E. L. Roberts, sole owner. 1350 kc, 1 kw daytime only.
Potockay, Mich.—Midwestern Broad-

Petoskey, Mich.—Midwestern Broad-casting Co., licensee of WTCM, 1340 kc casting Co., licensee of wireM, 1940 KC 250 w unlimited time. Lester M. Bieder-man, president, 30%; William H. Kiker Jr., vice president, 16¼%; Drew McClay, secretary-treasurer, 15%; Fred G. Zierle, director, 16¼%; Edward G. Biederman, director, 22½%.

station. KTNM operates on 1400 kc. 250 w fulltime.

Mr. McAlister formerly was program director of KFYO Lubbock and is now general manager of KICA Clovis. He will manage the station. Mr. Maples is associated with KFJZ Ft. Worth, Tex.

Having received Commission approval for remaining 50% stock of WMLT Dublin, Ga., from J. Newton Thompson [BROADCASTING, April 1], George T. Morris, individual owner of station, in another application to the FCC now seeks consent to incorporate holdings under laws of State of Georgia. Licensee corporation will do business as Dublin Broadcasting Co., with Mr. Morris as president. WMLT operates on 1340 kc with 250 w unlimited time.

Marks 700th

BILLY HENRY, CBS newscaster, June 21 made his 700th broadcast of Bill Henry and the News Monday through Friday 8:55 - 9 p.m. Taking over the five-minute sponsored pro-

gram on CBS in Sept. 1943, Mr. Henry's preparation of the fiveminute script starts at 8 a.m. During the day he attends Washington's press conferences or Congressional hearings. His only

Mr. Henry

other news activity is a daily column for the Los Angeles Times. Mr. Henry is sponsored on CBS by the Johns-Manville Corp., New York, through J. Walter Thompson Co., New York.

P&G on NBC

PROCTER & GAMBLE, Cincinnati, has bought for the fall season the NBC Sunday period 10-10:30 p.m. which will be vacated by General Electric Hour of Charm. Decision as to which of various shows sponsored by the advertiser will fill the slot has not been made. RUSSEL M. SEEDS Co., Chicago, has notified Grove Laboratories Inc., St. Louis, one of the top network and spot advertisers, of its intention to file suit in the St. Louis Federal Court for the recovery of commissions on \$1,058,000 in advertising revenue, if the company does not fulfill its contract.

Difficulties began May 12 when James H. Grove, Grove president, notified the agency of the appointment of Duane Jones Co., New York, to represent Grove at the end of 90 days' notice.

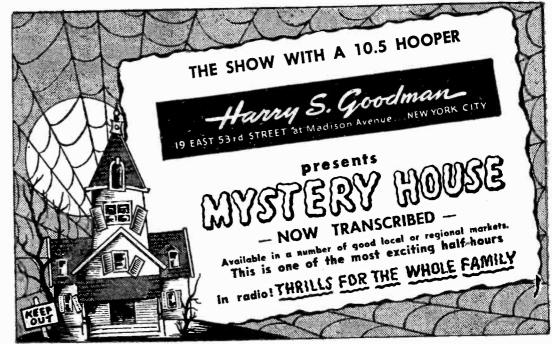

The agency, through its attorney, John B. Moser of Chicago, contended notice would constitute breach of contract in that agency contract was not to expire until June 30, 1947. In addition to Mr. Moser, regular counsel for Seeds, the firm of Thompson, Mitchell, Thompson & Young, St. Louis, is being retained. Firm won a judgment in May 1945 for breach of contract when Grove attempted to dismiss H. W. Kastor & Son Adv. Co., Chicago, as one of its agencies. Courts awarded Kastor & Sons \$15,000 after decreeing no definite time termination.

In the present litigation, Seeds is expected to ask the court to award commissions in the amount of \$160,000. Figure is based on advertising appropriations for the following accounts: Grove's cold tablets, \$750,000; Paso ointment, \$140,000; Dr. Porter's oil, \$35,000; Chill-Tonic, \$80,000; Jitter-Bug insecticide, \$53,000.

Agency has also notified Grove it expects to retain title and ownership of Reveille Roundup and The Home Towners, vocal quartet appearing on NBC.

Kraft Renews

KRAFT FOODS Co., Chicago, has renewed Kraft Music Hall effective July 25 on full CBS network, Wed. 8-8:30 p.m. (CDT). Kraft's summer series, which began May 16, stars Comedian Edward Everett Horton and Pianist Eddy Duchin. Agency is J. Walter Thompson Co., Chicago.

ment.

Central Florida Broadcasting Co., granted use of 740 kc, 1 kw day only, will share clear channel assignment with KQW San Jose, Calif., and KTRH Houston, Tex. FCC Plans Policing of Jammed Spectrum

RID-Field Division Merger to Fight Problems

By JACK LEVY

ANTICIPATING that the number of FM, AM and television stations "in the next few years" may reach an aggregate of 4,700, the FCC last Thursday announced details of a master plan for policing the "enormously-expanded postwar radio spectrum." The plan provides for the merger of the war-created Radio Intelligence Division (RID) with the Field Division, the combined unit to be set up as the Field Engineering and Monitoring Division, under the Field and Research Branch of the Engineering Dept. It will be headed by George S. Turner, formerly chief of the Field Division. George E. Sterling, formerly chief of RID, will head the Field and Research Branch.

Unfold Secrets

Coincident with the plan, which takes effect July 1, the Commission unfolded for the first time since its establishment in July 1940 the special equipment and techniques used by the RID for counter-espionage and for safeguarding war communications and transportation.

Opening up its Laurel, Md., laboratories to reporters and photographers, with permission to "see or shoot anything," the Commission conducted a five-hour exhibition of its far-flung monitoring activities, topped off by an actual demonstration of a nationwide alert for a clandestine radio station and the location of the illegal operation within five minutes. The equipment and facilities used for this work, it was explained, will now revert to peacetime application for patrolling the usable spectrum space, reaching to 30,000,000 kc and beyond.

War Forced Growth

In explaining the need for its expanded monitoring program, the Commission said that the "forced wartime growth" of radio communications is estimated to have advanced the art "an entire generation." Hundreds of thousands of additional channels, it predicted, will be licensed in the newly discovered regions of the spectrum and with the demand for frequencies still far exceeding the supply efficient policing becomes of "paramount importance." The Commission recalled that when the Government first began policing the spectrum in 1911 it was concerned with only a few ocean-going steamers. But today, it pointed out, the FCC "is confronted with the problem of preventing traffic snarls or law violation on radio highways" which will bring an estimated increase in traffic in the next few years to:

- Standard stations, from 1,000 to 1,400.
- FM stations, from 50 to 3,000. Television stations, from six to 200 or 300.
- Radio-equipped planes, from
- no cities to 5,000. Aviation ground stations, from
- 700 to 2,500.
- Two-way service for autos, taxicabs, etc., from one city to 200 cities.
- Radio-equipped railroads, from one road to 150.
- Fire department radio, from no cities to 5,000.
- Citizens walkie-talkie, from none to 200,000.
- Amateur operators, from 60,000 to 100,000.

In addition, said the Commission, thousands of channels will be used for radar, point-to-point communication, diathermy and other electro-medical and industrial heating devices, ship-to-shore communication, multi-purpose microwave relay link systems, and many other safety and special services.

Element of Crime

"With many highly developed small radio transmitters readily available," the Commission warned, "criminals can be expected to increase their efforts to use this weapon to outwit the law."

Acting as the "eyes and ears" of the FCC throughout the nation, the new combined Field Engineering and Monitoring Division will have the following major functions:

1. Monitoring the spectrum to locate sources of interference to authorized radio services and identifying all forms of radio transmission. 2. Detecting and locating illegal stations and developing evidence for prosecution.

3. Inspecting all classes of stations licensed by the FCC.

4. Conducting radio operator examinations and issuing licenses to qualified operators.

5. Measuring frequency and making technical analyses of the emission of radio stations.

6. Performing emergency direction finding service to aircraft upon request.

7. Making field strength surveys of stations, conducting special engineering projects in connection with frequency allocation and related problems, and conducting propagation recording projects in conjunction with the Technical Information Division and the Laboratory Division of the Field and Research Branch.

The Commission said that several factors arising from the war have created special problems for its radio law enforcement officers. Principal among these are the availability of surplus military radio equipment, the increased number of persons familiar with radio operations, and the expanded use of radio in air navigation in police work and other types of communication.

Causes of Chaos

Operation by unlicensed operators, by persons unfamiliar with radio laws or by pranksters or criminals, the Commission declared, "can create far more havoc than in the prewar days of a relatively uncrowded radio spectrum. They can cause ships to go on the rocks, airplanes to crash, police departments to lose the trail of hoodlums.

Interference from diathermy and other medical and industrial appliances using radio, it added, now

has greater potentialities for danger and confusion in the ether. Similarly, the increased number of huge airliners and the growth in private flying will accentuate the problem of locating and furnishing directions to lost planes.

Sale of surplus walkie-talkies in recent months, the Commission said, has created a special problem in guarding against the unauthorized operation of radio transmitters, which is subject to a \$10,000 fine or imprisonment or both.

To explain the RID monitoring operations, the Commission conducted a tour of its Laurel laboratory, about 25 miles from Washington, which served as the focal point for wartime counter-espionage which, at the peak of activities, embraced a network of 102 monitoring stations connected by radio and teletype.

Demonstrations Given

With Acting Chairman Charles R. Denny Jr. and Commissioner E. K. Jett attending, the party of reporters and photographers was given demonstrations of the various apparatus by which enemy clandestine stations were tracked down in record time, including a transmitter in the German Embassy in Washington whose signals were picked up within a few minutes after it went on the air two days after Pearl Harbor.

Mr. Sterling directed the tour, assisted by Lloyd S. Quynn, radio monitoring engineer; Adolph Andersen, supervisor; Gerald S. O'Connor, A. P. Walker, Ernest C. Thelemann, H. W. Johnson, M. L. Parker, W. K. Roberts and G. J. Ikelman, engineers.

Signs CBS Period

Agency is Ruthrauff & Ryan, New York.

Lustre-Cream Option OPTION on first quarter hour of Don McNeill Breakfast Club on ABC, Monday-Friday, has been taken by Kay Daumit Co., Chicago (Lustre-Cream shampoo). Firm will commence sponsorship of program Sept. 2. Swift & Co. holds second and third quarter hours and Philco has fourth quarter of show Daumit account was placed by Hill Blackett Co., Chicago.

At Deadline

PROPOSED FM REGULATIONS ADOPTED WITH CHANGES

ADOPTION of proposed rules and engineering standards concerning FM broadcasting, as proposed May 24 [BROADCASTING, June 3], announced Friday by FCC. Final form varies from proposed in only two instances.

Section 3.204 (a) (2) differs with respect to Class B stations in Area II. New rules more clearly describe Commission policy of authorizing maximum power and antenna height wherever it is believed that demand for facilities will permit.

Second change concerns definition in engineering standards of antenna height above average terrain for Class A and B stations. In line with proposed regulations, FCC Friday further ordered outstanding FM CPs or license reretofore issued for community stations be classified Class A stations; all other FM CPs and licenses issued be Class B.

Text of exceptions to May 24 order:

In the matter of Promulgation of Rules and Regulations and Standards of Good Engineering Practice for FM Broadcasting Other Than Non-Commercial Educational Broadcast Service.

Section 3.204 (a) (2) is amended to read as follows:

In area II, class B stations will be licensed to operate with a service area equivalent ² to a min-imum of 2 kw effective radiated power and antenna height of 300 feet above average terrain and a normal maximum of 20 kw effective radiated power and antenna height of 500 feet above average terrain.⁴ The use of greater power and antenna height will be en-couraged in those portions of Area II where such use would not result in undue interference to stations already authorized or to probable assignments insofar as can be determined at the time of the grant. In such case, the power, antenna height and area will be determined on the merits of each application, with particular attention being given to rural areas which would not otherwise receive service.

In addition Section 1M of the Commission's Standards of Good Engineering Practice Concerning FM Broadcast Stations is amended to read as follows:

Antenna height above average terrain -(1) For Class A stations the term "antenna height above average terrain" means the height of the radiation center of the antenna above the terrain 10 miles from the antenna.

(2) For Class B stations the term "antenna height above average terrain" means the height of the radiation center of the antenna above the terrain 2 to 10 miles from the antenna. (In general a different antenna height will be determined for each direction from the antenna. The aver-age of these various heights is considered as the antenna height above average terrain for Class B stations.)

It Is Further Ordered, That any outstanding FM construction permit or license which has heretofore been issued by the Commission for a community station shall be classified as a Class A station, and that all other FM construction permits and licenses which have been issued shall be classified as Class B stations.

GRANTS UP FM CPs TO 110; CONDITIONALS TO 450

CONDITIONAL grants for FM stations reached 450 mark Friday when FCC authorized additional seven outlets, four of which went to standard licensees. Four grantees previously given engineering approval, awarded construction permits, bringing to 110 number of FM permits issued since resumption of peacetime licensing.

Six of seven conditional grants were for Class B (metropolitan) stations and one was for a Class A (community) outlet.

Commission also designated one FM application to be heard in consolidated proceeding with related applications, bringing to 140 number of FM cases in hearing.

Granted construction permits (power given is effective radiated power; antenna height is height above average terrain) were:

FINAL CP'S GRANTED

Johnston Broadcasting Co. (WJLD) Birmingham, Alabama—Class B; 93.5 mc (Channel No. 228); 40 kw; antenna 750 feet. (B3-PH-518). Lee Broadcasting Inc. (WTAD), Quincy, Illinois— Class B; 98.1 mc (Channel No. 251); 33 kw; antenna

639 feet. (B4-PH-185).

WKY Radiophone Company, Oklahoma City, Okla. —Class B; 38.9 mc (Channel No. 255); 152 kw; an-tenna 928 feet. (B3-PH-171).

Sunbury Broadcasting Corp. (WKOK), Sunbury, Pa.—Class B; 99.3 mc (Channel No. 257); 3.4 kw; an-tenna 871 feet. (B2-PH-585).

Conditional Grants

Conditional grants, with city, grantee, majority or minority interest in standard station and classification, follow:

MISSOURI—St. Joseph, KFEQ Inc., KFEQ, B FLORIDA—Miami, Paul Brake, B NEW YORK—Albany, Hudson Valley Broadcasting

Co. Inc., B Poughkeepsie, Poughkeepsie Newspapers, Inc.,

WKIP, B Utica, Rome Sentinel Co., B OREGON—Albany, Central Willamette Broadcast-

ing Co., KWIL, A PENNSYLVANIA—Sharon, Sharon Herald Broad-casting Co., WPIC B

Designated for Hearing

Ft. Wayne, Broadcasting Co., Inc., Ft. Wayne, Ind.—Designated for hearing application for new FM station, to be heard in consolidated proceeding with applications of Midwest FM Network et al; or-ders heretofore issued in these dockets to be amended to include the Ft. Wayne Broadcasting Co., Inc. application.

The Commission adopted an Order in re applica-tions of WBNX Broadcasting Co., et al (Dockets 6013 et al) for FM stations in the New York-New Jersey area, ordering that Sections 1.73 and 1.141 of the Commission's Rules of Practice and Procedure be waived for the purpose only of permitting amend-ments relating solely to additional data requested by the Commission in connection with the appli-cations, to be filed directly with the presiding officer of the consolidated hearing; that the presiding officer be authorized to accept for filing all such amendments which comply with Section 1.74 of the Commission's Rules, and where no objection thereto is made by any party; that in the event of objection to such amendment, said presiding by any party officer be directed to refer said amendment to the Commission for action by the Motions Commissioner.

WJZ RATE CARD CHANGE

Closed Circuit

(Continued from page 4)

past two months actor has made rounds of Chicago agencies attempting to get air time for "Tommy Timber" without success.

FORD MOTOR Co., last week discussing possibility of switching Sunday Evening Hour, 8-9 p.m. on ABC to 4-5 p.m. Sundays on NBC. Company reportedly dissatisfied with ABC time. Now that NBC and Kenyon & Eckhardt are in discussion stage, it was said ABC offering better available time to sponsor. Program currently scheduled to return to ABC sometime in October. 4 to 5 p.m. on NBC now filled with sustaining National Hour (4-4:30 p.m.), and sponsored RCA show (4:30-5 p.m.). Latter show is shifting to early period Sunday. National Hour will move, possibly to Thursday night.

STIRRING of union activity amongst white collar workers at NBC, WOR and WMCA New York, evident last week. Prodded by recent CBS white collar election, United Office & Professional Workes of America (CIO) distributed union leaflets at WOR and WMCA. Reported that union will aim at NBC for next drive to organize.

COLGATE-PALMOLIVE-PEET reportedly may take over NBC 7:30-8 p.m. Thursdays to be vacated by Bob Burns Show which Lever Bros. dropped. Ted Bates Inc., New York, Colgate's Agency, said negotiating with NBC.

QUEEN CITY AMENDS

QUEEN CITY Broadcasting Co. (KIRO Seattle) petitioned FCC to amend application for 1 kw on 600 kc, Boise, Idaho, to 1 kw unlimited, directional antenna, on 950, remove from hearing docket and grant without hearing. Application followed FCC's proposed denial of Queen City application for use of 600 kc at Boise, while proposing to grant that of KFXD Nampa, Idaho, to change frequency from 1230 to 580 kc, increase power 250 w to 1 kw, move transmitter to midway between Nampa and Boise [BROADCASTING, May 6].

CBS FIGHTS KQW DENIAL

CBS Friday took two steps to protect AM and FM interests. Filed exceptions to proposed FCC denial of KQW San Francisco sale by Brunton brothers for \$950,000 to network, asked oral argument, indicating net intends to litigate should FCC make proposal denial final [BROADCASTING, June 3, 10]. At same time network filed petition with FCC to intervene in Washington FM proceedings. CBS earlier filed application for FM outlet in nation's capital [BROADCASTING, June 3].

DISC HEARING DEFERRED

² For the purpose of determining equivalent coverage, the 1000 uv/m contour should be used. ⁴ In the determination of appropriate coverage, consideration should be given to population distribution, terrain, service from other FM stations, trade area and other economic factors. Among

the recognized trade area authorities are the following: J. Walter Thompson (Retail Shopping Areas), Hearst Magazines, Inc. (Consumer Trad-ing Areas), Rand McNally Map Co. (Trading Areas) and Hagstrom Map Co. (Four Color Retail Trading Area Map).

BENTON RECUPERATING

WILLIAM B. BENTON, Assistant Secretary of State for Public Affairs, recuperating at Connecticut home from mouth infection, which kept him in Bethesda, Md. Naval Hospital several weeks.

BROADCASTING • Telecasting

WJZ New York, July 1, issues new rate card with four principal changes, as follows: (1) Discounts on programs no longer computed on basis of consecutive weeks and now based on number of program periods used within 12 months; (2) Discount and rebate structure has been combined into one discount; (3) rates for stationbreaks and one minute announcements and their frequency requirements have been changed; (4) all participation programs which were not on flat rate basis have been so changed.

New rates and policies apply to new advertisers July 1, 1946, with present advertisers protected until July 1, 1947.

REQUEST of NAB for 60-day postponement of June 24 deadline for filing of briefs and requests for oral argument on proposed transcription rule revision granted Friday by FCC. NAB sought delay to permit discussion of the proposal by its board of directors, which meets Aug. 6-8 at Estes Park, Col. [BROADCASTING, June 17]. The proposed rule would amend Section 3.407 to liberalize requirements for identification of transcription and recordings.

AMELIA UNDERWOOD, fashion editor in NBC press information department, leaves after eight years to become publicity manager of Womens Home Companion July 29, replacing Joan Lane, resigned.

CONVEY RELINQUISHING THIRD INTEREST IN KWK ST. LOUIS

SALE OF approximately one-third interest in KWK St. Louis to Anthony A. Buford, general attorney for Anheuser Busch Inc. and Arnold G. Stifel, former partner in St. Louis investment banking firm of Stifel, Nicolaus, announced Friday by Robert T. Convey, president. Mr. Convey and family will continue controlling stockholders. Amount involved not disclosed.

Transaction does not require FCC approval, since control is not affected, but the FCC, within statutory 30-day period, will be notified of transaction. Both Messrs. Stifel and Buford to become members of the board of Thomas Patrick Inc., but will not actively participate in KWK's day to day operation.

Change announced at staff meeting of KWK employees by Mr. Convey marks first time in station's 19-year history that substantial interest has been held by persons other than members of immediate Convey family. Mr. Convey explained that plan calls for immediate completion of facility expansion to exceed \$500,000. He disclosed that the 3 kw section of KWK's 50 kw FM station will be on air early next month.

Boatmens Bank Building selected as FM transmitter site. During early months of operation single square loop antenna will be employed, to be replaced by eight bay antenna mounted on 270 foot tower on roof of Boatmens Building. Antenna will be tallest structure in St. Louis, is planned for completion in October subject to approval of CAA.

BOLER SAYS WAIT SALE PART OF MVN REVAMPING

REORGANIZATION of Mississippi Valley Network and North Central Broadcasting System, both controlled by John W. Boler, owner of KSJB Jamestown, N. D., and KVOX Moorhead, Minn., probably will include purchase of WAIT Chicago, 5 kw independent, from Gene T. Dyer, Mr. Boler revealed Friday. Purchase price reported at \$600,000.

Mr. Boler, confined to Presbyterian Hospital, Chicago, after being stricken with gall-bladder attack while en route by plane from Washington to Chicago Wednesday, said WAIT purchase negotiations should be completed by today. He just recovered from measles.

Mr. Boler said \$2,000,000 to refinance MVN and purchase WAIT being advanced by group of eastern underwriters. Reorganization will see divorcement of MVN from NCBS, with transfer of majority—possibly all—NCBS stock to MVN. In that case NCBS Chicago and New York offices would be closed, MVN headquarters maintained in St. Paul. NCBS owns exclusive recording rights to "Joe Palooka"

THRU JETT'S EYES

COMMISSIONER E. K. Jett, former chief engineer of the FCC, and the official principally responsible for the basic allocations covering television and other high frequency services, had this to say about the fight telecast:

"NBC and all who participated in bringing the Louis-Conn telecast to Washington are to be congratulated on the fine technical performance and excellent production technique employed."

ARRANGEMENTS COMPLETED FOR ATOM BOMB TEST

FINAL arrangements for broadcast of atomic bomb test at Bikini atoll June 30, with Bill Downs, CBS correspondent representing four networks for pool broadcast from plane immediately following bombing plane, completed Friday.

First four-network broadcast will take place 3-3:05 p.m. picking up take-off of bombing plane on first of its four 15-minute test runs over target. Bomb is scheduled to be dropped on fourth run, with five runs maximum. If bomb is not dropped on fifth run, because of weather conditions, test will be postponed.

Networks have cleared time between 6 and 7 p.m. for actual description by Mr. Downs from plane and sound of explosion when bomb is dropped. At 8 p.m., after returning to headquarters at Kwajalein Island, Downs will be heard on all networks interviewing bomber and pilot of bombing ship.

TEXAS VIDEO GRANT TO CARTER PUBLICATIONS

CONSTRUCTION permit for television station authorized by FCC Friday to Carter Publications Inc. (WBAP), Fort Worth, Tex. Permit calls for Channel No. 5 (76-82 mc); effective peak power radiated: 30.4 kw (visual and aural); effective antenna height above average terrain: 500 feet.

Grant first issued for television station in Southwest; brought to 27 number of video stations operating or authorized.

WLIB PLANS SALES CHANGE

NEW sales policy to be installed by WLIB New York, according to Jackson Leighter, recently named president of station by Mrs. Dorothy S. Thackrey, owner. Sales change eliminates two positions, Mr. Leighter said in connection with resignations last week of Ed Twamley, general manager, and Robert M. Scholle, sales vice president. No replacements planned, he added. Taking office today as station manager, new post, is Lou Jacobson, onetime WGN Chicago producer. Mr. Leighter

People

J. J. ROBBINS, music publisher, resigned from board of directors ASCAP because of recent withdrawal of Robbins-Miller-Feist Music Corps. Will be succeeded by Abe Olman, who also took over Robbins Music Corp.

WILLIAM WILSON, Jr., ABC sales promotion staff, named WENR Chicago local and ABC spot salesman. Mr. Wilson joined ABC Central Division September 1945, previously employed as assistant to district sales manager National Gypsum Co., Chicago.

BARRON R. PROCTER, chief accountant and office and personnel manager of Lennen & Mitchell, New York, elected controller.

EDWARD J. CONTENT, WOR engineer and acoustical expert since 1926 will leave station July 6 to form own business as acoustical consultant and studio design specialist. Mr. Content responsible for acoustical job don for UN Security Council meetings at Hunter College, is now consulting for UN meeting at Lake Success.

HITS CAB-HOOPER PLAN

ARTHUR C. NIELSEN, president A. C. Nielsen Co., Chicago, Friday said of CAB intention to discontinue own rating service July 31 and switch to C. E. Hooper Inc. rating (see story page 46). "I see no great significance to the arrangement because it fails to give CAB subscribers anything which they could not sacure by purchasing Hooper's service in the ordinary manner." Further added that each member of the CAB committee would be tendeed invitation to visit Nielsen Co. to investigate mechanical index before subscribing to Hooper.

FELTIS ADDRESSES AFA

HUGH FELTIS, Broadcast Measurement Bureau's president, listed five ways advertisers and agencies can use forthcoming BMB audience measurements in speech last Saturday to Advertising Federation of America meeting at Swampscott, Mass. Points were: (1) To evaluate stations in terms of total audiences, audiences within given areas or cost per thousand listeners; (2) to pattern radio campaigns according to product distribution; (3) to help advertisers coordinate different media; (4) to promote progams more effectively, (5) to foster dealer tie-in advertising.

DU MONT CONGRATULATES

DR. ALLEN B. DU MONT, president of Du Mont Television, wired congratulations to Niles Trammell, NBC president: "Congratulations to you and the entire NBC television staff for the masterly handling of the Louis-Conn broadcast. We provided television receiving sets for more than 1000 of our people and they were unanimous in their praise of the quality of the image and the skill with which the job was done. Television received a great impetus."

comic strip.

Under proposed plan MVN will be incorporated *de facto* in Illinois. WAIT, if purchase goes through and FCC approves, will become origination point for MVN's *Town and Country Time*, full hour farm program now aired from WLOL, said Mr. Boler. Other considerations enumerated by him include purchase of KVOX by MVN. Mr. Boler said he would retain KSJB, have substantial share of outstanding stock in new organization, plus board membership.

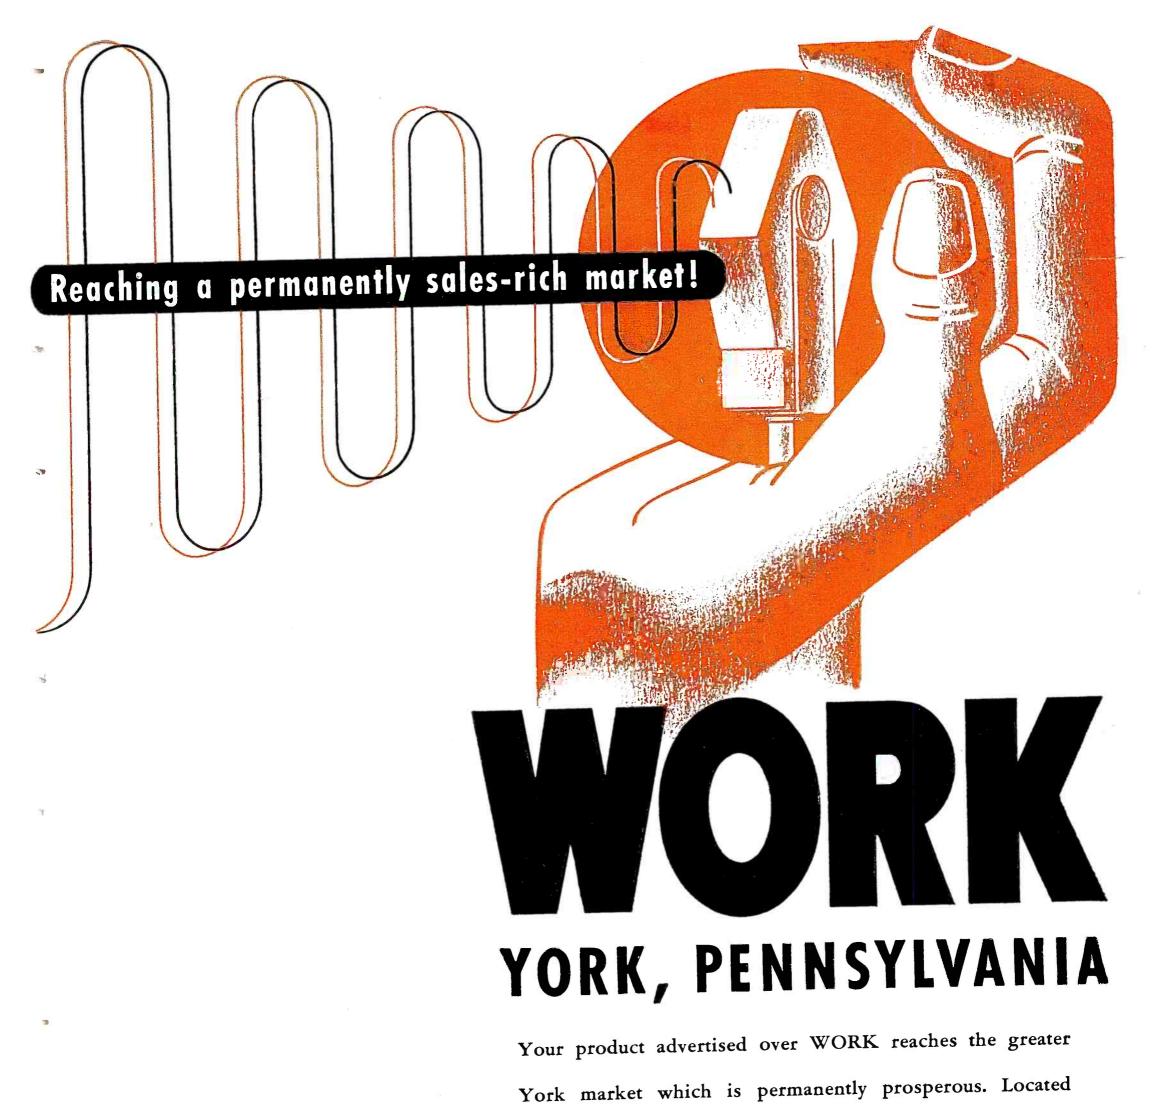

MVN claims 70 affiliates. NCBS as a sales organization and regional network, operates 23 affiliates. Mr. Boler said he holds 10-day option on WAIT purchase.

Page 102 • June 24, 1946

said appointment was made with FM and television in view.

FCC GRANTED renewal of licenses for period ending May 1, 1949 to KPQ Wenatchee, Wash.; KVI Tacoma, Wash.; WSUN St. Petersburg, Fla. An additional 75 stations on temporary license were given further extensions to Sept. 1, 1946, pending determination upon applications for renewal. In FM field, following were extended upon a temporary basis only until Sept. 1, 1946: WFMN Alpine, N. J.: WMIT Winston-Salem; WNYC-FM New York; WGTR Boston; WMTW Boston. Another 29 FM stations on temporary were further extended until Sept. 1, 1946.

SENATE late Friday passed State, Justice and Commerce 1947 appropriations bill, restoring \$9,284,778 for State's Office of International Information & Cultural Affairs (including shortwave), also including: amendment limiting State Dept. to purchases of 75% of international shortwave station time without licensee consent. Bill now to conference (earlier story page 20).
