Broadcasting#Oct18

Bob Zschunke on Milwaukee and WVTV.

"Good independent TV is really a family entertainment alternative. If they have good movies, good kids programming and sports, that's a nice mix. We do a lot with WVTV for that reason.

"WVTV is determined to be a viable contender in Milwaukee. They own the kids Monday through Friday. And they also bought up the rights to the Brewers and the Bucks.

Bob Zschionke is Sr. V.P. Marketing and Media Services, Hoffman, York & Compton, Milwauker

"Here, WVTV programs bowling in the first hour of network prime time. That's good, intelligent programbuing. It doesn't get the big uembers, but it's Milcaukee — bowling capital of the world.

"Even with upcoming cable, a progressive indepen- is basically local. Gaylord dent can maintain the edge. After all, they've been narrowcasting for years, so they know how to do it well.

"I don't care how big an advertiser is, all business stations — like WVTV program to fit the market. I think we've used every Gaylord station in the country."

Closed Circuit

Nairobi showdown

J.S. may be on verge of walking out of nternational Telecommunication Union plenipotentiary conference, now under vay in Nairobi, Kenya. Conference is expected to vote this week on Algerian-Arab resolution to expel Israel from this and all other conferences of ITU. U.S. has said it would leave conference if Israel is hrown out. And word from Nairobi is that thairman of U.S. delegation, Michael Bardner, sees chances of overcoming antisrael vote as no better than 50-50.

Walkout might not be U.S.'s last step, What U.S. sees as increasing politicization of ITU is causing U.S. officials increasingly o consider option of leaving organization. That is one of several options that will be examined in study Congress directed National Telecommunications and information Administration to make of governmental organization for developing international telecommunications and information policies.

ladio dragging

Broadcasting Industry Revenue Reporting Committee, as of word last week from accountants, said 42% of commercial TV and 21% of commercial radio stations had esponded to its survey. "Deadline" bassed Oct. 1, but committee still is counting on better-late-than-never esponse. Committee said 100-150 questionnaires are still coming in daily. Not included in totals so far, but major cource of optimism, according to committee, are assurances from ABC, CBS and NBC that they will supply data on heir TV and radio networks and owned stations.

Expanding cast

While cable copyright bill, H.R. 5949 which was passed by House, is in limbo before Senate Judiciary and Commerce Committees, sports organizations are lobbying hard for inclusion of provision to expand FCC's current sports blackout rule (BROADCASTING, Oct. 4). And new claimant to protection has entered picture. American Low-Power Television Association which represents more than 2,000 applicants is asking Judiciary and Commerce Committees to hold hearings and include it.

Association is concerned about provision in H.R. 5949 that would exclude low-power stations from must-carry rules. They want must-carry rule either dropped entirely or amended to give secondary must-carry protection. Secondary protection would require cable systems to

carry low-power stations if cable channel is available and if low-power operator is willing to pay for carriage. Judiciary Committee Chairman Strom Thurmond (R-S.C.) appears willing to let dissatisfied parties present their case in hearings. Commerce Committee Chairman Robert Packwood (R-Ore.) is also planning hearings.

Aid to imports

U.S. Customs Service is proposing tariff increase for lens systems made abroad for American-made television cameras—move that U.S. manufacturers say would cripple them in competition with foreign manufacturers of complete camera assemblies. RCA has told customs average price of \$125,000 for American-made studio camera (with foreign lens) would go up by \$3,100 and enable makers of foreign cameras to undersell Americans. Customs wants to raise tariff from present 5.3% to 17.4% on lenses, leave tariff at 5.3% on complete camera imports from abroad.

NBC, filing as camera customer, not subsidiary of RCA, told Customs Service tariff hike would force it to buy imports in preference to domestic cameras.

President for RAB?

Some Radio Advertising Bureau board members will propose during board meeting at La Costa, in San Diego, on Oct. 25 that executive committee conduct search for president of RAB. This possibility continues although Miles David signed new, four-year contract to continue as vice chairman and chief executive officer of bureau in September (new pact was not announced). There were reports last summer that some board members wanted to oust David or at least engage another person as RAB president. But instead Davidwas named vice chairman and CEO (BROADCASTING, July 9) and after protracted negotiations he signed new contract.

Foes of fees

Opposition to spectrum-use fees is gaining momentum. Last week Texas and Kentucky Broadcasters Associations at annual meetings voiced strong objections to idea as expounded by FCC Chairman Mark Fowler and National Radio Broadcasters Association and endorsed by National Public Radio. Texas broadcasters officially voted unanimously against spectrum fees. National Association of Broadcasters executive committee condemned idea two weeks ago

(BROADCASTING, Oct. 11).

Even at NRBA there is hint of dissent. NRBA board member, Steven Hicks, president of Hicks Communications, radio group based in Dallas, told Texas broadcasters he thinks there is some division over idea on NRBA board. Hicks, who represents Texas broadcasters on board, is himself opposed to spectrum-use fee as quid pro quo for deregulation.

Farming up to date

Farm Bureau, three-million member private organization of farmers, is looking at January 1983 for launch of full-scale electronic information service for members. Bureau has completed year-long test among eight state bureaus and will incorporate findings into full-scale plans. AACSys has been transmitting stock and commodity news, weather, livestock and grain reports to subscribers. Farmtext field is not without competitors. AgriStar is planning nationwide test launch next month (BROADCASTING, Oct. 11).

Football fallout

In spite of some progress toward settlement of now four-week-old National Football League strike, major advertisers showed signs of growing nervousness last week. One rep firm reported receiving "more calls last week than in any previous" from advertisers wanting to cancel NFL advertising contracts altogether. Contract clause barring cancellation through end of season kept lid on all but one known case: Xerox Stores, which is said to have canceled spot radio contracts for entire season and is said to face lawsuits from up to 13 stations.

Attitude late Friday, according to reps contacted, was "optimistic" that end of strike was near. Adding to optimism: reports that could not be substantiated that pressure on NFL from three major TV networks for speedy end to strike, has increased as ratings for substitute programs have fallen farther and farther behind.

New blood

French videotext and teletext interests are forming new marketing organization to promote their technology in North America. Organization, which will comprise number of hardware and software suppliers, will be headed by Thomson-CSF. Alphatel, current videotext-teletext marketing agent in U.S., has been foundering.

Cable castings

New York roadblock

While negotiations in the New York cable franchise process among the city, Cablevision and Warner Amex concerning who gets what in Brooklyn appear to be at an impasse, there has been some recent progress in the Staten Island situation. Borough officials have elected to divide that borough into two franchises, east and west, that are said to be roughly equivalent in population, income demographics and growth potential. Three companies have been targeted for a franchise there-Vision Cable, Cox and Warner Amex. A source at the borough level said, however, that officials there are now "leery" about awarding Warner Amex a franchise, given rumors that emerged about a month ago indicating troubles in the marriage between Warner and American Express-rumors that both companies have stated are not true.

As to the Brooklyn negotiations, Cablevision had until quite recently been under the impression that the city had successfully arranged for a swap of Brooklyn franchises whereby that company would receive the southern franchise (perceived as more desirable), leaving Warner Amex with the northern and central sections. The swap was necessary to keep Cablevision in the process, and to make its franchise for the entire Bronx borough, along with some additional financial aid, more palatable. Warner, on the other hand, denies that such a deal was struck. Hence, back to square one.

Another complication is presented by the Bedford Stuyvesant Restoration Corp. It has an agreement with Cablevision, a spokesman for the group said, giving it about 15% of Cablevision's Brooklyn franchise holdings by virtue of a deal that was made before the MSO rejected wiring North Brooklyn, where the Bed-Stuy section lies. Should Warner take on the northern franchise it doesn't intend, at this point anyway, to count the Restoration Corp. into its plans.

L. A. suit

A cable television company that was recently blocked in its attempt to secure a franchise to operate a system in south-central Los Angeles has filed a \$60-million antitrust suit against the city of Los Angeles, charging that city officials acted in bad faith by giving the firm, Universal Cable Systems Ltd. (the majority partner in South Central CATV Associates), a low ranking among franchise bidders

The suit, filed in U.S. District Court in Los Angeles, seeks a court order awarding the south-central franchise to SCCA. The action also alleges that Los Angeles Mayor Tom Bradley and other political figures tried to get SCCA to merge with another franchise bidder—Community Telecommunications Inc.—and an unnamed group described as having "strong political ties."

The city council rejected all bids for the franchise earlier this year, contending that the applicants did not have sufficient funds to build the 210,000-home franchise area. The city has issued a new request for pro-

posals and expects to receive new bids by the end of this year.

The suit also charges that the financia status of SCCA and competing applicant was deliberately misrepresented by city of ficials and seeks an injunction to preven the city from ignoring proper bidding procedures in awarding the franchise.

SCCA is 60% owned by a group of loca investors, and 40% owned by Nielsen Enterprises of Wyoming. CTI is composed clocal investors.

Equity investigations

Gene Schneider, president of United Cable Television Corp., denied rumors last weel that his company was up for sale at a price of \$450 million, or any other price, for the matter. He described those rumors as "ak solute hogwash." United is, however employing the services of Daniels & Associ ates, based in Denver, and Goldman Sachs, New York-based investment banker, to ex plore various alternatives for a "potentia sale of equity" in the company, according to Schneider. The capital raised in such a sale in whatever form it takes, would not result it a change of control over the company, he said, and would be used to help finance the cable system builds to which United is com mitted over the next five years (BROADCAST ING. Oct. 11). A number of offerings are being contemplated, including the forma tion of limited partnerships and the offering of convertible debentures. A public stocl offering, however, "is not in the cards" a this time. Schneider said.

Cable debate

By the time California cable subscribers go to the polls Nov. 2, 1.4 million cable house holds will have had a chance to view Senate candidates Governor Edmund Brown and San Diego Mayor Pete Wilson square off in a televised debate thanks to Satellite News Channels and the California League o Women Voters. The league had organized the debate, held Oct. 11, as the third in a series, but was unable to enlist broadcaster: to carry it. When Times Mirror Cable's Long Beach, Calif., system programing manager Rose Abdi, contacted SNC headquarters in Stamford, Conn., about the possibility o running the debate over the channel the system uses for SNC, the news service ir turn proposed using spare Group W satellite transponder capacity to make a feed available to cable operators throughout California SNC picked up the cost of producing the television coverage, and over one weekend lined up 89 cable systems to take it up on the offer, a number of them not regular SNC carriers. Carriage arrangements included live and tape-delay cablecasts.

While such long-form secondary feeds represent a significant departure from SNC's standard headline format, a spokes-

A lot to offer. The National Cable Television Association's two-day seminar on opportunities for minorities in cable television—"Minorities and Cable: The Interconnect of the '80's"—drew more than 100 persons to the Washington Marriott hotel last week. The opening session featured (I-r): Tom Wheeler, president, NCTA; Robert Johnson, president, Black Entertainment Television, and June E. Travis, senior vice president, American Television and Communications Corp., and chairman, NCTA's minority affairs committee.

an last week said: "I wouldn't be surprised see this lead to other, similar, public serce-oriented projects."

HBO memorabilia

ome Box Office claimed two firsts last eek—both involving contributions of pes of programs that have appeared on ie pay cable service. The Time Inc. unit resented the Schomburg Center for esearch in Black Culture (below HBO excutive vice president/programing, Michael uchs (I), makes the presentation to Schomurg's Wendell Wray) with tapes of three picert presentations starring black perforers Diana Ross, Dionne Warwick and ladys Knight and the Pips with Ray harles.

In a separate donation, HBO presented upes of more than 30 programs to the

Museum of Broadcasting, in what was said to be the first major acquisition of cable product by the museum. That gift includes the first program HBO put up on the satellite in 1975—in the process inaugurating a new era for cable—the heavyweight bout between Muhammad Ali and Joe Frazier. Other selections include On Location and Standing Room Only specials, and the eight-part documentary series, Remember When. The Museum of Broadcasting will host a special three-week exhibit starting tomorrow, Oct. 19, entitled "Home Box Office Programing: Reflections from a Decade."

Participatory programer

UTV Cable Network held a luncheon for the advertising community in New York to provide the results of research conducted over the summer focusing on viewer acceptance of the networks; primary for-mat—"Innovision," whereby viewers interact via telephone with the network's various game, talk, news and sports programs, as well as participate in opinion polls, contests and give-aways. UTV, based in Fairlawn, N.J., which is scheduled to launch in January of 1983, has signed commitments from more than 20 MSO's (including eight of the top-10) and a number of independent systems with a combined subscriber count of 2.5 million, said Al Parinello, executive vice president of UTV. He added that by launch, signed commitments should total around 3 million.

The network is being positioned as a ser-

vice that will help operators retain subscribers and reduce churn, which on a national average have been estimated to be as high as between 30% and 40% a year. UTV executives believe that combining viewerresponse capability to traditional program concepts will enhance the appeal of the UTV product. Based on a sample of 750 cable subscribers to systems committed to UTV around the country, the network found that 61%, split just about evenly between males and females, expressed an interest in having UTV available on their systems. Of those who expressed an interest, 83% said they would like to participate in specific programs; 70% of the women and 71% of the teens would agree to have their names placed on mailing lists for samples and 44% said that the ability to actively participate adds to the enjoyment of the program.

UTV programing will have a 12-minute per hour commercial load, with two of those minutes provided to operators for local availabilities. A 30-second spot would cost between \$50 and \$1,600. All programs are based on some form of viewer call-in format. UTV will guarantee viewing audiences to advertisers based on projected call-in rates per program, and will provide make-goods for under-deliveries. UTV's computer-based viewer-response system can process 600,000 calls per hour. The network recently signed Steve Allen, comedian and pianist, to do a series of 13 one-hour programs entitled Steve Allen's Music Room.

Frank D'Alessio is the chairman of UTV and Richard Levinson is president. They were recently awarded the cable franchise for Paterson, N.J.

Which network just introduced the future of radio?

sports program currently substituting for Mutual's normally scheduled NFL Game of the Week and regional NFL action

Mutual calls this dramatic breakthrough "muticasting." of radio stations, multicasting means more quality programs ochoose from at any given moment. For advertisers, it means futual can deliver practically any audience or market ou want.

Other networks are still only talking about this techology, saying how much it will do for radio in the future. But futual brings you the future, today. So if you're wondering who tally leads the way in network radio. The answer is Mutual.

MILITUAL BROADCEASTING, SYSTEM

Cable advertising pow-wow. Varjous values of cable advertising were pointed up last week in third of four conferences being held by Cabletelevision Advertising Bureau, Norman W. Campbell, chairman and chief executive officer of Tracy-Locke/BBDO, Dallas, said whereas television was choice for masses, cable provides mass of choices. He told meeting in Dallas that companies that are prohibited from network television because of cost now have opportunity to participate and use new medium to reach their target audience effectively. On other hand, he added, companies able to afford network TV but were not really interested in reaching masses can now tailor their messages to specific categories. David Beckerman, vice president, advertising, Radio Shack, said company has watched cable growth with interest and regards it as medium it can use effectively. Beckerman said average cable viewer is upscale in education and income and good prospect for Radio Shack advertising. Robert J. O'Brien, senior vice president and director of media services, Bozell & Jacobs, Dallas, said that with new media, advertisers will have to change their thinking regarding marketing efforts and media usage. He said advertisers will have to fund more research into segmentation opportunities, advertising strategies and measurement of results, or they will have to rely more on judgment, if research costs prove prohibi-

If it's legal, why not? Kris-Tv Corpus Christi, Tex., has obtained advertising schedules from two liquor stores and reports campaign is working well. Frank Smith IV, salesman for KRIS-TV and son of president-owner T. Frank Smith Jr., said he had been working on landing liquor account for several months. After canvassing numerous liquor stores, he persuaded Portland Liquor Inc. in suburban Portland and Double Jigger in Corpus Christi to test TV waters. Thirty-second TV commercials stressing price and brands began running for Portland on Sept. 25 and for Double Jigger on Oct. 8. Advertising will continue until Christmas. According to Smith, stores report that business has been brisk since TV drive began. About 30 negative telephone calls have come to station from viewers who disapprove of liquor advertising on television. Smith's observation: "If it's legal and people sell it and people drink it, why not advertise it?"

USA ad count. USA Cable Network reports that advertising billings for third quarter (June-September) totaled more than S8 million, with first-time buys from list of companies including Campbell Soup Co. (Swanson dinners); Mattel (Intellivision and M Network video games); Pillsbury (baked goods); Pontiac Motors; Satellite News Channels; Sears; Tandy Co. (home computers); Anheuser-Busch; Atari; HBO; Toyota, and Xerox. Currently, seven of USA's advertisers spend S1 million or more on network. Jeffrey B. Lawenda, vice president, advertising sales and commercial programs development for USA, said that network is "basically on target to achieve its goal of in excess of S20 million" in billings for 1982.

Union city. American Postal Workers Union will begin S2.7-million advertising campaign today to counter private competition to Postal Service. Union's action was spurred by TV advertising campaign last spring by Federal Express, which depicted two post office clerks discussing pensions and other benefits while customer was trying to get help mailing package. Commercial will air in Chicago, Cincinnati, Cleveland, Dallas-Fort Worth, Detroit, Hcuston, Indianapolis, Kansas City, Memphis, Nashville, Miami-Fort Lauderdale, Minneapolis, Pittsburgh, Philadelphia, Seattle-Tacoma, St. Louis, Los Angeles, New York, Boston, Atlanta, Milwaukee, San Francisco, Denver, Washington, Birmingham, Ala., and Hartford, Conn. J. Walter Thompson is agency for union.

New digs. Financial News Network announced opening of Chicago sales office—811 Diversey Parkway, 60614. Telephone (312) 528-5010.

Bell blast. Southwestern Bell has started new campaign promoting convenience of using public telephones to handle business problems on the run. Television spot will air in seven cities within Southwestern Bell's territory which includes San Antonio, Austin and Corpus Christi, all Texas; Kansas City, Oklahoma City, Houston and Dallas-Fort Worth. Campaign will run through December. D'Arcy-MacManus & Masius, St. Louis, is agency.

campaign this week in Pennsylvania markets of Allentown, Philadelphia and Reading. Eight-week flight will air during 6 a.m.-7 p.m. times, targeting adults, 18-49. Agency: Weightman Advertising, Philadelphia.

Cottman Transmission Systems ☐ Campaign is under way for automotive franchise company in 40 markets. Flight will run through fourth quarter. Target is men, 18-49. Agency is Ross Advertising, Ft. Washington, Pa.

R.G.M. Services ☐ Sears authorized carpet cleaning service is currently running in five markets and will continue through Oct. 24. Target: women, 25-54. Agency: Weightman Advertising, Philadelphia.

RADIO AND TV

Joseph Huber Brewing Co. ☐ TV campaign for Bavarian-style Augsburger light and dark beer begins this week in Chicago for eight weeks. Radio also begins this week in San Francisco and Madison, Wis. Boston market is already carrying beer on radio. Spots will run through Thanksgiving. Target is men, 18-34, and will run during 10 a.m.-7 p.m. times. Agency: Zechman & Associates Advertising, New York.

Exide Batteries TV advertising begins this week in Minneapolis, Cleveland and Davenport, Iowa, and will run through mid-December. Radio campaign will begin Nov. 22 in Davenport for varying flights, totaling eight weeks and Nov. 29 in Minneapolis and Cleveland for varying flights, totaling seven weeks. Radio spots will air during 6 a.m.-8 p.m. times. Target is men, 25-49. Agency is Lewis & Gilman, Philadelphia.

Into the Fabric of Society Its Strength Depends On Its Programming

Turner Program Services, the company that brought viewers the only 24 hour a

day news program alternative, addresses three critical issues facing society today... world over-population in *A Finite World*... the earth's

capacity to grow food in **The New Dustbowl Blues**... and **Our Daily Bread, A Study in Black Youth Unemploy- ment**. Three one-hour

specials designed to inform, move, and even inspire your viewers about the condition of our world today.

Turner Program Services, 1050 Techwood Drive NW, Atlanta GA 30318

Monday Memo

A network television programing commentary from Ralph Malvik, Potomac Productions, Washington

Survival plan for network TV

For the last few years industry experts have been nervously monitoring research data on audience levels for prime time network programing. In 1978 the combined network share of homes watching prime time TV was 94%. By 1981 this figure had dropped to 84%. Data covering the first two quarters of 1982 show a continuing decline.

A recent study by J. Walter Thompson's media resources and research group confirms this trend and predicts a further sharp drop to 73% by 1985 to 63% by the end of the decade. The report expects the 1980's to be a time of steadily eroding network shares, ratings and absolute numbers of viewers, despite an increase in the number of households and persons watching TV. If true, this bleak trend will be happening at a time of enormous growth in cable by almost any measure—major cities wired, penetration rising to 60% by 1990 and rapid expansion of advertising on cable.

According to the JWT report, the culprit is not only cable, but the other new technologies as well. "Interactive cable is here, pay-per-view looms as the next big money maker, cost of dishes and transponders is coming down, MDS could develop into a multichannel delivery system, STV has been deregulated, and DBS has just been given the green light by the FCC."

In the face of this evidence, the broadcast networks still publicly disclaim the importance of the problem, and have not exercised their formidable programing potential in order to fight the competition. In my view, the question is not whether the networks will fight back, but how and when.

This situation is but the latest chapter in the long history of technology and the effect of innovation upon existing products and services. There has been a consistent pattern in the developmental phases of the innovative process. Typically, when a new product or service becomes widely accepted in the marketplace, there are dire predictions that the new technology will supplant existing ones. Who can forget the concern in the early 1950's that television would replace radio, movies, even the reading of books?

The axiom holds that if the innovation is significantly better than existing technologies, it will eventually supersede them (e.g., 78's were replaced by both 33's and

After receiving a masters degree in telecommunications from the Newhouse School at Syracuse University, Ralph N. Malvik began his career as a radio announcer at WNCN(AM) New York City. He has also been program director of a radio station in Syracuse, N.Y., and worked on the production staff of the CBS-TV affiliate in that city. Malvik was awarded a Ph.D. in policy studies from Syracuse University, and served on the legislative staff of the White House Office of Management and Budget for five years, handling telecommunications issues, as well as policy for all levels of education. Malvik was vice president of programing for The Appalachian Community Service Network, "the Learning Channel," from its inception as a cable service in 1979, until establishing his own firm, Potomac Productions, in Washington, earlier this month.

45's). However, if it is only different, the new technology will primarily exert enormous financial pressure upon existing products/services to adapt to new market conditions. An obvious example is 1980's radio compared to radio in the pre-television era. And so it is with broadcast television and its new electronic competitors.

While many in the industry believe that the declining audience shares cited above may be the death knell of at least one of three broadcast television networks, I disagree. The most compelling reason is the enormous capital investment each of the parent corporations has in its television network subsidiary. A more likely outcome is one that recognizes these factors

and anticipates how the networks will adapt. Consider, for example, the following scenario:

As audience shares continue their precipitous decline, one of the networks will be restructured as part of a radical rescue attempt. Programing will be refocused into "modified narrowcasting." Under such a plan, the network will establish perhaps three mini-networks offering:

 Entertainment (similar to the schedule of the existing parent network).

Information (news, sports, including videotext).

Contemporary music (similar to cable's Music Television).

Each existing local affiliate of the parent network could choose one of the new services that it judges to be the most appropriate to its market. The other mininetworks would then seek affiliates from the remaining stations in each market, especially the independents. This approach is similar to what ABC Radio has been doing for the last 10-15 years.

In order to implement such a plan, significant cost reductions would be necess-

■ Signals would be distributed by satellite, rather than via AT&T long lines.

As with the auto companies, the unions would have to renegotiate their contracts to assist in this rescue attempt.

■ A return to live-on-tape production of many series to reduce the enormous costs of post-production.

Other assumptions in this concept include:

News programs would air simultaneously on all three mini-networks. This would keep costs down as well as satisfying FCC requirements.

A repeat pattern would be adopted whereby almost all programs would be seen at least twice a week, similar to PBS.

Which network will take this approach? The obvious candidate is NBC-TV. It is still in third place, although moving up under Grant Tinker's leadership. Given the financial problems of parent RCA, however, Tinker's improvements may not come fast enough. NBC would also benefit from the relationship with RCA Americom that owns the Satcom satellites.

Accordingly, significant changes in the structure and operation of network television may be on the horizon. They are the inevitable result of economic Darwinism at work. Rather than fearing such change, the industry should welcome it because of new opportunities that will result. After all, the only constant in life is change.

IN A WORLD WHERE IMPORTANT DECISIONS ARE OFTEN MADE ON LOOKS ALONE...

ISN'T IT GOOD TO KNOW THERE'S SOMETHING THAT'S LOOKING BETTER ALL THE TIME.

From the excitement of a chase scene to the realism of a human drama, only film has the capability to give you the exact look you want.

Film offers the broadest range of imaging-from delicate hues, subtle detail, and controlled depth, to brilliant color, sharp contrast, and bold perspectives. Eastman color negative films can convincingly portray reality or convey fantasy without losing believability.

For your next production, look into Eastman color films. They'll

make you look better, too.

Eastman film. It's looking better all the time.

Datebooks

This week

Oct. 15-20 — Vidcom/MIP-TV fall international video marketplace. Palais des Festivals, Cannes, France.

Oct. 18-19—Seminars on current business and legal problems of cable television and satellite master antenna television, sponsored by *Illinois Institute for Continuing Legal Education*. Hyatt Regency Chicago, Chicago, Information: (217) 787-2080.

EDITOR: FCC Chairman Mark Fowler's recent proposal for a spectrum use fee that would help support public broadcasting in return for "unregulating" commercial broadcasting is an interesting idea which raises several important questions.

Chairman Fowler suggests that public broadcasting, financed in part by spectrum fees, could perform certain vital public services that commercial television, especially unregulated commercial television, will not perform when it is left entirely to the marketplace. Among the vital unfulfilled needs that the FCC chairman has cited are quality children's programing and fair access by political candidates. Other gaps in commercial television bill of fare these days include quality educational, cultural and science programing, as well as prime time public affairs documentaries and minority interest programing.

We welcome the FCC chairman's recent endorsement of the financial needs of public television and radio—systems capable of presenting the best our civilization has to offer on our most important media of communications. Chairman Fowler's support for public broadcasting is an important asset in this administration.

A key set of questions raised by Mr. Fowler's proposal centers on the size and extent of the spectrum use fee to be imposed. Should the tax be confined to radio and television's spectrum use, or should it also be assessed against other users such as telephone and cable television's microwave hops? Should the spectrum use fee be based on the amount of spectrum used, or on gross revenues, or on profits, or what?

Another key set of questions focuses on the proposed use of the spectrum fee once it is collected. As a supplemental source of revenue for public broadcasting, in addition to, I hope, temporarily decreasing federal appropriation, a spectrum fee might be very helpful to a system always starved for funds. However, if the spectrum fee is proposed as the sole source of public broadcasting's federal support, replacing the current federal appropriation, then severe problems arise. The spectrum fee, no matter how big or small it might be, will be entirely unrelated to public broadcasting's needs, costs or the public's priorities for its services. As a matter of public policy, there are strong grounds for questioning the wisdom of any dedicated tax for any dedicated use, as opposed to having all such taxes go into the general treasury where the Congress and the people can decide how the revenues should be allocated.

The argument has been made that it would be appropriate to use a telecommunications spectrum fee, like a grazing

fee or highway tax, to replenish and improve the environment it exploits. Such a dedicated use tends to diminish the Congress's and therefore the public's control over how tax funds should be spent and on what priorities.

As part of his proposal, Chairman Fowler suggests that the Congress clarify public broadcasting's mission, implying that the government should legislate public radio and television's programing priorities and responsibilities, especially in the areas of children's programing and political access.

There is no question that public broadcasting does have certain special obligations for public service. Indeed, that is our very reason for being. But those priorities are better defined by the nonprofit educational license holders of local stations in individual communities than by the federal government. We should be wary of imposing a federal government broadcasting system that would mandate specific programing priorities for public radio and television. That would seem to be directly contrary to Chairman Fowler's own marketplace convictions and new directions.

The FCC chairman's new, fundamental approaches in this area deserve and require a good deal of further elaboration and thoughtful discussion.—Lawrence K. Grossman, president, Public Broadcasting Service, Washington.

Other side

EDITOR: In reply to the Oct. 4 letter from John Marshall, wfig(AM)-wwdm(FM) Sumter, S.C., against Docket 80-90, let me take the other side. I am a competitor of wwdm. However, they have a monopoly on black FM radio from Columbia to Charleston, with only a 3 kw FM at Summerville in between. The FCC has seen fit to boycott blacks here at wsol by not assigning an FM to our city, while one was available, and putting it in a city where nobody wants it. Docket 80-90 would give us a 50 kw Class B1 facility for 24-hour operation.

The only operators against 80-90 are the "fat-cats" with 100 kw facilities like John. Meanwhile, wsoL can only program daytime to our area while wwDM goes 24 hours. It is now beginning to come to light why docket 80-90 isn't likely to be acted upon any time soon at the FCC. Marshall summed it up very nicely when he said it "will open a can of worms and permanently cripple the profitability of many."... The answer to that is if you can't stand the heat, John, get out of the kitchen! Docket 80-90 will make the bad operations get on their toes and shape up or ship out. It will make for better radio in America, if the FCC will adopt it. - Clarence Jones. president, WSOL(AM) Elloree-Santee, S.C.

UNMASKING THE CHILD MOLESTER

"My stepfather wasn't like the dirty old man on the school playground that parents warn their children about. We were like the Waltons. He was my daddy."

The words are from a victim of child molestation. And as is true in 80% of all reported cases, the molester was someone she already knew.

By age 16, one in four girls has

been affected. With boys, one in 10.

While there is no known cure for the mental disorder that afflicts the molester, a public educated about the facts and resources available can help reduce its impact.

It was with this objective that three different Gannett voices in three different cities, The El Paso Times, KPNX-TV in Phoenix and KSDO radio in San Diego, independently launched revealing series that recounted the damage done to children in the communities they serve.

But beyond the documentaries, all three series provided testimony from doctors, psychiatrists, service organizations—even the molesters themselves—along with an understanding of the danger signals and actions to take.

The sexual abuse of children is a sensitive and unpleasant subject. But helping to overcome a community problem is the responsibility of courageous, caring local journalism.

And every Gannett local information service—from Honolulu to Hattiesburg, Lansdale to Louisville, Tucson to Tampa—is expected to exercise that responsibility, each in its own way for its own community.

TOP OF THE WEEK

Media stocks ride market wave; outlook good for next year

Communications issues benefit from falling interest rates; analysts predict gains in revenues in 15% area in '83

Media stocks have been no sluggards in the hectic market activity of recent weeks, in most instances substantially outperforming the market, as measured by the Standard & Poor's 400 industrials average. Going back to the mid-August start of the market's rally, that S&P average had risen about 31% by last Thursday, a climb that is at the low end of the improvements scored by chief media issues. Indeed, 40% and 50% gains were the order of the day in communications, even after some profit taking Thursday when the whole market slipped.

Of course, an underlying impetus in the

media momentum is the same shift in interest rates that has fueled the general market jump, particularly in the last two weeks. As interest rates go down, money market investments yield lower returns, making investments in stocks relatively more attractive. In the words of Drexel Burnham Lambert analyst John Reidy, "what you're willing to pay for stocks has increased" and not out of any definite sense of when anticipated economy recovery will occur.

Looking at some of the individual gains, ABC ended Thursday at \$49.50, up 35.2% over its closing on Aug. 11, and that's after giving up several dollars during the week. (Measured at Tuesday's closing price, the stock was up 44.7% over August.) CBS's gain from August was 42.7%, at \$52.625 Thursday. That days

drop of \$1.50 was not out of line with the market's general performance, despite CBS's report the day earlier of sharply cut earnings in the third quarter (see below). LIN led the broadcasters with 51.9% improvement.

Capital Cities climbed 43.7% since August, Metromedia 37.5%, Taft 32.8%. Among diversified media issues Time Inc. posted a 44.8% gain; Times Mirror 45.4%; Gannett 50.7%; Knight-Ridder 38.4%; Viacom, 59.4%.

Cable-related stocks seem a mixed-bag. Storer, for instance, showed only 20.7% price improvement since August; Cox 25.2%; Heritage Cable, weakest of the list, 7.9%, well under the general stock market surge.

Meanwhile, Tele-Communications Inc. scored 56.4% improvement, United Cable, 50.4%. Those percentage gains are, perhaps, deceptive when stacked up against those of their broadcasting brethren. To some extent, the cable gains represent climbs from a deep slump, while the broadcasters' improvement comes on top of stock prices that had been holding

CBS third-quarter income down 68% but stock up

While revenues for quarter drop 2%, Wall Street reacts favorably to what it sees as Wyman leadership

First the bad news: CBS last Wednesday eported third-quarter net income that was lown 68% from the year earlier. Now the good news: The stock market reacted as if hat bad news were good news—viewing he hard business decisions that hit earnings this quarter as evidence that CBS President Thomas Wyman "has just taken over the company" (as one analyst put it) and will steer a course out of CBS's recent roubles.

In making the announcement of the earnings decline (and a revenue decline as well) Wyman said: "Our financial results for the third quarter reflect both difficult business conditions and the effect of important steps we have taken to reposition our businesses. While those steps cause mmediate negative financial impacts, they nave been taken because they have positive longer-term implications." Included in those steps were the killing of CBS Cable, and a decision announced earlier last week to consolidate CBS Records manufacturing operations by closing its Terre Haute, Ind., plant at a cost of 1,250 jobs and an \$11 million pre-tax hit to profit.

The report of the income figures is anything but easy reading, with the distinc-

tions it makes among income from continuing operations, the charges due discontinued operations (CBS Cable), and net income; plus the effects of tax liability and accounting changes.

The end result is that CBS revenues for the quarter slid 2% to \$958.1 million. Income from continuing operations, which absorbed the record plant closing cost of \$5.6 million after taxes, plumeted 54% to \$28.6 million, \$1.02 per share. That drop would have been even steeper except for what CBS termed an "atypically low level of income taxes" resulting from the settlement of a past audit. It would seem CBS benefited by \$9 million to \$10 million there and if that amount were subtracted from the continuing operations figure it would have been off 68% from 1981.

CBS separately reported a discontinued operations loss of \$10.1 million post-tax for the CBS Cable shutdown—\$3.6 million for operating losses, \$6.5 million on the loss of the disposal of CBS Cable's assets. Both those figures, of course, represent about half the respective pre-tax losses.

All that produces a bottom line of \$18.5 million, 66 cents per share, net income for the 1982 quarter, 68% below the year-earlier \$58.7 million, \$2.11 per share. (Trimming the \$9 million benefit from the tax settlement off that net income figure would yield an 84% drop in net income

this quarter.)

Only the publishing group within CBS reported increases in both revenues (5%) and profits (undisclosed).

The Broadcast Group experienced a 9% increase in revenues, but "sharply higher first-year costs associated with new contracts for television sports events, expanded news programing and the impact of Radioradio" resulted in a profit decline.

CBS/Columbia Group revenues were up 6%, with Ideal Toys revenues now included in that segment; but operating losses in Specialty Stores and Musical Instruments left that division with a loss for the quarter.

Worst hit was CBS Records—revenues there were off 21% in the quarter, and the group reported a loss for the quarter, with the plant closing, foreign exchange losses and weak sales blamed.

Although CBS pointed prominently to the CBS Cable losses and the records plant shut-down as factors in the earnings decline, together they totaled less than half the drop—clearly business conditions at its operating units took a heavy toll as well. And while CBS had prepared analysts at a recent meeting (BROADCASTING, Sept. 20) for a poor quarter, conversations with analysts last week suggested that things turned out even a little worse than was suggested then.

up reasonably well during the recession. Cox, which earlier benefitted from some downside cushioning thanks to its broadcast holdings, conversely finds its cable interests a drag on its current gains.

Looking back at the top performers, what's fueling their better-than-market climbs? E.F. Hutton's Susan Watson calls it "anticipation of next year" with "people clearly looking over the trough" of the recession, and seeing in media stocks "fairly predictable businesses that seemed to come through the recession relatively unscathed."

David Londoner of Wartheim & Co. is looking for 15%-16% improvement in network revenues next year, with spot and local gains approaching that figure. All around, he anticipates "fairly healthy earnings gains" for broadcasters in 1983.

At First Boston, Rich MacDonald thinks the networks will see 15%-plus gains in 1983 earnings, with group broadcasters experiencing low to mid-teens growth.

Cable remains saddled with investor concerns about how long it will take companies to yield reasonable returns from their newer systems. Although, as Drexel, Burnham, Lambert's Reidy notes, lower interest rates help on that score, they "still don't answer all the questions."

Another question now is what, if any, room remains in the media stock prices for further growth. Has their run-up fully accounted for their near-term potential? As David Londoner sees it, "There's some room but not much more." Broadcasters, he says, traditionally lead the market back from recessions, and have their greatest gains early on.

Media brokers unanimously agree it is too early to judge the effect of the drop in the prime rate on station trading. There has been some loosening of money in the past couple of months, brokers report, but not enough to guarantee the trend will continue. Activity has picked up considerably with major-market swaps among big players like Metromedia, Gannett, Taft and Chronicle, but medium-market deals are still caught between expensive money and

sellers unwilling to take back paper.

Brokers and their clients, accustomed to years of double digit interest rates, are skeptical they will ever see single digit interest rates again. Brokers also find the floating loan rates that lending institutions charge are anathema and see no major station trading explosion until rates are fixed again. "The days of fixed-rate money are gone," believes Cincinnati broker Ted Hepburn, who said this makes buyers very cautious. To buy a station at "10 times cash flow doesn't pay with 15% prime," said Hepburn, repeating an observation made by other brokers. But Hepburn said he also has seen a growing "interest" the past six weeks from clients as slight breaks in interest rates have opened. "The boys are beginning to scratch their heads" at the prospect of affordable money, said broker Richard Crisler, Cincinnati, who does not advance predictions about which way interest rates will go.

It is the short-term loan rates that are falling, pointed out Howard Stark, a New York media broker specializing in major-market deals, but most buyers require loans tied to long-term rates that are still hovering above the prime at 17%-18%. Few have confidence interest rates will stay where they are or even go down, Stark said, and suggested businessmen might have a better idea of where rates are going after the upcoming elections when Federal Reserve policy should become clearer. Even if rates continue to fall, Stark said, companies are thinking in terms of 17% rates for the next 10 years.

Ron Ninowski, a Washington broker, said the prime rate is deceptive because many of the deals written require financing with prime plus two, which pushes rates up to 14% or above. "Clients are taking the back seat" as rates drop, Ninowski said, waiting to see if they will drop even further. Station trading could increase, Ninowski believes, if fixed rates in the 12%-13% range were established.

Frank Kalil, of Kalil & Co., Phoenix, is confident rates will drop further but does not foresee when.

Bill Chapman of Chapman Associates, Atlanta, said his feeling "is one of encouragement" that station trading wil pick up, although he is not convinced in terest rates will continue their downward trend. Money is slowly becoming available again, Chapman reported, with a half dozer banks this year approaching him fo prospective borrowers. Also, sellers are becoming a "little more realistic" about their asking price, especially in seller-financed deals where the seller is aware he must compete with a loan institution.

Brokers did not dismiss the lower rates out of hand, and most are convinced rates are at least not galloping in the opposite direction. Combining both caution and uncertainty, Richard Blackburn of Blackburr & Co., Washington, spoke for many "This may be the window to buy something. How long that window will stay oper I don't know."

Third time's a charm for Tribune-United

Joint venture wins 216,000-home Maryland franchise; promises 120 channels with first tier of 42 at \$1.50 per month; all homes will be passed

The joint venture of Tribune Cable Communications and United Cable Televisior Corp. continued its winning ways lasweek, picking up the cable televisior franchise for the wealthy Washingtor suburb (216,000 homes) of Montgomery county, Md. It was the third major triumpt for the year-old joint venture.

Tribune-United of Montgomery County, as the local incarnation of the joint ven ture is known, and the county must stil negotiate and sign a franchise agreement that would transform Tribune-United's promises into legal obligations. That process, according to county officials, is expected to take about two months.

The award of the 15-year franchise was made by County Executive Charles W Gilchrist, but, as Gilchrist said at a press conference in Rockville, Md., last Thursday afternoon (Oct. 14), his decision was based on a franchising record that pointed to Tribune-United.

Tribune-United was top rated in the preliminary and the final evaluation by the county consultant, Carl Pilnick of the Telecommunications Management Corp The venture was also recommended by the county's cable television project manager John Hansman, and by the Cable Television Advisory Committee, made up of county citizens.

Tribune-United has promised a firstclass system for the county, which, according to the 1980 census, is the seventh wealthiest community in the U.S with a per capita income of more than \$12,000 per year.

The residential system, which ultimately will pass every home in the sprawling county, will provide 119 channels of ser

Time Video Group continues financial leaps

Poor performance in forest products and publishing only served to highlight the surging gains scored by Time Inc.'s Video Group in the just completed third quarter. Over all, company profits from continuing operations dipped by 9.3% to \$35.2 million, 55 cents per share, on revenues that were up 8.5% at \$877 million. However, buoyed by subscriber growth in American Television & Communications cable systems and Home Box Office services, Video Group operating profits jumped 36.9% over those of the year-earlier quarter to \$47.1 million, and revenues there rose 36.2% to \$220.8 million.

Although company operating profits were down in the quarter, net income was up. Last year Time subtracted a \$19 million loss from discontinuation of the *Washington Star* from its operating profits to give it a net income of \$19.6 million. This year's \$35.2 million net, unreduced from operating profits, was up 79% from the year earlier \$19.6 million.

For the nine months, Time's net income of \$109.9 million (\$1.73 per share) was up 14.9% on revenues that rose 108% to \$2.4 billion. The Video Groups' \$117.1 million operating profit in the nine months was almost half the company's total operating profit of \$240.5 million; in the third quarter alone, video profits were 60% of corporate operating profit. The third quarter also saw a halt to the slight margin erosion in video operations that had been evident at Time in the first half.

County executive Gilchrist announcing the franchise award

ice. The first tier will contain 42 channels nd sell for \$1.50. The second tier of 84 hannels will go for \$5.95. And the third er, containing 119 channels, will cost abscribers \$8.95. Some of the channels n the second and third tiers are optional ay services, ranging in price from \$6.95 > \$8.95 per month. Cox's Indax videotext ervice will be available to all subscribers or \$4.95 per month.

In addition to the residential system, ribune-United has promised a dual, 440 thz institutional loop that will interconect the county's schools, hospitals and junicipal buildings.

Once a franchise agreement between ribune-United and the county is negotied and signed, the joint venture has said will begin wiring the county and finish ithin four years. Within 35 months of the signing of the agreement, most of the punty (95% to 98% of the population) ill have access to cable service.

Tribune-United has earmarked \$55 illion over the life of the franchise for apport of local programing. That money ill be administered by the Community elevision Corporation Task Force, a non-tofit group of interested Montgomery punty citizens, which will be formed to accourage the production of local programing.

At the press conference, Gilchrist said e was persuaded to go along with Triune-United primarily because of its lowost basic tier and its proposed universal ervice. "It is important to serve the rural reas as well as the urban," he said, "and is important to have a basic entertainnent and information service that, at 1.50 per month, is affordable by almost very household."

In tapping Tribune-United, Gilchrist rected the bids of other companies with a ubstantial number of local investors. iilchrist pointed out that the county made lear from the start that local partners ould not count for or against a particular pplicant.

The marriage of Tribune and United has roved to be a winning combination twice efore. It won the rights to wire a consorum of communities in Oakland county, lich. (104,000 homes) last summer and acramento city and county, Calif.

(360,000 homes) last month.

United's recent success in franchising, which includes winning several additional franchises on its own, has raised questions about whether United has the wherewithal to make good on all of its promises. Although admitting it is trying to bring in some fresh capital, United says it has sufficient cash flow and credit to wire the more

than 800,000 homes to which it has won the rights (alone or in tandem with Tribune) over the past year (BROADCASTING, Oct. 11).

Gilchrist said that his review of the franchising record indicates that the joint venture "has the financial strength and the track record to meet its commitment ..." He added, however, that the county will "establish effective oversight and enforcement of all commitments to insure that the cable company complies with all of its promises."

Although the rumors that circulated on Wall Street two weeks ago that United was on the trading block caused some alarm among county officials in Rockville last week, assurances from United President and Chief Executive Officer Gene W. Schneider that the rumors were unfounded assuaged their concerns (see "Cablecastings," page 8).

Following Gilchrist's action, Tribune-United's local franchising staff broke out the champagne and the balloons. "We are very proud," said franchise director Jane Simons, "that we won on the merit of our proposal."

Reagan's economy address riles President's critics

ABC refuses to air speech; Democrats use Riegle to counter, plan to file fairness complaint

President Reagan got his wish for free network time to address the public on the economy last week. But he also got a lot of argument from Democrats and other critics of his policies. And the controversy over his appearance has generated an unusual, if not unique, fairness doctrine complaint against CBS from angry Democrats who had opposed free time for the President in the first place.

CBS and NBC carried the President's 22-minute address live, beginning at 7:30 p.m., on Wednesday. So did two cable networks, Cable News Network and Satellite News Channel. But not ABC. ABC's News's Washington bureau chief, Ed Fouhy, said that, based on advance guidance from the White House, the speech 'didn't strike us as being of sufficient importance to warrant live coverage.'

To Democratic party officials in Washington, the President's assertedly nonpartisan remarks reviewing the nation's economy-several days after the highest unemployment figure since the Depression, 10.1%, was announced-was a blatant effort on the part of the White House to aid Republican candidates in the upcoming off-year election three weeks later. Accordingly, the officials-Charles Manatt, and the chairmen of the Senate and House campaign committees, Senator Wendell Ford (Ky.) and Representative Tony Coelho (Calif.) - urged the networks in telegrams to avoid a "precedent of network complicity in last-minute partisan

campaigning by the President."

Reagan sounded a number of points he had made in speeches seeking support for his policies and even used the line that has become a theme in the political commercials Republicans are running, "Stay the course." Those who carried the speech live justified the decision on the ground that the economy is the overriding issue in the country and that the public should have access to the President's views. But they also made sure the President did not have the broadcast forum to himself.

Contributing to the Democrats' expression of outrage was the knowledge the Republican National Committee had attempted to buy time for a half-hour partisan broadcast. At least one network, NBC, had been approached with a request for time on Oct. 13. It wasn't until the three networks turned the Republicans down for various reasons that the White House disclosed the President's plans for a speech on the economy and offered an invitation to the networks to cover it. Spokesmen at the White House and the Republican National Committee said the Republicans are still interested in purchasing time for a partisan speech, by the President. The President's speech on Wednesday did not fill that bill, those sources said.

The Democratic leadership nominated Senator Donald W. Riegle Jr. (D-Mich.), ranking member of the Senate Banking Committee and, Democratic officials said, a representative of a state suffering 16% unemployment, as their spokesman to respond to the President. NBC presented him in a five-minute address immediately

Reagan on CBS

Riegle on NBC

after the President concluded—("The course needs to be changed," Riegle said)—and just before the start of the second game of the World Series NBC was carrying, the cable networks also carried Riegle following the President.

But CBS chose to employ the Other Voices format it has used in the past in presenting contrasting views to a President's. For 30 minutes beginning at 11:30 p.m., Wednesday, it ran a series of such voices, including Riegle's, former Vice President Walter Mondale's and former President Carter's chief domestic adviser, Stuart Eizenstat.

The Democrats' selection of Riegle as a spokesman posed a problem for stations in Michigan since he is a candidate for reelection. NBC and CBS warned affiliates there they could incur equal-time obligations in carrying Riegle and therefore might prefer not to carry his portion of the broadcast. It wasn't clear how many NBC affiliates in Michigan did not carry the Riegle remarks. NBC reported only 15 stations did not carry the 7:30-8 p.m. program. CBS said two of its affiliates in Michigan that carried the President's speech did not carry the Voices of Opposition.

Although ABC had not carried the speech live or on tape, it contributed its bit to the dialogue through its Nightline program. It ran excerpts from the speech and invited comments from Mondale, whose appearance with anchor Ted Koppel had been taped in advance. Mondale, a likely contender for the Democratic presidential nomination in 1984, incidentally, was on a publicity roll as a result of Reagan's speech. In addition to his appearances on CBS and ABC on Wednesday night, he showed up for an interview on NBC's Today the next morning.

As for the networks' method of dealing with the President's speech, the Democrats were satisfied with NBC. The network had offered equal time on Thursday,

beginning at 7:30 p.m., but the Democrats preferred the time immediately after the President's remarks, even if it was less than equal in length. Gregg Schneiders, a party spokesman, said Reigle was able to "throw cold water" on the President's remarks. CBS was another matter. DNC Chairman Manatt said CBS was presenting "CBS's reply to the President," not the Democrats'. The Democrats were so angry at CBS the leadership called on all Democratic members of Congress to boycott the CBS program. Four Democratic senators canceled—William Bradley (N.J.), Alan Cranston (Calif.), Claiborne Pell (R.I.), and Christopher J. Dodd. (Conn.).

But that is of less consequence to CBS than the fairness complaint DNC lawyers—led by former FCC Chairman Charles D. Ferris and including two of his former aides at the commission, Frank Lloyd and Gregg Ballard—filed with the FCC on Friday. It invokes the so-called Zapple doctrine, which applies during political campaigns and holds that stations that offer free or paid time to political candidates are obliged to offer the same amount of free or paid time to their oppo-

nents for response. It creates what h been referred to as a "quasi-equal oppotunity."

The DNC contends that the Zapp doctrine applies to the President's speed because it was given in support of Repulican candidates for Congress. In effect then, each station airing the speech will giving free time to a supporter of Repullican candidates in its area—or so the suclaims.

To buttress its claim, the suit cites the Republican effort to buy time for a patisan address during the week in which the President addressed the country, three weeks before the elections; the absence of a national emergency that might warrant nationwide address, and the broadcast of the speech shortly after the announcement of painful economic news. The surface also notes that the speech echoed statements in past political speeches by the President and closed with the line from Republican commercials, "Stay the course."

"This," Lloyd said, discussing the conplaint, "is a unique case. No President hat ever done this."

Court reverses Eastern Microwave

Decision by New York circuit court closely follows current legislation, making passive resale carriers exempt from copyright fees

The line of judicial decisions in cases involving resale carriers that relay television signals to cable television systems took another turn last week. This time, the turn was in favor of the carriers—and was in line with language in copyright legislation now working its way through Congress.

At issue was the appeal of Eastern Microwave Inc. from the decision of a U.S. district court judge who had held that EMI, which distributes wor-TV New York's

signal to more than 600 cable systems to satellite and microwave networks, is liab for copyright payments to the producers of the programing (BROADCASTING, Marc 22).

But last week, the U.S. Court of Appea for the Second Circuit, in New Yorl reversed that decision. In a unanimous opinion, it held that under the terms of the copyright law now on the books, EMI is passive carrier and, therefore, exemple from payment of copyright fees.

The case grew out of the contention and Doubleday Sports Inc., owner of the Ne York Mets baseball team, that it is entitle to copyright payments from EMI for it

retransmission of Mets games that are broadcast by WOR-TV.

The case turns on what constitutes a passive carrier. The district court held that EMI did not fit that description, as contained in the law, since it selected WOR-TV's signals, exercised control over recipients of its retransmissions, and did not limit its activities to providing wires, cables or other communications channels for the use of others.

The decision was a cause of deep concern to resale carriers generally who saw themselves paying for programing they had been picking up at no cost. By the same token, it was welcomed by producers, who already received copyright payments from the stations as well as fees from cable systems based on their compulsory licenses.

The House Judiciary Committee, responding to expressions of concern from the cable industry and the resale carriers, made a number of changes in the law that

would in effect overrule the district court's decision. The changes are among those approved by the full House before the recess. But whether Senate action on the copyright bill will begin next month is questionable. The legislation is pending before the Commerce and Judiciary Committees.

Accordingly, the decision of the Second Circuit takes on considerable importance, assuming it survives. Lawyers for Doubleday, who have been arguing in court as well as before congressional committees that sports interests must have control over their product, last week said the decision on what course to take had not yet been made. David Lloyd, of Arnold & Porter, said the options included petitioning the court for rehearing, seeking Supreme Court review—and seeking relief from Congress, where sports interests are already working hard for amendments to the copyright legislation.

The members of the Motion Picture Association of America, who are interested bystanders in the case, were as disappointed with the decision as the sports groups. To Fritz Attaway, counsel for MPAA, the decision did not comport with reality. As for the court's basic conclusion, he said carriers like EMI "are as passive as

someone holding up a 7-11 store."

The three-judge panel, in an opinion written by Chief Judge Howard T. Markey, of the U.S. Court of Customs and Patent Appeals, who was sitting by designation, made these points in concluding that EMI is a passive carrier:

- EMI had only one transponder available for its extra-terrestrial services, so "naturally" sought to retransmit the signals of "a marketable station." In meeting the demand for wor-TV's signals, EM1 acts "passively, retransmitting exactly what it receives and the entirety of what it receives." The technical restrictions that forced EMI to make an initial determination as to the signals of a particular station do not evidence the "'control' ... intended to be precluded" by the Copyright
- The requirement of an absence of direct or indirect control over the particular recipients of [a passive carrier's] retransmission "is fully satisfied by EMI." The carrier, subject to FCC regulation, is bound to furnish its communications services on reasonable requests. And "the record indicates that no reasonable request for its services was ever refused by EMI."
- EMI only provides "wires, cables, or other communications channels for the use of others"-the cable systems receiving the signals of wor-Tv and other "originators." And the carrier is selling only its transmission services, not, as Doubleday contended, the Mets games. Cable systems pay EMI on the basis of the number of subscribers only up to a maximum of \$3,000, regardless of the content of the transmitted signals.

The court's holding that EMI is a passive carrier appears to run counter to the decision of another appeals court in a case brought by WGN Continental Broadcasting Co. That company complained that United Video was violating the copyright law when, in retransmitting wGN-TV Chicago's 9 p.m. news program, United stripped a teletext transmission from the vertical blanking interval and substituted material of its own. The U.S. District Court that heard the case rejected the complaint. but on appeal, the U.S. Court of Appeals in Chicago reversed, holding that United must carry the WGN-TV teletext material (Broadcasting, Aug. 16). United is seeking rehearing in that case.

But the appeals court last week noted that the court in the WGN case held that, "unlike" EMI, United "actively removed material inserted by wGN-TV into the 'vertical blanking interval' and substituted business news" and, thus, was not a passive intermediary.

Beyond the question of whether EMI is a passive carrier, the appeals court dealt with the congressional copyright policy that, the court believes, is aimed at assuring cable systems a variety of programing sources.

The court noted that "the centerpiece of the compromise reflected in the act is the compulsory scheme." And that scheme, it added, "presupposes a continuing ability of [cable] systems to receive signals for

distribution to their subscribers." Adoption of Doubleday's position, the court said, "would stand all copyright owners athwart that conduit between the original broadcast and the opportunity for subsequent performances by [cable] systems.'

Adoption of that position would also, in the court's view, enrich copyright owners to a degree not intended by Congress. If it were to impose a requirement that all intermediate carriers "negotiate with and pay all copyright owners for the right to retransmit their works, assuming such requirements were not impossible to meet, the court said, "such action would produce a result never intended by Congress, namely a substantially increased royalty payment to copyright owners with no increase in the number of viewers."

Century files suit against Ventura, Calif.

Present cable operator says new request for proposal violates company's constitutional rights

Century Communications Corp., the nation's 26th largest MSO, has challenged the authority of local municipalities to regulate cable television systems.

The Canaan, Conn.-based MSO filed suit against Ventura, Calif., in Los Angeles district court alleging in part that the city's demands for franchise fees and access channels and regulation of basic cable rates were infringements of its First and 14th Amendment rights.

The suit was percipitated by Ventura's decision to open up bidding for a new cable franchise, rather than merely renewing the franchises of the two companies that now provide cable service to the city-Century and Avenue TV Cable Service Inc.—and that are set to expire in 1983.

The suit also alleges that the city and its cable consultant, CTIC Associates, Washington, violated federal antitrust and racketeering laws and that the city breached its original franchise contract with Century, by not renewing it.

The city's new request for proposal, which was issued Sept. 3, makes demands that "deprive and restrict" its First and 14th Amendment rights, Century said. It pointed specifically to the city's proposal to regulate rates and its insistence on a five percent franchise fee and other noncash charges. "Century's ability to exercise its function as an organ of the press ... are inextricably bound up with and are dependent upon its capital expenditures, its annual expenses and its revenues," the complaint said. "Due to the inextricable bond between revenues and the ability to disseminate, city price controls in combination with other city-imposed financial burdens permit city control over the quantity, quality, content and form of Century's First Amendment dissemination." The RFP's requirements that Century

also carry access programing and mustcarry signals, it said, also would impinge upon Century's First Amendment rights.

Under the terms of the RFP, the complaint said, it would be forced to surrender constitutional rights merely to remain in business in the city. Century will not be allowed to operate in Ventura, it said, "unless it first agrees to be bound by the city's extensive oppressive and confiscatory new conditions, and unless it further agrees to waive all existing rights and be bound by [an] auction process which will exlude all cable television disseminators from the city who do not surrender rights."

The complaint also charged that CTIC Associates and the city violated the federal racketeering laws with its RFP. They have, in effect, the complaint said, "attempted to force [Century] to pay large sums of money and convey valuable property and service to ... the city and through the city to CTIC Associates ... by threatening to unlawfully injure [Century's] existing property and business ... if said payments are not made."

The city violated the federal antitrust laws, the complaint said, by using its control of the city's rights of way "to control and suppress competition among First Amendment speakers and by taking actions that would exclude Century" from the cable television business in Ventura "unless it accepts anticompetitive contracts and contract-award procedures." The city also uses its control of the right of ways, it said, to award the franchise to a "de facto monopolist" and exert monopoly power over cable in the city to "exclude competition and control prices."

The complaint also claims that Century's original contract with the city provides for renewal on the same terms and conditions. "Century's investments were made with the expectation that it would be entitled to continue to operate, to compete and to rely upon the express renewal clause in its contract."

Ventura city manager John Baker and CTIC Associates Henry del Castillo, who was named specifically in the suit, declined last Friday to comment on the suit until they had a chance to see it.

Britain's cable report is released

Hunt study recommends no blocks on foreign programing and few government regulations

Cableless Great Britain should build a cable TV system that offers the maximum in channel selection and the minimum in government regulation. There should also be no limits imposed on showing foreign programing and franchisees should be under "no obligation of impartiality or balance on individual channels except in news," said the report.

Those recommendations came from the Hunt Committee report, chaired by Lord Hunt of Tenworth, who was charged last April with heading a committee to come up with a plan for a national cable TV system. Currently Britain has cable TV only in certain rural areas beyond reach of broadcast stations and with a couple ex-

perimental systems.

The Hunt Committee also recommended a new central cable authority be set up to award franchises and exercise general oversight, although once the franchises are awarded it should "remain in the background." Heavy supervision and regulation of cable TV, the committee felt, would stifle potential creativity that the increase in channels are hoped to offer. To get cable TV off the ground and keep it flying, the committee urged customers be charged equipment rental and some channels be offered on a subscription basis. To insure that the franchises be self supporting, the committee urged the establishment of advertiser-supported channels. Advertising, as well as programing, should not be subject to government regulation. as currently is the case.

And while subscription channels should be permitted to show X-rated movies if the channel is equipped with an electronic lock-out device to control viewing, programing in general should follow the same level of "decency" required of all other British Broadcasting Corp. and Independent Television services. Franchises need only be awarded to cable operators, and not to programers or suppliers. The committee stressed, however, that channels should be made available for leasing, and there also should be some requirements concerning educational, public access and

children's programing.

To insure that existing services will not be severely damaged by the increase in channels made available by a new cable TV system, the Hunt Committee proposed several safeguards:

 All BBC and ITV services must be carried.

Restrictions of exclusive cable rights for certain major sporting events should be established.

■ A temporary ban on pay-per-view services should be imposed.

■ A system of oversight designed to ensure that cable lives up to its promises and that complaints directed to it are

Delco finishes AM stereo tests

After examining Magnavox, Motorola and Harris and getting turndowns from Kahn, Belar and Fisher, GM subsidiary expects recommendation to be announced in 3-4 weeks

The Delco Electronic division of General Motors Corp. finished its testing of proposed AM systems last Friday (Oct. 15) and expects to recommend a system to the GM car divisions in three to four weeks. The tests were completed, according to Delco spokesman William Draper, after a final invitation to submit to testing drew a negative response from one proponent, Kahn Communications Inc. and no response from two others, Belar Electronics Laboratory and F. T. Fisher & Sons.

The three systems tested by Delco were those proposed by Magnavox, Motorola and Harris Corp. After tests on the Harris system were completed Oct. 11, Delco informed the three remaining proponents its special authority from the FCC to test proposed systems at WIRE(AM) Indianapolis would expire on Friday, Oct. 15, but that an extension might be requested if any other proponents decided to participate in the tests.

By Friday, Delco had received word only from Leonard Kahn, president of Kahn Communications, who said he'd been advised by his attorneys and by supporters of his system in the broadcast industry to avoid participating in the tests.

"The FCC, in listing the 'primary actors' in the marketplace, placed the broadcaster first and the receiver manufacturers last, after the system proponents," said Kahn in a letter to Delco. "The broadcasters, who are experts in evaluating new

broadcast developments, are best qualified to decide which broadcast techniques they will utilize."

Another problem with the Delco tests are the possibility of antitrust litigation, said Kahn. "The fact that GM attorneys share, at least to some extent, our fears that your present activities may violate antitrust laws is proven by their refusal to grant Hazeltine and Kahn Communications immunity and hold us harmless against antitrust litigation if we were to participate in your tests."

Kahn Communications and some of its supporters in the broadcast industry "are not convinced that the prior official statements made by Delco, both in writing and orally, to the FCC in support or other proponents will not bias your tests," said Kahn. The company also is concerned about Delco's failure to "provide proper engineering reports to the FCC" during early car reception tests of the Magnavox system, he said, and it questions why Delco permitted only brief, unrecorded testing of car radio reception during field tests by the National AM Stereophonic Radio Committee.

"I believe that within a few short months the AM broadcasting industry will complete its selection of a single stereo system," said Kahn, who promised to "cooperate fully" with Delco and others.

Broadcast engineering experts have been divided on the question of whether Delco's tests will have a real impact on the search for a standard in AM stereo. Although some believe, as does Kahn, that the industry will eventually settle on a system, others maintain that route will take too long and that interest in AM stereo broadcasting would wane and die before a standard is found.

heard, should be set up.

The Hunt Report next goes to various cabinet ministers for consideration and debate in Parliament. According to a Department of Industry spokesman, estimates to construct the over 37,000-mile cable system, which would wire about half of Britain, are over \$5 billion. He said the cabinet ministers could reach a decision on the Hunt Committee's recommendations and those supplied by others on whether to go ahead with a plan for a national cable TV system by the end of the year. The Thatcher government is said to support the idea because it will provide needed employment and capital to Britain's slumping economy. There are no estimates as to when construction could begin because ministers are undecided about how much regulation is needed, the spokesman added. The spokesman said that Lord Hunt has asked the government to make its intention known regarding cable TV legislation so it can be introduced in the next session of Parliament. "Quite honestly, no one knows at the moment, not even the ministers, just what they will want to do and decide . . . other than to say that there is a strong inclination in the government to go ahead," the spokesman said.

Disney Channel in double shuffle

Pay-cable service offices to be moved from New York to Burbank with Wagner out as president and Jimirro as interim leader; parent company forms corporate committee with eye to Miller becoming Disney chairman next year

Walt Disney Productions announced last week that it is moving the offices of the Disney Channel, a pay-cable service to be launched in April 1983, from New York to the company's Burbank, Calif., studios. Alan Wagner is out as president, but is negotiating with the Disney people about a consulting post in connection with the

Disney Channel.

Jim Jimirro, executive vice president, telecommunications for Disney Productions, said that the chief executive officer's post for the proposed pay service may not be filled for some time, if at all. "Alan won't be replaced in the strict sense of the word," Jimirro told BROADCASTING. adding that Disney "will fill the gaps" with company executives currently based on the West Coast. And with all the talent Disney now possesses on the coast, combined with the fact that the pay channel is a project now totally controlled by Disney, Jimirro said now "is not the time to reach for a high visibility person" like Wagner. In the meantime, Jimirro assumes interim leadership of Disney Channel activities.

Wagner was offered the opportunity to relocate to the West Coast retaining the Disney Channel presidency-an opportunity

Chrysler moves. Spokesman for Chrysler Corp. said last Thursday (Oct. 14) that published reports saying the Dodge car and truck account was being assigned to BBDO were "purely speculative." He said a decision on a new agency probably will be made sometime this week. The account, which bills more than \$100 million annually, with about 65% in broadcast, is now at Kenyon & Eckhardt, K&E has had the entire Chrysler Corp. business, billing about \$250 million, since 1979. Chrysler notified K&E several months ago it wanted to add a second agency to handle the Dodge car and truck account. K&E will continues as agency for Chrysler and Plymouth Cars and Chrysler corporate, billing about \$150 million.

that he declined because of "personal and emotional ties" to the New York area. And while he described Disney's decision to consolidate the cable channel operations on the West Coast as personally 'painful,' he noted that it didn't exactly "come out of the blue. It was certainly in the cards since the divorce," he said, a reference to Disney's decision last month to deal Group W Satellite Communications out of the Disney Channel picture (BROADCASTING, Sept. 13).

Wagner and others within the Disney Channel's New York offices denied that Disney had taken a "Saturday Night massacre" approach to shutting down that office. It was during a "rather quick" meeting with Disney executives on Wednesday night that Wagner and Jeff Grant, executive vice president of the Disney Channel, were informed of the consolidation plans. "There is no good way of doing it," said Wagner, but the Disney people "are trying to be as decent as anybody can" in this type of a situation.

Disney is negotiating with one executive from the New York office concerning the possibility of staying on with the pay channel and based in the east—Barbara Ruger, vice president, marketing, for the Disney Channel. "I'm still talking with them" on

that possibility, she confirmed.

In another development last week, Disney announced the formation of a corporate management committee to develop policy and direct operations. A company spokesman confirmed the accuracy of reports that the move was in preparation for the likely succession next year of Ronald W. Miller, currently president and chief operating officer of Disney Productions, to the top Disney post, replacing E. Cardon Walker, stepping down as chairman and chief executive officer.

With dissolution of partnership with Group W went two transponders Disney needed for its service; agreement with Wold will provide cable programer space on same bird for which it was scheduled, Westar V

Wold Communications, Los Angeles, leased two transponders on Westar V and then turned around and subleased them to Walt Disney Productions for the distribution of The Disney Channel, a pay cable service slated for launch in April 1983.

The deals give Walt Disney the two transponders it needs for East and West Coast feeds of its programing, which will be a mix of vintage Walt Disney features and original productions.

As originally conceived, the Disney Channel was a joint venture between Walt Disney and Group W Satellite Communications. Under the multifaceted agreement binding the two companies, Group W was to have supplied two Westar V transponders needed for distribution. When the joint venture fell apart and Walt Disney decided to go it alone last month, it was forced to go out and find the necessary transponders on its own.

Wold leased one of the transponders, 6X, from American Satellite Co., the joint venture of Fairchild Industries and Continental Telephone Corp. that holds a 20% interest in the Westar satellite system. The major resale carrier leased the other, 5X, from TCI Development Corp., a subsidiary of Tele-Communications Inc., the Denver-based MSO that had earlier leased the transponder from American satellite.

That the Disney Channel will still be on Westar V despite the breakup keeps alive the hopes of other cable programers on the satellite that it will ultimately emerge as the industry's second cable programing satellite, a companion to RCA Americom's Satcom III-R and the focal point of thousands of cable earth stations. The other Westar V cable programers include Group W's Satellite News Channels 1, Black Entertainment Television, superstation wor-Tv New York, and, starting next year, the UTV Network, the Nashville Network and SNC II.

In its agreement with American Satellite, Wold also obtained the rights to lease from American Satellite two additional transponders on ASC-1, the first of two domestic satellites American Satellite will launch in 1985, or two additional transponders on Westar V, 5D and 7D, also in 1985.

All four of Wold's new transponders the two it leased to Disney and the two for which it obtained the future rights—are protected, which means that should they fail their users will be shifted to another transponder.

With the latest deals, the Wold transponder inventory rises to 11. Wold uses three of its four transponders on Westar IV for occasional traffic and subleases most of the fourth to SelecTV for distribution of its pay service. In addition to the two transponders on Westar V it is subleasing to the Disney Channel, it is subleasing one to Eastern Microwave, which distributes wor-TV. Its two transponders on AT&T's Comstar D-3 are subleased to ABC and CBS.

Networks suffer through third week of football strike

NBC drops CFL; ABC, CBS air variety of sports programing: TBS all-star games set

The third weekend of the NFL players strike (Oct. 9-10) resulted in more dismal Sunday ratings for CBS and NBC, with more of the same for ABC (to a lesser degree) during its Monday 9 p.m.-midnight slot which the network has been filling with its cache of acquired films. Meanwhile, the Turner Broadcasting System was preparing to carry the first two in a planned series of all-star games put together by the National Football League Players Association, scheduled for yesterday and tonight.

NBC decided to "suspend" for at least two weeks, its coverage of Canadian football games, and, like just about everybody else in the scenario, is hoping that the strike will be settled in that time. NBC earned a 2.5 rating and a 5 share for the Canadian Football League game it aired on Oct. 10. The year before it earned a 13.7/35 for the NFL contest it carried.

In place of CFL football yesterday, NBC planned to air an expanded edition of NFL '82 from 12:30 p.m. to 1:30 p.m., and then a sports special featuring taped coverage of the Charlotte 500 stock-car race, and two live boxing matches originating from Atlantic City, followed at 4 p.m. with World Series coverage (game five).

CBS intended to anchor its Sports Sunday special yesterday (1 p.m.-4:30 p.m.) with four boxing contests (all different from the NBC bouts) from Atlantic City, of which at least two were to be live and shown in their entirety. Also featured were taped coverage of "The Great Pool Shootout" from Atlantic City, and the Mr. Universe contest, taped the preceding week in Bruges, Belgium. Live reports and interviews from Milwaukee on game five of the World Series were also scheduled. Developments in the NFL strike were scheduled for NFL Today (12:30 to 1 p.m.) prior to the Sports Sunday program. CBS's Oct. 10 edition of Sports Sunday earned an 8.1/24, compared with the 15.1/35 that the network averaged for an NFL doubleheader the year previous.

The majority of CBS advertisers were reportedly staying with the substitute programing, with all spots sold out and priced between \$40,000 and \$50,000. Those that did not were either shifting to other dayparts or holding out for future sporting events. By and large though, advertisers were accepting the alternative programing "and paying the relative worth," said Paul Isacsson, vice president in charge of sales for CBS.

ABC substituted the film, "Starting Over," one week ago in the usual Monday night football slot, which received a

14.3/22. That compared with the 20.6/33 score that the Miami-Buffalo game accrued one year before. Tonight ABC will air Monday Night Football Superstars, during which 12 professional football players will compete in seven of 10 events for a \$20,000 first prize.

An ABC spokesman said that some of the Monday night football advertisers have opted to place their spots in other programing while some have chosen to stay with the substitute programing. Tonight's Football Superstars contest is sold out, commanding a 30-second spot price of \$110,000, slightly more than the \$100,000 the network was charging for spots in substitute movies and \$40,000 less than a comparable spot in a Monday night football contest.

As to TBS's planned all-star games, at press time the federal district court in Buffalo had not acted on a petition by the NFL Management Council and several team owners to enjoin Turner from carrying those games. And in Washington, the appeals court there insured that the players could participate legally in at least the first two planned contests by deciding not to hear arguments on the matter until this Wednesday (Oct. 20).

Turner Network Television, the ad hoc

network that TBS has set up to feed particinating over-the-air television stations. has signed up stations in 95 markets covering 74% of the nation, including 17 of the top 20 markets, the exceptions being Seattle/Tacoma, Denver and Baltimore, all of which support NFL teams. New Orleans is the only other market with an NFL franchise that is not covered.

So far, 71 network affiliates are committed to carry the planned games, including 34 ABC affiliates, 23 stations aligned with NBC and 14 with CBS. Add to that 24 independent stations, and the total number of TNT affiliates, as of late last

week, equaled 95.

The game scheduled for yesterday was to have been played at RFK Stadium at 1 p.m., between players representing the Eastern divisions of the National and American Football Conferences of the NFL. Tonight's game, starting at 9 p.m. (NYT) is scheduled to be played at the Los Angeles Coliseum between players representing the Western divisions of those two conferences.

TBS remains tight-lipped about advertising commitments, other than to reaffirm sponsorship by Chrysler Corp., which first became known several weeks

GE's 2-for-1 proposition

New Comband technique puts two television signals into one channel: cable use seen as an immediate market

It's hard to make something out of nothing, but that's precisely what General Electric Co. claims to have done.

The GE television division announced last week the development of Comband, a system for squeezing two television signals into one conventional mhz television channel or, more simply, creating two channels where there had been one ("Closed Circuit," Oct. 11).

Although the system is being packaged initially for cable television, according to GE, it is applicable to all television media, including broadcasting, STV, MDS, and satellite and microwave links.

By installing a Comband encoder at the headend and Comband converters in subscribers' homes, according to GE, the cable operator can quickly and relatively inexpensively double the capacity of his own system.

(He will not be able to double the number of services, however, since FCC and copyright rules prohibit the altering of must-carry broadcast signals. A cable operator with a 12-channel system and four must-carry signals, for instance, could add only eight additional nonbroadcast services by installing the Comband system.)

If Comband is everything GE says it is, it will have a profound impact on the economics of cable. "The Comband system provides an alternative to expensive conventional upgrading techniques," Jacques Robinson, vice president and general manager, GE television division, said in a prepared statement. "It could also reduce construction costs in new cable systems. since a single cable with the Comband system has the potential for delivering as many channels as a dual cable system using conventional techniques."

Although other television bandwidth compression schemes and channel doublers have been marketed, none have been as inexpensive to implement as GE claims Comband is. According to GE's Tom Tucker, Comband's product manager, the system's addressable converters will cost about 50% more than conventional ones. Instead of costing \$140, he said, the Comband converters may cost \$200.

The key to Comband's low cost, Tucker said, is its use of analog rather than digital compressing techniques. By eliminating the redundancy in adjacent television lines, he said, Comband can squeeze onto one line the picture information that is normally contained on two. Two television pictures can then be transmitted on alternating lines of a single television signal.

What's the tradeoff? The Comband reduces luminance bandwidth of the television picture from 4.2 mhz to about 3 mhz, Tucker said. But, he added, the reduction in luminance bandwidth has minimal effect on the quality of the pic-

Cable operators will get a first hand-look at the Comband technology and the Comband equipment next month at the Western Cable Show in Anaheim, Calif.

The ABC News World News Tonight is now "closed-captioned" nationwide.

Without the box on top, the box on the bottom is meaningless to 16 million Americans

Thanks to the TeleCaption Adapter, the hearing-impaired can finally understand what most of us take for granted.

This remarkably sophisticated device decodes special signals broadcast by ABC, NBC, PBS, and several cable networks. The decoded signals then appear on the screen as subtitles - or "closed captions" - so that the hearingimpaired can "hear," too.

What programs are they "hearing"? Just look in TV Guide and you'll find

"C.C." next to news broadcasts, sports events, movies, comedies, and children's shows. Each week, there are approximately 40 hours of closed-captioned programming in all.

Even advertisers are sitting up and taking notice. Over 175 smart companies are now closed-captioning their TV commercials.

Of course, without a TeleCaption Adapter, a hearing-impaired person is still missing out on the excitement. And that's where Sears comes in.

Our job is to help get TeleCaption Adapters into the homes that need them most. We've gladly agreed with the National Captioning Institute to offer the adapter. And we sell it for just \$279.

Closed-captioning is a major breakthrough for America's You can count on 16 million hearingimpaired citizens. And we at Sears are

proud to do our part. Sears, Roebuck and Co. 1982

The New LE Benchmark

Improved In Four Important Ways!

No. 1 Cart Machine

Today, one out of every two broadcast cartridge machines purchased worldwide is an ITC Premium Line machine. Now, four new features make this first-choice line an even greater value.

Improved Frequency Response

The head is new. The open-faced design is cylindrically shaped rather than hyperbolic. MuMetal laminations are surrounded by epoxy filler impregnated with aluminum oxide particles for shielding and durability. Core windows are wider than conventional designs. The end result is

greatly improved frequency response without low end humps and bumps.

New Cart Hold Down

New Head Design

Removable Head Module

True center pivot design. Azimuth, zenith and height adjust independently. Locking one does not affect the others. Steel ball pivots and longer azimuth arms permit finer tuning.

Improved Tape-Head Alignment

New cartridge positioning system assures precise, rigid alignment of tape to head even when insertion is hurried or careless.

Long-Life Pressure Roller

The 525K pressure roller offers twice the pulling power and extended life. Tolerates

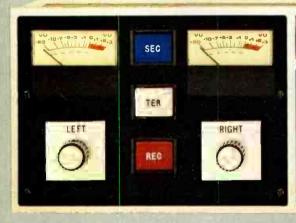

common cleaning chemicals. Holds its durometer even in high humidity.

A NEW DEPARTMENT ABOUT RADIO

Election action

The NBC Radio Network plans to broadcast 11 hours of live continuous coverage of the 1982 general elections-more coverage than the network has provided in any previous election year, according to Jo Moring, vice president, NBC Radio News. Anchoring the coverage from 6 p.m. until midnight on Tuesday, Nov. 2, will be NBC News Correspondents Cameron Swayze and Peter Hackes. From midnight until 5 a.m. Wednesday, anchors will be Ann Taylor and Russ Ward. Coverage will include reports on the progress of 36 gubernatorial and 33 senatorial races, NBC News projections of winning candidates, vote tabulations and analyses of various races. A modular format will allow stations to use as much or as little of the coverage as they wish, according to

Thursday night live

WQXR-AM-FM New York filled its 189-seat concert theater for the first performance of its live-on-the-air series, the *Dubonnet Chamber Music Festival*, which premiered Thursday, Oct. 7. To be broadcast on the first Thursday of each month, the series is the first to be regularly scheduled from WQXR's concert theater in more than 10 years, according to station president and general manager, Walter Neiman. WQXR has had its own concert hall since the station

was built 35 years ago and until about 10 years ago had its own string quartet, which performed live on the air regularly. Since then, the concert hall has been used mainly for special event performances and program production, according to Neiman, who said national syndication of the Dubonnet Chamber Music Festival is possible at some future date. Scheduled to perform in the series are the Chamber Music Society of Lincoln Center, the Pro Arts Chamber Orchestra, the Cantilena Chamber Players, the Waverly Consort, the American Brass Quintet, the Canadian Brass and the Cleveland Quartet. Robert Sherman, program director at WQXR, produces the series.

Listening levels

The growth in FM listening seems to have leveled off in 1982, with only a 0.2% increase registered in the top 10 markets, according to figures compiled by Arbitron. Based on the spring 1982 Arbitron survey, the new figures show that FM listening, on average, represents a 55% share of all listening in the top 10 markets. The average FM station's share of listening in those markets remained at 3.1 in 1982 while the average AM share dropped from 2.7 in 1981 to 2.5 this year.

Washington was in the forefront of top 10 listening in 1982 with a 66.8 share, a jump of 1.7% followed by Dallas-Fort Worth with a 66.7% share. The survey showed Chicago

with the highest share of AM listening, with 43.4%, followed by Pittsburgh with 43.2%. Pittsburgh showed the largest FM growth in 1982, with the FM share of listening climbing to 47.7% in 1982 from 43.8% in 1981.

Country roads

A national guide to 1,200 AM and FM country radio stations, arranged according to their location and proximity to interstate highways, has been published by Logos Unlimited, Ypsilanti, Mich., in a joint marketing effort by Dodge Trucks and 46 stations in the West, Midwest and South. Paid for by the Dodge truck division of the Chrysler Corp., the 1983 Country Music Radioquide is being distributed free in Burger King, Kentucky Fried Chicken and Arby's restaurants and 7-11 stores. The 46 participating country radio stations are promoted on the front, back and inside for the single-page fold-up guide and, in exchange, promote it on the air. Kenyon & Eckhardt Advertising Inc., Detroit, created the campaign, for which 3,250,000 guides were released on Sept. 15, in time for the Country Music Association's Country Music Month, October. Stations participating in the campaign include WOXI(FM) Detroit; KIKK-AM-FM Houston; KRAK(AM) Sacramento, Calif.; WHOO-AM-FM Orlando, Fla., and KZLA-AM-FM Los Angeles.

Creativity in conference

"The Sound of Creativity" is the theme of a four-day conference on radio production to be held Dec. 16-19 at the Asilomar Conference Center in Pacific Grove, Calif. Sponsored by Audio Independents Inc., San Francisco, the event is meant to bring together independent producers, station program directors, network programers and syndicators and is expected to draw more than 300 people, according to AII executive director, Michael Toms.

Featured speakers will include Tom Lopez, president, ZBS Media, New York; Randy Thom, soundtrack producer for a number of major films, including "Apocalypse Now" and "Star Wars," and Jim Cameron, founding news director of NBC Radio's young adult network, The Source, and now head of his own production and consulting firm, Cameron Communications in New York. Workshops are to address such topics as funding, marketing, women in broadcasting, documentary production, satellite technology, cable audio, radio drama and children's programing. Audio Independents is a nonprofit organization created to support independent radio

WOXR's concert theater

Radio classroom. "How to Break into Radio: A Learning Experience," was the topic of a seminar sponsored by WHFS(FM) and Career Connections Inc., both of Bethesda, Md. The day-long primer in radio examined many facets of the business and featured representatives from the field.

Jake Einstein, executive vice president and general manager of whis (at the podium) and originator of the seminar, kicked-off the day's activities for the 107 participants who paid \$65 to attend.

He noted that the seminar drew a mixed crowd, some of whom are already in radio, and those anxious to break into the industry.

The seminar was a success and the results of a survey conducted there showed an interest in holding more. Whis plans to sponsor another one, on engineering and news announcing, in early December.

Topics discussed included how to get a first job in radio, advertising, news, on-air announcing sales, management and resumes. Eleven speakers, many from other stations in the Washington market addressed the group. They included:

Bob Duckman, music director, wash(FM) Washington; Jamle Bragg, news anchor, wtop(AM) Washington, and Evelyn Sellers, administrator of affirmative action and employee service, wRC(AM)-WKYS(FM) Washington.

producers with distribution, marketing, access, fund raising, professional development and public education.

Some from the heart

A series of 26 half-hour programs "exploring human spiritual growth from a nonsectarian perspective" are being made available to commercial radio stations for the first time beginning next month through the Longhorn Radio Network of the University of Texas-Austin. According to David Freudberg, who produced Kindred Spirits for the Boston-based Public Media Foundation, the essays in sound" examine how people cope with change during their lives and how they develop spiritual values. Each program focuses "on those who have found meaning and strength in the various spiritual traditions as well as through life's circumstances, and those who face the challenges of aging, illness, or adversity."

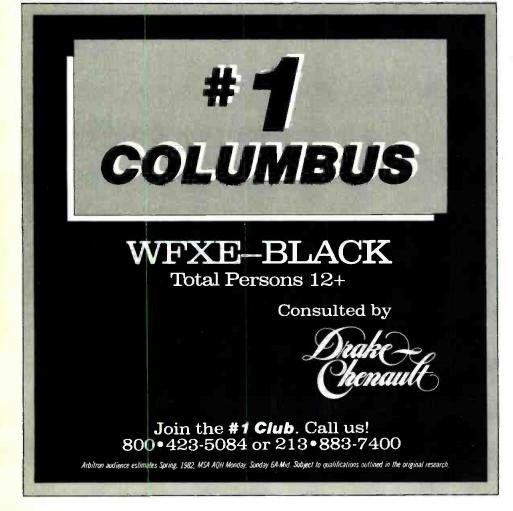

The series was broadcast last year by more than 100 noncommercial outlets. Among those whose "spiritual quests" are featured in the series are boxer Muhammed Ali, editor Norman Cousins, author Elisabeth Kubler-Ross, the Dalai Lama of Tibet, and consultant on aging Lois Harris. Independent producer Freudberg, formerly a regular contributor to National Public Radio's All Things Considered, traveled as far as Sri Lanki (Ceylon) and West Germany to conduct interviews for the series. "Kindred Spirits" is located at P.O. Box 777, Cambridge, Mass. 02139.

Carson and comedy

Johnny Carson, star of NBC-TV's Tonight Show, will host a two-hour comedy special on the NBC Radio Network, to be offered to affiliates the weekend of Nov. 19-21 and repeated on Thanksgiving Day, Nov. 25. A Half-Century of NBC Comedy is to be a retrospective of great comic performances and will utilize both the radio and television archives of NBC. Among the comedians whose work will be highlighted are Will Rogers, Groucho Marx, Eddie Cantor, Ed Wynn, W.C. Fields, Jack Benny, George Burns and Gracie Allen, Bob Hope, Abbott and Costello, Edgar Bergen and Charlie Mc-Carthy, Milton Berle, Bob and Ray, Steve Allen, Bill Cosby, the troupe from the program That Was the Week That Was, Flip Wilson and members of the cast of NBC-TV's Saturday Night Live.

Latin American grant

The National Endowment for the Humanities has awarded National Public Radio \$325,000 to produce a 13-part radic series called Faces, Mirrors, Masks: 20th. Century Latin American Writers. The series will comprise half-hour programs combining music, on-location interviews and excerpts from novels, poems and essays written by a variety of Latin American authors. Some of the authors to be featured include Gabriel Garcia Marquez, Carlos Fuentes and Jorge Luis Borges. The program is tentatively scheduled to air in late 1983.

IF YOU THINK IT'S JUST ANOTHER TALK SHOW... YOU HAVEN'T HEARD THE TALK!

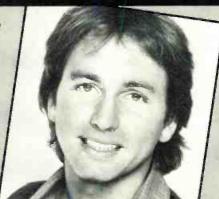

"I've enjoyed every second of it!
You're a very interesting man!"
—Peter O'Toole

"How do you know all this stuff?
That's what I'd like to know."

—Gene Wilder

"This is my life! Who is behind the curtain Brian?... You know everything!"—John Ritter

"You are great Brian... He is the best talk show person in the world! You just give more thought and you give more life to people and more ideas and it's such a joy." —Candice Bergen

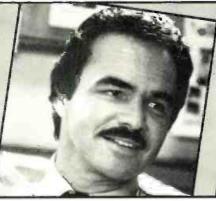

"Has anyone ever known as much about what they're doing before they talk as much as you? You're incredible. You've got 'em all nailed."—Jack Lemmon

"You have been listening down the drainpipe. You know an awful lot about me and I'm getting very agitated here. What else are you going to spring on me?"—Bette Midler

"How do you know all this stuff? Wow!"—Dustin Hoffman

"God, you're a good interviewer! You just hit nerves! I'd like to come and lie on your couch sometime."

-Burt Reynolds

"You are a gold mind of information."—Jill Clayburgh

Inehan Ompany

Sylvester Stallone called to ask if he could be on his show.

Rudolf Nureyev chose it as one of only two TV appearances he made in sixteen years.

Gene Hackman refused all North American interviews for a decade except his show.

Stars you seldom see on TV are truly "at home" here. Guests like Woody Allen, Jane Fonda, Diane Keaton, Clint Eastwood, Patricia Neal, Meryl Streep, Liv Ullmann, Fred Astaire, John Travolta, Maggie Smith, Harry Belafonte, Angela Lansbury, Warren Beatty, George C. Scott and hundreds of others.

Why do they love "Linehan and Company"? Because the host makes them feel like talking. Really talking. About themselves, their work, their problems, their secrets...about everything.

Brian Linehan has already achieved

such incredible popularity on Canadian TV that he has been called the foremost interviewer ever on television.

But Brian does *more* than interview. He conducts a gentle, intimate probing with a fascinating rapport that becomes magically addictive to viewers. He gets *facts*. Not idle chatter.

Now discover this special programming excitement for yourself! King Features proudly offers 130 new shows ready to power-up your numbers beginning January, 1983. A package so extraordinary that you should not buy any other show with any other man...until you see "Linehan and Company" with Brian Linehan!

There is simply nothing else like it on TV. The ratings potential goes beyond and above them all!

The series that gets the guests others can't The host who asks the questions others don't

Programings

It's CBS again

Network wins prime time ratings race for second week of new season; ABC again is second, NBC third

CBS-TV made it two in a row.

After a "premiere week" victory (BROADCASTING, Oct. 11). CBS continued to hold onto prime time honors during the second week of the 1982-83 season.

CBS averaged an 18.6 rating and 30 share to ABC-TV's 18.1/29 and NBC-TV's 15.2/25. That was about the same point spread that CBS and ABC had a week earlier, with NBC still deep in the basement

All three had higher ratings than during the season's first week. Week one ratings and shares totaled 49.6/81; week two, ended Oct. 11, brought 51.9/84.

Ratings comparisons, and indeed, trend forecasting, remained difficult however. Baseball interrupted the three-network series competition as ABC offered American (Milwaukee vs. California) and National (Atlanta vs. St. Louis) League playoff action on five nights. On Sunday, for example, an American League runover scored the week's highest rating, 25.3/43 from 7-8 p.m., knocking CBS's 60 Minutes out of its usual leadership position.

That's Incredible (15.2/24) was the only regularly scheduled original series episode on ABC's schedule. "Coal Miner's Daughter" (19.2/30) substituted for NFL Monday Night Football and on Friday, after rainout baseball coverage for a half hour, ABC suffered with unpromoted repeats of Benson (9.6/18) and Greatest American Hero (6.5/11) and a special Fall Guy episode (9.6/17), that fell to the bottom of the ratings. Other than that it was baseball with the five prime time telecasts averaging a 20 rating.

Five series premiered during the week. Four were on CBS. The leader was CBS's Simon & Simon (24.8/36), second in the week's ratings only to the Sunday playoff runover. Simon & Simon's return on Thursday at 9 p.m. was tied to the CBS hit preceding it, in effect a two-partner with Magnum P.I. (22.8/36).

On Wednesday, CBS launched Alice (15.3/23), Filthy Rich (16.5/25), which lost to both ABC baseball (19.4/31) for the entire game and NBC's Facts of Life (19.5/30) and Family Ties (18.1/28). CBS's new Tucker's Witch couldn't beat baseball but did overtake NBC's Quincy,

M.E. (15.2/27).

The week's other premiere was NBC's CHiPs hour (17.1/26) which fell to baseball (21.0/32) but beat each half hour of CBS's Archie Bunker's Place (16.0/25)

and Gloria (17.5/26).

None of the new shows this season registered in the "First 20" ratings list. Highest rated of the newcomers was NBC's Family Ties, ranking 22d of 63 programs. The lowest also was in NBC's camp, Voyagers (10.3/17), ranking 60th.

While NBC continued to have ratings problems, it was able to see improved share levels for almost all of its series over their "premiere week" performance. Thursday night's *Cheers* (14.7/22) and *Taxi* (15.2/22) were low scoring but not as low as their earlier 9.6/15 and 10.9/16. NBC's *Knight Rider* performed well, reaching a 17.2/30 against CBS's *Dallas* (23.1/40).

Among the week's top-10 rated programs, CBS had six series and a movie and ABC had three baseball games. The top-20 positions—10 for CBS, eight for ABC and two for NBC—follow:

ABC's American League Championship runover (25.3/43); CBS's Simon & Simon (24.8/36), Dallas (23.140), Magnum P.I. (22.8/36); and Bare Essence movie part II (22.4/36); ABC's National League Championship game four on Sunday (21.0/32); CBS's One Day at a Time (20.9/30); ABC's American League game on Tuesday (20.6/33); CBS's Jeffersons (20.5/30) and Falcon Crest (20.3/37):

ABC's National league game on Thursday (20.0/31); CBS's Bare Essence part I (19.7/31); NBC's Hill Street Blues (19.5/31) and Facts of Life (19.5/30); ABC's programs show on Sunday (19.4/32), and "Coal Miner's Daughter"

Drop documented. Although a number of agencies have documented a drop in prime time network household audiences as a result of cable television viewing, an analysis by Doyle Dane Bernbach shows that prime time network target audiences have declined at a greater rate.

DDB reports that between 1980-81 and 1981-82, network affiliates experienced a 6% drop in prime time household audiences, but viewing by adults 18-49 fell by 8%; adults 25-54 by 7%; adults, 18-34, by 9%, and adults, 18-34, by 9%.

The pattern was slightly different in late fringe. Network affiliates lost about 5% in household audiences but among adults 18-49 the decline was 4%; among adults, 25-54, 5% and adults, 18-34, 9%.

DDB noted that among teen-agers, there was a sharp decline both in prime time and in late fringe viewing and attributed this, in part, to the video game craze, which apparently is taking teenagers away from the TV set.

(19.2/30) and National League game on Saturday (18.8/32), and CBS's 60 Minutes (18.5/31) and Trapper John M.D. (18.4/30).

ABC had four of the "final five" all on the Friday night its game was rained out: ABC's baseball (11.4/22); NBC's Voyagers (10.3/17); and ABC's Benson (9.6/18), Fall Guy (9.6/17) and Greatest American Hero (6.5/11).

Steve Allen tracks changes in TV fare and TV audiences

Television personality-comedian Steve Allen attracted standing-room audiences at the Museum of Broadcasting in New York during two 90-minute seminars at which he spoke at length and answered questions on his occupation and avocation—comedy.

Allen acted as if he were still the host of his old talk shows—*The Steve Allen Show* on CBS-TV and the *Tonight* show on NBC-TV—as he spun anecdotes and dipped into nostalgia.

His first program was devoted largely to a commentary on his own program running through the 1950's. He stressed that those programs were live (before the introduction of tape), leading to a free-form type of programing. "We could do anything we wanted and if we had nobody scheduled, we could just talk," Allen said.

"We were able to range over a large territory," he recalled. "Among other things we had a 40-minute segment once on blacklisting in the entertainment field. We did 30-minute dramas on two nights. We did an expose on organized crime in New York, and the next week our studio was stink-bombed while the show was going on. It turned out to be a hilarious show. I think it proved how humor often is rooted in tragedy."

Allen told the audience that the *Tonight* program was preserved in kinescope but in the late 1950's a supervisor of the storage department of NBC-TV in New Jersey ran

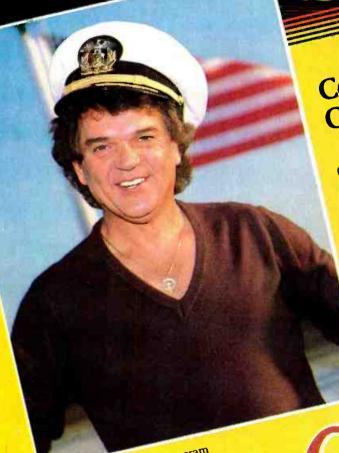

out of shelf space.

"To remedy this situation," Allen continued, "this dunce acted out a cultural atrocity. He decided to burn many of the kinescopes on hand, including those of *Tonight*. Included was a conversation I had with the poet Carl Sandburg, who was supposed to speak for five minutes only but stayed for 90 minutes."

During the second seminar, Allen observed there are no successful variety programs on television today, a dearth he attributed to the restlessness of viewers. "People sat still in those early days of television," he said, "but today viewers have the attention span of a gnat," a condi-

GRAMIONS, INC.

Star value. Post-Newsweek Video and Schaefer/Karpf Productions are producing film, *Right of Way*, teaming Bette Davis and James Stewart. Project has been sold initially on exclusive basis to Home Box Office.

From TV to print. Telepictures Corp., New York, has formed subsidiary, Telepictures Publications Inc., with its first offering *Muppet Magazine*. It will be quarterly publication produced in conjunction with Jim Henson Associates, creator of *The Muppet Show*. First issue will be in November.

In the marketplace, Telepictures has cleared 83 markets for off-network debut of More Real People, syndicated half-hour version of NBC's Real People . . . Victory at Sea, 1954, film documentary series about Allied naval effort in World War II, is being re-released through agreement between NBC Enterprises and Gould Entertainment Corp., New York ... Best Film & Video Corp., Great Neck, N.Y., has secured distribution rights to 60 motion pictures from Almi Century Distribution Corp., subsidiary of RKO Century Theater, including, "The Man Who Fell to Earth," "Monty Python and the Holy Grail," "Pumping Iron," "Putney Swope," and "Cousin, Cousine." ... What's at the Movies, weekly half-hour program about motion pictures currently playing at movie houses, is being produced and distributed this fall by Tele-Color Productions and Syndicast Services ... Program Syndication Services has sold Carter-Grant's Holiday Moments, series of 35 one-minute program inserts, to 15 new stations with roster now totaling 36 stations ... General Entertainment Inc. is offering for syndication two limited series on travels of author James Michener, James Michener's USA (five one-hour programs) and James Michener Abroad (seven onehour programs) ... Michener is also hosting series (five half-hours) examining arts in Poland, now being syndicated by General Entertainment Inc., New York ... Evening Magazine, production of group W's Kyw-Ty Philadelphia, is going live this fall, its sixth season, each evening. ... Celebrity Interviews is new feature series for insertion in television talk, magazine and news shows featuring two-to-10-minute interviews with prominent personalities. Feature is being offered by Bright Star Productions of Studio City, Calif. The Forecast Group, newly formed Los Angeles production company, plans national syndication in January of Dream House, focusing on "unique and individual coverage of homes in the glamour real estate market." Polygram Television and Judd Hambrick Productions have announced co-venture agreement to produce and distribute new halfhour weekly public affairs series, tentatively titled Our American Exchange, for fall 1983 syndication. Program will be available on barter basis and focus on presentation of "both sides of timely contemporary issues" facing American people.

Love and war. World War I provides background for 1915, seven-part adventure series just licensed for exclusive U.S. presentation to Entertainment Channel. Detailing exploits of two young Australians through war years 1913-1915, series was produced by ABC-Australia in association with Lionheart Television to commemorate 50th anniversary of Australian Broadcasting Commission.

Oak branches out. Oak Media Development has announced formation of joint venture among Oak, Spectacor Video Enterprises and Jaffe/Hoffman Productions, to be known as Josh Enterprises, which will produce first made-for-pay-TV soap entitled, *A New Day in Eden.* Jaffe/Hoffman is production firm based in Los Angeles and Spectacor is division of PRISM, regional pay-TV service based in Philadelphia.

Lorimar news. In its first venture into distribution of feature films, Lorimar Television Distribution has completed sales of its 25 titles of Lorimar I to 44 markets, including wphltv Philadelphia, waga-tv Atlanta, ktrk-tv Houston, kcmo-tv Kansas City, Mo., and wdsu-tv New Orleans. It also has placed into syndication 130 half-hours of former NBC-TV toprated program, Rowan and Martin's Laugh-In. Program will be edited from one-hour to half-hour for syndication and will be available for fall 1983 start.

Getting together. Joint venture has been established by March Five Inc., New York, and Los Angeles-based television producer and media consultant Neisha Cohen to handle public relations for authors and television, film and theatrical personalities. Lee A. Helper, head of March Five's West Coast operation, has been named senior VP of company, directing public relations activities of company from Los Angeles and coordinate joint venture to be headed by Cohen. March Five will continue to specialize in publicizing cable, syndicated and commercial television programing.

Film bugs. CBS Theatrical Films and Warner Bros. have signed agreement under which Warner has acquired domestic distribution rights to all of CBS's theatrical motion pictures to be produced over next three years. First feature to be offered will be "Table For Five," Voight-Schaffel Production, starring John Voight and scheduled for release in early 1983. Second film to be released will be "All The Sad Young Men," starring John Shea, Kate Capshaw and Josh Mostel. Other films will be announced shortly. CBS Theatrical films said it plans to produce more than 15 films over next three years.

tion he said may have been caused by exposure to television.

He devoted most of the second seminar to a discussion of the career of Sid Caesar, calling him the "Chaplin of television" and "a true genius." He said that by the late 1950's, westerns and situation comedies emerged as dominant television forms and "Sid's career went into eclipse."

There is a \$2 admission to the seminars. The next seminar series, starting this week, will feature newspaper and magazine critics.

Fuchs criticizes cable criticism

Members of the Hollywood production community—and the entertainment industry press—were told by the programing chief of the nation's largest pay television service that they have been too swift and harsh in their judgment of the cable business. Home Box Office executive vice president for programing, Michael Fuchs, urged those attending last Tuesday's (Oct. 12) Hollywood Radio and Television Society luncheon in Beverly Hills to "not define this medium too hastily. Let's keep

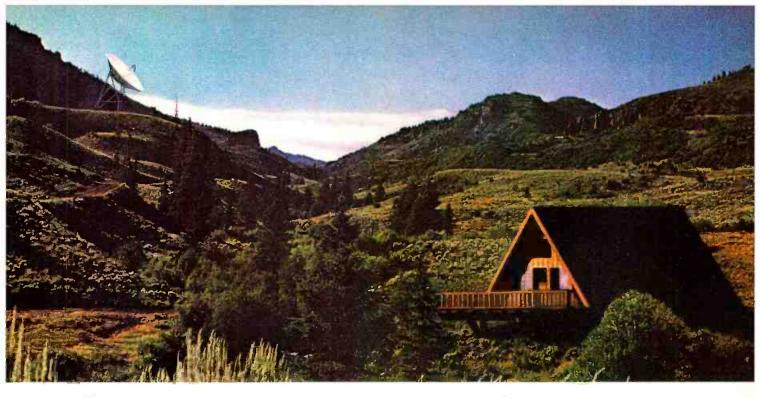

Fuchs

our minds open and let's judge this emerging infant on its merits—not for failing to miraculously correct what has preceded."

Fuchs singled out members of the press for repeatedly focusing on conflict between HBO and motion picture studios over movies sales, saying: "We've only given 10,000 interviews on this subject...lt's a tired story already." During a question-and-answer session following his prepared remarks, Fuchs insisted: "It's not a matter of making peace [with the production community], since we've never declared war." He said both parties have a stake in the new medium, adding: "We don't kill our infant, which is what this industry is."

Earlier, Fuchs had characterized "almost everything" he has read recently about cable as telling him "that cable isn't real—it's overblown, low achievement type." After citing several examples of negative comments on the industry, he charged that "much of [such writing] I've

In program distribution, trust Bell to be there.

Leading-edge companies know we are at the gateway to the future broadcasting environment. More and more of your advertisers are looking for customized programs and distribution methods as vehicles for their products.

Nobody knows this better than the Bell System—a pioneer in broadcast

distribution, anticipating broadcasters' needs from the industry's inception.

To meet broadcasters' needs today, Bell offers end-to-end capability and responsibility—from transmit/receive or receive-only earth stations to transponder space to land links. Bell System provided and maintained earth stations, fixed or transportable, can be located on Bell premises or at your locations—an arrangement that lets you keep pace with the rapid advance of technology without a large capital investment.

If you want to develop new program strategies, put our knowledge to work for you. Only Bell can provide this total nationwide mix—audio and video program distribution services, over satellite and terrestrial systems. And our responsibility doesn't end with installation. Bell Labs is continuing research to enhance existing services—from improving signal quality to protecting against signal piracy.

To take advantage of our total systems approach, start with a call to your

Bell System Media Industries Account Executive.

The knowledge business

found gets written by people who don't have HBO or cable television [service]."

Fuchs conceded that "cable is not the be all and end all" and "the business expectations [of the industry] have been a bit unreal." His own version of cable's role in the media mix was tempered by qualifications:

"We're not going to turn the economics of the entertainment industry upside down—but we're going to be a big, big contributor....

"We're not the great [network] replacement—we're the great addition, and things will be a lot more interesting business-wise and creatively if this business flourishes. Narrowcasting—l've always thought it's a lot more challenging to produce something that hits a non-exploitive chord in a lot of people than entertaining just 25 people. A lot of people have and will find out the expensive lesson of narrowcasting. Is M*A*S*H not good programing because it's not narrow appeal?"

Fuchs suggested that "a file of unattractive adjectives built up from commercial TV" is being recycled in reviews of cable programing. That's unfair, he said, because the latter medium is still young and spending millions of dollars "just trying to get our programing to your door. I'd rather spend it just on programing, and maybe some day this will be the case."

In prefacing his remarks, Fuchs maintained that HBO has tried to smooth out its relationship with motion picture studios recently and said he'd "like to see conflicts between HBO and the studios come to an end some day." Later, responding to a reporter's question, Fuchs emphasized HBO's commitment to seek exclusive purchase agreements with studios and "in pre-buying motion pictures" in order to improve and protect the service's competitive position. "If you don't think HBO is getting movies made in this country," he declared, "you're wrong."

Showtime renews 'Paper Chase'

John Houseman remains as star as former movie, CBS and PBS series stays alive on cable

The pay cable television network Showtime and 20th Century-Fox Television announced last Monday (Oct. 11) that production of seven new episodes of *The Paper Chase* will be produced for a second year of distribution by the cable service. The dramatic series is in its fourth video incarnation: first as a 1973 Oscarwinning theatrical release, as a 22-episode series during the 1978-79 season on CBS-TV, as a rerun on public television in 1981 and as a pay cable series beginning next year on Showtime.

Greg Nathanson, Showtime's vice president of programing, estimated the firm would spend about the same as a commercial network does (between \$300,000 and \$400,000) to produce each new one-hour episode. The program will feature John Houseman returning in his role as Prof. Kingsfield and James Stephens returning as law student James Hart. The first two new episodes will be written by John Osborn, the author of the original book on which the series have been based. Osborn may write the remaining five shows as well.

Nathanson said Showtime hopes to continue *The Paper Chase* as an ongoing series, probably scheduling new episodes at monthly interludes. Showtime has bought the rights to the original 22 episodes, which may be repeated beginning this year. The venture represents the first pay TV series production for 20th Century-Fox Television and the largest investment in a single program series by the cable service. No major changes in the

actual production are anticipated, although a spokesman for the studio said that the shows might include more adult-oriented material and will be edited on videotape rather than film. The show will be shot on film, however, with network-level production values, he said.

18th Armstrong awards presented

A musical tribute to the late singer Janis Joplin, a news documentary on the Voting Rights Act and one station's in-depth coverage of a 50-day teachers' strike were among radio programs honored last Friday (Oct. 15) at the 18th annual Armstrong awards ceremony, held this year at New York's Lincoln Center.

Presented by the Armstrong Memorial Research Foundation of Columbia University, New York, the awards are named after Edwin H. Armstrong, inventor of FM radio and other circuits used in radio-TV equipment.

Master of ceremonies this year was veteran radio and TV journalist John Cameron Swayze. A special award went to Dallas Townsend, who has recently completed 25 years as anchor of CBS Radio Network's World News Roundup.

The awards recognize excellence and originality in six categories of programing. This year's winners were:

Music

WLIR(FM) Garden City, N.Y.

Get It While You Can: A Tribute to Janis Joplin, first place.

Kimberly Haas and John Diliberto (independent producers) — Edgar Varese's Sonic Liberation, second place.

CKFM-FM Toronto The Act You've Known For All These Years, honorable mention.

Education

WHRO-FM Norfolk, Va. \square American Diplomacy, first place.

National Public Radio

Reagan mics Made Easy, second place.

Canadian Broadcasting Corp.

Samuel Johnson and His Friends, honorable mention.

National Public Radio

Juvenile Crime and Juvenile Justice, honorable mention.

News Documentary

National Public Radio | Voting Rights Act, first place.

National Public Radio

Father Cares: The Last of Jonestown, second place.

NBC Radio Network | Hitler's Children, honorable mention.

WAHT(AM) Lebanon, Pa. □ Under the Influence: A License to Kill, honorable mention.

Public/Community Service

WOR(AM) New York - Goodbye Lucy, first place.

Robert and Elleen Zallsk (independent producers) □ · The Day After Trinity, second place.

Canadian Broadcasting Corp.

The Arms Race, honorable mention.

Creative Use of the Medium

Kathy McAnally and Randy Thom, San Francisco

Sound Design, first place.

National Public Radio

Star Wars, Episode 13, second place.

Gay Media Production Associates
The Men With the Pink Triangle, honorable mention.

BottomyLine

To market, to market, RCA Corp. announced offering of \$100 million of 12.75% 10-year notes. Net proceeds from sale of securities will be used for working capital, general corporate purposes and to repay floating rate debt.

Trimming sall. Oak Industries, which earlier announced decision to put off DBS plans (Broadcasting, Oct. 11), says it is lowering its earnings estimates for 1982. Recession's effect on Oak businesses, devaluation of Mexican peso, state of Mexican economy, higher than budgeted costs for new cable television products and "unexpectedly severe reduction in sales of addressable converters," were problems cited. Company now believes it will net about \$20 million in 1982, down from \$30.3 million in 1981.

Detachment. Cablevision Systems Development Co. set Oct. 4 as detachment date for separate transfers of debentures and warrants bundled in recent public offering (BROADCASTING, Sept. 13).

Gearing up. Four Star International Inc., Los Angeles-based film syndicator, has announced plans to re-enter production business after hiatus of more than 10 years, and will open Hollywood office soon. For fiscal year ended June 26, firm posted profit of \$528,397 or 99 cents per share, up from \$168,315 or 31 cents per share previous year.

17th Gabriel awards to be presented

Winners were announced in the 17th annual Gabriel Awards competition by Unda-USA, the national association of Catholic broadcasters and allied communicators. Awards honor commercial and public service programing for the 1981-1982 broadcast year. Thirty-one national and local stations, programs and spots were selected to receive awards from a total of 735 entries. Presentation of awards will be Nov. 5 at the Palmer House in Chicago during the Unda-USA annual general assembly.

List of winners are as follows:

Personal Achievement

Robert Keeshan @ Captain Kangaroo.

BIII Moyers - Creativity with Bill Moyers.

Station awards Television

WBZ-TV Boston.
WCVB-TV Boston.

Radio

KMOX(AM) St. Louis.

Suddenly, cable construction has a totally new kind of management

Byers System Management.

In the past few months, one small company has quietly revolutionized the cable construction business.

Using a total systems management approach. Byers Communications is already at work on two of America's largest new metropolitan builds, with more waiting in the wings.

In creating this unique matrix format, Byers drew upon key executive experience not only in computer management (Morgan Payne, President), but also in aerospace (Jay Simmons, Executive VP/Operations) and in cable operations (Bill Pitney, Executive VP/Corporate Development).

Unlike old-fashioned cable construction methods
—where operators themselves had to supervise coordination of labor, materials, and testing—Byers System
Management can provide complete turnkey delivery of
your plant. You receive it already tested and ready for
marketing, on schedule and on budget.

Each project is supervised locally by experienced Byers' project managers, with close support from a highly skilled team of specialists based in Atlanta. Materials procurement and computerized inventory control are also centrally managed for cost efficiency and assured on-time delivery.

To today's MSO faced with multiple builds of increasingly complex 400-440 Megahertz, dual-cable plants, the Byers Turnkey delivery can be a blessing that frees skilled personnel for more profitable operations duties.

Other operators may want to use Byers' modified turnkey capabilities—engineering/design, labor only, material procurement and inventory control, and testing.

Byers also offers complete rebuild services through "retrofit," an economical way to upgrade.

Discover how you can make use of Byers Systems Management to free up key personnel, save time and expense, and expand your new build capacity. Write or call Bill Pitney at (404) 696-7455.

NAB puts in bid for more royalty fees from cable

Association feels broadcasters deserve more from 1980 pool for entire broadcast day

The National Association of Broadcasters made a pitch last week for an increase in broadcasters' portion of cable royalty fees for 1980.

The association was testifying before the Copyright Royalty Tribunal, which is to decide how 1980 cable royalty fees will be distributed.

The NAB and other parties are asking for a greater portion of the fees than awarded in 1979. Several sports organizations and the Motion Picture Association of America testified earlier. Public broadcasters and other NAB witnesses testify this week.

NAB President Edward O. Fritts was on hand for part of the hearings but did not testify.

Broadcasters were awarded 5.06% of the 1979 cable royalty fees. The association and other parties involved in the CRT's 1979 proceeding are appealing its decision in the U.S. Court of Appeals in Washing-

The NAB's outside counsel, Victor Ferrall, of Crowell & Moring, Washington, outlined the association's case.

"Here is what we are going to show you, we are going to show that cable systems carry channels, not programs. We are going to show you that cable systems carry compilations which someone else has done, either the broadcast station, in the case of distant signals, or a cable network in the case of cable services.

Ferrall maintained that broadcasters should be granted a larger share of fees because of the "valuable" contribution distant TV and radio signals provide to cable systems.

The NAB has not yet asked for a specific percentage increase. However, Ferrall stated that a range between 7% and 12% would be reasonable.

Ferrall criticized the sports organizations because he disagreed with their argument for increase. He said their percentage of fees should increase because the number of games aired in 1980 had risen since

"In my view, their case this year is an insignificant part, a time-based justification for an increased share," he added. Ferrall also maintained that broadcasters' contributions to sports telecasts is significant. Ferrall said that the "contribution the teams make and the broadcasters make to sports telecasts are inextricably intertwined. It is hard, if not impossible, to separate them," he said.

Larry Patrick, NAB senior vice president for science and technology, joined Ferrall and argued for a percentage increase. Patrick stressed the value of local programs to cable operators.

He maintained that station-produced programs are creative and varied, and have wide appeal. Patrick also noted that distant signal radio stations don't merely duplicate locally available station formats. He presented an analysis of formats of distant and local FM stations carried by cable systems in 1980.

The NAB reported the results of a study conducted by Statistical Research Inc., which showed that although syndicated series fill half of cable TV's program time and local programs only 10% of it, cable operators rate local programing of comparable value. According to the SRI study, which surveyed more than 400 cable operators, syndicated series received a 2.8 average rating as of value to the operators and local news program followed with a 2.7 rating.

Patrick also presented evidence th showed there has been a change in loc news programing due to new technologie New technologies have enhanced a st tion's ability to provide regional coverag thus increasing the appeal of local station

The NAB also presented witnesses fro the cable industry to back up its argume that local programing is valuable. Willia Petty, senior vice president for th southern division of Capital Cities Cabl and Edward Hewson, vice president ar general manager of King Videocable, di cussed the value of distant signal progran ing and distant FM stations to cab systems.

They argued against assertions by oth parties that local programs on distant si nals are not of value to cable systems.

Wayne Cornils, NAB vice president radio, also testified on the value of distar radio signals to cable systems.

Neal Pilson, president of CBS Sport stressed the importance of contribution broadcasters make to sports telecasts. F outlined the broadcasters' copyrightab interests in sports broadcasts.

Watson sees rise in TV news quality as well as quantity

Likening his job to that of a quality contr inspector on an assembly line and describ ing his role as the conscience of the nev operation, George Watson, ABC Nev vice president, addressed a Washingto luncheon meeting last week sponsored l The Media Institute, a Washington noi profit organization seeking to improve a curacy and fairness in the media. Watso spoke as part of the institute's continuir program to bring media executive together informally with business execu tives, "The trend toward greater respon sibility and accountability is growing. Watson said, "the increase in quantity [broadcast news] will be matched by ir provements in quality."

The increase in the volume of news pr graming is the best assurance of more ba anced news coverage, Watson told his a dience. As new kinds of news program crop up in the middle of the night, uniqu opportunities for critics and voices wi different views become availabl Although time for such expression is cu rently relegated to those odd hours, Wa son said there exists a sizable audience f

With the addition of Last Word, tl name for ABC's new midnight news pr gram that began Tuesday, Oct. 6, "tl three major networks would have a

The NAB's Michael Berg (I) counsel, and Eddie Fritts

On June 27 1982, the space shuttle Columbia made history.

So did TeleCaptioning

The instant the shuttle went up on June 27, the word went out—literally—for the first time ever, because of the advanced technology of real-time captioning. Real-time captioning was developed by the National Captioning Institute in order to provide simultaneous subtitling of live events.

Hundreds of thousands of people with hearing impairments were able to thrill to the full impact of the shuttle's breathtaking flight as it occurred. And their full participation in this historic event was historic in itself.

NCI's TeleCaptioning was created solely to open up the world of television to the deaf and hearing impaired. It's made television come alive, with over 40 hours of TeleCaptioned programs from "Dynasty" to "Little House on the Prairie" to "ABC's World News Tonight" to the Super Bowl itself. And NCI has not only the capability, but the commitment to maintain this vital service on a national basis.

TeleCaptioning has also provided hundreds of advertisers with a new way of reaching the hearing impaired, a market extraordinarily loyal to products of companies that have made the effort to reach them. Among these are Procter & Gamble, American Express, Datsun and McDonald's.

If you want your program, product or service to be "heard" by a market that's too important to miss, please send in the coupon or call us. We'll be happy to provide you information on what TeleCaptioning can do for you.

Na

Watson

ded over the past year about 40 hours of regularly scheduled news and information to their weekly schedule that's almost a 75% increase in news," Watson claimed. Although network executives are not exactly sure who is watching their news programs in the early hours of the morning, the development of Nightline showed them that an audience does exist. The proliferation of news programs, Watson noted, offers more opportunity for viewers to "talk back to the tube." Watson confirmed there is still no full-fledged broadcast version of a letters-to-the-editor column or an op-ed page—although some programs like ABC's 20/20 are beginning to offer that opportunity, he said.

Watson objected to the title ombudsman for his position. Roone Arledge, president of ABC News, in establishing the position, "wanted a person who is part top management of ABC News, whose responsibilities included what happened before, during and then after the fact of broadcast." An ombudsman, Watson explained, would be someone brought in after the fact of publication or broadcast, and not someone charged with steady monitoring of newscasts. It was also Arledge's idea to start Viewpoint, ABC's occasional look at how it and other media handle various issues.

Viewpoint's objective, Watson said, is to "provide a forum for critics of broadcast journalism in general, and ABC News in particular." If ABC was the first to explore these areas of accountability, insisted Watson, "we are not alone at last," pointing to CBS's establishment of a new vice president for news practices "whose job description sounds pretty much like my own." NBC has not established such a position, believing it is "bad and unnecessary," Watson said.

But when two of the leading broadcast news operations establish watchdogs, Watson pointed out, "something of significance is afoot." That something is a "growing recognition that our policies and practices could stand some policing and our critics deserve a forum. ... If conscience is the small voice inside you that says: 'Someone is looking over your shoulder,' then we are very well aware that we are being watched.' Watson emphasized that recognition of critics is

essential to keep trust with the public. It is nothing else but "enlightened self interest" that disposes the network to do so, and networks must prove themselves fair and impartial in news coverage if they are to combat the "impression that we arrogantly don't give a damn." At stake, Watson warned, are the rights and liberties a free press enjoys. Those rights and liberties ultimately depend on the consent of citizens. "We cannot protect the free press by invoking the First Amendment. We need the public's understanding and support ... to provide an attentive ear and open mind to the public's concern to the ways in which we discharge our responsibilities."

When errors in fact do occur, "it's our policy to correct them immediately," Watson said. More common, however, Watson explained there is a "difference of opinion over what set of facts you report." Another

area of contention is how facts are handled. "It's very often not the facts that are in dispute, it's the report that is built around them"

Responding to a question for details behind ABC's decision last week not to carry live President Reagan's address to the country (see "Top of the Week"), Watson said that the President's request for air time and the content of the address-the economy-came suspiciously close to election time. Watson said the request for air time was made "after the Republican National Committee had fought unsuccessfully to buy time for a political ad-Although ABC was informed, President Reagan's address would not be political, "we are three weeks away from an election." The President's speech would be covered, Watson assured, in ABC's regular news coverage. Both CBS and NBC carried Reagan's address.

Raising the profile of the productivity problem

Newly formed group representing broadcasters, BICIAP, will begin campaign on Christmas that will educate and orient Americans on productivity as underpinning to the economy of the nation

The nation's productivity, normally more a matter of furrowed brows in board rooms and think tanks, is about to become a universal concern for all America—if the Broadcasting Industry Council to Improve American Productivity has its way. That organization is now rallying broadcasters to donate their facilities for a massive five-year orientation and education program focusing on the wobbly productivity leg under the nation's economy.

But the BICIAP has a more immediate and urgent goal: financial support for the effort. So far, 13 major broadcast organizations have pledged a total of \$130,000 (\$10,000 each). That, however, is just a fraction of what the council feels it will need for production, distribution, research and other costs.

Announcement of the Dec. 25 start was made last week by Don LeBrecht, newly appointed executive director of BICIAP. Formation of BICIAP was approved earlier this year by the executive committee of the National Association of Broadcasters at the urging of Jerry Lee of WEAZ(FM) Philadelphia, a former NAB board member (BROADCASTING, April 5, 26).

Lee is chairman of the new council whose membership also includes NAB Joint Board Chairman William Stakelin as BICIAP vice chairman; Don Curran of Field Communications; Ben Hoberman, ABC Radio; Arch Madsen, Bonneville International, and Mark Smith of KLAS-TV Las Vegas.

LeBrecht said the campaign initially would offer orientation, in lay language, on how productivity in America relates to the strength of the economy. It will define productivity as output per worker-hour and show how the productivity decline in

this country has weakened the dollar, created an uncertain economic future and eroded America's strength in the world's marketplace.

He said the BICIAP's background study found universal agreement among economists and productivity experts that primary reasons for low productivity are ineffective management, adversarial relationships between labor and management, adversarial relationships between government and management, and functional illiteracy.

Identification of problems that the council seeks to address came from a productivity panel that the council set up and which consists of Dr. Jay Hall, president and executive officer, Teleometrics International: Dr. Herbert E. Striner, Kogod School of Business Administration, American University; Ken Schatz, president, Partners on Purpose; James H. Stoors, national marketing program director, CBS/Technotec Commercial Credit Services Corp.; Dr. William Abernathy, professor of business administration at Harvard University, and Bill Moyes, president, The Research Group.

The BICIAP also cited 1981 research that Compton Advertising conducted for the Advertising Council. Those findings revealed national concern for the future of the country if productivity growth continues to drop. The study said the annual average productivity growth of 3.2%, in the 1948-65 period, had dropped to 2.1% in the 1966-72 period, and to just 0.8% in the 1973-79 period.

Added the BICIAP report: "It is estimated that every one percent of growth in the productivity rate will increase workers' buying power by \$26.5 billion. Therefore, the benefits of increased productivity are self-evident."

Television and radio spots for the Dec. 25 campaign start are being prepared by Trout & Ries Advertising, New York, and will be test run Nov. 9-11 in Columbus, Ohio.

are being provided with kits explaining what the council is and what it expects to accomplish, samples of on-air editorials and speech texts for delivery at local meetings. Broadcasters are also being approached through the trade press, state association newsletters, NAB publications and meetings.

To reach government, letters from the council to administration officials—particularly cabinet members and members of Congress—will explain the program and emphasize endorsements received last spring and summer from President Reagan, House Speaker Thomas P. (Tip) O'Neill and AFL-CIO President Lane Kirkland

The list of endorsers was augmented 10 days ago by Representative Timothy E. Wirth (D-Colo.), chairman of the House Telecommunications Subcommittee. In a letter to NAB President Eddie Fritts, Wirth noted that, as chairman of the Special Task Force on Long Term Economic Policy of the Democratic Caucus of the House, he shared broadcasters' concern for increasing American economic productivity. He said he hoped the NAB's effort would educate the public about the seriousness of the problem, and added: "It should help to lay a foundation of public opinion upon which those of us in Congress can take actions that will return our country to its economic preeminence."

To reach unions, the council is offering

LeBrech

Interamedia

Carson complex. Entertainer Johnny Carson and wife Joanna have donated \$1 million to University of Southern California's division of cinema-television for assistance in constructing new Carson Television Center, to contain 3,500-square-foot soundstage and video production wing. Construction of five-building complex begins late this month. "We are honored to invest in the future of television at USC." Carsons said, "and we can only hope that once the facility is in place a generation of creative and technically proficient individuals will provide quality entertainment well into the next century."

Internal

Hispanic reports. Group broadcaster Spanish International Communications Corp. has commissioned Arbitron for special survey of Hispanic TV viewing in New York, Los Angeles and Miaml where SICC owns stations. Reports, initially for upcoming November and February survey periods, will be based on larger total Hispanic dlary sample (targeted at 300 homes) than Arbitron's regular syndicated Hispanic reports and will include proportionately more Hispanic households from countles outside high-density Hispanic metro areas. Results will be distributed to Arbitron's advertiser and agency subscribers to syndicated reports in those markets.

Support services. Lee Enterprises, broadcast group owner and newspaper publisher, has launched Lee Services Group (LSG), new company offering "wide range of management services to industry associations." Named general manager of LSG is Steve Currie, immediate past president of NATPE International, who continues as manager of broadcast operations for Lee's KOIN-TV Portland, Ore. First major project of LSG is NATPE Programer's Guide, to be distributed at NATPE convention in March. In addition to preparation of association guides, Currie said, LSG expects to be involved in office services (such as mailing lists and billing) and perhaps consultation.

Togetherness. PBS television stations—wnet(TV) New York, wttw(TV) Chicago, KQED(TV) San Francisco and KERA(TV) Dallas-Fort Worth—and South Carolina Educational Television Commission have announced formation of consortium to co-produce *Great Performances* series, which is entering its 10th season. Series had previously been produced solely by wnet, with creative input from various sources including many PBS member stations. Consortium will fulfill management role, to address programing and other long-range plans, budgets and potential funding, with emphasis on seeking new underwriters. Exxon has committed \$4.9 million to upcoming season, while Corporation for Public Broadcasting and National Endowment for the Arts have added another \$2 million combined.

189 such organizations materials on the campaign which will be relayed to their members.

To reach management, interviews are being arranged with the nation's top business journals, given jointly by council members and by top management executives in company newspapers and magazines. Of special importance is the U.S. Chamber of Commerce's Nation's Business magazine, Washington Report newspapers and Biznet, the chamber's TV feed to members.

To reach educators, major organizations in that field will be briefed on the program prior to the planned phase to reduce illiteracy in the work force. The groups also will be provided with posters and literature, aimed at the educated members of the public, noting the special classes available to illiterates.

Other council activities:

- A speakers bureau is to provide professional speakers for conferences, conventions, talk shows and broadcast interviews.
- News conferences, open to all, are to be held at headquarters of U.S. companies that have established good rapport with workers resulting in increased productivity. Those showcases of success as of

now, are to start in late January 1983, after the campaign has been under way a month, with others to be held once a month with varying formats.

When the second phase of the BICIAP campaign gets under way in 1984, the National Association of Manufacturers is to distribute materials to its members explaining the skills bank and how training for specific jobs will benefit the employe, the company and the economy.

In addition, a Washington Coordinating Council on Productivity, is working with members of the House and Senate to set up a program in each state in which an individual, community or corporation will be recognized by the state's congressional delegation for exemplary work in improving productivity. That program is to be implemented in 1984.

The on-air portion of the campaign is expected to involve \$75 million to \$100 million annually for five years in donated air time.

A separate nonprofit corporation has been set up to facilitate handling of contributions and other support for BICIAP. Major broadcast groups among the initial contributors include Bonneville International, Broad Street Communications, Buckley Broadcasting, Century Broadcast-

ing, Fairbanks Broadcasting, Field Communications, GCC Communications, Greater Media, Hubbard Broadcasting, McGavren-Guild, Malrite Broadcasting, Palmer Communications and Susquehanna Broadcasting.

Both Lee and LeBrecht last week were high in praise of those cooperating in the campaign who recognized that "we've all got to pull together." Lee particularly cited "the herculean effort" of Ward Quaal, former broadcaster and now a consultant, who played a major role in rallying support from broadcasting and government and who spearheaded the fundraising drive. Quaal is co-chairman of the BICIAP's advisory committee, along with Bruce Kauff-

practice in Philadelphia. Headquarters for the council is at 1771 N Street, N.W., Washington 20036; telephone 202-296-6572.

man, former justice on the Pennsylvania Supreme Court and now in private law

LeBrecht, a 24-year broadcasting veteran, was director of operations for EZ Communications prior to his appointment as executive director of BICIAP. Earlier, he had been program director of WPAT(AM) New York-Paterson, N.J., and station manager of WDVR(FM) Philadelphia, since changed to WEAZ.

Varying voices on cable TV

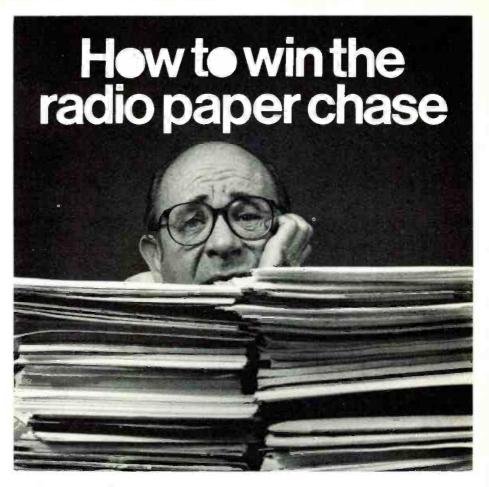

Harvard audience hears different prospects for pay's future

Cable experts voiced both skepticism and optimism about various aspects of the industry's future during a Harvard University discussion. Warner Amex Satellite Entertainment Corp. president John Schneider and Cable Advertising Bureau president Robert Alter were predictably bullish about programing and revenue prospects. But Time Video Information Services president Sean McCarthy and cable programing and packaging firm head Melinda Benedek wondered just who will pay how much for what.

Schneider, former CBS president, told the John F. Kennedy School of Government audience that most of the 108 channels planned for local franchises will eventually be used. There's wisdom, he said, in "building highways wide enough to accommodate an electronic future." Programers should be willing to take risks, he said. "It's perfectly all right if someone fails, if we're going to invent a new [entertainment] form."

Alter sees no shortage of specialized programing, and the segmented audiences for it. Calling this emerging viewership a very strong marketing tool for cable operators, he contended that broadcast networks' share of the video market would drop to 60% by 1990.

"Advertisers are starting to realize that exclusive cable programing is the only way to reach everyone," he claimed.
"We're upsetting the life of the adver-

MAPS maps more for you!

For a business that deals exclusively in sound, a radio station generates an uncommmonly high volume of paperwork. Some managers are so wrapped up in the paper chase, there's little time for the main thing: Reaching a big, responsive audience and earning a profit at it.

Cetec MAPS puts all that paper in its place, memorizes it, makes multiple analyses, and gives you just the timely data you need for timely control of Management,

MAPS means more for station management—much more than any clerical scheme or off-the-shelf general business grab-bag.

Accounting, Programming, and Sales.

Call Frank Crane: (805) 684-7686 • Outside Calif.: (800) 235-5715 Cetec Broadcast Group 1110 Mark Avenue, Carpinteria, CA 93013 tising industry," an industry he called slow to move and prone to think in short-range season-to-season terms. But he projected that cable advertising revenues would reach \$3 billion-\$4 billion by 1990. "Advertising's role in cable's future hasn't been defined yet," Alter said, adding that both industries need to learn a lot about each other.

Benedek, however, foresees a continued single-market basic cable offering because she says operators haven't demonstrated that they're willing to give financial backing to more diverse offerings. The president of High Wire Ltd., Benedek predicted that pay TV will continue to be an ancillary market for films, plays and concerts, and will only dabble in other kinds of programing.

McCarthy is leading Time's videotext campaign with as many questions as answers. "Can we or anyone else create content that people will value or use?" is one problem he's pondering. He rapped Prestel and other videotext experiments

for putting their money into creating a network, and not into creating content. He called them instruments of government policy, and unresponsive to the marketplace. "They say they're going into the business market," he continued, "which means that you've failed with the consumer."

To attract the consumer, who he feels right now is most apt to be a pay TV subscriber, McCarthy thinks a way must be found to make an essentially "dull" medium-print over television-interesting, deliver it for a fixed \$5 to \$10 monthly price and get the price of home boxes down from the present \$4,000 to \$150 or

"Television isn't a reading medium," he said. "People will never read a 25 paragraph story on it." He's skeptical about two-way and 108-channel capacity. "All those channels aren't wanted or needed, except to win cable franchises," he said, and he sees "no proof of a profitable business in two-way.

Law & Regulation 4

Hearing impaired argument goes to Supreme Court

Issue before justices is whether FCC should deny renewal to KCET-TV because of complaints made by hard-of-hearing group

The question before the Supreme Court last week was whether the FCC is required to enforce a provision of the Rehabilitation Act of 1973 as if it were a part of the Communications Act. For a time, several justices appeared to be expressing the view that the commission is as bound by the policy of that law as it has been by policy of the antitrust and equal employment laws. But toward the end of the 80-minute argument, the sentiment on the bench appeared to have changed. Chief Justice Warren E. Burger was talking of the "statutory scheme" as giving "life or death control" over the station involved, to the "funding agency"—in this case, the Department of Education.

At issue was a case in which a group of hearing impaired in Los Angeles, as represented by Sue Gottfried, had petitioned the FCC to deny the license renewal of noncommercial KCETTV Los Angeles on the ground it had not adequately served the hard of hearing. Among other things, Gottfried cited Section 504 of the Rehabilitation Act, which prohibits discrimination against the disabled by those who receive federal funds.

The FCC rejected the argument, and renewed the license, as it did the licenses of seven commercial stations that had also been the object of Gottfried petitions to deny. But while the U.S. Court of Appeals affirmed the commission as to the commercial licenses, it reversed in the KCET-TV case. The court said it was "unreasona-

ble" to believe a public station [which is federally funded] could operate "in the public interest without at least attempting to satisfy its statutory obligations" (BROADCASTING, April 27, 1981).

Counsel for KCETTV, Edgar F Czarra Jr., suggested the station was 'serving the needs of the hearing impaired. He said that during the 1974-77 license period under review, the station had aired 1,000 programs with open captioning and had met the minimal requirements imposed by the commission for serving the hard of hearing—airing emergency warnings in writing across the screen, showing newscasters' faces in closeup to facilitate lip reading and presenting sports scores in writing.

Counsel for the government, Samuel A. Alito Jr., said the commission has not required stations to engage in closed captioning because of the "technical complexity" of the problems involved; he said the commission felt it could aid development by not attempting to set standards.

Beyond those matters, the counsel argued that the commission should not be required to enforce Section 504 of the Rehabilitation Act. Czarra said the commission may consider other statutes in enforcing the public interest standard. "But that's a judgment Congress entrusted to the FCC," he said. Added Alito: "The FCC could take Section 504 into account, but it can't take responsibility for enforcing it."

Several justices probed those views. "Would the FCC consider allegations of unfair labor practices?" Justice William Rehnquist asked Czarra. "Must the FCC take into account the failure of a licensee to live up to the requirements of another law?" asked Justice Byron White. To the first question, Czarra said the commission would wait to see what the enforcement agency would do. To the second, he said, "It depends on the nature of the law."

Alito got only a few sentences into his

argument before the questions rained down from the bench. Burger and White suggested a parallel between the FCC's concern for fair employment practices and its possible responsibility for enforcing Section 504 of the Rehabilitation Act. "The FCC has indicated that employment is relevant to FCC responsibility [in the licensing process]," Alito said.

And both White and Justice John Paul Stevens suggested they felt the FCC was exhibiting a detached attitude with regard to the Rehabilitation Act. White on several occasions asked if the commission considered the act "irrelevant." And Stevens asked of the FCC, "They don't

care?

Charles Firestone, counsel for Gottfried, didn't have things easier. His charge that the station had "discriminated" against the hard of hearing fascinated the justices. "What do you mean by discrimination?" White asked, almost as soon as Firestone started speaking. "Indifference, exclusion, devoid of equal access," Firestone said. Would the Supreme Court be guilty of discrimination against the hearing impaired if it did not provide amplifying equipment at its oral arguments?" Burger asked. "Not under the law," Firestone responded.

Stevens expressed bewilderment by the tack taken by the hearing impaired in the case. What, he wondered, did Gottfried want: "a general rule applicable to all stations?...ls denial of renewal the way to get such a rule?" Justice Thurgood Marshall also wondered what the point of the Gottfried suit was. Firestone several times mentioned the need for "guidelines." White, after his sharp questioning of counsel for the station and the government, noted in his questioning of Firestone that Gottfried had tried another approach through the courts-seeking an injunction against the station but that the U.S. district court where the action was brought had dismissed it and suggested that relief be sought from "the funding agency.'

(That matter is far from settled, however. While dismissing Gottfried's suit against KCET-TV as well as the Corporation for Public Broadcasting and Public Broadcasting Service on the ground that violation of Section 504 had not been proved, Judge Manuel Real ordered trial for the government defendants—the Department of Education, the Attorney General, the FCC and the Health and Human Services Department. At the end of the trial last year, he ordered a cutoff of DOE funds for public television programing until the government did what was necessary to assure access on the part of the hearing impaired to that programing (BROADCAST-ING, Nov. 2, 1981). Both Gottfried and the government appealed, and arguments in

the case will be heard on Nov. 4 by the U.S. Court of Appeals for the Ninth Circuit.)

Burger suggested that that agency—the Department of Education—does indeed have the final word in such matters. "If [the public stations] don't play ball, they won't get the money," he said. "Isn't that the statutory scheme?" But Firestone wouldn't concede. "In the end," he said, "it's the FCC that must look at the overall operations of a station."

FCC asked to doctor PTAR

WBRE-TV wants rulemaking to get rid of off-network provision as 'anticompetitive'

The FCC has been confronted with another proposal that it chip away at the prime time access rule. The proposal is, in fact, identical to one that the commission dismissed as untimely a year ago—that a rulemaking be initiated aimed at repeal of the off-network provision of PTAR.

David Baltimore, president of wbre-tv Wilkes-Barre, Pa., an NBC affiliate, said the rule has failed to serve any of the purposes for which it was intended and has served only to injure the public "by preventing it from receiving the programing it desires, and to individual licensees by interfering with their ability to compete in the marketplace."

The off-network rule plugs a possible loophole in PTAR, which prohibits affiliates in the top 50 markets from carrying more than four hours of network programing in prime time. Since a primary purpose of the rule is to reduce network dominance and reserve a portion of prime time for programing decisions by individual licensees, the commission decided to bar programing formerly seen on a network as well as network programing for the four hours.

Chronicle Broadcasting Co. (KRON-TV San Francisco) proposed repeal of the offnetwork provision a year ago. But the commission dismissed the petition in an order in which it noted that the Broadcast Bureau was reviewing the suggestions made by a special network study staff that had studied PTAR and its related rules, and had recommended repeal of the off-network rule. The commission said the review could lead to a proceeding considering total or partial repeal of PTAR. As a result, the comission said, it would be premature to consider only the off-network restriction.

The review led the commission to initiate a rulemaking aimed at repeal of the collateral financial interest and syndication rules. But fierce opposition by affiliates, like wbre-tv, forced the commission to abandon consideration of PTAR repeal. The affiliates contended they needed the rule to help them resist network pressure for program clearances. Baltimore said it is now "appropriate and necessary" to

return to the issue raised in the Chronicle petition.

The commission, in adopting PTAR and related rules in 1970, said they were intended to help promote diversity of programing by affiliates. But Baltimore, like Chronicle last year—and like the special network study staff—said the off-network regulation had failed in that regard. There is a considerable sameness among the game shows and other inexpensive programing he says are seen in access time. In any event, Baltimore added, any "theoretical need for the rule" has been eliminated by the major changes in the video program distribution market.

Baltimore calls for the elimination of the off-network restriction as one that prevents the normal functioning of the marketplace and, in the process, bars the public from receiving the programing it prefers, as well as handicapping affiliates in their efforts to compete against independent stations that are free to air off-net-

work programing.

Baltimore says the "anti-competitive aspects" of the off-network restrictions "are particularly harmful" in markets with heavy cable penetration like Wilkes-Barre-Scranton. He noted that cable systems typically import the signals of distant independent stations, "both those from nearby major markets and the so-called 'superstations' distributed by satellite." During access time, he added, "virtually all of these independents broadcast the 'off-network' programing that audiences prefer."

To Baltimore, there is no inconsistency in supporting PTAR—as a bulwark against network pressure—but not the off-network restriction. Since the commission set aside the access period for affiliate use, he said, "it is irrational to then encumber the ability of affiliates to program that period freely."

Equal time on marketplace ideas

Representative Swift and TRAC's Simon take opposing views to Fowler's unregulation stand

A couple of second opinions on FCC Chairman Mark S. Fowler's policy of "unregulation" are being offered in the current issue of the National Academy of Television Arts and Science's *Television Quarterly*. Neither constitutes an endorsement. 'Representative Al Swift (D-Wash.) contends the "glib assurance" of those who believe Fowler's "marketplace" approach contains "magical" qualities is misplaced. And Sam Simon, executive director of the Telecommunications Research and Action Center, formerly the National Citizens Committee for Broadcasting, says "unregulation presents a clear and present danger to the essential democratic nature of our political system."

Swift, who is a member of the House Telecommunications Subcommittee, said

THE TOBACCO INSTITUTE.

he is concerned about the "glib assurance from ulta-conservatives and some of my neo-liberal colleagues" that the marketplace "has magical properties which will set all wrong things right immediately upon the elimination of government involvement."

Swift has his own problems with government regulation of broadcasting; he said he agrees with Fowler on "the silliness of community ascertainment" and his observations on the need to rationalize the multiple ownership rules. But instead of throwing out all regulations, Swift calls for "modified, less regulatory, freer broadcast approach."

He called, as he has in the past, for "quantifying" the public trust responsibility, and thereby eliminating "the need for layers of subjective regulation ..." He also said that "the heart of the public trust responsibility is really localism, a station holding a mirror up to its community." And he said: "must-carry rules and prime time access are prime examples of prudent considerations appropriate to insure that localism survives."

Simon, in his article, said "unregulation" is "a program for privatization of the First Amendment freedoms of speech and press." He said that under Fowler's approach, the government's role "would not be to protect the First Amendment interests of the public as a whole as stated under the 1934 Communications Act, but instead, to create and enforce property rights in the corporate enterprises that have been enjoying governmentally granted

24-HR. PROFESSIONAL SERVICE FOR COLLINS & CONTINENTAL AM & FM TRANSMITTERS

Continental Electronics offers parts and engineering service for all Collins AM & FM transmitters.

Whenever you want parts or service for your Collins or Continental equipment, phone our service numbers day or night,

"A New Strength in Radio Broadcasting Equipment"

Washington Watch

CRT filing. National Association of Broadcasters filed objections with Copyright Royalty Tribunal to sports organizations' request for declaratory ruling and exclusion of some NAB testimony and evidence on 1980 cable royalty distribution. NAB states that joint sports claimants are attempting to paint "the issue here as the same one that was decided by the tribunal in the 1978 and 1979 distribution proceedings. That is simply not true. The issue NAB's evidence addresses, the value of broadcasters' copyright interests in sports telecasts, has never been determined by the tribunal." NAB also asked U.S. Court of Appeals for District of Columbia Circuit to require CRT to consider broadcasters' claims for compensation for cable carriage of distant telecasts of sports events and commercial radio station signals for 1979 cable royalty distribution proceeding. Broadcasters also disagreed with sports organizations argument that "broadcasters and sports teams are joint authors and thus joint owners of copyright."

Which one. FCC's Office of Science and Technology has issued report, "A Comparison of Alternative Spectrum Regulatory Approaches," which compares methods of regulating spectrum. Report, written by Rodney Small, FCC economist, analyzes and contrasts current method of spectrum management with a free market approach. Small said Office of Science and Technology hoped to receive comments on various proposals discussed in report. If report draws favorable reaction, it might be followed by notice of inquiry or notice of proposed rulemaking examining proposals in further detail, Small said.

Gesundheit. Complaints and compliance division of FCC Broadcast Bureau has denied fairness doctrine complaint by The Joint Council of Allergy and Immunology which alleged that ABC World News Tonight broadcast had violated doctrine in presenting only one side of issue on "what doctors should do for this nation's nearly 35 million allergy sufferers." While council said broadcast "appeared to endorse... 'clinical ecology,' " it failed to indicate that traditional medical treatment had been shown to be safe and effective. In dismissing complaint, Broadcast Bureau said council hadn't shown that subject was controversial one of public importance.

Reversal. FCC has granted Sound Radio Inc. construction permit for facilities of WNJR(AM) Newark, N.J., reversing Review Board decision. In 1978 decision, Review Board disqualified all applicants in proceeding—Gilbert Broadcasting Corp., Community Group for North New Jersey Radio Inc., Fidelity Voices Inc. and Sound—in wake of finding that Community, Sound and Fidelity, as interim operators known as 1430 Associates, had been responsible for disguised lottery broadcasts, even if they had been unaware of broadcast's true nature. Review Board also found that principal for Gilbert had been involved. Commission, however, said that while there might be grounds to disqualify permanent licensee under those circumstances, it didn't think findings on 1430's interim operations reflected sufficiently upon applicants' qualifications to warrant denial of their applications and argued that they should each be given comparative demerits for deficiencies in supervising station instead. That accomplished, FCC then found Sound to be preferred applicant on standard comparative issue.

engineering studies on whether proposals involve interference with existing stations or with other pending proposals, has asked low-power TV applicants that are proposing directional antenna systems to submit all technical information by Nov. 1. FCC noted that without knowledge of precise shape of applicant's radiation pattern, commission wouldn't be able to determine whether stations would provide adequate interference protection to other stations.

NBMC filing. National Black Media Coalition, arguing that stations' equal employment opportunity efforts have been deficient, has petitioned FCC to deny renewals of 13 Michigan and Ohio stations: Ohio University's noncommercial woub-TV-AM-FM Athens, Ohio; Reams Broadcasting Corp's wcwa(AM) and wiot(FM) Toledo, Ohio; Media-Com Inc.'s wknt(AM) and wnir(FM) Kent, Ohio; Wdbn Inc.'s wdbn(FM) Medina, Ohio; Lake Erie Radio Co.'s wJw(AM) Cleveland; Delta College's noncommercial wucm-TV University Center, Mich.; Booth American Co.'s wsgw(AM) and wiog(FM) Saginaw, Mich., and Shamrock Broadcasting Co.'s wwww(FM) Detroit.

Radio file. National Cable Television Association has asked FCC to dismiss proposal of Amateur Radio Relay League to prohibit cable systems from operating on frequencies assigned to amateur radio service. The ARRL proposal, NCTA said, is "an excessive and unwarranted response to the interference problems which allegedly exist between cable systems and amateur radio stations." Its adoption, it added, would "severely curtail the operations of cable systems."

and protected licenses to broadcast."

Simon also attacked Fowler's principal argument for "unregulation"—that the scarcity rationale for regulation no longer exists. Simon says it does. He noted that there are 100 million more people in the U.S. today than there were in 1929, when the population was 123 million, "with an equal claim on the same number of broadcast frequencies." What's more, he said, there has been an "explosive growth of potential uses for the same quality of spectrum that existed in 1934."

Simon contended that First Amendment values would be lost in Fowler's system of "unregulation." That philosophy articulates commercial values, he said. Only if there is a dollar value to the information will it be made available, he said, "and only to those with the resources to purchase the information." He contrasted that approach with "the First Amendment values of an uninhibited marketplace of ideas," and noted that the Supreme Court, in the Red Lion case, held that "'it is the right of the public to receive access to social, political, aesthetic, moral and other ideas and experiences which are crucial here.

Alaskan clear channel concerns

Breakdown of clears has presented few problems between U.S. and Canadian broadcasters, but some in Alaska are wary of interference

The U.S.'s brewing radio war with Cuba makes for scare headlines. But it's hardly the norm in an area of international relations where mutual self-interest imposes a degree of civility on negotiations that assures they will escape the attention of all but those most intimately involved. Take the ongoing talks with Canada over a new AM relationship.

While attention has been focused on the Reagan administration's efforts to win congressional approval of a station to broadcast to Cuba—a move American broadcasters fear would intensify the degree of Cuban-caused interference they already suffer—U.S.-Canadian talks over a new AM treaty and over each country's use of the other's clear channels have gone virtually unnoticed.

But not entirely unnoticed. Alaskan broadcasters are keeping an eye on developments and, by their letters, to the FCC, have let it be known they are uneasy. They are concerned about Canadian proposals to locate new AM stations on what are now U.S. clears. The 25 U.S. and seven Canadian clears will become available for occupancy by the other country when Canada makes good its plan to abrogate the North American Regional Broadcasting Agreement, which bars use of the other country's clear channels within 650 miles of the border.

The treaty being negotiated would replace NARBA, and would be used to fill in the agreement governing use of the AM band that Western Hemisphere countries concluded in Rio de Janeiro, in December.

That agreement does not provide for clear channels; stations are classified according to power and use.

U.S. and Canadian officials, who have held a series of negotiating sessions since early in the year, will meet again today (Oct. 18), in Washington. Wilson LaFollette, chief of the FCC's technical and information branch, who is participating in the talks, last week said both sides are "optimistic" that work on the new treaty and on resolving the incompatibilities on the clear channels can be concluded in "the first half of 1983."

The Alaskan concerns—which have not vet been echoed by broadcasters in the lower 48-involve the close to 200 assignments on U.S. clears that Canada is seeking. Tom Busch, of KNOM(AM) Nome, Alaska, last week said Alaskans fear some of those assignments would result in interference to their stations, particularly in rural areas. He expressed surprise that the clear channel talks had appeared to stir comparatively little interest among clear channel stations in the continental U.S. He noted that generally clear channel stations had been quick to oppose the introduction of outlets on their frequencies thousands of miles away, in Alaska.

LaFollete attempted to ease concerns. "We have pointed out these matters to Canada," he said. "And those concerns are being taken care of." He noted that Canada has concerns of its own. "They have a few proposals for stations in remote areas where they are concerned about in-

terference from stations in the lower 48." LaFollette said, adding, "When these needs arise, negotiations proceed to try to make sure each side gets extended coverage. Alaskans concerns are being worked into the bilateral discussions."

Americans are showing considerable interest in the clears of both countries. Some 150 "filings of interest" were submitted in response to a commission request for information on the number of applications that might be filed for assignments on Canadian clears in the U.S. And more than 300 applications have been filed for assignments on the U.S. clears.

Sorting out incompatibilities among proposals for stations on each other's clears is not the only allocations matter confronting the U.S. and Canadian negotiators. The U.S. is seeking to include in the bilateral agreement provisions that would permit increases in power for Class IV stations and for extending the hours of daytimers. Under one U.S. proposal, Class IV's could operate with up to 1 kw, instead of at the present limit of 250 w. And under a second proposal, which would be in line with a pending FCC rulemaking, daytimers would operate postsunset. The proposal also would liberalize existing authority to operate presunrise.

The U.S. will take up a number of the same issues when negotiations begin with Mexico on Nov. 15 to update, in light of the Rio agreement, the 1967 bilateral agreement that governs the two countries' employment of the AM band.

Books For Broadcasters

T51263 HOW TO BE A DISC JOCKEY,

by Dan Ramsey. THE complete manual on what a disc jockey really is-and isn't! If you want to be successful as a disc jockey, this is the book to have. Start off with a description of what it's all about, including great advice from three jocks who "made it". Then learn ways to increase your own chances of success, including advance planning and being adaptable. There's also info on developing an on-air personality, how to develop your voice and communication skills, how to be persuasive and how to speak "naturally" on a program. You also find out how to produce a radio show, how to put together a music programming format, how to conduct a survey, and how to produce radio commercials. And since a radio station is not a one-man operation, you'll also learn how to work with engineers, sales and traffic personnel, managers and others. This book shows you what it really takes to be a DJ and how you can achieve that goal. 224 pps., 63 illus.

DBS headlines PSSC conference

Five major system proponents will lead a three-day trip into the satellite universe

Representatives of five companies that have proposed direct broadcast satellite systems will kick off three days of satellite talk this Wednesday (Oct. 20) at the Washington Hilton hotel.

The DBS proponents will speak at the Public Service Satellite Consortium's seventh annual conference. They include Judith Elnicki, vice president, public affairs, Satellite Television Corp., the only company so far to win FCC approval of its plans: Wilbur Pritchard, president, DBS Corp.: Robert Johnson, chairman, Video Satellite Systems: Robert Fransen, vice president, programing and news, United States Satellite Broadcasting, and Richard L. Vega, consultant to Graphic Scanning.

Although the PSSC conference is only a day long, it will be followed on Thursday by a two-day satellite users' conference sponsored by Services by Satellite (Sat-Serve), the for-profit subsidiary of the nonprofit PSSC. That conference will be highlighted by a panel session Thursday morning featuring Robert N. Wold, chairman and president, Robert Wold Co.: Stanley Hubbard, president and general

manager, Hubbard Broadcasting, the parent company of USSB, and Robert Schmidt, president, Communications Technology Management.

The PSSC comprises schools, hospitals and other nonprofit institutions and the agenda of its annual conference was planned to appeal to the membership. It includes sessions on satellite networks for universities and colleges, chaired by Elizabeth Young, president, PSSC and SatServ: broadening the educational market through satellites, and establishing teleconferencing networks.

DBS also will be on the agenda of the Sat Serv users' conference. Frank Magid, Frank Magid Co., and Michael Lubin, assistant, vice president, new business development, Linkabit, will discuss on Thursday morning what market exists for DBS.

Other sessions will address international uses of satellites, encryption, video-conferencing, converting downlinks into uplinks, transportable earth stations, low-power television, two-degree spacing and satellite usage during the rest of the decade.

There will be a number of exhibitors on hand for both conferences, including the Appalachian Community Service Network, Colorado Video, Compucon, Comsat General, Comsearch, Scientific-Atlanta, Videostar Connections and Western Union Video Conferencing.

Ins Sync

Make your bids. American Satellite Co., Rockville, Md.-based partnership of Continental Telecom Inc. and Fairchild Industries, has invited several companies to bid for \$100-million contract to build two domestic communications satellites. Satellites, which are scheduled for launch in September 1985 and September 1986, will have C-band and K-band capability. ASC expects to evaluate and award contract by December 1982.

Safer St. Louis. Warner Amex Cable Communications has introduced security service to 90,000 homes in 26 metropolitan St. Louis communities. Fire, burglary and medical alert services are in package available to noncabled as well as cabled residences and businesses.

In the ball game. Telemation Inc., Salt Lake City, says its mobile production division has received biggest contract in its one-year history. According to Telemation President Terry Hoffman, division has \$500,000 agreement with Metrosports Inc. to provide production facilities and crew for sports syndicator's lineup of NCAA football and basketball during 1982-83 season.

Sports captioning. Metrosports, largest independent sports syndicator, and National Captioning Institute have announced plans to provide closed captioning for major basketball and football games utilizing NCI's expanded captioning format. Deal includes NCI captioning 12 sporting events including football Liberty and Aloha Bowls, plus various college basketball games. Sports captioning to be provided follows NCI's "scoreboard" captions that it created for 1981 Sugar and Super Bowls and that provided statistics on downs and yards to go, time outs remaining, scoring summaries, penalties and change of possession. New Metrosports captions will include background information on teams and players, statistics and some color commentary. Captioned Metrosports will be available on TV and cable.

Beyond the Fifth Estate

Cautious words on videotext

Yankee Group seminar conferees say video games will drive two-way cable services more so than videotext, BOC's will seek inroads

Those attending a two-day conference in New York last week sponsored by the Yankee Group, a Boston-based communications consulting firm, were told that entertainment options (video games and gambling) will be the driving force behind two-way interactive services such as videotext, and that once the AT&T divestiture plan is put into effect the former Bell operating companies will be looking for new businesses and may seek Fifth Estate alliances with cable operators and broadcasters. The Boston Globe's Robert Phelps also was on hand to discuss the 1985 launch of a Viewtron videotext system with Knight Ridder Newspapers in Boston.

Mark Kriss, a research manager with the Yankee Group, said videotext today is driven by the newspaper and broadcasting industries, which seek a solution to "declining market shares." Those groups, he said, perceive videotext as "an extension of the office into the home." However, that perception "incorporates obsolete assumptions," including the belief that videotext operators have to sell subscribers an expensive home terminal and "somehow cost justify it with an array of services [known as service integration]." The personal computer explosion has made

that premise obsolete, said Kriss, noting that by 1985 projections are that there will be 13 million home computers, accounting for about 15% of all television households. And the profile of the typical home computer owner closely tracks that of the videotext target market—25-44-years old, earning \$25,000 or more.

Kriss said that videotext support by bankers and retailers is questionable, since they "may just be testing the waters." As to advertising support of videotext, Kriss said that the community has barely begun to support cable television, which he described as "vastly superior" to videotext as a medium for advertising.

A Yankee Group study of home computer use indicates that 45% of all usage last year was for entertainment related activities (games essentially), 30% for educational activities, 15% for accessing data bases and 10% for personal finances.

As for two-way cable, the Yankee Group predicts that 1% of the industry's revenues will be derived from transactional services in 1985 and perhaps 4% by 1990. By the latter year, less than 10% of all cable households will have two-way capability. Systems with two-way capability might implement "network" games, said Kriss, combining advanced computer-game technology with electronic messaging and high-speed digital networks.

Howard Anderson, president of the Yankee Group, said that the former BOC's will be looking to provide many new services and will have to move quickly (over the next two years) to get

Delta makes your deliveries DASH.

Delta DASH* delivers the same day to over 90 cities across the U.S and abroad, covering 10,000 communities. Why get that small package delivered tomorrow when you can DASH it today? DASH (Delta Air Lines Special Handling) delivers packages up to 70 lbs... probably to the destination you have in mind. So give us a ring at the Delta

Marketing Office in the city nearest you. Or call DASH at (800) 638-7333 for pick up or delivery.

For top priority shipments over 70 lbs., use Delta Air Express. It guarantees your shipment gets on the flight specified. For full details, call your nearest Delta Marketing Office.

DELTA AIR CARGO. READY ALL-AROUND.

into such businesses as customer-premise equipment distribution, cellular radio and "least cost routing," finding the most cost-effective routes for long-line services. If they don't move quickly, he said, those companies will remain "invisible." He also suggested that state or regional public utilities commissions will probably approve, if not encourage, those phone companies becoming involved in side ventures in order to keep basic- and access-service rates low.

Phelps of the Boston Globe said that it was the goal of the paper and KRN to get its joint videotext venture on line by January 1985. Late next year the paper will make the final decision. As the operation is envisioned, the partners anticipate three major lines of business—news, provided by the Globe, KRN and additional sources; transactional, divided into retail, financial and ticketing services, and a private-user business where professional groups can use message networks.

The news business would be advertiser-supported, and would include both display and directory advertising. Two hundred thousand frames of text will be on the system.

"We're not wedded to a single product, or fun and games," said Phelps, "we're ready to go" wherever the demand arises. He said the venture was now gathering data. "We want to know all we can about our [potential] customers." A demonstration system should be ready by early 1983.

The home terminal costs are not cheap. The first generation line will cost \$600; the second generation about \$700 to \$800, as more sophisticated models come on line. Subscribers, he said, can expect to pay \$15 per month for basic service plus \$15 for telephone-line costs. Special features, like video games, would be provided at additional cost.

Phelps said the *Globe* will spend at least \$8 million, and perhaps as much as \$15 million, to launch the venture, most of which would go toward computer items.

Boston Viewtron will use AT&T's frame-creation terminal to create pages of text. Phelps said that technology "is not as nice as Telidon . . . you can't do as much with the graphics and be economically viable." But the AT&T equipment is impressive nonetheless. "You can produce almost any color you want," he said.

Phelps was conservative when it came to predicting when the venture might begin to make money, noting that it may be as late as the mid-1990's. "This is not the tail that will wag the *Boston Globe* in two years," he said.

Space shuttle is for the birds

Next flight of Columbia will carry SBS-3 and Anik-C satellites into orbit

When the space shuttle Columbia is launched for its fifth flight Nov. 11, it will be carrying two commercial satellites into space. The birds—Satellite Business System's SBS-3 and Canada's Telesat's Anik-C—are the first commercial payloads the shuttle will carry into space.

The birds will be launched 24 hours apart, SBS's being placed in orbit about eight hours after the shuttle is launched from the Kennedy Space Center in Florida. The 7,200-pound satellites will undertake a series of maneuvers after Columbia releases them from its cargo bays before finding the correct geosynchronous orbit for each. SBS's is 94 degrees west longitude, Anik-C 117.5 degrees west longitude. After more tests, the birds will become operational, expected some time early next year.

SBS-3 is the third bird in SBS's fleet and will add 50% more capacity to current services, primarily residential long-distance telephone. The new bird will enable SBS to launch its message service II, a new interstate, long-distance telephone service for residences and small businesses.

Anik-C will join five other Anik birds in the sky and hopes to become one of Canada's main cable satellites. It will be Anik's most powerful bird launched to date, projecting four spot beams onto the earth. Earth stations as small as one-meter will be able to pick up television programing.

Several pay cable channels, expected to be launched early next year, telephone conversations and provincial educational channels will be on the bird. The option for interim DBS (utilizing the spot beams) remains open. Oak Industries was going to use the bird as part of its first phase of DBS operation, but Oak scrapped that phase two weeks ago (BROADCASTING, Oct. 11).

Robert C. Hall, president of SBS, said "Since the inception of SBS ... we have anticipated shuttle launches of our spacecraft. The advent of operational shuttle missions is a proud time for NASA and shuttle contractors."

The ejection procedure begins when the shuttle's cargo bays are open and an aluminum canopy locks in place to protect the cargo from the sun. A spin table in the cradle where the satellites are housed is activated, rotating the seven-foot birds at about 50 revolutions per minute.

The shuttle crew maneuvers the Columbia into the proper orbit for ejection. Ejection occurs when a clamp is released by explosive bolts. The satellites are released at a speed of three feet per second.

Once the birds are out, they must be raised from their altitude of 185 miles to about 22,500 miles, and slowed in orbit from 17,300 miles per hour to 6,800 miles per hour, to reach geostationary orbit. Two in-orbit firings, one by the PAM-D motor and the other by the apogee motor, will place the satellites in proper orbit.

SBS also has made requests to launch a fourth and fifth satellite from the shuttle. The cost of this launch for SBS is \$8 million.

Telesat plans to launch two more birds from the space shuttle in April 1983 and April 1984. The cost to Telesat for this launch is between \$9 million to \$10 million, substantially below the Delta rocket launch costs of between \$25 million and \$31 million.

Election databank. United Press International has created electronic databank for upcoming national off-year elections for Senate, House and governor races, Called UPI Datapolitix, bank consists of about 275 items, totaling about 120,000 words. Information will be supplied to all UPI bureaus and made available to newspaper and broadcast stations on subscriber basis. Items on file include stories on all House races in each state, analyses of 33 Senate and 36 governor races, plus biographies of candidates, list of retiring officeholders, marginal House seats, newly created House districts and races matching old rivals.

CKLW - Detroit, MI is broadcasting Harris AM Stereo

For complete information, write Harris Corporation, Broadcast Division, P.O. Box 4290, Quincy, Illinois 62305-4290.

AddedAttractions

BROADCASTING's editors and writers are at work on a number of special reporting assignments scheduled (*) to appear during the next few months. Among the more prominent prospects:

- Oct. 25 From across the Atlantic: BROADCASTING's on-the-scene report of Vidcom 82 (International Video Communications Market). And from this side of the ocean, an advance report on what to expect at the Atlantic Cable Show on the boardwalk of Atlantic City, N.J. Plus: The ATC Story. A journalistic snapshot of cable television's largest MSO as it passes a historic milestone: two million connections, four million subscriptions.
- Nov. 8 It's a big week for engineers, advertisers and the cable industry and BROADCASTING will preview coverage of the Society of Motion Picture and Television Engineers conference in New York, the Association of National Advertisers meeting in Palm Beach, Fla., and NCTA's Cable Programing Conference in Los Angeles.
- Nov. 15 Cable Week in California. A complete rundown of exhibit floor, the conference agenda and the transponder universe are among the elements prefacing BROADCASTING's coverage of the Western Cable Show. Also included will be all the news from SMPTE and ANA, plus a peek at the Television Bureau of Advertising's San Francisco meeting. Plus: a special report on the 10th Anniversary of HBO.
- Jan. 3 A BROADCASTING's annual double issue, featuring the first installment of "The Second 50 Years: 1982" and "Forecast: 1983." A summing up of the year that's passed and a forward look at the year that will be.

BROADCASTING will continue to update this schedule as appropriate, (a) to give readers an idea of what's upcoming, (b) to give sources due notice that we're at work in their territories and (c) to give advertisers a chance to plan their own marketing strategies in tandem with these editorial opportunities.

New stations

FM applications

- Hanahan, S.C.—Hanhan Communications Inc. seeks 96.1 mhz, 100 kw, HAAT; 1,136 ft. Address; 70 Logan Street, Charleston, S.C. 29401. Principals: Jeffrey D. Southmayd (40%), Stephen J. Hannon (35%) and Lawrence O. Thompson (25%), Southmayd is Washington communications attorney and principal in applicant for LPTV's at Glen Burnie, Towson and Bethesda, all Maryland His wife, Nancy Southmayd, is applicant for new FM's at Snowmass Village, Colo.: Bluffton, S.C.; and Middleton, Md. Filed Sept. 29,
- Newberry, S.C. Newberry Media Co. seeks 106.3 mhz, 1.7 kw, HAAT; 376 ft. Address; 8 Tulip Street, Greenville, S.C. 29609, Principal; J. Stephen McClure (100%), who is son of J.R. McClure, owner of four AM's, Filed Oct. 4.
- North Charleston, S.C.—Bormac Broadcasters seeks 96.1 mhz, 100 kw, HAAT: 939 ft. Address: Suite 1759, 630 Fifth Avenue, New York 10111. Principals: Elayne N. Boros and Maria N. McComas (50% each). McComas owns 26% of permittee WOSO(AM) San Juan, P.R. Boros is applicant for new FM's at Miamit Peoria, Ariz.; and Poughkeepsie, N.Y. Filed Sept. 29.
- North Charleston, S.C.—Charleston Minority Radio Ltd. seeks 96.1 mhz, 100 kw, HAAT: 1.500 ft. Address: Suite 418, Uptain Building, Chattanooga. Tenn. 37411. Principals: Joey Dan Stone (95%) and Noemi Santana (5%), who have no other broadcast interests. Filed Sept. 29.
- North Charleston, S.C.—Lowcountry Women Communications Inc. seeks 96.1 mhz, 100 kw, HAAT: 1.194 ft. Address: 1868 Rughy Lane, Charleston, S.C. 29407. Principal: Sonja Pearlman (100%), who is former regional sales executive at WKXZ(AM)-WKTM(FM) North Charleston and radio sales account executive at WTMA(AM)-WPXI(FM) Charleston, Filed Sept. 29,
- North Charleston, S.C.—North Charleston Broadcasting Inc. seeks 96.1 mhz, 95 kw, HAAT: 1,350 ft. Address: Highway 70 East, New Bern, N.C. 28560. Principals: Larry Williams (39%), J.D. Conner (26%), Ed Seeger (25%) and Rona Burns (10%), Conner is president and principal owner of WBIC(AM) New Bern and WSFL(FM) Bridgeton, both North Carolina, where Seeger is general manager. William is general manager of WBLX(AM) Mobile, Ala., and Burns is operations manager at WKBC-AM-FM North Wilkesboro, N.C. Filed Sept. 29,
- North Charleston, S.C.—O'Grady Broadcasting Inc.

seeks 96.1 mhz, 100 kw, 11AAT: 373 ft. Address: 42 10th Avenue, Charleston, S.C. 29403. Principals: Susan B. O'Grady, president, and family, O'Grady family owns WGCAIAM) Charleston, S.C. Filed Sept. 29.

- North Charleston, S.C.—Santee Broadcasting Inc. seeks 96.1 mhz, 100 kw, HAAT: 1010 ft. Address: 1 North Guignard Drive, Sumter, S.C. 29150, Principals: Henry T. Everett Jr. and George R. Tindal (50% each), who have no other broadcast interests. Filed Sept. 29,
- North Charleston, S.C.-Southern Broadcasting Corp. seeks 96.1 mhz, 97.7 kw, HAAT: 1,084 ft. Address: 2000 Harley Street, North Charleston, S.C. 29405. Principals: William P. Rovers, president, and others. None have other broadcast interests. Filed Sept. 29.
- North Charleston, S.C.—Wil-La-Saun seeks 96.1 mhz, 100 kw, HAAT: 749 ft. Address: 218 Rutledge Ave., Charleston, S.C. 29403. Principals: D. Ward Wilson (48%), William Saunders (42%) and Juanita W. LaRouche (10%). Wilson and Saunders are part owners of WPAL(AM) Charleston, S.C., where LaRouche is station manager, LaRouche also owns 50%, and Saunders 9%, of WDPN(FM) Columbia, S.C. Filed Sept. 29.
- Denton, Tex.—Payne Radio Properties seeks 99.1
 mhz, 100 kw, HAAT: 1,337 ft. Address: 5840 South Memorial Suite 103, Tulsa, Okla. 74145, Principal: Gail Payne (83%) and five others. Gail Payne is wife of William II. Payne, president of KTFX(FM) Tulsa, Okla, Filed Sept. 28.
- Lake Dallas-Denton, Tex.—North Texas Communications Group seeks 99.1 mhz, 100 kw, HAAT: 920 ft. Address: 4113 Bruk Road, Fort Worth, Tex. 76119. Principals: James Kellum and Maurice Barksdale (40% each) and Charles W. Baker (20%), Baker is community relations director and public affairs producer at KXAS-TV Dallas-Fort Worth. Barksdale and Kellum are principals in various LPTV applications. Filed Sept. 29,
- Spokane, Wash. —Claire Cordon seeks 103.9 mhz. 3 kw. HAAT: 300 ft. Address: 2222 West Courtland, Spokane 99201. Principal: Cordon has no other broadeast interests. Filed Sept. 29.
- Spokane, Was. Pacific Metrocom NW seeks 103.9 mhz, 3 kw, HAAT: 300 ft. Address: 16930 Walnut S.W., Prior Lake, Minn, 55372, Principals: John Russo (75%) and A. Michael Siegel (25%), who also are applicant for new FM at Ashland, Ore. Filed Sept. 29.

TV applications

■ Cape Coral, Fla.—Cape Coral Broadcast Production and Management Corp. seeks ch. 36; ERP; 503.5 kw vis., 100.7 kw aur., 11AAT; 964 ft.; ant. height above ground: 973 ft. Address: Route 2, Box 251, Alva, Fla.

33920. Legal counsel: Stuart B, Mitchell, Falls Church. Va. Principals: Group of seven stockholders headed by Art Rohwedder, president and 11% owner. Principals include Don S. Sundquist and Leonard R. Harris (16.7% each), who are principal owners of CP's for new TV's at Key West and Melbourne, both Florida. Filed Sept. 28.

- Fort Walton Beach, Fla. Beacon Broadcasting Inc. seeks ch. 35; ERP: 826 kw vis., 99 kw aur., HAAT: 196 Ft.; ant. height above ground: 224 ft. Address: P. O. Box 7008. Columbus, Ga. 31908. Principal: Subsidiary of Quality Media Corp. William J. Kitchen is president. Beacon Broadcasting also is Licensee of WBFJ(AM) Winston-Salem, N.C.; WMOC(AM) Chattanooga, Tenn.; and WIXO(AM) Mobile, Ala. Filed Sept. 30.
- Fort Walton, Fla. Hilton Organizations Inc. seeks ch. 52; ERP: 1,987 kw vis., 198.7 kw aur., HAAT: 656 ft.; ant. height above ground: 618 ft. Address: 5839 Mariner Drive, Tampa, Fla. 33609. Legal counsel: Baraff, Koerner, Olender & Hochberg, Washington. Principal: R.C. Hilton (100%), who owns WSWS-TV Opeliika, Ala., and is permittee of WSMF-TV Florence, S.C. Filed Sept. 20.
- Humacro, P.R. Angel A. Bocanegra seeks ch. 68; ERP: 825 kw vis., 99 kw aur. HAAT: 773 ft.; ant. height above ground: 218 ft. Address: P.O. Box 503, Luguilla, P.R. 00673, Principal: Bocanegra has no other broadcast interests. Filed Aug. 26.
- Ponce, P.R. Zeal Broadcasting seeks ch. 48; ERP: 100 kw vis., 10 kw aur., HAAT: 858 ft.; ant. height above ground: 113 ft. Address: Blg. 10-13, Santa Rosa, Maymon, P.R. 00610. Legal Counsel: Baraff, Koerner, Olender & Hochberg, Washington. Principals: Tomas Correa Acevedo and wife, Edna Muniz (50% each), who have no other broadcast interests. Filed Sept. 22.
- "Alvin, Tex.—Living Stones Church Inc. seeks ch. 67; ERP: 54.84 kw vis., 5.48 kw aur., HAAT: 30 ft.; ant. height above ground: 1.040 ft. Address: 1407 Victory Lane, P. O. Box 487, Alvin 77511, Principal: Noncommercial applicant headed by Rev. Alan Lloyd Handl, president, who has no other broadcast interests. Filed
- Texarkana, Tex.—Floyd Bell seeks ch. 17; ERP: 16.22 kw vis., 1.62 kw aur., HAAT: 471 ft.; ant. height above ground:, 430 ft. Address: 303 West Broad Street, Texarkana 75501. Principal: Bell owns 51% of KADO-AM-FM Texarkana, Filed Sept. 17.

FM actions

revenue: \$44,000. Principal: Hugh J. Williams (100%) who owns KVSL(AM) Show Low, Ariz. (BPH-811110Al). Action Sept. 23.

- *Watertown, N.Y.—St. Lawrence Valley Education Television Counsil Inc. dismissed application for 89.5 mhz, 2.17 kw, HAAT: 1,150 ft. (BPED-801017AG). Action Sept. 27.
- Grafton, N.D.—KGPC Co. granted 100.9 mhz, 3 kw, HAAT: 125 ft. Address: 45 West 6th Street, Grafton 58237. Estimated construction costs: \$40,000: first-quarter operating cost: \$15,000, first-year revenue: \$73,000. Principals: Gary C. Pearson, president (49.6%), Rodney Webb and Del Nygard (24.8% each) and three others who own KGPC(AM) Grafton. (BPH-820107AQ). Action Sept. 23.

TV actions

- Mayaguez, P.R.—Michael L. Carter dismissed application for ch. 22; ERP: 90.3 kw vis., 9.3 kw aut., HAAT: 1,090 ft.; ant.; ant. height above ground: 133 ft. (BPCT-820412KE). Action Sept. 21.
- Tullahoma, Tenn.—Quin-Abi Broadcasting Inc. granted ch. 64; ERP: 557.2 kw vis., 11.4 kw aur. HAAT: 694 ft.; ant. height above ground: 1,102 ft. Adress: Westside Drive, Tullahoma, Tenn. 37388. Principals: Jerry P. Newton (82.5%), wife, Brenda J. Newton (7.5%), their children, Jerry and Cameron (5% each) and Jack L. Dickey (7.5%), who also owns W1RB(AM)-WLHQ(FM) Enterprise, Ala. (BPCT-820309KE). Action Sept. 24.
- Houston, Tex.—Deborah A. Richard dismissed application for ch. 61; ERP: 316 kw vis., 31.6 kw aur. HAAT: 1,167 ft.; ant. height above ground: 1,250 ft. (BPCT-820510KL). Action Sept. 15.
- Nederland, Tex. Texas Gulf Communications Inc. granted ch. 21; ERP: 4610 kw vis., 829 kw aur., HAAT: 1025 ft.; ant. height above ground: 1063.6 ft. Address One Plaza square, Port Arthur, Tex. Estimated construction cost: \$2,035,000; first-quarter operating cost: \$680,000; first-quarter revenue: \$500,000. Legal counsel: Rubin, Winston & Diercks, Washington Consulting engineer: Peter V. Guereckis & Associates, Potomac, Md. Principals: Beverly Parker, president (20%), and eight others at 10% each. Parker is Lamar University, Port Arthur, Tex., teacher and has no other broadcast interests. (BPCT-811124KH). Action Sept. 24.

Ownership changes

Applications

- KSAA(FM) Casa Grande, Ariz. (105.5 mhz, 3 kw, HAAT: 70 ft.)—Seeks assignment of license from Grande Communications Corp. to Darrel E. Brunson for \$225.000. Seller: Subsidiary of Wycom Corp., which is owned by William R. Sims. Wycom Corp. also owns 51% of KUGR(AM) Green River, Wyo, Wycom Corp. also bought, subject to FCC approval, 51% of KPIN(AM) Casa Grande, Ariz. (BROADCASTING, Aug. 31). Buyer: Brunson is executive vice-president and 30% owner of KSIT(FM) Rock Springs, Wyo. Filed Sept. 16.
- WFYV(FM) Atlantic Beach, Fla. (104.5 mhz, 100 kw, HAAT: 660 ft.)—Seeks assignment of license from BEN1 of Atlantic Beach Inc. to Metroplex Communications of Jacksonville Inc. for \$2.85 million. Seller is subsidiary of Philadelphia-based Broadcast Enterprises National Inc., group owner of four AM's and two FM's and one TV, headed by Ragan Henry. BENI also sold, subject to FCC approval, WCIN(AM) Cincinnati. Buyer is Cleveland-based group of two AM's and four FM's owned by Norman Wain and Robert Weiss, who also sold, subject to FCC approval, WHTTLAM) Miami for \$2.2 million (BROADCASTING, Aug. 30). Filed Oct. 4.
- WATL-TV Atlanta, Ga. (ABC, CBS, NBC, ch. 36, 2,030 kw vis., 304 kw aur., HAAT: 1,170 ft.)—Seeks transfer of control construction for Briarcliff Communications Group Inc. from D.R. Jones et al to ATL Acquisition Corp. Principals: Applicant seeks to transfer de facto control to transferee because it will have two seats on executive committee of board of directors while remaining shareholders will have one. ATL currently owns 30% of Briarcliff. Buyer is subsidiary of Sillerman-Morrow Broadcasting Group Inc., which is equally owned by Robert EX. Sillerman.

- Bruce Morrow and 425 Radio Associates. 425 Radio Associates is equally owned by Howard J. Tytel, Steven J. Kumble and Gerald Wendell. Sillerman-Morrow Broadcasting owns WALL(AM)-WKGL(FM) Middletown, N.Y.: WRAM(AM) Dover, N.J., and WJJB(FM) Hyde Park, N.J. Filed Sept. 3.
- WGML(AM) Hinesville, Ga. (AM: 990 khz, 250 w-D)—Seeks transfer of control of Liberty Broadcasting Co. from E.D. Steele Jr. (100% before: none after) to Charles E. Stovall (none before: 100% after). Consideration: \$250,000. Principals: Seller has no other broadcast interests. Buyer is Atlanta developer and business broker and has no other broadcast interests. Filed Aug. 31.
- WGEC(FM) Springfield, Ga. (103.9 mhz, 3 kw, HAAT: 300 ft.)—Seeks assignment of license from Effingham Enterprises Inc. to Christian Enterprises for \$305,000. Seller: Group of ten stockholders. Arte Tebeau is president. Buyer: Noncommercial corporation headed by James N. Birkitt Sr., president. Christian Enterprises also is licensee of WIVE(AM) Ashland, Va. Filed Oct. 4.
- WVTL(FM) Monticello, Ind. (95.3 mhz, 3 kw, HAAT: 135 ft.)—Seeks assignment of license from Twin Lakes Broadcasting Inc. to Tippecanoe Broadcasting Inc. for \$425.000. Seller: Estate of Leon Buck (57.35%) and W. Douglas McLuen (42.65%) who have no other broadcast interests. Buyer: Neal Nussbaum and Mark Bauer (50% each). Nussbaum is TV program syndicator and former part owner of WFRL(AM)-WXXQ(FM) Freeport, III. Bauer is Goodland, Ind., attorney. Neither have other broadcast interests. Filed Sept. 15.
- KOLT(AM) Scottsbluff, Neb. (1320 khz, 5 kw-D, 1 kw-N)—Seeks transfer of control of The Hilliard Co. from Russell G. Hilliard and family (100% before: none after) to Virl Davis and others (none before: 100% after). Consideration: 1,867,500. Principals: Seller Russell Hilliard owns 50% of KCMP(AM)-KCNQ(FM)[CP] Brush, Colo. Buyer is owned by Clara Petersen (27%), and husband, James Petersen (22%). Gary Drown, Virl Davis (16.33% each) and Melvin Sauer and Judy Wilson (8.17% each). Except Clara Petersen, they are all employees of KOLT(AM). Excluding James Petersen and Gary Drown, they own KPNY(FM) Alliance, Neb. Filed Oct. 4.
- WIMG(AM) Trenton, N.J. (1300 khz, 5 kw-D, 1 kw-N)—Seeks assignment of license from Progressive Communications Inc. to Crusade Broadcasting Corp. for \$425,000 (BROADCASTING, Oct. 11). Seller: Jeanne Greenberg and husband. Herbert Greenberg, who have no other broadcast interests. Buyer: L.E. Willis, who owns WPCE(AM) Portsmouth. WOW1(FM) Norfolk and WGOE(AM) Richmond, all Virginia, and WKUE(FM) Green Cove Springs, Fla. Filed Oct. 4.
- WOKN(FM) Goldsboro, N.C. (102.3 mhz, 3 kw HAAT: 275 ft.)—Seeks transfer of control of WOKN Inc. from George G. Beasley (90% before: none after) to Eastern Regional Broadcasting Inc. (none before: 100% after). Consideration: \$650,000. Principals: Seller is Goldsboro, N.C.-based group of seven AM's and six FM's principally owned by George Beasley, who last bought WTIP(AM)-WTIO(FM) Charleston, W. Va., for \$1,425,000. (BROADCASTING, May 24), and bought, subject to FCC approval, WTSB(AM)-WGSS(FM) Lumberton, N.C., for \$980,000 (BROADCASTING, March 29). Buyer is controlled by Robert Swinson Jr. Swinson currently is general manager and 10% owner of WOKN(FM). Filed Sept. 22.
- WKEW(AM) Greensboro, N.C. (AM: 1400 khz, 1 kw-D, 250 w-N) Seeks assignment of license from Friendly Broadcasting of Greensboro Inc. to WKEW Partners for S661,260. Seller: W. S. In Contest

FCC actions

- FCC issued Notice of proposed rulemaking regarding use of lotteries or random selection to choose initial licenses when there is more than one applicant seeking same frequency.
- FCC denied WNYC(AM) New York request for permanent night operation from 6 a.m. to 10 p.m., and antenna relocation and increase in power to 50 kw. FCC also denied WOCO(AM) Minneapolis its request for antenna relocation and increase in power. Action Sept. 23.
- FCC granted Satellite Television Corp. CP for first phase of direct broadcast satellite system. Action Sept. 23.
- FCC Review Board reversed initial decision awarding CP to Birmingham Family Television Inc. for new TV at Birmingham, Ala., and instead granted competing application of Celtic Media Inc. (BROADCAST-ING, May 3). Board found applications basically equivalent, although rejected BFT's integration proposal upon which initial grant was based because it was specified in tardy amendment, and thus cannot be accorded full credit. Celtic won out because one of directors is local resident. Celtic is noncommercial religious organization. Action Sept. 23.
- FCC invited further comments seeking formulation

806-807 mhz range, FCC refused request by WVEU(TV) Atlanta, Ga., to increase its operating power for six months to half that authorized (2,63) kw). Action Sept. 29.

of policies regarding renewal applications of broadcas

licenses that are being considered in comparative hearing. Further comments are due Nov. 15 and replies by

■ Due to interference with land mobile stations in

Dec. 6, 1982. Action Sept. 29.

- Review Board denied license renewal of KROQ(AM) Burbank, Calif., and granted competing application of Royce International Broadcasting for new AM on same frequency. Board affirmed ALJ's conclusion that each of several adverse findings against licensee of KROQ required its disqualification. Royce International is owned by Edward R. Stolz II, owner of KWOD(FM) Sacramento, Calif. Action Sept. 20.
- FCC denied buy-out agreement between Mobile Broadcasting Service Inc., and MBB Inc., applicants for new AM on 960 khz at Daphne, Ala. Action Oct. 6.
- FCC upheld Broadcast Bureau action granting KWOA(FM) Mountain View, Ark., waiver to permit it to exclude recorded music from the majority-of-programing computation. Action Oct. 6.
- FCC approved assignment of license of WREN(AM) Topeka, Kan., to Radio Station WREN Inc., and waived duoply rule which prohibits certain signal contour overlap between commonly owned stations, Action Oct. 6.

TALK ...

One of the best talk pros is available. I've spent the last 2½ years doing PM & AM drive in Philadelphia. "7" share and 46,000 per 1/4 hour AM drive. Can handle music and news **WITH** phones.

Thinking of switching formats? I'll take care of that for you. Talk **CAN** come cheap but before you decide ... let's rap. 215—825-8592. Thanks.

Books For Broadcasters

T5213 HANDBOOK OF RADIO PUBLICITY & PROMOTION, by Jack MacDonald. This handbook is a virtual promotion encyclopedia—includes over 250.000 words, over 1.500 on-air promo themes adaptable to any format, and over 350 contests, stunts, station and personality promos! One idea alone of the hundreds offered can be worth many times the small cost of lins indispensable sourcebook. 372 pages. 8 ½ x 11" bound in long-life 3-ring binder.

T5819 JOURNALIST'S NOTEBOOK OF LIVE RADIO-TV NEWS, by Phillip Keirstead, network news producer, adjunct prof. Fordham Univ Written to provide broadcast journalists with a solid understanding of journalism concepts and techniques. Covers the techniques of gathering, processing, writing, and broadcasting live news, using the latest electronic equipment. Contains special sections on laws relating to journalism, documentaries, and editorials. 252 pp. 29 ills. \$12.95

T51161 TELEVISION PRODUCTION
HANDBOOK, by Doug Wardwell,
PhD. A complete guide to planning, staging and directing a TV
production. For those involved in

any phase of TV production, or who want to learn how the system works, this is a working guide dealing with every aspect of this art. It offers an easy-to-grasp explanation of the workings of television program production and transmission and the vital functions the management/production team must fulfill. Then, the author tells how to use cameras and related equipment, lighting, makeup, sound, visuals, graphics settings and props to achieve the desired effect and result. He also offers sound advice on direction, on-camera appearance and performance, and electronic editing of the tape recording for final refinement, It's a book designed not only

to teach, but to use as a day-to-day

guide, too! 304 pps., 406 illus, \$15.95

The National Broadcasting Company is now offering two exceptional opportunities for qualified technical professionals.

One position requires an individual with technical expertise in the field of television engineering. The ideal candidate will be self-motivated and have excellent planning and administrative skills. Responsibilities will include:

Television system design ● Television circuit design ● Digital systems planning ● Product design review ● Conceptual design ● New product technology ● Project implementation

Also required is a thorough understanding of analog and digital theory as applied to television systems, and experience in the application of television pickup, switching effects and editing equipment.

The major responsibilities of the second position will include television design and evaluation laboratories. Specific duties will involve:

- Advance planning and system conceptual studies
- Design, review and procurement support for major TV pickup and transmission systems use throughout NBC
- New equipment design planning and design reviews with manufacturers.
- Industry standardization activities and industry technical coordination.
- User division technical liaison, television equipment evaluation and budget analysis.

Required is heavy experience with a major TV equipment manufacturer, network, major station group or equivalent. Must also have considerable experience in industry representation on standards committee, technical societies or equivalent. Broad based knowledge of broadcast operations necessary. Educational background should include a BS in Engineering or Physics, with Communications options, and post-graduate studies in a related field. Both positions require strong ability in oral and written communications and excellent interpersonal skills. NBC offers salaries commensurate with experience and an excellent benefits package. For prompt consideration, please send resume with salary requirements in confidence to:

DIR's Meyrowitz: putting rock radio on center stage

When one of rock music's most popular groups, The Who, performs its last concert on Dec. 16 in Toronto, it will be broadcast live over hundreds of radio stations. The event will be a first for The Who, whose members have always avoided live broadcasts in favor of taped performances that can be edited. For DIR Broadcasting President Bob Meyrowitz, whose company last Thursday won the rights to the broadcast, The Who's final performance represents both a victory over several other companies that had been competing for the broadcast rights to the concert and one more confirmation of Meyrowitz's theory about radio programing.

For Meyrowitz, radio is meant to be a primary entertainment medium, not simply a background music and information service, and since he founded DIR with partner Peter Kauff in 1972, the company has grown from a two-man operation with contacts and an idea to one of the largest and most successful radio program production and syndication firms. With revenues in excess of \$5 million annually and a reputation for having produced some of the most innovative syndicated programs on radio, DIR appears to be headed nowhere but up, in spite of a fire at its New York headquarters early this year that destroyed many of the company's taped archives, as well as its production studios.

When DIR was founded, syndicated concerts for radio were virtually unheard of, said Meyrowitz, who developed the idea while working as an account executive at NBC Radio. In 1972, the Rolling Stones gave a free concert at Altamont, Calif., at which a riot broke out and a fan was killed. A free concert on the radio would be safer and would reach millions of people, thought Meyrowitz, who suggested the NBC Radio Network substitute a concert for some of its failing weekend Monitor programing in an effort to attract a new and younger audience. Meyrowitz was told his idea was terrible, that is until he'd lined up 70 affiliates to carry the program and found two advertisers to sponsor it. Three Dog Night, then one of the hottest rock groups, went on the air a few weeks later and shortly after that Meyrowitz left NBC to create DIR.

Although it was much tougher for the fledgling company to put together a national concert broadcast than it had been for a major network, Meyrowitz secured sponsors for his first two programs and after they were aired, won commitments from those sponsors for a series of six additional concerts. The King Biscuit Flower

Robert Meyrowitz—president, DIR Broadcasting, New York: b. June 9, 1942, Brooklyn, N.Y.; BA in history, Syracuse University, Syracuse, N.Y., 1965; station relations staff, then research staff, then director of research, ABC Radio, 1965-1967; director of research, Hearst Magazines, New York, 1967; director of sales development, then account executive, NBC Radio, 1967-1972; co-founded DIR in 1972; m. Ellen Goldstein, Jan. 23, 1965; children—Stacy, 15 and Alyson, 14.

Hour, DIR's oldest program and now one of rock radio's best-known syndicated series, was born.

From there, the company continued to expand. The 30 radio series it has produced during its first 11 years, have included several music and interview and contemporary news interview programs such as *Mary Travers*, in which that singer interviewed and performed with other well known folk singers, and the currently produced *The Inside Track*, in which syndicated columnist Lisa Robinson has interviewed and highlighted the music of performers including Mick Jagger, Pete Townsend and Pat Benatar.

A high point for DIR's news programing operation came in 1979 when former revolutionary Abbie Hoffman, who had been in hiding for several years, contacted DIR and announced on its *Direct News* program that he planned to give himself up to authorities to face criminal charges for possession of illicit drugs. *Direct News* got the story first, said Meyrowitz, because Hoffman was familiar with the program, which interviewed newsmakers in an effort to bring them closer to the public.

Music programs currently produced at DIR in addition to the King Biscuit Flower Hour include a weekly country music concert series, The Silver Eagle, Supergroups in Concert, a weekly series

for rock radio, a monthly series of taped live concerts performed especially for DIR and Rock Radio Awards, an annual special recognizing the performers of the year's most popular records. Each of the music series is aired on one of ABC's radio networks after an agreement, forged two years ago, that made DIR a primary program producer for ABC Radio.

The agreement with ABC, which was the first in what has become a series of unions among networks and major program producers, allowed DIR to concentrate more on its primary mission—program production—said Meyrowitz, although the company continues to syndicate some programs—as it will The Who's final concert—on its own.

To date, DIR's programing has been exclusively for radio, but that does not mean, said Meyrowitz, that the company will never program or has never tried to program for television. In network television, Meyrowitz envisions a future for today's top rock music performers, and although rock concerts have proved unsuccessful on network TV, he sees the aging of the rock music generation along with its stars as a combination that soon—perhaps "in the next two years"—will make rock entertainment programing a more than viable choice for the three major networks.

Entertainment is the key, according to Meyrowitz, and with many of today's premiere rock music entertainers—the Rolling Stones' Mick Jagger, Led Zeppelin's Robert Plant and The Who's Roger Daltry—retiring from the concert circuit for good, Meyrowitz anticipates a new breed of entertainer for viewers in their age group. "Robert Plant could be just as good as Andy Williams," he said.

A successful entry into TV program production would not rule out DIR's continuing to produce for radio, said Meyrowitz, who calls radio "the most innovative medium" because it is one in which "nobody can tell you it can't be done." Today's radio programing, which is often attacked for being sterile and lacking in variety, is merely in transition, according to Meyrowitz.

"People who complain about radio today want it to be what it was in the days of underground FM radio," he said, "but underground no longer reflects today's society." Today's radio is like the radio of the 50's, he said. There are "tight playlists and few supergroups but an abundance of good songs that will eventually lead to the development of tomorrow's supergroups."

When not pursuing his work at DIR, which often captures weekends and late nights, Meyrowitz spends time at home with his family. He raises and rides his own horses and enjoys fox hunting.

FCC's Broadcast Bureau Chief Larry Harris says that degree of informational and/or educational content in programing should be considered in determining whether program qualifies as documentary that would be exempt from restrictions of prime time access rule. Harris offered guidance in letter to Margot Polivy, counsel for National Association of Independent Television Producers and Distributors. She had requested ruling that More Real People, scheduled for prime time presentation by number of stations, does not qualify as exempt program under PTAR. Harris dismissed that request on ground that Polivy had not offered sufficient facts concerning program. But he proceeded to offer "some guidance" in area. He said "common thread" distinguished programs exempt as documentary "from other programing fare" is that informational or educational content "takes precedence over the program's entertainment value." In absence of "predominately entertainment orientation," Harris said, "the commission believed that it was unlikely that the networks would serialize or present such programs." Accordingly, he said, "we ... sought to assume the continued presentation of these programs at peak viewing hours and extended the documentary exemption to include

ABC News's new, live late-night news and information program has been titled "The Last Word" and will begin on Jan. 26 (midnight-1 a.m. NYT). Program will focus on topical stories, trends and personalities behind news, with host Greg Jackson in New York and Phil Donahue serving as major contributor from Chicago. Av Westin, vice president for program development of ABC News, in charge of developing The Last Word, told news conference in New York there are 28 million viewers after midnight that new program can attract with its format including interviewers with guests in studio and from remote locations and viewer call-ins on toll-free numbers.

National Association of Broadcasters has gone to court in its opposition to FCC's authorization of Satellite Television Corp. to build direct broadcast satellite system. NAB last week filed notice of appeal of that action with U.S. Court of Appeals in Washington. Action follows by week NAB's petition to FCC to stay its action authorizing what would be nation's first DBS system. That petition was filed because of NAB's appeal of commission action in June adopting rules establishing Direct Broadcast Satellite Service. NAB said authorization of STC application 'seriously threatens the prospect for detached review and consideration of the legal issues under appeal.'

President Reagan talked to nation's farmers Friday morning over radio hookup arranged by White House. Deputy press secretary Karna Small, who put network of farm-area stations together, said 200 outlets took nine-minute broadcast live, while tape was fed to 153 others, as well as National Public Radio. White House Department of Agriculture also made program available through their news actuality services. Major news in broadcast was that U.S. will sell Soviets 22 million metric tons of grain in next fiscal year.

Twelve major motion-picture companies have filed copyright infringement suits against 10 videocassette dealers in five states. Information for suits was prepared by security division of Motion Picture Association of America which said more such actions are being prepared in massive effort to curb film piracy. Raids were made by U.S. marshals in Arizona, California, Illinois, Utah and New York. According to MPAA, marshalls confiscated pirated copies of films that included "Star Wars" and "Mary Poppins." Suits were filed by Columbia Pictures unit of Coca-Cola, Walt Disney Productions, Embassy Pictures, Lucasfilm Ltd., Orion Pictures Corp., Paramount Pictures Corp. unit of Gulf & Western, Metro-Goldwyn-May Film Corp. and United Artists Corp. units of MGM/UA Ente tainment, Universal Pictures unit of MCA, 20th Century-Fo Film Corp., Ladd Co. and Warner Bros. unit of Warner Cor munications.

Comsat's third quarter was fifth consecutive quarter with it crease in earnings. Comsat reported earnings of \$11 million, a \$.2 million from second quarter and up \$4.6 million from thi quarter of 1981. With release of report, Comsat declared qua terly divident of \$.575 per share. Third quarter revenues we \$105 million, \$20.1 million more than for same period of 198 Losses resulting from partnership in Satellite Business Syste decreased from \$5.9 million in third quarter of 1981 to ! million for third quarter of 1982. Most of improvement, ho ever, is attributable to reduction of Comsat's interest in SBS October 1981 from 41.3% to 33.3%.

National Association of Broadcasters and Consumer Electronic Group of Electronic Industries Association petitioned FCC la week to defer its rulemaking on multichannel television sour systems. Group is asking for more time to test and develop or standard for systems, which it will recommend to commissio E

Report issued by Joint United Nations Information Committee last week accused Western media of presenting "grossly inac curate" picture of UN. Report said Soviet Union and its allie provided more accurate coverage of organization. It blame Western reporters for having negative influence on Third Wor nations through its sophisticated communications systems. said that "discrepancy between realities of United Nation system and public perceptions has inevitably led to a measure disillusion in the industrialized developed Western world. recommended that UN respond when it is seriously criticized

Program will be seen on five Oak-owned ON-TV operations in Los Angeles, Phoenix, Chicago, Fort Lauderdale/ Miami and Dallas/Fort Worth as pay-per-view event which will cost \$15. Negotiations are also under way to supply program to other STV operators and cable systems with P-P-V capability.

Zap Zapple

One of the more imaginative interpretations of the political broadcasting law is being invoked by the Democrats in their request for equal time to answer Ronald Reagan's broadcast on the economy. It is the "Zapple doctrine," named for Nicholas Zapple, now retired, who was communications counsel to the Senate Commerce Committee in 1970 when he made the doctrine up and the FCC adopted it.

The law according to the way it was written says the equal-time standard applies exclusively to candidates. The law according to Zapple says fairness demands that "quasi-equal" time be given to supporters of candidates as well during political seasons. Nothing personal, Nick, but the FCC of 1982 has been given a wonderful chance to get your name off its books.

Not now

On the 14th page of a 15-page manuscript of a speech that FCC Chairman Mark Fowler delivered to Australian broadcasters two weeks ago was a brief reference to "a marketplace approach to determining frequency utilization—say, a bidding competition for frequencies by competing services." The reference was reported in this magazine's "In Brief" department of last week and would attract no more attention at this point but for a report just issued by the spectrum management division of the FCC's Office of Science and Technology (see "Washington Watch," page 60). That report describes, in considerable detail, how a marketplace allocation of spectrum space could at least be tested. It is the blueprint for a proposed rulemaking or a notice of inquiry.

"This may seem like a radical approach," said Fowler to the Australians, "but there are many in the United States who believe this makes more sense than leaving spectrum carving to the political process."

That observation takes on more meaning when read against the following from the Office of Science and Technology report: "It seems likely, therefore, that natural economic forces could make the decisions that the FCC now makes . . . At present, it would be speculative to attempt to evaluate exactly how a market approach would work. The best apparent way to make such an evaluation would be to test the market approach in an experiment." And in what parts of the spectrum could the test be done? Did it take two guesses to identify the space occupied by UHF television channels 66-69 and that taken from UHF television several years ago and now held in land-mobile reserve?

In an experiment, the basic decisions now made by the FCC to determine type of spectrum use, class of user, system design and spectrum loading would be made by users, who would initially be selected by an auctioning of frequency rights, by lottery or by a vesting of rights in existing users. The rights would define an area of operation, a limit of out-of-band and out-of-area field strength and a maximum field strength for transmission within the assigned area. Rights holders could trade at will.

"It might be objected that this would create chaos," said the staff report in the understatement of the week, "due to incompatible usage in a given area of the spectrum." But the report sees a spate of trading that would lead to "an initial equilibrium ... Natural economic forces, then, would perform both the allocation and interference control functions that the FCC is currently per-

The reaction here is that all this talk comes about 55 years too late. Marketplace allocation and assignment might have been a preferred choice, if anybody thought about it seriously then,

when the Radio Act of 1927 was adopted. Certainly that kind of spectrum distribution would have led to far different regulation and probably less of it than is in effect now. It cannot be adopted now, however, unless the enormous investment in existing transmission and reception gear is to be ignored. It is not in the public interest to divert any FCC resources to further pursuit of an outdated exercise.

The little medium that could

It is easy to be blase, or even skeptical, about the new campaigr being mounted by the Broadcasting Industry Council to Improve American Productivity-an organization whose aim is as ambitious as its name is long. Just as the latter does not roll trippingly off the tongue, neither does the former engage easily with the mind. The intention is no less than to turn the country around, economically. To save the nation, if one wants to be dra matic about it.

This journal has elected to be neither blase nor skeptical abou it. Rather, we have decided to join the cheerleading. Having watched this campaign evolve, tortuously, from one man's idea into an effort that has enlisted both the good names and the monetary support of 13 charter founders—plus the support of the President of the United States, the Speaker of the House and leaders of the labor movement, as well as the nation's business community—we've come to the conclusion that this is not only an idea to believe in, but one that will work.

To that end, we commend the 13 enlightened contributor (their names are listed in the article that begins on page 52) for their vision, their commitment and even their patriotism—a work we hope has not yet gone out of style. And we commend to other the idea of following their example. Among other things, this i an opportunity for the broadcasting industry to demonstrate to al not only its concern for matters beyond the most recent rating: but also its exceptional ability to mobilize the country to a good cause. Productively speaking, there could hardly be a better pur pose on which money, time and energy could be spent.

As the chart below demonstrates, there are but two months re maining before this campaign goes on the air. We will run weekly reminders of that fact until D-Day-fittingly enough, on Dec 25 Neither the industry nor the country could give itself a bette holiday present, or a more fitting beginning for the new year.

Broadcasting Industry Council to Improve American Productivity

Opinion-Makers Look At Lutheran Television

Here are just two of many delighted comments on the Lutheran Television Christmas Specials, from professional, civic, educational and communication leaders who influence the viewing preferences of many, many others.

Listen to your leaders—they're the critics who count.

The Stableboy's Christmas

"Lutheran Television never misses a chance to address basic human concerns in a real and valuable way...and 'The Stableboy's Christmas' is television at its best. It's entertaining and fun, never 'preachy'—high-quality family viewing, superbly produced."

Lowell Schoer, Ph.D.

Professor of Learning Psychology, The University of Iowa,

30 minutes – 3 minutes for sales/PSA No program charge – closed-captioned (tape only) An Emmy Award winner – available in Spanish

The City That Forgot About Christmas

"The Lutheran Television children's specials fill a real need in family programming. The City That Forgot About Christmas' does an excellent job of entertaining children while it delivers an upbeat but unmistakable message. I recommend it highly."

Hon. John Maitland Illinois State Senate, Bloomington, Illinois

30 minutes – 4 minutes for sales/PSA No program charge – closed-captioned (tape only) Available in Spanish

Schedule separately—or together, for a 1-hour Christmas special.

NEW YORK WAS SUPPOSED TO BE DIFFERENT IT WASN'T OCT 1 9 1982

Doubleday's WAPP (FM) Is Now The Most istened To Rock Station In America.

#1 Adults 18-34

When we started WAPP in New York on June 15th, there was a lot of curiosity about what would happen. After all, Doubleday had scored big in other startup situations ... but this was New York City ... the toughest market in America.

Well, the summer Arbitron is in. In just three short months WAPP has become the <u>number one</u> station in New York among 18-34 year old adults. In many dayparts,

the sum total of the two major competitors doesn't even equal our share. With a weekly cume audience of nearly 2 million people, WAPP delivers more listeners in the metro than any other rock station in America.

What everybody forgot was ... New York is our hometown. Nobody knows the Big Apple like "New York's Apple." And nobody does that kind of job but Doubleday Broadcasting.

DOUBLEDAY BROADCASTING ... AT THE CORE OF THE APPLE.
