VOICE of a FRIEND

with the Confidence long-time Friendships give

1923 marked Arthur C. Page's first radio experience; in 1927, he became Associate Editor of Prairie Farmer; 1928 and '29 saw the beginning of this long carser as WLS Farm Program Director and conductor of the famed Dinnerbell program. Art's workdays are enriched with memories: of WLS' work for flood relief; the Peabody award for "meritorious service to Agriculture"; letters from state governors, state and national agricultural leaders and (most important to Art) from listeners who want to thank or congratulate or ask for help.

When WLS Farm Program Director Art Page talks, many of his listeners remember his voice from as far back as 1923; still more recall his first days as conductor of the Dinnerbell in 1929; and there are thousands in his Midwest American audience who have met him personally at farm meetings, state and county fairs in these four states. (Dinnerbell was broadcast from remote locations 53 times during 1944 alone; 37 of these broadcasts originated outside Chicago and 16 from points within the city.) Naturally, these listeners regard Arthur C. Page as an old friend; his messages are more than just broadcasts; they are the words of a friend who has stopped in for another visit. So it goes on WLS. Farm editors, announcers, singers. newsmen, musicians-all are accepted as friends. Which makes WLS itself speak to Midwest America as The Voice of a Friend. Friendship rests on mutual confidence. Confidence generates response. Response equals results for the advertisers who use WLS - The Voice of a Friend in Midwest America.

city desk wishes to correspond with handsome sponsor...

(OBJ: profitable alliance)

So you were a newspaper man once yourself? Good. Born reporter? Fine. That makes it unanimous.

For apparently the million-and-aquarter well-to-do people in WTOP's 50,000-watt area are a lot like you. That's why WTOP decided to give them a chance to play reporter.

We made a program called *City Desk.* A program of local news, as accurate and swift and sharp as our national and foreign news. We recruit our reporters *from the audience*. For every item used on the air, out goes one dollar to the reporter, with a certificate of excellence. What's more, the reporter of the best story of each week gets *City Desk's* special award of five bucks. A veteran network newsman, Cliff Allen, sits in the slot of *City Desk* processes the stories — broadcasts them daily (5:35-5:45 p.m. EWT) Monday through Friday—ten minutes of *first*rate hometown news.

New twist? Yes. Sounds good? Is. Why didn't somebody think of that before? Because it's WTOP's business to think'em up first, as witness Janice Gray, The Factfinder, Stump Us, Arthur Godfrey's Sundial, Arch McDonald's 6:30 Show, and Battle of the Bureaus.

All *City Desk* needs now is a smart sponsor. All a smart sponsor needs now is *City Desk* working for him.

So call us – or call Radio Sales – but *call. Quick.*

SEVEN UP Inc., St. Louis (soft drink), on March 28 will begin sponsorship of a half-hour variety show on Mutual, 7:30-8 p.m. (CWT), originating in New York with rebroadcast for the West Coast. Contract for 52 weeks was placed by J. Walter Thompson Co., Chicago.

NEW APPLICATIONS filed with the FCC: Voluntary assignment of license of KTBC Austin, Tex. from State Capital Broadcasting Assn. to Claudia T. Johnson, majority owner, and wife of Rep. Johnson (D-Tex.); New standard station, 1490 kc 100 w unlimited time at Bloomington, Ind. sought by Fred O. Grimwood, radio engineer and former licensee of KLCN Blythesville, Ark.

P. BALLANTINE & Sons starts Cameron Andrews as featured comedian on CBS Monday, 10:30-11 p.m. Formerly featured Johnny Morgan. Agency is J. Walter Thompson Co., New York.

JOSEPH D. BOHAN has been elected vice-president of Sterling Drug Inc., New York, in charge of the Centaur Co. division, succeeding Harold B. Thomas, resigned to become partner in Pedlar & Ryan, New York. Formerly divisional vice-president of Centaur, Mr. Bohan has been with the company 13 years. He is chairman, national relations committee, Proprietary Assn. of America.

EFFECTIVE March 18 three CBS programs will be available for local sponsorship. They include *Morning News Roundup*, Monday-Saturday, 8-8:15 a.m.; *Morning News*, Monday-Friday, 9-9:15 a.m.; a ten-minute news program, five minutes of straight news, five minutes of analysis, 11-11:15 p.m., all EWT.

S. C. JOHNSON & SON, Racine, Wis., has renewed Fibber McGee & Molly Tuesday 9:30-10 p.m. on full NBC network for 52 weeks effective April 3. Agency is Needham, Louis & Brorby, Chicago.

YPIFYING the American saga, from office boy to successful executive is the story of Frank Miller Reed, director of media for Hill Blackett Advertising Agency in Chicago.

Frank was born Dec. 16, 1902, in Fort Wayne, Ind. He attended the Western Military Academy, Alton,

Ill. and studied at the University of Illinois for two years.

In 1923 Frank came to Chicago to join the Stack Advertising Agency (later known as Stack-Goble) as an office boy. For nineteen years he was associated with the agency. He was space buyer until 1942 when the agency dissolved. He was with WIND Chicago as time salesman for six months and then with Wm. Rambeau

Co., station representatives for 10 months. seeing pla

In 1943 he became Director of Media for Hill Blackett where he buys time for the following accounts: Wander Co., (Ovaltine), Chicago; Staley Mfg. Co., Decatur Ill., and E. J. Brach Co., Chicago.

Frank married his school sweetheart, Frederica McClellan. They have two children, Phyllis, 17, and Nancy, 13. The Reeds reside in their own home in Beverly Hills, Chicago.

When queried as to hobbies Frank insisted that he is "the finest grass cutter in the world" and that working around the house is his hobby. He used to play golf but because of the shortage of time he no longer can indulge in this game. Playing poker and

seeing plays are his favorite methods of relaxation. Best of all all Frank avers he likes to watch radio productions. He is a great studio fan and says "I get a kick out of watching radio broadcasts."

The American Scene LINCOLN MEMORIAL Washington, D. C.

LET US Consider TOGETHER

The broadcasting business as we know it in America today is complex and confusing. Hourly, management is faced with new problems and new opportunities. For this reason it becomes increasingly difficult for us who live with and in this broadcasting business to see clearly what we have and what we want to have in the future.

In the hope that we can arrive at some better understanding of our mutual problems and opportunities by considering them together, Radio Station KVOO, through a series of advertisements in this publication, will endeavor to define and discuss these matters.

We believe, that considering together, we may improve the art of broadcasting and thereby fulfill the destiny of American radio which, to paraphrase the immortal words of Abraham Lincoln, must be "... of the People, by the People, for the People" if it is to remain free.

Military to Confide Secret Data to Radio

Basis for Norton Curves Will Be Revealed

By BILL BAILEY

WHAT PART classified military data on F2 layer transmission played in the FCC proposed allocations to FM and television will be disclosed at a secret session Monday morning (March 12) with Army and Navy communications officers at FCC headquarters.

Decision to let the industry in on the highly-guarded data on which Dr. K. A. Norton based his controversial curves was reached last Thursday during oral argument on the future location of FM. All of the FM, television and standard broadcast testimony had been concluded by noon Friday, with testimony to be heard on facsimile and non-broadcast services.

Economics of Interest

Argument opened Wednesday morning before the full Commission, with Commissioner Ray C. Wakefield absent on an overseas assignment. Chairman Paul A. Porter presided except for brief periods Thursday and Friday when Commissioner Paul A. Walker acted as chairman. Commissioners Clifford J. Durr, Norman S. Case and E. K. Jett shared in cross-examination of witnesses, with Commissioner Jett carrying the bulk on technical phases, and Commissioners Durr and Walker evincing unusual interest in the economic aspects of broadcasting. The record will be kept open until after the secret session Monday.

Developments in the oral argument last week included these:

Dr. T. T. Goldsmith Jr., research director of the Allen B. DuMont Labs., Passaic, N. J., literally rocked the FM broadcasters on their respective heels with the assertion that "adequate 6-mc television" allocations will be provided "if eventually television occupies the entire spectrum between 44 and 216 mc" (see story this page).

Col. W. A. Roberts, counsel for Television Broadcasters Assn., submitted a plan of assignment of the proposed 12 channels below 300 mc, whereby 398 stations would be provided in the nation's first 140

AS CHAIRMAN PAUL A. PORTER of the FCC rapped (with bare knuckles), calling to order the momentous oral argument in proposed allocations above 25 mc at the National Museum Auditorium, Washington, last Wednesday. Commissioners are (1 to r): Clifford J. Durr, Paul A. Walker, Chairman Porter, Norman S. Case, E. K. Jett. Commissioner Ray C. Wakefield is on an overseas assignment.

DuMont Would Give 44-216 mc

To Television, Eliminating FM

markets, with 112 cities assured of at least one outlet.

Industry engineers were divided in their opinions of Dr. Norton's curves, with some challenging the accuracy of his conclusions and others, including T. A. M. Craven, vice-president of the Cowles Broadcasting Co., and former Commissioner, lauding Dr. Norton as one of the world's foremost propagation experts.

FM interests were equally divided as to economics. Manufacturers couldn't agree on the comparable costs to the public of FM sets in

EXPANSION of the 6-mc televi-

sion band to include all the area

between 44 and 216 mc, thus elim-

inating FM unless that service

oral argument on spectrum pro-

posals between 25-30,000 mc by

Dr. T. T. Goldsmith Jr., research

director of the Allen B. DuMont

DuMont Labs., approved the FCC

proposals, but requested that the

102-108 mc channel be assigned now

to television. The Commission pro-

poses to reserve that band for fu-

ture assignment to television, FM,

facsimile, or other services, de-

"While 12 channels will provide

pendent upon future needs.

Dr. Goldsmith, on behalf of the

Labs., Passaic, N. J.

the present band (42-50 mc) and receivers for the proposed band (84-102 mc).

Television interests did not oppose the Commission's proposals, but all asked for assignment of the 102-108 mc band, now pegged as unassigned. They were divided, however, over interpretation of the allocations below 300 mc. Advocates of high-definition video urged the Commission to make the lower allocations on a "temporary" basis; proponents of present-day standards called for "permanent" assignment below 300 mc.

for a limited competitive commer-

cial service, the addition of the

13th channel will be of further as-

sistance," said Dr. Goldsmith in a

statement prepared by the Allen B.

DuMont Labs. "Furthermore, it

will insure that the receiver de-

signs will be developed along lines

probably capable of including all of these 13 channels, and assure

ready adaptation to include other

channels between 84 and 180 mc."

Additional Channels

mission to "take such steps as are

practical to earmark additional

6-mc channels in the region between

84 and 180 mc", to be released by

other services when no longer re-

(Continued on page 73)

Dr. Goldsmith urged the Com-

Testifying in support of his calculations of early last November [BROADCASTING, Nov. 6], which indicated that FM would be comparatively free of F2 layer transmission in the higher frequencies, Dr. Norton said the military would agree to a conference with industry propagation experts to make known to a select group of engineers reasons for his conclusions.

Chairman Porter accepted the invitation and designated the hearing for Monday to accommodate Maj. Edwin H. Armstrong, FM inventor and opponent of Dr. Norton's contentions. The conference originally was proposed for Friday of this week but Maj. Armstrong advised Chairman Porter he would not be available.

Rejects Norton Curves

Throughout the oral argument, Maj. Armstrong steadfastly refused to accept Dr. Norton's curves as conclusive proof that F2 layer transmission in the 40-mc region would be detrimental to a nationwide FM service.

A committee of the TBA submitted a complete assignment plan based on the 12 channels below 300 mc proposed by the FCC whereby New York, Chicago, and Los Angeles would have seven Class A stations each; San Francisco, six; Boston, Detroit, Pittsburgh, St. Louis, Buffalo, and Cincinnati each five; Cleveland, Washington and Columbus each four; Baltimore, Albany-Schenectady-Troy and Rochester, three; and Youngstown, Akron and Toledo each one.

On the committee which drew up the proposal were: F. J. Bingley of the Philco Corp., chairman; Dr. Goldsmith, DuMont Labs.; David B. Smith, Philco; O. B. Hanson, and Robert Shelby, NBC; George Lewis, Federal Telephone & Radio Corp.; E. A. Hayes, Hughes Productions; Harry Lubcke, Don Lee Broadcasting System; H. L. Blatterman, Earle C. Anthony Inc.; W. J. Purcell, General Electric Co.

Proceeding rapidly on Wednesday morning, the Commission took up Fixed Public Service (other than Alaska). Haraden Pratt, chairman of Panel 8, read from his brief although Chairman Porter later reiterated the request that only new (Continued on page 64)

(Continued on page 64)

Radio May Lose Older Men to Service

Draft Boards Expected To Call 30-33 Age Groups

By JACK LEVY

BARRING military developments which may reduce the needs of the armed services, broadcasters may be called upon by local draft boards to give up a substantial portion of their physically qualified registrants in the 30-33 age group beginning about April 1, acording to a spot check of Selective Service boards and station personnel directors by BROADCASTING last week.

While the boards were unable to estimate how many 30-33 men would be called, it was indicated that the prospects for filling quotas from the 18 through 29 groups are exceedingly poor. Should the need for replacements continue at the present rate, it appeared, it would become necessary to make progressively greater demands on the older groups.

Must Be 'Necessary'

Under new procedures announced Feb. 25 by National Headquarters of Selective Service, registrants in the 30-33 group to be eligible for deferment must be "necessary to and regularly engaged in" essential activities. Previously, it was only required that registrants 30 years of age or over be "regularly engaged in" essential activities to be eligible for deferment. The status of registrants in the 34-37 group is not affected.

Forms 42 or 42A should be used by employers in requesting occupational deferment of registrants over 29. A spokesman for Selective Service said that boards can be expected to give careful consideration to key employes and that technical men especially will likely be granted deferment. Determination in all cases will be left to the boards.

Whether the boards will allow present deferments to continue until date of expiration before calling up men for induction would depend on local conditions. In some arcas, those who have had preinduction physical examinations will be the

WOPI DESTROYED BY MIDNIGHT FIRE

FIRE which began in an adjoining store destroyed the building Saturday, Feb. 24 in which WOPI Bristol had studios on the second floor. The fire was reported by an announcer as he signed off at 12:05 a.m. All station equipment was destroyed except typewriters and office furniture which were removed before the blaze reached them. Current records were damaged.

rent records were damaged. Offices of the station have been moved temporarily to the building floor of the Union Trust building half a block east of the former location at 410 State street. The blaze destroyed a grocery store, real estate office and doctor's and lawyers' offices in two three-story buildings.

Page 14 • March 5, 1945

first to be called and deferments will be permitted to stand. In other areas it may be necessary to review all deferments to furnish the necessary men to meet quotas.

For registrants under 30, the regulations call for filing a new form, 42A (Special Revised), for obtaining occupational deferment and for certification by designated agencies in the Government responsible for procurement and production of war materials and those responsible for the maintenance of essential services. This procedure is to assist local boards in determining which registrants, in the interest of the war effort, should be given serious consideration.

FCC Not Included

Although the FCC is not included in the list of 15 recommending agencies designated for the 18-29 group, Selective Service emphasized that employers may file the new form with the local boards even though certification has been denied by the Government agency having jurisdiction or if the employer does not come within the jurisdiction of any Federal agency. The local board is empowered to grant or deny deferment as its judgment dictates but are instructed to give certified requests the most serious consideration.

At the office of Col. Arthur V. McDermott, Director of Selective Service for the New York City area, it was predicted that "quite a few" men would be needed from the 30-33 age group to meet the demands of the military services, as the supply of 26-29-year-olds is limited. Spokesmen refused even to hint at the number of men in the 30-33 group who would be required

Carter Test

STARTING off with a ten-city test,

Carter products, New York, will sponsor John J. Anthony's Goodwill

Hour on Mutual Monday through

Friday, 1:45-2 p.m., probably starting April 2. Period was the one

originally planned, the network de-

clining a later proposal for a 9:15

p.m. across-the-board spot on the

grounds that combination of the

product, liver pills, the night hour and program would not make good radio [BROADCASTING, Feb. 26].

To be expanded to a larger network

if the test is successful, series is scheduled for WOR WGN KHJ KFRC WIP WNAC WEBR WHK KWK WOL. Ted Bates Inc., New

York, is agency. Carter sponsors

Jimmie Fidler on the Blue, for Arrid, placed by Small & Seiffer,

New York. Mr. Anthony's last com-

mercial series was on Mutual for D. L. Clark Co., Pittsburgh.

Murine Buys Spots

MURINE Co., Chicago, on March

5 begins sponsorship for 52 weeks

from the city, stating only that this will depend entirely on the needs of the armed forces.

A quick check of a representative sample of New York stations revealed that while many station employes are in the 30-33 group, the industry will not be hard hit by the draft unless its present "essential" classification is withdrawn and unless there is to be a general reclassification of individuals now deferred for physical disability. Most stations reported that either they had been granted or had requested occupational deferment for all key employes. If selective service does move in on radio, the announcing, sales and technical staffs seem likely to be hit hardest, the reports indicated.

The proportion of men in the 30-33 group to total registrants varied widely with stations. One key network outlet reported 31 registrants in this group classified as 2A. An independent station had none who would be affected. Another had 60% of its operating staff in the 30-33 group.

In Chicago, one key network station reported 10% of its operating personnel in the 30-33 group while another had less than 5% and a third about 8%. One independent had 14% and another 7% in the 30-33 group.

In Washington, one key station reported 22% of its registrants in the 30-33 group classified as 2A while another said that all of its 30-33 men were 2A(F). Another major station reported about 30%in the 30-33 group. Generally, engineers constituted about half of the total registrants in the 30-33 group.

GE Net Up

NET INCOME of General Electric Co. available for dividends for 1944 totaled \$50,846,000, or \$1.76 per common share, compared with \$44,-923,000, or \$1.56 per share in 1943, GE president Charles E. Wilson announced last Friday. These amounts were after setting aside \$7,123,000 for postwar adjustments and \$5,323,000 for contingencies.

IT'S A LONG-TERM affiliation for Walt Lochman (r) as KCMO Kansas City director of sports and special events, effective March 20. E. K. Hartenbower, KCMO general manager, smiles approval. Coming from WIND Chicago, Mr. Lochman in 1940 ranked first on the national Sporting News poll.

Blue Names Huber To Top Ad Post

Appointed Kenway Successor; Murray Grabborn Promoted

E. J. (Mike) HUBER, formerly sales promotion manager of the Blue Network central division in Chicago, has been appointed advertising manager of the network, Fred Smith, vice-president in charge of advertising, promotion and publicity, announced last week. Mr. Huber will supervise the advertising and promotion of Blue cooperative programs, station promotion and business development as well as for the network itself, Mr. Smith said.

Kenway Named

Ivor Kenway, whom Mr. Huber succeeds as Blue advertising manager, has been placed in charge of advertising and promotion for the network's owned and managed stations. He will also supervise publicity and public relations, research and business development for the Blue's own stations.

Mr. Smith also announced the appointment of BBDO, New York, as advertising agency for the network, replacing Geyer, Cornell & Newell. Leonard Erikson, who recently joined the agency after some 15 years at CBS, where he was network sales manager, will be account executive on the Blue account.

Murray Grabhorn, assistant sales manager of the Blue Network, has been placed in charge of the sales and promotion activities for programs built by the Blue program department. He has been temporarily relieved of his administrative duties, to concentrate on this special assignment. Mary Baldinger of the network's promotion department has been assigned to assist Mr. Grabhorn in the preparation of special promotion for these programs.

* * * Florsheim Named

STANLEY FLORSHEIM, formerly manager of cooperative program sales for the Blue Network, has been made director of cooperative programs, Mark Woods, president, American Broadcasting Co., owner of the Blue, announced last week. Ludwig Simmel, formerly Blue sales service manager, has been named administrative assistant to Mr. Florsheim; George Schrier of the Blue publicity staff has been made publicity manager of the department, and Lydell Wilson, with the department since its inception two years ago, becomes business development manager for co-op shows.

Robert Saudek, just returned from service overseas for the OWI as manager of ABSIE, has rejoined the Blue as sales service manager, succeeding Mr. Simmel. Prior to leaving the Blue last spring, Mr. Saudek had been assistant to the executive vice-president.

NAB Urges 'Hitch-Hikers' Be Abolished

May Revise Code; Presidency Studied

CALLED UPON to dispose of a welter of problems due to cancelation of the membership meeting this year in keeping with wartime restrictions, the NAB Board of Directors at a two-day session in Washington last Tuesday and Wednesday polished off a weighty interim agenda which it hopes will hold radio on even keel until the next regular board session scheduled for Omaha in May.

Highlighting the board's actions were:

(1) Enlargement of the committee to select a president to succeed J. Harold Ryan by adding Don S. Elias, WWNC Asheville; Paul W. Morency, WTIC Hartford, and John J. Gillin Jr., WOW Omaha, to supplement the original committee of Messrs. Ryan, James D. Shouse, WLW Cincinnati and G. Richard Shafto, WIS Columbia, S. C. Mr. Shafto was named temporary chairman, succeeding Mr. Ryan. (2) Adoption of a resolution proposed by its Sales Managers Executive Committee calling upon the networks to eliminate "cow-catcher", "hitch-hike" and cross-reference announcements "at the earliest possible date".

Code Report Considered

(3) Consideration of interim report of the NAB Code Committee, exploring possible revisions in the self-regulation code and augmenting the board's code liaison committee to work out proposed amendments probably to be considered at the next annual meeting.

(4) Authorization of associate membership liaison with NAB standing committees and as first step naming three radio station representatives to consult with the Sales Manager Executive Committee. They are John Blair, John Blair & Co.; William Knodel, Free & Peters Inc., and Henry I. Christal, vice-president, Edward Petry & Co. Inc.

(5) Authorization of steps to strengthen employe-employer relations in radio through expansion of labor relations activities upon recommendations of John Morgan Davis, general counsel.

(6) Endorsement of recommendations of its news committee on handling of sponsored news programs and authorization that the recommendations be sent to all stations for edification and guidance.

(7) Referral to public relations committee of a proposal prepared by Losh & Lee, Los Angeles public relations firm, for creation of a proposed Academy

of Radio Arts & Sciences, to award "Oscars" for outstanding radio performance and for other public relations purposes.

Without mentioning names, President Ryan reported to the board on the search for a new president, who would take office on July 1--the deadline set by Mr. Ryan for his return to his regular duties as vice-president and directing head of the Fort Industry Co. stations. More than a dozen names originally were considered by the three-man committee and the list was narrowed down to three or four. The committee, however, requested the board to give it further instructions on such matters as tenure, salary, type of man preferred and authority to make a definite commitment within prescribed limitations.

Action at Omaha?

The enlarged committee will meet in New York March 21 for its first full session. It will deliver an interim report at the Omaha meeting.

inghouse Radio Stations Inc.

Nominated for the two large sta-

vention last year.

That session will be held between May 1 and 15, at the invitation of Director Gillin. Mr. Ryan had assumed the NAB presidency on an interim basis in April 1944, with the understanding that he would not be required to serve beyond next July 1. He took over the presidency from Neville Miller, first paid executive of the NAB and now with UNRRA in the European war theatre. Mr. Miller's stipend was \$35,-000 per year, plus \$5,000 in allowances.

Unanimously adopted were the recommended resolutions proposed by the Sales Managers Committee against parasitic station-break announcements. Both NBC and CBS had made commitments for their elimination and these, it was reported, were renewed at the board meeting. Arthur Church, KMBC Kansas City, had petitioned the board to renew the plea for their prompt elimination, having called attention to the previous CBS deadline of Oct. 1, 1944, which report-

Nominations Made for Election to Fill Six Posts as NAB Directors-at-Large FORCED TO conduct its annual tual are not NAB members. The election of directors-at-large by

networks designate their own directors.

Hugh A. L. Halff, WOAI San Antonio, district director from Texas, tendered his resignation effective March 15, for health reasons. Martin Campbell, WFAA, WBAP-KGKO Dallas-Fort Worth, recently elected to succeed Mr. Halff on July 1, will assume the post March 15.

Under the wartime procedure, the NAB membership must be notified of the at-large nominations by about May 15. Within 15 days new nominations may be made by a minimum of 10 station members, but these need not be by petition carrying that number of signatures. If a minimum of 10 members write in the same name for a broadcaster for any director class, the name will appear on the final ballots to go out by June 1, returnable in 15 days to the election committee.

The board also authorized a referendum ballot on the election of a new director for the fifth district. to be conducted by Ernst & Ernst, in view of the split meeting necessitated by the ODT restrictions on more than 50 attendees. Georgia and Alabama broadcasters of District 5 meet March 19-20 in Atlanta, while Florida and Puerto Rico broadcasters meet in Jacksonville March 22-23. The incumbent district director is John C. Bell, WBRC Birmingham. Two other districts, the first, which meets in Boston March 5-6, and the ninth, which meets in Chicago March 29-30, will elect directors for two-year terms. The incumbents are Mr. Morency for District 1 and Leslie C. Johnson, WHBF Rock Island.

edly was not invoked because of the failure of other networks to follow through on commitments.

The resolutions as adopted by the board follow:

WHEREAS the use of so-called "cow-catcher" and "hitch-hike" announce-ments militates against the interests of radio listeners generally by tending to create annoyance, confusion and mis-understanding in the minds of such

listeners, BE IT RESOLVED that the Sales Managers Executive Committee respect-fully requests the NAB Board of Directors to urge all broadcasters to elim-inate so-called "cow-catcher" and "hitch-hike" announcements from net-work, national spot and local programs at the earliest possible date.

WHEREAS it should be the constant aim of radio station management to present programs of varied interest, and to promote such programs to the end that the number of sets in use shall

that the number of sets in use shall increase, and WHEREAS the present practice of network, non-network and local adver-tisers of calling attention to their pro-grams on competing stations or net-works tends only to divide the existing audience, now, therefore. BE IT RESOLVED that the Sales Managers Executive Committee urges the broadcasting industry to discour-age and ultimately to deny to network, non-network and local advertisers the privilege of calling attention on one program to another program on a com-peting station or network.

Study Authorized

Following a lengthy discussion of the NAB code as adopted in 1939 and a report on the code committee's meeting in Washington the preceding week from Code Committee Chairman Lee B. Wailes, manager of Westinghouse Radio Stations Inc., the board authorized a continuing study looking toward possible revisions at the next annual convention. The board liaison code committee was enlarged to include two additional members, with Campbell Arnoux, WTAR Norfolk, and Paul W. Morency, WTIC Hartford, added to the original committee of Kolin Hager, WGY Schenectady; F. M. Russell, NBC Washington vice-president, and Don S. Elias, WWNC Asheville. The Code Committee has called a tentative meeting in New York for March 21 - 22.

The code, it was emphasized, is part of a continuing effort and is "a living and virile document". Controversy engendered over CIO-WHKC proceedings before the FCC was reviewed and there was discussion as to whether stations should sell time to labor unions and cooperatives. One view was that (Continued on page 63)

691 NAB Members

NAB MEMBERSHIP has reached an all-time high of 691, of which 635 are standard stations, 16 FM stations, one television station, two networks, and 37 associate members. Since the last NAB Board meeting in November, 30 additional active members have been enrolled, along with two associates. Among the newcomers is Comdr. E. F. Mc-Donald, president of Zenith Radio Corp., which operates WWZR, FM outlet. Comdr. McDonald was first president of the NAB, having served in 1923-25 when he owned WJAZ Chicago.

Denny, Hyde, Bartlett Figure In FCC Promotion Speculation

General Counsel Is Mentioned as Successor to Craven; Veteran Assistant May Move up

AN FCC "merit parlay" which would see General Counsel Charles R. Denny move up to a commissionership, Rosel H. Hyde stepped up a notch as Mr. Denny's successor, and Col. Theodore L. Bartlett, recently returned from the Mediterranean theatre, succeed to an assistant general counselship, was being speculated upon last week. All three have been mentioned for the existing FCC vacancy, created when Comdr. T. A. M. Craven retired to the broadcasting field last July.

Mr. Denny has not been a candidate, but is said to have the endorsement of Chairman Paul A. Porter. With the President's return to Washington last week from the Yalta war conference, it is expected a nomination will be sent the Senate any day. The 32-year-old general counsel is a Democrat and Washingtonian. He has won the confidence of the Commission and of members of Congress identified with radio during his tenure as the FCC's chief lawyer which began in 1942, after having served a year as assistant general counsel.

Hyde Gets Support

Mr. Hyde, veteran assistant general counsel in charge of broadcasting, has been supported strongly for the Craven vacancy. An Idaho Republican, he was with the former Federal Radio Commission in 1928—shortly after its creation, has served continuously with it and the FCC. If Mr. Denny receives the FCC appointment, Mr. Hyde's elevation to the general counselship is regarded almost as a certainty.

Col. Bartlett, likewise a veteran FCC attorney, was in charge of the Law Department's administrative activities before going on active Army duty three years ago. He was air communications officer in the Mediterranean theatre until his return to this country a few weeks ago. It was thought likely that Col. Bartlett, if not named to the Commission vacancy, would be proferred an assistant general counselship—probably in connection with the important allocations

School Sold

STOCK of Midland Radio & Television Schools Inc., all owned by KMBC Kansas City, has been acquired by G. L. Taylor, president and active head of the schools, according to Arthur B. Church, KMBC president. Mr. Taylor has resigned as KMBC vice-president in charge of technical development. Robin D. Compton, formerly of RCA and NBC, and active in television, has been named technical director of Midland Broadcasting Co. A. R. Moler, chief engineer, and A. K. Krahl, studio director, continue their KMBC posts. phases upon which so much emphasis is being placed in view of prospective postwar operations.

Should the "merit" promotions ensue, it is thought the FCC will seek Congressional authorization for an increase in the number of assistant general counselships from the present three to possibly five or six. Fanney Neyman Litvin and Leonard Marks, both senior attorneys on the broadcast staff under Mr. Hyde, logically would be in line for assistant general counselships.

Chairman Porter is expected to confer with the President on the FCC vacancy any day. He is known to be anxious to have the Commission brought to its full strength promptly, because of the heavy schedule of work ahead.

\$1,000,000 LIBEL CHARGED BY NOBLE

EDWARD J. NOBLE, chairman of the board of American Broadcasting Co. (Blue), Thursday filed a motion in the New York Supreme Court asking permission to file a counterclaim for libel for \$1,000,-000 in the \$2,925,000 damage suit of Donald Flamm against Mr. Noble in the sale of WMCA New York by Mr. Flamm to Mr. Noble for \$850,000. Justice William C. Hect Jr. reserved decision.

Mr. Noble's action is based on statements said to be contained in press releases issued on Mr. Flamm's behalf in connection with his suit, which charges Mr. Noble with coercion and illegal conspiracy with Mr. Flamm's employes to force Mr. Flamm's employes to force Mr. Flamm's action to Mr. Noble. Mr. Flamm's action to have the sale rescinded and the station restored to him was altered to a suit for damages following the sale of WMCA by Mr. Noble to a group headed by Nathan Straus, now president.

Clear Group Plans Hearing Procedure

Craig Presides at Meeting of CCBS Executive Committee

INFORMAL conferences with the FCC engineering and legal staff, to determine the scope and magnitude of data to be developed for the clear-channel allocation proceedings scheduled for May 9, were arranged last week by the Clear Channel Broadcasting Service, following a two-day session in Washington and an informal discussion with FCC Chairman Paul A. Porter.

Whether postponement of the May 9 date will be sought by the clear-channel stations will depend largely upon the outcome of the staff discussions, it was believed. At the informal sessions, efforts will be made to clarify the issues and to determine what technical data will be developed by the FCC and what portion the clear-channel group should supply. It was thought the group will seek postponement until fall, in any event.

Craig Presides

Edwin W. Craig, WSM Nashville, chairman of CCBS, presided over a meeting of the executive committee of the group in Washington last Thursday and Friday. Attending the sessions were a number of clear-channel station representatives not on the committee.

Those present included: J. Leonard Reinsch, WSB Atlanta; B. J. Palmer, J. O. Maland, Paul Loyet and Ralph Evans, WHO Des Moines; Frank Scott, WHO attorney; Mark Ethridge and W. Lee Coulson, WHAS Louisville; Wil-liam B. Ryan and H. L. Blatterman, KFI Los Angeles; James D. Shouse and James Rockwell, WLW Cincinnati; Hugh A. L. Halff, WOAI San Antonio; W. H. Summerville, WWL New Orleans. Louis G. Caldwell, general counsel of CCBS, and Andrew D. Ring, engineering consultant, also participated. Messrs. Craig, Ethridge, Maland, Caldwell and Ring conferred with Chairman Porter last Friday regarding the staff conferences on issues and procedure.

gineering counsel would be retained by the regional organization. Paul D. P. Spearman, former counsel for NARBS, is regarded as the likely selection as counsel. The former engineering counsel was Dr. Greenleaf Whittier Pickard, of Boston.

Because of the ODT ban on conventions of more than 50 out-oftown people, it is doubted whether the regional group will call a general meeting. Mr. Shepard said that the membership could be kept posted by mail.

FIRST public speech of Gen. Joseph W. Stillwell since his recall from China was presented Friday as an exclusive from Cleveland by WJW. Gen. Stillwell spoke before the Cleveland post of the Army Ordnance Assn. at the Hotel Statler.

Shepard, Damm, Craney Seek To Revive Regional Stations

FOLLOWING practically the identical pattern of previous allocation proceedings involving clear channels, moves were initiated last week to revive an organization of regional broadcast stations to present the medium-station case before the FCC clear channel hearings scheduled to begin May 9 in Washington.

John Shepard 3d., chairman of the Yankee Network and former president of the National Assn. of Regional Broadcast Stations, formed in 1938; Walter J. Damm, vice-president of the Milwaukee Journal stations, and president of FM Broadcasters Inc.; and Ed Craney, KGIR Butte, last Monday sent telegrams to some 20 former directors of NARBS proposing reactivation of the regional group. A majority of those contacted, Mr. Shepard said last week, supported the move and a letter will go out forthwith to all regional or nonclear-channel stations inviting them to participate in the organization.

Steering Group

Mr. Shepard said it was not certain whether the organization, if created, would follow the pattern of NARBS or whether it would simply become a committee operation similar to the Newspaper-Radio Committee created several years ago to block moves looking toward divorcement of newspapers from station ownership. In any event, he said, the plan was to create a steering committee or executive committee which would function for the organization.

In its letter to regional stations, the organizing committee will recommend an informal organization, probably to be known as the "Re-

gional Group". It was suggested that the executive committee include the same membership as the last board of NARBS but with two changes. In addition to Messrs. Shepard and Craney, the old board included Hoyt B. Wooten, WREC Campbell Memphis: Arnoux, WTAR Norfolk; Edgar L. Bill, WMBD Peoria; Lewis Allen Weiss, Don Lee, and Edgar H. Twamley, then of WBEN Buffalo. Mr. Twamley, now with Spot Sales in New York, no longer is in the station field, while Mr. Weiss declined to serve. The suggestion was made that Mr. Damm and T. A. M. Craven, former FCC commissioner and executive vice-president of Cowles Broadcasting Co., be substituted for them. All mentioned have agreed to serve, with the exception of Mr. Bill, who could not be reached.

The plan, according to Mr. Shepard, would be to present testimony at the May 9 hearings, opposing any encroachment on service or operation of regional stations. This presumably would include opposition to any increases in power for clear-channel stations and would be in favor of the breaking down of the existing two dozen clear channels to I-B (duplicated) status. NARBS originally was formed on a provisional basis in 1936, prior to the engineering allocations hearings that were dealing with standard broadcasting. It was made a permanent organization in 1938, preparatory to the last clear-channel hearings, which preceded the original North American Regional Broadcasting Agreement which expires next year.

It is expected both legal and en-

WOW Case Heard Nets Plan San Francisco Conference WPB Reconsiders By Supreme Court Coverage; BBC Also to Air Meetings Four Applications

Invasion of FCC Domain by State Court Is Argued

WHETHER the physical properties of a station can be considered apart from its license became the major contention in the case between Radio Station WOW Inc. and Dr. Homer J. Johnson, stockholder of the Woodmen of The World Life Insurance Co., which was argued before the Supreme Court last Thursday by James Lawrence Fly, WOW attorney, and Don W. Stewart, acting for Mr. Johnson. It was Mr. Fly's first court appearance since leaving the FCC last fall.

Two major questions to be decided, both hinging on the separation were: (1) if, as Mr. Johnson contends, the only issue is "con-structive fraud" in granting a lease for the station for an allegedly insufficient rental and inadequate protection, and (2), if as the lessee holds, the decision of the Nebraska Supreme Court setting aside the lease and transfer of license invades the jurisdiction of the FCC. The question of public interest also figured in the argument.

Amount of Rental

The stockholder claimed in the original suit which was lost in the lower Nebraska court and then reversed by the State Supreme Court that the station was rented to its manager and a group of associates by their friend, the president of the insurance company, at a rental only about a quarter of its income and inconsistent with its value. Mr. Fly stated that on this issue, which is not the direct one to be decided by the court, it is the license which enhances the value of the station and without it the equipment would be surplus material. Furthermore, he said, the figures given were not relevant since the insurance company is tax exempt whereas that is not the case with WOW Inc.

The Nebraska high court, according to the argument, first ruled that the station and license be returned and in a motion to dismiss the ruling adhered to its original judgment but interpreted the license as being incidental to the return. The claim of violation of Sec. 402 (a) of the Communications Act brought debate of whether a state court or the Commission should decide in cases of "constructive fraud". If as in normal legal procedure, the state court rules how the matter of the license be handled or if the Commission's licensing powers instead cover the matter of proper contract and fitness to run a station, were the questions put before the highest tribunal.

Mr. Fly asked why the complainants didn't come before the Commission while the transfer was being weighed and his opponent argued belief that it was a state matter and said the case was startWITH the major networks planning coverage of the United Nations Conference in San Francisco, opening April 25, the Radio Correspondents Assn. last week was detailed by the State Dept. to pass on all radio news applicants planning to report the meeting.

Applications should be filed immediately with Michael J. McDermott, special assistant to the Secretary of State for Press Relations. Mr. McDermott's office in turn refers all applications to Earl Godwin, president of the Radio Correspondents Assn. Although plans vere not completed by the association, it appeared likely that D. Harold McGrath, superintendent of the Senate Radio Gallery, probably would be in San Francisco to handle radio personnel.

CBS Group

CBS announced that a contingent of four newsmen from New York and one from Washington will be sent to San Francisco to work with CBS West Coast newsmen. Heading the group will be Everett Holles, assistant director of news broadcasts. From New York will go these commentators: William L. Shirer, Bob Trout, Maj. George Fielding Elliot. Bill Henry of the Washington staff also will attend.

Members of the KQW San Francisco staff assigned to the conference include William Eilers, Don Mozley and Grant Holcombe, who will function under the direction of Philip Woodyatt, West Coast assistant news director. From KNX Los Angeles, Fox Case, director of news and special features, will head a group of commentators and reporters including Harry Flannery, Chet Huntley, Nelson Pringle and Wallace Sterling. Two KNX technicians, Les Bowman and John Quinn, also have been asigned.

To give British listeners full coverage of the San Francisco conference, BBC will have a broadcasting booth. Louise Ryerson, in charge of facilities at the North American branch of the BBC in

ed in court at that time. Mr. Stewart also contends the question of jurisdiction was never brought up until the decision was reversed.

Disagreeing with the no-publicinterest contention, Mr. Fly stated that if the physical properties of the station are returned it will still be the FCC's job to issue another license to the Woodmen or not, as it sees fit. This might cause interruption of a vital service during wartime, he said. It would be leaving the Commission "on the horns" in a touchy situation, said the former FCC chairman.

Parenthetically, Mr. Fly told the court he "thinks it is a serious question if the FCC will ever again give a license to an insurance company or a bank."

New York, left Feb. 26 for San Francisco to make arrangements. Alistaire Cooke and Anthony Wiggan, BBC newsmen, are expected to handle most of the broadcasts. Chris Cross, BBC publicity director, also expects to attend the conference at the conclusion of a tour of the West and Midwest, contacting stations, radio editors and others in connection with BBC activities in the U.S.

Marlin Expands Its Spot Coverage to 59 Stations MARLIN FIREARMS Co., New

Haven, has expanded to 59 the number of stations carrying spot announcements for Marlin razor blades and shave cream-the largest schedule in the company's his-tory. Transcribed jingles composed and performed by Lanny and Ginger Grey are aired about thriceweekly on stations in selected markets. Latest additions to run for the first half of 1945 include WNOX WHBF WIBC. Included is a daily morning newscast by Clyde Kitell on WEAF New York. Agency is Craven & Hedrick, New York.

Long Opens Rep. Firm

DEWEY H. LONG, former manager of WELI New Haven and WSAI Cincinnati, on March 15 will open his own southeastern representative firm

with headquarters in Atlanta. The firm will be located in the William Oliver building. A veteran in radio sales and management, Mr. Long was for-Long was for-merly southeast-

ern representa-tive for CBS radio sales and com-mercial manager of WBT Charlotte and WAPI Birmingham. In addition to representing stations in the southeast, he will act as consultant to stations in that area.

Blue Meeting

REPRESENTATIVES of the eight stations which will become affiliates of the American Broadcasting Co. (Blue Network) on June 15 will meet in New York the end of this month to discuss plans for promot-ing the new affiliations to their listeners and clients. Meeting, called by Oscar (Pete) Schloss of the Blue stations department, will be attended by executives of WCAE Pittsburgh (currently MBS); WFBR Baltimore (MBS); KRNT Des Moines (CBS); WNAX Yank-ton (CBS); WPDQ Jacksonville, Fla. (MBS); WFTL Miami (MBS); WCOP Boston (Blue); WLAW Lawrence (CBS).

Stations Authorized New After Once Being Refused

AGAIN reversing itself, the War Production Board last week approved four applications for construction of new stations which had been previously denied authorization on the ground the additional facilities were not essential to the war effort. The action permits construction of two new stations in Sacramento, Cal., an additional outlet in Harrisburg, Pa., and a station in Petersburg, Va., which has no primary service.

Action Consistent

The Board's reversals were conaistent with overrulings by the WPB Construction Bureau early in February of denial of two applications by the Radio & Radar Division under a policy instituted last December of refusing authorizations for new stations on the basis of essentiality during wartime. Following the turnabout on these applications, all other applicants who had been denied authorization filed appeals and, it is understood, the Division recommended approval in the interest of consistency.

The Board also reversed its previous policy regarding applications for construction of new studios for existing stations. Two such applications by KFAB Lincoln and WGES Chicago had been originally refused authorizations by the WPB Construction Bureau although the Radio & Radar Division had recommended approval. Last week, the Bureau, on appeal, approved KFAB's application.

Action on WGES is being withheld pending a report from the War Manpower Commission on availability of labor in Chicago, a critical labor area.

The new station applications approved for construction are for KXOA Sacramento, 250 w on 1490 kc, filed by Lincoln Dellar, vicepresident of KSFO San Francisco, KCRA Sacramento, 250 w on 1340 kc, filed by Central Valleys Broadcasting Co.; WHGB Harrisburg, Pa., 250 w on 1400 kc, filed by Herbert Kendrick and G. L. Hash; and WBHD Petersburg, Va., 250 w on 1240 kc, headed by Jonas Weiland, owner of WFTC Kinston, N. C. All of the applicants had been granted conditional construction permits by the FCC prior to its Jan. 16 freeze order.

The Board also approved the application of Robert W. Rounsaville for a new station (WBAC) at Cleveland, Tenn. A conditional construction permit had been granted for this station by the FCC under the Jan. 16 policy following new facilities in areas lacking primary service. Authorization is also likely for WLAT Conway, S. C. which received an FCC conditional under the freeze provisions.

KFAB Opens the Gate to a 1½ Billion Dollar Market^{*}

Beyond this gate...for hundreds of miles over rich rolling farmlands and into wide fertile valleys...stretches the vast 200 county area served by the BIG FARMER STATION.

Throughout this entire KFAB territory, folks enjoy a total annual effective buying income of $1\frac{1}{2}$ billion dollars. Consider, too, Mr. Timebuyer, that this purchasing power is based on such solid sources of income as cattle, sheep, hogs, poultry, grains, along with payrolls from many large industrial plants.

Let KFAB "Open the Gate" to this 1½ Billion Dollar Market for you. Cash in NOW on this tremendous buying power.

WJW's MR. NEMO

Everything that happens in Cleveland happens to Mr. Nemo. At least, that's the way he feels about it. He's the only guy we know who is completely happy when he says, "Everything happens to me."

At the drop of a fire alarm or a hockey puck, Nemo's off with a flash, with an announcer and microphone in tow. Nothing ever happens in Cleveland too big for WJW's Mr. Nemo to handle smoothly and professionally, and nothing too small to escape Nemo's attention. His head practically spins on his shoulders looking in all directions for any event that will interest Clevelanders.

We saw him at a prize fight the other night, and remarked, "Big crowd tonight."

He scoffed, "If you think this is a big crowd, you ought to see all the people I got on the other end of this wire!"

Tom Joyce Quits RCA · Victor Post Television Authority Will Announce Plans April 1

TOM JOYCE, general manager of the Radio, Phonograph and Television Department of the RCA Victor Division of the Radio Corporation of America, at Camden, N. J., announced his resignation from the company this week after 23 years of service. Mr. Joyce will announce his future plans about April 1. He will remain in television.

Successful Campaigns

Mr. Joyce is well known as an authority on postwar commercial development of both home and theatre television. At 29 he was manager of advertising and sales promotion of all RCA products. Four years later he was made vice-president of the RCA Mfg. Co., predecessor to RCA Victor Division.

He patented the sealed radio tube carton which was the basis for a sales and advertising campaign credited with stamping out the "racket" of selling used radio tubes as new tubes. Under his direction were carried out the advertising and sales campaigns built around the "Magic Brain", "Magic Eye", "Magic Voice" and other successful exploitatons.

Mr. Joyce was one of the first to foresee the come-back of recorded music. At the beginning of World War II he was given responsibility for RCA Victor's employe morale program. Out of that assignment came the company's "Beat the Promise" campaign on war production that has served as a model for industrial plants all over the U.S. Exhibits at the Chicago fair in 1933-34 and at the New York fair in 1940 were under his direction. He has been active in civic affairs, was one of the found-ers of the Camden County War Savings Committee, chairman of a Camden County Labor-Management "Production for Victory" committee and a leader in other community affairs.

Transfer Sought

VOLUNTARY assignment of li-cense of WDAK Columbus and WRLD West Point, Ga. from the present licensee partnership to a new partnership composed of pres-ent owners and two new individuals is sought in applica-tions filed with the FCC. Allen M. Woodall, general manager of WDAK and sales manager of WRLD, would acquire 10% interest and Margaret A. Pill, housewife and women's civic leader, would acquire 8% interest. Amount involved is \$15,300. L. J. Duncan, who now is 51% owner, would hold 40% after transfer; Leila A. Duncan, now 25%, 20%; Josephine A. Rawls, now 14%, 12%. Effie H. Allen retains 10% interest. It is proposed, according to applications, Mrs. Pill would counsel stations on women's civic and public service programs.

MR. JOYCE

PAC NEWS SURVEY **Charges Commentators** -Are Anti - Labor-

MONITORING survey conducted by the PAC over a 7-week period preceding the presidential election, covering 212 news items about lacovering 212 news items about la-bor broadcast by 23 network com-mentators, rates 21% of the items as being factual in content while 79% were comprised of the com-mentators' and others opinions, ac-cording to last week's issue of the *CIO* Nears CIO News.

Declaring that "labor took a beating" from the commentators, the News said: "Of the five pro-grams which gave the most atten-tion to labor—Fulton Lewis jr. on Mutual, Morgan Beatty on NBC, Henry Taylor, Baukhage and Ray Henly on Blue—every one had a Henly on Blue—every one had a heavily unfavorable-to-labor score." heavily untavorable-to-labor score." Mr. Beatty was singled out as "rarely" expressing his own views but quoting anti-labor as opposed to pro-labor opinion in a ratio of about 12 items to one. "The survey shows," the News concludes, "that if major commen-tators are not to be accused of a

tators are not to be accused of a sort of mass neurosis that finds them out of step with the demo-cratic temper of the times, they had better be more careful whom they quote when discussing labor topics.

Lee Hat Plans

FRANK H. LEE HAT Co., Dan-Weintraub & Co., New York to han-dle advertising, public relations and merchandising. C.P-P, which sponsors Mr. Stern's Colgate Sports Newsreel on NBC, commis-sioned Betty Seaver to do the sculp-ture. Agency is Sherman & Marouette. ture. Agency is Sherman & Marquette, New York.

RCA 1944 Earnings Show Gain Over Previous Year's Report

Net of \$10,263,291 Allows for 51.2 Cents Per Common Share; Tax Share Large

NET PROFIT of the Radio Corp. of America in 1944 was \$10,263,291 compared with \$10,192,452 in 1943, the 25th annual report of the company, released Tuesday by Brig. Gen. David Sarnoff, president, revealed.

The earnings are subject to renegotiation but specific provisions on a basis similar to 1943 have been made. After payment of preferred dividends, earnings on common stock were 51.2 cents per share, compared with 50.5 cents in 1943.

Taxes Large

Representing 74.5% of income, provision for Federal income taxes amounted to \$29,947,900, or 14.6%more than last year. The tax provision was equivalent to \$2.16 per share on outstanding common stock in 1944; \$1.88 in 1943.

The year-end financial statement also shows total current assets as ammounting to \$190,629,493 against \$189,312,778 in 1943; liabilities, including borrowings under V-Loan credit, \$133,251,944 in 1944 compared with \$138,977,334 at the end of the previous year. Working capital amounted to \$57,377,549 compared with \$50,335,444 in 1943. V-Loan credits decreased \$10,000,000 during the year to \$55,000,000. On Feb. 15, 1945 an additional \$20,000,-000 was repaid, reducing V-Loan credit to \$35,000,000. After providing for dividends and adjustments, the total earned surplus was \$43,-645,087, and increase of \$2,039,436 over last year. A chart showing the company's growth in the past ten years reveals gross income increased from \$89,228,898 in 1935 to \$326,421,913 in 1944.

Report breaks down gross income by source for 1944 and 1943, showing that the manufacturing division's gross of \$244,245,587 is 15.5% above the 1943 total; the communications companies' gross of \$22,715,125 is 21.1% ahead of 1943; miscellaneous minus intercompany transactions totaled \$2,-467,126 in 1944, a decrease of 30.2% from the previous year, and RCA's revenue from broadcasting, \$56,994,065 in 1944, also decreased 6.3% from 1943. However, the 1943 broadcasting total included the income from nine months operation of the Blue, before its sale to the American Broadcasting Co., so

Airline Spots

MID - CONTINENT AIRLINES, Kansas City, on March 1 began three to seven spots weekly on KMOX KSD KXOK KROC WTCN KSO. Till forbid contracts were placed by Goodkind, Joice & Morgan, Chicago.

when that is deducted the figures show that NBC's gross rose from \$48,512,335 in 1943 to \$56,994,065 in 1944, an increase of 17.5%.

New production peaks in radioelectronic equipment used in the war effort, new records in radio communications and completion of more than 100 research projects for the armed services, are claimed in the annual report.

War products delivered by the RCA Victor division during 1944 set an all-time record, exceeding 1943 deliveries by 16%. More than a thousand engineers have been engaged in research, development and production of radio and electronic equipment for the war effort, resulting in the building of more than 200 new types of electron tubes and more than 350 types of apparatus not manufactured by anyone prior to the war.

For security reasons many developments cannot be revealed but it was disclosed RCA Victor designed and produced many radio altimeters allowing more effective night operations through fog and other bad flying conditions and for other aviation purposes.

One of the major achievements

in the field of electron tubes was the development of additional miniature tubes and other types to perform new functions. Many postwar radio products will be considerably smaller because of these miniature tubes and they make possible greater designing flexibility.

Special electron tubes have enabled construction of a television transmitter operating at frequencies up to 300 mc, a wavelength of one meter. This is the first time a transmitter with a power output of 5,000 w has been devised for video broadcasting on a frequency so high in the spectrum. A highly efficient optical system for projecting television pictures has been designed which will, in home application, produce brighter pictures as large as 18 to 24 inches.

During 1944, NBC broadcast 2,-173 programs originating in foreign countries, more than 400 over those broadcasts in 1943. The foreign staff numbered 58. It was 36 last year. RCA communications handled 150,000,000 words of radio traffic, largely related to the war. New direct circuits were established with India and Gambia, British West Africa. Direct service with Paris also was resumed. At the request of military authorities stations were established and operated in Naples and Southern France.

Stockholders at their annual meeting May 1, will be asked to approve the RCA retirement plan, adopted by the board of directors and effective since Dec. 1, 1944.

29% of Station Personnel in Services

7,918 Men and Women From 900 Outlets Now in Uniform

BROADCASTING stations have given more than 29.69% of their personnel to the armed services, the annual survey conducted by BROADCASTING Yearbook disclosed. This does not include employes of networks. Neither does it take in the hundreds serving the Government in civilian capacity.

On the basis of statistics compiled from questionnaires, 7,918 men and women, representing more than 900 stations, are wearing uniforms of the services. Only six stations reported no personnel in the fighting forces.

Including the several hundred with OWI, WPB, OPA and in civilian capacities with the Army, Navy, Marine Corps, Coast Guard and Maritime Service, it is conservatively estimated that radio's wartime contribution in manpower exceeds 40%.

A year ago slightly more than 23% of radio's personnel was in uniform [BROADCASTING, Jan. 31, 1944]. Only 5,813 were listed in the 1944 Yearbook. Although the 1945 Yearbook, now in distribution, does not list radio personnel in service, the survey was conducted in conjunction with Yearbook information.

Casualties Double 1943

Casualties have increased more than 100% in the last year. Whereas the 1944 Yearbook listed 28 uniformed former employes killed in action or dead as a result of accidents, the 1945 Yearbook lists 57 dead, and 29 missing, as against only seven reported missing a year ago.

Three radio correspondents have met death in battle zones. They were Raymond Clapper and Frank Cuhel of Mutual and Tom Treanor of NBC.

Scores of radio men have been decorated or cited for bravery and activities beyond the line of duty. Heading many of the key departments of Army and Navy are radio men who left their civilian jobs to don the uniform of the fighting forces.

Of the stations reporting personnel in the armed services, KNX Los Angeles leads with 137. Second is WLW Cincinnati, reporting 92 in uniform. WGN Chicago ranks third, with 73 of its former em-

Average 8.45

Average per station is 8.45 persons in the armed services.

The radio manufacturing industry has given more than one-third of its employes to the uniformed services, according to a survey conducted by the Radio Manufacturers Assn. Of 86,173 employed in radio manufacturing in 1940, the RMA reported 36,374 are with the fighting forces. Of that number 34,446 are men and 1,928 women.

BROADCASTING statistics do not include the thousands from advertising agencies, production, transcription, talent and kindred allied services who are serving the armed forces.

Rationing Complexities Explained on NBC Show

COMPLEXITIES of the rationing system, and problems relating to food conservation and nutrition are explained in Nation's Rations, thrice-weekly quarter-hour public service program which started on NBC Feb. 26, with the network contributing the time, and General Mills Inc. furnishing "Betty Crocker", its home economist, as speaker, and scripts by GM's Marjory Husted. Government representatives explain point rationing and new developments in the food situation. Program originates from Chicago with pickups from Washington, and New York.

With pickups from Washington, and New York. While there are no commercials for General Mills, program offers indirect promotional value as Betty Crocker is associated with General Mills for her Friday afternoon programs for Softasilk Cake Flour, and a Saturday morning show, both on NBC. Name is used for GM products, such as Betty Crocker soup.

WMPS News Policy

IN ADDITION to its recent decision to remove middle commercials [BROADCASTING, Feb. 19] WMPS Memphis has announced adoption of a new policy to make news programs more interesting. In an effort to change the set format of news periods, the 8:15 a.m. news will henceforth be titled Over the Coffee Cups, with Bob Neal and Bob Greer of the WMPS staff giving the news informally, as though it were being discussed by a couple at breakfast. Stories will pass from one to the other, at all times following copy of the news dispatches.

Page 24 • March 5, 1945

INCE late November, KYW listeners have been welcomed to "Harmony Hall" every Wednesday evening, at 7:30. Strawbridge and Clothier, one of America's great department stores, sponsors thirty minutes of delightful music by a 25-piece orchestra, a mixed chorus of sixteen voices, and guest soloists.

"Harmony Hall" is the first program of its kind to be sponsored by a Philadelphia department store. KYW was the natural choice for this production, offering as it does the usual Westinghouse combination of fine facilities.. equipment, talent, producers, announcers, and engineers.. for major programming. These concerts are notable additions to other distinguished local programs, as well as NBC productions, on KYW.

The living-room chair is now a front-row seat for "Harmony Hall" every Wednesday evening at 7:30, in the thousands of homes in Philadelphia and its environs served by Strawbridge & Clothier and KYW.

WMT covers 126,500 square miles . . . reaches 3,500,000 people . . . an area whose population represents the bulk of Iowa's \$1,500,000,000 yearly income.

You reach the listeners attracted by the powerful Columbia Network programs, plus the ingenious, personalized programming designed to appeal to the folks of this area.

You reach more of the important markets in Iowa ... because WMT is located approximately in the center of their concentration, covering an area 320 miles in diameter ... touching 5 states.

The rates? They're the lowest in Iowa per radio family!

WMT... "The Buckle on the Corn Belt"... the simplest, least expensive, most effective way to reach the rich "Corn Country Folks of Iowa."

Small Market Group Selling Advantages Cited by Keystone

Report Confirms NAB Panel Findings on Rates, Programming, Market Data, Salesmanship

ANALYZING the small station picture, the work of the NAB Small Market Stations Panel was praised this week in a special report issued March 5 by the Keystone Broadcasting System. The report reviews parallel findings and similar conclusions on small market stations as a result of individual studies made by the NAB Panel and KBS, and follows by a few days publication of the NAB recommendations of the Small Market Stations Panel, of which Marshall Pengra, general manager of KRNR Roseburg, Ore., is chairman.

The KBS brochure issued on the study, titled "With a Bow to the NAB Small Market Stations Panel," corroborates the NAB Small Market Panel on the questions of: 1) group selling; 2) rates; 3) programming; 4) market data; 5) selling.

Timebuyers' Difficulty

On the subject of group selling, the KBS report states that "one sore thumb to the buyers of time has always been the difficulty in dealing individually with small markets. As compared with major metropolitan outlets, the time purchased in beyond-metropolitan markets is much smaller. In the making of smaller contracts individually, the KBS report continues, "the bookkeeping and headaches and administrative expense have been out of proportion to the billing involved. The advantage is obvious. Instead of many separate matters with many discussions involving many contracts, the timebuyer may reduce the business to a single operation under the group selling plan. The group selling plan is the base of the Keystone operation." KBS report states the group selling method for small market stations is the solution of Lewis Avery, NAB director of broadcast advertising.

Regarding rates, the KBS report again parallels the NAB Panel, pointing out that the aim of KBS has been to establish a reliable standard and equitable rate scale, enabling the advertiser to purchase coverage of small towns and rural areas at costs comparable with those in larger cities.

NAB and KBS reports on programming are strikingly similar, both emphasizing the importance of local programming and the advantage of the local station in comprehending the catering to the local audience.

More and better market information data is advised both by the NAB Panel and KBS, the latter pointing out in its report that for the past four years it has provided agencies with data scientifically compiled on the small market picture generally, and specifically on the 208 KBS affiliates.

On the topic of selling, the KBS analysis agrees with the NAB sales suggestions, adding that the modern methods instituted by KBS and its affiliates, on presenting facts and presentations, has met with highly favorable response among agencies and timebuyers.

In conclusion, the KBS report states that: "If there is any Back Seat in the national radio advertising picture, it need not, it will not be reserved for Small Market Stations!"

Harrison to Capital

APPOINTMENT of Al F. Harrison as special representative with headquarters in Washington was announced last week by Hugh Baillie, president of United Press. Mr. Harrison, who arrived in Washington Wednesday, has established offices in the National Press Bldg. He will deal with both radio and newspaper activities. For the last 10 years Mr. Harrison has been manager of radio sales, with headquarters in New York. He created the UP radio wire in 1935 and built it into a nationwide service, covering all 48 states and the District of Columbia.

Canceled by Canada

AT LEAST three Canadian network shows are being canceled earlier than the expiration of their contract, on the ground of budget controls and expenditure of more advertising appropriation than allowed under Canadian regulations. The shows affected are Quaker Oats' Brewster Boy which terminates on April 13, Lehn & Finks Hind's Creams Blind Date which terminates on March 26, and Fruitatives' Double or Nothing which terminates on March 31.

\$139,553.50

PROCTER & GAMBLE Co. show Truth or Consequences on NBC last Saturday celebrated its fifth birthday. Since it went on the air March 3, 1940, under the direction of Ralph Edwards, the program has several times demonstrated radio's pulling-power in the human interest field. An appeal for contributions to the March of Dimes campaign has to date drawn a total of 256,506 mailing pieces representing gifts totaling \$139,553.50—said to be the largest single contribution to the fund. Show will broadcast beginning March 17, while being filmed for a movie. Agency is Compton Adv., New York.

MASTER CONTROL

where and when it counts

As a clear channel station, our job is to be heard where no other sta-

tion is heard, to reach people in rural America heretofore reached only by their county weekly newspaper.

This means signal strength and programs with a purpose.

Our audience needs weather reports as quickly as we can get them.

They want market reports, stock and grain prices, news from the government, as well as news from the war fronts where their stalwart sons fight alongside other stalwart sons from the great cities of America.

Thousands upon thousands of farmers set their clocks, come and go to and from the fields in relation to the service programs WSM brings them. They've come to expect WSM service as confidently as they expect their next

> meal. This is the result of twenty years of broadcasting to rural America. This is, we believe, another demonstration of the need and purpose of clear channel broadcasting. This is WSM.

Worldwide Audience Hears MacArthur Turn Over Government of Philippines

A WORLDWIDE audience listened Feb. 26, 10 p.m. (EWT) as Gen. Douglas MacArthur turned the civil government of the Philippines over to their President, Sergio Osmena. All four

mena. All four networks broadcast MacArthur's address and a portion of the ceremony. O W I shortwaved the broadcast around the world. CIAA beamed it to Latin America.

For 24 hours Col. Schechter preceeding the ce-

remonies, troops guarded land lines running 150 miles from Lingayen Gulf to Manila as a precaution against Japanese cutting the wires. As an added safety measure, very high frequency shortwave was used from the palace to the radio ship *Apache* lying off Luzon. [BROAD-CATING, Feb. 26]. To lessen the possibility of Japanese jamming the airwaves, networks were alerted for the broadcast, but were restrained from using any pre-announcements or teasers until 9:30 p.m.

Beamed to U.S.

A Signal Corps mobile unit also was in operation, shortwaving directly from the scene of the ceremonies to the *Apache*. Press Wireless used its transmitter for voice. Broadcast was beamed both to Press Wireless in Los Angeles and to RCA in San Francisco for a choice of the better circuit.

Lt. Col. A. A. Schechter, ex-NBC news and special events director, now radio public relations officer attached to Gen. MacArthur's staff, handled radio details from the Philippine capital. He has just been promoted to that rank. Col. E. M. Kirby, former NAB public relations director, now chief of the radio branch, Bureau of Public Relations, War Dept., contacted networks, individual stations and other radio facilities from Washington.

Arthur Feldman, Blue correspondent, introduced the General on the air, standing in for Clete Roberts, Blue representative wounded on Leyte [BROADCASTING, Nov. 6]. Roberts had been urging Gen. Mac-Arthur to broadcast on Blue, but MacArthur pointed out that War Dept. forbade exclusive broadcasts. However, the General promised Roberts that when he made his next broadcast, Roberts could present him. As Clete Roberts is still invalided from his wounds, Feldman did the honors.

To carry the broadcast, Blue canceled the first 18 minutes of the Guy Lombardo program sponsored by Chelsea cigarettes, picking up the final 12 minutes of the halfhour show. MBS also aired the Philippines ceremony for 18 minutes, killing the quarter-hour sustainer, Anita Ellis Sings, and cutting the opening three minutes from Paul Schubert's newscast, a Mutual coperative program.

CBS and NBC each took 15 minutes of the MacArthur program, the latter canceling the half-hour Carnation Milk *Contented Hour*.

Instead of canceling its commercials, CBS moved them back a quarter-hour, broadcasting Lady Esthers' Screen Actors Guild 10:15-10:45 p.m. instead of the usual 10-10:30, and airing the Johnny Morgan show for Ballantine 10:45-11:15 p.m. The 11 p.m. news program was moved back to 1:15 for which CBS dropped the repeat of Armour's Hedda Hopper program.

Standard Radio Speeds Current Disc Releases

UNDER new stepped-up schedule, Standard Radio Inc., national transcription library service, will provide almost immediate delivery of current popular releases to its radio station subscribers. In making announcement, Jerry King and Milt Blank, co-owners, pointed out, "This means that new tunes included in the 80 numbers Standard Radio Inc. sends out every month will get to our 400-odd subscribing stations before their listeners even have a chance to request them."

All recording of other types of music will be done to cover a period of from six months to a year from date of actual recording, thus allowing processors, who are loaded with Army work, more time to get firm's releases out. Standard Radio Inc. is also starting policy of recording full libraries of orchestras at one time, then holding releases until they are needed. Move is in direct opposition to regular transcription policy which has been to avoid tying up large amounts of talent money over an extended period of time.

Squibb Reappoints Agency

E. R. SQUIBB & Sons New York, has reappointed Geyer, Cornell & Newell, New York, as agency for radio advertising, the appointment involving for the present handling of Squibb's CBS program, which is being replaced with a new show. *Jimmy Carroll Sings* [BROADCAST-ING, Feb. 26]. BBDO New York, which has handled the CBS period continues to handle institutional copy in magazines and a new campaign on the Angle tooth brush, launched in magazines and newspapers.

CBS School Plan

PLANS to portray North American history and life on a program tentatively titled *The American Story* were outlined at a recent meeting of the National Board of Consultants of CBS' American School of the Air, to discuss 1945-46 plans for the educational series. Teachers' Manual, the program's guide book, has reached a distribution of 200,000 copies.

SESAC Offering Library Service Selections of Affiliated Music Publishers To Be Included

ENTRANCE of SESAC into the transcription libarary field was announced last week by Paul Heinecke, president of SESAC, which has more than 900 station licensees for the use of its music. Comprising American folk music, western, hillbilly and cowboy songs, hymns, gospel music and light concert music, the new library will be made up of selections from the catalogs of music publishers affiliated with SESAC, most of them not available in the other library services.

Vocalists and musicians performing for the SESAC Transcription Library include: Charlie Magnante, accordianist; Eddie Smith, singing cowboy; Avenir de Monfred, organist and composer; Frank Novak, master of more than 30 instruments known as the "Stokowski of Corn"; Bert Hirsch, concertmaster and first violinist of many radio orchestras; Rosalie Allen, vocalist and yodeler.

"The use of such talent on transscriptions," Mr. Heinecke said, "affords the smallest station the opportunity to huild programs comparing favorably with live talent".

A low price has been set for the library service, he said, to make it available to all stations. Transcriptions are being recorded by Columbia Recording Corp.

Casite's Big List

CASITE Corp., Hastings, Mich., on March 14 begins an announcement campaign of 10 to 14 spots weekly, using 160 to 175 stations. Account is placed through Keeling & Co., Indianapolis.

WIP Philadelphia is canceling all singing commercials opening, occurring during, or following its newscasts.

SURROUNDED by flood waters of the Tombigbee River for the second time within a year, the antenna tower and runway for the transmission line of WCBI Columbus, Miss. are visible. Base of WCBI tower is on a concrete foundation 15 feet above ground. WCBI engineers used boats to read antenna meters, visible above the water.

PIGGLY Wiggly Stores, San Antonio (local grocery chain), has arranged for sponsorship of H. V. Kaltenborn on WOAI San Antonio. Contract is for 26 weeks.

OWI CONTRADICTS TABER'S CHARGES

A STATEMENT explanatory of the OWI's formation and procedure and calmly contradictory of the flagrant charges made by Rep. Taber (R-N.Y.) on the House floor Tuesday, was issued by Neil Dalton, director of the Domestic Branch of OWI.

Rep. Taber charged that NBC and CBS are "under the absolute domination and control of the New Deal administration" and that Mutual "is just hanging on". The three networks, he said, are closed to administration critics. The OWI was declared to be "attempting to destroy freedom of the press" and to be preventing the press "rom obtaining information about the Government. He also declared FCC pressure has nearly destroyed the freedom of radio. A letter from Elmer Davis, OWI director, to OWM Director Byrnes which Rep. Taber introduced, precipitated the outburst.

Mr. Dalton pointed out that OWI was created at the insistent demand by press and radio for better coordinated government information and that after long dealing with OWI they know it is not engaged in censorship. The letter referred to, Mr. Dalton said, was written to make procedures clear to all Agencies "to insure accuracy of the greatest possible degree and to avoid confusion as far as possible. Referring to James R. Brackett, deputy director of OWI, whom the representative said wrote the letter for Mr. Davis and whom he said was inexperienced, the OWI answered it "knows Mr. Taber is mistaken".

LENGTHEN BREAKS FOR NBC CHIMES

EFFECTIVE April 2, all NBC stations will utilize the NBC chimes at their station breaks. On the same date the interval between NBC's network programs will be increased from 20 to 30 seconds. Changes are results of a discovery by Niles Trammell, NBC president, at an affiliates' meeting that about 30% of the network's stations did not use the chimes at all and most of the others only some of the time, because the 20-second interval did not leave sufficient time for a local chain-break announcements. Mr. Trammell acted; told the stations; they reacted. Now the network's audible trademark will be sounded from coast to coast.

College Conference

J. HAROLD RYAN, president of the NAB; Augustin Frigon, general manager, CBC, and Frederic R. Gamble, president, AAAA, are among the members of the advisory committee of a Conference of Radio and Business sponsored by the School of Business, College of the City of New York, it has been announced by Harry Noble Wright, president of CCNY and chairman of the committee. Conference, to be held in April, will feature discussions of radio-business topics. A series of awards will be presented for "skill and craftsmanship in the effective creation of a radio program or promotion plan." Dr. Robert A. Love is director of the conference; Dr. John Grey Peatman is chairman of the awards group.

Microwave Tests CHURCHES PROTEST Are Held by AT&T

Annual Report Speculates **On Postwar Possibilities**

CONSTANT trend of radio toward shorter waves as techniques of generation and detection are devised is noted in the American Telephone & Telegraph Co. annual report.

These microwaves can be formed into beams like searchlight beams and penetrate darkness, fog, dust and rain, the report continues. Relay stations make possible transmission along the earth's surface beyond the horizon.

Relay Tests

Communications possibilities of microwaves appear promising and their use is being explored as a supplement or alternative to wires and cables for telephone and television transmission, the report says. Bell has obtained experimental licenses to test a radio relay system between New York and Boston.

Western Electric Co., manufacturing branch of the system, last year made more than a million airplane radio transmitters and receivers as well as vast numbers of pieces of war communications and electronic equipment.

Bell System operating revenues were \$1,769,705,000, an increase of \$121,628,000 or 7.4% over 1943. Net income was \$8.54 per share compared with \$9 in 1943.

Swing's 114 Sponsors

IN HIS FIRST month as a Blue cooperative program, Raymond Swing has been sold to 114 sponsors on 105 stations. Sponsors include 21 department stores, 17 grocery concerns, 11 breweries, 7 tire companies, 5 automobile distributors, 5 drug stores, 4 beverage concerns, 4 men's clothing stores, 4 dairy products companies, 3 furniture houses, 3 jewelry stores, 2 newspapers, 2 shoe companies, 2 candy stores and 14 miscellaneous concerns.

Tintex on 160

PARK & TILFORD, New York, resuming promotion of all-fabric Tintex tints and dyes after the usual tex tints and dyes after the usual mid-winter hiatus, last week start-ed the first schedules in a spot radio campaign to cover some 160 stations in 33 States. The last drive, con-cluded in mid-December, included 125 stations. All types of time have been purchased with special emphasis on established local program features. Newspapers, home eco-nomics magazines and trade publications are also used. Agency is Charles M. Storm Co., New York.

KGW Backs Bond Sales

KGW Backs Bond Sales THE TANKER "Sully's Hill" was chris-tened at Kaiser's Swan Island yard by Barbara Nelson, first grade teacher in Portland's Alameda school, repre-senting pupils of the school who bought \$78,000 worth of Bonds in the Sixth War Loan Drive. KGW Portland sponsored the contest over its weekly Schools at War program in conjunc-tion whit the Oregon War Finance Committee, Launching was recorded and rebroadcast.

NEW WPEN POLICY

WPEN Philadelphia, in a move to give greater public service and to permit the equitable apportionment of time among all church groups, has canceled all contracts for religious broadcasts effective Easter Sunday, April 1. Religious broad-casters have organized in open protest to the new policy claiming it is an abridgement of free speech and religion. New policy means loss of approximately \$150,000 a year in revenue.

in revenue. Entire broadcast time on Sun-day 7:30 a.m.-11 p.m. now is oc-cupied by religious broadcasts, most of them on a commercial basis and with comparatively few re-ligious organizations represented. Under the new policy time for a substantial schedule of religious programs by all faiths will be made available without cost. The church people themselves including some people themselves, including some of those now on the station, will decide what programs and which types shall be presented.

Objections to the new policy have been voiced by representatives of 16 radio gospel hours who charged that cancelation by WPEN of their contracts constitutes a threat to freedom of speech and religion. Meeting at the Benjamin Frank-lin Hotel Feb. 26, the ministers formed the Assn. of Philadelphia Gospel Broadcasters and announced plans for a mass protest meeting at Convention Hall March 15.

"We do not want the Govern-ment to control religion or to con-trol radio," the new association declared in resolution, "and for the same reasons we do not want private concerns to exercise any con-trol whatsoever. 'Free time' is a joke, because the stations are not going to give the best spots to re-ligion. The heart of Sunday night can be had only by buying.

Ralph Weinbaum

RALPH WEINBAUM, 40, vice-Grey Adv., New York, died Feb. 23 in a New York hotel. He had been with the agency 14 years. He leaves his wife, son, mother, and brother.

Pulse Moves

PULSE Inc., New York, market research firm specializing in radio audience measurement, has moved from 500 Fifth Ave. to larger quarters at 110 Fulton St. Telephone is REctor 2-6863.

Gratitude

EXPRESSION of gratitude, in the form of a resolution adopted concurrently by the Senate and House of Repre-Senate and House of Repre-sentatives of Oregon, came to the KGW Portland staff on the occasion of Lincoln's Birthday, when the station's staff journeyed to Salem to take part in the traditional Lincoln Day celebration at the State House producing a half-hour live show. On Feb 20 those on the program a half-hour live show. On Feb. 20 those on the program received copies of the joint resolution thanking the KGW participants for their time and effort.

... and here's one good reason why!

It's the Western Electric Synchronizer—announced in 1940 as a real contribution to FM —now proved outstandingly successful in years of operation.

In Western Electric Synchronized FM Transmitters, the mean carrier frequency is maintained continuously and precisely by a single low temperature coefficient crystal.

The Synchronizer compensates immediately

and automatically for a change in the mean frequency of the modulated oscillator arising from any cause. It is uncannily accurate in keeping stations on frequency.

Developed by Bell Telephone Laboratories, the Synchronizer is a good example of the advanced design — and the leadership — you can count on in all equipment manufactured by Western Electric.

Buy all the War Bonds you can...and keep all you buy!

Meeting Attacks on Radio Advertising

Duane Jones Executive Points to Benefits Of Air Medium

TO COMBAT attacks which threaten the welfare of radio, Ralph Smith, general manager of Duane Jones Co., one of the five most important timebuying advertising agencies, suggests that steps be taken immediately to give the industry an official voice, not only to speak authoritatively in its own behalf but to promote the best interests of radio as an advertising medium.

The crusade against middle commercials launched by the St. Louis Post-Dispatch and ardently supported by many other leading dailies is a case in point, Mr. Smith states.

As quarterback on the team of specialists that make up the Duane Jones Co., 65% of whose advertising is now placed on the air, Mr. Smith is responsible for more than 2.000 commercials that are broadcast each week, 18% of them middle commercials. Clients of the agency sell approximately \$75,000,-000 worth of goods annually with these commercials as the spearhead of their selling effort. In fact, 66% of the agency's current billing, according to Mr. Smith, has resulted from earned sales increases gained primarily by radio broadcasts for the 55 products its advertises.

"Although a code of fair practice exists in radio," he said, "it has never been implemented by the appointment of either a spokesman or governing body with authority to meet current problems as they arise. Self-regulation, to be effective, must be backed by authority especially authority to combat campaigns or movements calculated to turn public opinion against radio as a forerunner to onerous legislation which if passed might completely destroy the value of air advertising through arbitrary rules governing commercials.

"I wonder," he asked, "if the papers conducting this campaign could be as interested in eliminating bad taste in commercials as they

Esso Campaign

ESSO Marketers (Standard Oil Co. of N. J.), has begun a campaign on *Esso Reporter* news programs on 38 stations, and in other media, warning motorists that neglect will speed automobiles to the scrap heap, underscoring the advertising theme for the past three years "Care Saves Wear." Copy emphasizes "Save That Car." Agency is Marschalk & Pratt, New York.

are in preparing for postwar liquidation of radio as an advertising competitor?"

A statement issued regarding this controversy by Paul Porter, FCC Chairman, was interpreted in some trade papers as implying that if radio itself did not enforce good taste in advertising, Congress might, since the FCC lacks authority to prescribe program content.

"So far," said Mr. Smith, "not a single voice has been lifted in behalf of radio in this present campaign, despite the code and strict network and station control of commercials. Although politically inspired censorship of radio advertising would be a direct threat to the source of revenue that insures radio's very existence, nevertheless not one network or major executive has spoken affirmatively for advertising in this controversy. And for that reason it seems imperative that an authority be set up which

can defend the industry when unfairly attacked as well as undertake its wise promotion as an advertising outlet.

Attacks Sporadic

"Considering that attacks against the industry are sporadic," he said, "the main function of an industry policy-forming organization would be to advance radio's value as a public service medium, in the advertising field as well as those of

- entertainment, information and education. In this respect, the press has wisely set up operating ma-
- chinery, and as a result there reaches the business world a constant flow of well organized, selling copy, setting forth the advantages of newspaper advertising over
- other media. The time has come when radio should be doing the same thing. Time should be purchased on the air and proselyting
- for postwar radio advertising should begin now, possibly with 15minute programs, the commercials of which would tell how radio is helping to solve the world's mer-

chandising problems. "Neither censorship nor legisla-

tion is needed to make middle commercials and other forms of air advertising complaint-free. All that is required is closer attention to local programing. No one likes, of course, to hear a Chopin concerto interrupted by a middle commercial of hillbilly music. If, therefore, agencies and advertisers would work with stations to get specific information regarding the content of programs, commercials could be tailored to fit into these programs

JOHN E. LINGO & SON, INC. Est. 1897 CAMDEN, NEW JERSEY so that listener resistance would be nil. The real evil, then, is not bad commercials so much as it is conflict between commercials and program content. In the Duane Jones Co., we conduct program surveys to make certain our commercials fit into the shows."

Spots Everywhere

Specializing in the packaged goods field with radio campaigns that deal in the arithmetic of advertising, Mr. Smith says the agency places for its client, the Manhattan Soap Co., more than 1,000 commercials per week in 75 newscasts which that company is currently using. For Mueller's macaroni products the agency places close to 200 commercials per week on news broadcasts conducted in 18 important cities east of the Mississippi by Mueller's staff of 12 top newscasters.

Another client, Pierce's Proprietaries, is among the large users of one-minute spots, of which the agency places approximately 1,000 per week. The advertising value of these broadcasts, both news and spots, is not only indicated by sales

MR. SMITH

rises for the products, Mr. Smith states, but also in the constant flow of favorable fan mail about them.

RADIO'S FORGOTTEN MAN

THE FOLLOWING is suggested by Mr. Smith as the type of commercial that might be used on sustaining or specially purchased time by the radio industry to sell its value as an advertising medium.

ANNOUNCER—Friends, just take a moment and look around your home for the various items that have made your life easier, happier, and really fulfilled your daily needs. Take a look at your medicine chest. Take a look at the groceries in the pantry. Take a look at the furniture in your home.

Dozens and dozens of these things, you'll find, were recommended to you over your radio. That's where you heard about them. And you're glad you did.

So you see, in addition to bringing you fine music, pleasant entertainment, latest news and valuable educational features, radio brings you another thing of value—actual radio advertising in commercials that tell valuable news about the developments of American industry for the American home—and radio advertising explains just how they can benefit you.

So today, let's tip our hats to radio's forgotten man-the radio advertiser. He not only sponsors radio's finest programs but the products he manufactures can make life pleasanter for you.

Malone Back at Home

WILLIAM E. MALONE Jr., recently discharged from the Army, has returned to American Home Products Corp., in a new position advertising and

sales promotion manager of Affiliated Products Inc., the cosmetic unit. Before entering the service Mr. Malone was assistant to the vice-president of AHP's Kolynos Division, and had

Mr. Malone AHP's Kolynos Division, and had previously served as assistant advertising manager of the Kelvinator Division, Nash-

Kelvinator Corp.

Ellis On Loan

GENERAL Motors Corp. has "loaned" Ray C. Ellis, former director of the Radio & Radar Division of WPB, to the Johns Hopkins Applied Physics Lab., Silver Spring, Md., Washington suburb, for a special assignment in highly secret and specialized electronics research.

Philippine Service

PRESS WIRELESS on Feb. 25 resumed its Manila circuit, which had been discontinued Dec. 31, 1941, when the Japs invaded the Philippines. Station will handle all forms of radio communications, including radiotelegraph, radiotelephone and radiophoto, Joseph W. Chaplin, director of communications, announced.

Join Marlin List

WNOX Knoxville, WHBF Rock Island and WIBC Indianapolis have been added to the list of stations carrying the spot singing announcements for Marlin Firearms Co., New Haven, for razor blades and shaving cream. Contracts were placed through Craven & Hedrick, New York.

Proprietary Office

PROPRIETARY ASSN. of America has established an Office of Pharmacal Information under the supervision of Dr. Frederick J. Cullen, executive vice-president of the PAA. OPI, with headquarters in New York and Washington, will provide information on the packaged medicine field to physicians, health commissioners, health groups, teachers, drug associations and to all media of information.

BROADCASTING . Broadcast Advertising

Mind if We Salute a Couple of Great Pioneers?

SOME of us here at the Blue, while old hands at radio, are new to certain phases of this network business.

Not exactly Johnny-Come-Lately's, though. The New Blood at the Blue spent many a year in the trenches, so to speak, at the agency end of radio. We played a part in helping advertisers build some of the present top-rating shows.

But now we're in the saddle of a network trying to make it more useful to more people and, at the same time, trying to build in values that will make it possible for advertisers and agencies to sell *more* goods at *less* cost.

And the deeper we dig in, the more we realize how fortunate we are that our predecessors had level heads.

Broad Vision Avoided Traps

Ever think how sour radio might have gone with the wrong handling? We figured out the other day, for example, that the amount of listening in a single week to Blue Network shows is the equivalent of 475 million people.

And that's only one week on one network. Ours. Our predecessors, who have been in the business longet, have even larger audiences, so the sum total of the three major networks will probably run into a billion and a half or two billion. That is a lot of listening. A lot of opportunities through the years to make very bad mistakes from which no end of criticism would have arisen and about which the Government might have had to take violent action.

But the vision of the Paleys and Kestens and Sarnoffs and Trammells kept radio from falling into that trap.

Now comes a new era. During the war radio has become a vital instrument of communication, a greater personal friend to John Q. Public than ever before. And the job of serving an economy on-the-mend after the war is going to force radio into being a still better selling medium. So, armed with a radio system that's earned a brand new pedigree and with new jobs to do, we, at the Blue, are setting out to match our ideas against the old timers, and benefit by their experience.

We feel that we are making progress-a lot of progress.

We have put together what is generally regarded as the ablest program department in the network business.

We have added 8 new powerful, well-managed stations.

We have permitted broad freedom of expression to our news commentators, believing that in this way the Blue can make "freedom of the air" a reality.

We can point to the biggest ratings of any network on weekday mornings—a record that has been maintained every month for over a year.

All this progress helps build confidence and reputation and, in turn, these two ingredients help our advertisers sell more goods.

Now There Are Three Great Networks

Yes, the radio "picture" is changing—perhaps by as much as 33¹/₃ per cent—for many feel that where once there were only two great networks, now there are three. Shrewd Time Buyers are becoming increasingly aware of this and many now consider it sound postwar planning to have a good time period on the Blue tucked away.

Yep-we're building on the sound and firm foundation laid by the pioneers. God bless 'em.

THIS IS THE SELLE NETWORK

DCASTING

WEST DESCRIBES AD ROLE IN WAR

PAUL B. WEST, president of the Assn. of National Advertisers, speaking before the Advertising Club of Washington at the Hotel Statler last week, urged the use of the advertising medium as an aid to peace in bringing the facts before the public. Mr. West stated that the program to provide reemployment of veterans and problem of their rehabilitation will require the help of advertisers. As chairman of the War Advertising Council, Mr. West reviewed advertisers' help in selling more than \$800,-000,000 in War Bonds, calling it the "greatest sales job in all history." Mr. West pointed out that a public opinion poll conducted for the Assn. of National Advertisers has revealed that more than \$5% of the people interviewed are aware that private business is using much of its advertising to tell people how they can help in the war effort.

Plea for Seamen

Citing as an example of radio's wartime roll last December's shipping crisis, Mr. West recalled the plea for sufficient numbers of merchant seamen to man the convoys. At one Atlantic port, Mr. West said, 155 first mates were needed, and only 14 were on hand. To help alleviate the Merchant Marine manpower problem, the War Advertising Council sprang into action, Mr. West said, and as a result all the December and January convoys sailed on time.

The Council, Mr. West said, intends to continue the volunteer organization "after the shooting stops," dedicating the forces of advertising which it represents to the public service.

Hodgson, Marshall Join Ivey & Ellington, N. Y.

HYLAND L. HODGSON, and Charles R. Marshall, vice-presi-dents and directors of J. M. Mathes Inc., New York, have resigned to join Ivey & Ellington, New York. Now a vice-president and member of the board of directors at I&E Mr. Hodgson was one of the original group which organized the Mathes Agency. As vice-president in charge of service. his accounts included Ludens Inc. spot radio advertiser for Luden's cough products. Mr. Marshall who had been with Mathes since 1933 becomes a vice-president at I&E. Both will service accounts. A third Mathes execu-tive, Charles S. O'Donnell vicepresident in charge of marketing, who left the agency in January, will shortly open a public relations firm in New York, specializing in Latin American accounts.

Following the resignations by Messrs. Hodgson and Marshall, Mathes announced the election of Hurley G. Hust, account executive, to the vice-presidency; and two new account executives—J. Edson Poler, and Clay W. Stephenson Jr. Mr. Stephenson was at one time advertising director of Duncan Coffee Co., Houston, and president of Steele Adv., in that city. Mr. Poler was advertising and sales promotion head of Esquire Publishing Co., and recently held a similar post at Samter Bros., Scranton, Pa.

BROADCASTING . Broadcast Advertising

It's vital in a Library too!

THE POINT we're making here is—variety, combined with quality. A mighty important consideration in the life of a program director . . . and a station's balance sheet.

For the number of listeners and clients you'll attract is in pretty direct ratio to how well you vary your shows, and still keep them appealing.

That's where ASSOCIATED is your best bet!

From hillbilly to grand opera, from jive to popular

concert, from sacred music to modern dance . . . ASSOCIATED brings you all this and *showmanship*, too. Not just a few peaks and a lot of fillers, but topnotch entertainment value *throughout*.

The word is getting around fast: ASSOCIATED offers *most* hours of the best *radio* music! An endless stream of big-time, big-name, *big-audience* music...designed for maximum use, variety and sales power!

Get the facts without obligation. Write *today* for the ASSOCIATED LIBRARY booklet!

25 West 45th Street, New York 19, N.Y.

MOST Hours of the Best RADIO Music . . . Represented by Loren Watson, 400 Madison Ave., N.Y.C.

Delivered, via Radio

EVERY DAY, almost every hour of this war, history is made. Precedents topple like duckpins. Even at that swift pace, radio is adding to its laurels.

Last Monday, as a whole world listened, Gen. Douglas MacArthur delivered to President Osmena the liberated capital of the Philippines. It was a stirring event. After three years of Japanese occupation Manila was free and MacArthur had fulfilled his promise.

All American networks, in a pooled broadcast, carried the epoch-making ceremony. OWI relayed it over American shortwave stations and CIAA facilities carried it to the Latin-American nations.

Lt. Col. Abe Schechter, radio officer on Mac-Arthur's staff, arranged the broadcast, just as he had aligned hundreds of international pickups while director of news and special events at NBC. Acting for the combined networks was Art Feldman, youthful Blue war reporter, who had been at Abe Schechter's elbow during those years at NBC.

That broadcast is a harbinger of the job ahead for radio in the mopping-up phases of the war—and the writing of the peace. As nations are liberated, the world will eavesdrop. And when the map of the world is redrawn, radio will be there.

After the peace is written, it will become free radio's big function to help maintain the peace by keeping the world informed, and by overtaking the lies or half-truths of upstart aggressors.

Stop, Look—They Listen

THINGS ARE happening at a giddy pace over radio commercials. They may be getting out of hand. There's a lot of yipping about things that aren't germane.

Let's get the record straight. Some months ago WJR Detroit announced it would ban middle commercials in news programs. Even before that, the networks, goaded by their affiliates, had agreed to eliminate such ill-contrived devices as cow-catcher and hitch-hiker announcements (but they haven't to date). WWJ Detroit later threw out singing and transcribed spots. Then the *Post-Dispatch* in St. Louis loosed a haymaker against middle-commercials and objectionable sponsors of news programs. Behind the powerful editorial prodding of that newspaper the crusade has snow-balled.

All these efforts in the interest of better radio are fine.

But let's not go overboard. Some folk, in getting aboard the bandwagon, are overdoing it. One newspaper chain, itself in radio ownership, objects to radio saying "brought to you by" in its news broadcasts. That's getting to the below-the-belt region. Certainly no one properly can claim radio doesn't label news as to its source. Even the press associations and major newspapers now credit the networks for war news gathered by radio correspondents--top-flight newsmen in their own right. Stations credit their press associations (which they pay handsomely) with appropriate "bylines", not only because it's a good practice, but because it has prestige value.

The fact is that American radio is the best and the most progressive in the world. Radio advertising and copy techniques are better today than they were five years or five months ago. They'll be better five months from now.

Measure newspapers and magazines by the same standards and you'll get results by-andlarge, that are no better, if as good. There are many accounts on the best of the printed pages that can't get on the air. Mutual, newest of the networks, has just turned down a milliondollar contract from a national proprietary account. The money probably will be spent in newspapers and magazines.

Let's improve radio service. But let's do it on the basis that the great job now being done can be done a little better. Let's not be stampeded by zealots who don't know or don't care where to stop.

Write-of-Way

LELAND STOWE, the distinguished war observer, reports that a script he prepared for broadcast and submitted to the Army Review Branch in accordance with his commitments as an accredited correspondent was held up five days before release.

This in itself is lamentable, but possibly can be understood if one concedes that a military reviewer's task is a difficult one in the face of that inexorable "chain of command." But Mr. Stowe states also that during the period he was awaiting action on his piece, he was visited by a British army officer who asked him not to use the material.

The script was Mr. Stowe's comment on the Greek civil strife, an account predicated on his personal observations in the beleaguered land. It did not deal gently with the British position in the matter.

It is apparent from this circumstantial evidence that our respected Ally was intent upon a project of political censorship. The practice does not become Great Britain or any other nation which is in this war to unshackle the peoples of the world. This is not an isolated instance, nor does the cloak hang only on the shoulders of Great Britain. American officers heretofore have taken liberties in the name of military security.

Censorship, as we see it, is a two-edged weapon of war. It can supply information to assist our armed forces in prosecuting our cause; it can delete material which harms that effort by aiding the enemy. This is the line which has been followed by Byron Price, Director of Censorship, and it is granted generally that his administration of the difficult task has been an intelligent and informed one.

This policy merits study because the precedents established now may have far-reaching and serious effects on the availability of news at the peace conference. It must be, most agree, an open conference, with free discussion of the issues. The purpose of censorship in wartime is a noble one. It saves lives. It saves materials. But intolerable and misdirected censorship cannot save the world. Let's look now, as there is ample evidence that our leaders are looking, toward the time when the victors will foregather in an attempt to chart a better world.

Let's look and remember that a lasting peace cannot be written with a censor's blue pencil.

Our Respects To -

CLYDE MORTON JOICE

ITH 20 years in advertising work but no radio experience, Clyde Morton Joice in the beginning of 1940 left the agency

he was connected with to form Goodkind, Joice & Morgan. He immediately became immersed in the firm's radio activities and by the end of the same year the agency received an award from the Chicago Federated Advertising Club for producing the best local program in Chicago.

Today, Clyde supervises the creative radio efforts of the agency originated in 1938 by Lew Goodkind who had previously handled radio for Lord & Thomas for nearly a decade. Clyde had left Mitchell-Faust after 20 years to go into business for himself. Raymond R. Morgan, operating his own company in Hollywood, completed the new triumverate, managing its operations on the coast.

Born in Wells, Minn., Dec. 23, 1889, Clyde was graduated from Hyde Park high school in Chicago and then spent a year and a half handling inquiries for a correspondence school. His earnings enabled him to enroll at the U. of Chicago where among his fellow-students were Paul Hoffman of Studebaker, Ralph Rosenthal of Arthur Meyerhoff and Hilmar Baukhage.

After graduation from the University, Clyde entered law school but before finishing the socalled "Wilson depression" forced him to return to work. He entered merchandising—and stayed, first selling typewriters and then, in the spring of 1915, joining the advertising department of The Fair, Chicago department store.

Within a few months he was producing the greater part of the store's newspaper and direct mail advertising. Some two years later, he was made advertising manager, responsible for an annual budget of close to \$500,000.

Clyde entered the Mitchell-Faust Adv. Agency in 1920, soon becoming associate copy chief. In 1927, he was made copy chief, supervising such accounts as Armour & Co., General Motors Truck, Ward Baking Co. and Dr. West's Tooth Brush. He was named vice-president in 1933.

As president of Goodkind, Joice & Morgan, Clyde supervises an assortment of accounts including Planters Peanuts, Goldenrod Ice Cream, Hooker Glass & Paint, Iowa Soap Co. and Jewel Tea Co. The agency's success in radio after its first year has acted as a spur on its activities. Each of the partners has gone after business, travelling nearly 50,000 miles in a year, visiting radio stations, working with sales crews, making radio expenditures pay.

Clyde is the father of two children. His son, Lt. John Alden Joice, is with the Army Air (Continued on page 44)

A-101

I OVEMBER 19th, 1919–10:30 p.m. The Senate galleries were jammed by tense crowds. Hundreds overflowed into the corridors outside, unable to get into the Senate Chamber.

Four months of fiery debate on the League Covenant and the Versailles Treaty. Millions sat at home-wondering what *their* representatives had to say.

Today, the very same legislative body faces the very same momentous task. But today, in the Metropolitan area alone, hundreds of thousands of people have, in effect, front-row seats for the drama of democracy as it unfolds in the halls of Congress.

Because, through stirring re-enactment each Sunday from 3:30 to 4:00 p.m., WMCA takes its listeners—for the *first time in radio*—into those chambers where today's and to-morrow's history is created.

WMCA's "HALLS OF CONGRESS" is based directly upon the Congressional Record. With "chaff" removed by skillful editing, with human interest supplied by a special reporter sitting in on each session and with roles of legislators performed by professional actors . . . the pages of the Record spring to life.

No radio play can surpass, in vividness and meaning, these dramatizations of the week's debates in Congress . . . no "documentary" program can perform a greater service for Americans.

"HALLS OF CONGRESS" is available for sponsorship. Available to an advertiser who wants to be identified with a program that already occupies a unique place in radio . . . and in the minds of its listeners.

In the old days they fired a gun from The Citadel in Halifax, Nova Scotia, to tell the time.

Today the population listens to CHNS for the time.

NOTE: They Still Fire the Gun Keeping Up the Old Traditions!

Traditions, However, Don't Get Much Business. CHNS DOES—Try It.

630 KILOCYCLES 5000 WATTS Full Time BLUE NETWORK

EDGAR KOBAK, MBS president, was to leave New York last Sunday for a week business trip to the Midwest. He arrives in Chicago Monday and proceeds from there to Omaha accompanied by ADOLPH HULT, Midwest sales manager of Mutual, and DAN ORTH, MBS salesman, both of WGN, Mutual's Chicago station. Mr. Kobak will address the Omaha Adv. Club Tuesday evening. He will be back in Chicago Wednesday through Friday, returning to New York Saturday.

HUBBELL ROBINSON Jr., vice-president in charge of programs and production for the Blue Network, left Feb. 25 for a month trip to the West Coast, stopping off in Chicago en route.

ARTHUR WEILL, former daytime operations manager of WHN New York, has been appointed comptroller. He succeeds JACQUES VAN STRATEN, who has been elected assistant treasurer of MGM International Filns Corp., subsldiary of Loews Inc., WHN owner. WAYNE HUTCHINSON, former announcer with KSO and KRNT Des Moines, replaces Mr. Weili as daytime operations manager.

NAOMI FINE has joined WMCA New York as sales promotion manager, replacing HOWARD KLARMAN, who has been made account executive. Miss Fine goes to WMCA from CBS radio sales, working on promotion of CBSowned stations. Previously she was assistant promotion manager of CBS New York affiliate, WABC.

B. MARSCHNER has been transferred from MBS sales department to take charge of personnel, replacing GLADYS HARDING, resigned.

HERBERT E. TAYLOR Jr., former assistant director of sales of Allen B. DuMont Labs., Passaic, N. J., has been appointed director of transmitter equipment sales.

RICHARD F. FROHLICH, former assistant to the late ROBERT L. MURRAY, public relations director of ASCAP, has been placed in charge of the department. VIRGINIA SHEA has been named editor of ASCAP's radio program service.

HARRY A. COOPER, former West Virginia newspaper man and more recently with the sales department of WBLK Clarksburg, W. Va., has joined the commercial staff of WMMN Fairmont, W. Va.

DAN SHERIDAN has been named manager of CKMO Vancouver, replacing ROY WRIGHT, Mr. Sheridan is a former sportscaster on U. S. West Coast stations.

STATIONS. SPENCE CALDWELL, manager of CJBC Toronto, has resigned effective March 15 to become director of the transcribtion division of All-Canada Badio Facilities with headquarters at Toronto. Before joining CJBC he was manager of CKWX Vancouver. His new post returns him to the Taylor-Pearson-Carson organization with which he had been connected for 15 years prior to joining CJBC.

JEAN ELDRIDGE of the Chicago office of BROADCASTING and FRED KLEIN, timebuyer at Dancer - Fitzgerald - Sample, Chicago, have announced their engagement.

GERALD N. IRWIN, formerly with Joseph Katz Agency and Newell-Emmett. New York, has joined the sales department of WSGN Birmingham.

ROBERT MENAUGH, superintendent of the House radio gallery of Congress, on leave as executive officer of the War Intelligence Division. Bureau of Public Relations, War Dept., has been promoted from captain to major.

COMDR. YODER BACK AS KOA MANAGER

LT. COMDR. Lloyd E. Yoder has resumed his post as general manager of NBC's Denver station KOA, Frank E. Mullen, NBC vice-pres-

ident and general manager announced last week. Mr. Yoder, who took up his former duties at KOA last Thursday, relinquished the post over two and a half years ago to assume active service in the U.S. naval re-

Comdr. Yoder U. S. naval reserve. James R. MacPherson, who has been in charge of management in the interim, has been named assistant manager, in charge of all commercial activities. Robert H. Owen continues as assistant manager in charge of engineering.

Welcoming Mr. Yoder back to the company, Mr. Mullen said, "It will be a great pleasure indeed when hostilities cease that we are able to bring back into the service of the company so many men and women now in the armed forces."

A graduate of Carnegie Tech, and a member of its football team, Mr. Yoder served successively as radio editor of a Pittsburgh newspaper; announcer of WCAE Pittsburgh; NBC staff announcer; chief of NBC's West Coast press department, becoming KOA general manager in October 1939.

William J. Cord

WILLIAM J. CORD, 28, son of Errett L. Cord, owner of KFAC Los Angeles and former automobile manufacturer, died last Monday after an accidental fall from a penthouse balcony. Police said the young man called to friends, "see how strong I am," attempted a hand stand on the balcony railing and fell 28 feet to the marble floor.

SGT. RICHARD B. WESTERGAARD, on leave as vice-president of Scripps-Howard Radio Inc. and general manager of WNOX Knoxville, is now "somewhere in France," attached to an engineering combat battalion.

TOM GILCHRIST, manager of WTMC Ocala, Fla., is the father of a girl.

KEITH KIGGINS, Blue vice-president in charge of station relations, New York, is in Hollywood for conferences with **DON SEARLE**, western division general manager of that network.

ARTHUR H. CROGHAN, vice-president and sales manager of WJBK Detroit, has resigned from the station, retaining his interest as minority stockholder. He plans to spend a month in Mexico, arriving in Los Angeles around the first of May.

DON NORMAN, manager of NBC western division spot sales, has been transferred to New York.

JAMES A. KENNEDY, general attorney of All America Cables and Radio Inc., affiliate of International Telephone & Telegraph Corp., has been elected a vice-president. Mr. Kennedy was with the FCC from 1934-1941, serving the last four years as assistant general counsel.

MAJ. EDNEY RIDGE, general manager and owner of WBIG Greensboro, N. C., has been named commander of the North Carolina division of the Sons of Confederate Veterans.

HENRY P. JOHNSTON, vice-president and general manager of WSGN Birmingham, has been reelected to the board of directors of the Planters & Merchants Bank of Uniontown, Ala. Mr. Johnston also has been appointed class agent for the 1929 class of Washington & Lee U., Lexington, Va.

You cannot cover the tremendous New York market without using WBNX, because . . . WBNX reaches

HERE IS the famed "Voice of Savannah", Pvt. Clifford M. Clarke, of the American Forces Network, reputedly the most decorated announcer in the European Theatre [BROADCASTING, Feb. 26]. The former WSAV Savannah announcer has been awarded the Silver Star, the Bronze Star, and the Purple Heart with Oak Leaf Cluster.

V-D Program Survey

INDICATING an enlightened stand on formerly taboo health problems, approximately 40 stations when queried by the OWI Domestic Radio Bureau about carrying a program on venereal diseases with very few exceptions agreed they would if the program were in good taste presenting well-known experts and not in dramatized form. The query was a sampling to gauge the overall reaction. At the request of the Public Health Service a 15-minute disc has been prepared using one authority each from the Army, Navy and Public Health Service. It will be distributed to a large list of stations throughout the country.

Kaplan Now Major

PROMOTION of Ben Z. Kaplan to the rank of major has been announced by Mediterranean Allied Air Forces headquarters. Chief of the hometown section of MAAF public relations, Maj. Kaplan, 26, was formerly on WOAI San Antonio as a news reporter.

WTMV PURCHASED BY JOHNS FAMILY

PURCHASE of WTMV East St. Louis, Ill., by the Johns family of St. Paul and Chicago for \$105,000, from Carlin S. French, owner and general manager, was announced last week, subject to FCC approval. The station operates on 1490 kc with 250 w and provides service in the St. Louis market.

Under the agreement, Mrs. Penrose H. Johns would acquire 60%; Myles H. Johns 20%; Lt. William F. Johns Jr. 10%. Myles Johns would be executive director and Michael Henry, formerly assistant manager of WTMV, would be station manager. St. Louis is the home town of Mrs. Penrose Johns.

The transaction covers the pending 10 kw FM application of WTMV as well as all other assets. Myles Johns controls WOSH Oshkosh, holding 55% interest and William F. and William F. Jr. are identified with the ownership. William F. Johns Sr. is vice-president of WTCN St. Paul and is president of the Ridder-Johns Co., Chicago newspaper representatives. William F. Jr. is in the Army Air Corps.

Butler Acquires Control Of KTUC Tucson, Ariz.

ACQUISITION of control of KTUC Tucson, Ariz., by Burridge D. Butler, president and director, through purchase of 23 shares of treasury stock for \$2,300, was granted by the FCC last week to Tucson Broadcasting Co., licensee. Mr. Butler, president of WLS Chicago and also major owner of KOY Phoenix, already owns 138 shares (49.8%) of the KTUC stock.

cago and also major owner of KOY Phoenix, already owns 138 shares (49.8%) of the KTUC stock. Consent also was granted by the Commission to voluntary assignment of license of KPDN Pampa, Tex. from R. C. Hoiles, sole owner, to his three children, Harry, Jane and C. H. Hoiles, doing business as Radio Station KPDN, an equal partnership. Monetary consideration was \$1. Mr. Hoiles stated that he no longer was able to care for the station.

At the same action the FCC granted assignment of license of KQV Pittsburgh from KQV Broadcasting Co. to Allegheny Broadcasting Corp., owner of all stock of assignor. No money was involved. Allegheny Broadcasting, composed of a group from Pittsburgh previously had purchased the station from Hugh J. Brennen [BROAD-CASTING, Aug. 21, 1944].

Grove Must Pay Kastor \$15,000 in \$75,000 Suit

U. S. DISTRICT Judge Rubey M. Hulen on Feb. 22 awarded H. W. Kastor & Sons Adv. Co., \$15,000 for services rendered Grove Labs. during the period from April 2 to July 20, 1943. Damages of \$75,000 were denied. Through the winter of 1943 the Grove firm spent \$1,-414,000 advertising the new Four Way Cold Tablets. On April 2, 1943 the agency testified it solicited a \$500,000 advertising budget for the 1943-44 season. Kastor charged that although it was authorized to proceed, on July 20 Grove ended the agreement and notified Kastor that another advertising firm had been engaged. By that time 95% of its work on the advertising campaign had been done, the plaintiff declared. The court ruled that the agency had not completed a third of its services.

THOMAS A. CRABBE has resigned as copy and contact executive of Mac-Farland, Aveyard & Co., New York, to join Roy S. Durstine Inc., New York, specializing on package products. He came to MacFarland from Colgate-Palmolive-Peet Co., where he had served as assistant advertising manager. Ralph E. DeCastro is now copy director and account executive at MacFarland Aveyard.

MELVIN W. HUBBARD Jr., copy writer, formerly with J. Walter Thompson Co. and Campbell-Ewald Co., has joined Arthur Kudner Inc., New York.

EARL C. DONEGAN, group head in the service department of McCann-Erickson, New York, has been appointed a vice-president.

WILLIAM BOLTON Jr., for 15 years with McCann-Erickson, has joined the Philadelphia office of N. W. Ayer & Son, as account executive. J. Edward Ford, formerly with the Chilton Co., joined Ayer copy department.

R. H. L. BECKER, who recently resigned as director of advertising for the National Cash Register Co., Dayton, O., has become a partner in Hugo Wagenseil & Assoc., Dayton agency.

Grant Forms Firm

GENE GRANT, for many years account executive of NBC San Francisco and more recently of the Blue Network, has opened station representative offices at 1651 Cosmo St., Hollywood. Telephone is Hillside 7874. Firm will operate under name of Gene Grant & Co. Mr. Grant has been in radio since 1929, having started with KFI Los Angeles, and later going to NBC San Francisco. Upon separation of the Blue from NBC, he continued with the former network, transferring to Hollywood last August.

Independent

... were the Egyptians "hep cats?"

Although it is not known when the first clarinet was made, ancient Egyptians used a simple clarinet made from a hollow cane, with part of the cane forming the reed. Today, low-caste Egyptians play a double clarinet, similar to the ear-lier instrument, but fashioned of two canes glued together. This same instrument, without any changes, dates back at least 5,000 years.

Learning "by ear"

The triple clarinet, a later variant of the Egyptian instrument, is still used in Sardinia. A constant flow of air is necessary to play the Sar-dinian Clarinet, and instructors have devised a unique method to teach breathing. The prospective virtuoso blows through a straw into a glass of water. If the bubbling stops while the pupil inhales, his master boxes his ears.

Enter the "licorice stick"

The modern clarinet was developed from the French chabemeaux, a short, cylindrical wind instrument, in the late 17th century. Shaped like a jointed oboe with a bell and two keys, it was never played at the same time as the oboe-for the simple reason that both were played by the same artist.

In 1836, Adolphe Sax straightened out this offshoot of the oboe, and introduced the present day "licorice stick."

The brilliant tone patterns of the clarinet range from less than 200 to 10,000 c.p.s. The true tonal quality of the instrument is best featured by: **VERTICAL CUT RECORDINGS!**

Owned and operated by Fetzer Broadcasting Company FREE & PETERS, INC., Exclusive National Representatives

AND NOW TO THE NIGHT CLUB!

Of course that's not Farmer Bill's destination, but don't think he couldn't afford any entertainment he wants. The average Iowa farmer made \$7,672 in 1943. In 1944, it was up about 20% more.

And while we at KMA know he doesn't wear a top hat and white gloves, perhaps some of the alleged "farm stations" aren't aware of the fact. Else they wouldn't offer him hot-spot jive recordings, Broadway wisecracks, and suave big-city announcers reading meager farmnews bulletins.

We say a farm station should be a farm station. Announcers and news editors should know the farming business. Market reports should be not only read but interpreted. Entertainment should be of the homey sort that farmers enjoy. And the proof that we're right lies in the fact that we get more than twice as much listener-mail as any other station in this 80% rural area.

Let us-or Free and Peters-tell you more about the amazing results which are rewarding our policy. Write!

Plans Expansion

Plans Expansion THE NEW YORK World Telegram plans to expand its spot radio circuiation drive with sponsorship of the quarter-hour Warm-Up period on WNH New York before all baseball games of the Brooklyn Dodgers. Series is not assured however until government officials give official go-ahead for the games and station schedule can be arranged.. Cooper, of Lyman, S. C. Mr. Cooper received the award in his modern chicken house during a broadcast.

Three Join Keystone

THREE more stations have become af-filiated with the Keystone Broadcast-ing System; they are KODY North Platte, Neb., WMLT Dublin, Ga. and WKLA Ludington, Mich.

Herr Hitler's first interview

It was in 1933 that Pierre J. Huss, INS correspondent, tracked Adolf Hitler to Berchtesgaden. He got his interview,—the first granted to a foreign newspaperman after Hitler's rise to power. But "Pete" Huss' journalistic career is marked by a long string of beats.

Born in Luxembourg, speaking several languages fluently, Europe is a familiar stamping ground to Huss. For nearly two decades, he has represented INS—in Mexico, London, Madrid, Paris, Berlin and elsewhere on the continent. He is an authority on central European affairs.

After eight years as INS Berlin bureau chief, Huss returned to the United States. In this interlude, he wrote the best seller, "The Foe We Face"—a lucid account of the rise of Hitlerism. The outbreak of war, shortly thereafter, again took him abroad.

Huss covered the campaign of our forces in Africa and the Mediterranean theaters. He reported the Roosevelt-Churchill conference in Cairo. He was with the American forces during their training for D-Day, covered the invasion of Normandy from the bridge of H.M.S. Scylla, landed in France with the Allied forces. At the invitation of the chief of staff, Pete joined General Patton's famous U. S. Third Army, graphically describing its drive up to the Saar Valley. From the 20th U. S. Army Corps, he received a citation for his "fearless activity" in covering American army movements across Europe.

Like those of other INS reporters, Huss' eyewitness accounts from spots where the fighting is hottest have consistently made front pages in the nation's newspapers. Radio news editors have found these stories admirably suited for news broadcasts.

The INS wire, day in and day out, remains in the forefront with lead stories and top headline stories. In specialized news and feature writing, too, INS leads in local, national and world-wide services.

235 EAST 45TH STREET, NEW YORK 17, N.Y.

. . WHEN YOU GO WEST OF CHIGAGO

The Quad-City market (Davenport-Bettendorf, Rock Island, Moline and East Moline-Silvis) includes the largest (218,000) concentration of retail buyers between Chicago and Omaha, and between Minneapolis-St. Paul and St. Louis, according to Hooper '43 and '44 surveys.

ETTER in answer to ticket re-ETTER in answer to ticket re-quests for Glamour Manor, myth-ical hotel program on Blue, Mon-day through Friday, features a letter-head picture of Cliff Arquette, pro-prieter, and the 32-room, 2 bath hotel, Letter is typed on lined paper and written in the style of the program. "Postively every room equipped with Crisco & Ivory Snow" is legend at bottom of page. Program is sponsored by Procter & Gamble Co., Cincinnati. *

Talent Contest

Talent Contest UNCLE DON, who conducts a chil-dren's program on WOR New York, is presenting his fifth annual "Uncle Don Child Talent Contest" to pick the most gifted boy and girl in the East. WE'LL HARVEST THIS CROP TOMORROW!

A slight exaggeration, yes—but all fooling aside, the crops up here in the Red River Valley *are* gigantic. It's a *cinch* to raise almost anything in this fertile valley . . . including *sales quotas*! For our busy hay-seeds make plenty of money—and spend it (an average of more than \$7250 *each*, during 1944)!

WDAY is the *only* chain station that covers *all* the Red River Valley. It's one of the most productive smaller stations in the entire U.S.A. If you want the PROOF, just write us. We've got some *facts* to show you!

HARDY STRESSES USE OF LOCAL PROGRAMS

INSTEAD of stations "trying to 'out-network' the networks," Ralph W. Hardy, program director of KSL Salt Lake City, said at the NAB 14th District meeting in

NAB 14th District meeting in that city, [BROAD-CASTING, Feb. 5] "it would be wiser to augment network program services with features conceived and handled throughout from a local point of view and thus do

Mr. Hardy view

a job the networks are not in a position to do."

Another point Mr. Hardy brought out, with the program department especially in mind, is that "we encourage our public service units to use small segments of time and to use them well, particularly where we are appealing to only a small section of our audience." He also suggested a more frequent reviewing of the total weekly broadcasting schedule, with special focus on programs that have been running "year after year without any particular direction or analysis as to their aims or achievements."

"May we rededicate ourselves," he said in closing, "to providing more excellent program facilities for the public, and may we discriminate the difference between serving the public's convenience and that of serving interest and necessity."

Ad Club Award

THE WOMAN'S Advertising Club of St. Louis is sponsoring the Erma Proetz award in memory of a member who died Aug. 7, 1944. The award will be in recognition of the oustanding creative advertising work done by a woman during the period from March 1, 1944 to March 1, 1945. The contest is open to any woman in the advertising profession. Four \$100 bonds will be awarded, one each for advertising copy, advertising art work, advertising photography, and creative radio writing which advertises a specific produce or service. The award will be made at a dinner in St. Louis May 21, 1945. Mrs. Norrie Passino, 7850 Stanford Ave., University City 14, Mo., will supply detailed contest rules.

KMPC News Policy

LIVE commercials only will be used for newscasts on KMPC Hollywood, effective March 19, according to Robert O. Reynolds, station manager. Opening news program commercials will be limited to 15 words maximum. Policy is in line with improved programming and better handling of newscast commercals, it was said.

Vigoro in Four Markets

SWIFT & Co., Chicago (Vigoro), on March 1 will begin sponsorship of spot announcement campaign for four weeks, six to nine spots weekly, in four markets. Agency is J. Walter Thompson Co., Chicago.

CBC's Shortwave Station Takes Air

By JAMES MONTAGNES

CANADA'S FIRST governmentowned shortwave transmitter went on the air officially February 25 with a one-hour feature program to Canadian troops in Great Britain and western Europe. Prime Minister Mackenzie King and Justice Minister Louis St. Laurent spoke during the dedication ceremonies, and programs from all parts of the Dominion were broadcast.

The transmitter has been two years in the building, at Sackville, N. B., by Canadian Broadcasting

HEY, Y'ALL HEADIN' FER <u>POSSUM</u> TROT (Ky.)?

Fact is, we don't even know whar it's AT—but it's sure listed as a real Kentucky town! But we at WAVE will never worry about our inability to reach that marneurial-minded metropolis or any of its like. Not while supial-minded metropolis or any of its like. Not while wAVE remains the favorite NBC station for the million-or-so really important people in the Louisville lion-or-so really important people in the Louisville trading Area (where more than half of Kentucky's total buying is done!) Would you like the whole story?

Corp. engineers, at a cost of about \$1,000,000. Two RCA 50 kw transmitters are housed in the shortwave transmitter section of the modernistic building, which also houses the broadcast band transmitter of CBA Sackville, N. B. Canada started late in the shortwave field, but its transmitter has been in use now since Christmas Day with broadcasts in English and French to Canadian troops and in German with war news to Germany. Now Dutch, Czech, and Flemish language broadcasts are to be added, with Spanish and Portuguese programs for Latin-America to follow later this year.

Three antenna arrays are used to feed programs to the various zones. One beam now in use is directed at Great Britain, western Europe and a part of Soviet Russia. In reverse it will be used to send programs to Mexico, Central America and New Zealand. A second beam will be directed to South America, and in reverse to eastern Asia. The third beam goes to Africa and Australia in reverse.

CBC is operating the transmitter for the Canadian government, with a committee from the Department of External Affairs working with CBC on program policy. Later it is expected the Department of Trade and Commerce will have a voice in program policy as the station becomes a Canadian trade envoy. CBC has formed an international service division with offices at Montreal, where programs will be built and produced. Offices are located at 1236 Crescent Street, Montreal. Peter Aylen, formerly liaison officer at Ottawa, is in charge of the international service division. CBC international service is working with OWI in programming.

Shortwave broadcasts will be carried eventually on 11 frequencies. One transmitter will use 6.09 mc with call letters CKOB, 9.63 mc with CKLO, 11.705 mc with CKXA, 15.19 mc with CKCX, and 17.82 with CKNC. The other transmitter will be heard as CHAC on 6.16 mc, CHLS on 9.61 mc, CHMD on 9.64 mc, CHOL on 11.72 mc, CHTA on 15.22 mc, and CHLA on 21.71 mc.

FORMATION of a new society, known as the ITPICANS, designed to improve upon any improvements suggested for radio by their elders, has been announced by Miss Gale (Scoop) Russell, president (cent-

er). Miss Russell is surrounded by her ITPICANS Board of Gover-(1 to r) ring-around-thenors (1 to r), ring-around-the-rosy-wise; Judith Lee (Duchess) Glascock; Craig Smith, Jerry Fish-er, Mahlon B. (Duke) Glascock and Adeline Roberta Terrell.

Occasion for formation of the society was the first birthday anniversary of Miss Russell, daughter of Frank M. Russell, NBC Wash-ington vice-president. Board members are the children of these WRC Washington dignitaries: Mahlon B. Glascock, commercial manager; Carleton D. Smith, general man-ager; Donald Fisher, announcer, ager; and Robert Terrell, operations supervisor.

ITPICAN, Miss Russell ex-plained, is a contraction of the term "In the Public Interest, Convenience and Necessity" which, she said, was a popular dinner-table topic in her home.

KFRE News Policy

FALLING in line with other stations nationally, KFRE Fresno, Cal. has started eliminating middle commercials from newscasts, ac-cording to Paul Bartlett, station manager. Mr. Bartlett said, "All KFRE news sponsors have enthusiastically endorsed this new policy, which we and they believe to be a real step forward in the presenting of news broadcasts. News programs originated by the network grams originated by the network (MBS) will continue as before, pending adoption of a similar policy by the network companies." Gep-eral adoption of such a policy by the industry has been urged by the St. Louis Post Dispatch, owner of VSD Other station to in the KSD. Other stations to join the move are WJR Detroit and WTMJ Milwaukee. KMPC Hollywood effective March 19 will use only live commercials on newscasts with opening announcement limited to a 15-word maximum.

Moley on Blue

RAYMOND MOLEY, newsweek associate and author of the News-week feature "Perspective", will be heard on the Blue Sunday, 8:15-8:30 p.m. beginning March 11. Pro-gram will not be available for sponsorship for the present according to the Blue. Sunday period has been occupied by Dorothy Thompson, who moves over to Mutual for Trimount Clothing Co. beginning March 25.

Five American Programs Lead on Canadian Nets

FIVE AMERICAN network programs led the February national evening program popularity rat-ings on Canadian networks, accordings on Canadian networks, accord-ing to the latest survey released by Elliott - Haynes Ltd., T or on t o. Charlie McCarthy led with a popu-larity rating of 41.6, followed by Fibber McGee and Molly with a rating of 38. Third place went to Radio Theatre, fourth to Bing Cros-by Music Hall and fifth to Bob by Music Hall and fifth to Bob Hope. Treasure Trail with a rating of 23.4 was the first Canadian program in popularity. Others of the leading 15 Canadian network shows were in order, Album of Familiar Music, NHL Hockey (Canadian origination), Waltztime, Aldrich Family, Green Hornet (Canadian origination), Frank Morgan, L for Lanky (Canadian origination), Blind Date, and John & Judy (Canadian origination).

On French programs the leading five evening shows were Ceux qu'on Aime with a rating of 34, Secrets du Dr. Morhanges with a rating of 33.4, Le Raillement du Rire, Le Course au Tresor and Metropole.

Eighteen American network programs, 14 Canadian English language programs, and 19 Canadian French language programs are listed in the monthly evening time survey.

TBA Committee

FORMATION of an engineering committee of the Television Broadcasters Assn., was announced last week by F. J. Bingley, TBA direc-tor and chief television engineer of Philco Radio & Television Corp. Members of the committee are: W. J. Purcell, General Electric Co., Schenectady; Dr. Thomas T. Gold-smith Jr.; Allen B. DuMont Labs., Passaic, N. J.; David B. Smith, Philco; O. B. Hanson, NBC, New York; Robert Shelby, NBC (alter-nate); E. A. Hayes, Hughes Pro-ductions, Les, Angelog Control ductions, Los Angeles; George Lewis Federal Telephone & Radio Corp., Newark; Harry Lubcke, Don Lee Broadcasting System, Holly-wood; H. L. Blatterman, Earle C. Anthony Inc., Los Angeles.

THE JOHN WANAMAKER organ in the firm's Philadelphia store, was to be featured in a program over WIBG Philadelphia 10:05-10:30 a.m. begin-ning March 5 (today). Contract was placed direct.

Strong Bill Sought To Curb Petrillo

Chairman Lea Wants Broader Measure Than S-63

PROBABILITY of further hearings before the House Committee on Interstate & Foreign Commerce to provide the basis for legislation to prevent interference with freedom of the air was seen last week by Rep. Clarence F. Lea (D-Cal.), chairman of the Committee. Chairman Lea told BROADCASTING that testimony heard Feb. 22-23 on the Vandenberg bill (S-63), passed by the Senate, which is confined to broadcasting of noncommercial cultural programs, demonstrates the need for a broader measure.

Chairman Lea revealed that he has sent out letters to interested organizations for suggestions for dealing with the problem precipitated by James C. Petrillo's demands on broadcasters, insofar as they concern freedom of communications. He said that Chairman Paul A. Porter of the FCC had laid down broad principles for action in the matter [BROADCASTING, Feb. 26] and "we feel the necessity for getting more complete facts".

Cites Petrillo Ban

Referring to the Petrillo ban against broadcasts of the National Music Camp at Interlochen, Mich., on which the Committee heard testimony, Chairman Lea said: "In principle, it applies to the right to restrict communications over the air. That's quite a fundamental principle there. The airwaves belong to the public and no one has a right to interfere."

Chairman Lea said the Committee may forego its current consideration of railroad retirement legislation long enough to devote another day to the Vandenberg bill. A broader measure would in all probability be worked out in executive session, he said.

Meanwhile, the first major repercussion to the royalty system exacted by Mr. Petrillo from the recording industry developed with the demand by John L. Lewis, president of the United Mine Workers, for a 10c per ton payment to the UMW on all coal produced in the bituminous industry. Like the recording agreement, which requires that the fees are to be used for an "employment fund", the Lewis proposal provides for a "participating royalty" which would be 'anti-inflationary" and which "seeks only to promote the physical welfare of the miners, thereby increasing their productivity". The plan, Mr. Lewis points out, "would not violate the Government's stabilization policy, or any wage formula."

When the recording dispute was before the WLB the royalty fee system was held as not opposed to wage stabilization policy.

Many Foreign Language Shows on Air in 1943

DURING LAST year, 146 of the country's 912 radio stations broadcast about 364 foreign language programs a week in some 25 languages, according to a survey by the Common Council of American Unity, as reported by Jacques E. Ferrand, chief of the council's foreign language radio division. The report will appear in an early issue of Interpreter Release, bulletin isued by the council.

The council estimates there were about 1200 hours of foreign language programs on the air per week in 1944, the average having four hours of air time weekly and the time given such broadcasts varying from 15 minutes to 60 hours a week. Polish is the most frequently broadcast language with 64 programs. Others are: Italian, 54 programs; Spanish, 46; German, 22; Greek, 21; Yiddish, 19; Hungarian, 16. "An estimated 95% of the programs are commercial and nearly all are broadcast on local stations", Mr. Ferrand writes. Most of the non-English programs are aired in the daytime, set within a framework of spot announcements.

Official Coast Guard Photo

COVERING amphibious operations at Lingayen Gulf in the Philippines, Chief Specialist Jack Cole, of the Coast Guard, was wounded in the hand by a piece of shrapnel. He was on the production staff of Vox Pop before entering the service in 1942. The Philippine invasion is one of a number of Pacific operations Cole has covered as a U. S. Coast Guard correspondent.

QUEBEC PONDERS RADIO AUTHORITY

PROVINCIAL control of broadcasting is envisaged in a bill tabled in the Quebec Parliament at Quebec City Feb. 27. The bill calls for creation of a provincial broadcasting service with expenditures for land, buildings and radio stations limited to \$5,000,000. It would be headed by a manager drawing \$9,000 annually. Receipts from operation would go to pay salaries, operating costs, interest and amortization of loans with any surplus going to the provincial treasury.

The service would be called Radio-Quebec and come under the jurisdiction of the provincial premier. It would prepare programs and engage artists, gather and broadcast news, carry commercial as well as sustaining programs and feed its programs to other stations.

HOOPER RATINGS PUT HOPE FIRST

BOB HOPE heads the list of "first fifteen" programs in the Feb. 28 evening network report released by C. E. Hooper Inc. Fibber McGee & Molly places second followed by Joan Davis with Jack Haley (substitute), Radio Theatre, Charlie McCarthy, Screen Guild Players, Bing Crosby, Walter Winchell, Mr. District Attorney, Jack Benny, Abbott & Costello, Take It or Leave It, Kay Kyser (1st half-hour), Your Hit Parade, Eddie Cantor. Average evening figures are as follows: Rating, 10.5; sets-in-use, 32.8; available audience, 80.1. Radio Theatre has the top sponsor identification index.

Josephy Award

BRONZE STAR Medal has been awarded S/Sgt. Alvin M. Josephy, Marine Corps combat correspondent, who was chief of special events with the Radio Bureau of the OWI and prior to that assistant director news and special events with WOR-Mutual New York. Now covering the operations on Iwo Jima, Sgt. Josephy received the award for his courageous work at Guam in recording the action there [BROAD-CASTING, Aug. 14, 1944]. "With complete disregard for his personal safety," the citation states, "he a recording of the historical made significance which when rebroad-cast in the United States, vividly brought home the essence of Pacific amphibious warfare."

WHBC Names Hershey

RETIREMENT of Felix Hinkle, manager of WHBC Canton, O. and appointment of William I. Hershey, of the executive offices of Brush Moore Newspapers Inc., Canton, as temporary manager were announced by the station last week. Mr. Hinkle was formerly business manager of the Canton *Daily News* until its suspension in 1930. Members of the WHBC staff tendered a farewell dinner in Mr. Hinkle's honor at the Hotel Onesto.

TOM LALLEY, formerly account executive and copy chief of Doremus & Co. and previously in a similar capacity with Weiss & Geller, has joined the Blue Network as sales promotion manager.

NAB Board

(Continued from page 15) such matters should be left to the judgment of individual station management. In any event, it was concluded that the code itself requires membership, rather than board action and that nothing concrete in the way of industry-wide sentiment can be tapped until there is another annual meeting possibly 18 months hence.

The board heard a report from Hugh Feltis, president of the Broadcast Measurement Bureau, on the current campaign to enroll stations in the project. An average of about 80% of stations represented at NAB district meetings thus far held has signed contracts, with the aggregate in the neighborhood of 300. Mr. Feltis had resigned from the board by virtue of his resignation as general manager of KFAB Lincoln to accept the BMB post. J. Leonard Reinsch, WSB Atlanta. was elected his successor by the board as a director-at-large for large stations.

Progress Reports

Following a report from Mr. Davis on labor relations, the board recommended expansion of labor activities, particularly in the light of postwar employment prospects. The labor executive committee has scheduled a meeting in New York for March 6-7 to pursue Mr. Davis' recommendations.

The board heard progress reports on legislation and the Petrillo platter-turner issue, among others. It adopted a resolution proposed by the public relations committee commending the Assn. of Women Directors of NAB and Mrs. Dorothy Lewis, NAB coordinator of listener activity, on its work and more particularly its campaign entitled "Women of the United Nations". This campaign was launched Feb. 17 at a conference and luncheon in New York attended by representatives of many nations and including Mrs. Franklin D. Roosevelt.

All members of the board were present except for William B. Way, KVOO Tulsa, who had a previous commitment. Those present were Mr. Morency; Mr. Hager, Roy F. Thompson, WFBG Altoona; Mr. Arnoux; John C. Bell, WBRC Birmingham; Hoyt B. Wooten, WREC Memphis; Nathan Lord, WAVE Louisville; John E. Fetzer, WKZO Kalamazoo; Leslie C. Johnson, WHBF Rock Island, Ill.; Mr. Gillin; E. L. Hayek, KATE Albert Lea, Minn.; Hugh A. L. Halff, WOAI San Antonio; Hugh B. Terry, KLZ Denver; Arthur Westlund, KRE Berkeley, Cal.; William B. Ryan, KFI Los Angeles; J. O. Maland, WHO Des Moines; T. A. M. Craven, WOL Washington, D. C .; Mr. Elias: Dietrich Dirks, KTRI Sioux City; Frank King, WMBR Jacksonville: Frank Stanton, CBS New York; Mr. Russell; Harry R. Spence, KXRO Aberdeen, Wash.

FCC Allocation Hearing

(Continued from page 13)

evidence be submitted. Mr. Price of AT&T, complained of the lack of certainty as to the number of frequencies which would be assigned and requested a "reasonable" number for common carrier service exclusively. He also asked if the company's three existing radio services must be moved that five years be given for the adjustment. Others scheduled on the subject declined to testify.

Also testifying on Coastal, Marine Relay, Ship, Mobile Press and Fixed Public Service in Alaska, Mr. Pratt suggested higher frequency ranges (above 1000 mc) for obstacle detection for ships at sea. Frank Dunbar Jr., appearing for the Lorain County Radio Corp. which operates a ship service on the Great Lakes, specified that the bands assigned be adjacent and that they be moved up slightly from the 30-40 mc range to 40-44 mc.

Smythe Describes Production of FM

Dallas W. Snythe, chief of the Economics Division, FCC Accounting Dept., opening the FM phase of the argument, testified that in a survey of 101 manufacturing plants conducted by the Commission, it was learned that 395,755 FM units have been made in this country. Of that number 365,648 were combination FM-AM receivers, 13,388 were exclusively FM and 16,719 were FM adaptors.

He estimated total retail value of the 395,755 sets at \$76,083,063, divided as follows: Combination sets, \$71,908,878; FM exclusively, \$3,366,981; FM adaptors, \$807,-204. Mr. Smythe cited figures submitted by the Philco Corp., Philadelphia, which he said manufactured 46% of the total combined FM-AM sets. Philco estimated the aggregate retail value of the 171,-994 units sold at \$19,791,812.

Of those sets, however, Philco estimated that the retail value of the FM band in combination sets averaged \$12.50 per set, making the overall public investment in Philco sets \$2,149,925. Arbitrarily doubling that figure for the remainder, Mr. Smythe arrived at the figure of \$4,841,350, for an aggregate of \$6,991,275 for the FM units in combination sets. Including exclusive FM sets and adaptors, the total public investment in FM is \$11,165,460, Mr. Smythe estimated. In an alternative computation, based on Philco's estimate of \$12.50 for unit in combination sets and \$48.28 per unit in all others, Mr. Smythe submitted the estimated

DISCUSSING FM allocations was this trio of RTPB Panel 5 executives at the FCC oral argument last Wednesday. Conferees are (1 to r): W. R. David of General Electric, vice-chairman of Panel 5 and chairman of the transmitter committee; Dr. Ray H. Manson, vice-president of Stromberg-Carlson Co., chairman of the Panel 5 receiver committee; C. M. Jansky Jr., Washington consulting engineer, chairman of Panel 5. All three testified in favor of retaining FM in its present band.

public investment of \$15,675,725.

As for depreciation, under the first method of estimation, the depreciated retail value in 1945 attributable to FM would be: 5-year life, \$4,466,184; 7-year life, \$6,375,-477; 10-year life, \$7,815,823. Depreciated retail value in 1947 (on the assumption that it will be two years before FM gets into mass production): 5-year life, scrap value only; 7-year life, \$3,182,156; 10-year life, \$5,582,731.

Under the alternative method of computation Mr. Smythe listed depreciated values as follows: 1945 --5-year life, \$6,269,490; 7-year life, \$8,949,696; 10-year life, \$10,-971,608; 1947--5-year life, scrap value only; 7-year life, \$4,467,012; 10-year life \$7,836,863.

FM Stations Licensed By FCC Reviewed

Mr. Smythe estimated that the original cost of total technical broadcast property involving FM was \$1,923,337 and the depreciated value, \$1,334,756. His estimates were based on financial reports to the Commission for 48 licensees and construction permit holders as of Dec. 31, 1943, which gave an average cost per station of \$40,070. Investments by power were given as follows: 1 kw or less, \$357,081

National Representative

JOHN BLAIR & CO.

for 18 stations; 1.1/3 kw, \$288,781 for 12 stations; 10 kw, \$546,827 for 11 stations; 10.1 kw and over, \$730,-648 for 7 stations.

C. M. Braum, chief of the Nonstandard Broadcast Application Section, Broadcast Division, FCC Engineering Dept., testified that as of Feb. 20, 1945, there were 46 FM stations licensed, seven for which construction permits are outstanding, and two of the seven under active construction. Considering 48 stations, he said four are operating under wartime experimental or developmental licenses, leaving 44 whose requirements and coverage have been determined.

Of the 44 stations, 33 have installed full transmitter power and two have installed the antenna system authorized. Only 10 FM stations have completed full construction and testing, he added, while 32 of the stations are authorized on a wartime basis to operate without their regular transmitter power or with temporary antenna systems or both; six other stations are complete except for minor items.

Should FM be moved upward, he said, one licensee of a 50-kw station estimated the transition cost would be from \$20,000-\$25,000 or about one-third of the list price of the transmitter, which cost \$67,-000. Using the one-third as a factor, Mr. Braum estimated the aggregate cost to broadcasters of modifying transmitters would be around \$300,000. He didn't hazard a guess as to cost of changing an-

Borden Replacement

BORDEN Co.'s replacement for the Ed Wynn Show, on the Blue features Jerry Wayne, singer, with Jeff Alexander's orchestra and chorus and guest stars, Jane Froman to appear on the second of the series. Program shifts from Monday 9-9:30 p.m. to Sunday 8:30-9 p.m. beginning March 25. Producer is Bob Weenolsen, and Dan Seymour, announcer. Agency is Young & Rubicam, New York.

tennas, since little information was available.

Jett Asks Estimates Of Potential Losses

Commissioner Jett asked that witnesses supply estimates of the potential losses if transmitters are modified. Chairman Porter suggested that industry witnesses "bear in mind Mr. Jett's suggestion." He made it plain the Commission wants all the facts possible to guide it in its decision.

Mr. Jansky told the Commission that on Tuesday Panel 5 met in Washington and voted 21-1 to reaffirm its original stand at the hearings last fall and to support the brief submitted by the chairman and vice-chairman of Panel 5 [BROADCASTING, Feb. 26]. Dr. T. T. Goldsmith, representing the Allen B. DuMont Labs., he said, cast the only dissenting vote, while five members did not vote.

He submitted a memorandum by Maj. Armstrong, Dr. H. H. Beverage of RCA Labs. and Dr. Charles

PITTSBURGH ADVERTISERS KNOW THE LOCAL SCORE

That's why it means something that 7 of Pittsburgh's 8 leading department stores used KQV last year.

ALLEGHENY BROADCASTING CORP. National Representatives: SPOT SALES, INC. R. Burrows, based on propagation studies conducted by the three in collaboration with Dr. G. W. Pickard, Dr. H. T. Stetson and Stuart Bailey. Challenging conclusions by Dr. Norton, submitted in the closing days of the fall hearings, Mr. Jansky said:

"The basic data available to Mr. Norton—and it was available also to our members—does not justify such wide conclusions as he has drawn. . . The most important issue is one dealing with propagation. Men can overcome whatever temporary obstacles may exist . . That memorandum concludes that the evidence on which you based your opinion was unsound."

Mr. Jansky admonished the Commission they must "believe Norton and the errors he has made" or "Dellinger, Beverage and Armstrong". Questioned by Mr. Denny as to quantitative data showing interference in the maximum sunspot cycle, Mr. Janksy said such data means little at 50 mc unless in contrast equally quantitative data is available in other frequencies.

Manson Says Costs Based on Moving Band

Dr. Ray H. Manson, vice-president of the Stromberg-Carlson Co. and chairman of the Panel 5 receiver committee, testified that his committee, composed of manufacturers, agreed that receivers could be built for the 84-102 mc band, but such a change "imposes important technical difficulties, such as receiver drift and the attainment of the requisite sensitivity and selectivity, which will have a bearing upon the quality of service to be rendered to the public."

The committee agreed also that at least six months additional engineering time will be required to prepare for receivers at 84-102 mc, that the increased cost involved to the consumer would range from \$4-\$32 per set, with the majority opinion tending toward \$32.

Adequate filed testing and design revisions for the 84-102 mc band would entail an additional three months. The committee recommended that a firm allocation commitment be made by the FCC so "unnecessary delay and increased cost to the public can be avoided".

Dr. Manson testified that the

"I'LL BE RUINED if FM moves up," Leonard L. Asch (1), president of the Capitol Broadcasting Co., Schenectady, licensee of the nation's only independent FM station, WBCA, told Dr. W. R. G. Baker of General Electric Co. and chairman of the Radio Technical Planning Board, during a recess at the allocation oral argument before the FCC last week. Mr. Asch testified that if FM is moved up, his business would be a "washout". He operates the country's only FM station in competition with AM.

increased cost estimate was based solely on moving the FM band and not on other factors.

W. R. David of GE, chairman of the transmitter committee, said his group, meeting Feb. 24 in New York, agreed that transmitters could be built for 78-102 mc operation, but the change imposes "very important technical difficulties particularly in the matter of high frequency tubes, transmitter circuits, antennas and transmission lines".

Considerable engineering time will be required, up to six months for lower powers and 1-3 years for higher powers, he said. It was the opinion of a majority of his committee that transmitters for the higher frequency band will cost more, particularly the higher power ratings, he added.

Mr. David submitted a letter from the Radio Manufacturers Assn. transmitter tube engineering committee on tube availability as follows: All tubes, 250 w-50 kw power level available for FM in the

CBS Affilliate—Represented Nationally by The Katz Agency, Inc. band 42-50 mc; tubes of 250 and 1,000 w available in the 84-102 mc band, but those of 3 kw power level and higher would not be available for periods ranging from 6 months to 2 years.

Maj. Armstrong submitted correspondence kept by an amateur broadcaster in Phoenix, Ariz., who reported receiving F2 layer reception durng the maximum of the last sunspot cycle, dating from October 1936 to March 1938. He heard Maj. Armstrong's station, once picked up the NBC television sound channel, picked up stations in South America and a few others, but the NBC sound channel, operating on 49.75 mc, was the only one above 43 mc which he received.

On the other hand another station, five miles away and equipped with better facilties than the Phoenix station, experienced none of the F2 layer transmission, Maj. Armstrong explained.

Sunspot Interference Called Unpredictable

Maj. Armstrong told the Commission that if FM moves up, as proposed by the FCC, it would be delayed at least a year. To offset any ideas that he might be interested financially in keeping FM in its present locataion, the inventor told the Commission that if it retains FM in its present band, he will turn over all his royalties for one year to a board to be appointed, the money to be expended as the board sees fit.

He asserted "we can't predict sunspot interference" and drew a comparison between "actual experience' and "theory", declaring that the Commission should base its conclusions on "the years of experience of those in the FM field" rather than theory. Maj. Armstrong said he wasn't worried as to the ability of the manufacturing industry to expand with FM. As the art progresses new designs will be created and the transmitter and receiver manufacturers will keep pace. He pointed out that it would be some time before a maximum number of transmitters could be in operation and by that time the receiver manufacturers would be ready to expand.

Maj. Armstrong questioned Dr. Norton's calculations, saying his predictions based on frequencies twice as high as those on which standards were made and the recommendatiaons of those "who have had actual experience" were so different "it seems something must be left out ... some errors were made".

The Commission's staff was confused in two places and "misunderstood testimony of three witnesses," said the inventor. He listed the three main sources of interference as F2 layer, Sporadic E and Tropospheric. He dwelt at length on F2 layer, explained its characteristics and told the Commission that during the last sunspot peak amateurs operating on 56-58 mc attempted to establish coast-to-coast transmission on F2 layer, but didn't succeed. He concluded that "Norton's predictions were based on assumptions, not facts".

"I think our vast experience dur-

Howard H. Wilson Co., Nat'l Representatives

ing the sunspot cycle and Dr. Dellinger's predictions which I'm sure were based on the hop, probably will be our best guide through the next sunspot cycle".

Maj. Armstrong discussed Sporadic E, disagreed with some of Dr. Norton's conclusions and touched briefly on the tropospheric wave. He offered the following proposed allocations in the band 44-108 mc; amateurs 44-48 mc; FM 48-66 mc; first television channel 69-75 mc; five television channels 78-108 mc.

He would leave the two 3-mc bands unassigned, the space ultimately either going to FM or television, depending on which service demonstrates the greater need. He suggested it could go to television by moving the No. 1 band down to 66 mc or it could go to FM. Maj. Armstrong suggested that a temporary deviation from his arrangement could be adopted pending adjustments in all the services.

Cyrus T. Read, director of sales engineering of Hallicrafters Co., Chicago, concluded the first day's testimony by supporting the proposed allocations. He estimated the cost of converting present-day FM sets to higher frequencies would be \$10-\$15.

Thursday's session opened with Commissioner Walker acting chairman in the brief absence of Chairman Porter, who was called to appear before the Senate Appropriations Committee. John Shepard 3d, chairman of the board and general manager of the Yankee Network, recommended that FM be allocated either 44-62 mc or 46-64 mc and that high-powered stations be as-

signed to the upper portion of the band.

He listed these three factors leading to Yankee's opposition to the FCC proposals: (1) delay in providing FM service; (2) loss of incentive by pioneer FM broadcasters; (3) obsolescence of receiving sets and loss of investment made by broadcasters to date.

made by broadcasters to date. Mr. Shepard said information from transmitter manufacturers indicated it would take from two to three years before a transmitter of 25-50 kw could be delivered complete. Therefore, a period of three to four years would elapse before full production of FM receivers could be attained. He estimated the average life of receivers now on hand to be seven years, basing his assumption on Dept. of Commerce statistics.

"I am convinced that FM reception by the great majority of the public would be delayed for approximately five years based on the facts I have just outlined," said Mr. Shepard. "This would be in addition to the delays which FM has already encountered, due in part to unavoidable circumstances.

Fears FM Will Be Adversely Affected

"Our conclusion, therefore, is that, if the assignments proposed by the Commission are put into effect, FM as a broadcasting service will be put back to where it was in 1936; and it will be very sick for a period of many years, probably on its death bed." Mr. Shepard cited statistics gathered by Ernst & Ernst, New York, showing that 373,675 FM receivers were manufactured at an aggregate cost to the public of \$68,188,619. [The Ernst & Ernst survey was not as extensive as that conducted by the FCC and introduced on Wednesday].

day]. Mr. Shepard made these recommendations: (1) That FM be assigned to the lower part of the 44-108 mc band; (2) that present operators be given permanent new assignments immediately; (3) that the matter of operating on both the old or the new frequency be left to the discretion of the licensee until such time as there are a sufficient number of sets in the hands of the public to justify operation on the new frequency exclusively or until the educational interest requires the use of these frequencies in any given locality; that the Commission take cognizance of the millions of dolalrs which have been invested in the development of an FM broadcasting system.

On the basis of another survey Mr. Shepard said the total FM investment on the part of broadcasters is \$5,961,872, of which he placed the cost of transmitters, transmission lines and antenna at \$1,431,-642. Under cross-examination by Commissioner Jett, Mr. Shepard said if from an engineering standpoint the Commission finds FM should be located above 50 mc and that such a move would "improve it rightly", he would agree that FM should be moved. He agreed with Mr. Jett that economics should not outweigh engineering factors but added that economics should be considered along with other phases.

Commissioner Jett said it was his understanding that 50 kw FM equipment has been developed and is ready to start the minute freezes

AT BLUE Network's television kickoff Feb. 25 at General Electric's video station, WRGB Schenectady, Mark Woods, (1) president of the American Broadcasting Co., and Robert Peare (r), vicepresident of GE in charge of advertising, flank Johnny Olson, m.c. of the Ladies Be Seated telecast.

are lifted, though he added it might take two or three years to produce the equipment.

Mr. Shepard, under cross-examination by Mr. Denny, said the FMBI brief which opposed the Commission's proposals was concurred in by the six members who signed it. They were, besides Mr. Shepard, Theodore Streibert, Cecil D. Mastin, C. M. Jansky Jr., J. E. Brown, comprising a committee on brief and oral argument, and Walter J. Damm, FMBI president. He added that the FMBI was not unanimous in its views.

Craven Supports FM Move Upward

T. A. M. Craven, vice-president of the Cowles Broadcasting Co. and former Commissioner, said Cowles would stand on its brief supporting the Commission's allocations. He expressed the view that F2 layer and Sporadic E interference would be such that FM in the 42-44 mc portion could not perform a good service.

Comdr. Craven said "The people on FM made no quantitative study" of skywave interference. He agreed with the views of Drs. Wheeler and Norton whom he lauded as two of the foremost propagation experts in the field and told the Commission, "I see no reason whatsoever in doubting their judgment".

Supporting his contention that FM should be moved upward, the veteran engineer said the FCC must protect the outer regions of service areas to afford service to those living outside of cities. "I think it's the duty of the Commission to take

any step whatsoever to protect service in all areas," declared Comdr. Craven. On the predicted delay, if FM is moved up, the Cowles executive said he thought manufacturers are ready now to turn out 50 kw equipment for the higher frequen-"If we manufacture with the cies. speed of war, it won't take very long," he said. "If television transmission in sound can be produced in the 108-mc band, so can FM. There's no mystery about it. . . . I've been impressed that the attitude of industry is negative. If industry took that attitude in war we wouldn't get anywhere. We must take positive attitude.'

Comdr. Craven said he thought co-channel interference was more important than shadows or tropospheric interference. He urged the Commission to think in international terms in allocating and pointed out that if skywave interference follows Dr. Wheeler's forecast at the next sunspot cycle peak, FM should not be allocated in the 40-mc region because there would be untold interference not only from stations in this country but other countries. He called on the Commission to "give paramount weight to technical data" and consider all other factors as secondary. "I think it's in the interest of the future of FM for the Commission to consider co-channel interference," he ashe asserted. "I have recommended and I recommend again that the Commission's proposal be adopted."

Crosley Ready to Build Sets For Higher Frequencies

John D. Reid, manager of re-search, Crosley Corp, Cincinnati, testifying on cost of building new receivers, said Crosley plans to turn out an FM set for higher frequencies which would cost the consumer an additional \$3 or \$4. Mr. Reid said the biggest factor in redesigning would be expansion of the band rather than position in the spectrum.

Mr. Reid declared that Croslev feels the FCC proposed allocations are sound and it is desirable to shift the FM band to 84-102 mc.

C. R. Miner, design engineer, rcceiving division, electronics depart-ment, GE, said the majority of manufacturers believed that the cost to consumers for the higher frequency sets would range from \$15 to \$30 more than at 40 mc. He said the cost of expanding the band would not be appreciable but listed the increase as due principally to a

change in the operating frequency. GE estimates its cost of manufacturing sets in the higher frequencies would be \$24-\$30 more per unit to the consumer. He said the in-creased cost was due mainly to the use of expensive materials and declared "it will be everybody's endeavor to pull cost down in the future". He said GE estimates were based on receivers sold in 1940 for \$69.95.

Lodge Describes Interference Factors

William B. Lodge, CBS director of general engineering, said he had studied Dr. Norton's testimony and failed to find any discrepancies. He referred to an article he wrote for BROADCASTING, Aug. 14, 1944, as setting forth his views and asserted that he had not changed his opinion. He said some of the apparent discrepancies in propagation opin-ions were caused by "different objectives.

He said Dr. Norton was a highly qualified expert in the field of propagation and that he agreed with Dr. Norton that long-distance interference in frequencies below 50 mc made it necessary to move FM to higher frequencies if a general service is to be provided. Mr. Lodge doubted there would be any delay in broadcasting with power up to 10 kw and declared that when a broadcaster goes to a manufacturer with a definite order "he can generally get a better delivery date

than he reports to committees." Frank Marx, technical advisor, engineering department, American Broadcasting Co. (Blue) restated the Blue's position as set forth in its brief, that the network believes the Commission's proposal should be adopted.

cense of WBCA Schenectady, only independent FM station in the country, opposed the allocation move on the grounds that it likely would force his organization out of business. He said WBCA has been on the air commercially since July 17, 1941, operating 16 hours daily, and although gross time sales have been

\$35,000 the company has operated at a loss of \$70,000. Nevertheless his firm believes the investment was good, inasmuch as it looks forward to wide service in the present band.

Mr. Asch attempted to insert in the record a letter from a listener threatening complaint to Congress if the Commission moves the FM band but Chairman Porter, who arrived shortly before noon recess, overruled the letter as irrelevant. Mr. Asch also attempted to insert in the record a telegram from CBS which he said refused him network service because his was an FM station but the Chairman also refused to admit it on the grounds that it had nothing to do with allocations.

Dr. Manson, recalled to the stand, said he did not believe the Commission should decide allocations on the problem of receivers. "All other factors being equal, however, he said, "the Commission should consider receivers in the hands of the public." He said that while it would cost more to manufacture sets for higher frequencies he had no doubt that all manufacturers would build receivers regardless of where the FM band is finally located.

"At the present moment postwar is out," he said. "We are fighting a war and everything else is secondary. When we get engineers we can make the sets. Cost is no object. We must get results, but we must make sets that the public can buy." He said WHFM, the Stromberg-Carlson FM station in Rochester, N. Y. had received no reports of interference.

David B. Smith, director of research, Philco Corp., said that PhilHon. Otto Goes O'Neil, Larson & McMahon Chicago, Illinois.

Dear Otto:

National Sales Representatives . SPOT SALES, INC., New York - Chicago - San Francisco

co, largest manufacturer of FM receivers for the home, is in agreement in general with the Commission's proposals for FM and television. Considering the magnitude of the problem, he testified, the Commission has done "a splendid overall job" in reconciling the claims of the various services. Mr. Smith supported the Commission's predictions that the pres-

Mr. Smith supported the Commission's predictions that the present band would cause interference which he said "would seriously impair the value of FM broadcasting and reception." He said the primary purpose of FM "would be defeated if any substantial amount of interference develops due to vagaries in transmission."

He testified that a shift to the proposed FM band would not impair the usefulness of the 170,000

WHLN Joins MBS

combination sets sold by Philco for standard broadcast and shortwave reception although it "will have the effect of obsoleting the FM band of most FM sets now in the hands of the public."

He estimated a shift of frequencies from 50 mc to the region of 90 mc will add from \$2.50 to \$5 to the list price of receivers and a similar increase in cost if the band width is increased from 90 to 150

channels. With experience the cost differential will tend to disappear, he added.

He asserted that "if it is necessary to pay a bit more in the form of increased receiver cost for the higher frequencies in order to obtain interference-free service, then the cost should be incurred. On the other hand, the shift should not be made unless it seems that there will be substantial interference in the lower frequencies where FM now is."

Daniel E. Noble, appearing as an engineer interested in the FCC proposals, said that if the FM engineer "would sit tight for a while, the television engineer would solve his problems for him." Supporting the 84-102 mc recommendation, he testified that a poll he conducted among engineers showed a substantial majority favoring the higher band.

Engineers Testify on Interference Studies

Archer Taylor, representative of the Paul Godley Co., Montclair, N. J., consulting engineer, submitted data based on studies he conducted while at the Bureau of Standards which supported the contention regarding interference in the present band.

Ralph J. Renton, chief, Equipment & Projects Section, Field Division, FCC Engineering Dept., testified regarding field strength surveys made near Louisville, Ky., over different terrain at both 45½ and 91 mc which, he said, demonstrated that shadows over this area do not appear to be noticeably different at either frequency. E. W. Allen Jr., chief, Technical

E. W. Allen Jr., chief, Technical Analysis Section, Technical Information Service, FCC Engineering Dept., testified regarding correction factors applied to Mr. Renton's surveys for making the data applicable to a broadcast service and for comparing the data with

\$1,000 CHECK for prizes in WWDC Washington's bowling tournament is handed to Arville Ebersole, chairman of the National Bowling Congress, by Tony Wakeman on whose *All Sports Parade* program results will be given. the distance ranges predicted by the signal range curves of the FCC standards of good engineering. Mr. Allen supported Mr. Renton's interpretations.

Dr. Norton gave a resume of his studies on propagation characteristics which provided the basis for his determination that excessive interference would develop in the present FM band and that there would be relatively low interference in the 84-102 mc band. Since these studies were carried on in conjunction with military operations, Chairman Porter ruled that in the interest of security a closed session would be held at which technical witnesses would be permitted to cross-examine Dr. Norton.

Sees Increase in Primary Service Area

Dr. Norton said the studies made by Mr. Renton and Mr. Allen further substantiated his conclusion that FM will have larger primary service areas at the higher frequencies. He pointed out that if shadows were relatively more important at the higher band this would have been encountered in Mr. Renton's analysis. He noted also that the expected increase in primary service area will be realized even if the protected contours are kept the same as in the present standards applicable to the present band.

He asserted that if the Commis-

BROADCASTING • Broadcast Advertising

sion recognizes that the external noise is considerably lower in the higher band and undertakes to protect a lower field intensity contour from interference, the primary service areas of stations in the new band "will be very much larger than in the old band and it will be possible to supply a very much larger rural audience a truly interference free broadcast service." He testified his conclusions regarding greater range of FM stations in the higher band were based partly on extensive tests in which

He testified his conclusions regarding greater range of FM stations in the higher band were based partly on extensive tests in which he participated and further tests since he has been with the War Dept. He said that in connection with his earlier tests he drove over hundreds of miles of roads in the eastern part of the country, simultaneously observing field intensities of FM signals and listening to the signal to noise ratio in level, hilly and mountainous terrain. It was during this study, he said, that "I came to realize that this proposed new broadcast facility would make possible for the first time a really fine, interference free broadcast service to the American public."

Subscription Radio Asks Channels

Later, he said, after digesting Dr. Wheeler's data on sporadic E skywave field intensities he realized that this interference would substantially reduce the service areas of stations in the present band "for what I consider to be significantly large percentages of the time and that this sporadic E layer interference alone would produce a degradation in the new FM scrvice comparable in some respects to the interference problem we now have in the standard broadcast band."

Commissioner Jett said for the record that Dr. Norton is probably the world's outstanding expert on wave propagation. Chairman Porter commented that the statement, coming from the only technical member on the Commission, merited considerable importance.

Joseph L. Weiner, appearing for Subscription Radio Inc., urged the Commission to provide as many FM channels as possible "so there won't be so many objections" to his proposed service. He presented results of a survey conducted, which, he said, indicated the majority of those questioned are willing to pay for subscriber radio.

He challenged the NAB's brief, which did not object to subscriber

Be Seated

THERE'S a return to normalcy in one respect at the FCC. For the first time since 1939, the unwritten "stand up" rule enforced by former Chairman James Lawrence Fly is out of vogue. When Mr. Fly assumed the chairmanship, he required all present to remain standing until the Commission membership filed in. Then he rapped the gavel. At the oral arguments on allocations which began last Wednesday, Chairman Paul A. Porter presided at his first public hearing. He eschewed the "stand up" practice. He doesn't require it of the Commission staff at meetings either. He also permits smoking by the staff at Commission meetings.

radio but recommended that it be treated as a multiple-address service and be allocated in the band elsewhere than channels reserved for broadcasting services. The expected opposition from the NAB did not materialize but the suggestion in its brief is more damaging," he said.

Mr. Weiner challenged the CBS brief which opposed subscription radio as not in accordance with broadcasting as specified in the Communications Act, and asserted that the people want interferencefree radio and "interference-free from advertising". He said under the present system of broadcasting the listener has no choice whether

FREE & PETERS, Inc., Natl. Rep.

he prefers to "listen to advertising matter" or "pay in another way" for his entertainment.

Questioned by Chairman Porter as to whether rivalry would be permitted in the same areas, Mr. Weiner said he believed interest in subscription radio would lie in new fields rather than competition in established fields.

Dr. R. R. Lowdermilk of the U. S. Office of Education, said his department could take no position in allocations, but left it entirely to the FCC. Confusion among educational broadcasters resulted, he explained, from "educators seeing two groups of people in whom they have confidence, in disagreement." Some schools recommended that FM remain where it is and others supported the FCC proposal, he said, but the majority opinion was advanced in a possible compromise.

David B. Smith, appearing as chairman of RTPB Panel 6, endorsed the Commission's proposals. Then he assumed the role of director of research, speaking for Philco Corp. Again he endorsed the proposals on behalf of his company and said Philco feels that the proposed 12 channels below 300 mc will provide for several hundred stations, while proposed allocation of experimental frequencies above 400 mc will make possible developmental work in that region. Mr. Smith added, however, some years would be required to develop television at the higher frequencies. He expressed the belief that television in the upper frequencies would supplement that of the lower area and

that there would be no conflict between the two.

Thomas E. Harris, appearing for NBC, said his organization would rest on its brief, which supported the FCC proposals. O. B. Hanson, NBC vice-president and chief engineer, said NBC had made inquiries to the Commission regarding a station on the proposed Channel 4, 66-72 mc, because the network wanted to be "in the middle of the band" rather than in the end since the extremes are "vulnerable."

Pressed by Commissioner Jett and Mr. Denny as to whether pos-sible skywave interference on the 44-50 mc channel influenced NBC's decision to ask for Channel 4, Mr. Hanson said: "I don't think so." Later he said, in answer to a direct question, that if the FCC gave

NBC the first channel "we'd take it."

Joseph H. Ream, CBS vice-presi-ent, supporting that network's dent, brief, which concurred in the proposed allocations, said technical considerations make it clear that it's necessary to establish, "as soon as possible postwar, wideband television in the ultra-high frequen-cies." He said "there seems to be no longer any question that better service can be provided in higher frequencies."

The question as to when new tele-vision can be proved still is unan-swered, he continued, but surmised that if manpower and materials are available within a reasonable time CBS could give demonstration "be-fore the year is out." He urged that the 12 channels proposed below 300

BEELINE TAKES A BOW

Since the Beeline was first offered to advertisers in October, 1943, only 17 months ago, its sales curve has been steadily climbing . . . far ahead of national trends . . . regardless of season. mc be tagged as "temporary" and Commissioner Jett interjected to clear a statement he had Jan. 15 at a news conference prior to re-

lease of the proposals. The Commissioner said his ref-erence to "temporary" allocation erence to "temporary" allocation below 300 mc did not specify any time, or even months. "It might be years," he added. "I don't want any-one to take that phrase 'temporary' too seriously." "We believe a freezing of stan-dards as proposed by Col. Roberts (W. A. Roberts, counsel for TBA) is as good a way as any of post-

is as good a way as any of post-poning the day when high-defini-tion television is proven," said Mr. Ream. "We suggest the Commission in its final report allocate the 6-mc channels temporarily, two, make wide channels in the ultra-high frequencies permanent, and three, en-courage the efforts of the industry to develop high-definition televi-sion."

Armstrong Details **FM** Operations

As Friday's session opened it was announced that the secret session with military experts next Monday would be confined to F2 layer transmission, inasmuch as engineers generally were agreed on other phenomena. Mr. Allen was recalled to the stand to elaborate on his testimony of Thursday.

Maj. Armstrong, again taking the stand, corrected his testimony of Wednesday and gave detailed in-formation regarding operations of FM stations on frequencies of 110 and 117 mc. "From the Alpine transmitter we were always able to get a better signal at 42 mc than from the Yonkers transmitter at 117 mc," he said.

Ben Adler, facilities engineer of the American Broadcasting Co., operator of the Blue Network, sup-ported the Commission's television proposals and said "it is felt that the lack of sufficient low frequency channels to establish a nationwide television service will provide impetus to the immediate development of commercial wideband television in the high frequency experimental bands.

Comdr. Craven, returning to the stand to testify for television, said the Cowles Broadcasting Co. in-tends to start high-definition video in Washington at the earliest pos-sible moment and that he had been assured by Westinghouse officials that delivery could be made on a high-definition transmitter within "six months of some date in the

future". "Within a reasonably short time after VE Day I think we can give Washington a demonstration of high-definition television," he as-serted. "Cowles is willing and anx-ious to demonstrate the new television as quickly as possible after the war." Comdr. Craven said Zenith felt it could manufacture receivers "to meet our specifica-tions in a reasonably short period." Col. Roberts, who didn't submit the TBA brief and DuMont state-

ment until last week because he

was out of Washington, said that TBA urged prompt adoption of a nationwide television frequency assignment plan, such as he outlined. The proposed 12 channels below 300 mc will permit a widespread and "satisfactory" service but at least six additional channels arc needed for "complete competitive service," the TBA brief suggested.

Points to Plans for Color Television

TBA called for immediate allo-cation of the 102-108 mc band to television and pointed out "it is possible to allocate a 14th channel immediately below 102 mc to teleinimediately below 102 me to tele-vision for a temporary period of five years". Channel sharing with other services must be "closely controlled and subordinate to all television use," the brief continued. Col. Roberts said "every member of the accordinate in provide the second

of the association plans to go into color television in the wide band and perhaps very much higher fre-quencies" than proposed by the FCC, but he added it would be some time before high-definition video can be accomplished. He called on the Commission to allocate the television channels below 300 mc on a "permanent" basis to insure "secur-

ity" to manufacturers, broadcast-ers and the public. Allen B. DuMont, head of the laboratories bearing his name and first president of TBA, introduced letters from several listeners tending to show that the DuMont television service had gotten wide re-ception. In the case of complaints, investigation disclosed that receiv-er antennas had been improperly installed and when changes were made the complaints stopped.

Paul J. Larsen, of Johns Hop-kins U., representing the Society of Motion Picture Engineers, pro-tested the CBS brief attacking the-atre television. He contended that theatre television is not a broadtheatre television is not a broad-casting service, that it could not utilize wire lines such as Muzak, that the service should be classified as private communications to differentiate it from broadcasting. SMPE asked the Commission to "reaffirm the experimental allocation of frequencies for the service of theatre television" in the band from 1900-30,000 mc.

From 1900-30,000 mc. Paul M. Segal, counsel for the American Radio Relay League, said the proposed allocations are "entirely acceptable" to the ARRL. K. B. Warner, ARRL secretary, said the amateurs would prefer their present assignment 56-60 mc

In Southern New England People are in the Habit of Listening to WTIC

over 50-54 as proposed, but would take the FCC assignment. He termed the 56-60 mc band as "uniquely erratic" where anything can and does happen".

George Milne of the Blue network, appearing as allocations chairman of RTPB Panel 4, urged the Commission to reconsider its proposal and allocate more channels for relays. Mr. Harris said NBC concurs in the RTPB recommendations.

Broadcast services, except facsimile, were concluded at 12:30 p.m. Friday and the Commission went immediately into police radio services. Dr. Daniel E. Noble, chairman of RTPB Panel 13, urged the FCC to reserve additional channels for the postwar use of mobile services, to insure expected expansion of essential emergency services.

Testifying then as a member of Committee 8 and not panel chairman, Dr. Noble suggested a channel between 30-40 mc for portable equipment and walkie-talkies. These services are impractical in the higher bands, he said, because of battery difficulties.

During Friday's closing session, the Commission introduced into testimony letters written by A. W. Mathis, vice-president of H. G. Fisher Co., diathermy manufacturers, to 150 surgical supply dealers and 30,000 physicians urging that they communicate with U. S. Senators to "use their influence with the FCC" to grant a "sufficiently wide band" for diathermy equipment.

When Mr. Mathis, who is chairman of the Appeal Committee of the Committee on Medical and Surgical Applications, RTPB Panel 12, completed reading the letters, Mr. Denny assured him that the oral arguments before the Commission are not a "futile procedure", as implied in the company's letters.

Witnesses for rural telephone service, industrial, medical and scientific services, and general emergency services such as fire, forestry, police, etc.; railroads and general mobile were heard. The Commission hoped to complete the oral argument on Saturday.

D. E. ROBINSON has resigned as director of research of Pedlar & Ryan to join Sherman K. Ellis & Co., New York, as vice-president in charge of research. Research director of Federal Adv. for 14 years, Mr. Robinson is a member of the Board of Broadcast Measurement Bureau, of the AAAA research committee and other research groups.

DuMont Plan

(Continued from page 13)

quired and to "then be assigned to television service as the commercial television service demands further expansion."

"Adequate 6-mc television broadcast allocations will be provided if eventually television occupies the entire spectrum between 44 and 216 mc, but this entire spectrum can be assigned as needed by normal expansion of the service having begun with the present 12 proposed channels," Dr. Goldsmith continued.

"As to frequency modulation broadcasting, the range from 84 to 102 mc can probably be incorporated in television receiver designs to provide both television reception and frequency modulation sound broadcast reception. Then as television commercial operation expands it can, if necessary, absorb these frequency modulation sound broadcast channels if that service no longer receives public demand in view of the superior television service providing both sight and sound."

The DuMont Labs. would solve the congested FM band problem by restricting the channels to 40 kc, rather than 200 kc, as proposed by the FCC, contending that under its proposal "450 clear channels will be provided." From its experience in AM and FM transmission at 83.75 mc, the corporation is "thoroughly convinced that the narrower band amplitude modulation can provide an excellent broadcasting service."

Division of Channels

If the FCC proposal should prove inadequate to accommodate all qualified stations applicants, then DuMont suggested "it would be wise" to plan a division of the channels so as to accommodate both FM and AM in this region of the spectrum between 84 mc and 102 mc.

Television in the region from 44-84 mc is "more sound technically than FM" in the same area, the statement continued. DuMont opposed earmarking the 480-920 mc region, now proposed for experimental television, for commercial use, contending "there is no indication at the present time" that the high-definition service will prove feasible commercially.

Allocation of the proposed 12 channels below 300 mc should be on a "permanent" basis, the DuMont statement admonished and that the FCC should issue an "official statement" to the effect that they would "remain assigned for this purpose over a period of at least ten years".

NAB Blasts WNEW's Claim That BMB Needs Safeguards

Research Committee Answers Six Points Raised by New York Station for Independents

FOLLOWING a two-day meeting of its Research Committee in Washington, the NAB last week blasted the exploratory study of WNEW New York which had proposed special safeguards for independent stations in "problem markets" as a basic part of the industry-wide audience measurement plan.

In its exploratory study, results of which were announced last month, WNEW employed procedure recommended in the original NAB coverage plan, forerunner of the BMB. The Research Committee, in its response, challenged the conclusions.

In a letter dated Jan. 25, 1944, Miss Alberta Curtis, research director of the New York independent, asked that the findings in the study be considered in two different ways: "As shortcomings which jeopardize the chances of the BMB to satisfy some prospective members, or as difficulties which might be ironed out." The letter was addressed to Paul F. Peter, NAB Director of Research and secretary of the Research Committee.

Six Points for Study

Miss Curtis' letter, briefing a 50page report of the WNEW survey, listed six points which, she recommended, merited further consideration by the Committee. The Report was studied by the committee and the six points were answered in a letter signed by Mr. Peter and Roger W. Clipp, president, WFIL Philadelphia and chairman of the Committee.

Miss Curtis' six points, paraphrased (in italics) and the NAB replies:

reprise: (1) Since there are certain weak-nesses in the BMB Plan which are pertinent only to the independent sta-tions and small stations, there might be a permanent sub-committee of the BMB's research committee set up to represent them.

In order to insure operation in the best interests of all parties, the BMB has created a committee of the Board and created a committee of the Board of Research consisting of Robert F. Elder of ANA, D. E. Robinson of AAAA and Frank Stanton of NAB, each of whom represents one of the three cooperating organizations and all of whom are qualified research people. In addition it has been recommended that a research committee be appointed having equal representation from each of the three associations ..., With this structure, the interests of the independent and small stations are preteried. are protected.

(2) This station (WNEW) would be to have a clear-cul statement by like the BMB of what the Bureau is measuring, and of the relations between this and other audience measures.

The BMB will measure the total number of radio families who listen to stations and where those families re-side, BMB circulation, engineering contours and program ratings are each different measurements for dif-ferent purpose

(3) The specific provisions in the BMB Plan for the even representation of different economic groups are of

interest to us (WNEW). It is a ques-tion whether it is enough to set a minimum figure of 50% to be obtained from all levels since there could still be over-representation of high income

from all levels since there could still be over-representation of high income groups. If the highest income group returns 80% and the lowest 50%, there is still a definite bias. In its (WNEW) study a 50% re-turn was not attained... The BMB specifications state that a minimum return of 50% from any county (or city) must be secured before results can be tabulated. In actual operation the ballot method employs the same procedure in follow-up in all three economic classifications to bring the total return up to 50% or better. Such wide separations as the hypo-thetical case cited... have not been encountered in actual practice. (4) This study disclosed that ... a considerable proportion of the low income group still finds it too compli-cated ... we felt that still further tests should be done to come to the simplest form possible. The BMB will pre-test all question-naire copy and instructions before they are put into actual use... Experience with the BMB technique has not in-dicated that any great difficulty of re-spondent understanding has been en-countered.

spondent understanding has been encountered.

(5) The inconsistencies in station call letters listed by the same families on two different occasions (original on two algerent occasions (originat ballot and follow-up)... could prob-ably be overcome in part by enclosing with the ballot a list of stations and dial positions in counties where the number of stations with inside cover-age exceeds ten....

Inconsistencies Not Borne Out

The significance of inconsistencies of station call letters listed by the same family is not supported in the survey work performed by WNEW.... The suggestion that a list of stations be included with the ballot is not work-

included with the ballot is not work-able because the project itself is the only means which could properly de-termine what stations should be includ-ed in such a roster. . . . (6) The data on program listening in this study suggests that the audience of certain programs exceeds the total circulation for the station. The BMB could consider procedures for establish-ing correction factors. . . .

The conclusions . . . are not war-ranted from the material submitted. The report reaches conclusions through answers obtained by personal inter-view with an "atypical sample", using the question, "Do you listen fairly reg-ularly to any of these programs?" In order to reach a comparison there would have to be established a definite correlation between once-a week and correlation between once-a-week and "fairly regular" listening. Technically, the BMB measurement properly ap-plied to any station will always show BMB circulation higher than the acship circulation higher than the at-tual audience to any one program in a station's normal schedule. Concluding her letter to Mr. Peter, Miss Curtis stated: "I hope that this

Miss Curtis stated: "I hope that this study will contribute in some measure to the development of the BMB's op-erations. Our own understanding of the plan has been clarified, and that was our purpose in trying to get the picture for ourselves."

Mr. Clipp, in presenting the NAB's views on the WNEW sur-vey, invited WNEW to present any further suggestions it might de-velop as a result of the study. Miss Curtis had presented her views in person to the Technical Sub-Com-mittee of the NAB Research Committee Feb. 20.

Miss Bernice Judis, manager of WNEW, announced in New York that the full 50-page report on her station's exploratory survey would be released this week.

All Texas Stations Sign

Simultaneous with release of the NAB comment on the WNEW study, it was announced by Hugh Feltis, BMB president, that all Texas stations attending the NAB meeting in Dallas (District 13) now had signed with the Bureau, first area to subscribe 100%.

Mr. Feltis last week appointed the following committees of the BMB:

BMB: Advertising Industry Relations: Linnea Nelson (J. Walter Thompson), chairman; Carlos Franco (Young & Rubicam), Frank M. Russell, vice-president, NBC; J. O. Maland, general manager, WHO Des Moines; Donald B. Stetler (Standard Brands Inc.) and J. A. Miller (Standard Oil Co. of N. J.). Research: D. E. Robinson (Pedlar & Ryan), chairman; Frank Stanton, vice-president, CBS; Robert F. Elder (Lever Bros. Co.). Finance: Mr. Clipp, chairman; Leonard T. Bush (Compton Advertising Inc.). A third to be named. By-Laws and Rules Procedure: Joseph M. Allen (Bristol-Myers Co.), chairman; Melvin Brorby (Needham, Louis & Brorby Inc.): Robert T. Mason, general manager, WMRN Marion. Mr. Feltis said that Miss Nelson, Mr. Elder and Frank Silvernail, of

YOUNG GILLETT IS KILLED IN ACTION

ANNOUNCEMENT was made last week that Pvt. David Lester Gil-lett, son of Glenn D. Gillett, con-sulting engineer now in war service,

was killed in ac-tion last fall in Italy.

Young Gillett went into active combat in Italy last summer and was killed by machine gun fire on Sept. 16 while leading his squad in an attack on a hill position. He

Pvt. Gillett

was born July 8, 1924 and was a student at Norwich U. in 1942, when he entered the Army. His older brother, Robert, is on active duty with the Army in a communications company of an Air Forces wing stationed in Belgium. His younger brother, Richard, is in the Navy serving in a catapult group aboard a carrier.

The elder Gillett, well-known con-sulting engineer in Washington, for the past three years, has been a development supervisor at the Co-lumbia U. Division of War Re-search at the Navy Underwater Sound Laboratory in New London. He recently joined the Operation Analysis Group of the 20th Air Force in communications work and after an orientation period in this country, he will be attached to the staff of one of the bomber groups based in the mid-Pacific.

the BBDO Radio Department, were to attend the NAB district meeting in Boston, which opened today.

Present BMB subscriptions from NAB districts where Mr. Feltis has appeared are as follows:

	Stations	Now	
District	Attending	Signed	Percentage
6	35	33	94%
13	45	45	100%
16	22	15	68%
15	25	10	40%
17	39	35	90%
14	24	22	92%
10	38	29	76%
11	28	24	86%

(Total signed from other Districts where meetings are yet to be held: 36.)

Adams Named

JACK ADAMS, radio producer and director has been appointed executive assistant in charge of the concert and radio division of W. Colston Leigh Inc., New York, lecture and concert bureau. Mr. Adams has been with Colston Leigh as radio division head since 1943, presenting Lawrence Tibbett on Your Hit Parade. A pioneer in radio, Mr. Adams created and sold the first network radio program The Atwater Kent Hour on NBC, later establishing a bureau to manage radio artists and create commercial programs. Business was merged in 1928 with Concert Management headed by Arthur Judson.

WNBH, WOCB Transfer

VOLUNTARY assignment of the licenses of WNBH New Bedford and WOCB West Yarmouth, Mass. from E. Anthony & Sons Inc. to Bristol Broadcasting Co., a holding company solely owned by the newspaper publisher, is requested in applications filed with the FCC last week.
