

Here's what "Big Time" buyers say about WCOP's new power

GILLETTE SAFETY RAZOR COMPANY BOSTON, U.S.A.

July 5, 1946

Harry D. Goodwin, Promotion Manager Station WCOP Copley Plaza Hotel Boston, Mass.

.

It certainly was good to have WCOP increase its power to Dear Mr. Goodwin:-5000 watts. As the key ABC station in this area, broadcasting our regular Friday night boxing bouts and other sports events it gives us coverage in important metropolitan markets that we were not reaching previously.

More and more power to WCOP.

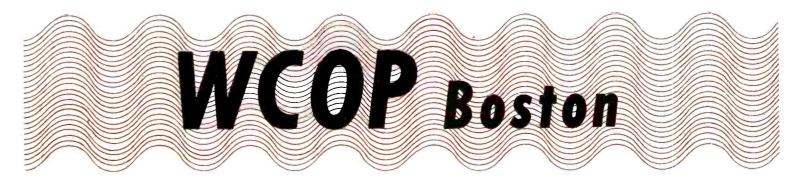

Cordially yours, J. J. Lambert

Asst. Advertising Manager

With ten times more power than formerly, WCOP's new 5000-watt signal carries an advertiser's message to every corner of the Greater Boston area — a market of 3,000,000 people. Right along with it goes WCOP's intensive merchandising service. That's why WCOP adds up to the shrewdest buy in Boston for your

advertising dollar!

JJL/W

A Cowles Station Exclusive American Broadcasting Company Outlet in Boston

Us you were

These are familiar words to a lot of ex-soldiers, and their wish to get back—as they were—has pushed retail clothing sales in the Nashville area to a new high ... Even before the war, sales amounted to almost 15 million dollars annually ... This is just a sample of the strong retail market that is effectively covered by WSIX. So, whether yours is a new product, or a longestablished one try the buying power of our great audience. Your answer to sales success in Nashville is WSIX.

... WSIX gives you all three: Market, Coverage, Economy

BROADCASTING... at deadline 747

SEVERAL COURSES open to FCC on application for involuntary transfer of KOB Albuquerque back to Board of Regents of New Mexico College of Agriculture and Mechanic Arts [BROADCASTING, Sept. 2], but early positive action considered unlikely. One reason: Litigation involved, and FCC doesn't like to act in such cases until litigation settled. Since transferor's portion of application unsigned, Commission could return it as incomplete. But there is precedent for outright dismissal extending at least as far back as 1939 when FCC dismissed voluntary transfer application because transferor had not signed, even though it contained sales contract.

HOPE held by some network sources that NBC, CBS and others may get together to present united front in their opposition to present wording of FCC's proposed liberalization of rule requiring identification of recordings. Most big broadcasters want name talent identified, claim NAB's endorsement of present proposal came after failure to agree on suitable substitute. Although deadline for briefs has passed, date not yet set for oral hearings [BROADCASTING, Sept. 2]. (For AFRA viewpoint see story, page 83.)

AROUSED group of NBC affiliates blocked plan of network sponsor to charge dealers for privilege of getting a local tie-in announcement during program. Understood sponsor planned to assess dealers a sum far in excess of affiliates' own rate card charge for these cut-ins. Affiliates recalled past complaints by local stores based on alleged deception by national sponsor in making them believe they would participate in network cooperative whereas they merely got one cut-in announcement during half-hour program,

BELEAGUERED radio manufacturing industry up against it again. Strikebound Monsanto and Bakelite plants, which supply bulk of plastic for tube bases, have slowed down set production to pre-reconversion walk. Tube inventories, with two to seven day supply, may dry up and blow away anytime, according to informed trade sources. Production in June and July eclipsed prewar record at nearly 1,400,000 sets per month.

Upcoming

- Sept. 9-10: NAB Small Market Stations Executive Committee, Hotel Statler, Washington.
- Sept. 9, 16, 23: BMB Pre-Publication Clinic, WGN Chicago.
- Sept. 11: Brand Research Foundation, regional meeting, San Francisco.
- Sept. 19-22: Affiliated Advertising Network annual meeting, Salt Lake City.
- Sept. 23: NAB Employe-Employer Relations Committee, Statler Hotel, Washington.

(Other upcomings on page 48.)

Bulletins

WBAX Wilkes-Barre asked FCC Friday for switch from 1240 to 590 kc and power increase from 250 w to 1 kw, directionalized, fulltime.

LICENSE renewals granted WWDC Washington and KGKB Tyler, Tex., by FCC Friday. WWDC, on temporary license since Oct. 1, 1945, given renewal ending Feb. 1, 1948; KGKB, on temporary since Dec. 1, 1945, renewed to Aug. 1, 1948.

FORD PRO GRID TELECASTS

FORD MOTOR Co., Dearborn, Mich., reported negotiating to sponsor telecasts of New York Yankee pro football games this fall on WCBW New York, CBS station. Mel Allen, sportscaster, will do play-by-play of Columbia U. football games which Ford is sponsoring on CBS video station beginning Sept. 28. Agency, J. Walter Thompson Co., N. Y.

Business Briefly

OLD GOLD FOOTBALL . P. Lorillard Co., New York (Old Gold cigarettes), beginning Sept. 30 for football season sponsor broadcasts of New York Giants professional games on WHN N. Y., Sunday afternoons. Red Barber and Connie Desmond do play-by-play descriptions. Agency for Old Gold, Lennen Mitchell, N. Y.

CAMELS ON CBS • R. J. Reynolds Co., Winston-Salem, N. C. (Camel cigarettes), bought 7:30-8 p.m. Saturday night on CBS, starting Oct. 12, sponsoring Vaughn Monroe 52 weeks. (Monroe summer replacement for Abbott & Costello). Agency, William Esty & Co., N.Y.

SPECTOR FOR STAZE

Staze Inc., New York (Staze denture adhesive and Okaze, denture cleanser) appointed Raymond Spector Inc., N. Y., to handle advertising; includes radio.

HAT SPONSOR 🗢 Lee Hat Co., Danbury, Conn., Sept. 8 started weekly transcribed repeat of ABC's Drew Pearson on KFWB Hollywood. Agency, William H. Weintraub & Co., N.Y.

MORE RADIO PLANNED • H. C. Bohack Co., Brooklyn and Long Island chain stores, appointed Mihic & Smallen, N. Y., to handle advertising, effective Oct. 1. Firm currently using participations on Mary Margaret Mc-Bride show, WEAF New York and sponsors quarter hour on WGBB Freeport, L. I. Company plans to expand radio in near future.

RCA board Friday declared 87½ cents per share dividend on \$3.50 cumulative first preferred stock, July 1-Sept. 30 period, payable Oct. 1 to stockholders of record Sept. 16.

FCC Proposes New Radio Employe Report

CALLING for information on employes' scheduled and overtime hours as well as their pay, proposed revised form of Schedule 13 of annual financial report of networks and licensees (FCC Form 324) revealed by FCC Friday.

Revision, first in about eight years, designed

filled out by network and key stations only.

Copies of proposed revision sent to NAB and licensees. FCC scheduled informal conference Sept. 20 "pursuant to requests by interested persons for opportunity to present comments." Dallas W. Smythe, FCC assistant chief accountant in charge of economics and statistics, slated to conduct conference in Room 2232, New Post Office Bldg., Washington, at 10 a.m. Interested persons invited. Besides getting data on number, hours and compensation of employes, revised form provides more specific occupational classifications. Forms ask for total number of weekly hours scheduled for each class of employes, total compensation for those hours, and similar data on unscheduled overtime hours and overtime pay.

SEQUEL TO CBS vice presidential appointments (see page 14) is strengthening of network's strategy planning board at New York headquarters. Moving into offices next door to President Frank Stanton are Joseph H. Ream, senior vice president and secretary, and Frank K. White, vice president and treasurer. Three worked closely together as wartime vice presidents under Paul Kesten.

SOMETHING new will be added to Mutual special events. With recent resignation of Tom Slater, who has joined Ruthrauff & Ryan as account executive, A. A. Schechter, MBS vice

(Continued on page 85)

to get more specific and meaningful data which will provide statistics of use to FCC and other agencies such as Labor Dept. and its Bureau of Labor Statistics, authorities explained,

Recognizing differences between operation of networks and key stations as compared with other stations, proposed Schedule 13 composed of three parts instead of one.

Proposed Schedule 13-A would be filed by all broadcast stations and networks; covers all but non-supervisory program employes. Schedule 13-B, for all but network key stations, calls for data on non-supervisory program employes and is divided into two sections, one covering staff program employes and one covering free-lance program employes. Schedule 13-C similar to 13-B but would be

As in present Schedule 13, data is for one specific week (week ending Oct. 12) and includes usual questions as to number of employes in each class and number in various pay brackets.

ANNOUNCING

RADIO STATION UPOA

"Radio Hawaii"—KPOA—on the air September 15, offers new sales power to advertisers and new enjoyment to listeners in Hawaii—a major market with population of over half a million.¹

KPOA sits solidly in this Hawaiian market—a market as American as hot dogs and baseball and as near to you as your telephone. Hawaii is an American market buying American cigarettes and cosmetics, drugs and gasoline and automobiles. It is a major market with retail sales totalling \$427,000,000 ²—bigger than that of Pittsburgh, Cleveland, Seattle or San Francisco ³—all major markets, too.

Hawaii wants your products. Department of Commerce statistics show that in 1940 Hawaii was fifth biggest buyer of mainland products—fifth only to the world's largest nations. Since 1940, population has increased; tourist trade now is expected bigger than ever; Army and Navy installations will remain stronger now than before the war.

The best time is available *today*. Take advantage of present availabilities. Build a valuable franchise in this major American market. Call or wire your nearest Petry office.

A MAJOR Market Now and still growing!

Civilian Population:	502,122
Retail Sales: \$42 (Based on 1945 Sales Tax Collections	7,387,316)
Per family effective buying income:	\$6,043
(U. S. National Average:	\$4,061)

In Nebraska's second market, only one radio station makes it a policy to serve that market alone. That's KFOR. People in the Lincoln area know that KFOR is constantly on the job serving them with well-produced local programs that appeal directly to them. They know that KFOR keeps them well informed with intelligent news broadcasts and far more special features in the public interest than any other station

So listeners in the Lincoln area keen their dials set at 1240, KFOR, the station that serves them best. You can sell this loyal audience at very low cost. Contact KFOR or Edward Petry for availabilities in spots and local shows that can do the job for you competently and effectively.

Feature of Week

WM. HENGERER Co., Buffalo department store, has completed its second year of broadcasting *Early Date*, which it calls "the most succesful and most expensive single radio program of any department store in the United States."

The 9:15-9:45 a. m. audience participation show, heard over WBEN Buffalo, has a Hooperrating of 12.4, highest daytime score in Buffalo. Originated by the store's advertising manager, Julian Trivers, the program is produced in the store's tea room, where an audience of 150 attend daily and are served breakfast after the broadcast. The tea room is booked three weeks in advance.

The show includes contests, gags, quizzes and prizes. Its for-

POW Commercial

PERHAPS in the delusion that the jingle was a Broadway hit, a gang of German prisoners of war used to while away the hours chanting "Super-suds, Super-suds. . . Lots more suds from Super-suds." So reports Dick Shepard, advertising salesman at WKXL Concord, N. H., who was stationed at a POW camp. They did mighty well on the melody, but weren't too sharp on the words, he said. mat differs each day because much of the show is ad libbed, but its four principals maintain the same flavor. They are: Clint Buehlman, announcer and gag man; Esther Huff, official hostess who does commercials and participates in gags; Norman Gray, pianist, and Wally Nehrling.

Commercials are both institutional and merchandising with a particular merchandise theme usually dominating an entire week. Opening of the store's college shop held the spotlight for a solid week. Three commercials a day, 15 a week are used.

Many charitable, fraternal and civic groups in Buffalo approach the store for interview time on *Early Date*. Woven into the show, their messages come as informal appeals and results are reported excellent.

Hengerer's believes in concentrated promotional effort. That is why it puts everything into its own program instead of using scattered announcements on different stations. "It is our opinion," said Mr. Trivers, "that a radio presentation in a department store must compete on an even basis with the best the networks can offer. People living in Buffalo or any other city will tune in only what they consider superior listening."

Breakfast Club, which competes with Early Date, has a Hooperrating of 9 throughout the country, but drops to 3.5 in Buffalo.

Sellers of Sales

F OUND: One of the youngest time buyers in an advertising agency. Youngest from the point of service as well as age, Mary Veronica King ably handles time buying for Kudner Agency, New York.

Born Oct. 26, 1921, in New York City, she moved at the tender age of 2 with her parents to Elizabeth,

New Jersey, and has lived there ever since.

She attended parochial schools and has taken a number of graduate courses at Fordham U. under the private tutoring of Father R. J. Gannon. Her first job was in the accounting department as a newspaper checker of the Kudner Agency in 1940. Six months later she was appointed to take charge of radio and magazine billing for the agency, and a few months later was appointed radio and magazine billing head. On June 1, 1946, she was named time buyer.

campaign for *Collier's* magazine, which currently uses 69 stations in 14 markets. The account expects to expand its schedule soon. It currently spends about \$10,000 per week on radio billing.

Swimming during the summer, reading in her spare time, and going to the legitimate theatre are just a few of Miss King's

outside interests. Musical - comedies are her favorite, although she has s e e n practically everything now on Broadway.

She is also the past president of her community's Parsa Sodality and is ac-

Located in one of the fastest growing cities in the east. Covers prosperous Delaware, Southern New Jersey, parts of Pennsylvania, Maryland and Virginia.

VOL. 31, NO. 10

WASHINGTON, D. C., SEPTEMBER 9, 1946

FCC Expected to Seek Larger Budget

Backlog Piles Up As Reduction Is Ordered By RUFUS CRATER

MORE FUNDS for 1947 to permit employment of more personnel was seen in industry and semi-official quarters last week as the only solution for FCC in its still-losing battle to catch up on broadcast applications.

While FCC sources have not commented, the approach of the Sept. 15 deadline for submitting budget requests to the Budget Bureau brought speculation that the Commission, which during the current year is operating with an appropriation of \$5,560,000, probably would ask for around \$7,000,000 for the fiscal year starting July 1, 1947.

Expansion Needed

It is conceded in broadcasting circles that there is little hope of "catching up" on pending and still-coming applications unless the Commission is permitted not just to retain but to expand its present strength. More space is needed, too.

Despite a record turn-out of actions on all types of broadcast matters since the wartime freeze policy was lifted last October, the steady flow of applications continues to pile up a bigger and bigger backlog awaiting Commission action.

Last Oct. 8 the Commission was faced with 1,148 applications for new stations-standard, FM, and television. There have been more than 800 grants for new stations since that time. Even so, the number of new-station applications today stands at approximately 1,300, although in recent weeks FCC has managed to get out decisions at about the same or perhaps a slightly better rate than that at which new requests were filed. These figures do not include applications for changes in facilities, transfers and assignments, renewals, experimental operations, common carrier matters, and assorted others that come before the Commission. If FCC is still losing ground in its fight to clear up the backlog, informed observers ask, then how can there be hope for improvement next year—or the year after, if the pace of filings continues at the expected rate-without material increases in funds and personnel to handle the increased work load? Chances of any consequential drop-off in the rate of filings are considered slim almost to the point of being nonexistent. Applications for new AM stations have come in unexpectedly large numbers, but they continue to come. No let-up has been seen in FM applications, nor is any expected. Rather, development of FM is expected to bring increasing numbers of applications to get into the new field.

Only in television, among new broadcast applications, has there been any substantial lessening of the tempo. Scores of applicants have dropped out voluntarily, due largely to the cost and to the controversy over black-and-white and color. At present there are nearly 50 video applications before the FCC, and 28 construction permits have been issued to others.

Several possibilities loom to indicate greater activity at the Commission during the coming year, aside from the evident present interest in broadcasting. One is the prospect of opening up the 540 frequency and the flurry of applications which would follow such a development. Another is the possibility of a breakdown of at least some of the clear channels, which would bring another flurry.

FCC Unaffected

Personnel reductions recently ordered by the Budget Bureau among various U. S. agencies are not expected to affect FCC materially. In view of last week's Budget Bureau edict, which called for a lopping-off of a total of 159,786 workers by a number of agencies by Nov. 16, it was understood the Commission might lose "a few." But FCC's personnel is already somewhat under the authorized ceiling, primarily in the number of field employes, and it was thought this shortage would more than make up for the number which might be "lost" as a result of the Budget Bureau's order.

The Commission at present has an estimated 1,200 to 1,300 employes in all its divisions, with some 800 of these employed in Washington.

\$5.00 A YEAR-15c A COPY

It was pointed out that besides more personnel, the Commission needs relief from the overcrowded conditions in its Washington headquarters. Files overflow into hallways in many instances, for example. Some members of the law department have "offices" in the library, and in some cases it is necessary for two persons to do their work at a "one-man" desk.

303 Authorized

The score on new station grants shows 303 AM stations authorized this year. In FM there have been 519 conditional grants of which approximately 236 have been made regular construction permits. In television, 28 grants have been made.

Another three- or four-month hearing calendar this winter is considered an inevitable follow-up to the 250-case calendar drawn up late last month covering the period from Sept. 4 to Nov. 26 [BROAD-CASTING, Aug. 22, 26].

Petrillo Strike Threatens Remotes

New York Hotel Tie-Up Spreads to Other Chain Cities

RADIO FACED the possibility of being deprived of remote music from hotels and night clubs, as BROADCASTING went to press, unless the New York-night club strike called by Local 802, American Federation of Musicians, was settled.

James Caesar Petrillo, AFM president, said in New York Wednesday that the strike was "a local situation, and I am taking no part in negotiations." But by Thursday it had spread to Washington and Chicago and threatened other cities where hotels are operated by the same corporations which operate New York hotels and night spots where the AFM had struck. to a raise, that while he was taking no part in the negotiations, the AFM would support Local 802.

So far radio has been little affected by the strike. In New York the four major networks said there was virtually no interference with schedules. In a few instances remotes originally scheduled from New York hotels or night clubs were replaced with feeds from affiliates in other cities.

CBS officials said the strike had given that network "practically no interference" with programming.

MBS reported there are "still more than enough sources of muBlackstone, CBS switched the pickup to another hotel.

Networks said they anticipated the New York strike and scheduled remotes from other cities. Should the strike become nationwide, however, it would seriously affect late night schedules which are almost entirely dependent on name bands from various night spots throughout the country.

West Coast Not Affected

West Coast network operations had not been affected. Top officials pointed out that the fourhour differences in time between PST and EDST make eastern band remotes useless to programming needs on the West Coast. Consequently there have been no remotes originating in the East which had to be replaced. The strike had not reached the West Coast. In Chicago, remotes by Ted Straeter's orchestra, playing in the Empire Room of the Palmer House, and the Ginsberg ensemble from the Victorian Room of the same hotel were cancelled on WGN-Mutual when Petrillo ordered the musicians out. Clyde McCoy's or-(Continued on page 83)

Returns to Chicago

Mr. Petrillo returned to his Chicago headquarters after his New York trip. He was quoted in published dispatches as saying the strike would be "settled in a few days." He couldn't "understand the attitude of the hotel owners in holding out," he said, and added that the musicians were entitled sic," although Mutual was deprived for the first time in years of Ralph Ginsberg's chamber music from the Palmer House in Chicago.

ABC reported it had no remotes scheduled from New York hotels that were affected by the strike.

NBC officials reported no difficulties in filling schedules.

CBS, through WBBM Chicago, had scheduled a pickup from the Stevens Hotel but when the Chicago Federation of Musicians, of which Mr. Petrillo also is president, ordered its members out of the Stevens, Palmer House and

Despite OPA Troubles Porter is Still on Job

PRICE ADMINISTRATOR Paul A. Porter, who has been having his troubles with decontrol and other phases of the new OPA Act, has not yet asked to be relieved of the job, President Truman said Thursday.

The president added that he did not think Mr. Porter will make such a request. BROADCASTING, Sept 2, said that Mr. Porter is expected to return to the FCC chairmanship by Jan. 1. Acting Chairman Charles R. Denny Jr. would revert to a commissionership.

Husing Contract

TED HUSING, former CBS director of sports, has signed a fiveyear contract with WHN New York calling for his services as a platter turner on a series of daily programs beginning Oct. 28 to be heard from 10 a. m.-12 noon and 5-6:30 p. m. Program will be known as Ted Husing's Bandstand. Contract is understood to call for a minimum salary of \$260,000 for the five years. Mr. Husing also will share in program profits. At one time Mr. Husing was a WHN announcer and broadcast the Columbia U. football games on that station.

Time Firm Drops

ELECTRONIC TIME Inc., New York, has been granted dismissal without prejudice of application to build developmental AM station to broadcast time of day for reception by watch-size receivers. Action was taken by Commissioner Walker at Aug. 30 motions hearing. Applicant told FCC it was interested in more feasible plan for proposed experimental station operation. New system would use existing FM station. Original application set for hearing Sept. 9, based on broadcast of time on 25-30 mc band to watchsize receiving sets to be made by Belmont Radio Corp.

Ford Drops ABC

FORD MOTOR CO. will relinquish the time of its Ford Festival of American Music on ABC Sun. 8-9 p. m. effective Sept. 22. Advertiser will not renew the show on any other network. The show was handled by Kenyon & Eckhardt, New York. Ford Motor Co., however, will sponsor the Dinah Shore Show Wednesday nights on CBS through J. Walter Thompson Co., New York.

Gammons, Meighan Elected To Vice Presidencies at CBS

Mr. GAMMONS

EARL H. GAMMONS, director of CBS Washington office, and Howard S. Meighan, CBS director of station administration in New York, last week were appointed vice presidents of the network.

In radio since 1924, Mr. Gammons has been with CBS for 15 years. Shortly after his return from service in World War I, Mr. Gammons joined the Washburn Crosby Co., which bought WLAG, now WCCO Minneapolis-St. Paul, and in 1933 was made general manager of the CBS affiliate. In July 1942, he was transfererd to Washington as director of the CBS office in the Nation's Capital. He will continue in that position. Mr. Gammons has served several times as director of the NAB.

Mr. Meighan has been identified with radio since 1928, when he joined the J. Walter Thompson Co. A year later he was transferred to the agency's radio de-

Mr. MEIGHAN

partment, leaving in 1930 to become vice president in charge of station relations for Scott Howe Bowen. In 1933 he joined J. Stirling Getchell Inc. as head of agency's radio department and a year later joined CBS as an account executive in Radio Sales, the network's spot broadcasting division. Five years later he was advanced to eastern sales manager of Radio Sales and in August 1945, was appointed director of station administration in which position he will continue.

Video Weather

BORDEN Co., New York (Reid's Ice Cream), will sponsor 60-second televised weather forecasts on WCBW New York (CBS) three times weekly, starting Sept. 15. Filmed animations of 60 weather situations will be used. Account placed through Doherty, Clifford & Shenfield, N. Y.

WNOX 'Spots'

COMMERCIAL spot announcements for studio audience only is unique plan adopted by WNOX Knoxville, Tenn. When station found it necessary to give an extra performance of its Tennessee Barn regular Dance (aired Sat. 9 p. m.) at 7 p. m. for audience only to handle overflow crowds, idea caught on to make it like real show. A half-dozen commercial non - broadcast spots have been sold to local merchants, and the audiences like 'em.

Parker on CBS

PARKER PEN Co., New York, Oct. 2 starts Information Please 10:30-11 p. m. on CBS. The contract for the Dan Golenpaul package was placed through J. Walter Thompson Co., New York. The show was last heard June 18, 1945, on NBC under sponsorship of Socony-Vacuum Oil Co., New York, through Compton Adv., New York. The time 10:30-11 p.m., currently used by Nash-Kelvinator through Geyer, Cornell & Newell for its Kurt Massey Show, will be dropped. The pen company was reported to have contracted to pay Mr. Golenpaul \$11,000 a week for the show.

Gillette Signs

GILLETTE SAFETY RAZOR Co., Boston, Sept. 18 will sponsor telecast of the heavyweight championship boxing bout between Joe Louis and Tami Mauriello on WNBT New York, NBC television station. Fight will be held at Yankee Stadum, Bronx, N. Y. Agency for Gillette is Maxon Inc., New York. Bout is also to be sponsored by Gillette on ABC [BROADCAST-ING, Sept. 2].

Launderall Plan

F. L. JACOBS Co., Detroit (Launderall, automatic home laundry unit), has announced a cooperative advertising plan to include radio and which is designed to "encourage and assist" Launderall dealers in conducting essential local advertising campaigns. Fund of advertising allowances, on per unit basis, of \$2 from factory, \$2 from distributor and \$4 from dealer, would

Cole Signs 55

COLE MILLING Co., Chester, Ill., will sponsor *Smilin' Ed McConnell* on 55 MBS southern stations, effective Sat. Oct. 5 10-10:15 a.m., to advertise its Omega flour. Contract was signed several months ago but was suspended because of Government wheat extraction regulations. Agency is J. Walter Thompson Co., Chicago.

Drawn for BROADCASTING by Sid Hix Be "They're setting up circuits for the UN Peace Conference in here." N

be spent for radio, newspaper, billboard and sign advertising.

Conti Renews

CONTI PRODUCTS Corp., Brooklyn, has renewed the Thurs. 6:30-7 p. m. time on Mutual starting Oct. 3 for 26 weeks. Advertiser currently is sponsoring *By Popular Demand* until mid-November, at which time it may sponsor *The Treasure Hour of Song* or retain the present Ed Wolff package. Decision will be made by the agency, Berminghan, Castleman & Pierce, New York.

Eight Programs Carried on Pulse Signal

Multiplex System Demonstrated By Federal

EIGHT individual programs were broadcast simultaneously over a single radio frequency (930 mc) last Thursday in a press demonstration of the Pulse Time Modulation method developed by Federal Telecommunication Labs., scientific research affiliate of International Telephone and Telegraph Co.

The broadcast, a preview of a demonstration to be given today to representatives of the FCC, the Army, the Navy and other Government agencies, was described by the company as "the world's first demonstration of multiplex broadcasting, of broadcasting by PTM, and of broadcasting by microwave."

Pulse time modulation is a type of radio transmission involving the sending of a series of short bursts, or pulses, each approximately onehalf millionth of a second in duration. Unlike AM, which involves modulating the strength or amplitude of the wave, or FM, in which the rapidity of vibration, or frequency, is modulated, PTM waves do not change in amplitude or frequency, but achieve communication by varying the time interval between the pulses.

Programs 'Sampled'

Allowing for those variable timelapses between pulses, the PTM transmitter sends out several hundred thousand pulses a second. In theeight-program transmission used in the demonstration, each program was "sampled" 24,000 times a second. Received on a pushbutton receiver permanently tuned to the signal frequency on which all are broadcast, the individual program selected by the listener is heard as uninterrupted sound, the listener's ear putting together the 24,000 individual pulses into a composite whole as smoothly as the viewer's eye combines the individual frames of a motion picture into continuous action.

To show the versatility of the system, the demonstration included pickups of a live voice news commentator, a rebroadcast of an AM program, a rebroadcast of an FM program, a Muzak transcription, a musical recording, teletype similar to that used by the news services, a Dow Jones news ticker and a *New York Times* telephoto and facsimile transmission. the demonstration tour began, to the Federal Laboratories at Nutley, N. J., where the group witnessed the reception of the various programs.

Designed as a means of freeing broadcasting from the program service limitations imposed by the lack of available frequencies in the lower parts of the radio spectrum where AM and FM broadcasting is now located, PTM operates in the ultra-high frequencies where more space is available. Since transmission at these frequencies is limited to the line-of-sight horizon from the transmitter site, PTM offers the further advantage of allowing all broadcast services in a community to come from a single transmitter, located at the best position in the community, probably the top of the tallest building.

The eight programs transmitted in the demonstration occupied approximately three megacycles, the IT&T engineers said, adding that from 12 to 16 programs could have been broadcast in the five-and-ahalf-megacycle band employed in the transmission. With a wider band the number of programs that could be sent simultaneously from a single transmitter might number as high as 100, it was stated.

Also, since the facsimile and teletype transmissions require less band width than the 9,000 cycles allotted each audio band, it would be possible to transmit three facsimile programs and 50 teletype programs simultaneously, along with the other program services, without expanding the bands assigned them in the demonstration. Reception was through a parabolic antenna at Nutley, directed at the New York transmitting antenna. With all broadcast programs originating from a single source, in general use of PTM, each home or apartment building would use a directional receiving antenna focused on the transmitter, affording the maximum quality of reception with a minimum of interference.

Any number of satellite receivers can be connected to the same antenna and radio frequency receiving equipment, it was explained, so that by pushing different buttons different programs can be received on the various sets in a home or apartment building. Produced in like quantities, PTM receivers

(Continued on page 84)

Microwave Opens Up Radio Channels

Multiple Transmissions In S-H-F Conducted By Raytheon

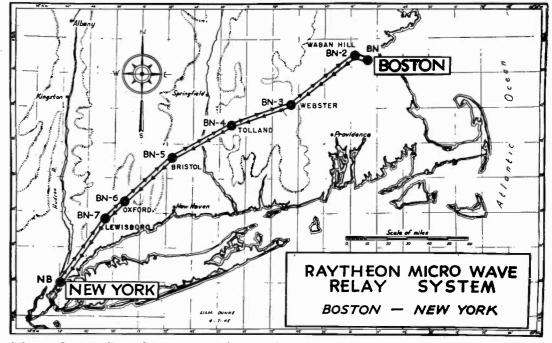

EXPERIMENTS in microwave transmission on 4,000 mc, conducted last Thursday by Raytheon Mfg. Co. and Radio Inventions Inc. proved the feasibility of multiple transmissions simultaneously on the same frequency, officials reported.

With terminal points on top of the Lincoln Bldg., in New York, and at Raytheon's Waltham, Mass., plant, automatic relay stations were located at Lewisboro, N. Y.; Oxford, Bristol and Tolland, Conn., and Webster and Waban Hill, Mass. Facsimile, voice and teletype messages were transmitted in the tests.

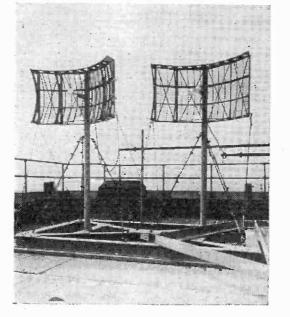

By using microwave relay in the super-high frequency spectrum, the available radio frequencies are multiplied many fold, according to Raytheon officials. FCC in June 1945 authorized the experiments after Raytheon presented a plan for a nationwide microwave relay network at general allocations hearings in 1944-45.

Reliable Service

J. Ernest Smith, manager of Raytheon's Microwave Communica-

Map shows Raytheon experimental microwave relay system between New York-Boston.

During last week's demonstration Hogan Faximile, with test equipment manufactured at Radio Inventions laboratories, utilized a 4.8-kc band within the 15-kc Raytheon channel for transmission of facsimile text, maps and photographs from New York. These were received with clarity at Raytheon's Waltham terminal.

Facsimile was transmitted at the rate of 3 linear inches or 24 square inches per minute. Signals were transmitted over wire lines from Mr. Hogan's laboratory at 155 Perry St., New York, to the Lincoln Bldg., where they were used to modulate a microwave transmitter. After the facsimile demonstration, a program from WOR New York was transmitted over the microwave circuit simultaneously with text from a teleprinter. Mr. Smith said "microwave stations may be beamed on opposite paths and be operated on the same frequency while located in close geographic proximity."

The last three were, of course, reproduced visually on appropriate receivers. The telephoto demonstration included transmission of a picture of the group taken at the IT&T Bldg. in New York, where the transmissions originated and tions Dept., predicted that microwave radio will provide reliable service day and night, since it is unaffected by sunspots and other vagaries peculiar to standard frequencies. "Through this medium it may be practical to serve communities not adequately provided with telephone, telegraph, radio, FM, FM facsimile or television coverage," he said.

John V. L. Hogan, president of Radio Inventions Inc., which developed the Hogan Faximile, declared that Thursday's demonstration was "only the beginning of a new era in record communication." Raytheon transmitting and receiving antennas at New York terminal.

He said that "with the 15-kc band which Raytheon's microwave system makes available, facsimile transmission with automatic synchronization at 2,000 words a minute becomes a realistic possibility."

Commercials Lead in Whan Studies

Oklahoma Adults Prefer Sponsored Network Broadcasts

NETWORK COMMERCIAL programs rank first among Oklahoma listeners over sustainers or local broadcasts, Dr. F. L. Whan, of the U. of Wichita, discovered in his annual study of listening habits for WKY Oklahoma City. Results of the survey, conducted in December 1945 and January 1946, were released last week by WKY.

Dr. Whan set out to determine which "educational" programs were preferred by Oklahomans. He asked the question: "What three educational programs do you like best?" Some 30% refused to answer but of the 60% who did, 50.2% listed commercial quiz programs as first choice.

Here's the way Oklahomans listed their preferences for "educational" programs: 21 quiz programs, 50.2%; 100 local programs, not news, 11.1%; 18 talks programs, 10.3%; 30 complete dramatic shows, 6.8%; 13 variety programs, without featured comedians, 6.7%; all local newscasts, 4.4%; 26 commentators, 2.8%; 15 serious music programs, 2.3%; 28 daily serial programs, 2%; 14 miscellaneous music shows, 1.3%; 9 featured comedians, 1.1%; 13 popular music programs, .8%; six war programs, .2%.

Dr. Whan learned that Oklahomans were not agreed as to "educational" programs, listing more than 290 different programs not including local newscasts. The foregoing data, said Dr. Whan, "reflects the great disagreement found or lack of uniformity in selection of 'educational programs'."

While more than 290 programs, exclusive of local newscasts, were named as among the best three educational programs, "approximately 81.2% of the 6,370 listings were concentrated in the top 50 programs, the survey revealed. Of the top 50, Dr. I. Q., Quiz Kids, Information Please, Take It or Leave It and Kay Kyser's College of Musical Knowledge ranked first to fifth respectively, with Chicago Round Table and American Town Meeting sixth and seventh.

Eighth in preference was Truth or Consequence, with Cavalcade of America ninth and Battle of the Sexes tenth. Pointing out that the figures are "biased toward better educated listeners," Dr. Whan concluded: "To educators it may be significant that The Lone Ranger was chosen by as many (as one of the best-liked 'educational programs') as was the first place symphony program; that Dr. I. Q. was selected by more than five times as many adults as either the Chicago Round Table or American Town Meeting; that Truth or Consequences was named by more than

twice as many farm listeners as was National Farm & Home Hour."

He added that adult listeners in Oklahoma "are indifferent to the matter of sponsorship when selecting the best-liked 'educational program'." Response to questions indicates, Dr. Whan explained, that Oklahomans "are unaware of any relationship between 'educational' value and sponsorship."

Of network programs, commercials were listed as preferred by 93.1% of those who replied to the educational question, with only 6.9% preferring sustaining shows. Local programs ranked 15.5%, giving network commercials 78.7% preference over all programs. Dr. Whan did not segregate local commercials from sustainers.

Of 16 types of programs listed, 64.1% of the women showed preference for comedians and 69.1%(Continued on page 83)

Radio Plays Important Part in Kansans' **Daily Lives**

RADIO plays an integral part in the daily lives of Kansans and is scheduled to become even more important as reconversion progresses.

That's the conclusion of a postwar study conducted last March by Dr. F. L. Whan of the U. of Wichita for WIBW Topeka, and released last week by Ben Ludy, station general manager. Under the general subject, "The 1946 Reconversion Plans of Kansas Families," the survey indicates little change in actual postwar accomplishments and plans over those anticipated in 1944 and 1945 when Dr. Whan conducted studies on postwar plans of Kansas families.

"The tables reflect a prosperity

TIME SHIFT EXPEDITER The Katz Agency Using Simplified Form For Semi-Annual Headache-

SPECIAL FORM for clarifying daylight to standard time changes of programs has been evolved by The Katz Agency, New York, station representative.

Stations represented by Katz used the form last spring in changing from standard to daylight time. The procedure eliminated much paper work and elicited favorable comments from agencies according to H. R. Goldberg, Katz official.

The form has two columns, one

headed "Present Schedule," the other, "Schedule Beginning Sept. 29, 1946." Under each are listed day and time, preceding program and following program. Since the columns are alongside each other, comparison between preceding and following programs under the two schedules may be readily made.

The station types in the form in triplicate for each account, sending original and second copy to the Katz office responsible for the account.

	pies for each account. Sen fice responsible. Station

Program	Minute	Break
Oper	ating Time as of Sept. 2	9, 1946:
Time Zone: Eastern	Central Mo	ountain Pacific
PRESENT SCHEDUL	E SCHED	ULE BEGINNING SEPT. 29, 1946

MIDWESTERN listeners generally are satisfied with today's radio fare, they prefer network commercials over all other programs, listen very little to so-called "public service sustainers" and particularly like quiz-type broadcasts in the "educational" category, Dr. F. L. Whan, U. of Wichita, learned in a study of Oklahoma for WKY Oklahoma City. A study of Kansas for WIBW Topeka revealed an era of prosperity, that radio plays an important part in the daily lives of Kansans, that 91.7% of Kansas families have radios in working order and 1,808 of each 10,000 Kansas families have definite plans to buy sets when they are available.

beyond the wartime expectations of Kansas family heads," said Dr. Whan. They show that fewer family providers lost their jobs than expected, that fewer retired, that a greater number found new jobs and that fewer were without work in March 1946 than expected it in January of either 1944 or 1945.

The latest Whan study shows that 91.7% of Kansas families have receivers in working order. In 1945 the percentage was 81.9% and in 1944 it was 89.9%. Percentage of radios not in working order dropped from 4.8% in 1945 to 3.4% this year. In 1944 the figure for sets out of order was 3.9%.

This year's study indicates a trend towards buying receivers. In 1944 a total of 6.2% of Kansas families had no radios. The following year the figure dropped to 6.1% and last March only 4.9% reported having no sets.

Dr. Whan projected his statistics from information gathered from 1,353 urban families, 1,152 village families (in communities of 2,500 or less), and 1,232 farm families. He used 52 selected areas and chose respondents at random.

Plan New Sets

Of each 10,000 families in Kansas, 1,808 had made definite plans in March to buy new radios, Dr. Whan's study shows. A year ago the figure was 2,204 and in 1944 it was 1,605. An additional 754 of each 10,000 families said they "expected to buy" new receivers. In 1944 those who expected to purchase new sets but had made no definite plans totaled 610 of each 10,000 families while in 1945 the figure was 859. If receivers were available today, 1,082 families of each 10,000 would buy them without hesitancy, the Whan study revealed. Last year 1,119 said they would buy immediately and in 1944 the figure was 765 of each 10,000.

NAB Convention to Air Licensing Policy

Complaints Bring Warning From Willard

By J. FRANK BEATTY

FCC has no authority to deny new station grants on the basis of economic factors, A. D. Willard Jr., NAB executive vice president, declared last week as NAB took formal recognition of complaints that FCC is indiscriminately licensing stations without regard to the size of the market.

Protection of a franchise by a Government regulatory body would involve control over the business, income and services of a station, Mr. Willard wrote W. E. Whitmore, manager of KGFL Roswell, N. M., who had written NAB in protest against FCC's licensing policy.

NAB opened the way for discussion of the problem at its Oct. 21-24 convention in Chicago.

The association's board of directors is on record in direct opposition to FCC consideration of economic factors in granting of new stations, having taken a definite stand at its Aug. 6-8 meeting [BROADCASTING, Aug. 12].

Repercussions Seen

Foreseeing economic repercussions from the Commission's policy, Mr. Willard explained that those who project broadcasting enterprises should exercise normal caution in selection of markets.

"If Joe Doakes is stupid enough to apply for a license for a new broadcasting station in a community which cannot support another facility, the Commission has no authority to refuse the grant for this reason," Mr. Willard stated.

First of all, Mr. Willard wrote, the Commission itself was forbidden in the Supreme Court's Sanders decision from taking into consideration as a separate and independent element any economic injury to an existing station in the granting of licenses to independent broadcasters.

He then explained that the Communications Act forbids the FCC from interfering with the rate structure or business structure of stations, specifically exempting broadcasting from the type of supervision FCC exercises over common carriers. Pointing to possibility of regulation amounting to mere policing, should the day come when ample wavelengths are available, Mr. Willard wrote: "Then, and then only, could we have a truly free American radio in the same sense that we have a free press-absolutely unfettered by any Government regulation concerning public interest, convenience and necessity."

ness regulation, the Commission "has on a number of occasions, by indirection, attempted to exercise some measure of control over the 'business' of broadcasting. The Commission's statements concerning the price of radio stations, concerning over-commercialism, etc., are examples. If we should go to Congress and ask for laws which would authorize the Commission to deny or affirm grants in consideration of economic factors, we would most certainly be inviting — and most probably would get - FCC authority to regulate the quantity of advertising, the charge for advertising, the sale price of radio stations, and so on."

Mr. Whitmore had written to NAB that "this indiscriminate licensing may well result in the breaking down of public confidence in an industry which has been regarded as presenting the highest type of public service to the people." He cited examples of station licensing in small communities which he said indicate "the Commission is forgetting its obligation to the public interest."

Text of Mr. Whitmore's letter to NAB, addressed to President Justin Miller and received before he had returned to Washington headquarters from his vacation, follows: Dear Sir:

I no longer feel that I can remain silent while the FCC is indiscriminately granting new AM permits with com-plete disregard to the economics of the situation. It seems to me that this indiscriminate licensing may well result in the breaking down of public confidence in an industry which has been regarded as presenting the highest type of public service to the people.

When the Commission grants one 5 kw, two 1 kw, and two 250 w stations in a town with a population of ap-proximately 18,000, I think the Commission is forgetting its obligation to the public interest. I feel that it is time that broadcast-

ers individually and through NAB should use every means at their disposal to have the Congress and the people express their opinions on this indiscriminate granting of facilities which will start cut-throat competition and innumerable failures of broadcasting stations in event of even a minor depression

While the Commission denies any in-

RISING volume of complaints has been coming to NAB headquarters from station owners aroused over rising number of FCC station grants in small cities where ability to support more than one or two stations in a practical problem. Involved is serious question of type of control exercised over industry. To clear up whole question, association has analyzed legal and operating angles in letter to a complaining station operator.

terest in the economics of broadcasting, their own yardstick says: public interest, convenience and necessity. The granting of five stations in a community that can barely support one is not in the public interest, is not a public necessity.

I have spent over 20 years in the radio business and I look with fear and trembling upon the economic repercussions from this indiscriminate use of the licensing power of the Commission. I intend to attend the convention in Chicago and if nothing is done before that time, I intend to be heard in committee or on the floor of the convention on this subject; although I do not feel that the matter should be allowed to continue until that time.

May I have your reactions to this let-ter as I feel that there has to be a stopping place somewhere in the granting of facilities?

Willard's Reply

Mr. Willard's reply to Mr. Whitmore follows:

Dear Mr. Whitmore:

First, let me say to you that we at the NAB are just as disturbed as you concerning the FCC policy of indis-criminate AM licensing. We feel almost certain, as you do, that the industry will feel some measure of economic repercussions because of it.

The problem is a knotty one. Like so many of broadcasting's tribulations, it has many facets.

To begin with, the Commission itself has been enjoined (in the Sanders Case) by the Supreme Court of the United States from taking into consideration as a separate and independent element any economic injury to an existing station in the granting of licenses to independent broadcasters. In effect, if Joe Doakes is stupid enough to apply for a license for a new broadcasting station in a community which cannot support another facility, the Commission has no authority to refuse the grant for this reason.

Since the Supreme Court decision is, in effect, the law upon this subject, time, I would welcome a only the Congress (as you pointed out you may have to this letter.

in your letter) can remedy the situa-tion.

Here we run into facet number two. The Federal Communications Commis-sion is prohibited by the Communications Act from interfering with the rate structure, or the business struc-ture, of radio broadcast stations. The Act specifically exempts broadcasting from the kind of FCC supervision that is applied to common carriers. Despite this prohibition, the Commission has on a number of occasions, by indirection, attempted to exercise some meas-ure of control over the "business" of broadcasting. The Commission's statements concerning the price of radio stations, concerning over-commercialsm, etc., are examples. If we should go to the Congress and ask for laws which would authorize the Commission to deny or affirm grants in consideration of eco-nomic factors, we would most certainly be inviting-and most probably would get-FCC authority to regulate the quantity of advertising, the charge for advertising, the sale price of radio sta-tions, and so on.

I think you will agree with me that it is fairly obvious that a regulatory Government body will not protect a franchise against competition unless it regulates its business, its income and its services.

There is still another facet. The whole structure of the regulation of American broadcasting by the Federal Communications Commission is based upon the theory of "scarcity." Because there are not enough wavelengths to go around -because not everybody who wants to go into broadcasting can do it—the Congress placed certain restrictions and responsibilities upon the licensees who are privileged to operate stations. Theoretically—and quite possibly practically —if the day ever comes when there are more wavelengths than there are peo-ple who want to engage in broadcast-ing, Federal control of the industry could and should be reduced to the ing, receral control of the industry could and should be reduced to the simple policing of the wavelengths. Then, and then only, could we have a truly free American radio in the same sense that we have a free press—abso-lutely unfettered by any Government regulation concerning public interest, convenience and necessity.

At its last meeting, Aug. 6-7-8, the Board of Directors of the NAB had a lengthy discussion of the problems arising under the Commission's policy of granting licenses in a wholesale method. The board felt very strongly that the principle of free competitive enterprise must be upheld and that any action upon the part of the industry to bring about consideration by the Commission of economic factors would be contrary to the interest of the industry and to the principles of free enterprise.

May I say to you finally that the matter is not closed and that your opinion concerning this whole problem is most certainly welcome here at headquarters, or at the convention in Chicago. Incidentally, I will be there and will be most happy to discuss this whole situation with you at length. In the mean-time, I would welcome any reaction

USES Will Place Licensed Operators

Federal Employment **Agency Replaces** Commission

Informal advices at FCC offer practically no hope for relief from the order, which requires that transmitters be manned at all

not within FCC's jurisdiction. FCC has turned over to USES several hundred filled-in cards listing names of applicants in various areas. FCC's questionnaires had been sent to operators as they received a license or renewal. The operator was asked to state if he was available for employment and if willing to move. USES has sent its branch offices a list of stations which have notified FCC they are unable to obtain first class operators. List of available operators all over the country will be kept by USES in Washington. Stations are advised to contact the nearest USES office for local availabilities. If there are none, the office will contact Washington.

Mr. Willard reminded that despite the Act's ban on rate or busi-

CLEARING HOUSE for placement of licensed broadcast operators is being set up by the U.S. Employment Service. With 1,700 branch offices around the country, the Federal agency will list names of operators available to fill jobs.

Formation of the placement comes as a hundred or more stations, mostly in smaller cities, are complaining over difficulty of securing first class operators to man transmitters or hardship involved as a result of FCC Order 91-D, effective last month.

times by operators having first class licenses. It is known, however, that the FCC has provided temporary relief to a score of stations unable to obtain the services of first class operators. These stations received 30-day relief from the order. No word has been received from FCC as to chance of obtaining extension of the 30-day grants.

USES has contended that the job of listing available operators, previously handled by FCC on the basis of postcard questionnaires, was properly a USES function and

BROADCASTING • Telecasting

Revised Rules to Bring Few Changes

Important Alterations In FCC Procedure Yet to Come

DESPITE THE SCOPE of the project, few substantial changes in existing practice will result when the revised rules and regulations governing organization, practice and procedure of the FCC [BROAD-CASTING, Sept. 2] become effective Sept. 11.

The new Part I, as required by the Administrative Procedure Act (Public Law 404), brings together into one piece for the first time an outline of the whole Commission setup, the location of its offices and divisions, its methods of operation, a list of the forms it uses, and the rules governing procedure.

But radio attorneys who participated in the FCC-bar-press seminar on the new, 148-page revision last Tuesday pointed out that the "important" changes are not in this new edition of Rules Part I but are yet to come—in December and June, when the hearing provisions of the Procedure Act become effective.

Recodification

Harry M. Plotkin, FCC assistant general counsel who helped supervise the revision and conducted the seminar, called it primarily a recodification from existing rules and from administrative orders and public notices which had been given the effect of rules. Hereafter, it's not a rule if it's not in the rule book.

He pointed out that the hearing procedure is as yet "untouched," explaining that from the time the Procedure Act was signed on June 11 until now the Commission has been trying to meet the Act's Sept. 11 deadline for getting out the revised Part I. Sections 7 and 8 of the Act, relating to hearings and decisions, become effective Dec. 11 while Section 11 making hearing examiners responsible to Civil Service Commission instead of FCC takes effect June 11, 1947 [BROAD-CASTING, July 8, Sept. 2].

FCC and Federal Communications Bar Assn. officials are slated to meet this week to make plans for a study of changes proposed at the seminar on Part I and also to look toward drafting provisions putting into effect the hearing requirements of the Procedure Act. Philip G. Loucks, president of the bar association, and its Committee on Practice and Procedure, headed by Karl A. Smith, will head the FCBA group in the project. declaratory rulings terminating controversies or "removing uncertainty." In the past, the Commission sometimes used the device of a press release in such cases. Mr. Plotkin said the Commission had not given much consideration to the matter of declaratory rulings but might "some day" want to put more detail into that provision of the regulations.

Waiver of Hearing

In another change, the new "waiver of hearing" policy [BROAD-CASTING, July 1] henceforth will allow the Commission to issue proposed, rather than final, decisions on cases in which the parties have waived hearing. The parties may then have oral argument. Mr. Plotkin pointed out that only one waiver had yet been signed and it was hoped this liberalization would encourage more to follow the plan and thus speed action on the huge backlog of hearings cases.

The whole waiver policy was put on the agenda for later discussion after Paul D. P. Spearman, radio attorney, challenged the form of the waiver, contended that the policy would permit adverse information to get into the record without the opposing party's knowing it, and declared he would never waive a hearing so long as the filing of a waiver form is required. It was suggested that one remedy might be to prohibit submission of additional information on a case after a waiver is signed.

Adequate Notice

Remedies for problems arising from 11th-hour applications and amendments will be sought in later conferences, it appeared, particularly to insure that all interested parties have notice of new applications or amendments and that they have adequate time thereafter to prepare their cases in the light of such new developments.

Attorney Harold Mott suggested a rule, to insure early announcement of the issues in hearing cases, declaring that in one case

Special Scale of Music Fees Expected for Crosby Series

By BRUCE ROBERTSON

RECORDING fees to be collected by the publishers of the music to be used on the Philco Bing Crosby broadcasts will undoubtedly be worked out by special agreement between the program producers and Harry Fox, agent and trustee for the major ASCAP publishers, Mr. Fox told BROADCAST-ING last week.

Normally, the fees paid to Mr. Fox's clients for the right to transcribe their musical compositions for broadcast use are based on a charge of 25 cents per tune per station broadcast, with the fee raised to 50 cents per number per station per broadcast in the case of "production" numbers from plays or motion pictures.

BMI Rates

In this case, however, Mr. Fox pointed out, there is an unusual combination of network and supplementary stations all using recorded material, so that the normal rule does not apply. He said that the fees would probably be worked out for the Crosby broadcasts on much the same basis as they were for Morton Downey's Coca Cola broadcasts on Mutual, also from recordings rather than live. In that case, Mr. Fox reported, the program is broadcast by a total of some 333 stations, but a flat fee of \$62.50, equivalent to the rate for 250 stations, was agreed on for each musical number used on that series.

out for higher rates. The two-cent fee is the maximum permitted by the copyright law for phonograph records and many copyright attorneys have held that since the law reads "mechanical reproductions" without specifying the type this statutory limitation should apply to transcriptions as well. On at least two occasions suits have been threatened by transcription companies-NBC Radio Recording Division and Associated Music Publishers-against Mr. Fox's clients to test their right to charge special fees for transcriptions, but none has come to court. A Federal court decision in a motion picture case (Jerome vs. Twentieth Century-Fox Film Corp.) last summer held that the two-cent maximum fee on recordings was not applicable to motion picture film.

These fees are for recording rights only, the stations and theaters pay to BMI and ASCAP separate performance fees for the use of their members' music on the air (or in their theatres).

There are no extra musicians union fees in connection with the Crosby-Philco-ABC deal as long as the musicians perform only for recordings for which they will receive the regular recording fee of payment. But if the crooner should do any of his network shows live (as the contract reportedly calls for should the Hooperating for his recorded series fall below a stipulated minimum) then there would be an extra charge for the off-theline recordings made for use on the supplementary stations carrying the program individually and not fed by ABC.

RULES on FCC procedure are being completely rewritten under requirement of the new Administrative Procedure Act. While the most important changes are yet to come, many minor revisions incorporated in Part I, effective Sept. 11, are described in the accompanying article.

an attorney stood at the door and handed out copies of the issues to participants as they walked in for the hearing.

The new Part I definitely states that the Commission will try to give 30 days' advance notice of a hearing, but it was pointed out that this has been done as a matter of policy insofar as possible.

Mr. Plotkin made plain that he thought the Commission now is using "boilerplate issues" and as soon as possible should begin instead to put out "tailor-made issues" on each particular case. He suggested that attorneys ask that the issues be enlarged in any cases in which they are in doubt.

Deposition Rule Changes

Possibility of a complete overhauling of the deposition rules was indicated by Mr. Plotkin's request for the attorneys to give thought to this subject. As it now stands, the rule is substantially unchanged except that motions to take depositions must be filed not less than 15 days (rather than 25) before the proposed deposition date, and depositions must be filed not less than three days (rather than five) before the hearing on the case.

The new rules specify certain matters in which authority may be delegated from the Commission and what heretofore has been known as the administrative board to certain individual officials of the Commission—Secretary, Chief Engineer, etc.

Other changes: FCC will give its reasons for adverse actions on motions as well as on petitions; in petitioning for an order, attorneys no longer need to submit a copy of the order they desire; Saturday, no longer a work day at the Commission, shall be counted as a Sunday or legal holiday in computing time; pleadings and documents (except briefs) may be filed on letter-size (8x10¹/₂ inches) as well as legal-size (8½x13 or 14 inches) paper; unless issued on the Commission's own motion, reguests for subpenas must be in writing and give the scope and relevance of the evidence sought; witnesses testifying under subpenas are entitled to witness fees as in the courts, the fees to be paid by the party requesting the subpena.

Although the new Part I already has been adopted, the Commission requested suggestions for revisions—and received several in the course of the two-hour seminar. Approximately 100 attorneys participated.

One of the major departures in the new Part I is that the Commission may, if it sees fit, issue BMI publishers generally have set their transcription rates at two cents a tune a station a broadcast, although a few exceptions, notably Edward B. Marks Co., have held Advance Notice Machinery Slated for further consideration with a view to changes or additions are such matters as machinery to

The Hooper "STATION LISTENING INDEX" is computed from the total station mentions secured from the coincidental questions "To what program were you listening, please?" and "Over what station is that program coming?" asked of persons found to be listening to the radic. Excluded from this base ("Total Mentions") are those who are "Not at home," those who are "Not listening" and those who, although they may have reported listening to the radio are unable to identify the station to which they are listening. Base for "Sets-in-Use" computation is "Total Homes Called."

*Every rated hour given equal weight. For this reason this Total Index is not an arithmetic average of the Day-Part Indexes.

The Code of Practice governing the use of "CONTINUING MEASUREMENT OF RADIO LISTENING" applies to this "STATION LISTENING INDEX."

And W-I-T-H led all the rest!

We know this kind of stuff boomerangs. But we're proud of that Hooper . . . even if it never happens again!

Who ever heard of an independent station leading 4 network setups in the same town on total rated time?

that W-I-T-H, the successful independent, is at the top of that radio list.

*

*

*

P.S. Before the boys get out the axe, baseball is only on Monday through Saturday, 9:05 to 10:30 p.m.

It happened in Baltimore! And it's W-I-T-H that led all the rest, as you can see.

We've been telling you that W-I-T-H delivers more listeners per-dollar-spent than any other station in this, the country's 6th largest city.

That July 1946 Hooper is just one more indication that when you want big sales at low cost, make sure BROADCASTING • Telecasting

Service, Regulation on NAB Agenda

Eisenhower Is Not Able To Address Meeting

TWO-PLY theme based on improved service to the public and protection of broadcasting and other means of communication and education from growing inroads of Federal regulation will mark the NAB's first convention since 1943 when it meets in Chicago Oct. 21-24.

With President Justin Miller back from vacation, Executive Vice President A. D. Willard Jr. and Secretary-Treasurer C. E. Arney Jr. worked last week on convention plans, aided by association department heads concerned with various phases of industry operation.

List of speakers is still in the formative stage. Hope that Gen. Dwight W. Eisenhower, chief of staff, would address the convention was given up last week when it was learned that his plans for the next two months will not permit him to make any addresses in this country. General Eisenhower had been sought also by the American Legion for an address at the annual Legion meeting, but this too was impossible.

Media Co-operation

Going through the conference stage at NAB headquarters is a project designed to merge broadcasting, motion pictures, newspapers and magazines in joint protection of freedom of expression. At the Aug. 6-8 NAB board meeting decision was reached to support such a movement when procedure has been evolved.

This project may blossom during the convention in the form of a special session devoted to freedom of expression. Under consideration is a plan to have leading figures from various media participate in a convention session at which the project would be given full consideration. Position of each medium on the problem would be made clear, and individual issues reduced to a common denominator.

Allocation of convention time to aspects of industry operation is still in the early stages. Different groups are asking for choice spots on the agenda, creating a difficult problem despite the fact that the convention will cover four full days.

Subcommittee to consider revision of the standards. This committee has not yet been named but a report is to be made to the convention under board direction.

Warning was issued Friday by NAB that requests for hotel reservations must be in the hands of NAB within a short time. Reservation forms were sent to members over a month ago. Many have been returned, but NAB pointed out that the returns were disappointingly slow in arriving.

Under the NAB's contract with the Hilton Hotels (Palmer House and Stevens), priority for reservation of blocks of rooms during the convention period will cease Sept. 20. NAB emphasized that applications received after that date cannot be accepted.

IMPORTANT roles in opening broadcast of WRAL-FM Raleigh, N. C., last Friday were taken by (l to r) Howard Maschmeier, program director; Ray Reeve, sports editor and sales manager; Gov. Cherry of North Carolina, and Fred Fletcher, station manager.

Gen. Stoner Begins UN Communications Meet

BRIG. GEN. Frank Stoner, Army communications chief who was named chairman of the communications panel for the United Nations two weeks ago, began meeting with his panel of experts at Lake Success, L. I. headquarters of the UN last week.

With the general were G. S. Van Dissel, a Dutch engineer who planned and installed the League of Nations radio system at Geneva and S. Kagan, a former signal officer with the Free French army during the war.

Form Agencies

NEW advertising agency, Armando & Stansbury, located at 345 Madison Ave., New York, has been formed by Armando, former creative consultant at Grant Adv., New York, who is president of the new firm, and Henry H. Stansbury, former partner of Stansbury & Ashe, New York, vice president. Hiram Ashe, former partner of Stansbury & Ashe, has formed an agency under his own name at 345 Madison Ave., New York.

FM Promotion

WTOD-FM Toledo, which goes on the air "within 30 days," has built a variegated FM promotion campaign based on standard station radio programs and spots, newspaper advertisements, commercial films and dealer relations. One feature is interviews with officials of radio manufacturing companies, broadcast over WTOD. They are queried on dates when FM receivers will be available to the public, according to Edward Lamb, Toledo attorney, and president of Unity Corp., owner of the stations. General manager of WTOD-FM will be William H. Spencer, who holds the same position at WTOD. The FM station will go on the air with a 250 w General Electric transmitter, increasing to 23 kw as equipment becomes available. Initial daily schedule runs from 3 to 10 p.m.

MOSCOW DELEGATES TO LEAVE SEPT. 22

U. S. DELEGATES to the fivepower telecommunications conference in Moscow Sept. 28 [BROAD-CASTING, Sept. 2] are scheduled to leave Washington by plane Sept. 22, it was learned last week.

State Dept. hopes to announce names of the delegates this week. They have been submitted to the White House and to the Soviet Government (as reportedly requested by Russia). State Dept. has withheld announcing the delegates formally until they have been approved by the President and visas have been issued by the U.S.S.R.

Delegates Include

It is known, however, that Francis Colt deWolf, chief, Telecommunications Division, State Dept., will head the U.S. delegation and that FCC Comr. C. J. Durr will be the Commission's top man. No affirmative word as to whether industry representatives would be permitted had been received from Moscow as BROADCASTING went to press, but it was generally felt at State Dept. that Russia would insist the delegation be confined to official Government representatives, taking the view that the Government represents all the people.

Noel Wesley Expands To Radio, Television

NOEL WESLEY, head of his own theatrical production firm, Noel Wesley Productions, New York, last week announced the expansion of his organization into radio and television production. Sue Chrysler, formerly of Radio Consolidated has joined the firm to handle all talent and Paula Petty, formerly of WRGB Schenectady, General Electric television station, and Sonya Finard will handle the concert department.

Mr. Wesley has announced two packaged television shows available for sponsorship now, one called *House Party* starring Jack Pepper and company, and a quiz show with Bert King, formerly of the *Blind Date* program.

Lehigh on Yankee

THE LEHIGH Coal and Navigation Co., Philadelphia, has signed. 52-week contract with Yankee Network through Lewis & Gilman, Philadelphia, for sponsorship of The Yankee Weatherman, Mon. through Fri. 8:15-8:20 a. m. The weather, how it will affect the day's activities in New England such as travel, school, sporting events, is discussed in conversational style. Seventeen stations have started program with remaining outlets of the regional network to carry show as time is cleared. Sponsor in addition to network program is using live announcements daily tying-in local coal dealers.

Improved Service

Consideration of plans for improved service to the public will cover programming standards as well as stronger association control over industry activities. Possible revision of the Standards of Practice, successor to the former Code of Ethics, will be considered. At its meeting the board took steps to coordinate activities dealing with industry regulation and President Miller was authorized to name a new Standards of Practice

Two Join Agency

H. H. HINDLEY, former San Francisco manager of Allied Adv. Agencies, has been appointed manager of Dorland International-Pettingell & Fenton newly opened offices in Central Tower Bldg., that city. Frank Schlessinger, account executive of Allied, also has shifted to the new agency.

Dodge on WJR INDICATIVE of automotive industry's return to radio is sponsorship, effective Sept. 3, of *Bud Guest, Reporter at Large* over WJR Detroit, by the Dodge Division of Chrysler Corp. Mr. Guest is the son of Edgar A. Guest, famous poet, and has been heard on WJR for many years. Contract, calling for three quarter hours, Tues.-Thurs.-Sat. 6:15 p. m. (EST), was placed through Ruthrauff & Ryan.

means COVERAGE

WOW, with 5000 watts on 590, can be heard CLEARLY more than 100 miles from Omaha. WOW is LISTENED to because it is a basic NBC station, carrying 33 of the 50 top-rated programs plus first-class local features and NEWS. Thus WOW gives you THE BIGGEST RADIO AUDIENCE your money can buy in the Omaha trade territory.

Refer To THE MARE

The chart above, based on computations by competent radio engineers, shows how muca MORE power is needed to lay down a $2\frac{1}{2}$ millivolt signal, in the Omaha area, at frequencies higher than 590. WOW's $\frac{1}{2}$ millivoltcontour actually has been established at nearly 200 miles from Omaha in every direction.

 \star These are the approximate frequencies of other full-time stations in the Omaha area.

Proposed Allocations for FM Revised

Class B Changes Would Affect 75 Areas

AN UP-TO-DATE VIEW of FCC's FM allocation plan was provided last week with announcement of a revised list of Class B channels tentatively designated for localities throughout the U.S., providing for more than 1,600 stations.

A revision of the tentative plan issued last December [BROADCAST-ING, Dec. 24], the list shows 78 additional channels have been allocated to 55 areas while 22 have been withdrawn from 20 other localities. The additions include two for Chicago, which now has 19 channels tentatively allocated as compared with 17 last December. With five of these already assigned and three to be reserved for one year, FCC sources said, 11 rather than nine may now be assigned among the 12 pending applicants.

The list covers only the Class B channels and does not show (1) grants which have been made, or (2) the effect of the channel reservation policy on various areas.

feet above average terrain. Separation of stations "varies from that required by ground wave interference (principally in the eastern U. S.), to the separation required for freedom from tropospheric interference 1% of the time or less (principally in the western areas)," it was explained. Generally, separation of stations increases toward the West, "where the expected demand for channels will be less and where added protection for weak signals will be provided."

Others Available

Although "only a few" channels have been designated for many small cities, particularly in the West, FCC said it appears these will satisfy the demand but that others are available "and will be provided as required." It was also pointed out that some areas have been allocated more channels than other areas of about the same or even greater population within the same general section. This, the A NEW LIST of tentative channel allocations to various U.S. localities, providing for more than 1,600 Class B FM stations, was issued by FCC last week. The list incorporates subsequent changes in last Dec. 19's tentative plan and provides wherever possible for more channels in areas where there is a demand for them.

Commission said, is because "areas near large centers of population usually contain a number of cities which require channels, while other areas are farther from dense population centers and thus involve no objectionable interference by the allocation of more channels in its section."

Changes in the number of channels tentatively assigned to general areas since the Dec. 19 list include 78 added to 55 general areas as follows:

Alabama: Gadsden 1, Lanett 1, Mobile 2; Arkansas: Fort Smith 3; Cali-fornia: Fresno 2, Marysville 2, Modèsto 2, Monterey 1, Salinas 1, San Luis

Obispo 1; Connecticut: Meriden 1, New Britain 1; Florida: Jacksonville 2, Mi-ami-Miami Beach 3, Orlando 1. Tampa 1; Illinois: Chicago 2, Mount Vernon 1; Indiana: Fort Wayne 1; Kansas: To-peka 1; Kentucky: Paducah 1; Louisi-ana: New Orleans 1; Maryland: Hagers-town 1, Salisbury 2; Massachusetts: Fitchburg 1; Minnesota: Rochester 1; Missouri: Kansas City 1 St Louis 2

Missouri: Kansas City 1, St. Louis 2. New Jersey: Atlantic City 2, Bridge-ton 1; New York: Binghamton 1, Oneonta 1, Poughkeepsie 1, Utica 1; North Carolina: Greensboro 1, Raleigh 2, Wil-son 2; Ohio: Fostoria 1, Lima 3; Okla-homa: Durant 1; Pennsylvania: Oil City 2, Pottsville 1, Sharon 1; South Carolina: Lancaster 1; Tennessee: Johnson City 1, Kingsport 1, Memphis 2; Texas: Denton 1, Houston 2, Wichita Falls 2; Virginia: Norfolk 1, Winchester 1; West Virginia: Huntington 2; Wisconsin: Beloit 1, Wausau 2.

Twenty channels previously allocated tentatively to the following general areas have now been removed:

California: Palm Springs 1, Redding 1; Connecticut: Hartford 1, New Haven 1, Waterbury 1; Delaware: Wilmington 1; District of Columbia: Washington 1; Indiana: Hammond 2; Kentucky: Harlan 1; Massachusetts; Worcester 1; New York: Dunkirk 1; Ohio: Marion 1; Pennsylvania: Greensburg 1. Philadelphia 1, State College 1, York 1; Tennes-see: Bristol 2; Texas: Kilgore 1, Sherman 1; Wisconsin: Wisconsin Rapids 1.

Allocations under the revised plan are shown below.

Λ INVITES YOU TO MATCH WITS WITH AMERICA'S GREATEST DETECTIVE

IN THE EAGLE MURDER CASE"

After an auto accident, Joe Dalton, suffering from a fractured right arm and leg, is being removed to an ambulance. One of his partners, Bill Graves, asks the attendant to give Dalton a hypodermic, despite Dal-ton's desperate objection. Dalton's other portner, Ed Edwards, and Dalton's wife are next to the stretcher when the ambulance doctor administers the hypo.

2 Although Dalton was alive when the hypodermic was administered, and though placed in the ambulance im-mediately after, Dalton is found dead Although Dalton was alive when the on arrival at the hospital with a knife in his left side. Nobody could have gotten into the ambulance enroute.

3 District Attorney Markham relates the baffling murder of Joe Dalton . . . and asks the help of ''P.V.'' Ameri-ca's greatest Detective. ''P.V.'' and his secretary, Ellen Deering, listen attentively to the details.

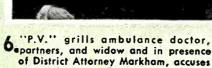

goes to see Dalton's widow. 'P.V.' 4 who tells him about Dalton's partners in the Eagle Manufacturing Company.

SEE IF YOU CAN SOLVE THIS EXCITING MYSTERY WITH CLUES SHOWN BELOW

5 Dalton's two partners have a fight when each accuses the other of stab-bing Dalton. 'P.V.' overhears and learns that partners hated each other and hated Dalton, too . . . and that Mrs. Dalton was beneficiary of a large insurance policy.

"P.V." grills ambulance doctor, of District Attorney Markham, accuses the guilty one. Do you know whom?

in the ambulance head first instead of feet first . . . that put Dalton's LEFT side near Mrs. Dalton, When she saw the hypodermic was taking effect, she plunged a knife into her husband's side, just before the stretcher was slid into the ambulance. How Vance outwits her when she confronts him with a gun in her hand makes for the most dramatic climax ever done in radio. Hear it in "THE EAGLE MURDER CASE!"

Resurrection

ONLY LIVE program in the Philippines today is a voice from the dead, according to Robert Stewart, MBS Manila correspondent. Just before the Japanese made their sweep into Manila in 1941, an organist completely dismantled his Hammond organ, carried the parts high into the hills, and buried them six feet underground. Recently the same organist exhumed his organ and is now playing the only "live" show on KZRH Manila—in fact the only live show on the two commercial Philippine stations now operating, Mr. Stewart said.

Koepf Heads Television For Fort Industry Co.

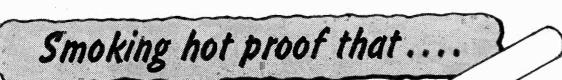

JOHN KOEPF last week was named television manager of the Fort Industry Co., according to an announcement by George B. Storer, Fort Industry president. Mr. Koepf has been Washington manager of the company, and will continue in that position in addition to his television duties. Fort Industry has a black and white video application on file for Toledo.

From 1940 until he entered the Navy in 1942, Mr. Koepf was in charge of television for Procter & Gamble, as assistant to William M. Ramsey, P & G radio director. He joined Fort Industry Jan. 1 when he was released from service as lieutenant commander.

KERN Bakersfield, Calif., has joined Southern California Broadcasters Assn.

TRADITIONAL WELCOME to Hawaii was given Mr. and Mrs. Lewis Allen Weiss on their visit to the Islands by Ralph M. Fitkin (1), president of Aloha Broadcasting Co. Mr. Weiss, vice president and general manager of the Don Lee Broadcasting System and vice chairman of Mutual, took the trip with his wife and daughter.

North Carolina Is The South's No.-1 State And WPTF is North Carolina's No. 1 Salesman!

Tobacco auction markets are now in the full swing of their 1946-47 selling season in North Carolina. That's big money news in this state which produces 48% of the nation's tobacco. And of North Carolina's crop, 90% of it is grown and 91% of it is sold in WPTF's North Carolina Primary. In fact, including tobacco sold in WPTF's Virginia and South Carolina primary counties, more tobacco is sold in the WPTF Primary than in any state in the union. No wonder alert advertisers now are upping their WPTF schedules to tie-in with this lush selling season.

*WPTF PRIMARY...

Iowa Fair Offers Exhibition Video KRNT-RCA Victor Display **Proves Highlight**

SEVENTY-FIVE percent of inquiries at the information booth of the Iowa Centennial Fair were for location of KRNT-RCA Victor television exhibition, according to station officials.

The television show was the principal feature in a heavycalibre KRNT Des Moines promotional campaign, during the eightday fair ending Aug. 30. Other media used included a neon-lighted blimp, vehicle signs and trolley placards, radio programs and spots, show-window displays, luncheon club speeches, loudspeaker announcements and printed theatre programs.

Viewers of the television shows in the International Harvester tent at the Des Moines fairgrounds were estimated to include half the 500,000 fair visitors. Paul B. Mowrey, ABC television director, said it was the most heavily-attended television show he had ever experienced.

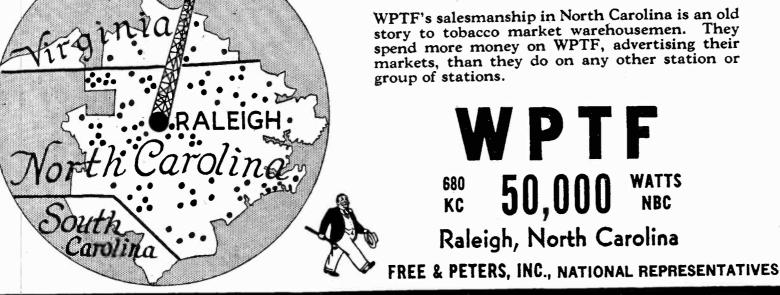

An eight-hour daily television schedule brought two video shows each hour, many of them both televised and broadcast over KRNT. Standard broadcasts filled the 15-minute periods while preparations were made for the next television program. Breaks were used to advertise the formal opening of KRNT Radio Theatre Sept. 9, and its first attraction Oklahoma!

Dick Hooper, RCA Victor shows and exhibitions manager, Joe Jenkins, RCA Victor production manager, and Harvey Marlowe, ABC television production manager, said the television show was the biggest outdoor video demonstration ever staged. They believe similar shows will be attempted on a nationwide basis.

Mr. Mowrey, in a talk before the Des Moines Advertising Club, predicted a video station for Des Moines "soon after the television network starts." He later indicated this would be early 1948.

Bendix Reports Loss

BENDIX AVIATION Corp., Detroit, reported consolidated net loss of \$820,015 for the nine months ended June 30, compared to net income of \$10,376,644 the previous year. Operating loss for the ninemonth period was \$9,381,418, of which \$1,111,669 was incurred in the quarter ended June 30. This was before provision of \$88,228 for Federal income taxes but after appropriating \$701,792 of the reserve for contingencies such as postwar reconversion. Estimated refund due to carryback credits was \$1,400,000, making a net profit of 200,104 for the third quarter, equivalent to 10 cents.

Opposition to New Radio Act Grows in Canada's Parliament

OPPOSITION TO A NEW Canadian Radio Act [BROADCASTING, Sept. 2], incorporating more powers for the Canadian Broadcasting Corp., grew to such an extent during the closing days of the session of the Canadian Parliment, that the government withdrew the bill, but voted the CBC \$2,000,000 for expansion despite heavy opposition.

Never before has as much opposition developed on the subject of broadcasting as during the last days of the session at Ottawa, when the government endeavored to put through a new radio act incorporating recommendations of the Parliamentary Radio Committee of 1946. It was only after the government had withdrawn the bill and an acrimonious debate of seven and a half hours that a majority of Liberals and Co-operative Commonwealth Federation (CCF) members voted the CBC \$2,000,000. Opposition members stated that this vote would commit Parliament "irrevocably" to a principle that ultimately would destroy private broadcasting.

The money vote more or less endorsed the new radio act which provided for increased financing limits for the CBC and allowed it to use all clear channels, three of which have, since the Havana Treaty was put into effect, been used by private broadcasters.

Remote Facilities

Ralph Maybank (L. Winnipeg, South Centre) chairman of the Parliamentary Radio Committee, pointed out that the CBC expansion program was in keeping with Parliamentary Committee reports since 1936, and would have been completed earlier except for the war. He stated that the whole purpose behind development of a second network by the CBC, was to give Canadians living in remote parts of Canada a second choice of programs.

"There is no doubt," he agreed, "that if the private stations were allowed to do so, they could develop the network. The crux of the situation is whether the law will be changed to allow private stations to have this network. It has been definitely against the opinion of Parliament that they should be allowed to do so, and has been written into the act since 1932." Advertisers would not carry such network programs to the remote areas where there are no major markets, he stated. Rev. E. G. Hansell (Social Credit, Macleod) pointed out that the CBC now had sufficient authority not only to drive private radio broadcasting out of business, but under facsimile development to drive the press out of business. He stated that the CBC now also controls facsimile transmission.

(No facsimile stations are yet in existence in Canada.)

There is no doubt that opposition to the radio legislation not only from official opposition parties but also from among government party members, was not entirely due to the interest in radio. But opposition to government legislation has been growing in the past months as an increasing amount of authority was being delegated to bureaucratic government bodies, not responsible to Parliament. Continuance of bureaucratic bodies set up during the war has been basis of considerable government legislation, and opposition to this has grown apace, climaxed in the radio legislation and that of the foreign exchange control board legislation.

Oppose Fund

After the government had withdrawn the new radio legislation, opposition members endeavored to get the money vote for the CBC cut from \$2,000,000 to \$1. Opposition members pointed out that the privately owned stations put up their own money "to do a job which we are now asking the taxpayers of Canada to put up the money for," and private stations also paid taxes which the CBC did not do.

Denton Massey (PC, Toronto-Greenwood) stated that "a network developed under private enterprise, permitted by the CBC, on which the Canadian advertiser can air his own programs, will develop programs which will be as much an advertisement for Canada in the United States as United States programs are an advertisement for that country in ours." He claimed that when CFRB loses its 860 kc frequency to the CBC, and is not allowed to go to 50 kw, much of its audience will turn to United States border stations for their programs. He complimented the CBC on its excellent work, but declared himself opposed to the "complete monopolistic control."

PAC Urges Councils to Seek Free Time

CIO Advises FCC Appeal **If Stations Turn Down Discs**

A CAMPAIGN to induce radio stations to provide free time for a series of 19 transcribed announcements under the guise of "public interest" has been started by the CIO Political Action Committee, according to the Sept. 2 CIO News, official organ of the Congress of Industrial Organizations.

"PAC launched its air battle for a large vote turnout in November with a letter to CIO Councils which urged local acquisition of free radio time," said the News article. "Refusal of station managers to grant radio time should be made the subject of vigorous protest to the FCC, the letter pointed out."

At PAC national headquarters in New York, Allen Reitman, publicity

COLORADO

director, denied that the PAC would file protests with the FCC if stations refuse to carry the announcements, although he said if a station censored them, the PAC "might object." The CIO News made it plain, however, that the PAC had instructed local CIO councils to insist that stations carry the announcements without charge.

Cite Public Interest

"Naming radio as the most effective means of reaching millions daily, the PAC advised, 'if the station balks at putting these announcements on the air . . . your reply should be that radio stations under the Federal Communications Commission are licensed to serve in the public interest'," said the News article, apparently quoting from the PAC letter. The article appeared in a two-column box on page 2 under the caption, "Calling All Citizens!"

"This announcement is in the public interest, said PAC, pointing out that urging people to register and vote is a good American tradition on which our democracy is based," said the CIO News.

Citing what it termed "an example of censorship methods used by radio," the News article said the PAC reported "refusal of Radio Station WMT Cedar Rapids, Iowa, to grant paid air time to the local CIO-PAC on the grounds that the proposed broadcasts were controversial. The Cedar Rapids Council has filed a complaint with the FCC, accusing the station of unfairness," said the article.

Complaint Local

Mr. Reitland declined comment on the Cedar Rapids incident, except that it was being taken care of locally. FCC sources last week admitted that Herbert Eveland, recording secretary, Cedar Rapids

Industrial Union Council, on Aug. 20 wrote the Commission charging that WMT had been "unfair." Mr. Eveland complained that WMT refused to air certain scripts "under the auspices of the Political Action Committee," but that "they state they would use the script without change under the auspices of the Bernhart for Congress Club (Democratical party)."

In Washington William B. Dolph, executive vice president of WMT. said he had not been apprised of the complaint and had no comment. Neither had Herbert M. Bingham, counsel for WMT, heard of the complaint, either from FCC or the PAC.

The CIO-PAC has produced 19 "register-vote" spot announcements "for radio use by local union and civic groups," according to the CIO News. PAC instructions to local councils for use of the 19 transcribed announcements suggested that "six, concerned with voting, be played close to election day, while the other 13 on registration are for immediate use. The five musical announcements are recorded by nationally-known ballad singers Tom Glazer and Peter Seeger in cooperation with People's Songs Inc., while the dramatic sketches were produced by a Hollywood cast," said the CIO News.

Second Series

A second series of "spots" is being produced by the PAC. These will deal "with specific issues of the campaign such as inflation, housing, security and anti-discrimination," said the News article. They "will provide room for insertion by the local group of a 'plug' for endorsed candidates," the article concluded.

According to investigators for the House Committee on Un-American Activities, Messrs. Glazer and Seeger were members of the Young Communist League, and of the Almanac Singers. Committee records show that Mr. Seeger was a delegate to a Chicago meeting of the American Peace Mobilization, which has been cited on seven occasions as a Communist front organization by Congressional committees and former Attorney General Francis Biddle.

Mr. Glazer was a member of the presiding committee of the American Youth Congress, an organization "controlled and built by the Young Communist League," and which has been cited on 10 occasions as a Communist front organization, according to the House Committee on Un-American Activities. On March 29, 1944, the old Dies Committee on Un-American Activities cited the Almanac Singers as a Communist front.

TAYLOR-HOWE-SNOWDEN Radio Sales

MBS Renewal

GUM LABS., Clifton Heights, Pa., has renewed for 52 weeks Singing Sweethearts, MBS Sun. 1:30-1:45 p.m. Agency is Makelim Assoc. N. Y.

The Dixie Four, left to right: Gene Lowery, director and lead singer; "Honey" Dunn, bass; Melvin Doss, tenor; "Shorty" Green, baritone. Frankie Collins, pianist.

Hoosiers "Take To" The Dixie Touch

Judging by audience response to the renditions of the Dixie Four over WIBC, there's a yard-wide soft spot in the Hoosier heart for the songs of magnolia-andmammy-land. For ever since coming out of the South to join the live talent staff of the fastest growing radio station in Indianapolis, these close-harmony singers of spirituals and southern ballads have provided good listening for ever-increasing numbers of Hoosiers. Organized in Mississippi in 1938, the Dixie Four was first heard from WJDX Jackson and later WMC Memphis. Their enthusiastic reception by listeners in nine southern states caught the attention of WIBC talent scouts and led to their present affiliation with "The Friendly Voice of The Indianapolis News." Here, they are charming WIBC audiences with their own morning show and a featured spot on the popular "WIBC Coffee Shop."

The brand of entertainment provided by the Dixie Four, and its eager acceptance by the people of Indiana, is representative of all live talent shows aired by WIBC. For all of these programs—musical, dramatic, news and special events—are planned, written, produced and enacted by personalities who know their radio and the Hoosier taste. So, to get the most for your radio dollar, see your John Blair man today about a WIBC live talent show tailored to your own particular sales re-

quirements.

★ ★ And you're lucky... because now, with one-station economy you may buy this big Mutual market that includes a million - and - more Puget Sound folks who enjoy an effective buying income that is right close to two billion dollars annually.

★ ★ ★ Puget Sound listeners are glad and lucky... for KVI's 5,000 watts on 570 kilocycles delivers their favorite Mutual programs with "top of the dial" signal strength and clarity.

South Americans Planning Solid Front At Inter-American Meeting in Mexico

SOUTH AMERICAN radio interests plan to present a solid front and some ideas novel to Latin-American broadcasting at the Inter-American Radio Congress, now set for Sept. 30 in Mexico City. The conference originally was called for last May 19 in Havana but postponed until fall.

Top radio figures from Argentina, Brazil, Chile and Uruguay met Aug. 9-11 in Buenos Aires to lay plans for the meeting. No advance announcement was made of the Argentina conference, quietly called as a follow-up to the South American Congress at Rio de Janeiro last year [BROADCASTING, Oct. 8, 1945].

The Buenos Aires meeting voted to urge a tri-sectional organization be set up at the Mexico gathering, with North, Central and South America each having its own group. Delegates admitted their hope was to avoid "Yanqui control" in the master organization,

Network Correspondents At White House Dinner CORRESPONDENTS of the four nationwide networks who accompanied President Truman on his 18-day vacation cruise to New England and Bermuda were dinner guests at the White House Thursday, along with newspaper correspondents. During the evening they saw a motion picture based on the cruise.

A cooperative broadcast by the four radio newsmen over Bermuda station ZBM drew thanks from the President, who heard the program and asked for a transcription as a souvenir. Radio correspondents who took the trip were Arthur Barriault, NBC; John Adams, CBS; William E. Coyle, ABC; William Hillman, MBS.

Ceremonies Mark Debut Of WRAL-FM Raleigh

FORMAL opening program of WRAL-FM Raleigh, N. C., scheduled for last Friday (Sept. 6), was to include greetings from networks, stations and radio celebrities in a broadcast also carried by WRAL, AM station of Capitol Broadcasting Co.

A. J. Fletcher, president of the

and admitted that the Argentina meeting was called to insure a bloc vote in Mexico City.

South American broadcasters were unanimous in their views on freedom of radio. They will make every effort to combat censorship by various governments. In other moves the Buenos Aires session recommended:

1. That Article 3 of the 1940 South American Accords reached in Santiago de Chile be reaffirmed "to strengthen peace and continental solidarity." Article 3 states that stations of one country shall not comment on the internal politics of another. Argentina politics have been a favorite target of Latin commentators for some time.

2. That recordings made in one country and sent to another be duty-free "to foster cultural interchange." A rider suggests that "given the importance of this measure, diplomatic pouch privileges should be made available." Sponsored recordings made in Argentina and sent to Paraguay, for instance, would be "cultural" rather than commercial, it was explained.

3. That equipment for transmitters be duty-free.

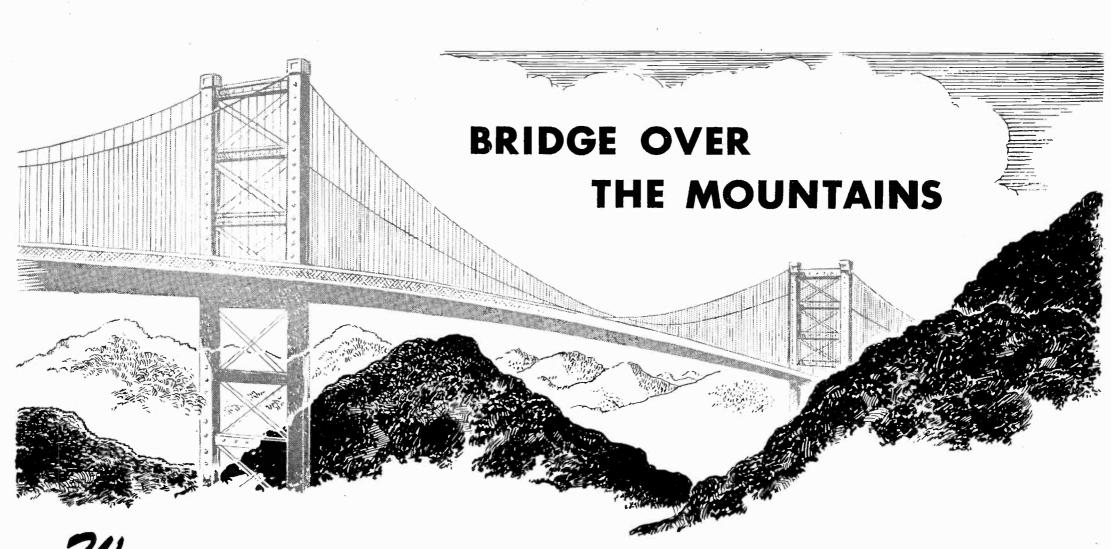

4. That the organization, regional or hemispheric, lobby for legislation which would guarantee owners at least enough security to enable them to exploit licenses fully.

Several U. S. manufacturers are planning to set up exhibits of transmitters, receivers, etc., while a number of American broadcasters are planning to attend as observers [BROADCASTING, Aug. 26]. Campbell Arnoux of WTAR Norfolk and Hugh A. L. Halff, WOAI San Antonio, have been chosen to attend as observers for NAB [BROADCASTING, Aug. 19].

State Dept. has taken no official cognizance of the meeting, since it was called purely as an industry affair. Several Cuban broadcasters are reported to have dropped out of the conference.

company, presided at the ceremonies which heard transcribed greetings from more than 12 stations and networks, saluting WRAL-FM as a key station of Tobacco Network. Others on the show were Gov. Gregg Cherry of North Carolina, Acting Chairman Charles R. Denny Jr. of the FCC and Prof. Edwin Armstrong, inventor of FM. Station will be on the air daily from 3 to 9 p. m., operating on 95.3 mc with 1000 w. It will carry many of WRAL's most popular shows and will feature music and sports.

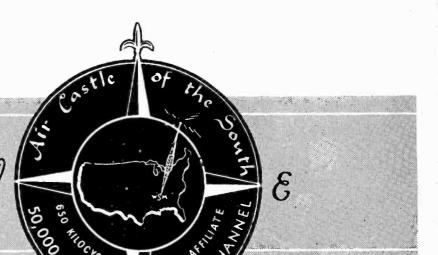

HEN WSM first put its signal on the air, twenty-one years ago, there were folks back in the mountains for hundreds of miles around Nashville who had never been beyond the church and the store at the cross-roads. The advent of WSM into their lives was a milestone in itself. It brought them new facts, a new outlook, the promise of a new sort of life.

Surely it is not cause and effect, but it is more than coincidence that WSM's life span of twenty-one years parallels the great growth and development of living standards in the mountain regions of the South. Full credit goes to the hardy pioneer spirit of the people here. But, surely, too, we supplied some part of the inspiration, some part of the stirring which brought it about.

And as our region grew in stature, WSM grew too—in facilities, in scope of program, in service to the five million people in reach of our clear channel signal.

Their adherence to our banner is our greatest recompense for the two decades of effort which has made WSM an important force in the area of more than five million people—five million people who can be reached through only one single medium... WSM, Nashville.

Idea in Patent Office PATENT rights covering a "radio

program controller" are available for licensing or sale, according to a list published in the official gazette of the U.S. Patent Office. The device "provides a means to manually switch off unwanted portions of programs for intervals of five to twenty-five minutes," according to the Patent Office. Owner of the device, for which patent No. 1,961,871 was issued June 5, 1934, is Floyd G. Caskey, with correspondence to be addressed to Argus Advisory Service, P. O. Box 577, Benjamin Franklin Station, Washington, D. C.

The device consists of five control keys, any one of which when pressed down will switch off the receiver, energizing a motor and magnetic clutch. After an interval, the motor operates a cam, returning key to original position.

Radio Program Control Newspapers' Drop as National Medium Traced to Radio's Research Technique

NEWSPAPERS' failure to match radio's research and sales techniques is largely responsible for their loss to radio of preeminence as a basic advertising medium for national advertisers, Neil H. Borden, professor of advertising, Harvard Business School, states in an article in the September issue of Harvard Business Review.

Titled "Selling Newspaper Space to National Advertisers," article is based on a study of national advertising whose results were published in detail in National Advertising in Newspapers.

Mr. Borden points out that while radio's novelty and glamour may have initially attracted the attention of mass-product advertisers, "the steady growth of the medium to its pre-eminent position has not rested on so insecure a

foundation. Rather, radio growth has come in large part because objective evidence has shown advertisers the effectiveness of specific programs undertaken by them."

Advertisers Convinced

To satisfy the desire of clients for "objective evidence of consumer response to advertising programs," Mr. Borden writes, "advertisers, agents and the broadcasting networks have carried on projects of experimentation and research that have outstripped those applied to other media. . . . From many interviews the author and his co-workers gained the indelible impression that the increasing use of radio by large advertisers has come from a conviction of its effectiveness as a part of their selling programs."

Newspapers, Mr. Borden states,

What's Surprising About About This ? TENT, \$900 PER CAPITA INCOME AUGMENTED BY COTTON Seven million dollars can do a lot to raise a market way above the average—and that's how much the production of cotton, alone, brings in out here in the Panhandle! And

have not, in their research, "initiated adequate experiments or gathered sufficient data on newspaper usage to provide convincing sales presentations to national advertisers. Instead, their selling has continued on an intensive, intraindustry competitive pattern which was fashioned in earlier decades when newspapers constituted the dominant medium for national advertisers appealing to mass markets. . . For the most part the efforts of newspapers soliciting staffs and of representatives' solicitors have been directed at the competitive level of individual newspaper against individual newspaper."

In contrast to this competitive selling by newspapers, he goes on, "the selling approach both of radio networks and of magazines, while in part competitive with other networks or other magazines, has in large part been primary. While sales presentations have pertained to the individual network or magazine, they have made full use of arguments designed to convince the advertiser of the value to him of using network broadcast advertising. For instance, radio networks have stressed the success attending broadcasts and the value of the auditory approach."

Small Market Stations To Hold Meeting Today

OPPORTUNITY for thorough discussion of problems of stations under 5 kw in cities of less than 50,000 during the NAB convention in Chicago Oct. 21-24 will be sought by the association's Small Market Stations Executive Committee at a two-day meeting starting today (Sept. 9).

Meeting of the committee was called by Marshall H. Pengra, KRNR Roseburg, Ore., chairman, in advance of the Chicago convention to give members a chance to lay groundwork for discussion during the industry meeting. The committee itself will meet on the first day of the convention, with a general convention session scheduled on small market station problems.

Ignition Standards

NATION'S car manufacturers have well underway research to insure that auto ignition systems will not interfere with television and other high frequency radio, according to report by Automobile Manufacturers Assn. Studies made by a committee of the Society of Automotive Engineers and the Radio Manufacturers Assn. have established tentative standards to place within tolerable limits the radio interference rendered by ignition systems, according to the report. The findings suggest means of reducing or eliminating visible static on video screens and audible distortion heard on shortwave loud speakers. It is proposed that standards be met by Jan. 1, 1948.

"HE THINKS IT'LL CATCH FISH, TOO!"

You can't blame the fisherman for thinking that he can catch fish with a WBAL microphone. Fact is, so many advertisers have found that their messages over WBAL bring such satisfactory results.

And there's a reason why! WBAL's powerful voice will bring you more listeners . . . thanks to better

programming. More listeners will bring you the sales results you're looking for in the Baltimore area. Besides, there's more to advertising over WBAL than meets the ear. A behind-the-scenes merchandise department does a grand job of tying up programs at point-of-sale. Catch?

Operator Proposal Draws Ire, Support

Conflicting Viewpoints Given on Shultz Contention

INTEREST AND DISMAY

EDITOR, BROADCASTING:

In the Aug. 26, 1946 issue of BROADCASTING, you published a letter written to you by a manager of a 250 w station complaining of the need for first class operators in such a station. This letter was read by us with much interest and dismay.

Indeed, we were so surprised at such a stand, that as operators with years of experience, we feel that we should express our views on the subject. If you feel that you can publish our side of the question, we shall be gratified.

In the first place, we feel that

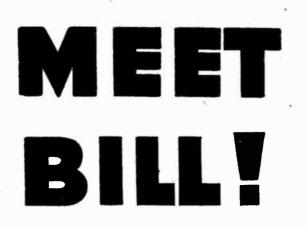

first class operators are needed operators who have the confidence, and who know enough to look into a piece of equipment, to see how it ticks. We have seen some of those operators who are not supposed to look inside the "works," when something went wrong, just stand and bite their nails. Many times we have seen a station off the air for several minutes or even hours when a first class man could have had it back in nothing flat.

Furthermore, since when is there nothing to do but sit and draw pay? With a total of sixteen years in small stations, here's one who can say that he has never seen the time that there wasn't plenty to do. Six and one-half years in one place with an average of $56\frac{1}{2}$ hours per week does not indicate there is nothing to do. Too many managers may feel that money is being "wasted" on first class operators, but did any of these managers ever get up at 1 a. m., go to the transmitter and see for themselves the many weary hours of hard work being put in by the first class man?

It seems that the management of small stations feel they can operate without a transmitting department, until something goes wrong—and then all means of communication to the transmitter are "hot" with inquiries as to what is wrong, and how long it will take to fix it.

We feel that the public interest can better be met by having operators who know how to keep the equipment operating to full efficiency and smoothness—with high quality and absence from noise,

The No. 1 Farm Station in the No. 1 Farm Market would like you to

This is Bill Bailey, KMA's persuasive, energetic and amiable Promotion Manager. When it comes to promotion, Bill is a fellow who *does* the job instead of *talking* about it. He could probably sell electric fans even during an Iowa blizzard, but he'd much rather tell the *facts* about KMA's great farm-market in his own sincere way.

Bill knows the enormous potential of the 155 counties composing KMA's primary area, located in the nation's great cornbelt. He knows KMA's complete coverage of this rich farmland —KMA's intelligent programming—KMA's un-

WHEN John W. Shultz of WMVA Martinville, Va., writing in BROAD-CASTING, Aug. 26, advocated relaxing of the requirement for firstclass engineers in stations, he drew the fire of those who cited the vital role of operators. Simultaneously, another champion of the small station's position on limited personnel, gave his viewpoint. The opinions are given on this and following pages.

hum and other mechanical annoyances.

Furthermore, we believe that some of that good cash used in making trips to Washington, merely to prove a point such as this one to which we are referring, should be spent on hiring first class operators.

HARD TO FIND OPERATORS

EDITOR, BROADCASTING:

The use of operators holding restricted operator permits will allow their selection on quality of announcing instead of technical knowledge. This knowledge is usually of no value at all by a newly licensed man because he lacks practical experience. Our experience has shown that as soon as a first class operator has obtained a little experience he immediately looks for a transmitter job where he will not be required to announce. Of course, this is only natural for any man competent to pass the first class license must be a "technical man."

The hundreds of 250 watters who use combination operators-an nouncers can greatly improve the quality of their announcers if they are selected on the quality of their announcing and leave the technical work to one first class operator. Our wartime experience has proven that one man is more than enough to handle all technical work on a small station. This station has operated more than five years with one technical man and has not lost one minute off the air due to technical trouble other than power failure or lightning. Even counting these we have lost less than five hours total time in five years. Obtaining competent combination announcers-operators has always been a major problem with small stations. Even during the depression it was practically impossible to find them and today with the housing problem we have not been able to find a single man interested in moving into our community, even though we pay \$50 per week as a starting salary. For more than two months we have answered every "situation wanted" in your excellent magazine and have not received a sin-

excelled *selling power*. Once *you* know these facts, you'll be as enthusiastic about KMA's service and selling power as Bill Bailey is, himself. Give us a chance to *prove* it. Contact your nearest Lewis H. Avery office, or wire us—today!

SAYS PROTESTS STEM FROM GREED

EDITOR, BROADCASTING:

An Open Letter to Most Southern Stations:

The day of reckoning is not yet. Just because the FCC rules you must employ only first class engineers, don't think your walls of Jericho are crumbling! Your walls have been staunchly built; they are only beginning to crack. But the fissures are deep and the united trumpet calls of employe and listener rebellion will one day widen them so that your little empires shall be surrounded by rubble even as now they are encompassed by stone. And of what stones are your walls built? Of such as these:

1. The granite of greed. You act as a loudspeaker for your network, collecting the reflected glory and goodness of Big Town production along with the moneys which accrue when you have a monopoly on a particular audience only by virtue of the absence of competent outside coverage. You keep down your overhead by hiring only combination men. An announcer who program directs, acts as librarian, and writes your pitiful copy. An engineer who must change a tube. flip a record, read a newscast and scale your antenna. A copy girl who writes your personal letters, services accounts, acts as file clerk and sweeps up your sawdust.

2. The stone of stupidity. You expect someone to believe that were you not enjoined to employ first class engineers, the resultant savings would go into better programming and equipment. You whine that you want to provide better public service: yet you turn down local talent under the pretense that it is incompetent (when actually you can't find good talent ANYWHERE without expenditure -of both effort AND money!) You make your capital repairing generators or selling hot dogs (which is fine in itself) but you expect this qualifies you to run a radio station; you are not sensible enough to hire someone who has been qualified through experience or schooling. And be it here acknowledged, if you please, that where competition is nil, the fact that profits are being made is not synonymous with listener approval of your local operation. 3. The brick of bitterness. You are bitter because you had thought no one would ever see through your walls. You take all and give noth-

SPONSORSHIP of Romance of the Highways for the 11th year on Don Lee Network was undertaken by Pacific Greyhound Lines. Final renewal details were worked out by (1 to r): Herbert C. Cayford, vice president of Beaumont & Homan, agency handling account; Boyd Rippey, account executive of Don Lee Broadcasting System; W. H. Starling, assistant to the president, Pacific Greyhound Lines; Commdr. A. W. Scott, program narrator; and C. C. Jensen, Pacific Greyhound traffic manager.

ing; then scream and rage when commissioners prod you to fulfill your "campaign promises" made at time of license application.

There, in very brief sketch is the composition of your walls. Anyone who has worked in your rockpile will recognize their shape. No, the day of reckoning is not yet. But it's coming. And all your wailings will not save you. Not when listeners react, along with employes to the trumpet call. May the notes ring loud and clear!

Hugh Guidi August 28, 1946.

ARMY RADIO SECTION ISSUES NEW SERIES

COMMEMORATING the historical event of each day of the year, 365 sponsorable scripts are being prepared by the War Dept.'s Radio Section, Public Relations Division. The quarter-hour scripts include both Army and American historical events of the years from 1776 to 1945, and are being sent to public relations officers of Army posts, camps and stations for distribution to local radio stations. First of the series will be available Oct. 1.

Series, titled This Day, is written primarily as an institutional and prestige project for the Army. In addition to the Army tie-in, however, there is provision for commercial sponsorship. Musical selections have been suggested in the scripts to illustrate the music of that date as far as possible. Scripts have been prepared under the direction of Lieut. Eddie Jones, formerly of the FCC Information Section. They are written by Stanley Field, assisted by Bill Hamilton, both of the Radio Section, War Dept.

WNOC Norwich, Conn. Ready to Start Today

WNOC, Conn., is scheduled to take the air Sept. 9 with 250 w on 1400 kc. Principals of Central Broadcasting Co., who also own WGAT, new Utica, N. Y., outlet, are H. Ross Perkins and J. Eric Williams, partners. Commercial manager is William H. Harris, recently of WHAI Greenfield, Mass., Bill Hickok is program director. Associated with him are John Melville, formerly WDAS Philadelphia, chief announcer; Gary Lester, in charge of news room; James Douglas and Harry Fuller, announcers; Elmina Brooks, formerly WTIC Hartford, women's commentator.

Howard H. Wilson Co. is national representative, with Bertha Bannan as New England representative. Salesmen of WNOC are Dick Landsman and William Heron. Station has RCA and Western Electric equipment. It has subscribed to AP news service.

PERSONAL appearance show of WWVA Wheeling, W. Va., the "WWVA Jamboree," has been revived by the station as regular Saturday night attraction.

Expert Stresses FM's Higher Fidelity

Necessity for Selectivity In AM Receivers Limits

EDITOR, BROADCASTING:

I have read with interest the articles appearing recently in BROAD-CASTING on FM, specifically the one entitled "Engineer Presents FM's Other Side" by Homer A. Ray Jr. and the one entitled "Another Engineer Speaks His Mind" by John Sherman.

Some comments were made in these articles on AM radio receivers which do not adequately and accurately set forth the facts in AM receiver design with respect to fidelity. Actually, the matter of the fidelity of an AM receiver is something which has not changed greatly for many years and the limitations on the fidelity of AM receivers result from circumstances which the receiver manufacturers have taken into account for nearly 20 years. This is simply that the Broadcast Band is allocated with 10,000 cycle channel separations and receivers must be selective enough to separate the channels. There is nothing mysterious about this and wishful thinking cannot change the resultant fidelity picture.

With respect to AM reception, an examination of all widely sold AM receivers whether they be the

TWO VIEWS of the disputed higher fidelity characteristics of FM have been presented by engineers in BROADCASTING. That there are more than two sides to this question is evidenced by the accompanying letter, which expresses the viewpoint of the manufacturing engineer who looks at the question from its design possibilities. J. E. Brown, assistant vice president of Zenith Radio Corp., is an engineer specialist in FM and television. He was chairman of the IRE-RMA joint meeting at Rochester, N. Y., last Nov. 12-13. In another letter on this page, Robert A. Fox, WGAR Cleveland engineer, cites better signal-to-noise ratio of FM.

\$20 variety or the \$300 variety will reveal a startling similarity in intermediate frequency amplifier selectivity design. It is at this point in a superheterodyne receiver that the necessary selectivity is obtained. Let us make this crystal clear. An intermediate amplifier in an AM broadcast receiver can be widened or narrowed without essentially changing its cost. The question is not one of the use of more expensive components. The question is that when a manufacturer designs a radio receiver for widespread sale over the United States, he must provide in that re-

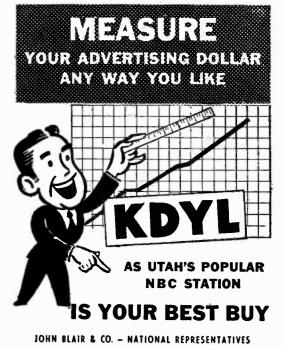

Mr. BROWN

ceiver adequate selectivity to permit the user to secure satisfactory radio reception in the present broadcasting structure, where stations are spaced 10 kilocycles apart. This will automatically limit the fidelity of the receiver to the point where there is essentially nothing left at 5,000 cycles. There is very little out of the receiver at 4,000 cycles.

It has been my observation and I am sure this is not alone peculiar to me that an AM receiver designed for 10,000 cycle reproduction is of little value at night all the year around at distances more than perhaps 10 miles from a 50,000 watt transmitter. Under these circumstances, such a receiver will accept signals from adjacent channels to the extent where the interference is so great that it is not an acceptable article to the user whether he be engineer or the public. It is all very well to have a superspecial receiver at the broadcast transmitter or near it where the signal is strong enough so that it alone is

(Continued on page 42)

WGAR Engineer Cites Better Signal-to-Noise Ratio of FM

EDITOR, BROADCASTING:

Two articles have been published in BROADCASTING on the subject of AM and FM. The first by Homer A. Ray in the July 22 issue and the second in the August 12 issue by John Sherman.

Of the above two articles, Mr. Sherman's is nearer the truth but has passed over some very important features of FM which makes it fundamentally superior to AM. Mr. Ray does not take into account the background noises of the two systems. I would like to recommend to Mr. Ray and to Mr. Sherman also, a very excellent technical analysis of AM and FM prepared by Raymond F. Guy and Robert M. Morris of NBC and published in the October 1940 RCA Review and also issued as a reprint by NBC Engineering Information Service. One of the important factors which must be taken into account is the "Triangular Noise Spectrum of FM." Since BROADCASTING magazine is not a technical publication it would be out of place to go into a thorough discussion here, but a few figures should be brought out to point out the danger of "general" statements. To briefly state a few figures for comparison of AM andFM, I would like to point out the following:

- 1. An FM system with a deviation ratio of one has a signal-to-noise advantage of 4.75 db for tube hiss and other fluctuating noises over an AM system.
- 2. With a deviation ratio of 5 (standard for FM broadcasting) the advantage of FM over AM is 18.75 db.
- When de-emphasis is used in *both* the AM and FM systems, there is more effective advantage in the

FM system. Assuming the standard pre-emphasis and de-emphasis circuits are used, there is an advantage of 7.35 db in the FM system.

FM, therefore, has an advantage of 26 db over AM for tube hiss and other fluctuating type noises. This is a definite figure due to the FM system alone. In addition, there is the advantage of operating on the higher frequencies which gives an advantage during

STABLE and DEPENDABLE!

The pound sterling is more than just a unit of currency, jointly with the Bank of England it has become the symbol of financial stability and dependability. "As sound as the Bank of England" is no idle catch-phrase.

In the Baltimore Market, radio time buyers are also familiar with another symbol of stability and dependable results. That symbol is "W-C-B-M" which stands for an effective means of bringing your product to the attention of a large number of listeners and influencing them to buy. "Baltimore's Listening Habit" is not a catch-phrase, but an every day reality to sponsors who are reaping the benefit of WCBM coverage. Here is an opportunity you can't afford to overlook.

MUTUAL BROADCASTING SYSTEM

BROADCASTING • Telecasting

WGAR Letter

(Continued from page 40) electrical storms which it is difficult to evaluate in db.

Mr. Ray says he has never seen an AM receiver operate with tone control in the "true high fidelity position that includes 10,000 cycles." He also states that this is the listeners' preference. The reason is the high frequency noise present in the AM system. Noises above 3500 to 4000 cycles are very irritating to the listener but this applies to noise, not musical tones, above these values. In the FM system with a 26 db advantage over this type of noise, the listener need not use the tone control. This is also the reason that transcriptions and recordings never give a true answer when used as a source of program for listener tests.

Sherman Answers

Mr. Ray also states that his transmitter at KIRO is capable of transmitting 15,000 cycles or the equivalent of the FM transmitter. This can very well be true but the listener cannot take advantage of it since all above 5000 cycles, or even less, is lost in tube hiss and fluctuating noise. Mr. Sherman also answers this when he says, "I do not agree that even a good minimum of the percentage of the AM radio receivers in use today are anywhere near flat to 5000 C.P.S." and also when he states, ".... the overall frequency response with the tone control in the normal position (using 1000 C.P.S. as reference) is down 3.2 db at 50 C.P.S. and down 14 db at 5000 C.P.S. on the high end...." On AM it is not possible to transmit and receive frequencies above 5000 C.P.S. without objectionable high frequency noise except in an area very near to the transmitter where the field strength is high. Therefore the manufacturer builds an AM receiver with a sharp IF to eliminate adjacent channel interference and a drooping audio system to eliminate high frequency noise. The listener goes further and turns down the tone control if he is outside the high field area.

The future, I believe, will prove Prof. Edwin H. Armstrong's FM system to be far superior to the AM system which Mr. James D. Shouse so stoutly defends. Thomas A. Edison opposed the AC power system of George Westinghouse, but the technical advantages triumphed-so will FM.

NEW 1,000-WATTER on 1270 kc takes the air in October at Lebanon, Pa., industrial and farming center, with call letters WLBR. Founders are H. Raymond Stadiem, president, and Lester P. Etter, secretarytreasurer. At ground-breaking for transmitter were (1 to r): Mr. Stadiem; Julian F. Skinnell, manager of programs and operations; M. Leonard Savage, chief engineer; Mayor C. Ray Bell, of Lebanon; H. B. Lau, C. of C.; Chet E. Hagan, news editor; Mr. Etter.

Brown Letter

(Continued from page 40)

obtained but this same receiver would be a most unsatisfactory article in general use. Attempts have been made in the past to sell such receivers and not always of the so-called custom built variety. Their lack of success and value is attested by the fact that so far as I know today the only receivers available having broad band characteristics are either special ones built for monitoring purposes or socalled custom built receivers selling at \$1,000 or over and including a manual adjustment of intermediate frequency amplifier band pass. The failure of High Fidelity AM receivers to secure public acceptance has been due to their annoying susceptibility to noise and adjacent channel interference. The limiter in the FM receiver eliminates these difficulties and makes high fidelity reception a realizable practical possibility. The difference in hiss level between High Fidelity FM receivers and High Fidelity AM receivers each operating on a received signal is evidence enough to demonstrate the utility of the two receivers.

It is no mere accident that radio receivers as widely sold by all manufacturers today have fidelity characteristics which are so nearly identical and which do not reproduce essentially anything from 4,000 cycles up. This is purely and simply a matter of the broadcasting allocations structure and there can be so far as we know now no essential change in radio receiver design until and unless this structure is changed from its present 10 kc separation. Let me repeat again, it is not a matter of using more expensive components. The real factor is the essential difference between the fidelity possible in a practical broadcasting allocations structure as now set up for FM and AM.

The FM allocations are such that if the receiver manufacturer desires, receivers can be manufactured with fidelity out to 10,000 cycles or more with no fear but that they will be usefully usable in the hands of the general public at any point in the United States that they are used.

> J. E. Brown Assistant Vice President and Chief Engineer Zenith Radio Corp.

DAR Resolution

DAUGHTERS OF the American Revolution may ask Congress to enact special legislation guaranteeing freedom of radio, Mrs. George Howard, national radio chairman, hinted in an interview Aug. 29. The society affirmed its opposition "to all efforts which would lead in the direction of government censorship, dictation or control of radio programs," and resolved to urge Congress "to enact such legislation as is required to give effect to this affirmation."

Here's the AM Transmitter that small-station owners are turning to....for its dependable, simpler circuits...its advanced design ... its modern, "dress-up" beauty!

HERE'S WHAT THE SMALL STATION NEEDS!

... Study these RAYTHEON features before you choose any transmitter, for replacement or new installation.

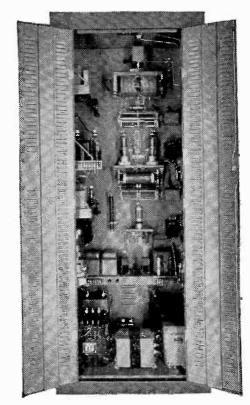

- Simplified, More Efficient Circuits A high level modulation system eliminates necessity of complicated and critical adjustment of linear amplifiers and minimizes harmonic distortion.
- Increased Operating Efficiency-The use of the most modern improved components which are operated at well below their maximum capacity together with simplified circuit design greatly increases overall operating efficiency.
- Greater Dependability-Due to the use of 3. Triode type tubes, feedback failure will not cause a complete breakdown and the signal quality will still be good. Cooled by natural convective air currents, it is not subject to damage or fire caused by a blower failure.
- Simple, Speedy and Accurate Tuning-All operational controls are centralized on the front panel; every circuit is completely metered

and instantly checked. A clutch-equipped lowspeed motor makes micrometer adjustment of the two tuned stages very easy.

- No Buffer Stage Tuning-The use of a Video Э. type amplifier in the buffer stage eliminates this complicated tuning.
- Silent Operation Natural air cooling means б. no blower noise, permits microphones in same room with transmitter.
- Low Audio Distortion Triode type tubes used in the audio stages have inherently lower dis-tortion level. Specially designed audio trans-formers reduce audio distortion still further.
- Easy Servicing-Vertical chassis, symmetrical 8. mechanical layout and complete accessibility through double rear doors and hinged side panels make the RA-250-a favorite.
- Easily Meets All F.C.C. Requirements-All electrical characteristics are well within the F. C. C. requirements. Noise level is -60 db below 100% modulation. Frequency response ± 1 db from 30 to 10,000 cycles per second.

ARE YOU SQUEEZING OUT THE BIG OUTSIDE AUDIENCE

on the Pacific Coast, too?

*Approximately half the retail sales on the Pacific Coast are made outside the counties in which Los Angeles, San Francisco, Oakland, San Diego, Portland, Seattle and Spokane are located—only Don Lee completely covers the OUTSIDE as well as the INSIDE half...a C.E. Hooper 276,019 coincidental telephone survey proves it.

Letting the *big outside audience* in on your radio show is plenty worthwhile on the Pacific Coast—these folks spend nearly 50% of the total 9 billions in Pacific Coast retail sales each year. But remember : You can reach them by radio only with Don Lee !

There are four radio networks on the Pacific Coast...all of them cover the *inside*, or seven major metropolitan county areas. Don Lee, however, is the only network with enough stations to deliver the *outside* audience also-an audience just as big and wealthy as the *inside*.

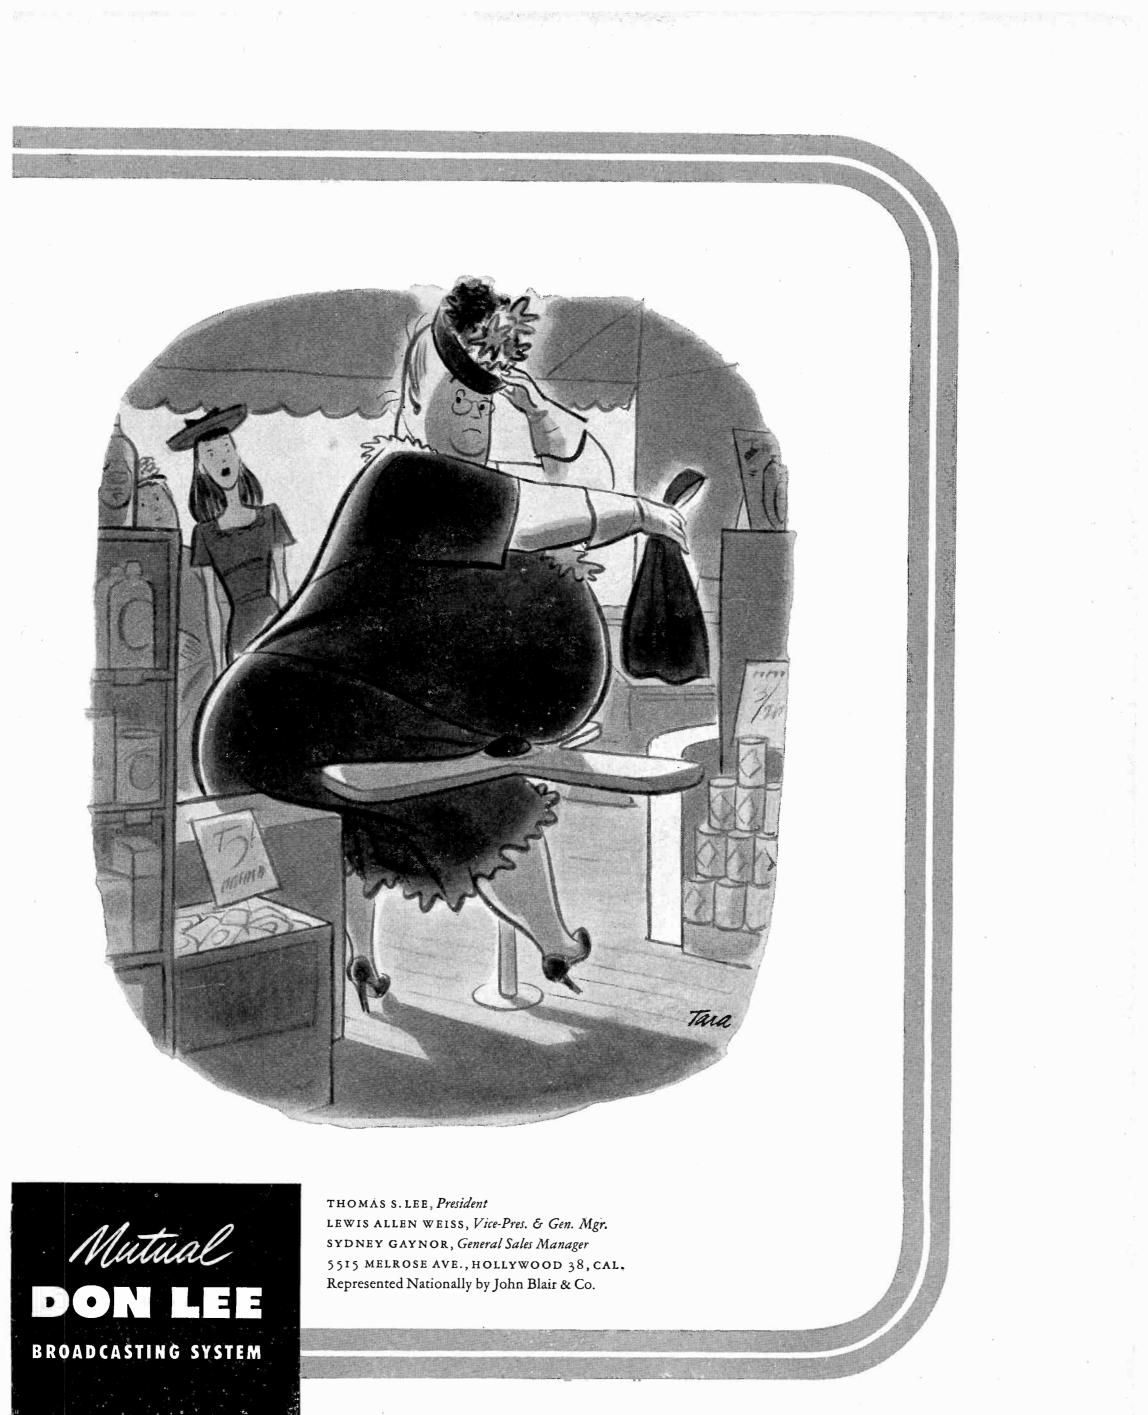

The reason for Don Lee's many stations is geographic. Look at a map and you'll see that most markets on the Pacific Coast are surrounded by mountains-5,000 to 15,000 feet high. The long-range broadcasting of other networks can't reach these markets. Don Lee, luckily for listeners, has a station located *within* every important mountain-surrounded market. There are now 40 Don Lee stations, *more than all other Pacific Coast networks* combined.

It pays to reach the big, prosperous *outside* audience on the Pacific Coast. Do it by putting your radio show on Don Lee, where everyone can hear it. More than 9 out of every 10 radio families on the Pacific Coast live within 25 miles of a Don Lee station.

The Nation's Greatest Regional Network

Raid-io, CIO Version

COMES NOW the CIO-PAC with 19 transcribed announcements to be broadcast "free" as "public interest" spots by stations.

If the broadcaster refuses to carry—without charge—the announcements, local CIO councils are instructed to remind him that his station is "licensed to serve in the public interest," that the CIO-PAC announcements are in the "public interest."

Failing to bulldoze the broadcaster out of time with that veiled threat, the local CIO council is instructed to file a "vigorous protest" with the FCC against the "offending" station.

Five of the 19 announcements are "musical," recorded by "nationally-known ballad singers Tom Glazer and Peter Seeger in cooperation with Peoples Songs Inc." [NOTE: Any broadcaster—or the CIO, for that matter—may learn about the Messrs. Glazer and Seeger from the House Committee on Un-American Activities (see story page 30)].

The law is specific with reference to political broadcasts. Naturally it was to be expected that the CIO-PAC would claim its activities are in the "public interest." It's in the "public interest" to elect Joe Doakes—so Joe Doakes will tell you.

The CIO-PAC is preparing more announcements on specific election issues. These announcements will provide room to insert "plugs" for local candidates endorsed by the CIO.

Broadcasters should resist efforts of any political organization to wheedle free time under the guise of "public interest." Once the bars are down, the door must be opened wide to all comers, under the law.

Certainly the FCC would not refuse to renew a license for failure to bow to the CIO-PAC—or would it? In such event broadcasters should and no doubt would seek redress on Capitol Hill. There the FCC was created and there broadcasters—not the CIO-PAC—were charged by the Congress with the sole responsibility of programming their stations.

I think that is another basic fallacy in the book (Radio's Second Chance). Radio is not intended to develop local talent. The great social purpose of radio is to bind the world together. The great social purpose of radio is to bring into every community what lies outside. Now, it has a subsidiary function, also, to disseminate local subjects. But that can be done without radio. That can be done in a local hall, with good acoustics. And to exaggerate the local function beyond the truly binding service of radio in making the world a closer place to live in and letting us know about each other seems to me to throw away Marconi's invention.

The Surplus Dearth

WE'VE TALKED recently with several Federal Government officials who are handling advertising funds for disposal of surplus property.

All reports indicate that radio is not getting its share of the promotional budgets which have been set aside in various agencies. Officials, commenting on this circumstance, blame radio. They maintain for the most part that broadcasters have not attempted to tailor programs or spot announcements to the peculiar needs of the Federal agencies.

We understand that the Maritime Commission will spend several hundred thousand dollars in the last quarter of this year on advertising. The War Assets Administration already has spent several millions, and several more are earmarked. Some effort is being made in WAA to employ radio in surplus disposal [BROADCASTING, Sept. 2], but the effort is fathered within the agency. Little voluntary help has been offered by broadcasters thus far, it is lamented.

Perhaps the NAB, in the interest of its members, could survey this entire field and come up with a workable plan that would put the full force of radio's selling power behind the Government campaign. Government officials will be receptive—for they still remember the terrific impetus given war bond sales and other war-inspired drives by this medium.

Dispatch from Berlin

A NEWS dispatch from Berlin relates that the American Military Government has set up its own radio station to broadcast to the German people, after having failed to gain its proper vote in the control of Radio Berlin.

This word must have hit with real impact those broadcasters who were fortunate enough to have made the trip to ETO just a year ago under Army auspices. That delegation, accompanied by several communications officers on our Army staff, visited Radio Berlin on Aug. 27, 1945. It was the first time a group of Americans had set foot inside the building since the Nazi surrender. And it probably was the last too.

Radio Berlin was to have been under what was called the "quadripartite" control of the Allies—Britain, France, Russia and the U. S. But the Russians moved in first. Despite the fact that the structure stood in the British Zone of Berlin, and the transmitter in the American, the Russians took complete control, with military guard and all. Evidently, they haven't relinquished it.

In recent weeks, there have been numerous events and incidents which have tended to

Our Respects To-

ELDON ARTHUR PARK

A LTHOUGH Eldon Arthur Park has in 17 years nimbly bounded up the WLW Cincinnati ladder from part-time odd jobs to administrative responsibility for more than \$1,000,000 in annual programming,

he rues the toil it took to do it. "I want to meet that widely-publicized fel-

low who falls into a puddle and comes up with a handful of gold pieces," he says. "Maybe it happens to others, but not to me—at least not often." To prove it he will tell you about fishing when he was a boy on the banks of the Wabash River.

"I'd get a basketful of fish," he recalls, "but I'd have to stay on the job 16 hours to get it."

In those days for reasons now forgotten he wanted to be a college professor and specialize in mathematics. This ambition refused to leave him even after finishing high school at Montpelier, Ind., where he won letters in track, baseball, basketball and football. In 1924 he acquired a crystal set and tuned in a far-away station in Cincinnati, but the professorial call was still stronger than WLW's signal, and young Park went off to DePauw University to study liberal arts.

That did it. The following year he gave up the teaching idea and enrolled in business administration at the University of Cincinnati.

Mr. Park had been born in Bluffton, Ind., in 1909, and since he was now 20, that made it a bad year to launch a business career—or to study business administration in the expensive collegiate manner. But as a youth who had learned to catch fish the hard way, he met the issue.

In addition to co-op jobs at W. E. Hutton and Co. (as a special accountant); Paramount Pictures (cashier at a branch exchange) and Procter & Gamble (as a cost accountant), he took on extra night and week-end work at WLW, setting up a guide service, handling the reception desk, and answering mail from

---Sydney M. Kaye, vice president and general council, BMI, The Author Meets the Critics, WQXR New York Aug. 22. strain relations between the U. S. S. R. and the U. S. But a year ago, despite the disclaimers of our top brass in ETO, it was evident to most if not all of the Radio Mission that all was not serene.

The Russians didn't want us or the British or the French—their brothers in arms only weeks before—to have a voice in the policy or direction of a broadcast station in a jointly occupied area. For they recognized radio as the most direct means of influencing the mind of man.

Where radio is free, men are free. It works just as surely the other way.

listeners.

Although this seems a stiff schedule, Mr. Park is glad of it now, for it gave him a chance to learn radio from the inside. His first brushes with a microphone came when he helped Little Jack Little on his mythical Nightclub of the Air, reading announcements and requests and doing other odd jobs in the postmidnight periods that were supposed to be after working hours. He made friends with Jane Froman, Singin' Sam, Ford Rush and Eddie Byron, who were then at WLW.

When he finished college in 1933, Mr. Park went to work as assistant traffic manager for

(Continued from page 46)

the station. By 1936 he had become program co-ordinator of the WLW Line, which fed programs to 37 stations. The next year he was made program director and had a hand in developing shows for the "Smoothies" and others on the way up.

When Jim Shouse and Bob Dunville came over from St. Louis to the Crosley Stations in late 1937, they sized up the 35 shows a week being originated at WLW for NBC and decided that a full-time supervisor of these was needed. They chose Eldon Park. He went to New York to take special training for the job, where he met the acid test on a Sunday afternoon. In charge of production of a full-hour Magic Key show he tried to take it into the scheduled rehearsal room, but found Toscanini there conducting a rehearsal with the NBC Symphony. The maestro ran over his time and cooly declined to depart. Mr. Park perspired, but finally got the room-and a scant 45 minutes rehearsal time-before actually putting his hour show on the air.

When he went back to Cincinnati as NBC district supervisor, programs from there went out over the network with never a hitch. They included: Red Skelton's Avalon Time, Tums' Vocal Varieties, Smoke Dreams, Plantation Party and Uncle Walter's Doghouse.

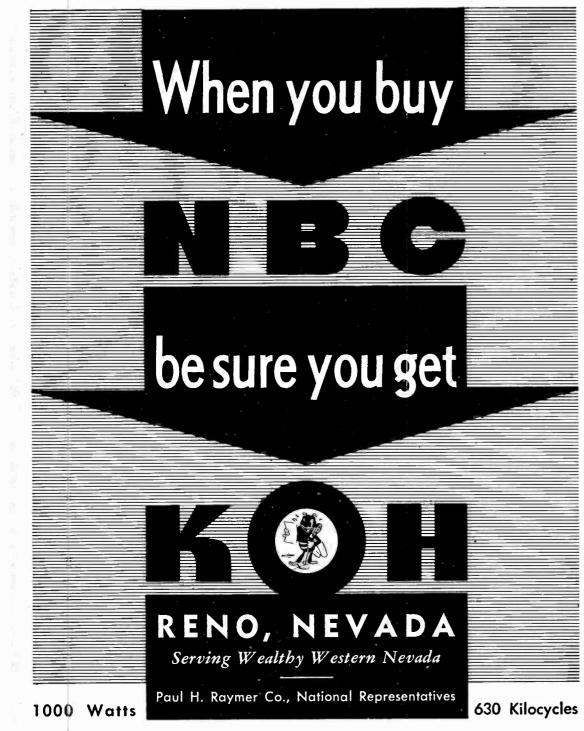

Poor health in 1940 prompted Mr. Park to take a long vacation in California and the Canadian Rockies. When he returned he became assistant sales manager of WLW. Next year he was called into Army service as a captain, but received a medical discharge later. He was next sent to New York as an account executive for WLW, but in 1944 returned to Cincinnati as assistant general manager. Last year he was placed in charge of WLW programming.

The 17 years of radio have nowise dimmed his enthusiasm or drive. He likes radio today better than in the old family-size days, but is faintly nostalgic for the clowning that used to go on.

"There was the time the Mary Sothern show went on the air with only eight pages of a 12-page script," he remembers. "The writer sat in the control room and typed like crazy on the last four pages, slipping them under the door to the director one at a time. Why more people didn't get ulcers, I don't know."

For fun in the future, Mr. Park looks forward to an upcoming trip around the world with his brunet wife, Eleanor, and son, Dick, aged five. Vacations meantime take him yearly to a cottage at Northport, Long Island.

Mr. Park is strong for never giv-

ing a newcomer the brushoff. Looking back over the roster of stars, he has a ready comment, "There are more where they came from."

Tom Revere Appointed As Donahue & Coe V-P

TOM REVERE has been named vice president and chairman of the Plans Board of Donahue & Coe, New York agency, according to

President E. J. Churchill.

For the last four years he has been vice president of Ted Bates Inc. For 11 years prior to that connection he had been with Benton & Bowles as vice president in charge of radio.

Mr. Revere

KORN Sale Pending

APPLICATION for sale of KORN Fremont, Neb. to Inland Broadcasting Co. (KBON Omaha) has been placed in FCC pending file along with Inland application for new 100-w Fremont station, Commission announced Aug. 30. Action followed denial of Inland petition to consolidate applications for hearing with third request on which both are contingent: Inland application to move KORN from Fremont to Lincoln, now awaits further hearing with several other 1400 kc applications. Sale application would transfer KORN from Nebraska Broadcasting Co. to Inland for \$20,000 [BROADCASTING, March 18].

New York Ad Club Plans On Previewing Facsimile

A PREVIEW of facsimile transmission will be given to members of the Advertising Club of New York at the first celebrity luncheon of the year to be held Sept. 18 at the club's temporary headquarters, 30 East 37th Street.

John V. L. Hogan, president of WQXR New York, and head of Radio Inventions Inc., New York, will address the luncheon meeting on "Facsimile Broadcasting and Post-War Selling," in conjunction with the demonstration which is being sponsored jointly by Radio Inventions and WOR New York.

The Advertising Club's weekly bulletin which will be printed on receivers located in the clubhouse, will be transmitted from Radio Inventions Inc., located at 155 Perry St., downtown New York, to WBAM New York, WOR's FM station, at 444 Madison Ave., and from there to the Advertising Club.

Contract Form of NAB Pends AAAA Approval

APPROVAL by the American Assn. of Advertising Agencies is awaited by the NAB Dept. of Broadcast Advertising before mats of the standard spot broadcasting contract forms go out to stations. Distribution of mats was authorized at the August meeting of the NAB board following approval of contract provisions by a joint NAB-AAAA committee.

Though the AAAA Timebuyers Committee has approved the joint committee's contract form, approval of the AAAA's Agency Advisory Committee and the AAAA board was awaited. The board is scheduled to meet Sept. 24. When final AAAA sanction is received NAB will mail the mats, according to Frank E. Pellegrin, director of broadcast advertising.

Convention Delegation Chosen by Petry & Co. EDWARD PETRY & CO., New York, will send the biggest delegation in the history of the company to the first post-war NAB convention in Chicago, it was announced last week.

Petry representatives at the con-

R EID LIGHTON, who after discharge from the service returned to the NBC market research department, has been appointed radio director of Seidel Adv., New York.

KUDNER AGENCY, New York, Oct. 1 opens offices at 436 A. G. Bartlett Bldg., Los Angeles, in addition to its San Francisco headquarters. Effective Oct. 1 the agency will handle the advertising for the Fruehauf Trailer Co. of California for Schipper Assoc., Los Angeles. **ROY H. COMPTON**, who has been in charge of advertising service for the trailer company, will continue in this same capacity for Kudner.

BILLY WILGUS, producer of J. Walter Thompson Co., New York, has been shifted to Hollywood and assigned to CBS "Dinah Shore Show" starting Sept. 18.

KERMIT RICHARDSON, recently Army released, and **ALICE GARDNER**, formerly of Advertising Counselors, Phoenix, have joined the production and copy staff respectively of Pardee, Cash & Associates, Hollywood agency.

REINHART KNUDSEN, separated from Army, has rejoined Portland staff of Botsford, Constantine & Gardner.

RALPH WHITMORE, radio director of The Tullis Co., Los Angeles, and **CAROLYN WILTON** were married in Westwood, Calif., Aug. 30.

W. G. ROSENBERG has resigned as radio director of Les L. Finkle Assoc., Los Angeles.

MYRON (Mike) DUTTON, Army veteran, has been assigned Hollywood producer of J. M. Mathes Inc., New York, on CBS "Sparkle Time" starting Oct. 3. Featured will be Meredith Willson and orchestra. Sponsor is Canada Dry Ginger Ale Inc.

CARLTON ALSOP has resigned his MGM production post to head Hollywood office of Kastor, Farrell, Chesley & Clifford at 6331 Hollywood Blvd. Telephone is Hollywood 8148. Mr. Alsop also will produce NBC "Drene Show with Don Ameche" starting Sept. 8.

VIC McLEOD has joined J. Walter Thompson Co., Hollywood, as writer on NBC "Tommy Dorsey Show." He replaces BUD PAGANUCCI.

GLENN WHEATON has been signed to write CBS "Tony Martin Show" for Foote, Cone & Belding, replacing ELON PACKARD and STANLEY DAVIS.

FRANK BROMBERG, former vice president of Ellis Adv., New York, has joined Rodgers & Brown, New York, as general manager and account executive.

SAMUEL LEDDY, formerly with Small & Seiffer, New York, in a research capacity, has been appointed media director of the agency. Mr. Leddy returned to Small & Seiffer last January after serving with the armed forces.

HARRY RAUCH, New York publicity director of Young & Rubicam, is in Hollywood for month conferring on West Coast aspects of agency clients with MILTON SAMUEL, Pacific Coast publicity director.

STANLEY E. WEISS has been named assistant production manager of H. M. Gross Co., Chicago. He formerly was head of the production control department of Pabst Sales Co. and most recently with Phil Gordon Agency as head of production department.

EDMUND ROGERS Jr., after a year and a half overseas service, has joined the research staff of Gray & Rogers, Philadelphia. He has received his degree from the U. of Pennsylvania.

GREY ADV., New York, is conducting special courses in various phases of advertising for the benefit of veterans who have joined agency and as refresher for other agency personnel. Included in courses is "Place of Radio and Video Advertising."

ARTHUR TERWILLIGER has resigned as production manager of Check Chart Corp., Chicago, to become member of the production staff of Klau-Van Pietersom-Dunlop Assoc., that city. He has been in advertising since 1929. Also added to agency's production staff is JAMES BATTONI, active in Milwaukee advertising for more than 10 years.

NORMAN ROSEN, formerly with the radio division in charge of television, J. Walter Thompson Co., New York, has joined Richard & Gunther, New York. as account executive.

HOWARD B. ERVIN, formerly in the traffic department of Young & Rubicam. New York, has joined Hanly, Hicks & Montgomery, New York, as traffic manager.

MIMI MARGO, radio director and timebuyer of Moselle & Eisen, New York, has been appointed head of the agency's newly formed publicity department.

ROBERT L. RICHARDS, formerly on staff of Philadelphia Inquirer, has joined Kemmerrer Inc., Hollywood agency, as production manager.

DICK CREAMER, former executive of BBDO San Francisco, assigned to Standard Oil Co. account, has joined McNeill & McCleery, Los Angeles, as account executive.

GENE BIGGS and JOY WRIGHT, formerly of Lynch Adv., Portland, Ore., and Giezendanner Adv., Houston, Tex., respectively, have joined Morgan Adv., Phoenix, Ariz.

WILLIAM M. SPIRE, former vice president and a member of the plans board of Ruthrauff & Ryan, New York, has joined Sullivan, Stauffer, Colwell & Bayles, New York, as a member of the SSCB plans board.

HOWARD KETTING, vice president of Ruthrauff & Ryan, Chicago, and executive on Wm. Wrigley Jr. Co. account, is in Hollywood for 10 days conferring on fall plans for CBS "Gene Autry Show."

vention will be: Edward Petry, Henry I. Christal, H. E. Ringgold, V. F. Righter, Irvin Gross, John E. Harrington Jr., James O. Parsons, Edward Voynow, John Ashenhurst, James Thompson, Buell Herman, Louis Smith, Chester Matson, Earle H. Smith, William Cartwright, George Kercher, Charles F. Grisham, James G. Sandison and Mason McGuire.

"It is obvious that this first postwar meeting of all elements of the broadcasting industry will be a most important and significant convention," Mr. Petry said. Radio promotion

JANE BUTLER Director of JANE RECOMMENDS

JANE RECOMMENDS—the WGBS woman's program—this month marks its Tenth Anniversary of leadership—a new all-time record for a personality program in South Florida.

HOW TO SPEND HOW TO SPEND #10,000 ** #510,000 ** #510,000 ** #510,000 ** #510,000 ** #510,000 ** #510,000 ** #510,000 ** #510,000 **

> JANE RECOMMENDS Month on WGBS is a tribute earned by ten years of helpful service to women. And ten years of service to advertisers, too, some of whom have used it daily for as long as eight years.

JANE RECOMMENDS, heard five times weekly at 2 p.m., is celebrating its birthday with the greatest audience promotion effort ever achieved in South Florida, a \$10,000 campaign. Join the party now and let JANE RECOMMEND your product to her loyal and growing audience.

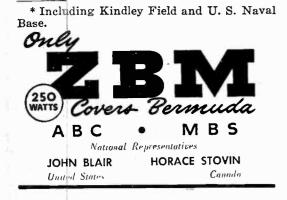

10,000 WATTS - 710 KC WCGBS *Florida's most kowerful* MIAMI ABC - A FORT INDUSTRY STATION REPRESENTED BY THE KATZ AGENCY

O NCE ZBM takes a product on tour there's no relaxing. Even *Holiday* magazine says "Wide-awake Bermuda tourist trade miraculously revived."

That's one reason 60 local accounts started with ZBM in May—why 60 more joined since. ZBM's 250-watts is the only adequate radio coverage of 38,000 * Bermudians. Consequently they listen closely, respond keenly to the ABC, MBS and local shows carefully designed for Bermudians.

Bermuda is leased to U. S. for 99 years. U. S. products and influence are growing. It's virtually untapped. A tidy little market spending 17 millions yearly for U. S. imports. For YOUR product?

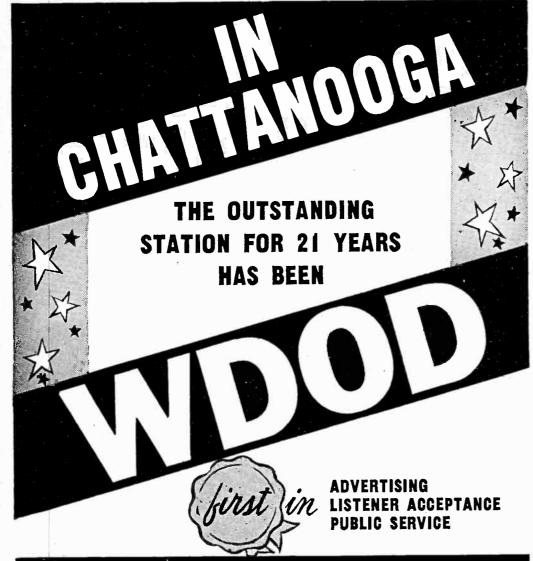

KFMJ TULSA PLANS TO OPEN OCTOBER 20

THE NEW KFMJ Tulsa, licensed to the Fred Jones Broadcasting Co., expects to get under way about October 20, it was announced last week by Lawson Taylor, general manager. Fred Jones, the licensee, is one of the largest Ford dealers in the country, with operations in Oklahoma City and Tulsa, and is also in the oil, hotel, ranch, drilling rig and other pursuits. The new station is assigned to 1050 kc with 1000 watts, daytime operation.

Mr. Taylor, former commercial and assistant manager of KTUL from 1935 to 1941, was released from active status in the Army Air Force as a major last November. He had entered military service in 1941 as an officer candidate. Prior to joining radio, he was a weekly newspaper publisher in Sand Springs, Okla., and before that had served from cub reporter to managing editor. He had worked on the staffs of the Fort Worth Star Telegram, Daily Oklahoman. Kansas City Journal Post. Chicago Daily News, and Christian Science Monitor.

Assistant general manager of the KFMJ is Tom Johnson, who was separated from the Army last year as a lieutenant colonel, specializing in motion pictures and radio in the Quartermaster Corps. Mr. Johnson formerly was commercial manager of KOMA Oklahoma City, and in the motion picture distribution field.

JOHN MELVILLE, former announcer of WSBA York, Pa., and WDAS Philadelphia, has been named chief announcer-news editor of WNOC Norwich, Conn.

JOHN WILEY, former publicity director of Lockheed Business Enterprises, has joined CBS Hollywood production staff. He replaces BOB RICHARDS who shifted to Foote, Cone & Belding Hollywood publicity department.

FRED BARR, WWRL New York program director, has been named to publicity committee of the American Social Hygiene Assn. campaign for New York City.

FRED SHAWN of NBC program department is the father of a girl born Aug. 27. Baby has been named Shirley Helene.

FRANK JOHNSTONE, formerly with OWI, has joined KFRC San Francisco as announcer.

LOUISE PECKMAN has been named production and musical director of KICD Spencer, Iowa. She previously was publicity director of KSCJ Sioux City, Iowa.

GENE BOLLINGER has resigned from the announcing staff of WLAT Conway, S. C., to enter U. of North Carolina. JIM ESTES has returned to station as announcer and sportscaster. ED BROWNING Jr. has been named program director of WLAT.

DONALD ROBERTS, discharged from AAF, has joined announcing staff of KFXJ Grand Junction, Col.

WILLIAM McGRATH, 19-year-old tenor who last year won Buffalo Evening News-WBEN voice contest and an eventual WBEN Buffalo contract as star of "The Frontiersmen," Thurs. 7:30 p.m., has been awarded a scholarship to Juilliard School of Music, New York. Frontier Fuel Oil Corp. is sponsor of the WBEN program.

ALUN WILLIAMS, New York freelance announcer, has been assigned announcer on new U. S. Rubber Co.-Encyclopedia Britannica television series on WABD New York. He formerly had been with KYW Philadelphia.

New Format Is Adopted On MBS Crime Series

INITIAL broadcast of the new MBS series *Crime*, *Causes and Prevention*, which starts Sept. 12, will be a full-hour program with the first half-hour devoted to talks by a group of qualified authorities in the field of crime prevention.

The second portion will consist of a dramatization of a typical criminal act, followed by an interview with the criminal and a panel discussion in which guests will discuss the case and answer questions from members of a selected audience, chosen from groups who have indicated interest in the problems of crime prevention and juvenile delinquency. Format for the last half of this program will provide the basis for subsequent programs to be heard Thursdays, 10:30-11 p.m. The entire series is being presented in cooperation with the Society for the Prevention of Crime, and Edwin J. Lukas, executive director of the society, will introduce the program and conduct an interview with the convict whose criminal act is the subject of the dramatized portion of the show.

Busy Hart

LET'S FACE IT! How much can a man do in 58 minutes? According to press-agent of KFWB Hollywood, Maurice Hart, record m.c. of "Start the Day Right," on one program answered 83 telephone calls and acknowledged names of callers on the air. He played 12 records completely, gave 15 time checks, played four transcribed announcements, ad-libbed five live announcements. Also had his secretary read and criticize four letters from listeners over the air. Between times he ate one peach, one donut and drank two cups of coffee before signing off.

BING GILMORE, former AAF pilot who flew the "hump" in the CBI theatre, is back on the job as announcer at KOMA Oklahoma City after an illness which kept him hospitalized several weeks.

KURT WEBSTER, released from the service, has returned to WBT Charlotte, N. C., to resume as m.c. of "Midnight Dancing Party," Mon. through Sat. 11:30 p.m.-1 a.m. Mr. Webster has been named "Night Mayor of Charlotte" by Mayor Herbert H. Baxter.

DENNIS SWEETING, discharged as a major from the Canadian Army after six years of services overseas, has joined the announcing staff of CBR Vancouver, B. C.

WILLIAM HERBERT, announcer of CBR Vancouver, B. C., is father of a girl, Bridget Ann.

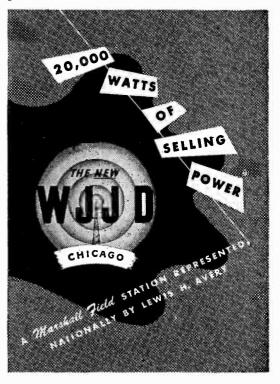

BILLY MAY has been re-signed as musical director of CBS "Adventures of Ozzie & Harriett."

ARTIE PHILLIPS has been made head writer on CBS "Maisie" program, with RUSSELL BEGGS assigned as assistant. WILLIAM ROBSON, CBS Hollywood producer-director, is in New York conferring with DAVIDSON TAYLOR, director of programs, on plans for two 90-minute CBS promotional programs scheduled to originate from those cities on Sept. 22 and 29.

RUSSELL NAUGHTON, announcer at WDRC Hartford, Conn., has been assigned m.c. of afternoon "Music Off the Record Club" program.

ALAN GANS, announcer for KYW Philadelphia, has returned to that station after a tour in summer stock which took him through New York, Pennsylvania, Virginia and Maryland.

GORDON HAWKINS, education and program director of Westinghouse Radio Stations with headquarters at KYW Philadelphia, has been re-appointed instructor in radio at the U. of Pennsylvania School of Education. This will be Mr. Hawkins' third consecutive year, and is an expansion of the teaching plan he developed and gave at the KYW Summer Radio Workshop to faculty members of all schools in Philadelphia's area.

Time Buyers! "Spots" PROGRAMS BRING HOME THE BACON!

• According to "Spot" these 11 programs do three things to bring home the bacon for your clients:

They have audience appeal. Look them over. These are smartly planned programs that people listen to—and keep listening to.

The audience is big. Fact is, 57% of American radio homes are covered by these eleven key NBC "SPOT" stations.

The audience has money. To be exact, it has 34.2% more spending power than the U.S. average.

No wonder these programs bring home the bacon. Let them bring some for your clients. But don't dally. This kind of bacon goes fast.

Owners of Liberty Seek New Outlets **Applicant to Buy WOOD Also Asks Two Michigan Grants**

A CONTEMPLATED expansion of holdings by Liberty Broadcasting Corp., which is seeking to buy WOOD Grand Rapids from ABC for \$850,000, was seen last week when its owners applied to FCC for new local stations in Holland and Benton Harbor, Mich.

Simultaneous with the applications filed by Roy C. Kelley, George S. Norcross and Ray M. Veenstra, president, vice president and secretary-treasurer of Liberty, respectively, the Commission reported a competing application for Holland filed by Ashbacker Radio Corp., licensee of WKBZ Muskegon, Mich. At the same time Ashbacker also applied for a new station at Manistee, Mich.

Messrs. Kelley and Veenstra, equal owners of Liberty, and Mr. Norcross, as an equal partnership under the name of KVN Co., stated that in the event of station grants, the two licenses would ultimately be assigned to Liberty. Applications for the acquisition of WHLS Port Huron, Mich., for a total price of \$300,000, and a new station on 1490 kc in Muskegon by Messrs. Kelley and Veenstra, are now pending before the FCC. Construction costs for the Holland and Benton Harbor stations were estimated at approximately \$21,240.

Ashbacker Radio Corp., 100% controlled by Grant F. Ashbacker, and KVN both applied for 1450 kc in Holland: Ashbacker with 100 w power, KVN with 250 w, both for fulltime. Ashbacker's Manistee station would operate on 1490 kc with 250 w fulltime, contingent upon grant of switch to 1230 kc by its Muskegon outlet, WKBZ, which is now on 1490 kc. Proposed KVN Benton Harbor station is for 1240 kc, 250 w unlimited hours. Ashbacker estimated construction costs at \$23,600.

CRC Announces Agenda For Cincinnati 'Meeting

THE COLUMBIA Recording Corp., New York, on Sept. 23 and 24 will hold its sales convention at the Hotel Gibson, Cincinnati.

In addition to company officials, executive and sales personnel from the 47 Columbia distributors, many Columbia records stars have made reservations for the two-day meeting, it was announced by Paul Southard, vice president in charge of sales and advertising. On the agenda for the convention is an outline of Columbia's advertising plans by Jim Flora, advertising manager, and representatives from McCann-Erickson, firm's agency, and an announcement of Columbia's new publicity program by Wayne Varnum, director of publicity.

K. SCOTT, Charlotte, N. C., has R. Scoll, challout, h. c., and been appointed sales represent-ative in southern Atlantic states for Charles Michelson Inc., Boston, for years, Mr. Scott formerly was with WIBG Philadelphia and more recently with WAYS Charlotte as head of com-mercial department and handling special assignments.

GORDON BUCK, for a year with C. E. Hooper Inc., has reopened his own ra-dio audience measurement office at 64 E. Jackson Blvd., Chicago. He was pre-viously with A. C. Nielsen Co. and Industrial Surveys

The intruder, who jumped to the sixth floor terrace from an adjoining building, was discovered by Joy Hodges, actress wife of Mr. Dudley. Hearing his wife yell, Mr. Dudley rolled out of bed and fell to grappling with the burglar. He hit him with a "lucky" left and when the burglar rebounded, promptly flattened him with an ash tray to the head. Police took the intruder to Bellevue Hospital prison ward. He identified himself as Theodore Baldwin, a merchant seaman.

o Readers of Broadcasting DID YOU EVER SEE THIS LETTER BEFORE, THIS LETTER APPEARED in the July 22 " issue of SAN BERNARDINO Broadcasting in an adver-SAN BERNARDINO. CALIFORNIA June 18, 1946 tisement over the Signa-

Radio Station K.P.R.O., San Bernardino, California. Our Department wishes you to know of the value of your radio facilities to the agricultural and horticultural endeavor in San Bernardino County. Not only the growers of commercial crops, but small lot and home gardeners have expressed themselves as having a great interest in the Farm Front process. San Bernardino County. Just recently we again had reason to use your facilities to warn people that a large shipment of sweet potatoes had been sold throughout the County, and it was hearly infested with Sweet Potato Meeril - a quarantimed pest not found in California. in the Farm Front program. We have an opportunity to present a great deal of val-usble informations over the radio. This information is put on the air the way we know it should be, and is not garbled up as it would be (and is) in the newspapers. The information we give is official, and be stand back of it as being authentic. When articles are worked over by the newspapers, we do not recognize the information. We figure that with the interest in the program and the fact that correct information is being given - the program fills a very definite County-wide public service.

Lours very and for the second for th

WEED & CO.

J OHN O. SEAVER has been appointed chief operator of WFMR, new station at New Bedford, Mass. Mr. Seaver previously had been with Eastern Airlines as radio technician and operator. He will be in charge of installation and operation of station's temporary 250 w RCA transmitter soon to be delivered.

DEAN STYERS Jr., former instructor in the Navy electronics school, is temporary addition to the engineering staff of WLAT Conway, S. C. He is to enter North Carolina State College to complete his course in electrical engineering. **JIM WILLIAMS**, operations supervisor of engineers for the State Dept. in San Francisco, is the father of a girl.

CHARLES CATANIA, former warrant officer in the Army Airways Communications System, has joined the technical staff of KOAD Omaha, new FM station. L. MORGAN CRAFT, who joined Collins Radio Co., Cedar Rapids, Iowa, in 1935

Mr. Bessemer

to the new office of vice president in charge of engineering and manufacturing. Succeeding him as general manager of the manufacturing division is L. E. BESSEMER, who was formerly chief production engineer of the equipment manufacturing firm.

Mr. Craft

Class One Father

WHEN a station goes off the air there are usually a variety of technical reasons. When KODL The Dalles, Ore., went off the air for one hour and 45 minutes it was because their only class one ticket holder, Marvin E. Johnston, was too occupied becoming a father.

GENERAL ELECTRIC Co., Schenectady, N. Y., Electronics Dept., has announced new forced air-cooled transmitting tube, Type GL-5518, designed for use as a class C radio-frequency amplifier and oscillator. Full ratings for new tube apply up to 110 mc.

LYNN BRENDEL has been promoted to general service manager of Hallicrafters

Co., Chicago. Credited with being a member of the origin a l engineering group which perfected the auto radio, Mr. Brendel in his new post will be responsible for servicing of all Hallicrafters equipment and the operation of the firm's six service centers throughout the country. He joined

Hallicrafters in Oct. Mr. Brendel 1945 as systems en-

gineer and was promoted to sales engineer in company's War Assets Adm. surplus disposal agency.

MAJ. SOMERS S. SMITH of the engineering staff of WBT Charlotte, N. C., has been recalled to special duty by Army Signal Corps. He's succeeded at WBT by HUGH A. WALKER.

Milestones

TO MARK fourth anniversary, KWKW Pasadena, Calif., Sept. 12 will devote an hour to live program to feature guest sports, film and radio personalities, according to Bill Beaton, station general manager . . . WJPF Herrin, Ill. Aug. 28 celebrated its sixth birthday with station break announcements calling attention to seventh year of service commencing on that date. Five staff members of original 1940 crew remain. They are: Charles R. Cook, general manager; Fred J. Reinhardt, station relation director; Doug Hadley, program director; June Wynn, women's editor, and Virgil Hood, custodian.

Helene Smith, organist of KGER Long Beach, Calif., in mid-September begins her 23d year in radio. . . . In latter August on occasion of 2,000th airing of their live, local Dairylcisure Time on WFBL Syracuse, program cast presented special program from a chartered airplane while circling the city. Show has been sponsored 8:45-9 a. m. across the board by Onondaga Milk Producers, branch of the Dairymen's League, since March 3, 1941. . . . Jacob Reed's Sons, Philadelphia clothier, has entered fifth year of broadcast advertising in that market via KYW Philadelphia. Half-hour transcribed series used by firm was placed by Seberhagen Inc., that city.

E D W. CONKLIN, separated from Navy as lieutenant (jg), has been appointed day manager of CBS Hollywood news bureau. He succeeds PAT O'REILLY who resigned after 4½ years to do free-lance writing in the Pacific Northwest. Prior to service Mr. Conklin was with the United Press in both New York and Los Angeles. He is also a former foreign correspondent.

AMOS KIRBY, farm editor for WCAU Philadelphia, is using a helicopter for his visits to the fairs being held at Allentown, Pa., Reading, Pa., and Trenton, N. J. Novel arrival method was made through arrangements with the Helicopter Air Transport Service, Camden, N. J. Mr. Kirby lands right on the fair grounds in his plane, adorned with WCAU pennants. At each fair he makes several descriptive broadcasts of the proceedings and interviews his rural listeners.

CHARLES ARLINGTON, after three years of Army service, has returned to Don Lee Broadcasting System, Holly-wood, as newscaster-announcer.

BOBBY GRAYSON, separated from Navy and onetime Stanford U. All-American back, is now sports consultant of KGW Portland, Ore.

SAM BALTER, former network sportscaster who became Los Angeles area commentator, has been named sports editor of KLAC Hollywood effective Sept. 9, at which date his commentaries will be concluded.

BOB (Deacon) DOUBLEDAY, agricultural director of WFBL Syracuse, and his collection of bells offered by fans furnish subject material for article in current issue of Hobbies magazine.

DEL LEESON, news editor of **KDYL** Salt Lake City, is the father of a girl, Susan.

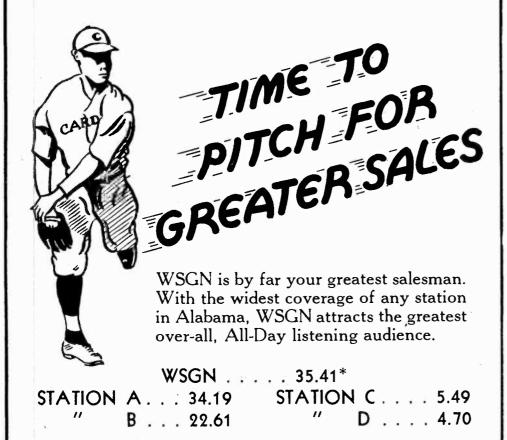

D. C. MacARTHUR, chief news editor of CBC Toronto, with JOHN FISHER, CBC commentator, and WELLS RITCHIE, CBC press and information supervisor, are to attend the national convention of the Canadian Weekly Newspapers Assn. at Halifax Sept. 12-14.

BOB GARROD, CBS Hollywood newscaster, has been assigned narrator on a Columbia Pictures sports short.

KSDJ to CBS

KSDJ San Diego, Calif., effective Oct. 1 starts operation and joins CBS as network's 159th affiliate. Operating with 5 kw fulltime on 1170 kc, the station is owned and operated by the Finley-McKinnon Broadcasting Co., and is affiliated with the San Diego Journal. Purnell H. Gould is general manager.

Charlie Alfreaton went to London...

Charlie's a veteran. He studies at Syracuse University, lives in a trailer camp. And, as we found out, he listens to WSYR. Most people do up here in Central New York State.

Since last March WSYR has been broadcasting a program called *The New Horizon*. It's dedicated to building a better understanding among the people of all nations. Ninety speakers, representCharlie Wheaton won. So we flew him to London for a weekend, escorted by WSYR's popular news analyst, Vadeboncoeur. He saw England's capital. He talked to noblemen and commoners. He visited Parliament and the war-gutted slums. He *met* Great Britain.

When Charlie Wheaton—a typical American came back to Syracuse, he had a lot of important things to tell WSYR's listeners, via *The New Horizon*, about typical Britons.

One was the plain, leveling fact that "the ordinary man in either country has the same basic hopes and fears, and values the same security."

We think *The New Horizon*—and things like sending Charlie Wheaton on a mission to London —are important. It's a contribution by WSYR... to today, to the future, to the dream that we all have for a unified world.

It makes dramatic listening. It's a program with a purpose. And it's typical of WSYR, the prestige station of Central New York State.

ing almost every country of the globe, have talked over it and WSYR. We're pretty proud of *The New Horizon* and what it stands for.

Not long ago we ran a contest as a part of this program. We wanted a winning essay on "What Can Great Britain and the United States Do to Be Better Neighbors?"

570 kc.—5000 watts NBC in Central New York

NOTHING WIGGLING IN LITTLE EGYPT (Ky.)!

Maybe it would cost you only one dime, two nickels, the tenth part of a dollar to take a peek at little Egypt (Ky.) via radio but don't "step right in, folks, to see the little lady." There ain't no sales pulsations there! Take a look instead at WAVE's Louisville Trading Area, the area that shakes up more business than all the rest of Kentucky combined! She's a bcaut, boys!

CHARLES R. GASTON, AAF veteran, has joined the advertising department of Tide Water Associated Oil Co., San Francisco. He will handle advertising production.

CHARLES H. BUTLER, for 10 years account executive of Stockton, West, Burkhart, Cincinnati agency, has been appointed to new position of merchandising and advertising manager of U. S. Shoe Corp., that city. He previously had been with Procter & Gamble Co. advertising department.

GENE O'BRIEN, director of radio activities for Universal Pictures, has been elected chairman of radio subcommittee of movie industry's Public Information Committee. He succeeds MARTIN LEWIS.

The 23C is a complete high quality ac operated amplifier and control assembly in a compact table-top console less than three feet long.

Capable of serving one or two studios, the equipment provides facilities for program production or audition and monitoring.

Fingertip controls handle a choice of eight studio microphones or low level transcription tables, control room announce or talkback mike and four remote lines. Four of the low level and one remote line may be used simultaneously.

The 23C is particularly suited to the needs of the smaller AM or FM station - or for single studio operation. For details, see your Graybar **Broadcast Equipment Representative** or write to Graybar Electric Co., 420 Lexington Ave., New York 17, N.Y.

CERTIFICATE, lapel pin and windshield sticker, verifying broadcast and civic acknowledgment of an

and civic acknowledgment of an "outstanding act of safety and courtesy while driving a motor vehicle" are being presented by KXOK St. Louis to qualifying citizens in a safety promotion campaign staged in conjunction with the St. Louis police department and Greater St. Louis Safety Council. Effective Sept. 14, awards will be made on early morning KXOK "So It Can't Happen to You" traffic safety program, conducted by a member of the local police force. Committee of judges composed of civic and business representatives nominates weekly winners.

Papers Welcome WARL

WARM welcome has been afforded WARL Arlington, Va., new daytime outlet, by local papers which forsee increase of merchandising and community interest through the dual media of information. The Arlington Daily; The Sun, weekly paper, and Northern Virginia Shoppers Journal have offered support to WARL. The Arlington Daily has been running large advertisements concerning the outlet. Station will give paper and its reporters credit for news stories broadcast. "City Desk" local news program is planned to feature paper's lady city editor. The Sun plans to give WARL full coverage and to schedule forthcoming programs.

WHN Displays

SCENES from WHN New York "Newsreel Theatre of the Air" series are being displayed on posters and window streamers just completed by Robert G. Patt, stations's promotion director, Household Finance Corp. and Adam Hat Stores, sponsors of the program, are distributing the posters in their offices and stores, respectively. Pieces feature pictures in the form of a series of motion picture film frames of news being gathered, prepared and presented on the newsreel show.

Safety Campaign

TRAFFIC TAGS, entitling holder to orchid with courtesy of WTCN Minneapolis, are being given to better-thanaverage drivers by police squad cars in safety promotion campaign being conducted by the station. Winners of the tags are announced on the WTCN "Platter Chatter" program. Traffic tickets bear WTCN program promotion and courtesy credit to firms awarding orchids.

CKMO Brochure

CKMO Vancouver, B. C., is distributing an eight page brochure on station mail response. Frinted in chocolate brown and white the brochure is captioned "A Letter to You About Letters to Us," and contains data on mail response and coverage map showing actual postmarks from locations covered by station's signal.

KARM News Service

PROMOTION service instituted by KARM Fresno, Calif., is built around menu news briefs furnished local restaurants. News headlines of the day, with brief explanations, are printed daily by KARM and in attractive cellulose folders are attached to menues. KARM is credited with service.

Shell Posters

SHELL OIL Co. is distributing to all service stations in North and South Carolina a 40×60 three-color poster

Baseball Service

BASEBALL fans in the New York area may obtain up-to-the-minute baseball scores of all major league games by calling Buckminster 7-5900, telephone number of WLIB New York, at any time during the broadcast day.

KQW Mail Piece

STRESSING studio programming, mail piece prepared by KQW San Francisco titled "Speaking of Operations" is being sent to national agency list to promote fall schedule. Cover cartoon shows hospital operating room. Cartoons are used throughout to illustrate KQW-CBS news operations and other KQW program features.

Talk Reprint

FOLDER issued by KFEL Denver is reprint of talk given by Edgar Kobak, MBS president, on "Are Stuffed Shirts Coming Back," before Denver Rotary Club during NAB Board of Directors meeting at Estes Park, Col. Piece is being mailed to memberships of Rotary, Denver Advertising Club and agencies.

WAPI Mail Piece

MAIL PIECE concerning the special events coverage of WAPI Birmingham. Ala., has been distributed by the station. Piece is titled "Speaking of Sports," features Maury Farrell, WAPI director of sports and special events.

One Group Urged

ALL DENOMINATIONS were urged by the 1946 Religious Radio Workshop, at a session concluded Aug. 30 at the U. of Chicago, to call on the Federal Council of Churches to provide necessary radio services at a national level. Workshop also urged immediate steps to organize all denominations under national council to work with networks for nonsectarian approach to broadcasting. Three-week workshop was directed by Rev. Everett C. Parker, director of Joint Radio Committee, Congregational Christian, Methodist and Presbyterian churches.

Bank Ad Meet

FINANCIAL ADVERTISERS Assn., national bank advertising organization with more than a thousand members, will hold its first national convention in the West at Fairmont Hotel, San Francisco, Oct. 7-10 inclusive. Nationally known speakers in field of financial advertising will headline program. Rod MacLean of Los Angeles is program chairman with Lester B. Johnson of San Francisco, chairman in charge of arrangements.

reach the leading audience of buyers of ad-

vertising through the largest A.B.C. net paid

circulation in the general advertising field.

Carolina a 40 x 60 three-color poster directing attention to "Sports Spotlight," quarter - hour three - weekly sportscast featuring Lee Kirby and George Theeringer, on WBT Charlotte, sponsored by Snell.

Column Reprints

REPRINTS of Rock Hill, S. C., Peoples National Bank column in Rock Hill Evening Herald, describing radio set ownership in that area, are being distributed by WRHI Rock Hill as promotion material. WRHI is mentioned in column which also cites market data and other facts about area.

Baton Rouge

Lafavette

Put a good talent show on wax, grind it out to prospects through a speaker system that distorts and fuzzes up the frequencies, and you cut your profit opportunities in two. That's a story that doesn't need explaining. And that's the reason station managers literally flooded us with inquiries about the Altec Lansing Duplex Speaker.

Their engineers gave them the facts. No other speaker system on the market can reproduce the clean highs . . . the deep basses and the wide range -50 to 15,000cycles - without concurrent inter-modulation effects. The Duplex does!

FAST AND EASY TO PUT UP and provides for a

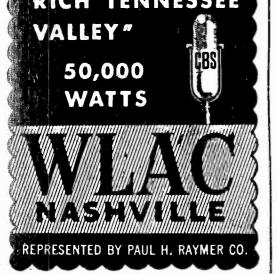

minimum of maintenance

A prominent construction company executive says: "The forethought in engineering and workmanship of fabrication greatly facilitates the

ease and speed with which Truscon Radio Towers

Typical of the Truscon Radio Towers being erected for new and modern requirements is the self-supporting structure illustrated at the left. Installed at Alliance, Ohio, it is 175 feet high, supports an FM antennae, and will serve a 5,000 watt FM station.

Also realizing that maintenance is of prime importance to the broadcasting station owner, Truscon designs its towers with a minimum number of field-bolted connections. Over a period of years, these features assure a constant saving in maintenance expense, due to the small number of joints to inspect and bolts to tighten. Tall or small . . . AM or FM . . . every type of radio tower need is met by Truscon engineering and manufacturing services. Truscon Radio Towers are triangular

BROADCASTING • Telecasting

in cross section and are built entirely of heavy steel members with most shop assembled connections made by means of electric arc-welding.

Experienced Truscon engineers will be glad to help solve your radio tower problems.

Manufacturers of a Complete Line of Self-Supporting Radio Towers . . . Uniform Cross-Section Guyed Radio Towers . . . Copper Mesh Ground Screen . . . Steel Building Products.

6052. It was further ordered that the petition insofar as it requests grant of application as amended, be dismissed.

Maricopa Broadcasters Inc., Phoenix, Ariz.—Granted motion to take depositions on Sept. 18 in re application for CP.

KARM, The George Harm Station, Fresno, Calif.; Alvin E. Nelson Inc., San Francisco; State College of Wash., Pullman, Wash.—Granted joint petition for continuance of hearing now set for Sept. 16, and continued same to Dec. 9, 1946.

Tower Realty Co., Baltimore, Md.— Granted motion to take depositions in re application for CP, said depositions to be taken at hearing room, State Tax Commission, Union Trust Bldg., Baltimore, except that of Archbishop Curley which will be taken at his residence.

Maricopa Broadcasters Inc., Phoenix, Ariz.; Radio Phoenix Inc., Phoenix, Ariz.—Denied petition requesting that the hearing on its applications now scheduled for Sept. 26 in Washington, be held at Phoenix insofar as the nonengineering testimony is concerned.

Century Bcstg. Co., Corpus Christi, Tex.—The Commission on its own motion continued without date until further order of the Commission, the hearing now set for Oct. 10.

Tennessee Radio Corp., Nashville, Tenn.—Granted petition for extension of time in which to file request for oral argument, etc., to proposed decision, and extended the time to Sept. 5 in which to file exceptions to the proposed decision.

Peoria Bcstg. Co., Peoria, Ill—Granted petition requesting leave to amend its application for CP so as to specify a modified DA system, etc., and the amendment was accepted.

KSFO San Francisco, Calif.—Granted petition for continuance of hearing now scheduled for Sept. 5 in re application for CP and KQW's application, and continued said hearing to Nov. 14, 1946.

SEPTEMBER 4

BY COMMISSION EN BANC

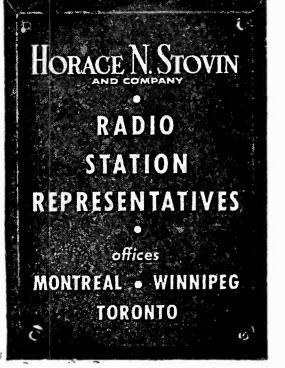

On its own motion the Commission continued the hearing on the Los Angeles FM applications (Docket No. 7727 et al) now scheduled for Oct. 14 at Los Angeles, to November 18 at Los Angeles.

BY ADMINISTRATIVE BOARD

WRNO Orangeburg, S. C.—Granted modification of CP which authorized a new station, to change name of applicant to WRNO Inc., make changes in antenna, changes in transmitting equipment, change transmitter and studio locations to 0.3 mi. E. of Orangeburg on State Highway 4, and extend commencement and completion dates to 60 days after grant and 180 days thereafter, respectively.

KWHK Hutchinson, Kan.—Granted modification of CP which authorized a new station, for approval of antenna and of transmitter and studio locations RFD, Hutchinson, S½ of SW¼ Sec. 25-22-6, Hutchinson, and 12 West 5th St., Hutchinson, Kan., respectively.

WDNL Bradenton, Fla.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations at Chamber of Commerce Bldg.,

Municipal Pier, Bradenton. Permittee is granted a waiver of Sec. 3.55(b) of the Commission's rules; conditions.

WHBS Huntsville, Ala.—Granted modification of CP which authorized a new station, to change type of transmitter, approval of antenna, approval of transmitter and studio locations at W. side of County Road, corner of O'Shaugnessy Ave., No. of Huntsville, and corner of Gallatin and W. Clinton Sts., Huntsville, respectively.

WKAB Mobile, Ala.—Granted modification of CP which authorized a new station, for approval of antenna and approval of transmitter and studio locations at Madison and Front Sts. Mobile, Ala., and change in transmitting equipment.

WPNA Alpena, Mich.—Granted modification of CP which authorized a new station, to change type of transmitter, approval of antenna and approval of transmitter and studio locations at 301 No. 2nd St., Alpena, Mich.

WFRP Savannah, Ga.—Granted modification of CP which authorized a new station, to change type of transmitter, for approval of antenna and approval of transmitter and studio locations at Perry Lane, Savannah, and 219 E. Charlton St., Savannah, respectively. Permittee is granted waiver of Secs. 3.55(b) and 3.60 of the Commission's rules; conditions.

KJAM Vernal, Utah—Granted modification of CP which authorized a new station, for changes in transmitting equipment, approval of antenna and approval of transmitter and studio locations at Main St. on 1st East St., Vernal, Utah.

KEIO Pocatello, Ida.—Granted modification of CP which authorized a new station, to change type of transmitter, and for approval of antenna and transmitter site at Cedar St. and Pole Line Road, 0.7 miles No. Pocatello.

REPRESENTING LEADING RADIO STATIONS

(Continued from page 16)

73.7% in 1944. Owning two sets, 21.9% this year; 23.8% in 1945; 20% in 1944; owning three or more sets, 5.7% this year; 6.6% in 1945; 6.3% in 1944.

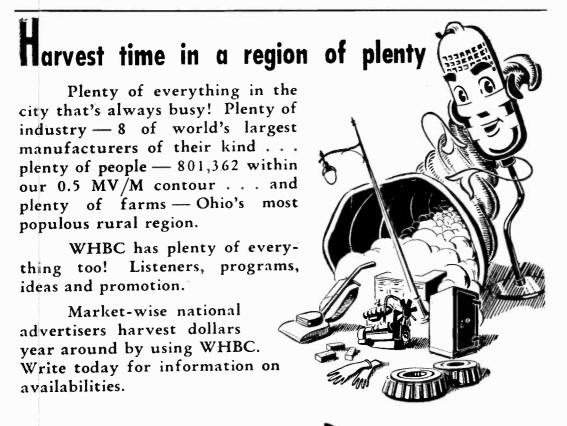

Of urban dwellers 94.8% reported their sets in working order; 90% of village residents said their sets were working and 89.4% of farmers reported no trouble. Farmers were hardest hit in sets out of order, 5.2% reporting no radios working. Of villagers 3.9% said their receivers were out of order, while the figure for urban dwellers was 1.6%.

Dead batteries accounted for most of the sets out of order, with 35.8% reporting that cause. A total of 29.1% listed unknown reasons, 16.5% blamed bad tubes and 11.3% listed "other reasons."

Dr. Whan, whose study covered a wide field, found that more than half of all savings reported last March were greater than in March 1945. Reconversion lay-offs and delay did not dissipate wartime savings in Kansas, he concluded.

Zeyher Named

LEWIS R. ZEYHER, formerly with the American Cystoscope Makers, New York, has been appointed works manager of the Columbia Recording Corp. plant at Bridgeport, Conn. Before his association with American Cystoscope, Mr. Zeyher was with Johnson & Johnson and the Atlantic Refining Co.

TWO EXPERIMENTAL VIDEO GRANTS MADE

AN EXPERIMENTAL STATION to provide Lancaster, Pa., with television broadcast service by intercepting and rebroadcasting signals from Philco's WPTZ Philadelphia on an ultra-high frequency was authorized by FCC last Thursday.

The grant went to Conestoga Television Assn., composed largely of employes of the RCA plant at Lancaster, and carries authority for experimentation with frequencies in the color band. The authorization is for "frequencies that may be assigned by the Commission's chief engineer from time to time," A3, A5 and special emissions for television, and 200 w peak output.

Continental Television Corp., Boston, also received a grant for a new experimental station, using center and modulating frequencies to be assigned by FCC's chief engineer, with A0, A3, A5, and special emissions for FM and television, including pulse, and 1 kw peak output.

Radio Talks on Agenda Of Farm Editor Meeting

SERIES of talks on radio's place in farm extension work and education will feature the annual meeting of the American Assn. of Agricultural College Editors, to be held Sept. 18-20 at Auburn, Ala. Radio meeting will be held on the morning of the second day under the title "A Nationwide Hookup," with Bill Zipf, Ohio extension farm radio editor, presiding.

Commissioner Clifford J. Durr of the FCC will speak on "Place of Television, FM and Facsimile in Educational Radio." Other talks are: "RFD and Extension Join Hands," Layne Beaty, WBAP Fort Worth; "Keeping Radio on the Profit Side of the Ledger," Charles Price Jr., assistant editor in charge of radio, Louisiana; "Radio Tech-niques That Pay Off," James Wilson, WAPI Birmingham; "How State and Federal Workers Can Aid Each Other With Radio Broadcasts," Kenneth M. Gapen, chief, Radio Service, Dept. of Agriculture; "We All Work Together," Ruth Van Deman, head Information Division, Bureau of Human Nutrition & Home Economics, Dept. of Agriculture; "Extension Editor and Experiment Station Editors Work Hand in Hand," Gerald Jenny, U. of W. Va.

Revised Rule

(Continued from page 18)

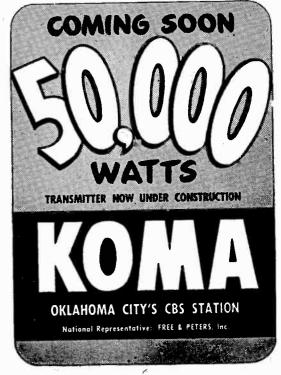

give advance notice to participants when non-parties are going to appear in a proceeding; possibility of reducing the number of copies of certain types of documents required to be filed; more specific language in the rule (1.306) regarding FCC's right to call for additional information from applicants, and clarification of several other sections including those calling for reports to FCC on changes involving stations, one covering grants made without hearing, and those regarding persons who may be admitted to practice before FCC. Attorney W. Theodore Pierson

Attorney W. Theodore Pierson questioned the usefulness of prehearing conferences unless some written document summarizes the agreements reached. Otherwise, he said, every participant has his own interpretation of what was accomplished.

In response to questions, Mr. Plotkin said FCC has no authority over prices which official reporters charge for transcripts of proceedings, but does plan to inquire about reporters' charges when it calls for bids. Under the law, he said, the Commission must give the contract to the lowest bidder. At present, the bids are in terms of bonuses for FCC from the reporting firms.

Kentucky Meet Delayed

MEETING of the Kentucky Broadcasters Assn., originally scheduled for the Lafayette Hotel, Lexington, Oct. 8-9, has been postponed to Nov. 15-16 at the same hotel, J. H. Callaway, secretary-treas-urer, announced. The meeting is for the general membership. Officers of the association, in addition to Mr. Callaway, are: Hugh O. Potter WOMI Owensboro, president; J. E. Willis, the Nunn Stations, Lexington, first vice president; Harry McTigue, WINN Louisville, second vice president. On the executive committee are J. Francke Fox, WHLN Harlan; Ken Given, WLBI Bowling Green, and F. Ernest Lackey, WHOP Hopkinsville.

Wilson Seeks 780 kc

HERBERT L. WILSON, consulting radio engineer with offices in Washington and Hollywood and laboratories in Rutland, Vt., applied to FCC last week for a new daytime station at Rutland on 780 kc with 1 kw. WBBM Chicago is dominant station on the channel. Mr. Wilson was a lieutenant colonel in the Signal Corps during the war.

Report Denied

DESPITE report, Los Angeles Times will not expand editorial coverage of radio, according to Harry Miller, executive as-sistant to Norman Chandler, publisher. Due to present newsprint shortage and other limiting factors, Times will not now develop new features, thus spiking report that the newspaper plans ex-pansion of radio log and addition to staff of radio editor-columnist. How-ever, Mr. Miller said when the news-paper is operating in FM and television, as now planned coverage will very probas now planned, coverage will very probably be increased.

In the Public Interest

Refrigerator Gift

GIRLS attending Camp Wamatachick in Arizona closed the summer season with a \$600 electric refrigerator because KOY Phoenix mentioned that they had to carry 1,000 pounds of ice each week to their camp. Jack Williams, KOY program director, visited five summer camps for boys and girls, made transcribed interviews and the station did a special program, Salute to Summer Youth Camps, on which Mr. Williams mentioned the ice-carrying girls. A listener provided the electric refrigerator. Parents of boys and girls interviewed were notified by KOY before broadcast time.

* * Hospital Spots

IN a successful \$1,000,000 drive for a new Sisters of Mercy Hospital, WIZE Springfield, Ohio, donated an average of 15 spots a day for a period of a month. In another

civic project Bob Terry, WIZE sportscaster, raised money for the children's summer playground fund, sponsored by the Boosters Club.

Epidemic Aid

WHEN a diphtheria epidemic threatened Anchorage, Alaska, the city's KFQD became the most important voice in town. City health officials used station to broadcast official proclamations and discussions of preventive measures to be taken against further spread of the disease. When schools were closed KFQD added two half-hours of children's entertainment to its schedule to help mothers keep their children contented indoors.

* * *

School Fill-ins

WITH school opening delayed and movies, amusement parks and public gatherings closed to children under 18 because of a high rate of polio in Colorado, KLZ Denver is broadcasting special programs designed to help mothers provide home recreation for their children. In cooperation with the Denver Recreation Dept., Elizabeth Flether has been devoting time on her KLZ Budget Brigade to members of the department who

Emmett Lavery to Write Movie on Radio History EMMETT LAVERY, president of Screen Writers' Guild, has been signed by Jerrold T. Brandt, independent Hollywood producers, to write the screen story for "Magic

in the Air," story

development. He

The story line will deal with the concept of free

radio, as well as

press and motion pictures. Film is budgeted at \$2,500,000 and is scheduled for 1947 release. A special NAB committee will review the script [BROADCASTING, Aug. 26]. Mr. Lavery is author of many screen plays, including "Magnificent Yankee;" "Hitler's Children," from book by Gregory Ziemer, former WLW Cincinnati commentator, and "The First Legion."

Young Appointed

GEORGE L. YOUNG, former assistant to J. Harold Ryan, vice president and treasurer of The Fort Industry Co., has been appointed account executive of Sound Studios Adv., Washington. He is former lieutenant commander in the Navy, had served as officer in charge of radio for Bureau of Naval Personnel (Washington AFRS). Miss Margaret Wylie J. Walter Thompson Co. Chicago, Ill.

Dear Margaret:

Never saw such a big dill pickle in my life, and boy how I love dill pickles . . .

you'll have to forgive me, I was just doing a little recollectin' a b o u t that super picnic the boss gave for all the folks at WCHS last week. Naturally me and Myrt were right in the thick of everything, throwing horseshoes, playing croquet, swimming, softball and just having a good time with a lot of swell people from WCHS. And speakin' of nice folks, I reckon that's another reason why everything runs along so smoothly at WCHS!

What You're MISSING

Keep your chute on, Mr. Time Buyer. Mississippi-the South's No. 1 expanding market with an effective buying income of over one billion dollars—is an opportunity you can't afford to MISS! But . . . if you want to sell 'em-you've got to tell 'em. Mississippi's leading radio stations give you complete coverage of this BILLION DOLLAR Market. Put your message on The 'Ole Miss Stations and you can't MISS Mississippi!

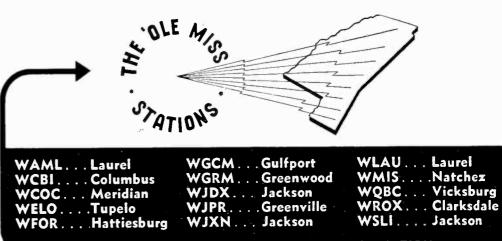

VUUD NEIGHBOR It will pay you to consider the vast possibilities of this great neighboring market. We'll gladly present facts as well as figures on how American advertisers can profitabiy use our network.

offer suggestions for games, crafts and other children's activities at home. KLZ also broadcasts a regular series featuring representatives of the National Foundation for Infantile Paralysis.

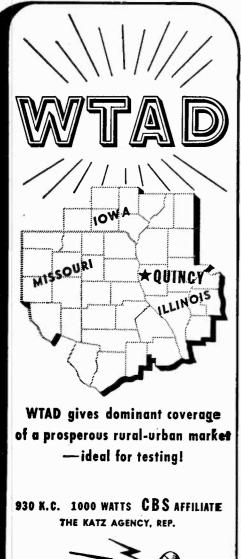

For Posterity

TELEVISION and motion picture audi-ences of 1996 will get a look at films of the Automotive Golden Jubilee of 1946, according to present plans of the Auto-mobile Manufacturers Assn. United States Rubber Co., sponsor of the telecast of the films over several video stations through ABC, has presented a copy of the pictures to the AMA which will seal them in its library with other motor historical material for the next 50 years.

CBS PROGRAM CLINIC TO BEGIN SEPT. 10

SECOND annual CBS program managers clinic will begin tomorrow, Sept. 10, in a three-week schedule of three-day-a-week meetings. Clinics will convene Sept. 10, 11, 12, and 13; the second week, Sept. 17, 18, and 19; third week, Sept. 24, 25, and 26. All meetings will be at CBS studios in New York.

Sessions are under supervision of William Fineshriber, assistant director of broadcasts; Roy Langham, assistant to the director of programs, and Robert Kennett, manager of program relations. Meetings will be designed to acquaint local station program personnel with plans, procedures and techniques of network programming, and for effective mutual interchange of program ideas and problems.

Agenda for this second series of meetings has been determined from answers to exhaustive questionnaires sent to all program managers after last year's clinics. It is a synthesis of their request for discussions of particular network and local operations.

Disc Restrictions

RESTRICTED participation of film personalities in transcriptions was reaffirmed last week by radio subcommittee of the film industry's Public Information Committee. Move is not aimed at participation in established formats of this type, it was explained, but levelled against myriad requests from little known and questionable sources in Canada and the U.S. Chief objections spring from open end transcriptions of this type which may be surrounded by context of dubious caliber and questionable sponsorship. In addition it was pointed out that in many places it is impossible to check time or manner of use. Committee members emphasized that abuse of discs has made screening necessary. Nevertheless hope was expressed that cordial relationships with all legitimate interview formats will continue as before.

Two of the R's

ALTHOUGH carefully prepared weeks in advance, a KFH Wichita, Kan., show with six participants was going through last - minute checks before it was discovered that George Gow, station news editor and m. c., had the one and only script. Three of the participants went to work on three typewriters and had six copies of the first two pages ready by the time the program went on the air. The six alternated between microphone and typewriters, and succeeded in maintaining a narrow lead over the progress of the show.

CBS O&O Accountants To Attend N. Y. Meeting STATION accountants from CBSowned stations will be in New York the week of Sept. 23 for a series of conferences with CBS headquarters department heads. Principal purpose of conferences will be a discussion of accounting, budget, tax and other financial matters and procedures as related to CBS station operations.

Station accountants who will be in town for the conferences are: Harry R. Crow, WTOP Washington; Robert F. DeVoe, KMOX St. Louis; John J. Murray, WEEI Boston; Charles D. Ryder, KNX Los Angeles; Louis R. Lazurus, WBBM Chicago, and John R. Lucas, WCCO Minneapolis.

CBC Transmitters

BROADCASTING CANADIAN CORP. has placed orders for three 50 kw and one 10 kw transmitters in Canada. CBC has not announced which companies are to make each individual transmitter, but orders have been placed with Northern Electric Co. (Western Electric's Canadian subsidiary), Canadian Marconi Co., and Federal Radio and Telephone Corp. All three plants are located in Montreal. Federal is a newcomer in the Canadian field [BROADCASTING, Sept. 2] and is understood to have moved into Canada after successfully bidding on the 50 kw transmitter order. The three 50 kw transmitters are for CJBC Toronto (860 kc), new stations at Winnipeg (990 kc) and Red Deer, Alta. (1010 kc), and the 10 kw transmitter will replace the 1 kw of CBJ Chicoutimi, Que., on 1580 kc.

WEAF EXPLORES FAR ENDS OF NEW YORK

MINDFUL that New York has four other boroughs than Manhattan, one of them of greater population, WEAF, NBC's key station in midtown Manhattan, has started a campaign to build listening in the outer reaches of its primary coverage area.

The most ambitious show WEAF conceived to attract the attentions of persons who live outside Manhattan was *Metropolitan News Roundup*, a daily 15-minute program featuring pickups from the editorial rooms of the *Brooklyn Eagle, Bronx Home News, Long Island Press, Newark Star-Ledger* and the Westchester County Publishers News Bureau at White Plains. The newspapers reciprocated with front-page references to WEAF.

Three other WEAF shows now venture to the boroughs: Ray Barrett, each Friday, broadcasts his sidewalk interviews, You're on the Spot, from the front door of a different New Jersey newspaper office; Jinx Falkenburg and Tex McCrary have been broadcasting their Friday program of the daily Hi Jinx series from the Brooklyn *Eagle* and soon will start a swing of all the papers participating in the Metropolitan News Roundup: and Maggi McNellis, of Maggi's Private Wire, decided to move her show into living rooms throughout the boroughs.

James M. Gaines, WEAF manager, is contemplating even broader operations beyond Manhattan. He is sure WEAF's expanding interest in the whole coverage area will result in bigger and more devoted audiences.

Seek Settlement

FINAL attempt for out-of-court settlement will be made Monday in the claim of Emmons Carlson, promotion and advertising manager of NBC Central Division, against Irna Phillips, daytime serial author. Meetings last week in Chicago broke up when Miss Phillips' attorney offered \$100,000 and Mr. Carlson's counsel asked \$300,000. Mr. Carlson's claim that he is the original author of Guiding Light, General Mills serial, was upheld in principle by the Illinois Supreme Court. If negotiations fail, the case will revert to Circuit Court for settlement of the amount to be paid.

ABOUT LIFE IN HOLLYWOOD

For that one-in-a-million person who doesn't give a hoot about the cinema and its luminaries, KFI's HOLLYWOOD HI-LITES* would be a gross misuse of time and talent. Lucky for us and for you, the advertiser, this daily fifteen minute program (4:15 p.m.) of goingson in the film capital is based on a subject that knows no equal in mass popularity. HOLLYWOOD HI-LITES* gives the public a fresh inside on the lives of the stars and starlets as well as numerous curious sidelights on producers, directors, musicians and all the others who join in the fabulous business of picture making. Each week from one to three outstanding film personalities appear on the program as guests, which helps keep listener interest running high. HOLLYWOOD HI-LITES* is written by a bright young man named Jimmie McKibben who has the 'open sesame' around the studios and the show's reporter is Jack Latham - a voice penny familiar to KFI listeners. *Formerly Hollywood Fan Magazine

AND NOW FOR THE PUNCH

Since this program's inception more than a year ago, HOLLY-WOOD HI-LITES* has been sponsored by a leading Los Angeles department store with marked success. It is now offered to a second sponsor in all its proven glory and at a cost quite within reason. Details are obtainable at KFI Sales or Edward Petry Company.

Press Presentation

ON TUESDAY evening (Sept. 10) NBC will give a press demonstration of the Schwerin system of qualitative analysis of radio programs, including both a presentation of the mechanics of the system and a demonstration of its operation with a test audience.

Calls Assigned CANADIAN BROADCASTING shortwave transmitters at Montri

Corp shortwave transmitters at Montreal and Sackville, N. B., have been assigned new call letters and frequencies, it has been announced by the Department of Transport, Ottawa. In addition to the four frequencies assigned the Mon-treal 7.5 kw station, used to send programs into western Canadian Frenchlanguage communities, this station has been assigned CBFA on 11.76 mc, CBFL on 11.72 mc; CBFO on 9.63 mc. The Sackville 50 kw transmitters for European and Latin-American broadcasts have been assigned in addition to 12 frequencies previously assigned, CKCS on 15.32 mc, CKLX on 15.09 mc, and CKRA on 11.76 mc. One previous assigned frequency at the Sackville station has been deleted, CHMD on 9.64 mc.

September 9, 1946 • Page 75

900 STATIONS PLAN WAR RELIEF SPOTS RADIO has offered its facilities to Greek War Relief Assn. and beginning Sept. 15 some 900 stations will carry spot announcements to aid the Greeks, Spyros Skouras, 20th-Century Fox president and head of Greek War Relief Assn., announced last week.

Bill Travis, national radio director of the relief group, returned to New York last week after contacting broadcasters in various parts of the country. Transcriptions are being made for the campaign. New ones will be sent out from time to time with copy changes, said Mr. Travis. Stations carrying the Greek War Relief announcements will average three daily.

Mr. Skouras said activities of the association are being intensified in view of the alarming death rate in Greece, now at an all-time high because of widespread disease resulting from semi-starvation. Hardest-hit areas are the rural regions in which 60% of the Greek population lives.

Morrison to KQW HERB MORRISON, after four years as flight operations officer in AAF and released as lieutenant colonel, has joined KQW Pittsburgh to handle publicity and sales promotion.

Station Relations Meet Held in N. Y. by MBS THE QUARTERLY MBS station relations meeting was held Sept. 3-6 at the Hotel Astor, New York. Attending the meeting were Robert Carpenter, MBS southwestern station relations representative; Harry LeBrun, southeastern representative; James Mahoney, midwest representative, and Don Ioset, eastern manager, and 53 members of the network including all department heads. Carl Haverlin, MBS vice president in charge of station relations, presided over the gathering.

Edgar Kobak, president of MBS, made a report on network activities at the dinner session Sept. 4 and predicted a "very bright future for Mutual."

On West Coast

H. PIERSON MAPES, vice president of Hutchins Adv., New York, left for the west coast last week to open the agency's new Hollywood office which will handle the Philco Corp.'s Bing Crosby show [BROADCASTING, Sept. 2]. James H. Carmine, vice president of Philco Corp., also plans to be in Hollywood about Sept. 9 for meetings as to details of the program.

KWKW Pasadena, Calif., has appointed Potts-Turnbull Co., Los Angeles, to handle national advertising.

TOM HARMON . . . In 3 years of college competition, Tom completed 101 passes out of 233 attempts, for 1,399 yards.

HEY ABBOTT!, screamed Bud Costello, but Lou was already in action as Betty Jane Seabury, of WEEK, new outlet in Peoria, Ill., was introduced to the comedians in the studios of WKY Oklahoma City. Miss Seabury, a lecturer on Orient customs, will be a member of WEEK sales and service staff.

Hearing Postponed

HEARING on the long-standing applications of WOWO Fort Wayne and WIRE Indianapolis for 50-kw operation on 1190 kc has been continued from Sept. 20 to Nov. 12, FCC announced last week. The action was taken by Motions Commissioner Paul A. Walker on Aug. 30 on petition of WOWO.

Meanwhile, the Commission had added three other applications to the hearing: WLIB New York seeking fulltime directionalized instead of limited-time use of 1190 kc and power increase from 1 to 10 kw, and others requesting a new daytime station on 1190 kc at Framingham, Mass. and a limitedtime station on 1200 kc at Middletown, R. I. [BROADCASTING, Sept. 2]. WOWO now uses 1190 kc with 10 kw, while WIRE is on 1430 kc with 5 kw.

On Convention Group

TWO HOUSTON radio people have been named to the committee for the 10th District Advertising Federation of America Convention in Houston Jan. 16-18. King H. Robinson of KTRH heads publicity and invitations and Miss Glenn Horton of KXYZ will be in charge of hospitality and greeting. J. H. Grant, Houston Lighting & Power

Decca Announces Profit For First Half of '46 DECCA RECORDS Inc., New York, last week at the meeting of the company's board of directors, reported a consolidated net profit of \$967,534 (unaudited), for the six months ended June 30, 1946, after provision of \$734,329 for all estimated income 'taxes. This

equals \$2.49 per share on 388,325 shares of capital stock outstanding at June 30, 1946 and compares with \$450,284 net profit, equal to \$1.16 per share, on the same number of shares outstanding at the end of the first six months of 1945.

Directors of the firm also declared a new regular quarterly dividend of 60 cents per share of capital stock of the company, payable Sept. 30 to shareholders of record Sept. 16. The previous regular quarterly dividend was at the rate of 30 cents per share.

A plan for a two-for-one stock split of Decca's capital shares, and for increasing the authorized shares to 1,500,000 from 500,000, was approved at the meeting. The plan is scheduled to be submitted to a special meeting of stockholders to be held Nov. 6.

Hooper Adds

INHERITANCE of eight more former subscribers of Cooperative Analysis of Broadcasting by C. E. Hooper Inc. has been announced. They are: Brooke, Smith, French & Dorrance, Hazard Adv. Co., Hoffman & York, Jessie M. Joseph Adv., Beech-Nut Packing Co., Grove Labs., International Silver Co., The Lambert Co. New clients obtained by Hooper are Schenley Distillers Corp., Walter Weir Inc., Fuller & Smith & Ross, Piedmont Adv. and Phillips H. Near Tragedy

CYANIDE fumes escaping from fumigating operations in the Red Mill Cafe below studios of KTFI Twin Falls, Ida., overcame a station announcer and interrupted a broadcast. Leonard Ingelbrigsten, 24, the announcer, whose radio name is Gary Thomas, was alone in the control room. When he failed to start the scheduled broadcast, George Malone, chief engineer, investigated and found Mr. Ingelbrigsten on the floor. Although near death, the announcer was reported recovering rapidly.

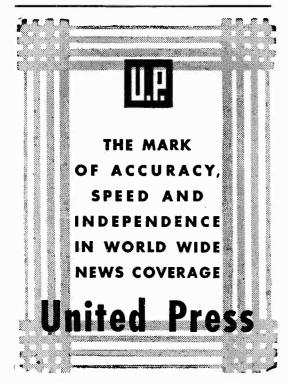

Peterson Named

THOMAS PETERSON, manager of Taylor-Howe-Snowden Radio Sales, Chicago office, has been appointed director of national sales for that representative firm which at present has representation in New York, Dallas, Amarillo, Los Angeles, San Francisco, Chicago and Portland. Following his graduation from the U. of Illinois in 1931 Mr. Peterson joined Scripps-Howard's national advertising department. In 1935 he joined the El Paso Herald Post as national advertising manager and when the Post and the El Paso Times merged in 1936, Mr. Peterson continued his managerial duties for the merger. Mr. Peterson joined T-H-S Sept. 1, 1944, as manager of the Chicago office.

IT&T Sale

INTERNATIONAL Telephone and Telegraph Corp. sold its Argentine telephone system to the Argentine government Sept. 3 for \$95,000,000 cash. I T & T will continue as technical advisor for 20 years. Col. Sosthenes Behn, I T & T president, and Henry A. Arnold, vice president in charge of South American operations, signed for the company.

Posner Adv. Moves POSNER Adv., New York, formerly located at 8 E. 41st St., has moved to 222 Fifth Ave.

GERMAN FORESEES NOISELESS TUBES

DEVELOPMENT of completely noiseless radio tubes through use of synthetic mica developed in Germany during the war is foreseen by Dr. V. Middel, German expert at the Siemens-Schuckert plant, according to an analysis of mica research made available by the Dept. of Commerce.

A report on the German product, prepared by Paul M. Tyler, investigator for the Joint Intelligence Objective Agency, is one of several on the subject available at the Office of Technical Services. Dept. of Commerce. Though synthetic mica costs 10 times as much as the natural product, its use might be less expensive because selection and testing would be sharply reduced and it has superior electrical qualities.

Mr. Tyler's report (PB-32545) is available at the Office of Technical Services (photostat \$2, microfilm \$1), in care of Dept. of Commerce, Washington 25, D. C. Check or money order should be payable to the Treasurer of the United States.

WPEN Wins, WIP Airs

THE "Miss America" contest conducted by WPEN Philadelphia for that city's representative at the Atlantic City finals was climaxed by a court fight between WPEN and Oscar Neufeld, who ran the contest in recent years and claimed the right to the contest in Philadelphia. After much publicity, WPEN won the court fight and sent the winner of the contest to Atlantic City. The odd twist in Philadelphia radio circles, is that after WPEN has expended all its promotional efforts towards making the contest a success, WIP Philadelphia originated the broadcast of the finals from Atlantic City for MBS coast to coast airing last Saturday, Sept. 7.

A-Bomb Story

STORY of the atomic bombing of Hiroshima, considered so significant by editors of the New Yorker magazine that they excluded all other editorial content in the Aug. 31 issue in order to run it in full, will be broadcast this week by ABC. The story, written by John Hersey, will be read without dramatization on four successive nights by an actor as yet unannounced. Broadcasts will be heard Mon. through Thurs. 9:30-10 p.m. Commercial program, The Doctors Talk It Over, sponsored by the American Cyanamid Co., Tues. 9:30-9:45 p. m., will be cancelled. Other programs occupying period are sustaining.

Ringlep Named

APPOINTMENT of Carter Ringlep as general sales manager of KMOX St. Louis was announced last week by Wen-

dell B. Campbell, general manager. He succeeds David Sutton, who has been transferred to the New York office of CBS. Mr. Ringlep has been with KMOX since 1941 as manager

of the St. Louis

office of CBS Radio Sales. Prior to that time he was regional sales manager for KMBC Kansas City.

Harry H. Field

HARRY HUBERT FIELD, director of the National Opinion Research Center, U. of Denver, was killed Wednesday in the crash of an Air-France airliner taking off from Le Bourget field, Paris. He was en route to London. Mr. Field directed an extensive study of listener reaction to radio, contacting typical listeners last November and December. Preliminary results were announced in March [BROADCASTING, March 18]. Complete data will appear this autumn in book form,

Grant of License To KABC Recalled Baker Protest Is Overlooked

By Administrative Board

ACTION of the FCC Administrative Board in giving KABC San Antonio a license covering its construction permit for 50-kw daytime operation on 680 kc [BROAD-CASTING, Sept. 2], was set aside by the Board last week. FCC sources said the reversal was made to permit study of a petition previously filed against the grant.

KABC, in which Elliott Roosevelt formerly owned a minor interest and in which his former wife, now Ruth Googins Roosevelt Eidson, retains substantial interest, was given a grant in July 1944 to switch from 250 w on 1450 kc to 50 kw day and 10 kw night on 680 kc. The station switched to 680 kc and started using the 50-kw transmitter last spring [BROADCASTING, May 20], and presumably will continue using the facilities pending FCC decision on a license to cover the construction permit.

Asks Hearings

After the grant was made, however, Norman Baker, president of CIA, Industrial de Mexico, former operator of XENT Nuevo Laredo, Mex., filed a petition with FCC asking for hearings to determine whether the KABC licensee acquired its transmitting equipment "in a lawful and proper manner" and whether it "disclosed all pertinent facts" in its applications for 50 kw [BROADCASTING, Dec. 24, 1945]. Mr. Baker claimed an employe of XENT sold the equipment to KABC without his knowledge.

Mr. Baker formerly operated KTNT Muscatine, Iowa, which was ordered off the air by the old Federal Radio Commission after complaints were made that Mr. Baker had used the station to promote a "cancer cure." Mr. Baker later was convicted in a Federal Court in Arkansas on a charge of using the mails to defraud and served a sentence.

James Fisher

JAMES FISHER, president and general manager of James Fisher Co., Toronto advertising agency, died at Port Arthur, Ont., Aug. 30, while on vacation. Born near Stratford, Ont., he went to Toronto in 1902, joined McKim Adv., and in 1910 opened the Toronto office of the present McConnell Eastman Co. In 1920 he founded his own company and in 1924 opened a Montreal office. He is survived by his widow, a brother and a sister.

Identification Aid KGHL Billings, Mont., got an early-morning call from the Billings police department. An elderly woman from Livingston, Mont., had gone to Billings to visit a daughter, but on arrival her memory failed. She couldn't remember her name, nor her daughter's. KGHL broadcast her description at 8:20 a.m. A few minutes later the Livingston police chief, who had heard the KGHL broadcast, called Billings police, identified the woman and by 8:45 a.m. she was at her daughter's home.

Williams Named

JOHN PATTISON WILLIAMS, vice president of WING Dayton and WIZE Springfield, Ohio, and president of the Ohio Association of Broadcasters, has been named by Gov. Frank J. Lauche as a member of the 11-man Ohio Army Advisory Committee. This group, comprised of outstanding residents of the state, has been appointed by the Governor to assist the Army in all of its important activities in Ohio.

Pay Raise Letter

THE UNITED Office and Professional Workers of America (CIO) Radio Guild last week addressed a letter to Niles Trammell, NBC president, requesting an immediate salary raise to tide over NBC white collar workers pending completion of organization and negotiation of a contract between the guild and NBC. Letter also pointed out that CBS had granted "a raise ... to all employees earning under \$100 a week."

Slocum Article

BILL SLOCUM, CBS director of special events, is the author of a five-part series, "I Guarded FDR," currently being published in the *Saturday Evening Post*. Mr. Slocum collaborated with Michael F. Reilly, who through Mr. Slocum, tells how as chief of the White House Secret Service, he carried out the responsibility of protecting President Roosevelt from the day after Pearl Harbor until the late President's death.

Directorship Exchange Between Two Agencies

AN EXCHANGE of directorships between Compton Adv. New York, and the English advertising agency, Lambe & Robinson, has been announced. Ivor Lambe, managing director of the English firm, has become a director of Compton Adv., and Richard Compton has been made a director of Lambe & Robinson. Mr. Lambe last week arrived in New York for an extended stay in America during which he will study U. S. advertising techniques.

Brand Names Dinner

WITH manufacturers who have had brand names in use 50 years or more being honored, the first all-Western Brand Names Research Foundation dinner will be held in Palace Hotel, San Francisco, Sept. 11. Vernon Churchill, president of the Advertising Association of the West, is to preside as m.c., with A. O. Buckingham, vice president of Cluett, Peabody & Co., New York, and chairman of the Foundation, scheduled to talk on "A Call to United Action." San Francisco Advertising Club will be host.

Deines Elected

HARRY J. DEINES, former account executive at Fuller & Smith & Ross, New York, has been elected a vice president of the agency and has assumed direction of the account group servicing the various Eastern divisions of the Westinghouse Corp. Prior to joining Fuller & Smith & Ross, Mr. Deines was advertising manager of the Electronics Department of the General Electric Corp. in Schenectady, N. Y., and Bridgeport, Conn.

WBSR Joins ABC

WBSR Pensacola, Fla., now under construction, Sept. 28 joins ABC as a South-Central supplementary station and brings the network's total affiliates up to 216. Owned by the Escambia Broadcasting Co. and managed by Ruth Braden, the station will operate full time with 250 w on 1450 kc.

Miss Graul to Agency

MARIAN V. GRAUL, formerly with the American Express Co., New York, has been elected secretary of Sweetser, Byrne & Harrington, New York.

Policies on Issues PETRILLO OBJECTS Broadcasters in Chicago **Distributed by ABC**

Controversial Subject Stand Outlined to Departments

POLICIES of ABC relating to the sale of time for controversial issue programs last week were distributed to all department heads.

Reminding its chieftains that the network itself "has no editorial viewpoint to advance or promote," ABC said it recognized its "responsibility in the public interest to safeguard and promote equal opportunity for the free discussion of controversial issues of general interest to the American peoples."

The statement specified the conditions under which the network will sell time for controversial subjects: The network will reserve the right to determine what subjects are of interest to warrant the sale of time for their discussion and to decide whether individuals or organizations seeking to purchase time are qualified to discuss the issues.

Between 10 and 11 p.m.

The network said that whenever availabilities permitted time for such programs would be sold between 10 and 11 p.m.

Operating instructions for controversial programs included provisions that on commercial programs the sponsor must be clearly identified at the opening and closing announcements must clearly state that ABC has made the time available to the person or organization presenting the program and that the network's standard disclaimer would, in these instances too, precede the network sign-off cue.

ABC also said it would sell time to organizations for the solicitation of memberships "whenever it appears to be in the public interest." No membership group, however, whose basic principles "attack, deride or misrepresent the varying elements of race, creed or color" will be accepted as a sponsor, the network said.

Presbey to ANAN

OLIVER M. PRESBEY, former radio ac-count executive at BBDO New York, has joined the American Newspaper Advertising Network as manager of the midwestern region with headquarters in Chicago. Before becoming an account executive, Mr. Presbey was assistant to Arthur Pryor, vice president in charge of radio at BBDO.

AS BAND PLAYS ON

DESPITE protest of AFM President James C. Petrillo, directors of the San Joaquin County Fair at Stockton, Calif., stood by their contract rights for appearances of the Mexican Tipican Orchestra, which has played twice daily at the 10day fair concluding today (Sept. 9). Mr. Petrillo has contended that the Mexican "good neighbor" group displaces local musicians.

AFL pickets have stood at all fair entrances, with members of various allied crafts refusing to cross musicians' line. Although paid by the Mexican Government and on a goodwill tour, it is understood the band will return home, thus cancelling Texas State Fair appearance Oct. 5-20.

A Justice Dept. spokesman last week disputed the contention of Mr. Petrillo that the Tipica Band in this country was in violation of immigration laws. "There is no violation of any law as far as we can see," it was said, with added comment that the group is here legitimately and no local musicians are being displaced. In Mexico City, Federal District Gov. Javier Rojo Gomez said that the band, which has made many goodwill tours in this and other American republics. would not consider future invitations to play in the U.S. if its appearance was going to cause "incidents."

Takes Radio Column

LOS ANGELES Daily News initiated what is said to be city's first radio column last week with start of syndicated John Crosby column, through the New York 'Herald Tribune. When questioned whether this was forerunner of local column, officials contended that new feature doesn't represent departure from uniform policy agreed upon by all papers several years ago. Despite denial, it is reported all Los Angeles papers are re-considering such a feature.

Show Revamped

WITH FORMAT improved and talent lineup bolstered, The Rudy Vallee Show replaces Philip Morris Frolics on NBC starting Sept. 10, Tues. 8:30-9 p.m. (EDST), with West Coast repeat 7:30-8 p.m. (PST). Hal Peary (Great Gildersleeve) and Lina Romay, film actress-singer, are to be opening guests. Scheduled originally to start Sept. 3. show was turned down by NBC and The Biow Co., agency for sponsor, Philip Morris & Co. [BROADCASTING, Aug. 26]. Both agreed that proposed program was below standard.

Unite to Promote Video

SETTING 1947 goal at 5,000 television receivers for Chicago, television broadcasters there organized a committee to cooperate with manufacturers, under aegis of Electric Association of Chicago.

William C. Eddy, video pioneer, director, WBKB Chicago, was elected committee chairman. Other members: I. E. Showerman, general manager, NBC Central Div.; James L. Stirton, assistant to Ed Boroff, ABC Central Div. vice president; Frank Schreiber, WGN general manager; Carl J. Meyers, WGN chief engineer.

A. B. Rodner Jr., Commonwealth Edison, said next step in television promotion is organization of advertising agencies and appointment of agency to represent electric appliance dealers. W. E. Guy, district sales manager, Graybar Electric Co., chairman of Electric Assn. Television Committee, presided.

Radio Is Given Credit For Success of Movie

RADIO SPOT campaign costing only \$10,000 was given much of the credit for box office success of a motion picture by Charles M. Amory, Buchanan & Co., New York, at a picture sales convention held last week in Atlantic City.

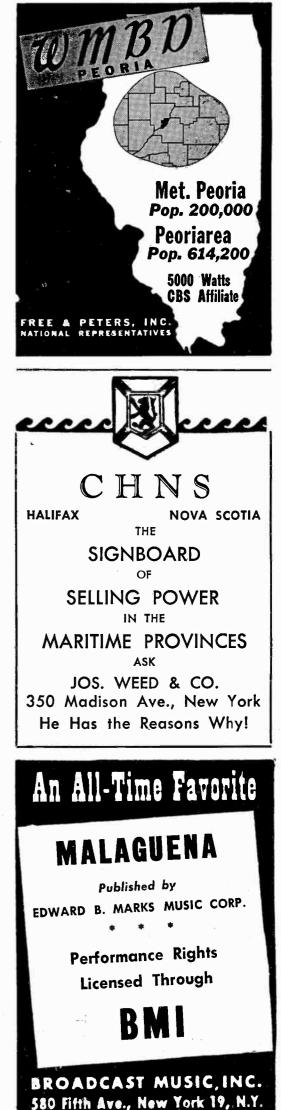

Mr. Amory pointed out that the radio department of the agency produced a "series of startling novel, hard-selling radio spots" on behalf of the picture "Down Missouri Way."

To the "radio campaign must go no little success for the bang-up success of the 'Down Missouri Way' engagements," he asserted.

Great Strides in Video Pointed Out in Article

"GREAT STRIDES have been made in perfecting television which may soon become a household requirement," according to article "Communication Developments Imply Greater Flexibility," in September issue of Domestic Commerce, published by Dept. of Commerce. Author is Ruth C. Leslie, of Industry Analysis Section.

Other developments foreseen are

Proposed Station Grants Now Final Borger, Odessa and Altoona

Given 250-w Locals

PROPOSED GRANTS for new 250-w standard stations in Borger and Odessa, Tex. and Altoona, Pa. were made final by FCC in decisions announced last Wednesday.

The Borger grant, for use of 1490 kc with 250 w fulltime [BROADCASTING, Aug. 5], went to Richard George Hughes of Pampa, Tex., real estate and construction company executive, on grounds that his "active participation in the development and civic activities of Borger" make him better qualified than Borger Broadcasting Co., whose application for the same facilities was denied. The latter is owned by W. J. Harpole (50%) and J. C. Rothwell (25%), owners of KSAM Huntsville and KVOP Plainview, Tex., and William T. Kemp (25%), KVOP manager.

Odessa grant, for 1450 kc with 250 w fulltime [BROADCASTING, Aug. 5], was awarded to Southwestern Broadcasting Co. on grounds that its owners could devote more time to the station than owners of Permian Basin Broadcasting Co., whose application for the same facilities was denied. Southwestern is principally owned by Dorrance D. Roderick (64%), licensee of KROD El Paso and interested in other stations, who will devote "substantial" time to new station in its early stages, and Paul Moss, president and 25% owner. Controlling Permian stockholders are Houston Harte and M. B. Hanks, who have interests in KRIS Corpus Christi, KPLT Paris, Tex., and KRBC Abilene, and newspaper and business enterprises.

The proposed grant to Roy F. Thompson, general manager of WFBG Altoona, Pa., for a new Altoona station using 1240 kc with 250 w fulltime [BROADCASTING, July 29], was made final after the competing applicant, Altoona Broadcasting Co., which received a proposed denial, amended its application to request 650 kc instead of 1240. Mr. Thomson received the grant in the name of Thompson Broadcasting Co. Principals of Altoona Broadcasting Co. are Herbert T. Wolf, J. S. Woods, Thomas C. Matthews, and W. J. Woods, who own 25% each in WMRF Lew-

Noncommercial

WNYC, New York's municipal station, can't carry commercials, but last week found itself plugging those on other New York stations. The city station broadcast all of the National Amateur Tennis Championship matches at Forest Hills, L. I., except for the finals and semi-finals for which A. G. Spaulding & Bros., Chicopee, Mass., had purchased exclusive broadcasting rights. WNYC, at the close of each of its tennis broadcasts, announced that listeners would have to hear the wind-up of the matches WHOM, WQXRon or WNEW, all carrying the Spaulding - sponsored programs.

Three New Locals Approved by FCC Fulltime Outlets for Texas, Montana and Colorado

NEW 250-w standard stations for Livingston, Mont., Alpine, Tex. and Colorado Springs, were authorized by FCC last Thursday. All grants were for fulltime operation.

The Colorado Springs authorization, to James L. Frank, is subject to any interference the station may receive if a pending Greeley, Col. application for the same facilities—1450 kc with 250 w full-time—is granted, the Commission reported.

Consolidated Hearing

Meanwhile, the Greeley application, filed by Moreco Broadcasting Co., was designated for consolidated hearing with an application of Gifford Phillips, principal owner of KGHF Pueblo, who seeks 1450 kc with 250 w for a new station in Denver.

Grants were:

Livingston, Mont.—Y ellowstone Amusement Co., 1340 kc 250 w fulltime. Principals: Paul McAdam, stockholder, Liberty Theatre Corp. and 50% owner of Grand Hotel, Missoula, Mont., presi-dent, 5,000 shares common; Edna Wilma Simmons, 99% owner of W. W. Simmons Co., theatre holding firm, 50% interest in Park Amusement Co. and stock-holder in Moe-Simmons Co., Kellogg, Idaho theatre operators, vice president, Idaho theatre operators, vice president, 6 shares common; Anna May Pollard, Helena, Mont., certified public account-ant, secretary, 5 shares common; E. K. Taylor, 5 shares common; Mrs. Lauren Ross, 100 shares preferred; Mrs. Neva McGraw, 10 shares preferred; C. A. Bernier, 5 shares preferred. Granted Sept. 5. Alpine, Tex.—Big Bend Broadcasters, 1490 kc, 250 w, fulltime. Principals: Barney Hubbs, majority stockholder in Pecos Enterprise, weekly newspaper, 50% partner in KIUN Pecos, Tex., and 10% in Oil Center Broadcasting Co., applicant (AM) for Odessa, Tex., pres-ident, 20 shares; Jack W. Hawkins, 50% partner in KIUN, 10% interest in Oil Center Broadcasting Co., former manager of KAVE Carlsbad, N. M., vice president, 20 shares, and Harry W. Bohnemann, chief engineer, KIUN, secretary-treasurer, 10 shares. Granted Sept. 5. Colorado Springs-James L. Frank, former general manager of New Bruns-wick (N. J.) Home News, now freelance writer, sole owner. 1450 kc, 250 w, unlimited. Granted Sept. 5.

10 FM Conditionals Are Given by FCC

Seven of FM Recipients Have Interests in AM Stations

CONDITIONAL FM grants for 10 applicants in five states were authorized by FCC last Thursday. All were for Class B outlets.

Seven grantees are affiliated with standard stations either as licensees or through interests of stockholders, while three are newcomers to broadcasting. The grants are subject to engineering conditions.

Newcomers

Radio newcomers in the group are:

Radio Diablo Inc., San Bruno, Calif., principally owned by Orrin H. Brown, general manager of Eitel-McCullough Inc., San Bruno, manufacturer of radio transmitting tubes, and the principals of the manufacturing company, J. A. Mc-Cullough and W. W. Eitel. The three own 25.6% each in Radio Diablo Inc. and are president, vice president and treasurer, respectively. Other stockholders: Edmond D. Buckley, secretary, 18%, and Robert S. Baldwin, 5.2%.

Sunflower Broadcasting System, Kansas City, Kan., owned by Harry Butler, funeral director, and Harry Cherzer, associated with a distributing company.

Daily News Publishing Co., Beloit, Wis., publishes the *Beloit News* (afternoon), and is principally owned by R. F. Collins, M. H. Dobson, and C. F. Karstadt. B. P. Eldred is president.

Conditional grantees follow (AM affiliation shown in parentheses):

California-Marysville-Yuba City Broadcasters Inc. (KMYC), Marysville, Class B (Comr. C. J. Durr voting for further inquiry); Radio Diablo Inc., San Bruno, Class B (removed from hearing docket and conditionally granted after additional financial and corporate data and supplemental engineering information shown in amendment to application).

ment to application). Kansas—Sunflower Broadcasting System, Kansas City, Class B. Texas—Darrell E. Yates (KRBA), Luf-

Texas—Darrell E. Yates (KRBA), Lufkin, Class B; Wichita Broadcasters, a partnership composed of Joe B. Carrigan et al (KWFT), Wichita Falls, Class B.

(WSVA), Harrisonburg, Class B.; Thomas Garland Tinsley Jr. (WLEE), Richmond, Class B; Suffolk Broadcasting Corp. (WLPM), Suffolk, Class B. Wisconsin—Daily News Publishing Co., Beloit, Class B.

Luncheons Revised

NEW YORK timebuyers and sellers whose weekly luncheon bull sessions of six or seven years ago grew into the Radio Executives Club of New York are reviving their stag luncheons beginning this Thursday at Toots Shor's and continuing throughout the year on alternate Thursdays with the REC luncheons. Backers of the revival stressed that there is no competition with REC, of which they are all members, but the idea is to recapture the informality that has necessarily been lost in an organization with several hundred members.

NBC O&O Meet

NBC management meeting of its six owned and operated stations will be held at Shawnee, Pa., beginning Wednesday (Sept. 11). Among those attending will be Niles Trammell, president of the network, Frank H. Russell, Washington, vice president, and top executives of WEAF New York, WMAQ Chicago, WTAM Cleveland, KOA Denver, KPO San Francisco, and WRC Washington.

BROADCASTING • Telecasting

Page 80 • September 9, 1946

NEW KPO-NBC San Francisco manager of news and special events, John Thompson (c) is congratulated by Cy Westeren, president of the Oakland Advertising Club, when the former addressed that group. Don Staley (r), KPO local sales manager, looks on. Mr. Thompson for the previous nine years had been assistant manager of the same department for NBC's

Central Division in Chicago.

DOHERTY TO SPEAK ON NAB's PLANNING EXPANDED operations for the NAB Employee Employer Belations

NAB Employe-Employer Relations Dept. will be outlined by Richard P. Doherty, new head of the department, at a Sept. 23 meeting of the Employe-Employer Relations Committee to be held in Washington at the Statler Hotel. Mr. Doherty was to assume his office Sept. 9 [BROADCASTING, Aug. 26].

At the committee meeting Mr. Doherty will outline his plans for expansion of the department's operations in line with committee recommendations adopted at a meeting Aug. 12. Among new committee functions are analyses of union contracts. These are based on data from over 300 stations. Distribution is planned of aids useful in union contract negotiations. These are based on studies of standard contract clauses and suggestions for alternative proposals.

Also slated for discussion is operation of the FCC's Rule 91-D requiring that station transmitters be manned at all times by operators holding first-class licenses. It is feared this rule will handicap the on-the-job training program for veterans now being conducted by stations.

Under way is a study of group bargaining between unions and stations, along the line of techni-

BOSTON U. STARTING COURSES ON SEPT. 19 REGISTRATION for radio courses at Boston II will begin Sept. 16

at Boston U. will begin Sept. 16, with first classes commencing Sept. 19.

According to President Daniel W. Marsh and Dean William G. Sutliffe of the college, the radio department is preparing to meet the growing demand for radio courses. These will include radio in education, radio salesmanship, accounting for radio, news reporting, script writing, announcing, radio speech, radio production, history of radio, principles of broadcasting, introduction to television, and other allied courses.

Instructors at Boston U.'s radio department, professionals from local stations, include: George W. Slade, educational director of WBZ-WBZA; Richard A. Cobb, WNAC production supervisor; Clifton T. Holman, program manager of WSAR Fall River, Mass.; and Henry W. Lindquist, WCOP. Acting director of the department is Professor William G. Hoffman.

Columbia Session

COLUMBIA U. Press Institute will hear A. A. Schechter, MBS vice president, in a discussion of newspaper and radio relationship at the Oct. 18 meeting.

The discussion will be attended by 25 managing editors and news editors from all parts of the country. According to the Institute's Floyd Taylor, this meeting will be closed to the public, allowing the radio men to voice opinions without fear of being quoted in public print. One more radio executive, yet unnamed, will also speak.

* * * Burton Course

ROBERT J. BURTON, head of BMI's legal department, will conduct a course in "Copyright and Business Practices of the Publishing and Entertainment Industries" this fall at the School of Business and Civic Administration of City College, New York.

The course will emphasize the problems and practices common to the presentation of copyrightable literary, dramatic, musical and artistic properties in broadcasting, motion picture, music, advertising and publishing. It will be given on Thursday evenings, 6:50-8:30 p. m., beginning Sept. 26 and will bring into its classrooms people engaged in various show business activities as guest listeners. * * *

TURNABOUT Winners Selected in Contest —For Agency People Only—

PROGRAM NAME contest open only to that usually excluded minority—advertising agency people —was won by Miss Mildred Jennings of Ryder & Ingram, Oakland, Calif.

Miss Jennings was awarded a \$100 U. S. Savings Bond by KSFO San Francisco for supplying the winning title for the station's three-hour afternoon musical request program. *Platters 'N Chatter*, her contribution, will become the title of the show of which Jimmy Moore is m. c.

Second prize, a \$50 bond, was won by James P. Milton of Leon Livingston Agency, San Francisco, for submitting Jim Moore's Request Fest. B. B. Schnitzer of Garfield and Guild Agency, San Francisco, won a \$25 bond as third prize for Melody With Moore. Other prize winners were: One To Four With Jimmy Moore, submitted by J. James Neale, Dancer-Fitzgerald-Sample, Chicago, and More by Moore, entered by Robert Collins, N. W. Ayer & Son, New York.

Judges were department store advertising executives: Madeleine Starrett, advertising manager, City of Paris; Margaret Tullus, assistant advertising manager, White House, and Tom Hall, advertising manager, O'Connor-Moffat.

WCTA Commencement Given Support of Press

BOTH community papers heralded the commencement of operations by WCTA, new local standard station at Andalusia, Ala. The Covington News and Andalusia Star, weeklies, gave full coverage to banquet-broadcast-ceremonies honoring advertisers and guests.

Editorial carried by the News cited advantages community would gain with advent of the station and commented on mutual support to be realized by the two media. The paper also urged full advertising participation as a way to general community advancement. WCTA is owned by Andalusia Broadcasting Co. Granted last March, station is operating on 1340 kc with 250 w fulltime.

WCTA staff includes James T. Ownby, general manager; Dige

50-kw Permit Asked

WINS New York, holder of a construction permit to increase its power to 50-kw on 1010 kc, last week applied to FCC for special service authority to begin 50-kw daytime operation and continuing to use its now authorized 10-kw at night. Minor re-radiation technical difficulties will prevent WINS from operating with 50-kw power fulltime for an estimated 60 days, authorities reported. WINS is now on 1010 kc with 10 kw fulltime.

Petrillo

(Continued from page 13)

chestra, appearing in the Boulevard Room at the Stevens Hotel, was cancelled by WBBM-CBS when the Chicago Federation ordered McCoy's group out. The Stevens and Palmer House are operated by the Hilton chain, whose New York hotels are affected.

The Blackstone in Chicago, operated by the Kirkeby chain, which has four New York hotels, was hit Thursday. Mr. Petrillo himself sent orders to Mel Cooper's orchestra, playing in the Mayfair Room, and a trio in the Balinese Room, to cease playing Wednesday night. The Petrillo order also banned music for private parties or special events in the hotel.

Charge Contract Breach

The Palmer House management charged that Petrillo had breached his contract by calling the strike after the union's demands for pay increase averaging 25% had been met by Chicago hotels and approved by the Chicago local of AFM.

In Washington the Roosevelt Hotel, operated by Maria Kramer, who also operates the Edison and Roosevelt in New York, was without music, as a result of the Petrillo ban.

Although networks generally were inclined to say nothing, they were watching developments closely. In the past Mr. Petrillo has been known to order musicians to refuse to play for network programs originating in a city unaffected because the music was replacing that of striking musicians.

Should he decide to halt all remote network feeds during the New York strike, radio would be faced with filling network remotes locally or with transcriptions.

Oklahoma

(Continued from page 16)

of the men gave news first choice, with comedians second. In 1944 newscasts got 83% of the men's first choices and 83.1% from women.

Dr. Whan learned that Oklahomans generally are satisfied with the type of programs they get. Only two out of ten adults reported any program wanted at a time it could not be heard, "but of more importance," said Dr. Whan, "those who report inability to get a desired program were at odds over the type of program not available, and again were at odds as to the time of day it should be broadcast." No more than 1.8% of all questioned agreed on a program type wanted at any given two-hour period, he said.

Charm of Poetry

JIM McMILLEN, The Old Poetry Master of WCBM Baltimore, usually is not surprised at the tenor of the fan mail that his readings invoke. However, he was taken back last week when two fan letters from ladies, 76 and 87 years old, respectively, contained proposals of marriage. P. S.—Both claimed to be wealthy.

RWG-AAAA Negotiation On Contracts Is Static NEGOTIATIONS between the Radio Writers Guild and the American Association of Advertising Agencies, sporadically underway for a year, last week were static.

An attempt to plan a standard form contract for writers is involved. The RWG recently proposed that a contract be drawn up immediately covering only the leasing of one-shot shows. But the AAAA objected to that type of contract and suggested two contracts be drawn, one involving the leasing of a one-time show from a writer and the other buying the radio rights outright for a onetimer's script. The Guild did not approve of the latter.

RWG will meet with its national executive council in Hollywood Sept. 14-15, at which time plans likely will be conceived for the next step.

AFRA May Enter Disc Announcement Dispute

POSSIBILITY that American Federation of Radio Artists may enter objections to the FCC's proposed liberalization of its rule pertaining to transcribed programs [BROADCASTING, Sept. 2] was seen last week.

Ray Jones, national assistant secretary of AFRA, said in New York, that although the AFRA board had not taken an official position on the FCC proposal, some of its executives thought it "too liberal." Mr. Jones has just returned from New York where the AFRA convention was held.

"The public and performers have a right to know if it is a transcribed show or not," he said. It

STRIKE AT WSAY IS DECLARED LEGAL

NATIONAL LABOR Relations Board has declared that the National Association of Broadcast Engineers and Technicians' strike at WSAY Rochester is legal, and the station has been directed to reinstate the five transmitter and studio operators. The strike began Aug. 12, 1945, and was caused, according to the NLRB's trial examiner, "by the respondent's [Gordon P. Brown, owner and general manager] unfair labor practices and not, as claimed by the respondent, by the employes' desire to compel the respondent to comply with a directive order of the War Labor Board."

Mr. Brown was requested to bargain collectively with NABET; offer employes in question full reinstatement, with back pay to Nov. 10, 1945; post copies of the notice at the studios in Rochester and at the transmitter plant in Brighton, N. Y.; notify the regional director of the Third Region (of NLRB) within 10 days from the date of the order what steps have been taken. Order is dated Aug. 26.

If the station does not wish to comply, the case may be taken to court.

WSAY contended the strike was illegal as it was allegedly designed to compel compliance with a directive order of the War Labor Board. The station also said the employes had violated the strike notice provision of the War Labor Disputes Act. Only one member of the Board concurred.

CBC Tourney Set

FIFTH AUTUMN golf tournament of the Toronto offices of the CBC will be held Sept. 20 at the Elms Golf and Country Club, Weston, Ont. This is an annual event for the entire broadcasting and advertising industry in the Toronto area. Committee in charge includes: E. L. Bushnell, CBC program director-general; E. A. Weir, CBC commercial manager; George Young, CBC station relations supervisor; Dick Claringbull, manager CBL Toronto; Louis Snider, 'CBC program department, and Wells Ritchie, CBC supervisor of press and information service.

Wanted to buy—radio station 1,000 watts or less. Replies confidential. Box 815, BROADCASTING.

Wanted—225 to 250 foot self-supporting tower, preferable with lights and insulators. Contact William L. Lipman, Tower Hotel, Milwaukee, Wisconsin.

Miscellaneous

Have \$5,000.00 to invest in a new or going radio operation with services. Box 826, BROADCASTING.

Advertising agency would like to hear from radio stations that will accept mail order accounts, percentage basis. Confidential. Box 867, BROADCASTING. The survey "should show better than anything else whether or not radio has been giving the public the types of programs it wants in Oklahoma," said Dr. Whan.

The study revealed that last winter 96% of Oklahoma's families

was likely that the AFRA board would consider the question soon.

TWO ADVERTISING men, Col. Robert W. Robb with N. W. Ayer & Son, and Lieut. Col. Stedman Chandler, with Pacific Coast Bureau of Advertising ANPA, San Francisco, are authors of new military book on combat intelligence called "Front Line Intelligence."

owned radios, while only 52.6% had telephones, that 89.4% reported radios in working condition, as against 92.2% in 1944. Bad batteries and tubes were blamed by the majority for radios out of order.

EXCEPTIONAL AIDE to RADIO DIRECTOR

For past six years have been in full charge of executing radio plans, spot time buying, network procedure, contracts, estimates, traffic, transcriptions. Systematic, good at details. Have been with medium-sized agency doing all of the above on large national account. Although young woman, have proven executive ability. Want and can assume responsibility. New York only. Box 875, BROADCASTING.

Pulse Signal

(Continued from page 15)

should cost no more than today's good standard sets, IT&T engineers believe.

Eventually, company officials stated, PTM may open up broadcasting facilities so that time on the air will be available for many program services which appeal to special audiences and which today are not broadcast at all or relegated to the least desirable broadcast hours. The system may be adopted first for broadcast use abroad, in countries where radio has not become so much a part of the average home as it is in the United States, it was said.

Business Purposes

In this country, however, they said that PTM would probably be used first for special business purposes. A wired program service, for example, might offer its subscribers a wider program choice by replacing its present wire connections with a PTM broadcasting system. News services might use PTM instead of wires to supply

RALPH SCHULENBURG, released from the Army after four years of service, is manager of the new office. Since his release from the service Mr. Schulenburg has been doing sales work in advertising specialties in St. Louis. He is son of **E**. **A. W. SCHULENBURG**, vice president and media director of Gardner Adv., that city.

news and pictures coverage to subscribing papers. So might other services for stock exchanges, banks, etc., in all of these, the users would be provided with special receivers to get the services for which they subscribed, which would not be receivable on sets of non-subscribers.

Use by Community

Another suggested use of PTM was by a community, which might adopt this system for use by its police and fire departments, its schools, and possibly other municipal services.

PTM may also be used for transmitting radio programs, telephone and telegraph messages and other intelligence across the country by radio relay. Transmission of 24 two-way telephone conversations on a single radio-frequency carrier wave was demonstrated by IT&T nearly a year ago, when wartime restrictions on the system were first lifted [BROADCASTING, Oct. 1, 1945].

JACK POWERS DIES OF HEART ATTACK FUNERAL SERVICES for Jack

Powers, 34, co-owner of KUTA Salt Lake City, were conducted Wednesday. He died Aug. 31 of a heart attack while asleep, during a short vacation trip in a canyon resort near Salt Lake City.

Born in Park City, Utah, in 1911, Mr. Powers was one of the four partners who, in 1934, laid the groundwork for KUTA and the Utah Broadcasting & Television Co. He was graduated from the U. of Utah and with three other classmates organized the radio firm. They are Frank Carman, KUTA general manager; David Smith and Grant Wrathall, the latter a Washington consulting engineer.

Mr. Powers had been instrumental in organizing the new Rocky Mountain Network, which includes, besides KUTA, KLIX Twin Falls, KGEM Boise and KEIO Pocatello, all in Idaho. In addition to his radio interests Mr. Powers was a prominent Utah stockman.

Surviving are his wife, Edna O'Connor Powers; a daughter, Sharon Lee; his parents, a brother and two sisters, all of Salt Lake City.

5-Year Contract

BILL HERSON, breakfast-time star on *Timekeeper* of WRC Washington, has been signed to a new five-year contract also providing for performances on prospective NBC FM and television stations in Washington, Carleton D. Smith, general manager of WRC, announced Wednesday. Mr. Herson has received numerous citations for co-operation in war and civic projects. Nancy Osgood, WRC women's activities director, was signed to a four-year contract.

U. S. Seeks Radio Pact With France Would Use Relays at Algiers

For Russian Broadcasts

NEGOTIATIONS looking to an agreement whereby France would permit the U. S. to use Algiers transmitters for relaying State Dept. shortwave broadcasts to Europe are being conducted, the Department announced Thursday.

Announcement followed a story by Robert C. Ruark in Scripps-Howard newspapers that the French Government had ordered the U. S. transmitters out of Algiers before this year ends. State Dept. said in the months following Allied landings in North Africa in November 1942, the U. S. "on the basis of existing military agreements," built three transmitters near Algiers.

"Since the end of the war the Government has continued to relay broadcasts over Algiers to the continent of Europe," said the State Dept. announcement.

When the Office of International Information and Cultural Affairs (OIC) was established under Assistant Secretary William B. Benton, "it became necessary to reexamine the Government's position as regards these radio transmitters whose presence on French soil was no longer justified by military exigencies," said the State Dept. release.

Negotiations Begun

Negotiations were begun with the French Government which "has at all times shown sympathetic understanding of our aims in this matter," said State Dept., but the "French Government pointed out that it was unable to prolong indefinitely a broadcasting arrangement growing out of wartime agreements."

Should the Algiers transmitters be sold to France, the U. S. would seek certain relay times, said the State Dept. It is known that Assistant Secretary Benton had planned to use the Algiers relay for Russian - language broadcasts, should the French Government permit. Until the negotiations are completed, plans to begin the shortwave broadcasts in the Russian language will be held in abeyance, it was learned.

Meanwhile Britain is beaming Russian-language broadcasts to the Soviet Union and Russia is beaming English-language programs to the U. S. France planned to start Russian-language broadcasts in August, but so far Britain is the only Allied nation carrying such programs.

Forty Feet

FORTY feet of cold Canadian water failed to stop performance of a Zenith Clipper shortwave portable even though it lay a full day on the bottom of a lake 300 miles north of Winnipeg. Ted Leitzell of Zenith Radio Corp. took the portable with him for a stay in the woods. On day of his return to U.S. it was knocked into the lake. Fish hook drag line failed to retrieve it, so Mr. Leitzell left it there. Several days after his return to work he received a letter from Victor Haft, teacher of Russian in a Dukhobor school and Mr. Leitzell's guide. The letter said the teacher had retrieved the set the following day, dried it in the sun and in the evening switched it on, without changing dial setting. Writer said, "Surprise! We heard WGN, that station in your Chicago, just as clear as ever."

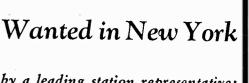

Video Dropout

TOTAL television dropouts for the current year reached 79 when the FCC last week reported the withdrawal of James A. Birdwell's application for a Nashville, Tenn., video station. Mr. Birdwell, in a letter to the Commission, stated that he was forced to withdraw because FCC had denied his application for a Nashville AM outlet. He hoped to alleviate television expense with his standard station. Mr. Birdwell applied for Channel 5 (76-82 mc).

Eugene Bedell

EUGENE D. BEDELL, 58, sales manager of Allied Record Mfg. Co., Hollywood, and a pioneer in Southern California radio, died at his home in that city Sept. 4 following a lingering illness. With Allied for more than 11 years, he previously had been chief auditor of Columbia Recording Co. He is survived by his wife and two daughters.

PETE WATTS, formerly with Southern California stations, has joined KXOA Sacramento, Calif.

81.3% of the 118,630 Families in this area have radios. See John E. Pearson Co.

Tillman Signed

JOHN TILLMAN has been signed as announcer of Vick Chemical Co. Prince Matchabelli "Stradavari" program on CBS, starting Oct. 6 in Sun. 2:30-3 p.m. period. Morse International, New York, is agency. JOE BIGELOW of J. Walter Thompson Co. last week devised the system of alternating writers each week on "The Hour Glass Show," sponsored by Standard Brands on WNBT New York, NBC video station, Thurs. 8-9 p.m. System thus gives an individual writer two weeks in which to write a show instead of the weekly deadline. by a leading station representative: a keen young salesman to specialize in television time sales. Remarkable opportunity for a man who knows he can sell and wants a career in television. Radio sales experience required. All replies will be considered confidential. BOX 861, BROADCASTING

TWO STANDARD GRANTS ANNOUNCED FRIDAY

(Earlier grant story, page 80) GRANTS for two new AM stations announced by FCC Friday, one to group including KQW San Francisco Manager C. L. McCarthy and KQW Stockholder Sherwood B. Brunton, for Las Vegas, Nev., and one to High Point (N. C.) Enterprise for High Point.

Las Vegas grant, for 1230 kc, 250 w fulltime, went to Las Vegas Broadcasters Inc. Principals: Mr. McCarthy, also minor stockaolder in KQW, president (26%); W. R. Steffner, CBS San Francisco office manager, vice president (26%); Mr. Brunton, who with two brothers and Mr. McCarthy owns KQW, secretary-treasurer (24%); E. L. Barker, former NBC sales account executive, now grantee of KLOK, new 5-kw daytime station at San Jose, Calif. (12%); T. H. Canfield, Santa Barbara attorney (12%). KQW and CBS now seeking reversal of FCC denial of sale of sta-:ion to network for \$950,000 [BROADCASTING, Sept. 2].

High Point grant, for 1070 kc with 1 kw, laytime only, came after July 19 amendment f Enterprise application to request that frejuency instead of 830 kc. Enterprise, headed by R. B. Terry, manufacturer and businessnan, previously received grant for 830 kc with kw daytime but authorization later was set uside in April because of conflicting application [BROADCASTING, May 6].

KOKO PURCHASE SOUGHT

APPLICATION for sale of 96.5% of capital stock of KOKO La Junta, Col., by Southwest Broadcasting Co. for \$25,950 reported by FCC. Leonard E. Wilson, secretary-treasurer and 13.7% owner retains 3.5% interest and will be vice president. O. C. Samuel, president, relinjuishes 5.25%, Elizabeth M. Wilson, vice presdent, 5.25% and Charles T. Miller sells 15.3%. Stanley N. Schultz, associated in ownership of XSFT Trinidad, Col. (CP holder), will own 50% and be general manager. Sale subject to Avco rule. Other principals:

P. P. Mickelson, president Trinidad Junior Col-ege, president, 1 2/3%; B. H. Shattuck, attorney, iecretary-treasurer, 1 2/3%; E. O. Schoembs, secre-ary Trinidad Chamber of Commerce, 8 2/3%; B. C. ary Trinidad Chamber of Commerce, 8 2/3%; B. C.
3ulson, hardware and retail furniture business.

R. Jones, with Triangle Chevrolet Co., 1 2/3%;
H. W. Hinkel, electrical and music business, 1 2/3%;
W. Azar, wholesale grocery firm, 8 2/3%; Paul E. Whiteside, president Alaskan Prod. Co., 2 2/3%;
D. R. Kennedy, Sinclair Refining Co. commission agent, 3. Kennedy, Sinclair Refining Co. commission agent, 1 2/3%; A. V. Berg, rancher, 2 2/3%.

ABS OFFICIALLY BANKRUPT

PINE BLUFF PROPOSED GRANT MADE FINAL

FINAL DECISION granting Radio Engineering Service application for new Pine Bluff, Ark. station using 1400 kc with 250 w fulltime and denying conflicting request of Arkansas Democrat Co. for same facilities at Little Rock announced by FCC Friday.

As in proposed decision [BROADCASTING, Aug. 12], grant based on grounds that better distribution of radio service would result since Pine Bluff has only one station while Little Rock has three. Successful grantee owned equally by Kenneth Kesterson and Charles Penix, who plan to give up present operation of radio and refrigerator repair service and supervision of Pine Bluff police and sheriff radio system to devote full time to station.

ABC, NBC PLAN WEDNESDAY PROMOTION

TO EFFECT maximum promotion effort for transcribed Philco Bing Crosby Show on ABC Wednesday nights starting Oct. 16, representatives of ABC, agency and sponsors assembling today (Monday) at Santa Barbara's Biltmore Hotel for two-day meeting. NBC, meanwhile, promoting own Wednesday night Hollywood originations, conducted closed-circuit session Friday for some 155 station managers and promotion men, with talks by Thomas H. A. Lewis, Young & Rubicam vice president in charge of radio (Duffy's Tavern); Austin Petersen, vice president of Ted Bates Inc. (Kay Kyser Show); Wayne Griffin, radio manager of Berg-Allenberg and producer of Frank Morgan Show; Walter Tetley of Needham, Louis & Brorby, and "Leroy" of Great Gildersleeve; Sidney Strotz, NBC Western Division vice president.

WINX-FM TO START

FIRST commercial FM station on air in Nation's Capital, WINX-FM Washington slated to start operation about middle this week, WINX manager R. C. O'Donnell announced Friday. Under interim grant from FCC, station, affiliated with Washington Post, will use WINX-owned experimental FM station W3X0 to duplicate WINX AM programs from around 9 a.m. to midnight, pending start of operation at authorized power of 20 kw. WINX programs to be duplicated in early stages of operation but no extra charge to advertisers contemplated at least until results of survey of set situation can be measured. Meanwhile, Commercial Radio Equipment Co., also FM

CHAINBREAKS OUT

REPORTS that ABC stations being offered Bing Crosby Show, sponsored by Philco Corp., with provision they eliminate 8:44 a.m. chainbreak on ABC's morning Breakfast Club, part of which also sponsored by Philco, confirmed at ABC headquarters. Elimination of chainbreak, it was said, would cancel considerable station and station representative revenue.

WORL SALE NOTICE

SIXTY DAYS from Aug. 28 allowed for public to file bids to buy WORL Boston on same terms as proposed sale to Bitner Broadcasting Co. [BROADCASTING, Aug. 19], FCC announced in advertising transaction in Federal Register Friday. Harold A. Lafount, general manager of Arde Bulova stations, and Sanford H. and George Cohen selling WORL to Laurence S. Bitner, former William Filene's Sons Inc. vice president, and Dominic J. Perri, general manager American Guaranty Corp., Boston, for \$200,000 plus quick assets and receivables not exceeding additional \$100,000.

HERBERT W. FRANK, for several years with Hershon-Garfield Inc., Boston, opened own agency offices in Park Square Bldg., Boston.

(Continued from page 4)

president in charge of news, special events and publicity, may soon light upon Jack Paige, special events and publicity director of Cowles-WOL Washington, with added functions for Mutual, as Slater successor. One of midwest's outstanding radio executives, who sparked nationally recognized Midwest Farmer competitions of past years, Mr. Paige may shortly move to New York to spread wings nationally.

REVOLT brewing among FM independent licensees who feel new broadcasting form not getting proper attention from NAB or old FMBI leadership. Not impossible reaction will set in by NAB convention time, with rump session scheduled at Chicago meeting.

THAT FCC is scrutinizing closely all forms of network affiliation contracts evident last week when Law Dept. called upon United Pacific, new West Coast regional, to alter clauses relating to exclusivity and option-time segments. Van Newkirk, identified with project and formerly with Associated Broadcasting System, evidently had contract conforming to ABS specifications, but FCC barristers saw need to require specific time segments and elimination of word "exclusive" in option time clause.

DEFUNCT Associated Broadcasting System, which had attempted fifth national network, leclared officially bankrupt in U.S. District Court, Grand Rapids, Mich. Bankruptcy petition, signed by Leonard A. Versluis, owner of WLAV Grand Rapids and ABS president, listed \$300,684 liabilities, \$32,548 assets. Of latter amount, \$450 for office furniture, \$12,359 checking account, \$13,000 as accounts receivable from Children's Bible Hour, basic ABS program. Major radio creditors include: \$19,111 to stations; RCA Communications, San Francisco, \$1020; UP, \$1200. George S. Labour, Grand Rapids, appointed trustee for defunct firm. Claims to be presented to Chester C. Woolrich, referee in bankruptcy.

BROADCASTING • Telecasting

grantee, has application pending for similar interim operation of its W3XL commercially.

FCC FRIDAY placed in pending files WOR New York application to install new day, night directional antenna. WOR, on 710 kc with 50 kw, which sought to increase height of tower from 365 ft. to 700 ft., denied CAA approval. CAA authorities, reportedly, intimated 500-ft. overall height would be approved. WOR transmitter now in Cataret, N. J., approximately six miles from Newark airport.

MICKEY QUINN left Abraham & Reynolds Adv., N. Y., to become sales and production head, M. Ryan Co., N. Y.

WITH RICHARD R. DEUPREE, president, Procter & Gamble, Cincinnati, busy in Washington on industrial mobilization in event of future war, reports revived that Neil H. Mc-Elroy, P & G vice president in charge of advertising, will move to presidency, Mr. Deupree becoming board chairman [CLOSED CIR-CUIT, June 24]. As chairman of Joint Army. Navy Munitions Board, Mr. Deupree working closely with Donald Nelson, former WPB chief, on industrial M-Day plan. Work may require many months, leaving P & G without active operating head.

SCHENLEY REORGANIZES ADVERTISING DEPARTMENTS

HAL M. CHASE, formerly Ralston Purina Co. St. Louis, named to new Schenley Distillers post, director of advertising services. He will serve all Schenley brands and be in charge of radio advertising, along with other media, advertising research, budget control and packaging.

James S. Hauck, formerly of N. W. Ayer & Son, in charge of advertising for specialty brands, including Cresta Blanca wines. K. H. Seidel, formerly assistant advertising director, named national sales promotion and merchandising director. Stanley T. Frame, formerly of Continental Can Co., named director of market research. New Schenley setup designed to delegate specific responsibility and provide flexibility, according to Harold E. MacDonale, vice president in charge of promotion, advertising and research. Head of whiskey brand division not yet named.

RCA ANNOUNCES NEW PYLON ANTENNA

NEW single-element "Pylon" FM antenna. rigid and self-supporting, announced Friday by W. W. Watts, vice president in charge of RCA Engineering Products Dept. Antenna requires no additional means of support or mounting. Simple in construction, has no arms, loops or circular elements. Bottom flange of cylinder, 13 feet in length, merely bolted to supporting structure. Additional cylinders, 13 feet high, and 19 inches diameter, with narrow slot cut from top to bottom, can be added where high gain needed. Radiation suppressed in vertical plane. Stacking four sections said to bring power gain of six. Pylon can be used to cover whole FM band with no tuning or adjustments required either on ground or in air. Feed line is single transmission line running up inside of cylinder along slot.

AAAA NAMES COMMITTEE

AAAA announced appointment of special committee to explore jointly with similar committee from ANA, possibility of improving public understanding of American business system through advertising. Committee members for the AAAA: J. C. Cornelius, BBDO, Minneapolis, chairman; Kenneth W. Akers, Griswold-Eshleman, Cleveland; Don Belding, Foote, Cone & Belding, Los Angeles; James H. S. Ellis, Kudner Agency, N. Y.; Clarence B. Goshorn, Benton & Bowles, N. Y. Ex-officio members: Sigurd S. Larmon, Young & Rubicam, N. Y., chairman of AAAA board of directors, and Frederic R. Gamble, AAAA president.

AD ROLE STRESSED

EFFICIENT distribution requires coordination of advertising, sales promotion and selling, especially in developing new markets, ac-

NAB AGENDA

TOPICAL outline for second, third and fourth days of NAB Chicago convention Oct. 21-24 tentatively drafted Friday by association headquarters staff (earlier story, page 20).

First day, Monday, taken by morning committee meetings, FM luncheon panel and late afternoon facsimile panel [BROADCASTING, Aug. 5].

Sunday featured by BROADCASTING golf tournament and registration.

Tuesday morning session opens with President Justin Miller's address, followed by programming standards session. Tuesday afternoon devoted to BMB.

Wednesday morning program: Music copyright and small market station meetings. Public relations and business session in afternoon.

Thursday morning devoted to retail advertising, including results of Joske's of Texas department store clinic. Broadcast advertising session in afternoon.

NAB, RMA TO MEET ON RADIO WEEK

FINAL decision on plans for second annual National Radio Week to be made Sept. 19 at meeting of NAB and Radio Manufacturers Assn. joint committee at Waldorf-Astoria Hotel, New York, according to Bond Geddes, RMA executive vice president.

RMA has elaborate program drafted but awaits NAB committee's approval before goahead signal is given. Program covers series of events during week of Nov. 10, with intense promotion campaign designed to build up nationwide interest in broadcasting.

Representing RMA at meeting will be John S. Garceau, Farnsworth Television & Radio Corp., chairman of Advertising Committee, along with radio week subcommittee of John F. Gilligan, Philco Corp.; John K. West, RCA; W. B. McGill, Westinghouse Radio Stations Inc.

NAB late last week named Radio Week committee from headquarters staff, consisting of President Justin Miller; Executive Vice President A. D. Willard Jr., and Executive Assistant for Public Relations Edward J. Heffron. They will attend New York meeting.

UOPWA TRYING ABC

UNITED Office and Professional Workers of America (CIO) now attempting organization of ABC white collar workers. Union last week collecting authorization cards preparatory to holding election for union representation. UOPWA also sent letter to ABC executives asking salary raises similar to request made of NBC in which union pointed out that CBS had allowed a 10 percent increase to CBS employes earning under \$100 a week.

Developed by RCA as an aid to blind bombing in wartime, Shoran is a new radar yardstick for world mapping

SHORAN-a surveying system with pin-point accuracy!

One small error in a map can be costly in the location of an oil well or mining property. But with Shoran, vast areas can now be charted by plane with an error of less than twelve inches in five miles—and in a matter of minutes or hours as opposed to weeks or months that would be required by laborious surveys made on the ground. Shoran is called one of the most important geographic inventions since the compass. It can fix the exact position of offshore oil deposits or minerals hidden under jungles, and renders obsolete many of the old, time-honored methods of charting. Shoran can also direct a plane flying in a black-

out or heavy overcast with such accuracy that during the war it was possible to drop bombs only a few hundred feet ahead of completely invisible advancing troops below with unerring precision.

Just as Shoran is a revolutionary stride forward in map-making, so do all RCA products represent

Until recently a closely guarded military secret. Shoran was developed at BCA

the farthest point of progress in their fields.

And when you buy anything made by RCA or RCA Victor, you are sure of getting one of the finest instruments of its kind science has achieved.

Radio Corporation of America, RCA Building, Radio City, New York 20. Listen to The RCA Victor Show, Sundays, 2:00 P.M., Eastern Daylight Time, over the NBC Network. secret, Shoran was developed at RCA Laboratories—a world center of radio and electronic research. Here, in this vast community of scientists and engineers, the same imagination and skills that developed Shoran keep RCA and RCA Victor the outstanding names in radio, broadcasting, television and recorded entertainment.
