

more on the same subject

More people live in those portions of the 7 great states covered by WOR (18,399,713), than live in the combined cities of Chicago, Los Angeles, Detroit, Pittsburgh, San Francisco, and St. Louis.

More money -26 billion dollars – was spent in 1944 by people in WOR's territory than the combined goals set for the 7th and 8th War Loan Drives by the United States Treasury Department.

More homes in the WOR area have radios than America's largest selling national magazine has buyers. Our digit deliverer, Miss Ochs, will remind you that we're talking about 4,704,675 homes.

More stories of how WOR has successfully sold goods rest in WOR's files than in the files of any other one station in the United States. The number, we keep repeating, is exactly one hundred and six.

LISTENERS SEND NICKELS, DIMES AND DOLLARS

AND A CHILD WALKS

1945—Dr. John W. Holland, WI.S staff pastor, visits Donald.

> 1944—Donald tries out the orthopedic walker.

20 months, two-year-old Donald Bresson was taken from his farm home to a hospital in Rockford, Illinois, to use an orthopedic walker given to the hospital by WLS Christmas Neighbors Club. Lifted into the walker for exercise twice each day for eight months, Donald is back home now, walking unaided and looking forward to Christmas with a normal child's anticipation.

HIS LEFT LEG, paralyzed by polio for

Nurses at the hospital tell us that without benefit of the walker given by WLS Christmas Neighbors Club, Donald would never have learned to walk.

* * * *

Each year since 1935, generous listening friends have sent to the WLS Christmas Neighbors Club money providing wheel chairs, inhalators, incubators, and other needed equipment for 593 hospitals and other child caring institutions in 17 states and Alaska.

1945 donations give promise of equalling 1944's \$27,000.00. With this money portable blood pressure machines and fracture beds will be added to the regular gift list.

This kind of help to those less fortunate is possible because of listener confidence in WLS—The result of continuous, reliable service by WLS to individual, family, and community in the rural Midwest. WLS serves business needs by frequent weather and market reports, farm problem discussions... brings educational programs into rural schools ... provides entertainment these folks like ... links inspirational programs with practical demonstrations of Christianity.

WLS Christmas Neighbors Club is but one example of WLS and its listening family combining to foster better living for Midwest America.

Closed Circuit

SHOULD CBS not acquire KQW San Francicco from the Bruntons at \$950,000 purchase price (see story, page 16) because of FCC policy declaration on network ownership, there will be number of bidders including Marshall Field Enterprises and possibly personages high in Democratic party ranks.

THE ANSWER to many of America's international communications problems probably will be found in a comprehensive report which has been prepared for the State Dept. by Prof. Arthur W. McMahon of Columbia U. Prof. McMahon spent several months studying knotty problem and his recommendations have been accepted favorably—in most particulars —by William B. Benton, Asst. Secretary of State. Prof. McMahon favors private participation in international broadcasting and appointment of a committee, to be chairmanned by an FCC official, to set up program for operation.

WQXR AND ITS FM adjunct, WQXQ New York, shortly will have new executive. Lt. Col. John S. Hayes, former WOR production chief, who directed AFN operations for the Army in ETO until recently, will join the *New York Times* stations as station manager shortly having procured Army release last week. Post is new one and he will report to Elliott Sanger, WQXR executive vice president, who will devote primary attention to policy level matters, along with John V. L. Hogan, president.

FATE of Fred Waring morning program on NBC, started six months ago as experiment, rests with American Meat Institute Board, meeting Dec. 28 in Chicago. If AMI directors approve twice-weekly sponsorship of 11-11:30 a.m. series, NBC keeps it sustaining other three days, otherwise show likely goes off.

MID-JANUARY may see departure from Treasury's War Finance Division of two key figures—Ted R. Gamble, National Director, and Lt. David Levy, Radio Section Chief.

LT. COL. TEX McCREARY, ex-New York Daily Mirror staffer, now on terminal leave, trying to interest at least one network in news service which he proposes to organize. His last Army job: Conducting flying circus of reporters and photographers to scenes of best stories in Pacific.

NAB PRESIDENT Justin Miller won't be seeing James C. Petrillo, AFM president, until after holidays. He wants across-the-table meeting with music czar, but parley postponed because Mr. Miller has Board meeting on schedule plus district meetings upcoming --and AFM head wants to spend holidays in Chicago.

LIKE HIS predecessor, President Truman is conversant with AFM-radio tribulations. He collided with it while in Senate and has shown

Bulletins

EDWARD R. MURROW, chief of CBS European staff, in charge of London office, and Davidson Taylor, who rejoined CBS Nov. 16 as director of programs after two years abroad in Government service, elected network vice-presidents Friday, dividing responsibility for all CBS broadcasts. Mr. Murrow supervises news, educational and discussion broadcasts, Mr. Taylor all other programs.

DIRECTOR of National Music Camp, Interlochen, Mich., will wage one-man war against James C. Petrillo, AFM president. Dr. Joseph Maddy, of Michigan music retreat, so announced Friday after he had been ordered to appear before the AFM executive board in Chicago Jan. 15 to show cause why he should be expelled from union. Union charges Dr. Maddy's work is "detrimental" to AFM.

CIO Jan. 5 starts Saturday series, *Cross Section-CIO* on CBS 3:45-4 p.m. Bill Downs, former CBS war correspondent, to conduct "impartial interviews" with CIO personnel.

DRUGGISTS TO HANDLE RADIOS

McKESSON-ROBBINS, wholesale drug distributors serving some 30,000 retail stores, and Goodyear Tire & Rubber Co. through its retail outlets will distribute RCA's new line of radios and radio-phonographs. Table models in \$25-\$75 price range to be introduced early next year. Also may be handled by mass distribution companies.

Business Briefly

ARMY BUYING SPOTS ● U. S. Army starting Jan. 7 uses 600 stations five times weekly for three weeks in recruiting announcement campaign. All stations except affiliates of ABCand Mutual which carried at least three Armysponsored football broadcasts will benefit Agency, N. W. Ayer & Son, New York.

FAWCETT ADDS • Fawcett Publications Inc., New York (Magazine Digest and True Magazine), has renewed World News Roundup thrice weekly on WEAF New York, through April 1, 1946. Company sponsors spot announcements on 13 stations for True and five stations for Today's Woman magazine. Agency, Mc-Cann-Erickson, New York.

DAINTEE NAMES HILL • Daintee Products Co., Paterson, N. J. (Brite-Aid and other household products), has appointed Hill Adv., New York, to handle grocery store products. Radio may be used.

TINKLETONE PLANS • Precise Electronics Co., New York (radio sets), has appointed Atom Adv., New York, to handle advertising. Firm expects to use radio in March to plug newest model called Tinkletone.

SNIDER SPOTS • Birdseye-Snider, New York (Snider condiments), on Jan. 3 starts daily participation in combined *Sunrise Salute* and *Housewives Protective League* on KNX Hollywood for 13 weeks. Agency, Benton & Bowles, New York.

ADM. FARLEY PROMOTED

REAR ADM. JOSEPH F. FARLEY, communications expert, nominated by President Truman to become commandant of the Coast Guard with rank of full admiral, succeeding Adm. Russell R. Waesche, who retires Jan. 1. Adm. Farley, 56, has been identified with Coast Guard-Treasury communications most of his Coast Guard tenure, which began in 1912. He has been Coast Guard-Treasury delegate to many international conferences on communications and was important figure on Board of War Communications.

Six Commercial TV Stations Assigned

PERMANENT assignments in the new low television band for the existing six commercial stations and the 10 experimental stations were announced Friday by FCC, together with procedure to be followed in shifting of assignments to conform with new allocations.

Four of six existing commercial metropolitan stations which must change frequency were notified they must go off air by March 1 and return with regular programs by July 1 on new assignments. Amateur service will shift March 1 from 56-60 mc to 50-54 mc.

The Commission explained all commercial assignments announced were for metropolitan stations with their existing powers and antenna heights. Changes in assignments of experimental stations were made to prevent interference to commercial stations, to achieve uniformity of licensing where the same equipment is used experimentally and commercially by the same licensee, or to remove television operation from frequencies assigned to other services.

To effect changes without disturbance, FCC set forth this procedure:

- Existing stations that must change frequency will go off the air on or before March 1, 1946, and return to the air with regular programs on or before July 1, 1946 on their new assignments.
- 2. The amateur service will change from the frequency space between 56 and 60

FOR THE COAST

"MEET

... in her purse she

When a man goes rummaging in women's purses, he's likely to get some surprises. Or, as emcee Jerry Lawrence proves to the delight of *Meet the Missus* audiences, anything is possible. Thus far he's found such oddities as smoked tripe, a hand grenade and a stuffed chipmunk. But that's not all...

By far the most interesting item in the handbags of a quarter-million women who each year comprise the studio audience alone of Meet the Missus is a half-billion dollars in buying power.[†] And this is only the buying power of women who actually see the show. In addition to them...

More ladies listen to Meet the Missus than to any local women's program on the Pacific Coast.*

. . by the Idea Network

THE MISSUS"

carries a half-billion dollars

Monday through Friday, rain or shine, holiday or washday—the ultra-glamour of Earl Carroll's (where the broadcasts originate), the gag questions and gimmicks, the unrationed laughter and deep-down sentiment of *Meet the Missus* on the Columbia Pacific Network make it a housewives' "must".

In person or on the air, Meet the Missus delights the lady with the purse—that allpowerful lady who does most of the Pacific Coast's family buying. And it pleases sponsors of everything from quick-frozen foods to floor wax, too. So much so that one advertiser voluntarily announced: "...our sales results are ample evidence that you have an outstanding show."

A call to us or Radio Sales will get you an introduction to the Missus and (as soon as an availability opens up) get your product an introduction to the purse-powerful audience of Meet the Missus. Why not call us or Radio Sales now?

+Computed on \$1,922 per capita effective buying income for Los Angeles, Sales Management "Survey of Buying Power" (May, 1945).

Feature of the Week

A WAR-END friendship was renewed early this month when Gen. Jonathan M. Wainwright, hero of Corregidor, made good his promise to visit Arizona, where he lived as a boy.

He made the promise to Howard Pyle, program director of KTAR Phoenix, who represented NBC, KTAR and the Arizona Broadcasting System as a war correspondent, as they were flying home after witnessing the Japanese surrender ceremonies on the U.S.S. Missouri and the surrender of Lt. Gen. Yamashita, Jap commander in the Philippines, in northern Luzon.

Gen. Wainwright's Arizona visit included an appearance on Mr. Pyle's *Report to the People of Ari*zona, a state network feature; a meeting with Gov. Sidney P. Osborn, accompanied by Mr. Pyle; a party at Williams Field near Phoenix, and a 325-mile flight which gave him a view of his old Fort Grant home, which he hadn't seen in 50 years. Mr. Pyle, the first civilian broadcasters to land on the

FANCY western riding crop was presented Gen. Jonathan M. Wainwright by Howard Pyle, program director of KTAR Phoenix, during a radio interview when the general made a visit to Arizona.

Atsugi airstrip near Tokyo, was the only radio man aboard the plane bringing Gen. Wainwright from the Pacific to the U. S.

Sellers of Sales

The second secon

1941 that the most important job asalesman can do is a good job of public relations.

No prophet, but now enjoying the fruits of his pre-war prediction, Ernie is prepared for the future with a long list

of satisfied clients now on the air with WBBM and an almost equally long list of accounts to whom he had to regretfully say "No" when they begged for time: "It has a lw ays

"It has always seemed to me that there is no such thing as a lost account. For this reason, even when we weren't able to satisfy local advertisers' requests for time, that we continued to c on t a ct them and keep them interested

in radio. Today, as some of the institutional accounts drop off, these people are still anxious to get on the air."

"The radio salesman's big job today and I speak only for the men on our sales staff, is to offer the proper solution to the radio problems a great many accounts will face as they move from wartime to peacetime production.

The secret of a successful sales force is the ability to coordinate

"We put fully as much effort into producing and servicing a local show or a local spot campaign as we would if it were a network production. The salesman is the advertiser's chief contact with the

station and the talent. If he has let the "easy money" of wartime accounts interfere with his maintenance of the respect and good will of advertisers hard hit by wartime restrictions, he has lost himself a friend and a future customer."

"It may be of interest to know that our own sales staff has actually spent more time and money in keeping our advertisers satisfied during the war when we had little time to

sell, than before Pearl Harbor when the shoe was on the other foot," he declared.

A native Chicagoan, born July 3, 1907, and educated in Chicago public schools, Ernië has been an advertising salesman from the day he walked out of Senn High School with a diploma in 1925. He started with the *Chicago Tribune* as a classified adman, and moved to New York to join the advertising staff of the *Tribune's* famed *Ocean*

WTIC HAS HELPED TO MAKE ME SOUTHERN NEW ENGLAND'S FAVORITE MUSTARD

Back in 1938, the makers of Gulden's Mustard decided to test the effectiveness of radio for promoting the sale of their product. WTIC and the wealthy Southern New England market were selected for the experiment. That test has resulted in a mutually profitable association of seven years standing, for Gulden's is today the favorite mustard of Southern New England.

A quality product, a superior sales medium, and an above average market form a combination that is just about impossible to beat. Gulden's Mustard, WTIC, and Southern New England are a case in point.

ONE OF A SERIES PRESENTING THE MEN WHO MAKE FREE & PETERS SERVICE

"Fore," pleasehere comes

JONES SCOVERN!

Yes, friends, alack and alas. Despite his cherubic face, the character depicted above is both a gin rummy hound and an amateur golf champion. Also, we hasten to add, he had seventeen years of successful advertising experience even before coming with F&P (including four years of top-notch work in local and regional sales at KSD) and is really one of the crackerjack radio time salesmen in the U.S.A. ... All in all, Jones has long proved himself to be one of your most valuable F&P "Colonels"!

Yes, we mean "your most valuable", as stated! Here at F&P, Jones Scovern and

all the rest of us have some rather original conceptions of radio-station representation - which include the idea that we represent your interests to the same extent as those of the radio stations we serve. Because we are convinced that if we "sell" you the right stations, and if those stations fully understand your needs - then you, and the stations, and F&P will all be more successful, and enjoy life a lot more while we're doing it!

Too good to be true, you think? Well, give us a ring and see if we can't show you, here in this pioneer group of radio-station representatives.

More Musicians, No **Overseas** Music **AFM Demand**

By Bruce Robertson

JAMES CAESAR PETRILLO, president of the American Federation of Musicians, fired a double blast at radio last week in demands on the major networks and affiliate stations.

He forbade the networks to broadcast any musical programs from abroad (except Canada) effective Dec. 31.

He ordered the networks to "do something" about the fact that of independent stations receiving network programs, only 275 employ staff musicians while 411 do not. He wants musicians employed in every station affiliated with any major network.

International Questions

Mr. Petrillo's first demand-that networks cease broadcasting music from abroad-is expected to have international repercussions. It came on the eve of the State Dept's. program for a world-wide information dissemination which includes. among other things, fostering the exchange of radio programs between this country and others (see story on page 76).

Officials of the major networks were surprised by the double blow. No formal comments were available, but it appeared likely that Petrillo's demands for musicians in every network affiliate would be tossed to the new Industry Music Committee named by NAB President Justin Miller. That committee held its first session in Washington Dec. 6 [BROADCASTING, Dec. 10].

In identical letters to the presidents of the major networks, the AFM chieftain asserted that affiliates which do not now maintain staff musicians "should employ live musicians if they are to continue to receive network programs." He said he would "be happy to call a meeting of the four chain companies some time after the holidays to discuss the entire matter."

In the meantime Mr. Petrillo suggested the network heads might "cooperate by advising these stations that something must be done to remedy this situation." He said the argument that musicians are

BROADCASTING • Telecasting

erating conditions, indicating that to him "normal" means music performed only by AFM members.

No analysis of network musical programs from abroad was available as BROADCASTING went to press, but network spokesmen informally expressed the opinion they were so few in number their absence would have little effect on overall programming of networks. These statements apparently overlooked the regular exchange of broadcasts conducted in cooperation with the British Broadcasting Corp. and carried in this country and England.

Many of these are not primarily musical programs but would lose much of their effectiveness if incidental music had to be eliminated, Stephen Fry, program director at BBC's North American headquar-ters in New York, said. Mr. Fry reported that he had requested BBC counsel to approach the AFM with a request for an explicit definition of musical pickups, pointing out that many addresses of international importance, such as those

of Gen. Eisenhower, have been accompanied by military music which the new AFM edict, if strictly interpreted, would eliminate. Mr. Fry also pointed out that if applied to international programming generally, prohibition on musical programs from abroad would seriously hamper radio's effectiveness as a means of promoting international understanding, as music, needing no translation, has played an important part.

Raises Social Problem

On the domestic front, Mr. Petrillo has raised a problem of social and economic 'responsibility of individual broadcasters as well as the issue of employment for AFM members. If the union's figures are correct, there are three network affiliates operating without employing live musicians for every two that do employ them. Those not employing musicians obtain their musical programs from the networks and records.

In addition to his latest demands,

unavailable in certain cities will

not stand up as the union now is

"willing and ready to service all of these stations." That goes for

Canada as well as the U.S., he

CONTINUING a campaign to

tighten his grip on radio, James

C. Petrillo, AFM president, has

added two more demands to net-

works. He has banned pickups of

foreign music (except Canada) ef-

fective Dec. 31 and told networks

that affiliates not now employing

musicians must hire them. Net-

works expected to toss latest de-

mands into lap of newly-formed

demand reached networks' head-

quarters shortly after his previous

communication forbidding pickup

of music from abroad. In that let-

ter Petrillo said the war is over and

there's no longer any need for such

foreign programs. He commented

it's time to get back to normal op-

Industry Music Committee.

The musicians-for-every-station

added.

RECOGNIZING the importance of clearing up hemispheric standard broadcast allocation problems before expiration of the "Havana Treaty" next March, both the State Dept. and the FCC went into action last Thursday, arranging a preliminary engineering meeting of representatives of U.S. stations on Jan. 4, to be followed by a conference of North American representatives in Washington on Feb. 4.

Full impact of the NARBA meeting, precipitated by Cuba's demands for additional standard broadcast facilities, apparently was not felt in either until after the State Dept. moved toward calling a full-dress "treaty conference" in Washington for early January [BROADCASTING, Dec. 17]. The FCC promptly interceded at the State Dept., urging a technical conference looking toward an interim agreement to obviate Senate ratification, because of lack of time in which to prepare for a conference of plenipotentiary proportions.

The State Dept. previously had

notified the North American nations signatory to NARBA (Canada, Cuba, Mexico, Haiti, Dominican Republic, Newfoundland and the Bahamas) that the sessions would be held in Washington the first week in January. Last Thursday, the State Dept. sent telegrams

PREPARATORY to the North American Regional Broadcasting Engineering Conference in Washington Feb. 4, Commissioner E. K. Jett of FCC, outstanding authority on international communications, has called meeting of industry engineers in Washington for Jan. 4. Possible effect on U. S. broadcasters of Cuba's demands for some 20 additional channels makes it important conference. Mr. Jett urges those planning to attend Jan. 4 conference to notify him.

to these nations advising them the conference would begin on Monday, Feb. 4 in Washington.

Simultaneously, the FCC announced last Thursday that Commissioner E. K. Jett, who has had broad experience in international conferences and who participated in the drafting of NARBA in 1937;

Chief Engineer George P. Adair, and General Counsel Rosel H. Hyde would meet with representatives of industry on Jan. 4 "to discuss matters to be considered at the forthcoming engineering conference relating to the North American Regional Broadcasting Agreement."

Importance of the conference is stressed in the FCC announcement, because of the possible effect even of partial compliance with the Cuban demands upon standard station operations in this country. Cuba has "demanded" new assignments on some 20 additional channels, mainly below 100 kc, and most of them with power of from 15 to 50 kw and all of them requiring protective directional antennas. Following the 1941 NARBA shiftover, many stations suffered intolerable interference from Cuban stations which did not comply with engineering standards specified in the agreement.

Every effort is being made to hold the Feb. 4 session within the limitations of an engineering conference, rather than a formal treaty meeting. The expectation is that an executive agreement may (Continued on page 78)

Touche!

IT TOOK a member of the press to hit the network television situation on the head. Last week, following the RCA color demonstration at Princeton, a newspaperman summed it up thusly: "CBS says 'we've got color but we won't show it.' RCA says 'we'll show it but we haven't got it.""

TV Standards Are Adopted by FCC

TECHNICAL standards to govern television operation were adopted by the FCC last Wednesday at its final meeting of the year. The Standards of Good Engineering Practice Concerning Television Broadcast Stations covers 26 pages of text, in addition to 10 charts and drawings. Applicants and engineers may obtain the Standards from the FCC.

The Standards, along with Rules and Regulations Governing Television (and all other services) will be published in full text in the BROADCASTING 1946 Yearbook Number now in production, which will appear in early 1946.

Subject to revision as progress is made in the art, the Standards are based upon the best engineering data available, including evidence at hearings, conferences with radio engineers, and information supplied by equipment manufacturers and television station licensees. They are complete in themselves, the Commission pointed out, and supersede previous standards or policies concerning television.

The Commission said that while the Standards provide for flexibility and indicate the conditions to which they apply, "it is not expected that material deviation from the fundamental principles will be recognized unless full information is submitted as to the need and reasons therefor."

The Standards cover 12 sections which include definitions, transmission requirements, typographical data interference determination, field intensity measurements, transmitter location, antenna systems, transmitter design, and studio equipment. Sections 13 to 20, which include approved transmitters and monitors and television broadcast application forms, are to be supplied.

The Standards are virtually the same as those proposed by a joint FCC-industry engineering conference and submitted last summer for the Commission's approval [BROADCASTING, Aug. 6].

CBS May Need New Station DAVIS LEAVES NAB **To Help Pay Costs--Kesten** Network Officials Make Plea at FCC Hearing

To Be Allowed to Acquire KOW San Jose

OWNERSHIP of another station may be needed, CBS Executive Vice President Paul W. Kesten told the FCC last Thursday, to help maintain the company's operations.

Appearing at a hearing in behalf of Columbia's proposed purchase of KQW San Jose, Mr. Kesten declared that signs are evident that broadcasting operations are going back to normal. And, he added, at normal level there is a threat of operating at a loss be-cause "circulation" has reached the ceiling. The present 32 million radio homes, he said, approaches the ultimate.

Replacement for WBT

He said CBS. which owns seven stations and 45% of another, is not seeking to raise the ceiling on its station ownership but is seeking to replace WBT Charlotte, sold several months ago (for \$1,505,000) under FCC network regulations. CBS, he said, will need the revenue from another station if operations return to "normal".

Importance of San Francisco as a news center-especially with the possibility of its selection as United Nations headquarters-was cited by Mr. Kesten as one reason an owned station is needed in that area. He said he could understand the Commission's viewpoint in not wanting one organization to own too many stations, but that it is important for the public interest that big news centers be covered adequately. San Francisco, he said, is vitally important in long-range planning.

Pointing out that 1944 was the peak year for revenue, he said if income dropped to the 1941 level the network would operate at a

loss. Pyramiding costs heretofore have been cushioned by expansion of the medium, he explained.

Ownership of a "reasonable number of stations-provided it falls short of monopoly-adds greatly to the economic stability of net-work operation," Mr. Kesten said.

CBS proposes to buy KQW, now its affiliate, from Ralph R., Mott Q., and Sherwood B. Brunton and C. L. McCarthy for \$950,000. The hearing was held before Commissioners Clifford J. Durr, Charles R. Denny Jr., E. K. Jett and William H. Wills.

Frank M. Stanton, CBS vice president and general manager, said if the application is granted CBS plans to apply for a change in frequency from 740 to 560 kc with 5 kw day and night, and that if this change is' not permitted CBS would prosecute an application for 50 kw on 740 kc. He said the company also would ask that KQW be designated as a San Francisco station.

He said CBS did not need any immediate return on its investment but did expect KQW to show a profit.

"Two or three" prospective managers for KQW as a CBS-owned station are being considered, Mr. Stanton declared, adding that "he will certainly be a Pacific Coast man who knows the Bay area."

D. W. Thornburgh, CBS vice president in charge of Pacific Coast operations, would have supervision over KQW. Mr. Thornburgh was scheduled to appear at the hearing but became ill in New York while en route to Washington.

Mr. Stanton said CBS planned

(Continued on page 73)

RESIGNATION of John Morgan Davis as general counsel of NAB, submitted some time ago, was accepted Thursday by President Justin Miller. Mr. Davis asked to be relieved of his post to devote full time to his law firm in Philadelphia, Davis & Short. He will stay at NAB until a successor has been named. Labor aspects of the Law Dept. will be shifted to the new Employe-Employer Relations Dept. now getting under way, with a director to be named soon. Mr. Davis joined NAB Aug. 9, 1944. He had been in Philadelphia broadcasting since 1929.

Study of Agency **Recognition Slated**

PRESENTATION of pros and cons covering a proposed agency recognition bureau within the NAB was worked out last Tuesday at a meeting of a subcommittee of the Sales Managers Executive Committee. The presentation will be laid before the NAB Board of Directors at its Jan. 3-4 meeting in Los Angeles (see roundup story on board meeting page 20).

Cost of operation, which might run \$25,000 or more a year, is discussed along with operating aspects.

If the board endorses the recognition project and the script, a 30minute dramatization will be prepared. This will give those at district meetings a chance to offer their views after hearing the idea argued both ways.

Attending the subcommittee meeting at NAB headquarters in Washington were: Stanton P. Ketler, WMMN Fairmont, W. Va., chairman; Harold Soderlund, KFAB Lincoln; Lewis H. Avery, head of Lewis H. Avery Inc., representa-tives, and former NAB Director of Broadcast Advertising; Muriel Reger, New York script writer. Frank E. Pellegrin, NAB Director of Broadcast Advertising, along with J. Allen Brown and Hugh M. Higgins, assistant directors, participated.

HIX "No Ma'am we haven't any parts yet. This is what your new radio will look like though!"

FCC Announces FM Allocation Proposals

Conditional Grants Are Made for 32 FM Stations

ADOPTING the new channel numbering system to designate station frequencies, the FCC last Wednesday announced a tentative allocation pattern for the U. S. providing for more than 1500 metropolitan and rural FM stations. The plan does not include community allocations, a Commission expert explaining the number of such channels available is "undeterminable" but that they will provide for at least several thousand additional stations.

Simultaneously, the Commission made 32 more conditional grants for FM stations, bringing to 229 the total number of authorizations since the resumption of normal licensing. In addition, three applications for stations in the Ft. Wayne, Ind., area were designated for hearing, bringing to 43 the humber of cases to be heard.

The FM allocation plan was characterized by Chairman Paul A. Porter as an effort to show what is possible in a rough way rather than as a hard and fast policy to be applied in authorizing stations. He emphasized that departures will be made from the plan wherever

it is found in the public interest to do so.

In several instances, the Commission pointed out, "there appears a lack of sufficient channels to meet the probable need for assignments. When the demand grows in these areas, it is usually possible to reallocate channels from adjacent areas where the demand is less

MORE than 1500 metropolitan and rural FM stations, in addition to an indeterminable number of community outlets, are provided in a tentative allocation plan devised by the FCC. Channel numbers are those adopted by the Commission to designate station frequencies.

and where service may already be sufficient. As a result, a lack of channel listing for a particular locality does not necessarily mean that a channel cannot be made available there, should the need develop."

The Commission said the plan does not include community stations, because "it has not been considered practical to establish a basic allocation pattern for stations of this type." Nevertheless, the Commission is anxious to encourage applications for this type of station from broadcasters who fear the designation "community" carries the implication of a small station. Commission engineers de-

 Broadcasting Co. Inc., all for Port Wayne, Indiana.

clare a community station provides considerably better coverage than an AM local facility and as good as the usual regional station.

The probability that many applicants may be assigned community channels, thus increasing the number of available metropolitan channels in an area, was revealed. Ten community channels, it was explained, may provide as many as five such assignments in some cities, depending on demand for such facilities in the area.

The Commission plan takes into account cities where there are no standard stations and applications for FM stations from these areas. It provides that the number of FM channels shall be 50% to 100%above the number of standard stations in each city or market area.

The Commission noted that only a few channels have been designated for a number of small cities, particularly in the West, anticipating that this would supply the probable demand. However, it was pointed out, more channels are available if the demand develops.

Allocation Plan Basic

The allocation plan uses as a basis an effective radiated power of 20 kw and antenna height of 500 ft. above average terrain. The separation of stations on the same channel, the Commission said, "varies from that required by ground wave interference (principally in the Eastern U. S.) to the separation required for freedom from tropospheric interference 1% of the time or less (principally in western areas)."

The Commission conceded the probability that many of the service areas which are being determined for these cities may be greater or less than that provided by the 20 kw power and 500 ft. antenna height and interference more or less than now considered. In many cases, it declared, it is likely that the service areas will be smaller than that provided by this power and antenna height.

The plan of allocations was worked out some time ago, it was learned, and was used as the basis for designating applications for FM stations in Area H for hearing. A plan of allocations for Area I (New York, southern New England and Middle Atlantic states) was adopted two months ago [BROADCASTING, Oct. 29] when the Commission accepted the CBS proposal for assigning frequencies in New York, Philadelphia and other eastern cities. Except for "a little juggling," it was explained, the allocations for Area I are unchanged.

It was admitted there are "hot potatoes" in the plan but it was

pointed out that the proposal is flexible and can be adjusted to meet station demands. If necessary, Commission engineers asserted, the number of available metropolitan and rural channels in Area II could be substantially increased.

Grants and hearing designations authorized last week left the Commission with still approximately 500 FM applications to be acted upon. A total of 272 applications have thus far been given conditional grants or set for hearing.

FM Allocation Plan

Channels available for FM stations in various cities are listed in the following table:

FCC Adopts Deadline Policy for Filings

Cut-Off Date For Boston Hearing Is Invoked

A NEW POLICY of setting deadlines for the filing of additional applications to be considered with cases scheduled for hearing was announced by the FCC last week.

The practice was invoked for the first time in an announcement by the Commission inviting "the full-est possible competition" for available FM channels in the Boston area, where consolidated proceedings have been scheduled beginning March 11. Commissioner Clifford J. Durr, presiding, will hear 10 applications already filed for a maximum of nine frequencies. Prospective applicants were given until Feb. 9 to enter the hearings.

Ashbacker Ruling

It was explained at the Commission that the deadline procedure was applied in the Boston cases because it was desirable to have a "cut-off" date for interrelated applications since three months advance notice had been given of the hearings. The same practice will probably be adopted for future FM hearings, it was. indicated. Only the Boston cases have been scheduled but 30 other FM applications have been designated for hearing.

The Supreme Court decision 'in the Ashbacker case [BROADCAST-ING, Dec. 10] had little to do with the Commission's action, it was said. In ruling that competitive applications must be given hearing before grants are made, the court had commented: "Apparently no regulation exists which . . . requires an application for a frequency, previously applied for, to be filed within a certain date."

The deadline policy will probably not apply to standard applications and was not included in notices of issues mailed out on cases scheduled for hearing. It was explained that the calendar set for standard procedings allows insufficient time for a "cut-off" date.

Other FM applications designated for hearing will probably not be heard before the first part of May, it was disclosed, as the full schedule adopted by the Commission for the first three months of 1946 precludes additional proceedings during this period. Most of the field hearings, it was pointed out, will also require further hearings to receive engineering testimony. These are to be held in Washington and will keep the Commission busy for the month of April at least.

The Commission pointed out that its allocation report of Oct. 26 indicated a possible maximum of 10 metropolitan channels in the Boston area, including the existing station (WBZ-FM) owned by

Page 18 • December 24, 1945

Westinghouse. Ten applicants have applied for the remaining nine channels, it stated, adding, "It desires the fullest possible competition for the channels and seeks the fullest information concerning the qualifications of the applicants.'

Lists Four Issues

The Commission said it is desirous of making the Boston hearing "of maximum usefulness in its task of assigning these valuable channels." It declared it wishes to give "every encouragement" to veterans and other newcomers interested in entering the broadcast field.

Originally, 11 applications for FM stations in the Boston area had been designated for hearing but one of these-Bristol Broadcasting Co. Inc .- has withdrawn. The remaining applicants are CBS. Yankee Network, Raytheon Mfg. Co., Unity Broadcasting Corp. of Mass. (subsidiary of International Ladies Garment Workers Union), Fidelity Broadcasting Corp., Northern Corp., Matheson Radio Co., Templeton Radio Mfg. Corp., Massachusetts Broadcasting Co., Harvey Radio Labs. Inc.

Four issues were listed by the Commission for consideration at the hearings. These are: (1) qualifications of the applicants, (2) character of the proposed program service, (3) area and population to be served, (4) determination on comparative basis which applications should be granted.

Thus far, the Commission has designated 40 FM applications for hearing, including those in Boston. The others are for stations in the Cleveland, Akron, Providence-Pawtucket and Indianapolis areas. Notices of issues to be heard on seven applications for the six channels in Providence-Pawtucket have been mailed out and applicants in the other cities will shortly be notified.

In connection with consolidated proceedings scheduled for standard applications, the Commission invited testimony from others, besides the applicants, which would assist it in reaching decisions.

Applicants for standard service to be heard at California hearings, beginning Jan. 2, are FM Radio & Television Corp., San Diego; Broadcasters Inc., United Broadcasting Co., both in San Jose; De-Haven, Hall and Oates, Salinas; and Central California Broadcasters Inc., Berkeley (KRE). Each of the applicants is seeking a new station on 1370 or 1380 kc which requests a change in frequency from 1400 to 1380 kc and increase in power from 250 w to 1 kw. unlimited. A sixth applicant, Valley Broadcasting Co., Stockton, previously consolidated with this group, was removed from the hearing as a result of its amendment to request 1420 instead of 1380 kc.

The California hearings will be held at Fresno and will be pre-sided over by Commissioner Ray C. Wakefield, a former member of the California Railroad Commission.

A second set of standard hearings, beginning Jan. 3, will be held in Glens Falls, N. Y., to consider three applications for new stations on 1450 kc, 250 w unlimited. Applicants are Glens Falls Broadcasting Corp., Great Northern Radio Inc., and Glens Falls Publicity Corp. Commissioner William H. Wills, former Governor of Vermont, will preside.

Third Group

Also during the first week in January is a third group of hearings to be held in Charleston, W. Va., to consider three applications for new stations in that city to operate on 1240 kc. 250 w unlimited. Applicants are James H. McKee, Capitol Broadcasting Corp., and Chemical City Broadcasting Co. Commissioner Charles R. Denny, former FCC general counsel, will preside.

In each of the standard broadcast hearings the Commission will receive testimony on eight issues as follows: (1) qualifications, (2) primary service coverage, (3) pro-gram service proposed, (4) possible interference with existing sta-tions, (5) possible conflicts with services proposed in other applications, (6) compliance with engineering standards, (7) possible conflicts with regulations of Civil Aeronautics Administration, (8) determination on comparative basis as to which applications should be granted.

Three Sales Halted for Ignoring Rule

ANNOUNCEMENT of FCC's proposed rule requiring the open-bidding method of handling station transfers and assignments found six pending transactions being processed along lines set out in the rule-and at least three being held up for failure to follow the plan.

The proposed rule, announced Dec. 14, is based on procedure suggested by the Commission in its Crosley-Avco decision last September [BROADCASTING, Sept. 10], requiring public advertisement of proposed transfers and assignments and calling for a 60-day waiting period for submission of competing applications. The Commission served notice on Oct. 3 that, pending issuance and adoption of a formal rule, it would defer action on any subsequent applications unless the open-bidding plan was followed.

No active opposition was reported last week, but most sources agreed it was too early for reaction to crystallize. FCC said a hearing on objections to adoption of the rule would be called if requested in writing by Jan. 15. A brief must be submitted with the request.

Applications for transfers and

assignments placed in the FCC's pending file involve KXA Seattle, KFQD Anchorage, Alaska, and KELD El Dorado, Ark. FCC said it was deferring action pending adoption of the rule contemplated in the Crosley-Avco decision or until the parties elect to follow that suggested procedure.

May Call Hearing

While the Crosley-Avco decision did not specify the number of advertisements required of applicants, the formal rule would require two advertisements a week for three weeks. Submission of a copy of the advertisement, setting forth terms of the proposed transaction and noting that competing applications may be filed on the same terms, would be required along with the application.

The applicant's advertisement must be published in a daily paper of general circulation in the community in which the station is located. FCC also would advertise the terms; under the interim procedure this has been done in the Federal Register, on a one-time hasis.

Text of the order follows:

Text of the order follows: At a meeting of the Federal Communi-cations Commission held at its offices in Washington, D. C., on the 15th day of December, 1945; WHEREAS, The Commission in its de-cision in the matter of Fowel Crosley Jr., transferee (Docket No. 6767) an-nounced that it was considering pro-posed new rules and regulations pre-scribing procedure to be followed in cases involving the assignment of license or transfer of control of corporate licen-sees; and

cases involving the assignment of idense or transfer of control of corporate licen-sees: and WHEREAS, The Commission is of the toton 1.33, prescribing such procedure-which appears in an appendix to this order-may serve public interest, con-were the server of the server of the proper dispatch of business and to the state of justice that all interested per-sons be given an opportunity to file briefs and to appear before the Com-mission to argue orally why the pro-proped in this Order: NOTHEREFORE, IT IS ONDERED. Philco Finds City TV Cost Is Half Million

Glimpse at the cost of es-tablishing and operating a tablishing and operating metropolitan television station was provided last Fri-

day as Philco Radio & Television Cop. filed data with the FCC completing its application for a video station in Washington, D. C.

Philco estimated initial installation costs at \$528,423 and monthly operating costs at "\$61,500 and upwards," the latter figure not taking into account such costly items as talent. Estimated monthly rev-enue was "not known." The minimum estimate on operating costs would run to \$738,000 a year.

Other Estimates

Philco's operating estimates, anticipating 37% hours of programming per week, compare with CBS estimates of \$3,191,000 a year for 42 hours a week [BROADCASTING, Oct. 15]. In October 1944, James D. McLean, sales manager of television transmitting equipment of General Electric Co., estimated on a prewar price basis that equip-

Data Filed With FCC Shows Monthly number about 190, reduced by the amount of air time originating in **Operating Budget of \$61,500**

ment for a "master television station" would cost \$250,000 to \$300,-000 excluding grounds, buildings and antenna structures, and that technical operating expenses would be around \$350,000 a year for 56 hours per week not counting

HOW MUCH does it cost to establish and operate a television station? Philco Radio & Television Corp. estimated last week that its proposed Washington station would cost \$528,423 to install and "\$61,500 and upwards" per month to operate, not counting talent costs.

talent and assuming the eight-hour program day is divided equally between live talent and film, all originated at the station.

Costliest item in the installation proposed by Philco would be studio technical equipment-cameras, film scanners, microphones, synchronizing generators, etc.-\$171,300. Next item is \$167,281 for construction of buildings. Link equipment, furniture, and two mobile camera units would cost an estimated \$79,-580. Other installation costs:

Visual transmitter \$32,500; aural transmitter \$12,137; antenna systems \$19,995; studio lighting \$34,-000; frequency and modulation monitors \$1.630; acquisition of land (already purchased) \$10,000. Three studios, six studio cameras and four mobile-unit cameras would be used.

Philco asks assignment of Channel 4 (66 to 72 mc) for the Washington station, which would be the southern terminus as well as an initiating station in the firm's highfrequency relay system connecting New York, Philadephia, and Washington. Operating personnel would amount of air time originating in New York and Philadelphia, plus administrative staff and stage designers, carpenters, painters, make-up artists and assistants.

Studio Site Undetermined

Studio site has not been determined. Transmitter would be located in Arlington County, Virginia.

The amended application, prepared by Reed T. Rollo of Kirkland, Fleming, Green, Martin & Ellis, Washington law firm, and Raymond M. Wilmotte, Washington, consulting radio engineer, points out that Philco has actively participated in television development for 13 years, having started operation of experimental station W3XE in Philadelphia in 1932 and WPTZ Philadelphia as a commercial station in September 1941.

The company proposes a monthly schedule of 54 hours of outside pickups; 100 hours of studio production; 10 hours of motion picture (Continued on page 76)

Los Angeles NAB Meeting to Map Expansion

NAB Board of Directors, meeting at the Hotel Roosevelt, Los Angeles, Jan. 3-4, will approve a vastly expanded program designed to meet rapid progress of broadcasting operations and improve its services.

A tentative agenda has been prepared for the first board meeting since the Oct. 1-2 session in Washington at which Judge Justin Miller was inaugurated as president and A. D. Willard Jr. as executive vice president. It covers the entire range of broadcast functions and brings before the board new activities which have been in the formative stage and are ready for final approval.

Big Budget

NAB headquarters officials. armed with the biggest budget in history, believed about \$600,000, , will submit reports covering association committees and departments. Work of the past year will - be reviewed and plans for 1946 outlined.

Attending the board meeting from headquarters will be Judge Miller, C. E. Arney Jr., secretarytreasurer, Frank E. Pellegrin, director of broadcast advertising, and Edward M. Kirby, public relations counsel.

The board meeting will be followed by a series of NAB district meetings starting Jan. 7 in Los Angeles and ending Feb. 8 in Memphis. A second series of meetings is tentatively scheduled to start March 18 in Minneapolis and end March 29 in Cincinnati. Plans for other meetings have not been

arranged but will be held sometime in April. (See district meeting schedule this page). Going up the West Coast for the

first three meetings (Los Angeles, San Francisco, Seattle) will be the NAB quartet attending the board session. They will return to Washington during a 10-day gap in the schedule. Resuming Jan. 25, Mr. Willard will join the party in place of Mr. Kirby. The itinerary covers Omaha, Denver, Dallas, Tulsa and Memphis.

Membership of NAB is at an alltime high, the board will be in-

formed, with prospects good for acquisition of new members in 1946 as the industry expands. Also in sight is the prospect that such nonmembers as ABC MBS and Yankee in the network field, and WOR New York and WGN Chicago in the station group may join during the vear.

Westinghouse Problem

Conversations have been held officials of Westinghouse with Radio Stations Inc. since resignation of that group from the board last autumn. No indication has

NAB District Meetings

16th District (S. Cal., Ariz., N. M.) Roosevelt Hotel, Hollywood, Jan. 7-8.

- 15th District (N. Cal., Nevada, Hawaii), Fairmont Hotel, San Francisco, Jan. 10-11. 17th District (Wash., Ore., Alaska), Hotel Olympic, Seattle,
- Jan. 14-15.
- 10th District (Iowa, Neb., Mo.), Fontenelle Hotel, Omaha, Jan. 25-26.
- 14th District (Mont., Col., Wyo., Idaho, Utah), Brown Palace Hotel, Denver, Jan. 28-29.
- 13th District (Texas), Baker Hotel, Dallas, Jan. 31-Feb. 1.
- 12th District (Okla., Kan.), Tulsa Hotel, Tulsa, Feb. 4-5.
- 6th District (Ark., La., Miss., Tenn.), Peabody Hotel, Memphis, Feb. 7-8.

Tentatively Scheduled

11th District (Minn., N. D., S. D., Wis., Mich., in part), Hotel Niccolet, Minneapolis, March 18-19.

- 8th District (Mich. exc. 2 cos., Ind.), Pantlind Hotel, Grand Rapids, March 21-22.
- 9th District (Ill., Wis. in part), March 25-26 (no site selected).

Th District (Kr., Vi.S. III party, March 20-20 (10 Site Setector).
Th District (K.Y., O.), Hotel Gibson, Cincinnati, March 28-29.
Th District (D. C., Va., W. Va., N. C., S. C.), Cavalier Hotel, Virginia Beach, Va., April 11-12.

Others to be held in April.

casting finds NAB building up staff to keep pace with industry progress and growth. Plans for year will come before NAB board of directors Jan. 3-4, with all departments geared for stepped-up service to broadcasters. New president, Justin Miller, will present association projects to board and review progress since he took office Oct. 1.

IMPENDING new era in broad-

been given as to the possibility that Westinghouse will return to the fold. Westinghouse resigned on the ground that NAB had improperly presented the early history of broadcasting in its 25th Anniversary promotion and because of dissatisfaction with other phases of association activity.

In its discussion of membership the board will consider the matter of dues paid by various classes of members. Prospect at the Finance Committee budget meeting Dec. 13-14 [BROADCASTING, Dec. 17] was that an increase in dues would not be necessary despite heavy expansion in departmental budgets and other overhead.

Among other subjects in this category will be status of network membership, bringing up the perennial problem of automatic network membership on the board. Status of FM members acquired with merger of NAB and FM Broadcasters Inc. will be considered.

As of Dec. 13 NAB membership totaled 865, including 648 AM sta-(Continued on page 74)

"KENMORE", NEAR FREDERICKSBURG, VIRGINIA LINOLEUM BLOCK PRINT FOR WRVA BY CHARLES SMITH

HOME OF WASHINGTON'S SISTER

Fredericksburg, just fifty-five miles north of Richmond in the Mother State of Virginia, is the site of many interesting old homes which date back to the Revolutionary and War Between the States eras. Among these is "Kenmore", built by Colonel Fielding Lewis for his second wife, Elizabeth (familiarly known as "Betty"), only sister of George Washington. "Kenmore", long a rendezvous of fashionable Virginians during the middle of the eighteenth century, is especially noted for the beautiful ornamental plaster work on the ceilings of some of its rooms. Now restored, the mansion contains relics and furniture associated with the Washington and Lewis families a perpetual link between the glories of the Past and the promise of the Future. This link, too, is the cornerstone of WRVA's policies. Our pledge of service is bound to the future by our respect for the past and our pride in being an integral part of a State so rich in history, so rich in destiny.

> 50,000 WATTS NIGHT AND DAY STUDIOS IN RICHMOND AND NORFOLK, VIRGINIA

Above: Outside the transmitter building on Soipan. Right: The Western Electric 50 KW transmitter.

EVER hear of KSAI? It's on Saipan – a Western Electric 50 KW installed by the O.W. I. to wage psychological warfare on the Japs. Using a four element directional antenna-giving an effective signal of 250 KW-it did its primary job most efficiently.

But KSAI did another great job, too. One day a crippled B-29—its navigating equipment smashed —"homed" on the station's powerful beam and rode it to safety. Army orders quickly came through: "Keep that station on the air 24 hours a day!"

Around the clock, KSAI kept going—with only six hours a month allowed for maintenance. Requests from lost flyers for "position" dropped from an average of 140 per day to a mere 20. In four months alone, KSAI was credited with saving 20 Superforts, 200 flyers and equipment worth more than \$15,000,000.

Certainly this Western Electric installation paid big extra dividends!

His is the voice of saipan Here, housed under combat conditions, is the vetera Western Electric 50 KW transmitter on Saipan. If you're going to 50 KW you can't do better than to hose one of these Western Electric 407 type transmitters building we sature dependability, the same dupien i will give you the same dependability, the same union foraybar is taking orders now get yours near the top of

BUGABOOS PLAGUE FREE NEWS Experts Agree Communications Face Same Sovereignty Threats as Statesmen

FREEDOM of world communications under UNO was debated by a panel of five radio and press associațion chieftains at a Dec. 14 conference of the American Assn. for the United Nations at Town Hall, New York.

Gist of the debate: The same bugaboos of national sovereignty which plague the statesmen of UNO's participating nations rise dark and ominous among the news and information experts of the world.

The panel was composed of Robert Saudek, director of public relations, ABC; A. A. Schechter, director of news and special events, Mutual; Lyman Bryson, director of education, CBS; Frank Starzel, assistant general manager, Associated Press, and Harry Flory, foreign news manager and director of communications, United Press. Brig. Gen. David Sarnoff, president of RCA and chairman of the board of NBC, presided.

Association had ready for the , panel a tailored set of four questions: (1) Should UNO insist upon freedom of communications as vital to the maintenance of world understanding? (2) How can American radio and press associations contribute most to the exchange of constructive stories throughout the world? (3) How can the press and radio of the world contribute to general understanding and support of UNO? (4) Should radio and the press assume a continuing obligation to put before the world the operation of the U.S. form of democracy?

One of the questions, the panel concluded, was misleading, others vague.

Said AP's communications-wise Mr. Starzel: "It is hopeless to suggest that nations relinquish their sovereignty of communications." He stated his opposition to the adoption of resolutions on this subject which were "platitudes incapable of realization."

What Mr. Saudek wanted to hear was a definition of "freedom of communications." His suggestion was that it might have different meanings in different countries. No one answered his request.

In response to question No. 2, concerning world-wide exchange of constructive stories, Mr. Schechter had a brisk reminder: Exchange of stories between U. S. news agencies which are free and competitive and agencies abroad which are government-owned or governmentcontrolled is sometimes difficult. Mr. Schechter's implication was that a foreign agency's selection of a U. S. news offering would be frequently determined within the rigid restrictions of a foreign government.

Mr. Bryson pointed to another factor which, particularly in radio's case, would hamper free exchange. Language difficulties, he said, are critical.

Question No. 3, concerning press and radio support of UNO, was brushed off quickly. A free press and radio, said Mr. Bryson, could not oblige itself to support any cause. Its obligation was to disseminate the truth as it saw it.

Much the same answer was given to question No. 4, involving the American radio's and press' responsibility to tell the story of American democracy.

Said Mr. Starzel: "If it means propagandizing, the answer is 'no.' If it means giving true accounts of the function of our government, the answer is 'yes'." Good or bad, reports on what goes on in Washingten must be given honestly, he said. Mr. Flory enthusiastically agreed. UP, he said, would hardly underwrite a project to gild a report of government function which, in truth, should be unfavorable to the U. S.

Wide 16-mm. Film Use In TV Seen by Thomas WHEN TELEVISION eventually replaces radio, 16-mm. motion pictures will supplant present electrical transcriptions, predicts Joseph A. Thomas, president of Telefilm Studios, Hollywood.

"Motion pictures will be made of events in the news spotlight and then will be edited and broadcast by television," Mr. Thomas said. "Low cost of 16 mm. camera coverage and projection will give it a preferred position over 35 mm. Also, the narrow gauge film is noncombustible and therefore may be sent through the mails and otherwise shipped at lower cost." He said several advertising firms had inquired at Telefilm Studios about having 16-mm. commercials made for telecasting. The firms expect to make 16-mm. films of their factories and products to supplant oral commercials, he revealed.

Ekins Threatened

H. R. Ekins, news commentator of WSYR Syracuse, said last week that he had received threats of bodily harm to himself, wife and child, unless he stops or eases up on his alleged criticism of participants in labor troubles. He denies the charges, saying he has not taken either management's or labor's side in the disputes. Police cars are patrolling the area around his Syracuse home.

Merton V. Emmert

MERTON V. EMMERT, 29, farm and ranch director of WOAI San Antonio, died suddenly Dec. 12 in San Antonio. He was formerly with WLW Cincinnati and WEAF New York. Mr. Emmert is survived by his widow and three daughters.

Reece Bill Would Alter FTC Reviews

Want Advertising Aid In Fight to Amend Measures

By WALLACE WERBLE Editor, Food-Drug-Cosmetic Reports

BACKERS of the Reece bill to amend the Federal Trade Commission Act are campaigning for support from advertising, including media and agencies as well as advertisers, in preparation for House Interstate and Foreign Commerce subcommittee hearings on the measure, scheduled to begin Jan. 28.

The measure, HR-2390, was introduced in the House last February by Congressman Reece (R-Tenn.), member of the Interstate and Foreign Commerce Committee who took a leading part in the five-year legislative fight that led to the food, drug, and cosmetic amendments to the FTC Act in 1938. A subcommittee composed of the following Representatives will conduct the hearings: Sadowski (D-Mich.), chairman; Rogers .(D-Fla.), Rabin (D-N.Y.), Reece, O'Hara (R-Minn.) and Howell (R-III.).

Provisions

Broadly speaking, provisions of the Reece bill are divided into two parts:

1—Of interest to the advertising industry in general, particularly to its members who may have transactions with the FTC, are changes in the court review provisions of the original act which would give Circuit Courts the power to look into the facts supporting FTC cease and desist orders and to modify such orders when necessary.

2—Of interest primarily to the food, drug, and cosmetic industries are provisions designed to eliminate the technical "dual jurisdiction" between FTC and the Food and Drug Administfation, which has primary jurisdiction over food, drug, and cosmetic labeling as a result of the 1938 Food, Drug, and Cosmetic Act. The situation is complicated, but FTC critics charge that the Commission has stepped into FDA's field by trying to regulate labeling via its jurisdiction over advertising.

The "review provision" of the present FTC Act, which affects all advertisers, requires Circuit Courts to uphold the Commission's findings of fact if supported by evidence. The trend of judicial decisions in recent years has established the doctrine that the courts

everybody knows

WBIG

means good broadcasting

columbia affiliate greensboro, n. c. represented by hollingbery by backers of the Reece bill (HR-2390), which would eliminate overlapping of FTC and FDA and change review provisions of the FTC Act. Wallace Werble, editor of "Food - Drug - Cosmetic Reports," presents herewith an analysis of how the Reece bill would affect advertisers.

SUPPORT of advertisers is sought

cannot disturb the Commission's findings as long as FTC has been able to produce evidence to support its views.

Critics of the Commission cite Circuit Court decisions in recent years on appeals from FTC orders in which the judges admitted that, if they had the power, they might have reached conclusions differing from those upon which the Commission based the order.

In recent decisions Circuit Courts have said that the prevailing judicial doctrine on administrative procedure prohibits them from revising—toning down—the prohibitions contained in FTC orders even when the courts may feel that the Commission has been unduly severe.

In a general way, the review provisions of the Federal Communications Act of 1934 and a number of acts governing other administrative agencies are similar to those in the FTC Act. Mr. Reece, who, as a member of the House Interstate and Foreign Commerce Committee, participated in consideration of the acts creating the FCC, Securities and Exchange Commission, and other like laws, contends that their drafting subcommittees turned for example to the original FTC Act when it came to writing in court review sections.

First Passed, First Changed

Since the FTC Act, which established the pattern, was the first one passed, Mr. Keece contends that it should be the first one changed and then, if necessary, consideration could be given to amending the review provisions of the FCC and other laws which were based on the original FTC pattern.

For a number of years there have been pending before Congress a group of bills which would change the administrative procedures employed by all government agencies, particularly the quasi-judicial, quasi-legislative agencies like FTC, FCC, and SEC. One of these measures, the old Walter-Logan bill, passed both houses of Congress but was vetoed by the late President Roosevelt.

Mr. Reece argues that, while the administrative procedures of various agencies have much in common, it would be wiser to tackle each agency in a separate bill.

To correct the FTC-FDA "dual jurisdiction" with regard to foods, drugs, and cosmetics, Mr. Reece would amend the FTC Act to in-(Continued on page 69)

PERSONALITY

EACH of the Oklahoma Publishing Company's four powerful merchandising factors has developed a distinct and vigorous personality which reflects itself in sales. Combined into a single selling unit their individuality paves the way for a complete job of advertising and distribution that postwar manufacturers and distributors demand in such a diversified market as the vast Southwest provides.

- Skilled craftsmen, whose efforts earned for The Daily Oklahoman a 1945 citation for excellence of typography, make-up and presswork in the Annual Ayer Exhibition, make the Oklahoman and Times the Southwest's favorite newspapers.
- Network caliber programming, production and showmanship have earned for WKY the distinction of being the station most Oklahomans listen to most ... the station most advertisers turn to to move merchandise off dealer's shelves.
- 3. Three times in a row, four times in all, Mistletoe Express Service has received top award of the National Safety Council as the nation's safest inter-city commercial fleet. In 1945, Mistletoe's city pick-up fleet was named second in the United States in this classification.
- 4. It is a rare occasion when the entire Farmer-Stockman can be assembled in the office. Farm kitchens, plowed fields and stock feeding pens are far more familiar to Farmer-Stockmen editors than are upholstered office chairs. Farm visits form the basis for Farmer-Stockman direction.

STUDIO

N orth Carolina exceeds every other Southern state both in value of manufactured products and in cash income to farmers. On the former, North Carolina does *nearly three times* as much as the average of the nine other Southern states—and on the latter, *nearly twice* the Southern average. Isn't this the kind of Southern Market you are seeking?

W ith 50,000 Watts, at 680 k.c.—and NBC—Station WPTF is by long odds the No. 1 radio salesman in North Carolina. Let us send you the complete facts and availabilities. Or just call Free & Peters!

RED SKELTON was formally welcomed back on NBC Red Skelton Show, sponsored by Brown & Williamson Tobacco Corp. and placed through Russel M. Seeds Co., Chicago. Watching comic sample hors d'oeuvres at post-broadcast party are (l to r): John Elwood, manager, KPO San Francisco; Freeman Keyes, Seeds president; Sidney N. Strotz, NBC Western Division vice president; John Guedel, president, John Guedel Radio Productions, executive producer of Skelton show.

WGST Temporary License Is Extended As Pickard-Calhoun Pact Is Cancelled

GEORGIA School of Technology (WGST Atlanta) last week advised the FCC it has cancelled its obligations to the Sam Pickard-Clarence Calhoun group, which formerly managed the station. The Commission had ruled WGST would have to free itself from the alliance or lose its license. The station's temporary license was immediately extended to Feb. 18.

In filing a new application for the same frequency (920 kc) within the Dec. 18 deadline set by the Commission, the station submitted evidence that the Board of Regents renounced its contract with Southern Broadcasting Stations Inc. which had been held illegal [BROAD-CASTING, Sept. 24, Nov. 19]. The contract required payments by WGST of 15% of gross income from sale of time over a period of seven years.

Mr. Pickard is a former member of the old Federal Radio Commission and a one-time vice president of CBS. Mr. Calhoun is an Atlanta attorney. As principals in Southern Broadcasting, they formerly managed WGST under an agreement which the Commission held amounted to domination of the station. A subsequent contract to free the station of this domination was also ruled illegal.

As part of its new application, filed by Reed Rollo, counsel, the station included a resolution adopted by the University Board of Regents shortly after the Commission issued its proposed decision to revoke the station's license. The resolution declares:

Resolved, By the Board of Regents of the University System of Georgia that the ruling of the FCC having made the contract with the stockholders of Southern Broadcasting Stations Inc. legally impossible of performance, the Board hereby approves the action of its WGST Radio Committee in directing that said contract be not further complied with. This action is taken without prejudice to a fair adjustment or settlement of whatever rights the said stockholders may have, subject to the approval or consent of the FCC.

The application stated that the other parties to the agreement were notified orally of the cancellation and that no payments have been made since the issuance of the proposed decision on Sept. 20. It was further declared that the University "will not undertake to negotiate any adjustment or settlement with the other parties to the agreement and until said parties first obtain the approval or consent of the FCC to negotiate a settlement of whatever rights said parties may have under the agreement."

The "rights" alluded to are the station's equipment, ownership of which has been questioned, according to the Commission's decision.

Santa Exposed

HOWARD JONES, announcer of WIP Philadelphia, can't even hide behind white whiskers and a heavy cold. Mr. Jones was costumed as Santa, with a mike hidden in his magic wand, interviewing kiddies on the Eavesdropping With Santa Claus program in Gimbel's toy department. One youngster listened attentively to "Santa" Jones and then turned on a know-it-all expression which the announcer caught fast enough to hoist the mike as high over his head as possible. Up piped the boy with: "Aw, you ain't Santa Claus! You're the guy who gives the money away on the Renuzit program."

Borez Is on Brief Leave From JWT Paris Office

MAURICE BOREZ, head of J. Walter Thompson Co.'s office in Paris, will be in the agency's New York office for the next few weeks. Mr. Borez kept the Paris office open throughout the time the Nazis occupied France. He admitted, however, that little advertising, if any, was done during that period.

Mr. Borez says French advertisers are buying time on Radio Andorra located in Andorra between Spain and France, which broadcasts in French and Spanish, and Radio-Monte-Carlo, which broadcasts in French. Radio in Paris is government controlled and allows no commercials. It is expected that when supplies become more plentiful many of Mr. Borez' clients will resume using radio.

'TRITON' TRANSMITTER FOR SALE RFC Selling Quantity of Radio Equipment From Surplus War Stocks

SECOND high-power broadcast transmitter was declared war surplus last week and turned over to Reconstruction Finance Corp. for public sale. It is the 50 kw Western Electric transmitter formerly operated by KSL Salt Lake City and installed by OWI on the propaganda ship *Triton Maris* [BROADCASTING, Nov. 5] with Doherty circuit added to bring output up to 130 kw.

First high-power transmitter offered for sale by RFC was placed on display at Rosslyn, Va., last week. Bids will be closed this week by RFC. It is an RCA 50 kw 50E, never used [BROADCASTING, Nov. 26]. Sale is being handled by RFC's Richmond, Va., branch office. Transmitter on *Triton Maris* was valued by OWI at \$67,700. It is reported to be in good condition. RFC is anxious to move equipment on the ship, now piling up dockage costs at Richmond, Cal., shipyard. From it comes a long list of radio equipment which OWI valued at a total figure of \$113,855. RFC plans to have the equipment dismantled and placed on display. Among items on ship are:

9 Western Electric amplifier consolettes

2 19 A/TRC1FM antennas

22 microphones (6 Western Electric 633 A dynamic, 16 RCA 74B velocity) 4 Hallicrafter receivers

5 receivers, other types

LOOK TO NASHVILLE . .

Manufacturers and retailers looking toward postwar prospects in the South have their eyes on Nashville . . . for Nashville has set the pace for the South with four years of recordbreaking gains in population, income and retail sales. It is Tennessee's only A-1 city, and one of sixteen A-1 cities in the nation. The rich Nashville market area, with over a million prosperous buyers, is covered adequately and economically by WSIX—Nashville's outlet for both the American and Mutual networks. . . . We will be glad to furnish full particulars on request. Write us—today!

WSIX Offers:

 Top shows of both American and Mutual networks which guarantee an unusual share of the radio audience in this area.

2. A powerful signal at low frequency—your assurance of a wide coverage at a very low cost per radio listener.

Add it all up—entertainment, coverage and reasonable rates— WSIX has what it takes to put across your sales message.

AMERICAN MUTUAL

5,000 WATTS-980 KILOCYCLES

Represented Nationally By THE KATZ AGENCY, INC. 5 Diesel generators (1 1 kw, 1 5 kw, 3 100 kw)

10,000 sapphire playback cutting needles

1 Motorola FM transmitter (OWI value, \$1,000)

1 FM link transmitter (OWI value, \$1,200)

4 complete turntables (2 Presto L, 2 Presto 6A)

1 800-1500 kc Westinghouse tuning unit

Enormous quantities of tubes, fixed condensers, resistors.

STATION REQUESTS INCREASE IN CANADA

RETURNS filed in the House of Commons at Ottawa show that 170 applications for broadcasting stations, both AM and FM, television and facsimile stations, have been made in eastern Canada since January 1944.

Data were obtained by John Diefenbacker, Progressive Conservative member for Lake Centre, who also asked this data for western Canada [BROADCASTING, Nov. 12]. There were 87 applications for AM stations, 71 for FM stations, 9 for television and 4 for facsimile. While the report did not give data as to how many applications had been allowed, a number of the applicants listed are known to have received their licenses and at least one is on the air at present.

Among those applying are many newspapers, some department stores for television, a number of AM stations for FM and television licenses, and a number of radio representatives and CBC officials for both AM and FM.

Georgia Institute

FIRST Georgia Radio Institute will be held in spring at Henry W. Grady School of Journalism, U. of Georgia, under auspices of Georgia Assn. of Broadcasters and the Journalism School. Leading broadcasters will be invited. Georgia association committee will go over tentative program in January, includes Wilton E. Cobb, WMAZ Macon; John Outler, WSB Atlanta; Jack Williams, WAYX Waycross.

Fan Letter

FANS of WCOV Montgomery, Ala., take their fandom seriously. To the station, addressed "Attn. Manager," came this letter:

"I would like to buy a stock or part interest in this station.

"I also would like to get a job working at this station as a control operator trainer. "With kindness regards, I am

"Your Very Truly.

"P.S. I also like for this station to become a more powerful station."

Especially for HEAVY DUTY Industrial Applications

This high power industrial tube built by Federal is the result of the widening use of induction heating for heavy applications...especially designed for the purpose...built to meet the exacting demands of severe operating conditions.

Federal's 9C23 is a tube that can stand the gaff...with extra ruggedness for stamina...heavy duty filament for long life and high power output... and with the inherent reliability and exceptional qualities that characterize every tube in the extensive Federal line.

Tube that Stands the GAFF Jube that built by Feeleral

> Here is another instance where Federal's long experience and leadership in tube design and construction contribute to electronic progress. And it is a good reason to see Federal first for industrial power ... rectifier ... transmitting tubes.

> Remember — "Federal Always Has Made Better Tubes."

THE OUTSIDE AUDIENCE IS MIGHTY INTERESTED

on the Pacific Coast, too!

IN THE OUTSIDE MARKET live half the radio families on the Pacific Coast. These families are good customers—they account for approximately half of the more than Eight Billion Dollars spent in retail sales on the Pacific Coast each year.

You can't sell 'em if you don't tell 'em and they (the Outside Audience on the Pacific Coast) can't hear your sales message if you aren't on Don Lee. For *only* Don Lee completely covers both the inside and outside markets. A 276,019 C. E. Hooper coincidental telephone survey (the largest ever made on the Pacific Coast) proves *that* conclusively.

You see—only Don Lee has enough stations (39) to deliver both the "inside" and "outside" in this 1,352 mile long mountainous market (the other 3 networks combined have only 29 stations). In fact, nine out of every ten radio families on the Pacific Coast live within 25 miles of a Don Lee Station. So give both markets a break next year—place your radio show on the network that carries practically as much Pacific Coast regional business as the other 3 networks combined—DON LEE.

Example from Special C. E. Hooper Survey ABERDEEN-HOQUIAM, WASHINGTON

	SHAR	E OF AUDIE	NCE
STATION	Morning	Afternoon	Evening
Don Lee Station KXRO	56.2%	65.1%	47.3%
Most popular competing station	33.6%	20.8%	31.4%

Other examples to follow

The Nation's Greatest Regional Network

Approximately half the retail sales on the Pocific Coast are made OUTSIDE THE COUNTIES in which Los Angeles, San Francisco, Oakland, San Diego, Portland, Seattle and Spokane are located.

NAB PROMOTES NEWS CLINIC IDEA Series Starts With Indiana Broadcasters January 2-3 in Indianapolis-

SERIES of radio news clinics tentatively planned for 1946 will open Jan. 3 when NAB will conduct a one-day seminar for the Indiana Local Broadcasters Assn. as part of that group's Jan. 2-3 meeting in Indianapolis.

The clinic idea was first tested Nov. 16 at Springfield, Ill., when broacast stations in that state participated in a meeting conducted by the NAB [BROADCASTING, Nov. 19]. Reaction was favorable, bringing national interest in the clinic plan as a means of exchanging ideas and hearing proposals for strengthening of station news staffs and improvement in presentation.

E. R. Vadeboncoeur, vice-president of WSYR Syracuse and chairman of the NAB News Committee, and Arthur C. Stringer, NAB director of promotion and committee secretary, conducted the Spring-field clinic. Mr. Stringer will conduct the Indianapolis clinic, which will be open to all stations in the state.

The Indiana local group also has asked NAB to conduct an employeemployer relations forum the same

General Motors Starts New Program on Mutual GENERAL MOTORS Corp., Detroit, which recently dropped all advertising except that on the air [BROADCASTING, Dec. 10] last week increased its radio expenditure by starting a new twice-weekly program on the full Mutual network of 282 stations. New series, titled This Land of Ours, which will cost the motor manufacturer some \$8,000 a week for time alone, will feature Henry J. Taylor, columnist and commentator.

Series is designed to inform the listening public on social and economic trends and new developments in industry. Program, placed through Kudner Agency, New York, on a 52-week contract, will be used for institutional advertising, at least until the culmination of the UAW-CIO strike which has currently tied up production at GM plants.

Going With Truman

PRESIDENT Harry S. Truman's Christmas trip to Independence, Mo., will be covered by the four major networks. Leaving by plane Christmas morning will be David Brinkley, NBC; Bryson Rash, ABC; Bill Downs, CBS; Charter Heslep, MBS. They will return the following Friday. The President will be heard on all networks Christmas Eve at 5 p. m. in a holiday message as he lights the national Christmas tree on the White House grounds.

day. Scheduled to represent NAB are John Morgan Davis, general counsel, and Milton J. Kibler, assistant general counsel.

President of the Indiana association is D. A. Burton, WLBC Muncie, with O. E. Richardson of WJOB Hammond and WSAR Lafayette, as secretary. The Jan. 2 meeting will be devoted to association matters. Site of Indianapolis meeting has not been announced.

NAB News Committee has invited state groups to request news clinics. The clinics are open to all stations in a state regardless of NAB membership.

PRICE LAUDS RADIO DURING CENSORSHIP

BYRON PRICE, retired Director of Censorship, last week in his final report to the President, praised the way in which radio and the press kept the secrets of the war, especially keeping the "best-kept" scientific secret, the atomic bomb. The "two-year voluntary blackout on such news was effective," he said. "The value of the self-censorship

program," Mr. Price said, "rested not alone on a few spectacular achievements . . . but on the continuous day by day restraint by editors and broadcasters". But he stressed the importance of a radio and press free from dictatorial censorship reducing "American citizens to a state of intellectual slavery."

In his 154-page report, Mr. Price lauded radio and the press for forbearance under censorship, which, he maintained, he considered necessary only under the stress of war.

Edward B. Marks

EDWARD B. MARKS, 80, music publisher and composer and founder of the Edward B. Marks Corp., New York, died Dec. 17 in the Nassau Hospital, Long Island. Mr. Marks' firm was the first major publishing house to pull out of ASCAP to join BMI during the ASCAP-BMI fight in 1941. Firm has a five-year renewal contract effective, Jan. 1, 1945, with BMI for performing rights to Marks catalogue. Mr. Marks was the composer of many popular songs. He wrote two books: They All Sang and They All Had Glamour. He was vice president of the Music Publishers Protective League. He leaves a widow, a daughter and two sons.

Coffee Groups Name

PAN-AMERICAN COFFEE BUREAU and Joint Coffee Promotion Committee, New York, are expanding promotional activi-ties and have appointed. Tom Fizdale Inc., New York, public relations bureau, to direct and handle public relations. J. M. Mathes Inc., New York, handles the advertising the advertising.

LawyersLaud, Condemn Hearing Plan

FCC Calendar Arouses Varied Comments From Bar

By RUFUS CRATER

REACTION of attorneys to the FCC's record-setting three-month calendar of hearings ranged last week from forthright approval to outright condemnation.

"Abominable," one attorney told BROADCASTING. "A good job," declared another. In carefully qualified words, others characterized the schedule as a good thing—if it works.

The calendar, reportedly devised under the supervision of Commissioner Charles R. Denny, former general counsel, calls for consideration of 268 applications for AM, FM, and television service in three months of hearings beginning Jan. 1, with five sets of hearings running simultaneously in Washington and in the field [BROADCASTING, Dec. 10]. Petitions to intervene and motions to enlarge the issues must be filed within 15 days after the issues are made public, except for good cause, and proposed findings of fact and conclusions of law generally will not be required.

FCC 'All Ready'

FCC authorities said they were "all ready to handle three hearings simultaneously in Washington and two in the field." They said they deliberately scheduled the field hearings so that five commissioners would usually be available in Washington. Examiners within the Commission probably will preside over most Washington hearings.

A huge volume of work—approximately 1,000 other broadcast applications, for example—will occupy Commission attention while the hearings are under way.

Lawyers, although divided on the practicability of the calendar, agreed it would keep them working overtime. Most thought they could keep up, but many wondered whether they would be able to give each case proper attention. Some believed the FCC would have to revise the schedule.

"The schedule will be bound to break down," asserted one attorney. Another, expressing a similar belief, pointed out that it "doesn't take into consideration the necessity for preparing proposed decisions and final decisions" and said the plan "becomes a kind of empty shell" without proposed findings, arguments, briefs, exceptions, etc. Another wouldn't venture a guess as to effectiveness of the hearings because "with this

Let KCKN PAVE THE WAY to Greater Sales FOR YOU Your sales road can be a smooth one, paved with greater sales and greater profits . . . if you hire KCKN in Kansas City. Because KCKN programs exclusively for the listeners' taster of Greater Kansas City, your radio sales talks bit bome with the metropolitan inteners who tune in on KCKN for the kind radio entertainment they enjoy. So, without the rate penalty of out-state coverage, you may tell and sell Kansas City's NINE HUNDRED MILLION DOLLAR market-through KCKN. Your nearest CAPPER office will give you availabilities. procedure L don't know whether we'll be able to produce a good record."

One big problem, it was noted, is interventions. Several lawyers expected to find that they must intervene in cases in which they are not actually listed on the calendar, thus facing the possibility of conflicting engagements. One said he didn't think "anybody will know before the hearings start, what the issues actually are." Another expected many petitions to intervene to be filed late—and to be accepted —because of the short limit on time for filing.

"They send the issues to the parties, and outsiders may not, know whether they can intervene or not," said another. "The petition to intervene must be filed within 15 days from the time the issues came out, and you don't even know when the issues came out."

One lawyer noted that the schedule called for him to appear in three hearings—outside of Washington—in a single month. Because of shortage of time, he contended, he will have no opportunity to prepare for any but the first unless he prepares all three before starting out. Lawyers practicing alone were considered especially hard hit, particularly when they must appear in several cases.

'Out of Line'

"Completely out of line" was another verdict. "It gives no consideration to the limited number of attorneys and engineers who are handling a vast number of applications. It will be impossible for any one of our clients to get the attention he deserves, because of the proximity of hearing dates and the shortage of attorneys. Probably the FCC will have to rearrange the schedule, though maybe if they take engineering testimony in Washington they won't get as bogged down as I think they will."

On the credit side, boosters of the plan pointed out that it eliminates the necessity of much travel by witnesses who otherwise would have to come to Washington. Elimination of proposed findings of fact also was seen by some as "a good thing" which "should have been done long ago and should be made permanent." Several who found fault with other phases of the plan considered the streamlining of procedure a helpful move which would not jeopardize chances of fair hearings.

"It's a good job—better than I thought they could do," declared another enthusiast. Many who criticized the plan said they could understand the FCC's viewpoint and thought the Commission "should be complimented on undertaking to handle so large a volume of work expeditiously." Others felt a more satisfactory schedule could have been arranged if attorneys had been consulted in advance, and some declined to pass judgment yet because "the question is whether the Commission will act as quickly after the hearings" as in undertaking the hearings schedule.

One of the most significant steps in modern education by radio is the WBZ "Teachers' Radio Workshop"... conducted each Summer for teachers in the Boston area. It is a cooperative project by Westinghouse Station WBZ and the Massachusetts Department of Education. Regular evening classes are held over a period of several weeks. Station experts in all aspects of broadcasting impart intensive, professional training to a large class of teachers concerned with the use of radio for in-school listening.

Teachers are given a comprehensive grasp of the fundamentals of radio. Supervised examinations at the end of the course make the teachers eligible for college-credits, increased salary. Morning programs, coordinated with the "Workshop," are broadcast to schools daily.

Another phase of WBZ's extensive educational activity is the "Massachusetts Plan," jointly sponsored by the State Department of Education and Westinghouse Stations WBZ and WBZA. It is a special 26-week broadcast-course for teachers.. currently based on the program "Our Foreign Policy," with supplementary broadcasts by prominent educators. This course likewise qualifies teachers for credits, and is state-wide in scope.

A NEW MARKET THE SIZE OF SYRACUSE!

SPOTICHECK SHOWS

RIWORKERSST

900,000 EMPLOYED!

The U. S. Employment Service recently reported that \$28,000 people were at work in the Detroit area in September. Other sources reveal that the number of hourly paid factory uporkers increased 70,000 from September to November 1, 1945!

No. 1'm. not leaving Detroit leaving bought live bought HOME! home: home

Best estimates place the population increase since 1940 at about 225,000. This is equivalent to the number of people in Syracuse, N.Y., or Omaha, Neb. And most of these "newcomers" are staying in Detroit! A recent spot check by members of the Detroit Real Estate Board, in various sections of the city, showed that practically no home owners and very few of those who were renting anticipated leaving Detroit.

Remember this important population bonus when making plans for your activity in this great market. Remember also that WWJ is the preferred radio station in the Detroit market.

Station KGW had as its radio guests during 1945 some of the most prominent leaders in the fields of sports, stage, radio and theatre entertainment and of the armed forces. These names constitute only a partial list of those who appeared before the KGW microphone. This public service is emphatic proof of KGW's recognition of the importance of listener interest in contemporary occurrences, a policy that continually shapes the programs of this progressive choice of Pacific N.W. radio audiences.

THOMAS MITCHELL, Hollywood Academy Award winner, discusses his script with Homer Welch (right), KGW program director, and Jack Matlack (left), payroll savings division chairman, Oregon War Finance committee, and manager of J. J. Parker's Broadway Theatre.

Charleston, W. Va., and WOOD Grand Rapids, Mich., will receive plaques for outstanding skill and ingenuity in exploiting the marriage of Linda, heroine of the day-time serial, Linda's First Love, sponsored via transcription on 27 midwestern stations by Kroger Grocery & Baking Co., Cincinnati. Station promotion contest for audience was conducted Oct. 18-Nov. 14, coinciding with a letter contest on Kroger coffee promoted by the program and through the local Kroger stores.

In addition to the plaques awarded stations, individuals responsible for promotion will receive Gruen watches. They are: Jerome Reeves, WBNS; John Sinclair Jr., WCHS; Lenore Little, WOOD.

Honorable mentions were awarded WIRE Indianapolis, WLW Cin-cinnati, WOWO Fort Wayne, KDKA Pittsburgh, WIBA Madison. Entries were submitted by 20 of the 27 stations carrying the program. Judges were Lewis Frankel, Billboard; James Owens, Radio Daily; Bruce Robertson, BROAD-CASTING.

Who said the Engineer doesn't want goodlooking equipment? Or who said the Manager doesn't give a hang for efficiency? People may have believed that once—but no more.

Which explains why the new GATES Equipment is all built for engineering efficiency *plus* modern, streamlined appearance. A GATES-equipped Station is a joy to work with—and a pleasure to see. You, too, will like the looks—and the operaTHE ENGINEER AND THE MANAGER WANT THE SAME THINGS...AND WE GIVE IT TO THEM!

tion—of the new GATES Transmitting Equipment. Write for details about it. And ask about the GATES Priority System for Prompt Post-War Delivery! Gates Radio Co., Quincy, Ill.

THE GATES TRANSCRIPTION TURNTABLE 5 DESIGNED FOR EXCEPTIONAL PERFORMANCE

WRITE TODAY FOR DETAILED BULLETIN

You get heavy, rugged construction without sacrificing precision performance, when you install this outstanding turntable; which gives you instantaneous speed change and "wow" free reproduction. This turntable is designed for hardest, most exacting use—combines harmonious, modern appearance with the best standards of performance.

GATES is now in full production on civilian equipment and can make prompt delivery on many popular items.

PROGRESS REPORT

EXCLUSIVE MANUFACTURERS OF RADIO TRANSMITTING EQUIPMENT SINCE 1922

2-0198

PAUL A. PORTER, FCC chairman, con-ferred with President Truman last Mon-day and reported on results of the Anglo-American Communications Con-ference in Bermuda early in the month, which he had attended as U. S. vice chairman. There was no comment on reports that Mr. Porter might move to the White House as Presidential assist-ant (CLOSED CIRCUIT, Dec. 17).

ant [CLOSED CIRCUT, Dec. 7]. JAMES D. SHOUSE, Crosley Corp. (WLW Cincinnati) vice president and general manager, now in London to support the plea for Cincinnati as UNO home site, is the only top broadcast executive to have made two trips to Europe since the war. He was there about a year ago on shortwave and other radio affairs

shortwave and other radio affairs. DONALD WITHYCOMB, veteran broad-cast executive now radio adviser to Baltimore Sun papers, applicants for both AM and FM facilities, has estab-lished temporary headquarters in Balti-more and is dividing his time between Baltimore, New York and Washington. IST LT. THOMAS N. DOWD, in the Ma-rime Corps since Sept. 1942 and who has served in Saipan and Thunan, has re-turned to law firm of Plerson & Ball, Washington attorneys specializing in radio During his leave he was made a partner in the firm. F. CLEVELAND

HEDRICK Jr., formerly special assist-ant to the Attorney General in the Anti-Trust Division and on active Army duty with Selective Service during the war, also has become a member of the Pier-son & Ball firm.

HORACE L. LOHNES, Washington at-torney, was stricken with a severe in-fluenza attack last Thursday and is under treatment at the Carlton Hotel. He also has suffered recurrence of a foot allment.

DONALD THORNBURGH, CBS vice-president in charge of West Coast ac-tivities, is in New York Hospital suf-fering from a kidney-bladder attack with which he was stricken while bound from Los Angeles to the East Dec. 14. He was to have participated in a hear-ing before the FCC Dec. 20 on acquisi-tion of KQW San Francisco by CBS.

VICTOR A. BENNETT, vice president and national sales manager of WAAT Newark, is on a business trip to Lon-don for about a month.

EDGAR KOBAK, president of MBS, has received a scroll from the Governor of Georgia appointing him an honorary lieutenant colonel and aide de camp of the governor's staff formed for the de-fense of the state.

COMMISSIONER and Mrs. E. K. Jett on Dec. 18 became grandparents for the third time. Their daughter, Mrs. Joseph Burk, wife of an Army captain, gave birth to a 7 lb. daughter at Garfield Hospital, Washington.

* The B. F. Goodrich Chemical Company plans . . .

Business Leaders plan for

RECONVERSION is a big word today, but it is a word that isn't used in the Louisville Geon Plant of the B. F. Goodrich Chemical Company. This plant is one of the largest synthetic resin plants in the country, manufacturing Geon raw materials in the form of powdered resin, plastic granules, and latex liquid, and marketing them to other manufacturers for processing into semi-finished or finished products.

Early in the war, in answer to the needs of the Army and Navy for insulating material to replace rubber which was our most critical war material, Geon was used in manufacturing various types of electrical wire and cable.

Not only did Geon serve in the wire and cable field, but these plastics were used in making Army raincoats, Navy foul weather suits, instrument cases, gun covers, ponchos, tents, ground clothes, water bags, bunk bottoms, and numerous other items which helped the serviceman combat his second enemy—nature, by keeping him dry, and protecting his weapons and gear from corrosion.

These are a few of the Geon war developments, and they mean that now virtually all homes, offices, and industries will be improved by the use of plastics. It is a fact that polyvinyl chloride, used in the manufacture of military products, is the same material which will be used for products of plastic which will appear on the shelves in the post-war civilian world. For this reason the Louisville plant will need to go through no reconversion process in turning back to civilian production.

With Geon's war job done, the plant in Louisville will go on producing Geon resins, plastics and latex—only for peacetime comfort, practicality, and beauty. There are tremendous unlimited potentialities, some as yet undiscovered, for the future plastics industry. The demand will be great, and men are and will be needed to supply it. It is a field for returning war veterans and for war workers. It is a young man's business with a secure future.

R. D. SCOTT, Plant Manager

Pouisville!

* The Jefferson Dry Goods Company plans . . .

W E ARE happy to announce that our Louisville store has been selected as one of the first in our chain to be enlarged and modernized. Our company operates 40 stores in cities all over the country and Louisville's bright postwar prospects influenced their decision to make our store one of the first for expansion.

Having just consummated a 20-year lease, we plan to spend \$150,000 in new construction which will begin as soon as possible . . . we hope by the first of the year. Our plan also calls for modernization of our equipment at a cost of \$75,000. When the remodeling is completed we will have one-third more selling space than ever before and will employ 20 per cent more people for sales and services.

We feel that Louisville has one of the brightest retail futures in the country. Its new industries and the increased population offer all our local stores greater opportunities than ever. This is why we are eager to go ahead with our expansion program.

BEN W. MAYER, Group Manager

BROADCASTING • Telecasting

Dear Santa:

IF you can deduce how two (AM and FM) can live as cheaply and as happily as one . . . IF you can get eight television stations on four channels . . .

IF you can find an FM assignment in New England . . .

IF you know what to do with international shortwave stations . . .

IF you can find a way to explain American broadcasting to Congressmen . . .

IF you can find a way to explain Congressmen to American broadcasters

IF you know of a program opening for an FCC friend of ours ...

IF you figure out what to do about clear channels . . .

IF you've solved how to keep music the lifeblood of radio without recurrent transfusions

IF you know how to hike sales without hitch-

ing . . . or handle cows without catchers . . . IF you can develop standard radio time . . .

IF you agree that an Association is known

by its men, as vice versa . . . IF you can solve the paradox of *The Hat* talk-

ing through a man

IF you can figure out a state-owned broadcasting system that is free ...

IF you can tell lawyers how they can be three places at once . .

IF you can define public interest

WE have an interesting

Proposition

For you!

FM Misnomer

FOR THE guidance of the hundreds of applicants and prospective applicants for FM stations, the FCC has compiled a tabulation of available assignments for trading areas throughout the nation. There are some 1500 assignments enumerated for metropolitan stations; none for so-called community stations. The list is not a hard and fast allocation. It is designed simply to show possible combinations for particular markets. There will be deviations dictated by prudent engineering based upon supply and demand.

The FCC faces many baffling problems in breaking this new ground. One has been the dearth of applications for "community" stations. All seem to want "metropolitan" or rural stations because they connote larger operations corresponding to regional and perhaps high-power assignments in AM. The "community" station, however, seems to be an untouchable waif which carries the stigma of being simply a precinct operation.

Engineers tell us the average FM community station will have coverage and signal intensity far superior to the average Class IV AM station, commonly called a local. It is in the lowest installation and overhead class.

Then why not label the so-called "community" station a "local". The 400-odd locals in AM, for the most part, have gotten along very well. They are important entities in their cities or towns. They don't suffer from the local clasification. They wouldn't in FM either.

Award to the Wise

WE SEE by the publicity releases that more awards have been made to radio stars and programs, and even, by Heavens, to the publicity departments, for performances beyond the call of duty during 1945.

In this particular instance, the awards are based upon the ballots cast by "600 radio editors, columnists and critics". As a matter of fact, there are less than 20 bona fide radio editors on American newspapers; editors, we mean, who listen to radio, write about it and devote their full talents to it. Many of those voting in these polls are "junior staffers" [copy boys] or in some instances, bedeviled copydesk editors, who are ordered by the slot man to paste up the daily radio logs.

Of course, the results of these polls provide fine fodder for the publicity silos. What usually goes unmentioned are such salient facts as these:

Fred Allen, who placed second as America's most popular comedian in one poll during 1945, had been on the air only four weeks in that year when the ballots were counted.

Bing Crosby, who was top vocalist, had no regular program of his own throughout the year, did appear as guest a few times. He was still a juke box hero, but it wasn't radio.

It is recalled, also, that the late Graham McNamee, pioneer air reporter, was still placing third as a sportscaster in many of these polls three years after his untimely death and five years after he had dropped air work altogether.

Ireene Wicker was winning awards on her children's programs two years after she had ceased broadcasting.

In one instance, a woman's group conducted a nationwide poll to select the best programs for young listeners. Our reporter, calling the chairman of that particular coast-to-coast enterprise for a story on the results of the balloting, was told the results were not ready— "the committee has not voted yet". The committee was comprised of three women.

None of this is to imply that the champions are not champions, that the blue ribbons do not dangle from the proper lapels—it is but to wonder.

On a recent nationwide poll, one network was awarded first prize for the best V-J day coverage—a story that was covered on ALL networks by pooled broadcast. Who thinks up such things anyway?

We, by the way, have conducted our own poll. We find that there are now 178 awards made in radio. Most of them are on the talent level. Few of them recognize the great virtues of broadcasting which make it a dominating cultural influence in our lives today. Too few of them acknowledge the concept that broadcasting is audible journalism—painting in broad strokes for the ear, as does the press for the eye, a daily portrait of the world in which we live.

EVEN THOUGH there hasn't been a single responsible voice in support of the Wood Bill to gag radio by legislative processes, the threat lingers. Someone in high office should deliver the coup de grace to this most iniquitous Un-American thrust and expunge it forever from the Congressional prints.

Our Respects To -

ERNEST FREDRIK WERNER ALEXANDERSON

ACT that many of radio's notable developments have been made in the U. S. may be traced to Swedish-born Ernst Fredrik Werner Alexanderson's early flair for languages.

Son of a professor of languages at U. of Uppsala and later U. of Lund, Sweden, Dr. Alexanderson, now consulting engineer of General Electric Co., learned English, German, French and Latin as well as Swedish. At Technical U. in Berlin, after graduating from Royal Technical U. in Stockholm as an electrical and mechanical engineer, he came across an English copy of Alternating Current Phenomena, by General Electric's Dr. Charles P. Steinmetz—and was able to read it.

The volume made such an impression that the youthful engineer, then a student of Professor Slaby, a creator of the once-important Slaby-Arco system of radio communication, resolved to come to America and seek work with Dr. Steinmetz.

Dr. Alexanderson, now 67, has secured 300 patents in radio telephony and telegraphy, television, motors, generators, and allied fields, averaging a new patent approximately every seven weeks for some 35 years. In 1944 he won the Edison Medal, awarded annually by the American Institute of Electrical Engineers, for "outstanding inventions and developments in the radio, transportation, marine, and power field." King Gustav V gave him the Swedish Order of the North Star, and he has also received the Medal of Honor of the Institute of Radio Engineers (1919); knighthood of the Polish Order of Polonia Restituta (1942); the John Ericsson Medal for outstanding contributions to the field of radio engineering (1928) and the Cedergren Medal for electrotechnical authorship (1944). In 1934 he was elected to the Royal Academy of Science of Sweden, the body which bestows the Nobel prizes in science, and in 1940 his name was listed on a "Wall of Fame" honoring foreignborn citizens who have made notable contributions to American democracy.

When Dr. Alexanderson arrived in the U. S. in 1901, he went to work as a draftsman for C & C Electrical Co. in New Jersey, joining GE in 1902. An assignment to build a high frequency alternator for Prof. Reginald A. Fessenden, one of the pioneer radio experimenters, resulted in his delivery of a practical alternator which, on Christmas Eve in 1906, enabled the Fessenden station at Brant Rock, Mass., to transmit "the first broadcast in

(Continued on page 50)

Respects

(Continued from page 48) history." With improvements, this machine became the famous Alexanderson alternator, which assumed reliable trans-Atlantic radio communication and brought Guglielmo Marconi, father of radio, from Europe to Schenectady in 1915 to witness a demonstration. The Britishcontrolled Marconi Co. sought exclusive use of the machine. To keep it from falling into foreign hands, government officials encouraged formation of the Radio Corp. of America; GE backed the new firm and Dr. Alexanderson became its chief engineer in 1919.

Meanwhile, he had developed

many other radio improvements, including a tuned radio frequency receiver system providing selective tuning; the magnetic amplifier; multiple tuned antenna; anti-static receiving antenna and the directional transmitting antenna. He has also devised radio altimeters, and his studies in the polarization of radio waves are credited with explaining certain phenomena in radio direction finders.

His magnetic amplifier, which hecorrectly foresaw as useful for trans-Atlantic telephony, was made obsolete by his electronic amplifier, which applied to radio telephony the vacuum tube improvements worked out by Dr. Irving Lang-

HOWARD'S AND ME--BOTH WELL-SUITED!"

How many stores, would you say, have broadcast over one station, five days a week, every week of every year, for 20 years—two decades? That's what Howard's Clothes For Men has done, over WDAY!

You can't blame us for taking pride in the number of local accounts which we *keep* for years, years and years! Ain't you convinced, yet?

sults, and wisely quit if they don't get them!

Howard's is only one of eighteen "locals" who have been with WDAY, steadily, from ten to twenty-three years! Ain't you convinced, yet?

muir and Dr. W. D. Coolidge, GE research scientists. With the new tubes it became possible to build powerful transmitters for high frequencies; the principle is the basis of modern radio broadcasting.

During the first World War, when German subs were cutting cables and German stations were blanketing the Allies' wireless transmission, Dr. Alexanderson and his assistant, Harold H. Beverage, later chief research engineer of RCA, evolved the anti-static re-Wide attention was atceiver. tracted to his work when the S. S. George Washington, carrying President Wilson to the Peace Conference, kept in touch with America by radio telephone through the New Brunswick station.

From 1919 to 1924 Dr. Alexanderson divided his time between GE and the Radio Corp. He personally superintended construction of powerful radio stations in Sweden, Poland, England, Hawaii, California, and Long Island.

In the next few years he did outstanding pioneer work in television, staging in Schenectady the first home reception of television (1927-28) and the first theatre video demonstration (1930). Television was broadcast regularly from Schenectady during 1928. The mechanical method made images crude, but some remarkable distance records were achieved. The features of D. W. Griffith, motion picture director, were transmitted from Schenectady and recognized in Los Angeles. The face of Prof. August Korolus of Leipzig was televised from Schenectady to Berlin. A rectangular figure was relayed back to Schenectady from Australia.

Earlier, on June 5, 1924, Dr. Alexanderson had sent over RCA stations the first trans-Atlantic facsimile—a hand-written greeting to his father. In 1931 he obtained a patent disclosing the principle of frequency modulation as applied to the transmission of pictures.

With the separation of GE and RCA in 1932, he devoted himself to the power applications of electronic science, such as power transmission with direct current, and continued his interest in shortwave phenomena and television. He has produced a long list of inventions in the power and control fields.

Born Jan. 25, 1878, in Uppsala, son of Prof. A. M. Alexanderson and Amelie von Heidenstam Alexanderson, he married Miss Edith B. Lewin of Rome, N. Y., in 1909. She died in 1912. He married Miss Gertrude Robart in 1914 and they have four children. Yachting is his No. 1 hobby.

In 1923 radio led to the return of his son, Verner, then six, who had been kidnaped. A caretaker at a lake resort recognized the youth from a description broadcast by WGY, GE station in Schenectady.

Dr. Alexanderson is a member and former president of IRE, a fellow of the American Institute of Electrical Engineers, and holds

More Radios Soon GREATLY increased supplies of durable goods, radio and other household appliances in particular should be available on dealers' shelves within the next few weeks, the Commerce Dept. predicted last week. To date these items have been reaching consumers in only a small trickle. Complexity of production processes and removal of the excess profits tax Jan. 1 with consequent holding off the market of finished goods were cited among causes of the shortage.

FCC Delays Action In Ashbacker Case

Supreme Court Mandate Seen By End of This Week

NO FCC action on application of Ashbacker Radio Corp., Muskegon, Mich., will be taken until after the Supreme Court issues a mandate in its decision reversing the Commission's grant of a construction permit and license to WJEF Grand Rapids. The corporation has applied for special service authorization to operate WKBZ on 1230 kc.

Paul M. Segal of Segal, Smith & Hennessey, who won the Supreme Court case, filed the Ashbacker petition a week after Supreme Court's decision was handed down Dec. 3 [BROADCAST-ING, Dec. 10], it was learned last week.

Mandate This Week

Under a 25-day period which the high court allows for filing rehearing petitions, the mandate is expected late this week. Until then the FCC will take no action either against WJEF or on the WKBZ petition.

John E. and Rhea Y. Fetzer, owners of WKZO Kalamazoo, were granted a CP on 1230 kc for WJEF in June 1944. At the same time the FCC designated for hearing petition of Ashbacker to change the WKBZ frequency from 1490 to 1230 kc. It was the Fetzer grant that Ashbacker attacked, and resulted in the Supreme Court's decision that where there are conflicting applications the Commission must hear all before granting any.

Should the Commission issue a special service authorization to WJEF to continue operations pending its final decision after hearing the two applications, Mr. Segal said he would oppose such action in court.

honorary degrees of Doctor of Science from Union College, Schenectady (1926) and Doctor of Philosophy from the Royal U. of Uppsala, Sweden (1938).

KDYL

Jerry Burns in "Pole Moonlight," sponsored by a Salt Lake department store, 10:30 p.m. three times a week, reads selected poems, voices timely musings to an organ background.

BILL FRAKER, announcer at KDKA Pittsburgh, has returned to the station following release from Navy. He served three years.

WALLY WILLIAMS, formerly with KSL Salt Lake City and released from the Army, has been appointed musical di-rector of KUTA Salt Lake City.

TODD RUSSELL. Canadian comedian. is new m.c. on Pharmaco Inc. "Double or Nothing" program on Mutual. Sun. 9:30-10 p.m.

ERNEST de la OSSA. NBC personnel director, has been elected vice chair-man of the New York Personnel Man-agement Assn. Previously he was mem-ber of executive committee of the group as well as program chairman.

RICHARD JAMES has returned to WQXR New York as announcer after three years in Army. Including service in France and the Rhineland.

WALT MURPHY, announcer at WINN Louisville, Ky., has been named pro-duction manager. JAMES BOOTH and FDWIN KALLAY, both Army veterans, are new announcing staff additions.

JAMES L. STIRTEN, former program manager of ABC central division and released last week as Marine Corps litu-tenant. has heen amointed assistant to **F. R. BORGOFF.** ARC vice president in charge of central division.

JACK GARRISON, former Army cap-tain and in 66th Infartry Division for four years, has returned to announcing staff of KMOX St. Louis. New to staff is HOWARD DORSEY, formely with AFRS and in one of first groups to enter Tokvo.

BEN ALEXANDER, released from Na DEN ALFXANDER, released from Navy as lieutenant, and prior to service NBC Hollyword announcer-actor-writer, re-sumes his portraval of Ben Waterford on NBC "Great Gildersleeve".

DENNIS DAY, former feature singer on NBC "Jack Benny Show", and now as-signed to AFRS program section, Los Angeles, has been promoted to lleu-tenant (j.g.).

DON STANLEY, released from Navy, has returned to NBC Hollywood as an-nouncer replacing BOB CAMPBELL, now freelance announcer-actor.

CORDON PHILLIPS, released following three years with AFRS in South Pacific. has returned to Don Lee Broadcasting System, Hollywood, as sound technician.

RADIO GI's in the Japanese area are Americanizing Nippon's networks and stations, according to word last week from Brig. Gen. Ken R. Dyke, former advertising and promotion manager of NBC, now Gen. MacArthur's education and information chief.

Commenting on the "radio situation," Gen. Dyke wrote BROADCAST-ING: "It is certainly an interesting one [the radio situation], and one which is great fun to play around with," he wrote. "The Japanese radio to date leaves a lot to be desired when compared with stateside stuff. We have already inaugurated a Farm & Home Hour, a daily women's program, a political forum, and a few other innovations which are attracting great interest among the Japanese radio public. Strangely enough, they had no programs of this type before or during the war."

EDUCATIONAL RADIO CONTEST PLANS SET

ENTRY BLANKS for the 10th American Exhibition of Educational Radio Programs, May 3-6, are being distributed by the Institute for Education by Radio, Ohio State U. Entries must be submitted by Feb. 1.

Exhibitors will be classified in three groups: national networks and organizations; regional networks and organizations and regional and clear-channel stations (5 to 50 kw); local organizations and stations (less than 5 kw). A first-place and an honorable-mention award will be made for each type of exhibitor in each of the following program classes:

Religious, agricultural, women's, cultural, social problems, personal and family problems, public issues (forums, etc.), news interpretation (not straight news reporting), interpreting civic and service organizations, furthering international understanding," children's (for out-of-school listening), programs designed for in-school use in primary grades, for in-school use in intermediate grades, and for inschool use in junior and/or senior high schools.

Each entry will be judged as an entire series rather than as an individual program. A recording of a typical program in the series must be submitted, but submission of more than one recording in a given series is not encouraged. Exhibit fee is \$2, with an additional \$2 for each additional recording submitted in any series. Award winners will be given special notice in Education on the Air, 1946, the proceedings of the Institute, which will be published by the university. Entry blanks may be secured from Institute Director I. Keith Tyler, Ohio State U., Columbus,

Equity Library Theater **Plans Dramatic Series** PLANS are underway to package a new dramatic air show for Actors Equity Assn., to be called Equity Library Theater of the Air. Thomas L. Stix and J. G. Gude,

of New York, have been assigned as co-producers and business managers of the venture, with proceeds going to support of Equity Library Theater Fund. Mr. Stix and Mr. Gude expect to develop a half-hour or hour dramatic show for sale to a sponsor.

Equity Library Theater, assists unknown acting talent. It previously was supported by private donation and stage plays in various public libraries.

Billboard said, "Just about the best film record of New York's Navy Day celebration... record of New York's Navy Day celebration... a film which is a fitting document of our Navy and the public's reaction to it." Trade reviews tell you

Why ABC is on the Right Track in Television

When we started in television, we knew that to make a success of it we had to establish a basic pattern in order to build television that was above all *practical*. In outline, it was something like this:

America's advertisers had a lot to do with making radio the success it is today. By competing among themselves for larger audiences, they made programs increasingly better, with the result that they, the public and the radio industry all benefited.

2 Advertisers and their agencies will play just as important a part in commercial *television*. For that reason, the best approach to television is from the standpoint of making it a *practical*, *economical medium for advertising*.

3 The logical place to begin the development of television is with what has already been learned about *listening audiences.* New and costly experimental work in new types of programs will play its part. But right now the adaptation of proved, successful, economical radio shows with assured listening audiences is the industry's best bet in developing practical television.

Shows should be televised on regular weekly schedules, just as they are in radio, in order to build and hold television audiences.

The Plan Really Works!

How far that philosophy has taken us in just the past few months is best told in trade reviews of ABC video shows. Some of them are on this page. Read them closely. What they say, in effect, is that in *all* types of video programs—audience participation, children's shows, night baseball, special events—ABC is not only on the right track, but off to a good start as well. That's why advertisers who want to get into television on a practical, economical basis are getting set on ABC today.

In the Schenectady area, enjoy special ABC Christmas television programs December 21, 24, 26, 27 and 28 at 8:00 p.m. on Station WRGB.

American Broadcasting Company

CLIFF GORSUCH, KDKA Pittsburgh engineer, has returned to station fol-lowing release from the Army as lieu-tenant. He served for 33 months, was in CBI and Africa.

in CBI and Africa. WALTER WIDLAR, project engineer for the Med-Rad division of Black Indus-trles, Cleveland, since Nov. 1944, has been appointed gen-eral manager of that division. For 10 years he was re-lay facilities engi-neer for WGAR Cleveland, during which time he worked on ultra-high frequency moworked on ultra-high frequency mo-bile broadcasting equipment. In 1942 he was granted leave to become member of labora-tory staff of Colum-tory staff of Colum-bia Q. Division of War Research, where

time

New directors for two-year terms are: Arno Johnson, director of marketing research and media for J. Walter Thompson Co.; Victor Pelz, managing director of the traffic audit bureau; Carl H. Henrikson Jr., associate director of re-search, J. M. Mathes Co.

KLZ Starts New Series **On Farming January 11**

"A NEW DAILY public service program devoted exclusively to the advancement of farming as a business and a way of life" will start on KLZ Denver Friday, Jan. 11. The Farm Reporter will be coordinated and directed by Lowell Watts, graduate of Colorado A & M, holder of six-month scholarship in practical farm radio at WLW Cincinnati, and just released from AAF, after six months as a prisoner of war in Germany.

Program will be heard Monday-Friday 12:30-12:45 p.m., followed by a newscast, scheduled according to farmer time preference as shown in a KLZ poll. Mr. Watts will use a wire recorder in addition to the KLZ mobile unit for on-thefarm broadcasts. Farm Service Program continues on KLZ 6:15-6:30-a.m., with both programs sustaining. Dedicatory program for the new series will be held Jan. 10 at Denver's Cosmopolitan Hotel, with Secretary of Agriculture Clinton Anderson, Governor of Colorado John Vivian, and Dr. Roy Green, president of Colorado A & M, as guests.

Carpet Promotion

ALEXANDER SMITH & SONS CARPET Co., Yonkers, N. Y., plans extensive ad-vertising campaign during 1946. Output is expected to be 75% of 1941 produc-tion. Most of budget, not yet finally determined, goes to publications but local radio is being tested. Rectifier

Rectifier DEVELOPMENT of a new half-wave high vacuum rectifier, a miniature tube said to be capable of handling 20,000 volts in a 23s inch bulb, was announced last week by National Union Radio Corp., Newark, N. J. Corporation re-ported that the tube, designated as the N. U. 122, was well-suited for applica-tion as a halfwave rectifier at line fre-quencies as well as for application in other forms of rectifier circuits.

KFBC SCORES Again Takes on Big Basketball Schedule in West-

KFBC Cheyenne is again broadcasting an intensive schedule of basketball games, sold on a cooperative basis, six sponsors to a series, between 30 or 40 sponsors in all. On Dec. 6 the station broadcast a pre-season exhibition game between Wyoming and Brigham Young U., two top contenders for Big Seven honors.

In the regular season play the station will broadcast 16 Wyoming U. games by direct wire from Salt Lake City, Provo, Logan, Denver, Fort Collins and Boulder, the balance of the games being played at Laramie, home of the university. In addition, there are 24 high school games both home and out of town, and 15 or 20 additional games from Ft. Francis E. Warren and the American Legion games of Denver, KFBC will also broadcast 10 or 12 games from the National AAU basketball tournament in Denver the latter part of March.

Schedule involves 4,000 miles of travel for the KFBC crew, including William C. Grove, KFBC manager, making the arrange-ments and doing the engineering; play-by-play announcer, Jimmie Blaines, formerly with KTUL Tulsa among other stations; and Larry Munson, formerly of WMIN Minneapolis, another play-by-play mike man. Aggregate cost is approxi-mately \$30,000.

CJBQ Authorized

CJBQ Belleville, Ont., is new 250 w station licensed to operate on 1230 kc, with A. M. Haig, recently RCAF group-captain, as licensee. Station is expected to be on air in May, using Northern Electric, equipment. CJBQ will be repre-sented by H. N. Stovin & Co., Toronto.

THIRD network affiliate group has joined the movement to bring about concerted action to check resumption of the semi-annual shift by networks to daylight saving time in the spring and back to standard time in the autumn. Unanimous expression by affiliates of ABC at a meeting in Minneapolis has been sent to the NAB and to John H. Norton Jr., ABC station relations manager.

Similar action had been taken by ABC affiliates, District 2, at a meeting in Detroit [BROADCASTING, Dec. 17]. Sentiment in favor of united action has been developing among other network affiliate groups.

United Front

E. L. Hayek, of KATE Albert Lea, Minn., NAB director for District 11, acting on behalf of the affiliate group, notified NAB and Mr. Norton of the Minneapolis action. ABC affiliates in the area are contacting other network stations in an effort to develop a united front against twice-yearly schedule shifting by networks.

Mr. Hayek's letter follows:

"From the discussion at our meeting held here in Minneapolis I believe you realize that there is

PAIRS of cotton bolls, termed the community in province and largest iso-white gold" of the Arkansas River Valley, have been mailed to industry representatives by KOTN Pine Bluft, Ark. Seeds from the "KOTN Polls" may be planted, according to inclosed card, which also suggests "Through the medium of station KOTN plant the seeds of sales success."

Ford Series Cards

CARDS for music store display are be-ing distributed weekly by ABC to 110 amillates carrying "Ford Sunday Evening Hour". Calling attention to guest art-ists on series, cards carry line, "Great artists on the air-Great records in your home". Gummed labels give individual station calls and broadcast times.

and the second

FOOTE, CONE & BELDING, New York. FOOTE, CONE & BELDING, New York, was host at a reception honoring Kate Smith and Ted Collins Dec. 17 at the Waldorf Astoria in New York. Agency handles the "Kate Smith Sings" pro-gram effective Jan. 4, when it takes over advertising for General Foods Corp.'s Instant Postum which was for-merly handled by Young & Rublcam [BROADCASTING, Aug. 6, 1945].

SINGLE OFFER of a postcard picture of "Uncle Tom" (Tom Moore), m.c. of WCKY Cincinnati "Western Jamboree," brought 13,383 requests from 33 states, Canada and British West Indies in three days. Count ultimately grew to 38,193. Cincinnati advertising agency representatives and WCKY personnel examining the mail are (1 to r) George Moore, WCKY sales manager; Robert M. Fleming, radio director, Stokes, Paimer & Dinerman; Walter Haehnle, Haehnle Advertising; Jim Bellamy, WCKY sales staff; Bill Dawes, WCKY studio supervisor.

KMOX Tradition

TRADITIONAL Christmas broadcast of chimes and midnight service from St. Genevieve Church, St. Genevieve, Mo., on KMOX St. Louis, symbolizes holi-day to many listeners in that area, ac-cording to folder prepared by station. Broadcast this year will mark not only 10th anniversary of program but also 20th anniversary of KMOX.

CFAR Folder

CFAR Flin Flon, Man., has issued a de-CrAt film Flon, Mail, nas issued a de-scriptive folder relating how the min-ing town of Flin Flon got its name. Prospectors who staked the copper claims in 1914 named it after a charac-ter in the only book they had among them. Flin Flon is now third largest

Christmas Legends

KCKN Kansas City and WIBW Topeka, Kan., last week mailed colorful book-let "Where Our Christmas Customs Come From". Piece was inserted within blue folder with Christmas theme and message, "For your greater enjoyment of the coming Christmas Season".

Grid Dinner

WPEN Philadelphia and The Evening Bulletin were co-sponsors in feting city high school football champions at a dinner at the Bellevue Stratford Hotel last week. Presentation of Bulletin cup and individual emblem pins was broad-cast over WPEN. Novelty Card

NOVELTY direct mall card has been distributed by CKCW Moncton to an-

Promotion Personnel

RICHARD REDMOND, recently dis-charged from AAF as major, has re-joined Mutual as advertising director in network's sales promotion and rein network's sales search department.

ALE

arch department.
LF T. PARKES, recently discharged flight lieutenant from ROAF, has joined CKCW Moncton, N. B., as directon, N.

LOU SPECTOR, for three years in Ca-nadian Army as script writer and spe-cial events writer for Army newsmaga-zine Khaki, has been appointed pub-licity director of CHML Hamilton. He was news editor of CHML before joining service.

SPENCER GREEN, for three years in air branch of Navy, has resumed post as promotion and publicity manager of KJR Seattle.

LT. ROBERT G. PATT, out of Navy, re-joins promotion department of WHN New York as supervisor of sales presen-tations and research. ROBERT F. AN-THONY continues as station promotion, audience promotion and advertising heard head.

NATHANIEL MARKS, copy editor in NBC press department, is father of a boy, Kenneth Burtin, born Dec. 18.

ROLAND TRENCHARD, director of public relations of WAAT Newark, has been named chairman of the public re-lations committee of the Newark Ki-wanis Club.

nounce new Monday through Friday program "She Shall Have Music". Card states "We're in the doghouse" for not personally announcing new program although CKCW felt sure everyone knew about the program designed "as a relief from drama."

Pennants

GUMMED paper pennants containing photos and autographs of recording personalities are being sent upon re-quest to listeners of "950 Club", daily record show of WPEN Philadelphia.

Personal Messages

MIMEOGRAPHED on varied colors of paper, packet of Christmas messages from Don Lee-KHJ Los Angeles person-alities has been distributed by the network.

10 Biggest

THE TEN biggest news stories of 1945 were selected by Richard L. Tobin, director of news for American Broadcasting Co., in a speech before the Alumni Association of the graduate schools of Columbia University. Tobin's rankings, in order were: The atomic bomb, defeat of Germany, defeat of Japan, death of Franklin D. Roosevelt. death or disappearance of Adolf Hitler, postwar upheavals in Orient, South America and Europe; the United Nations Organization, including the San Francisco Conference, postwar strike defeat of Winston wave, Churchill by British socialists, war crimes trials at Nuremberg.

COLUMBIA NETWORK

PROUD WE WERE THAT DAY

Listeners to the Sunday broadcasts of the NBC Symphony recently heard Arturo Toscanini conduct the world premiere of "Overture the world premiere of "Overture to a Fairy Tale" by Mario Castel-nuovo-Tedesco. The composer is one of the five distinguished Judges for the "KFI-HOLLY-WOOD BOWL YOUNG ARTISTS COMPETITION" now airing Mondays at 9:30 p.m. He and his colleagues hear the instru-mentalists (all under age 25) who are appearing in the concert broadcast series and will select the win-ner to solo in Hollywood Bowl during the 1946 Season of "Sym-phonies Under the Stars" with Leopold Stokowski. Serving with Mario Castelnuovo-Tedesco as Judges are: Julian Brodetsky, Eudice Shapiro, Emanuel Bay and Dr. Louis Woodson Curtis.

CHRISTMAS COMES TO HOLLYWOOD

On the day after Thanksgiving, more than half a million Angelenos lined Hollywood Boulevard to witness one of the film city's biggest productions - the opening of Santa Claus Lane. A mile-long parade of floats (carrying NBC stars exclusively) brought throattearing cheers from spectators. KFI's entry in this lush event was a swan-like shell built on a 16 ft. flat bed truck, and we overheard a local wit remark that our job carried enough silver lamé to dress every chorus line in America. An immense "KFI" and a glittering line of copy subtly reminded the throng that the celebrities appearing in the spectacular parade are heard over this station.

CHOOSING names and phone numbers, from list of auto license numbers, "License Quiz" program sponsored on KXOK St. Louis by Milton Oil Co. awards money prize to person correctly answering a question when phoned. Money increases when question is incor-rectly answered. Listener need not be tuned in to program. Olian Adv., St. Louis, placed 52 week contract for Mon.-Fri. 6-6:10 p.m. program.

World Roundtable

World Koundtable WORLD-WIDE roundtable discussion by MBS correspondents of "What We Face in 1946" will be aired Jan, 1 9:30-10:30 p.m. on "American Fórum of the Air". Theodore Granik, regular Forum mod-erator, will introduce show which will bring in William Hillman and Albert Warner from Washington, Cedric Fos-ter and Bill Cunningham from Boston. Cecil Brown from New York, Mailory Brown from London, Leslie Nichols and Arthur Gaeth from European continent and Don Bell from Tokyo.

Entertain Veterans

Entertain Veterans TWO ABC programs and the WJZ New York Victory Troop will present special shows from veterans' hospitals on Christmas day. "Breakfast Club", spon-sored by Swift & Co. and Philco Corp., will broadcast from U. S. Naval Hos-pital at Great Lakes, III., and "Giamour Manor", sponsored by Procter & Gam-ble Co., will broadcast from Birming-ham General Hospital in San Fer-nando Valley, Calif. The WJZ Victory Troop is currently on tour of Army and Navy hospitals in Washington, D. C., area. area

WMCA Program

NEW YORK, New Jersey and Connecti-cut GI's in Berlin and Tokyo will be heard in their own transcribed Christ-mas celebrations on WMCA New York Christmas day 3:30-4:30 p.m. Titled "Christmas Overseas", program winds up station's annual visit to far corners of the world to deliver Christmas greet-ings from men overseas to their fami-lies in this country.

New on WPAT

FIVE new programs scheduled to begin on WPAT Paterson in January are "Student Jury Trials", "Citizens of To-morrow", both teen-age programs; "Community Sing of the Year", featur-ing barber shop quartets; "Colums Write", round table forum of newspaper

Pearson Period

WILLIAM H. WEINTRAUB, New York, advertising agency for Lee Hats, sponsors of Drew Pearson, Sunday, 7-7:15 p.m. on American raised the question that the sponsor had an option with the network for the first available time opening up on Sunday evening. But when Mayor LaGuardia's association with the 9:30 slot was announced the agency questioned the allotment of the time to another sponsor. However, network pointed out that commitment for the time with the Mayor was made prior to option contract on the Drew Pearson show. Lee Hats is still looking for another time period.

G-M on 282

GENERAL MOTORS Corp., Detroit (institutional), Dec. 21 started This Land of Ours on 282 Mutual stations, Mon. and Fri. 10-10:15 p.m. Agency is Kudner Agency Inc., New York.

editors; "Lest We Forget", which will originate from Paterson's Community-Veterans Service Center.

Army Recruiting

PROGRAM urging men to enlist in the army, entitled "We Guard the Peace," started on WNEW New York on Dec. 21, 9-9:30 p.m. Broadcasts are in coopera-tion with southern New York recruiting and induction district of the Army.

Air Charades

AIT Charades NEW QUIZ SHOW for audience partici-pation has started at CBC studios in Winnipeg and is being aired weekly on CBC Trans-Canada network. "Let's Play Charades" is acted out by the orchestra and with sound-effects. Audience mem-bers guess name and receive prizes in war saving stamps. Listening audience sends in charade suggestions. Those used win prizes of war saving certifi-cates.

New MBS Series

NEW FUN-SHOW series titled "Smile Time", featuring Wendell Noble and Steve Allen, starts on Mutual Dec. 31 in quarter-hour Mon.-Fri. 1:30-1:45 p.m. spot. Program is one of network's year-end changes as part of plan to bring improved broadcasting fare to listeners.

Christmas Show

NBC VIDEO station. WNBT New York. presented special Christmas program Dec. 23 titled "Musical Christmas Pres-ents". Program featured classical music. ballet, famous pictures of the Nativity and first complete television production of Prokofieff's "Peter and the Wolf".

MELVIN ELLIOTT, WOR New York newscaster, knew the meaning of real frustration recently when he heard substitutes for himself on his own programs, pinchhitting because he was locked in his apartment and unable to reach the studios.

Mr. Elliott, whose first broadcast is at 7 a.m. for Mentholatum Co., discovered that he was locked into his 56th Street, New York, apartment at 6:15 a.m. on Dec. 11, when he tried to leave for the station. Repeated attempts to open the door failed. Telephone calls to the building superintendent and locksmith failed. Even a climb up a ladder on the terrace of his topfloor apartment leading to the roof resulted in disappointment when a trap door-also locked-stopped him.

Mr. Elliott phoned the station and a substitute was used on the early broadcast and again at 10 a.m. on the Popular Home Products Inc. broadcast. Mr. Elliott went back to bed in despair, but woke up at 11 a.m. with an idea. He telephoned a friend, Gil Kriegel, announcer of WQXR New York. Mr. Kriegel has strong feet. He arrived at 11:15 a.m. and after two healthy kicks from the outside, the lock gave way and Mr. Elliott emerged, a free and grateful man.

GE VIDEO PRODUCER STRESSES PLANNING

LARRY ALGEO, senior producer at General Electric's television sta-WRGB Schenectady, told tion. members of the American Television Society how to build a television show at a luncheon meeting last Wednesday at the 400 Club, New York.

Preparation, he said, was the key to good television production. To get the most out of television, a medium which he said was more flexible than the stage, less flexible than the motion pictures, a producer must carefully plan his show well before the first camera re hearsal.

Television producers, he said, may well look to moviemen for example. Motion pictures, he said, have developed to a high degree the perfection of cutting, lighting and pace, perfection which can be applied also to television.

RCA Raises Wages

RCA VICTOR last week announced a salary increase of 10% for the majority of its workers, and a new minimum wage. Increases, effective Dec. 15, apply to all RCA Victor salaried employes to whom increases could be granted without wage negotiations. The minimum semi-monthly rate for all employes is now \$50, and a 10% increase has been granted to all those earning up to and including \$378 monthly.

Kellogg Considers

KELLOGG Co., Battle Creek, Mich., is considering new net program for placement, through Kenyon & Eckhardt, New York. Firm is now sponsoring three others series.

Overseas Records

GIS STATIONED overseas will receive Yuletide recording of volces of their families with compliments of WNEW New York. Titled "Living Christmas Cards", discs will be sent to soldiers immediately after being played on Christmas Day on three special pro-grams.

Participations

JUICY GEM ORANGES, New York, has started participation sponsorship of "Dorothy & Dick", weekdays 8:15 a.m. on WOR New York for 13 weeks through Hill Adv., New York.

CHRISTMAS and New Year's greetings from loved ones at home are being recorded for Oklahoma's servicemen overseas by WKY. Plan is a project of WKY's Women Commandos program, sponsored by Oklahoma Natural Gas Co., and directed and produced by Julie Benell. Arrangements have been made with military officials to have the recordings flown to the men overseas.

Families and friends of servicemen are invited weekly to the broadcasts, to luncheon, and then to record their messages. Expenses are paid by Oklahoma Natural Gas Co. As an added feature, Miss Benell will also play recordings from servicemen to their families. The Women Commandos program is broadcast 15-minutes Monday-Friday, and will continue on the air as Women's World following wartime duties.

REVOCATION ASKED FOR KABC'S PERMIT

<u>RETITION asking the FCC to re-</u> voke its construction permit to KABC San Antonio and to prohibit Alamo Broadcasting Co., licensee, from using transmitting and other equipment acquired from CIA, Industrial de Mexico, S. A., former operator of XENT Nuevo Laredo, Mex., was filed last week with the Commission by Norman Baker, former operator of KTNT Muscatine, Iowa, and president of the Mexican firm.

Mr. Baker, who served a term following conviction on charges of using the mails to defraud, asked the FCC to conduct hearings to determine whether the Alamo company acquired its transmitting equipment "in a lawful and proper manner" and whether applicant "disclosed all pertinent facts" to the FCC in its application to operate with 50 kw on 680 kc [BROAD-CASTING, May 1, 1944; July 17, 1944]; that the hearings be conducted in Nuevo Laredo, Laredo, Tex., San Antonio "or such other places as shall be requisite to the ascertainment of all true and pertinent facts."

The old Federal Radio Commis-sion ordered KTNT off the air some years ago after complaints had been made that Mr. Baker was using his station to promote a "cancer cure". He later was con-victed in a Federal court in Arkansas on charge of using the mails to defraud. In his petition to the FCC, the former broadcaster alleged that an employe of XENT sold the equipment to KABC without his knowledge and that of majority stockhilders.

Larus Renews

LARUS & BROTHERS Co., Richmond (Chelsea and Edgeworth tobacco), Jan. 8 renews for 52 weeks "Guy Lombaido & His Royal Canadians" on 167 ABC stations Tues. 9-9:30 p.m. Agency: War-wick & Legler, N. Y.

BROADCASTING • Telecasting

Response to Sponsored Video Greater Than to 'Sustaining'

SPONSORED television shows are already beginning to win greater audience response than sustaining features, Fran Harris, video director for Ruth-

hauff & Ryan, Chicago, believes. T el e vision's

ability to give visual dimension to sound offers unlimited opportunities for better exploitation of "hard - to - sell" products, she de-

clares, and cites as an example a broadcast over WBKB, Chicago television station,

for Acrobat Shoe Company, which was presented directly to Chicago schools. "Here the audience was able to

see the features pointed out in the announcements, and the ability to give action to the product itself was particularly effective," she said.

Educational Field Open

"A field which should attract many sponsors in the near future is the educational program, which not only can be entertaining, but contribute information and culture.

"The widely accepted concept of ideal education-knowledge which an immature mind absorbs almost unconsciously from close contact with a mature one is being given practical application on many Chicago television shows, particularly those presented by the Chicago Board of Education.

Such programs as The Battle of the Books, Health Habits, The Air Age, Fire Prevention and other educational subjects which were presented by the Board of Education all lend themselves to a variety of commercial uses.

"Insurance companies, food and drug accounts have in television a great new field to teach safety. better living, better diet and a multitude of other subjects which need visual as well as oral interpretation," she explained.

Miss Harris said students who view television programs are enthusiastic in their response to this new medium, and pointed out the advantages of educating them as wage-earners of tomorrow to look upon television as a practical medium of advertising.

"A recent series of programs produced as an experiment combined both education and advertising," she continued. "Sponsored by the American Gear Co. basketball team, Chicago's representative in the National Basketball League, the programs are presented in the interest of developing means for creating better young Americans through improved educational channels.

"All of the Chicago public

schools cooperate in the challenging adventure. The weekly telecasts are prepared by different schools, with teachers and students participating. The Admiral Radio Corp. has also recognized the value of television to introduce an item with a wide price range.

At Own Expense

"Heretofore most commercial AM stations have presented public service programs at their own expense. This particular type of program has an even greater advantage for commercial sponsorship in television." Miss Harris said.

She described a recent broadcast of a demonstration of the Sister Kenny method for treating infantile paralysis, And They Shall Walk as a type of educational program that attains its greatest effectiveness through television.

"We at Ruthrauff & Ryan feel that the opportunities for expanding markets as well as educating great numbers of people through television are unlimited," said Miss Harris. "The time is not too far off when commercial sponsorship will make possible programs which cannot be produced on the limited budgets of the television stations themselves."

The Committee for Economic Development said that post-war employment in the South Bend area would be 122 %-as compared with 1940.

As this city swings into its mighty job of turning out peace-time products -to fill its tremendous backlogs of orders - it's easy to see that the C.E.D. was correct! Employment is already hitting the level predicted, and going UP.

The "Hooperating" of WSBT is figure magic, too! It simply fascinates usso much that we'd like everyone to see it. Shall we mail you a copy?

Mackay Proposes Press Messages at Low Cost A COMMUNICATIONS service to supply U. S. news to the rest of the world at the lowest costs in communications history will be begun by Mackay Radio and Tele-graph Co., if FCC approval is obtained. Mackay filed application with the FCC last week to establish rates of approximately onethird cent per word on the new service.

From Mackay's high-power transmitters in New York and San Francisco the company proposes to blanket the world with U. S. news for simultaneous reception at authorized press receiving points. Booster stations in Europe and Pacific areas would insure adequate radio reception of American news in remote countries at all times.

\$1,000,000 Pen Plan

REYNOLDS INTERNATIONAL Pen Co., New York (two year pen), plans to allocate \$1,000,000 for promotion in 1946 according to Chicago office of Maxon Inc., agency appointed to handle account.

KOOS Renovates

KOOS Renovates STUDIOS and executive offices of KOOS Coos Bay, Ore, located in the Hall Bidg, are undergoing complete renova-tion under direction of Hal Shade, manager. In addition to revamping of studios and office, space, plans call for enlarged and new program department. New technical equipment is included.

NETS FEATURE HOLIDAY PROGRAMS Spirit of Thankfulness Marks First Peace Observance of Christmas-

FIRST peacetime Christmas in five years will be observed by networks and local stations by a dominant mood of joy and thanksgiving, although program schedules will not differ in any marked degree from wartime observance.

Spokesmen for networks and local New York stations report that a definite increase in musical programs and domestic pickups this year denotes the only difference in radio's peacetime observance of the holiday.

In contrast to famous choral groups featured on special programs, Prudential Insurance Co., sponsor of The Family Hour on CBS, presented a 100-voice chorus of its employes in special Christmas music broadcast on Dec. 23. and WHN New York featured 500 orphan children in a community sing Dec. 22 from the Hotel Edison, New York. Two children's holiday parties were broadcast on ABC on Dec. 21 and 22, from Hollywood and Washington, D. C. The Washington program, International Children's Christmas Party, is an annual event.

Dramatizations of the Nativity and Christmas portraits will be

featured on all networks and stations. Dickens' Scrooge will be portrayed by artists varying from Lionel Barrymore's famous characterization on the CBS Noxema Chemical Co. Mayor of the Town (Dec. 23) to the American Negro Theatre players' presentation of Scrooge on WNEW New York (Dec. 23).

Onetime commercial programs on Christmas day will include Elgin National Watch Co.'s annual twohour variety program on CBS, titled Two Hours of Stars, featuring top-flight radio and motion picture artists; Ronson Art Metal Works' half-hour music and dramatic program, Christmas Musicade on CBS, first in a series of annual broadcasts, and a special one-hour program of Christmas music on NBC 4-5 p.m., sponsored by Cummer Co. and Charles H. Phillips Chemical Co., in place of daytime serials usually heard at that time.

Church services of all denominations will be broadcast, including special masses and choirs, and the annual Mutual broadcast of Pontifical High Mass from St. Patrick's Cathedral, New York, on Christmas Eve.

Mutual inaugurated a new program idea Dec. 18 with a two-way choral and greetings exchange between members of the U.S. Congress and the British Parliament.

Military Pickups

GI pickups from overseas still hold a prominent place in network programs this year, with broadcasts emphasizing the GIs' manner of celebrating the holiday as members of the Army of Occupation. On Dec. 22, NBC featured a pickup from a returning troop ship.

ABC has pickups planned from Paris, Berlin, Munich, and Switzerland; Mutual is presenting a special broadcast from Tokyo Dec. 24 with members of the 9th Division participating in a dramatization of the Nativity story for their families at home, and including messages for the hope of peace by Generals Eisenhower, MacArthur and McNarney, and Admiral Nimitz.

Mutual on Christmas will have man-on-the-street interviews with policemen, telephone operators, bus drivers, and others engaged in work that keeps them on the job on the holiday. Another Mutual idea was the presentation of six leading New York department store Santas as guest contestants on Helbros Watch Co.'s Quick as a Flash program Dec. 23.

Standard Oil Co. (New Jersey) will sponsor an hour broadcast on Mutual Christmas day with a 70,000-mile radio and shortwave hookup between America and seven overseas points, designed to bring an exchange of greetings between members of the armed forces and their families in this country.

The speech of President Truman Dec. 24, 5-5:30 p.m., when he lights the national Christmas tree on the White House grounds, and that of King George VI to the British Empire on Christmas day will be broadcast to the world.

Pigeon's Progress

SOMETHING NEW - or something old-in communications strolled casually into BROADCASTING'S Washington office last Tuesday. It was a Western Union boy with a disinterested pigeon perched on his shoulder. As it was a carrier pigeon, we asked if the bird was carrying the message or the messenger. The explanation was simple, if not enlightening, "He was walking up F Street, and so was I, so he got on my shoulder." The pigeon had no comment.

Gen. Collins Appointed **Army Information Head** LT. GEN. J. LAWTON COLLINS last week was appointed to succeed Maj. Gen. Alexander D. Surles as director of information for the War Dept. Gen. Surles, who has been director since August 1941, has been assigned to special duty with the office of the Chief of Staff.

Gen. Collins has served as Chief of Staff of Army Ground Forces since late August, after his return from ETO where he was commander of the 77th Corps throughout the invasion and the drive across the Continent. He holds the Distinguished Service Medal with two Oak Leaf Clusters, Silver Star with Oak Leaf Cluster, Legion of Merit, Bronze Star, and English, French and Russian decoration.

Opinion Poll THE U. S. is overwhelmingly opposed to military training according to analy-sis of unsolicited letter received by "America's Town Meeting" following recent broadcast on this subject. George V. Denny Jr., moderator, reported that 89% opposed military training. Mail in-cluded letter from high school and col-lege students lege students.

MODEL 250 BCF 88-108 MEGACYCLES

TEMCO proudly presents this outstanding achievement in FM engineering—the result of 10 years of pioneering in custom-built, superlative communication equipment.

HIGHLIGHTS OF THE TEMCO 250 BCF

•Normal rated output power 250 watts. Maximum rated output power 375 watts.

•Continuous monitoring of the carrier frequency by a center frequency deviation meter calibrated directly in cycles.

An exciter unit — heart of the transmitter—characterized by tuning simplicity accomplished by employing only 4 stages to raise the primary oscillator frequency to the carrier frequency.

"A new circuit of technically ad-

vanced concept which maintains a high degree of center frequency stabilization without introduction of distortion.

•Peak efficiency and great dependability are obtained by the use of new miniature V-H-F tubes in the exciter.

Improved design in the IPA and PA stages eliminating tank radiation, feedback, radio frequency and high voltage potentials from the tank circuits and transmitter frame.

*A limited quantity of the TEMCO Model 250 BCF will be available for January delivery. Orders will be filled in rotation as received. ACT NOW. Place your order at once.

NOW ON DISPLAY FOR YOUR INSPECTION. Phone or wire for an appointment.

CMA LINDA FOOD Co., Arlington, Cal. (Ruskets breakfast food), Jan. 7 starts sponsoring "Burritt Wheeler— Commentary", three times per week on 10 CBS Pacific stations. Packaged by Fletcher Wiley Froductions, quarter-hour series is also sponsored twice-weekly by Wilco Co., Los Angeles (Bif Insecticide, Clearex glass), on same sta-tion list. The change will be temporary

By LEO M. FREMONT

MORE THAN 10,000,000 servicemen and servicewomen are returning to the ranks of the nation's consumers. These people have been away from advertising, sales messæges and radio commercials from one to five years. Few advertisers may recognize the fact that their advertising can be doubly potent if it falls in line with the thoughts and desires of these 10,000,000 new consumers.

When the soldier gets his discharge he's a "free" man. No soldier will ever want to be "talked down" to. He won't want his thinking created for him; he'll want to do his own planning. Our commercials in radio must recognize the maturity which men have gained while in the Army.

Be aware of the fact that "instinctive desires" in the average veteran have not changed. He still wants a home, a wife and a family—he wants a steady job, a car in the garage and as many of the comforts of life as he can obtain. But he has been away from these things for so long; he has been under duress and strain; his emotions have run the gamut so often, that his response to "certain appeals" clearly points to the fact

"He shouldn't have cancelled his broadcast over WFDF Flint."

that American-made products are superior in every way.

是我的珍慕的

When he starts out to buy he'll be looking for products, accessories, etc., that were on the market when he left home. But they won't all be there. Advertising should step in now and teach the veteran that the new things developed by industry and manufacturers during the war years are actually better. He will be definitely unfamiliar with the new products that research has developed; he won't know that the substitutes now give him more for his money.

Gadget Conscious

The Army, with its hundreds of new time-saving gadgets, has made the veteran gadget-conscious. The walkie-talkie, wire and film recorders—many new ideas and new ways of doing things have been developed in the automotive field, the shoe industry—these "new" things must be pointed up and explained to him. He'll be looking for the shorter, more economical way.

It's no secret that 86% of the money paid to soldiers in the European theater of operations is sent back home, in the form of War Bonds, allotments and insurance. The veteran has definitely become savings-conscious. There is a tremendous opportunity here for banks and savings institutions and insurance companies.

Without exception, when it comes to food and drink, the one thing the American soldier has

LEO FREMONT joined the Army in March 1942, when he left his job as publicity and promotion director for the Arrowhead Network, Duluth (WEBC WMFG WHLB WEAU). At 22 he was probably one of the youngest regional network promotion managers in the country. His last Army duty before release last month was directing program department's "commercial" section of the Paris office of American Forces Network, promoting GI spot campaigns.

missed most overseas is milk. The Army has provided ice cream of a sort overseas in recent months, but it's nothing to compare with the rich American-made product. All dairy products are on the veteran's list of things he wants. Good advertising will pay off for the smart dairyman.

The shedding of the uniform, be it Army, Navy, Marine, Coast Guard or Merchant sailor, will be a great day in the lives of millions of veteras. Men will be heading for new suits, new shoes, white shirts and colorful neckties. Servicewomen will be spending millions of dollars refurnishing their wardrobes. It all points to more sales for stores of this type—and the cream of those sales will fall to the advertiser who slants his copy in the right direction.

The emphasis cannot be placed (Continued on page 82)

The further they fly, the feebler they become ... fifty miles may make them strangers... close to home they're robust and welcome. Radio has its local

Vital Cavity Magnetron Tube's History Described by Raytheon

DEVELOPMENT of the cavity magnetron tube from a laboratory freak to the mass-produced heart of modern radar was described last week as war-time wraps were lifted from this hitherto "top secret" enterprise.

The agency principally responsible for engineering the mass-production technique by which these vital tubes were supplied at a pace with production of less troublesome radar parts was Raytheon Manufacturing Co., Waltham, Mass. Last week Raytheon told the story.

Early radar sets suffered a chronic weakness: the best tubes then known were of insufficient strength to produce the high frequencies which scientists knew were needed to operate the sets with practical efficiency. What they wanted were tubes capable of generating and detecting radio energy at frequencies of 3,000 million cycles. In 1940 British scientists at England's U. of Birmingham were bidden by the British Admiralty to devise such a tube. Before year's end they had succeeded; the cavity magnetron was at last a fact. Next problem was how to build it in quantity.

That was the problem which beset researchers of Raytheon whom the company had meanwhile assigned to work with the radiation laboratory at Massachusetts Institute of Technology. By fall of 1941 Raytheon was making 17 magnetrons per week and that quantity only by day and night production. Seventeen per week were not enough by thousands. In December 1941, the U. S. Navy allocated funds to Raytheon for a plant designed to produce 100 tubes per day. In May 1942 the company began operations at the plant.

From the bright new factory 100 tubes emerged each day, each tube representing 100 man-hours of precision machine work, additional hours of individual processing and testing. It became plain that unless manufacturing techniques improved remarkably, magnetron would become the tiny, but unbreakable bottleneck in the entire radar program.

It was Percy L. Spencer, then Raytheon's director of research, who developed a mass production system which eliminated precision tool work and almost overnight expanded plant capacity from 100 to more than 1,000 daily. The new process was called lamination.

Machines now stamped the configurations out of thin sheets of copper, then stacked and brazed the stampings to form a solid mass. The process of making the magnetron body had become automatic. Assembly lines were installed so that two operators now did the work that 15 had done. Automatic processes improved not only quantity, but quality of the product. By war's end more than half the magnetrons produced in the world had come from Raytheon's assembly lines.

Meanwhile, new developments in radar called for variations in the tubes. More than 50 types of magnetrons are in use now. They range from the smallest, weighing one and a half pounds and delivering 2,500 peak w at 2,500 volts, to the biggest, weighing 14 pounds and capable of delivering 1,500,000 w at 30,000 volts.

War-time uses of microwaves are being applied to peace-time detection and direction applications. And Raytheon predicts that the magnetron and other microwave types offer possibilities for useful devices undreamed-of so far.

NEW PROGRAM USES RECORDER PICKUPS NEW TYPE of documentary news

program, Hot Off the Wire, utilizing the war-born wire recorder. started Dec. 16, 10:45-11 p.m. CST, on WBBM Chicago.

Prepared by WBBM special events department the show was tested Dec. 8, using six separate wire-recorded pickups. Program featured interviews with a 105year-old former slave; member of Dutch underground; Dutch Minister to U. S.; Santa Claus; Secretary of Agriculture Clinton Anderson; a nylon salesgirl, and Pauline Carbone, center of stormy British-American love mixup. The recorded interviews consumed nearly nine minutes of program.

Jim Hurlbut, special events chief and writer of the show, said members of the station's news and special events staff will cover all outstanding news events in Chicago for program material.

Raising a Calf

HAL DAVIS, radio publicity director of Kenyon & Eckhardt, is mailing daily postcards to radio editors re-porting on the progress of Allen La Fever in lifting Phoebe the calf. Based on the old saw, "If you lift a calf every day you will be able to lift a cow," the 17year-old farm boy lifts Phoebe every day, on Saturdays doing the lifting before the studio audience at CBS broacast of County Fair sponsored by Borden Co., whose agency is K. & E. Stunt is in its third month and as of last week Allen, who weighs 150 pounds, was still getting Phoebe off the ground despite her increased poundage from 75 to 163.

SOLLY ANNIVERSARY KJR Garden Expert Nears 7,048th Broadcast

CECIL SOLLY, British-born garden expert, who conducts Solly on the Air five nights weekly on KJR Seattle, on Dec. 31 reaches his 7,048th sponsored broadcast in 16 years of broadcasting.

The job keeps him busy off the air as well as on, and he cites figures to prove it: 22,233 requests received for garden booklets offered on his broadcasts; 16,089 letters received from listeners and personally read; 15,290 telephone calls for garden information personally afswered; 156 garden lectures delivered throughout the Northwest.

Born in 1896, Mr. Solly worked with Carter's, largest seed house in England, before World War I. After three years in military service, including 11 months in the American Expeditionary Forces, he returned to Carter's, then came to the U. S. in 1924. He worked with Henderson Seed Co. in New York until 1929, when he went to Seattle and opened his garden program. Each successive sponsor has kept the show for more than two years. It is currently heard at 9:45 p.m. Monday through Friday.

Contempt Hearing

JUSTICE PIERRE F. CAS-GRAIN, presiding in Superior Court in Montreal, reserved judgment following the hearing of a motion to fine President James C. Petrillo and the AFM for contempt of court for alleged violation of an interim injunction by placing the Tic Toc Cafe, Montreal, on the "unfair list" for musicians. Counsel for Tic Toc Cafe, which instituted the contempt proceedings [BROAD-CASTING, Nov. 26], also asked that Montreal Guild of Musicians, affir liated with AFM, be fined for contempt. Defense counsel contended the Guild had not violated the interim injunction, that Mr. Petrillo and the AFM had not been summoned to appear before the court and, in any event, were beyond the court's jurisdiction.

Racket in Augusta

WHILE GOING from house to house collecting funds which she claimed to be under the auspices of WGAC Augusta, a young woman was arrested last week for obtaining money under false pre-⁵ tenses. The 21-year-old woman told housewives she was collecting funds for the station to give to an Augusta widow "in urgent need of money." One housewife became suspicious and called J. B. Fuqua, station manager, who sent police to the block in which the woman was operating her racket. She has been released under bond.

REGULAR broadcast of "America's Town Meeting" on American on Dec. 27 will be telecast on WRGB Schenectady, General Electric video station. where program will originate that night.

with KNOW for Sales Results

With reconversion and labor problems becoming important factors in your business expansion plans, it will be well worthwhile to look to progressive Austin, where post-war business already has the green light all the way.

The Committee for Economic Development report on war production centers, dated October 6th, indicates that Austin has reconversion well under way, with little or no major unemployment problems, and labor trouble at a minimum. The state

RADIO

STATION

capitol and diversified industries bring the average per-family income in Austin well above that of the rest of the United States. This means your business will find a thriving market here.

To sell this market, KNOW has the "Know How." Hooperatings for KNOW the oldest, best established station—show it leading Austin's other station by a wide margin at every period, day or night.

In your future expansion plans, go forward—with Austin and KNOW.

We will be glad to send you complete information on the Austin Market and our brochure, "The Austin, Texas Area," at your request.

Hope, McGee, Skelton Lead Hooper Ratings

BOB HOPE, with a rating of 34.0; Fibber McGee & Molly, with 28.3, and Red Skelton, with 24.8, are the top three programs as far as audience goes, according to the Dec. 15 report of C. E. Hooper Inc. on network evening commercials. Skelton rating, computed as it is broadcast too late for a telephone check in the East, is in the nature of a welcome home from military service and may not indicate the standing of his program a few months hence.

Average evening audience rating was 10.1, a gain of 0.7 from the Nov. 30 report, a gain of 0.3 from Dec. 15, 1944. Average evening sets-in-use was 31.9, up 2.2 from the last report, up 1.4 from a year ago. Average available audience was 80.1, up 0.9 from the last report, up 1.0 from a year ago.

First ABS program to receive a Hooper rating was Adam Hats Fight of the Week, which rated 22.

After Hope, Fibber and Skelton, top rating programs were: Charlie McCarthy, 24.7; Jack Benny, 24.4; Screen Guild Players, 24.2; Radio Theatre, 22.8; Walter Winchell, 22.0; Mr. District Attorney, 21.8; Fred Allen, 21.5; Eddie Cantor, 19.9; Take It or Leave It, 19.0; Truth or Consequences, 18.7; Abbott and Costello, 18.5; Amos 'n' Andy, 18.4.

Spindle Eye, 10 kw Radio Ship, Serves Army as Roving Communications Center

"SPINDLE EYE", 10 kw radio ship, is performing yeoman service as the Army's roving radio communications center off the Japanese Islands and the China Coast.

Just returned from a test trip on the Spindle Eye, Lt. Col. Jack Harris, radio public relations chief for Gen. MacArthur, told BROAD-CASTING last week of the success of the ship, whose signal has been receiving from three plus to four plus ratings. "On one of our tests from Korea," Col. Harris said, "RCA in San Francisco said the signal was good enough for a five plus rating." Five is studio quality.

The ship was planned originally as the master control for coverage of the invasion of Japan, replacing the *Apache* as the Army's communications ship.

Operated under MacArthur's GHQ Public Relations and serviced by a Signal Corps detachment under Capt. Phillip Finney, the *Spindle Eye*, while in Tokyo Harbor picks up the signal from Radio Tokyo and beams it back to the States. First Lt. Sheldon Weaver, of WSM Nashville, is chief engineer.

Tests were made along the Central and South China Coast and off Korea, sections that are potențial news spots, and which are not equipped with other radio or press

facilities. At present, the ship is at Hokaido covering Christmas activities of occupation troops there.

The Spindle Eye will be in Tokyo Harbor for the January war crimes trials. At all times she will be standing by to go to any spot in the Pacific where needed.

Has Two Studios

The ship has two studios, one for broadcasting, the other for recording. There are six recorders aboard, two wire, two film, two acetate, one of which has gyroscopic equipment designed especially for recording during heavy seas.

Equipped for both voice transmission and for filing press copy, the Spindle Eye can file a record 300 words a minute. Hal Boyle, AP correspondent, now in Japan, writing on the ship, called it the ultimate in press and radio facilities for news coverage.

The ship is also doing hundreds of "hometown" recordings, according to Col. Harris. Format of the disc has now changed to include entertainment, such as music and talent, as well as regional group interviews. They will be only on request. Stations desiring recordings may send requests to the Radio Branch, Bureau of Public Relations, War Dept.

Capt. Lansing Lindquist, formerly with WSYR Syracuse, N. Y., has replaced Col. Harris as radio public relations chief in Japan. Col. Harris, prior to entering the Army, was director of news and special events at WSM Nashville.

bak, in Chicago for a board of directors meeting, attended a dinner of the network's staff he got an unexpected surprise and showed he appreciates a joke as well as the next person. Some MBS employes at one end of a long table were indulging in a bit of harmony and Mr. Kobak heard only the word "Mutual" in the song. When the vocalists obliged with full-throated three-part harmony, this is what he heard:

M is for the money that they don't pay

U is for the usual bunk we're fed. T is for the tiring hours each day. U is for the same old thing we said A is for the —'s that we work for L is for the place we'll go some day

Put them all together they spell . . . MUTUAL. The best damned network in the

U. S. A.

The song was an off-the-elbow improvisation by Marie Karlstrom, sales department, and Jean Scorsone, MBS promotion artist.

Letter to the Editor

EDITOR, BROADCASTING:

May I once more ask space to bring to the attention of every broadcasting station and officia. the fact that today as never before they MUST stand together, they MUST work for the common good of the public, and they MUST not let fascist-thinking congressmen or any others, try to throttle radic with government ownership or any form of censorship.

Radio in North America is being conducted in an excellent fashion generally and, as a means of spreading ideas, both educational and entertaining, stands for $m \circ r$. among methods of communication.

It is rabid congressmen like Cannon and some others who are ever on the alert to change not only radio, but other forms of American industry and institutions to conform more closely to some foreign government.

A sane, level-headed, businessman in a city or small town, who is a respected citizen, a law abiding man, may open a radio station, or buy a station, only with the thought in mind always, that the government will not give him a license longer than one or two years. He may tie up fifty, a hundred, or two hundred thousand dollars in a radio station, but he still has no assurance that he will be licensed longer than the one, or two years. No matter how honestly, how sincerely he managed his station, or how dear to the listeners heart his station is, he still is afraid to make too great investment because he is afraid that he will make some little slip up, or mistake that will cost him his license. The very least the FCC can do is to license radio stations for at least five years, and if, in the meantime, that station has knowingly or willingly violated some rules of the commission, then force t sale, or refuse him a furthe license.

Most certainly a radio station is no more or less than a newspaper of the air, and so far as cluttering the air with beer and pill advertisements as Brother Cannon has said, the radio certainly should have the same right as a newspaper.

The greater majority of radio station owners and managers are inherently honest. They want to cater to the public and give public service. . . If many of our representatives and members of Congress will spend more time trying to "actually" serve their constituents, instead of running around the country and visiting foreign countries, to bring back "isms" that are un-democratic and un-American, we would all be better off by far.

T-H-S Radio Party in Chicago

ONE OF the year's largest radio parties in Chicago was given by Taylor-Howe-Snowden Radio Sales to introduce their stations managers to the Chicago radio industry. More than 550 invitations were issued: more than 700 persons attended. Party was at Drake Hotel.

IN THIS GROUP are (1 to r) Raymond Hollingsworth, manager of KGNC Amarillo; Elaine Miller, Grant Advertising, Chicago; Tom Peterson, manager, Taylor-Howe-Snowden Radio Sales, Chicago; Dale Miller, account executive. Earle Ludgin & Co., Chicago.

GUESTS at the party included (l to r) Rudi Neubauer, network salesman, NBC Chicago; Margaret Wylie, timebuyer, J. Walter Thompson Co., Chicago; George Johnson, manager of KTSA San Antonio.

CIAD Carries CBS

CJAD Montreal, which began broadcasting Dec. 8, is now carrying a number of CBS English-language network shows, including several formerly carried only by Montreal's CBS outlet CKAC. CJAD, however, has not been permitted a CBS franchise [BROAD-CASTING, Dec. 17] following decision of CBC governors not to give any more U. S. network affiliations to independent stations. It is understood CJAD is now carrying CBS programs as English-language outlet for CKAC, which primarily carries French-language programs.

Join WPIK

Reece Bill

(Continued from page 24)

clude specifically the definition of "labeling" as it now appears in the Food, Drug, and Cosmetic Act. At present the 1938 Wheeler-Lea amendment to the FTC Act says that the Commission does not have jurisdiction over labeling, but does not specifically define the word.

While the food, drug, and cosmetic industries all have an interest in the "dual jurisdiction" problem, it is the proprietary drug industry which is primarily con-cerned with it. Shortly after the enactment of the 1938 Food, Drug, and Cosmetic Act, the FDA issued a list of "suggested" warning statements which it required proprietary drug manufacturers to use.

Sometime later, the FTC began ordering proprietary drug manufacturers to include warnings in their advertisements-or as an alternative to include the warnings on their labels. If they included the warnings on their labels, they would not have to put them in advertisements, but would have to say in all advertisements-radio as well as printed-"Caution: Use only as directed".

Indirect Regulation?

Proprietary drug lawyers charge that this is an indirect way of regulating labeling via advertising. They point out that no advertiser will buy time or space to warn potential consumers against use of his product under certain circumstances and that the consumer is adequately protected if the warning is placed on the label. For this reason, proprietary drug men contend, advertisers, when faced with the alternative of putting warnings in ads or labels, choose the latter.

Proprietary men also claim the Commission in some instances is insisting on warnings which are different from those which the Food and Drug Administration requires. A number of prominent radio advertisers - Bromo-Seltzer, Stanback, B-C, and Miles-are currently engaged in a series of cases with FTC involving the Commission's insistence that the firms add three words to the warnings they now have on their labels-warnings which apparently have at least the tacit approval of FDA.

British Poll

A POLL by Dr. George Gallup of British listeners found that 40% of the listeners were entirely satisfied with the BBC or governmentowned system of broadcasting. Of 44% complainants, 12% commented on dullness and poor quality; 11% said system was "too highbrow" and 9% said "not highbrow enough". Of those questioned 16% said they either do not listen to the radio or do not own sets.

CBS EMPLOYES last week received a Christmas bonus of one week's pay.

THE WSAM TRIPLE MARKET WILL AGAIN BE TOPS IN '46

Concluding a merry, prosperous Christmas trading season, WSAM looks forward to even greater prosperity throughout its tri-city area in 1946. Thousands of workers permanently located and gainfully employed will be in WSAM's triple market —Saginaw, Bay City, Midland, They'll all hear your advertising message through the area's dominant radio voice-WSAM.

CUT THE COST OF HANDLING YOUR PREMIUM RE-**SPONSE AS MUCH** AS ONE THIRD!

Write and tell us how many premiums you expect to send out by the end of your campaign, what your premium is and whether you make a charge to the consumer for it.

We can then tell you by how much your costs can be cut, and it won't cost you a cent to find out!

Our plan calls for the cooperation of your present fulfillment house, so please do not delay in telling us about your problems.

DON'T BE FOOLISH ABOUT WISDOM (Ky.)!

Wisest thing to do, say we, is to stay the heck out of such queerlynamed settlements as Wisdom, Kentucky. In this big State what most advertisers really want is WAVE's Louisville Trading Area, where there's more buying power than in all the farflung remainder of Kentucky combined. A man can be wise without possessing any part of Wisdom: In fact, that almost proves he's smart!

YOT WHEN SPOTS ask a John Blair man

& COMPANY REPRESENTING LEADING RADIO STATIONS

Veterans Complete Announcing Course

GRADUATES of WEEI Boston's first announcers class for veterans, fifth in a series of announcers classes conducted by WEEI [BROADCASTING, Dec. 3], are pictured with station executives and class directors: (l to r) James Bronssdon (ex-Navy); Leroy Wires (ex-Navy); Paul Winter (ex-Coast Guard); Guy Aylward (ex-AAF Cadet); Fred Garrigus, WEEI director of veterans affairs; Charles Wilson (Army Engineers); Harold E. Fellows, WEEI gen-

eral manager; Vernon Gaskins (ex-Coast Guard) Arthur Edes, class instructor; Harold Broder (ex Navy); Bernard Reinherz (Army); Joseph Garlan, (Army); Robert Schneider (Army); John Farrel (Army). WEEI is now seeking jobs for the gradu ates, who entered the class from military hospital: in the Greater Boston area. All are New Englander: except Mr. Schneider, of Brooklyn; Mr. Gaskins of Clarksburg, W. Va., and Mr. Winter, of Minne apolis. Station plans another class soon.

On the Service Front Gen. Thompson Urges AFRS **Continuation Overseas, in U.S.**

RETENTION of Armed Forces Radio Service facilities by the government was advocated by Brig. Gen. Paul W. Thompson, chief of Information and Education Division of ASF, European Theater.

Gen. Thompson, recently in Hollywood for inspection of AFRS operations, pointed out that this service will play an important part in the education program for occupation forces around the world and especially for the peoples of Europe.

High Standards

He stated that AFRS network operation in Europe has maintained the highest standards of radio entertainment during the war and was a major factor in maintaining morale of the American soldier overseas. "It is imperative that this service and the same high standard be continued at least during the occupation period because of the tremendous part it plays both in education and entertainment of our men away from home and for the European people," Gen. Thompson emphasized.

Simultaneously with statement of Gen. Thompson, it was revealed that the Army and Navy through efforts of Maj. Martin H. Work, Commandant, have provided sufficient funds for expansion of AFRS activity at full quota indefinitely.

In addition to AFRS Los Angeles headquarters employing approximately 300 military and civilian personnel, shortwave offices in New York and San Francisco will continue in daily operation, with nearly 1500 hours of news, special events and sportscasts a week now being beamed via 20 shortwave transmitters. AFRS headquarters

is also providing 151 radio shows weekly to more than 200 broadcast stations outlets. An average of 130,000 copies of AFRS productions are flown overseas each month.

Included in forward plans of AFRS are war casualties in hospitals in United States. A "bedside network" will provide hospital listeners with AFRS programs by means of sound systems run on a daily broadcast schedule basis. Well over 100 hospitals in the U.S. are now receiving pressings of AFRS programs on a weekly basis equivalent to 17 hours of transcribed entertainment for each 7 days.

Equipment, designed in coordination with the Surgeon General of the Army, will enable bedridden listeners to select four separate types of programs continuously from special listening devices, ranging from "hushatone" receivers that lie flat against pillows, to familiar dial tone apparatus. These installations are now underway.

Five Leave WVTM

FIVE HIGH point men left WVTM Manila and the Army last week. S/Sgts. Ray Carroll, Merle Sinders and Sgt. Jerry Kaufherr are vet-erans of AFRS, all three having served at AFRS stations of the "Jungle Network" in New Guinea. Sgt. Carroll was formerly an-nouncer with WIP Philadelphia and WHOP Hopkinsville, Ky. Sgt. Sinders was WVTM's chief engi-neer. Sgt. Kaufherr was an-nouncer with WGN Chicago and KBUR Burlington, Ia.

Other two released are Sgt. James G. Hughes, former General Electric Co. employe; and Technician Stewart C. Parsons, engi neer of WMBH Joplin, Mo. and KTUL Tulsa. All have had ove: 20 months overseas.

Col. Brisson Released LT. COL. FREDERICK BRISSON head of the Army Air Forces Office of Radio Production. has been released from service after four years with the AAF. He has also been serving on the staff of General of the Army H. H. Arnold at head. quarters, Washington, following a tour of duty in ETO. Col. Brisson was recently decorated with the Legion of Merit for outstanding service with the AAF. He returns soon to his home in Beverly Hills, Cal., to resume activities in the motion picture industry.

Comdr. Smith Returns

COMDR. C. ALPHONSO SMITCI assistant information director at FCC in 1937-38, has returned to States on temporary duty at Navy Dept. after five years active duty in West Indies and South, Pacific. He expects shortly to be placed on inactive list. Comdr. Smith's last foreign assignment was as commanding officer of U.S. Naval Advance Base, Fiji.

Bronze Star to Fogel

LT. COL. IRVING FOGEL, recently released from radio branch, Information and Education Division Allied Forces Headquarters and Headquarters Mediterranean Theatre, and has been awarded the Bronze Star for meritorious achievement in connection with military operations. Col. Fogel is co-owner of Technical Research of America, firm specializing in transcriptions and record playing equipment in United States and Europe.

Gamble Is Honored TED R. GAMBLE, national director of War Finance Division of Treasury Dept., has been awarded The Poor Richard Club's Gold Medal of Achtevement for 1945, according to Roger W. Clipp, presi-dent of the club and WFIL Philadei-phia.

WKMO Is Winner In CBS Promotion KTSA and WREC Runnersup In Awards to Affiliates

WINNERS of CBS \$25,000 affiliate station promotion contest which began Sept. 16 and ended Nov. 17 were announced last week by Thomas D. Connolly, director of CBS program promotion. WKMO Kokomo, Ind., was awarded \$10,-000 for the best all-round promotion. For second best, KTSA San Antonio received \$5,000. WREC Memphis got \$2,000 for third.

> Other winners each of which received \$1,000 were: WTAG Worcester, best use of guest-critic recordings; WHUB Cookeville, Tenn., best use of star recordings; KTUC Tucson, hest use of local announcements: WDNC Durham, N. C., best use of newspaper advertising; WJR Detroit, best use of posters; WGAR Cleveland, best use of carcards; WWL New Orleans, best use of billboards, and WREC Memphis, best use of movie trailers

Special Citations

Special commendations, without cash awards, in the all-round classification were voted to WGAR and WWL, both of which won cash prizes in other categories.

Contest judges were Robert Collins, N. W. Ayer & Son, chairman; Linnea Nelson, J. Walter Thompson Co., vice chairman; Frank Silvernail, BBDO; Carlos A. Franco, Young & Rubicam; C. T. Ayres, Ruthrauff & Ryan; Robert Buckley, Dancer, Fitzgerald & Sample; William Dekker, McCann-Erickson; John Hymes, Biow Co.; Leonard T. Bush, Compton Adv., and Francis Barton, Benton & Bowles.

Richards Is Chairman FLETCHER D. RICHARDS, president of Campbell-Ewald Agency, New York, has been named chairman of the Advertising Agencies Division in the \$4,000,000 Memorial Cancer Center Fund Campaign. The Center is to provide an integrated "university" for cancer teaching and research on an in-ternational level. Mr. Richards' first task is to organize soliciting of funds from members of the advertising profession.

Back at KFRC

PARKER GAYMAN, released from the Army, has rejoined the announcing staff of KFRC San Francisco.

Humburg Is Father

ARMAND HUMBURG, technician of KFRC San Francisco, is father of a girl.

Acme Places

ACME BREWING Co., San Francisco. has started sponsorship of Darrell Don-nell's quarter-hour thrice-weekly news-casts on KFRC San Francisco. Contract is for 52 weeks. Agency is Brisacher, Van Norden & Staff, San Francisco.

Open Agency

JOHN H. HOEFER & Co., new adver-tising agency with John H. Hoefer and James W. Dieterich Jr. as principals, will Open in San Francisco Jan. 26 with offices at 303 Sutter St.

SOME of the approximately 3,000 gifts distributed last Saturday to about 1,000 dependent children, orphans and wards at a children's party given by Zella Drake Harper and WIBG Philadelphia are pictured above in WIRG's colorfully decorated show-window studio. Listeners to Zella Drake Harper's WIBG programs contributed the gifts. Movies, a stage show, and Christmas carols were part of the annual party.

Publisher's WSRR Ownership Given Official FCC Approval

OWNERSHIP of the only station in a city by the community's only newspaper does not necessarily constitute concentration of control of news disseminating media, the FCC held, in effect, last week by WSRR Stamford, Conn., by Ste-phen Rich Rintoul to Western Connecticut Broadcasting Co. Price was \$161.000.

The case aroused widespread interest in both the radio and newspaper fields, in that the Commission's decision was expected to set a precedent for similar future cases [BROADCASTING, Oct. 15]. Kingsley A. Gillespie, 14% owner and publisher of the Stamford Advocate, is 51% owner of WSRR. The Commission's vote was 6-1, Commissioner C. J. Durr dissenting. The Gillespie family owns the Advocate.

During hearings on the proposed assignment in early October, Mr. Gillespie testified that eventually he would resign as business manager of the newspaper to devote fulltime to the station. He told the FCC that the newspaper and station would be operated as separate and competitive entities, that the station would not depend on the newspaper for local news coverage and that advertisers would not be sold space and time in combination.

Action of the Commission majority bore out the philosophy of FCC Chairman Paul A. Porter, expressed in October before the House Appropriations subcommittee [BROADCASTING, Dec. 3], when he said: "It seems to me . . . when a radio station in a community, say of 25,000 or less, has to split the advertising revenue between the independent newspaper and independent radio station, you have a very mediocre radio station in that field."

Population of Stamford is larger than the 25,000 or less community. Figures in 1940 placed it at 61,215 and of the retail trading zone at 112,000. Mr. Gillespie presented data showing, however, that outside newspapers had a larger circulation in Stamford than the Advocate and that New York stations have wide audiences in Stamford.

Berk Is Appointed VP By Foote, Cone, Belding COL. HARRY A. BERK, on terminal leave from the Army and formerly assistant to the chief of the redistribution division of the WPB and president of Harry A. Berk Inc., New York, advertising and public relations firm which will be dissolved early next year, has been appointed vice president in charge of the new international division of Foote, Cone & Belding.

Plans for entry of agency into international advertising field were announced last week. First overseas office will be opened in London, with all European operations directed from there. Col. Berk will make his headquarters in the agency's New York office, travelling frequently between offices in this country and overseas.

BUFFALO WEATHER Net Stations Broadcast —Continuous Reports—

NETWORK affiliated stations in Buffalo met the emergency situation brought on there by a record 60-inch snowfall from Dec. 14 to Dec. 18 by broadcasting continuous weather reports, news, cancellations of organization meetings, storm warnings, and other information throughout the four days. Stations broadcasting the public service features were WGR (ABC), WKBW (CBS), WBEN (NBC) and WEBR (Mutual).

WBEN reported that more than 2,000 individual storm items, including announcements appealing for snow shovelers and milk deliveries, were broadcast on its station, and over 3,000 telephone calls concerning questions about school openings, bus and trolley service and work schedules were answered by station's personnel.

WEBR's chief engineer John Clark remained at the station all night on Dec. 15 to be on hand for the opening of the station next morning, and Tony Fink, night news editor, broadcast intermittent storm bulletins for a period of 17 continuous hours. John Boothby, production manager, wrote scripts for special programs and presented them on station when participants on regular programs were unable to reach studio.

Committee Asks 20% Commercial Limit In News, Participation, Variety Series

REVISIONS in the NAB Standards of Practice concerning commercial copy were drafted Dec. 17-18 at the Palmer House, Chicago, by the NAB Code Committee.

Using the theme "better results with less copy," the eight members of the committee, with Herbert Hollister, KANS Wichita as chairman, proposed that commercial copy be reduced on participating, news, and variety shows to within 20% of total air time.

More Effective

Five-minute news programs, the committee recommended, should not contain more than one minute of commercial copy.

"By improving the writing of commercial copy, and by judicious use of less commercial time on the air, sponsors will contribute greatly to radio entertainment and do a more effective selling job," Mr. Hollister told the committee.

The present nighttime copy requirements adopted by NAB should apply to daytime programming as well, the committee felt. Its recommendations will be passed on to the NAB Board of Directors for approval before being submitted for inclusion in the revised code which will be adopted at the NAB

And the "CLEVELAND CLAMBAKE" is just one of the fine WJW programs that HAS the listener interest it deserves. Mornings and afternoons throughout the week... Monday thru Friday more people listen to WJW than any other regional station. And ... WJW delivers more daytime dialers per dollar in Cleveland than any other station.

convention to be held next fall. Date for the convention has not been set.

Attending the conference were Mr. Hollister; Edgar L. Bill, WMBD Peoria; Merle S. Jones, WOL Washington; Edward Yokum, KGHL Billings, Mont.; Jan Schimek, CBS; William S. Hedges, NBC; Willard D. Egolf, NAB special counsel, and Edward M. Kirby, NAB public relations counsel.

Strike Is Set Jan. 3 At Western Electric Sympathy Support of Regional New York Walkout Feared

STRIKE of 16,700 employes of 21 Western Electric plants in Northern New Jersey and New York, source of equipment for the vital Bell Telephone System, has been set for Jan. 3 by the executive board of the Western Electric Employes Assn.

Decision to strike came last Tuesday after the union had rejected a renewed company offer to raise wages 15%. The union demands a 30% wage rise.

As his own union polished its armor in preparation for action, Frank J. Fitzsimmons, president of WEEA, sought reinforcement. To 47 locals of the National Federation of Telephone Workers, parent body of WEEA, he sent telegrams requesting support.

Sympathy Strikes Feared

Possibility that its support might come in the form of sympathy strikes posed a threat to major elements of the communications industry.

No official company statement was made after the strike was called. Company sources, however, indicated that Western Electric had felt its counter-offer was generous and would await developments.

In support of its counter-offer of 15% wage increases, the company pointed out that such a raise would place wages at a level 57% above those of January, 1941, and that weekly take-home pay would average 10% above wartime levels.

White House Show

S P E C I A L quarter-hour CBS broadcast Jan. 7, 3:15-3:30 p.m., will feature Mrs. Harry S. Truman from the White House, when she is joined by Mrs. Franklin D. Roosevelt, Actress Cornelia Otis Skinner and Screen Star Elizabeth Taylor in a salute to all women aiding in annual March of Dimes campaign. Mrs. Truman will be presiding at a tea for chairmen of the women's division of National Foundation for Infantile Paralysis.

Rejoins KPO

CAPT. HAL WOLF, released from Marine Corps, has rejoined the announcing staff of KPO San Francisco.

TOKYO MOSE

TOKYO MOSE, otherwise Sgt. Hy Averback, former assistant production manager of KMPC Hollywood, plays records used by Tokyo Rose and broadcasts on facilities she formerly used. Like Rose, Mose aims shows at GI's but sells recruiting, the Army's education program and VD prevention to troops in Japan and Kofea. He is heard 2-3 p. m. Monday through Saturday on WVTR Tokyo and the Is-station Armed Forces Radio Network for which WVTR is key.

Rehearing Is Granted Bamberger TV Request REHEARING was granted last Wednesday by the D. C. Board of Zoning Adjustment on the appeal of Bamberger Broadcasting Service, New York; from a board ruling last October that it could not build a television tower over 200 feet high on a proposed transmitter site in the nation's capital.

Rehearing will be held Jan. 16.

ABC Bowl Pickups

FOUR pre-game and one post-game broadcast will be included in ABC's coverage of the New Year's Day Sugar Bowl football game in New Orleans. Shows surrounding the game are: Dec. 27 10:30 p.m., Harry Wismer will introduce sports personalities; Dec. 28 10:30 p.m., Joe Hasel, from New York, will devote Your American Sports Page to game; Dec. 30 11:15 p.m., Mr. Wismer will broadcast another personality show; Dec. 31 10 p.m., Mr. Wismer will be mic. at part of New Orleans mid-winter Sports Assn. dinner. At 9:45 p.m., Jan. 1, after the game, Mr. Wismer will broadcast presentation of trophies to outstanding players. Broadcast of the game between Oklahoma A. & M. and St. Mary's of California, will begin at 2:45 p.m. It is one of the Gillette Cavalcade of Sports.

Page 72 • December 24, 1945
Joske Year Long Test Ending; Continued Radio Use Foreseen

JOSKE'S, nationally known San Antonio department store, concludes its year-long test of radio's power to sell goods for retailers on Dec. 31, winding up a scientific broadcast advertising campaign conducted at suggestion of the NAB.

Though the store has not divulged 1946 plans, it is believed the advertising budget will provide continued use of the broadcast medium on a substantial basis.

Actual results of the test await a report from Ernst & Ernst, auditors, who will complete examination of the store's records when its fiscal year closes Jan. 31. Already the firm has examined records for the first nine months of the year.

When audited statistics are available they will be analyzed to reveal comparative sales in 1945 and 1944, along with advertising breakdowns for the two years. Several months will be required to complete clinic reports, which will be issued in sections.

Consumer Survey

Year end consumer survey will also be made, similar to a study made when the test got under way last January. This survey will show any possible changes in consumer attitudes as a result of scientific use of the medium. Key personnel of the store will be surveyed in January to determine their attitude.

During the year Joske's store used over 30 quarter-hours per week along with five five-minute periods and announcements. This schedule was expanded in November to include over a dozen more quarter-hours as well as a halfhour program.

Original clinic idea was conceived by Lewis H. Avery, former NAB Director of Broadcast Advertising and now owner of the representative firm of Lewis H. Avery Inc. Representing NAB in the experiment since Mr. Avery opened his firm has been Frank E. Pellegrin, who returned to the NAB Broadcast Advertising Dept. as director after Army service.

Mr. Pellegrin spent the week of Dec. 10 in San Antonio observing results of the test. He is now preparing a report to be submitted to the NAB Board of Directors in Los Angeles Jan. 3-4 and to district meetings during the winter and spring.

Out of the 12-month experiment will come a large fund of information on the use of radio by retailers. Results of various forms of radio rendition will be provided as well as conclusions on effective time of day, type of audience, power of sales and institutional copy, etc.

A subcommittee of the Sales Managers Executive Committee is

BROADCASTING • Telecasting

advising the NAB department and aiding in preparation of reports. It consists of Cecil Beaver, WOAI San Antonio, chairman; Walter Johnson, WTIC Hartford; Arthur Hull Hayes, WABC New York; Mr. Avery, This group will work with a subcommittee of leading retailers

Million Receivers In '46 Is G. E. Goal 25% FM Is Production Goal Set by Dr. W. R. G. Baker

A MILLION RADIO receiving sets, at least 25% of them FM, is the production goal which General Electric Co. would like to reach in 1946, Dr. W. R. G. Baker, vice president in charge of electronics operations, said Thursday.

To reach it, the company would have to run the distance like a sprinter. Dr. Baker thinks the charley-horses of reconversion befuddlement may bring the sprinter down short of the tape.

Dr. Baker's uncertain outlook for 1946 was characteristic of the general tone of reports delivered by GE executives, including President Charles E. Wilson, at a press conference marked by management's references to the reconversion delays already encountered and those which may be reasonably expected for next year.

By the end of 1945, GE will have shipped about 30,000 radio receivers, all of them table models. Present production is about 1,200 per day. In its early reconversion plans, the company had expected to be producing five times that many units by mid-December. Reason for the slow production: Labor strife, government pricing policies and retooling problems have delayed production all along the line.

By comparison with the production which the company had rosily envisioned at war's end, current and likely future production figures look gloomy, Dr. Baker said.

WGHF Starts Soon

FACSIMILE transmissions on a daily basis will begin in about 30 days on WGHF, new FM-facsimile station operated by Finch Telecommunications [BROADCASTING, Nov. 19]. Feature of the new station is a skyrocket-type antenna [BROAD-CASTING, Nov. 26]. Capt. W. G. H. Finch, president, said facsimile will be programmed daily at the close of sound broadcasts.

Record Review

RESUMES of activities in phonograph record industry, guest appearances of top disc makers, top 10 records of week. new releases and behind-the-scenes interviews with music-makers and publishers are featured on "Disc Digest," new Sunday afternoon show by Robert Q. Lewis on WHN New York.

KOW Hearing

(Continued from page 16) to spend around \$300,000 a year for programming and program personnel at KQW as compared with an estimated \$150,000 to \$160,000 the station now spends.

Earlier, William B. Lodge, CBS director of general engineering, pointed out that Columbia is the only one of the four major networks that has no owned station in San Francisco.

An exhibit was introduced by the FCC showing that American owns four stations; NBC six, and CBS seven plus 45% of WAPI Birmingham. CBS stockholders also own 88% of WCAU Philadelphia. It was pointed out that the network has no voice in the operation of WAPI, and when asked whether he had control over WCAU, Mr. Kesten reolied: "Unqualifiedly, no."

After a discussion of the comparative number of stations owned by the major nets, Mr. Kesten raised the question of whether the Commission "has the responsibility" to equalize networks' station ownership. Is it necessary, he countered, "to bring the weakest up to the strongest, or adversely, or drag down the strongest to the level of the weakest? The number of stations owned by a network is a measure of the competitive organization . . ., and the end product of competition is better programming."

Foresees Radical Changes

When Commissioner Denny cited FCC rules relating to network ownership of stations, Mr. Kesten said there probably would be enough radical changes in radio in the next decade to make it necessary for FCC to review many past considerations.

Mr. Stanton declared that CBSowned stations operate "pretty much as individual units," with broad policies being determined in New York in meetings with the station managers. He praised the public service and programming record of CBS stations, and lauded their "extra-curricular activities" in public service.

Ralph R. Brunton, president of Pacific Agricultural Foundation Limited, licensee of KQW, said the present owners had been in radio for 21 years and wanted to retire. He said this applied particularly to himself, since he suffered a "fairly bad heart attack" four years ago.

If FCC doesn't approve the proposed sale to CBS, he explained, another purchaser would be sought. He said KQW now originates "very few" programs at San Jose. He considers the station, which the Bruntons bought in 1934, as serving the entire Bay Area rather than San Jose alone, he added.

Julius Brauner, CBS general attorney, appeared for the network, and George B. Porter for the transferors. Harry M. Plotkin, FCC assistant general counsel in charge of litigation, represented the Commission.

ST.LOUIS 630KC. 5000 Watts Full Time American Broadcasting Co. Represented by John BLAIR & CO.

Page 74 • December 24, 1945

NAB Meeting (Continued from page 20)

tions, 42 active FM stations, 2 networks, 2 television stations, 171 associates (applicants for licenses, transcription firms, equipment manufacturers, representatives and similar groups).

Important on the agenda is the report of the Employe-Employer Relations Committee and the new NAB Employe-Employer Relations Dept. A \$60,000 budget for the department was approved by the board earlier in the year and pattern for the operation was drawn up Dec. 8 at a meeting of the committee in Washington. Committee chairman is John Elmer, WCBM Baltimore.

The department will be functioning by the time the board meets. President Miller and Mr. Willard will start operation by setting up a fact-gathering unit. Need for complete statistics on labor and production, along with other important reference material. to augment service of the Labor Dept. has been recognized for some time. With funds available, the work of developing a source of information can proceed pending selection of top personnel. A leading specialist in the labor relations field will be sought for the No. 1 department post but prospect for selection of such a person before the board meeting was not bright though one or two staff members at the No. 2 level may be on the job by that time.

Of significance is the fact that broadcasters will be able to offer a united front in its labor relations. Prospect of an unsettled national labor situation emphasizes the need for a coordinated approach.

Industrywide cohesion in coping with the music situation is closely related to the new department, though the Industry Music Committee named by President Miller covers all affected groups, whether NAB member or non-member.

Changes Proposed

Proposals to revise the NAB Standards of Practice, adopted at the Aug. 6-7 board meeting, are to be studied. Both the Code Committee (see story on page 72) and the Sales Managers Executive Committee h a v e recommended changes in the standards. These changes would cover commercial copy on five-minute newscasts as well as participating and sunrise programs. Hitchhiker and cowcatcher plugs have been discussed at meetings of both committees and will come before the board.

Proposal to set up within the NAB an agency recognition bureau will be considered. The subject was discussed by a subcommittee in Washington Dec. 18.

Plans to resume annual NAB conventions will be taken up, with prospective plans for an autumn meeting. (See story on page 85).

President Miller will submit a report on the Capitol Hill situation, covering prospects for passage of

CORNER CONFAB participants are (1 to r) Dee Mower, Mutual salesman; Joe McGillvra, host; Russ Tolg, BBDO timebuyer; Gene Fromherz, Dancer-Fitzgerald-Sample timebuyer, at cocktail party held in Chicago at Tavern Club Dec. 14 by Joseph H. McGillvra Co., station representative.

the Lea Bill to outlaw labor racketeering by the AFM along with other bills of interest.

New FM Dept. progress is to be reviewed, based on a report to be submitted following a meeting of the FM Executive Committee at the Palmer House, Chicago, Dec 28.

Mr. Kirby, as public relations counsel to the association, is expected to recommend broadening of the department at headquarters, along with similar branching out in New York. Opening of a Hollywood liaison office is proposed to give West Coast members a closer association contact. Better facilities in New York are desired.

Extension of farm broadcast activity will be on the agenda, following the Dec. 4-5 meeting of the Agricultural Directors Committee. This group recommended quick action on a program designed to raise the level of farm programming and bring into closer association agencies, farmers, broadcasters and Government. Naming of an NAB agricultural director was proposed.

Hugh Feltis, president of BMB, plans to report on progress of the joint agency to provide figures on broadcast coverage.

A special committee on program awards will report on the plan to set up an Academy of Radio Arts & Sciences. Committee members are William E. Ryan, KFI Los Angeles, chairman; Harry R. Spence, KXRO Aberdeen; Hugh B. Terry, KLZ Denver; William B. Smullen, KIEM Eureka, Cal.

Original project was proposed by the Lee-Losh publicity firm in Los Angeles, which operates the Oscar project for the motion picture industry. The radio proposal was described as "bewildering" when discussed by the board in October but some portions of the idea were deemed worthy of study.

The board will go into a proposal by western mayors that broadcasters assist in providing housing for veterans. Other media and organizations will be asked to assist veterans.

The Program Managers Executive Committee will have in shape a proposal to set up a new Program Dept. with a budget of perhaps \$40,000. Format was considered by the committee at a meeting held Dec. 10-11 in New York. The project meets an oft-heard demand that the association addimembers in program operations.

The board will hear a review of broadened service now being given by the Dept. of Broadcast Advertising, headed by Mr. Pellegrin. J. Allen Brown, former general manager of WFOY St. Augustine, Fla., took over Dec. 1 as assistant to Mr. Pellegrin in charge of small station activities. He is conducting a survey of Small Market Stations Committee activities as well as pay of salesmen. Hugh M. Higgins joined the department Dec. 10 as an assistant. He is in charge of promotion. Mr. Pellegrin will hold meetings of small market stations during the NAB district sessions, along with meetings of sales managers. He will report on the Joske department store clinic in San Antonio, scheduled to wind up Dec. 31. He spent the week of Dec. 10 in San Antonio going over the clinic with store and station executives.

Tax Case Reports

Winding up the board agenda are reports covering the New Mexico tax litigation over a gross sales tax which the State claims can be applied to stations by classifying them as intrastate operations Hearing on merits of the case is slated in late January by the U.S. District Court for the District of New Mexico. Meanwhile the court is considering its jurisdiction to hear the case. Status of network membership will be taken up during consideration of a possible amendment to the by-laws.

Directors will be elected by the eight even-numbered districts during the district sessions. These districts, with present directors, are: 2d District (N.Y., N.J.), Kolin Hager, WGY Schenectady; 4th District (D.C., Va., W. Va., N.C., S.C.), Campbell Arnoux, WTAN Norfolk; 6th District (Ark., La., Miss., Tenn.), Hoyt B. Wooten, WREC Memphis; 8th District (Ind., Mich.), John E. Fetzer, WKZO Kalamazoo; 10th District (Ia., Mo., Neb.), John J. Gillin Jr., WOW Omaha; 12th District (Kan., Okla.), William B. Way, KVOO Tulsa; 14th District (Col., Utah, Ida., Wyo., Mont., S.D.), Hugh B. Terry, KLZ Denver; 16th District (Ariz., So. Cal., N.M.), William B. Ryan, KFI Los Angeles.

Raibourn Denies Anti-Trust Charges

TV Retarded by U. S. Movie Interests, Suit Alleges

DENIAL of charges by the Government that U. S. motion picture interests had conspired to retard development of large-screen television was made in New York late last week by Paul Raibourn, president of Television Productions Inc. and head of television activities for Paramount Pictures Inc.

"On the other hand, Arthur Levey, president of Scophony Corp. of America was not "unhappy" over the suit filed Tuesday in New York Federal Court by the Dept. of Justice naming Paramount, Television Productions, Scophony Corp., Scophony Ltd. of London, General Precision Equipment Co., its president, Earl G. Hines, and Mr. Raibourn.

The civil action seeks to: (1) break up the alleged conspiracy, (2) free patents and licenses assertedly long frozen by the monopolistic cartel.

The United States Government charged that Scophony Ltd. obtained between 1937 and 1939, basic patents on the "Supersonic" and "Skiatron" systems of television. These systems, it was alleged, operate with light sources, not unlike those used in motion picture projection, making possible the projection of televised images on screens as large as those in movie theaters.

Enlarged Through Mirrors

In other systems, notably the most popular one which used the cathode ray tube, the image may be enlarged only through use of mirrors, the complaint alleged. Loss of brilliance inherent in optical magnification has retarded commercial development of largescreen television, the complaint stated.

In 1942, the complaint charged, Television Productions, General Precision, and Scophony Ltd. formed Scophony Corp. of America, whose stock the three corporations own or control, to hold American rights to Scophony Ltd. patents and inventions.

The defendants agreed, it was alleged, to divide the world by hemispheres for commerce in television equipment. The eastern hemisphere was Scophony Ltd.'s bailiwick, the western hemisphere, Television Productions' and General Precision's.

The complaint charged that to date Television Productions and General Precision have failed to make a serious effort to exploit Scophony products and have prevented Scophony Corp. of America from granting licenses under these patents to their competitors in the motion picture and electronics fields.

Other interests, unidentified in the suit, were said to be ready,

BROADCASTING • Telecasting

JUSTICE Dept., in suit filed last week in New York Federal Court, charged an international cartel dominated by U.S. motion picture interests had conspired to retard development of large-screen television. Among defendants, Scophony Corp., Paramount Pictures, Television Productions, General Precision Equipment Corp. Paul Raibourn of Television Productions was "amazed" that his firm hadn't been questioned about Scophony Ltd. Skiatron principle. Arthur Levey, Scophony president, welcomed court action.

willing and able to develop and exploit the Scophony patents and inventions in this hemisphere on terms favorable to the Scophony Corp. of America. Mr. Levey, president of SCA, in a news conference after the filing of the suit, identified these "other interests" as "prominent financial concerns," two of which he said had offered to ante up \$4,500,000 to exploit Scophony patents, but had withdrawn from the pot upon learning of the strings attached to SCA by Television Productions and General Precision.

Effect Charged

Effect of the conspiracy alleged in the suit was to: (1) postpone development in this country "of an important advance in the television art," and (2) delay the "opening of a new field of public entertainment and education." according to Wendell Berge, assistant attorney general in charge of the anti-trust division of the Department of Justice.

To Mr. Levey, the suit came as

NEGOTIATIONS were in progress

last week for employment of a

"third party" to prepare data from

the FCC's confidential station finan-

cial files for use in the clear chan-

Louis G. Caldwell, counsel for

To Prepare FCC File Data for Hearings

the task.

no surprise. He had known, he said, that an investigation by the government had been underway for several months.

Although refusing to admit flatly that he welcomed the suit, he said its initiation certainly did not make him unhappy.

"We see in the suit a chance for us to go ahead and improve our equipment in America," he said. Break-up of the cartel, whose dominant movie interests have restrained his company from exploiting its inventions, would, he said. come as an agreeable relief.

Mr. Raibourn first heard of the government's action, he said, when he read of it. At week's end, Mr. Raibourn, still reportedly unserved by the government of notice of the suit, said he was "amazed to learn from the press that we are charged with hindering the dedevelopment of television because of a small interest in . . . Scophony."

Wartime developments of radar, electronics and television, he said, may have made obsolete the original supersonic ideas of Scophony. "The large sums of money spent by governments during the war on the Scophony Skiatron principle have so far failed to produce a successful method of applying it to television," he added.

"Television scientists would have laughed at us had we at any time claimed Scophony to have the possibilities indicated for it in the newspaper publicity in the last few days."

Mr. Raibourn said it was "amazing" that no representative of the Dept. of Justice had "seen fit to discuss with me the question of Scophony's possibilities or our activities in connection therewith."

Mr. Caldwell had asked that the

Commission prepare exhibits and

make them available to all parties

before the hearings, explaining that the clear channel hearing order sets forth several issues which

depend in large part upon economic

considerations for determination.

The Commission replied that cer-

tain data already are available in

State Dept. Requests Information Fund

\$8,500,000 Sought for Foreign Radio Operation

By BILL BAILEY

STATE DEPT. has requested \$44,500,000 of Congress for the 1947 fiscal year to carry out a program of international information, it was learned last week as plans for creation of the Office of International Information & Cultural Affairs were made public. The program would be on a 10-year basis. Of the \$44,500,000 appro-

priation, \$8,500,000 would be used

STATE DEPT. requests \$44,500,-000 for new Office of International Information & Cultural Affairs, including \$8,500,000 for radio. Rep. Bloom (D-N. Y.), House Foreign Affairs Committee, chairman, will press his bill (HR-4982) authorizing State Dept. to purchase or rent necessary broadcasting facilities. .

for broadcasting, \$17,000,000 for Latin American relations, \$13,000,-000 for information and \$6,000,000 for other purposes.

Bloom to Seek Action

Meanwhile Rep. Sol. Bloom (D-N. Y.), chairman of the House Foreign Affairs Committee, will press for Congressional action on his bill (HR-4982) authorizing the State Dept. virtually to go into the radio, newspaper and motion picture business.

To carry out its plans for spreading the gospel of America to the four corners of the earth [BROAD-CASTING, Dec. 17], State Dept. would be authorized, under the Bloom Bill, to:

(1) Provide for the preparation and dissemination abroad of information about the U.S. through press, publications, radio, motion pictures and other information media, and through information centers supervised by U. S. missions and consulates abroad.

(2) Rent, utilize, or lease and operate existing facilities for preparation or dissemination of information, and to purchase, rent, construct, improve, maintain and operate facilities for radio transmission and reception, including the leasing of real property both within and without the continental limits of the U.S. for periods not to exceed 10 years.

State Dept. would be given virtual carte blanche to employ certain personnel without Civil Service approval, purchase any equipment necessary in its program and otherwise promote its campaign.

A staff of some 2,000 will be needed, with about 400 assigned to duties abroad, it was learned. This compares with the 13,000 employed by both Office of War Information and Office of Inter-American Affairs before those agencies were

Mr. Ogilvie

abolished in September by Executive Order.

Replacing the Interim International Information Service, which was set up by President Truman when he abolished OWI and OIAA, the Office of International Information & Cultural Affairs will be headed by William T. Stone, now director of State Dept.'s Office of Public Affairs. John E. Peurifoy has been named deputy director.

The new organization becomes effective Jan. 1. Ferdinand Kuhn, who has been director of IIIS, will return to private life when that interim organization expires Dec. 31.

As now planned the new agency will be composed of five functional divisions and five area divisions. It will be responsible directly to William B. Benton, Assistant Secretary of State.

Ogilvie Heads Division

Heading the Radio Division will be John W. G. Ogilvie, former radio director of OIAA. Col. J. Noel Macy, head of Westchester Broadcasting Co., licensee of WFAS White Plains, N. Y., and newspaper publisher, will be director of press and publicity. Col. Macy has been on duty in the War Dept. Bureau of Public Relations. He was the first executive officer of the Women's Army Auxiliary Corps (later the WAC) when it was organized.

John Begg will head the motion pictures functional division; Herschell Brickell, exchanged persons, and Richard Heindel will be in charge of libraries and institutions.

Area division chiefs will be: European operations, Eric Bellquist; Far Eastern, George Taylor; American republics, William L. Schurz; occupied countries, Henry P. Leverich; Near Eastern and African, to be named.

Three assistants to Mr. Stone, in charge of radio, press and motion pictures, also are yet to be appointed.

Mr. Benton has stressed that the State Dept. would supplement, rather than replace, existing radio, press and motion picture services. He met Dec. 21 with the seven licensees of the nation's 36 international shortwave outlets to discuss future international broadcasting, but no decision was reached. It was indicated, however, that the licensees would not be averse to continuing the present plan whereby the State Dept. purchases all time outright and programs the stations.

The Bloom Bill would provide Congressional authority for such operations. and. the. appropriations would make the money available.

Philco

(Continued from page 20)

film. Sixty percent of programs would be commercial.

Proposed weekly programming would include 55% adult and 11% children's entertainment; 15% educational, most of which would be produced in cooperation with government departments and agencies; 13% news; 3% religious; 3% public service.

"In order to provide the best television programming service for the Washington audience, certain of the programs in this proposed schedule will be brought by relay from New York and Philadelphia," the application asserts, adding that Washington originations of interest in New York and Philadelphia may be relayed to those points. "For instance, Know Your Cit, remote tours of Washington, programs produced by governmental bureaus, Supper at the Press Club -all are conceivably just as interesting to the television audiences in other cities . . .

Spot News Events

Remote spot-news pickups would include such events as Presidential messages, arrival of important personages in Washington, debate or the vote on important legislation in Congress; Congressional hearings; press conferences.

Specified programs include shows produced with the aid of the Dept. of Education primarily for viewing in the schools; an informal women's forum led by a homemaking au-thority; studio programs conducted by pediatricians and child psychologists; animated cartoons followed by studio shows for children; news summaries and televised previews of coming attractions; weekly visits to governmental departments and Congress; musical comedies; public exhibits of automobiles, furniture, food, etc.; audience-participation quiz programs; night club previews; aviation shows; boxing, wrestling, basketball and other sports events; televised street-corner interviews, weekly Hobby House; motion pictures telecast; Sunday religious services direct from churches.

Philco's original application was filed March 22, 1944.

CKCW Plans

CKCW Moncton, N. B., will shift assignment from 250 w on 1400 kc to 5,000 w on 1220 kc early in 1946. Studios will remain at Moncton, with new transmitter being installed at Cherryfield.

Sponsors Renew Fourteen on NBC

FOURTEEN NBC programs have been renewed by their sponsors for 52 weeks starting in late December or early January. They include:

Colgate-Palmolive-Peet Co., Jer-sey City, Can You Top This? for Palmolive Brushless and Lather Shave creams, Sat. 9:30-10 p.m. Agency is Ted Bates Inc., N. Y.

Colgate - Palmolive - Peet Co.'s Judy Canova Show for Palmolive Soap and Colgate Tooth Powder, Sat. 10-10:30 p.m. Agency is Ted Bates Inc.

Colgate - Palmolive - Peet Co.'s Colgate Sports Newsreel for Shave Cream, Fri. 10:30-11 p.m. Agency is Sherman & Marquette, N. Y.

R. J. Reynolds Tobacco Co., Winston-Salem, Grand Ole Opry for Prince Albert tobacco, Sat. 10:30-11 p.m. Agency is William Esty & Co., New York.

Westinghouse Electric Corp., Pittsburgh, Westinghouse program, Sun., 2:30-3 p.m. Agency is Mc-Cann-Erickson, N. Y.

E. I. du Pont De Nemours & Co., Wilmington, Cavalcade of Amer-ica, Mon. 8-8:30 p.m. Agency is BDO, N. Y.

National Dairy Products Corp., N. Y., Sealtest Village Store, for Sealtest Ice Cream, Thurs. 9:30-10 p.m. Agency is McKee & Albright, Philadelphia.

Standard Brands, N. Y., One Man's Family for Royal Desserts and Fleischmann's Yeast, Sun. 3:30-4 p.m. Agency is J. Walter Thompson Co., N. Y.

Standard Brands Fred Allen Show, for Tender Leaf Tea and Blue Bonnet Margarine, Sun. 8:30-9 p.m. Agency is J. Walter Thompson.

Bristol-Myers Co., N. Y., Mr. District Attorney for Ipana and "italis, Wed. 9:39-10 p.m. Agency 18 Doherty, Clifford & Shenfield, N. Y.

Bristol-Myers Eddie Cantor Show for Sal Hepatica and Trushay, Wed., 9-9:30 p.m. Agency is Young & Rubicam, N. Y.

B. T. Babbitt Inc., N. Y., Lora Lawton for Bab-O, Mon.-Fri. 10-10:15 a.m. Agency is Duane Jones Co., N. Y.

G&G Plan Board

GARFIELD & GUILD, San Francisco, has set up a planning board to supervise all of the accounts prved by southern California offices of agency. Board comprises A. Niel Herd, vice-president in charge of Los Angeles office; Richard Berggren, copy chief, Los Angeles; Sidney Garfield; Walter Guild, and David Bascom, copy chief, San Francisco.

Appeal Answered

Appeal Answered APPEAL for ald for a veteran of the Merchant Marine blinded by enemy ac-tion and hospitalized by a fire at his home in which his two children perished, was made from audience of Mutual's "Opinion Requested" broad-cast Dec. 16. Studio audience chipped in \$100. Listening audience had raised total to \$674 by Dec. 20.

STIRTON APPOINTED **BORROFF ASSISTANT** ED R. BORROFF, vice president

in charge of American Broadcasting Co. Central Division, Chicago, announced appointment of James L. Stirton as his assistant, effective Jan. 1.

Mr. Stirton, former program manager for the division, is on terminal leave from the Marines, in which he has served since July 6, 1944. From April through November, 1945, he was attached to the Third Marine Corps Division on Guam as second lieutenant.

He succeeds Merritt R. (Mac) Schoenfeld, now in the New York ABC office. He first joined NBC in 1929 as a member of the artist department, leaving in 1937 to form his own talent managing organization. He returned to NBC in 1939 to manage its Chicago artists' service, continuing until January 1942 when NBC and the Blue were divorced at which time he was appointed program manager for the ABC Central Division.

Wismer Honored

Wismer Honored HARRY WISMER, ABC sports director, has been nominated by Future Maga-zine, published by the U. S. Junior Chamber of Commerce, as one of na-tion's 10 outstanding young men under 35 years of age. Mr. Wismer will broad-cast Sugar Bowl game on New Year's Day.

Wayne Coy Is Appointed WINX General Manager

WAYNE COY, assistant to Eugene Meyer, publisher of the Washington Post, last week was appointed general manager of WINX Broadcasting Co., effective Jan. 1. He will retain his position with the Post, in addition to his station duties. Before going with the Post Mr. Coy was special assistant to President Roosevelt. Prior to that time, he was an Indiana newspaperman.

The Washington station is owned and operated by the Post, which also owns and operates W3XO, FM station in Washington. W3XO, in operation since 1938 as an experimental station, was recently purchased from Jansky & Bailey, consulting engineering firm. WINX has applied to the FCC for license to construct a commercial FM station in Washington.

Hines to WHK

JACOB HINES has been appointed in charge of continuity department of WHK Cleveland. He has been active in local music work.

Brethauer Appointed

ROBERT BRETHAUER, released from Navy and formerly assistant purchasing agent for Chicago Board of Education. has joined sales, traffic and sales serv-ice department of ABC Chicago.

Page 78 • December 24, 1945

NARBA

(Continued from page 15)

be worked out to continue NARBA on an interim basis pending the writing of a new treaty and devising adjustments to take care of Cuban requirements and any other interim business which may arise. Canada has proposed a two-year extension of NARBA from March 29, 1946. The United States had proposed a one-year extension. Cuba, however, pressed for consideration of its demands.

Formal invitations for the Feb. 4 session, supplementing the telegram sent out last Thursday to the North American nations, will go out by mail forthwith, it was learned.

The FCC, following consultation with the State Dept., designated Commissioner Jett, himself the former Commission chief engineer, to handle the preliminary conversations. It was expected Commissioner Jett will head the FCC group at the Feb. 4 sessions. Should the meeting take on treaty aspects, it was presumed FCC Chairman Paul A. Porter, as well as Commissioner Jett, would be delegates.

Cuban Proposal

The Commission announcement was supplemented with the Cuban proposal submitted Sept. 14 at the Third Inter-American Radio Conference held in Rio.

[This proposal was published in full text in BROADCASTING Oct. 8, 1945. A breakdown of the specific channels sought by Cuba, together with U.S. stations assigned to each frequency, were published in BROADCASTING Dec. 17, 1945.]

The full text of the Commission's public notice calling the Jan. 4 conference follows:

Commissioner E. K. Jett, the Chief Engineer and the General Counsel of the Commission will meet representatives of industry on Friday, January 4, 1946, to discuss matters to be considered at the forthcoming engineering conference relating to the North American Regional Broadcasting Agreement.

The only proposals which have so far been submitted by countries signatory to the North American **Regional Broadcasting Agreement** are those of Cuba, a copy of which is attached, and the proposal of the Canadian Government for an extension of the period of the agreement for two years. This notice is for the purpose of inviting the assistance of engineers and others able to give technical assistance in the consideration of the questions raised by the Cuban proposals. It is hoped that through this means the Commission's representative who may be designated to assist in formulating the viewpoint of this country at the conference will be better prepared for that responsibility.

The meeting which will be held in Room 6115 at 10:00 o'clock, Friday, January 4, will be concluded

GREATLY IMPROVED black-and-white television receivers were demonstrated by E. W. Engstrom, RCA vice-president in charge of Princeton N. J., laboratories, at Princeton. He explained points of superiority.

Lemmon Advises Government Subsidies To Help U. S. International Stations

PROBLEM of maintaining American international broadcasting at the high level of efficiency developed during the wartime years, without resorting to government ownership of U. S. shortwave stations or placing an undue financial burden on individual broadcasters, can best be solved by Government subsidies similar to those granted transoceanic airlines, Walter S. Lemmon, president of World Wide Foundation which operates five shortwave transmitters, told BROAD-CASTING last week.

His own organization, he said, would prefer a wholly free situation since it is a non-profit educational undertaking and able to get ample support for its international educational broadcasts without recourse to public funds. He pointed out, however, that commercial broadcasters who pioneered in international broadcasting field at considerable expense to themselves in the prewar days should not be asked to resume the entire cost of maintaining the accelerated program of international broadcasting from America that is necessary today.

"The profits of such companies as NBC and CBS, for example," he said, "come from their operations in standard broadcasting, which must now also support their experiments with FM and television."

Programming, Mr. Lemmon

on that day subject to call for later sessions if found necessary or advisable. In order to aid in the arrangements for the meeting and the disposition of matters to be brought up, interested persons are requested to notify Commissioner E. K. Jett of their intention to participate, by letter, on or before January 2, 1946. In this connection, information is requested as to identity of persons who will appear, by office or position, and if the appearance is in a representative capacity, the identity of the persons or firms in whose behalf they will appear. It is further desired that persons desiring to attend the meeting indicate in their responses their main points of interest.

stated, should be handled and financed by the individual station operators. "There should be the same freedom of listening, the same choice of programs offered by competing broadcasters internationally that we in the United States have at home," he said. Government control should be confined to scripts of broadcasts dealing with matters of the country's international policy which should be submitted to the State Dept.

The subsidy, he suggested, might well cover physical costs of operating and maintaining the shortwave transmitters and be figured on a basis of power as an incentive for the shortwave broadcasters to keep improving and strengthening their international signals. The subsidies would empower the Government to ask that broadcasts be beamed to parts of the world not covered by the usual station operations, Mr. Lemmon said.

PAY OF SALESMEN SURVEYED BY NA

PAYMENT of incentive commissions has been found the most effective means of compensating salesmen, judging by preliminary results of a survey being conducted by F. Allen Brown, assistant director of the NAB Dept. of Broadcast Advertising in charge of small market stations activities.

In many cases a 15% commission on collections from a salesman's accounts has been satisfactory. Main objection has been the fact that pay of salesmen sometimes is much higher than that of other key personnel.

Combined salary and commission has been effective at some stations, it was indicated. Another station prefers straight salary, with fiveweek bonus at Christmas. Sliding scales of commissions are effective at another outlet.

Tyson Returns

LT. (j.g.) IRWIN W. TYSON has returned from the Navy to O. S. Tyson & Co., New York, as account manager. Atlas Appoints

ATLAS CANNING Co., New York, has appointed Modern Merchandising Bureau to handle advertising. Radio is scheduled to be used after first of year.

U. S. PROGRAMMING ABROAD ADVOCATED

NECESSITY of continuing adequate shortwave broadcasting schedules to pump U.S. news and cultural information around the world was emphasized by William T. Stone, director of the Office of International Information and Cultural Affairs in a round-table dis-cussion over NBC Dec. 15.

- Participating with other officials of the State Dept. on "Our International Information Policy," Mr. Stone said that his office contemplated reduction of the heavy wartime shortwave schedules, but recognized the essentiality of continuing an adequate program to keep other nations informed of U.S. news.

Bell System Will Test Highway Phone Service EXTENSIVE trials of mobile radiotelephone service to make possible voice communications between vehicles on three intercity highway routes or boats on adjacent waterways and any telephone connected to the Bell System were planned last week by Bell. Highway routes are between Chicago and St. Louis via Ottawa, Peoria and Springfield, Ill.; between New York, Albany and Buffalo, and between New York and Boston.

Applications for the first transmitting and receiving stations to serve the Chicago-St. Louis route have been filed with FCC by Illinois Bell Telephone Co. Similar applications for the other routes will be made soon, the company reported.

too strongly on the advertising potentialities in the household appliances field. Housing projects, and homes built by the veterans themselves with loan help under the GI Bill of Rights will create a terrific demand for appliances of all sorts. And add these thoughts: he'll want a new radio because he's found out French and German radios are in many cases inferior to ours; he'll want a new stove because he'll be a lover of fancy foods and cooked dishes, lots of cakes, pies and cookies; and he'll want a refrigerator.

Diversion and recreation will appeal to him more strongly now. Such accounts as summer resorts, fishing rendezvous, travel agencies or places of anusement can gain much trade from the returning veteran and the veteran's family. The veteran has had little or no

FCC Asks Prompt Response by Stations To Preliminary Reports on Revenues

FCC'S ANNUAL call for analysis of station broadcast revenues for the calendar year was dispatched Dec. 20 to all licensees with the request that they be submitted "as soon as possible" after the close

opportunity for personal possession of things of value while in the Army. Everything has been GI. Accent the instinct of possession in the copy of such accounts as real estate, jewelers, and automobiles. "Own your own home," "jewelry is not only a gift, but a life-long investment," "drive your own automobile, the new 1946 models have these new features."

Cleanliness, time savers, appetizers, durability, modernity, family affection, courtesy, economy, sports, hospitality, beautifying these have appeal to the veteran. of the year. The request is for a preliminary report on station revenues, to be followed by the detailed report.

"It is considered desirable," said the FCC's covering letter, "that the Commission be informed on the question of revenue from sales of time by the broadcast industry for the year 1945 as soon as possible after the close of the year."

Sent each station were two copies of the preliminary report form of station revenues with the request that one be returned not later than Jan. 19. Stations with total revenue from sales of station time for the year of less than \$25,000 or less than an average of \$500 weekly if operated for less than a complete year were advised to fill in only the total amount of revenue.

"Since this schedule is designed

Positively! WORCESTER IS A HUGE MARKET- even larger than you think!

AND ONE OF THE MOST STABLE AND PROSPEROUS IN THE NATION

Measured in terms of population, Metropolitan Worcester numbers 522,607.* This exceeds the urban populations of such great cities as Cincinnati, Kansas City and St. Paul. It leaves behind the metropolitan populations of Rochester, Akron, Dallas, Seattle or Newark.

Now look at the buying income. In 1944 it was \$4,594 per family, or 10.3% above the national average. And Worcester is diversified with over 500 industries within its compact trading area which helps to keep pay roll peaks on an even keel the year 'round.

The Worcester Market is one no thoughtful advertiser can overlook — a market dominated by WTAG, which is acknowledged by listeners, distributors, dealers and Hoopers as Worcester's No. 1 radio station, with creative facilities and equipment to match its big coverage.

* Massachusetts State Department, Dec. 1945

Congressional Carols

IN REAL HOLIDAY spirit, six U. S. Congressmen and six members of the British Parlia ment joined voices over Mutual Dec. 20, 11:30 a.m. in a carol sing. The two groups sang two carols apiece and then joined in an across-the-ocean double sexette of "Silent Night". Congressmen include: Harry L. Towe (D-N. J.), Leslie C. Arends (R-III.), William S. Hill (R-Col.), Frank Fellows (R-Me.), Paul W. Shafer (R-Mich.), Harve Tibbott (R-Pa.).

only to give the Commission a preliminary report of the broadcast industry," the covering letter stated, "the respondents are requested not to wait for a final audit of the books before submitting this report."

Data requested include revenue from networks; nonnetwork sales to national and regional advertisers and to local advertisers, and incidental revenues, with ordinary commissions deducted.

Shomo

(Continued from page 10)

Times edition which died when the depression made luxury liners a permanent part of New York's skyline. Returning to Chicago, he was head of the *Tribune's* loop advertising office until 1981, when he moved over to the *Herald-Examiner*.

An opportunity to hit the road for McFadden Publications and see something of the Midwest caused him to sever connections with the *Examiner*. In 1937 he walked into Kelly Smith's office at WBBM and walked out with a job as salesman.

After working on CBC radio sales for Kelly Smith until 1940, he was promoted to eastern sales manager in New York for WBBM, remaining there until September 1944, when he became sales manager for the CBS owned and operated Chicago outlet.

Ernie confesses he isn't a "joiner" and belongs to no clubs, although his favorite hobby is people, with golf and squash running in close order.

He resides in Evanston with his parents and two children, Albert, 5_1 and Mary Louise, 10. He is divorced, single, satisfied.

Right now, he views the sales world through rose colored glasses, as public demand for war restricted items continues to grow. But when the economic scales shift from sellers market to buyers market Ernie offers this bit of advice to men and women considering radio sales as a career: Good public relations is long-range. And successful salesmanship depends on good public relations.

Seven Transfer, Assignment Lea Bill to Get Action **Requests Are Filed With FCC**

FRANSFERS and assignments figare in seven applications accepted lor filing last week by the FCC. Stations involved are WRLD West Point, Ga., and WDAK Columbus, Ga.; KTOK Oklahoma City; WFEA Manchester, N. H.; WSGN Birming. ham and relay station WJOT; KOIN Portland, Ore.

Reorganization of Valley Broadcasting Co., licensee of WRLD and WDAK, is proposed, with L. J. Lincan and his wife, Leila A., and his sister-in-law, Mrs. Josephine Rawls, taking over operation of WRLD, and Allen M. Woodall, Mrs. Margaret A. Pill and others taking over WDAK as Radio Columbus Inc.

Messrs. Duncan and Woodall and Mesdames Duncan, Rawls, Pill and Effie H. Allen, mother of Mrs. Duncan and Mrs. Rawls, are partners in the present Valley Broadcasting Co. Mr. and Mrs. Duncan, Mrs. Allen and Mrs. Rawls propose to sell their combined 82% interest for \$164,000 to Mr. Woodall, David E. Dunn and Howard E. Pill, three of the stockholders in Radio Columbus Inc.

Mr. and Mrs. Duncan and Mrs. Rawls would continue to do business as Valley Broadcasting Co. in operating WRLD. Mrs. Allen is retiring from the Valley Broadcasting partnership and seeks to transfer her 10% interest to Mrs. Duncan and Mrs. Rawls, while Mr. Woodall and Mrs. Pill want to sell their respective 10% and 8% interests in WRLD and increase their equity in WDAK. Mrs. Pill would receive \$2,400; Mr. Woodall \$3,000; Mrs. Allen \$1,000.

Stockholders in Radio Columbus include Mr. Woodall, Rufus M. Lackey of Birmingham, and Ernest D. Black of Macon, each of whom holds 500 shares of common and 500 of preferred stock; Mrs. Pill and H. S. Durden of Montgomery

Snow in September..

down South...

Cotton is the 16-county WSPA-Piedmont's largest money crop. Over 27,500,000 baled - pounds each year are produced in Spartanburg County alone.

respectively own 200 shares of each, and David E. Dunn of Montgomery owns 100 of each. Mr. Woodall also owns an interest in Northwest Georgia Broadcasting Co., licensee of WGAA Cedartown; Mr. Black is half owner and president of Georgia Broadcasting Co. (WBML Macon); Mr. Durden has a one-third interest in Montgomery Broadcasting Co. (WSFA Montgomery, Ala.), of which Mr. Pill is chief owner; Mr. Dunn is 8 1/3% stockholder in Montgomery Broadcasting.

WDAK operates on 1340 kc with 250 w power; WRLD, on 1490 kc with 250 w.

KTOK application involves voluntary assignment of license from O. L. Taylor to KTOK Inc., Oklahoma City, a new corporation in which Mr. Taylor holds 99.8% of stock. Robert Enoch, station manager, and Leonard H. Savage own 0.1% each. Contract provides for Mr. Taylor, who is executive general manager of KGNC KFYO KTSA KRGV, to make the assignment in return for 1,000 of the authorized shares of capital stock in KTOK Inc. and assumption by KTOK Inc. of liabilities including a \$50,000 note. Station is on 1400 kc with 250 w.

Terms of the WFEA agreement assign license of the station from H. M. Bitner to WFEA Inc., owned entirely by Mr. Bitner. No money is involved. Mr. Bitner formerly was publisher of Pittsburgh Sun Telegraph and director in Pitt Publishing Co. and owns 30% of WFBM Indianapolis. WFEA operates on 1370 kc with 5 kw power.

Under terms of the will of Victor H. Hanson, who died last March 7. application has been filed for transfer of 1,235 of 1,500 outstanding shares in Birmingham News Co., licensee of WSGN, from Ruth Lawson Hanson, executrix, and C. B. Hanson Jr. and Henry P. Johnston, executors, to themselves and James E. Chappell and Harry B. Bradley as trustees under the will. Worth of the stock is estimated at \$617,500. On 610 kc, the station operates with 5 kw local sunset and 1 kw night. Same transferors and transferees are involved in WJOT relay application.

KOIN Portland application seeks approval of the sale of the station by C. W. Myers, Josephine Hunt, Gertrude E. Myers and KOIN Inc., trustee, to Field Enterprises Inc. for approximately \$943,967 [BROAD-CASTING, Oct. 29]. Mr. Myers owns 64% of Class A stock, Mrs. Hunt 35%, and Mrs. Myers 1%. Thirtytwo employes own 411 of 1,000 shares of Class B stock. Field Enterprises, in which Marshall Field owns 100% of preferred and Class A stock and 80% of Class B. is publisher of the Chicago Sun and owner of WJJD Chicago and WSAI Cincinnati. KOIN operates on 970 kc with 5,000 w.

Soon After Mid-January

HOUSE ACTION on the Lea Bill (HR-4737) to curb James Caesar Petrillo and his American Federation of Musicians will be asked by Rep. Clarence F. Lea (D-Cal.), its author and chairman of the Interstate & Foreign Commerce Committee, immediately after the second session of the 79th Congress convenes Jan. 14, Rep. Lea said last week.

Delay of legislative drafting clerks in rewriting certain provisions of the measure, coupled with other pressing legislation prevented committee action before the holiday recess Friday. Mr. Lea said, however, he would ask his committee to report out the bill shortly after the second session opens. Congress recessed Friday until Jan. 14, before the Committee could consider the rewritten measure [BROADCAST-ING, Dec. 17].

New York Test

TIME OUT Co., New York (Time Out liquid breath sweetener), will start 60-day spot campaign on five New New York stations including WEAF WJZ WABC WOR on Feb. 1. Fifth station had not been selected last week. About five announcements are expected to be used on each station a day. Agency is Dudley Rollinson Co., New York.

Signs Full MBS

WILLIAMSON CANDY CO., Chicago, effective Jan. 13, will sponsor new mystery show, format yet unannounced, Sun. 4:30-5 p.m. on full Mutual network. Aubrey, Moore Wallace, Chicago, is agency. Firm is slated to drop present sponsorship of "Famous Jury Trials" Fri. 9-9:30 p.m. on ABC, effective Feb. 1.

Compiling Glossary

GLOSSARY of radio terms and definitions is being compiled by the NAE to clear confusion on the meaning of many words commonly used in the industry. Action was taken by Edward M. Kirby, NAB public relations counsel, after a government economist had asked for clarification of the term "spot broadcasting." Stations have been asked to send in definitions of a number of radio terms.

Comfort Mfg. on ABC

COMFORT MFG. Co., Chicago (Craig - Martin toothpaste) will sponsor special broadcast of ABC "Club Matinee" 1:30-2 p.m. (CWT), on Christmas Day. Program will be repeated to ABC West Coast and Mountain stations at 5:30 p.m. (CST). Agency is Mc-Junkin Adv., Chicago.

New J-W-T Time Buyer

FRANCES YOUNG, secretary to Alfred Crapsey, sales manager of KPO San Francisco, has joined J. Walter Thomp-son Co., San Francisco, as time buyer.

Available February first. Address R. E. Patterson, 377 East Madi-son Avenue, Springfield, Ohio.

UNO Plans Powerful Station: Shouse Proposes Cincinnati

UNITED NATIONS Organization is planning its own autonomous radio station in the U.S., answering to no government or communications organization.

Last Monday UNO authorities prepared a document on the rights and privileges of the organization within the zone of the new world peace headquarters. Included in the recommendations was a stipulation that UNO reserve the right to establish its own sending and receiving station.

Autonomous Body

According to Francis Colt de Wolf, State Dept. Telecommunications Division Chief, authorities now attending the UNO preparatory conference in London discussed possibilities of a station with State Dept. officials before leaving for London. It was recommended that the organization have both pointto-point and shortwave facilities within the headquarters zone.

Situations Wanted (Cont'd)

Ex-serviceman—27 years old, married— would like announcer's position in Los Angeles vicinity. Has had experience on network station with studio programs, turntables, network co-ops, etc. Ready to begin work after first of the year. Write James F. Tunis, 7419 Lankershim Birdd., No. Hollywood, Calif. Bivd., No. Hollywood, Calif. Miscellaneous

Gags! Comedy! Free catalog: Box 616. BROADCASTING.

. Officials recommended that the stations should not come under the jurisdiction of either the FCC 01 any communications body. Frequencies may be allocated under the Berne Bureau of Telecommunications to avoid interference. Should any duplication of frequencies or other communications difficulties arise, Mr. de Wolf presumably would be liaison between the FCC and UNO on problems concerning U. S. broadcast stations

The shortwave facilities doubtless would be for the use of UNO members who could reach the entire world simultaneously on any announcements or information for world consumption.

The FCC has received no word of the proposed station, Earl Minderman, FCC Director of Information, told BROADCASTING last week. As the UNO is without precedent, there are no rules governing such an organization's communications facilities. Under the Communications Act, no one may own and operate a station within the U.S. unless an American citizen. Comgress, however, may be asked for legislation authorizing a UNO station within the U.S.

Decision in January

Also in the document drawn up in London last week were provisions for "unimpeded and safe transit" over all its territories to ... accredited representatives of radio, press, and motion pictures.

The UNO Preparatory Commission decided to postpone at least until January when the assembly meets again, selection of a specific site for the world organization.

James D. Shouse, vice-president of the Crosley Corp., Cincinnati, in charge of broadcasting, accompanied by Mayor James Garfield Stewart and Walter Eberle, Cincinnati Chamber of Commerce president, flew to London last week to present a formal invitation to the Commission to place UNO headquarters in Cincinnati. Mr. Shouse, who suggested the move, cited proximity of the Bethany Transmitters, owned by the Government and operated by Crosley for the State Dept. He pointed out that the Bethany Transmitters are powerful enough to reach all of the United Nations.

It was understood, however, that San Francisco is being given serious consideration by the preparatory commission because it ranks third as a world communications center and has other advantages.

ATTENTION SERVICEMEN! To aid servicemen seeking radio jobs, BROADCASTING will

accept situation wanted classified ads at no charge. Thirty words maximum. Two insertions. Sign name, rank and give address.

NAB CONVENTION Meeting in Central U. S. Likely for Fall

IN NAB convention next fall in he interior of the country is the resent outlook, although the time nd place remain undetermined.

This was the word from F. M. ussell, NBC Washington viceresident and chairman of the IAB Special Convention Commitee, after canvassing prospects last veek. Officials of the Office of Delense Transportation have indiated that the peak postwar transion tation load should be over in .Ny September. The suggestion, nowever, was that if the convenion is held, it should be in the nidwest area, relatively equidisant from all points.

Mr. Russell, after conferring rith his committee colleagues, flugh Terry, general manager of KLZ Denver, and Harry Spence, IXRO Aberdeen, Wash., both memers of the NAB Board, concluded that they would shoot for latter part of September or early October. The probable sites are Chicago or Cleveland— the latter because of its municipal auditorium which could house the convention and displays.

The convention—which would be the first in two years—would have an anticipated attendance of 1500 to 1800. The previous alltime high was between 1000-1100 in 1944. But with the emergence of FM, television and other services, it is felt the attendance will reach a new all-time peak.

Petrillo

(Continued from page 15)

Mr. Petrillo has forbidden AFM members to perform on any television station until agreements have been reached. He has ordered networks and independent stations to pay standby fees or hire two staffs if they duplicate AM programs on FM stations.

So far efforts to halt the musicians' czar have been futile, although Rep. Clarence F. Lea (D-Cal.), chairman of the House Interstate & Foreign Commerce Committee, will press for action shortly after the New Year on his bill (HR-4737) to curb Petrillo's inroads in broadcasting.

Mr. Petrillo and his union in the past have expressed the philosophy that it is wrong for a station to get 'wy through the use of network and recorded music without employing live musicians locally. He has as yet been unable to control the broadcast of recordings. The AFM strike against record manufacturers demonstrated that even stopping production of new records had little effect on broadcasters, who went on using the records that had been made during the years preceding the strike.

But when it comes to networks, the situation is quite different. When a network affiliate station and the local AFM union have been

BROADCASTING • Telecasting

Chicago Radio Newsmen Open Fight to Obtain Equal Rights

CHICAGO radio news editors took their first step Dec. 18 to obtain equal privileges with newspapers by organizing the Chicago Radio News Assn. at a luncheon at the Merchandise Mart.

Instances where radio newsmen have failed to receive equal facilities in covering national events were discussed. The New York to London inaugural flight of United Airlines, with five newspapers and only one radio outlet represented, and the refusal of Navy public relations to permit wire-recorded interviews at the Adm. Halsey press conference were cited.

Ray Elected

Bill Ray, NBC news director, Chicago division, was named temporary president, empowered to name two committees of five. One committee will nominate permanent officers subject to vote, and the second will draft a constitution.

The association was formed for the sole purpose of representing radio as an industry on national news events and not as a bargaining agent between radio newsmen

unable to agree on a contract and the local has called on the national organization for assistance, the AFM has considerable power.

Usual procedure is for AFM to ask the network not to supply musical programs to the particular station. The network refuses to com-ply, pointing out that to do so would be to breach its contract with the station. The AFM then withdraws all remote musical pickups from the network, keeping them from the one station by keeping them from the entire network. On some occasions the union has gone further and withdrawn studio sustaining and even commercial broadcasts from the network as a means of exerting pressure on the individual affiliate to come to an agreement with the local union.

When previous agreements have been reached between the networks and the AFM, affiliates and non-affiliates have been known to make remarks about being "sold down the river." They have pointed out that the networks would rather increase the ante to the AFM than face the threat of several weeks without musical programs, particularly commercial musical programs.

For that, among other reasons, the networks may be expected to show no reluctance in handing this AFM problem over to the Industry Music Committee for solution. Certainly, they point out, it is an industry problem. It is unfair, they contend, to make demands upon affiliates and not upon non-network stations.

The following list of states, with the number of network stations employing musicians and those that do not, was compiled by the and management.

At the meeting were: Bob Hurleigh and Paul Brines, WGN; Everett Holles, Jim Hurlbut and Don Kelly, WBBM-CBS; Bill Ray, John Thompson and Bask et Moss, WMAQ-NBC; Connie O'Dea, WENR - ABC; Julian Bentley, WLS; Bob Ward, WJJD; Jim Dale, WIND; Roy Brubaker, WMBI; James Bormann, AP; Charles Ahrens, UP; George Gilotti and William Brons, INS.

All Chicago stations were invited to send representatives to the next meeting, to be held early in January. The group will meet weekly until constitution and bylaws are drafted, monthly thereafter.

The group recommended action to eliminate the volume of releases from publicity bureaus which, in most cases, are unacceptable for broadcast purposes. By drafting a policy outlining the needs of radio news departments, publicity men would be able to "angle" their releases with greater results, the members agreed.

Hayes to Chicago

GORDON HAYES, assistant sales manager of WTOP Washington, CBS owned and operated outlet, transfers to Chicago this week to join CBS Radio Sales western division, reporting to Wilbur Edwards, CBS Radio Sales manager in Chicago, Appointment is effective Jan. 1. Mr. Hayes has been with WTOP since April 1943 and before that was 10 years with Washington Daily News, the latter three as advertising manager.

peting applicant enter into and file with the Commission within 30 days from the date of such order a contract for the assignment of the license or construction permit, or the transfer of such competing applicant upon the same terms and conditions as stated in the original application or upon such other terms and conditions as the parties may agree upon and which new terms and conditions the massion terms and conditions the Commission shall find to be in the public interest. shall find to be in the public interest. (e) The provisions of this section shall not apply to the following cases: (1) where there is a reorganization of a corporation which holds a license or construction permit, involving no change in beneficial ownership; (2) where there is an assignment from a decedent to his executor or adminis-trator or from the executor or adminis-trator to his duly appointed successor. This section, however, shall apply to an This section, however, shall apply to an assignment or transfer from an execu-tor or administrator to heirs, trustees, or third persons; (3) where there is an assignment from an individual or individuals to a corporation owned and controlled by such individual or individuals without any change in their respective interests or from a corpora-tion to the individual stockholders controlling such corporation when there is no change in their respective interests; that does not involve any change in the test. that does not involve any change in the actual or beneficial ownership of the licensee.

I.T.&T. Income

CONSOLIDATED net income of \$5,085,104 for the first nine months of 1945 was reported last week by International Telephone and Telegraph Corp. The corporation's income for a similar period last year was \$5,743,398.

Second Station Grant To Marietta, O., in Wee

SECOND new local station was granted by FCC last week for Marietta, O., community of 14,500 of population, with approval Parkersburg Sentinel Co. application for facilities of 250 w and unlimited hours on 1340 kc. FCC previous week approved request of Marietta Broadcasting Co. for 250 w on 1490 kc in Marietta.

Parkersburg Sentinel Co., pub-lisher of Parkersburg (W. Va.) Sentinel, is affiliated with News Publishing Co., Wheeling, owner or controller of several regional newspaper firms including Evening. Journal Publishing Co., Martinsburg, which is applicant for local station on 1490 kc. Marietta Broadcasting Co. is owned by Howard L. Chernoff, managing director of West Virginia Network, and Mildred and Melva G. Chernoff.

Commission authorized new station at Pottsville, Pa., on 1360 kc with 500 w daytime for A. V. Tidmore trading as Pottsville Broadcasting Co. Mr. Tidmore for five years had been general manager of WFMD Frederick, Md.

Marietta CP Granted Chattahoochee Group AN APPLICATION for a new station was dismissed last week as the result of the death of the applicant and a grant was made to another applicant who had competed for the facility. The action resulted from the death of Virgil Evans, former owner of WSPA Spartanburg, S. C. [BROADCASTING. Oct. 15], whose application for a station in Marietta, Ga., was considered along with that of Chattahoochee Broadcasters which requested the same facilities. Chattahoochee was given the grant, to operate on 1230 kc with 250 power, provided its proposed site meets the requirements of the FCC and the Civil Aeronautics Administration.

C. E. HOOPER missed his own Christ-mas party last Wednesday, victim of the flu epidemic.

LOOKING OVER the crowd at a Christmas party given by cast of Woman in White serial in Chicago are (1 to r) William Weddell, assistant sales manager, NBC Central Division; Irna Phillips, author of the show; Herb Futran, producer; Carl Wester, head of Carl Wester Agency, which handles the Woman in White program.

Streamlined Procedure for TV **Hearings Is Proposed by FCC**

A PRE-HEARING conference which may have far-reaching effects on the handling of multiple upplications for television stations in the same locality has been called for Dec. 28 in the offices of FCC Chairman Paul A. Porter.

While the meeting will be specifically concerned with the eight applications for stations in Washington, hearings on which are to begin Jan. 21, it is regarded as practically certain that the procedure to be established in these proceedings will be adopted for all cities in which video applications exceed available frequencies.

Called by Plotkin

The conference was called by Harry Plotkin, FCC assistant genal counsel, to discuss the possibility of simplifying the hearing procedure, and particularly the stipulation by the applicants of certain incontrovertible facts. The Commission had scheduled nine days for the hearings, allowing one day for each of the nine applications originally filed. One of the applicants, the Washington Times-Herald, owned by Mrs. Eleanor Patterson, withdrew from the field last week.

Only legal counsel of the applicants for the Washington stations were invited to the conference, lending credence to the belief that the Commission is anxious to effect a real screening of testimony. Chairman Porter has exhibited interest during various hearings in speeding up procedure.

The calling of the conference follows by less than two weeks the adoption by the Commission of changes in hearing procedures to facilitate handling of the heavy schedule of cases during the first three months of 1946. It appeared evident that further simplification will be needed if the hundreds of ABC Dec. 19 presented Christmas bonus applications still to be processed checks to all employeer or more. will be needed if the hundreds of

are disposed of in reasonable time. The Washington cases are ex-

pected to set the precedent for the handling of consolidated television applications. They are the only cases to be designated for hearing and the only cases scheduled for hearing. The procedure used in these cases will doubtless apply to at least half the approximately 150 video applications in the Commission files. In nearly a dozen cities, including New York, Chicago and Philadelphia, applications exceed frequencies and will require hearings.

Applicants in Washington

Applicants for television in Washington are NBC, Bamberger Broadcasting Co., Philco Radio & Television Corp., Evening Star Broadcasting Co. (WMAL), Allen B. DuMont Labs Inc., Scripps-Howard Radio Inc., Capital Broadcasting Co. (WWDC), and Marcus Loew Booking Agency. FCC allocations provide four frequencies for the Capital.

Withdrawal of the Times-Herald application was ascribed by Mrs. Patterson in a petition filed with the FCC to pressure of her newspaper and other interests. However, it is understood that belief that the service will eventually move to the higher frequencies entered into her decision not to compete for the frequencies at this time.

At least two other applicants have withdrawn in the last few weeks, feeling that television is bound to move "upstairs." Since the withdrawal of Metropolitan Television Inc., New York, owned by two large department stores [BROADCASTING, Dec. 17], S. Filene & Sons, Boston department store, has also left the field.

WKBW, WGR Must Cancel Time Lease With Tabernacle Within Thirty Days

BUFFALO Broadcasting Corp., licensee of WKBW and WGR Buffalo, N.Y., must cancel its lease for time to Churchill Tabernacle within 30 days, or lose its licenses in 90 days, the FCC ruled Thursdav.

The Commission made final, with minor alterations, its proposed findings following four years of hearings and study [BROADCASTING, Sept. 17]. Under the ruling, licenses of both stations are extended temporarily for three months providing the licensee files with the FCC within 30 days after the decision becomes final a statement establishing that it has "full control over the operation of the stations and no further effect is being given the agreements with the Churchill Tabernacle."

Multiple Ownership Question

In addition to the contract issue, there is a question of multiple ownership. Under the duopoly regulation (Section 3.35) Buffalo Broadcasting must dispose of one

NLRB ORDERS VOTE ON AFRA AT WIBA

AN ELECTION within 60 days to determine whether employes of WIBA Madison, Wis., want to be represented for collective bargaining purposes by American Federation of Radio Artists (AFL) was ordered last Thursday by the National Labor Relations Board. Recommendations of a trial examiner. who conducted hearings July 31 in Madison, were sustained.

AFRA lost its appeal, however, to include salesmen and office employes in its unit. One salesman who does a 15-minute program daily and a continuity writer (classified as office employe) who also does a daily program were included as parttime air employes. NLRB found that WIBA, licensed to Badger Broadcasting Co., during 1944 "sold radio advertising valued at approximately \$294,000, of which approximately \$146,000 represented receipts from the sale of national advertising.'

Except for two janitors, musicians, technicians and supervisors, AFRA sought to include all employes in its unit. The NLRB held, however, that AFRA's desire to include salesmen and office employes in the same unit with announcers "clearly does not conform to the well-established bargaining pattern with respect to radio station employes."

FC&B Appointments

FC&B Appointments GEORGE SMITH, former assistant man-ager of the new products development department of Standard Brands Inc., has been appointed assistant account executive of Foote, Cone & Belding, New York, Jack Laemmar, released from Navy as lieutenant commander, has re-joined Foote, Cone & Belding, Chicago, as assistant to Stuart Dawson, manager of solio department Canceliere Lemmar of radio department, Genevieve Lemper ontinues as time buyer for office.

station. Negotiations already are underway in that direction.

The Commission said it would permit filing of a new application looking towards licensing to the Buffalo Broadcasting Corp. of present facilities of either station, provided it is shown that if the license is granted, Buffalo Broadcasting would have "exclusive use and control of the station."

LaGuardia To Add Sunday Broadcast

FIORELLO H. LaGUARDIA, who as Mayor of New York has broadcast on the city-owned station WNYC each Sunday noon since the beginning of the war, will continue his weekly "messages to the people" of that city after his retirement from office at the end of the year. New series will be broad-cast on WJZ New York, 12-12:25 p.m., each Sunday starting Jan. 6, under sponsorship of June Dairy Products Co., New York.

Contract has been set for some time but was not signed pending completion of the Mayor's negotiations for a nationwide evening series, according to John McNeil, manager of WJZ, key station of ABC network which will carry the LaGuardia Sunday evening series sponsored by *Liberty* magazine [BROADCASTING, Dec. 10]. If another network had signed up the Mayor nationally, he might have preferred to do his local program on that network's New York outlet, Mr. McNeil explained. The Mayor has already become a WJZ feature, however, since he broadcast last spring on the station the last Thursday of each month.

Amount of the Sunday noon contract was not divulged, but it was learned that the contract runs for 52 weeks, with the first 26 weeks non-cancellable. Program will originate from the LaGuardia home in Riverdale, with Milton J. Cross as announcer. Both sponsor and station have agreed that neither will in any way censor the Mayor or limit his analyses of civic and national affairs.

SPONSORED TV SHOW FOR DUMONT STUDIO

NEW TELEVISION program will start on DuMont television station WABD New York, originating in the telestudios now under construction in the John Wanamaker Store when studios are completed later this winter or early next spring. Program, to be broadcast Monday through Saturday and tentatively entitled Television Parade, will be sponsored by not more than 30 manufacturers throughout the country on a participation basis. Sponsors are being solicited by Anderson, Davis & Platt, New York agency.

At Deadline...

CAESAR'S LEGIONS SEEK THE WORLD

(See Lead Story, Page 15)

RELEASE late Friday by NAB of letter from J. C. Petrillo, AFM president, banning overseas pickups of music effective Dec. 31 had immediate repercussions in certain official quarters. Possible cancellation of Army plans to pickup transcribed programs from Japan for home morale purposes as well as to broadcast a New Year's musical greetings from overseas troops was seen as one immediate result.

Text of the Petrillo letter, dated Dec. 5, follows:

"You will possibly recall that during the way the Federation waived its objections to network broadcasts of programs emanating from foreign countries, even though music for these programs was furnished by musicians who are not members of the American Federation of Musicians.

"We considered this a necessary wartime measure to promote goodwill and good relationships with other countries, and we're very happy to cooperate.

"However, now that the war is over, we believe that we should get back to normal as rapidly as possible. Therefore, will you kindly discontinue the broadcasting of any musical programs emanating from foreign countries, effective Dec. 31, 1945.

"This, of course, does not apply to the Dominion of Canada, where the musicians are members of the American Federation of Musicians."

BBM ADOPTS SPOT CHECK

CANADA'S Bureau of Broadcast Measurement will discontinue gathering data by the continuing study, substituting one-time spot check system covering all Canada at one time, BBM directors made this decision to keep on a standard with BMB, and after consulting BMB and other agencies. BBM favors the mail ballot and will use this in obtaining its spot check. BBM has 57 Canadian station members, 60% of total, and expects 6 more early in new year; 42 Canadian agency members; 10 U. S. agencies; 47 advertisers; 8 representatives (3 in U. S.)

EDWIN F. STEVENS DIES

EDWIN F. STEVENS Jr., 44, executive vice president and general manager of Decca Records, vice chairman and director of World Broadcasting System, and executive vice president and director of Brunswick Radio Corp., Northern Music Co., Sun Music Co. and Clarence Williams Music Co., died Dec. 20 at his Scarsdale, N. Y. home. He was one of founders of Decca Records, serving as vice president and director since its organization in 1934. He entered record business 20 years ago.

FCC STAFF INCREASE

PASSAGE last week by Congress of deficiency appropriation of \$392,500 for FCC for the remainder of 1946 fiscal year will permit limited expansion of personnel to handle broadcast matters. On basis of original request for \$785,000, Commission had contemplated increase of 501 persons—52 to Broadcast Branch, Engineering Dept.; 10 to Broadcast Branch, Accounting Dept., and 28 to Broadcast Division, Law Dept. Increase of 11 was planned for License Division. Overall increase of 170 now planned.

WOW MUST FILE

RADIO STATION WOW Inc., licensee of WOW Omaha, must file application for license renewal within 30 days, according to FCC order. Action was taken in accord with decision of U. S. Supreme Court [BROADCASTING, June 25]. That decision on litigation involving station ownership and control, reversing decision of Nebraska Supreme Court, stated FCC must decide license issue before any action can be taken on station property issue.

FIZZ FIZZLED

FOR 5,981 broadcasts listeners to Alka-Seltzer Newspaper of the Air on Don Lee Pacific have heard the closing commercial featuring Alka Seltzer tablet fizzing in water. Fred Shields, announcer, fills electric percolator with water, plugs it in, checks it. Then as he is about to make final announcement, he picks up glass by its wire handle, fills it with water and at proper moment drops in tablet. On Dec. 13 routine was carried out smoothly until he announced, "And now, ladies and gentlemen, listen to it fizz!" Fred swooped the glass in front of mike but his face froze in horror. He had forgotten to put in water!

People

MAURICE B. MITCHELL, sales promotionpublicity director, WTOP-CBS Washington. becomes WTOP sales manager succeedin WILLIAM D. MURDOCK, resigned. GORDOI HAYES, assistant sales manager, moves t. Chicago office of CBS Radio Sales. Ma Mitchell's successor unnamed.

MAJ. GEN. FLOYD L. PARKS, back from ETO as Chief of Staff, Combined Airborne Forces, and Commanding General, First Allied Airborne Army and Berlin District, named War Dept. public relations director succeeding COL. R. ERNEST DUPUY, acting director since October. Gen. Parks, serving under the director of information (see story this issue) is fin charge of all Army news and pictures in U. S.

MARK UPSON, manager, Eastern Sales Division, Procter & Gamble Co., Cincinnati, promoted to general sales manager. E. C. MOFFATT, Western Sales Division manager, moves to Eastern Sales and PAUL R. PAR-RETTE, in charge of Los Angeles office, succeeded Mr. Moffatt.

JACK HANSSEN, former Army Hour announcer with First and Third Armies, now handling radio publicity for Surplus Property Administration. Before entering service he was program director of KYSM Mankato, Minn.

CHARLES J. ZELLER Jr., sales manager, United Broadcasting Co., Chicago, to Guenther-Bradford & Co., Chicago agency, as radio director.

keen interest since assuming helm. He probably would favor showdown sometime soon.

RED TAPE IS holding it up, but Reconstruction Finance Corp. has seven-figure advertising budget duly ok'd down the line. Radio will come in for share of fund when RFC feels there is merchandise that can be sold by broadcast. Fuller & Smith & Ross is advertising agency for war surplus sales unit.

SHORTLY AFTER turn of year Census Bureau will start releasing first radio set ownership figures since 1940 decennial census. New data to cover number of farms possessing sets as of Jan. 1, 1945. Data, by counties, to be released driblet-wise with complete package available by April.

CONTRARY TO press speculation that he had been fired as Gen. Douglas MaeArthur's Public Relations Officer, Brig. Gen. LeGrande A. Diller, now in U. S. on leave, will return to his Tokyo job in mid-January. Gen. Diller now planning news coverage Japanese, war crimes trials. Gen. MacArthur doesn't fire men who were with him at Bataan.

BBC, WHICH now airs both heavier type programs of talks and symphonies and lighter entertainment such as popular music and comedy, reportedly preparing new program series of another stripe—to compete with commercial radio stations operating from the Continent. Latter said to worry officialdom of BBC₄

BROADCASTING • Telecastini

HE WORLD of make-believe found new planes of expression through the medium of radio broadcasting. If only for the countless hours of enjoyment provided shut-ins and those far off the beaten track of everyday life, radio can be justly proud of its accomplishments in dramatics_daytime and night as well.

Broadcasting arrived on the scene back at the turn of the Twenties with the novelty of the medium itself as the tune-in incentive to the inquisitive listener. It was realized, however, that programming on a day in and day out basis would soon lose its luster existing only in wonderment.

What could lend itself better to radio's single dimension of sound than the challenge of dramatics? Limited only by the ingenuity of the human mind, radio was quick to appreciate its potentialities. On August 3, 1922, the WGY (Schenectady) Players, radio's first dramatic group, presented Eugene Walter's "The Wolf" in a full length performance lasting two and a half hours.

Beginning the next month, radio drama became a

weekly feature on WGY with Broadway favorites dramatized_ The Garden of Allah, Secret Service, The Passing of the Third Floor Back and nearly 200 others. Orchestra entre, acts and general theatre routine were followed. As in the photograph above, the whole cast simulated the sound of trot-

ting horses (long before the days of sound effects) in the exciting climax of *The County Fair*. Note the lamp shaded microphones!

The history of WGY as one of America's pioneer broadcasters is star-studded with accomplishments. Television, which is coming into its own as the broadcasting industry enters the second quartercentury, looked to WGY for its first programming attempt in dramatics. On September 11, 1928, station manager Kolin Hager arranged for WGY to transmit the dialog and sound effects while the short wave station W2XAF carried the picture signals.

To compare such early day efforts with the finished productions of today again exemplifies the broad advancements of American broadcasting in the few short years of its existence. KMBC's unique Joanne Taylor weekday program series of fashion news set to dramatics is now in its 13th continuous year of pleasing Heart of America listeners. The CBS Radio Theatre remains year after year as one of radio's top preferred programs. One almost would be tempted to say radio dramatics are here to stay.
