YOU CAN'T BE A BUSI-NESS MAN AND ALSO A WOMAN-HATER

You *know* it's the woman who buys. She's your best friend. The women in WOR's service area—a 7 billion dollar market—do the buying...just as they do anywhere else. But there *is* a difference. Their cosmopolitan interests—which WOR never forgets in its many programs—make them real leaders in public endorsement. Don't neglect them.

Here are ANSWERS to problems of building better Recorded Programs for Spot Broadcasting

You are a spot broadcaster. You are anxiously concerned with building and producing successful recorded programs.

You have many problems, of course. Problems of casting suitable talent, creating interesting scripts, producing perfect recordings. Too, you probably get a grey hair or more making sure of correct and punctual deliveries.

We give you the answers to these and other problems in our new "Recorded Program Service" book which is yours for the asking.

Read it and you will discover that our newly organized Recorded Program Service can simplify recorded program building for you, intelligently and completely.

Write for this new book today!

"A <u>marvelous</u> program, Mr.F&S!"

IF we're boring you about "F & S service", please stop us. But . . . In both our New York and Chicago offices, we have just installed a complete and comfortable Audition Room. Designed by sound engineers. Acoustically treated. Fitted out with the latest Western Electric Wide Range transcription reproducing equipment, for both 33 1/3 and 78 R.P.M. vertical and lateral recordings . . . These rooms will be available to all our agency

friends and their clients . . . will also be used for auditioning World Program Service and other fine transcription features now available for sponsorship on F & S stations.

Even if you have never before tested "F & S service" — *especially* if you have never done so — you will be more than welcome to the use of our audition facilities.

oint Session of Broadcasters, Advertisers and Agencies Moves Swiftly Toward Bureau to Authenticate Coverage

4OVING with unexpected speed, epresentatives of the trade assoiations representing broadcasters, dvertisers and their agencies met n executive session in New York spril 22 and laid the groundwork or a cooperative independent bu-eau to authenticate station coverge and audience data. It will par-liel broadly the functions of the audit Bureau of Circulation in he printed media field.

Called together at the invitation f the National Association of roadcasters, officials of the Asso-tation of National Advertisers nd the American Associtaion of dvertising Agencies-the groups itally interested—met in a round able discussion, agreed upon the undamental theory, and proceeded th steps to hasten the formation f the proposed agency, which yould act as a research bureau nd clearing house for trade infor-nation of the broadcasting indus-

Both the NAB and the AAAA ave enabling resolutions from heir memberships authorizing deberations looking toward creation f an ABC of radio. The ANA has ot, but will endeavor to put itself n record in similar fashion at its onvention at White Sulphur prings May 7 and 8.

Six-month Goal

T WAS AGREED at the session hat the three trade groups, hrough duly designated commitwould convene following the NA meeting to formulate a tangile project, with the hope of set-ing up the central bureau in the hortest possible time. The objecive is to have the bureau a going oncern within six months. Broadv, the discussion surrounded divi-ion of control of the bureau on a asis of 40% each to the broadasters and advertisers and 20 per ent to the agencies, the latter asuming the lesser proportion be-ause they function both for the dvertiser and the medium. In attendance at the joint meet-

ng were: For the ANA—Stuart Peabody, the Borden Co., chairman of the ANA hoard; Paul B. West. manag-ing director, and A. W. Lehman, assistant managing director.

Assistant managing director. For the AAAA—John Benson, president; Frederie R. Gamble, ex-ecutive secretary; H. H. Kynett, Aitken - Kynett Co., Philadelphia;

Charles Gannon, radio director, Er-win. Wasey & Co., and Louis Weld. For the NAB—Arthur W. Church. KMBC, Kansas City, chairman of the special committee of five desigthe special committee of hye desig-nated last year to develop the plan; Edgar Kobak, vice president of NBC in charge of sales; John Karol, CBS research director; Philip G. Loucks. NAB managing director; Dr. Herman S. Hettin-ger, NAB research director. and Hurth W. Bezüllen chief cataiteigen

ger, NAB researce director, and Hugh M. Beville, chief statistician of NBC. Details as to drafting of the plan, and formulation of a definite project, were left by the joint committee to the three executive offi-cers of the trade associations-Messrs. Loucks, West and Gamble. After this group completes its de-liberations, it will convene with the main "joint committee" for ap-proval of the work, assuming, of course, that the ANA will vote ap-proval of the commignation? proval of that organization's par-ticipation at its White Sulphur Springs meeting. In the joint committee discus-sions over which Mr. Church pre-

sided only basic organization mat-ters were gone into, with no definite understanding as to how costs would be prorated. It was tacitly agreed that the bureau should be an independent organization, owing its allegiance to no single trade association or industry, but working cooperatively and in unbiased fashion for all three.

Need of Accurate Data

THERE was unanimity of view on THERE was unanimity of view on the need for such an agency, to supply authenticated data about radio coverage, whether from the technical standpoint or of the audi-ence reaction species. The need, it has been emphasized, is for uni-form data to displace haphazard and possibly biased surveys now produced by stations, or by re-search bureaus for agencies and search bureaus for agencies and advertisers. Through such a bureau, for example, advertisers and agencies could procure in stand-ardized and uniform manner, iden-tical data for all stations which subscribe to the bureau to displace

the material now prepared inde-pendently by stations, most of which, it is contended, ultimately reposes in yawning waste-baskets.

The joint committee discussion presupposed a bureau which would move slowly and judiciously, un-dertaking at the outset perhaps an uncontroversial matter such as statistics on receiving-set distribu-tion. Gradually it could invade the more complicated fields of audited coverage, such as listener surveys, field strength surveys and similar data

Ultimately, however, it would cover the whole broad field, necessarily establishing precedent since there is no formula which it may follow. Control of its actions would be vested in the board of directors, split up among the NAB and ANA, possibly with equal representation, and the AAAA with the balance of the power represented perhaps by one-half the membership of the two other organizations.

Preparatory Work

IT WAS INDICATED that a slow, methodical development of the bu-reau is desirable, so there will be a minimum disturbance of existing work in the survey field. There was a thought that possibly these broad, but uncoordinated operations could be fit into or absorbed by the projected bureau.

At the joint session, Mr. Loucks outlined the preparatory work done by his organization under his diby his organization under his di-rection. Since last November, when Dr. Hettinger took leave of absence from the Wharton School of Fi-nance & Commerce, of the Univer-sity of Pennsylvania, to become NAB research director, he has been engrossed in this task. He was retained after the NAB con-vention in Cincinneti last Sentem vention in Cincinnati last September had adopted a resolution authorizing the undertaking.

The joint committee meeting followed a session of the NAB special lowed a session of the NAB special committee of five, held in New York on April 17 at the call of Mr. Church. This committee originally comprised Messrs. Church. Ko-bak, Karol, John V. L. Hogan, consulting engineer of New York, and Walter J. Damm, past presi-dent of the NAB, and manager of WTMJ, Milwaukee. Mr. Damm, however, it developed, has resigned, and J. O. Maland. general manaand J. O. Maland, general mana-ger of WHO, Des Moines, was named in his place. All of the committee members, together with the ex officio members, Mr. Loucks and Dr. Hettinger, met at the April 17 session. It was immediately after this meeting that arrangements

Rowing Along Together . . . By Thornton Fisher

were made for the tripartite sessions with the other trade associations, and the coordinated plan was placed definitely under way.

More than likely, sufficient headway will have been made in the deliberations to allow the subject to be discussed fully at the forthcoming meeting of the NAB Com-mercial Section to be held in con-junction with the annual conven-tion of the Advertising Federation of America, scheduled for the Pal-mer House, Chicago, June 9-12. It also will be one of the live topics at the forthcoming NAB annual convention at Colorado Springs July 6-10.

NAB Convention Action

AT THE LAST NAB convention, held in Cincinnati Sept. 16-18, the subject of a cooperative coverage bureau provoked considerable discussion. Finally, the resolution was adopted: following

"Resolved, that the NAB hereby directs the chairman of its commercial section to appoint a committee of five to study what is pertinent informa-tion for the advertising agencies and the advertisers who are the buyers of radio advertising, and to invite dis-cussions with representatives of the American Association of Advertising Agencies and the Association of National Advertisers, with a view to set-ting up a bureau for the broadCast-ing industry, such committee to report with recommendations to the board of directors for action as quickly as pos-sible."

In connection with this action, President Benson of the AAAA told the last convention that his organization also had gone on record endorsing such a project. He pointed out that the ABC created 20 years ago, had given tremendous impulse to the publication field, and that the outdoor advertisers recently had established a com-parable yardstick which brought new confidence to the medium. With those media providing such information, he asserted that ra-dio could not afford to be without a similar clearing house. He declared that field strength surveys and listener habit studies both are indispensable to agencies and ad-vertisers, but not enough are being made and they are not standard-ized. The job, he pointed out, is to decide upon the method to be used for all stations, upon a national

Garment Workers' Plea

Confuses 970 kc. Case COINCIDENT with the filing of an application by the International Ladies Garment Workers, for a 1,000 watt broadcasting station in New York on the 970 kc. clear channel, a report became current that the agreement reached by four station operators for a realignment on the wave had been broken. The case had been set for hearing for May 9, but the Garment Workers, in their application made public April 24, requested a postponement.

The original applicants are KJR, Seattle, dominant station on the channel, which applied for an increase in power from 5,000 to 10,000 watts; WCFL, Chicago Fed-eration of Labor, operating fulltime on the wave under special grant; Amon G. Carter, Fort Worth publisher, who seeks a new 5,000 watt station in that city, and Hearst Radio Inc., which seeks a new 1,000 watt station in Albany, N. Y.

First Lady—Reporter

MRS. FRANKLIN D. ROOSEVELT turned "roving reporter" for NBC Easter Monday by broadcasting a portion of the "roll by roll" festivities on the White House lawn. Carleton Smith, NBC presidential announcer, was broadcasting the historic egg-rolling event with a portable mike, when he noticed Mrs. Roosevelt on the White House portico. held the "mike" befor He before the F.rst Lady, only to have her take it from his hand and rove about with it for several minutes, to tell the NBC-WJZ network audience of the goings-on.

Railroad Campaign Will Start May 1

A SERIES of one-minute transcriptions for the Western Railways Association, which recently placed its appropriation in the hands of Reincke-Ellis-Younggreen & Finn, Chicago agency, will be spotted twice daily on between 30 and 40 stations beginning May 1. The campaign, recorded by WBS at its Chicago studios, is a cooperative one in which all Western lines are cooperating to increase summer travel by rail.

The precise schedule had not been worked out as BROADCASTING went to press, but it is understood that if the spots prove successful, the project will be continued throughout the Summer. The commercials will suggest that listeners write friends in the East advising them to take their summer vaca-tion trips by rail. With the exception of the national spot-transcription campaign of the Chesapeake & Ohio and the current Chicago & North Western series on WENR, Chicago, this is the first important radio advertising effort on the part of railroads for several years.

Vick Resumes in Fall

VICK CHEMICAL CO., Greensboro, N. C. (cold remedies), going off the air for the summer months plans to renew network and spot broadcasting in the autumn, probably with a half-hour program. The sponsor has just closed a 29week NBC-WJZ series thrice-weekly, with Willard Robison's orchestra and claims one out of three radios turned on during the program was tuned to its Plantation Echoes. Cecil, Warwick & Cecil Inc., New York, handles the account.

Schenley Program

SCHENLEY PRODUCTS Co., New York (liquor) has taken over sponsorship of the amateur show of WHN, New York, originator of this type of program. The series, which is reported to be for 26 weeks, is understood to be the forerunner of further Schenley radio advertising. The New York program involves a talent tieup with Loew theatres, owners of WHN. Lord & Thomas, New York, is the agency.

Plan to Exclude Press From Station Ownership

REITERATING his view that he felt newspapers and radio broadcasting stations should be divorced completely, and that there should be no joint ownership of the two, Senator Wheeler (D.) of Montana, declared April 23 he has in mind legislation which would prohibit such joint ownership.

Earlier this session the Senator, chairman of the Interstate Com-merce Committee charged with radio legislation, declared during hearings that he was opposed to the joint control of the two mediums. Pressure of other legislation, particularly his measure to strictly regulate holding compan-ies, he told BROADCASTING April 23, might prevent his introduction of such a measure at the current

session. "I am definitely of the opinion that newspapers and broadcasting stations should be divorced, wheth-er corporately or otherwise," Sen-ator Wheeler declared. "But I find it difficult, due to the pressure of other business, to handle such legislation at this time. If I do not introduce such a measure at this session, I intend to pursue it at the next."

Senator Wheeler said that two great mediums of news dissemination, so effective in moulding public opinion, should not be "monopolized". During the hearings last January he repeatedly interpolated remarks about newspaper acquisitions of stations, notably those by the Hearst organization.

Increased Use of Radio Aids Philip Morris Sales

EARNINGS of Philip Morris & Co., New York (cigarettes) trebled earnings last year, mainly on the basis of continued growth in sales of the 15-cent Philip Morris cigarettes introduced in January, 1933, according to information obtained by Lawrence M. Hughes, of the New York Sun in an interview with L. B. McKittrick, president of the company.

Earnings for the fiscal year ended March 31 were between \$3.50 and \$3,75 a share, Mr. McKittrick is quoted as saying, as compared with \$1.21 for the previous year. Unit sales of Philip Morris ci-garettes are said to have passed the four billion mark, with radio advertising playing a prominent part in the growth. The company is said to be increasing its use of radio, with nearly 100 stations now scheduled. Biow Co., New York, is the agency.

Max Baer for Gillette

GILLETTE SAFETY RAZOR Co., Boston, on April 29 started a 13week series of half-hour programs with Max Baer, heavyweight box-ing champion, on an NBC-WEAF network. The program is titled Lucky Smith, and presents the boxer in a detective role. The contract is understood to include broadcast rights to the Baer-Braddock championship fight June 13, which also may include a CBS network. The sponsor has an option on an additional 13 weeks. Ruthrauff & Ryan Inc., New York, is the agency.

Senator Wheeler Defers 45 Affiliates Sign **New NBC Contract**

Negotiations Continuing With Rest of Network's Stations

FORTY-FIVE affiliated stations, in addition to the 15 it manages and operates, have thus far been signed by NBC to the new contracts being offered under its new station compensation plan. The station compensation plan. The contracts go into effect on varying schedules, some being in effect already, and the whole plan is to become operative for all stations Feb. 1936, when the new network rates are in effect on all accounts.

Contract negotiations are still under discussion with most of the remaining stations among the 88 affiliated with NBC, with the ex-ception of those in the Mountain and Pacific Coast divisions. These are to be discussed personally with the station managers during the next month by Frank E. Mason, administrative vice president, who will be joined on his tour of the stations by Don E. Gilman, Pacific division vice president.

Field Representatives

NEGOTIATIONS with the sta-tions started early in February when the NBC dispatched_its representatives to the field. The contracts were obtained largely by Niles Trammell, Chicago division vice president; William S. Hedges, manager of managed and operated stations; R. M. Brophy, station relations manager, and Keith Kig-

relations department, New York. The list of 45 affiliated stations which have already signed contracts follow:

which have already signed con-tracts follow: WJAR, Providence; WTAG, Worcester; WCSH, Portland, Me.; WFBR. Baltimore; WBEN, Buffalo; WCAE, Pittsburgh; WWJ. Detroit; WHIO. Dayton; KSD, St. Louis; WOW. Omaha; WFIL, Philadelphia; WBAL, Baltimore; WSYR. Syra-cuse: KWK, St. Louis; WMT. Cedar Rapids, Ia.; KSO, Des Moines; KOIL, Omaha: WREN, Lawrence, Kan.; WTAR. San Antonio; KTBS, Shreveport. La.; WTMJ, Milwaukee; WIBA. Madison. Wis; KSTP, St.; Paul; WEBC, D u l u t h; WDAY, Fargo, N. D., and KFYR, Bismarck, N. D. The NBC managed and operated N. D. The NBC managed and operated

stations coming under the new plan, all of whose contracts are al-

plan, all of whose contracts are al-ready in effect, are: WEAF and WJZ. New York; WENR and WMAQ. Chicago; KPO and KGO. San Francisco; KDKA. Pittsburgh; KOA. Denver; WBZ. Boston; WBZA. Springfield; WGY, Schenectady; WRC and WMAL, Washington; WTAM, Cleveland; and KYW, Philadelphia.

WIRE on Basic Red

WIRE (formerly WKBF), Indianapolis, has been transferred by NBC to the status of a basic Red network outlet, instead of an op-tional outlet on either the Red or the Blue. The station is managed by D. E. "Plug" Kendrick.

Publishers Liberalize Press-Radio Plan

BV GILBERT CANT

Dppose the Sponsorship of News at Annual Convention; Note to Continue 15% Agency Compensation Basis

CAPITULATION of American ewspaper publishers to the prin-iple that the public is entitled to pore radio news was voted April 5 at the annual convention of the American Newspaper Publishers Association, but a deaf ear was urned to the contention that news hould be available for sponsorhip.

2

e

re-

rk-

Π.

The convention unanimously dopted the report of its radio comnittee containing recommendations o that effect. To date the two th ress-Radio bureaus have not deided to what extent they will iberalize service which is permited under the amended program put it is expected subscribers will e able to get practically as much

hews as they can carry. In the case of networks this robably will mean one or two exra five-minute news periods, one bout noon and the other at 11 m. Individual station subscribrs, particularly those facing keen Transradio competition, may be alter owed even more news if they are willing to pay transmission costs. ie.

Allowed More News

STATIONS affiliated or owned by 008 newspapers will be in an even bet-01er position since they will be able, Aff. after paying the fee to Press Ra-le. the Bureau, to pick any desired be bews off the wires and after giving the usual credit, use it on the

is air whenever desired. is air whenever desired. is formulation of the New York pureau's plan was delayed by the the business manager of the New York pusiness manager of the New York Sun, who was in Binghamton due to his father's illness. Expected imitations inherent in network to subscribe to Press-Radio separ-tately to avail themselves of poten-MC. tial liberalization of rules, it is anœ, (*

Herbert Moore, manager of Transradio, commented on the ac-¹⁰ tion as follows: "I am sorry they ¹⁰ extended the agreement and sorry that various modifications are only supotentially better. Unless they take the improved. Discrimination in avor of stations owned by newsavor of stations owned by news-oapers is bad and destroys the real or pretended public service nature of the plan. If they put more news pown, competitors will retaliate with the nore and better news. M. "We are doing our best to re-the form commercial credits in news and boroacets and block products in news

proadcasts and blame criticism on the fact that these things sound worse than they look. We don't blug products in news columns as papers do and I don't think the American public is so stupid as publishers seem to think, in mistaking commercials for news. Sponf news and if they were to do any-hing objectionable in commercials hey would be dropped from our ist of clients."

E. H. Harris, of the Richmond (Ind.) Palladium - Item, presented the report of the Radio Committee, of which he is chairman. On his motion, it was adopted, after a desultory discussion featured by admissions from all publishers who touched on the question that radio broadcasting of news has not cut into their sales and may have

helped them. Frank D. Throop, of the Lincoln (Neb.) Star said that while there was no doubt radio did take the edge and the freshness off some of the news printed, he had never heard of anybody giving up the buying of newspapers for this rea-

son. Frank S. Hoy, of the Lewiston (Me.) Sun - Journal, confirmed Throop's experience, and went further, saving "All can testify that we have had an increase in circu-lation during the last two years." Discussion of the provisions for supplying news to radio stations was scarcely more animated. J. R. Knowland, of the Oakland (Calif.) Tribune, a member of the radio committee, member of the govern-ing committee of the Los Angeles

Press-Radio Bureau, and a direc-tor of the Associated Press, said only that the AP cannot and will not sell news to anybody but newspapers.

Roy Howard, president of the Scripps - Howard enterprises, said newspapers are faced with the de-velopment of a new medium of news dissemination which has not a century of journalistic ethics and tradition behind it." He made no suggestions but contented himself with the rhetorical question "What are we going to do to meet this situation?"

S. E. Thomason, Chicago Times, warned publishers that newspapers are going to have to face the fact of competition in news broadcasting, whether they like it or not, and accused them of having failed to consider squarely the economics of the situation. The thing to decide, in his opinion, is whether the existing great news-gathering organizations are going to furnish the news for radio broadcasting, or let somebody else do it. "We must see that the dissemination of news does not get out of the hands of the newspapers," he said.

Report of ANPA Radio Committee

THE TEXT of the report on newspaper-radio relations as adopted by the ANPA:

The focal point of Press-Radio relations is based upon the newspapers' property rights in the news which they have gathered as members or as clients of one or more press associations. Since all newspapers which are members or clients of one or more press associations have a certain property right in the news of those press associations, the Radio Committee bases its activities upon the premise that these property rights in the news should have some central body to coordinate their interests in the broadcasting of news furnished by the press associations. The Press-Radio Bureaus, composed of the press as-sociations, the newspapers, and the broadcasters provide a medium through which these rights may be co-ordinat-ed and preserved in the broadcasting of news. This is the basis upon which the Radio Committee makes its report.

During the last year attempts were made by some broadcasters to en-croach upon the property rights of the newspapers and the Press Asso-ciations in the news which they gather. These attempts manifested them-selves in the news which certain radio stations took from the newspapers without their consent or that of the Press Associations. They persisted in these violations even after notice had been served upon them. One case of this kind in the State of Washington which the property rights of The in which the property rights of The Associated Press in the news had been violated by a broadcasting station was taken to a Federal Court. The Fed-eral Judge ruled against The Asso-ciated Press. An appeal was taken to a higher court. The United Press

and the International News Service agreed to share the expense of the appeal. On the other side of the con-troversy The Executive Committee of of the the National Association of Broadcasters is raising a fund to fight this appeal. Many members of the Na-tional Association of Broadcasters are using their influence to induce the As-sociation to withdraw from the case.

Efforts have been made by certain interests connected with the broad-casting industry to destroy the property rights of the newspapers and the Press Associations in the news through Press Associations in the news through legislation. This action was attempt-ed in the Legislature of the State of Washington where a bill was intro-duced to permit radio stations to take the news from the newspapers with-out their consent or that of the Press Accessitions. The legislation failed Associations. The legislation failed of enactment.

Radio Committee has only Your Radio Committee has only been able to report these violations and to make recommendations for legal action on the part of those who are in a position to defend these fund-amental rights. We believe, however, that through Your

further cooperative efforts on the part of some of the larger interests in radio and through continued effort on the part of the newspapers to co-operate with the radio industry as a whole, we will be able to eliminate some of the conflicts which exist in these spots.

Publishers must understand that Publishers must understand that the Press Associations and newspa-pers have no legal right to interfere with the broadcasting of news which has not been gathered by the news-papers or the Press Associations.

The newspapers and the Press Associations. sociations have no monopoly on the gathering or selling of news. The main point at issue between the (Continued on page 43)

Support for the proposal to continue the Press-Radio Bureaus came from John Ewing, of the Shreveport (La.) *Times*, who said that he has bought two radio sta-tions during the last year, and very soon found out that his listeners (who are also the readers of his paper) demanded news on the air.

ANPA's committee on advertising agents lined up squarely be-hind the association's two traditional watchwords: Preserve the dual rate intact, and continue the 15% straight agency commission. In both these matters it is thus aligned with the AAAA, and against the ANA.

Radio Competition

THE ANPA'S Bureau of Advertising stated in its report that newspapers are now "facing unusual competition for the advertis-er's dollar." According to the Rureau's estimates, national adver-tisers paid \$163,000,000 for newspaper space in 1934; a gain of 12.4% over 1933, as compared with a loss of 9.4% shown in 1933 as against 1932. Expenditures in magazines totaled \$113,500,000, a gain of 20.8%, and the Bureau thought the fact magazines showed a larger percentage gain than newspapers could be partly ex-plained by the fact that they showed a larger loss between 1932

and 1933—18.3%. Then, using the quaint word "broadcast" to denote broadcast advertising, the Bureau reverts to its habitual denunciation of radio as "an experimental medium".

In another section of its report, the Bureau of Advertising takes up the thread where the Clark Hooper survey left off, and reproduces charts which are alleged to show "How Radio 'Circulation' Shrinks."

The method of depicting homes in a row (developed by the CBS Sales Promotion Department) is used, and the figures appended tell

used, and the figures appended ten the following: "Of all 32,500,000 Homes in the United States.... "61.5% have radio sets.... "Of these, 87% are occupied, 7 to 10 p. m.... "22.4% have their sets turned on.... "4.5% are listening to a single program.... "3.2% can identify the advertiser or the product." Directly contrasting "Radio ver-sus Newspaper Circulation," the

sus Newspaper Circulation," the following claims are made: "Of all homes.... "87.5% read a newspaper.... "22,4% listen to

some radio program." The Bureau has neglected to

point out that it refers to "reading a newspaper" on a 24-hour day basis, while for some unexplained (because unexplainable) reason. radio listeners are presumed to be non-existent unless they choose to have their noses counted during the arbitrarily designated period from 7 to 10 p.m.

Without bothering to give Clark Hooper credit by name, the Bureau then quotes this organization's "findings," the fallaciousness of which has already been demon-strated in BROADCASTING, Feb. 15.

35 May 1, 1935 • BROADCASTING

Alka-Seltzer Takes the Air-way to Success

By H. S. THOMPSON Advertising Manager, Dr. Miles Laboratories Inc.

Liberal Use of Radio Time and Intelligent Merchandising **Combine to Bring Spectacular Jumps in Sales Volume**

OUR first radio broadcasting over WLS, Chicago, in 1932, looked like an answer to prayer — 33,000 sample requests from our Sunday afternoon announcements and no less than 200 from any state.

Mr. Thompson

The same idea occurred to all of us at the same time-the chainthat's all we need to put Alka-Seltzer over right! So we went on the chain; went high-hat; kept the same theme but engaged different talent-more expensive. Resultsfewer sample requests from the en-tire chain than formerly from one station alone.

Summer with baseball games as competition. Our 13-week contract expired, and we took a Sunday afternoon period the following fall over another chain. Thirteen weeks and few tangible results cured us,

and few tangible results cured us, we thought, of the radio habit. February, 1933, and the hour of the National Barn Dance from 10 to 11 p. m. (CST), was open for a sponsor. It took the combined ef-forts of the advertising and sales departments as well as all the colormorphin of our exerce. Wools salesmanship of our agency, Wade Adv. Agency, Chicago, to convince our board of directors that we might be able to get some results from this program. The Barn Dance had been on the air for seven years. For more than a year, it had been on at the Eighth Street Theatre in Chicago, packing the house and turning them away every performance at 75 cents admission.

Upward Go the Sales

AFTER ONLY two or three broadcasts, the sales in the Chicago area picked up a bit. A new president took office-and business increased. The banks were all closed—and business increased.

By mid-summer, the Chicago area was going so well that we were considering using the NBC basic blue network. But the hour --11 to 12 (EST). "Everybody's in body before that the the time." in bed before that time!"

A compromise was effected. The program was extended to Detroit and Pittsburgh by direct wire from WLS. The results proved that there are some towns in which curfew does not ring, at least on Saturday rights. The National Burn Dance is now on twice each Saturday ight, 9:30 to 10:30 (EST), and a special broadcast for Western States 9 to 10 (MST), 8 to 9 (PST).

They are still packing the house and turning them away at the Eighth Street Theatre in Chicago. Nearly half a million people have raid to see this show, and that's a real run for any man's show. Uncle Ezra? Well, he was very

popular on the Barn Dance pro-

WHEN Uncle Ezra calls for a "toot on the tooter, Tommy", millions are listening-and a lot of them are buying Alka-Seltzer. About a year after the product was introduced (1931), Dr. Miles Laboratories Inc., began to use radio. The record: 1932, not so hot; 1933, fair; 1934, up over 500%; 1935, January alone was far ahead of the whole year 1933, and shooting skyward. The bulk of Alka-Seltzer advertising has been done via the air waves. And here is how it was donea radio success story that is teeming with lessons in skillful merchandising and good promotion.

gram. He had a "powerful little five-watter in the friendly little city of Rosedale", broadcast over WLS at 1:15 p. m. We sponsored this broadcast for several months. Three announcements that we would send a photograph of the old Wren" and "Jumpin' Jennie Wren" and "Toots", a baby that had been abandoned in the hallway of his station brought between 56,000 and 57,000 requests. This from a 15-minute daytime broadcast over the single station.

Dealer Cooperation

WHAT more natural than that Uncle Ezra should be our selection for our network program? About 200 different transcrip-

tions have been made of the Comedy Stars of Hollywood. These transcriptions are for spot broadcasting over stations that reach an audience not adequately covered by our other broadcasts; for areas where the sales are lagging a bit, and for densely populated districts that can use more coverage than is given by our regular programs. News broadcasts are put on in

similar territories for exactly the same reason-to bring and keep our per capita sales per month up to or above our quota. These spot broadcasts have been continued in many instances, long after their appointed time for expiration, because the results have seemed to more than justify the expense.

Why have we been successful in our broadcasts?

Not having access to the results of other radio programs, we do not know whether or not we have had greater success than others. All we know is that we continue to broadcast and our sales continue to increase.

Like any truthful advertising man, I will confess that the principal reason for the rapid increase in the sale of Alka-Seltzer, is the merit of Alka-Seltzer. Cooperation of druggists has been, and still is, a mighty important factor in Alka-Seltzer sales. The druggists of

California suggested to us that they put on an Alka-Seltzer week for us in January. They asked nothing in return, but we entered into the campaign with them wholeheartedly, using generous newspaper space, a total of nearly 1,000 radio announcements on all stations in the state, and special placards on the front of street cars in larger cities. We installed window displays, counter displays, banners, etc., in 3,000 of the 3,400 retail stores in the state. From the amount of Alka-Seltzer sold in this one week, we are more than ever convinced that the druggist, wholesale and retail, is a mighty important factor in putting over any item he really wants to push.

In every town where we use a radio station, we put special detail men. We put in as many window trims as possible, and as many counter cards and soda fountain dispensers as the druggists will let us. The first duty of our special salesmen is to make both wholesale and retail druggists conscious of our product and the efforts we are making to increase the demand for

UNCLE EZRA

it. Orders are of secondary importance although they generally run to a considerable volume.

Why do people listen to the Alka-Seltzer Barn Dance? Frankly, we don't know. We believe that it is because most of them like the friendly atmosphere of the pro-gram. After all, the majority of us are just plain folks. We like the man who is informal and friendly. We like the man who takes us by the hand and calls us by our first name. That is why Rotary, Kiwanis and other so-called service clubs flourish.

Variety in Appeal

MANY of us grew up in small towns or on the farm. Nearly all of us have friends or relatives who of us have triends or relatives who did. The Barn Dance is popular for the same reason that "The Old Homestead", "The County Fair", "Shore Acres", and "Way Down East" were sure-fire hits 40 or more years ago. We have put on a lot of veneer since those days, but underneath we haven't changed much. Our reaction to clean wholesome entertainment is the same. Uncle Ezra, because he is human -quick tempered but kindly-stubborn, but underneath the surface, charitable and deeply religious—is attracting a large and constantly increasing number of listeners. The Comedy Stars of Hollywood

appeal to a different audience, the more sophisticated. As we use them, they are mighty effective in increasing the demand of Alka-

Seltzer. "Give me a toot on the tooter, "Give a toot on the tooter, Give me a toot on the tooter, Tommy. Special Announcement— Station MILES wants to express its appreciation of the fine work of the Wade Advertising Agency in producing the Alka-Seltzer Na-tional Barn Dance and the Uncle Ezra Programs."

Just a word about broadcasting results. Our records show that for the first 13 weeks, the increase in most sections is gradual. Then a jump in sales which becomes more noticeable as time goes on. In many cases, the increase over

sales made before our programs went on the air has been greater the fourth month than the com-bined increase for the first three months.

ANA to Convene May 5 For Semi-annual Session

AS IN PAST gatherings of the As-sociation of National Advertisers, closed sessions will precede the open meetings of the 26th semi-annual meeting of the ANA to be held May 5-8 at the Greenbrier White Sulphur Springs, W. Va

At the closed radio session May 7, program, commercial announce-ment, merchandising and audience check subjects will be discussed with speakers including Chester J. La Roche, president of Young & Rubi-cam; Dr. D. P. Smelser, Procter & Gamble and George Bijur, director of sales promotion, CBS.

A Thousand Dollars a Minute

Most anniversary celebrations are better undiscussed...organized to revive and glorify the forgotten past . . . occasions to which the guests of honor attend with regrets or develop severe cases of "prev. appointm'ts"...BUT THIS ONE WAS DIFFERENT.

KFIPB, the Warner Bros. station in Los Angeles, recently celebrated ten years on the air with a thousand-dollar-a-minute cast in a two hour and a half program that made history. On this one program were probably a greater number of "big name" stage and screen celebrities than had ever been heard over any station.

Bette Davis, Dolores Costello and Al Jolson share the microphone in a 3-star act.

Every star invited *arrived*, and *stayed* (that's a world's record) with the one exception of Joe E. Brown who was ill in bed at home.

Some thirty individual acts were rehearsed and broadcast. Leo Forbstein's Vitaphone Orchestra and the Vitaphone Men's Chorus gave a notable musical performance.

The anniversary broadcast was made from the studios of KFWB, located on the actual stage where the first talking picture was made. "In fact," said Harry M. Warner, president of Here's just part of the highest-priced program ever broadcast. From left to right, Mr. and Mrs. Pat O'Brien, Dick Powell, Joan Blondell, Phil Regan, Maxine Doyle, Frank McHugh and Lyle Talbot.

Warner Bros., "it was through this station that talking pictures were made possible. It was during the construction of KFWB that Frank Murphy, our electrical wizard, called our attention to an instrument that convinced us talking pictures could be given to the public."

On the program was Monte Blue, a film colony favorite, whose voice was the first to be heard on KFWB's first broadcast, ten years ago.

Dick Powell dashed in, whispered something about a "heavy date, get me out early"...ended up by being one of the last to leave.

The notable team of Harry Warren and Al Dubin, Hollywood's song-writing fools, exhibited their "Babe Ruth ways."

Benny Rubin, Bob Armstrong, George Brent, Winifred Shaw, Warren William and Dorothy Dare were a big part of the "Thousand-dollara-minute" cast.

Monte Blue, Harry Warner, Frank Murphy and Al Jolson do a little harking back.

Al Jolson flew in from Palm Springs to ap pear ... had this to say ... "I don't think an radio program has ever been given with so man stars and I think that if IV arner Bros. had to pay, they would have really gone out of busines tonight."

Here's as many of the cast as could be pulled awa from the birthday cake long enough to be photographed.

AND THE POINT... because of its close tieu, with motion picture people and the nature of it programs, KFWB is a real force in the broac cast field in Southern California; that it slice off a considerable share of the listening audienc in this area; that its rates, plus coverage, de serve consideration in air advertising in thi the nation's fourth market.

KFIVB is owned and operated by Warne Bros. Motion Picture Studios. It is located o the Warner Bros. lot in Hollywood and broad casts from the largest sound stage in the Wes

Evaluating the Radio Program in Advance

Bv R. CALVERT HAWS Radio Department, Henri, Hurst & McDonald Inc., Chicago

A Formula Developed by a Successful Producer Dissects The Essential Elements of an Effective Broadcast

GREAT many questions are sked in this era of successful raio advertising as to how a com-nercial program can be judged eforehand. To satisfy my own nind, I have set up a formula thich appears to cover the essen-ial points. I present them hererith for whatever good they may o to others interested in program roduction and presentation.

In reading the script, I check the ollowing things: Form, action, rogression, good taste, balance, ariety, tempo, length.

A Matter of Form

O MAKE each of these a little learer, the following is a brief ynopsis of what I mean by each t these points: ORM: In matter, there are three

asic forms: A circle — variaion an oval; a square—variation n colong; a triangle. Now a gramid, a mushrooni, a tree, a hampagne glass, a pear, are all asically triangular in shape alhough each one is a variation. On vase you have a triangular base, circular body and an oblong neck, ut the form as a whole is tringular. Therefore, successful radio pro-

rams should have a basic appeal nd while the variations are nunerous, for success the script riter and producer should have n mind a form as the basis on which he builds.

In radio there are three distinct orms: Comic; straight (sex in its roadest sense); tragic.

Plenty of Action

CTION: A successful program onsists of three major actions: Inroduction, happening, a clearing p. To illustrate: 1. You introduce the fighter in

prize fight. A blow is struck; ou await the result.

2 You announce Mr. Jones will peak. He makes a statement, ums up.

3. You introduce Jack and Jill. hey say they are going up the ill for water. They go. Finale: Jack falls down and breaks his rown and Jill comes tumbling fter."

4. An orchestra is introduced. t plays a number which in itself ulfills the happening and clearing The verse and the chorus ither musically or orally, or both, ake a statement and clear it up. ROGRESSION: A successful adio program must progress. It an't stand still. A successful nusical show is simply a number f pieces of music put together and ecomes one big number progresively.

You can't imagine a successful nusical comedy which opens with verybody in the show on the stage inging the hit number and ending ith a soprano and duet. A sucessful radio show must build to a limax. Anti-climaxes tire an audi-

TO ANSWER the thousands of questions shot at people in radio about how to best judge a program is well nigh impossible. In this article the author, who has been highly successful as a program builder, and who has the background of a station manager, gives his formula. He has directed the series over CBS for the Selby Shoe Co., Portsmouth, O., featuring Mrs. Roosevelt, wife of the President, which ended on April 19 for the Summer.

ence and lose their interest. The same law of progression applies to talks and script shows.

GOOD TASTE: Radio has been ever careful in this regard. Other forms of entertainment have not been so careful. In radio you cannot select your audience — "for adults only" does not apply. Nor does the time of day help. There-fore, a radio program to be successful must always in every detail be in good taste. It must not be offensive to any creed or section of a race or age.

Holding Interest

VARIETY: Variety is the law of interest. You have seen people pick up a book and say "that book looks dry, page after page of solid type." A trip on the ocean where for day after day one sees only the same old sea, gets monotonous. Riding on a train through the desert-nothing but sand. A good speaker injects a joke every so often into his talk, or varies it with a personal reminiscence. A successful radio program, there-fore, must have variety to hold and retain interest.

BALANCE: This is something that only instinct can distinguish. If you entered a room and found the fireplace on the ceiling, at once you would feel something was wrong. A picture hung badly-instinctively you feel just how high or how low it should be. A tree with just the trunk showing above the lower branches at once seems out of harmony. Stage setting, a picture, an advertisement out of balance, a building that protrudes instead of recessing in its progress skyward, a flagpole smaller at its base than at its top-all are against our ideas of proportion and so pro-duce a feeling of dissatisfaction.

Many a play has been a flop because of too much of the leading man or leading lady. Script writers and producers feel as it were the right spot in which to place the commercial, the music or to in-troduce the great artist. To cut dialog, to introduce new charac-ters, etc. A successful radio program must have balance.

TEMPO: If I stand 10 feet away from you with a basket of tennis balls within my reach and throw one to you, and after you have caught it throw you another,

MR. HAWS

chances are I can throw each one fairly fast and you won't drop any. But if I throw them at you even slowly, but in rapid succession, you may catch the first one or two and then throw up your hands to shield yourself. The same way with throwing thoughts over the radio. They must be presented so that the audience can catch each one, assimilate it and be ready for the next one. Otherwise they stop mentally and lose part of the stop speech trying to get the part they missed. This applies to all sounds coming over the radio. Composers bar after bar, sometimes repeat the exact thoughts, sometimes the melody with variations, but the central melody or theme is there.

Proper Timing

THE SUCCESS of Amos 'n' Andy is often attributed to the tempo of their shows. No pains are spared to be sure that the audience has properly assimilated a thought before they proceed to another one. If people come in and out of a scene too quickly, if they are not properly introduced, if a speaker rushes from one thought to an-other without being sure his radio audience has thoroughly understood what he is driving at, a feeling of dissatisfaction is built up in the listener's mind, and the pro-gram is not successful. Tempo is vital to a successful radio program. LENGTH: I have left this to the last. No scene, no musical number, no speech, no commercial should be longer than is necessary to adequately put across the thought you wish to convey. The trouble with many writers, speech makers and some composers is that they so often detour from the main thought only to try and cut across lots to get back to the main thought.

The last word is of great advan-tage. In courts of law, the lawyer for the defense trys to anticipate the final address of his opponent to the jury and to take as much out of it as he can, because the last thought in the mind is often the one best remembered. Copywriters of advertisements invariably end their copy with an urge to act. So, in radio continuities the length should be sufficient to tell the story, driving home the most important point at the end of the speech or the production. Otherwise, anti-climaxes appear which are bad and produce an unpleasant feeling in the mind of the listeners.

New Spot Series Started by Colgate

COLGATE-PALMOLIVE - PEET Co., Jersey City, begins an exten-sive spot campaign late in April for Crystal White and Octagon soaps, using 15-minute transcripttions, twice weekly. Entitled Thea-tre of Romance, the shows are written from stories that have appeared in Hearst's Cosmopolitan magazine.

magazine. Through Benton and Bowles Inc., New York, the transcriptions have been placed on the following stations for Crystal White: KFH, Wichita; KMBC, Kansas City; KOMA, Oklahoma City; WFAA-WBAP, Dallas; WOAI, San Au-tonio; KWK, St. Louis; WOW, Omaha; KOA, Denver, and KSTP, St. Paul.

Omana; KOA, Denver, and KSII, St. Paul. For Octagon Soap: WCAU, Philadelphia; WOR, Newark; WBAL, Baltimore; WRVA, Rich-mond; WBT, Charlotte; WSB, At-lanta; WTOC, Savannah, and WAPI, Birmingham.

General Food's Radio

GENERAL FOODS Corp., New York, began sponsorship of Tony and Gus on the NBC Blue (basic) network April 29, to promote Post Toasties and Post 40% Bran Flakes. The script is written by George Frame Brown, who plays Gus, while Mario Chamlee, tenor of the Metropolitan Opera Com-pany takes the part of Tony. The show is at 7:15 p. m. to follow Amos 'n' Andy five nights weekly from Monday through Friday. The contract is for 26 weeks and the contract is for 26 weeks, and the agency is Benton and Bowles Inc., New York. The client is using a larger proportion of the total ap-propriation on radio, as compared with other media there is using with other media, than in previous years' campaigns for these products.

Dr. Stewart Is Elected Vice Chairman of FCC

DR. IRVIN STEWART, member of the FCC, on April 18 was elected vice chairman of the agency, in addition to his duties as chairman of the Telegraph Division. A Texas Democrat, and the youngest member of the seven-man commission, he will serve in his new capacity as acting chairman when Chairman Anning S. Prall is unable to preside. He will not, however, necessarily serve on each of the three divisions as an ex officio member, since the act provides that the c,h a i r ma n shall designate who shall sit on each of the divisions in the absence of regularly assigned members.

At the same meeting, a motion put by Dr. Stewart, providing that the FCC itself in general meeting shall pass upon every staff appointment, however minor, was carried. Heretofore, this function has been left to the appropriately designated personnel officer in cases of non-executive posts, as in most governmental agencies..

1

Ugliest Man

A NEW version of the Man in the Street type of program tried by WGPC, Albany, Ga., was the "ugly man" contest, sponsored by Goodrich tire stores. Listeners were offered passes obtainable at Goodrich stores and more than 4,000 appeared for a special program staged in a theatre. So successful was this idea that Ed Sims, sales manager of WGPC, despite the fact that he received a number of votes as the "ugliest man", decided to stage a "biggest liar" contest.

Beverage Sports Series

STAN LOMAX, sports commentator of WOR, Newark, will broadcast two new series of programs, with Fiegenspan Brewing Co., of Newark, and Frantz Distillers Inc. as sponsors. The Fiegenspan series began April 30 while the Frantz programs start June 3.

WJR Will Affiliate With CBS in Fall

NBC Now Is Negotiating for A New Outlet in Detroit

A SHIFT in CBS and NBC outlets in Detroit will take place Sept. 29 when WJR, 10,000-watt clear channel outlet of the NBC-Blue network switches to CBS and CKLW, present CBS outlet, either returns to independent status or moves to the WJR position. Also figuring in the negotiations for the realignment is WXYZ, operated by the Kunsky-Trendle Broadcasting Corp., and now aligned with Mutual Broadcasting System. The CBS-WJR contract is for five years.

Negotiations whereby WJR decided to shift to CBS largely grew out of the station's failure to reach an accord with NBC on its new station compensation plan. Arrangements with CBS were made in conversations between William S. Paley, CBS president, and G. A.

SOUTH CAROLINA'S RICH

You cannot afford to overlook South Carolina's richest market: Here are people that spent \$4,000,000.00 more for food, clothing, automobiles, etc., than was spent in the second best county in South Carolina.

Greenville County for the same year accounted, for 20% of the entire wholesale business for the State of South Carolina.

RICHEST MARKET Within fifty miles of WFBC's trans-

within fifty miles of WFBC's transmitter there are 656,992 prosperous people. 76% of them own radio sets and are loyal listeners to WFBC.

We invite you to investigate the rich possibilities advertising over WFBC offers the manufacturer.

1000 watts, 1300 kilocycles (5000 daytime authorized) High Fidelity RCA Equipment

Owned and operated by The Greenville News and Piedmont — the Leading Newspaper in South Carolina. Net Paid Circulation 45,000. Richards, president, and Leo J. Fitzpatrick, vice president and general manager of WJR. While figures were not divulged, it is understood that under the CBS-WJR contract, based on CBS business this year, the station will realize in the neighborhood of \$35,000 more annually from its network programs. Roughly, it is estimated that during the current year WJR's contract with NBC yielded it something like \$200,000.

Seeks 50 Kilowatts

MEANWHILE, WJR is making plans to petition the FCC for an increase in power from 10,000 to the maximum 50,000 watts. Mr. Fitzpatrick was in Washington April 22 to discuss the matter with his attorneys and with FCC officials. The station is on the 750 kc. clear channel.

It is understood that WJR's severance with NBC will in no way affect the status of its sister station, WGAR, Cleveland, as an NBC-Blue outlet. WGAR is controlled by the Richards-Fitzpatrick organization.

In addition to WXYZ, and CKLW, a Canadian-licensed station, control of which is held by George B. Storer, consideration also may be given by NBC to an affiliation with WMBC, Detroit, now operating with 100 watts. The station has pending an application to increase its power to 500 watts and to shift its frequency from 1420 kc., a local channel, to the regional channel of 1300 kc. The station is owned by the Michigan Broadcasting Co., of which W. Wright Gedge is executive.

Contract Problems

CONFERENCES were held in New York April 24 between Mr. Storer, his Washington counsel, Horace L. Lohnes, and NBC officials, in connection with a possible NBC affiliation. One of the issues involving the station has been the unsettled state of Canadian radio regulation and periodic frequency shifts. CKLW now is assigned to the 1030 kc. channel, a Canadian exclusive channel. Moreover, there has been some controversy about the broadcasting of U. S. commercials over Canadian stations on Sundays—a serious point of contention with respect to CKLW and its network affiliation. These matters, it is understood, are ap proaching satisfactory settlement insofar as the Windsor-Detroit

outlet is concerned. An inkling also has been given that CKLW might contest the CBS cancellation of its contract, effective in September, on the ground that the document still has a yea to run from next June. The CBS contention evidently has been tha since CKLW has been shifted in frequency by the Canadian au thorities, the terms of its contrac have been abrogated automatic cally.

Fisheries on Network

BOOTH FISHERIES Corp., Chi cago, starts a CBS program on 1 stations May 2 under the titl *Fish Tales.* It will be broadcas Thursday mornings, with a secone program on Tuesdays to be addee Oct. 29. The company recentl, placed its account with Sellers Ser vice Inc., Chicago.

Proposal to Change Disc Rules To Be Heard June 20 by FCC

Whole Issue of Transcription Regulations May Come **Before Commission Following Petition by WBS**

ACTING upon a petition filed last autumn by World Broadcasting System Inc., together with resystem Inc., together with re-quests that regulations governing the broadcasting and announce-ment of transcriptions be clarified or amended, the Broadcast Division of the FCC has set June 20 for argument on possible alteration of existing regulations.

In a notice issued April 19 the FCC ordered all parties who wish to participate to file their notice not later than May 18. Simultaneously, it was stated orally that entire issue of transcription regulation, rather than merely that of the WBS program .service, would be thrown open. The FCC notice of hearing follows in full text: Upon consideration of a petition filed by World Broadcasting System, Incorporated, New York, New York, tor an Amendment to or Clarification of Paragraph 176 of the Rules and Regulations of the Commission, the Broadcast Division will hear argu-ment on this subject which pertains to mechanical paraclustions Such to mechanical reproductions. Such argument will be held June 20, 1935, beginning at 10:00 A. M. at the of-fices of the Federal Communications Commission, Washington, D. C. All parties the wire to mericipate

All parties who wish to participate should file their notice of desire to be heard with the Commission not later than May 18, 1935.

Change in Rules

IN ITS BRIEF filed Oct. 17 through counsel, Paul M. Segal and George S. Smith, of Washington, WBS asked that the rules for announcement of transcriptions be

revised to cover explicitly the WBS program service. The issue of elimination of the transcription an-nouncement altogether, a perennial one since transcriptions became popular, was not specifically raised. It was asked that definite language be added to the existing regulations, and the request also was made that WBS be given an early opportunity to offer evidence and present oral arguments.

The language proposed by WBS to cover transcriptions in its li-brary to eliminate the necessity of the announcement after each num-

"In cases where a library of electrical transcriptions made exclusively for broadcasting purposes is so made that a number of individual selections are used in the presentation of a coherent and coninuous program, then even though that program is not produced from one individual mechanical reproduction, but is assembled into a continuous program through the use of selections from several such reproductions, the program is nev-ertheless an electrical transcrip-

tion program and the announcement thereof is governed by the first sentence of the second para-graph of Rule 176. The use in such program of various commercial credits or announcements shall not be considered as interrupting the continuous character thereof,"

Other Revisions

THIS ISSUE grew out of the fact that some FCC employes had interpreted the regulation now in force to mean that in the case of the WBS service, announcements of the "electrical transcription" or "mechanical reproduction" would have to be made after each number from a given disc, rather than at the 15-minute interval specified.

Aside from this issue, however, Aside from this issue, however, the current understanding is that? the Broadcast Division also will take testimony on the broader is-sue of elimination of the announce-ment "this is an electrical tran-scription", altogether. It is indi-cated, too, that the Broadcast Di-vision will consider other possible provision south as these new in revisions, such as those now in force in connection with call letter announcements, wherein the stations are required to make such announcements only at one-half hour intervals, or changes in lan-guage designed to clarify the mat-

ter. Opposition to the WBS proposal, and to any proposition that the announcement be eliminated, doubtlessly will be forthcoming from the American Federation of Musicians, which repeatedly has opposed transcriptions on the ground that they tend to bring about unemployment for musicians in radio studios. Networks, like live talent performers, also have looked askance upon the elimination of the transcrip-tion announcement, maintaining that there should be some differ-entiation between "live talent" and recorded programs so the public may be kept informed as to the character of program.

NAB Resolution

THE ISSUE of elimination of the announcement requirement was first raised in 1933 at the NAB convention, when a resolution was adopted petitioning the old Radio Commission to abolish the require-ment. At the convention last October in Cincinnati, similar action was taken. As adopted by a record vote, last year's resolution reads as follows:

Resolved, that the National Asso-ciation of Broadcasters hereby reaf-tirms the resolution adopted at its, 1933 convention referring to the elim-ination of announcements for electrical transcriptions produced especially for broadcasting, and directs the conven-tion resolutions committee to draft an appropriate resolution for this pur-pose to be transmitted to the Federal, Communications Commission.

The 1933 resolution reads as follows:

follows: Whereas, the use of the electrical transcription method of broadcasting programs is generally accepted by both stations and by listeners, and has become an important economic factor in the operation of broadcast-ing stations, and Whereas, there is definite evidence of serious loss in income to stations because of existing requirements that electrical transcription programs must be so announced, and Whereas, there has been sufficient;

Whereas, there has been sufficient progress in the manufacture of electrical transcription programs that the reproduction of the majority of such (Continued on page 39)

In the greatest mass radio survey ever conducted in Los Angeles, KHJ, the Don Lee-Columbia station had the largest number of listeners in the Los Angeles Metropolitan District. It showed that an average of nearly one-third of the 639,895 radio families in this rich area are *habitually* tuned to KHJ.

Los Angeles Metropolitan District has o of the population and 78% of the il sales of the entire 11 Southern Calitia counties. KHJ completely domis this market.

L. C. Probert, Vice President-Advertising Manager, Chesapeake & Ohio Railroad.

Success in Introducing Congoin Traced To Campaign Using 140 Radio Stations

By Ralph Lockwood

Vice President Lockwood-Shuckelford Co.. Los Angeles FORTY TONS of Congoin (health beverage) a month is a lot of merchandise to move, but radio is doing it. As a matter of fact, radio launched the idea about 12 months ago and has carried the entire burden. The only additional advertising other than radio has been a minor use of trade publications and, of course, dealer displays and the other necessary literature for point of sale effort.

Outstanding in the campaign of the Congoin Co., Los Angeles, is the fact that it is doubtful if this product could ever have been introduced to the people of this country without radio when you realize that Congoin is an entirely new product to this continent. It necessarily carries a long story, longer than the public will read but with sufficient interest that they will listen to it. Some 140 stations carry the programs.

Wide Distribution

THE UNUSUAL feature of the campaign was a series of programs over KNX, Hollywood. This campaign was run for a period of five weeks. Congoin sponsors the In-Laws, five nights a week, over this station and has for many months. An offer was made—a picture of the In-Law cast in return for an evidence of purchase, consisting of a box top. The listeners were instructed if their dealers did not carry Congoin they

could send their dollar direct to the station and receive a package of Congoin along with the picture. In five weeks, from all of the 11 western states, Alaska and in many states east of the Rockies, 16,542 In-Law fans responded.

In-Law fans responded. To get some idea of the power of radio, the present distribution of Congoin in the 11 western states tells the story, said to be virtually unparalleled in the history of trade. The first distribution of this beverage was made last August. Today it is distributed through over 20,000 drug and grocery stores in the 11 western states. The restaurant business, served by individual tea bags, is growing with unusual rapidity. Congoin is supported by nearly every wholesale druggist and grocer in the West.

The present radio schedule of Congoin gives complete coverage in the West. KNX In-Law programs are supported by three time signals a night. In the San Francisco area John Nesbitt, narrator, in his famous Headlines of the Past has taken the history of Congoin into hundreds of thousands of homes via KFRC. Spot transcription broadcasts have been carried on in all of the population centers of the West. The people living in and around Chicago are being sold Congoin direct over two stations—six days a week over WLS, sponsoring the Ma and Pa skit, and six nights a week over WJJD, using Transradio News.

Following the policy of Congoin

Business is better in Washington State. And business is much better for those firms who use KIR. 5,000 WATTS Sales managers will do well to advertise in this favored territory over this favorite station. Fisher's Blend Stations, Inc., operating KOMO-KJR, Seattle, Washington. N. B. C. For information consult **NETWORK** Edward Petry & Co., Inc. SEATTLE Chicago New York Detroit San Francisco WASHINGTON

TEXACO'S SPEED Signs Baseball Series One Day, On the Air the Next-

ESTABLISHING what is believed to be a record for speed, the Texas Co. (Fire Chief gasoline and Texaco Petroleum products) became the sponsor of all home games of the two Chicago major league baseball clubs over WCFL on April 16. Ac cording to S. J. Andrews, vice president of Hanff - Metzger, Chicago, agency which placed the account, the program was okehed by the Texas Co. at noon April 15 and it went on the air the following afternoon.

The oil company is sponsoring the play-by-play broadcasts of all of the home games of the White Sox and Cubs, under the contract. Hal Totten, dean of Middle West sports announcers, and a pioneer of broadcasting from the playing field, is handling the broadcasts.

these new markets are opened through direct sale to the consuming public. Some 140 stations on the schedule have taken the story of Congoin throughout the length and breadth of the United States. The progress of Congoin's radio activity has been one of the most interesting success stories to come from radio on the Coast.

Merchandising Tieups

CONGOIN has never given away free samples. It has, however, a display carton carried at the cash registers of the drug and grocery stores. This displays 24 ten-cent trial packages. They are never mentioned over the air, but in the last six months over 800,000 have been sold. Besides the trial package Congoin is packed in 100, 200 and 400 cup sizes, and the individual bag cartons of 100 Congoin bags for individual service. This latter is for cafe, restaurant and soda fountain distribution. Supplementing this radio effort, it has been backed by window strips, window displays and 50,000 sevencolor lithograph color cards.

The Congoin success proves beyond all question the tremendous power of radio advertising. It proves that when you have an interesting story, presented in an interesting way, the public will respond, and their response will reflect in sales. The present activity west of the Rockies is now developing the Congoin business in a dozen or more trade centers, and by maintaining the present schedule national distribution will be secured within the next few months.

New Representative

GEORGE ROESLER has opened offices as a station representative at 43 East Ohio St., Chicago, representing KARK, Little Rock, Ark. and the Wisconsin League of Radi Stations, comprised of WKBH, La Crosse, WTAQ, Eau Claire, WHBL Sheboygan, WHBY, Gree Bay WCLO, Janesville, WRJN, Racine and WIBU, Poynette. For severa years commercial manager of KOIL, Omaha, Mr. Roesler was later eastern sales representative for Edgar Rice Burroughs, Inc (Tarzan transcriptions), and was recently associated with the Berl Horswell Co. Mr. Horswell has closed his Chicago office and is now in La Crosse, Wis., as assistant to Joseph Callaway, head of WKBH

Sponsors Revising Drug Continuities

Cooperate With FCC to Avoid Trouble Over Programs

COOPERATIVE steps to eliminate objectionable continuities are being taken by several of the medical service and medical products accounts cited by the FCC as being under investigation, it was learned in official quarters April 26. Following disclosures in the April 1 issue of BROADCASTING of more than a score of accounts against which complaints had been made, a number of the manufacturers or distributors of the products contacted the FCC and the Federal Trade Commission to ascertain how they could modify their commercial credits to avoid any possible punitive action against the stations which had been cited.

Continuities Revised

MEANWHILE, a general toning down of such advertising was apparent, with many stations moving far more cautiously than in the past. The FCC maintained its silence with respect to new complaints on the ground that such matters must be held strictly confidential until full investigations are made. It is understood that there are now pending before the FCC about three-score complaints having to do with station programs and other operations construed as in possible violation of regulations.

in possible violation of regulations. In all of its dealings regarding programs, the FCC is now emphasizing that it is doing nothing, and

WOR Rate Increase

AN INCREASE in evening rates and introduction of a more liberal discount plan, promoted by the increase in power from 5,000 to 50,000 watts, together with "a substantial gain in radio sets, and an estimated increase of 50% in listeners" was announced April 20 by WOR, Newark, to become effective one month later. As against the former night rate of \$750 per hour, \$450 per half hour and \$300 per quarter hour, the new rates are \$925, \$555 and \$370, respectively, with day rates remaining the same. Prior to May 20, WOR will accept contracts at the old rates for the first 13 weeks, providing the broadcasts begin by June 20. As in the case of the readjusted network schedules, the buyer of time will benefit according to the quantity of time purchased per week, and in addition the advertiser will receive a 10% rebate at the end of 52 weeks of consecutive broadcasting.

intends to do nothing, that will violate the provisions of the law prohibiting any exercise of program censorship on its part. Nevertheless, Chairman Anning S. Prall reiterated that there was no intention whatever of "letting down", and that the FCC already is seeing the fruits of its efforts in the elimination of improper or border-line programs.

GEORGE B. STORER, Detroit broadcaster and operator of CKLW, Windsor, Ont., has filed an application with the FCC for a new daytime station on 680 kc. with 1 kw.

PRESTO "INSTANT" RECORDER

Fulfills the insistent demand by Broadcasting Stations and Electrical Transcription Studios for highest quality, highest fidelity recording apparatus. The list of stations now using Presto Equipment reads like the "Blue Bock" of Broadcasting. And, all the better recording studios are Presto equipped.

FEATURES

Turntable — 2 speeds — 78 and 33 1/3 R.P.M. Records on either aluminum or acetate. Interchangeable feed screw for either inside out or outside in, at any number of lines per inch. Accurately turned cast aluminum table with extra heavy rim for maximum filtering. Amplifier has 92 Db gain—10 watt output. Flat within 1.5 Db from 30-15,000 cycles. Copper oxide Weston volume indicator. Power supply for preamplifier and radio tuner. Equipped to handle 2 turntables for continuous recording. Has 2 controls. Gain and selector switch (radio — radio receiving, play back, microphone receiving, microphone P.A.).

Everything for recording, from a needle to a complete studio installation.

Somehow, somewhere, the idea has got around that people don't listen to their radios in the summer. That loud noise you hear is us laughing.

Out here in the Buffalo Area, radios are just as popular in the dog days as they are in the winter time—and there's an even larger listening audience.

That's no exaggeration at all. The Buffalo Area is pretty much of a vacation territory, you know. There's Niagara Falls drawing thousands of tourists every week. There's Lake Erie literally lined with cottages on both the American and Canadian Shores. There's Lake Ontario with almost as many summer homes. And there's also the automobile radio which dealers tell us is selling like hotcakes hereabouts.

Those are the reasons why we say "Pfui on dog days". We know from past experience that radio advertising is highly effective throughout the summer months in the Buffalo Area. Advertisers who tried it just to keep us from pestering them any more got results that surprised everybody but the Buffalo Broadcasting Corporation.

The time is ripe right now to lay your plans for a summer radio campaign in the Buffalo Area. When you put one on over Buffalo Broadcasting Stations WGR-WKBW you command the largest regular listening audience on the Niagara Frontier. You reach the spending public—and you can pick the most advantageous periods to put your message across.* Think it over.

* Buffalo Breadcasting Corporation Stations WGR-WKBW divide Columbia Broadcasting and Buffalo Broadcasting productions between them, enabling you to pick and choose your time in a way that's impossible when one station carries chain programs.

Baseball Stars Signed

SPONSORED by General Mills Inc., two of baseball's outstanding stars will be featured in a nightly baseball review over WCAU, Philadelphia, in which they will tell the "inside story" of the day's baseball game. Left to right, in the above photograph, are Jimmy Wilson, manager of the Philadelphia Nationals, Dr. Leon Levy, president of WCAU, and Jimmy Fox, captain of the Philadelphia Americans. Nightly ten minute talks will be given at 6.45 p. m. from the dressing rooms of one or the other of the elubs, depending upon which team is playing on home grounds. The account was placed through Blackett-Sample-Hummert Inc., Chicago.

Waytrol Series

NUTRITIONAL RESEARCH Inc., Los Angeles, on April 17 started a 30-day test program on KECA, Los Angeles, thrice weekly. Advertising Arts Agency, Los Angeles, handles the account and the program is captioned *Health News Reporter*. The sponsoring firm recently entered the national market and produces "Waytrol", a weight control nutritive in powder form. Other stations in the 11 western states will be used later if the opening campaign is successful.

Disc Firm Control Is Taken to Court

COURT action in Los Angeles in April indicated a three-cornered legal battle for the control of the Radio Transcription Co. of America, which maintains studios in Hollywood and offices in New York and Chicago.

Action was brought in superior court by G. Y. Clement, a stockholder, who asked for the removal of Freeman Lang and Everett K. Barnes as directors. He asked for an accounting of funds of the corporation.

Two cross complaints were on file April 19. One was placed by, Messrs. Lang and Barnes and Gertrude De Blin, also a director. They asked for removal from the directing board of C. C. (Cash and Carry) Pyle, sales manager, and John J. Wilson, secretary-treasurer, on the grounds that they exceeded their authority. They also asked for an accounting of expense funds used by Mr. Pyle.

The second cross-complaint was filed by Mr. Pyle and called upon the court for a declaration of the respective rights of both Mr. Lang and Mr. Pyle under an alleged voting agreement. His contention, as stated in the document, was that under the specified agreement Mr. Lang lacked a right to vote any of the stock of the corporation without his (Pyle's) concurrence.

FORD dealers are sponsoring Mr. Gallagher and Mr. Shean, Juniors, sons of the famous old song team, on WEAF, New York, six evenings weekly.

Sales of Summer Time On Networks Increasing

SUMMER schedules of networks will overcome much of the usual warm weather letdown, according to present indications, with NBC announcing that bookings already are 25% over 1934. Sixty NBC clients, as of April 19, had signed to continue during the summer, 37 of them having been users of the network for more than a year. In all, 74 sponsored programs are booked.

Expenditures on NBC for the four summer months since the network started have been: 1927, \$923,720; 1928, \$2,482,128; 1929, \$4,251,278; 1930, \$6,545,597; 1931, \$7,953,082; 1932, \$7,957,685; 1933, \$5,953,862; 1934, \$8,253,005.

TO HELP children who listen to the broadcast adventures of Orphan Annie see her in a circus, to help the circus sell more seats in the afternoon, and to increase the sale of its Ovaltine are the three purposes of a tie-up recently effected between the Wander Co., Chicago, and the Cole Brothers-Clyde Beatty Circus.

In the serial program, broadcast each weekday afternoon over an NBC-WJZ network, Annie is beginning a new series of adventures with a mythical circus. In reality, there is an Orphan Annie in the Cole Brothers-Clyde Beatty Circus which opened in Chicago on April 20, who may be seen with her dog Sandy throughout the show's entire season.

By an exclusive arrangement between sponsor and circus management, any child presenting an Ovaltine carton-top at the ticket office will be admitted at a reduced rate (a 40-cent seat for the carton-top and 25 cents) at any matinee performance except Saturday or Sunday. This arrangement, announced on each broadcast, will be continued during the road tour of the circus, which will include approximately 150 towns. The plan was conceived and carried out by the Chicago office of Blackett-Sample-Hummert Inc., in charge of the Ovaltine advertising.

AN AMATEUR program especially for child talent has been started by WFBL, Syracuse.

WLW Directional Signal On 500 kw. Is Analyzed THE FCC is holding in abeyance consideration of the protest of WOR against WLW's resumption of operation with 500,000 watts at night until it can review the technical analysis of the super-power operation with the new WLW directional or "suppressor" antenna,

operation with the new WLW directional or "suppressor" antenna, it was learned April 25. Action is unlikely until the regular FCC meeting May 7. WLW resumed its 500,000-watt night operation experimentally with the new antenna on April 24 and observations are being made by the FCC, Canadian Radio Commission, WLW and WOR, to ascertain the signal pattern and the degree of interference, if any.

WOR contends that WLW's use of a directional designed to curtail interference toward Toronto, where CFRB complained of blanketing, would result in intensifying interference with it, since the Newark station operates on the adjacent channel of 710 kc. After analyzing the results, the FCC then will consider the WOR protest. Both stations are outlets of the Mutual Broadcasting System, and, it is openly indicated, some resentment has arisen from the protest.

Client's Audition Room Placed in New Offices By Free & Sleininger AN AUDITION room for clients, modern in style and equipped with wide-range Western Electric reproducing equipment, has been included in the newly-enlarged Chicago quarters of Free & Sleininger Inc., at 180 N. Michigan Ave. In addition to the audition and

cluded in the newly-enlarged Unicago quarters of Free & Sleininger Inc., at 180 N. Michigan Ave. In addition to the audition and control rooms the added space includes a number of private offices which will be occupied after May 1 by the Chicago staff of Free, Johns & Field Inc., affiliated firm of station representatives.

tion representatives. On May 1 the New York office of Free & Sleininger Inc., will move into larger quarters at 110 E. 42nd St. These will contain audition and control rooms similar to those in the Chicago offices and will house the New York staff of Free, Johns & Field Inc. The enlarged quarters in both cities are in line with increased activities in the sale of transcribed radio programs, it was stated by James L. Free, president of both organizations.

Recording Artists Refuses to Supply Names of Licensees

Proceeding With Plan to Exact Fees for Record Broadcasts

DESPITE inquiries from stations and from the NAB respecting its membership and its right to assess royalties on the performance of phonograph records, the American Society of Recording Artists Inc., Hollywood, has thus far failed to supply this information, but informed BROADCASTING's correspondent in Hollywood April 22 that it intends to "proceed" with its original plans, as of May 1. So far as known, no stations have signed the licenses proposed, which are regarded as "extortionate" in the extreme, plus the fact that the organization has not proved its right, legally or otherwise, to collect the royalties.

Strangely enough, George H. Hall, managing director and Arthur W. Levy, executive secretary, told BROADCASTING's correspondent that they had received "many communications from broadcasters" and that "in the main their reactions have been favorable." They added: "While we will not, at this time, release the names or numbers of the stations that have signed with us, we can say that the response has been favorable to the extent that we shall go ahead with the original plans. These call for a service fee of \$5 a month to stations to pay for log sheets, clerical expense, postage and so forth. In addition, stations will pay from 5 to 15 cents per performance for each phonograph record that uses talent belonging to our group."

List Not Furnished

THE ORGANIZATION a few weeks ago circularized all stations with license blanks and a covering letter informing them that the new system of royalty assessments would become effective May 1. It is understood that the "Society" seeks to collect in the neighborhood of \$5,000,000 from radio, as against about \$2,000,000 collected by ASCAP. The bulk of this, of course, would come from the smaller stations which use far more phonograph records than the larger ones.

To the inquiry regarding members and their compositions, Mr. Hall said:

Hall said: "I have not felt it at all necessary to furnish a list of our present-day members' names or their number. After all, it is a list that is being revised almost daily with additions and changes. However, I do not mind saying that the list is available to bona fide station inquiries from broadcasters who have signed up with us. Member stations, naturally, are entitled to this and all other facilities of the Society's clerical force."

Another Fireside Chat

PRESIDENT ROOSEVELT spoke over the nation-wide networks of both NBC and CBS networks Sunday, April 28, at 10 p. m. (EST), in another of his Fireside Chats, this time on the \$4,800,000,000 reemployment fund. It was his first intimate talk this year.

Senate Reverses Copyright Action Rescinds Treaty Ratification Pending Plan to Revise Law

THE UNUSUAL procedure of rescinding its ratification of a reaty was taken by the Senate April 22 in the case of the Rome Copyright Convention, after its membership had been informed that there had been a legislative understanding that the document would not be accorded action until the Senate could consider an accompanying bill revising the copyright laws to afford greater protection to users.

The treaty was ratified April 19 while Senator Duffy (D) of Wisconsin, was absent from the chamber. On April 22 he asked unanimous consent that the measure be returned to the executive calendar, a motion concurred in by Senator Pittman (D) Nevada, chairman of the Foreign Relations Committee, which originally had reported favorably on the treaty.

Amendments Needed

SENATOR DUFFY is author of the bill (S.2465) which would drastically amend the existing copyright law by eliminating the statutory minimum infringement fee of \$250 per infringement and otherwise tone down its provisions, particularly insofar as the arbitrary powers of ASCAP are concerned. It has been pointed out that amendments to this law are essential before the United States

Senator's Ambition

A LIFELONG ambition was realized recently by 30-yearold Rush D. Holt, U. S. Senator-elect from West Virginia, when he pinch hit for the Solemn Ole Judge in anno un cing the Grand Ole Opry of WSM, Nashville. The Senator-elect said he had 24 invitations to speak on Jefferson's birthrday but chose Nashville because he knew the Opry would be in full sway.

can join the International Copyright Union.

Senator Duffy declared April 24 that the procedure now is for the Senate Patents Committee to consider his measure, and perhaps hold brief hearings, particularly to hear whatever protests ASCAP may wish to make. Senator Mc-Adoo (D.) of California, chairman of this committee, has been ill and this has delayed committee action. More than likely, it was indicated at his office, hearings will be called within 10 days or action will be taken without a hearing. The plan then is to have the

The plan then is to have the Senate consider the Duffy bill preparatory to ratification of the treaty, since this country will not be in position to adhere to the international treaty unless the law is revised. Provisions of the existing law, under the Duffy bill, would be altered to lessen materially the hardships of copyright users, notably broadcasters. (For details see BROADCASTING April 1 and 15.)

We're 'IN THE MIDDLE'

WHAS has the distinct advantage of being able to deliver both northern and southern markets . . . It is the farthest south of all Columbia Broadcasting Basic Outlets, yet it is strategically located in the very heart of the rich Ohio Valley, near the center of population, where its 50,000 watt signal spreads into profitable territories on every side.

... And it is because WHAS has proved its ability to reach and sell a large, cosmopolitan audience that its schedule is well filled, winter and summer, with the cream of radio programs.

SAY... or DIAL... or CALL...

No matter what point you want to reach ...whether it be in 80,000 places in the United States or Canada or in all the world beyond, send your message via Postal Telegraph.

For Postal Telegraph is the only American telegraph company that offers a worldwide service of co-ordinated telegraph, cable and radio communications under a single management.

Postal Telegraph will speed your message to the other end of the town or the other end of the world...with accuracy... with dependability. And when you send a message via Postal Telegraph by telephone, charges will appear on your telephone bill.

Radio's Audit Bureau

GOOD progress is being made toward the formation of an ABC for broadcasting station coverage. If diligent effort means anything, such a bureau should be a going concern before the year is out due to the combined efforts of the trade associations representing advertisers, agencies and stations. Properly the broadcasters, through the NAB, are taking the lead.

Guess-work should be taken out of radio. From the standpoint of results, there are case histories of advertisers aplenty which show that radio, dollar for dollar, so outsells every other medium that there really isn't any basis for comparison. But the agencies and the advertisers, indeed the stations themselves, really don't know how they accomplish it from the standpoint of analytical coverage. The proposed cooperative bureau will be designed to supply the figures and related data. It is a logical development, because competitive media have it, despite the fact that their "circulation" problems are not analagous. Pioneering technical survey work undertaken in lean times by such organizations as Jansky & Bailey should not be lost sight of in the creation of the new bureau,

The Program Solution

A TEMPEST unequalled in the history of commercial radio has been stirred up by the Prall-inspired campaign of the FCC to eliminate questionable commercials, particularly those having to do with medical accounts. Many stations are leaning over backward to avoid trouble as a consequence of the FCC edict, and are turning down good business along with the bad or near-bad.

The FCC must move cautiously, lest it run counter to the anti-censorship provision of the law. With conviction and zeal that can hardly be questioned it has sounded the warning, threatening stations with possible extinction. But it hasn't provided a formula which stations or their advertisers can pursue in deciding whether a program meets the standards of good taste. This does not seem to be entirely just, yet the FCC contends that it is as far as it can go.

Everyone agrees there is a certain amount of ill-advised material on the air—a fractional fringe that has tended to cause the whole industry to be misjudged. The united effort is to clear the air of it. The fear is that the FCC may exceed the bounds of sound judgment.

Perhaps a solution would be to set up within the industry (the NAB would be the logical agency) an individual whose task it would be to advise stations and advertisers and their agencies whether particular accounts are construed to be ethically, esthetically and otherwise acceptable. It would be a matter of "editorial selection", so to speak, for the industry. The man would have to be forceful, and one with the courage to say "no". In our opinion a man like James W. Baldwin, executive officer of the Code Authority, might well fit in that niche.

Thus, when a new account is offered, the NAB could review it, and if necessary, check with Federal authorities to ascertain whether the claims are reasonable. Like the procedure so successfully adopted by *Good-Housekeeping* in the home commodity field, the NAB could place its stamp of approval on products or services, and deny it to those which fail to meet predetermined specifications.

We simply toss this idea into the ring.

Common Sense Action

THE CLOSEST approach yet taken to a common sense attitude on radio-press competition in news was the action at the convention of the American Newspaper Publishers Association in New York, upon recommendation of its radio committee. In the committee's conclusions individual broadcasters and radio advertisers who sponsor news will find plenty with which to quarrel. But the real victory is found in the recognition of radio as a news disseminating medium—something the publishers were unwilling to concede at their convention a year ago.

The way is now opened for the United Press and the International News Service to sell news to stations, if they choose. The chances are that they will, and promptly at that. And, as the action of the ANPA clearly sets forth, they can, if they wish, sell their news for sponsorship competitively.

All things considered, it seems that the worst is over in the conflict between radio and the press. It was only necessary for the publishers to realize that radio, as an ultra modern means to disseminate information, could not be ignored. The recognition came in the ANPA action, and while there will be plenty of controversies to smooth over, the problem at least is reduced to a tenable and consistent basis.

The RADIO BOOK SHELF

IN THE INTEREST of effective radio selling, NBC has just published *Broadcast Merchandising—A Review* covering the period from August, 1933 to January, 1935. Among contributors to the regular *Broadcast Merchandising*, of which the new publication is a summary, were Lee H. Bristol, vice-president, Bristol-Myers Inc.; Ralph Starr Butler, vicepresident, General Foods Corp.; George W. Vos, advertising division, Texas Co.; Douglas F. Storer, formerly radio director of the Blackman Co.; W. C. McGreevy, manager, Clark-McGreevy Drug Co.; W. G. Hildebrant, president, Gotham Adv. Co.; Arthur Sinsheimer, radio director, Peck Adv. Agency.

"MORE Power to You!" titles a handsome brochure published by WOR to publicize among advertisers and agencies its recent increase in power from 5,000 to 50,000 watts. Illustrated with remarkable "shots" of the new high-power plant by the famous woman photographer, Margaret Bourke-White, the spiral-bound volume tells a graphic story of the increased service and coverage afforded by the 10-fold power increase. Particular emphasis is laid on the fact that WOR has "directed power", attained through use of a directional antenna designed to give its maximum coverage in the populous areas.

A POCKET edition of Gilbert & Sullivan operas to serve as a guide to radio listeners has been published by Bass Publishers, 509 Fifth Ave., New York, (35c) under the title The Radio Synopsis of the Gilbert & Sullivan Operas.

The Status of the Local

A SERIOUS effort seems to be under way to organize local independent stations into a cooperative group for procurement of national business—business which for the most part now is denied them. In the past such plans have come and gone without making so much as a dent in the tough hides of national advertisers and their agencies.

It is fool-hardy to think that all of the some 250 locals, or even half of them, can band together and establish a common sales organization able to crash the national field. Time isn't bought that way. Moreover there are too many hay-wires who operate on a catch-as-catch-can basis in the local field, who couldn't give away their time (though many of them do!).

But there is no real reason why a moderately-sized group of stations in reasonably good markets could not set-up a cooperative organization with that aim in view. They must be technically acceptable, and operated on high business and ethical standards if they wish to achieve their goal. After all, an advertiser does not inquire as to the number of presses a newspaper has before signing an account; he pretty well knows the public acceptance of the publication as reflected in its circulation. The same applies to radio. The question is not how much power, but whether the station covers the market and has the audience appeal or circulation.

We Pay Our Respects To-

GEORGE FRANCIS ISAAC

THE TYPICAL success story of radio, familiar to readers of this tolumn, is the tale of the pioneer who left the plainly marked highways of established business to plunge into the uncharted regions of radio and who wrested a pioneer's profits from exploiting the virgin ether. George Francis Isaac, subject of this sketch, is the exreption that proves the rule.

reption that proves the rule. The best clue to Isaac's characer is the fact that, since he left college to sell want ads for the *Chicago Tribune*, he has never asked for a job. Following Emeron's classic address to mousetrap makers, he has applied himself to the job at hand and let the world come to him. The fact that at 32, George Isaac is head of the radio taff of Lord & Thomas, is sufficient testimony to the value of Emerson's advice and to the effeciveness of his own application.

iveness of his own application. Born Nov. 12, 1902, in the little town of Oak, Neb., George spent his boyhood in Mankato, Kan. After graduating from the Mantato High School, he matriculated it Northwestern University, where he laid the foundation for his adrertising career by managing the business end of the campus humorbusiness end of th

In 1924 George left Northwestrn and made his sole application or employment at the *Chicago Tribune*, where he started work n the classified advertising deartment. The next five years saw him steadily progress from clasified to merchandising, from merhandising to local display and rom local to national display. Then in February, 1929, when he was beginning to feel established as a successful space salesman, the *Tribune's* radio station, WGN, ound itself in need of a new comlinercial manager and George was spicked for the job.

No one, to use a trite phrase, vas more surprised than George. He knew little about radio, was tot especially interested in it, and stad certainly never considered greaving the newspaper where he ad made good for the unknown ealm of radio. But since his

f bosses seemed inclined to let George

do it, he said OK and started out. His six years at WGN gave George an exceptional opportunity to view radio from several angles. During that time WGN was affiliated first with NBC, later with CBS, and finally, later a time without any network tieup, with WOR, WLW and WXYZ in the cooperatively owned Mutual Broadcasting System. The successful formation of MBS is largely due to the untiring efforts of Isaac, who found ways of smoothing out the difficulties that so frequently threatened to turn this new network into just another of many good ideas that didn't pan out.

At his door can also be laid the credit—or blame; only history will decide which it is—for the flood of juvenile programs that nearly swept the country's radios from the living room into the nursery. It was he who suggested to the agency of the Wander Co. that radio would be a good place for the "healthy child" appeal of their publication advertising and that Orphan Annie, comic strip heroine whose chief quality is robust health, would be just as popular on the air as in the funnies and an excellent salesgirl for Ovaltine. So successful was this radio juvenile serial that when the craze

So successful was this radio juvenile serial that when the craze was at its height a manufacturer of a drain cleaner wanted WGN to prepare a juvenile program for him. "Aside from the difficulty of interesting children in something they cannot use themselves," said George, "can you imagine the reaction of any normal mother toward an advertiser who tried to sell her children a product that is plainly labeled Poison?

"This is an extreme case, of course, but there are still too many programs not at all suited to the products advertised which are on the air merely because some other advertiser has had an outstanding success with a similar show. The fact that it is so much easier to copy a pattern than to build a program around the product to be advertised makes it one of radio's biggest dangers."

When in January of this year, Lord & Thomas persuaded George Isaac to put his knowledge of ra-

PERSONAL NOTES

AMONG the radio notables attending the spring Gridiron Club dinner of Washington correspondents April 13 were: M. H. Aylesworth, NBC; George M. Burbach, KSD, St. Louis; Louis G. Caldwell, Washington attorney; Gardner Cowles Jr. and John Cowles. Des Moines Register & Tribune stations KSO. KRNT and WMT; Edwin C. Hill, CBS commentator; Dr. C. B. Jolliffe, FCC chief engineer; Richard C. Patterson Jr.. NBC; Commissioner George Henry Payne, FCC; Frank M. Russell, NBC; Quin Ryan, WGN, Chicago; David Sarnoff, RCA; T. J. White, Hearst Radio Inc.; Frank W. Wozencraft, RCA; Roy A. Roberts, Kansas City Star (WDAF); Frank E. Mason. NBC.

ARTHUR W. SCHARFELD, Washington radio attorney, suffered a broken leg April 16 when he tripped while walking on a capital street. He is temporarily confined to his home with his leg in a cast.

COL. THAD H. BROWN, member of the FCC. on the Pacific Coast in April, was tendered a dinner in the Palace Hotel, San Francisco, April 15 by communications firms operating in northern California. He was in San Francisco for an inspection of the FCC office.

HARRY CARLSON, night manager of WNEW, Newark, and former program director of WMCA. New York, has entered the insurance business.

REGINALD B. MARTIN, manager of WKBB, Dubuque, Ia., for more than a year, has resigned to become program director of KSO. Des Moines, and the Iowa Broadcasting System. JAMES W. BALDWIN, executive officer of the Code Authority for the Radio Broadcasting Industry, left Washington April 21 for a week's stay in Chicago on code authority business.

business. E. Q. WILSON, commercial manager of KROW in San Francisco, resigned April 13 to become display manager for the J. C. Penny Co. H. P. Drey, general manager, is supervising the department and Howard Wilson continues as manager of KROW's commercial department in Oakland. Dan Weldon, who left KROW about a year ago, has rejoined the staff as account executive in San Francisco. Other new additions to the commercial department are Frank T. Faircloth, new to radio, and Victor Narrow, formerly associated with KGGC, San Francisco.

dio and radio talent at the disposal of their clients who are buyers of these commodities he found little essential difference between his work at WGN and that at the agency.

"Broadcasters and agencies are alike," he says, "in that it is their iob to present programs that are both profitable to the sponsors and pleasing to the audience. The fundamental task of the radio executive is to find ideas that are intrinsically valuable for radio and to adapt those ideas to the advertising of his clients in a way that is compatible with the best interests of the listening public. And that is true whether the executive is employed by a station or an agency."

Married to Kathleen Iris Detweiler, George is the father of a 19-month old daughter. Some of his spare time is spent on the bridle path or golf links, but it is entirely consistent with his character that he can say without affectation that his real hobby is radio. NILES TRAMMELL, vice-president in charge of NBC Central Division, was one of the Chicago Association of Commerce members to ride to Minneapolis during the initial run of the twin Zephyrs in April.

JAMES E. FRANCIS, executive at the Camden, N. J. office of RCA Mfg. Co., RCA-Victor division, arrived late in April at the Hollywood branch on an inspection trip.

MARVIN NEVILS, formerly with Ruthrauff & Ryan Inc., New York, has joined the commercial staff of WBIG, Greensboro, N. C.

GERALD J. NORTON, formerly assistant sales manager of KHJ, Los Angeles, and for the past few months on the sales staff of KROW in San Francisco, has joined the commercial department of KYA, San Francisco, as account executive.

COL. ROBERT R. McCORMICK, publisher of the *Chicago Tribune*, spoke on "The Freedom of the Press", broadcast by WMCA, New York, at the April 25 meeting of the Advertising Club of New York.

WILLIAM JAMES, former night program director of KMPC, Beverly Hills. Cal., has been transferred to the Los Angeles studios as assistant business manager.

HAL BOSKILL, formerly with the commercial department of KGHL, Billings, Mont., has joined the sales staff of KGVO, Missoula, Mont.

ED HELLMUND, formerly with the Travel Guild in New York; Walter Evans, Kansas City advertising man, and Murray Danglade have joined the sales staff of WHB, Kansas City.

LINCOLN DELLAR, manager of KDB, San Diego, resigned in April to leave for New York. He was succeeded by Harry Witt, at one time commercial manager of the station.

BEHIND THE MICROPHONE

COL. BOB NEWHALL, pioneer sports writer and radio commentator, is back on the air at WLW, Cincinnati, after a six-week vacation during which some 50,000 fans wrote letters urging his return. His program is sponsored by the Mennen Co., Newark (cosmetics).

SID SCHWARTZ, formerly assistant radio editor of the New York *Mir*ror, has been named assistant publicity director of WNEW, Newark.

JOHN HUGHES, formerly with Seattle stations, has joined the announcing staff of KMTR, Hollywood.

BOB EVANS, former sports editor of the Cleveland *Plain Dealer*, has left journalism to broadcast sponsored sports events on WGAR, Cleveland. Wauenita Jonson. new to radio, is assisting Ben Levin, WGAR news commentator.

C. G. "TINY" RENIER, formerly of WDAF, Kansas City, has been named production manager of KMOX, St. Louis.

SARA MINABELLE ABBOTT, singer and actress of WLW-WSAI. Cincinnati. was married April 7 in Aurora, Ind., to Ralph P. Hutchins, chemical engineer. She was secretary to John L. Clark, general manager of WLW-WSAI, before joining the stations' artists staff.

FRED HEGELUND on April 15 terminated his services as assistant in the production department of KTAB, San Francisco.

FRANK COOLEY, announcer at WTMJ. Milwaukee, was back at the microphone eight days after a recent emergency operation for appendicitis. JENNISON PARKER, after a year's absence in Southern California, has returned to KFRC, San Francisco, as continuity editor. JOHN McCORMICK, production manager of WKRC. Cincinnati, was married April 24 in Mariana, Fla., to Eunice Richardson, Cincinnati.

THOMAS FREEBAIRN-SMITH, announcer at KNX, Hollywood. is the father of a boy born April 11.

C. C. VON EGIDY, former production man in the Northwest, has joined the announcing staff of KMPC. Beverly Hills.

ART LINDSAY, announcer, has returned to NBC. San Francisco, after two years at KOIN, Seattle, in the same capacity.

VERNE E. SAWYER, formerly announcing at Seattle stations, has joined the staff of KGVO, Missoula, Mont.

THE MILWAUKEE JOURNAL STATION EDWARD PETRY & CO. LOU EMMEL, for several years manager of NBC Artists Bureau, San Francisco, resigned April 15. He plans to start his own booking agency.

STANLEY SHAW, announcer at WNEW, Newark, was married recently to Gloria (Jarcia, head of the Concert Dance Group of Baltimore.

HARRY GEISE, chief announcer at KRKD, Los Angeles. takes the part of the announcer in the new M-G-M picture "Public Hero No. 1" which is about to be released.

DOROTHIY MATSON, formerly singer at WHB, Kansas City. has joined the program staff of WNAX, Yankton, S. D.

MAHLON MERRICK, producer and one-time program manager of KHJ, Los Angeles, resigned as of May 1.

LESLEY MARSHALL, formerly of WNAC, Boston, and WMCA, New York, has joined the announcing staff of WIP. Philadelphia.

DEAN MADDOX. director of special events at KYA, San Francisco, has been appointed program director, succeeding Richard Holman, who was both program director and production manager. Lynn Church, announcer, is also doubling with continuity and publicity, succeeding Eugene Eubanks, who had recently come to the station. H. C. Connette, for more than a year in KYA's continuity department, has also left the station. Harry Rogers, exploitation manager and Rodrick Mayes, annonneer, have taken on additional duties of continuity writing and production.

JOHN WELLES, production manager of KFSD, San Diego, resigned in April, with Harry de Lasaux, formerly with the NBC production department at San Francisco, taking his place. Mr. Welles will be chairman of the radio round table at the annual convention of the Pacific Advertising Clubs Association in San Diego June 23-27.

It takes the best jockey PLUS the best horse—to WIN We've PROOF that

Any program broadcast by two or more Pittsburgh stations finds a MAJORITY of Listeners on WCAE

STARRING THE STARS — To stimulate interest in programs broadcast over its station, KSD, the St. Louis Post-Dispatch, is publishing a daily feature on its radio page, "minute interviews", of the type shown above, with stars of the NBC-WEAF network. The series, which began last month, will be continued indefinitely. The feature is three columns wide by nine inches deep and is drawn by Medearis, staff artist of the newspaper.

REGINALD A. ALLEN, formerly of WMCA, New York, WHOM, Jersey City and WDNC. Durham, N. C., has joined the announcing staff at WBT. Charlotte, N. C. He is an announcer, singer and dramatist and replaces Weston Britt, who resigned to become program director of WSPA, Spartanburg, S. C.

LEW LANSWORTH, at one time script writer and producer of Eddie Cantor and Jimmy Durante air shows, has opened radio consultant offices at 382 Monadnock Building, San Francisco.

JOE SIMPSON, for more than a year announcer at KGMB, Honolulu, CBS outlet, has resigned and is back in San Francisco. He was succeeded by Dean Stewart.

STAFF members of WBRC. Birmingham, walloped WAP1's baseball team approximately 36 to 8 in a recent game. The series will continue every other Sunday until one station wins four games. In the first game Announcer Leland Childs. Operator Hugh Graham and Manager Bill Young hit homers for WBRC.

DICK STEPHENS, formerly with KFI. Los Angeles. on its technical and announcing staffs. on April 15 joined the announcing force of KFWB. Hollywood. Al Warner, who had been holding the dual position of announcer with KGFJ. Los Angeles. and KFWB, Hollywood. resigned the KFWB post in April to devote full time to KGFJ.

WMCA "Strip Rates"

IN AN effort to prove the value of afternoon time, WMCA, New York, has inaugurated a low "strip price" rate for quarter-hour periods between 1 and 4 p. m., which represents a reduction of approximately 50 per cent of current rates. The rate calls for a strip "across the board" from Monday through Saturday, and will be applicable only to advertisers who use six periods a week on a minimum 13-week contract.

IN THE CONTROL ROOM

JOSEPH E. BAUDINO, plant manager of WBZ in Boston lectured April 22 on radio engineering in a series of radio courses offered by the University Extension Division of the Massachusetts Department of Education. John F. McNamara, NBC announcer and program director of WBZ-WBZA, lectured on announcing on April 29.

NED NOLAN, Engineer at WGAR, Cleveland, resigned May 1 to enter Dodge Institute, Valpariso, Ind. CHARLES M. SHERWOOD, formerly eastern sales manager of F. A. D.

CHARLES M. SHERWOOD, formerly eastern sales manager of F. A. D. Andrea Inc., has been named general sales manager of the Allen D. Cardwell Mfg. Corp., Brooklyn, makers of variable condensers.

JAMES TISDALE has returned to the technical staff of WIP. Philadelphia, after an absence of two years spent in radio research.

LUVERNE E. SHATTO, formerly with KRLC, Lewiston, Id., and KFJI. Klamath Falls, Ore., has joined KAST, Astoria, Ore., and is installing a high-fidelity transmitter for the new station. which expects to open late in June.

Protests Against Series By Mexican Government Are Rejected by FCC

FINDING nothing improper or in violation of the radio regulations, the FCC has passed over the protest registered by a group of Congressmen against the program sponsored over an NBC-WEAF network by the Mexican government and designed to stimulate tourist travel, it was learned April 25. The protest asked for punitive action against NBC on the ground that the initial program, broadcast March 21, contained a poem in Spanish, which allegedly was offensive to Catholics. In addition to the protest signed by 16 Congressmen, Father John B. Harney, superior of the Paulist Fathers, New York, also asked for disciplinary action.

The Congressional petition was signed by Reps. Connery, McCormack, Healey, Casey and Higgins, all of Massachusetts, Democrats; Citron, Smith and Kopplemann, Connecticut Democrats; Daily and Slack, Pennsylvania Democrats; Pfeifer and Fitzpatrick, New York Democrats; Welch, California Republican, and McGrath, California Democrat; O'Neal, Kentucky Democrat and Igoe. Illinois Democrat

Democrat; O'Neal, Kentucky Democrat and Igoe, Illinois Democrat. Father Harney's protest was motivated largely by the anti-Catholic actions of the Mexican administration. The matter was referred to the FCC Law Department by Chairman E. O. Sykes of the Broadcast Division, which reported no violation. The Mexican account is placed by De Garmo-Kilborn Corp., New York.

KGMB Opens U. S. Office OPENING of a mainland office at the Hotel Californian, San Francisco, in charge of L. D. West, is announced by KGMB, Honolulu, which recently changed management. Simultaneously, it was announced that negotiations are under way to open a San Francisco studio where programs will be originated and sent by remote control to Honolulu.

EQUIPMENT

N ISSUING its Catalog H, General iadio Co., Cambridge, Mass., has for he first time included a section on ndustrial devices, the result of the pplication of electronic apparatus nd technique to fields other than the mmunications industry. Among auch devices are noise meters and troboscopes. Other sections of the atalog deal with the company's reistors, condensers, inductors, freuency and time-measuring devices, scillators, amplifiers, bridges and acessories, standard-signal generators, scillographs, cameras, analyzers, metrs, power supplies and parts and acessories. The catalog describes quipment for those who desire combete installations and component parts for those who prefer to assemile units.

WTMJ, Milwaukee, which for more han a year has been broadcasting a vgular daily schedule of facsimile ransmission over one of its shortwave experimental stations, soon will nake radical changes in its equipnent. These improvements will make it possible to reproduce picture material on a tape seven inches wide ustend of only four inches as heretofore. Much finer definition of the drawing will be obtained by scanning the subject material at the rate of 100 lines per minute, and by the use of a chemically treated paper in the recording device.

A NEW accoustical tile made of pressed and ground rock is being used in the control rooms of WNEW, New York, to overcome unnatural reverberations and aid the control man in checking reception.

THE HIGHEST point in Philadelphia now is the self-supporting raditor of WDAS, described by the station as the only one of its kind in the East. The signal has been more than tripled by the new antenna. Alexander W. Dannenbaum, president of WDAS, announces that the antenna is the first step in a series of technical improvements.

KFRC, San Francisco, has started installation of a new Western Electric transmitter which will be ready for service in June. The station will also add complete new studio equipment, Harrison Holliway, manager, announced. The FCC recently granted KFRC a 5000-watt daytime power increase.

ALL-WAVE reception is being installed in the Waldorf-Astoria hotel, New York, with Western Electric Co., making the installation of a receiver which will be the largest all - wave equipment in the world. The 2,200-25,000 kc. band is included in the installation, with a special antenna system being suspended between twin towers of the hotel. Automatic volume control will counteract fading and a device will reduce interference. The equipment is similar to that used by A. T. & T. at Netcong for transntlantic communication and at Miami for Caribbean radiotelephone reception.

Take World Library

FOUR stations subscribed in April to the WBS World Program Service, bringing the list to 116 stations. The new subscribers are WJR, Detroit: WOOD-WASH, Grand Rapids, Mich.; KGA-KHQ, Spokane; WKEU, Erie, Pa.

W. M. ELLSWORTH Radio Talent and Entertainment Manager of many high class radio artists and acts available for employment. Scouts talent for stations and advertisers. Can fill any order— No charge for services Suite 1503, Mather Tower, Chicago, Ill.

Radio Treatment

NOT what the doctor ordered, but startling in its effect, was the "Open Your Eyes" theme melody of Eddie Dunstedter's organ program on KMOX, St. Louis. According to the organist's mail, a lad in Akron, O., who had been bed-ridden for a year and consigned by doctors to a walkless future, heard the the me melody faintly, but wanted it louder. When no one heard his call for aid, he got out of bed and walked to the radio, according to the letter to KMOX, and now can walk with ease.

Hearst Interests Ready To Assume Operation of Two West Coast Stations

SINCE no appeal was on file with the FCC, the sale of KTM, Santa Monica, Cal., and of KELW, Burbank, Cal., to the Los Angeles Evening Herald Publishing Co. was to be consummated April 30, according to information from the West Coast.

Official notice of the proposed transaction was filed April 18 with the county recorder's office in Los Angeles.

While preparations were being made to take over the stations for operation on May 1, no staff appointments had been made at the time of going to press. Charles F. McGuire, radio direc-

Charles F. McGuire, radio director for the Hearst paper, and Eugene Inge, its radio editor, were expected to announce soon names of the manager and permanent staff. It was expected that ultimately the Hearst interests would combine the two half-time stations into a single unit.

Coincident with the taking over of the two Southern California stations, the Los Angeles *Herald-Express* was expected to drop its official affiliation with KFAC, Los Angeles, its official station the last two years. It was only an affiliation, however, as Hearst had no monetary interest in the station or any hand in its operation.

ALL 1935 home games of the champion St. Louis Cardinals and the Browns will be sponsored over KWK, St. Louis, this season by General Foods Inc., New York (Wheaties).

AT ITS BEST ... OVER WIRES OR ON THE AIR

FOUNDED in 1869, Western Electric has been manufacturing sound equipment ever since the invention of the telephone in 1876. Its product kept pace with the rapid progress of the telephone industry—helped largely to make possible the kind of telephone service America now enjoys.

When radio broadcasting was born, Western Electric branched quite naturally from leadership in one field of sound to another. Today, it not only manufactures all manner of telephone devices . . . including the special repeaters, loading coils, switches, etc., used in forming great radio networks of wire . . . but also microphones, tubes, transmitters, amplifiers and everything else involved in putting radio programs on the air at their best.

Because Western Electric equipment embodies more than a half-century of experi-

ence in Sound—because it is made to the most exacting standards your station can depend upon it.

Tenth Anniversary on Air Is Celebrated by WADC

AMONG the first stations to install the new type vertical radia-tor, WADC, Akron, claimed a three-fold increase in Northern Ohio, as it celebrated its tenth year on the air. Some 15,000 persons visited the new studios and transmitter at Tallmadge, six miles from downtown Akron, which were installed at a cost of \$50,000. The radiator was erected by Truscon Steel Co., Youngstown, O.

The station, an affiliate of CBS, operates on 2500 watts daytime, 1000 watts at night, and according to Allen T. Simmons, covers 14 Ohio counties. Studios and offices are maintained in nearby Canton.

Examiner Advises **Brooklyn Changes**

Would Delete Four Stations in Favor of Brooklyn "Eagle"

FAVORED with an Examiner's report recommending approval of its application for a new station in Brooklyn to take over the facilities of four time-sharing sta-tions, the Brooklyn Daily Eagle nevertheless faces possible long liti-gation before final adjudication of the issue, it was indicated by counsel representing the stations which would be deleted, as BROADCASTING went to press. Under FCC procedure, the parties in interest have dure, the parties in interest have until early in May to file excep-tions to the report of Examiner George H. Hill and request oral arguments before the Broadcast Division, sitting en banc. Such arguments are n ow mandatory when requested.

Therefore, it was asserted, at least three or four months may elapse before the Broadcast Division has an opportunity to con-sider final action on Examiner Hill's report. And even after the FCC decision, the way is left open for recourse to the Court of Ap-If such a course is pursued there is the likelihood that the case will be kept in litigation possibly for a year or more.

Alternate Proposal

IN HIS April 15 report Examiner Hill recommended that the four kc.—WARD, WBBC, WVFW and WLTH—be deleted and that their facilities be given the newspaper. He held this would serve public interest, as opposed to what he con-strued to be uneconomical use of the ether through a four-way time division. He found also that while two other applicants for the facili-ties were fully qualified financially and technically, he felt that the newspaper was entitled to first consideration.

Mr. Hill recommended that the application of WEVD, New York, operated by the Jewish Daily Forward, through the Debs Memorial Wara, through the Debs Memorial Fund, be denied because it would entail shifting of other stations and cause objectionable interfer-ence. In the case of the applica-tion of Arde Bulova, New York watch manufacturer, and half-owner of WNEW, Newark, and Norman K. Winston, realtor, for a new station on 1400 kg the Fx a new station on 1400 kc., the Examiner held that the applicants, like WEVD, were fully qualified, but that granting of the Brooklyn *Eagle* application "would tend to distribute the radio facilities avail-able to the area". In his con-clusions he recommended that if the Eagle application is not granted, then the Bulova - Winston re-quested should be the alternative.

The four stations whose deletion is recommended have been at loggerheads off and on for several years. They have interested themprimarily in the broadcastselves ing of foreign language programs.

STUDIO NOTES

A SERIES of sponsored programs Metropolitan Travelogue will be preseuted on WOR, Newark, starting May 2 and continuing 18 weeks by the Port of New York Authority. The programs are designed to acquaint New York residents with interesting places easily reached.

ONE-MINUTE programs, not spot announcements, are being sponsored on WBT, Charlotte, N. C., by the local Ford branch, covering the Carolinas. Twenty-six programs a week will be broadcast on the long-term contract. Martha Dulin, called the "Ford Radio Girl" gives a dialog, telephone-operator style," promoting Fords. The program is designed to aid dcalers in moving used-car stocks. Miss Dulin is provided with a white Ford and loud-speaker, making the rounds of Carolina dealers. In visiting local dealers, a car is placed under a canopy and sold as the "Radio Girl" special of the day.

IN A NEW rate card issued by WCAU, Philadelphia. an hourly rate has been established, replacing the practice of charging double the halfhour rate for an hour program. To encourage summer advertising, a 10% discount is offered for 52-consecutiveweek contracts.

SEVEN Tulsa stores sponsor jointly the *Tour* of *Downtown Tulsa*, a nightly 30-minute program on KTUL, Tulsa, Okla. The script employs imaginary vehicles for tours of the city, with proper sound effects. All commercial announcements are dramatized. A 14-piece orchestra, a quartet, and three singers are used.

THE popular Silver Flute dramatic series, with "Marco the Wanderer" will be revived May 3 on the NBC-WJZ network.

Chicago CBS Discovers Find in "Unknown Singer" Contest

IN VIVIAN DELLA CHIESA, winner of the recent "Unknown Singer" contest conducted over WBBM, Chicago, whose lovely soprano voice is being compared with the finest experienced professional talent on the air, CBS believes it has a "find". Entering a contest of 2,500 young hopefuls, she emerged winner not only of a 13-week contract at \$1,300, under the sponsorship of the American Druggists Syndicate, but the assurance of a regular radio career. Here she is shown receiving her award from H. Leslie Atlass, CBS Chicago vice president. Left to right: J. Kelly

DESIGNED to attract the fisherman in the audience, is a new spring program Angling the Streams on KYA. San Francisco, conducted by a piscatorial authority, Capt. Gene Sullivan, during his Sportsman Corner. It is an idea that has commercial as well as sustaining possibilities for many stations.

THE SERIES titled WSJI Brings Hollywood to Your Home was concluded April 26 by WSM. Nashville, and was declared an outstanding success by National Life & Accident Insurance Co., Nashville, and Metro-Goldwyn-Mayer Corp., joint sponsors. PROGRESS of WSMB, New Orleans, during the last decade was re-

leans, during the last decade was reviewed in a teath anniversary program April 21. The station was the first in the Louisiana-Mississippi area to adopt a 17-hour daily schedule.

COOPERATING with the Cleveland Academy of Medicine, WGAR. Cleveland, has started a scries WGAR's Health Reporter featuring interviews between an Academy executive and local doctors on health problems.

RAYMOND KNIGHT, cuckoo artist, will start an NBC-WJZ series May 6 under the title Ray Knight's Cuckoo Clock.

THE California-Western School Music Conference. held in Pasadena, Cal., April 14 to 17 inclusive, broadcast four programs via remote to KHJ, Los Angeles, and to stations of the Don Lee-CBS network. There were 3,000 musicians in attendance at the biennial convention.

RESULTS of Sunday games of Cleveland sandlot ball team are to be broadcast by WGAR, Cleveland, cooperating with playground officials.

Smith, WBBM commercial mana ger; Howard Neumiller, CBS Chi cago production chief; Ferd Grofe, orchestra leader and com poser; Josephine Buckley, contes finalist; Dorothy Gordon, contes finalist; H. Leslie Atlass; Mrs William J. Piggot, chairman, Illi nois Federation of Women's Clubs Miss della Chiesa; John Boles, mo tion picture star, judge; Stephani-Ziegler, contest runner-up, als awarded a contract; Sylvia Froos radio and stage star, a judge; Mar jorie Westcott, contest finalist, and Holland Engle, CBS western divi sion program director.

WHB. Kansas City, and the Kansa City Journal-Post affiliated April 7 with the newspaper carrying a bi front-page display announcing tha WHB would broadcast three new programs a day featuring John Car eron Swayze as commentator. WHI programs will be interrupted for important news flashes.

FIVE new afternoon programs hav been started by WCKY. Cincinnat as weekly features. They are th Youth Parade. songs and instrumet tal; Happy Days in Disic, fiddlers sister act and banjo; Two Wit Tunes, vocal and violin; two new son program series.

program series. CIVIC and community development are discussed daily at noon on KMEI Medford. Ore., by the local Chambe of Commerce, the first in the natio to broadcast by remote control direct from its offices on a regular dail schedule, according to Mrs. W. Virgin, station öwner. Subjects a, the way from farm problems to touist promotion are discussed in th programs.

A TWO-WAY studio classroom broad cast was staged recently by WHAA Rochester, during a science progran in the *Rochester School of the Ai* More than 6000 classroom listener were tuned to the program. The in structor's voice was reproduced in th schools as usual from the mai WHAM transmitter, while the shor waved remarks of pupils and educa tors were picked up and rebroadca: along with the instructor's voice.

along with the instructor's voice. KTAB. Rossi was heard in greeings and pronounced success for the station under general management -Philip G. Lasky, who recently too over reims of the station. coming San Francisco from Salt Lake Cin where he formerly managed KDY.

THREE new programs on KFAB at KOIL, Lincoln and Omaha, are Cor tassel Carnival, Melody Matinee at News, Notes and Variety.
A BIG STORE BOOSTS SALES

Adopting Radio, Houston Department Store Discovers -That Business Soon Increases Rapidly -

By W. C. MUNN President. The Munn Co. Houston Department Store

DIO as a medium for direct rchandising has been driven me to us by a graphic proof furhed through the facilities of our adcast over KPRC, Houston. have found that the housewife be brought into direct contact th our merchandise over the air ves, and the experience is not ly edifying but is proving very fitable.

In structure, our program is nple, and two characters carry entire thread of the continuity, ich is provided by our show-winws, counters and racks of cloth-and other items. These charac-rs are the "Radio Floorwalker", o directs the attention of the lishing audience to the merchandise at we have to offer, and Mary ne Munn, the Munn Co.'s pernal shopper, who is the liaison atween the store and the public.

A Vivid Picture

HESE TWO go hand in hand, p by step, down the aisles of all e floors of our store and, speakg informally and in a conversa-onal tone into a portable micro-tone, they discuss the store in a right, informative way. The oorwalker will call attention to is item and that, and Mary Jane unn will pause to give a descrip-in of it. The effective service us afforded the listener is easily rceived. The listener is given a vid, accurate word picture of nat we have to offer, has the adntage of expert comment, and ceives the whole message in a ay that makes it easy to grasp d easy to retain. Our store is a large one, Hous-

n's largest department store, coving five acres in the heart of the ty. We have two annexes and an trance on each of the four streets durating our building. We have a durally heavy traffic in the store der ordinary conditions, and ve found that traffic in the store creases materially during the riods of and just following the coadcast oadcast.

There is no question that this ogram has produced direct re-Its for the store, as concerns our Tume of sale. And we are happy report that it is doing a splen-d institutional job for us.

Selling Merchandise

IS INTERESTING to note that les always increase in the de-rtment affected by the broadcast, d after only six broadcasts from r store, we noticed direct results volume of sales over the counts, while our mail order business, nich is invited by Miss Munn, has creased 20%. In one day, in nich our draperies and rug dertments were featured in the oadcast, business in these items ubled.

As for our mail order business, have received mail requests om as far away as 400 miles. All pail is personally attended to by T personal shopper, with the un-rstanding that the merchandise sired may be returned if it fails

MR. MUNN

to meet the requirements. We also invite listeners to phone in for their wants, if they are within phoning distance, and our phone business triples for several hours following the broadcast.

We broadcast from some department in the store three times week-ly, Monday and Wednesday morning at 10, and Friday at 8:40, at which hour the store is open for business.

Hollywood Plans of NBC Await Legal Clearance

HOLLYWOOD headquarters NBC may be moved to the old Con-solidated Film Laboratory building on Melrose Ave., close to RKO and Paramount studios, according to advices from Hollywood, if final legal barriers are overcome. The building has not been used since it was damaged by fire several years ago.

Consolidation of the NBC artists bureau, now temporarily in the Roosevelt Hotel, and the downtown Los Angeles publicity office, is understood to be among plans under consideration. With abandonment of the present studios on the RKO lot, the Hollywood division would group under one roof its offices, rehearsal halls, technical quarters, studios and in addition would be equipped for future development of television.

Consumers Study

CONSUMERS RESEARCH Inc., radical organization which has constantly asserted itself in oppo-sition to many forms of advertising, has inaugurated a study of radio, and has asked subscribers for short description of "particularly objectionable programs".

Copyright Bulletin

REOPENING of copyright negotiations with the ASCAP was signalized April 26 when a special meeting of the NAB Copyright Committee was called in New York to consider a proposal by ASCAP in connection with prolongation of existing contracts when they expire Sept. 1. The proposition, it is understood, takes into account the pending Govern-ment anti-trust suit against ASCAP. At present broad-ASCAP. At present broad-casters are paying 5% of their "net receipts", plus a sustaining fee established ar-bitrarily. The NAB copy-right committee comprises Alfred J. McCosker, WOR, chairman; Isaac D. Levy, WCAU; F. M. Russell, NBC; I. Z. Buckwalter, WGAL; and Walter J. Damm, WTMJ. Philip G. Loucks NAB man Philip G. Loucks, NAB managing director, attended the session.

A TEST radio program is being staged by the Gas Appliance So-ciety of Metropolitan Chicago to supplement its newspaper adver-tising. Beginning the middle of April and continuing through June, the Society is placing daily one-minute announcements over stations WBBM, WGN, WENR, WMAQ, and WGES, advertising the seven makes of gas ranges whose manufacturers, together with their more than 300 dealers in the Chicago area, make up the Society's membership. Campbell-Ewald Co. is the agency.

Local Stations to Meet For Organization Study

A MEETING of a representative group of 18 local independent stations, scheduled for May 8 in Washington, with a view to formulating plans whereby these stations and others in a similar status can be represented nationally in procuring national spot business, has been called by Edward A. Allen, president of WLVA, Lynchburg, Va., and prime mover of the project. The meeting is designed to be in the nature of "steering committee" work to develop preliminary plans to be considered at the NAB convention in Colorado Springs July 6-10.

Those invited by Mr. Allen to participate in the "steering committee" meetings are: Le Roy Mark, WOL, Washington; John Elmer, WCBM, Baltimore; W. W. Gedge, WMBC, Detroit; William S. Pote, WMEX, Boston; L. A. Benson, WIL, St. Louis; Herbert Hollister, WLBF, Kansas City, Kan.; Ben S. McGlashan, KGFJ, Los Angeles; Edward E. Bishop, WGH, Newport News, Va.; Isaac Z. Buckwalter, WGAL, Lancaster, Pa.; S. A. Cisler, WJTL, Atlanta; Earl J. Smith, WNBZ, Saranac Lake, N. Y.; Ormond O. Black, WSGN, Birmingham, Ala.; Clifford M. Chafey, WRAW, Reading, Pa.; C. D. Martin, WNBF, Binghamton, N. Y.; H. M. Loeb, WFOF, Flint, Mich.; C. A. Hill, WIBM, Jackson, Mich.; Winston L. Clark, WLAP, Lexington, Ky., and C. W. Hayes, WHBC, Canton, O.

Copeland Bill Lingers UNLESS a legislative miracle takes place, the Copeland-Tugwell Food & Drug Bill (S. 5) is dead for this session of Congress. Since the measure was shoved to the bottom of the Senate Calendar April 8 by motion of its sponsor, Sena-tor Copeland (D.) of New York, there has been no active considera-tion of it. Senator Copeland has shifted his interest to other urgent legislation, and while some women's clubs and other organizations are understood to be agitating for prompt passage, he has shown no disposition to revive floor consideration. With the exception of the provision which would vest adver-tising control in the Department of Agriculture, the bill already has been so drastically altered on the floor that it has few active opponents. The only possibility of passage, it is stated, is for all opponents to unite in an active campaign to jam it through.

Pickwick Bus Series

PICK WICK Corp. (Pickwick Greyhound Lines), Los Angeles, in April started to produce a series of five-minute travel dramatizations with the Los Angeles office of Beaumont & Hohman handling the account. Hollywood RCA - Victor studio did the technical work. The agency was to make up its list late in April to place the series over a number of stations throughout the country starting in May and continuing through the vacation months.

Rice Regional

CHINA RICE IMPORTING Co., San Francisco (rice) for the first time in its history is including radio in its advertising schedule and is using a 15-minute spot on NBC-KPO, Sundays, 9-9:15 p. m. (PST) starting May 5. The program features Bennie Walker, master-ofceremonies and the Jones Boys, a five-man harmony team. Hixson-O'Donnell Inc., San Francisco, is the agency.

WLEU Opens at Erie

FORMAL opening of WLEU, Erie, Pa., new local station, on April 20, is announced by Leo Omelian, station licensee and owner. On 1420 kc. the station has 250 watts day and 100 watts night. It is equipped throughout with RCA apparatus.

Programs Studied By Philco Institute Radio Credited With Improving

American Tastes in Music

A RESPONSIVE CHORD has been struck by the newly formed Radio Institute of the Audible Arts among radio, musical and educational groups in its broad ef fort to encourage and stimulate audience interest in "worth-while" programs.

The Institute was founded several months by the Philco Radin & Television Corp., and Pitts San born, eminent music critic, way named as its director. The pur pose of the Institute, according to a statement made upon its formation, is to "further the advance ment of radio and to secure for every listener the full benefits an satisfaction that can be derived from the radio as an instrumen of entertainment and education.

Since its formation, the Institut has prepared a number of broch ures and instituted several sur veys relating to programs. Thes are being sent to selected lists o listeners. Among the current re leases is one titled "recommender radio music programs", with com ments by Mr. Sanborn. A radii time table listing recommended ra dio programs in the musical field identifying the time and the net works over which they may b heard, together with the featurer orchestras and artists, and a time table covering recommended talks carrying the same listening infor mation. Commercial along with sustaining programs are enumer ated.

Educational Surveys

IN THE FIELD of surveys, Mi Sanborn has instituted one cover ing the work of educational insti tutions operating radio stations and another dealing with the effec of musical offerings over the ai upon the viewpoint of the listenen In the former, the Institute re viewed the activities of some o the 38 stations operated by educa tional institutions in 22 states, a well as the educational course made available through the facili ties of commercial stations. "Thi informal survey," Mr. Sanborn de clared, "is not intended as a com plete picture of educational broad casting in the United States, but i offered as an indication of what i being done, and what can be don to utilize the radio in schools an in the field of adult education."

On the music side, Mr. Sanbor declared that his observations hay shown that radio had done muc to improve the musical tastes o the American public during th last ten years. "The standards o American listeners have soare since 1925," he said. "It is radi temerity and courageous experment and subsequent public educe tion by radio that have done i. The phonograph began this mus cal trend, but that was attende with considerable expense and the repertory was limited. Radio has cut the expense to a minimum, an the repertoire broadens with eac successive season."

CALL letters of the Ardmoreit Publishing Co. Inc., station at Arco more, Okla., have been changed by the FCC from KIUO to KVSO.

FutureIsUncertain For Canadian Body

Life of CRC Extended by Bill For Only Two-month Period

By JAMES MONTAGNES

NTIMATION was given by Hon. Alfred Duranleau, Minister of Maine, under whose jurisdiction raio operates in Canada, during the closing days of the Parliamentary session, that when Parliament meets again May 20 definite action might be taken in connection with Canadian broadcasting. Sir George Perley, acting prime minister during R. B. Bennett's illness, said a phange in radio control would not necessarily be made, but felt personally, that "we ought to be able to carry on this service by a Commission, but how that can be done I do not know, I admit that frankly."

The radio question came up with the passing of a bill to extend the life of the Canadian Radio Commission. That something will be done soon is shown by the fact that the bill provided only for the life of the Commission for two months from April 30.

Private Stations

CHARGES by the opposition included that the number of private stations had increased from 49 to 59 during the last three years, when radio was supposed to be operated under a commission appointed to build a national owned system; that politics had crept into the administration of broad-casting; and that programs were that there was a plan to build h.gh power stations at Vancouver, in the Maritimes, and elsewhere, but it was delayed by lack of money. When Parliament reassembles the question is to be considered, either by a House committee or by government legisla-tion. If all the private stations were wiped out, many parts of Canada would be left without radio services.

CKLW, Windsor, soon to be replaced by WJR as CBS outlet for Detroit, came in for considerable mention in Parliament, and the charge that political interference there was so great as to cause almost a public scandal was made by Hon. W. D. Euler, former minister of national revenue.

Mr. Euler proposed a 15 kilowatt rederal broadcasting station for Toronto. He stated that present rules of the Commission forbid any criticism of legislation enacted by the present government, which if enforced, would mean the elimination of opposition speakers from the air during an election campaign. Public dissatisfaction with the Commission has even bred the suspicion that the government radio has become the property of the Conservative party, now in power, he charged. None of the purposes for which the Commission was created has been carried out, nor has the Commission made any adequate attempt to answer criticism, he claimed.

That much of the radio question had to deal with the forthcoming general election, can be gathered from the fact that several opposition speakers stated that free use of the air should be given leaders

The 'Mike' Line

MORE than 1400 applicants for positions on WHIO, new Dayton (O.) station, were auditioned in selecting the staff and it took two weeks to hear all the voices. Among those selected was Tom Slater, brother of Bill Slater, NBC announcer, and he had never been confronted by a microphone before. He formerly was publicity director of Miami University, Miami, O. WHIO control engineers wear light uniforms with red letters WHIO on the lapel, and also must wear them on remote pickups. Page boys also are uniformed.

of Canada's three political parties. Premier Bennett in his recent series of half-hour talks paid for the time, but he is a wealthy man, claimed the opposition. The leaders of the two other parties were unable to pay for time on the air. England's system was recommended by the opposition, but the government could not see how the Canadian air could be similarly divided to give everyone satisfaction. The radio should be considered a means of education for the voters, the opposition pointed out.

voters, the opposition pointed out. Meanwhile the Canadian Radio Commission stays on the job officially till June 30, and with an election to be held in the autumn, some decision will have to be made before the Commission's term of office runs out.

SPOT ADVERTISING on Sundays will stop May 5, the date the recent prohibition against Sunday spot advertising will go into effect. Exempt from the prohibition are time signals and spot announcements which render a public service.

The ruling came about due to the question of legality under the Lord's Day Act, of all forms of broadcast advertising on Sunday. Information is now being collected with a view to restricting advertising publicity in Sunday programs to "good will" advertising from which the element of solicitation for the sale of commodities, against which the Lord's Day Act seems to be explicit, has been eliminated.

Change in Disc Rules

(Continued from page 14) programs is now generally considered

Whereas, the broadcasting industry would be greatly benefited by the removal of existing restrictions, therefore, be it

Resolved, that the NAB hereby respectfully urges the Federal Radio Commission to alter the existing regulations requiring that electrically transcribed programs made especially for broadcasting be so annonnced, so that such a transcription may be announced merely as a production of the concern making such transcription.

Resolved further, that the National Association of Broadcasters hereby directs its officers to bring this resolution without delay to the attention of the Broadcast Division of the Federal Communications Commission, and to take whatever steps may be necessary and practicable to secure prompt revision of the regulations in accordauce with this resolution.

Acme Beer Increases

CALIFORNIA BREWING ASS'N, San Francisco, has increased its Acme beer advertising to include spot announcements on eight Pacific Coast stations over a threemonth period, starting May 1. Stations being used include KFRC, San Francisco; KPQ, Wenatchee, Wash.; KJR, Seattle; KGW, Portland, Ore.; KDYL, Salt Lake City; and KGA, Spokane. Emil Brisacher & Staff, San Francisco, is the agency.

Fisher in Movies

THORNTON FISHER, radio narrator and cartoonist featured by P. Lorillard Co. (Briggs Tobacco) over an NBC-WEAF network in the Briggs Sports Review, has been signed by Noel Pictures Inc., New York, for four half-hour sports features, in which he appears as narrator and actor. The first release "Idol of Millions", which covers the life and battles of Jack Dempsey, will be released during May.

WBRC Baseball

WBRC, Birmingham, will broadcast out-of-town games of the local Southern League baseball team, with Hood-McPherson Furniture Co. as sponsor. Eugene (Bull) Connor, member of the State Legislature, again will announce.

RADIO is to be used by Universal Camera Corp., New York, in a fivemonth campaign which will include other media. Brooks, Smith & French Inc., New York, is the agency.

Wilson Breaks Arm

L. B. WILSON, president and general manager of WCKY, Cincinnati, and one of the nation's most popular broadcasters, suffered a broken arm in a fall at his home on April 15. In attempting to separate two dogs engaged in a fight on his lawn, he slipped, and fractured his left arm between the shoulder and elbow. He returned to his office during the same week, but probably will have to carry his arm in a cast for six weeks.

Advertising Session

THE 32d annual convention of the Advertising Affiliation of America, including four advertising clubs in the United States and five in Canada, will be held May 9-11 in Pittsburgh. Chairman of the program committee is Ralph Leavenworth, Westinghouse advertising manager. Among speakers will be Chester A. Lang, advertising manager of General Electric Co. and William E. McFee, American Rolling Mill Co.

Three Types of Programs And Merchandising Tiein In WBT Tastylax Series

BLACKSTONE PRODUCTS Co. Inc., New York (Tasty-Lax, Blackstone Aspirin) has started an extensive merchandising program on WBT, Charlotte, N. C. Under the direction of A. H. Kaplan, radio director of the Rose - Martin Inc., New York Agency, three diversified types of programs are now being used on the weekly schedule. One is an amateur show, the other musical and third melodramatic.

In each show, unusual features are included to induce listeners to write in and win cash prizes. On one show, problems are presented and listeners asked to send in the solutions. Cash prizes are awarded the three best solutions. In the other production, strange facts are solicited and again prizes awarded for the best.

Fridays, Tasty-Lax uses a melodramatic series known as the *Spider*. A handkerchief is the giveaway used for this show. To increase interest in the Tuesday amateur programs, the client awards the winner of the audition with a traveling set.

WMCA Defendant In Copyright Suit

Associated Music Publishers Seek Injunctions in Court

SUIT was begun in the U. S. District Court for Southern New York on April 19 by Associated Music Publishers Inc., for alleged violations of copyright by Knickerbocker Broadcasting Co. (WMCA) in performances on the air of works for which AMP claims to have exclusive American rights. WMCA's answer must be filed in the court by May 14.

With 600,000 titles on its list, AMP had a number of alleged violations drawn to its attention last year, as a result of which it warned stations against unlicensed use of its numbers. L. L. Watson, radio director of AMP, said this is the group's first suit against a radio station. It has 175 station licensees.

Injunctions Sought

THE COMPLAINT lists seven causes of action, charging that beginning with a performance of "Fue Tu Culpa", a tango, on Aug. 23, 1932, WMCA allegedly violated the copyright law; that no reply was received to published and other warnings, and that it was decided to begin suit after a performance of the Polka and Fugue from Weinberger's "Schwanda der Dudelsackpfeiffer" on Feb. 6 this year. On Feb. 10, however, it is charged, the same work was again performed, as was also a "Poeme" by Chausson.

by Chausson. The court is asked to grant both temporary and permanent injunctions against continued performance of its works without license, and to assess either actual damages or the penalty provided by the copyright law, ranging from \$250 to \$5,000.

Charges of Censorship Are Filed by Rep. Fish Against WHN, New York

ALLEGATIONS of censorship against WHN, New York, were made April 19 by Rep. Hamilton Fish Jr. (R.) of New York, after he had been notified that a speech he was scheduled to deliver could not be put on the air because he had failed to submit the manu-script three days before air time. Mr. Fish protested to the station and also to the FCC verbally, and on April 25 raised the issue on the floor of the House.

Louis K. Sidney, manager of the Loew's station, asserted that the Fish speech, which purportedly at-tacked the New Deal, was not submitted to the station until two hours before the time of broadcast, or too late even to be read by station counsel.

The Fish fight was immediately picked up by the American Civil Liberties Union, which said it welcomed the Congressman's offer of support for legislation to guarantee freedom of the air, but pointed out that Mr. Fish had been incon-sistent in his stand. The Union said that at the educational hearing before the FCC on May 15, it would present " a list of wholly unjustified instances of censorship, of which we have records and will add them to your recent experi-ence."

STANDARD OIL Co., of New Jer-sey, having started a "Happy Motoring" campaign, plans to include radio in mid-summer.

PERAMBULATING ANTENNA-Here is the 66-foot portable tower used by Lynne C. Smeby, technical supervisor of KSTP, St. Paul, in making tests with a portable transmitter to determine location of new station KROC at Rochester, Minn., to be operated in conjunction with KSTP. The tower can be erected by three men and the portable transmitter set up ready for use in an hour and a half. The tower folds into a space 20 by 20 inches and 12 feet long.

Fraud Order Is Pressed **On Astrology Broadcasts**

THE FEDERAL government at Laredo will attempt to uphold its fraud order against Prof. E. R. Rood, who gives advice (for a consideration) on all matters by means of astrology over station XENT, Nuevo Laredo, Mexico. At present, Prof. Rood has a tempo. rary restraining order against the government to prevent postmaster J. R. Goodwin of Laredo from holding up his mail. Chief Assist ant United States Attorney Forrest Lee Andrews, who will represent Postmaster Goodwin as wel as the government, said that ir addition to giving advice, Prof Rood also dispenses (for a consideration) a medicine named by him as "Cell Food Tablets" which he claims will cure a person suffering from any physical disorder.

The trouble started when Prof Rood was conducting his astrologi teal observations for the benefit of the "Astro Radio Club" over sta-tion XEPN at Piedras Negras Coahuila, Mexico. His mail wa: stopped after the postoffice depart ment issued a fraud order agains him. Then the professor moved hi: operations, his astrological obser vations and his "Cell Food Tab lets" to radio station XENT across the Rio Grande from Laredo. The postoffice department issued 🔢 fraud order against him there, rec ords show.

Where Daylight Saving Prevails

CITIES and towns throughout the country and in Canada in which radio broadcasting stations are located and which are observing daylight saving time this Summer are listed below. The list was drafted from a compilation made by the Merchants' Association of New York, which led in the daylight saving time movement throughout the country. Data was obtained by the Association by questionnaire sent to municipal officials and commercial organizations in every city and town, to ascertain those in which the earlier hour would be observed.

Except where otherwise indicated, the period of observance is from 2 a. m., April 28 (the last Sunday in April) until 2 a. m. Sept. 29 (the last Sunday in September). All New York program schedules during this period will be broadcast on Eastern Daylight Saving Time.

The list of daylight cities having radio stations, by States, follows:

follows: CONNECTICUT—Notwithstanding the attempt of rural legislators to pro-hibit the observance of Daylight Sav-ing by the passage of law making it an offense to show other than East-ern Standard time on clocks or time-pieces publicly displayed, Daylight saving is observed by banks, offices, stores and factories in the following places: Bridgeport. Hartford, New Britain. New Haven, Waterbury. DELAWARE—Wilmington. GEORGIA—Atlanta. ILLINOIS—Chicago and suburbs, Ci-cero, Waukegan. INDIANA—Elkhart, Fort Wayne, Gary. Hammond, Muncie, Richmond, South

- Hammond, Muncie, Richmond, South

- Bend.
 MAINE—Augusta, Bangor. Portland.
 MASSACHUSETTS Observance required by State law.
 MICHIGAN Practically every community follows Eastern Standard Time all year.
 MISSISSIPPI—Jackson.
 NEW HAMPSHIRE—Has State law similar to Connecticut's prohibiting other than Eastern Standard Time but a number of cities start the working day an hour earlier. They include Laconia. Manchester, Portsmouth. nouth
- mouth. NEW JERSEY—Asbury Park, Atlan-tic City, Jersey City, Newark, Red Bank, Trenton. NEW YORK—Albany, Brooklyn, Buf-falo, Freeport, Jamestown, Long

Island City, New York, Plattsburg-Saranac Lake, Troy, Utica. In Rochester daylight saving was de-feated by a referendum but many factories and offices start the day

- feated by a referendum but many factories and offices start the day an hour earlier. OHIO-Due to demands for daylight saving in cities, towns and villages-outside the Eastern Time Zone, the entire state was put on Eastern Standard Time April 3, 1927 by or-der of the Interstate Commerce Com-mission
- der of the Interstate Commerce Trie-mission. PENNSYLVANIA Allentown. Erie-Johnstown, Lancaster, Philadelphia, Pittsburgh, Reading, Scranton. RHODE ISLAND—Entire state. HAWAII—Honolulu and entire terri-
- RHODE ISLAND—Entire state.
 HAWAII—Honolulu and entire territory.
 CANADA—Brantford, Ont. (June 30-Aug. 31); Chicoutimi, Que. (May 4-Sept. 28); Fort William, Ont.; Halifax. N. S. (June 1-Sept. 29); Hamilton, Ont. (May 4-Sept. 14); Hull, Que.; Kingston, Ont.; Moncton, N. B.; Montreal: Ottawa; Quebec; Regina, Sask.; St. Catharine, Ont.; St. John, N. B.; Toronto; Yorkton, Sask., (all year).
 EUROPE—Great Britain and Northern Ireland (April 13-Oct. 5); France (March 25-Sept. 29); Belgium (seven months from April 7); The Netherlands (May 15-Oct. 6); Portugal (March 30-Oct. 6).
 SOUTH AMERICA—Argentina (Oct. 1-March 30).

Report of ANPA Radio Committee

(Continued from page 7)

adcasters and the newspapers is reluctance of the newspapers and Press Associations to sell the to radio advertisers for sponsor-

over the air. 'his refusal rests upon these two

amentals: irst: The practice would permit advertiser to censor and edit the s to suit not only his own adver-mg program but also his prejudices social, economic, religious and poeverate into propaganda for the adiser.

econd: Since the sale of news is basis of the newspaper publishing iness this asset should not be sold

iness this asset should not be sold he broadcasters to be used in com-tion with the newspapers. o get to the essence of the prob-which has confronted the Radio mittee, the general public is de-ding news by means of Radio dcasting because of its speed and venience. Many radio stations are inclined to give away the time for dcasting news when this "Radio the can be sold to an advertiser a substantial amount of money. vs also can be sold easily to almost radio advertiser.

radio advertiser.

e newspapers, the Press Associa-is, and the two Chains have been perating in the performance of a ic service to radio listeners, but y of the independent radio sta-s have not cooperated because the d of the cash register means more hem than the preservation of prin-es which affect the welfare of the eral public.

e believe that substantial progress been made in the last year in the ss-Radio Bureaus, in the coopera-extended by the National Broad-ing Company and the Columbia adcasting System, and that still ther progress is possible. he co-operation of the newspapers

a radio stations in the broadcast-of news has been carried on un-the general supervision of your mittee.

he Press-Radio Bureaus have peradio listeners. This statement is ed upon the contents of thousands etters and calls which have come the Bureaus from listeners who intarily expressed their apprecia-

intarily expressed their apprecia-of the service. he New York Bureau has attained igh standard of efficiency under the onal supervision and direction of in S. Friendly of The New York The Pacific Coast Bureau has a developed to an equally high de-of efficiency by Norman Chandler the Los Angeles Times and J. R. wland of The Tribune, Oakland, fornia, all of whom are members our Committee.

our Committee

addition to this, your Committee been making a study of the trend adio and its relation to the newser publishing business. One of noticeable developments is the lual increase in the number of o stations owned, in whole or in by the newspapers. The records that one hundred and fifteen of six hundred radio stations in the hundred radio stations in the red States are owned or controlled newspapers, which in terms of er amounts to about one-third of total.

he Committee believes that the s-Radio Bureaus should be main-ed for another year. that the dcasting of news should be liber-d, and that fuller authority 'ld he vested in the two Bureaus governing the broadcasting of

ПОХ

G BUY

While the plan, which your Com-mittee submits herewith, is not en-tirely satisfactory, we believe it is the best that can be obtained under the competitive conditions which exist among the various groups represented in Press-Radio. Your Committee, in therefore, recommends the adoption of the plan and that it be put in opera-

tion at once. Your Committee desires to place it-self on record as being opposed to the general practice of selling news to an advertiser for sponsorship over the air because this policy is unsound in principle and, if it is generally adopt-ed eventually will destroy Press-Radio Bureaus and do untold damage to the public matters.

public welfare. The sale of news to an advertiser for broadcasting purposes opens the way for him to edit and censor the way for him to edit and censor the news over the air. The listeners will be offered propaganda of various kinds under the guise of news. The radio advertisers who are in control of all advertising programs under our pres-ent system of broadcasting have de-veloped the technique of weaving their advertising stories into the broadcast-ing as a part of their news programs, so that the listeners, if they are not on guard will be sold a cathartic or on guard, will be sold a cathartic or a breakfast food because some alert advertiser has hooked up his product with a news item concerning the health of some person prominent in the public life. The listening public is being fooled by advertising propa-ganda broadcast under the guise of news

After many conversations with the various groups involved in Press-Radio relations, a conference with representatives of the groups which had been previously concerned with this problem was held at the Hotel Biltmore, New York City, April 5th,

Biltmore, New York City, April 5th, which was attended by representatives of the National Broadcasting Com-pany. the Columbia Broadcasting Sys-tem. The United Press. The Interna-tional News, The Associated Press, and the Executive Committee of the A. N. P. A. Radio Committee. After eliminating all of the pro-posals to which the combined group could not agree. we arrived at the following final and unanimous con-clusions as a basis for further co-operation between the broadcasters, the press associations, and the news-papers, for a period of one year. This course seemed to be the only one open to us.

to us. 1. 1 That the public interest requires the continuation of the Press-Ra-dio Bureaus in order to make cerdio Bureaus in order to make cer-tain that reliable and authentic news is disseminated through the medium of radio broadcasting. (The National Broadcasting Company and The Columbia Broadcasting System have pledged their support for another year if this recommen-dation is adopted.) 2. That the Committee in charge of the operations of each of the Press-Radio Bureaus be authorized to adopt such rules and regulations

to adopt such rules and regulations as in their opinion are essential to

as in their opinion are essential to a better service. 3. That the newspapers owning or affiliated with radio stations. sub-ject to the regulations of the Press-Radio Bureaus, be allowed a more flexible use of wire reports as those reports are received in their own of fices for broadcasting of news; provided, that such newspapers make announcement of the news sources as required of those who receive their reports from the Press-Radio Bureaus. 4. That publishers should individu-

Moine

The United Press and The International News Service, in concurring in the action of the conference, reserved the right, when and if, in their opin-ion, it should become necessary, to sell a news service to advertisers or radio stations for broadcasting pur-poses under such restrictions as they shall impose to preserve the purity of the news. They stated that, in principle, they were opposed to the sale of news for radio sponsorship as a source of revenue, and that such news would be sold only for sponsor-ship when competitive broadcasting of news warranted such action. tional News Service, in concurring in

of news warranted such action. We believe that the above plan will tion of the two Press-Radio Bureaus to enable them to serve the public with reliable news and at the same

time, not tie the hands of the press associations nor penalize newspaper-owned or affiliated radio stations.

Your Committee has made an honest effort to serve the Press as a whole, with due regard for the rights and privileges of the public, but there still remains a responsibility upon every publisher to do his part to solve a most difficult problem by lending his full cooperation to any plan which the Corrections may educt as a policy

his full cooperation to any plan which the Convention may adopt as a policy for the best interests of all. Respectfully submitted, E. H. Har-ris, Chairman; Amon G. Carter, Nor-man Chandler, E. D. Corson, John Cowles, K. A. Engel. Edwin S. Friendly, H. Ponting, J. G. Stahl-man, O. S. Warden.

CENTAUR Co., New York, has started a morning radio series on 30 CBS stations promoting its ZBT baby powder, with Hanff-Metzger Inc., New York, the agency.

HARRY W. WITT, since September, 1933, commercial manager of KGB, San Diego outlet of the CBS-Don Lee network, has been named manager of the station, according to an announcement April 16 by C. Ellsworth Wylie, general man-ager of Don Lee. He succeeds Lincoln Deller, who has left for New York City.

South American Visitor

JAIME YANKELEVITCH, president, general manager and owner of Radio Nacional (National Radio, Buenos Aires), parent organization of the largest broadcasting chain in South America, is expected to arrive in New York May 10 on a business trip. He intends to make extensive purchases of latest types of radio equipment for his stations, and to contract for transcriptions, rebroadcasting and the like. His headquarters in the United States will be at the office his American representative, lly Markus, 1560 Broadway, of Fally Man New York.

Editors Becoming Reconciled to Radio As Medium for Dissemination of News

THAT EDITORS of the country are becoming reconciled to the power of radio as a disseminator of news was obvious as the 13th annual convention of the American Society of Newspaper Editors, held in Washington April 18-20, found the press turning toward a common sense approach to the

competition of broadcasting. Typical of this trend was discussion on the last day of the convention when a resolution was intro-duced, criticising the NAB for its part in raising a fund to meet the Associated Press appeal from the KVOS case, in which Federal

Field Intensity Surveys, Coverage Presentations for Sales Pur-poses, Allocation and Loca-tion Investigations

Judge John C. Bowen ruled that stations have unrestricted right to broadcast news once it is published, since radio is a faster means of disseminating news.

The resolution at first was worded to "condemn" the NAB but this was amended, after discussion, to was amended, after discussion, to "declare its disapproval", and then adopted. Leading the discussion was A. C. McCullough, publisher of the Lancaster (Pa.) Intelligenc-er, which operates WGAL and is identified with the Mason-Dixon group of stations. Professing that he isn't interested in radio but is a "newspaperman and just don't know anything else" he warned know anything else", he warned the editors to prepare for the "inevitable". In addition, he stated that "radio is going to become the that "radio is going to become the *headlines* of the news of tomor-row, and that the newspaper has to rebuild itself and present the details." Continuing, he warned that "you can't stop it if you will. The thing is to meet the competi-tion as we find it."

Rights of Stations

EDSON BIXBY, publisher of the Springfield (Mo.) News-Leader, and an applicant for a station, suggested that broadcasters "should procure their own news and then broadcast it."

W. A. Bailey, of the Kansas City (Kan.) Kansan, which has just bought WLBF, Kansas City, took the position that broadcasters have a perfect right to raise money for the test of the KVOS ruling and proposed that the word "con-demned" be changed to "disapproval", which was done.

At the closed sessions of the convention April 19, Dorothy Thompson. foreign correspondent and author, and Raymond Gram Swing, referred to the evils of government-controlled radio in foreign countries, and Marlin Pew, editor of Editor & Publisher, touched on

the competition of radio. The stenographic transcript of the editors' discussion of the KVOS resolution follows:

A. C. McCULLOUGH, Lancaster (Pa.) Intelligencer—I'm just won-dering whether we can turn back the tide. I have seen a great many things come and go in my time— canals, jerkwater railways, trolley lines, buggy factories, wagon factor-ies, whip factories and a great many others. The newspaper today is big-

ger and better than ever. It has stood the trend of the times and the disintegration that has come to other

Industries like no other institution. It is bigger and better than ever. The radio is here. I am just won-dering whether the newspapers ought to be eternally fighting with it. Fortunately, or unfortunately, we also have radio. I am not speaking in those terms. I helong to the old school. The radio doesn't appeal to me. I ani a newspaperman and just don't know anything else, hut it does seem know anything else, hut it does seem to me that this society might just as well prepare for the inevitable. It does seem to me that the radio is go-ing to become the *Headlines* of the news of tomorrow, and that the news-paper has to rebuild itself and present the details. I fear that any attempt by this society, as I said, to turn back the tide is something that has no the tide, is something that has no place here. It is something which place here. It is something which every speaker hefore this convention has referred to as the thing which is making demagogues and what have you. Let us not be fogeyish with ad-vancement. You can't stop it if you will. The thing is to meet the com-petition as we find it.

WALTER M. HARRISON, The Oklahoman. Oklahoma City (Operat-ing WKY)—Would the gentleman give to all who wish to possess them-selves of it, our material, that which we have paid for so dearly?

EDSON BINBY, Springfield (Mo.) News-Leader—As I understand it, there was not opposition to radio broadcasting news. It is broadcast-ing and stealing news that we have paid for. Let them procure their own news and then broadcast it.

W. A. BAILEY, Kansas City (Kan.) Kansan—As I understood the resolution it started out by saying that we condemned the passing of the hat, or something like that. The point I was raising is this: As I un-derstood this move, it resolves itself on the fight primarily, on the side of radio, between newspapers that do not have radio hookups and newspapers. and those that do, and right in the Association of Broadcasters there is, as I understand it, some feeling that those who do not have newspa-per hookups should not contribute to this fund, and those who do not have newspaper hookups are contributing. It seems this resolution would be a little more in keeping with the dignity of this Association if we would leave of this Association if we would leave out the part where we say that we condemn their attempt at financing this fight. I think they have a perfect right to test the case in court and why not have our resolution drawn along the line that we are centering on the point of combating piracy. rather than their financing of the case

J. NOEL MACY, Yonkers (N. Y.) Statesman—If we are going to make it general, we might as well add to it that we condemn piracy of news by radio and other newspapers, either

FREQUENCY MEASURING SERVICE

HIGH FIDELITY

FOR 100/250 WATT STATIONS

Stations operating on 100 or 250 watts, or on 100/250 watt licenses may now give their listeners the same High Fidelity and completely reliable service that is afforded by more powerful up-to-date transmitters. The RCA Type ET-4250 Broadcast Transmitter brings this to the smaller station, plus new simplicity, increased reliability, finer performance, and new economy.

COORDINATED DESIGN

It is important to remember that RCA is the only organization in the radio industry that produces everything from the microphone in the studio to

the loudspeaker in the home. All RCA equipment is designed according to a thoroughly coordinated plan for organized High Fidelity, avoiding all difficulties in matching and compensation in the field.

RCA Broadcast Transmitter, 100/250 watts, Type ET-4250, for High Fidelity. Complete, self-contained, AC operated.

OUTSTANDING FEATURES

The audio characteristic of this new transmitter affords less than plus or minus 2 db. variation from 30 to 10,000 cycles. The hum level is 60 db. below the modulation level. The audio harmonics are less than 4% total arithmetic sum at 95% modulation, and the radio harmonics are well within the requirements of the Commission. All this means high fidelity, and vastly increased listener interest and substantially larger audiences. The improved crystal control circuit employing the new "V" cut crystals does not require critical temperature control and insures less than 10 cycles variation plus or minus.

At 250 watts output, this modern transmitter, operating on either 110 volts or 220 volts 60 cycles, draws only 1.7 KW,—which means new economy in power consumption.

Write for Bulletin No. 47 on this remarkable $100^{-2}250$ watt transmitter.
