Why WYAY chooses to use the best:

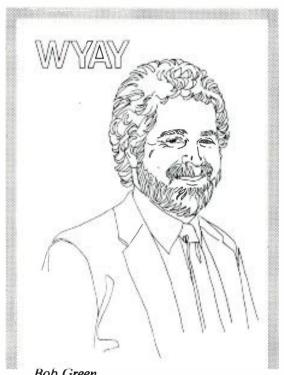

"There's no one who's better at developing a winning strategy."

"When Katz (now NewCity Communications) came into Atlanta two years ago, we knew we'd need all of the right tools to win in this market. And, having The Research Group on our team was one of our most important tools.

We work with them at all of our stations. And, they have been invaluable to us. There's no one in this business who is better at translating the research data into usable ideas—a plan that really works. And, we've seen the proof right here at Y-106. We were in a real 'David and Goliath' battle with WKHX. Two years ago they had a 10.0 share 12+ and we had a 1.1.* Now, in the most recent Arbitron, we're up to a 6.1 and WKHX is down to a 5.3.**

It has worked because The Research Group has provided us with the framework to make this whole thing happen. Their research clearly pointed the way to a winning strategy for Y-106. And, it gave us the confidence to stick with it. They're the best and that's why we use them."

^{*}Spring 1984 Arbitron. 12+ AQH share. M-S, 6A-12M, MSA. **Spring 1986 Arbitron. 12+ AQH share, M-S, 6A-12M, MSA.

- "Ripley's Believe It or Not!" TV's most unique, promotable series.
- A worldwide institution over 70 years of popularity.
 And an awareness level of 9 out of every 10 people.
- Delivers women, men, teens and kids in early fringe, late night and weekends.
- Available in both hours and half-hours.
- Hosted by Jack Palance.

RIPLES
Believe It or Not!

It will make a believer out of you.

A Haley/Rastar Production in association with

SPANISH BARTER PROGRAMMING NEVER LOOKED SO GOOD!

NetSpan is now offering for 1987 two new musical series that will bring to your station and its advertisers the most exciting lineup of Latino artists ever to light up the television screen.

ESPECTACULAR 1987

Following the smash success of Espectacular 1985 and Espectacular 1986—here comes Espectacular 1987, all-new hour-long programs featuring fabulous one-man

(or woman) shows with the biggest names in Latino music—Iglesias, Feliciano, Menudo, Jose Jose, Jurado and more. 12 brilliant hours taped before live audiences.

NIGHT OF THE STARS

A brand new series of 12 hour-long programs that brings European, South American and Carribean artists together for the first time.

Unsurpassed production values underscore brilliant

performances by 28 extraordinary entertainers, including Leonardo Favio, Julio Iglesias, Emmanuel, Raphael, Luis Miguel and Italy's electrifying Franco Simone.

Both series are being offered on an advertiser-supported basis, and both are ideal vehicles for reaching the unusually high percentage of women viewers who regularly watch Spanish language television. If you are a Spanish-language station or an Anglo station in a community with a large Hispanic population, you

owe it to your viewers to bring them both of these superb series.

Hurry. Join WNJU-TV 47 New York, KVEA 52 Los Angeles, WCIU-TV 26 Chicago and other stations across the U.S.—plus the Tempo Satellite cable systems—in programming these outstanding NetSpan series.

Closed Circuit

Upping ownerships

Word has it that FCC Mass Media Bureau is considering, on its own motion, proposal to modify multiple ownership rules to permit single entity to own 24 radio stations in same service. Rule currently limits ownership to 12 AM's and 12 FM's. Bureau is apparently operating under theory that congressional concern that caused FCC to pull back from intention to abolish limits altogether (BROADCASTING, Oct. 6, 1984) was focused exclusively on TV.

Under wire

Strong desire by Kohlberg Kravis Roberts & Co. to complete liquidation of two companies it had taken private, Storer Communications and Wometco, has already produced several headlines and could well produce more. Some say KKR has given Storer's chief executive officer, Terry Lee, option to purchase company's remaining TV station, WTVG(TV) Toledo, Ohio, for price in neighborhood of \$50 million. As for remainder of Storer Cable, serving over one million basic subscribers, KKR is reportedly thinking about dividing ownership of systems into smaller limited partnerships. Move, it is said, would preserve certain tax advantages that would otherwise disappear if systems were not sold by year's end. Smaller size would also make subsequent disposal of systems easier.

Feds at work

Justice Department investigation into possible antitrust violations by cable operators and programers in connection with programers' scrambling of satellite signals and providing of service to home satellite market has taken on new dimension. Investigators are now calling in multichannel microwave operators to hear about their problems in acquiring rights to cable programing. One operator spent five hours with investigators in Washington last Thursday.

Titsch will be pleased

FCC commissioners, who have regularly attended annual Kennedy Center Honors galas in Washington as guests of CBS, may be shut out this December since new agency policy forbids acceptance of entertainment from parties with business before agency. Network traditionally has provided each commissioner with two

tickets for gala and dinner-dance afterward. Tickets this year range in price for outsiders from \$500 to \$3,125 each. "We probably won't be attending this year," said Jerald Fritz, chief of staff to FCC Chairman Mark Fowler. "FCC rules don't permit that."

Way out

FCC could soon be faced with precedentsetting decision if Westinghouse Broadcasting and General Electric-new owner of NBC- merge their radio properties and NBC networks into new company (BROADCASTING, Oct. 20). If merger scenario holds as written, its approval would allow GE, which, to comply with commission rules, needs to sell five NBC radio stations in three markets where it co-owns television outlets, to retain minority interest in them as part of new configuration. Merger proposal under discussion appears to contain some wrinkles such as GE and Group W, which would also hold minority interest, having no voting stock in new entity and majority interest going public. In event both parties go forward with plan, FCC, which generally does not consider nonvoting stock as constituting ownership, would need to decide whether GE is honoring its commitment to divest.

It's safe bet that companies such as Capital Cities, which is required to sell properties due to 1985 acquisition of ABC, would keep close eye on any FCC action concerning Group W/GE merger.

Flying colors

NBC has completed network acceptance tests of M-II half-inch videotape recorders from Matsushita and, according to source, new technology has met or exceeded all published technical specifications. Result of tests on production model recorders were sent last week to chief engineers at all NBC affiliates for their perusal—affiliates have offer from Matsushita for one-third discount on M-II. Network itself has so far taken delivery of 30 studio and 30 portable recorders, will receive total of 212 units costing \$3.4 million by end of year, and has placed second order for 236 decks costing \$4.5 million for delivery in first quarter, 1987.

One impact of implementation of M-II at NBC News, which expects full conversion of all domestic bureaus by next summer, could well be reduction in size of news crews. Although such shrinkage

could be subject to other considerations, including objections from technical unions, NBC News source told BROADCASTING that once M-II is fully in place "ultimately maybe half the coverage units will have a single technical [person]."

Half-inch venture

Scripps Howard Broadcasting has become first known broadcaster—besides NBC (see above)—to order Matsushita's new M-II half-inch recorders. Group station purchase, using "dip of toe" approach, is for total of 16 studio and field recorders valued at half-million dollars.

Patrick view

At FCC Commissioner Dennis Patrick's prodding, Association of Independent Television Stations and American Bar Association have reportedly agreed to host seminar in Washington Dec. 4 on property rights and broadcasting. Patrick's keynote speech is expected to be critical of cable's compulsory license and will question wisdom of FCC's repeal of syndicated exclusivity rule.

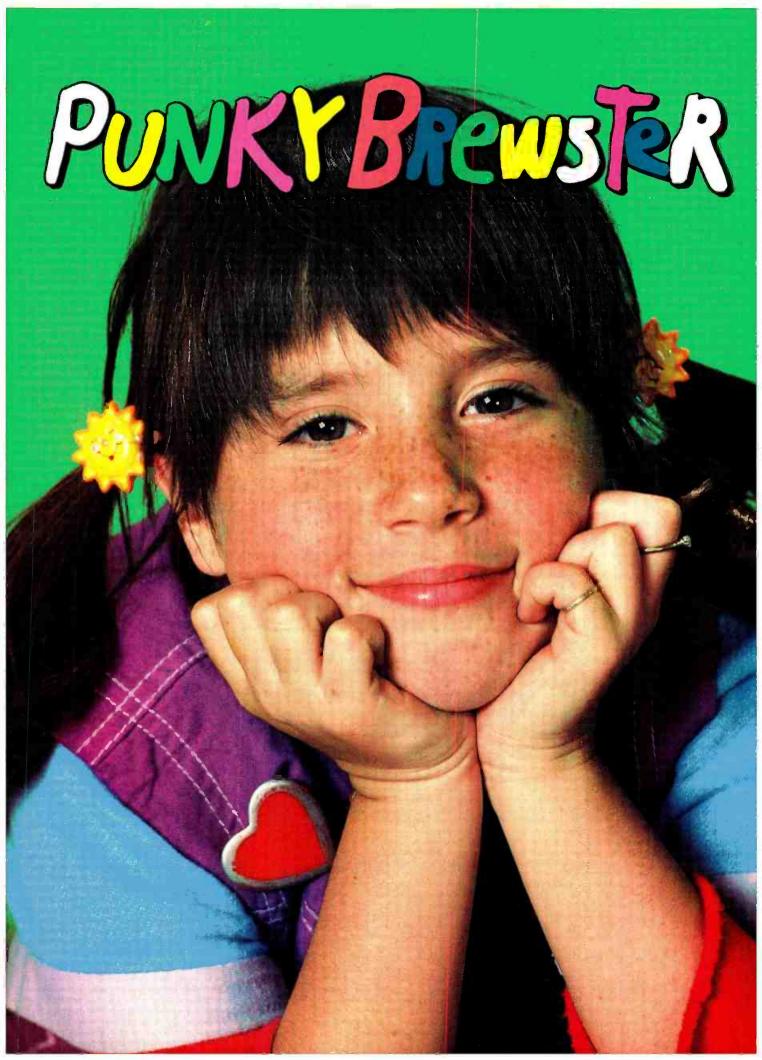

Going up

Leading candidate to replace Jules
Haimovitz as president of Viacom's
Entertainment Group (see page 10) is
Paul Hughes, currently president, Viacom
Broadcast Group. Hughes's background
is advertising sales and station
management, and he does not have much
in way of program production experience.
But sources last week said Hughes was
top choice to fill entertainment group spot
because he is "an ace manager."

Look before leap

Dow Jones & Company, parent of *The Wall Street Journal*, is conducting two market studies of feasibility of establishing satellite-delivered financial news network for easy listening and other adult-formatted FM stations, with determination expected by year's end. Company has been successful with its seven-year-old *Wall Street Journal Report* that offers stations—mostly AM outlets in top 50 markets as well as number of "affluent" secondary markets—17 two-minute reports each weekday and six one-minute reports on weekends.

New FM-oriented network, which would be "softer" and more "abbreviated" than current service.

YOU COULD MAKE A DECISION THAT WILL AFFECT THE FUTURE OF AMERICA'S CHILDREN.

THE FACTS:

- You can have a show with 44 new adventures (88 episodes in total) with the cast that has made it so popular.
- You can have a show that has a loyal following of fans and a backlog of fan letters 60,000 deep!
- You can have a show about a small-for-her-age girl, with lots of spunk, who faces the problems and frustrations of growing up that most children will face.
- You can have a show that's entertaining, a show with lots of heart.

THE DECISION:

Cable castings)

Package deals

As part of his campaign to shape a competitive home satellite marketplace through pressure rather than legislation, House Telecommunications Subcommittee Chairman Timothy Wirth (D-Colo.) asked all the major cable programers whether they planned to make their satellite signals available to home dish owners in program packages and through third-party distributors. The home satellite industry sees packages and third-party distribution as keys to insuring dish owners access to programing at reasonable prices

According to Tom Rogers, senior counsel to the subcommittee, two-thirds of the programers had responded by last week. Although some positions were "extremely general." he said, all but Viacom International (Showtime/The Movie Channel and MTV Networks) "indicated a willingness to participate in multiple program packages"

In the Viacom letter, Ronald Lightstone, senior vice president, corporate and legal affairs, skirted the question of whether Showtime/TMC and MTV Networks would deal with third-party packagers. Lightstone, instead, talked about Showtime/TMC's plan to offer, in addition to Showtime and TMC, a package of 10 basic cable services through its new Satellite Direct Inc. subsidiary. The implication was that none of the Showtime/TMC services would be available to other packagers.

In contrast to Viacom, Terence McGuirk, vice president, special projects, Turner Broadcasting System, said TBS's CNN and CNN Headline News are already available through HBO and Showtime/The Movie Channel and TBS plans to offer them as part of its own package. "Seeking the broadest possible distribution of its service. TBS is willing to cooperate with any responsible and economically rational effort to package program service, provided additionally such packager meets normal and reasonable business standards of reputation, experience, service quality and the like."

Even though ESPN doesn't expect to start full-time scrambling prior to March 1987, said William Grimes, president and chief executive officer, the sports network has already completed an agreement with Show-time/TMC to be included in SDI's basic TVRO package.

"We intend to make every effort to insure that our retail distributors offer our services as part of a program package as well as on an a la carte basis," he said. "Additionally, ESPN anticipates entering arrangements with a number of qualified distributors in an effort to insure dish owners a choice of purchase options. In all cases, the ESPN service will be provided to our authorized distributors at rates which will enable them to make ESPN available to consumers at competitive prices."

Tom Rogeberg, senior vice president, administration and operations, CBN Cable Network, said the network intends to scramble its satellite signal using Video-

cipher II by the end of the year "We are currently being marketed in cable operator-distributed packages, and are in the process of writing contracts for the same purpose with a premium-channel-led package and a programer cooperative. Also, we are now seeking proposals for other third party distribution to TVRO's."

Nickolas Davatzes, president. Arts & Entertainment, said that the network has not firmed up its scrambling. But. if and when it scrambles, he said, it "seems certain that the M/A-Com technology will be used...[and the satellite signal] will definitely be made available for distribution to the home TVRO market.

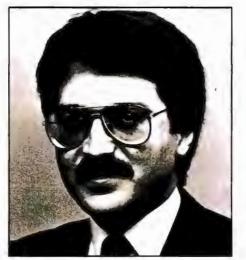

Because A & E doesn't have the marketing capability to sell direct, he said, it will offer its TVRO service through "Showtime, HBO, cable operators or other qualified third party" distributors on a nonexclusive basis "both in packages with other cable program services as well as an a la carte basis."

John Hendricks, chairman and chief executive officer of the Discovery Channel, said the service will announce its scrambling plans in the near future. Like A & E, Discovery said it would make its signal available through other distributors, including cable programers, cable affiliates and "other packagers."

John F. Cooke, of the Disney Channel, said the network is talking to the National Rural Electric Cooperative Association regarding their packaging of the Disney Channel along with other programing services. "We hope that those discussions with the NRECA result in a marketing and packaging agreement."

New title

Jules Haimovitz, president of the Viacom Entertainment Group since July 1985, has been named to the newly created position of president of the Viacom Networks Group, effective last Thursday (Oct. 23). Haimovitz, who joined Viacom in 1976 as director of planning and administration for pay televi-

Haimovitz

sion, and who Viacom said was instrumental in the creation of Showtime, will have responsibility for the operations of Showtime/The Movie Channel Inc., and MTV Networks

The appointment follows the resignation of Showtime/The Movie Channel Inc. chairman and chief executive officer, Neil Austrian, two weeks ago. At that time, there was speculation within Showtime that Haimovitz was among those being considered to replace Austrian (BROADCASTING, Oct. 20).

According to Viacom spokesman David Fluhrer, Haimovitz will participate in the search for Austrian's successor, who will probably have the title of president of Showtime/TMC, rather than chairman, as Austrian did. In the meantime, Viacom expects to announce "shortly." possibly this week, Haimovitz's successor as Entertainment Group president.

Kenneth F Gorman, chairman of the group and executive vice president of its parent company, Viacom International Inc., called Haimovitz "a pioneer of cable television progaming" and said he "joins our Networks Group at a time of renewed commitment to this vital segment of the communications and entertainment industry. Advertiser-supported cable television will experience sustained growth in the coming years and pay television—through a number of strategies led by programing exclusivity and the development of pay-perview networks—is poised for explosive growth in the near future."

Weather coverage

The Weather Channel has signed new affiliation contracts which it said will increase its reach by more than 1.2 million households. Contracts were written last month with systems serving 710,000 subscribers, said Sandra McGovern, vice president of affiliate sales and marketing for TWC. Another 525,000 subscribers were added during the first two weeks of October, and McGovern projects that by the end of the year, the 24hour-a-day service will reach 23 million households. She said the "recent growth spurt" is attributed to three factors: deregulation, TWC's programing changes last June and the addition of new affiliates from cable operations throughout the West.

TWC also said last week that the Nielsen third-quarter viewer report will show a 50% increase in TWC's viewership, compared to last year's third-quarter figures. Cumulative weekly viewership during this period increased by 800,000 households, TWC said, adding that the audience growth was apparent in all time periods, with early morning viewing levels "virtually doubling."

Turnerisms

Ted Turner, speaking in Beverly Hills, Calif., last week at the Pitzer College national issues forum dinner and afterward at a press

Sikes on must carry. National Telecommunications and Information Administration Director Al Sikes restated his interest in seeing the development of a more procompetitive telecommunications environment in a speech at a Federal Communications Bar Association luncheon last week. He suggested that lifting the restrictions prohibiting the Bell operating companies from offering certain information services is one way to accomplish that goal. He also reiterated his view that there is a need for "fairness" in any public colicy. adding that: "Maybe there never should have been a set of rules that required cable television companies to carry signals of all the local TV stations. But there were, and lots of people made investments based on those rules.

conference, touched on a sweeping array of topics, including his personal wealth, the future of his financial empire and the Goodwill Games.

Turner's fiscal woes were a recurring theme throughout a nearly 40-minute long speech and question-and-answer session with the audience that followed. Describing his \$26-million loss on his \$35-million investment in the recent Goodwill Games as "probably the most money that anybody ever lost on a sports event in history," Turner said he is turning his attention to ways to gain the interest of television viewers in Western nations for the American Goodwill Games in four years. In 1990, he said, "it's going to be a much larger financial commitment." As to whether he would continue with the games if the next set is also a financial disaster, Turner later told reporters: "We will cross that bridge when we come to it. I hope the bridge is (still) out."

Asked where Turner will be in five years, he replied, "Another day older and deeper in debt. We'll probably have a partner if we are ... I hope I'm still solvent." Turner said later he is holding discussions with several potential partners, but he declined to name

Having appeared on the Forbes list of the most wealthy Americans, Turner said the magazine's value of his worth "at more than \$280 million" is "not very accurate." How much money does he have? "I don't know how much I'm worth," he said.

Cable and children

On the occasion of National Children's Television Awareness Week, Oct. 12-18, the cable industry celebrated its contribution to "the positive uses of television" and to helping "parents and children maximize TV's potential as an educational tool.

A study of the New York market released by the National Cable Television Association compared the volume of children's programing over a five-week period this

year and 10 years ago.

Spring 1976 and spring 1986 TV Guide listings in New York showed a 142% increase (from 936.75 hours to 2,265 hours) of children's programing-with 98% of that increase due to the introduction of satellitedelivered cable services. In 1986, 10 cable services provided 57% of children's programing, NCTA claimed.

Children's fare available during prime time rose by 359%. "In 1976, prior to the advent of cable services, television in the New York market offered 20.25 hours of prime time children's programing," said the NCTA. "In 1986, a total of 93 hours... was available." The study, "Children's Television Programing in New York, 1976 and 1986: A Case Study of Programing Availability, October 1986," is available from the Research & Policy Analysis Department of NCTA, Washington.

Junior critics

Nickelodeon, one of MTV Networks' four programing services, will debut its new movie review program for children, Rated K: For Kids by Kids, on Nov. 1 at 4 p.m. (NYT). The show will be hosted by four teen-agers, who will review, on a rotating basis, their "favorite and least favorite movies," including new releases, home video selections and pay cable titles, Nickelodeon said. Included with the critiques will be movie clips and behind-the-scenes looks at film production.

Basketball buy

ESPN announced last week that it had signed a seven-figure deal with Nike Inc. to be the exclusive athletic shoe sponsor for the basic cable service's college basketball lineup for the coming season. Nike will also advertise in other ESPN programing, including College Football Association games, tennis, golf and ESPN's SportsCenter. ESPN plans to televise 146 college basketball games this season.

INNOVATIONS IN LIVING

- HSN is Now in its 5th Year
- 18 Million Packages Delivered
- 500,000 Satisfied Buyers
- Best Bargains Best Format
- Best Customer Service

\$HARE THE \$UCCE\$\$

The Home Shopping Network brings "Millions in Bargains™" and "Thousands in Prizes™" to viewers across the nation, live, 24 hours a day. Home Shopping Network 2, "Innovations in Living™" is broadcast via SatCom V Transponder 1. Programming originates from our 40,000 sq. ft. studio complex and uplink in the greater Tampa Bay area.

On a typical shopping day club members buy fashions, jewelry, tools, collectibles, housewares and electronics - all at discount prices and without leaving their homes.

In addition to the bargains and fun, HSN viewers compete for thousands of chances to win valuable prizes.

Our show hosts display each bargain one at a time and give detailed descriptions. Club members then

call in on one of 600 toll-free lines. Callers can chat with the show's host and offer testimonials, ask questions about an item or place an order by issuing a personal check or using any major credit card.

Every purchase is entered into our computer which transmits the information to our distribution centers. Shipment of orders occurs within 48 hours via U.P.S.® and delivery is completed within 4 to 7 working days.

AFFILIATE COMPENSATION

The Home Shopping Network provides an ongoing compensation plan, paying you, THE BROADCASTER. Full time Affiliates will find the compensation plan very viable.

Every item of merchandise is computer tracked and a percentage of all sales attributed to your station is paid directly to you, monthly.

MARKETING SUPPORT

The Home Shopping Network's co-ordinated marketing programs generate maximum viewer participation and purchases, thus insuring greater revenues for your station.

Our campaigns include direct mailings personalized with your own logo and channel number. Home Shopping Network also provides a series of 30 & 60 second promo commercials, and a co-op Newspaper Advertising Program.

Affiliation agreements with compensation are avaliable in areas where HSN has no cable affiliate.

Satellite fever. Grey Advertising has created GreySat, unit that will plan, negotiate and execute media buys for clients who want to reach large portions of Europe through satellite television, radio and print, GreySat, based in London, is designed to capitalize on growing media opportunities for multinational advertising aimed at Pan-European market. Operation will be headed by Tony Pearson, vice chairman and executive media director in London. He said that by 1990 "we expect to have five satellites and 30 new channels that can be received by small rooftop dishes."

П

Oh, tangled web. Reynolds plastic wrap, product of consumer division of Reynolds Metals Co., is star of new television commercial that gives tangled, and playful, view of number of

competing home plastic wraps. Those brands are shown twisting out of control while Reynolds Plastic Wrap emerges in smooth rollout, exhibiting its ability to "cling where it is supposed to cling." Campaign is scheduled to start this week in 125 spot television markets. Target: women, 18-49. Agency for campaign is J. Walter Thompson/New York.

Tough discussions. There will be 10 workshops at Television Bureau of Advertising's 32d annual meeting in Los Angeles, Nov. 17-19. Discussions will relate to theme of this year's meeting, "Television In Today's Tougher Business Climate." Workshops will explore subjects including "Living With Pressures of Bottom Line," "Changing Role of Station Representatives," "How Management Can Keep Control of Negotiations" and "Applying Principles of Supply Side Economics to Station Operations."

September advertising claims. Nine challenges to national advertising, including three carried on television, were resolved during September by National Advertising Division of Council of Better Business Bureaus. NAD reviewed television commercial for Kraft Inc. (macaroni and cheese dinner) and found claims were substantiated. Modified were claims in commercial for Land O'Lakes Inc. (Lean Cream sour cream and Natural Dairy Blend). Murray Ohio Manufacturing Co. agreed to make changes in commercial for Street Machine bicycle if aired in children's television programing (handled by Children's Advertising Review Unit).

SDI campaign. American Conservative Trust, political action committee, is funding 10-day. TV and radio advertising campaign beginning Oct. 26. Ads (10- and 30-second spots) will air in seven states (California, Nevada, Colorado, Texas, North Carolina, Alabama and Florida) and are aimed at adults and voters. Two ads have been developed. One attacks candidates who are opponents of Strategic Defense Initiative (SDI), including Senator Alan Cranston (D-Calif.); Representative Tim Wirth (D-Colo.), who is running for Senate; Representatives Jim Wright (D-Tex.); John Bryant (D-Tex.), and Ronald D. Coleman (D-Tex.). Other spots are endorsements of candidates who support SDI, including Republican Senate candidates Jim Santini of Nevada, James Broyhill of North Carolina, Paula Hawkins of Florida and Jeremiah Denton of Alabama. Trust is planning to spend minimum of \$300,000 and is buying time for ads to run during prime time, on network affiliate stations, three times daily.

TV ONLY

Jordache Enterprises - Jeans will be spotlighted in Christmas promotion beginning in mid-November for six weeks in 12 markets. Commercials will be carried in early fringe and special program segments. Target: No specific demographics. Agency: Winner Communications, New York.

THE BEAR FACTS ABOUT LBS' NEXT KIDSHOW WINNER.

- He's the sensational talking bear who's taken the nation by storm, outselling the Cabbage Patch Kids in his very first year.
- Now he's a TV star, with a whole family of won-
- derful characters, in LBS' next first-run animated hit for boys and girls.
- Featuring inventive, magical adventures with enduring appeal, and themes that entertain and
- enrich.
- LBS, the hit makers who developed the longrunning syndication successes Heathcliff, Inspector Gadget and MASK, now add Teddy

Ruxpin to their roster of animated favorites.

 Powerful mini-series marketing plan will build big audiences for this winning kidshow:

@1986 ALCHEMY II, INC. ALL RIGHTS RESERVED.

- 5-PART MINI-SERIES IN DEC. '86 AND APR. '87.
- HALF-HOUR STRIP STARTS FALL '87.

THE ADVENTURES OF TEDDY RUXPIN in From LBS in association with Worlds Of Wonder, Inc. and DIC Enterprises

A commentary on TV commercials for radio stations from Steve Stockman, Custom Productions, Framingham, Mass.

Powering your radio station through TV commercials

Some TV commercials are more powerful than others.

Think about all the commercials you've seen—for anything. Remember the Pepsi spot with Michael J. Fox in the library? Remember the American Express commercial with Ron Reagan? Remember the John Hanock "Real Life...Real Answers" commercials that look like an episode of Hill Street Blues?

How many times have you seen those commercials? Once? Three times? Ten times? How long did it take you to notice them?

Some commercials stick in the memory better than others. Some commercials you remember after just a couple of viewings because they say something of interest to you. They make you react either to their main point or the way they say it. You remember the product and the message because they're an intrinsic part of the spot.

Other commercials you remember after 10, 12 or 20 viewings, and then only because they grate on your nerves. Mary Lou Retton...was she plugging Lifesavers or batteries or what? You remember her, but not the message.

The difference between a TV campaign for a radio station that gets the call letters out (if that) and one that pounds a marketing message home and gets ratings results is 'power.'

"Power commercials" sink in with less repetition. The truth is that with a more powerful commercial a radio station can get away with a smaller buy, or get more results with a bigger buy. Power commercials are more efficient. They get the job done better and faster.

Here is a "power test" you can use—questions to ask'yourself or your target audience when you're looking for a power commer-

■What does this spot say to the target audience? Some spots don't say anything. They just look nice and display the call letters. Bumper stickers do that for a lot less money. Power commercials have a clear point.

■Will they care? Pretend you are in the target group (maybe you are). What does the message do for you? Will it make you tune in? Power commercials answer the question: "Why should I listen?"

■Is it focused? How many messages does the spot try to deliver? It's tough enough getting people to remember the name of your station. Are they going to remember that WAAA is the station for "a fun morning team, information, sports, weather, music and traffic . . . and 'no-repeat Thursdays'?" Power commercials have a clear thesis statement.

Steve Stockman is president of Framingham, Mass.-based Custom Productions, a company dealing exclusively with custom television commercials for radio stations. Before starting Custom Productions, he was director of marketing, advertising and promotion for WAAF(FM) Worcester, Mass. (Boston), and national promotion director for Katz Broadcasting. This article is adapted from his new booklet, "More Powerful Commmercials: Doing Your Own Custom Television Production.

■Is it believable? Power commercials are credible.

Is it powerful? Is the message solid and communicated throughout the spot? Is it uncluttered by subplots or intrusive gags? In a power commercial the entire spot works for the radio station and its message.

■Does it feel like your station? Some stations are loud and funny, some quiet and relaxing. A power commercial reflects the character and the personality of the station.

Is it unique? Recently an advertising trade publication attributed video personality Max Headroom's campaign for Coke to Pepsi. Why? Because it looks, sounds and feels just like Pepsi's "new generation" spots. Power commercials are unique.

The best commercials will pass the power test and turn your TV campaign into an unqualified success. The slightly less efficient spots may cost you money. The very worst, commercials, ones totally wrong for your audience, can cost you the ratings battle.

Here are some situations in which your best route to a power commercial is produc-

ing your own from scratch:

■Your station is unique, and you can't find a syndicated TV commercial that fits. Syndicated spots are made to be run by a lot of stations, and they fit some better than others. Apply the power test to the TV commercials you see on reels. Don't compromise. The money you spend to run the spot is always going to be greater than the money you spend to produce it.

■You want to use research to help you de-

sign a spot. Your research is important to you. You spent a lot of money on it. It should be used to influence the design of your TV commercial in much the same way it is used on the station. Your marketing strategy and the things that are most important to your target audience should determine the focus of your spot. Conducting research while your spot is developed, such as storyboard testing, can help you design a precise and powerful message.

■You want to address the competition directly on TV. In many competitive situations, especially format changes, it can be to your advantage to refer to the competition in your TV spot. You can mention them by

name, or as "Brand X."

■To attract attention you need a stunt—a particularly outrageous commercial that will generate talk in the community. Highprofile personality stations create outrageous bits and promotions that generate talk on the streets. Extend that outrageousness to your TV campaign.

You want to localize your TV commercial, using shots of your city. Sick of those radio spots shot in generic-looking, hightech studios? Using a recognizable restaurant, park or street corner can add a local

touch that people will remember.

Promote a unique contest. Your station has spent a lot of effort creating the ultimate contest for your market. Suck them in with a power spot based on your contest.

You want to create an entire campaign, not just an individual spot. Many big TV advertisers work on TV campaigns, not spots. They can be tied together loosely by a positioning statement and style such as the Pepsi "Choice of a New Generation" campaign; they might feature an identical format such as the Pizza Hut celebrity campaign, or they might be "episodes" with the same characters and settings, such as the Miller Lite "tastes great—less filling" series.

You don't need to change spots every week as some companies do. You can do an installment every ratings book, every six

months or even every year.

You want to promote your air personalities. A well-done TV campaign can make a popular personality into a true local star. This is also a chance for station management to act as extras.

The power commercial, built from scratch, squeezes more of your station's message into its script, characters, action and settings.

Your commercial should start with the unique needs and desires of your radio station. There are no assumptions before the process begins that lead you toward a particular end. There's no pressure on you to bend your message to fit a spot that already exists-and prevent you from creating a power commercial for your station.

Rocky Balboa, James Bond, Inspector Clouseau and Dick Cignarelli

You know Mr. Balboa, James and the Inspector.
They are only the beginning of one of the most wonderful libraries of titles ever.

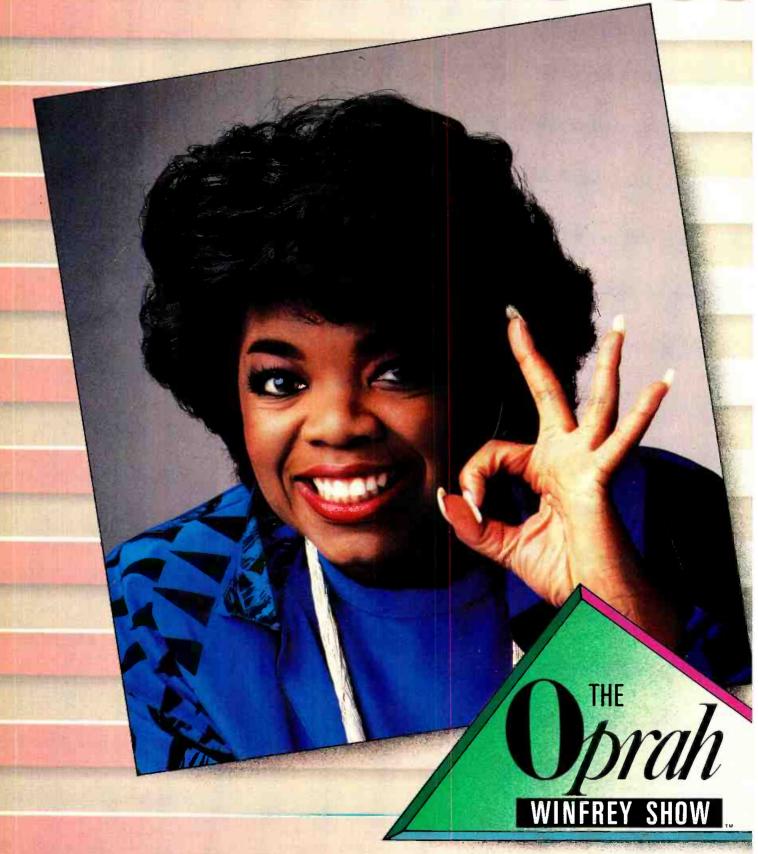

You know Dick Cignarelli, too.
He's in charge of domestic
syndication at MGM/UA.
Good titles, good people, good company.

Good Company.

THE KEY TO SUCCESS

Panasonic brings you M-II.
The broadcast recording system our competition can't seem to duplicate.

Now you can shoot, edit and broadcast with 1" quality—on 1/2" cassettes.

When it comes to broadcast systems, it appears our competition has been erased. Because no other format can match the spectacular performance of M-II from Panasonic.

With M-II's metal particle tape system, you can use the same compact 90- or pocket-size 20-minute cassette from ENG/EFP right through editing to on-air broadcast. With 4.5MHz bandwidth (-3dB), 50dB S/N and burst signal insertion for phase alignment and jitter correction, M-II is the single solution to all your broadcast needs.

In fact, each unit in the M-II line offers some pretty uncommon common features like four audio tracks (two linear and two FM), an integral longitudinal and vertical interval time code/time date generator with presettable user bits and Dclby*-C noise reduction. And M-II products utilize a standard edit control interface, so you can upgrade gradually if you like.

AU-650 Studio VCR. This compact, rack-mountable VCR has all the advantages and functions of conventional recorders with the benefit of the M-II format. The AU-650 provides video and audio performance as good as—if not better than—that of 1" VTRs. In a ½" cassette format that lends itself to station automation. It records and plays either 90- or 20-minute cassettes, and provides smooth action, variable slow motion as well as freeze frame. And the AU-650 can perform frame-accurate automatic editing with multi-generation transparency. There's also an internal TBC to assure on-air quality playback.

AU-500 Field Recorder. The AU-500 offers the portability and functions demanded by ENG/EFP users, while providing picture quality comparable to 1"— all on either a 90- or 20-minute cassette. This small, ruggedly designed unit is equipped with confidence field color playback, automatic backspace editing, TBC/DOC connection, search function and warning indicators that alert the operator should recording problems arise and the AU-500 accommodates NTSC composite or various component input signals.

The AU-400 Camera Recorder. This lightweight, compact camera recorder provides ENG users with more than 20 minutes of recording, and a picture quality that rivals that of 1" VTRs. The AU-400 also features B/W video confidence playback through the camera's viewfinder, a chroma confidence indicator and audio confidence output through a speaker.

There's even an automatic backspace editing function and warning indicators. And the AU-400's rugged construction provides excellent resistance to dust and moisture.

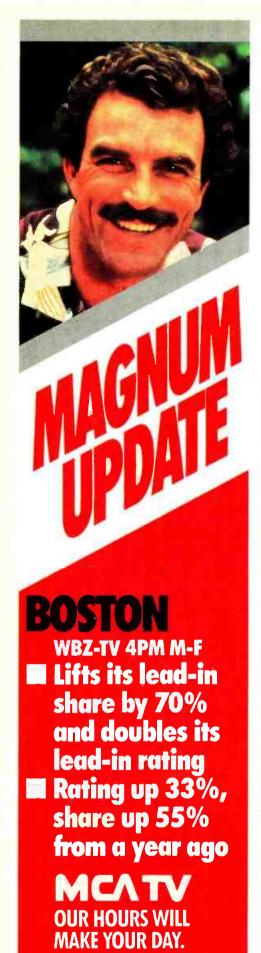

M-II, it's the only broadcast system of its type in the industry. And it's available now. Two of the best reasons to go with M-II from Panasonic.

TOP OF THE WEEK

CBS reorganization in high gear

Tisch now considering staying on as chief executive officer, if CBS board requests, which remains distinct possibility; meanwhile, Loews chairman moves to streamline company by concentrating on core businesses; more staff cutbacks to come; fate of Grant, Leahy may hinge on near-term prime time results; company eyes purchase of Miami television station

The Tisch whirlwind continued to swirl through CBS last week. Six weeks into his new job as acting chief executive officer, it is apparent that Laurence Tisch is giving the

company his personal imprint.

Last week's revelations: an expected elimination of 200 to 300 positions in the broadcast group plus other layoffs in corporate staff by year's end; the belief among CBS corporate executives that their colleagues overseeing the entertainment division are in danger of being replaced; the company's sale of most of its educational and professional publishing operations for \$500 million, and its interest in buying a VHF television station in Miami.

Tisch, in an "At Large" interview with BROADCASTING (see page 50), says that many of the changes he plans on making at the company will be completed within the next few weeks. He is doing so apparently with the approval of the company's board of directors, which may be prepared to make him the permanent successor to Thomas Wyman as chief executive officer.

The 63-year-old Loews chairman clearly is enjoying overseeing daily business operations once again. At Loews, where he is also chief executive officer, Tisch had been more involved with long-term investing. While confirmation was lacking for some of last week's reports, the absence of visible activity by the board's search committee, which is supposed to be seeking Wyman's permanent replacement, tended to confirm the suspicions about Tisch's remaining as CEO. As of last week, six weeks after Wyman's forced resignation, the search committee had reportedly held only one meeting-a short one following the company's board meeting several weeks ago.

While Tisch may stay at CBS, others in the company will be leaving. Several sources said last week that the CBS/Broadcast Group is slated for 200 to 300 more layoffs, in addition to the roughly 700 that

Grant

took place in the past 12 months. Areas where cuts will be made, it is said, are to include management information services (MIS); finance, and advertising, promotion and press relations on the West Coast.

At the executive level it was widely said that the futures of Bud Grant, president of the entertainment division, and Tom Leahy, the executive vice president to whom Grant reports, were dependent on the performance of the television network for the remainder of the fourth quarter. Observers in Hollywood suggested that the performance of the prime time schedule once the World Series on NBC has been completed may reveal whether there will be changes at the executive level.

A continuing management review by Coopers & Lybrand aimed at improving efficiency and making cuts, where necessary, is expected to result in additional layoffs at the corporate level. Already moved last week was Timothy Reynolds, formerly vice president of finance for the broadcast group, moving to vice president of finance, programs, for the parent company. The position of vice president of finance for the network, formerly held by Bruce Nugent, will be combined with Reynold's former post and will be filled by Jay Gold, formerly vice president of finance for CBS Songs. An agreement to sell the music publishing operations of the company was reportedly reached last week, with estimates of the sale price ranging from \$85 million to \$140 mil-

A far larger divestiture by the company was announced last week with the \$500-mil-

Leahy

lion sale of certain publishing operations to Harcourt Brace Jovanovich Inc. The operations, principally Holt Rinehart and Winston and W.B. Saunders, a medical publisher, constituted most of what had been the CBS educational and professional publishing division. The company said that while proceeds from the sale, which is subject to government and CBS board approval, "may be applied to working capital, the company remains interested in acquisitions, particularly in the field of television stations.'

CBS's statement that it would invest in its broadcasting operations seemed confirmed by reports that the company was shopping for a television station in Miami. More than one reliable source said CBS is currently talking with Taft Broadcasting about purchasing the latter's wCIX-TV Miami, a VHF independent, and giving that station the CBS network affiliation currently enjoyed by colocated wTVJ(TV). The latter station was scheduled, up until last week, to have been sold, along with six other stations, to Lorimar-Telepictures (see page 46).

But the CBS action was considered strong enough to have contributed to Lorimar-Telepictures decision to drop wTVJ(TV) from the package station purchase. Observers think it is likely that CBS will get a station in Miami, since Wometco, wTVJ's owner, may be forced to negotiate the station's sale to CBS, rather than lose the affiliation agreement, which would significantly reduce the station's value.

The continuing layoffs, budget cutting and restructuring are, not surprisingly, leading to anxiety at the company, CBS officials said. BROADCASTING received a letter, apparently from a CBS employe, threatening a class-action suit against the company on behalf of the many secretaries who have been dismissed. Last Thursday, Tisch, speaking to employes at CBS Entertainment in Los Angeles, felt compelled to deny rumors that the company was considering the reduction of dental and other employe benefits.

While much has been laid at the door of the acting chief executive officer, all his actions are subject to weekly review by the managing committee of the board of directors, established at the time of Wyman's dismissal. Tisch is chairman of that committee, whose other members are acting CBS Chairman William Paley, Michel Bergerac, Harold Brown and James Wolfensohn.

That committee has been kept informed, and perhaps gave advance approval of such major changes as the elimination two weeks ago of the entire CBS/Publishing Group's executive staff, including the dismissal of its president, Peter Derow. Said one senior company official: "To a certain extent this is

a board-run enterprise, and for that reason Tisch is less isolated than Wyman."

Small signs of board disaffection with Tisch's strategy were surfacing. One concerned the company's corporate giving policy, in which the board's public policy committee is actively involved. Recently the corporate contribution staff was cut from 10 to two people, and the company is discontinuing some projects, including its facultyin-residence program. While CBS is fulfilling commitments made earlier and will "spend about what we expected to spend for the year," acording to a senior executive, the question of how much, if any, CBS will give in the future will probably be reviewed by the board committee at its Nov. 12 meeting. Those who might argue against reducing future commitments include committee member Franklin Thomas, president of The Ford Foundation.

Aside from persistent reports that the alliance between Tisch and Paley had also begun to wear thin, Tisch appeared to be moving without opposition.

reduction exercise.

As to further job cuts, Wright said, "you'll definitely see some activity on our part to contain ourselves at least to the size we are and perhaps somewhat smaller, but I don't think there'll be any dramatic change."

Some executives at the network confided last week that they were not totally in sympathy with Wright's approach, but they also said that Wright is the new boss, and it is his right to question the way business has been done if he feels there is a more efficient way of doing it. "He's just finding his way around, and people are nervously reacting to him," said one executive, asking not to be quoted by name. "He happened to show up at a time when we do our budgets and at a time when the network economy is dull." That timing, he added, coincidental or not, is good, "because Wright won't have budgets forced on him that he might have thought unacceptable."

That executive said there was some concern among the ranks that Wright's acrossthe-board approach to cuts was arbitrary, perhaps unfair to those units currently operating more efficiently than others. But he also said the resistance was overblown and no more than the usual tension and anxiety

that come with new leadership.

Despite Grossman's reported initial concern with the budget exercise, a source within the news division said there was "no lack of cooperation" with the effort to find more efficient ways of doing business. He said that Grossman's concern with the budget was part of "the normal course of business...This is getting-to-know-you type of stuff."

The source also confirmed that despite the news president's concerns, the division was participating in the budget exercise to the same extent as the other divisions. The questions that Wright is asking, he said, are "legitimate."

At his press conference, Wright was asked if he would take the same hands-off approach to management that senior level officials at Capital Cities/ABC have said they embrace. "I would be 180 degrees from that," said Wright. The reason, he said, is that he does not have the background in the business that Capcities/ABC Chairman Thomas Murphy and President Daniel Burke have. "It's essential for me to understand the organization and why we do things and how we do things, and all the aspects if I'm going to add value to this business." He said he would be as involved in as many elements of the company "as time and reason permit."

On other subjects at the press conference, Wright said:

He would consider spinning off the company's radio networks along with its radio stations in the proposed merger with the Group W radio stations, "if the right circumstances develop. If you own a network and you don't own any stations it's just a more difficult burden to maintain the strength of the network vis-a-vis all your affiliates."

That NBC wants very much to renew its pact with National Football League, which expires at the end of the current season. "If we lose it," he said, "it won't be because we

Wright stands fast on trimming NBC

Exercise to pare budget meets with some hostility, but new NBC executive says action may reveal areas where company can operate more efficiently

Despite NBC's position as a strong number one in prime time ratings and demographics and a leader or strong contender in other dayparts as well, it is probable that the network will reduce its staff in the coming months and may also have a smaller budget in 1987 than in 1986. NBC's new president and chief executive officer, Robert C. Wright, made those points perfectly clear during a press conference with reporters in New York last week.

Wright's comments came two days after a New York Times article reported that Wright had ordered all units and divisions within NBC to go through a budgeting exercise—to reduce next year's costs by as much as 5% below costs in the current fiscal year—and had encountered stiff resistance to the exercise. The paper said that NBC News President Larry Grossman had refused to participate in the exercise, quoting an unnamed source as saying Grossman believed it would be a "mistake" to put such reductions on paper.

Sources at the network confirmed the accuracy of the story. Grossman would not talk about the subject, except to say he believed the news division would receive the funds it needed to operate effectively in 1987. At his press conference, Wright denied that Grossman refused to participate in the exercise, as did other sources at both corporate and news division levels. Wright also stressed that he understood there were divisions, including entertainment, news and sports, where it was unlikely that 5% or anything near that figure could be cut because of programing, rights and talent fees locked in for the com-

Wright

ing year. At the press conference he noted that the entertainment division, for example, "has commitments which basically preclude any changes in 1987." But he added that "it's possible, on the other hand, to look at how we buy our entertainment product or license it or what elements we might produce versus that which we might license or buy, and that's part of the exercise."

Wright made it clear that cost control will continue to be a top priority on an ongoing basis. On the likelihood that the network's budget could be reduced next year by an overall 5%, he said: "I wish we could cut 20% because we'd be that much stronger, but it's not possible in many areas. So I think in some areas we can do things differently and probably save some money, and in other areas we're pretty much going to have to do what it is we've committed ourselves to do." He stressed that "I'm going to keep the heat on" when it comes to finding ways to cut costs. "I don't feel there's any alternative in this environment whatsoever." He said that no unit would be exempt from the budget-

want to, it'll just be because we've got some horrendous economic situation that we can't deal with," or if enough affiliates suggested they were no longer interested in supporting the package.

■ That he expects to report to the board on NBC's activities perhaps once each quarter.

Midterm elections focus on Senate

If Democrats wrest control from Republicans, it's likely Hollings will be back at helm of Commerce Committee; with Wirth running for Senate seat, chairmanship of House Telecommunications Subcommittee may go to Markey

It's down to the wire as the general election draws near. At stake are all 435 seats in the House and 34 in the Senate. The outcome of this year's midterm elections will affect the Fifth Estate because of the likelihood that the composition of key House and Senate committees with jurisdiction over communications and copyright issues will change. For starters, there is the possibility that the Democrats will regain control of the Senate and its committee chairmanships. Even if the Republicans retain their majority, the retirement of Communications Subcommittee Chairman Barry Goldwater (R-Ariz.) and Copyright Subcommittee Chairman Charles McC. (Mac) Mathias (R-Md.) will lead to significant changes. And in the House, the departure of Telecommunications Subcommittee Chairman Tim Wirth (D-Colo.), who is running for the Senate, will result in new leadership there.

The Republicans hold a 53 to 47 edge in the Senate. But since 22 of the 34 seats up for election are Republican, the GOP is at greater risk than the Democrats. The Democrats only need a net gain of four seats to assume control. If the chamber ends up with a 50-50 ratio, the GOP would remain in control because of the tie-breaking vote of Vice President George Bush. (In that instance the committee chairmanships would stay Republican.)

On the Senate Commerce Committee, several incumbents are up for reelection, including Republicans Bob Packwood of Oregon, Slade Gorton of Washington and Bob Kasten of Wisconsin. Both Packwood and Gorton sit on the Communications Subcommittee. Kasten chairs the Consumer Subcommittee, which has jurisdiction over the Federal Trade Commission. Of those races, Gorton appears to be the most vulnerable. He is being challenged by Brock Adams, former transportation secretary under President Jimmy Carter, and the contest has been described as a dead heat.

On the Democratic side, Ernest Hollings of South Carolina, the ranking minority member on Commerce, Daniel Inouye of Hawaii and Wendell Ford of Kentucky are running. They are members of the Communications Subcommittee and are considered secure in their bids for reelection.

If the Democrats wrest control of the Senate, Hollings is expected to chair Commerce once again. In that event, he would also be in line for the chairmanship of the Communications Subcommittee. If Hollings didn't as-

sume that post, next in line is Inouye. However, there is a greater likelihood that Inouye will opt to chair the Merchant Marine Subcommittee, which leaves Ford, who might take the seat. With Hollings at the helm, communications policy decisions could deviate from the path they have taken since Republicans took control of the committee in 1980. For the most part, Hollings has been a proponent of broadcasting and cable deregulation. He is, however, a staunch advocate of the fairness doctrine, and the broadcast industry's efforts to eliminate the doctrine would prove difficult.

Even if the Republicans retain control, the committee's makeup will be altered. John Danforth (R-Mo.) would be expected to remain chairman of Commerce, but due to Goldwater's retirement, there will be at least one shift in subcommittee leadership. Packwood would be expected to succeed Goldwater as chairman of the Communications Subcommittee. Since Packwood took a strong interest in communications issues when he led Commerce, he is likely to chair an active subcommittee. Louisiana Democrat Russell Long also is leaving, which means there will be two openings on the committee.

Goldwater's departure affects the lineup in other Senate committees as well. Judiciary Committee Chairman Strom Thurmond (R-S.C.) has said he wants to replace Goldwater on Armed Services. Thurmond's relinquishment and the retirement of Senators Mathias and Paul Laxalt (R-Nev.) give Utah Republican Orrin Hatch an opportunity to lead Judiciary. Hatch currently chairs the Labor and Human Resources Committee and has not officially said what he'll do. Most observers feel he would want to head Judiciary.

The broadcasting and cable industries are

Hollings

not likely to relish the prospect of Hatch assuming that post. The senator is considered an ally of the motion picture industry which is often at odds with cable and broadcasters over copyright matters.

The fate of the Copyright Subcommittee itself is unclear. Mathias's departure as chairman has raised the question of whether the subcommittee will be reinstituted next year. The subcommittee was defunct from 1976 until 1983 when it was revived. There is some speculation that if the Senate remains under Republican control, copyright issues will be handled by the parent Judiciary Committee. In Judiciary, Democrat Joseph Biden of Delaware would become chairman if his party takes over even though Edward Kennedy (Ď-Mass.) headed Judiciary before. Kennedy would be expected to chair Labor and Human Resources. As for a Democratic chairman of the Copyright Subcommittee, Patrick Leahy (D-Vt.) would be in line for that post if the subcommittee stays in business.

Other reorganization in Judiciary would occur as a result of the three vacancies created by Laxalt and Mathias, and by the death of Senator John P. East (R-N.C.). Committee incumbents seeking reelection are: Charles Grassley (R-lowa), Jeremiah Denton (R-Ala.), Arlen Specter (R-Pa.) and Leahy. Denton and Specter are said to be facing a stiffer challenge than originally envisioned although they are reported to be holding their own. Barring upsets the incumbents are expected to return.

As for control of the Senate, two races are representative of the struggle between the two parties. In Colorado, a heated race has developed between Wirth and Republican Congressman Ken Kramer who are vying for the seat vacated by Democrat Gary Hart. The Wirth-Kramer contest is being characterized as a toss-up. Kramer's and Wirth's standings in the polls have shifted back and forth. If Wirth wins, there is speculation that he might seek a seat on the Senate Commerce Committee and continue to play a role in the development of communications policy.

Another toss-up race is under way in North Carolina where Senator James T.

Markey

Broyhill (R), who was appointed to succeed East, is squaring off with former Democratic Governor Terry Sanford. Broyhill served in the House as ranking minority member of the Energy and Commerce Committee.

In the House, a picture of the Telecommunications, Consumer Protection and Finance Subcommittee in the 100th Congress is not as clear. There is talk about shifting the subcommittee's jurisdiction over consumer protection and finance to other subcommittees. Telecommunications might stand on its own or become part of another subcommittee. Two years ago the same discussion occurred, but Wirth's departure increases the chances for change. Among the scenarios mentioned would be the creation of a Finance and Trade Subcommittee, where consumer protection issues would fall under the purview of the Commerce, Transportation and Tourism Subcommittee chaired by James Florio (D-N.J.). However, there have been reports that Florio has expressed an interest in finance. Also, there is some probability that the Fossil and Synthetic Fuels Subcommittee and the Energy Conservation and Power Subcommittee might be merged and chaired by Representative Phil Sharp (D-Ind.).

Any inkling of what actually will happen isn't likely to surface until late January when the new Congress convenes. The House usually reorganizes its committees in late January.

Despite all that conjecture, the front runner for chairman of the Telecommunications Subcommittee if it survives is Representative Edward Markey (D-Mass.). Markey's views on communications issues are not likely to stray far from Wirth's. Broadcasters are apt to be at odds with the Massachussetts Democrat on such issues as broadcasting deregulation and children's television. Markey is currently chairman of the Energy Conservation and Power Subcommittee, but has stated his desire to succeed Wirth (BROADCASTING, April 21).

There are reports that other members senior to Markey, such as Sharp and Florio, are interested in the post. Still another potential candidate is Al Swift (D-Wash.). Swift, said one source, "would have to jump a few bodies to get there." Nevertheless, his strong interest in telecommunications issues keeps his hat in the ring. The role seniority plays in determining subcommittee chairmanships, said one Hill aide, "is counting less and less."

For the most part, composition of Telecommunications's parent, the Energy and Commerce Committee, should remain about the same with John Dingell (D-Mich.) as its leader. Most, if not all, of the Commerce members are expected to be reelected. There will be three open seats on the Democratic side (Wirth, Barbara Mikulski [D-Md.], and Richard Shelby [D-Ala.] are running for the Senate) and a vacancy created by Broyhill's appointment to the Senate. Norman Lent (R-N.Y.), who became the ranking minority member on Commerce after Broyhill left, is expected to retain that post. And Matthew

Rinaldo (R-N.J.) is likely to continue as ranking minority member on Telecommunications whatever its final form will be.

The lineup in the House Copyright Subcommittee shouldn't experience much change, if any. Representative Robert Kastenmeier (D-Wis.) will continue his leadership of the subcommittee. There are no vacancies other than the seat held by Republican Thomas Kindness of Ohio, who is running for the Senate. As for the election and its impact on the subcommittee, Representative Howard Coble (R-N.C.) is facing a tough match.

PBS to study program practices

Announcement comes in response to heat organization is getting, most recently over 'The Africans'

The Public Broadcasting Service announced last Thursday (Oct. 23) that it will review its policies and standards governing selection of programs for national distribution to affiliates. The review was recommended by PBS President Bruce Christensen and authorized by the executive committee of the 35-member board, and was a reaction to recent criticism of PBS, although a PBS spokeswoman said the board had been considering such a move since last June.

"This step is necessary at this time because there are some who seek to discredit the programing on PBS," Christensen said. "Nothing is more important to public television than its program and editorial independence," he continued. "The PBS board is the properly constituted authority to examine any questions raised regarding the integrity of PBS's programing judgments. This review will permit them to do so."

PBS has been under attack on several fronts. Its fall series, The Africans. has generated much controversy since early September, when Lynn Cheney, chairman of the National Endowment for the Humanities, demanded that NEH's name be removed from the program's credits, claiming the show conflicts with the government agency's guidelines requiring objectivity and balance in the programs it helps fund (BROAD-CASTING, Sept. 8, 29). Republican members of Congress, led by Representatives Don Ritter (Pa.) and Michael Oxley (Ohio) and Senator Barry Goldwater (Ariz.), have pressed the Corporation for Public Broadcasting to conduct content analysis of PBS programing (BROADCASTING, Sept. 22), and Ritter introduced a bill on the issue in the last days of the 99th Congress (see story, page 114).

Accuracy in Media, a conservative Washington media watchdog, has repeatedly challenged PBS programing, claiming it contains liberal bias (BROADCASTING, Jan. 27). Last Thursday morning, AIM and eight other organizations (the National Conservative Foundation, Citizens for Reagan, the American Lebanese League, the Ethiopian Refu-

Lorimar revises Storer station purchase

Faced with a possible loss of its CBS network affiliation, wtvJ(Tv) Miami has been dropped from the seven-station purchase scheduled to have been made by Lorimar-Telepictures. Reliable sources told Broadcasting that CBS officials have had preliminary discussions about purchasing co-located wcix(Tv), one of the five Taft Broadcasting independent stations up for sale, which would result in that VHF station becoming the new CBS outlet in Miami. CBS now also has the option to negotiate with Wometco about the purchase of wtv.

The revised purchase announced by Lorimar-Telepictures last week is for the six Storer television stations: WSBK-TV Boston, WJBK-TV Detroit, WJKW-TV Cleveland, WAGA-TV Atlanta, KCST-TV San Diego and WTI-TV Milwaukee. The purchase price has been reduced from \$1.85 billion to \$1.415 billion, reflecting the elimination of WTVJ from the deal (\$405 million), plus a \$30-million markdown on the remaining six stations. In addition, the sellers, an investment partnership headed by Kohlberg Kravis Roberts & Co., will acquire \$70 million in preferred stock in the new L-T subsidiary containing the six TV stations. Most observers said that would reduce the amount of cash the buyers would have to put up for the stations

There may have been other considerations, in addition to the CBS complication, that led to the elimination of wrvj—part of the Wometco station group also owned by KKR—from the originally announced transaction, including apparent problems with financing the purchase ("Closed Circuit," Sept. 15). Part of the purchase was to have been financed through the sale of stock in the Culver City, Calif.-based entertainment and advertising company. The price of L-T stock has recently declined. The company has also changed its mind about the degree of bank financing it would use and the corporate structure by which it proposes to operate the stations ("In Brief," July 7). Details of the purchase are expected soon in an anticipated filing with the SEC.

A reason that none of the Storer stations were dropped from the package is that the sale of still another station, wttv,tv, Bloomington (Indianapolis), Ind., to Lorimar-Telepictures for the assumption of \$85 million in debt is contingent upon all six Storer stations being purchased by L-T. Drexel Burnham Lambert, which is arranging the purchase and financing for L-T, has a significant ownership in wttv, either directly or through employes and, it is widely believed, would like to see the station sold. The sale of the Miami station was not a prerequisite for the Bloomington transaction.

gees Education and Relief Foundation, the Lincoln Institute, Americans for a Safe Israel, the National Black Republican Council and the Committee for Accuracy in Middle East Reporting in America) held a press conference in Washington to state their opposition to *The Africans*.

Christensen said the review of PBS program standards will be conducted by a board committee and outside experts, none of whom had been named at press time. The reviewers will study current policies for selection of programs, how those policies have affected the PBS program schedule and what changes may be warranted. The group will report its findings to the full PBS board in December.

Christensen said he did not expect the re-

view to quiet ideological attacks. Irvine said he was "delighted that PBS is finally responding to the public clamor for some reexamination of its policies" but doubted the organization would carry out an objective investigation. "I would expect what we would get from PBS is a whitewash," he said. "This is like asking the Nazis to conduct their own examination of the gas chambers—to use a somewhat extreme analogy—or asking John Dean to investigate Watergate."

At the nine-organization press conference last Thursday, Irvine said the CPB board should "enforce" the section of the 1967 Public Broadcasting Act that says government-funded programs should be produced with strict adherence to objectivity and bal-

ance. He said he was told by CPB's acting general counsel that that requirement has been removed from CPB contracts with producers, a situation he called "scandalous." Irvine also said he has urged NEH to sue the co-producer of The Africans, WETA-TV Washington, to recover the \$600,000 NEH contributed to production of the show. Asked whether he would withdraw that demand in light of PBS's announcement, Irvine said: "I don't see why this action by PBS should change that at all. It would send a message to these contractors who seek money from NEH and CPB that they just can't say one thing in asking for the money and then go out and blithely do something entirely different, which is what they've been able to do.'

Multichannel TV operators regroup

Revived Microwave Communications Association meets in Washington to work for solutions to infant industry's problems, including opening up programing sources

Multichannel television (MCTV), also known as wireless cable and, not entirely accurately, as MMDS, is still in its early stages. But, with the right diet of cable programing, the pioneers of the over-the-air pay television medium believe it will grow and take its place alongside cable and broadcasting in the media mix of tomorrow.

The newly reconstituted Microwave Communications Association provided a forum for the pioneers and their qualified optimism at a three-day convention in Washington last week. Also among the 200 in attendance were suppliers of the equipment, programing and microwave channels used by the medium.

The first of the MCTV operators are offering service in Philadelphia, San Francisco, Cleveland, Washington and several smaller markets. And others are planning to introduce the series shortly in Milwaukee and Oklahoma City.

MCTV operators make use of some of the the 30-plus microwave (2 ghz) channels to broadcast multiple channels of pay programing to subscribers. To receive the line-of-sight signals, subscribers must be equipped with special microwave antennas and receivers.

The FCC has divided the 2 ghz channels among three services: the Multipoint Distribution Service (MDS), the Instructional Television Fixed Service (ITFS) and the Operational Fixed Service (OFS). Pay programers have always had access to the common carrier MDS channels, and, over the past several years, the FCC has relaxed its rules so they can also lease, under certain conditions, the ITFS and OFS channels.

MCTV is the heir-apparent to single-channel MDS, which, using the same basic technology, offers a single pay service (often Home Box Office or Showtime) to subscribers. Single-channel MDS prospered briefly in the late 1970's and early 1980's, but went

into a tailspin in 1982 as a result of cable competition and widespread theft of service. No one expects it to recover.

MCTV has been talked about since Microband Corp. of America proposed the service to the FCC in 1982 as a way of reversing the fortunes of single-channel MDS. But its introduction has been slowed by regulatory, technical and financial obstacles.

Today, MCTV operators and would-be operators still have the regulatory hassles and money problems, but they say the chief problem preventing them from either getting into business or competing on a equal footing with cable operators is the inability to secure programing rights to the services of such major cable programers as Home Box Office. Asked why they can't get those rights, they point the finger at cable operators.

According to MCTV operators at the convention, MCTV services have been launched or are soon to be launched in several markets:

■ In Philadelphia, Micro TV Inc. is providing a four-channel service (MTV, CNN, ESPN and Prism, the regional sports and entertainment network) for \$24.95 a month. President Bill Gross said he has temporarily stopped accepting new subscribers in June after reaching the 10,000 mark. He said he will resume marketing the service after he has completed adding several channels of programing to the service. He said he has 5,000 names on a waiting list.

■ In San Francisco, Premier Communications has been offering a five-channel service (HBO, ESPN, CNN, wtbs[tv] Atlanta and worth New York) since August 1985. Because the service is not yet scrambled, said Premier's Jack Capuzelo, it is concentrating its marketing efforts on bulk customers (hotels, motels and apartment buildings), and on upgrading existing single-channel MDS bulk customers and signing up new ones. For the new service, he said, he charges \$6 or \$7 per month per hotel or motel room and \$10 a month per apartment unit.

■ In Cleveland, Metropolitan Cablevision is selling an eight-channel service (Show-

time, CNN, WTBS, WOR-TV, ESPN, MTV, HitVideo USA and Score) for \$18.95 per month. James Theroux, president and chief executive officer, said that he is offering the service only within the city of Cleveland, which is not yet wired for cable. He declined to reveal his exact subscriber count, saying only that he "has thousands of subscribers" and is adding 100 a day. A consensus of some of Metropolitan's hardware and programing suppliers is that it serves between 2,000 and 5,000 homes.

■ In Milwaukee, Specchio Developers is on the verge of launching a 14-channel service, including WTBS, WPIX(TV) New York, WGN-TV Chicago, HBO, SelecTV, Bravo, American Movie Classics, MTV, Nickelodeon, The Nostaglia Channel, CNN and ESPN. According to President Mike Specchio, the business plans calls for selling to multiunit dwellings and single-family homes. The bulk rate will vary with the size of the building being served, he said. Homes will be charged around \$16 a month for a "basic" package and \$6 a month for each pay service.

In Oklahoma City, Multichannel Communications Inc. hopes to launch an 18-channel service, but must first get FCC permission to co-locate the transmission sites for each channel. Multichannel President Curt Bradley said that the regulatory hangup has already delayed the service for several months and has the potential for delaying it for several more. Bradley said he has contracts for the heart of the programing lineup, including HBO, MTV, ESPN, CNN, Lifetime, WTBS, WOR-TV and WGN-TV.

Not every budding MCTV operation is in a big city. According to William Ternent of American Technologies and Information, ATI has four-channel systems up and running in San Luis Obispo, Calif.; Salina, Kan., and Hays, Kan. In addition, it has one under construction in Mobile, Ala.

The MCTV operators feel they need and are entitled to the same programing that cable operators get. But those at the MCA convention said that major cable programers are not dealing with them. Among those cited for their recalcitrance were Home Box Of-

fice, Showtime/The Movie Channel, The Disney Channel, the USA Network and Home Box Office. HBO is said to be on some MCTV systems only because they had (or purchased) a single-channel MDS operation with pre-existing rights to carry the service. Premier's Capuzelo said HBO is cutting no new deals for the distribution of either of its services via microwave. Despite his long affiliation with HBO as a single-channel MDS operator, he said, HBO will not allow him to carry its companion Cinemax service as part of his MCTV programing.

The MCTV operators believe that the cable programers are discriminating against them because of pressure from cable operators who fear the competition from MCTV. Jim Clark, sales manager, Conifer Inc., and newly elected president of MCA, said, "We have some suspicions that that is the case."

Without HBO and Showtime, it will be difficult for an MCTV operator to compete with cable operators, said ADI's Ternent. But neither will deal with MCTV, he said. "Interestingly, both are vertically integrated with [cable] MSO's," he said. "You have to make up your own mind as to what is going on." (HBO is owned by Time Inc., which also owns American Television & Communications, the second largest MSO; Showtime/TMC is owned by Viacom International, which also owns Viacom Cable, a top-25 MSO.)

Without competition from MCTV, said Ternent, cable operators will have a de facto monopoly of the distribution of cable programing. At the same time, they will be deregulated and able to charge consumers whatever they want, he said.

Clark said that one of the goals of the MCA will be to educate Congress and try to persuade it to bring pressure to bear on cable programers to start dealing with MCTV operators. He said MCA may try to push for legislation.

At a panel session on programing, Omar Duwaik, president of MDA Inc., an MDS common carrier, and MCA's new vice president, said that during the waning days of the 99th Congress, he and others tried to attach a provision that would have required cable programers to deal with third-party packagers of cable programing for the TVRO owners. Duwaik said they failed to attach the provision, and the Senate voted down, albeit narrowly, the TVRO legislation. Nonetheless, he said, if MCA members make their presence felt on Capitol Hill during the next session of Congress, they will get results. "I don't think it will continue for too long."

The good news in the programing arena is that other programers will deal with MCTV. The programing session featured representatives of two cable programers who were eager to sell to MCTV: Group W Satellite Communications (The Nashville Network and Home Team Sports) and MTV Networks (MTV, VH-1 and Nickelodeon). According to Duwaik, ESPN has temporarily stopped selling to MCTV, pending reformulation of its MCTV policy.

In the question-and-answer period following the presentations, the programers' policies of charging MCTV operators more than cable operators was challenged. Tom Hawley, GWSC's representative, said the cable operators pay less because they are can qualify for "volume discounts, which are huge."

Sandy McGill, director of special markets, MTV Networks, said the rates for cable operators are lower because they were set earlier than those for MCTV and other special markets (TVRO, SMATV, hotels and motels). In August 1985, he said, "we came out with a set of [special market] rates we felt were competitive and that would suit the volume and scale of each of the separate markets." The rates were "based on a competitive structure and [they] couldn't, by nature, be identical" to the rates set years earliers for cable, he said.

Judging by the programing lineup of the MCTV operations already holding programing contracts, other cable programers eager to sell to MCTV include Turner Broadcast-

ing System, Tempo Enterprises, United Video, Lifetime, Eastern Microwave, Rainbow Programing Services Co., the Nostalgia Channel and SelecTV. Hawley said the Discovery Channel, of which GWSC is a minority owner, is also willing to sell to MCTV.

Aside from the programing question, the industry's biggest problem may be in finding capital to finance construction of systems. Although the cost of building a 20-channel MCTV operation to serve 20,000 subscribers is nowhere near the cost of building a cable system to serve the same number of people, it still isn't inexpensive.

Metropolitan's Theroux said the it would be a grave mistake to enter the business undercapitalized. It will take \$10 million to serve 20,000 homes, he said. Reception equipment and installation cost about \$370 per home, he said. In addition, MCTV will need \$1.5 million to rent and equip the front and back offices and another \$2 million to cover the early operating losses. "It's tough to do it right," he said.

Theroux, as it happens, is one of the few without money problems. He is well financed by venture capital raised by TA Associates. Others are not so lucky. Mike Speccio, for instance, spent more than \$2 million to buy out single-channel MDS operations in Milwaukee and Minneapolis, the cities where he hopes to make his MCTV mark.

He said he, like most everybody else in the business, is now looking for financing. The industry will take off, he said, at the same time cable did—when it was able to obtain long-term debt financing and stretch out the amortization.

At the top of MCA's regulatory agenda is to encourage the FCC into granting MMDS construction permits more speedily. The FCC has been tentatively selecting permittees for the two four-channel blocks in each market through lotteries for over a year. But, according to Clark, it has only awarded permits to a handful of the lottery winners. What's holding things up is the processing of lottery winners' interference analyses, which the FCC must review before awarding permits, he said.

At a convention panel session, two FCC officials addressed other regulatory issues confronting the industry. James Keegan, chief of the FCC Common Carrier Bureau's domestic facilities division, said his division hoped to draft a recommended order in December concluding a rulemaking that would give MDS operators the option of classifying themselves as common carriers or broadcasters for regulatory purposes. Keegan also said the comments in the proceeding favored

the proposal.

Stuart Bedell, chief of the FCC Mass Media Bureau's distribution services branch, guessed" that some instructional television fixed service operators would be permitted to operate at up to 100 watts instead of the 10 watts they are generally permitted. But Bedell said it "was pretty clear" that the commission wasn't planning to change its ground rules through rulemaking. Bedell said the current rules permitted the commission to authorize powers above 10 watts on a case-by-case basis. But Bedell also recommended that ITFS operators limit their requests for higher power to cases where it is really needed. "It's up to you not to bury us with paper," Bedell said.

The industry's regulatory agenda involves agencies other than the FCC. Charles Walsh, an attorney with Fleischman & Walsh and MCA's counsel, said the U.S. Copyright Office has launched a notice of inquiry seeking comment on whether satellite master antenna television and multipoint distribution systems should continue to be considered as "cable" systems under the copyright law. Walsh said it would behoove the industry to argue for retention of their status as a cable system because without that, MDS operators would not be able to take advantage of cable's compulsory license when it came to copyright obligations for carrying broadcast superstations. "Then you must bargain in the marketplace to carry those signals," Walsh

According to Clark, the MCA is a merger of two foundering associations—the MDS Industry Association, which held its last convention in October 1984, and the Microwave Communications Association, which last met in June 1985. Clark said the new group has temporarily kept the name of the latter association, but said that one of the first orders of business will be to pick a new one.

Indies angry over cable channel switching

INTV vows to fight growing practice at systems of moving stations to higher channel assignments

Independent television operators have a new beef with the cable industry and appear to be on the verge of declaring war. They are distressed about a new marketing strategy used by a growing number of cable systems. Cable operators are realigning their channels to create a more appealing lineup to increase viewership, attract more local advertising and promote programing more easily. Consequently, some independent stations may be moved from lower channel assignments to a less desirable position on what they are calling the "upper stratosphere" of a cable system's channels. (According to research, services carried on channels below 13, particularly those adjacent to network affiliates and strong independent stations, are more heavily watched than services on higher channels.)

Alarm over this latest phenomenon surfaced during a board meeting of the Association of Independent Televisions Stations in Nashville two weeks ago. Following that meeting, INTV President Preston Padden returned to Washington ready to stop cable from what he called a "blatantly anticompetitive" practice.

In addition, he warned that such activity might preclude any further cooperation with cable on must carry. Cable is unhappy with the A/B switch provisions in the FCC's new must-carry rules and asked the broadcasting industry which also has problems with the concept, to join it in petitioning the FCC for reconsideration of that provision. INTV says cable "can't expect our help on the A/B switch" as long as these channel reassignments are occuring.

INTV leadership has been directly affected by this new marketing practice. In Oklahoma City, Cox Cable advised local network affiliates and independents that it is instituting a new channel arrangement on the first of next year. Ted Baze, president-general manager and part owner of KGMC-TV Oklahoma City, is INTV board secretary. His ch. 34 has been carried on Cox Cable's ch. 10 and will be moved to ch. 33.

"People have to go through the entire dial before they get to the independents," Baze said. "We wouldn't have a quarrel if they would put us on our own number," he added. Baze said local broadcasters are planning to meet with Cox officials and if that proves unsatisfactory, they'll approach the franchising authority. However, in summing up the situation, Don Richards, general manager of KAUT-TV Oklahoma City, noted, "it's their [cable's] train, they can run it anyway they want."

Cox said its primary reason for shifting channels was technical. The system was experiencing a serious ghosting problem, explained Jill Trione, director of communications and programing for the Cox system. She noted that Cox was moving affiliate and independent stations off their numbered channels as one way to cut down on ghost-

ing. "We'll still have a direct pick-up problem, but we choose services that would not cause as much damage." Under its new lineup, affiliates on channels 4, 5 and 9, would be carried on 7, 8 and 10, respectively. Instead, the station's program guide would be on ch. 4, the Financial News Network could be found on ch. 5 and C-SPAN would be carried on ch. 9.

Trione stressed that Cox wanted to be fair to the independents and felt that lumping them all on channels 30-34 was an equitable approach. She also said they put them together for customer convience, so that viewers won't have to search for the independent stations. The system did not move some of the advertiser-supported services because it is interconnected with Multimedia's cable system there for selling local advertising.

Trione emphasized that Cox was devoting the next two months to informing its customers about the new channel lineup. "We're certainly going to do everything to let our customers know what we're doing," she

Another example cited by INTV was that of KSTW(TV) Seattle. That station is owned by Gaylord Broadcasting Co., and is broadcast over ch. 11 and carried on the same channel by most of the cable systems in the Seattle ADI. The station expects to be moved to the upper 20's, said Kevin Hale, KSTW's vice president and general manager. "For years, we've promoted ourselves as ch. 11, it's going to take a long time to get viewer patterns back to normal," Hale said.
"Our guys have had their belly full," Pad-

"Our guys have had their belly full," Padden said, referring to INTV's view that the cable industry is a monopoly and that independent broadcasters are at its mercy. Padden indicated that INTV was ready to attack cable on other fronts as well. He suggested INTV might support the telephone industry's drive to become deregulated and offer information services in competition with cable. And he implied that cable's compulsory license would be in jeopardy.

Padden noted that his board's formal position would emerge after the FCC issues a final order on its new must-carry regulations. Technically, he noted, cable operators are complying with the must-carry compromise that INTV and other factions of the broadcasting industry reached with cable. That agreement says: "Systems are not required to carry stations on their channel positions, but must carry all qualified local stations in their entirety on the lowest priced tier."

Padden argued that shifting channels around is "grossly inconsistent" with the "spirit" of the agreement. The lowest priced tier, he said, was understood to mean basic service. "We made a deal for carriage on basic, which we considered to be the lowest numbered group of channels." But, since that agreement, Padden said, the nature of basic service has started changing.

Under the old must-carry rules, a VHF signal had to be carried on the same cable channel as its over-the-air designation. There were no other requirements concern-

ing channel positioning and basic was defined as the "lowest priced tier available to subscribers." The FCC's final order is not out, nevertheless, in a statement accompanying the new must-carry rule, the commission indicated that mandatory carriage would apply to "the lowest priced separately available tier of service." Unless the final order specifically states otherwise, independents will likely find it difficult to stop cable operators from realigning their channels.

"Channel positioning was never part of the deal. I don't know how they can argue for this now," said National Cable Television Association President James Mooney. He questioned the validity of INTV's complaint. "Where do they get off complaining that a ch. 22 is going to be put in a location in the mid-20's? Why should UHF signals be entitled to a channel on cable better than the one the FCC gave them?" Mooney asked. He suggested INTV was trying to use its signature to "ratchet up the deal," adding that he told INTV, "as politely as I could that their signature isn't worth that much."

Channel realignment "is not a national policy issue, it's a local issue," said Ed Allen, president of Western Communications, Walnut Creek, Calif., and an NCTA director. INTV invited Allen to address the board as an individual cable operator, not on behalf of NCTA. His primary mission was to present the cable industry's perspective on must carry, but wound up discussing channel positioning too.

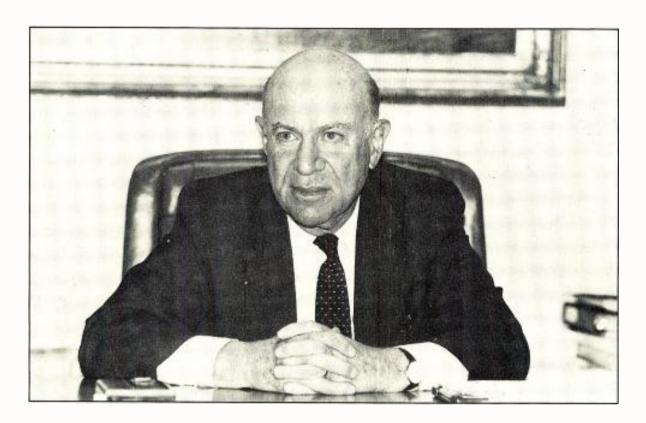

INTV's complaints were not only being dismissed by the cable industry. The National Association of Broadcasters was reluctant to jump into the fray.

"It's a business practice that INTV is objecting to; channel positioning has nothing to do with the must-carry deal," said NAB President Eddie Fritts.

Channel realignment is a trend developing within the industry. At this point, operators are in a "transitional period," said Terry McGuirk, vice president for special projects for Turner broadcasting's WTBS(TV) Atlanta. WTBS and other ad-supported basic services have been trying to convince operators to consider shifting their channels to enable more effective promotion and increase viewership as well as local advertising revenue.

enue.
"We're going to see a lot of experimenta"McGuirk predicted. tion over the next year," McGuirk predicted. He said that much of the focus has been on the low-numbered channels. But there are other options being considered such as distributing network affiliates throughout the cable band. And there are some in the industry who insist that national channel alignment is essential to improving viewership of basic cable. In Los Angeles, the Southern California Cable Television Marketing Council will unveil a plan this week for a common channel lineup for the roughly 90 cable systems in the Los Angeles ADI. Under this plan the network affiliates and strong independent stations will stay where they are and the other independents would be carried on their broadcast channel designations.

Atz Large

Larry Tisch and the new realism at CBS

Few initiates to the Fifth Estate have captured such interest—or caused such trepidation—as Laurence A. Tisch, the billionaire entrepreneur and investor who, on Sept. 10, became the acting chief executive officer of CBS, and who has spent most waking hours since shaping the company to a new, leaner, less complicated silhouette. Last Monday, Tisch agreed to meet with BROADCASTING editors for this candid "At Large" interview, in which he describes his plans for CBS's immediate future and his hopes for the company's long haul.

What attracted you to CBS in the first instance? Was it purely for investment possibilities, and do you now see something else in the company?

Well, my original investment was purely for investment purposes. I'm still an investor in the company, but now that I have a role as acting chief executive, you see a lot more things than you can as an outsider. It's been a fascinating experience in a very interesting business.

Do you still see it as an investment opportunity?

Definitely. We're large investors in the company and we hope that the investment for the long run works out profitably.

Would one be right or wrong in thinking that you might stay just long enough to see your investment in the company appreciate, and that you then might find it makes business sense to take your money elsewhere.

No. Our stock has never been for sale and as far as I know, as long as I'm active at Loews Corp., it will never be for sale.

What are your thoughts about selling any pieces of CBS? The re-

o, we won't guarantee a new AVC Century Series switcher will win you awards. But by effortlessly handling your most demanding tasks a Century Series AVC can free you to concentrate on what really matters—award winning production.

Century's new SuperSTAR™ Memory system simply overpowers production problems. Its unmatched ability to manipulate, memorize and recall reduces complex tasks to a few button pushes.

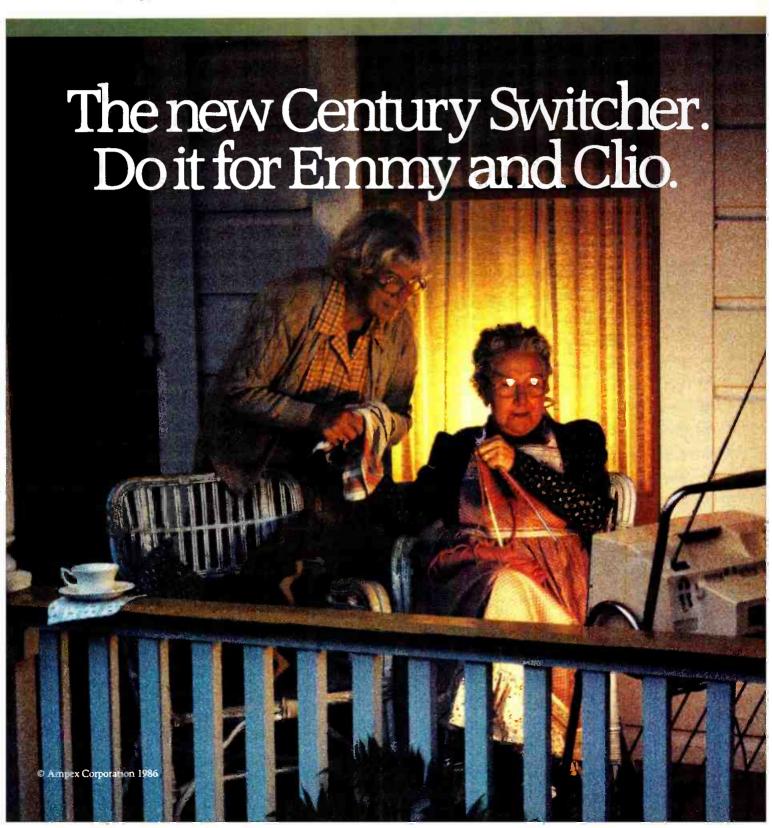

Greater keying power and flexibil-

ity give you the kind of creative command you've dreamed about. Each M/E has three *full-capability*, independently maskable keyers and a time-saving Key Memory. Virtually any transition imaginable between keys and backgrounds is possible. You'll find yourself creating effects on the Century, rather than going off-line.

So if you're feeling compromised by your switcher, take a look at the new AVC Century Series. You'll discover capabilities other switchers don't even offer as options. No matter which model you choose, a Century Series switcher will be a powerful complement to your creativity.

The many awards and honors for outstanding journalism that our newspapers receive year after year belong to the innovative, talented people in the Hearst Newspapers Group. They have made the Times-Union and the Knickerbocker News in Albany the most important media voices in New York's state capital and the Seattle Post-Intelligencer a respected editorial voice in the Pacific Northwest. From the boldly revitalized San Francisco Examiner to the newly redesigned San Antonio Light, Hearst newspapers are setting standards of excellence all over the country.

Throughout The Hearst Corporation, the innovative ideas of our people...all 12,000 of them working in more than 135 different businesses...have helped us become one of the largest and, we think, one of the best communications companies in the world.

cords group, for example, or CBS/Fox.

CBS Records is an integral part of this company. It's been here a long time. It's got great management, it's got a great position in the industry, and we've certainly given no thought whatsoever to separating it from CBS.

There has been talk that CBS is talking with its partners in Trintex [the joint venture with IBM and Sears to develop a videotex system] about ending that association.

No, CBS will remain in Trintex. It's just a question of on what basis it will remain in Trintex.

I would like to volunteer an impression about your lengthy tenure of five weeks, which is that you seem to want the company to concentrate on doing fewer things, while doing them very well, and while reducing the cost of doing them very well. Is that fair?

I couldn't have said it better myself—what you said is exactly right. I don't think we should be a so-called conglomerate. I think this should be a media company with an emphasis on broadcasting, and we should do that very well. That's our purpose.

There's another impression of your five weeks so far, which is that you seem to be doing all the heavy work before the new CEO comes in—that you want to clear up what has to be cleared, to get rid of the undergrowth, or whatever you feel is necessary. Why is it necessary to do that, as opposed to waiting for the new CEO to come in and set his own course?

Well, I am the CEO now. I'm not here for a vacation. You know, if there's a job to be done, it's my duty to do it, and not leave the burden for somebody else to do the dirty work; that doesn't make sense to me. I mean, it's painful to do some of the things that we have to do. I don't enjoy it at all, but by the same token, the board asked me to be acting chief executive, and I think it's my obligation to carry out that function to the best of my ability.

Does what you said about CBS Records hold true for the other assets of the company?

Yes. Basically, we want to maintain the company as it is. Of course, we are a business and we have an obligation to the stockholders, and if somebody said to us that there was one particular unit that somebody wants much more than we do, I would present it to the board of directors. It's their decision to make.

This is not a black and white corporate world, you know. There are always areas of grey that come up from time to time. I think it's the role of the chief executive to present everything, alternatives, to the board, no matter what they are. I'm just one person out of 13 on the board.

I don't mean for you to infer anything from that, but I just don't like the idea of making blanket statements that this is holy or that's not holy.

There does appear to be—at least when viewed from the outside—an air of crisis about CBS, partially because of the circumstances of your becoming CEO and because of the already announced cutbacks. Just how much trouble is CBS in, and how Draconian a program do you think will be required to get it back on track?

Just to get the thing in perspective: CBS is in no trouble, none whatsoever. CBS, if you really look at it from a financial standpoint, is in great shape. Take any number you want for the value of the assets of this company—you name the number—and I'll multiply it for you. Name it.

Two hundred.

O.K. If you take the number of 200 and you say we have 24 million shares out, that's four billion, eight hundred million dollars of value in the company. There's \$660 million of debt, so you add the debt back and that gives you five billion four. So your debt to equity ratio becomes around 13% or 14%.

I mean, the whole thing becomes silly season when people talk about the financial problems at CBS. There are none. This is as strong as any company in this country.

One of the reasons for the crisis atmosphere is the layoffs. Just after

you took over as acting CEO you said that if at all possible, you were going to try to do this through attrition rather than having layoffs.

There are two parts to it. The layoffs that are taking place, or a great many of the layoffs taking place now, were already scheduled. These plans were presented to the board [by the former CEO, Thomas Wyman] back in April, May, June, July and September—mostly at the July board meeting. This is not new.

Now, it may be adjusted. Certain areas may feel it more than other areas. But basically, nothing is being done in this company that touches programing, news or broadcasting, media. There's nothing to do with anything that counts.

I mean, we're talking about our extraneous functions, that no company would have.

Would that include the CBS Technology Center, for example?

We closed the center, but we moved the people who were working on research products to the divisions. In other words, they took people who were working with broadcasting from the center to the broadcasting group, and they took people who were working with records to the record group.

But you went from 90 people to perhaps 20.

No, more. I think we'll end up with about 40.

But then we took away the administration that was duplicated, we took away grounds people up there. We're selling the real estate. That center was scheduled to be closed a year ago, before I came on board, and nothing had been done about it. They waffled back and forth.

How much will you get for Stamford?

Oh, it'll be many millions. I don't know the exact price, but many millions.

Twenty?

Oh, I'd say maybe a little less than that, but in that ballpark.

Well, what do you plan in further cutbacks within the organization?

Whatever is necessary to run the company in a normal, fairly efficient basis where the employes will be happy in running it. I've always found—and I've been in business a long time; I don't even realize how long it is now, but it must be 40 years—that the happiest employe is the one who comes to work and knows he has a job to do that day. Not the person who comes to work and says: "How am I going to spend the day today? Can I shuffle enough paper to make it look busy?" You wouldn't run your business that way. Why should CBS run its business that way?

And do you find that CBS had been run that way in the past?

No. Well, certain areas. Not all areas of CBS, but there were certain areas where there was tremendous redundancy. And this doesn't go to broadcasting, I'm not even talking about broadcasting or radio or TV. Just corporate in general. I think you could say that CBS thought it was General Motors or IBM or AT&T, considering the number of people in certain categories that had nothing to do with the operation of the businesses.

How much do you anticipate you'll be able to generate in terms of an improved bottom line?

I don't know yet.

Is this the process that you're following through with Coopers & Lybrand?

Yes. Coopers & Lybrand is doing a lot of work here. They're very capable people; they're very fair. We're trying to do it with a minimum of dislocation to the average employe. I think we're being generous involving corporate policy about layoffs, whether it's severance or anything that goes with it. And the climate in New York right now is such that people can get jobs. New York is a very healthy city, and the type of people that are being laid off here can get other jobs.

Not at ABC.

Well, we're not laying off engineers or people on the air or broad-

Dialogue on the 35th floor. CBS Acting Chief Executive Officer Laurence Tisch across the desk from Broadcasting editors (I to r) Steve McClellan, Geoff Foisie and Don West, joined by Robert A. Beizer, Loews Corp.'s Washington-based counsel (Schnader, Harrison, Segal & Lewis) on FCC matters.

casters or in programing. We're laying off generalists, whether it's in finance or public relations—areas of that type where people can get other jobs. And, of course, they're not limited to ABC and NBC.

Just to talk about the reason for these cuts. As you have said before, it's to take money that was being used to support the administrative structure and instead put it where it can be seen on the tube.

That's right. We will stop at nothing to put on better programing. We will spend any amount of money for programing, for news, anything that reaches the American public. That is our obligation.

Bud Grant, the president of CBS Entertainment, has said CBS Entertainment doesn't want to spend more than 3% or 4% more on Hollywood programing this coming year. Neal Pilson, whose domain includes sports, has been one of the most outspoken executives on holding down costs. So my question basically is, where is this extra money going to go if it's really not going to Hollywood and it's not going to the NFL and it's not going to go for more employes?

Well, in the first place, there is no "extra" money as such. Take a look at what's happening with revenues at the networks. They're flat at best. When we say a 3% or 4% increase in cost, that comes right out of our bottom line. It's not that we're going to make more money. It's to try to provide first-class programing without going into the red. That's the problem facing the networks.

Wall Street hasn't yet caught up with what's happening at the network level. I'm not talking about the O&O's and I'm not talking about radio. I'm talking about network. And you saw ABC's statement; they're losing money on their network this year. I mean, who three or four years ago would have predicted that ABC would lose money in the operation of its network? It's hard to believe. This is a problem that we're all facing.

What happened in publishing? What was the thought process that went into having both divisions within the publishing group report directly to you?

We have two very capable executives—Harry McQuillin at publishing and Peter Diamandis in magazines—and there was no reason for an additional layer of overhead between them and the chief executive.

One could argue, in essence, that in the broadcast group itself, you have television networks and you have the station operations. At Capcities/ABC, the corresponding two executives report directly to Daniel Burke. Have you thought about setting up a similar structure?

We have good management in our broadcasting group, and we really feel that the way it's been running can continue. But like everything else, I'm new here, and I really haven't examined carefully whether that is the best possible way of running it or doing something like ABC did.

I'm inclined to think we will end up running it similar to the way

it's been in the past, with the president of broadcasting being responsible for all the functions in the broadcasting group. I don't see any reason to change it.

Because that's a larger entity?

I think it makes sense to keep it that way.

The question is whether or not there will be an intermediate layer of executive vice presidents in the broadcast group. Between the division presidents and the group president.

No, there's no need for an intermediate layer because right now you have Gene Jankowski [president of the broadcast group] and then you have Pilson and Bud Grant and [Howard] Stringer [acting president of CBS News] and [Thomas] Leahy [executive vice president for the TV network and CBS/Entertainment] reporting to him. I don't want to have an intermediate layer. I don't think there's any need for an intermediate layer there.

Well, between the divisions and the group, there is that layer of executive vice presidents.

You mean when you have the O&O's reporting to Pilson?

Right

Well, I tell you. I don't think you can handle it much differently than that. Gene couldn't handle everybody reporting to him; he needs a couple of key executives that can pick up some of that. I don't think that's a problem, I really don't.

So it's basically "if it ain't broke, don't fix it"?

Not really, but partially. I think we have good people. I think Pilson does a good job. I think Stringer is doing a good job with news. You know, I just think it's working all right. I don't view changing it.

Well, how quickly can you make the necessary corrections that you see the company needing, and how deeply are those corrections going to affect the broadcast group?

It won't affect the broadcast group at all from a programing standpoint.

Or from a personnel standpoint? People want to know if their jobs are secure.

Whatever is happening here will be over in a couple of weeks; this isn't going to last forever. That's what Coopers & Lybrand is working on, to come up with a financial structure that will work or a public relations structure that will work. After that, you get down to the fine tuning, and then you can do it by attrition.

Do you think CBS will look essentially different when you finish this initial process?

No, I don't think so. I mean, you won't know it. Looking at the company, you may have fewer people in certain areas than you had

before, but there will not be fewer people to speak of in the areas that are essential to our business. I mean, it doesn't make any difference to the viewer how many people CBS has in corporate public relations or in corporate investor relations, or things of that type. The main thing for the viewer is to make sure that we have the best correspondents available for news and that we have the best programing available for the network.

Are your projections for 1987 that cash flow for CBS might be below what it is in 1986?

It's conceivable. Sure. I think network profit will be down in 1987 from 1986. We hope to make it up in other areas. But it's conceivable that network profit could be down.

As a middle-road projection for the company as a whole, do you think it's possible that it might have a smaller cash flow in 1987 than 1986? In publishing and the advertising marketplace?

Publishing and magazines are holding up well. Music is doing very well. The O&O's should do better in '87, radio should do better in '87. It's a push. Network could be down in '87 or should be down in '87 based on the numbers we're seeing.

What is your management philosophy and what are you looking for from the people who report to you?

My philosophy is very simple. I like to be surrounded by good people, honorable, intelligent people; I like them to take the responsibility and do their thing. I am not interested in a lot of meetings, a lot of recording, all the folderol of a big corporation.

I think if people are given the opportunity to run their division or group, whatever you want to call it, and they're backed by the management at the top, whatever that may mean, I think they can do a much better job than if you had somebody looking over your shoulder every day.

If you want an example of how I operate, spend a day in Chicago. We took over an insurance company there in a bitter battle in 1974. I became chairman of the company, and immediately went about bringing in a new chief executive. We retained as many of the old people there as possible. And once the new chief executive was in place, my role was to go to a board meeting once a month—and I still do as chairman. But the company runs without me on a day-to-day basis. If the head of the insurance company has a problem, he may call me, but he's the boss.

That company [CNA Insurance] has gone from a net worth of \$100 million in 1974 to a net worth of \$3 billion today. It's the strongest insurance company in America. Loews has never taken five cents in dividends out of that company, and the people who are there are the team that was brought in to work with the new chief executive in 1975, and they're all still there.

Should we expect that to be the pattern for CBS?

I would hope to have something similar.

Does that mean there will be a new CEO and that you will step aside?

That's up to the board. That's strictly in the hands of the board.

You would certainly have something to say about it.

No. Whatever the board thinks is best for CBS; I'm at their service.

You have changed, in our view, from a person who was an outside investor, dealing in an impersonal way with business considerations, to someone who has been captivated by the idea of the broadcasting business and is operating within it. In a way, you're now operating as a hired hand, presumably—that's what it says at the FCC.

Oh, I am. No question. That is true.

And yet you're not a typical hired hand, and I would doubt very much that if you didn't want to serve as CEO later than tomorrow afternoon, that any decisions of the board would have anything to do with it. So I'm wondering, do you want to stay?

I haven't even thought about that. I'm just happy to do what I'm doing here, in the meantime.

Well, how busy a search has gone on out there for a successor?

The search committee is accepting names and recommendations and it has a meeting scheduled for next week.

What is the job description for the new CEO?

I haven't seen it yet.

Would you have a hand in writing it?

Well, I'd be glad to discuss it with the search committee when the time comes, but job descriptions are funny things. I mean, I've been in business a long time, and every time we've hired somebody, it's been outside the job description.

What should he bring to the table?

He's got to bring his integrity, an open mind, intelligence, all of the good things you'd want from anybody.

We might hypothesize that the person who will be the next CEO would be somebody who has a bit more experience on the creative side, the talent side—some of the qualities that the board faulted your predecessor for not being attuned to.

You know, when you get into the area of talent, it's just such a subjective thing. We were in the theater business for many years, and we did some business with Hollywood for many years, and I've never come across anybody that has a perfect record in talent, or even with high grades in talent. It's such a hit or miss business that anybody who tells you he's good at picking talent, he's kidding you. I think you need somebody with good common sense, and you hope it works out.

We have editorialized with the hope that you would pick a broadcaster or someone who knows the broadcasting industry.

That would certainly be a help, if we could find the right person in that industry—sure.

There is a suggestion that there is something to running a broadcasting company that may be different from other businesses—that they may not be interchangeable parts with Pillsbury presidents.

I don't agree with that, at least not in the five weeks I've been here. I don't think broadcasting requires any different talent than running a good business. Sure, there are facets of it that you have to pay more attention to. In the average business, you're not worried about talent or programing to the same extent, but if you're a sensible businessman you will make sure that you have the best people possible to pick up those functions.

No CEO is going to pick the talent here; it's his job to make sure that the head of entertainment is the best possible man for the job. Or that the head of the O&O stations is the best possible man for the job.

Of course, the advantage to being a broadcaster is that you can't get snowed as easily by the people you pick, but an intelligent businessman can pick that up in a pretty short time.

Are you making any conscious effort to help to ameliorate the morale situation in the company, and the concerns that so many people have about insecurity?

Well, you can't fool the people. You can't put out statements about the great morale and the security and then have 100 people leave that week. My hope is that we will be finished with these cutbacks or whatever they are in the next couple of weeks and that we can get back to the normal business operation. But I'd rather not say anything that this is the end of it when it really isn't.

I think the morale is pretty good. Now in certain areas where they expect changes, I can see where there would be problems with morale. But the problems of morale don't go to the heart of our business; I mean I think in the news division, the morale is good, in the programing division, the morale is good, the broadcasting areas, the morale is good.

In general, are you prepared to say how major a commitment CBS will continue to make in the news area under your administration?

That's the one thing I can commit to unequivocally. We will expend every effort to make the news division or the news area better than it's ever been. Now I don't know how far we'll succeed, but the will

You people do a bang-up job . . . it sounds great!—Ed Richards, News Director, WOMC FM, Detroit, MI

RADIO NEWS YOU CAN USE

As you can see, our affiliates are impressed with the way United Stations handles the news. How does a network generate such consistent across-the-board praise? Simply by doing everything possible to give stations news they can use.

New York
Washington, D.C.
Chicago
Detroit
Dallas
Los Angeles
London

COVERAGE: US has news bureaus in New York, London and Washington, D.C., correspondents reporting from every major capital around the globe and hundreds of locations throughout America. With a network as extensive as ours, we're able to bring you live reports from the scene no matter where a story breaks.

RELATABILITY: Not every story holds the same significance for every audience. US brings you the news that's most important to your listeners and demonstrates how it will affect their lives.

DELIVERY: In the words of one of our affiliates, ours is . . . 'the writing style of the 80's,' meaning that delivery by both anchors and reporters is conversational and concise.

US 1 broadcasts news on the half hour, seven days a week, targeting a younger network audience attuned to the faster pace of young adult stations.

US 2 targets a more mature adult audience with comprehensive newscasts on the hour, every day of the week.

IT'S ON US: Could you use the kind of news that commands this kind of respect . . . particularly from your listeners? Maybe it's time you called US.

For affiliation information about US 1 and US 2, call our Affiliate Relations Department at 212-575-6100.

Freeze.

Introducing the fastest, easiest way to get quality prints and slides from video.

Now you can capture the moment, freeze it, and frame it. All with the touch of a button.

With the new FreezeFrame Video Image Recorder from Polaroid.

FreezeFrame produces sharp, instant color prints and color or black and white 35mm slides from virtually any video source. And it delivers a finished picture that is far superior in quality and resolution to direct screen photography or thermal video image recorders.

If you use video, you need FreezeFrame.

FreezeFrame has hundreds

of uses for anyone who uses video in their profession. It can be used in broadcast, production and advertising to proof. edit, storyboard

or reference. It can System includes Video Image Recorder, be used to pull a control console, and print film camera/adapter. 35mm camera/adapter optional.

print off a just-breaking news story. or for color correcting a proof. It can even help in film-to-video transferring. Medical professionals can use FreezeFrame for diagnostic

recording, patient referral or teaching. And it's the easiest way to get slides or prints for presentations or training.

> FreezeFrame can improve vour image.

FreezeFrame

Frame.

connects easily to video cameras, professional VCR's, laser disc players and computer graphics systems.

You can preview and even improve the video image because FreezeFrame has a full range of image enhancing controls including tint, contrast, color, sharpness, brightness and raster fill. And if you're shooting prints, Freeze-Frame uses a new color print film specially developed for use with video imaging.

New FreezeFrame from

Polaroid. It's fast, easy, and at \$1,899*, very affordable.

To find out how Freeze Frame can help you, call toll-free 800-225-1618, 9 a.m. to 6 p.m. Eastern Time.

Or fill out and return the coupon. We'll give you the full picture and show you just how easy it can be to capture the moment on FreezeFrame.

is there, and the desire is there, and the effort will be made.

And the willingness to allot the funds?

The funds are the least of it. I mean, nobody has come to me in the five weeks I've been here and said to me, "Give me x millions of dollars and I'll give you a better something." I'd love that to happen; I'd love somebody to come into my office and say, "Look, if I had \$5 million (or \$10 million or \$20 million) I could deliver much better programing, much better broadcasts."

Is that a challenge that you'd make in general to the employe base? Yes, I would love to hear it.

How do you start a meeting with someone whose area you're questioning?

I don't think there's any real formula to that. I don't remember any of the questions that I've asked people. I'm very informal.

I've heard of two situations. One in which you allegedly spoke to the head of an area and said, "What can I do for you?" as though you were prepared to give them \$100 million if they really needed the \$100 million. And then you proceeded to cut the division in half, or something like that.

Maybe I was right!

Then I heard that Derow made an appointment with you to discuss a budget matter or budget options, and two minutes into the interview you said, "We really don't need to discuss that because you're fired and so are 14 or your people."

No, Derow wasn't fired. He has a contract for a couple of years; he's going to receive his salary; he's going to act as a consultant to the company, but he wasn't fired. Derow is still on the payroll here. All we did with Derow was that I told him as nicely as I could—and it's certainly no reflection on Peter, and he knew it—but his job wasn't a job. It was a layer that wasn't necessary and I think that Peter would be the first to admit that.

Now I'm sorry for Peter. I think he's a very nice young man, a very intelligent young man. But it wasn't his fault that management put this layer in a few years ago, and started it. But it was just a layer that wasn't necessary. But I didn't fire him. He's still with us.

You started to say that you were very informal.

When I sit across the table from anybody, I'm not the boss. We're just having a discussion. I'm trying to elicit information, in a sense, for me to better understand their function, and perhaps for them to better understand where I'm coming from.

And if their case is such that they need more people, I'll say to hire more people. But if their case is such that I see and they see that they need fewer people, I'll say let's work with fewer people. But no one comes in there where I say to them automatically that they have to do x and x and x.

Can you give any flagrant'examples of overbudgeting or redundancy that you have encountered at CBS?

Yes, I could. I could give you loads of them, but I just don't want to do it. It would hurt somebody.

But it could be instructive.

Well, it isn't instructive because there's always someone at the other end who is running that department who is still here, or something. It just doesn't help. But there are loads of them, I'll tell you—loads of areas of great redundancy.

How involved are you in the plans being formulated for the CBS Morning News time block?

I would say that I'm curious. I'm not involved in the programing of it as such.

Curious enough to keep abreast of what's happening there?

Yes. In the sense that time is running. It's now, what, toward the end of October and this program is supposed to go on the air in January and I sort of want to know if we're going to make it on time.

What's going on?

Well, I think we have a good man putting the program together, a fellow named Bob Shanks who was hired before I got here, and he's working very hard at putting the program together, and from what I've seen I think the program has merit.

Is it pretty much in place as to what he hopes to accomplish?

Well, I think it's getting in place. I'm not so sure that he's got the whole thing put together yet. I think he's got the outline of the program, and I think he's got to make his arrangements with the various people to fit into the slots.

Do you have any intention of furthering or increasing the Loews stock holdings in CBS?

No, no plans at all.

Are you any more likely to sign a standstill agreement than you were before?

No. I said from the first day that we wouldn't sign a standstill. There's no need for a standstill. We said we were going to buy 25% of the stock and we bought 25% of the stock. We've never done anything differently than we said.

If I were either a stockholder or an employe of CBS, what should I expect from you? How much of the future are you going to occupy? If I were an affiliate, how long should I expect to see you as CEO of this company?

Being CEO is not up to me; being CEO is up to the board. That one I have nothing to say about. Talking about the other thing, as a stockholder, all you have to know is that I will do my best to do what's right for the company, and if you look at the history of the companies that we've been attached to, I think they speak for themselves.

I mean if you had bought a share of Loews in 1959 for \$14 it would be worth over \$5,000 today. Besides the dividends, with all the splits and everything else. So I think the stockholders of Loews have done very, very well.

Do you think the stockholders of CBS can anticipate similar action?

Oh, I couldn't deliver that. Loews has gone in 27 years from a tiny company that had 100 theaters in 1959 and now it's a company that has assets close to \$20 billion.

If I might take the role of a CBS affiliate, I'm wondering two things. First, it seems that I've given CBS News years and years to do something about that morning time block, and they haven't been able to score. So why should I continue to clear it?

Well, you might not—some people have dropped it. I mean, it's our obligation and our job to give you a program that you can be proud of and would want to run. I'm not happy with the situation.

But I must say, however, on the other side of the equation, that I watch CBS News in the morning and I'm proud of it. I think it's a very good program. I don't know if any of you watch CBS News in the morning with Charlie Rose and Faith Daniels, but I think it's a very good program; they do a first-class job. But it's not getting the kind of audience that the affiliates desire; therefore, we're trying to do something about it. But it's certainly a program that CBS can be proud of.

The second thing I'd want to know as an affiliate is what about the prime time situation? When is CBS going to become more competitive?

That's a good question, and I don't know the answer. We're going to try everything possible to get better ratings for our prime time programs—to get new programs, to get innovative programs and do everything possible to bring in new programing and better ratings.

How long it's going to take and whether we'll be successful, I can't promise. But we're going to try—money isn't going to stand in the way, effort isn't going to stand in the way. Maybe we need a lot of everything, plus a little luck. But we have to do something, and we'll try everything.

Among the television network groups, CBS has the smallest coverage and the smallest number of owned TV stations.

Right. We have 19% of the market.

In the 50 major markets, quality radio arrives via RCA's radio network satellite.

Radio is a numbers game. And our Satcom satellite can help you win.

Consider these figures: RCA Americom's radio network satellite gives you access to as many as 15 stations in each of the top 20 markets. And at least 5 stations in each of the top 50.

More than 3,500 radio stations are tuned to RCA. Since we reach the biggest number of stations, we offer the best distribution coverage available—with digital for superior quality and analog single-channel-per-carrier for

maximum flexibility.

It should come as no surprise that most major programmers already distribute shows via RCA's radio network satellite. Our 29 services include the ABC, CBS, NBC, United Stations, Transtar and Wall Street Journal Radio Networks; Mutual Broadcasting System and Westwood One.

Quality and reliability keep those customers happy. Transmission is via 8.5-watt solid state amplifiers, the most powerful of any broadcast radio satellite,

and provides mono and stereo audio channels of up to 15 kHz. Availability is better than 99.99%, maybe the best in the business.

You can get information describing our radio program distribution services along with a *free* copy of our poster (a reprint of the illustration above) by calling our number.

(609) 987-4218, and asking for Elizabeth Rawson.

Would you like to buy more?

I think we should buy more over the next few years. I think we should get up to 23% or 24% of the market.

Would you expect the marketplace to bottom out, or would you expect high multiples on television stations to decline further, making it more attractive for you to buy, or are you waiting for something else?

I think prices right now are higher than I would want to pay for the coverage. And we're getting the coverage anyway—it's not something that we have to do because our affiliates are covering those cities for us, so I think we have to find the time when the economics are right.

Do you have a sense of how the network television business will change over the next five years?

Not really. We're in a state of flux. We have a possibility of a fourth network. That would be a major change in the industry. I think a lot

depends on the economics and the economy in the next couple of years.

But what are you betting in terms of how much money the television network side of CBS's business will return to it in the next five years? Do you think it's going to continue to decline?

No. It can't decline much more than it has because you get into a major loss position at some point with any further decline. I think we have to do everything possible now to earn a fair profit in our network; I think it's healthy for the affiliates and healthy for the industry. I'm not happy that ABC lost money this year or that ABC may lose money on their network next year—that's not good for the industry. I think the most important thing is to make sure that we have a healthy industry and that we can continue to provide first-class programing for the country. That's our obligation. We have to live up to that.

But I take it that you must look at CBS optimistically.

I look at it realistically.

And what is that view?

I think that the networks have a couple of tough years ahead of them. I think if you really went behind the scenes at the network, and you looked at the economics of the advertising expenditures over the last

10 years, and the relationship of the networks to that expenditure, you'd find that from the period of 1975 to 1985, network prices increased much faster than the rate of inflation. And just thinking as a businessman, you know that those things never continue for too long. There has to be a day of reckoning.

We've come up to the day of reckoning that started at the end of 1984 and into 1985. You had a flattening of expenditures on TV, but you had a continuation of the costs of programing, an increase in the cost of programing. So you reduce the profitability of the network to practically zero in the last few years. Now we have to wait another year or two years before you can really straighten out the cost of advertising on TV over a 15-year period, to bring it back into balance with the overall economy. Because you had this fast run-up—you had the economy going this way and TV going that way.

So now you flatten out TV and the economy is still moving up a little. When those lines get back together again sometime in the next few years, I think you can then start seeing a much healthier situation in TV. We've allowed couponing, direct mail and marriage mail and circulars and everything else to come in under us as a source of spending for the advertiser—because our rates went up so fast, we're paying for it now, and we're going to pay for it for another couple of years.

Why should that be? The television network business, although it's had large overall profits, hasn't had extremely high profit margins, and in fact some people would say it has never been a three-network economy, that it's only been two and a half. So why shouldn't the pricing have allowed these competitors to come in?

In the first place, when the networks started to do well, they never controlled their costs. So their costs went crazy, and as their pricing went crazy their costs went crazy. So they were never able to deliver the real value. They didn't make the money. It wasn't that they were profiteering, they just weren't running good businesses.

It would have been a much healthier situation if the networks had raised their rates in line with the rate of inflation and had kept their costs in line with the rate of inflation, but both shot up way beyond that. Now, the costs have continued to go up—well, they've slowed down somewhat—but they've continued to go up, while the advertising expenditure, which is not in our hands, has stopped growing. That's where we're caught, and I think that's going to last a couple of years.

So while I may be optimistic maybe five or 10 years out, I am not optimistic on network profits for the next two years. And when I say network profits, I'm taking all three networks and figuring their revenue and what their profit will be.

Within that context, would you assess CBS's competitive position in the marketplace?

Well, we're right in the middle. We're ahead of ABC and behind NBC. We're going to strive like hell to get back to number one because there's a certain momentum that goes with being number one that certainly helps your revenues and everything that goes with it. But it's going to take time to do it, and I don't know how long that will be.

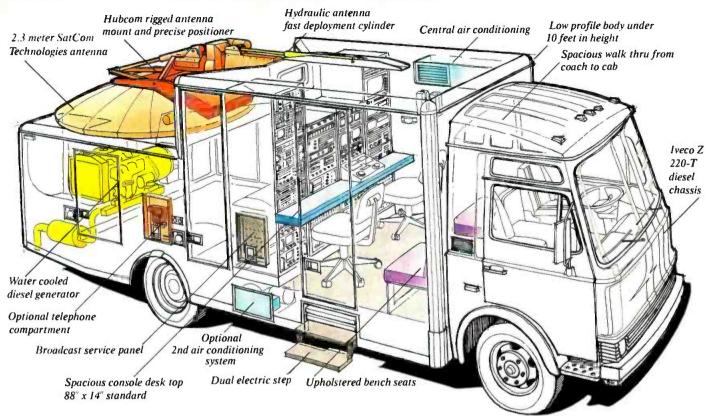

One thing that might improve profitability at the networks, it has been said, is if the networks were to get more financial interests in the shows they run.

Well, I've heard that and I don't know enough about it to refute it. But that's not a big problem. Sure, there's no reason why we shouldn't have financial interests because we're taking all the risks and all the gamble. But I don't think that is going to change the tide at the moment. It may help in the long run, and may lead to better programing and more investment by the networks in programing. But on a temporary basis, I don't think that's the big issue as far as profitability.

And what is the big issue?

Well, first we have to run the company efficiently. In the second place, we have to make sure that our cost increases don't exceed the rate of our revenue increases.

Is there anything you can do to enlarge your market?

The Latest SNG® Innovations... From The Inventor Of SNG® Vehicles.

HUBCOM. Builder of the first SNG® vehicle in the U.S. HUBCOM. Builder of more SNG® trucks at work in the field than everyone else combined. HUBCOM. Introducing its second generation while others play "catch-up."

Lighter and better balanced. More compact for easier access to tight locations. Lower profiles. Improved antenna systems. And every HUBCOM SNG® vehicle comes equipped with a one year warranty and our 24-hour hotline.

Choose gasoline or diesel power. Choose a low profile or conventional vehicle. But whatever you choose, you'll get the latest SNG® innovations — from the inventor of SNG® vehicles...HUBCOM.

The last word in technology from the first name in the industry.

Better programing, bigger audience. But of course we all want that. And that's nothing unique to us; everybody is going to be doing the same thing, fighting for that market share. But other than that, I don't know what we can do to enlarge the market. I mean, we're still an American broadcasting company confined to the 50 states.

Did the Turner takeover attempt cripple the company more than anything else?

I don't think anything has crippled this company. I don't think that this company is crippled in any way. At least I don't find that here, I'll be honest with you. I don't find any sense of despair or any sense of deep-rooted problems. I don't see anything that would lead me to believe that Turner hurt this company. I mean, I don't know what people think in this company necessarily, but I don't think that Turner damaged this company at all.

Well, it certainly softened it up and added a lot to its debt, and made it very vulnerable to takeover.

But let's be practical. ABC was sold and it didn't have a Mr. Turner. RCA was sold and it didn't have Mr. Turner. And CBS, without Mr. Turner, is now the only independent network.

You don't think that was a critical factor, then.

Well, in somebody's mind it may have been a critical factor, certainly in the press's mind it was a critical factor. But I don't see it in the operation of my department. The people in this company are not shell-shocked from Mr. Turner.

I was just thinking financially.

Well, financially I go back to what I said originally. We're in fabulous shape in this company financially. I mean, I like the shape we're in when I look at the balance sheet.

You're not in fabulous shape if you're going to have to make as many changes as you're making to make it decent.

No, wait a minute. It's my obligation to run a good company and to run it intelligently. It's not my obligation to waste money. I don't know how you run your magazine, but I am sure if you see redundancy in an area that's not productive, you're not going to keep it. Why should you be different than I? We're not doing anything dramatic here. We're not selling the building, we're not moving people around all over the place to save a little rent here or there.

CBS was created and has existed for 60 years as a company with a certain difference, with a certain style and flair and class. And that's largely been attributed to the influence of Bill Paley and Frank Stanton. Does all that go out with the new broom?

I hope not. Bill is still here and is as active as ever. No, no. I certainly hope not. We've got to keep this patina for the company—it's very important.

We have great people here, whether it's in the news or broadcasting, and I think that this company will re-emerge as number one. It should. We did it before. We had periods where we lost a lead, and we came back. I'm encouraged about the future of CBS from that standpoint.

Some who take a cynical point of view think things don't get better, they get worse. Telephone service may be a case in point. And then one thinks about CBS. Can this company aspire to greater things in the future than it has known in the past? Realizing that many believe this has been the greatest broadcasting company of all, what can it hope for? And that's part of the CBS image, too—that's part of what the staff gets excited about.

It certainly raises the challenge and the hurdle level.

Is it realistic? You tell us, and I accept, that you're a realistic man. Is that realistic to hope for?

Well, it's realistic in the sense that all we need to be better than the past is to have more appreciation by the audience. And even in its best days, CBS never had 50% of the viewing audience, so that there are goals out there that CBS never met in the past, that we can at least aspire to, which we may never achieve. I think there's a lot of room

to do good things.

And make more money?

I've always worked under the theory that if you do the right thing, the money takes care of itself; I've never worried about profits. Just run your company right and give the customer the right deal, give them the best product that you can possibly deliver, and the profits will come in. If we give them the best programing possible, somehow the bottom line will show the result.

One of our preconceptions had you sitting in your office at Loews, alone in front of a Quotron, talking by telephone with the family about what deals to make. That was a very narrow picture that we're trying to broaden.

Well, what happened was that I worked myself out of a job at Loews. I had no job. And I'm over here now for five weeks, and they don't even miss me. So when you have no job and you have an office to go to, you can either look at the walls or you can look at a Quotron machine.

So you worked yourself into another job?

I worked myself into another job. I'm enjoying it. But that's the way I operated at Loews, and anybody who could do their job did it. And I handed out all of the jobs, and everybody was doing their job and they didn't need me. Sure, they needed me four times a day to answer a question or have a meeting or something, but my door was always open, the same as my door is always open here. You want to come in, just walk in.

The image that went with that was more of you acting as an investment analyst than as an operator, than as a businessman running a business.

I've run businesses. I've been active in the markets, and I enjoy them all. I don't miss the market, I must tell you. Everybody asks me, where is my Quotron machine. I don't want a Quotron machine; I've got enough to do all day long here. I don't have an interest in the stock market. But if you said to me, you know, there's nothing for you to do, I'm not going to sit and look at the wall, I'll sit and look at the Quotron machine before I look at the wall.

But I'd rather run a business than look at the Quotron machine.

If we were to ask for an interview a year from now, where would we find you?

I haven't got a clue. I just hope I'm alive a year from now. If I'm alive and healthy, I'll see you any place.

That's a given.

I'll see you any place, I don't care where it is.

When are we going to find out whether or not you stay as CEO?

I don't have a clue on that one; I can't answer that. That's up to the board.

It's up to the board, but may we assume you are enjoying the job?

I am enjoying it. I'll never deny that. I'm enjoying what I'm doing and I think I'm doing a good job. You know, I don't want that to sound like a conceited statement in any way; don't get me wrong. But I think my relationships with the people here are good, and I think it's working. And I think it's going to be a happy relationship.

So is it possible that if the board of directors of CBS said we really think the job you are doing here is valuable and that we don't think we can find anyone else who can do the job as well as you, or simply that there would be no need to look elsewhere, then you would consider staying as CEO?

Well, I'd be lying if I said I wouldn't consider it. I'm not sure I would do it, but I'd be lying to you if I said I wouldn't consider it.

Have you been bitten by the television business bug?

I've been bitten by CBS. I think it's a fascinating company. I think it's got great potential and I think it's a great institution. I think it's a unique company.

Broadcasters' influence on technology waning

Unlike years past, when equipment makers followed lead of broadcasters, today there are new customers calling the shots; closing down of network and group research centers has lessened influence also

For many years, when broadcasters talked, equipment manufacturers listened. Today, they are still listening, but the voice of the broadcaster is only one of many that manufacturers must hear to remain competitive.

For some of the largest video equipment companies, professional nonbroadcast users make up as much as half of their total video market, and the industry is witnessing a growing reversal in the flow of new technologies, now running from consumer-industrial markets down to broadcast. It used to go the other way.

But the broadcasters' diminished role in the marketplace may still be good enough, according to a number of key broadcasters and equipment manufacturers questioned by BROADCASTING. The industry's choice of new gear today is wider than ever, and manufacturers continue to prize the prestigious broadcast market and its special needs.

Still, the long-time avenues of communication between broadcasters and manufacturers continue their transformation. With today's atmosphere of fiscal conservatism and financial uncertainty, many see the historically important source of user information, the commercial networks, shrinking their development labs and growing less able to devote resources to develop designs and press their approach with manufacturers. Other broadcasters, such as station group owners, are uncertain whether their own financial status will allow them to pick up the slack.

And the technology itself is also no longer the driving force it once appeared to be. While manufacturers are expected to contin-

Special Report

ue their advance in broadcast technology, new developments are increasingly driven by what the market is perceived to need, rather than what appears possible in the laboratory. But who will point tommorrow's technology in the right direction?

"The marketplace for professional TV equipment has broadened substantially," noted Charles Steinberg, an Ampex executive for more than two decades and its president and chief executive officer since last month. "Ten or 20 years ago it was just broadcast; now it's a multitude of users—smaller stations, cable organizations, also TV for industrial applications. Many customers that just didn't exist 10 years ago now represent one-third to one-half of Ampex's business. And these new customers have more of an influence on us."

William Connolly, president of Sony Communications Products, said his company's sales are about evenly split between broadcast and corporate video, and has recently combined the formerly separate broadcast and professional divisions to reflect the confluence of those shares. "In the past five years, there's been a tremendous growth on the business-industrial side," he said. "[Broadcast] TV is not a growth industry."

Harris Corp., another firm historically dominated by broadcast interests, has also seen nonbroadcast video products creep up to 25% of its total video sales, while broadcast markets remain essentially flat, according to James Koehn, general manager of the Harris Broadcast Division.

One result of the growth of professional video has been a gradual shift away from broadcasters' long-held role as originator of most new TV technologies.

According to Julius Barnathan, president of broadcast operations and engineering at Capcities/ABC, "If you go back into history, the broadcasters made equipment which was then made industrial, which was then made for the consumer. That's been the case up until 10 years ago. Then all of a sudden, somebody started to get into IC's [integrated circuits] for consumer electronics." With today's huge demand for consumer products, he explained, more technological development has begun at the consumer level, and the new techniques then find their way into professional and broadcast markets.

Perhaps the best examples of this reversal in the technology flow are the portable videotape products that have revolutionized TV broadcasting in the past decade. Although videotape recording began as a broadcast development in the 1950's, three-quarter-inch U-matic later emerged exclusively as an in-

dustrial product; broadcasters weren't even shown the development at first. More recently came half-inch videotape recording technology, developed primarily as a consumer product but later drawing the interest of broadcast and industrial markets.

Broadcasters see their input to the process lessened and wonder about the results. "The days of being the guiding light are gone," commented Renville McMann, vice president of advanced television at CBS Technology Center until the announcement of the center's closing last month as part of network budget cuts. "In the past, a lot more of the ideas for equipment originated with broadcasters. They had a need and their own labs, where they could get original stuff built and worked on. Now, with large industrial markets, manufacturers have large labs of

Ampex's Steinberg

their own, and are starting to develop gear and have ideas themselves for the kind of gear which should be developed... The broadcaster doesn't have nearly as much influence."

Another broadcast veteran, Tribune Broadcasting's Director of Engineering Otis Freeman, agreed: "I don't feel we have as much influence over the actual design of equipment as we did 20 years ago. They [manufacturers] listen, but I don't feel we have what we had 20 years ago. The networks were big players then; they set the style for what was done."

But manufacturers need not accept all responsibility for the change in the relationship. Broadcasters themselves now make purchasing decisions in far different ways than in the past, increasing the importance of extra-technical concerns and the consequent roles of nontechnical personnel in equipment buys.

"Within the broadcast operation," said

Ampex's Steinberg, "the people we were calling on in past were the technical people, the chief engineer or engineering-operations heads. Today, it's totally different. Those people are still important, but they are not the sole contact. Now it's artistic people, news people, financial people."

The changes may not be all bad for broadcasters. Some say broadcasters now have an even greater field of new technologies to choose from. John Swanson, vice president of engineering at Cox Enterprises, said the influx of competitive Japanese firms has resulted in a "tremendous" availability of new gear as compared with that available in the past from the few major manufacturers then in business.

"The market is being driven by the needs of the customers," Swanson said. "Now

Sony's Connolly

with the intense compeition, I feel its a buyer's market. It used to be certain companies no longer in the business told you what you wanted. Japanese and American companies now are coming to us and saying: 'What would you like to see today, five years from today?'"

Broadcasters have also benefited from the technology flow from another nonbroadcast field, the high-end post-production market that manufacturers have targeted in recent years, Swanson added. "Graphics, sophisticated paint and editing systems have been developed for post-production markets," he said, "and have found a rather neat home with the broadcaster."

But one potentially dramatic change in broadcast engineering circles is causing concern for both broadcasters and manufacturers—the shrinking of network engineering design groups.

The most recent blow to network development capabilities was the closing last month

Sony Betacam Betacam vs. Ba vs. Thomson-C Who will win?

You will.

Because Betacam® is now a multi-source format.

That means you'll have an even wider choice of products and features to meet your specific needs. You can expect innovative future products such as high-performance Betacam SP. And you'll have the security of knowing that the premier manufacturers of broadcast VTRs are committed to a ½" standard.

SKOADSASÎ

SIX HOURS * GLAMOUR * WEALTH * POWER

WARNER BROS. TELEVISION DISTRIBUTION
A Warner Communications Company

of the CBS Technology Center in Stamford, Conn., whose work led to numerous engineering innovations over the years. CBS operations and engineering have also seen some far-reaching cuts in recent months, as has Capcities/ABC, where engineering development had already been cut to a handful of personnel. So far untouched by the reductions is NBC, although rumors circulate steadily about its own impending losses. But the merging of RCA Laboratories with General Electric's research facilities and the loss last year of long-time industry leader RCA Broadcast, both of which had relationships with NBC-TV, may also result in some longterm weakening of the company's research abilities.

In the past, network development of broadcast technology has been an essential ingredient in the new product work of numerous manufacturers. "Manufacturers are more capable than they used to be, but in the old days, the opposite was true," said CBS's McMann. "Manufacturers were living off the reports of network labs; they'd read them and then design the equipment.'

A sampling of recently developed technologies that benefited from engineering support at the networks, according to technical executives, includes items as diverse as studio cameras from Philips, ENG cameras from Ikegami ENG, RCA's CCD camera, Sony's slow-motion video systems, Ampex videotape control software, Matsushita's half-inch M-II videotape recorders, teletext products, signal processing gear and graphics and display systems.

But this could all change as the networks cut away their development capabilities and expect more of the manufacturers themselves. Said McMann: "The people currently in charge of all three networks are under such tremendous pressure because of the falloff in advertising and in the percentage of viewing audience. Their thinking is very short-range.

Barnathan believes "the era of 'let the networks do it' is going... The problem the networks face is we have been doing that and nobody else has been doing it in the industry and now the networks are having their profit margins squeezed" and are unable to continue the effort.

Also, the engineering planning capability remaining at the networks will most likely focus more sharply on technologies that can help reduce costs and increase efficiency, commenters agreed. ABC-TV's Robert Thomas, now director of equipment planning after joining the network in 1982 following three decades at RCA Broadcast, explained that when a new technology is suggested for a program now, the network must first look at the show's requirements and then carefully weigh the "production value" of the development against its cost. "It doesn't mean the nets are any less interested in advanced technology," said Thomas. "Efforts now are being directed toward developments which will reduce costs of the product by reducing maintenance or improving reliability, allowing fewer operators.

Cassette-based videotape recorders, such as digital video units entering the broadcast

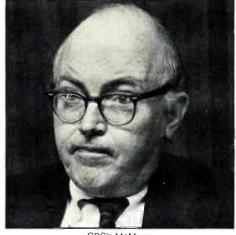

ABC's Barnathan

market in the next few years, are a good example for Thomas of such a product, supplanting today's studio standard Type C oneinch videotape in quality and requiring less maintenance and expected to be competitive in cost.

ABC's Barnathan added: "We will still be in it in leading the way of those that will make us a better product and give the viewer something better to see. I don't think we're going to get out of that aspect. We're going to be looking at ways to be able to be more reliable and efficient.'

NBC's vice president of engineering, Steve Bonica, sees a similar approach for his network. "Each of the programs we invest in and nurture has a very important goal, that it is important to the economic health and welfare of the company and the enhancement of the product we deliver," he said. Bonica also expressed confidence that NBC executives would continue to recognize and support that activity, even within an austere economic climate. "To develop hardware is fundamental to our engineering mission to improve the economic situation of the broadcaster. It has to do with the future."

Manufacturers watch the lessening of network engineering resources and see at least one other important result in addition to decreased product development-increasing limitations on systems engineering, the careful integrating of video and audio technologies at which the networks have so excelled in the past. According to Ampex's Steinberg, there may now be a greater reliance on

CBS's McMann

The Outperformer IKEGAMI'S HL-79E IS MORE VERSATILE THAN EVER

Ikegami's HL-79E has lived up to its billing as the greatest achievement in hand-held camera technology, a claim supported by an increasing number of 79 series purchasers, presently in excess of 5000.

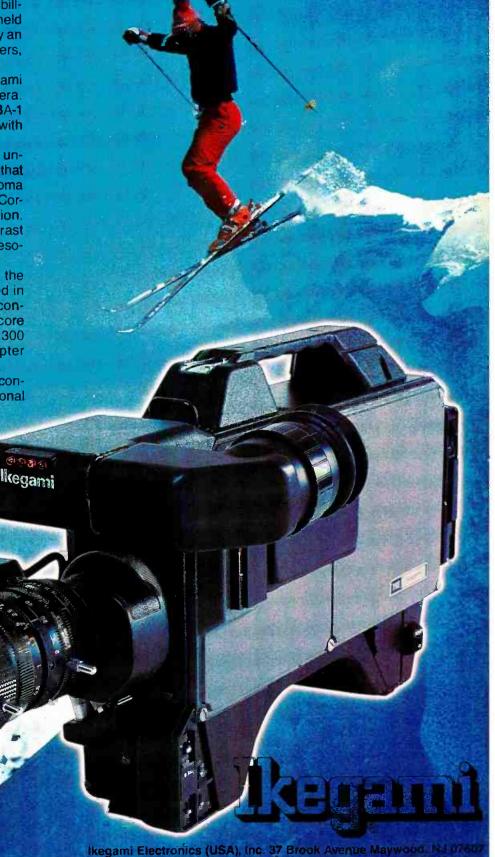

And yet, today, the engineers at Ikegami have found a way to improve the camera. Now, when equipped with the new VBA-1 adapter, the HL-79E is totally compatible with the Sony Beta recorder.

On your shoulder, the HL-79E is still unmatched in performance with features that include Dynamic Detail Correction, Chroma Aperture Correction, Highlight Aperture Correction and Auto Contrast Compression. Plus the HL-79E offers superior contrast range, S/N ratio, registration accuracy, resolution and more.

On a tripod, the HL-79E becomes the premier EFP camera which can be used in various systems configurations and controlled remotely by the MA-79 Multicore Adapter, through multi-core cable (up to 300 meters) or by the TA-79E triax adapter through triax cable (up to 2000 meters).

The camera can be set up using conventional manual techniques or an optional microprocessor assist.

For a complete demonstration of the HL-79E and other Ikegami cameras and monitors, contact us or visit your local lkegami dealer.

Adapts to Sony Beta Recorder

East Coast: (201) 368-9171 West Coast: (213) 534-0050 Southeast: (813) 884-2046 Southwest: (214) 233-2844 Midwest (312) 334-977

outside organizations for systems design. "In the past, they had the capability to do it," he said, "but now are looking to outside organizations because it is a far more difficult iob, more sophisticated. But more importantly, it's because they can't keep staffs on board.

Sony's Connolly, who went to the manufacturer after 23 years at CBS and who sees many network technical activities remaining relatively uniform for the time being, said manpower reductions might affect network systems design, with either manufacturers or newly emerging system design groups filling the gap. He is worried, he said, that a decline in network engineering could limit the "feedback" that aids manufacturers in the design of individual components and how they fit within an overall system, although this is not something he has yet seen.

Harris director of advanced development Robert Weirather also acknowledged a trend in that direction, although he said it is being

manifested quite gradually.

ABC's Thomas sees the trend as well. "There has been somewhat less emphasis on advanced systems design," he said. For instance, ABC has never planned on wholesale conversion to a component plant, analog or digital, mainly because it doesn't feel the advantages are great enough, but also because of the extremely complex systems redesign that would be required.

There are some station operators, on the other hand, who would not mourn the loss of network engineering development preeminence. For them, network technologies have done more to skew engineering developments because of what is viewed as the personal politics of product development that they argue have interfered with purely scientific developments and blinded manufacturers to the needs of broadcasters across the country and outside the network centers.

Large group broadcasters have played an important role in product development, despite their lack of network-style development laboratories. But like the networks today, their resources may simply not allow them to take on the greater responsibilities

they would like.

At Cox Enterprises, Swanson said he sees a shift in the direction of research and development input to group broadcasters away from networks because of the latters' shrinking resources. But, Swanson added: "I'm a one-man staff and certainly don't have the time or resources or intelligence to tell the industry how it can determine future products. It's unfortunate; if I had the choice, I would like to have someone. But I don't know that other group broadcasters are any better equipped.

Tribune's Freeman agreed: "We don't have the labs to do the evaluations like the networks...It's too costly to get involved in development."

Regardless of broadcasters' ability, or inability, to provide manufacturers with clearcut indications of how to meet their needs, broadcasters still believe they are viewed by the suppliers as a essential market to win

over to their products.

"Broadcast is a market manufacturers would like to have," CBS's McMann said, "even if as only an advertising vehicle. It's still a prestige market . . . Companies' marketing people are always in and out of stations, listening for any scrap of information. If the broadcaster says he wants something. a lot of companies" will respond.

Barnathan sees that continuing interest as a result of the higher profit margin manufacturers achieve with broadcast sales, while industrial sales are comparitively low-cost

and smaller in size.

If manufacturer interest in the market remains, input from the broadcast users will

Digital fiber optics: the latest link

An experimental digital fiber optic link could soon replace the telephone landlines that have connected ABC-TV's facilities in New York and Washington since the late 1940's.

The network has been experimenting with fiber optics since 1980 and is now in the final stages of negotiations with AT&T, which will supply the fiber optic circuit to the network. The Washington-N.Y. path is used extensively by ABC News for various programs, including its Nightly News, Good Morning America and Nightline.

The project, described by Kenneth Michel, Capcities/ABC equipment planning engineer, at a technical conference in Washington, will deliver TV program material over a 45-megabitper-second (mbs) AT&T digital fiber optic link using sophisticated bit-rate reduction techniques and codecs developed by manufacturer NEC. The AT&T intercity circuit, already in place, has a 180 megabit capacity, so four of the 45 mbs services can be multiplexed onto a single fiber.

ABC began its first experimentation with fiber optics during the 1980 winter Olympics in Lake Placid, N.Y., when it used the technology, although with the signal in an analog form, to transmit audio and video between the site of opening ceremonies and the network's master control center.

The experimentation later turned to digital technology, largely because of its improved signal quality over long-haul transmission. The application of the digital fiber optic technology to broadcast TV during the 1984 summer Olympics was a first, according to the network.

Despite its advantages digital transmission leaves the quality of program material critically dependent on the capability of analog-to-digital and digital-to-analog conversion circuitry, so much of ABC's subsequent work has concentrated on improving these code-decode circuits (codecs) used for the link, Michel explained. And while early work, such as at the 1984 Olympics, was with fiber optics using a 90 mbs data rate, the network also ultimately settled on the use of 45 mbs, which, unlike 90 mbs, is offered as a standard intercity digital service

The first test of 45 mbs codecs, according to Michel, was

conducted between ABC's Washington news bureau and New York, with participation from AT&T Communications, Bell Labs and NEC, which supplied its experimental codec. A fiber link using the NEC codec was again used during election night, 1984, in a preliminary operational test.

Within several months, serious discussion began between ABC and AT&T concerning implementation of a 45 mbs service between New York and Washington, with concerns turning to the selection of an appropriate codec for the service. Network testing of codecs from AT&T and NEC (another company, ABL, proposed a codec which was not tested during this period) began in January 1986, and, according to Michel, the work indicated that the video performance of the AT&T code would not be suitable for ABC's applications, while the NEC codec was judged to be acceptable for the NTSC transmissions.

Michel is quick to point out that with the network now completing its transition to satellite network interconnect, it has little interest in returning to the common-carrier-supplied services like those used in its former interconnect system, and so sees fiber optics more as a supplement than a replacement of its satellite system. For ABC, there are also areas of concern including the long-term reliability of the fiber circuits, maintenance response time and the difficulty in locating faults

With that in mind, AT&T and ABC are currently continuing negotiations on starting the fiber link. The network was hoping to begin the service in early to mid-November, but it still has not resolved the question of who will supply the terminal equipment and maintain and monitor the digital data stream.

ABC doesn't have the capability to monitor the digital data format, it argues, and believes AT&T should take on responsibility for the codecs.

If the service starts, Michel added, the existing analog circuits would be left intact as a backup for at least the first 90 days of the trial. After a year, during which the joint venture would work to determine the fiber service's standard parameters and specifications, AT&T would file for a general tariff to offer a permanent 45 mbs service between New York and Washington.

CONTROL EVERYTHING BUT THE NEWS ITSELF

News ExpresssM gives you the edge every day

Satellite news gathering (SNG) is setting the world of TV news on fire. Because stations are capturing the

action live-from almost anywhere it happens.

With News Express from GTE Spacenet, SNG can be an even greater competitive advantage. Spacenet has combined its years of experience as a communications leader with the very latest in satellite technology. The result? News Express provides you a level of control never before possible.

More control over voice communications with dialtone on demand

Whether you're covering a factory fire, a hot political story, or a sizzling series of events such as a playoff, you don't want to worry about telephone connections. News Express gives you dialtone on demand, as soon as your transportable unit's antenna has made satellite contact, with or without video transmission. News Express includes up to four voice

channels for fast voice communication from your unit, via satellite, to the publicly dialed phone system.

Quality control from a communications leader

Spacenet provides reliable, high-quality transmission and operations expertise from the most advanced satellite monitoring and control facility in the industry. You can schedule time cost-effectively in increments as brief as five minutes. News Express also gives you complete editorial control, without a vendor-arranged priority system. Contact GTE Spacenet to learn how News Express puts you in control of your SNG program.

GTE Spacenet: Getting Down to Business

Broadcast Services Marketing (703) 790-7700

Spacenet

remain important, perhaps more than ever due to the increasing complexity of the industry's diverse needs. "In the case of some companies," ABC's Thomas said, "response to users' needs is much better compared to earlier times. The really successful companies are the ones that discuss user needs at early stages of product development, keep users informed and seek their input when the products are available."

Steinberg called close work with broadcast customers one of Ampex's "great virtues" and cited past work with networks such as ABC on technologies including slow motion or special effects. "It's still the same today," he added. Concurring was Connolly, who called interaction with the end user "the only sensible way to develop products.... You cannot build products in a vacuum."

Harris's Weirather also emphasized that company's "customer-involved" approach to new technologies. "Previously, engineers sat and looked at circuits and tried to decide how to do something" that broadcasters would want, Weirather said. "Today, we say, let's invite some broadcasters in and throw ideas at them and see how they react... Otherwise we could spend a lot of time doing the wrong things."

But customer involvement in product development may also have its limitations, said Koehn of the Harris Broadcast Division. "Customers are dealing with today's problems, not those of five to 10 years down the line, as a manufacturer must. That's true in any industry."

But the effort to maintain rapport with broadcasters is not likely to end soon. "Our involvement with users is a one-way street," Weirather said. "It will only increase; we will not go back into the ivory tower."

Yet because broadcast is no longer the only video market, manufacturers may now be less willing to develop highly specialized items that hold little promise of profit out-

side a few uses. Thomas of ABC said: "A lot of things the networks are no longer doing are one of a kind anyway, and manufacturers are not willing to go through development just to sell 10 of something. Examples are race car cameras, or cameras for any special point of view or used in such small numbers."

Cox's Swanson said that manufacturers face greater financial risks in spending large development sums in a relatively small market such as broadcast. "Manufacturers don't come out with something no one's going to buy. They can't afford to make a major mistake in manufacturing, unlike users, who at least have the latitude of lying back."

Broadcast engineers realize as well that technology may no longer be the fundamental influence it once was. Steinberg explained: "In the past, quality was the limiting factor, so it became the driving force. That's not so any more. You can do anything with technology if you have the right financial resources. But does it make sense economically?"

According to Connolly of Sony, "The old idea of technology driving the marketplace is a myth. Technology responds to the marketplace. The customers determine the features built into a product line. The most dramatic change over the last 20 years [in the broadcast-manufacturer relationship], has been that 20 years ago, technology was sufficiently young that you were technologylimited, it was a question of what you could do. The change has been extremely dramatic; it's no longer what can you do, but what should you do. That's a big distinction. Now that you can do almost anything" how is a choice to be made?

ABC's Thomas agreed and cited international disputes over high-definition television technology as an example of economic and political concerns overriding technological ones. Fiber optics, by contrast, are an example of science adapting to "social" requirements, in this case fitting more information in the same bandwidth.

mation in the same bandwidth.

Barnathan added: "What has happened to us, unfortunately, is there's been a tremendous capability in the technology, so many inventions that have no need or can't find a user. The market must lead the technology."

But most believe if broadcasters are to point in the direction they believe technology should go to meet market needs, they must have the resources and staff to explore the many possibilities.

CBS's McMann, whose own development work was abruptly ended last month with the closing of the CBS Technology Center, expressed his concern that such advanced research capabilities would be difficult to rebuild after they are dismantled. "You are throwing away years of knowledge. Yes, you can rebuild, but will it be as good as it was? There is something to be said for experience.

"Some day broadcasters will wake up with a terrible shock," McMann added, "because this money machine is being replaced [by competing media]. Our work was a defense mechanism, but it also was to open our eyes to what's going on and try to make CBS a leader. In the short range, you will probably see no difference. The question is what we will see five to 10 years from now, because most of this work is for the long run."

His pessimistic conclusion: "If we had no TV, just radio, and we had the same mentality we do today, there never would be any TV. They wouldn't permit the money to be spent. Paley and Sarnoff had the insight TV could be something, but no one knew for sure. It's the same thing in the future. The company has to be looking at [new technologies] and put enough money into them.... These guys are not worried about that. They're worried about what the profit will be for next year."

The ongoing struggle for hi-fi AM

Latest advance in the battle to improve the medium may be found in new transmission-reception standards being advocated by NRSC

Hi-fi AM radio? As unlikely as that may seem to broadcasters and their listeners, it is the promise of the voluntary AM transmission-reception standard tentatively adopted by National Radio Systems Committee last month.

If the standard is widely implemented by broadcasters and receiver manufacturers, the hi-fi gap between AM and FM that has been widening since the early 1960's will be narrowed to a point where only the most discriminating listeners will be able to tell the difference.

But will the standard be widely implemented? Although the signs so far are all positive, it's still too early to make any predictions. The standard's acceptance by the NRSC, which comprises leading broadcast-

ers and receiver manufacturers, means the standard carries the endorsement of the major elements of the broadcasting and consumer electronics industry, but it doesn't guarantee that anybody will put the standard in play.

Some broadcasters may balk, fearing that operating with the standard on the promise of new listeners in the long term may cause them to lose listeners in the short term. For receiver manufacturers, the chief hang-up may be the lack of an AM stereo standard. "I don't think many receiver manufacturers would build a mono [standard] wideband receiver," said Eb Tingley, the Electronic Industries Association's representative on the NRSC. "You can't sell good audio to the public unless it's in stereo."

The NRSC standard is still considered a draft. The NRSC is collecting comments from all interested parties until Dec. 15. If no changes are warranted, it will become final on Jan. 12, 1987.

Because the standard is voluntary, it's really only as valuable as the broadcasters' and the receiver manufacturers' willingness to implement it. The National Association of Broadcasters, which has backed the NRSC's work from the beginning, is already working for the standard's early implementation. In a letter to NAB board members earlier this month, NAB Radio Board Chairman Bev Brown, KGAS(AM) Carthage, Tex., urged them to express support for the standard in comments to the NRSC. "Once the standard has become effective, I plan to contact every AM radio station in the country, urge them to adopt the standard, and, hopefully, advise them of full NAB board support," he said. "For the NRSC process to be successful, the implementation of these standards should be as rapid as possible."

The NAB believes so strongly in the standard that, as a last resort, it may ask the FCC to act. In comments filed at the FCC, NAB said: "It may be, after the NRSC standard is

ANNOUNCEMENT

Thomson-CSF And Comark Communications, Inc.

On August 1, 1986 Comark Communications Inc., was acquired by Thomson-CSF. The management of both organizations believe that the marriage of these two innovative companies will foster significant new technologies for the U.S. Broadcast equipment industry.

Technological strength, long term commitment and the ability to provide product support means the rebirth of state-of-the-art transmission equipment and systems.

decided upon, that implementation cannot occur without being 'codified' in the FCC rules," the NAB said in comments filed with the FCC last spring. "Should this be the case, NAB will urge the commission, at the proper time, to consider adopting the results

of the NRSC's work as part of its rules."

According to John Marino, vice president, engineering, NewCity Communications Inc., owner of four AM's, and NRSC co-chairman, the NRSC decided not to seek an FCC standard so that the committee could change the standard as needed in the years ahead without having to go through an FCC rulemaking. One committee member, who asked not be be identified, said the reason was political. Some NRSC members didn't want to be locked into a standard by the FCC, he said.

AM has been trapped in a cycle of degenerating fidelity for decades. To mitigate interference from other stations, receiver manufacturers have been making AM radios with less and less frequency response. To compensate for the lack of frequency response in the receivers, AM broadcasters have been boosting or pre-emphasizing the high frequencies of the audio. The more preemphasis the broadcasters use, the more interference they cause and the narrower the frequency response of radios becomes.

The NRSC has proposed a standard curve

Look again!

Barco Industries has exciting new products and expanded user support.

Our new CVS microprocessor-controlled broadcast monitors, for example, are the first truly intelligent monitors. They have both an analog and a digital bus. Plus four plug-in slots for today's options and those yet to come, like self diagnostics and digital interface modules.

You can also store, and automatically recall, either calibrated presets or your own preferred presets. Up to forty CVS monitors can be controlled from one master remote.

CVS monitors accept both component and composite inputs, and color alignment is automatic. And, as in our best

master control monitors. **Automatic Kinescope Biasing** (AKB) maintains color and black level stability.

As for support, we now have a national service center with an 800 number and a nationwide network of factory trained dealers.

We also have a full line of other monitors, as well as HDTV, Chroma Decoders, and CATV equipment. Call or write 170 Knowles Drive, Suite 212. Los Gatos, CA 95030, Phone: (408) 370-3721.

Barco Industries. Inc., is a member of the ACEC group. © Barco Industries, Inc. 1986 for pre-emphasizing the high frequencies before transmission and a complementary standard curve for attenuating or de-emphasizing them in the radio set. To use the NAB's analogy, pre-emphasis is similar to turning up the treble on a stereo receiver. De-emphasis is like turning up the bass.

Just as important, the NRSC has proposed that broadcasters limit the audio bandwidth of all programing to 10 khz.

According to the draft standard released at the NAB radio convention in New Orleans last month, if broadcasters adhere to the standard pre-emphasis curve, interference caused by excessive pre-emphasis will be limited. And if, at the same time, receiver manufacturers incorporate the complementary de-emphasis curve in radios, AM signals and receivers will be, for the first time, fully compatible with each other.

Implementation of the curves will create a system in which "AM broadcast stations will know with certainty the likely audio response characteristics of AM receivers in order to facilitate a consistent tailoring of AM station sound, and AM receiver manufacturers will know with certainty the likely audio response characteristics of AM broadcasters so that the audio response of an AM receiver can be tailored accordingly," the draft standard said. "A 'matching' of preemphasis and de-emphasis is expected to im-prove the consumers' overall satisfaction

with the technical quality of AM radio."

The limitation on audio bandwidth is designed to eliminate second-adjacent channel interference, which would otherwise disrupt listening on the wideband radios envisioned by the standard. A station and its secondadjacent neighbor are 20 khz apart. If one or both broadcast signals with more than 10 khz of bandwidth, the new breed of wideband radios will detect both where their signals overlap, making enjoyable listening to one station impossible. If both stations limit themselves to 10 khz, such mutual interference is eliminated.

Broadcasters have had about six weeks to study the NRSC standard and, according to NRSC co-chairman Marino, the response so far has been good. Major group broadcasters such as Group W Broadcasting and Capcities/ABC which were involved in the standard-setting process have indicated that they will use the pre-emphasis curve and limit their audio bandwidth, he said.

The initial response of the receiver manufacturers has also been positive. Delco Electronics, the General Motors subsidiary that is the largest domestic maker of radios, is committed to using the curve in at least its line of AM stereo receivers. At the NAB radio convention, a demonstration of the standardized system featured a Delco prototype with standard de-emphasis.

Bart Locanthi, an NRSC co-chairman who is leaving Pioneer North America Inc. to become a consultant to Pioneer and other receiver manufacturers, said that most Japanese manufacturers have been interested in building wideband AM radios. Now that there is a standard, he said, they will do it.

Despite the encouraging signs, wide-

the recipe for a new hit!

spread implementation of the system is anything but a given. Bob Orban, of Orban Associates Inc., a San Francisco maker of audio processors for radio stations, said many receiver manufacturers may hesitate to build wideband receivers until they are convinced that broadcasters are going to limit pre-emphasis and audio bandwidth. If broadcasters aren't operating under the standard, he said, wideband radios would pick up excessive noise and interference and fail in the marketplace. "The manufacturers would lose millions," he said.

An engineer for a domestic maker of automobile radios, who asked that neither he nor his company be identified, said his company has yet to commit to adopting the standardized de-emphasis curve out of concern that wider radios would be more susceptible to electrical noise emanating from car ignition systems and other sources as well as to interference from adjacent and second-adjacent stations. He expressed some skepticism that enough AM broadcasters would adhere to the 10 khz limit to mitigate the second-adjacent problem.

Bill Gilbert, of Delco, said many manufacturers may put off building radios to the standard until the AM stereo standard is established, figuring that it will be futile to try to sell high-performance wideband radios without stereo. Such thinking is worrisome to proponents of the NRSC standard because the future of AM stereo is still very much up in the air.

The FCC authorized AM stereo broad-

NAB's Ed Williams (I) and Michael Rau demonstrate the NRSC standard on pre-emphasis/de-emphasis to NAB's Engineering Advisory Committee.

casting in 1982, but it didn't set a standard, choosing instead to allow the "marketplace" to set a de facto one. The result of the decision, after four-and-a-half years, is no standard and relatively little stereo broadcasting. The marketplace standards battle has come to a stalemate with proponents of Motorola's C-Quam system on one side and those of Kahn Communications' single-sideband system on the other. Today, fewer than 10% of the nearly 5,000 AM stations in the U.S. are broadcasting in stereo.

Hope that the stalemate will be resolved and that AM stereo will finally take off currently centers on a report on the AM stereo marketplace undertaken by the National Telecommunications and Information Administration (BROADCASTING, Sept. 15). If the study, which is due out around the end of the year, concludes that one of the systems clearly dominates the marketplace, it could go a long way toward establishing that system as the de facto standard and AM stereo as a permanent fixture in radio.

Although it would be difficult to find an AM broadcaster who didn't want to bring high fidelity to the medium, there are some who don't want to give anything up for it. Frank Kramer, director of radio engineering, Viacom Broadcasting, said some broadcasters may want "to continue running more preemphasis" than specified by the standard for the benefit of the millions of existing narrowband receivers in the field or to compensate for the loss of high frequencies in their antenna systems.

And what about Viacom? Kramer said the company has yet to make a commitment to employ the standard at its three AM's, but added that it likely will. The potential benefits are great, he said, and the costs are small.

Orban said other broadcasters may balk at limiting the audio bandwidth to 10 khz because of the paradox at the heart of it. "They are going to have to make their programing sound a little bit worse on the studio monitor speakers for the sake of making it sound better to the listener." he said.

NewCity's Marino said his task will be to

NewCity's Marino said his task will be to make broadcasters understand that the benefits of the standard far outweigh any detriments caused by limiting the audio bandwidth to 10 khz. AM radios can't pass frequencies about 10 khz and, even if they could, most people couldn't hear them, he said. Some FM stations, he added, effectively cut off the high end of the program audio by compressing it to boost the signal's loudness

In the end, Marino feels the industry may have to be forced into implementing the standard. "I have a feeling we will have to go to the FCC and the FCC has said it will help us," he said.

The logic of the situation seems to dictate that the broadcasters take the lead in implementation. According to the NAB, stations

will be able to implement the standard fairly inexpensively and quickly. Most stations will have to buy no more than \$500 worth of electronic components or circuit boards, it said, although some stations may also need a new audio processor.

For receivers manufacturers, it's not nearly as cheap or easy. According to several manufacturers, it will take a year or more for them to redesign a radio to incorporate the standard de-emphasis curve and get it into full-scale production. More important, as Orban pointed out, to market wideband radios without knowing whether most broadcasters are going to adopt the standard is to bear an unacceptable risk.

If the broadcasters and receiver manufacturer don't get trapped in a chicken-and-egg situation, where each side is waiting for the other to go first, standard wideband radios may start hitting the market in 1988. There seems to be no question about the benefits

that would flow to AM.

In radio sets, high-fidelity is expressed as frequency response. Today, FM stereo receivers boast response of around 15 khz, while most AM radios claim no more than about 3 khz or 4 khz. With the widespread implementation of the standard, AM radios could go to 10 khz and, as far as most people are concerned, make the jump to high fidelity. For all practical purposes, according to some hearing experts, the fidelity gap between AM and FM would be virtually closed.

Bronwyn Jones, an audio expert at CBS Technology Center before it was shut down last month, said few people over the age of 30 are able to hear sounds over 10 khz. Most males start losing their ability to hear high frequencies in their late teens, she said, while most females lose it in their early 30's. According to one study, she said, loud noises, music and general noise pollution have accelerated hearing loss in recent decades.

In the real world, the ability to hear above 10 khz may be of little practical value. Jones said that low frequencies mask high frequencies so that the teen-ager with acute hearing listening to rock 'n' roll with a sustained heavy bass line still wouldn't be able to hear the highs. And Michael Rau, a staff engineer

FM also out to improve service

It's hoped the NRSC standard and AM stereo will close the audio-quality gap between AM and FM and give the older service a chance to recover some of the audience (and revenues) lost to FM over the past two decades. But, in fact, it may be needed to insure the gap doesn't get any wider. FM is trying to improve itself, too.

Broadcasters' FM improvement efforts have been concentrated in the newly formed subcommittee of the National Association of Broadcasters Engineering Advisory Committee. According to Tom Keller, senior vice president, science and technology, NAB, the FM Transmission Subcommittee will devote its time and energy to helping to bring FMX to fruition, investigating the role of transmitting antennas in causing multipath reception problems, working with the International Radio Consultative Committee in developing a new "reference receiver" for use in allocations research, and studying a proposal to boost the power of Class A FM stations to a maximum of four kilowatts and the height of their antennas to 100 feet. According to Keller, a chairman for the new subcommittee has not yet been selected.

Perhaps the most important task on the subcommittee's agenda is to help FMX along. FMX, which was developed jointly by NAB and CBS to eliminate the noise penalty FM stations pay for broadcasting in stereo, calls for FM stations to broadcast a second relatively noise-free stereo difference channel in quadrature with the first. A new class of FMX radios would receive the second channel, providing stereo listening in areas where conventional service would have succumbed to noise.

The system has the potential of expanding the effective coverage of FM stereo stations three or four times—to that of its monophonic coverage. But independent tests of the system have revealed serious compatibility problems. In multipath reception conditions, the tests found, conventional FM radios do not fully reject the second FMX difference channel. The resulting crosstalk caused increased distortion, a worsening of the multipath effects and a loss of separation.

Keller acknowledges that the compatibility problem exists, but said technicians at the CBS Technology Center had been working on three different approaches to solving it when CBS shut down the center last month. The NAB, CBS and others desiring the invest in the technology have been meeting in recent weeks to decide who will pay for [the continued development of the system] and who will own it," he said. Once that's settled, he said, the development can resume.

at the National Association of Broadcasters, said that in a car, engine and road noise attentuates the highs, making them more or less inaudible even to the best ears.

Charles Berlin, director of the Kresge Hearing Research Laboratories, part of the medical school of Louisiana State in New Orleans, said that if AM broadcasters can deliver 10 khz to the listeners, they will be at little disadvantage to their FM counterparts. Except for the people with "golden ears," he said, the difference between AM's 10 khz and FM's 15 khz would be negligible.

On the other hand, moving from 4 khz to

10 khz would be "a hell of a change," Berlin said. The highest key on a piano produces a fundamental frequency of 3.8 khz, he said, but every key produces "overtones" that occur at multiples of the fundamental frequencies and diminish in intensity the higher they get. It's the overtones that give instruments, particularly the human voice, their "richness," he said.

Viacom's Kramer concurs with others that few can hear frequencies above 10 khz. But, he said, electronically and artificially limiting the audio to 10 khz before transmission can be disconcerting to the ear. If the ear is allowed to "roll off" the highs naturally, he said, "the sound will be fuller."

The whole point of AM improvement efforts, of which the NRSC standard and AM stereo are a significant part, is to make AM more competitive with FM. Some skeptics say that AM will never sound as good as FM, pointing out even if AM fidelity were brought up to the same level as FM, the older medium would still be subject to all sorts of disruptive electrical noise caused by everything from lightning to lighting fixtures.

AM proponents concede that AM is more susceptible to electrical noise, but say that AM has some distinct advantages over FM, notably better propagation and freedom from multipath reception problems. Given stereo and hi-fi, they say, AM will be the medium of choice in the car regardless of programing.

Broadcasters fight for UHF spectrum

While groups including NAB and AMST are pushing to convince FCC to turn down plan to reallocate some TV spectrum, land-mobile interests seen by some as having upper hand

The Association of Maximum Service Telecasters and the National Association of Broadcasters say they are continuing their effort to convince the FCC to drop a pending proposal to give additional UHF TV spectrum to the land-mobile radio services.

But, as of last week, it appeared that land mobile, without actually having to lobby its case, had the upper hand. One well-placed FCC source said a majority of the commissioners appeared to be "votes" for land mobile. Several sources also said FCC personnel were "skeptical" about broadcast arguments against the spectrum giveaway. James Quello appeared to be the only commissioner that broadcasters may be able to count on for a vote.

Precisely how the AMST and NAB will try to derail the proposal to permit land-mobile operators to use 28 UHF TV channels in eight of the top-10 markets remains to be seen. But the good news for broadcasters is that they will apparently have some time to try to bring a majority of the commissioners around to their point of view. Thomas Stanley, FCC chief engineer, told BROADCASTING last week that, "considering the weight" of the conflicting comments in the proceeding, he didn't think his office would be able to present a recommendation to the commissioners on the proposed reallocation before next February.

(In comments at the FCC, broadcasters generally opposed the FCC's proposals [BROADCASTING, July 21], and an industry advisory committee established by the FCC to investigate technical issues of spectrum sharing filed a report reflecting a deep difference of opinion between broadcasters, who contended that the sharing proposed could cause interference to UHF stations at twice the level considered acceptable for day-to-day viewing, and land-mobile interests, who alleged that the potential for increased interference is small [BROADCASTING, May 12].)

The news that broadcasters have time to argue their case would appear particularly welcome since little lobbying against the proposal, which also would drop co-channel protection ratios at a UHF TV station's predicted grade B service contour from 50 db to 40 db, has been done thus far. Greg De-Priest, AMST vice president, said that association had made the rounds of the commissioners's offices in late September and early October to, among other things, voice concern that the proposal would not adequately protect broadcast service and would lead to a further "AMization" of the band. "We don't want to let what happened in the AM band [interference] happen in the TV bands," De-Priest said. Yet Thomas Keller, NAB senior vice president for science and technology, said that association really hadn't started lobbying yet. "But this will be a major

item." Keller said. "We put more effort in this than any other technical item."

Dick Hollands, NAB senior vice president, television, told BROADCASTING that the association's UHF committee will be in Washington for its regular meeting next Thursday (Oct. 30). And the committee, according to Hollands, planned to visit the offices of all the commissioners to discuss the issue

Hollands said the "basic pitch" was that UHF spectrum is a broadcasting resource—which might be needed for new broadcast technologies such as high-definition television—that "should not be given away because of the presumed needs [for spectrum] of land mobile." Another part of the argument, according to Hollands. is that land mobile can start using "actual state-of-theart equipment" to meet its need for new channels. "It seems to us that they can accommodate their needs by more efficient use of the spectrum already assigned to them," Hollands said.

Keller said the association also planned to brief the FCC staff on data disputing assumptions upon which the commission built its sharing proposal.

Perhaps not so coincidentally (NAB is arguing that the UHF spectrum should be retained for enhanced broadcast signals). AMSTand NAB are planning an over-the-air advanced television project in the Washington area early in January to show members of the appropriate congressional committees and the FCC what HDTV is all about (see box, page 90).

How much impact that demonstration project will have is unclear, however. One well-placed FCC skeptic said he had received assurances from the broadcasting industry since the early 1970's that HDTV was just around the corner. "How many times do you have to hear the same thing?" this source asked. "If one were suspicious, one would guess they are timing the demonstration because of the [FCC's proposed reallocation] item."

This source also said that if broadcasters want to go to HDTV, they will have to come up with a way to fit it into their existing 6 mhz channels so they won't interfere with one another. "HDTV is going to come, but they are going to have to work on it to get it to fit in the existing 6 mhz to protect other broadcasters," the source said.

This source said other reasons for FCC skepticism about the broadcast claims were that broadcasters were arguing for "greater [interference] protection [from land mobile] than they get from each other." and that land mobile and broadcasters are already sharing UHF channels 14-20 in 13 cities, "and it works there," the source said.

The FCC source said the commission was aware of counterproposals by broadcasters that would give parts of channels to land mobile instead of six mhz chunks. And this source said those proposals would be given consideration. But those proposals might push up the costs of land-mobile equipment

to "exorbitant" levels and might not yield enough bandwidth to accommodate full land-mobile systems, the source pointed out

Also according to the source, what is really fueling broadcast opposition to the reallocation is that "the big V's" think that the availability of UHF spectrum for broadcasting furnishes VHF's with an argument against VHF drop-ins.

AMST's DePriest said it was no secret that the drop-in consideration had been an association position for years. "But in this case, it's not particularly relevant because the question here is protection of existing service," DePriest said.

On the argument that broadcasters would have to develop an HDTV technology that would fit into 6 mhz channels to avoid causing interference to other broadcasters, De-Priest said: "That's an open question."

DePriest also said he was aware that the FCC has been using the sharing of UHF channels 14-20 as an argument in favor of the further sharing proposed. DePriest said New York was the only market of the 13 cities involved in the 14-20 sharing where interference protection had been reduced from 50 db to 40 db, but that the affected station actually gets about 58 db protection

because of the particular operating circumstances.

"Lack of complaints is not an indicator of anything," DePriest said, "because in many cases, people won't know what's causing interference or to whom to complain."

DePriest added that AMST's strategy would be to "try to keep the issue at a scientific rather than political level." DePriest said the test data submitted in the technical advisory committee report supported AMST's argument that the FCC's proposal would not afford broadcasters adequate protection "and would cause substantial loss of service within stations' Grade B contours."

Olympic tasks ahead for ABC and NBC

Both networks are busy planning their strategies for covering 1988 summer and winter Olympics

For most broadcasters, the 1988 Olympics may seem far off, but for the planners at NBC and ABC, the events are quickly approaching.

NBC, which will cover the summer games in Seoul, South Korea, from Sept. 17 to Oct. 2., and ABC, which will broadcast the winter games Feb. 13-28. in Calgary, Canada, have already begun planning for basic coverage, and many key decisions are expected to be made in the next few weeks.

There will be little room for error once the games are under way. Up to 80% of NBC's planned 100-plus hours of summer games

coverage will be live, with most of the final events to be held in the morning in South Korea to coincide with prime time in the U.S. ABC also expects a large prime time audience because of the winter games' location in the Pacific time zone, and will concentrate on live broadcasts during much of its 90 hours of planned coverage.

NBC has made a "massive" commitment to cover the summer games, said Ken Aagaard vice president of Olympic operations. NBC's coverage will probably cost well over \$100 million, he said, and require the efforts of between 1,600 and 1,700 people, including about 600 engineers and 300 production staffers.

In addition, NBC News is contemplating remote broadcasts of the *Today* show and

NBC Nightly News from Seoul during the games, and their staffs will increase the number of NBC personnel in South Korea by "another 100 or so," said Aagaard. Decisions on talent to cover the games have not been reached; executive producer Mike Wietzman is expected to make that announcement in late 1987.

NBC's coverage will be based around a host feed from the Korean Broadcasting System (KBS) and Manhwa Broadcasting Corp. (MBC), Korea's leading broadcast networks. NBC was originally nervous about depending on a host feed from another broadcaster, according to Aagaard, but after seeing the Korean coverage of the recent Asian games, which he described as "damn good," NBC requested only minor changes.

HDTV goes to Washington

Next January, an unusual pair of television signals will pass through the airwaves of Washington. The signals, carrying high-definition television to a handful of sites, are part of an advanced terrestrial TV broadcast demonstration organized jointly by the National Association of Broadcasters and the Association of Maximum Service Telecasters.

The demonstration is not promoting use of the Japanese-developed 1,125-line HDTV technology; rather, its goal is to help maintain the technical competitiveness of terrestrial TV services. According to project director Ben Crutchfield of NAB, with alternative and enhanced TV technologies under rapid development, broadcasters must try to persuade the FCC and Congress not to give away or allow the degradation of the UHF TV spectrum that could give broadcasters room to develop competitive advancements of their own in the future (see story above).

Crutchfield outlined the demonstrations for BROADCASTING.

The process will begin at the site of a wusa(TV) broadcast tower in Washington, where an HDTV videotape recorder will be used to run program material in the 1,125-line, 5.3:3 aspect ratio HDTV format. The HDTV signal, at this point 25 mhz wide, will be fed to an NHK-supplied encoder (dubbed MUSE for its use of 'multiple sub-Nyquist sampling encoding' circuitry) which will reduce the signal by almost a third, to 8.1 mhz.

The MUSE bandwidth-reduced HDTV signal will then be transmitted in two forms. The first, using standard TV's vestigial sideband AM transmission, will be accomplished with a specialized transmitter manufactured by ITS and a modified antenna from Micro Communications. The AM signal, transmitted at 1.5

kw ERP, will be aired pending FCC authorization, over channels 58 and 59. The second signal will go out as a 1 w FM transmission in the 13 ghz direct-broadcast satellite band to demonstrate the capability of using the DBS band for terrestrial applications. A modified Harris antenna and transmitter will be used.

Three receiving points will be used, according to Crutchfield, one at NAB headquarters, another at the FCC and a third at the U.S. Capitol. At each of the receive points two special wideband receiver-demodulators will feed one or the other incoming signal to the MUSE decoder, which will then reconstitute the HDTV signal and pass it on for viewing either to HDTV video monitors or a large-screen HDTV projection unit. At the receive points, viewers will be able to switch between the AM and FM versions of the HDTV signal, and at least one site, will also be able to see the 1,125-line signal downconverted to standard 525-line NTSC for comparison purposes.

Among the viewing materials will be a 10-12-minute HDTV videotape of Washington scenes produced for the project by noncommercial weta-tv Washington, HDTV videotapes from the 1984 Olympics, an Italian HDTV music video and other materials, including a possible 35mm film transfer to HDTV.

Already. initial stages of the demonstration have gotten underway, Crutchfield noted. In early October, the project tested the ITS transmitter, the receivers-demodulators and the Harris FM transmitter and receiver. Next month, over-the-air test broadcasts will begin and last through December, first with test signals, then with program material. If all goes well, the demonstration will then begin and continue through January.

Breeders'Cup Newsfeed.

Take your viewers down the stretch.

The Breeders' Cup Newsfeed is a 15-minute satellite delivered package of features, interviews, and location footage direct from Santa Anita Park, the 1986 site of Thoroughbred racing's \$10 million, seven-race championship.

Unscrambled and completely unrestricted, the Breeders' Cup Newsfeed

gives you the opportunity to provide your audience with daily stories on the top horses, jockeys, trainers, owners and celebrities who make up the "Super Bowl of racing."

Take your viewers down the stretch with

the Breeders' Cup Newsfeed because when you do, you'll be giving them a winner!

3pm-3:30pm EST WESTAR IV, TRANSPONDER 9X AUDIO 6.2 & 6.8

LATE FEED

7:30pm-8pm EST WESTAR IV, TRANSPONDER 10D AUDIO 6.2 & 6.8

To learn more about the Newsfeed or Breeders' Cup Day, call the Breeders' Cup Newsfeed staff at (703) 847-6662.

Agard added that relations with the Korean broadcasters have been "open and candid."

NBC's present preoccupation is the construction and development of its international broadcast center. The center, soon to be home for more than 300 engineers, will be constructed by Korean contracters and farmed out to a turnkey operator for final construction. The center will contain two large main studios with more than 100 monitors and large Grass Valley Group switchers and four smaller studios for each of the onehour morning, afternoon, prime time and late night shows, with editing rooms equipped with GVG 300 switchers. There will also be another 12 to 16 smaller editing rooms, each with three or four tape machines, and one large playback room with 20 M-II tape machines and a mix of seven other models.

Tests of the facility will begin in August or September 1987 with the final installation of equipment expected in January 1988.

NBC has divided the game's 26 venues in Seoul into four coverage areas with NBC augmenting the Korean host feed to a greater or lesser degree in each group. Track and field and gymnastics, where NBC will put its greatest emphasis, represent the first group events. These are the largest venues to be covered. Having many different individual events going on at the same time, both will have three separate feeds. Most of the coverage of these events will come from NBC cameras, Aagaard said, although the actual number of cameras depends on what the host feed has to offer.

A second group of events—swimming, basketball, volleyball, boxing and water polo and diving—will require fewer cameras and while not as involved in terms of sheer manpower, will receive a great deal of direct NBC coverage.

A third group will be covered generally with small mobile units augmenting the host feed. These aports include tennis, soccer, wrestling, weight lifting, cycling, rowing,

canoeing and baseball.

The fourth group will be covered by the host feed almost exclusively but NBC may occasionally use a mobile unit to augment the coverage. These activities will include Tae Kwon Do, judo, archery, equestrian sports, fencing, table tennis, handball, shooting, hockey and yachting.

Transmission for NBC will be handled on a satellite to be determined with two outgoing and one incoming paths. One outgoing path will be operated on a 24-hour basis, with the other as backup. The incoming path will operate on a bookable basis for feeds to Korea from the U.S. NBC will use Korean Telephone Authority dishes for its ground station. The broadcast signal from South Korea will be picked up in both Burbank, Calif., and New York, but a control site has yet to be determined. NBC may chose to emanate the network from both spots or use one path for air and the other as backup.

ABC is also still in the earlier planning stages of its coverage. Joe Debonis, general manager of field and studio operations, said that ABC is still in negotiations with Canadian broadcasters about how the coverage of events will be split, and that it will probably be another two months before negotiations are complete and ABC knows how many people it needs.

Marvin Bader, vice president of Olympic operations, estimated that ABC will send 700 to 750 people, about 400 of whom will be engineers. As for broadcast talent, many ABC executives felt strongly that Jim McKay would be back to cover the Calgary

ABC's coverage of the winter games will also center on the host broadcasters' feed, and Debonis said ABC would probably supplement all the feeds with its own cameras, but the exact layout of the coverage is still being determined. ABC will definitely augment certain events that are considered more interesting to American viewers: figure skating and alpine events, for example. Sports to be covered are: alpine skiing, giant slalom, special slalom, ski jumping, cross-country skiing, figure skating, compulsory skating, speed skating, ice hockey (at two stadiums), biathlon (cross-country skiing and shooting combined) and curling.

ABC will be building its broadcast center completely in-house. The center, which Debonis described as a complete new television station on location, will contain two control rooms, an on-air and pre-set studio and more than 50 videotape machines. The center will have a complete master control, routing switcher and extensive graphics. It is expected to be completed in June or July 1987. ABC will also take along 12 mobile "up close and personal" units, each with one or two cameras.

The network has yet to decide what new equipment it intends to buy for the Olympics, although operations executives confirmed there would be no purchases of new portable half-inch videotape systems for the games ("Closed Circuit," Oct. 20). Bader said they will be looking at other new developments up until the games.

As for NBC, that network expects to concentrate on the basics for the broadcasts with less emphasis on graphics and new devices than before. "In the past," said Aagaard, "we've seen a tendency for the spectacular to screw up the ordinary." This year NBC is concerned about the quality of graphics more than quantity. "New things may come along by the Olympics," said Aagaard, "but for now we just want to get the basics down." NBC will be using much of the latest equipment and expects to exploit the use of portable, point-of-view cameras, but will not be pioneering much new equipment.

The possible exception is high-definition television. NBC is reviewing 1,125-line HDTV converted to American 525-line NTSC standards for use in the Olympics and was said to be considering using some converted HDTV footage on last Sunday's (Oct. 25) Sports World ("Closed Circuit," Oct.

Several manufacturers make a stereo generator for television, Orban among them. How do you choose the best one?

Stereo generator design, while difficult, is a task whose goals are objectively defined by BTSC specifications and the EIA Recommended

Practices. Such design is well within the grasp of competent engineers, and the success or failure of the design is readily measureable by instrument.

In contrast, a TV stereo audio processor must be evaluated by *subjective listening tests*. Measured performance tells you almost nothing about the sound of a given design. This point is crucial because the audio processor, more than any other element in the system, dictates the air-sound you get.

Orban spent four years fine-tuning and perfecting OPTIMOD-TV Model 8182A until it could gracefully handle even the most difficult and diverse program material. During the development cycle, sophisticated mathematical design techniques were always complemented by exhaustive listening tests.

Part of OPTIMOD-TV's superiority stems from its architecture: its patented multiband compressor usually acts like a wideband compressor to preserve frequency balances. But unlike the oversimplified wideband compressors found in some other TV audio processors, it also prevents the pumping of midrange sounds (like dialogue) by low-frequency sounds (like sound-effects with lots of bass energy). It also has a CBS Loudness Controller

to prevent viewer complaints due to loud commercials.

OF A TV STEREO GENERATOR

ISN'T THE STEREO GENERATOR

Best of all, OPTIMOD-TV's adjustability makes it a processor that will serve you well now and in the future. Comprehensive setup controls determine the amount of dynamic range reduction that occurs, so you can operate OPTIMOD-TV to produce a consistent, uniform sound that is comfortably listenable on small sets, use it as a safety limiter, or split the difference. The choice is yours!

Orban's 8182A/SG stereo generator plugs into the 8182A, interleaving the stereo generator's low-pass filters with the audio processor circuitry. This system approach yields a brighter sound with lower distortion than would be achieved if our 8182A were merely cascaded with a non-Orban stereo generator.

When you add it all up, it becomes clear why there are more Orban OPTIMOD-TV audio processors and stereo generators in service than all other makes *combined*. To learn more, contact your favorite Orban Broadcast Products dealer. Or call us direct in San Francisco.

Orban Associates Inc.

Programing 4

MIPCOM gathering momentum

Attendance by buyers and sellers is way up; many see Cannes passing London as biggest fall show—even giving MIP-TV a run for its money

Generations of Americans have been lured to the south of France by its sun and beaches and its elegance. Bernard Chevry, president of the MIDEM Organization, has taken advantage of those gifts of nature and of the French, and added his own organizational and marketing skills to develop a series of annual entertainment-related trade fairs, all held in Cannes, all successful. The latest example is MIPCOM, which concluded its second run, of five days, last Tuesday. And by many accounts, the market that is designed to bring together buyers and sellers of programing for television, cable television, home video and satellite services is now firmly entrenched as a major factor in the year-round series of such markets.

MIPCOM (the abbreviation stands for Marche International des Films et des Programmes Pour la TV, La Video, le Cable et le Satellite) last year replaced the market (VID-COM) in the MIDEM stable that had been created five years earlier to serve sellers and buyers of video product. And MIPCOM now appears to have developed into a serious competitive threat to the London Market, which is to be held next month. A number of American program distributors said they would skip the London Market this year, that they were satisfied with MIPCOM and did not think the expense of exhibiting at both markets could be justified. That would appear to leave MIDCOM as the dominant fall television market. (The television section of the MIFED theatrical film and television festival, now under way in Milan, Italy, had already been written off by most exhibitors.)

MIPCOM produced its normal budget of announcements of multimillion-dollar sales. Worldvision, for instance, reported sales of "over \$4 million" on Sunday (a day after New World Television grabbed the front page of the daily MIPCOM News with word

of \$3 million in sales). And Worldvision's senior vice president of international sales, Bert Cohen, was one of those who said he would pass up the London Market. "This is a better venue for selling programs," he said. "There are better facilities, more room." And in the much smaller city of Cannes, he said, "it's easier for everyone" to deal. Or as more than one exhibitor put it, doing business on the French Riviera in October is far preferable to doing business in London in November.

Herb Granath, president of ABC Video Enterprises, was another of those who said his company was doing well at MIPCOMwith interest shown in product like Amerika, the controversial 12-hour mini-series about life in America after it is taken over by the USSR, and Moonlighting ("It fits the European idea of what an adventure-romantic comedy should be")-and would not exhibit at the London market. "My guess is that London will disappear," Granath said. "It looks like Bernard Chevry has worked his magic again." If so, it may be the last time. Chevry sold the MIDEM Organization last summer to the United Kingdom's independent television network, TVS. However, he remains president of the organization for another three years.

The key to the success of MIPCOM is the presence of buyers. There were 550 of them looking for television product and 250 of them interested in video material, compared with 277 buyers of television and 145 of video programing in 1985. Where the buyers go, sellers are sure to follow. And that's how what the world will watch on television is decided.

MIDEM, incidentally, does not depend only on sun and sand to draw the buyers from around the world—from Malaysia to Australia to Japan and the United Kingdom and Germany. Barney Bernhard, international sales manager for the MIDEM Organization, acknowledged that MIDEM helps improve the odds that the important ones participate. He said the MIDEM Organization paid the hotel bills of "more than 600" buyers. He also said major exhibitors were

given special consideration: Those who took 10 or more units of space both at MIP-TV in April and at MIPCOM were given a 10% discount. It wasn't clear how many exhibitors qualified for that discount, but there were substantially more exhibitors at 1986's MIPCOM than at last year's—356 as against 238.

Apart from everything else, a major factor in the success of MIPCOM, at least from the American point of view, is the timing. Since it comes several weeks after the start of the network television season, American producers and distributors have a track record of ratings on which to base their sales pitch (assuming the ratings are worth bragging about). By contrast, MIP-TV, the dominant market for the sale of television programing, is held in April, as one television season is ending but before programing decisions for the next have been made.

One development that was beyond MI-DEM's control last week was the one-day strike that shut down the country on the final day of the market. Some of the participants scrambled to leave Cannes on Monday (fearful, oddly enough, of being stuck in a place some people would kill to visit). But it wasn't clear what effect, if any, that had on the market.

All told, there were some 3,200 in attendance last week, from 80 countries, an increase of 700 over 1985. Still, to exhibitors accustomed to the crush of thousands of people at MIP-TV, not to mention at an American NATPE, the number of people walking the floor was disappointing—squads instead of divisions. Guy Mazzeo, executive vice president of Blair Entertainment, when asked to comment on the traffic, said: "Bupkis." Gesturing at the empty hall running past the Blair exhibit, he said, "In past MIP's, you couldn't spit without hitting anyone. Here, you could shoot a machine gun and not hit anyone."

Perhaps, but exhibitors' screening rooms were usually occupied by prospective buyers, and exhibitors generally felt the quality of the buyer more than made up for the lack of quantity. "People at MIP-TV aren't seri-

ous," said Michael Jay Solomon, president of Lorimar-Telepictures. "Here you have serious buyers, so you can spend more time with the client." Indeed he did. On Monday, a spokesperson for the company said it had done in excess of \$10 million worth of business as of Sunday, split almost evenly between television and home video product. The home video material was sold to buyers from Greece, Venezuela and Argentina. The television programing, mostly series that Lorimar produced for network and first-run syndication, went to buyers in the same countries, plus Italy, England, France, Spain, Sweden, Norway and Denmark.

The interest of the foreign buyers was wide-ranging. Sonja Mendes, director of sales for CBS Broadcast International, for instance, reported sales of Sisters in the Name of Love, a one-hour music special, two Snoopy specials (A Boy Named Charlie Brown and Snoopy Come Home), some television movies and the network's news magazine programs (60 Minutes and West 57th). She also said buyers from Scandinavia, France and the United Kingdom had shown interest in the CBS News special on crack, 48 Hours on Crack Street. CBS also sold two of its shows-If Tomorrow Comes and Twilight Zone-in a number of Europe's major markets. Mendes provided no figures, but she did not seem disappointed with the way the sales effort was going.

Western World's Matthew Ody, whose company sells programs produced by noncommercial wGBH(TV) Boston as well as by the Australian ABC and the BBC, among others, had written to a number of buyers in advance of MIPCOM, with the result that his appointment book seemed like a page out of the United Nations directory: Callers came from Poland, Scandinavia, South Africa. West Germany, Malaysia, the Benelux countries, Thailand, Italy, Portugal, Greece, Holland, Turkey, the United Kingdom, France, Canada, Argentina, Peru, Chile and Mexico. Ody even saw some Americans. How was business? "Brisk to good," with sales including documentaries, feature films, music specials (a buyer from Greece, for instance, bought Kenny and Dolly) and variety series.

The increasing market for programing was evidenced at MIPCOM by the presence of representatives of the new frontier in program distribution: the satellite service.

The SES (Societe Europeenne des Satellites) of Luxembourg held a press conference to promote its Astra—"Europe's 16-channel television satellite"—and what would be the first privately owned satellite in Europe. The medium-power satellite that will beam advertiser-supported and pay programing to small backyard earth stations (0.85 meters) and cable television systems all over Europe is scheduled for launch aboard an Ariane rocket in February 1988.

One problem that Marcus Bicknell, SES's commercial director, brushed past in describing the organization's plans and hopes is the difficulty it is encountering in coordinating the satellite with Eutelsat, the organization of European countries that operates satellites serving the European community. He said after the press conference that Eutelsat was proposing difficult restrictions on Astra

Program expansion. Communications Equity Associates, the Tampa, Fla.based broadcast station brokerage, has announced long-range plans to establish a media and entertainment investment banking firm. To investigate ways to establish the firm, CEA Chairman J. Patrick Michaels announced the appointment of William D. Simon, vice president of a British company, Heron Communications, as vice president, entertainment industries. Along with experience in program financing and distribution, Simon has held political positions as staff assistant to former Representative Thomas M. Rees (D-Calif.) and later as deputy staff secretary to former President Jimmy Carter.

to avoid competition. Bicknell said Astra's lawyers do not believe coordination is required, since Astra would be used to provide a specialized service. However, he also said SES had offered Eutelsat a financial payment to ease the coordination problems—\$70 million over the next 10 years. Bicknell also said that while steps would be taken to avoid interference with other satellites, Astra will be launched on schedule, regardless of whether formal coordination has been achieved. Intelsat coordination would also be required, but Bicknell did not appear to be as concerned about dealing with that organization.

Another would-be satellite service was also shown off at MIPCOM. But TeleDiffusion de France was satisfied with a booth in which it demonstrated, by simulation, the signal and sound available from the D2-MAC system with which the TDF I and TDF 2 high-power, direct broadcasting satellites will be equipped. The first satellite is to be launched next September aboard an Ariane rocket. Together, the two TDF satellites will offer a maximum of five broadcasting channels. But the D2-MAC, which has been adopted as the single European transmission standard for a direct broadcasting satellite service, would permit the broadcast on each of the channels of either a television program along with four very high quality digital sound programs or eight good quality digital sound programs, or 12 very high quality digital stereophonic programs.

Developments like the emergence of satellite television encourage the MIDEM organization in the belief that there is a need for both MIP-TV in April and MIPCOM in October. MIDEM's Bernhard noted that the future of cable television is still before it in Europe; growth of the service has been much slower than in the U.S. And while the U.S. is fairly well saturated with television stations, he noted, there is room for "dynamic growth" in the number of television outlets in Europe. Furthermore, he said, the peculiar American interest in or need for a market a few weeks into the new network season cannot be controlling. "You can't organize a market around something that happens in October," he said. "This [MIPCOM] is done for television, video, cable and satellites." He would not say that MIP-TV would be overshadowed, in the MIDEM Organiza-

DEM Organization's scheme of things, by MIPCOM. But he predicted that "in three or four years, many U.S. companies will have a larger presence at MIPCOM than at MIPTV."

Certainly some exhibitors are beginning to express doubts about appearing at both MIP's. Ken Page, chief executive officer of

Gilson International, which distributes MTM product, said that next year may be his last MIP-TV. Indeed, he seems to be one of those who seduced by the Cannes environment. At one point, he said in an interview near his booth, "The only reason to come is business. And business has been excellent." MIP-TV, he added, is "not as good as MIP-

COM." Indeed, he said MIP-TV's value is hurt by its following another market, the Monte Carlo festival, by two months. And "the timing of MIPCOM is terrific." But then he said: "It's good to be here for wining and dining without making deals. People come to MIP-TV to reinforce contacts—for fun and friends."

College Satellite Network is off and running

College-oriented news and concert programing network launches premiere broadcast with live London concert

The College Satellite Network—a public affairs and entertainment program service for colleges with C-band satellite receive capability—was officially launched two weeks ago with a four-hour broadcast that included two *Nightline*-type discussions on U.S. foreign policy and a live concert from London.

According to CSN President Jack Calmes, the premiere broadcast was troubled by a couple of technical gliches. The musical portion of the broadcast, which featured several popular British groups, was preceded by a press conference with reporters at various club sites patched together by phone line via Westar V. The entertaiment portion of the event was fed over Westar IV, however, and there was some trouble getting the club sites switched over to the right satellite. The concert was fed to receive points by Bright Star Communications in London. There was also a "phase-cancelled sound"

problem for about the first 30 minutes of the first band's performance, said Calmes. He said the people at Bright Star were apparently unaware of the problem for so long because they did not have a monitor loop from the originating point back to the uplink facility. "I was crazed," said Calmes, noting that the audio during the troubled segment made the band sound like they were playing into a "microphone in a toilet." Once that problem was reversed, however, things went smoothly, he said.

For its first season, the 1986-87 school year, CSN is planning of five broadcasts, with the remaining four to follow in November, February, March and April. Each four-hour broadcast will have a public affairs segment, followed by a concert, roughly equal in duration. For example, the public affairs segment of the Oct. 15 broadcast featured two discussions on different aspects of U.S. foreign policy—Latin America and South Africa. Panelists included Elliot Abrams, assistant secretary of state for inter-American affairs, Senator Paul Sarbanes (D-Md.) and

Representative Michael Barnes (D-Md.). Also on the panel were anti-apartheid activist Randall Robinson, actor Mike Farrell and musician Jackson Browne. The congressman spoke from Washington, while Farrell was patched in from California and Browne from Milan, Italy. The feed went out to 293 colleges throughout the country, said Calmes. And the feed was set up so that students could phone in to question or comment on the statements of the panelists. WETA Communications, a subsidiary of the Washington-based public television station, is supplying CSN's domestic feed.

The concert that followed featured Big Country, Simple Minds, Simply Red and Spandau Ballet. Calmes said that the two events are marketed "separately" and attracted different campus audiences. He estimated that a minimum of 80,000 to 90,000 students watched the broadcast nationwide.

This year colleges participating in CSN will receive all programs free, said Calmes. Next year, however, schools will be charged for the "basic" program service, and there

Four in a row for NBC

Week four of the prime time season, like the three before it, belongs to NBC. The network handily beat out ABC and CBS with a 19.6 rating/31 share. CBS came in second with a 16.7/26, while ABC held third place with a 14.6/23. In evening news, CBS and NBC tied for first place with a 10.6/20. ABC had a 10.4/21, but its figures are for four days only. (On Wednesday, World News Tonight was pre-empted by the National League playoff game, which ran into extra innings. On Tuesday, the news program didn't run in some western markets, again due to the playoffs.)

Last year's stats for prime time were: NBC 19.4/30, CBS 16.6/26 and ABC 16.3/25. Last year's news numbers were: CBS 12.7/24, NBC 10.4/21 and ABC 10.3/19. HUT levels (homes using television) were 63.5% compared with last year's 64.0%.

For the season to date, NBC has an 18.6/30, CBS a 16.2/26 and ABC a 15.0/24.

ABC had no shows in the top 10 for week four, while NBC had six and CBS four. NBC's Cosby, Family Ties and Cheers again remain the top three rated programs. The second World Series game tied with Night Court for fourth place. This pushed Murder, She Wrote down to sixth place. The first World Series game came in at seventh. 60 Minutes and Dallas tied for eighth place, while Newhart closed out the top 10.

The American League games seven and six ranked 11th and 12th, respectively. This gave ABC its two wins (Tuesday and Wednesday). NBC won Thursday, Saturday and Sunday. CBS took Monday and Friday.

may be additional special "pay events" as well. The participating schools are responsible for picking the feed off the bird and for arranging display of the programs on large-screen (20-foot) projection systems. Calmes said each CSN broadcast costs between \$300,000 and \$400,000 to produce and promote.

The CSN programing is intended to be advertiser supported and Pepsi Co. is the network's first major sponsor with a two-year commitment worth more than \$1 million. CSN is currently talking to a number of other advertisers.

Currently, CSN, based in Dallas, is privately held, the principal stockholders being Calmes and CSN Chairman Charles Benton. Another shareholder is Dick Asher, president of Polygram Records. Benton is also chairman of Public Media Inc., Chicago, which distributes educational and entertainment films to the college market. Calmes was the founder and former president of Showco Inc., which produced the concert tours of musicians such as Janis Joplin, The Doors and The Rolling Stones. Plans are currently in progress to take the company public. CSN has submitted its plan for a public offering to the Securities and Exchange Commission and is awaiting word from the commission on whether the company can proceed.

From 'Divorce Court' to 'Parole Board'

Latest in reality-based shows to come from TPS: reenactments of parole hearings in prisons

Encouraged by the early ratings on the new reality-based courtroom shows introduced this fall, Television Program Source is offering a half-hour strip that will reenact parole board hearings from prison. The show, *Parole Board*, will be produced by Columbia Pictures Television, which, along with Bob Peyton and Alan Bruce Bennett, is a partner in Television Program Source.

Peyton said the ratings news on the new court shows "was a good enough reason for a new one." There are now four "reality-based" court shows in existence. And there is enough material for the new show, its producers say: Statistics show one male prison inmate out of every 35 is are paroled within two years and that there are 120,000 parole hearings annually.

Peyton said the new show could stand alone or be paired with other reality-based shows. The CBS-owned stations already employ such "court blocks" on their schedules. Peyton said that the show will be aimed at affiliates for mornings, early fringe or late night. CBS-affiliate wusa(Tv) Washington currently uses Divorce Court during late night.

Parole Board will feature two re-enactments of parole board cases in each half-hour. A three-member panel consisting of two men and one woman—with the men representing conservative and liberal perspectives and the woman representing still another point of view—will judge cases. The

three judges will be played by the same actors in each episode, with supporting cast

played by guest actors.

The show's executive producer will be Earl Greenberg, former NBC vice president of daytime television. Bill Glenn, director of The Young and the Restless for nine years, will direct the show, and Anne Howard Bailey, head writer on General Hospital for the last five years, will be executive story editor. Television Program Source will make 36week deals on the show, with sales being on a cash-plus-barter basis. Peyton said that clearances will begin in earnest once stations have more ratings evidence in hand on this season's premieres.

Television Program Source will also take to NATPE a Mark Goodson produced game show for fall 1987. Columbia Pictures Television is working on a one-hour talk variety show hosted by Willard Scott.

The program axe falls first at CBS

Wednesday and Saturday nights are in first rounds of cuts

One of the networks had to start the first round of inevitable prime time program cancellations this season, and last week CBS took the initiative, dumping three programs. although the network claimed that two of the shows may be back at unspecified future dates. As a result of the cancellations, CBS is rearranging its schedule on Wednesday

and Saturday nights. Better Days, from Magnum-Thunder Road in association with Universal, the network's new sitcom on Wednesdays at 8:30 p.m., will have its last broadcast on Oct. 29. The program averaged an 11.7 rating and an 18 share over three broadcasts. The program that precedes it, Together We Stand, from Burton/Schwartz, also in association with Universal, will go on "hiatus" that same evening. In its first four outings, *Together* averaged a 13.4/21. The program's premiere broadcast received a 17.1/26, but the three subsequent episodes didn't come close to

matching even those numbers.

CBS is also putting its in-house production, Twilight Zone, on ice. The one-hour program will have its last broadcast Saturday, Oct. 25, at 10 p.m. Over the first four weeks of the new season, the second-year show averaged a 9.8/18. Effective Nov. 1, CBS will program a Saturday night movie from 9 to 11 p.m., after Downtown, the firstseason, one-hour drama from Ron Samuels Productions in association with Tri-Star, which has also been a ratings under-performer at 8 p.m. Its first episode averaged an 11.9/23, but the three subsequent episodes have averaged a 10.8/19. The CBS movie will go up against NBC's dominant lineup of Golden Girls, Amen and Hunter and Heart

of the City and Spenser: For Hire on ABC. The network is taking The New Mike Hammer, which has been airing on Saturday from 9 to 10 p.m., and putting it in the Wednesday 8 to 9 p.m. slot effective Nov. 5. Hammer has also performed poorly in the ratings so

Le Parc offers you a great luxury suite even when your budget affords a good hotel room.

far this season, averaging an 11.1/19 over the first four weeks. The new Wednesday lineup will have Hammer followed by Magnum, P.I. at 9 p.m. and The Equalizer at 10 p.m. Hammer's new competition on Wednesday at 8 p.m. will be Perfect Strangers and Head of the Class on ABC and Highway to Heaven on NBC. The first Saturday movie on CBS will be Vengeance: The Story of Tony Cimo, about a man who hires a contract killer to murder his parents.

Conway returns to syndication

Tim Conway is getting back into television with a half-hour syndicated comedy show to be distributed by Carol Burnett's C.B. Distribution next fall. *Tim Conway's 'Scue Me* will feature such guest comedians as Jonathan Winters, Robin Williams and Carol Burnett, as well as unknown comedians whom Conway will search out in comedy clubs. Conway's wife, Julie Dees, who hosts a syndicated comedy radio program, will also appear in the show.

The show will be produced by Longshot

Productions, and will consist mainly of comedy sketches similar to those seen on the Carol Burnett Show.

JoAnne Leighton, director of sales at C.B., said that Conway has been "thrilled with the response" to the show. "People want to be in it." Conway plans to shoot two to three times as many sketches as necessary for the show, and include the best in the program.

Lang Elliot, who has worked with Conway for 15 years, will be executive producer of the show, and Tom Egan will be producer. Elliot and Egan worked together on the theatrical, "The Long Shot." Roger Beatty, who directed She's My Mama in its network run, as well as Carol Burnett and Friends, will direct the new show, which will be shot at Glendale studios.

There will be 22 episodes of *Tim Conway's 'Scue Me* that will be sold on a cash-plus-barter basis, with C.B. holding back one minute, and stations getting four-and-a-half minutes. Leighton said that the show is designed for early evenings on weekends, but could also be worked into sitcom checkerboards.

Conway is financing the new production

by offering it as a limited partnership, the Tim Conway Television Group I. Net proceeds of \$3.4 million are expected.

The agreement with C.B. said that if, by Feb. 28, 1987, it does not receive binding commitments of at least one million dollars from stations, the remainder of the offering will be returned to the limited partners. The prospectus for the offering, being made by Dallas-based Weber, Hall, Sale & Associates, said that the stations so far approached. ... have indicated strong interest in the series, although formal negotiations will not commence until the closing of the offering." C.B. would be entitled to 30% of revenue from cash sales and 15% of revenues from barter sales, with one half of its fees deferred until the partnership recoups its investment. Initially, net income or losses would be allocated 99% to the limited partners up to the amount of their contributions, after which, in case of income, split with general partner would be 60%/40%.

Actual production costs are scheduled to be \$100,000 per episode, of which Conway would get \$10,000 and Elliott, \$5,000. Conway is also scheduled to be in a first-run sitcom, financed by Procter and Gamble.

Syndication 5 Marketplace

King World reports that Wheel of Fortune has been renewed in two-year deals (for the 1986-87, 1987-88 seasons) in 204 markets covering 99.66% of the country. King World president of domestic distribution, Sid Cohen, said the deals were expanded to two years at the request of stations. Sales for the top-rated syndicated show are on a cash-plus-barter basis, with stations getting five-and-a-half minutes of advertising time (plus a 93-second end break), and King World keeping one minute. Wheel began airing on NBC's daytime schedule in 1975, and began in syndication in 1983.

King World has also added 15 markets to its *Jeopardy* lineup to bring that show's total to 193 markets covering 98.5% of the country. *Jeopardy* is sold for the same terms as *Wheel*. On Oct. 28 and 29, the show will film its second annual "Tournament of Champions," featuring five previously undefeated players (who have won five games) and 10 four-time winners. The 15 players will compete for a grand prized of \$100,000 in cash. The "Tournament of Champions" shows will air nationally during the weeks of Nov. 10 and 17. The new *Jeopardy* stations are KNST(TV) Topeka, Kan.; KRIS-TV Corpus Christi, Tex.; KFTY(TV) Santa Rosa, Calif.; KYTV(TV) Springfield, Mo.; KBJR-TV Duluth, Minn.; KDUH-TV Cheyenne, Wyo.; KPAX-TV Butte, Mont.; KGEN-TV Waco, Tex.; KAIT-TV Jonesboro, Ark.; KRIV(TV) Great Falls, Mont.; KBIM-TV Roswell, N.M.; KEYC-TV Mankato, Minn.; WLUC-TV Marquette, Wis.; WHIZ-TV Zanesville, Ohio, and WAGM-TV Presque Isle, Me.

D.L. Taffner reports that prior to the death of Ted Knight in late August, *The Ted Knight Show* was cleared in 10 more markets, and that following his death another eight stations bought the show to bring its market total to 116. Stations now carrying *Knight* are being offered *Three Apartments* (BROADCASTING, Oct. 20) as a replacement. Those stations, however, have not yet committed to the new show. *The Ted Knight Show* was sold on a cash-plus-barter basis with Taffner holding back three 30-second spots. Among stations that committed to *The Ted Knight Show* prior to Knight's death were KEYT(TV) Santa Barbara, Calif.; wcay-tv Nashville; KRRT(TV) San Antonio Tex.; wmkw-tv Memphis; wtvz(Tv) Norfolk, Va., and wnol-tv New Orleans.

Tribune Entertainment reports that it has cleared *The Hollywood Christmas Parade* in 122 markets covering 78% of the country. The parade takes place in Hollywood on Nov. 30, and will be shown in two-hour form, produced by Tribune's KTLA(TV) Los Angeles, during a Dec. 1-28 window. Lee Meriwether and Bob Eubanks will host. The events will be sold on a barter basis, with 12 minutes for stations and 12 minutes for Tribune. Along with the Tribune stations, the parade will be carried by KTVU(TV) San Francisco, WLVI-TV Boston, WKBD-TV

Detroit, wpLG(TV) Miami and wTOG(TV) St. Petersburg, Fla.

ITC Entertainment reports that it has cleared its movie package, "Volume Six," consisting of 16 pictures, in 38 markets, including eight of the top 10. Among the stations are KHU-TV Los Angeles, WLS-TV Chicago, WPVI-TV Philadelphia, WBZ-TV Boston and WXYZ-TV Detroit. Volume Six includes such titles as "Amos," starring Kirk Douglas; "Malice in Wonderland," starring Elizabeth Taylor, and "Not My Kids," starring George Segal and Stockard Channing. ITC also recently acquired from the Vista Organization "At Mother's Request," a four-hour mini-series to be telecast by CBS this year.

Baruch Television Group, a new Washington-based distribution company formed by Ed Baruch, former director of marketing and sales at now defunct DCA Teleproductions ("Closed Circuit," Oct. 6), reports clearing its first offering, *Stephen King's World of Horror*, on 154 stations covering over 86% of the country. The one-hour special, produced by Simmons/Oganesoff, investigates the works of terror/suspense author King, such as "Carrie," "The Shining," "Firestarter," "Cujo," "Night Shift" and others. Sales of the program for a Oct. 10-30 window, are on a barter basis with six minutes for Baruch and six minutes for stations. Baruch sold the show to wnbc-tv New York, KNBC(TV) Los Angeles, WMAO-TV Chicago, wbz-tv Boston, wxyz-tv Detroit and wbc-tv Washington.

GGP Sports reports that it has signed 112 of the 147 stations that carried seven World Cup Skiing specials to carry them again during a December 1986 through March 1987 window. In addition to the seven races, stations also get the U.S. Open from Copper Mountain, Colo., and the John Denver Celebrity Ski Classic from Heavenly Valley, Calif. In each of the one-hour specials, stations get six-and-a-half minutes, and GGP keeps five-and-a-half minutes. Among stations that will carry the races are wabc-tv New York, KABC-TV Los Angeles, wcvb-tv Boston, KRON-tv San Francisco and wxuz-tv Detroit. GGP President Bob Horowitz said that 88 of the stations buying the races are ABC and NBC affiliates who will tie in sales of time in the specials with their sales of the Olympics in 1988.

WesternWorld-Samuel Communications Inc. in Los Angeles has acquired the worldwide television and home video rights to "Into the Darkness," a new 90-minute made-for-television movie starring Donald Pleasence and his daughter, Polly Pleasence. "Into the Darkness" will be sold on a cash basis. Filmed in England and on the Mediterranean island of Malta, the movie focuses on a killer who stalks the world of high-fashion models. "Into the Darkness" is a 1986 Michael Parkinson/Michael Tabona film from T.P. Productions and features the music of Pat Benatar.

Stay 4 Tuned

Chevy Chase will host *The Tonight Show* on Friday, Oct. 31. Among his guests will be songwriter Paul Simon and comedian Jay Leno.

NBA star **Reggie Theus** makes his acting debut as a neighborhood legend who goes on to become a pro basketball player on CBS's last episode of *Better Days*, Wednesday, Oct. 29 (8-8:30 p.m.), only to wind up dead from a cocaine-induced stroke. Reggie Theus played with the Chicago Bulls for six seasons and is now in his third season with the Sacramento, Calif., Kings.

CBS is winding down its two-year, one-minute broadcasts of An American Portrait in a big way. In the final two broadcasts being aired tonight (Monday) and Tuesday (Oct. 28), **President Ronald Reagan** and CBS newsman **Walter Cronkite** will appear in segments lengthened to three minutes each. Tonight, the President will offer an overview of the series and the accomplishments of the people who have been portrayed since the series' start. Tomorrow night, Walter Cronkite will thank the hosts who have introduced the series over the last two years. An American Portrait debuted the week of Sept. 24, 1984. Mike Gargiulo has been the series producer and director for CBS Entertainment.

NBC News has offered Bob Jamieson, anchor of NBC's early morning *News at Sunrise*, the job of anchor of a new daily business show being developed jointly by NBC and the *Wall Street Journal* and scheduled to launch in January. Talk was that if Jamieson accepts, the *Sunrise* slot will be filled by Deborah Norville, currently an anchor at NBC-owned wmao-tv Chicago. NBC would confirm only that Norville is joining NBC News, but refused to confirm or deny that she would fill the *Sunrise* anchor spot.

The New York-based **Jewish Museum's** national Jewish archive of broadcasting will be celebrating the centennial of the birth of David Ben-Gurion, the first prime minister of Israel, with a series of screenings. Among the selections are outtakes of interviews with Ben-Gurion from Edward R. Murrow's *See It Now* program which originally aired March 13, 1956. Screenings will take place on Nov. 2 and Nov. 16, with the *See It Now* outtakes to air on the latter date at 1:30 p.m. The Jewish Museum is located at 1109 Fifth Avenue, New York. For further information: (212) 860-1888.

A professional's guide to the intermedia week (Oct. 27-Nov. 2).

Network TV—ABC: ABC Sunday Night Movie, "Never Say Never Again" (James Bond is after SPECTRE and two nuclear warheads in this 1983 film. Sean Connery stars along with Max von Sydow and Klaus Maria Brandauer), Sunday, 8-11 p.m.

CBS: CBS Tuesday Movie, Manhunt for Claude Dallas (based on the life of "mountain man" Claude Dallas Jr., stars Matt Salinger, Rip Torn and Claude Akins), Tuesday, 9-11 p.m. CBS Sunday Movie, Something in Common (stars Ellen Burstyn, Tuesday Weld and Patrick Cassidy), Sunday, 9-11 p.m.

NBC: NBC Sports, The 1986 Breeder's Cup (four-hour telecast), Saturday, 2-6 p.m.

Radio—CBS: Newsmark "The Enemy Within" (Diane Sawyer interviews First Lady Nancy Reagan about children and drug abuse), Friday, 2:30-3 p.m.

NBC: Cocaine Hunger (90-second NBC Extra reports), Monday-Friday, 30-minute documentary airs Friday.

RKO sues to stop coloring of old films

It says Color Systems Technology contract with Turner infringes on copyright; Turner says they are his movies to do with what he wants

In a legal skirmish over the issue of converting black-and-white films to color, RKO Pictures has filed a copyright infringement suit in U.S. District Court in Los Angeles to prevent Marina Del Rey, Calif.-based Color Systems Technology from computer tinting 10 RKO films produced from 1939 to 1952, including such titles as "The Hunchback of Notre Dame," "Back to Bataan," "Fort Apache" and "Tall in the Saddle."

The suit claims CST, which signed a contract in March with Turner Broadcasting System to colorize 10 RKO films and 90 other black-and-white movies in the MGM/UA film library (BROADCASTING, March 24), violated copyright standards by coloring the films without permission. RKO is asking the court for all profits derived from the color versions and possession of the films.

At a press conference last week in Beverly Hills, Ted Turner lashed out at the RKO suit. "The last time I checked they were my films," he said. CST is "working on my films. [RKO] shouldn't have sold them to me if they didn't want them changed." Turner said he was just trying to make his investment pay off. "They're my movies," he said. "I'll do what I want with them."

Charles Powell, executive vice president of CST, said RKO has sued the wrong comsaid. "We have a 100-film contract. Turner

decides what those 100 films are." The intention of the RKO suit, he said, is not to stop the coloring of the films, but rather to prevent CST from coloring them for Turner.

Since the matter is under litigation, RKO officials would not comment on why the suit was filed against CST or whether it was in response to another suit recently filed by TBS against RKO. Turner, who acquired the television syndication rights to the approximately 700 films in the RKO library from United Artists, sued because RKO claimed its previous purchase agreeement with UA precluded TBS from coloring 10 of those films, said Roger Mayer, president of Turner Entertainment Co.

The colorization issue has also developed on other fronts. The Director's Guild in Los Angles recently filed a 28-page brief with the copyright office of the Library of Congress opposing the coloring process. Library officials had asked interested parties whether copyrights should be granted to convert black-and-white films to color.

However, the opposition from Holly-wood's directors has not hindered Turner, who said he does not think the coloring process "makes that much difference. If the people that don't want to see the movies altered really want to find something to be upset about, [they should worry] about the fact that television stations edit 15 or 20 minutes out of a film so they can put the commercials in," Turner said. "You know, that seems to me a lot greater altercation of a film than taking a black-and-white film and making color out of it."

Turner said he believes "everything is better in color." In response to a question about whether he considered "Casablanca" "a sacred cow," he said: "I would colorize 'Casablanca' just for controversy." For television viewers who do not want to watch old films in color, Turner said "all they have to do is turn the knob" and view the movie in black-and-white. "What I am trying to do... is breathe new life into something old," he said.

"America's most listened to Talk Radio Station is looking for America's premier Newscaster. Must have excellent writing, reporting and production skills. On-air style is authoritative, professional, enthusiastic and conversational

Send tape, resume and a brief description of your qualifications to Bernard Gershon, News Director, WOR Radio, 1440 Broadway, New York, N.Y. 10018."

Disney makes deal with China

Now that China has opened up its doors to the west, a familiarization with western television was only a matter of time. Last week Walt Disney Co.'s Buena Vista Television International reported that on Sunday, Oct. 26, the *Mickey and Donald* cartoon series premiered on the Chinese government's China Central Television Network (CCTV). It has been roughly four decades since Disney films have been shown in China.

Disney plans to expand into motion picture distribution in China, as well as the production of character merchandise, publications and other products. *Mickey and Donald* is a compendium of 104 half-hour classic color cartoons from the 1930's, 40's and 50's have were been dubbed in Mandarin by CCTV for a two-year run. Disney is keeping two minutes of advertising time within the program, plus billboards for advertisers. The show premiered without any advertising in it, since Disney has yet to sign up any international advertisers. Disney said that its television series is expected to have an audience of more than 100 million viewers.

Ron Kayo, senior vice president of motion pictures, said the deal made sense both financially and in gaining an image in the Chinese market. "This is obviously going to help position us for future deals," he said.

Disney hopes its expansion beyond family-oriented fare both for television and theatrical films domestically will eventually fit into China's broadening cultural borders. Kayo mentioned that the first "Rambo" movie was a hit last year in China. "China is kind of an enigma," he said, noting the contradiction that the acceptance of Rambo represents. "It may be that Touchstone films are suited for China," he said. In the short term, however, Disney will stick to things like Wonderful World of Disney and The Disney Sunday Movie.

Disney did not license Mickey and Donald for cash fees because of the Chinese desire to keep currencies from other countries on hand to pay for essentials like machinery. "It's hard to get money from the Chinese for a series," said Kayo. CBS International, which has made deals with the Chinese to distribute programing, has done so on a barter basis.

American Television Communications said operating income before depreciation and amortization grew 16%, to \$53.7 million. Englewood, Colo.-based MSO said recent initial public offering helped it reduce bank debt from \$800 million to \$438 million. ■ Century Communications said that operating income before depreciation jumped 31% to \$10.2 million. But pre-tax income, and net income, of New Canaan, Conn.-based MSO declined, largely due to increased interest, amortization and depreciation expense resulting from recent acquisitions. As of Aug. 31, Century said it had 367,000 basic subscribers. Dun & Bradstreet operating income increased 15% to \$151.6 million. Marketing services revenue was up 16% and company said Nielsen Media Research had "solid revenue gains." In previous first quarter, Fries Entertainment had net income of \$205,000. Company said most recent operating earnings were up 37%, to \$386,000, but that interest costs from debenture offering led to net loss.

Gannett said operating income increased 16%, to \$139 million, and that on pro-forma basis, broadcasting revenue was up 3%. Company said: "The loss of tax credits for capital expenditures in the current year will reduce 1986 earnings gains from earlier expectations and will limit fourth-quarter earnings progress." ■ Jacor had net loss of \$140,600 in previous year's third quarter. Company said in just completed quarter, it had cash flow ("station operating income before depreciation, amortization, corporate expenses, interest expenses and income taxes") of \$2.3 million, up 75%. ■ Jones Intercable had operating income before depreciation and amortization of \$3 million, up 49%. Company attributed reduced income to increased depreciation and interest charges. Revenue increase for LIN primarily reflects consolidation of cellular operations—previously only income contribution was recorded, on "equity" basis. Earlier in year company changed accounting for investment tax credit from deferral to "flow-through" method which benefitted third-quarter net income by \$460,000. ■ Operating income for MCA was up 11%, to \$112.5 million. Largest revenue increase and more than half of filmed entertainment group total came from television operations, which jumped 83% to \$286.3 million. Third quarter saw revenue recognition from domestic syndication of Magnum, P.I.. Profits for filmed entertainment group, and company, were held down by disappointing results of theatrical film operations.
Meredith Corp. had income from operations of \$13.1 million, up 20%. Net earnings from previous second quarter included net gain of \$6.2 million from sale of assets. ■ Operating profit for The New York Times Co. jumped 44% to \$83.3 million. But company said that second-quarter net income was hurt by nonrecurring charge taken after state appeals court ruled against company in cable system litigation. As of June 30, company's cable systems had 134,000 subscribers, up 7% from year before. ■ North American Philips cited "...improved results in cable television operations." ■ Orion Pictures Corp. had net loss of \$5.9 million in previous second quarter. Company cited several theatrical film hits as main cause of improved results. Cash contributions from first-run syndication of Hollywood Squares will begin in next quarter. ■ Operating income for Aaron Spelling Productions jumped 83% in fourth quarter, to \$8.4 million, and 20%, to \$43.6 million, for full year. Company said "...results for fiscal 1986 reflect initial syndication revenues from the first five years of Dynasty as well as all three years of Matt Houston." Company attributed decline in net income for full year to decrease in available investment tax credits. Pre-tax income was up 4%. ■ In previous year's second quarter, TVX Broadcast Group had net income of \$6.1 million, as result of \$10-million gain on sale of Richmond, Va., television station. In most recent quarter company had loss from operations of \$3.5 million. Revenue "at stations owned and operated for both full periods" increased 8.1%. ■ Operating profit for Westinghouse was up 19% to \$211.8 million. Decrease in sales reflected "...sale of Group W Cable in June and the divestiture of other operations."

Advertising & Marketing 5

Hot Springs once again

Recent agency mergers and banning of advertising of legal products among concerns on tap at ANA annual meeting

The Association of National Advertisers is holding its 77th annual meeting this week (Oct. 26-29) at The Homestead in Hot Springs, Va., for an expected 450-plus attendees, including spouses, speakers, guests and staff. The theme of the conference is "The New American Scene—Opportunities for Advertisers." Keynoting the opening general session on Monday morning, Oct. 27, will be a veteran viewer of the American scene via his "On the Road" series, CBS News correspondent Charles Kuralt, who will speak on "Change in America." Kuralt will also supply an introduction and commentary at the conference's second general session on Wednesday morning.

One feature of the advertising scene of particular interest to the buyers of national advertising time and space in attendance, according to ANA vice president, communications. Tony Lunt, is the recent spate of mergers among large advertising agencies and the effect of "megamergers" involving such familiar names as BBDO, Doyle Dane Bernbach, Needham Harper, Ted Bates, Saatchi. Dancer Fitzgerald Sample, Bozell & Jacobs and Kenyon & Eckhardt on clientagency relationships. That concern is reflected in the conference agenda, with three sessions devoted exclusively to it: "The Changing Agency Scene," exploring how mergers have affected the advertising business from the perspective of some mediumsized and smaller agencies; "Mergermania: Preparing for Change in Marketing and Advertising," led by executives from both the agency and client sides, and "Mergermania: Preparing for Changes in Your Career," featuring executive consultant Ronald Walker of Korn/Ferry International, with advice on career management in a changing advertising environment.

Also of major concern to the attendees is the current regulatory climate. A Tuesday afternoon session. "The National and State Regulatory Scenes," sponsored by ANA's government relations committee, will focus on "taxes on advertising, proposals to ban advertising for certain products, requirements of warnings in advertisements and other restrictions on the rights of advertisers to truthfully advertise legal products and services." A breakfast briefing Wednesday, Oct. 29, will feature an ANA staff report on legislative issues affecting advertising. And following the briefing, the second general session will include an address on "Regulatory America" from Federal Trade Commission Chairman Dan Oliver. Speaking on

The Homestead

"Creative America," at the same session will be John Bergin, vice chairman, McCann-Erickson Worldwide, and on "Corporate America," J. Tylee Wilson, chairman and chief executive officer, RJR Nabisco.

Winding up the second general session and the conference will be a special presentation, "Toward a Drug-Free America." Presiding will be Herbert Baum, president of Campbell USA and chairman of the management board of the Media-Advertising Partnership for a Drug-Free America. Major League Baseball Commissioner Peter Ueberroth will review the advertising industry's response to the problem of substance abuse. Following Ueberroth's presentation, agency executives will review the individual efforts of their agencies, and will reveal new cam-

paigns to be conducted by the partnership. New officers and directors of the association will be installed at a members-only meeting Monday afternoon. Members will also vote on a change in the bylaws to increase the number of corporate representatives to ANA from one per company to two by creating an alternative member spot at

each representated company.

Entertainment for the Tuesday night black tie banquet and dance will be provided by The Arbors singing group, whose listed credits include albums, stage and radio, but who will be more easily recognized by attendees as the singing voices behind such commercial jingles as McDonald's "You Deserve a Break Today" and Schlitz's "when you're out of Schlitz, you're out of beer."

World Series home. From Oct. 4 through the end of the 1986 World Series, NBC-TV aired two 30-second spots recalling NBC's coverage of previous World Series and promoting this year's coverage. Dramatizing the network's first coast-to-coast radio coverage of the 1926 series, one spot depicted a young, rural fan greeting his grandfather who is returning home with a new radio; the other spot (above), also touting NBC as "home" of the fall classic, showed a New York couple in 1951 bringing home their first TV set just in time for game one. Both spots, which ran in all dayparts, were the work of Boston ad agency-production company, Spotwise Productions, whose television network, station and show promotion includes *Danahue*, ABC daytime serials, Blair Entertainment game shows and a new network signature for MTV Networks' VH-1. According to Spotwise, production costs for the two spots totaled \$100,000.

Law & Regulation 4

Attorney general outlines Justice action on pornography

Seven-point plan includes possibility of legislation banning obscene cable TV

At a press conference Wednesday, Oct. 22, Attorney General Edwin Meese unveiled a seven-point plan to "curb the growth of child pornography and obscenity," acting upon recommendations in the report of the Attorney General's Commission on Pornography released July 9 (BROADCASTING, July 14).

The Justice Department's target, according to Meese, was not materials that are "offensive to some but nonetheless have been recognized by the courts as within the bounds of protected speech," but rather "child pornography, sado-masochistic scenes, rape scenes, depictions of bestiality or excretory functions and violent and degrading images of explicit sexual conduct and other similar hard core materials." None of which, Meese said, is entitled to First Amendment protection. The "criminal elements trafficking in obscenity" Meese said, would be "pursued with a vengeance and prosecuted to the hilt." In answer to a reporter's question, Meese also seemed to supported the commission's controversial stance on the relationship of pornography to crime. He said there was "ample evidence of the relationship between those who commit violent acts and obscene materials.

The primary thrust of the plan appeared to be stepped-up prosecution by federal, state and local officials of existing legislative and judicial obscenity prohibitions, aided by the "creation of a center for obscenity prosecution [described as a 'multidisciplinary resource center'] within the criminal division" of the Justice Department, and "the creation of a task force of attorneys, also within the criminal division, which will work closely with the obscenity prosecution center."

Point five or six of the plan (the order in the Justice Department release differed from that outlined by the attorney general), however, called for a "legislative package to be introduced in the next Congress," part of which would be "legislation to proscribe obscene cable television."

In response to a question on the cable legislation, Meese said it was "something we will be exploring based upon the recommendations of the commission and something we will be exploring with the Federal Communications Commission and their experts as well as with people in the affected industries. We would not want to do this without getting pretty good information from people who are in the various industries—the television and cable television industries. I think this is an area in which we have to be very careful to assure that anything that would be involved in the legislation clearly fits within the Supreme Court's definition of obscenity."

The attorney general was not sure, however, what specific legislation would be offered, nor even if any would be necessary. Meese referred on several occasions to the Supreme Court, particularly the 1973 Miller v. California decision, as the guide to determining obscenity. In response to a question on what additional legislation was called for. considering that cable programing could currently be subjected to the Miller test, Meese said: "I don't know whether there will be any, except that the [pornography] commission has recommended legislation. We will be looking to see what additional legislative prohibitions may be necessary. I think that based on the commission's report there are certain things in the law that probably do need enhancing or correcting." He did not elaborate on what those might be, but the wording of the cable reference in the legislative package suggested it might be addressing specifically the pornography commission's recommendation to "amend Title 18 of the United States code [which makes obscene broadcasting illegal] to specifically proscribe obscene cable television programing.

Also part of the package to be put before the Congress was legislation, apparently aimed chiefly at so-called dial-a-porn services, "prohibiting the transmission of obscene material through the telephone or similar means of transmission." Again, Meese would not speak to specific legislation, which he said would be the task of communications experts in conjunction with Justice Department lawyers, but he said that the goal was to "frame legislation which does not provide a loophole for things that are clearly obscene within the definition of the courts merely because they are transmitted over telephone wires rather than being depicted in some other form."

Other points in the program or

Other points in the program are:

"An enhanced effort by each U.S. attorney's office, with concentration on international trafficking in child pornography and interstate trafficking in child pornography."

■ An enhanced effort by the Organized Crime and Racketeering Strike Forces, in coordination with the new task force, with emphasis on organized criminal enterprises involved in obscenity production and distri-

bution.

■ Coordination with the National Center on Missing and Exploited Children to eliminate the use and exploitation of children in the production of child pornography.

Assistance, in the forms of training and sharing of information, to state and local law enforcement agencies engaged in obscenity

prosecutions.

Brad Curl, national director of Morality in Media, whose list of officers includes antiporn activist Donald Wildmon, said that organization was generally pleased with the Meese plan. "We're very encouraged that there seems to be a comprehensive, intelligent and serious plan here to actually see that the obscenity laws on the national, state and local levels, will be enforced." While Meese spoke only about obscenity in his discussion of the legislative package, MIM general counsel Paul McGeady, felt that "the legislation to be carved out is the question of indency." There is "no logical reason in the world" he said, why the indency standard to which commercial television is now held "could not be applied to cable TV."

Barry Lynn, legislative counsel for the American Civil Liberties Union, took a different view, calling the Meese plan a "declaration of war against the wrong enemy. The package won't make anyone safer from sexual assault, but it could erode values like privacy and free press. It works by intimidation. When you announce the creation of a task force and a center for prosecution, you frighten people out of producing material that might not be obscene in a court of law.' Lynn said he was aware of almost nowhere where "anything remotely obscene is on a cable system." And the Meese plan suggested for him the scene of "FBI agents sitting around monitoring pay services.

Lynn said that the plan appeared to be predicated on the assumption that state and local law enforcement agencies were not prosecuting more obscenity cases because they do not know quite how to go about it. Lynn disagreed. "Most people don't bring porn cases because it's low priority. Pornographers don't steal TV sets. Most people want their TV sets back before they want to prosecute the pornographer operating in a little store in the seediest part of town."

Look again. The National Association of Broadcasters asked the Federal Election Commission last week to reconsider its ruling that a North Carolina station's offer of free air time to a congressional candidate would violate federal campaign law, in a letter to FEC comissioners, the NAB argued that donations of advertising time to federal candidates on a nonpartisan basis should not be viewed as an in-kind contribution and do not violate FEC law. The commission ruled that wags to Greensboro, N.C.'s proposal to offer free time for 30-second spots to Representative Howard Coble's (R-N.C.) campaign committee constituted a corporate contribution and that the FEC's prohibition against corporate contributions applies to media corporations as well.

Businessa

Taft, Bass and company buy Wometco Cable

\$625-million purchase nearly liquidates KKR's Wometco holdings

Wometco Cable TV Inc. signed an agreement last week to sell its cable systems to a joint venture of Taft Broadcasting Co., Robert M. Bass Group Inc. (RMBG) and members of Wometco's management for \$625 million. Wometco is owned by institutional investors headed by general partners, Kohlberg Kravis Roberts & Co. The Wometco systems serve 370,000 subscribers in eight, primarily Southern, states.

The price works out to about \$1,795 per subscriber, reflecting an upturn in the market value of cable systems, which had been selling for \$1,000-1,500 per subscriber in recent months. The increase in system prices has been attributed to increased cash flow stemming from falling interest rates, the completion of system construction and capital expenditures, and deregulation of subscriber rates.

Wometco Cable TV President John M. Lewis said he didn't feel the price was unreasonable. "When you consider the multiple of cash flow, the price was not too high," said Lewis. Industry analysts had estimated the cash flow of the systems at about \$60 million, which would mean a multiple of about 10. The general consensus among cable brokers was that the price was fair.

The purchase marks the latest chapter in the restructuring of Taft that began with Taft's purchase of Gulf Broadcasting for \$770 million in 1984. A little over a year ago, RMBG, owned by Robert M. Bass of the Bass family of Fort Worth, first filed with the Securities and Exchange Commission showing an 8% ownership in Taft and has since increased its stake to about 21%. RMBG holds four seats on Taft's board.

Taft has reportedly been trying to find a buyer for its five independent TV stations and is said to have seen their market value plummet from an originally-hoped-for \$500 million to \$300 million or less. The sale has been explained as one way Taft hopes to reduce its heavy debt service from the purchase of Gulf stations (said to total \$70 million this year) and because Taft's independent stations have not been doing well. In the first quarter ending June 30, sales at the company's independents had dropped 5% (BROADCASTING, Aug. 25).

Taft is already a partner with Tele-Communications Inc. in a cable group with more than 170,000 subscribers. In addition to its five independents, Taft owns seven network affiliates (which had an increase in sales of 25% last quarter), an entertainment production division, a distribution division and two cable television divisions.

The sale works out well for KKR, which avoided a larger tax next year by closing the deal this year. KKR bought Wometco for

about \$1 billion in 1984 and has since sold Wometco's WWHT(TV) Newark, N.J., and WSNL-TV Smithtown, N.Y., to Home Shopping Network ("Changing Hands," Aug. 11), for \$25 million; WZZM-TV Grand Rapids, Mich. to Queen City Broadcasting for \$65 million, and KVOS-TV Bellingham, Wash., to Ackerly Communications for \$25 million. Wometco's vending, bottling and movie theater operations were sold for about \$1 billion. KKR's sale of Wometco's WTVJ(TV) Miami for \$405 million to Lorimar-Telepictures has fallen through (see box, page 46). KKR still owns Wometco's WLOS(TV) Asheville, N.C.

As for the management group that will also be involved in the new company, Lewis declined to say who will be offered an oppor-

tunity to buy stock. "We don't know definitely who the management group will be." Lewis said, however, that he would be likely to hold "the same role in the future."

The cable systems sold are in Alabama, Georgia, Lousiana, Mississippi, North and South Carolina, West Virginia and Oklahoma. Most are mature suburban systems that are complete or near completion, although Lewis said there would still be some expansion because of their location in high growth markets. The only complication from the sale comes from Taft's current ownership of WGHP-TV High Point, N.C., where Wometco owns a cable system. A Taft spokesman declined to say whether the company intended to sell the cable system or the television station.

New LBO OK'd by Viacom board

Management changes initial offer; new proposal would keep company public; closing targeted for January

A revised management proposal to buy Viacom was accepted by that company's board of directors. In addition to adjustments in the payment terms, the new offer will keep Viacom a publicly traded company. Furthermore, management has apparently extended its timetable for selling the company and now expects to close in mid-to-late January. A closing beyond 1986 would end certain tax advantages that might have encouraged a sale of Viacom's broadcasting properties, thus making that divestiture less certain now.

The revised offer accepted by Viacom's board on Oct. 17 would pay \$37 cash and \$7 in exchangeable preferred stock for each of the company's 53.4 million shares outstanding. Additionally, shareholders would be given, presumably on a pro rata basis, shares of preferred stock convertible into common stock owning 20% of the company. The other 80% ownership would be split among the initially proposed owners, consisting of eight Viacom executives, three investment banks and the Equitable Life Insurance Co.

Ronald Lightstone, senior vice president, told BROADCASTING that he would still term the proposed transaction a leveraged buyout: "Equitable still is going to take a major share

of it, as opposed to a recapitalization where the same shareholders are in the same place." Lightstone said that all three issues of stock in the new company would be traded on some exchange and that the "mix and the makeup" of the bank and other financing would remain essentially the same. The senior vice president said the financing, and the deal itself, are no longer contingent on a year-end closing: "If there is a tax risk we will take it."

Among the risks of a 1987 closing is that taxes on the proceeds of a broadcasting spin-off would be considerably greater. The possibility of the spinoff was mentioned in the management group's initial filing with the Securities and Exchange Commission (BROADCASTING, Oct. 6).

There was still no certainty that the buyout proposal would be concluded. Raising at least a whisper of doubt was an SEC filing last week by Viacom's largest shareholder, General Amusements Inc., whose chairman, Sumner Redstone, said he had met with a Viacom director and suggested that the company remain public. Whether the 20% share currently contemplated satisfies General Amusements remains to be seen. The filing also indicated that General Amusements might consider making a counteroffer for Viacom, either by itself or in partnership with others.

Signed up. Wnyc-Tv New York, a noncommercial station with a commercial license that allows it to lease nonprime time to commercial broadcasters, has signed up two more services—The Shopping Line and International Television Network—for a three-month experiment. The Shopping Line will begin Nov. 1, and will air Tuesdays from midnight to 1:30 a.m. and from 11 p.m. to 1:30 a.m. all other nights. The station hopes to receive \$2,000 per hour from Shopping Line under an arrangement by which it will receive 10% of the service's gross sales from New York broadcasts. International Television Network will program movies, series, documentaries and specials from several Asian and European countries, Monday through Friday from 10 a.m. to noon.

SMPTE to open at new digs in New York

New venue, Jacob Javits center, to host industry's annual technical conference: 271 exhibitors expected to attend

The Society of Motion Picture and Television Engineers' technical conference and equipment exhibit were set to open in New York on a high note last Saturday, Oct. 25, with the annual gathering ready for a record 17.000 attendees. A total of 271 exhibitors, also a record, will be on hand for SMPTE's ever-growing equipment exposition, this year at New York's new Jacob Javits Convention Center.

Also on the agenda are 16 half-day engineering sessions with 113 technical papers on TV and film topics, covering advances in electronic post-production, new camera systems and computer applications in TV, and loosely organized around the show's theme, "Today's Technology—Tomorrow's Reality." More than 100 organizations and technical experts from nine countries are expected to participate in the technical program, scheduled between Sunday, Oct. 26, and Wednesday, Oct. 29.

The annual event normally alternates between New York and Los Angeles, and this year marks the first time it will return to be held in a New York convention center. Attendees in 1984 shuttled between crowded venues at New York's Hilton and Sheraton Centre hotels. By contrast, the Javits Center, on the city's west side, is a 22-acre facility making 230,000 square feet of exhibit space available for the society's exhibit. The center, 60% larger than the Los Angeles convention center used at the 1985 SMPTE show, should easily allow for expected growth in attendance over last year's record 15,600.

The conference program will open Saturday morning with a welcome from Harold Eady, society president, followed by an engineering report from Richard Streeter, engineering vice president at CBS. Mark Sanders, Ampex vice president of marketing and new technology, will give a keynote speech to conclude the session. According to Ampex, Sanders, formerly head of the company's Audio-Video Systems Division, will discuss trends of technological change, trace the history of magnetic recording, explain Ampex product development and close with a presentation on new developments in recording technology.

The papers program begins Sunday morning with sessions on computer applications for television, including talks on computerized camera operations and automated operation controller for broadcast, and a session on film and video laboratory practices, which includes one of the show's several papers on advances in electronic editing.

Afternoon sessions are highlighted by speakers Ray Dolby of Dolby Laboratories and Charles Ginsburg of Ampex, who will discuss the development of the videotape recorder and the technology's impact over the

past three decades.

Post-production concerns are well-addressed during the conference, with two sessions devoted exclusively to the topic. The first session on Sunday afternoon features three talks on video compositing for film and television. A second post-production session on Monday afternoon includes a pair of talks on videographics systems and, from CBS's Rupert Stow and William Nicholls, a paper on the technology and "dynamics" of prime time program production.

Another topic drawing attention of session goers is expected to be applications of digital technologies in television, with Monday and Tuesday afternoon sessions including papers on the BBC's digital high-definition bandwidth reduction techniques, on the implementation of new digital video 4:2:2 tape recorders by Sony, and, from Richard Taylor of Quantel, developments in digital production centers. Digital effects technologies will also to be addressed at the Tuesday session by representatives of Grass Valley Group and Thomson Video Equipment.

Production techniques, including lighting and electronic cinematography, are covered in sessions on Tuesday morning and Wednesday afternoon, with Wednesday papers also including discussions of component analog technologies from NBC, For-A Corp. and British broadcaster Granada TV. A Monday morning session also includes a panel discussion on electronic editing with representatives from several edit system manufacturers.

Camera systems receive attention at a Wednesday morning session, with papers on new developments from Hitachi and Thomson Video, and a focus on CCD technologies in talks by NEC, Eastman Kodak and Sony. Concurrently on Wednesday morning is an audio session with a concentration on trends in audio-for-video and stereo TV technologies. A panel on the topic will feature representatives from a half-dozen audio manufacturers and close out the morning discussion.

A session on enhanced TV sessions draws

CBS Technology Center shutdown lamented. Thomas Stanley, FCC chief engineer, was "saddened" by the closing of the CBS Technology Center. That's what he told the Association of Federal Communications Consulting Engineers in Washington Oct. 16. "We rely heavily on the technical community to provide information that will help us to better understand the technical issues," Stanley said. "The commission does not generally have the resources to perform independent, in-depth technical analyses on most issues, particularly in these times of tight budgets. We look to you, the technical community, to help us do a better job by providing us with high-quality information. The quality of our technical decisions depends, in part, on your inputs."

the papers program to a close on Wednesday afternoon. Talks cover proposals for HDTV transmission and production, with speakers from French research laboratories, Japan's NHK and New York Institute of Technology.

Other sessions cover audio-video trends, video laboratory practices, archival film and video, and theatrical enhancements.

The SMPTE exhibit floor, which is increasingly the main attraction for the majority of attendees, this year will include several new product developments in the video field.

Sharp Electronics is planning to show a new broadcast camera in Saticon and Plumbicon tube version to replace its XC-800 line. Artronics will show a new video paint library and a new video graphics system with 3-D animation. Microtime will have a new digital effects system. Also showing graphics advances will be NEC, with new special effects packages and software upgrades for its DVE System 10, and Bosch, which has a new variable resolution output up to 4,000 lines for its FGS-4000 graphics system.

Two new laser disk-based editing systems will be shown by CMX and Paltex, and A.F. Associates will show a new standards converter added to its distributor line, the AVS ADAC, first shown to broadcasters at the International Broadcasting Convention in Brighton, England, in September (BROAD-

CASTING, Sept. 29).

Tektronix will show a new model 1705 spectrum monitor for use in satellite newsgathering, and new lighting equipment for video field production will be introduced by LTM, and for the studio by ARRI. Also of interest among electronic cinematography products may be a new Panavision 35 mm camera, which incorporates electronic production aids including time-code and video assist.

Exhibit hours will be 2:30 to 8:30 p.m. Saturday, 9 a.m. to 7 p.m. Sunday, 9 to 5 p.m. Monday, and 9 to 4 p.m. Tuesday.

At the conference, SMPTE will also present a series of honors to members during a luncheon on Saturday, Oct. 25. Keynote speaker for the lunch will be George H. Brown, former RCA Corp. research and engineering head, best known for his work on color television systems. Brown received the National Association of Broadcasters' highest engineering award, the Engineering Achievement Award, at last April's convention.

SMPTE awards will go to 14 at this year's show. This year's highest honor, the Progress Medal Award, will go to Masahiko Morizono, deputy president and director of Sony Corp. in Japan. Morizono was cited for his contributions in the development of electronic newsgathering, Type C recording,

electronic editing, portable cameras and digital videotape recording.

In addition, the society's annual banquet will be held Monday evening, Oct. 27, at the New York Hilton. The following is a list of exhibitors at the SMPTE convention.

SMPTE exhibitors

Abekas Video Systems 456 353A Vintage Park Dr., Foster City, Calif. 94404

RAB strives for self-improvement

The Radio Advertising Bureau will strive for a better response in 1987 to the trend of agency regionalization for national spot buys. That was just one of the sales "initiatives" adopted by the RAB board during its annual meeting last week (Oct. 20-22) at the Ritz Carlton hotel in Laguna Niguel, Calif.

The board also directed the RAB staff to create a new sales advisory committee composed of "working" station sales managers who will guide the association in calling on key accounts and using sales materials. The committee, which will be composed of about 20 sales executives from stations in about 20 sales executives from stations in operational by Jan. 1. It will primarily concentrate on local and regional spot sales development and will meet twice yearly.

In other actions, the board directed RAB to focus its resources on seven key advertising sources: automotive, which includes manufacturers as well as dealer and distributor groups; fast food franchises; retail chains; supermarket and drug stores; air-

lines; computers, and movies—the last incorporating both national distributors and local theater chains.

Three new officers were elected at the annual meeting: Dick Verne, group vice president/radio for LIN Broadcasting and an executive committee member, becomes finance chairman; Carl Wagner, executive vice president of radio for Taft Broadcasting. who was board finance chairman, is now vice chairman, and James Arcara, president of Capital Cities/ABC Radio, who was vice chairman, is chairman. The appointments are effective Jan. 1 and will run for two years. Arcara replaces Dick Harris, president of Group W Radio, who will remain on the executive committee. Harris was not in attendance at last week's meeting. (Westinghouse is believed to be in the final stages of negotiations with General Electric, new owner of NBC, over a plan to merge Group W's 13 radio stations with NBC's eight radio properties and three radio networks ["Top of the Week," Oct. 20.])

Still another

Another satellite-delivered commercial radio service will soon enter the marketplace. Designed for small- and medium-market stations, the service, known as North America One, primarily features a combination of country music and talk programing—19 hours of live personalities (5 a.m. to midnight, central time) and five hours of overnight taped country programing, seven

days a week. (All of the country music for North America One is supplied by Country USA, La Crescent, Minn.)

The new service is being marketed by its parent firm, Kayla Satellite Broadcasting Network Inc. (KSBN), Richmond, Wis. North America One is schedule to debut on WTMB(AM) Tomah, Wis., in November.

According to Harry Thibedeau, air personality and marketing coordinator for North America One, the cost for subscribing to the new service has been set at \$500 per month. The company is also offering the downlink equipment for \$1,200. The initial goal, said Thibedeau, is to establish a network of 50 stations. Thibedeau also said North America One will carry the weekly Grand Ole Opry broadcasts from Nashville and will soon affiliate with a national network for news.

At the outset, North America One's live programing will run from six minutes past the hour to 58 minutes past the hour. The remaining eight minutes is given back to the station for local programing. Each hour will contain six minutes of commercial breaks—two minutes will belong to North America One and national sponsors and four minutes will be for local spots.

North America One is transmitted over Telstar 303, transponder 18.

Going right to the top

KANW(FM), a noncommercial educational station licensed to the Board of Education in Albuquerque, N.M., is hoping to air an oral

New Class A Winner

Continental's Type 814B 4.3 kW FM Transmitter uses the Type 802A Exciter to deliver a crisp. clean signal.

With an output of 4,300 watts, it has plenty of power reserve for Class A operation on a 2-bay antenna system. It's solid-state except for one 4CX3500A Tetrode in the final amplifier. A built-in harmonic filter is just one of many outstanding operating benefits. For a brochure, call (214) 381-7161. Continental Electronics, a Division of Varian Assoc., Inc. PO Box 270879 Dallas, Texas 75227.

Spanish talk. Call For Action Inc., the national information, referral and action service for consumers that operates as a nonprofit affiliate of radio and television stations in 24 markets, launched its first Spanish-language service last Wednesday (Oct. 22) over KTNO(W) Los Angeles. The station will serve as a "model" for the development of a bilingual network by the New York-based Call For Action organization, according to a spokeswoman for the service. Discussing the new Call For Action arrangement at KTNO are (I-r): Carol Kiplinger, president, Call For Action Inc.; Irene Gomez Caro, director of the Call For Action Spanish-language project, and Andrian Lopez, program director, KTNO.

arguments in the United States Supreme Court, which so far has banned radio, television and still camera coverage. In a letter to Chief Justice William Rehnquist, Lillian C. Barna, superintendent of the Albuquerque public schools, said that, due to the U.S. Constitution's bicentennial celebration next year, the public schools in Albuquerque will place an "added emphasis" on the study of the Constitution in its curriculum. "This is an appropriate time for students and the general public to observe the judicial system in operation at its highest level under the Constitution," Barna said. "All that is necessary in order to put our proposal into effect is our connection [for KANW] to an audio feed of your taping system. This can be accomplished in a simple, unobtrusive manner, she said. As of late last week, KANW had not yet received a response from Rehnquist.

SCA census

The market for FM subcarriers (SCA's) of major-market radio stations has been somewhat inactive over the past year, according to the most recent analysis of subcarrier usage conducted annually by Waters Information Services, Binghamton, N.Y.

The Waters "FM-SCA Census" examined FM subcarrier use in the top 30 markets from September 1985 through September 1986. It shows that usage of FM SCA channels in those markets grew by a mere 4%-352 to 366. The most dramatic increase was in voice applications such as radio reading services, ethnic programs and religious networks, which climbed from 69 to 80 subcarriers. Data transmission remains the leading SCA application, but the number of subcarriers being used for that purpose dipped from 97 to 92. Other results from the Waters analysis show the number of FM outlets utilizing more than one SCA nearly tripling, from 25 to 72.

Calculating company

Arbitron Ratings has entered into an agreement with Media Management Plus Inc., Edwardsville, Ill., to market that company's pre- and post-buy analysis software package of radio and television Arbitron data, called The Broadcast Negotiator, to advertisers and agencies. According to an Arbitron spokesman, the post-buy analysis package is being modified to include new features for interpreting Arbitron data.

This software package represents only one part of the overall Media Management Plus computerized advertising system which enables an advertiser and/or agency to perform a number of interrelated functions for managing media ad schedules. (Media Management Plus also utilizes Birch data for radio and Nielsen ratings for television.)

Programing overview

The National Association of Broadcasters is planning to continue the "national radio programing survey," which was started four years ago by the National Radio Broadcasters Association. The survey will cover,

September spot story

The national spot radio business continued its recent climb with September expenditures posting a 6.1% increase over September 1985 (adjusted for variance in the number of standard broadcast billing weeks in September 1985 versus September 1986) to \$78,513,800. That's according to Radio Expenditure Reports, Larchmont, N.Y., which collects financial information each month from representation companies. Unadjusted, billings for September registered a 15.1% drop.

among other things, local stations' use of news, sports, syndicated and network programing. Questionnaries are expected to be mailed in early December. NAB said it will publish the results next spring, making them available to member stations at no charge.

Birch buy

BDA/BBDO, Atlanta, will use Birch Radio as the primary radio ratings service for all of its clients including Delta Airlines, Birch executives announced last week. The agency will be working together with Birch in expanding the ratings service's qualitative reports to find "new applications" in evaluating radio buys.

Looking back

AP Network News is offering its affiliates a new, 30-second nostalgia feature, Flashback. According to AP, the daily series will provide "date-specific recollections featuring sound from past events and television shows, movies, and popular music that made the news that day." Flashback, which is scheduled to debut today (Oct. 27), will be both bulk-fed each Friday afternoon for the following week and fed each day at 6:32 a.m. and 10:32 a.m. NYT.

Oldies offering

The Programing Consultants (formerly TM Programing), Albuquerque, N.M., is readying a new rock oldies format for a November debut. The tape-distributed format, which has been dubbed "Rockin' Oldies," will be consulted by radio programer Dick Bartley. (Bartley is currently host of United Stations Radio Networks' Solid Gold Saturday Night and Solid Gold Scrapbook.)

Thankful Beatles

Westwood One will air a three-hour music/interview special over Thanksgiving weekend (Nov. 27-30), entitled *The Beatles: Twist & Shout*. The show will include interviews with all four Beatles as well as a tape of the Beatles' first radio interview, which was recorded on Oct. 27, 1962. It will be hosted by Westwood London correspondent Roger Scott.

"Thinking Outside The Box."

Finding the solutions to your programming problems... solutions that have eluded others.

For twenty years you have known us as TM Programming, the leaders in innovative, quality programming. Now we have a new name: The Programming Consultants. But our philosophy remains unchanged: To solve your programming problems with innovative, creative and effective ideas.

We bring strength and diversity to the table. Although we are part of a large corporation which owns radio stations, cable, research and other broadcast

Au

service companies, The Programming Consultants is a tight knit group of consultants working one-on-one with our clients, in a relationship where immediacy and responsiveness are paramount.

We are more than just a box of tape or a satellite feed. We are people committed to your success...A Powerful Partner.

Senate confirms two for CPB board

But former chairman Landau's nomination is traded for approval of Towery, Brenner

In the last hours of the 99th Congress on Oct. 18, the Senate confirmed two nominees to the board of the Corporation for Public Broadcasting and let lapse the nominations of two other candidates. Confirmed were former CPB vice chairman, Kenneth Towery, who served on the board from November 1981 to March 1986, and Daniel Brenner, former senior adviser to FCC Chairman Mark Fowler and now a communications law professor at UCLA. Passed over were former CPB Chairman Sonia Landau and Nancy Reagan's former press secretary, Sheila Burke Tate. Both women will have to be renominated by President Reagan next year if their permanent appointments are to be pursued.

According to a Senate source, Democrats refused to support Towery and Brenner unless Landau was held back. They also had "serious problems" with Landau's role in board business that occurred after her term had ended, including the search for a new

general counsel, preparation of CPB appropriations testimony and attendance at the June board meeting in St. Paul. Landau also lacked Republican support in Congress, according to one source.

Last week, Landau defended her postterm involvement. She pointed out that the search committee had been formed in May 1985 to find both a president and a general counsel, and its business was only weeks from conclusion when her term ran out. She attended only one more meeting, she said. and Harry O'Connor, whose term had expired at the same time, had also been invited to attend. Similarly, the meeting on appropriations was held in April, also soon after her term expired, Landau said, and in the past, Congress had been approached on the subject of appropriations by the CPB chairman, president and senior financial officer. "No one was really sure what we should do," she said. Landau said she attended the preliminary meeting with the expectation that it would be an informal one with the CPB president and financial officer, but that when she discovered the meeting was to be conducted before an audience and several members questioned the appropriateness of her attendance, she left. Finally, Landau said she attended the June board meeting—at her own expense—because it was a special joint meeting with the board of American Public Radio that she had been "instrumental" in setting up, because CPB board meetings are open to the public, and because she had been nominated for another term on the board.

Landau's and Towery's terms expired last March, along with those of three other board members, leaving the CPB board with only five of its 10 positions filled. Confirmation hearings for Landau and Towery were held in September (BROADCASTING, Sept. 22), but Senate approval was held up by the Democratics until President Reagan submitted the name of a Democrat for a third open seat on the board. Democrat Brenner was nominated at the end of September, and Republican Tate followed soon afterward ("In Brief," Sept. 29 and Oct. 6).

There were charges of politicization of the CPB board under Landau's leadership. In September 1984. Landau beat Democrat Sharon Rockefeller, wife of Senator Jay Rockefeller (D-W. Va.), in an election for the chairmanship (BROADCASTING, Sept. 24). In May 1985, the organization's president, Edward Pfister, resigned after six members of the board, led by Landau, voted to cancel CPB's involvement in a public television trip to the Soviet Union (BROADCAST-ING. May 20, 1985). In September 1985, Landau was re-elected by default after three successive secret ballots were split 5-5 between her and former board member O'Connor (BROADCASTING, Sept. 16, 1985). At her confirmation hearing last September, Landau denied charges that the board had become politicized. But the September CPB board meeting, to be held two days after that hearing, was boycotted by three Landau supporters who felt business should be conducted with more than five members present, and so the remaining two members, not Landau supporters, also did not attend

Landau said she felt it was "unfortunate" that her nomination had not been pushed through with the others, but she said she was not surprised. Asked whether she would accept a recess appointment, she said: "I'm just not even really thinking about any of CPB anymore." Rumblings over Brenner's FBI background check, required of all nominees, earlier had seemed to cast a shadow over his chances for confirmation (BROAD-CASTING, Oct. 13), but apparently the senators were convinced in the end that Brenner had not played a role in a pending FCC case involving the sale of KROQ-FM Los Angeles. Tate's nomination was believed to have come too late in the congressional session for her appointment to be moved through.

CPB directors had similar reactions to the

confirmations. CPB President Martin Rubenstein, who has worked with a five-member board for most of his term (he was selected Jan. 31), said he was "delighted" that Towery and Brenner had been confirmed. Landau supporters Richard Brookhiser, a senior editor for the National Review, and Howard Gutin, KLRU-TV Austin, Tex., said they hadn't thought about who they would support for chairman if Landau were not a candidate. (The board was slated to elect a new chairman and vice chairman at its September meeting, and will presumably do so at its next meeting, Nov. 13 and 14.) Brookhiser said he hoped President Reagan would seat Landau on the board as a recess appointee. Both members said they were happy Towery and Brenner had been confirmed. "I've been very uncomfortable with only five of us-seven will be much better, although I'd prefer 10," Gutin said. WOED(TV)'s Lloyd Kaiser, not considered a Landau supporter, also said he was "pleased that we will have more of a full complement on the board." As for whom he would support as chairman, he said: "I haven't given that any thought."

Several factors will have bearing on the choice of a new chairman. Rockefeller's term expires in March 1987, and she will not be eligible for reappointment. The terms of Lee Hanley and Richard Brookhiser also expire in March 1987, although both could be renominated. Brookhiser, who has served as temporary chairman since March, has said repeatedly he is not interested in the permanent chairmanship. Towery, who served as vice chairman from September 1984 to

March 1986, will serve until March 1991, as will Brenner, and is a possible candidate. Gutin's term expires in March 1989, and although his job as director of national development of KLRU-TV was phased out at the end of September under the reorganization of that station and co-owned KLRN(TV) San Antonio, Tex., that will have no bearing on his service on the board. Kaiser's term also expires in March 1989, and he said he had not given thought to vying for the chairman's spot.

On other issues, public broadcasting was the focus of attention in the House as last-

minute bills were offered by Republicans Michael Oxley, of Ohio, and Don Ritter, of Pennsylvania. Oxley's bill would allow limited advertising on public television on a voluntary basis, with a four-year sunset. Rit-ter's would require CPB to "perform on go-ing, systematic content analyses of documentaries produced with funds provided by such corporation." (The issue of content analysis was raised earlier by Ritter in a "Dear Colleague" letter to House members [BROADCASTING, July 28].) The legislation will have to be reintroduced in when the 100th Congress convenes in January 1987. □

KRQX(AM)-KZEW(FM) Dallas - Sold by A.H. Belo Corp. to Anchor Media Ltd. for \$20 million. Seller is publicly owned, Dallasbased group of two AM's, two FM's and five TV's headed by James M. Moroney, chairman. It publishes Dallas Morning News and seven community newspapers in the Dallas-Fort Worth area. Buyer is newly formed corporation headed by former Gulf Broadcast Group president, Alan Henry. KRQX is on 570 khz full time with 5 kw. KZEW is 97.9 mhz with 100 kw and antenna 1,680 feet above average terrain.

KLEW-TV Lewiston, Idaho, and KIMA-TV Yakima and KEPR-TV Pasco, both Washington -Sold by NWG Broadcasting Corp. to Retlaw Enterprises Inc. for \$17 million. Seller is

owned by brothers, John and Roger Noel. It has no other broadcast interests. Buyer is Fresno, Calif.-based group of two TV's owned by Lillian B. Disney and family. Disney's son-in-law, Ronald W. Miller, owns KVIQ(TV) Eureka, Calif. KLEW-TV is CBS affiliate on channel 3 with 13.8 kw visual, 1.38 kw aural and antenna 1.260 feet above average terrain. KIMA-TV is CBS affiliate on channel 29 with 484 kw visual, 87.3 kw aural and antenna 970 feet above average terrain. KEPR-TV is CBS affiliate on channel 19 with 490 kw visual, 88.3 kw aural and antenna 1,203 feet above average terrain.

WGIV(AM)-WPEG(FM) Concord, N.C. - Sold by Suburban Radio Group to Sky Broadcasting Co. for \$16 million. Seller is Belmont, N.C.-based group of four AM's and four FM's headed by William Rollins and Robert R. Hilker, president. Buyer is owned by Dennis Israel. It owns WGY(AM)-WGFM(FM) Schenectady, N.Y., and has recently purchased KSKY(AM) Dallas ("Changing Hands," Sept. 22) and WNYR(AM)-WEZO(FM) Rochester, N.Y. ("Changing Hands," Sept. 22). WGIV is daytimer on 1410 khz with 1 kw. WPEG is on 97.9 mhz with 100 kw and antenna 500 feet above average terrain. Broker: R.A. Marshall & Co.

KTAB(TV) Abilene, Tex. Sold by International Broadcasting Corp. to Shamrock Broadcasting Co. for \$15,750,000. Seller is owned by Thomas K. Scallen, president. It has no other broadcast interests. Buyer is Burbank, Calif.-based group of four AM's, seven FM's and three TV's owned by Roy E. Disney and family. KTAB is CBS affiliate on channel 32 with 2,051.3 kw visual, 610.7 kw aural and antenna 909.5 feet above average terrain. Broker: R.C. Crisler & Co.

KLZZ-AM-FM San Diego, Calif. - Sold by Southwestern Broadcasting Inc. to Edens Broadcasting Inc. for \$14 million. Seller is headed by Edward T. Shadek, president. It has no other broadcast interests. Buyer is Phoenix-based group of three AM's and three FM's principally owned by Gary Edens, chairman. KLZZ is on 600 khz full time with 5 kw. KLZZ-FM is on 106.5 mhz with 50 kw and antenna 230 feet above average terrain. Broker: Wertheim & Co.

KTXS-TV Sweetwater, Tex. - Sold by SWMM/Abilene Corp. to Lamco Communications Inc. for \$11,740,000. Seller is Houston-based group of three TV's owned by Billy Goldberg and Lester Kamin. Buyer

WKBZ is on 850 khz full time with 1 kw. WRNF is on 95.3 mhz with 2 kw and antenna 367 feet

Underwriting under discussion. Whether to tighten restrictions on local underwriting of nationally underwritten programs on noncommercial television was the major item of interest at an executive committee meeting of the board of the Public Broadcasting Service in Washington.

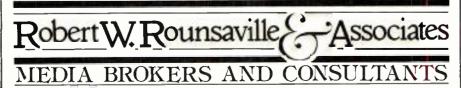

The debate was prompted by the news that a Florida public television station, WPBT(TV) Miami, returned \$16,000 to a local underwriter after the national underwriter of Managing Our Miracles: Health Care in America, complained that a competitor was being given equal fund-raising credit by the station. The national underwriter, Equicor, a joint venture of Equitable Life and Hospital Corp. of America, had contributed \$2.5 million to the 10part series, while the local underwriter, whose name was unavailable, contributed \$16,000 for spots in all 10. Early into the series, which began airing Sept. 30 on most PBS stations, the national underwriter saw the competing spots and complained to the program's producers, Columbia University Seminars on Media and Society, wnet(TV) New York and woed(TV) Pittsburgh. Former CBS News President Fred Friendly, head of Media and Society and host of the program, called the station to remind it of PBS guidelines advising stations to "carefully consider whether a potential local funder or underwriter might be confused with a national underwriter." He said the station was "most cooperative, and when they understood the problem, they changed it." (WPBT station personnel initially were unaware that the local underwriter was a competing and recently established health care organization, according to one source.)

The members of the PBS executive committee voiced concern over such conflicts, which they feared could lead to the withdrawal of crucial national underwriting support. (National underwriters provide \$58 million yearly, almost one-third of the value of PBS programs.) Mike Soper, PBS's vice president of development, estimated that up to 50% of PBS affiliates may be locally underwriting fully funded national programs, and several board members were wary of PBS taking on the job of policing member stations. Other members said that many stations cannot function without the money provided by local underwriters, and cautioned that any policy decision made by PBS must be made with the input of the stations.

PBS currently has only an advisory policy against local underwriting of nationally underwritten programs, because the board does not have the power to tell the stations what they can broadcast. But the board does have the power to adopt rules governing distribution of the National Program Service.

The executive committee made no policy decision at the meeting, voting to study the problem and make recommendations to the full board in December. PBS Chairman Al Stern told the board: And "I would hope that somehow out of this we could take some specific action so the stations would know that there's going to be some really serious punishment for them if they don't stop doing what is hurting public television very badly."

If the kind of broker you want treats your deal as if his own money were at stake, you need Robert Rounsaville.

"Determining fair market value isn't just an ivory tower exercise at CEA."

"Every financial situation is different. Each station offers a unique set of opportunities. And challenges. CEA looks at much more than one or two parameters in assessing the financial feasibility of an investment. We look at the whole picture.

Historical data. Published information. Industry resources. We make use of every source

DENNIS R. ECKHOUT Senior Broadcast Analyst Prior to joining CEA, Dennis Eckhout served as Senior Financial Analyst for Frazier, Gross and Kadlec, Inc., and has worked as an independent consultant in market and station analysis.

available, taking into account the constant changes in the marketplace. And using our own professional knowledge and experience as a guideline.

We also talk to the people closest to the situation. A station manager, for example, can be a very important resource because he knows his own territory better than anyone else.

We ask questions. Investigate. And, most important, listen.

Then CEA brokers and financial analysts compile all this information into a presentation that's clear, concise and functional. These presentations play a major role in every transaction. They're not just ivory tower exercises.

And CEA handles every aspect of every transaction for our clients' best interest. Even the most complex financing involving equity and debt placements.

Whether it's for a stand-alone transaction, or as part of a larger financing or broker arrangement, CEA delivers much more than the data. We turn the facts into accurate, effective information that can help clients make sound investment decisions. Our valuations and financial analyses are the springboard for action. And for success."

NBC hopes less is more

NBC News anchor Tom Brokaw joined NBC News President Larry Grossman last week in defending the network's decision to cut back its upcoming election coverage. Following an NBC press tour breakfast in New York, Brokaw said that NBC News would have liked to be on the air covering the elections from 6:30 p.m. to 2 a.m., but "it's just not realistic." Given that, among other things, there is not the "kind of interest" in start-tofinish coverage of midterm elections as in years past-either from the public or the stations—NBC will come on the air "episodi-cally," with full coverage during a "tightly produced program" at 10-11 p.m. NYT, Brokaw said.

There are "a whole new set of conditions" that have to be dealt with in 1988, Brokaw said, including the fact the elections are "essentially flat out there in terms of politics at the moment," and that stations are offering more of their own coverage. Brokaw said that there was evidence, beginning in 1984, that the stations were beginning to "peel away" from the networks. "Very often, if we were on at great length, we would find that we were talking for part of that time to ourselves, more or less," as local stations cut away to carry their own election segments, Brokaw said, adding that the network's extended coverage ended up being "terribly fragmented." NBC News felt it would be better to offer a more condensed, tighter program at the end of the night, and that it would "connect with the audience more than if we went on at seven o'clock and tried to fill up seven hours with election night returns," he said.

Grossman said that the decision to offer two five-minute reports in the 8-9 p.m. and 9-10 p.m. hours, with the hour report following, was initiated by the news division. The entertainment division was not heard from in that sense, he said, adding that "those kinds of editorial decisions-and that's what this was- are made by the news division in the first instance," Grossman said.

Sold-out Atlantic Cable Show

Annual event will feature panels on rate deregulation, home shopping, legal and technical issues

The fifth annual Atlantic Cable Show—representing the cable associations of Maryland/Delaware, New Jersey, New York and Pennsylvania—takes place this week in Atlantic City, Oct. 28-30. According to preregistration figures, about 2,500 are expected to attend. Exhibitor booths are sold out—as of Oct. 20, 332 booth spaces had been sold to 183 companies, 75 of them represented at the show last year, when 147 companies bought 271 booths, ACS said. Also, of the new exhibitors, about seven are home shopping organizations.

Among the topics to be discussed at the meeting are rate deregulation, local ad sales and technical considerations for 550 mhz cable systems. There will also be sessions on personnel development, building and preserving a public relations image and interfacing with consumer electronics. The last panel will be moderated by Randy Evans, chief engineer for Harron Cable TV, with Walter S. Ciciora, vice president of new technology for American Television & Communications; Bob Lee, system engineer for Viacom Cablevision, and Tom Mock, staff engineer for the Consumer Electronics Group of the Electronic Industries Association.

Also included among the scheduled panel sessions: three focusing on legal and financial concerns and home shopping. The legal panel will include Richard M. Berman of LeBoeuf, Lamb, Leiby & MacRae; Harold Farrow of Farrow, Schildhause & Wilson; Thomas Rogers, senior counsel of the House Telecommunications Subcommittee, and Richard E. Wiley of Wiley & Rein and former FCC chairman.

The financial panel will examine the perspectives of multiple system owners, regional bankers and Wall Street analysts. Panelists will also discuss new financing ideas. Moderator of the panel will be Phillip Hogue, Daniels & Associates, with other panelists including Greg Ainsworth, vice president and head of communications for Mellon Bank; Doug Dunnan, communications and technology group of Salomon Brothers Inc., and Jerry Lindauer, senior vice president, corporate development, Prime Cable Corp.

Another new panel session will examine the fast-growing phenomenon of home shopping services. It will be moderated by Stephen Ste. Marie, senior vice president of marketing and programing for American TV & Communications Corp. Other panelists are Peter Barton, president of Cable Value Network; Richard Berlin, executive vice president of operations for America's Shopping Channel; Charles Bohart, vice president of development for the Home Shopping Network; Harold Etsell Jr., president of Harte-Hanks Cable, and Joel Goldblatt, managing general partner of Monmouth Cablevision Associates.

On Wednesday (Oct. 29), a panel moderated by Dantia Quirk, president and publisher of QV Publishing Inc., will discuss pay per view. Other panelists are Joel Fleming, executive vice president and general manager of Vision Cable: Hal Krisbergh, vice president and general manager of Jerrold Division/General Instrument; Jeffrey Reiss, president and chief executive officer of Reiss Media Enterprises Inc.: Scott Kurnit, executive vice president and general manager of Showtime/Viewer's Choice, and Henry Magers, system manager of UA Columbia

Cablevision of New Jersey.

Prior to the official opening of the conference, the Community Antenna Television Association will hold an open forum on the Attorney General's Commission on Pornography Report (see story, page 104) moderated by Stephen Effros, CATA president, with Alan Sears, the commission's executive director; H. Craig Lewis, Pennsylvania state senator; Robert Clasen, president of Comcast Cable Communications, and Francis J. Viglietta, Pennsylvania Catholic Conference.

In Contest

Review board made following decision:

■ Green Valley, Ariz. (Alden Communications Corp. and Sungilt Corp.) TV proceeding. Scheduled oral argument for Oct. 31 on exceptions to initial decision of ALJ John H. Conlin granting app. of Sungilt Corp. for new TV station as Green Valley, and denying competing app. of Alden Communications Corp. Each parry has 20 minutes for argument. Alden may reserve part of its time for rebuttal. By letter. Oct.

ALJ Thomas B. Fitzpatrick made following decision:

■ Syracuse, N.Y. (Microband Corp. of America, et al) MDS

proceeding. Approved settlement agreement and dismissed with prejudice apps. of Microband Corp. and Broadcast Data Corp. and granted app. of Contemporary Communications Corp. for new MDS station at Syracuse. By MO&O.

ALJ John M. Frysiak made following decision:

Orlando, Fla. (Marlin Broadcasting of Central Florida Inc., et al) TV proceeding. Granted U.S. Communications Inc.'s motion for partial summary decision and resolved air hazard issue in its favor, By MO&O, Oct. 8.

ALJ Edward J. Kuhimann made following decisions

- Cambridge, Mass., and Boston (J. Christopher Robinson, et al) AM proceeding. Approved settlement agreement between J. Christopher Robinson and Nash Communications Corp. and dismissed Nash's app. with prejudice. By MO&O. Oct. 14.
- Amarillo, Tex. (Caprock Educational Broadcasting Foundation and Southwest Educational Media Foundation Inc.) Ed-FM proceeding. Approved settlement agreement and dismissed Southwest Education's app. with prejudice; granted

Caprock's app. for new educational FM station at Amarillo. and terminated proceeding. By MO&O. Oct. 10.

ALJ Walter C. Miller made following decision:

Denver (Don Tomas Moore, et al) TV proceeding. Approved settlement agreement and dismissed apps, of Don Tomas Moore, Sky High Telecommunications Co., Brassell & Romero, and Mountain States Telecasters with prejudice; conditionally granted amended app. of High Seas Communications Ltd. for new TV station at Denver, and terminated proceeding. By summary decision. Oct. 9.

ALJ Richard L. Sippel made following decision

■ Bunnell, Fla. (Meredith Corp., et al) TV proceeding. Granted Press Broadcasting Co.'s request and dismissed its app. with prejudice. By order, Oct. 7

ALJ Joseph Stirmer made following decisions

■ Bakersfield, Calif. (Dorothy J. Ownes, et al) TV proceeding. Approved settlement agreement and dismissed with prejudice apps. of Harold L. Mullican. Lash Communications. Liberty Broadcasting Corp. and Crown City TV Inc.; conditionally granted app. of Dorothy J. Owens for new TV station at Bakersfield, and terminated proceeding. By MO&O, Oct. 9.

■ Denver (Gali Communications Inc., et al) TV proceeding. Granted Urban Minority Broadcasting Institute Inc.'s consolidated motion to enlarge issues against Amador Broadcasting Limited and Gali Communications to determine availability of proposed transmitter/antenna site. By separate order, granted Amador Broadcasting's motion for limited summary decision and resolved engineering issue in its favor. By MO&O's, Sept. 29 and Oct. 3.

ALJ James F. Tierney made following decisions:

- Fort Bragg, Calif. (Fort Bragg Broadcasting Co. and Axell Broadcasting) FM proceeding. Approved settlement agreement and dismissed with prejudice app. of Fort Bragg Broadcasting: granted Axell's app. for new FM station at Fort Bragg, and terminated proceeding. By MO&O. Oct. 1.
- Fresno, Calif. (Contemporary Communication Corp., and Kravetz Media Corp.) MDS proceeding. By separate orders: granted Contemporary's petition and dismissed its app. with prejudice: granted Kravetz's app. of new MDS facilities at Fresno. and terminated proceeding. By order, Oct. 8. and by MO&O. Oct. 9.

Jeff Greenfield, political and media analyst. ABC News, wins fellowship at Gannett Center for Media

Studies at Columbia University, New York. Greenfield will take leave of absence from ABC from January to June 1987. He will study how press handles unanticipated domestic political crises.

Ernest E. Holling, VP, operations, Harron Communications Corp., Paoli, Pa., multiple cable systems operator, and Joel R. Richard, private accountant, form Richard/Holling & Associates Inc., Philadelphia telecommunications consultancy.

Rebecca L. Sims, assistant VP, finance, Malarkey-Taylor Associates Inc., Washington communications consultancy, named VP, fi-

Thomas F. Leahy, executive VP, CBS/Broadcast Group, New York, to receive Joseph E. Connor Memorial Award from Phi Alpha Tau, communications fraternity. Emerson College, Boston. Award, which recognizes excellence in speech and communications, will be presented Oct. 29 on Emerson College campus.

Deaths

Dewey (Bud) Nelsen, 56. retired assistant general manager and VP. sales, WHBF-TV Rock Island, III., died Oct. 14 of cancer at Lutheran hospital, Moline. Ill. Nelson retired from WHBF-TV on Sept. 30 after 19 years with station. He is survived by wife, Janet, son and daughter.

theEstate

IBC's Sherlock: The case of the contented manager

like Sherlock likes to tour 30 Rock, boundng by rooms full of NBC's latest technical vonders and even sneaking past his secreary and an awaiting appointment to relish ne last electronic marvel. The 49-year-old ead of operations and technical services OTS) has reason to be proud of his charge. Ie has helped turn one of the oldest plants in elevision into one of the most innovative.

In his four years as head of a 3,000-emloye division, Sherlock has rallied his crew f engineers and operators to a series of techological advances that have drawn the repect, and some criticism, of colleagues in he industry.

While Sherlock is quick to credit his staff vith the advances—his past responsibilities ave had more to do with finances than freuencies—it is no coincidence that during is tenure the company became the first ommercial network with a full-time satelite network interconnect, the network leadr in stereo television and, most recently, the irst and only to plan an all-out conversion to ew half-inch videotape technology.

Colleagues at NBC describe Sherlock as ard working, bright, a leader and consumnate manager of the largest division in the ompany. Ray Timothy, the NBC group excutive vice president who selected him for he post in 1982, said that Sherlock has done "marvelous job of leading an important

group.'

Many throughout the company have speial accolades for Sherlock's part in moving he company this year onto its new Ku-band atellite distribution system.

Sherlock has had his share of criticism, oo, in the wake of his well-publicized deciion last spring to convert virtually all of IBC's videotape plant in the next five years o the new half-inch M-II system from Matushita. The expensive move (costing upvard of \$50 million) has received strong and videspread support from the NBC divisions naking the switch. But some NBC affiliates nd rival broadcasters such as his Capcities/ ABC counterpart Julius Barnathan, presilent of broadcast operations and engineering nd Sherlock's self-professed "idol," have hallenged claims made for the system and ee the sizable commitment to it as risky.

Such straits are nothing new to Sherlock; e has made his way through others in the ast. One of his toughest trials came during ne company's 1979 unit manager scandal, vhen widespread financial abuses were disovered in NBC's unit manager division, nen responsible for fiscal management of .etwork shows.

Sherlock, his long years of financial exertise and solid reputation in hand, was alled in along with his present boss, group

MICHAEL JOHN SHERLOCK—president, operations and technical services, NBC, New York; b. April 1, 1937, Syracuse, N.Y.; bachelor's, business administration, Le Moyne College, Syracuse, 1958; assistant account supervisor, CBS News, 1959; budget analyst, business affairs, NBC, 1960-1973; director of business administration, business affairs, NBC, 1973; vice president, administration, Hertz Corp., 1973-1977; vice president, business affairs and administration, NBC News, 1977-1979; executive vice president, production administration, finance, NBC, 1979: vice president, finance and administration, NBC Sports, 1979-1982; executive vice president, operations and technical services, 1982-1986; present position since October 1986; m. Margaret DeCarlo, June 21, 1958; children: Margaret, 28; Mary, 24; Marjorie, 24; Michael, 18.

executive vice president and chief financial officer, Bob Butler, to help clear up the "unpleasantness." Several unit managers were eventually convicted of falsifying expenses; dozens of others were fired, and the operation was dissolved, its responsibilities given to individual management divisions. He describes it in retrospect as "gut wrenching."

Sherlock, who moved on in late 1979 to join the sports division as chief financial officer, also weathered the company's ill-fated 1980 Olympics planning, when the U.S. boycott of the games left NBC with an outof-pocket loss in the \$25-million range and a gaping 150-hour hole in the schedule.

Once past these early misfortunes, Sherlock's two-and-a-half-year tenure in sports proved an invaluable step towards the job he'd always wanted—what Butler described as Sherlock's "secret wish"-to be head of NBC operations.

From his start at NBC in the business affairs division, Sherlock had always gotten himself involved in operational activities, even if it was only assigning desks. "I've always had an interest in how things worked," he explained. "I like getting things done, contributing to an end.

His first real taste of operational activity came during his one departure from NBC, a four-year stay at RCA-owned Hertz Corp., where he had responsibility for all Hertz real estate, airport concessions, facility design and construction and purchasing. He was later brought back into the fold as a vice president at NBC News and loved it ("When I die and go to heaven, I'm going to work in a news division," he says). But it was really in the day-to-day activity of the sports division that Sherlock got his heaviest exposure to broadcast operations.

When the OTS slot under Timothy opened up in 1982, Sherlock was on the short list, Timothy recalled, but there was one hitch; he was not an engineer. Sherlock argued that the division had no lack of technical experts and what it really needed was someone to

guide that expertise.

'When I walked through the door," Sherlock remembered, "I found people who were hungry for leadership. They did not have enough of management's understanding and

capital support.

For Steve Bonica, vice president of engineering, Sherlock has provided that leadership, giving long-term engineering programs the backing they needed and applying his financial knowledge to technology plans and capital expenditures. "He understands better than we do what a program costs and what its benefits are," Bonica said. Because Sherlock also recognizes his own limits when getting deep into engineering territory, he has delegated and offers continuous encouragement to his staff to advance their management skills.

For Sherlock, his staff members are not so much 'engineers' as "very dedicated broadcasters." And as such, they've taken well to his view of the division as doing "nothing but servicing customers. Almost everything

is customer-oriented.'

There will certainly be no shortage of customers for Sherlock in the next several years, with some major NBC projects falling squarely in his lap. The coming of the 1988 presidential election and NBC's coverage of the summer Olympics, as well as the simultaneous implemention of M-II, are probably the biggest things on Sherlock's mind these days, although another big task for his crew will be the network's move to new facilities in the early 1990's.

Despite the load, Sherlock says he works a "reasonable" day (7:45 a.m. to 5:30 or 6:30 p.m.), is able to summer on the New Jersey shore with his wife, Anna D., and his boat, and ponder how much he likes his job: "NBC is a wonderful place to work; there's a

cooperative spirit."

But his task is not always easy. "We don't have a profit and loss statement; we don't get ratings. All we can do is make mistakes; we're only as good as our latest [success]. But I get my kicks out of making things run

Group W Satellite Communications confirmed last week it will shut down Home Theater Network, 12-hour-a-day service that featured only G or PG movies. Its last day will be Jan. 31, 1987. Launched in July 1977, HTN is one of oldest cable services, but also one of smallest in terms of subscribership. It now has 375 affiliates and serves 325,000 subscribers. "Over the past few years, HTN has gone from a money loser to a company with positive cash flow," said Cheryl Daly, spokeswoman for GWSC, "but we could not project significant growth for it in the future." She said two factors dampened service's prospects: sale of Group W's cable division, which had provided affiliate base, and projected long-term difficulties of pay cable in general. Decision to shut down service was precipitated by desire to lease GWSC's Satcom III-R transponder to TWA for its new programing service, The Travel Channel (see below).

TWA Chairman Carl Icahn has entered cable business. He announced last week plans to launch The Travel Channel, 24-hour-aday basic cable service, on Feb. 1, 1987. New service will be division of TWA subsidiary, TWA Marketing Services Inc., and will be headed by Jim Trecek as chief operating officer. Trecek had been senior VP of Tempo Enterprises. To distribute service, Trecek said, TTC has secured 12 hours (4 p.m.-4 a.m. NYT) on Satcom III-R, transponder 16, from Group W Satellite Communications, and is negotiating for fulltime slot on Satcom IV. GWSC will also handle tape playback and uplinking of service from its Stamford, Conn., facility, he said. GWSC made time on Satcom III-R transponder available following its decision to close down Home Theater Network (see above). Trecek said TTC also bought its name from GWSC. TTC had been name of travel-oriented programing presented between movies on HTN. TTC will be offered to cable system at no charge. He declined to say how much money Ichan

Bottom line considerations for 'Cosby'. A week after Viacom's announcement of its terms of sale for The Cosby Show in syndication (BROADCASTING, Oct. 20), stations were studying the company's marketing plan to determine whether the series, given the high prices it is expected to attract, makes economic sense.

At least one general manager said last week that his station would probably take itself out of the bidding. Others studying Viacom's offer said that while the show itself is not likely to make a profit, the strong lead-in it will probably provide to the remainder of the station's schedule could justify its purchase. "We can make money on this," said one executive.

The reactions came after meetings between Viacom and New York-based rep firms and some stations. Viacom will open sales of Cosby in New York today (Oct. 27) with formal presentations. Stations will be notified of the show's reserve price immediately following the presentations. The second market to bid on the show will be Chicago, with California markets following that.

According to sources, "a new wrinkle" in the marketing plan emerged from the initial meetings—Viacom will accept alternative offers for the show at the same time it is accepting bids in 5% increments over the reserve price it sets. It was not clear whether the two bids would be accepted simultaneously.

According to those reached last week, initial reserve prices for a week's worth of the show in New York are expected to be \$130,000-\$160,000. In Los Angeles, where the show is expected to command a higher weekly price than New York because there are more stations, the show could go for \$165,000-\$170,000. Station executives in Chicago estimated the show would be offered at a weekly reserve price of \$115,000-\$140,000.

Most of those commenting said Viacom's decision to take bids was fair, although many were not happy with Viacom's keeping of a barter minute. "I don't see anyone not wanting the product," said Viacom president of domestic distribution, Joe Zaleski. as committed to venture, saying only, "It's funded well, fund-deep."

Proposal by Association of Independent Television Stations at NATPE to add day of first-run syndicated programing to annual Television Critics Association press tour ("In Brief," Oct. 13) is picking a speed. INTV said last week that 17 producers/syndicators have: far agreed to split cost of Jan. 14 presentations. They are: MC, Gaylord, SFM, Fries, Disney-Buena Vista, D.L. Taffner, Colex, LE Communications, Paramount Domestic TV, Viacom, Lionhean Blair Entertainment, 20th Century Fox, Lorimar-Telepictures, Ti bune Entertainment, Television Program Enterprises and Grow W.

Pacifica Foundation, licensee of noncommercial KPFK(FM) Los Ang les, has responded to FCC Mass Media Bureau's formal request fromment on allegations that programing it broadcast was "obscer or indecent" (BROADCASTING, Sept. 29). In letter to bureau, Pacific said that homosexual programing at issue consisted of intervie with playwright and excerpts from play. "The treatment was set sitive and the predominant mood reflected the need to affirm life the face of death," Pacifica said. Pacifica also said it broadca warning that program contained material some might find objectionable. Program also was broadcast between 10 p.m. and "p.m. when children, Pacifica said, would not ordinarily be in littening audience. Pacifica said it regretted that other programinatics are sized.

First five prime time World Series games between New York Met and Boston Red Sox carried by NBC have averaged 26.2 rating an 42 share in Nielsen ratings, 9% higher than 1985's five-gam national average of 24.1/37, NBC spokesman said. Game five las Thursday (Oct. 23) had national average of 29.8/47. Night wa helped by Cosby Show lead-in (35.4/54), delaying coverage b half-hour to 8:30 p.m. Spokesman said Cosby aired because it i "most popular show in the country" and network feared calls fror disgruntled viewers if program didn't run. He added that "pract cally speaking," it was also "good lead-in" to series. Advertising-roughly \$275,000 per 30-second spot—was sold out for first fiv games (25 minutes in each game). Games six and seven were "jus about sold out," spokesman said.

Last week's news that WKJL(TV) Baltimore had settled on contrac with syndicators in wake of station's sale to Home Shopping Nework (BROADCASTING, Oct. 20) has raised ire of other stations which are now demanding similar reduction in their syndication paments. Syndicators settled with WKJL(TV) since they had no propect of getting full value of their original contracts after station asset-only sale to HSN. Association of Program Distributors not estimates that outstanding payments to syndicators as result station purchases and affiliation agreements by HSN, plus stations' credit problems, total between \$750 million and \$1 billio Between 85 and 90 APD members have now contributed \$2,00 each for legal counsel.

Pay cable penetration reached 26.1% of U.S. TV households as of l July, according to Nielsen Station Index. Leading list is Lare Tex., with 55% pay cable penetration. NSI also estimates that ${\bf V}$ penetration has reached 39.9% of U.S. households, with San Fr. cisco-Oakland-Santa Rosa, Calif., market and Las Vegas each h ing 56% VCR penetration.

CBS is negotiating with actress Mariette Hartley for possible co-harole on new morning news-entertainment program that network planning for next January. Robert Shanks, executive producer new show, said last week that he would not yet discuss plans, the did confirm that talks were ongoing with Hartley. In past, Hartle has substituted for Jane Pauley on NBC's Today. Unconfirm reports said Shanks has also approached columnist Jack Anders about contributing regular feature. Anderson did regular report for Good Morning America for about five years, ending in 198

Broadcasting Oct 27 1986

nks was executive in charge of GMA when Anderson was ght aboard.

York Mayor Ed Koch has refused to sign revised contracts with evision Systems Corp. for cable service for Bronx and threeters of Brooklyn. Larry Simonberg, assistant press secretary flayor, said last week that information had come to Koch since dof Estimates and Koch had approved revisions Aug. 14. le Koch had not "indicated what his sources of information" been, Simonberg said that recent press reports on investigatinto franchise awards had "been enough" and Koch felt "evne should look at this again." In other New York cable action week, Judge Francis X. Smith, administrative judge of State teme Court in Queens, was indicted by grand jury there. Acting to Smith's lawyer, Smith was charged with perjury and ing "evasive testimony" to grand jury in August, September earlier this month. Fuchsberg will move to have charges dissed, probably in next few weeks.

last week said it had made **full year (22-week) commitments to** of its new shows, including Crime Story, Our House, L.A. Law Matlock. Those shows, and most new programs received al 13-week commitment before being renewed for full year or celed. No word yet on shows at ABC or CBS.

ional Association of Broadcasters, following meeting between esentatives of CBS and NAB, said **CBS** has decided to retain n of engineers headed by Emit Torick to continue development on **C** stereo system while CBS and NAB try to find third-party estors to help fund development for share of licensing royalties. FMX development was thrown into doubt last month when announced closing of CBS Technology Center, where Torick his team were working.

onal Black Media Coalition's 13th annual conference kicked off Vashington last Wednesday (Oct. 22). Four-day event, with ne "Conquering Attitudes, Pressures and Politics," drew 2,500 ple to 35 panel sessions on broadcasting, cable, print journal, advertising and recording industry. Speakers included Repretative Walter Fauntroy (D-D.C.), syndicated talk show host ah Winfrey, National Black Network correspondent Malder, radio and TV commercial producer Anna Morris, and Melton, president and chief executive officer of WLBT(TV) cson, Miss. Keynote speaker at closing banquet Saturday night to be Randall Robinson, executive director of human rights anization, TransAfrica.

eral Election Commission late last week voted 5-0 to reconsider ruling prohibiting television station's offer of free advertising e to incumbent North Carolina congressman (see page 104). I will issue new order in 20 days.

asonic will introduce new three-chip CCD camera at Society of ion Picture and Television Engineers annual meeting in New this week (see story, page 107). Broadcast camera, available next spring, docks directly on company's new M-II half-inch to portable recorder.

Past three FBC affiliates have moved The Late Show Starring Rivers to 11-12 p.m., from 11:30 p.m.-12:30 a.m. slot: WTAF-TV adelphia, KTXL(TV) Sacramento, Calif., and KDVR(TV) Denver. d Hilton, FBC VP, affiliate relations, said that moves are result ivers tripling stations' ratings from November last year, when ran half-hour sitcoms.

Oct. 13-17, first full week for which ratings are available, The Show Starring Joan Rivers (appearing in 98 markets) earned 3.2 sen rating (no share available) compared to 6.4/21 share for

The Tonight Show Starring Johnny Carson (in 202 markets). Syndicated Night Life with David Brenner (in 100 markets) had 2.4 rating (no share available). Spokeswoman for Fox Broadcasting Co. said Rivers's numbers have nearly doubled 1.8 rating Fox stations had been getting in that time period. Fox has guaranteed advertisers 4 rating within year or it will have to offer makegoods.

Frances W. Preston, president and CEO, Broadcast Music Inc., was unanimously reelected to that post and named to organization's board at annual BMI shareholders and directors meeting in Los Angeles last week. In other action, Joseph A. Carriere, president, Caprock Telecasting, Roswell, N.M., was elected board chairman, succeeding William Faber, chairman, Media General Broadcast Group, Tampa, Fla. Faber, however, remains on board.

FCC seeks 'Shurberg' remand. The FCC has asked the Court of Appeals in Washington to remand Shurberg Broadcasting v. FCC (BROADCASTING, Sept. 29), in which the commission's distress sale policy is under constitutional challenge, to "reexamine the justifications" for the policy. In a motion filed with the court last week, the FCC said the distress-sale policy raised "many of the same questions" raised in the Steele case, which the court has already remanded (BROADCASTING, Oct. 13). The FCC had requested a remand of Steele, a comparative licensing case that was won because the victor was preferred for being female, to reconsider whether it should continue granting licensing preferences to females and minorities. "Because the commission now intends to undertake a proceeding to ascertain whether there is an adequate justification for the policy of granting comparative preferences based on race and gender, it seems appropriate also to reexamine the justifications for the distress sale policy," the FCC said last week. The distress-sale policy permits a licensee who has been designated for hearing to sell out before the hearing starts to a minority at 75% of the station's fair-market value. Jack Smith, FCC general counsel, said the commission planned to address both issues in the same proceeding. He said he hoped the proceeding, which will be open for public comment, could be launched by Christmas.

The FCC also asked the court to remand Winter Park Communications v. FCC to determine whether the minority preference granted there was significant to the decision. In that case, Winter Park had appealed the FCC's grant of the application of Rainbow Broadcasting Co., which received a minority preference for a new UHF TV station in Orlando, Fla. Smith said that if the preference were determined to be "decisional," the FCC would advise the court within 45 days and then have to decide whether to seek a remand to consider it along with Steele.

FCC Commissioner James Quello issued separate statements on each request for remand in which he said he had supported the requests because Supreme Court case law raised questions about the constitutionality of the preferential policies. "I want to make crystal clear, however, that I am not, at this time, questioning the wisdom of continuing our minority policies," Quello said in each statement. "I must, of course, study the law to be sure that the commission's policies are constitutional. However, as I have said before, I place the burden of proof on those that would challenge the constitutionality of our long-standing minority policies."

Senate Commerce Committee Chairman John Danforth (R-Mo.) has asked the FCC to keep him informed on the Shurberg case. In a letter, Danforth said: "So that the Commerce Committee may better assess these important issues, I ask that you advise us about the position the commission intends to advocate in this case, and to keep us informed about the status of this proceeding and any other proceedings that concern the commission's distress-sale policy." Also expressing interest was Senator Lowell Weicker (R-Conn.). In a statement Weicker made two weeks ago before Congress adjourned, the senator said the distress sale policy "works" and should "remain unchanged."

Editorials

Soul searching

It is no longer accurate to say that the times they are a'changin in broadcasting. The times they have a'changed.

A remarkable testimonial to that effect is presented in this issue's "At Large" interview with Laurence A. Tisch, the acting chief executive officer of CBS Inc. We have used the phrase "new realism" to describe his approach to operating one of the industry's leading companies. It commended itself to our editors when they asked him whether we was "optimistic" about CBS's prospects for the future. He replied that he was, instead, "realistic."

Can one be both? The men in current charge of the three major network companies are far more concerned at present with insuring their organizations' fiscal well beings than with the state of their souls. Capcities/ABC was the first to introduce the idea of modesty to network life styles that had, in some instances, become Roman. Last week, the new president of NBC was caught on the front pages in conflict with his colleagues over a proposal to reduce budgets by 5%. And Tisch, whose enthusiasm for his new line of work is perhaps exceeded only by his dedication to the bottom line, is unabashedly reducing expenditures at the Tiffany network to a level befitting a company that may believe most of its growth is behind it.

It is relatively easy to undo what earlier generations of broadcast leadership spent years in creating: the best system of broadcasting in the world, complete with a few bells and whistles that helped make the difference. It may be the better part of wisdom to bring more restraint than enthusiasm to wielding the budgetary axe.

Task force time

The attorney general, perhaps feeling the heat that has been building among conservative constituents, announced last week a seven-point plan of attack on pornography. Said plan, according to Meese, covers over 90% of the recent recommendations of his commission on pornography (BROADCASTING, July 14). That's about 89% more cure than is necessary for the problem at hand.

In the press conference announcing the plan, Meese's frequent references to the Supreme Court's *Miller* test as a clear guideline for obscenity cases seemed at odds with his call for a legislative package to be presented to the next Congress, including legislation to 'proscribe obscene cable programing." While the suggestion of legislation raised morality watchdog hopes of reaching beyond obscenity to collar cable with the indecency standard that is currently applied to commercial television, Meese indicated that would not be the case

The eventual bark-to-bite ratio of the attorney general's proposals remains to be tested. Let us hope that the vague references to legislation targeting cable will fall under the former.

Politics as usual

The Federal Election Commission has provided yet another illustration of how the regulation of political broadcasting is rigged to favor incumbents over challengers. Responding to a request for a declaratory ruling from, surprise, surprise, an incumbent member of the House of Representatives running for reelection, the FEC ruled that a television station's offer of free advertising time to the congressman and his opponents would, if accepted, constitute an illegal contribution to the candidates' campaigns.

True, the incumbent loses the free ride that had been offered, but at less sacrifice than will be suffered by rivals who, lacking the regular media exposure that comes with service in the Congress, need all the campaign air time they can get. If the FEC has correctly read the law that it administers, the Federal Election Campaign Act is of a piece with sections of the Communications Act that guarantee access and equal time for political appearances in nonnews programing. It is all designed to make sure that no challengers can make up for all the news coverage that incumbencies inevitably attract.

Gene Bohi, who runs wGGT(TV) Greensboro, N.C., offered 18 30-second spots to every congressional candidate in his area. Representative Howard Coble, a first-term Republican from Greensboro, trying for a second term, asked the FEC whether the free time would be a campaign contribution by a corporation, as proscribed by law. The FEC obliged with an affirmative answer.

Quite properly, the National Association of Broadcasters, going to the aid of Bohi and other members who may be generously disposed, has asked the FEC to reverse itself, and the agency agreed to reconsider. If the FEC looks to the basic purpose of the election act—to equalize opportunities for political debate—it will remove the gag.

Footnote. In its effort to persuade the Federal Election Commission to reverse its ruling about free political ads (see above), the NAB may have wandered into arguments it will later regret in other contexts. At one point in its appeal to the FEC, the association says that the parts of the Communications Act requiring broadcasters to provide "reasonable access" to candidates for federal office and equal time for all candidates to any office "reveal that providing free time directly to candidates on a nonpartisan basis is also a legitimate press function." That observation gets perilously close to saying that the First Amendment endorses intrusion by the government in the broadcast editorial process. At another point in the FEC appeal, the NAB refers to the "broadcast licensees' duty under the provisions of Sections 307 and 309 of the Communications Act to serve the public interest, convenience and necessity." The NAB adds: "Political broadcasts constitute a major element in meeting this standard." Is this the same NAB that has for years sought repeal of political broadcasting restraints?

Drawn for BROADCASTING by Jack Schmidt "I asked the boss to bring us up to state of the art, and he gave me an ad for a transmitter company"
