BROADCASTING, December 7, 1964

Saturday baseball

If any TV network wants major league baseball on Saturdays in 1965, it will have to negotiate with baseball committee headed by John E. Fetzer, veteran broadcaster and president of Detroit Tigers. At meetings in Houston last week, ball clubs began signing over rights for Saturday network games in 1965-66 to committee. Group expects to deliver 17 teams in 1965 package; Yankees are out because of CBS-TV contract and two unidentified clubs may be unable to take part. In past NBC and CBS negotiated individually with teams to broadcast home games. With committee holding rights, only way network will get games is to take all teams on equal-share basis, with no apparent limit to number of times any one team could show up on 26-week schedule. Presumably pennant contenders would prevail in lateseason games.

There are no special rules for Saturday when all teams are scheduled nearly every week. New Saturday plan for network showings is wholly unrelated to local television contracts teams may have. Only network blackouts would be in home cities of the two teams on national feed. Baseball feels rights gained from sharing proceeds will offset any losses at Saturday gate, and if they didn't, losses would be absorbed by higher price for rights in future. Current feeling is that Saturday package could bring about \$4 million in first year.

Those tempting residuals

Directors Guild of America, seeking to follow patterns set by talent unions, is reported to be demanding residual formula in contract currently in negotiation with producers of taped commercials. DGA's proposals on residuals could double directorial costs of taped commercials, it's understood, and conceivably could set precedent for field of film commercials, which are dominant form.

Municipal grab

Public-utility aspects of New York City's proposed CATV regulations are giving industry pause (see page 9), but precedent-setting potential of Asheville, N. C., move could be worse. Asheville city manager, Weldon Weir, finds 10,000-subscriber system could net \$500,000 annually after five years operation and sees boon to taxpayers, city revenues. Despite howls of six private applicants, including broadcasters, Mr. Weir is leaning toward city-owned operation. More than dozen

CLOSED CIRCUIT-

other city managers are holding up pending applications in their communities to see what happens. Bell Telephone's tie-up with one applicant there and state utility commission complication are behind go-slow attitude of Mr. Weir, but decision is expected right after first of year.

The boat sailed

Ironic hindsight: Sources close to Curtis Publishing Co.'s financial torment say there's evidence it might have been avoided some time ago. They report there are indications Curtis could have got in on television's ground floor but turned down chance to buy ABC-TV network-in late 1940's-for \$3.5 million. Turndown presumably did not permanently dismay late Edward J. Noble, then principal ABC owner. Few years later he merged entire ABC operation with United Paramount Theaters to form American Broadcasting-Paramount Theaters, present owner-and that was \$25 million deal.

Basic research

Testing of extent of viewer irritation that different commercial treatments arouse has long been discussed by National Association of Broadcasters, but idea now has gained fresh impetus from Howard Mandel, NAB vice president for research. He is scheduled to present concrete proposals at meeting of TV code review board Dec. 9-10 (see page 52).

It's understood Mr. Mandel will make pitch for using syndicated onehour show in prime time, preferably in two or three-station market, as guinea pig for measuring audience reaction to various types of commercials. Plan would keep amount of commercial time consistent, but vary number of commercial segments and number and placement of actual commercials. Audience reactions would be checked by telephone interviews on randomsample basis.

Job seekers

"Senior citizen" representation on FCC is being pitched by supporters of retired Safety and Special Services chief, Colonel Edwin L. White, who has announced his candidacy for commissionership to be vacated by Fred Ford to accept presidency of National Community Television Association. Colonel White, 68, now residing in St. Petersburg, Fla., is registered Republican and was FCC's first SSS chief, having retired five years ago, after having been in government service with Federal Radio Commission and FCC since 1930.

Timing of Mr. Ford's departure was still fuzzy last Friday but was expected possible by mid-December to become affective Jan. 1. Meanwhile active though unspectacular campaigns were being conducted by or in behalf of other aspirants, including former Commissioner Charles King, dean of Detroit College of Law; Mary Jane Morris, former FCC secretary, also of Michigan, and Curtis Plummer, executive director of FCC.

Missing seal

Some radio network authorities are privately concerned over failure of Sindlinger & Co., to whose national radio audience measurement service all four networks subscribe, to apply for accreditation by Broadcast Rating Council. Sindlinger's answer is that it has been plagued by computer problems that had to be solved before there could be any point in applying; that these have just now been resolved and that firm is already taking steps to get application in order. Reason for network concern is obvious: House subcommittee that opened up ratings scandal in first place-and is still keeping eye on clean-up effortsmight take dim view of their continuing indefinitely with service that fails to enroll in policing movement represented by BRC.

New York amigos

Believed imminent is agreement settling three-way contest for Paterson, N. J.-New York UHF ch. 66 grant for Spanish-language station. Understanding reportedly has been reached whereby Macfadden-Bartell Corp. (WADO New York) would drop its application for remaining UHF in metropolitan area, leaving way open for other applicants-Spanish International Television and Trans-Tel-to enter joint venture for immediate processing. Spanish International, which now operates KMEX-TV Los Angeles and KWEK-TV San Antonio, both Spanishlanguage UHF's, is partnership of Emilio Azcarraga, Reynold V. Anselmo, Julian M. Kaufman and Frank L. Fouce. Trans-Tel's principals are Herbert Scheftel, James Jacobson, Emanuel Dannett, New York attorney, and Edward DeGray, broadcast consultant.

CLEVELAND the "one-buy" market

the one to buy!

Another adventure in local programming, WJW-TV's twice award winning "ADVENTURE ROAD" brings the far corners of the earth to arm-chair adventures...holds general acclaim for wide-appeal intellectual and educational programming. Cleveland with no fringe stations taking a bite of the viewers is the one buy market. WJW-TV is the one to buy.

REPRESENTED BY ROBERT E. EASTMAN & CO., INC.

Late news breaks on this page and on page 10 Complete coverage of week begins on page 25 **AT DEADLINE**

Metromedia buys Packer Advertising

Metromedia Inc. has agreed to purchase Packer outdoor advertising companies, with properties in Cleveland, Cincinnati, and Toledo, all Ohio, and Salt Lake City, for over \$10 million in cash. Packer properties will be operated as central division of Metromedia's present outdoor subsidiary, Foster & Kleiser.

Holdings of Metromedia include six AM, six FM and six TV stations, ice capades, land atop Mount Wilson, Calif., to be developed for tourists, and transit advertising franchises in Los Angeles, San Francisco, Oakland, San Jose and Sacramento, all California.

NBC-TV reports daytime sales of \$4.5 million

NBC-TV reported week ending Nov. 27 was second week in row daytime sales topped \$4.5 million. Participating advertisers in week's sales include: Kimberly-Clark Corp., Neenah, Wis., through Foote, Cone & Belding, New York; Shulton Inc., through Wesley Associates, both New York; Dow Chemical Co., Midland, Mich., through Mac-Manus, John & Adams, Bloomfield Hills, Mich.; Bristol-Myers, through Doherty, Clifford Steers & Shenfield, both New York; Abbott Labs, North Chicago, Ill., through Tatham-Laird, Chicago; Lehn & Fink, through Geyer, Morey, Ballard, both New York; National Biscuit Co., through McCann-Erickson, both New York; Foster-Mil-burn Co., Buffalo, N. Y., through Street & Finney, New York; Nestle Co., White Plains, N. Y., through Leo Burnett, Chicago, and S. C. Johnson & Sons, Racine, Wis. and Mars Inc., Chicago, both through Needham, Louis & Brorby, Chicago.

CATV equipment demand brings Entron dividend

Entron Inc., Silver Spring, Md., community antenna equipment manufacturer and system owner, has declared 5% stock dividend and cash dividend of 5 cents per share, payable Jan. 15, 1965, to stockholders of record Dec. 15. Cash dividend will be paid on new shares. Entron plans to buy fractional shares created by stock dividend at closing market price Jan. 14, 1965.

Dividend, first since firm went public in 1959, was made possible, firm said, by new demand for CATV equipment. Entron recently received more than \$1 million in CATV contracts from systems in Utica, N. Y., Lawrenceville and Bridgeport, both Indiana, Jacksonville, N. C., Andalusia, Ala., and Napoleon, Ohio.

Entron's net sales for six months ended Aug. 31 were \$985,339, up 50% from \$603,191 registered during same period year ago. Pre-tax earnings were reported at \$66,472, up from loss of \$66,912.

N. Y. authority over CATV questioned

Natonal Community Television Association wrote New York City Mayor Robert Wagner over weekend outlining why, in its view, city hasn't authority for public-utility oriented regulations proposed for community antenna television (see page 44).

Using line of reasoning similar to approach taken in his filing with Connecticut Public Utilities Commission last week, NCTA general counsel Robert D. L'Heureux also sent Mayor Wagner exhibits offered Connecticut: history and scope of CATV industry, how Congress has pre-empted all broadcasting regulation to federal government and brief on public utility regulatory concept showing states are prohibited from applying it to CATV.

Mr. L'Heureux acted Friday (Dec. 4), day after nature of proposed New York regulations became known and included brief based on New York State law.

Hack station?

Plans were reported Friday (Dec. 4) for formation and operation of closed-circuit radio station by New York cab drivers to feed music, news, weather reports, etc.—and commercia!s—into New York City cabs. Connie Desmond, veteran sports announcer, was identified as executive vice president and program director. Details are expected to be made public shortly.

Rollins gets OK for Wilmington CATV

Rollins Broadcasting Corp., Wilmington, Del., has won city council approval for installation of community antenna television system in area, costing about \$4 million overall, spokesman said Friday (Dec. 4).

Already at work on \$2.5 million project in New Castle county (suburban Wilmington), Rollins will start on \$1.4 million installation in city by Jan. 1, 1965, said G. Russell Chambers, director of engineering.

Service, offering Wilmington, Philadelphia, New York and Baltimore TV stations plus time-weather channel, will use microwave and is expected to be ready for first of 21,000 potential subscribers in Wilmington proper by June, Mr. Chambers said.

Ż

Rollins is CATV applicant in Connecticut proceeding, Plattsburgh, N. Y., and Huntington and Charleston, both West Virginia. It is licensee of WAMS Wilmington; WNJR Newark, N. J.: WBEE Harvey, Ill.; WRAP Norfolk, Va.; WGEE Indianapolis; WCHS - AM - TV Charleston, S. C.; WEAR-TV Pensacola, Fla.; KDAY Santa Monica, Calif., and WPTZ(TV) Plattsburgh.

NAEB gets Ford grant to study ETV

National Association of Educational Broadcasters received \$600,000, threeyear grant from Ford Foundation to improve quality of instructional TV, William Harley, NAEB president, announced Friday (Dec. 4). NAEB conference on long-range financing opens in Washington today (Dec. 7) (see page 51).

Project will center on regional program of seminars to improve effectiveness of personnel working in instructional TV, according to Dr. Charles McIntyre, chairman of NAEB's instructional division. Program of consulting services for institutions using TV for instruction is also planned.

Staff appointments and details are to be announced at first of year.

Thursday Arbitrons

ABC-TV and NBC-TV tied in rating averages at 17.8 on Thursday (Dec. 2) 7:30-11 p.m., and CBS-TV had 16.0 in national Arbitrons. For seven-day pe-

riod ending Dec. 2, averages were 17.7 for CBS, 16.9 for NBC, 16.5 for ABC (see page 59). NBC and ABC also tied on Thursday in half-hour wins, each scoring with three, while CBS had one.

L&N buys Cole, adds \$5.5 million billing

Acquisition by Lennen & Newell, New York, of L. C. Cole Co., San Francisco agency, was announced Friday (Dec. 4) by Adolph J. Toigo, president of L&N and William E. Haberman, president of Cole. Move is effective Jan. 1, 1965, at which time Cole will be integrated into L&N's San Francisco office, adding \$5.5 million to L&N's West Coast division billing.

Mr. Haberman will become senior vice president and manager of L&N's San Francisco office. All key personnel of Cole will move to L&N. Agency's four-office western division now bills approximately \$14 million and L&N's overall billing will be estimated \$121 million.

Winchell, ABC, AB-PT sued

\$5 million slander suit was filed Friday (Dec. 4) against Walter Winchell -with ABC and its parent firm, American Broadcasting-Paramount Theaters, as co-defendants-by Dr. Sam Sheppard, convicted of slaying his wife. Sheppard claims while on trial in 1954, he was falsely accused by Mr. Winchell of fathering illigitimate child by woman then under arrest in New York for robbery. Mr. Winchell had a 15-minute Sunday program on ABC-TV in 1954.

NCTA nominating committee formed

Formation of nominating committee to propose slate of candidates for officers and directors of National Community Television Association was announced Friday (Dec. 4) by Bruce Merrill, national chairman.

Committee plans to meet in January and to announce slate prior to month before annual convention in Denver July 18-22. Fred Stevenson is chairman and members are Al Malin, Al Stern, Lee Stoner and Frank Valentine, all on association board.

DDB drops brewery

Doyle Dane Bernbach, New York, announced Friday (Dec. 4) that it has resigned West End Brewing Co., Utica, N. Y., after six-year relationship. DDB will continue to service \$1.5 million account (approximately \$1.1 million in TV) until new agency is appointed by West End Brewing.

ABC-TV leads in

weekly Nielsens

ABC-TV was first in 30-market Nielsens for week ending Nov. 29. ABC had 20.0 average rating, CBS-TV and NBC-TV tied at 17.5. ABC led Monday, Tuesday, Thursday and Friday nights; CBS on Sunday, and NBC on Wednesday, while CBS and NBC tied on Saturday. In half-hour wins, ABC had 19, NBC 16, and CBS 14. Top 35 shows in ranking order (NBC's Bonanza was pre-empted that week by special): Rank

A guide to WAVE watchers – native "birds" of the Louisville area

Red-beaked Pillgulper

Thirty-fourth place! That's where Red-beaked Pillgulpers pushed the Louisville Metro Area in Drug Store Sales last year —*five places* higher than Louisville's 39th place in metro area population! (Figures from SRDS.) WAVE-TV is the perfect prescription when it comes to reaching this market. Here's why you can reach more Red-beaked Pillgulpers on WAVE-TV:

• WAVE-TV leads in total market coverage—reaching more Louisville-area TV homes than any other station (567,400 TV homes vs. 445,700 for its nearest competitor —a WAVE bonus of more than 120,000 homes!*).

• WAVE-TV means TV leadership in the Louisville market—first on the air, first to carry network color, and only station that transmits local, live color—altogether an average of 40 hours a week of local and network color viewing.

• Source: ARB Market Coverage Information.

DATEBOOK ____

A calendar of important meetings and events in the field of communications.

#Indicates first or revised listing

DECEMBER

Dec. 7—Du Mont TV Network Alumni annual reunion. Hotel Elysee, New York.

Dec. 7—Hollywood Advertising Club luncheon. Selig Seligman, president of Selmur Productions, Los Angeles, will speak. Hollywood Roosevelt hotel.

Dec. 7-8—Conference on long-range financing of educational television stations, sponsored by the Educational Television Stations Division of the National Association of Educational Broadcasters. Featured speakers will be E. William Henry, chairman, FCC, and Francis R. Keppel, U. S. Commissioner of Education. Statler Hilton, Washington.

Dec. 7-9—Organizational meeting for state association of broadcasters in Alaska. Anchorage-Westward hotel, Anchorage.

Dec. 8 — Los Angeles Advertising Club luncheon. Mayor Samuel Yorty will pay tribute to city's broadcasters. Statler-Hilton.

Dec. 9—Fourth Annual Recognition and Awards luncheon of the American College of Radio Arts, Crafts and Sciences. Conrad Hilton, Chicago.

Dec. 9-10 — Meeting of TV code review board of National Association of Broadcasters. Washington.

Dec. 10—Advertising and marketing course of the Advertising Club of New York. Jack Bernstein, manager of sales promotion, NBC Radio, will address the seminar on "Network Radio's Value as an Advertising and Selling Medium." Ad Club, Park Avenue at 35th St., New York.

Dec. 10 — Awards luncheon of the Art Directors Club of Los Angeles, announcing winners of the 1964 competition of western advertising and editorial art. Statler-Hilton. Los Angeles.

Dec. 10-11—Meeting of board of directors of Association of Maximum Service Telecasters, Phoenix.

Dec. 18—Annual meeting of stockholders of Filmways Inc. Hotel Biltmore, New York.

Dec. 18—FCC deadline for reply comments regarding common carrier eligibility and the transfer of noncommon carrier stations from the Business Radio Service to a new Community Antenna Relay Service.

Dec. 28-29—Conference of the marketing education division of the American Marketing Association. Chicago.

JANUARY

Jan. 15-17—Board of directors meeting of American Women in Radio & Television. Hilton hotel, New York.

Jan. 16 — Retail Advertising Conference. Reed Pasternak, head of his own agency in Flint, Mich., will discuss "How to produce effective TV commercials at a sensible cost." Walter Tower inn, Chicago.

EJan. 18-19—Oklahoma Broadcasters Association mid-winter convention will hear Robert J. Burton, president of Broadcast Music Inc., Robert J. Rawson, chief of FCC Renewal and Transfer Division, and Thomas Wall, attorney with Dow, Lohnes & Albertson, Washington. Sheraton Oklahoma hotel, Oklahoma City.

Jan. 22—Annual banquet, Federal Communications Bar Association. Sheraton-Park, Washington.

Jan. 22 — Comments are due on FCC's notice of inquiry and proposed rulemaking regarding mutual funds and other investment houses that are in technical violation of multiple ownership rules.

Jan. 22-23-Meeting of radio code board of National Association of Broadcasters. Los

Are you like one of Solomon's wives?

Does the "boss man" get around to see you frequently. Does he show great interest? Are you really important to him. Are you important to his salesmen who are trying to sell your station.

Think of it. How could you possibly be important if you are just one more of a long list of T.V. stations. Imagine trying to actually *sell* 50 T.V. stations to busy time buyers.

Our T.V. stations are important to us because we will never represent more than fifteen. We believe in the compact list so that we can give each of our stations the maximum of personal interest, effort, time and attention. We think these are the basic essentials of good representation.

The large group owners think this way too. That is why so many of them have demanded the compact list. Today more than one third of all national spot T.V. business is represented in compact lists of fifteen or less stations. Should you have these advantages too? We could give them to you.

X denotes countles where circulation is established but where not enough diaries were placed for penetration figures.

Lincoln-Land map shows KOLN-TV/KGIN-TV penetration

This map of Lincoln-Land points to an average of Total Net Weekly Circulation (combined ARB 1960 and 1964) of KOLN-TV/KGIN-TV. It's further proof that you can't cover Nebraska without Lincoln-Land ... and you can't cover Lincoln-Land without KOLN-TV/KGIN-TV.

Lincoln-Land is the 78th^{*} largest market in the U.S., based on the average number of homes per quarter hour prime time delivered by all stations in the market. Weekdays, our 10 p.m. News delivers 70,700 homes — up to 20,000 more than ANY Omaha station (March, 1964 ARB).

Ask Avery-Knodel for complete facts on KOLN-TV/KGIN-TV — the Official Basic CBS Outlet for most of Nebraska and Northern Kansas. Angeles.

Jan. 22-24 — Advertising Association of the West convention. World Trade Center, San Francisco.

Jan. 25-29—Winter meeting of radio and TV boards of National Association of Broadcasters. Palm Springs Riviera, Palm Springs, Calif.

Jan. 26-28—Twentieth annual Georgia Radio-TV Institute of the Georgia Association of Broadcasters. Featured speakers include FCC Commissioner Robert E. Lee: Broadcast Music Inc. President Robert Burton, and John Chancellor of NBC News. University of Georgia, Athens.

Jan. 28-30—Winter convention of South Carolina Broadcasters Association. Columbia.

Jan. 29-31—Regional and board of directors meeting of National Advertising Agency Network, Guest House motor inn, Birmingham, Ala.

FEBRUARY

Feb. 1—Deadline for entries for Sigma Delta Chi Distinguished Service awards.

Feb. 2-3--Advertising Federation of America/Advertising Association of the West convention. Statler-Hilton, Washington.

Feb. 4-5—Annual conference of presidents of state broadcasting associations under auspices of National Association of Broadcasters. Shoreham hotel, Washington.

■Feb. 10-11—Michigan Broadcasters Association mid-winter convention and ninth annual Legislative Dinner, Jack Tar hotel, Lansing.

Feb. 21 — Reply comments are due on FCC's notice of inquiry and proposed rulemaking regarding mutual funds and other investment houses that are in technical violation of multiple ownership rules.

Feb. 26-27—Spring meeting of the Arkansas Broadcasters Association. Jonesboro.

MARCH

March 15—American TV Commercials Festival. Waldorf-Astoria, New York.

March 21-24 — National Association of Broadcasters annual convention. Shoreham and Sheraton Park hotels, Washington.

■March 29-30—Pacific Northwest Community Television Association Inc., 10th anniversary spring convention. Davenport hotel, Spokane, Wash.

March 31-April 1—New Business Forum to be co-sponsored by the National Electronic Distributors Association and the Electronic Industry Show Corp. during National Electronics Week. Community antenna television will be among items discussed. Hilton hotel, New York.

APRIL

April 1—FCC deadline for comments regarding frequency allocations and technical standards of its proposed rules governing the licensing of microwave radio stations used to relay TV signals to community antenna television systems.

■April 8-9—Fourth annual Collegiate Broadcasters conference and the second annual College Majors conference combined into one meeting under sponsorship of International Radio & Television Foundation of International Radio & Television Society. John C. McArdle, vice president and general manager WNEW-TV New York, is chairman. Hotel Roosevelt, New York.

MAY

May 3--FCC deadline for reply comments regarding frequency allocations and technical standards of its proposed rules governing the licensing of microwave radio stations used to relay TV signals to community antenna television systems.

BMay 17-19—First convention of Advertising and Marketing International Network. Pontchartrain hotel, Detroit.

"Our four new TK-60 Cameras prove we always buy the best"

...says Alvin D. Schrott, General Manager, WJAC-TV

Sales, program and production departments agree on TK-60 quality

When a veteran broadcaster like WJAC-TV, Johnstown, Pa., erects and equips a plush new station, everything about it must contribute to its image. But let Mr. Schrott tell it.

"We had reached a point in our expansion where only a completely new facility would meet our needs. We set our sights high. We were aiming at distinction—in building, in equipment. Our four new deluxe TK-60 Cameras prove we always buy the best. With their brilliant performance and distinctive design they not only assure a new standard of excellence—they look the part. We use them for everything—local programs, commercials —tape or live. Their versatility, their built-in production features, their fine pictures all add up to a highly effective image."

Want to add distinction to your station's image? See the TK-60 salesman.

THE MOST TRUSTED NAME IN TELEVISION

Radio: the flexible answer to a brokerage house's needs

Radio dead? Not on your life!

In the post-war television years the prophets of gloom frequently have tried to lay radio to rest. Bache & Co., happily, has paid scant attention.

MONDAY MEMO

Radio expenditures constitute a significant part of our advertising budget. And we have no reason to regret spending a single dollar in the medium.

Bache & Co. is no newcomer to radio. In fact we were the first investment firm of any size to use radio as an ad medium. One of the world's largest investment firms, with more than 100 offices here and abroad, Bache & Co. today employs a radically different commercial approach than it did in the pioneering days of 1948.

I

Staid Street • Radio for brokerage firms in the 1930's and early middle 1940's was unheard of. In fact it is doubtful if anyone in finance ever thought of radio as an ad medium. For the most part Wall Street in those years was the epitome of conservative salesmanship, or nonsalesmanship. Government restrictions, coupled with the apathy of most investment firms, restricted advertising to that of the newspaper "tombstone" variety.

With this investment and sales climate, the first Bache commercials back in 1948 were considerably different than today's. We started out cautiously with public service programing on wNYC New York. Then we tried minute announcements on WQXR New York with convincing success, and a few personality-type shows with something less than favorable results. Our initial success, however, indicated to us that radio had the potential to sell the services of a brokerage firm. We set out to devise a format to prove it.

After extensive research, we hit upon the idea of setting up and sponsoring a five-minute business news program on wor New York. Radio veteran Henry Gladstone was selected to be the Bache air voice.

Why Mr. Gladstone? Why work? Why a business news show? Why radio?

No Cold Fish • We believed Mr. Gladstone would be an ideal "Mr. Bache on the air." His air personality is authoritative (essential to dispel the cold-fish image Wall Streeters and bankers had presented over the years). Mr. Gladstone knows the business and financial world. In conjunction with the wor news team, headed by George Brown, he writes the show. Bache, I hasten to add, adopts a hands-off attitude toward the program's news contents. Our 12-year relationship attests to our satisfaction.

Work is the perfect vehicle for our weeknight show because it is basically a "talk" station. Our show is contained within a solid news block of some $1\frac{1}{2}$ hours. It reaches investors and potential investors. Ratings in our 7:15 time slot are the highest with the exception of two rock-and-roll stations. Listenership is consistently higher than any other business news program sponsored by a brokerage firm at any time. Our success prompted five or six other brokers to follow our lead in using radio.

A business news show is a natural for Bache & Co. and a perfect complement to our newspaper ads. Our audience, naturally, consists of people interested in a Ford strike, General Motor's earnings, a Chrysler stock split or the impact on the market of a cut by the Federal Reserve Board in the bank discount rate. And our opening and closing commercials, prepared by Albert Frank-Guenther Law Inc., stress a variety of Bache messages.

More Cities = With the success of the work show, Bache expanded its schedule substantially. Boston (WNAC), Chicago (WGN), Cleveland (WEAR), Dallas (WFAA), Denver (KBTR), Elkhart-South Bend, Ind. (WTRC), Minneapolis (WCCO), Phoenix (KOOL), Charleston, W. Va. (WTIP), and Syracuse, N. Y. (WHEN), receive a duplicate copy of the work program (generally prepared by Mr. Gladstone in late afternoon) over Bache's direct private wire network. Still other stations in Houston, Columbus, Ohio, Charlotte, N. C., Palm Beach, Fla., Vineland, N. J., and Morgantown, W. Va., receive the program only for use on local radio shows.

reasons. For one thing, the firm likes to pioneer new concepts and our history is studded with "financial firsts." Secondly, and very frankly, we were and are always looking for more customers at a cost-per-lead comparable to our newspaper advertising or better. Thirdly, we wanted people to know how to pronounce Bache. We've been called everything from "Bocci" to "Bach." For the record, the correct pronounciation is "Bay ch."

Flexible Advertising Finally, we wanted to add a new dimension to our advertising, the dimension of flexibility. Fast-breaking news developments can be covered best by instantaneous communications media such as radio and TV. Gladstone has the flexibility to change his copy right up to air-time. And our commercials can readily be changed to highlight any new development that crops up. Newspaper ads simply can't match this flexibility.

And while as a rule we change our commercials several times a week, on occasion we have emphasized repeatedly a particularly important research publication, our semi-annual *Selected List.* Our free lecture courses are also highlighted on our commercials.

Flexibility extends into other areas. In times of crises we have stepped up the number of newscasts. The 1963 New York newspaper strike is an example. During that period we added a couple of newscasts to fill the news void and increase service to the public and eliminated or reduced the number of commercials. Never previously a radio advertiser in Detroit, we entered that market recently to keep our many investors there posted during the news vacuum created by the just-settled Detroit newspaper strike.

Bache initially tried radio for several

Henry Gellermann is a general partner of Bache & Co., New York, one of the world's largest investment firms, and is director of the Wall Street firm's advertising and public relations. His talents are in business, finance and journalism. He was educated in Munich and in New York. Arriving in this country in 1929, he wrote in the field of business and finance. During World War II he served in military intelligence and during the Korean conflict served in psychological warfare.

(after a great year of being well represented)

This is our House of Representatives

This is the ABC Television Spot Sales office in New York. There are others in Chicago, Los Angeles, San Francisco and St. Louis.

The thing that sets ABC Television Spot Sales apart is the fact that the men really <u>represent</u> the markets they sell. Six of our salesmen came to the New York office after serving in our other markets. And they keep going back to keep up to date. They know our stations. They know our markets. That's one of the rules of the house. It makes for total service to advertisers.

It's no wonder that the best way to reach the people in

New York, Chicago, Detroit, Los Angeles and San Francisco is through the five stations represented by ABC Television Spot Sales.

ABC Owned Television Stations

WABC-TV New York • WXYZ-TV Detroit WBKB Chicago • KABC-TV Los Angeles • KGO-TV San Francisco

The WSJS Television Market No. 1 in North Carolina

OPEN MIKE®

Filling ETV voids

EDITOR: With regard to your Nov. 9 editorial comments on the advertisement of educational TV programs by commercial businesses, are you not overlooking the fact that many of the really worthwhile educational and public interest programs do not come to the attention of the public, simply because most ETV stations operate virtually without funds that can be used for this purpose?

I believe the firms that underwrite ETV promotion deserve a round of applause. Certainly the commercial broadcasters who "have contributed money, equipment and programs to educational stations" did it for the benefit of the ETV station-and their own public relations image-as much as do the firms that underwrite ETV advertising and production.-Lyman W. Hintz, public relations, Miller Brewing Co., Milwaukee.

EDITOR: [Re Nov. 9 editorial] It seems to me there are two points which should be considered when we criticize program underwriting by commercial interests on educational television.

First, we do not believe that a firm such as S&W Fine Foods is underwriting programs on ETV for the purpose of supporting ETV. Rather, the company is doing something for the community in which it does business. Thus the contribution is to the community, not to KQED(TV) San Francisco. . . .

The other major point concerns ETV financing. While I cannot speak for any other than our own station, I am sure that most, if not all ETV stations, would happily disengage themselves from such underwriting if a constant and steady source of programing funds were otherwise available. . . .--C. W. Brookins, program director, KFME(TV), North Central Educational Television Association Inc., Fargo, N. D.

Miami color sets: 5%

EDITOR: My attention has been called to your Nov. 16 issue (page 78) dealing with color set penetration in various markets. You show Miami as having 1.5% penetration.

We herewith enclose a photostat of an American Research Bureau report prepared for us at our expense for the Miami market. This shows 5% of all sets in the market as being color sets. . . .

From actual knowledge of the market. I personally feel that the 5% figure is undoubtedly correct.-S. D. Astin, president, WCKT(TV) Miami Beach, Fla.

(The enclosed documentation from Mr. Astin shows the 5% color figure in the spe-cial ARB report should supersede the 1.5% figure provided earlier by ARB.)

Who is Nash?

Nash is reliability.

In Lafitte, near New Orleans, a shrimper gets up at three, sees the moon through a troubled sky, then decides to go out anyway; Nash said, on WDSU-TV, the weather would be O. K.

In Goodbee, a farmer looks out at this thirsty fields and stops worrying about them; Nash said the rains would start before morning.

In New Orleans, thousands of sleepy fishermen set out for the Chef; Nash said the winds and the tides were perfect.

When he broadcast his first weather show on WDSU-TV, Nash Roberts—a qualified meteorologist—had a drawing board and map, a felt pen, and the services of primitive radar. He also had the feeling his show wouldn't last ten days.

That was more than twelve years ago. The drawing board and the map and the felt pen are the same ones he used on that first program, but the instruments Nash uses to predict New Orleans weather now include a radar network covering over two hundred miles, heavy-weather Navy reconnaissance flights, the Tyros satellite, and floating weather stations.

The weather stations are something Nash urged the Navy and Government to get five years ago; he has been told they are "invaluable."

Nash is the only weathercaster in Louisiana to hold the American Meteorological Society's "Seal of Approval in Recognition of Competence in Weathercasting."

Nash C. Roberts, Jr. is the Weatherman for New Orleans. Everybody quotes him, always using his first name. He is another living reason why "People look to WDSU-TV." They know that the Channel Six personalities are the most vital, interesting people in their fields . . . and have <u>earned</u> the right to a viewer's time.

Imagine! Two important publications like these leaving out essential information.

They know that media buyers depend on them for market facts when they're placing advertising.

Yet both of these publications leave out the retail spending of military personnel at on-base post exchanges and commissaries.

Now three large military installations -Fort Bragg, Pope Air Force Base, and Seymour Johnson Air Force Base-are right in the heart of our coverage area.

The combined income of the military personnel at these bases is more than \$127,000,000 annually.

According to conservative estimates, about half of this money is spent at PXs and commissaries. Yet it's not shown in any data reporting source.

So you can understand why we feel like lashing someone.

We asked the guys at Sales Manage-ment and Standard Rate and Data why they didn't include these vital figures.

''Impossible,'' they said. ''The figures just aren't available.'' WRAL-TV

Excuses, excuses.

Network, spot radio growing

RAB shows network billings up 5% in first six months, predicts spot will show similar increase; top 10 spent \$40 million for radio commercials

National and regional advertising dollars are flowing into radio at a modestly increased pace this year, with current signs pointing to advances in both network and spot radio billings.

This forecast was offered by the Radio Advertising Bureau last week on the basis of detailed compilations of radio expenditures during tht first half of 1964 and an examination of key indices for the second half.

The appraisal accompanied RAB's release of its list of top 75 network radio advertisers for the first six months of 1964, along with preliminary estimates on the first half's top 10 radio users—spot as well as network.

RAB officials reported that network radio business "is making substantial progress," with first-half billings "a solid 5% ahead of 1963, which was also an excellent year."

Spot Up Too • They estimated that spot radio business for the same period, though probably not up 5%, nevertheless appeared to have advanced beyond its levels for the first half of 1963.

Although their data on the months since June is still being assembled, they said the evidence thus far is mixed but seems to indicate that politics and television's preoccupation with conventions, campaigns and elections had slowed radio's customary summer surge. Even so, they expected 1964 to wind up ahead of 1963 in both spot and network volume.

The extent of these gains appeared to depend to a great extent on November and December business.

Authorities emphasized that, as always, the pattern of gains and losses in 1964 billings, compared to 1963's, varied widely from market to market and from station to station within markets. Thus one station may be enjoying substantially higher billings this year while the broadcaster across the street —or in a seemingly comparable market—may find his business unaccountably trailing last year's performance. \$2 Million Each • A special RAB compilation for BROADCASTING, incorporating preliminary estimates of spot radio spending in the first half of 1964, indicated that nine advertisers put \$2 million or more into spot and network advertising in those six months, while a tenth put almost \$2 million. Together, their six-month investments exceeded \$40 million.

The tentative top 10 in national radio advertising for the six-month period are led by General Motors, Ford Motor Co. and Reynolds Tobacco (for complete top 10, see separate story).

While RAB's first-half figures on top spot radio spenders are still being crosschecked, comparable data on top network advertisers has already gone through that process and RAB's estimates for the top 75 network radio users, January through June, are being made public today (Dec. 7).

General Motors heads the network list with \$2.842 million, followed by the Mennen Co., Bristol-Myers, Sterling Drug and William Wrigley Jr. in that order.

Campbell Soup, Reynolds Tobacco, Mars Candy, Accent and Metropolitan Life round out the top 10 (for complete top 75, see page 26).

Top 75 Total • The first-half network total for the top 75 was \$29,355,000. The figures are gross before discounts or agency commission and thus are comparable to data on other media.

Edmund C. Bunker, RAB president, noted that release of the network data "continues radio solidly within the

GM, Ford and Reynolds radio's biggest buyers

General Motors, Ford Motors and Reynolds Tobacco were radio's biggest users in the first half of 1964, according to preliminary estimates by the Radio Advertising Bureau.

GM's investments in network and spot radio during the six months were put tentatively at more than \$8 million, Ford's at more than \$7.6 million, Reynold's at almost \$5 million.

These three headed a tentative allradio top 10 compiled for BROAD-CASTING by RAB. The special compilation was intended to complement the list of leading spenders that RAB is releasing today for network radio only (see story this page).

The all-radio top 10 is tentative and therefore subject to change because the spot radio figures involved are still preliminary estimates whose cross-checking has not yet been completed. The network radio figures have been through the complete double checking process.

The tentative top 10 in combined spot and network radio expenditures are listed below. Although further checking of the spot outlays could result in adjustments in some of the totals, RAB officials appeared confident that the rank order of the 10 would remain unchanged. (The checking is expected to be completed within a few weeks, at which time RAB plans to issue a spot radio top 75 comparable to the network list being made public today).

Tentative top 10 network and spot for the first six months of 1964:

1. General Motors	\$8,112,000
2. Ford Motor Co.	7 641 000
3. R. J. Reynolds Tobacco	4,933,000
4. Chrysler	4,326,000
5. American Tobacco	3,941,000
6 Anheuser-Busch	2,438,000
7. Coca-Cola	2,431,000
8 American Tel. & Tel.	2 358 000
9 Nestle Co.	2,066,000
10. P. Lorillard	1,953,000

ranks of the measured media, a move begun earlier this year when RAB first issued a quarterly spot and network breakdown and broke the logiam that had existed in this area for years."

He saluted the ABC, CBS, Mutual and NBC Radio networks "for their continued cooperation in making these [figures] available to RAB."

Mr. Bunker noted that comparable first-half figures on top spot radio users would be ready for publication within a few weeks.

He pledged that both spot and network figures would be available at regular intervals "from now on." Estimates of first-quarter spending by the top 50 in each category were released last summer (BROADCASTING, Aug. 17, 31).

Diverse Categories • Reviewing the first-half network list, Miles David, RAB administrative vice president, called attention to the diverse advertiser categories represented.

The top spenders, he noted, ranged from "the automotive firms who sell directly to the motorist via the car radio to the drug and food advertisers whose prime target is the housewife."

This diversity, he said, is proof of radio's ability to adapt to the needs of virtually any advertiser.

Both spot and network figures are compiled for RAB by the independent accounting firm of Peat, Marwick, Mitchell & Co.

The ranking of top 75 network users in the first half of 1964, together with their estimated gross expenditures, appears above.

No complaints on liquor ads

Campaign, started with no fanfare, sends listeners to stores to buy Antiquary

For three months, straight-sell commercials for hard liquor have been broadcast in New York three times a night, five nights a week—and not one listener has made a complaint.

The commercials are for Antiquary Scotch whisky. They have been sponsored on WQXR New York by Carillon Importers Ltd., which last week renewed the schedule for another three months, Dec. 9 to March 8. The agency for Carillon is Saul Krieg Associates, New York.

Typical commercials during the first three months told listeners that "you'll be enchanted with the Antiquary's smooth and gentle flavor, its unique character," advised them not to miss "the slow savoring of this grand Scotch whisky," stressed its "special qualities [that] supply the magic touch to Scotch drinking," and urged listeners to "head for the neighborhood store and ask for the Antiquary by name—if your dealer doesn't have it, keep hunting, it's worth the trip..."

Where to Buy it • The general approach of the commercials is expected to continue, but with an addition telling listeners where to call for information if they can't find Antiquary in their stores. A Christmas-season commercial promotes Antiquary as the solution to gift-selection problems, "so perfectly lovely to give and get."

The commercials appear at the opening, middle and closing of WQXR's 10:30-11 p.m. period five nights a week —on Monday, Friday and Saturday in the *Pops Concert*, on Wednesday and Thursday in the second half of *World* of Jazz and Broadway Theater, respectively.

WQXR, owned by *The New York Times*, touched off a controversy several months ago when it announced that it would accept hard-liquor advertising in late evening hours (on a program-sponsorship but not spot-announcement basis). Schenley Industries bought time and planned to use straightsell commercials, but switched at the last moment to public information material.

When the Carillon-Antiquary campaign was set, it was decided to make no announcement and see whether protests would develop spontaneously, according to WQXR authorities. Last week they reported evidence that the commercials were sending people into stores looking for Antiquary—but not to their phones or writing tables to complain about liquor advertising on the air. Not one protest had come in, they asserted.

3d quarter spot TV billings rise

22.5% increase over same period last year reflected in responses from 41 more stations; confections and soft drinks jump \$7 million

Spot television expenditures by national and regional advertisers for the third quarter of 1964 were \$226,990,-000 as compared with \$185,330,000 for the comparable 1963 quarter, according to information being released today (Dec. 7) by the Television Bureau of Advertising.

The 1964 third-quarter expenditures represent a 22.5% increase over the 1963 period. TVB's figures for the 1964 period reflected reports from 382 stations and the comparable 1963 expenditures were based on 341 stations. An analysis made by TVB based on 341 stations for each period showed an increase of 21% in TV spot spending in the third quarter of 1964 over 1963.

TVB listed these product classes as making substantial gains in the 1964 third quarter over 1963: confections and soft drinks, from \$17,611,000 to \$24,609,000; drugs, from \$3,510,000 to \$5,269,000; sporting goods, bicycles and toys, from \$1,073,000 to \$2,890,-000; tobacco products and supplies, from \$8,644,000 to \$14,318,000 and transportation and travel, from \$1,996,-000 to \$4,215,000.

Advertisers showing third quarter spot TV increases over last year were:

Now it's simply

Erwin Wasey Inc.

The Interpublic Group of Companies Inc., New York, announced last week that the name of one of its organizations, Erwin Wasey, Ruthrauff & Ryan, has been changed to Erwin Wasey Inc. and at the same time disclosed several top-level executive changes.

David B. Williams, who has been chairman-president of Erwin Wasey, has been elected a senior vice president and group officer of Interpublic. He will continue to have responsibility for the development of the Wasey agency and will add corporate duties at Interpublic.

Marvin Corwin, who resigned last week as a senior vice president and plans director in charge of media, research and marketing at Doyle Dane Bernbach Inc., becomes president and chief operating officer at Erwin Wasey. Fred M. Mitchell, executive vice president of Erwin Wasey, becomes chairman of the company.

Erwin Wasey, Ruthrauff & Ryan was formed in 1957 by the merger of Erwin Wasey and Ruthrauff & Ryan. In October 1963 the agency became part of the Interpublic Group, which includes McCann-Erickson Inc.; McCann-Marschalk Co.; Pritchard, Wood & Co.; Mc-Cann-Erickson International; Fletcher Richards, Calkins & Holden; Johnstone Inc., and various sales promotion, research and public-relations subsidiaries. **TVAR's annual study**

shows consumers change

their purchase patterns

Consumption of a particular product and preference for a brand within that product line may vary significantly from one year to the next and from one market to the next.

That's the finding of Television Advertising Representatives' annual brandpreference study, researched for the representation firm by The Pulse, Inc.

The 1964 TVAR brand comparison report, released today (Dec. 7), is based on material gathered in 10,100 interviews; 5,100 families were surveyed in March and 5,000 families in May. The study covered the eight markets where TVAR-represented stations are located.

Product consumption was measured for 590 brands in 12 product categories, and the results are shown along with comparative figures for 1963.

Products covered were beer and ale, cigarettes, coffee, cold cereal, cold remedies, dog food, gasoline, hair spray, headache remedies, margarine, men's hair dressing and carbonated soft drinks.

Among the consumption patterns uncovered in the TVAR analysis the rep firm points to these as major findings:

• A trend to buying of regular or instant coffee brands exclusively rather than combination buying.

• A decline in the use of proprietary cold remedies. Decreases were found from 1963 to 1964 in seven out of eight markets for nose drops, sprays, inhalants, salves and cough and sore throat remedies.

2

4

3

• Dry dog foods gaining on canned dog food brands. In six of the markets surveyed dry dog-food purchases were found to have gained while canned products showed losses in this category. Variation in this case is exemplified by the Boston market, where 70.4% of dog-owning families buy canned dog foods, and Cleveland, where 64.4% purchase dry brands.

• High consumption of sugar-free, low-calorie soft drinks. These lowcalorie drinks were found to be taking a bigger share of the soft-drink market; families purchasing the low-calorie drinks exclusively ranged from a low of

NBC Radio fourth quarter at six-year high

A total of \$5.4 million in new and renewal business has been signed by NBC Radio for the fourth quarter of 1964, already exceeding the total fourth quarter of 1963 by 24%, William K. McDaniel, executive vice president of the network, reports.

Sales to date have achieved a "sixyear peak" in fourth-quarter business, according to Mr. McDaniel. He added that sales already on the books for the first quarter of 1965 are 16% higher than last year at this time.

New business came from Schick (Compton Advertising), Whitman Candy (Gardner Advertising), Pennsylvania Crude Oil (Meldrum & Fewsmith), General Mills Inc. (Dancer-Fitzgerald-Sample), Shulton (Wesley Associates), Chrysler Corp. (Young & Rubicam), Retail Clerks International Association (Robert M. Gamble Jr.), Borden Co.'s Aunt Jane's Pickles (Zimmer, Keller, Calvert), Rexall (BBDO), Florist's Telegraph Delivery (Campbell-Ewald).

The renewal business clients and their agencies are: Christian Reformed Church (Griswold-Eshelman), Wm. Wrigley Jr. (Arthur Meyerhoff), Mennen (Warwick &

Mr. McDaniel

Legler), Sun Oil Co. (Wm. Esty Co.), American Motors (Geyer Morey Ballard) and Standard Brands (J. Walter Thompson Co.).

29

20

£

1

¥.

• Margarine purchases fell in all eight measured markets. The sharpest decline was found in Pittsburgh where 74.4% of the sample reported themselves users in 1964, compared to 87.8% in 1963—a decline of about 15%.

Robert M. McGredy, managing director of TVAR, called attention to "an increasing use and reliance on spot television" to iron out the market-to-market variations in brand success. Very few brands enjoy top ranking in their categories in all markets measured, it was noted. In the 1964 report the brands at the head of their lists in all eight markets were Pall Mall (among women smokers of nonfilter cigarettes), Kellogg's Corn Flakes, Vicks nose drops, Vaporub and cough drops, Bayer aspirin and Instant Maxwell House Coffee.

TVAR-represented stations are WBZ-TV Boston; WJZ-TV Baltimore; KDKA-TV Pittsburgh; KYW-TV Cleveland and KPIX (TV) San Francisco, all owned by Westinghouse Broadcasting, which also owns TVAR, and three non-WBC stations, WTOP-TV Washington, WBTV(TV) Charlotte, N. C., and WJXT(TV) Jacksonville, Fla.

Robert McGredy, managing director of Television Advertising Representatives, discusses the soft drink market and TVAR's 1964 brand comparison report with representatives of J. M.

Rexall Drug Co., Los Angeles, will use nearly 2,000 radio stations and 400 TV stations for a "Cut the Cost of Living" campaign to run Jan. 6-16, 1965. Drive, placed through BBDO Los Angeles, will utilize the full ABC, CBS, NBC and Keystone radio networks for 80 commercials to boost post-holiday sales at Rexall drug stores, with the TV schedules ranging from six to 40 spots.

Bunlap Corp. through Grant Advertising, both Los Angeles, is using TV and radio in four-week and 40-market campaign for Touch 'n' Cleen cleaner.

Chevy is re-introduced after strike is ended

The 1965 Chevrolets are rolling again —that is the "re-introduction" theme the automobile manufacturer is stressing in advertising campaigns on radio-TV and in other media after a strike crippled production for six weeks.

Chevrolet said "We are re-announcing our 1965 models to the public because the strike began one day after the new models appeared in dealer showrooms on Sept. 24." The firm said the new advertising push is "largely in addition" to the advertising plans drawn up before the strike.

Special Sunday night spots were placed by Chevrolet opposite its *Bonanza* (NBC-TV, 9-10 p.m.) and was thus assured of reaching every set tuned to Sunday night television in the top 50 markets. In radio, the auto firm said special spots from Nov. 12 through Nov. 27 added 6.75 million listeners per broadcast for 45 spots on 450 stations.

DCSS, NL&B tie-up under discussion

A new advertising ageny, Needham, Harper & Steers with main offices in Chicago and New York, appeared to be forming last week as a result of negotiations among principals of Needham, Louis & Brorby, Chicago, and Doherty, Clifford, Steers & Shenfield, New York.

It was reported that talks of a merger or acquisition of DCSS by NL&B had been slowed somewhat by the necessary paper work and a snowstorm in Chicago that grounded a group of NL&B executives who were to fly again to New York late in the week. There was the possibility that a move would be made before the end of the year. Observers said there were no product conflicts among the agencies' separate client lists.

As a combined agency, NH&S would bill an estimated \$84.5 million a year. In broadcast billing, NL&B reported an estimated \$36.2 million for 1964, and DCSS placed its total at \$19.6 million, or a combined total of \$55.8 million. On this basis, the agency would have ranked as the 15th largest radio-TV billing agency in the country.

Manoff adds Tussy, Ronrico to client list

Richard K. Manoff Inc., New York, last week picked up \$1.1 million in billing with Lehn and Fink Products Corp.'s Tussy Cosmetics division, effective Feb. 28, 1965. Manoff has been serving L & F for other products.

Bates Christmas greeting: no gifts please

Station representatives and other media executives have received a pre-Christmas note from Ted Bates & Co., New York, calling attention to the agency's policy on gifts from media.

"Gifts and favors," the policy states, "should not be accepted by our employes from any media source or representative doing business with our department."

The note, sent by Donald W. Severn, vice president and manager of media relations, explained that "we are bringing this matter to your attention now to avoid placing you or anyone in an awkward or embarrassing position by having to decline or return any such gifts.

"Our associations and dealings throughout the year are based, I am sure you will agree, solely on the business efforts of each of us to effect the greatest benefit to both your clients and ours. We do and will continue to appreciate these day-byday associations and your continuing cooperation, for which we want to express our warm thanks.

"We will be most grateful not only for your understanding and cooperation in this matter but also if you would so inform your clients of the purpose of this letter." Kudner Agency has been handling Tussy, an account active in broadcast.

Earlier in the week Manoff picked up Ronrico Rums, products of General Wine and Spirits Co., from Papert, Koenig, Lois, an account worth \$500,-000 in billing.

Lehn & Fink (Stri-dex) is a sponsor of *Shindig* on ABC-TV, through Manoff. The agency also has renewed Milton Bradley Co.'s (games and toys) sponsorship for 1965 in a Saturday daytime show, *Shenanigans*, on ABC-TV.

Agency appointments ...

• Lapinal Inc. names Stahl, Lewis & Patton Advertising, Los Angeles as agency for Lapinal Life-Lite hair color products. TV, radio and print media will be used. George Patton will be account supervisor.

• Teleflora, telegraphic floral delivery service, appoints Forbath Advertising, West Los Angeles, Calif., to handle advertising and public relations. Richard Forbath, agency president, and Paul Davis, vice president, will handle the account.

• Mister Donut of America, Westwood, Mass. coffee and doughnut shop franchiser, names Chirug & Cairns, Boston, to handle advertising. Spot radio and TV will continue to be used by the account. Account supervisor is Peter Geisler.

• The Lockheed Aircraft Corp., Burbank, Calif., has appointed McCann-Erickson, Los Angeles, to handle its advertising, effective March 1, 1965. Account, uses a limited amount of radio in the Los Angeles area.

• Food Fairs Stores Inc., Philadelphia, has appointed Fletcher Richards Co., New York, to handle corporate advertising. Bryan Houston was named to head food chain's agency staff.

• Midwest Footwear Inc., Sullivan, Mo., has appointed Storm Advertising Inc., St. Louis.

• The Chap Stick Co., Lynchburg, Va., appoints Cargill, Wilson & Acree, Richmon, Va., to handle advertising for Chap Stick, Chap-ans and new products.

Rep appointments ...

• WSVA-AM-TV Harrisonburg, Va: Select Stations Representatives, New York.

• WSNY Schenectady, N. Y.: Grant Webb & Co., New York.

• KNDO(TV) Yakima and KNDU(TV) Kennewick-Pasco-Richland, both Washington: William L. Simpson & Associates, Seattle, and Jacobson-Simpson & Associates, Portland, Ore.

To our fellow broadcasters and friends in the advertising fraternity, a warm invitation is extended to visit Constitution Plaza's Christmas Festival of Light.

Being a part of an area of incomparable beauty is something wonderful for a broadcaster to share with viewers and listeners. So for Christmas, we added a skyful of tiny white lights, heroic angels and reindeer of exquisite wire sculpture, animated woodland animals, lofty starbursts, and a cascading fountain of light.

Soft music fills the air and choraleers perform in various areas of the Plaza virtually every day and evening.

If you're within harking distance of Hartford, come to Constitution Plaza's Christmas Festival of Light any evening through January 1.

The children will enjoy it too.

Big money for Houston rights

Schlitz digs down for over \$5 million for three-year radio-TV contract on Astros baseball team

The Houston baseball club last week became the Houston Astros and turned up an astronomical three-year contract with the Jos. Schlitz Brewing Co., Milwaukee, for the team's radio-TV rights.

Schlitz paid a reported \$5,310,000 for the rights; a figure that Schlitz said equals what "previous Colt sponsors have paid for the broadcast rights." Pearl Brewing Co., San Antonio, had been the Astros' major sponsor, picking up one-third of the package in 1964.

The Astros, by virtue of the Schlitz purchase, would appear to be the new record holder for baseball rights. The New York Yankees had been first, receiving an estimated \$1.2 million in 1964. The New York Mets, Los Angeles Dodgers and San Francisco Giants each received an estimated \$1

Commercials in

production . . .

Listings include new commercials being made for national or large regional radio or television campaigns. Appearing in sequence are names of advertiser, product, number, length and type of commercials, production manager, director, agency with its account executive and production manager.

Heller-Ferguson Inc., 1606 North Highland Avenue, Hollywood.

Champlain Oil and Refining Co., Forth Worth, Tex. (service stations): four 60's for TV, live. Hugh Heller, production manager. Agency: Tracy-Locke, Dallas. Larry Dupont, agency producer.

Locke, Dallas. Larry Dupont, agency roducer. Jos. Schlitz Brewing Co., San Francisco (Burgermeister beer): eight 60's for radio, musical. Hugh Heller, production manager. Agency; Post-Keyes-Gardner, Chicago. Jim Deasy, agency producer.

Jefferson Productions, One Julian Price Place, Charlotte, N. C.

Bost Bakery, Shelby, N. C. (bread): seven 20's for TV, live on tape. Jim Rogers, production manager. Norman Prevatte, producer. Agency: Cleveland Advertising. Max Butler, account executive.

Procter & Gamble Co., Cincinnati (Crisco oil): two 60's for TV, live on tape, Jim Rogers, production manager. Norman Prevatte, director. Agency: Compton, New York. Peggy Gannon, agency producer.

agency producer. Ruth's Salads, Charlotte, N. C. (salads): six 10's for TV, live on tape. Jim Rogers, production manager. Norman Prevatte, director. Agency: Sonny Smith, Charlotte.

Delta Air Lines, Atlanta (air service): two 60's for TV, live on tape. Jim Rogers, production manager. Don McDaniel, director. Agency: Burke Dowling Adams, Atlanta. Heyward Siddons, agency producer. million in 1964.

In 1964, the Astros—then the Colt .45's—telecast 14 weekend road games on eight stations in Texas, Louisiana, Oklahoma, Arkansas and New Mexico. A 25-station radio network carried all the team's games last season.

A Schlitz spokesman said last week that he expected the radio network would be about 30 stations and the TV network would have about a dozen stations for 1965. It is also expected that the team will telecast more games this year.

Schlitz, which made the purchase shortly after breaking ground for a new brewery in Longview, Tex., has an eye to "the virgin territory" the Astros network would cover, the spokesman said. He added that Schlitz would sell off part of the package, probably no more than 50%.

In 1964 Schlitz was one-third sponsor and held rights to the Milwaukee Braves at a reported \$525,000. Earlier this year when the Braves announced intention of moving to Atlanta where an estimated \$7.5 million, five-year radio-TV contract was waiting for them (CLOSED CIRCUIT, Oct. 19), Schlitz was said to have offered the Braves \$1.5 million for 1965 rights to keep them in Milwaukee.

However, the Braves agreed to move, although not until the 1966 season. The Schlitz spokesman said there had been no decision on sponsoring the Braves in 1965, and hinted that the brewery wasn't really interested in the Braves any more.

Goodyear, Chrysler buy golf package

Goodyear Tire & Rubber Co., through Young & Rubicam, has picked up half sponsorship, and Plymouth Division of Chrysler, through N. W. Ayer, has onequarter, of a new golf package announced last week by the Professional Golfers Association which sold the TV rights to Sports Network Inc.

SNI, under the agreement, will pay up to \$750,000 to the players for the rights to the 13 tournaments in the package. A third advertiser was expected to announce momentarily it will underwrite the remaining one-quarter sponsorship.

An estimate by PGA officials was

that the sponsors—once a third advertiser was added—would provide an outlay of more than \$2.5 million for the telecasts.

Martin Carmichael, PGA TV negotiator, and Dave Marr, tournament chairman for PGA, said the player package plan should provide at least five times the TV rights value of the standard agreement. In the standard agreement, the promoter sells the sponsorship rights individually to each tournament. They said the total purse for the tour will be sweetened by about \$500,000, or a 20% increase over 1964.

About one-fourth of the TV income from rights will be divided among more than 30 local tournament sponsors cooperating in the PGA TV plan. The balance, after deduction for insurance and promotion costs (there is a \$100,-000 expense reserve), will be allocated to the 13 cities where tournaments are appearing on the TV series in 1965 (and, under the plan, a-number of sites would be rotated from year to year).

PGA said 140 stations would telecast the golf tournament alive.

Under the plan, \$50,000 would go directly to PGA, up to \$200,000 spread among local tournament sponsors who may set up regional or local TV coverage, for which officials said SNI would provide facilities, and about \$400,000 would be shared by the 13 nationally televised tournaments. Details were worked out on Nov. 30 in Chicago by tournament sponsors.

Alcoa set for ABC-TV specials

The Aluminum Co. of America, Pittsburgh, will present a series of specials on ABC-TV, starting with its first *Alcoa Preview* this season on Feb. 4, 1965, the network announced Friday (Dec. 4).

Alcoa's new series-four one hour special entertainment shows-will offer viewers an advance, behind-the-scenes preview of new major motion pictures, broadway production and other entertainment vehicles. The series will show scenes from films and plays and go on location for its story. Douglas Fairbanks Jr. is the host-narrator. Alcoa Preview will be telecast also in March, April and June. The first program in the series, produced by Productions International Corp. (Joel Spector is executive producer and Arthur Cantor is asssociate producer), will concentrate on "The Adventures of Moll Flanders," a coming motion picture filmed in London and starring Kim Novak and Vittorio De Sica, and on a major new broadway musical. Fuller & Smith & Ross, New York, is Alcoa's agency.

TV toy ads come under fire

Survey says retailers think medium costs send prices upward

-

j.

5

¥

t

1.5

Ξ.

Ŷ

ž

\$

Toy store operators don't like television, despite the fact that the national TV advertising of toys by manufacturers has increased the retailer's business, according to a survey conducted by Pepperdine College of Los Angeles and directed by Consultants to Management Inc., marketing counsellors.

The reason for the toy retailers' dislike of TV is said to be a suspicion that the cost of TV advertising is so high that manufacturers are forced to put exhorbitant prices on toys, counting on the appeal of TV to children to force the sale, to ultimate disappointment of child and parent and the resentment of the latter against the retail store which sold him the overrated merchandise.

The toy store management also resents the fact that discount houses take advantage of the heavy TV advertising of some toys to cut prices "far below a reasonable retail profit (i.e., from 35-45% down to 1-5%) and/or to use the items as loss leaders," the survey reports.

The strong feelings of local toy sellers concerning television were revealed by a pilot study a year ago, so the Pepperdine-Western Model study delved into the matter. "The result," as reported in *The American Toy and Hobby Retailer*, a 162-page abstract of the national study published by the Pepperdine press as a paper-back book (priced at \$15 a copy), is "one of the most equivocal condemnations of an advertising medium ever observed by the CMI-Pepperdine College team."

Answers to specific questions reveal: 84.85% of the toys and hobby shop operators believe that national TV advertising raises the cost of toys and 78.53% that manufacturers are forced to increase list prices in order to finance their TV advertising. The report comments: "In spite of their widespread conviction that television raises prices, retailers are not certain whether manufacturers raise their prices in order to show greater profit on TV-advertised products, or whether they are actually forced to do so in order to pay the high advertising cost."

Among toy retailers alone, 77.48% felt that products advertised on TV are higher-priced than they otherwise would be, compared to 14.49% that felt news-

paper advertising evokes higher toy prices and to 18.09% who ascribed the same price-raising effect to magazine advertising. The big majority of toy dealers expressed the belief that neither newspaper (77.69%) nor magazine (78.69%) advertising made any difference in the price of toys. Asked, "Does heavy TV advertising make it easier for the discount house to cut prices?" 81.41% of the toy dealers said "yes."

However, the value of TV advertising to the toy retailer was recognized, when more than half of the dealers (56.54%) said they would stock a TVadvertised toy against a similar one which is not advertised on TV, but "offers superb packaging." But when the TV-advertised article sold for 10% more than the well-packaged toy, only slightly over half of the retailers (52.87%) chose it, despite the higher dollar profit it offered.

The discount department store and chain drug-store managers joined the other retailers in their anti-TV opinions, in "one of the totally unexpected products of the study." Of this group, 81.11% felt TV raises prices; 39.92% said it hadn't helped business; 94.31% felt TV raises prices more than newspapers and 96.72% that TV raises prices more than magazines.

Radio was omitted from the media comparison because it is used so seldom in national toy advertising, the report stated.

CBS-TV group gets good business report

An optimistic outlook for television business as a whole and for CBS-TV network business in particular was reported last week to have been presented by CBS network authorities to members of the CBS-TV Affiliates Association's board of directors at a meeting in Maui, Hawaii.

Participants in the session, held Nov. 18-20, said network officials indicated CBS-TV gains would exceed the television average. They cautioned, however, that the trend of the past several years' toward more TV network sales in minute participations and fewer in program sponsorships would almost certainly continue, despite all network efforts to halt and reverse it.

The session, a regular fall meeting of the affiliates board and network officials, also reviewed programing and other areas of mutual interest in what was described as an "entirely harmonious" atmosphere. Carl Lee, wkzo-tv Kalamazoo, Mich., was elected chairman of the affiliates board (see page 73).

Radio code groups discuss changes

Two subcommittees of the radio code board of the National Association of Broadcasters met in Denver last week,

one to consider the advisability of lifting product-acceptability bans and the other to review the simplicity and clarity of radio-code language.

Lifting the product bans specifically the one on hemor-

rhoid remedy commercials—has long been a pet project of Howard H. Bell, director of the code authority, and at a radio code board meeting (BROAD-CASTING, Oct. 5) the proposal reportedly met with general acceptance. The subcommittee was established at that time to study the idea further, and the subcommittee on code language was set up at the same time.

The only products still automatically banned from the air by the code would be hard liquor, but hemorrhoid remedy spots would still be judged on taste a requirement that some think would severely limit the products' advertising possibilities on the medium.

The subcommittee on language was understood to have made a number of recommendations, many borrowing TV code language as simpler and clearer. The panel reportedly voted to shore up and strengthen some of the code's stipulations, mainly in the advertisingstandards category.

Memebers of both subcommittees decided to maintain silence on their actions last week, pending submission of their findings to the full radio code board, which meets Jan. 22-23 in Los Angeles.

Complaints on McIntire's buy

Controversial minister

wants to purchase

2

4,

stations in Pennsylvania

The proposed purchase of radio stations in Media, Pa., by a religious group headed by the fundamentalist preacher, the Rev. Dr. Carl McIntire, has aroused strong protests before the FCC from spokesmen for established Protestant sects and Catholic and Jewish organizations.

Dr. McIntire's The 20th Century Reformation Hour, which is broadcast by some 500 radio stations, has been the subject of numerous complaints to the FCC. Dr. McIntire has been said to have criticized Protestant denominations, the Catholic church, the United Nations, U. S. foreign policy and civil rights movements, among other targets.

The controversial cleric is president of the Faith Theological Seminary of Philadelphia, which has petitioned the FCC for approval of its purchase of wxur-AM-FM Media. The seminary has contracted to pay a total of \$191,650 for the stations, \$67,500 for the outstanding stock and the rest for notes and mortgages. Since the petition was filed, the FCC has received more than 40 letters of protest, including one from the Episcopal bishop of Pennsylvania, one from the Anti-Defamation League of B'nai B'rith, one from the Catholic Interracial Council of New York, and one from the National Association for the Advancement of Colored People.

Dr. McIntire, once a dissident member of the United Presbyterian Church in the U.S.A., has been feuding with established Protestant groups for years. In 1936 he formed his own sect and is now president of the International Council of Christian Churches. He is pastor of the Bible Presbyterian church in Collingswood, N. J.

Promise In the transfer application filed with the FCC, Dr. McIntire's seminary said its purpose in acquiring the Media, Pa., stations was to broadcast the Gospel. It proposes to operate commercially, but with 25.2% of the programing devoted to religious broadcasts on the AM station and 13.8% on the FM. The seminary also promised to provide opportunities for opposing views on controversial subjects.

Many of those who have protested

the transfer assert that Dr. McIntire, if allowed to operate a station, would have "a divisive" influence on the public.

The Anti-Defamation League said he "lacks the degree of social and public responsibility demanded of a broadcast licensee." And the NAACP, in a telegram sent by executive secretary Roy Wilkins, said Dr. McIntire has built his career on "hate mongering." Freedom of Speech Issue • Many of

Freedom of Speech Issue • Many of those expressing these views said that the question of freedom of speech is not involved, since Dr. McIntire already has ample access to the airwaves—a reference to the more than 500 stations that carry his views. The freedom of speech issue has been raised a number of times by Dr. McIntire himself on his *Reformation Hour* program, when questions about his fairness have been raised.

In the media transfer case questions of religious freedom as well as free speech are involved. One commissioner, Lee Loevinger, has already expressed the view that the commission has no business, under the Constitution, in asking any questions about religious programing.

Complicating the matter even further for the commission is the fact that the stations' current licensee, Brandywine-Main Line Radio Inc., has operated the stations only since July 1962, when they went on the air. Thus, the commission, if it were to approve the transfer, would have found that it is in the public interest to waive the rule prohibiting the sale of stations held for less than three years.

International Issue = Among other sources of protest about Dr. McIntire's *Reformation Hour* has been the Voice of America, the official U. S. overseas information agency. Dr. McIntire's broadcasts are carried not only in this country but also to Europe, Africa, the Middle East and South America, by the short-wave station, WINB Red Lion, Pa.

The Voice of America was concerned that Dr. McIntire, whose views ran almost completely opposite to those of the State Department, would confuse foreign listeners as to the true aims of U. S. foreign policy (BROADCASTING, April 22, 1963).

The commission began looking into the matter, and soon heard itself accused by Dr. McIntire of "attempting to put an iron curtain around America." The commission said it wasn't concerned with Dr. McIntire but whether the Red Lion station was carrying the diversified religious programing it had promised to deliver. So far the commission has taken no action on that matter.

FCC hiring of lawyer hit

He quit State Department after being accused of lying in Senate hearing

On Sept. 1, John F. Reilly began working for the FCC as a trial attorney. He had held that position before, from May 1961 to April 1962, and his employment went practically unnoticed.

In recent weeks, however, it has been receiving critical attention in some news reports that note he is the John F. Reilly who in November 1963 quit an important State Department post after being accused of lying to the Senate Internal Security Subcommittee.

Mr. Reilly, who had been deputy assistant secretary of state for security, was a key figure in the case of Otto F. Otepka. Mr. Otepka, another State Department security employe, was fired for insubordination for passing privileged material on the department's security procedures to the Senate Internal Security Subcommittee. However, his appeal to the secretary of state is pending.

Mr. Reilly, in testifying before the subcommittee, at first denied "bugging or tapping or otherwise compromising" Mr. Otepka's office telephone. Subsequently, however, he and two of his aides submitted statements saying they had made a survey of the feasibility of intercepting conversations in Mr. Otepka's office by connecting wires from the telephone to a laboratory listening post. They said the device proved unsatisfactory and that the wires were disconnected within 48 hours without any conversations having been intercepted.

Senator Thomas J. Dodd (D-Conn.), subcommittee vice chairman, said the three men had "lied under oath" and called for action by the department against them.

The FCC's hiring of Mr. Reilly against this background was cited last week in a syndicated newspaper column that was critical of current "attitudes" in government employment.

Columnist Richard Wilson quoted an unnamed FCC commissioner as commenting, "just another Washington fuss" when asked to explain why Mr. Reilly was hired.

But, Mr. Wilson added, "what happened was that a man who had fronted for the State Department in a very

Reproduction machine lightens WJPF's work

WJPF Herrin, Ill., solved an old copy problem with its new copier. The station said it had been using 70 to 80 secretary-hours a week preparing its two daily program logs; found less than a third of that time is required with the help of a Thermo-Fax copying machine.

¢

ř

÷.,

ĩ

<u>غ</u>ت

Stable features of the log, such as long-term shows and advertisers, are now typed on special master logs, one set for each day of the week. As the need arises, last-minute changes are pencilled onto the master, which is copied on bondweight paper to produce a working log. The master is then erased and saved for the same day the next week.

The copies are made at the rate of one every four seconds and distributed to the persons concerned.

Robert Cook, station manager, says the system not only saves time, but increases accuracy as well. He plans to extend it to a set of special occasion "master" logs for sports broadcasts and other scheduled special events.

Mrs. Shirley C. Bauman, office secretary at the station, runs the master log through the infrared copying machine.

sticky situation in Congress landed on his feet in another department, a department holding life and death powers over the multi-million dollar communications industry.

"This is the kind of bureaucratic solidarity which tends to perpetuate bad practices in government...."

One broadcaster also expressed criticism. Frank B. Best of WDIX Orangeburg, S. C., in a letter to the National Association of Broadcasters, said broadcasters should protest Mr. Reilly's ap-

 pointment. He sent copies of the letter to the South Carolina Broadcasters Association and the Senate Internal Security Subcommittee.

> FCC Chairman E. William Henry, in commenting on the matter last week, said it was "a question of judgment as to whether Reilly was full and fair and candid with the committee. This is a matter of debate."

Furthermore, he said it wasn't "a matter of keeping anybody alive." He noted that Mr. Reilly, at State, had been a Grade 18 employe (which paid \$20,000 at the time, \$24,500 now) but had been hired by the commission as a Grade 15, with a base pay of \$17,000.

"It was a matter of whether we would have a competent lawyer or take the position he was forever unemployable," the chairman said.

Mr. Reilly, before leaving the commission for the State Department in April 1962, had built a reputation as an able trial lawyer. Thomas Fitzpatrick, head of the FCC hearing division. and Delbert Flint, the commission's personnel chief, spoke highly of his qualifications in discussing his possible employment with the commission last summer. The seven commissioners, who have ultimate responsibility for the appointment, were aware of the circumstances under which he left the State Department, according to Chairman Henry. He said there was no opposition to Mr. Reilly's employment.

Mr. Reilly is currently representing the Broadcast Bureau in comparative hearings involving channel 5 Boston, channel 38 Chicago and channel 20 Fort Worth, Tex.

Metromedia waiting for return of 3M Co.'s boss

Fate of Metromedia's offer to buy the Mutual Broadcasting System from 3M Co. (BROADCASTING, Nov. 23) remained uncertain last week.

Bert Cross, 3M president, whose ab-

sence from the country had deferred earlier consideration of the offer, was delayed in his return. He had been expected back early last week, but company officials said last Thursday (Dec. 3) that he would not return until Friday or perhaps this week.

Some sources interpreted the delay as meaning Metromedia's offer had been or would be rejected, but 3M officials said the offer had not yet been considered.

Metromedia's offering price was understood to be "in the millions," but there were indications last week that first reports, which put it at about \$5 million, may have been high. Although there was still no official word, reports last week indicated that the offer was probably nearer \$3 million. The 3M Co. acquired Mutual in 1960 for a reported \$1.3 million.

Mutual owns no stations but has 491 affiliates. Metromedia owns six AM, six FM and six TV stations.

Bureau okays amended dismissal contract

The FCC's Broadcast Bureau has recommended that the hearing examiner approve the revised version of an agreement between Tvue Associates Inc. and United Artists Broadcasting, applicants for channel 23 in Houston (BROADCASTING, Nov. 30).

The agreement calls for the withdrawal by Tvue from the channel 23 proceeding upon reimbursement by United of \$27,500 in expenses incurred by Tvue in processing its application.

In approving the agreement, the bureau said, however, that Tvue's application should not be dismissed without prejudice.

The bureau, which declined to approve the initial agreement for reason of the amount of reimbursement involved (BROADCASTING, Nov. 2), said that it was now satisfied that the amount is "reasonable and represents expenditures legitimately and prudently expended" by Tvue.

The bureau also said that the amended agreement now specifically indicates what Tvue's future television plans are —that the company would, upon dismissal of its channel 23 application, apply for channel 17 Rosenberg, Tex.

This new application, when filed, will be scrutinized by the commission and its staff to determine whether it is designed to serve Houston, the bureau said.

If the examiner dismisses Tvue's application for channel 23 with prejudice, the company would not be permitted to apply for a similar service in the Houston area for one year. Rosenberg is 40 miles outside of Houston.

CATV microwave proposal hit

Commenters criticize FCC's 'piecemeal' approach; NAB says this does not solve basic questions

The FCC was told last week by representatives of both the broadcasting and community antenna television interests that its proposed rules dealing with the licensing of microwave facilities used to relay TV signals to CATV systems are "premature," "unlawful," and "discriminative."

The National Association of Broadcasters, in comments filed last Monday (Nov. 30) on parts I and III of the rulemaking said the proposals are "premature" and a continuation of the commission's "inadequate and dangerous "attempt to resolve piecemeal the problems raised by the burgeoning growth of CATV systems.

The National Community Television Association, in comments jointly filed with the National Association of Microwave Common Carriers, said the commission's proposals, if adopted, could have a far reaching and adverse impact on the development of CATV service in the public interest and upon the development and operation of independent point-to-point common carriers serving CATV's. The two associations urged that the rulemaking be dismissed.

The rulemaking in question, proposed last August, is divided into four parts with the ultimate purpose of transferring all microwave licensees that serve CATV systems and do not qualify as common carriers, to a new "Community Antenna Relay Service" (CAR) administered by the Broadcast Bureau.

Part I would amend commission rules to require that all common-carrier applications include a factual showing that at least 50% of the customers subscribing for the applicant's service are "unrelated" and "unaffiliated" with the applicant. Also, that the proposed usage by such customers, in terms of hours of use and channels delivered, must constitute at least 50% of the usage of the applicant's microwave service.

The Basic Problem . The NAB pointed out that four notices of proposed CATV rulemaking are now outstanding with the commission, yet none goes to "the basic question of an evaluation and determination of the role CATV is to play in the overall scheme of broadcasting." NAB suggested that the commission withdraw the rulemaking until an overall CATV policy is established.

In referring to the extreme backlog problem in processing point-to-point microwave applications, NCTA said that it is inappropriate for the commission to devote the time it does to a legal determination of whether an applicant is

a bona fide common carrier.

The "holding out" theory, NCTA asserted, is the sole test of status as a common carrier and eligibility for common carrier frequencies. The association added that the appropriate solution to any "inordinate delays" would be for the commission to accept an applicant's "holding out," per se, as determinative of its status and eligiblity as a common carrier, as a matter of law.

Meredith-Avco Inc., a CATV owner and operator, said that while it shares the objectives the commission is pursuing in the proceeding, it believes the proposals in part I are unnecessary and unfairly discriminate against commoncarrier microwave service to CATV systems. The company added that significant improvements would have to be made in the proposals for the CAR service before it can be said to be an adequate instrument for meeting the present and future demands for microwave facilities to serve CATV systems.

Favoring the proposals for commoncarrier eligibility was AT&T, a microwave user through its Bell Telephone subsidiary. AT&T said that it is in the public interest that the limited number of common-carrier frequencies available be assigned only to bona fide common carriers which serve the public to a substantial degree, and not merely themselves.

Increasing Backlog = AT&T, disturbed over the "mounting backlog of applications in the domestic public point-to-point microwave radio service, pointed out that in 1960 the average processing time for routine applications by landline telephone companies in that service was about one month to oneand-a-half months. By 1964 the average time had doubled, the company said.

Others opposing the commission's rulemaking for much the same reasons included Jerrold Electronics Corp., Midcontinent Broadcasting Co., Western TV Relay Inc., Golden West Communications, and Video Service Co. The companies said that the proposals in part I of the rulemaking "would constitute an unwarranted reversal of basic commoncarrier legal precendent, a departure from long-standing commission policy, and an unfair and unnecessary singling out of the CATV industry in a manner that would stifle new investment and perpetuate monopoly." The test of common carrier "has always been" willingness to "hold himself out" as ready to provide services, the companies said.

It may well be one thing to adopt a

"fish-or-cut-bait" policy, Jerrold said, but it is another entirely to foreclose otherwise qualified parties from an entire field of endeavor. Midcontinent added that apart from the legal reasons militating against the adoption of the new rules, there is no compelling need which warrants such a radical reversal of long-standing precedent.

A joint petition by 40 CATV operators and microwave licensees was also filed last week requesting the commission to terminate its proceeding without adopting any of the proposed rules.

ABC, which had asked the FCC to institute rulemaking to limit the area within which a CATV could carry a station's signal (BROADCASTING, Oct. 19), said the agency should act on that proposal before acting on the rulemaking.

However, in the event the FCC does adopt the current rule proposals, the network said, provision should be made so that microwave authorizations will be granted for carriage of TV signals to. CATV systems only with the permission of originating TV station.

Deadline for reply comments on parts I and III of the rulemaking is Dec. 12; Comments for parts I and V dealing with frequency allocations and technical standards are due April 1, 1965.

Two WDKD applicants seek dismissal of one

Two applicants who filed early last month for the facilities of WDKD (1310 kc) Kingstree, S. C., the license of which was revoked two years ago, have asked the FCC to approve an agreement whereby one party would drop out upon payment by the other of expenses incurred in the proceeding.

WDKD, owned by E. G. Robinson Jr., was denied license renewal in July 1962 for broadcasts by the station's disk jockey, Charlie Walker, that were, according to the FCC, "coarse, vulgar, suggestive and of indecent double meaning" (BROADCASTING, July 30, 1962).

The two applicants for the WDKD facility-Collins Corp. of Georgia and Santee Broadcasting Co .- in a joint petition filed last week, asked the commission to approve an agreement enabling Santee to reimburse Collins \$3,500 for expenses incurred (engineering, legal, travel, etc.) in processing its application. At the same time the parties requested that the commission dismiss the Collins application, which would leave Santee unopposed.

Collins, headed by Frank K. Graham, 83.6% stockholder, was the first of the two applicants to file for the 1 kw daytime facility on Oct. 20 (BROADCAST-ING, Nov. 2). Santee filed its application on Oct. 27 and is owned by nine Kingstree residents, with Basil Ward as president.

Please don't call the Governor between 7:00 and 7:30 tonight.

Please try not to disturb Governor Edmund G. (Pat) Brown, at the California mansion, during the vital half hour when he is probably watching the news on KXTV, Sacramento.

The Governor watches KXTV news because it includes all three elements of journalistic responsibility. Hard news collected, summarized and presented by an experienced news team. News opinion in daily station editorials geared to the problems that deeply concern the Governor and his constituents in the Valley. News analysis by the leading columnists in the nation such as Roscoe Drummond, Stewart Alsop,

Marquis Childs, Evans and Novak, and eight others who give perspective to the complexities of national and international affairs.

KXTV is the only station in Sacramento that offers this total concept of news programming. The other Corinthian stations in Houston, Tulsa, Indianapolis and Fort Wayne are the only stations in their cities which offer the same news concept.

Unquestionably, the high regard Corinthian stations reflect for the medium, and their viewers, is a prime reason advertisers select Corinthian stations. Represented by H-R

Will New York CATV set pattern?

City proposes utility-type regulation

with profits limited to 6%, outside signals barred

and built-in guarantees of quality and service

Limited profit margins and closely controlled operation are in prospect for companies seeking community antenna television franchises in New York City.

New York's board of estimate let it be known last week that CATV companies there would operate with the status of quasi-utilities, with controlled rates designed to prevent profits from "greatly exceeding" 6%.

In addition, the scope of CATV operation, under present proposals, will be closely circumscribed, excluding transmission of signals from outside the city and barring delivery of signals "from any pay-television source."

Six Seek Franchises New York franchises are being sought by six different concerns, and developments there are being watched closely by other CATV entrepreneurs and other city governments and may have precedential influence.

Though the 6% provision is not contained in tentative resolutions drawn up for Sterling Information Services or Teleprompter Corp.—the first two petitioners for franchises in the city—James Thornton, director of the city's bureau of franchises, said this figure would be the guideline in determining rates for a CATV service.

The resolutions for Sterling and Tele-

prompter were to have been considered at last week's board of estimate meeting, but their hearing was once again delayed, this time until Jan. 14.

These resolutions, similar except for service and installation charges and bond and insurance requirements, cover only an "interim" period, not to extend beyond April 1, 1967. The city explains this is an experimental period during which appropriate rates for the companies could be determined.

Installation Charges • Sterling has suggested an installation charge of \$37.50 and a monthly fee of \$5.50 and Teleprompter would charge \$19.95 for installation and \$5 monthly. Each of these proposals has been adopted in the respective pending resolutions.

Mr. Thornton said the city would maintain the right to alter rates as it saw fit to insure reasonable, but not excessive, profit.

A provision in the resolutions which observers consider crucial would prevent tampering with existing signals or originating signals:

The authority granted is "for the sole purpose of permitting the delivery of all signals broadcast regularly by all television stations to viewers in Manhattan.

"The company must operate its an-

tenna system in such manner as to insure no degradation of any of the signals delivered by it."

Who Owns Programs? • A further provision which had not appeared in earlier resolutions prepared for board of estimate review (BROADCASTING, Oct. 26) deals with program ownership. Both CBS and NBC had informed the city that their network programs are not to be considered free property for CATV operators to pick up without network approval (CLOSED CIRCUIT, Nov. 23).

The latest resolutions prepared by the city authorities say the franchises would be "without prejudice to the rights of the owners or licensees of the programs, the signals of which shall be delivered by the company."

The question of proprietary control of programs was brought to the fore in the New York proceedings last week before further discussion was continued to the Jan. 14 hearing date.

Louis Nizer, appearing as counsel for United Artists, told the board of estimate that any contracts entered into by the city with CATV operators ought to contain a provision requiring operators to obtain licenses from program owners whose shows they will carry over their wires.

He advised the city to explore the problem further. United Artists is currently in a court battle with NWL Corp. (Clarksburg and Fairmont, W. Va., CATV systems) claiming improper use of its films by the systems' operators, who are said to pick them up from regular TV broadcasts without permission or payment.

Stipulations = One proviso in the pro-

CATV is not a public utility, NCTA states

The National Community Television Association urged the Connecticut Public Utilities Commission last week not to treat community antenna television as a public utility.

"There is no more reason for considering a CATV system a public utility than there is to declare antenna salesmen or a TV broadcast station a public utility or a common carrier," the association said in a statement filed with the PUC.

"In no states are CATV systems held to be a public utility, because they are not, in fact, of a public utility nature," the association said.

The Connecticut commission is in the midst of an extended hearing on more than 20 applications by firms seeking to establish CATV's in various Connecticut communities. It is expected to resume in Hartford Dec. 21. The NCTA outlined various changes it believes appropriate in the CATV regulations already adopted by the PUC.

The statement advised the PUC that it should adhere to its original determination not to deal with protection of local TV stations because the federal government has "wholly preempted" the broadcasting field.

The PUC has assumed CATV is a public utility although, the NCTA said, there is nothing in the state's CATV legislation to indicate "that utility regulation was ever intended." No state regulates CATV this way, NCTA continued, and only Nevada is considering the concept. If Nevada concludes that CATV is a public utility under its own laws, the NCTA warned, "the matter will be taken to the courts."

The PUC should avoid setting rates and requiring accounting reports of CATV's, the NCTA said. At most the commission should "restrict itself to the area of rate supervision." CATV is a high-risk business and limiting return on investment to 6%, as the PUC has considered, would limit entry to "only the most daring and foolhardy."

Although one view expressed to the commission is that any program origination by a cable system would be "broadcasting," this is clearly not the case, as defined by the Communications Act, the NCTA said.

Industry fight against New York plan expected

"It seems likely that the community antenna television industry will fight New York City's proposed CATV regulations," Robert D. L'Heureux, general counsel for the National Community Television Association said last Thursday (Dec. 3).

The proposal smacks of a publicutility concept of regulation, Mr. L'Heureux said, and "it would be a bad precedent" for CATV regulation in other large cities.

In addition, he said, the proposal (see page 44) would prohibit CATV's from carrying signals of stations outside the New York City area, and that is clearly "outside its [the city's] realm." Congress, he explained, has pre-empted the broadcasting field. "We could go to court and prove that the whole of the field of television is in the hands of the Congress," he said.

Connecticut Situation » Mr. L'Heureux said it was likely that the New

posed New York contracts holds that all liabilities deriving from the contract, whether to persons or property, which might involve damage payments by the city would be repaid by the operating company.

Additional requirements:

• All account books of the system operators would be open for city inspection. Contracts for multiple installations, which could be made with subscribers for lower initial fees and lower monthly charges would have to be filed with the board of estimate 20 days before their effective date.

• Installation contracts could not interfere with present master antenna systems to the detriment of service now available to master-antenna subscribers.

• The company would be authorized to install and maintain its own equipment, but would be prohibited from servicing TV sets.

• All signals in the area, UHF, VHF, commercial and noncommercial would have to be carried without prejudice.

The system operators would be obliged to service cable grid and connections to subscribing set owners on a 24-hour basis.

• Subscribers would be guaranteed "quality reception" or refund of installation charges, contested quality to be determined by the board or its representative.

• The company would pay New York 5% of its gross receipts for the right to operate the system, payments to be

Mr. L'Heureux

York plan would be opposed in the same manner, and for the same reasons, as set out in the NCTA's filing with the Connecticut Public Utilities Commission. The association told the state commission last week that Connecticut's CATV law does not encompass a public utility concept for CATV regulation and that it should avoid affording protection for local television stations because the Congress has pre-empted that area (see page 44).

Of the New York proposal, he added, "It would be a bad precedent for a city to regulate rates in effect as a public utility when it is not" a public utility. - 18

Supervising rates, taxing a CATV's profits and setting safety standards are up to the city, Mr. L'Heureux went on. "We maintain that setting rates [as contrasted with supervising them] is not within the power of a municipality." Guaranteeing a percentage of profit, as is proposed, is clearly public utility regulation, Mr. L'Heureux said.

The NCTA has been successful so far in preventing states from regulating CATV's as public utilities.

made monthly and to be considered additional to city or state taxes. In addition the city's departments or schools would be allowed a 25% discount on the service.

• The city will ask \$10,000 to \$15,-000 as bond for faithful performance.

• The board of estimate proposals set up a construction schedule for operators which would require 20 miles of coaxial cable to be installed within one year of the resolution's effective date. The CATV company would present the board with an outline of its proposed cable installations within one month of the grant of the interim franchise.

• Connections from cables to buildings would be required on a "nondiscriminatory basis."

News of the city's CATV control policies did not appear to dampen the enthusiasm of applicants for New York franchises.

Sterling and Teleprompter both indicated that they would in no way be deterred by the board of estimate proposals. Other applicants informed BROADCASTING of similar positions.

Charles Dolan, Sterling president, said no one expects a 6% return on the first two years of operation anyway, considering the tremendous initial capital outlays required to establish a system.

He suggested that when utility status is imposed on a company, "generally other things go along with it, one of them being exclusivity for an operation within a given area."

Contracts proposed by the board of estimate are nonexclusive, but there have been intimations that exclusive areas of operation might eventually develop.

Franchise bureau director Thornton had this to say:

"When one company is granted a franchise for a particular area it would be up to a second applicant for the same district to demonstrate public convenience and necessity to warrant a second franchise. The city probably wouldn't see much convenience in two guys fighting for the business in the same street."

Ross Taber, vice president, responsible for RKO General's CATV activities, said the revelation that the city would consider community antenna operations as utilities would not cause RKO to back away from its franchise application.

He said the rate structure quoted in the Sterling resolution is "perfectly practical." He suggested that the New York proceeding and the tight regulatory concept might have been influenced by the current CATV hearings in Connecticut.

Teleglobe Cosmotronics said the city provisions would not change its intention to press for the franchise, but that the 6% profit limitation might later be considered unrealistic.

1735 DeSales Street, N.W.. Washington 6, D. C. master antenna companies, noted that its petition had called for regulation of CATV in the city by a seven-man board of directors, two of whose members would be appointed by the mayor.

CATV Enterprises had said in its petition that it would consider the franchise to have the connotation of a public utility and expected its rates to be set to bring a 6% return on investment (BROADCASTING, Nov. 16).

All CATV franchise applications are expected to be considered at the Jan. 14 board of estimate hearing.

They'd rather quit than switch

The sale of WSUN-AM-TV St. Petersburg, Fla., was authorized by the city council last week after Lynn Andrews, city manager, submitted a series of alternatives which apparently left the councilmen cool.

The city council ordered Mr. Andrews to draw up a list of specifications which would call for sealed bids for the stations. Mr. Andrews said he would have the specifications ready for submission to the council by mid-January.

Last month, Mr. Andrews recommended that the St. Petersburg cityowned radio and TV stations be sold. He expressed his belief that the city had no business operating commercial broadcast stations, and warned that a capital expenditure of over \$1 million would be necessary in moving the station from the city's waterfront, which is due for renewal (BROADCASTING, Nov. 16). He also pointed out that wSUN-TV, now on channel 38, had lost its bid for channel 10 in that city and probably would lose its ABC affiliation when the new channel 10 station commenced operating.

At that time the council asked Mr. Andrews to submit a written report discussing alternatives. This he did last week.

Affirming his previous recommendation that the stations be sold, Mr. Andrews presented these other possible moves: (1) increase power of wsun-tv to 1,000 kw in an effort to retain its ABC affiliation. This would cost from \$250,000-\$300,000; (2) continue wsun-TV at its present power and hope to duplicate ABC programs; (3) continue WSUN-TV on a minimum schedule without network affiliation with the hope that UHF telecasting will take hold resulting in a possible reaffiliation with ABC or a fourth network; (4) continue as an independent operation, with local live public service, news, sports, films and specialized services (stock market quotations, film documentaries, cultural programs).

NAB opposes threat to TV auxiliary band

The National Association of Broadcasters has objected to an FCC proposal that would permit government space-research earth stations to share frequencies now exclusively allocated to the television auxiliary broadcast service.

The association said the proposal would cause extensive interference which could result in serious disruption to television broadcasting and greatly restrict the broadcaster "in his goal of service to the public."

The NAB's views were submitted last Monday (Nov. 30) in comments on the proposed rulemaking looking toward providing limited access to the 1990-2110 mc bands by government earth-to-space stations at four locations in connection with the Apollo project. The stations are at Cape Kennedy, Fla.; Kauai, Hawaii; Corpus Christi, Tex., and Goldstone, Calif.

At present, these frequencies are assigned for television pickup, studio-totransmitter link (STL), and intercity relay purposes. The commission's Oct. 23 notice of proposed rule-making indicated that the government would use high-power transmitters (10 kw) and interference may be expected to TV auxiliary stations operating within 175 miles of the space transmitters.

If the commission adopts its proposal, NAB pointed out, interference to TV auxiliary service by the earth-tospace transmitters would result in disrupted service to 45% of the state of California, including the Los Angeles, San Diego and Bakersfield metropolitan complex; approximately 30% of Florida, including such areas as Daytona Beach and Orlando, and a large portion of Texas, including San Antonio, Houston and Austin.

Also commenting on the FCC proposal was Midwest Television Inc., licensee of KFMB-TV San Diego and KNG-32, a TV intercity relay station operating between Los Angeles and San Diego.

Midwest said that although it doesn't oppose the rulemaking, it does believe the Apollo proposal is contrary to sound frequency allocations policy and procedure. And in the event the Apollo project interferes with its intercity station, Midwest said that it assumes the commission would cooperate with it in obtaining authority to operate on another frequency, even one outside the 1990-2110 mc band.

Comments in the rulemaking proposal were due Dec. 1; replies are due Thursday (Dec. 10).

The WWJ Stations are **highly regarded** in their community. For many reasons: Special emphasis on local affairs and news. A knowledgeable approach to total programming. A sincere devotion to community service. An affiliation with NBC dating back 38 years. And home ownership by The Detroit News. Because they are so **highly regarded**, the WWJ Stations provide advertisers with a more receptive atmosphere for sales messages. Consistent results through the years have proved that the way to squeeze the most out of a Detroit minute is to spend it on the WWJ Stations. Whether you sell watches or wax.

BUT ATTENTION SHIFTS FROM SMALL COMMUNITIES

Observers of rapid-moving developments in the community antenna television industry shifted their attention last week from America's smaller communities to two of the nation's largest cities: New York and Philadelphia.

New York officials seemed inclined toward a quasi-public-utility concept in establishing rules for CATV; Philadelphians, however, were still very much in the exploratory stage.

It was evident, however, that CATV had become very "big time" and that systems established in either city were certain to be multi-million-dollar enterprises.

CATV developments reported around the country:

Rockford, Ill. — Application received from National Trans-Video Inc., Dallas. **Kokomo, Ind.**—Request for CATV permit submitted by Booth Broadcasting Co. Others are pending from Kokomo TV Cable Co. Inc., Hoosier Telecable Co. and Multi-Channel Cable Co.

Colonie, N. Y.—General Electric Broadcasting Co. has outlined plans for a CATV at an estimated cost of \$500,000 that would pay the town 2% monthly on gross service fees and provide free connections for schools and fire stations. Capital District Better TV Inc. applied earlier.

Herkimer, N. Y.—Applications received from UniCable Inc., Oswego Valley Electronics Enterprises Inc. and WSYR-TV Syracuse, N. Y. (Newhouse Broadcasting Corp.).

Jamestown, N. Y.—Board of Public Utilities has recommended that city council extend Jamestown Cablevision Inc.'s 15-year franchise by 10 years. The firm is headed by Simon Goldman, president and general manager, WJTN-AM-FM Jamestown.

Newburgh, N. Y.—Application filed by Community Antenna TV Corp.

New York City—City officials indicated CATV would be considered as a quasi-utility and profit, rates and stations to be offered would be determined by a city body. A spokesman for the National Community Television Association indicated the industry would oppose this (see page 44).

Canton, Ohio—Applications from Neptune Broadcasting Corp., Steubenville, and Multi-Channel Cable Co., Portsmouth, both Ohio.

Girard, Ohio—City council has rejected legislation to permit establishment of CATV by Tex-Video Inc., Pittsburgh. Mingo Junction, Ohio—Terms of proposed CATV permit to Neptune Broadcasting Corp., Steubenville, Ohio, would pay city \$300 after second year of operation, \$500 annually for next four years and \$750 annually thereafter. Six TV signals would be furnished. Clark's Summit, Pa.—Borough council defeated 4-3 an amendment to CATV ordinance that would have permitted cable systems to duplicate local area TV stations with signals from TV's in Binghamton and Elmira, both New York.

Philadelphia — Telesystem Corp., Glenside, Pa., and the Bulletin Co. (*Philadelphia Evening Bulletin*) outlined proposals for CATV's amidst opposition from television servicemen (see below).

Huron, S. D.—City ordinance that would have given Midcontinent Broadcasting Co. (KELO-AM-TV Sioux Falls, S. D.), license to establish a CATV was defeated in a referendum.

Sioux Falls, S. D.—CATV ordinance proposed by Midcontinent Broadcasting Co. (KELO-AM-TV Sioux Falls) opposed by representative of KSOO-AM-TV Sioux Falls.

Huntington, W. Va.—Application filed by Video Engineering Inc., Washington. Fond du Lac, Wis.—Petition pending for CATV by Mid-Wisconsin TV Cable Inc.

Others enter CATV act in Philadelphia

Requests for permission to operate community antenna television systems were heard by a Philadelphia city council committee last week from the Bulletin Co., publisher of the *Philadelphia Evening Bulletin*, and Telesystems Corp., community antenna television system builder and a major system owner.

The proposals were revealed during a hearing last Tuesday (Dec. 1) at which television repairmen opposed the idea of any CATV in Philadelphia. The proceeding began a week earlier when spokesmen for Triangle Publications Inc. (WFIL-AM-FM-TV Philadelphia and owner of other stations, newspapers and magazines) explained its proposal for a Philadelphia CATV (BROADCAST-ING, Nov. 30.)

The hearing was continued until today (Dec. 7) when it is expected still other proposals might be offered, among them one from Jerrold Corp., Philadelphia, also a large CATV equipment manufacturer and system owner.

Benjamin Quigg, attorney for the Bulletin Co., told the committee that it had been working with Philadelphia Bell Telephone Co. on plans for a CATV system to serve the city. He pre-

ferred one company be given a franchise rather than divide the city into sections granted several franchises.

Fred Lieberman, Telesystems president, and Philip Kalodner, an attorney representing the firm, outlined a plan for CATV that would pay the city of an estimated \$250,000 annual profit after installation had been completed.

Other provisions of the Telesystems proposal: a ban on using the system for pay TV (Triangle's application would permit it but spokesmen denied such an intention); all local stations, UHF and VHF alike, would be carried; simultaneous duplication of local stations would be prohibited; television blackouts of sports events originating in a new Philadelphia stadium would be respected, and payment to the city of sums above normal taxes so as to assure about 2% of gross profit, estimated at \$250,000 yearly.

Spokesmen for the TV Service Association of Delaware Valley, saying the organization represented 84 of the 463 service firms in the Philadelphia area, said nothing in the pending city ordinance would prevent Triangle from monopolizing sales and service of TV sets in the area. Councilman Isadore Bellis, committee chairman, said if this were Triangle's intention, legislation was unnecessary.

NAB cites drawbacks to 3-year licenses

Paul B. Comstock, vice president for government affairs of the National Association of Broadcasters, last week outlined the NAB's analysis of the difficulties of the present broadcast license terms and said the NAB intends to urge Congress to lengthen the threeyear periods.

Mr. Comstock told a meeting of the Arizona Broadcasters Association in Phoenix that the license term logically could be extended to seven years.

The three-year term is an arbitrary limit, Mr. Comstock said, decided on in the early days of radio, and there is "surprisingly little evidence to indicate why the license was fixed at three years rather than five years, as proposed by the House and recommended by the industry, or two years, as proposed by the Senate." He said "fear of broadcasters' claims to a proprietary interest in specific wavelengths appears to have been the rationale behind the fixing of a finite term for broadcasting licenses."

Mr. Comstock said "broadcasters have earned a longer license period" because they have developed "the finest system of radio and television in the

BEVERLY HILLS Colia M. Selph G. Bennett Larson Bank of America Bidg. 9465 Wilshire Bivd. Beverly Hills, Calif. CRestview 4-8151 world... and the enactment of such a statute would be a demonstration of public confidence." A longer term, he said, "would cut down on red tape and paperwork for reliable broadcasters while preserving all necessary measures which the government may lawfully take against those very few licensees who do not serve the public."

One Per Customer - Increasing the license term to seven years, Mr. Comstock said, would permit each FCC commissioner, appointed for seven-year terms, "to pass upon each license one time. It would also reduce the potential danger of direct executive control of the licensing process. . . ."

Lifting the three-year license burden, he said, would allow the FCC to clean up its backlog and "turn greater attention to the few miscreants on the fringes of broadcasting and . . . to the outside instigators of corruption over whom broadcasters have no control."

He said the NAB will present its position to Congress and try to enlist the aid of individual senators and congressmen. "It is possible that the FCC itself may recommend a longer term of license," Mr. Comstock said, and he suggested that certain ideas of Commissioners Robert E. Lee and Lee Loevinger indicated compatibility with the philosophy of longer licenses.

Changing hands

APPROVED = The following transfer of station interests was among those approved by the FCC last week (FOR THE RECORD, page 83).

■ WIVY-AM-FM Jacksonville, Fla.: Sold by Edward J. and Constance Oberle to Vida Goldgar, public relations consultant, for \$209,000. WIVY, founded in 1946, is a 1 kw daytimer on 1050 kc. WIVY-FM, not yet on the air, holds a permit for 102.9 mc with 28.9 kw.

Community Antenna Television - American Cablevision Co.. division of Jack Kent Cooke Inc., Beverly Hills, has bought for \$2.5 million Winona (Minn.) TV Signal Co. and La Crosse (Wis.) TV Signal Co. Inc., CATV systems serving 7,674 subscribers. Brokers: Daniels & Associates Inc. (see page 52).

New TV stations

As of Dec. 3 there were 98 television construction permits outstanding for stations not yet on the air. Of these 16 were commercial VHF's, 59 were commercial UHF's, five were educational VHF's and 18 were educational UHF's. New station going on the air last week: KTVR(TV) (ch. 13), 1605 Adams, La Grande, Ore. On the air Dec. 6, with program test granted Nov. 27. KTVB Inc., licensee, owned by Georgia M. Davidson (92.73%), Bette L. Krueger (3.73%) and Sherli A. Kelsey (3.54%). Permittee is licensee of KTVB(TV) Boise. La Grande station is to be a satellite of Boise facility. KTVR is on the air with 13 kw visual and 6.5 kw aural using RCA transmitters and antenna which is located on Mt. Fanny, 17.5 miles east of La Grande and is 2,603 feet above average terrain.

Executives of the station include Cy Smith, station manager; Gene Tuttle, chief engineer, and Jerry Crandall, operations director. As a satellite of KTVB the station will carry NBC-ABC programs off the air. It will be sold in combination with the mother station. Robert E. Krueger is general manager of KTVB.

Information received regarding plans of other holders of construction permits includes:

WXXW(TV) (ch. 20), 1761 East Museum Drive, Chicago, noncommercial station. Chicago Educational Television Association permittee expects to begin programing Sept. 1, 1965. About the same time plans to move into new studio building at 5400 North St. Louis Avenue. Transmitters for both wxxw and wTTW(TV) will be located at 1000 Lake Shore Plaza. Wxxw will use General Electric helical antenna and General Electric 25 kw UHF transmitter. Effective radiated power will be 430 kw visual. Station will be operated and programed by the staff of wTTW.

KTCI-TV (ch. 17), 1640 Como Ave., St. Paul, Minn., noncommercial station. Twin City Area Educational Television Corp. permittee expects to go on air Feb. 15, 1965. The station will use an RCA transmitter operating at 47.6 kw ERP. Executives will be the same as for KTCA-TV St. Paul, also a noncommercial station.

KVSF-TV (ch. 2), Santa Fe c/o New Mexico Broadcasting Co., P. O. Box 1294, Albuquerque, N. M. New Mexico Broadcasting Co. permittee will begin construction May 1965. No date has been set for going on the air.

AMST board to convene

The Association of Maximum Service Telecasters board will meet Dec. 10-11 in Phoenix and some 30 members are expected to attend.

Principal topics are expected to be the threat of channel-sharing from landmobile units and the problem of antenna farms for tall towers now before the FCC.

BROADCASTING, December 7, 1964

ETV broadcasters meet in D.C.

Henry, Keppel to speak at two-day session organized by NAEB; 7-month finance study begins

Representatives of more than 90 educational, noncommercial television stations will meet in Washington today (Dec. 7) in a nationwide conference on long-range financing. They represent an investment of \$50 million and need \$25 million a year in operating funds, according to C. Scott Fletcher, president of the National Association of Educational Broadcasters' Educational Television Stations division, which organized the conference.

The two-day gathering will be addressed by FCC Chairman E. William Henry and Francis R. Keppel, U. S. commissioner of education.

Most of the FCC commissioners will be present for a question and answer period following Mr. Henry's luncheon speech.

In addition to NAEB personnel, members of the FCC, the Department of Health, Education and Welfare, the U. S. Office of Education, the Joint Council on Educational Broadcasting and the American Council on Education will be on hand in seminar groups to answer delegates' questions.

The conference also will begin a seven-month study of ETV financing under the direction of Dr. Frederick Breitenfeld Jr., using funds provided by the U. S. Office of Education.

William G. Harley, NAEB president, Richard B. Hull, chairman of the NAEB board of directors and Robert F. Schenkkan, chairman of the ETS board of directors will preside at the three general sessions.

É

Many educational stations are supported in part or in entirety by private contributions, with commercial stations among the largest contributors (BROAD-CASTING, Nov. 30, 9). In May 1962, Congress authorized federal grants for the activation of new stations and the expansion of existing ETV stations, to be made through the Department of Health, Education and Welfare on a matching basis. Of the \$32 million authorized, \$8 million has been issued in grants, and applications have been accepted for another \$8 million.

51

Oren Harris plans ahead

Payola not on his probable agenda, though ratings, cigarettes and CATV are

Representative Oren Harris (D-Ark.), chairman of the House Commerce Committee, sees little on the legislative horizon affecting broadcasting in the new Congress, he revealed in an interview last week.

But in the next and succeeding breaths, Representative Harris figured that his committee was sure to return to deliberation on broadcast ratings, cigarette advertising and probably community antenna television.

Payola isn't on his list, he said, and he indicated he had no idea why some people were speculating that the FCC has opened its own inquiry because of purported worry that Congress might beat the commission to it (see page 63).

As for political broadcasting, Representative Harris had his hands full with the abortive effort to suspend Section 315 for the presidential and vice presidential campaigns this year and voiced no inclination to become involved with amending the measure any time soon. If action is to come on Section 315, it appears it will have to start on the Senate side of Capitol Hill, and there was evidence last week that Senator Vance Hartke (D-Ind.) would start things off (see page 61).

(Representative Walter Rogers [D-Tex.], chairman of the House Communications Subcommittee, has promised to resume his probe of the fairness doctrine early next year [BROADCASTING, Nov. 30].)

Up to Broadcasters = Back in Washington for the first time since his reelection, Representative Harris said last week that if broadcasters "do what they can" to improve ratings, there should be no need for legislation. This has been his view almost from the outset of the rating hearing in February 1963, and he has held to it throughout the probings by his Special Subcommittee on Investigations and the subsequent remedial activity undertaken by broadcasters.

Asked about a report the subcommittee is expected to make on the results of its ratings inquiry, Representative Harris said it would be out after the first of the year. No legislation is anticipated in this area, but, he indicated, this depends on how well the Broadcast Rating Council performs.

The chairman also anticipates some work with the smoking and health problem, one that falls directly in the committee's lap both for its health and interstate commerce aspects.

Mr. Harris, at the urging of the tobacco industry, won a delay from the Federal Trade Commission last August when Chairman Paul Rand Dixon acceeded to the committee's request that it postpone for six months the effective date, then Jan. 1, 1965, for its rule requiring health warnings in cigarette advertising. The committee is on record as intending to return to the issue soon, and it was apparent from Mr. Harris's remarks that he has given it a high priority.

As for CATV, Representative Harris repeated the advice he said he has given cable system operators: They should try to get together with broadcasters and the FCC and on terms of legislation that might he proposed for the regulation of the new industry. (This is what the National Community Television Association, the National Association of Broadcasters and the FCC have been attempting for some time. Representatives of both trade associations are scheduled to meet in New York this week.)

CATV is Changing • The nature of the CATV industry seems to be changing, Representative Harris noted. Fran-

two months ago (BROADCASTING, Oct. 26), last week announced the purchase of two more for another \$2.5 million. American Cablevision, a division of Jack Kent Cooke Inc., Beverly Hills,

Calif., now owns CATV's serving more than 23,500 subscribers, placing it among the larger multiple owners. The systems just acquired are Wino-

chises are being sought in larger and

larger communities that already have

their own TV services. He said the

CATV in his home town, El Dorado

(Ark.) Television Inc., furnishes at least

three stations with NBC programs, including KTVE(TV) El Dorado, and two

"I don't know what this is doing to the stations' service area," Mr. Harris

said. "but sooner or later those fellows

in New York [time buyers] are going to

American Cablevision

American Cablevision Co., which

television business in a large way when

it paid \$4.6 million for five systems

buys two CATV's

with CBS programs.

notice what's going on."

Ine systems just acquired are winona (Minn.) TV Signal Co. and La Crosse (Wis.) TV Signal Inc., formerly owned by S. J. Kryzsko, president. They serve 7,674 subscribers.

Mr. Cooke said "announcement is imminent of the purchase of several more CATV systems." American Cablevision's other CATV's are in Laguna Beach and Barstow, both California, Palestine and Graham, both Texas, and Keene, N. H.

The sale was through Daniels & Associates Inc., CATV brokers.

Week of decisions for TV code board

The television code review board of the National Association of Broadcasters will meet in Washington Wednesday and Thursday (Dec. 9-10) to grapple with a number of problems, among them the decision on attempting to set up a central commercial clearing house for certain types of products.

In originally proposing the commercial watchdog group, Howard H. Bell, code authority director, suggested the clearing house pass on commercials for over-the-counter drugs, proprietaries, cold and cough remedies, cosmetics and analgesics (BROADCASTING, Oct. 12). He justified the choice of those particular fields by explaining that they are highly competitive and most urgently in need

ST.

of scrutiny because "the sell [is] so hard that the temptation to cross that fine line of propriety is considerable." Mr. Bell in that speech also touched on most of the other topics that will be considered by the board this week.

Lines are expected to be drawn at the board meeting on the question of whether the code should apply to political advertising. Although Mr. Bell has frequently stated his position that a hands-off policy should be adopted, some broadcasters think political spots should be subject to code standards.

The political-commercial issue will be discussed in the form of a proposed amendment, as will be proposals to adopt code language specifying that commercial testimonials must be honest and reflect genuine appraisal-a ruling previously made by the radio code board (BROADCASTING, Oct. 5)---and spelling out the understood code ban against drinking beer or wine on TV ads.

A review of the TV code's stand on product acceptability "could be one of the hottest items on the agenda," according to one source. At issue is the outright code ban on commercials for certain products, among them treatments for hemorrhoids. The radio code board may lift its similar ban (see page 52), but many members of the TV code review board have been less receptive to such an idea.

The board also will hear a report by Howard Mandel, NAB vice president for research, on plans to test various commercial formats on selected stations.

Discussion is planned on feature film clearance, a concept prompted by the recent influx of foreign films, some of which are considered less than ideal for family viewing. The board also will be filled in on the goals of the NAB's scientific advisory panel, which will pass on the scientific claims made in commercials. The names of the scientists have not been made public.

NAB postpones listing of code drop-outs

Legal considerations have led the code authority of the National Association of Broadcasters to postpone for a month its listings of the subscribers added to and deleted from its radio and television codes.

The deletions, which will amount to a public slap in the face of errant code subscribers, were to have been published in the December issues of the NAB's radio and television code publications. The code authority, however, considered that it had given notice of intention too near to publication date for subscribers who wanted to leave the codes to get out before the listings became effective, so the publication dates of deleted code members was moved back to January, when the Dec. 1-15 changes will be made public. A regular listing encompassing a full month will be started with the February publications, which will cover the Dec. 15 to Jan. 15 period.

A code authority source last week said that virtually no opposition to the listings has been encountered, and so far no stations have withdrawn from the code because of such opposition.

Court awards \$210,000 to WORL stockholders

The Massachusetts Supreme Judicial Court last week upheld a lower state court decision awarding 12 former stockholders of WORL Boston \$210,000 in a breach of contract suit.

The court affirmed a suit by the former stockholders against WORL Inc., which was formed in 1958 to buy the 5 kw daytimer on 950 kc. Negotiations were carried on for WORL Inc. by Paul F. Harron, Philadelphia (and also principal owner of WKTV[TV] Utica, N. Y., and KAUZ-TV Wichita Falls, Tex.).

The stockholders, who together owned 1,000 shares of WORL said they agreed to sell their stock at \$22 a share. WORL Inc. later refused to buy the stock, the plaintiffs said, and they were forced to sell it subsequently at a lower price. The defendants contended that personnel and other changes made at the station before the contemplated sale was completed caused a drop in revenues. This, they claimed, breached the contract.

WORL was sold in 1959 to a group including Edward M. Gallagher, Sidney Dunn and Francis and James E. Mutui for \$469,000.

The awards were originally made to the complaining stockholders by a courtappointed auditor. They were upheld by a state superior court last year.

Both the superior court ruling and the supreme court decision involved one of the complaining stockholders. It had been agreed that the decision in the one case would apply to the other 11 stockholders. The awards from \$463 to \$39,852, went to:

Frederick W. Roche, attorney, \$39,-852; estate of the late G. Lindley Gately, \$27,916; Joseph Dunn, \$27,916; Richard Maguire (treasurer of the Democratic National Committee), \$16,682; Chester Dolan Jr. (former state senator and former clerk of the state supreme court), \$12,916; and Arthur E. Haley, J. Joseph Mahoney, estate of the late Thomas L. Regan, Hazel V. Rabbitt, Jonathan G. Butler, and H. John Adzigian, \$11,585 each, and John L. Grady, \$463.

BROADCASTING, December 7, 1964

NAB nears end of presidential hunt

What may be the last meeting of the selection committee of the National Association of Broadcasters established last summer to find a president of the association—before reporting to the January meeting of the organization's joint board has been scheduled for Washington this week.

At the meeting to be held the evening of Dec. 8 and all day Dec. 9, the committee is understood to be prepared to grapple with two main problems:

• To decide which of several names should be recommended to the joint board as a permanent paid president, and

• To arrive at an alternative, failing the choice of a top figure, on how to fill the NAB presidency through a rotating leadership to be filled by prominent broadcasters on a temporary basis.

The second activity may well be the more significant, it's believed, because the committee has failed to find a candidate who incorporates all the characteristics that the committee itself established shortly after it was formed.

A third alternative has been discussed as a backup to the first two. This would be an interim measure pending the resolution of the hierarchal structure of the NAB to upgrade its joint chairmanship to a fulltime job, with the incumbent on leave from his company for the tenure of his term.

Members Tapped = This interim step received major emphasis at the committee's meeting last month in New York (BROADCASTING, Nov. 30), with several members of the group asked whether they would serve on that basis.

No commitments were made or received but in at least one case, it is learned, one of the committeemen sought and received his company's approval to serve NAB fulltime on a leave of absence basis for a designated period.

This week's meeting officially is scheduled to continue discussion of potential candidates for the permanent presidency, to receive reports from committee members who were delegated to check on the availability of several new names suggested last month, and to discuss what avenues to explore if no candidates can be presented to the joint board—or if the joint board fails to accept the committee's nominee.

Alaskans to form state radio-TV group

A group of Alaskan broadcasters is meeting Dec. 7 and 9 in Anchorage to organize a state association. This will give each of the 50 states its own broadcasters' group.

The initial action on forming the Alaska group was taken by a meeting of Anchorage broadcasters, who decided the state organization should be formed. At that time, A. G. Hiebert, president and general manager of KNIK-FM and KTVA(TV) Anchorage, was named temporary chairman. Mr. Hiebert has written the state's broadcasters, asking them to come to the organizational meetings.

James A. Murphy, president of the Washington State Association of Broadcasters, will speak at the Dec. 7 meeting. Dec. 8 will be left free for an Emergency Broadcast System meeting scheduled then, but the next day the incipient state association will convene again.

FCC Commissioner Kenneth A. Cox

BROADCASTING, December 7, 1964

cut a tape recording in Washington last week that will be played to the broadcasters in Anchorage.

Evans wants free time, space, for politicians

Mark Evans, vice president in charge of public affairs for Metromedia Inc., last week told the Kansas City, Mo., Rotary Club that "I believe all media should work out formulas to give time and space equitably" to candidates during political campaigns.

"All forms of advertising," Mr. Evans said, "should be appealed to for simple cost expenditures for space and time, as their insurance for a continued democratic way of life. Let us remind ourselves advertising is synonomous with democracy." He also contended that "all industry should make cost-price concessions to candidates and major parties" to help candidates hold down crippling costs. "Why can't campaigns be limited to four weeks?" he asked.

He also warned broadcasters to be-

5

¥

ware of slanting political news as, he said, many newspapers do. "In many small stations," Mr. Evans commented, "the man who writes or rewrites the newscasts frequently writes the editorials. In such a situation, it is hard, if not impossible, to be unbiased."

NCTA hits interim FCC action, policies

The National Community Television Association said last week that the FCC has adopted interim conditions and policies which "have virtually halted expansion" of community antenna television systems that use microwave service.

NCTA made the comment in opposing a proposal that the commission suspend all action regarding applications in proceedings involving CATV systems.

The proposal was made by the Tele-

vision Accessory Manufacturers Institute (TAME) in a pleading supporting ABC's petition for rulemaking that would put all CATV's under commission regulation (BROADCASTING, Oct. 19). TAME maintained that uniform federal regulation of CATV could not be achieved if the industry is allowed to expand "subject only to . . . local inadequate regulation."

But NCTA said, the commission has adopted interim policies and conditions in connection with four pending proceedings that make "the action requested by TAME unnecessary."

It noted that in two proposed rulemakings, designed to provide protection for television stations, the commission has adopted interim policies requiring microwave-fed CATV's to carry the local station's signal and to refrain from transmitting programs for 15 days before and after the station broadcasts them.

The commission, in connection with the inquiry into whether it should permit combined ownership of broadcast stations and CATV's, has said that ap-

plications involving combined ownership "will be carefully scrutinized and, where appropriate, deferred" until longrange policy is developed.

The fourth proceeding involves the proposed rulemaking to establish a new home, in the 12700-12950 mc band, for noncommon-carrier microwave service. NCTA noted that if that rule were adopted, existing licensees would be required to convert their facilities to the specified frequency spectrum.

Thus, NCTA said, the commission, "where it has deemed itself to have authority to regulate"—that is, in cases involving microwave service—"has set forth certain restrictions clearly designed to accomplish what TAME in essence is requesting it to do."

essence is requesting it to do." NCTA said "a full-scale halt of CATV expansion"—which would involve all-cable microwave systems— "cannot be accomplished by the commission under its present statutory authority." As in its opposition to ABC's proposal, NCTA asserted that the commission does not have authority to regulate CATV's

FCC aims at newswire contracts

Commission shows concern about basic 5-year

agreements AP and UPI have with broadcasters

and affect contracts have on 'freedom of action'

Broadcasters' complaints about their contracts with the AP and UPI newswire services led the FCC last week to launch an inquiry that could result in the commission requiring the rewriting of those contracts for the future.

At issue are two contractual aspects.

the contract.

Commission sources say in the past year "over 100" broadcasters, most of them licensees of radio stations, have complained about these provisions. And a combined notice of inquiry and proposed rulemaking adopted by the commission looks to the possibility of outlawing both the long-term contract and its carryover provision.

The commission, which has no regulatory authority over the wire services, would act through its jurisdiction over broadcast licensees. But the FCC made clear it is concerned with the effect of long-term contracts not only on a station's "freedom of action in news programing" but competition in the newswire field, as well.

Four Commissioners Present • The proceeding was adopted with only four commissioners present. Chairman E. William Henry and Commissioners Robert E. Lee, Frederick W. Ford and Kenneth A. Cox voted to issue the notice. Commissioners Rosel H. Hyde,

BROADCASTING, December 7, 1964

If you're going to drop our name,

please do it carefully.

We are delighted to hear our name mentioned. Or see it in print. But not when it's applied to our competitor's products or when it's used incorrectly.

BAND-AID isn't a synonym for "adhesive bandage." It's the family name of a group of Johnson & Johnson products. So if you have occasion to mention us, please say "BAND-AID Brand Adhesive Bandages." Or "BAND-AID Brand Spray Antiseptic."

Use the BAND-AID Brand followed by the particular product description.

And if that's too cumbersome, we'd honestly prefer you to leave our name out altogether.

· Johnson Johnson

Lee Loevinger and Robert T. Bartley were absent.

UPI has told the commission it needs the stability provided by a long-term contract to plan future operations. Both services note that contracts for less than five years are available, although in exchange for higher rates or, as UPI told BROADCASTING last week, "because of individual considerations."

AP indicates about 1,300 of its 2,400 broadcast members have fiveyear contracts and that another 1,000 have contracts continuing until termination by the member on two-years' notice. A spokesman for the AP in New York said the association would be glad to cooperate with the commission in the inquiry.

The commission notice doesn't make any specific proposals. But it does invite comment on the advisability of adopting rules prohibiting stations from contracting with newswire services for more than, "for example," two years. This would be similar to existing rules which limit a station's network affiliation contract to two years. The commission said rules permitting wire-service contracts longer than three years are not contemplated.

z

Comments Requested • The commission doesn't invite comments on the desirability of rules dealing with con-

tracts requiring the buyer of a station to assume the terms of a wire service contract. But one question on which it asks comments is "the extent to which long-term newswire contracts may limit the broadcast licensees' exercise of their programing responsibilities in the news field (including the appropriateness under the Communications Act of such long-term contract provisions requiring any assignee of the license to fulfill the contract during its term)."

The commission noted that the contracts containing the latter provision may deprive purchasers of stations of an initial choice of news sources. "Thus, the long-term contracts may prevent full compliance with nondelegable licensee responsibilities under the Communications Act," the commission said.

(Station brokers, who act as intermediaries in the buying and selling of radio and TV stations, acknowledged that long-term contracts with news services create some difficulties sometimes, as do other long-term contracts, such as those for rentals, leases, talent. None, however could recall any sale transaction that ever fell through because of this clause.)

Main Concern = The notice said the commission's main concern is the impact of the long-term contract "on the broadcast licensee's freedom of action in news programing." A five-year contract, it added, would appear to be inconsistent with a "broadcaster's obligation if it precludes him from following his judgment as to what news programing would best meet community interests and needs in the [three-year] renewal period. . . ."

The notice reflected the commission's interest in sharpening competition in the newswire field. The commission noted that its two-year limit on network affiliation contracts resulted from the conclusion that long-term contracts prevent "real competition" between existing networks and the development of new networks, "thereby depriving the public of the improved service" it might otherwise obtain.

Similarly, the commission said, "it may be" that five-year newswire-service contracts tend to lessen competition between the services and to discourage the development of other broadcast news sources.

The commission acknowledged that the presence of many customers other than broadcasters, such as newspapers, may have "a crucial bearing" on the overall competition between the services. Accordingly, the commission noted it needs more information to make a judgment, and asked for comment "on the effect of long-term contracts with broadcasters on competition between the newswire services and the development of other news sources, and the nature of any resulting detriment to the public interest. . . ."

The commission also asked the extent to which each wire service serves broadcasters under contract to the other "or may refuse to provide service to broadcasters having unfulfilled contracts or contractual disputes with the other."

Short-term Contracts And, in view of the position taken by UPI, it asks "the extent, if any, to which short-term contracts with broadcasters might inhibit effective newswire service operations and result in a deterioration of newswire service to the licensees."

Deadline for comments is Jan. 25. But the broadcasters' complaints about the wire services contracts has spread beyond the confines of the FCC.

The commission has referred the matter to the Justice Department to consider whether possible antitrust law violations are involved. And it has promised to keep Representative Emanuel Celler (D-N.Y.) informed of its activities in the matter. Representative Celler, chairman of the House Judiciary Committee and its antitrust subcommittee, indicated an interest after receiving copies of some of the complaints sent to the commission.

SDX condemns FCC action

Proposed resolution criticizes newswire inquiry as illegal

Strong condemnation of the FCC inquiry into broadcast station contracts wih newswire services and repeal of Section 315, the equal-time law, were among resolutions to be considered at the closing session Saturday of the national convention of Sigma Dela Chi professional journalism society in Kansas City, Mo. Indications were that both would win approval of some 600 delegates and alternates.

Apprised of the FCC's action when the three-day convention convened last Thursday, the resolutions committee, representing all branches of the mass media, concluded that the commission had exceeded its legal authority in directing an inquiry into AP and UPI and that the proper forum, if any action were indicated, would be the Department of Justice under antitrust laws (see story page 56, and editorial, page 96). The resolution, in preliminary draft, cited the inquiry as an interference with freedom of the press. Ben W. McKelway, chairman of the

BROADCASTING, December 7, 1964

58 (PROGRAMING)

CBS has Arbitron lead

It was CBS, NBC and ABC in that order and not one network more than 1.3 rating points from any other on the basis of Arbitron reports for the seven-day period ending Dec. 2. CBS had 17.5, NBC 16.5 and ABC 16.2 in average ratings for the 7:30-11 p.m. periods covered. The dominating network by half-hour wins per evening: NBC and CBS tied on Friday (Nov. 27), CBS on Saturday and Sunday, ABC on Monday and Tuesday, and NBC on Wednesday.

editorial board of the Washington Star (WMAL-AM-FM-TV) in the keynote address last Thursday, urged abolition of the equal-time requirements through repeal of Section 315. The editorial responsibility, he said, should be "where it belongs" with the broadcasters themselves.

Citing BROADCASTING estimates that the 1964 campaign involved expenditures for radio and television of \$40 million, Mr. McKelway said costs were too high and campaigns too long. More important than codes of ethics, he said, was responsible reporting.

Key to Freedom = Roy Roberts, chairman of the Kansas City Star Co., who has announced his retirement effective Jan. 1, told the convention that newsmen should not be discouraged by criticisms of the coverage of last summer's political conventions, the campaigns and the events in Dallas following the assassination of President Kennedy. "If you don't get the brickbats you're not doing the job," he said.

The most effective way of preventing censorship is to do a "hard-nosed news job," he said. He described the press as meaning radio and television too—a view echoed throughout the convention which only a few years ago regarded the broadcast media as secondary.

"You will keep your freedom as long as you deserve it, and that is through responsible reporting," Mr. Roberts said in what he called his "last speech."

Ted Koop, CBS Washington vice president and outgoing national president of the 16,000-member society, told the convention of the need for action in the face of unjustified criticism of journalism. He described the ends to which extremist groups have gone to retaliate against news media through economic boycotts. He said that on the West Coast one such group tied up classified ad telephone lines to "opposition" newspapers to inhibit ad placements.

Mr. Koop was to be succeeded as national president by Ralph Sewell, Oklahoma City Oklahoman and Times (WKY-AM-TV Oklahoma City) at the Saturday closing session. Robert Cavagnaro, past national president and general executive of the Associated Press, New York, was the recipient of the Wells Memorial Key, highest honor the society can bestow upon a member.

At a panel discussion on election coverage Thursday, Herbert Klein, editor of the San Diego Union, and news secretary to Vice President Richard Nixon in the 1960 presidential campaign, said that provision should be made to provide the party out of power with greater access to television. Julian Goodman, NBC News vice president, agreed but cited the requirements of Section 315 as precluding this. He called Section 315 "an archaic law" that should be replaced.

Mr. Klein also felt that early announcement of voting results and projections in the East affect voting patterns in the West. He said that in 1960 a change of 15,000 votes in four states would have elected Mr. Nixon over Mr. Kennedy.

In undergraduate radio-television contests first place in radio reporting went to Richard C. Lytle and Kenneth Hershberger, of the Pennsylvania State University. Second place went to the news staff of KEBS, campus station at San Diego State College, California. In radio or TV newswriting or commentary, first place went to Tom Woods and Don Buffon, students at San Jose State College, California. Second place went to a six-man team at WMRH, campus station at Ohio State University. In radio or TV public service in journalism, first place went to educational station KWSC-TV Washington State University for a group project; second place to Penn State.

ABC-TV affiliates hear '65-66 plans

Told network's competitive strength is improving at a faster rate than that of the other networks

Several additional nighttime series proposed for ABC-TV next season were disclosed last week at the network's eastern regional affiliates meeting in New York. Affiliates also were informed of two program changes for this season (see adjacent story).

E

2

のないのである。

6.

Newly mentioned half-hour titles were F Troop, Tammy, The Hellcats, Stalag 17, Kevin and Go Fight City Hall. Also presented were possible entries for 1965-66 reported earlier (BROADCASTING, Nov. 30).

Other highlights of the meeting included a discussion of apparent competitive strength of ABC-TV programing in the current season, emphasis on the new ABC News Daily Electronic Feed service to affiliates (see page 61), details of new daytime schedule improvements which become effective at yearend (BROADCASTING, Nov. 18) and a. preview sampling of *The American Sportsmen* a series of specials which will be seen next year on ABC-TV.

Other information on series possibilities revealed to affiliates: Baby Makes Three, a Bing Crosby Enterprises hopeful previously reported to be without a network commitment, was said to have ABC's interest; the one-hour Four Star Television western pilot that will star Barbara Stanwyck is now being called Saga of the Big Valley; MGM-TV's half-hour western-now with the working title of The Shenendoah Man, and previously reported without a network commitment-was said to be an ABC possibility, as is Four Star's The Hellcats, a one-hour pilot in color built on a theme of three barnstorming fliers.

Kevin would star Donald O'Connor; F Troop, a Warner Brothers half-hour comedy-western about a post-Civil War cavalry troop, would place Forrest Tucker in the starring role, and Go Fight City Hall is a new title for the

Thomas P. Chisman, chairman of the ABC-TV Affiliates Association's board of governors addresses the eastern regional meeting. At the head table were (I to r): Robert Coe, ABC vice president in charge of TV station relations; Thomas W. Moore, ABC-TV president; Julius Barnathan, ABC-TV vice president and general manager, and Edgar J. Scherick, ABC vice president in charge of TV network programing. previously talked-about Shirley Temple Show.

At the meeting, Thomas W. Moore, president of ABC-TV, reported on major advertiser buys announced by the network (BROADCASTING, Nov. 23, 30). Julius Barnathan, ABC-TV vice president and general manager, noted ABC-TV's rise in "performance" this season at a rate said to be more favorable than of the other networks, and also presented research material that he said showed ABC-TV not only reached the younger, larger households but also had a high incidence of adults. The program aspects were presented by Edgar J. Scherick, ABC-TV vice president in charge of programing.

It's show moving time at networks

Program shuffling by the TV networks may be accelerated after the new Nielsen report, said to be the most representative and definitive of the season, is out this week. But as of last week only these changes were certain:

On ABC-TV, Outer Limits (Saturday, 7:30-8:30 p.m. EST) will be replaced on Jan. 23, 1965 by The Family is King featuring the King Sisters and other members of their family, and Mickey, Wednesday 9-9:30 p.m., will be displaced when Shindig, now in the 8:30-9 p.m. slot, is extended another half hour.

On CBS-TV, all changes are not yet set, but *Mr. Broadway* Saturday, 9-10 p.m. will be dropped on Dec. 26.

NBC-TV replaces *Bill Dana Show*, Sunday 8:30-9 p.m., with a new western, *Branded*, on Jan. 2, 1965, and the last hour of 90 *Bristol Court* on Monday, 7:30-9 p.m., will be replaced. The two segments dropped in *Bristol* are "Tom, Dick and Mary" and "Harris Against the World." Coming in Monday, 8-9 p.m. on NBC will be *The Man* from U.N.C.L.E. which moves on Jan. 11 from Tuesday, 8.30-9:30 p.m. U.N.C.L.E.'s replacement on Tuesday will be *Hullabaloo*, a one-hour variety show created and packaged by General Artists Corp.

Directors, producers reach agreement

Directors of TV and theatrical motion pictures will get salary increases of 5% for the first two years and a second 5% for the final two years of a fouryear contract agreed on last week by negotiating committees of the Directors Guild of America and the Association of Motion Picture and Television Pro-

60 (PROGRAMING)

The blueprint for ABC's new TV news service

John T. Madigan, new director of the newly organized ABC Daily Electronic Feed (ABCDEF) service (see page 10), last week provided some specifics on the new service organized to provide ABC-TV affiliates with televised news stories.

The service, which will go into operation five nights a week starting next February, will provide hard news stories, features, advance stories for holidays, sports coverage, and stories not carried on the network's regular dinner-hour news program. The syndicated service will be available for contract purchase by ABC affiliates, with the price probably dependent on the individual station's rate card.

Plans for the service were an-

ducers. Retroactive to May 1 and running to April 30, 1968, the new pact has been approved by the DGA national board. It must also be ratified by the guild's membership before it becomes effective. A mail referendum is underway, to be completed within 60 days.

The agreement was reached after seven months of negotiations, with the demands of directors for more creative rights in connection with the programs under their direction a stumbling block that more than once threatened to scuttle any hope of agreement. Under the new agreement, the director is given more say-so over the editing of filmed TV shows and more time to do the job. He will have a full day to edit each halfhour program after completion of the assembly, two days to edit an hourlong show, etc.

The 5% increase in salaries covers assistant directors and unit production managers as well as directors and the same percentage increase is also applied to fees paid directors for the release of TV films for theatrical exhibition. The release of theatrical films to television is not part of this agreement but is covered by a six-year agreement that went into effect in 1960 whereby directors are given a percentage of the producer's gross receipts from the sale of theatrical pictures to TV.

Directors' fees from reruns of TV shows will now be based on the same formula that determines the fees paid actors, which curtails the number of rerun payments to the sixth run but increases the amount of each rerun fee. This formula also differentiates between network and syndicated reruns. The second run on a network would give the director 50% of minimum, versus 40% nounced last month at a meeting of the ABC affiliates board (BROADCAST-ING, Nov. 23).

The DEF will feed its daily budget of TV stories at 5 p.m. EST. Tape machines are the only equipment needed by affiliate stations to record the DEF stories. Stations contracting for the service will be allowed to record, for later use, the ABC dinner-hour news program.

Mr. Madigan said last week that the individual DEF stories will run 60 seconds or less. Voice narration will be transmitted with the video when the ABC correspondent is oncamera. When a story is accompanied by off-camera narration, the station may either run the video with the off-camera narrator's voice, or have its own announcer read a script made available by ABC.

ABC news correspondents will be given additional assignments in connection with the DEF service. The correspondents will be supplemented by stringers working on regional stories.

The syndicated service will provide between six and eight television stories each night, Monday through Friday. Its original staff will include about 20 producers, writers, film editors, couriers and shipping supervisors.

When a major story breaks too late for inclusion on the evening news program, it will be fed to affiliates at 11 p.m. EST.

1

for a rerun on individual stations in selected markets. The third run fees are 40% for network 30% for spot and so on.

The new directors' agreement does not include any payment for foreign use of TV programs. This is different from the agreement negotiated for actors by Screen Actors Guild, which provides for foreign use payment. The SAG contract, however, did not include any increase in base pay, such as that given the directors in their pact. The probable explanation for the difference is that all SAG members receive residuals but not all DGA members. Only the directors share in rerun payments, not the assistant directors or the unit manager.

Sen. Hartke to try again Plans another attempt at repeal of equal-time for political candidate

Senator Vance Hartke (D-Ind.), who has been introducing legislation to remove Section 315's equal-time provision since he came to Congress in 1959, said in an interview last week that he'd try again next year.

The time for the Senate to consider revision of Section 315 is now, early in the next session of Congress that begins Jan. 4, Senator Hartke said. This should be done "away from the heat of a political campaign," he said.

The equal-time regulations are having a different and unfortunate effect on political broadcasting than those intended when the section was written into the Federal Radio Act of 1927, Senator Hartke said.

Today, he observed, the equal-time provisions create an "apprehension complex" in broadcasters and makes them fearful of equal-time demands from what are sometimes called "fringe candidates."

In addition, Senator Hartke continued, the provisions are being used "to some extent as a dodge or an excuse by some broadcasters" not to fully inform the public.

Therefore, Senator Hartke said, he

The Most Trusted Name in Electronics

62 (PROGRAMING)

intends to re-introduce his bill to remove Section 315's equal-time requirements, one he has introduced in each of the last three Congresses. His proposal would leave in the section, he said, requirement that broadcasters provide fair and responsible coverage of controversial public issues and another that charges for political broadcasts not exceed those for other programs.

Last year the senator's bill was supported by six co-sponsors. Asked what would be likely to persuade a majority of his Senate colleagues that the equaltime section is unnecessary and a deterrent to good broadcasting, Senator Hartke said broadcasters would have to conduct themselves with "the highest standards" of responsibility. Just one bad actor among them will cast a poor light on the entire industry, he said.

Asked what could assure responsible performance, the senator answered, "self-policing." "A strong National Association of Broadcasters president with authority and determination can be very effective on this score," the senator said. Also needed, he thought: effective penalties for misbehavior.

Senator Hartke also said a plan to require membership in the NAB or some broadcaster organization like it "should have a complete and thorough examination and broadcasters should not prejudge it."

Broadcasters, he said, have to face up to self-regulation.

Senators who joined as co-sponsors of Senator Hartke's bill in the 88th Congress: E. L. Bartlett (D-Alaska), Birch Bayh (D-Ind.), Frank Church (D-Idaho), Joseph S. Clark (D-Pa.), Thomas J. McIntyre (D-N. H.) and Jennings Randolph (D-W. Va.).

Pros and cons heard in Metromedia v. ASCAP

Arguments in Metromedia's contempt action against the American Society of Composers, Authors & Publishers—an effort by the group broadcaster to gain a new form of ASCAP music performing rights license for its 10 radio stations—were heard last week in United States appeals court in New York.

Appearing in opposition to the Metromedia request were both ASCAP and the Justice Department.

The case had been brought on appeal from a district court ruling in which Judge Sylvester Ryan had denied the Metromedia motion.

Metromedia is seeking to force ASCAP to offer it a blanket license in which fees would be based on a percentage of gross receipts of its radio stations (BROADCASTING, Aug. 17), with receipts above those taken in a base year to be taxed at a lower fixed percentage.

The Justice Department, asking affirmation of Judge Ryan's ruling, argued that Metromedia lacks standing to have ASCAP held in contempt since it was not a party to the consent decree under which ASCAP operates.

The core of Metromedia's argument has been that it is penalized in its ASCAP contracts for the large sums it spends on its radio news operations, including a \$500,000 yearly news outlay for WNEW New York. Because ASCAP does not allow these expenses to be deducted from the base on which license fees are computed but does allow deduction of news-wire expenses that constitute the main news-gathering costs of some stations, Metromedia argues that it is paying disproportionate fees because of its news operation.

ASCAP contends that allowing one licensee to "dictate" the basis on which fees would be calculated would be an open invitation to all of its some 30,000 licensees to do likewise. The consent decree would become a "shambles" if Metromedia succeeds, ASCAP argued, and the court which rules on the fairness of fees quoted by ASCAP would have a "terrible task."

Inaugural credentials are in limited supply

The 1965 Inaugural Committee last week requested broadcast newsmen intending to cover the inauguration of President Johnson Jan. 20 to apply in writing for credentials from the House Radio-TV Gallery, Room H-323, The Capitol, Washington, D. C. 20515. Filing deadline is 6 p.m. Dec. 15.

The committee said credentials for the gala, ball and parade are limited and requests must be kept to an absolute minimum and confined to bona fide correspondents.

WJRZ's crime-news rules

WJRZ Newark, N. J., has imposed strict boundaries on its news department's coverage of criminal cases. Interviews with defendants are forbidden, comments on a defendant's guilt or innocence are not to be quoted, prior convictions or arrests of a defendant are not to be mentioned and, when the trial is in progress, coverage is to be limited to events reported in the official record.

President Lazar Emanuel ordered the rules into effect after the New Jersey Supreme Court restricted comments by policemen and attorneys in criminal cases in an effort to avoid prejudicing jurers (BROADCASTING, Nov. 23).

BROADCASTING, December 7, 1964

Does payola still exist?

N.Y. stations tell how

controls have

minimized dangers

Radio station executives and officials at other broadcasting organizations in New York appeared puzzled last week by FCC plans for an investigation into payola and plugola (BROADCASTING, Nov. 30). Almost unanimously they disclaimed knowledge of the existence of these practices.

The prevailing attitude was that stations had strengthened their controls since the last inquiry five years ago. Radio station executives expressed interest in knowing what lay behind the latest FCC probe.

Network officials, when checked, could not add to these comments.

John V. B. Sullivan, vice president and general manager of WNEW New York, who becomes president of Metropolitan Broadcasting Radio on Jan. 1, 1965, said he had heard "rumors off and on that payola has not died." But he added he knew of no specific cases and that the New York market was never mentioned as being implicated. WNEW always has had a policy of management control over the selection of records, he stated.

Harry Novik, general manager of WLIB New York, said he had not heard any reports that payola was flourishing. At WLIB the music department compiles a list of music to be broadcast during the day. Care is taken to make certain that individual records are not played too frequently.

The entire concept of payola is "utter-

ly alien to our 'sound of beautiful music' format," according to John C. Moler, president and general manager of WHN New York.

227

Stanton P. Kettler, executive vice president of Storer Broadcasting Co., owner of WHN, noted that the company "employs the strictest and most effective means possible to prevent payola and plugola."

Miles David, administrative vice president, Radio Advertising Bureau, said RAB is "surprised" by the "great amount of newspaper space" devoted to reports of the payola probe and added: "We doubt that reports of gifts to newspaper columnists would be deemed as meriting equivalent headlines."

Mr. David pointed out that payola to performers is based on the premise that a radio deejay has complete control of his own music selection. He indicated this assumption is incorrect, and cited a continuing RAB survey which shows that at only 9% of stations in larger markets (population of 500,000 or more) do the personalities select the records.

Frank Ward, executive vice president of wwRL Woodside, L. I., said that he had been "surprised" by reports of the FCC investigation. To his knowledge, he said, radio stations in the New York market, including wwRL, have instituted strict controls over music selection and presentation.

A WCBS New York executive noted that WCBS had taken "every possible precaution" to guard against payola since the last probe.

Lazar Emanuel, president and general manager, wJRZ Newark, N.J., said that the station did not permit any single recording to be heard more than once or twice a week.

WABC New York General Manager Walter Schwartz said the FCC probe would have "no effect" on wABC's programing. He said the station had "stringent" safeguards.

What's all the shouting about? FCC wonders

FCC officials expressed surprise last week at the reaction in the press to the commission's announcement of an inquiry into payola and plugola (BROADCASTING, Nov. 30).

They say the stories that have been written—many with banner headlines —suggest the commission is ready to conduct public hearings with bigname stars participating.

"It's not going to be that way, at all," said William Ray, chief of the commission's Complaints and Compliance division, who is in charge of the inquiry. He said the commission instituted the inquiry for the purpose of providing the staff with subpoena powers to do a more effective job of following up leads.

He added that the division has only six full-time investigators, and no additions to the staff are contemplated. As a result, the investigation will be limited in scope.

He indicated that no dramatic revelations are in prospect and that the inquiry would require considerable time and patience. YOU SAY! 5017 MINNEAPOLIS . ST. PAUL

Fairness methods enumerated

FCC letter to WFTV (TV) notes varying systems

broadcasters use to ferret out other views

The FCC, by releasing two letters to a Florida television station, suggested a number of techniques that broadcasters might use to comply with the requirements of the fairness doctrine.

The station is WFTV(TV) Orlando. which the commission has been investigating for almost a year because of complaints that it had been unfair in its treatment of controversial issues, "specifically" those on which the station editorialized (BROADCASTING, April 3).

The letters constitute a wrap-up of the investigation. The commission's conclusion, as stated in a letter dated Dec. 2, is that WFTV is fulfilling its obligation "to encourage and to implement the broadcast of contrasting viewpoints on controversial issues which are the subject of your broadcasts."

In the earlier letter, dated Sept. 16, in which it requested further clarification of the station's policy on fairness, the commission said that it "does not seek to establish a rigid formula for compliance with the fairness doctrine."

It noted that broadcasters have used a variety of methods to achieve fair-ness. "Thus," it adds, some stations offer time and present a copy or summary

of material they have broadcast on a controversial issue to a "responsible individual or group within the community" known to hold a contrasting view.

Community Leaders' Role . "Other licensees consult with community leaders as to who might be an appropriate individual or group for such a purpose," the letter added. "Still others announce at the beginning or ending (or both) of programs presenting opinions on controversial issues that opportunity will be made available for the expression of contrasting views upon request by responsible representatives of such views."

The commission also said that the "precise means of achieving fairness" is within "the discretion of licensees." But, it said, "the mere sending of a copy of an editorial to an interested person, without more, falls short of meeting that obligation."

In response to the Sept. 16 letter of inquiry, wFTV listed a number of techniques it uses to meet its fairness obligations. It was this response that led the commission to conclude the station is complying with the fairness doctrine.

As summarized by the commission,

English teachers watch TV at convention

At its 54th annual convention in Cleveland, the National Council of Teachers of English reviewed 25 television programs to demonstrate TV's use in English curriculums. The programs were chosen for their usefulness at various academic levels, and included selections from the three networks, individual stations and independent producers.

Attending the Nov. 25-28 confer-

ence were (l-r) Richard F. Siemanowski, CBS executive producer for news and public affairs; Roy Danish, Television Information Office director; Ned Hoopes, Hunter College High School; Dr. Albert Hibbs, California Institute of Technology and host of NBC-TV's Exploring, and Patrick D. Hazard, chairman of the English department at Beaver College, Glenside, Pa.

the station's methods include: presenting discussion programs for which participants holding contrasting views are sought out; offering time to specific persons who have viewpoints contrasting with those expressed in the station's editorials, "' where in the opinion of the station the issue warrants it'"; broadcasting the Editorial Mailbag for which viewers holding opposing views are encouraged to contribute their comments; sending copies of editorials attacking persons or organizations to those attacked with a specific offer of rebuttal tmie, and concluding each editorial with an announcement that the station invites rebuttals by responsible groups and individuals.

Ford gives another \$6 million to NET

The Ford Foundation announced last week it is making a \$6-million grant to National Educational Television in 1964 to support for one year NET's informational, cultural and educational program service for noncommercial TV stations in the U.S.

The grant raises to \$34.2 million the amount the Ford Foundation has given to NET and its predecessor organization, The National Educational Television and Radio Center, since 1951. The foundation has given more than \$90 million over the past 13 years to various educational-TV projects.

The foundation also reported last week it has made a grant of \$177,000 to the University of Sao Paulo, Brazil, to assist the university in the establishing of a closed-circuit television system by providing for studio equipment and station personnel.

An initial foundation grant of \$6 million was given to NET last year at the time the educational TV organization ceased its activities in radio production and distribution and in instructional television to concentrate in the area of informational, cultural and educational TV programing (BROADCASTING, Oct. 7, 1963).

Mark Century has new radio ID series

Mark Century Corp., New York, is expected to announce soon a new station ID series called "The Young American," it was learned last week. The radio production-programing company will announce the package as another entry in the radio program service field it entered more than two years ago.

Over the past several months, Mark Century has announced the opening of a new broadcast production center in New York (3 East 57th Street) and

has formed the Mark Century Sales Corp., of which Marvin A. Kempner is president.

Its initial entry in programing for stations, "Radio a la Carte," is now in more than 300 markets in the United States, Canada and Australia. Since the introduction of "Radio a la Carte," Mark Century has followed with its ID's, called "Encore," and with "Festival Radio," which is a commercial library service designed to accommodate advertiser messages and identifications.

Shortly after Mark Century Sales Corp. was formed, the organization acquired exclusive rights to sell all products formerly distributed by the Richard H. Ullman Co. Of these, two properties, "Formatic" and "Big Sound," were restyled and added to Mark Century's expanded portfolio. The company also has exclusive distribution rights to "Emperor," a radio promotion package that has been sold in more than 50 markets in the U. S.

The new "Young American" uses the singing of youthful groups along with modern tempo or "flair." Pilot packages already have been produced.

Quinlan files libel suit; seeks \$1.25 million

Robert Quinlan, program director of KTLA(TV) Los Angeles from 1958 to 1964, last week filed a \$1.25 million suit in Los Angeles Superior Court against Leo Seltzer, Jerry Seltzer, Oscar Seltzer and Roller Derby Associates. He accused the defendents of libeling and slandering him by charging him with accepting payola from the producers of Roller Skating Championship, which replaced Roller Derby on KTLA. Roller Derby Associates and Messrs. Seltzer have a \$10 million suit pending against KTLA, Paramount Picture Corp. (former licensee of the station) and Roller Skating Championship, on grounds of unfair trade practices (BROADCASTING, Jan. 6). The assertions that Mr. Quinlan took payola were allegedly made in depositions in connection with that suit.

Crosby expands to N.Y.

Bing Crosby Productions, Hollywood, has opened an office in New York to develop TV programs in association with writers there. Temporary headquarters is at 1271 Avenue of the Americas. Telephone 265-2772. The office is headed by Jacqueline E. Babbin, formerly a producer with Talent Associates-Paramount Ltd. and CBS.

range including extent to which music licensed by SESAC is used, SESAC's rates, station efforts to obtain lists of SESAC compositions, circumstances under which stations became SESAC licensees and whether SESAC threatened copyright infringement suits if they did not sign up.

In distributing the questionnaires, Robert T. Mason of WMRN Marion, Ohio, chairman of the all-industry committee, did not indicate what the committee plans to do with the material. But in a speech prepared for a meeting of the Ohio Association of Broadcasters he mentioned the questionnaires and asked the broadcasters to promptly return them. They would be sent, he said, to a government agency. Although Mr. Mason did not say which government agency would be given the survey's findings, it was reported to be the Federal Trade Commission, which has been investigating SESAC since last year following complaints by radio men (BROADCASTING, Sept. 30, 1963). The FTC study is expected to be completed early next year.

The committee was said to have urged the FTC for some time to use its powers over methods of competition in connection with SESAC's music-licensing operation. There were reports that the survey was initiated at least partly in response to suggestions advanced by FTC attorneys during these discussions.

Committee sources said response to the questionnaires had been substantial, with 300 to 400 replies within the first few days. The questionnaires were sent out about 10 days ago. In the questionnaires, stations are asked whether and for how long they have had SESAC music performance licenses, the monthly fee charged by SESAC, and, among other things, whether SESAC had represented that the fee was based in part on station power, was the lowest charged for a station with the same power, was based partly on hours of operation, and was based partly on population in the station's service area.

The stations are also asked whether they've ever requested that SESAC supply a list of its musical compositions, and if so, what SESAC's response was. They also are asked to indicate about how much SESAC music they use and whether their use is "limited to any special type of program, e.g., religious programs, etc." Q

5

£.,

3

The questionnaire also seeks information on whether stations have ever attempted to get different types of licenses from SESAC—licenses for only certain tunes, per-program licenses, licenses to use only certain types of music or licenses in which the fee is based on amount of music actually used.

Stations also are asked whether it was on their initiative or SESAC's that they became SESAC licensees. Where SESAC made the approach, the committee wants to know whether SESAC supplied a list of all of its compositions, whether it threatened to sue for copyright infringement if the station failed to take out a license, and whether the station "was . . . in fact sued for copyright infringement."

The questionnaire also solicits information that would permit comparison of fees paid SESAC with those paid Broadcast Music Inc. and the American Society of Composers, Authors and Publishers.

"Does station feel SESAC's fees to it are higher than the use of SESAC music justifies?" the questionnaire asks. The final query asks for "any other comments concerning SESAC which you may feel will be helpful to the committee."

Emanuel Dannett of the New York law firm of McGoldrick, Dannett, Horowitz & Golub is general counsel to the all-industry committee and the instructions on the questionnaire ask that the answers be sent to him. They also specify that the questions "are concerned only with SESAC's 'broadcasting performance license for AM stations,' not SESAC's license for its transcribed library."

In his letter to stations Mr. Mason said that "many stations have written to us concerning SESAC"; that in order to "take concrete action" the committee needs as much information as possible, and that in addition to the material specifically called for in the questionnaire, stations are free to send "such additional material as you feel will help the committee in dealing with the SESAC problem."

\$

Will encourage development of new programs for use in nonnetwork markets; Triangle's Jones named president

Group broadcasters representing stations in more than 40 markets in total voted last Wednesday (Dec. 2) to form Production Development Associates Inc., a corporation designed to stimulate new television production for the nonnetwork markets. The corporation is an outgrowth of a meeting of group broadcasters in Chicago in September by Ward L. Quaal, vice president and general manager of WGN-TV Chicago.

The following officers of PDA were elected: president, Tom B. Jones, executive program manager of Triangle Stations; vice president, Richard Krolik, Time-Life Broadcast Inc.; and secretary, Thomas A. Bland, Crosley Broadcasting. Four more executive committee members will be chosen at the group's next open membership meeting.

Membership in PDA is open to all interested broadcasting groups and stations. Richard A. Shively, Polaris Broadcasting, Chicago, was elected membership committee chairman.

A three-man committee will screen

pilots and hear proposals for programs that can be produced for first-run exposure on members' stations. The committee will operate until the next general PDA meeting, to be held within 90 days. Fred Thrower, executive vice president and general manager of WPIX (TV) New York, chairman of the committee, will be assisted by Robert I. Guy, Storer Broadcasting, Miami, and Dalton Dannon, KTLA(TV) Los Angeles.

Producers will attend the next PDA general meeting to discuss their program ideas and consider recommendations of Mr. Thrower's group. PDA members will indicate their stations' commitment for the purchase and/or financing of program production within a specified period following the meeting.

Members will deal with producers on an individual basis.

A constitution and set of by-laws will be submitted to PDA members at the meeting.

Program notes . . .

News special = WLIB New York will carry the 64th annual Nobel Peace Prize awards ceremony from Oslo, Norway, live on Thursday and Friday (Dec. 10 and 11). Direct coverage by WLIB, a Negro-oriented station, will be carried for the awards presentations speech Thursday and for the acceptance speech of Dr. Martin Luther King Friday. Harry Novik, general manager of WLIB, said the station also is preparing a halfhour documentary, From Nobody to Nobel Prize Winner in 10 Short Years for presentation Saturday (Dec. 12). WLIB is offering the documentary to other stations.

Special assignment = Tamra Wood, assistant public affairs director for wood-TV Grand Rapids, Mich., spent two weeks in a mental hospital on assignment to obtain information for a public affairs program. Miss Wood entered the hospital with only the institution's superintendent and a few aides knowing her purpose. Fellow staff members were told that she was on vacation. The product of Miss Wood's experiences, *Roses Have Thorns*, was to be shown on wood-TV Dec. 3.

They like him • King Features Syndicate TV reports that over the past four months renewals on its *Popeye* series has been running at 92% for the 220-episode cartoon series. The series is in 136 markets.

Healthy items - Two series of programs on health topics, one a quarter-hour and the other a half-hour, are available from the colleges of medicine, dentistry, pharmacy and nursing of the University of Illinois. The programs currently are being carried by stations in the Midwest. Contact: Jack W. Righeimer, University of Illinois Medical Center Information Office, 1853 West Polk Street, Chicago 60612.

State news • Maxbill Productions, Baltimore, is producing five-minute scripts on various problems and the history of Maryland. The scripts, whose production costs are being underwritten by the state, run six days a week and are in use on 19 stations.

New sound = Felix Grant, WMAL Washington personality, will produce and broadcast 15-minute radio series, *Jazz on the Potomac*, a new public service recruiting campaign for the U. S. Marine Corps.

New drama series • Esso Theater, U.S.A., a series of 13 one-hour dramas performed by repertory companies in 13 cities, will be telecast in New York

NEW! Cartridge Mount* for broadcast Cartridge Machines!

NORTRONICS HEAD MOUNT REDUCES MOUNTING AND ALIGNMENT PROBLEMS!

This new Nortronics Cartridge Mount, eliminates the need for rear-mount heads! Designed for cartridge tape handlers using endless loop tape cartridges of the Fidelipac and Viking type, it permits fast, easy installation and alignment of up to three heads on one assembly! "Micrometer" adjustments permit setting of head height, azimuth and face perpendicularity special lock screw on each head bracket "freezes" the adjustments. Heads are fastened to the bracket with a quickrelease screw clamp for fast installation.

Cartridge-Mount Kits, with all necessary hardware, are available for the conversion of existing cartridge players using rear-mount heads.

CARTRIDGE MOUNTS COMPATIBLE WITH ALL NORTRONICS TAPE HEADS!

Typically, two Premium series halftrack stereo heads—one used for record, the other for playback—and any Nortronics erase head may be mounted on a single assembly. Premium series heads feature fine laminated, precision-lapped, low loss core structures; deposited quartz gaps; and hyperbolic, all-metal faces. Cartridge Mounts, as well as the entire line of broadcast quality replacement heads, are available through your Nortronics Distributor.

For complete information about Nortronics Cartridge Mounts, write for our Form 17177.

66 (PROGRAMING)

and several other eastern cities starting next February. The series will represent a different play each week and each program will be repeated several days after the initial showing. The series' sponsor, Standard Oil Co. of New Jersey, has not yet purchased time for the series.

Silence pays = Red Skelton and French pantomimist Marcel Marceau will present a one-hour *Concert in Pantomine* on CBS-TV, sometime in February. Maurice Chevalier will be host.

Expansion • VPI Productions Inc., New York, has opened an office in Atlanta at 1140 Peachtree Street. Plans call for expansion to include production facilities and personnel. **Open door** • Richard-Sherwood Artists has opened its offices at 33 East 60th Street, New York. The company will specialize in representing talent for radio-TV commercial work.

5. 4 m .

A look ahead = NBC News' foreign correspondents will participate in NBC-TV's annual one-hour forecast of world events, *Projection '65*, to be colorcast Dec. 29 (10-11 p.m. EST). Following *Projection '65*, the correspondents will leave on a 10-city speaking tour.

Schoolhouse film • To Build a Schoolhouse, a 28-minute, color film sponsored by Educational Facilities Laboratories, is being offered by Associated Films, New York, on a free-loan basis.

EQUIPMENT & ENGINEERING

Color pushing TV set sales up

EIA winter meeting in San Francisco also gets report

on excise-tax issue; TV stereo unit to study standards

Sparked by color television, factory sales of TV sets in 1964 have risen 12%, from \$2.5 billion in 1963 to an estimated \$2.8 billion this year, Dr. Harper Q. North, Thompson Ramo Woolridge Inc., president of the Electronic Industries Association, told the EIA winter conference in San Francisco last week.

During the first 44 weeks of this year, Dr. North said, color-TV set sales

EIA support

When the National Association of Music Merchants holds its annual convention and exhibition in Chicago next summer, a powerful ally will also be meeting at the same time and in the same city.

The Electronic Industries Association, which has voted to change its summer meeting date to correspond with the NAMM meeting (to June 28-July 1) and to recommend that TV and radio set manufacturers exhibit at the NAMM show, agreed last week to sponsor two sessions at the NAMM meet: one on advertising and sales promotion and the other on servicing.

The plan is to make the NAMM annual meeting the number one exhibit show for radio and TV set makers.

reached 1,133,090 units. On this basis, he said, it is estimated that about 1.4 million color sets will be sold in 1964, with a factory value of about \$500 million. And, he added, this upward trend is expected to continue.

Total TV set sales this year should be above 9 million—a new record, Dr. North stated. Because many of the added black-and-white sets produced are portables, he said, the added dollar volume will not be so great. Factory value will run from \$1 billion in 1963 to \$1.3 billion this year.

The largest gain in electronic imports came in the consumer products field, Dr. North said, which ran for the first eight months from \$107 million in 1963 to \$117 million in 1964. TV set imports rose from \$13 million last year to \$17 million this year, also a record for the eight month period. Tape recorders, on the other hand, jumped from \$19.7 million to \$26.5 million in the same periods, with almost all imports from Japan.

Other highlights of the San Francisco EIA meeting:

Consumer Products Division recommended the establishment of an industry-wide National Stereo Television Committee to determine the practical technical standards for stereophonic sound on TV. This has been suggested by the FCC, which has issued a notice of inquiry on the subject (BROADCAST-ING, Nov. 16).

The division's recommendation was changed somewhat by the association's board of directors which directed that the EIA engineering department study the broadcasting-engineering implica-

÷.

14.1

tions, and also solicit opinions from manufacturers on the question. The board asked that a report be submitted at the next meeting, scheduled for Washington in March.

Preparing for congressional hearings on excise tax repeal or reduction, the consumer products division agreed that any change in the manufacturer's excise tax (now 10% on the manufacturer's sales price) should be applied to all TV sets in inventory in the hands of manufacturers, distributors and retailers in the form of a tax rebate.

Also brought up as a possible problem is the question of whether the public will hold off buying TV receivers if it is known that an excise tax repeal or reduction is under study.

• TV set makers also asked EIA to seek the cooperation of the National Committee on Uniform Traffic Laws and Ordinances in seeing to it that state motor vehicle laws permit owners to have a television set in an automobile provided that the driver cannot view it while the car is in motion. Some states now prohibit the installation of a TV set in an automobile.

Technical topics . . .

New generator - General Instrument Corp.'s thermoelectric division has developed an all-weather generator-an automatic power plant that may be used for microwave and radio communications and community television boosters.

Service available = Wilkinson Electronics Inc., Woodlyn, Pa., will furnish contractual and other service requirements to broadcasters who have purchased equipment made by ITA Electronics Division of Triangle Publications Inc.

New year = Advanced, sophisticated color camera chains and tape recording equipment costing \$800,000 have been added to MGM Telestudios' location facilities. The new equipment includes two giant custom built vans, one housing the company's portable RCA color television apparatus, and the second van with a fully transistorized video tape unit.

Hear, hear! = Atlec Lansing Corp., Anaheim, Calif., has a new wall-type monitor and playback speaker system designed for professional studio applications. The 844A Monitor/Playback system contains two Altec 414-type low frequency speakers, a crossover circuit and an Altec 860A H. F. compression driver coupled to an 811B aluminum sectoral horn.

New film system gives

advantages of TV

Mitchell Camera Corp. last week introduced System 35, described by the company as a "building block cinematographic system." The system is built around a Mitchell Mark II 35 mm

studio reflex camera in a Mark II sound blimp, to prevent the sound of the camera leaking out into the production going on, on the sound stage. An electronic door contains a vidicon camera that scans the reflex image and displays it on an electronic view finder. Also included are video monitors so that the cameraman, director, director of photography, producer, etc., can see what the camera sees at the same time the film sees it. Used with a Mitchell PreViewer, a tape can be played back immediately.

In essence, System 35 provides for the maker of filmed entertainment for TV or theatrical exhibition the advantages of live TV production, to which are added the immediate playback of video tape.

The overall package is tentatively priced at \$38,000, of which some \$5,000 goes for the vidicon camera attachment and \$12,500 for the video tape recorder. The vidicon camera circuitry was developed and built by the Kintel division of Cohu Electronics. Sony Corp and Harold Kuerschner of University of California at Los Angeles developed the electronic view-finder and Sony also aided in developing the Pre-Viewer.

The System 35 equipment, demonstrated to producers, directors, executives and newsmen, will be ready for delivery in April. The system is limited to monochrome, with no plans for color filming contemplated.

Color set sales may top 2 million in '65

RCA said last week that color television sets are selling at a record pace and distributor-to-dealer sales are now running more than 48% ahead of the same period last year.

According to Raymond W. Saxon, vice chairman of the RCA Sales Corp., "the industry is assured of selling more than one-and-a-quarter million sets this year, and has provided a momentum that should carry it over the two million level in 1965."

Mr. Saxon said by year's end RCA color set volume will exceed the combined dollar sales of all other RCA home entertainment products. He said this would be accomplished despite an overall increase in RCA's black-andwhite television, radio, stereo phonograph and tape cartridge recorder sales. Distributor-to-dealer unit sales of blackand-white TV sets are running 12% ahead of last year.

The dollar volume of RCA portable radio sales so far this year is 10% greater than the corresponding period last year. Phonograph dollar sales during the first 10 months of 1964 are 15% ahead of the same period of 1963.

BROADCASTING, December 7, 1964

FINANCIAL REPORTS

Capital Cities sees net income up in '64

Capital Cities Broadcasting Corp. last week estimated its net profits for 1964 would be \$2,750,000 on a net broadcast income of \$20.2 million. The profit would be equivalent to \$2 per common share. In 1963 the company reported a net profit of \$2,006,777.

Frank M. Smith, Capital Cities board chairman, offered these figures at a meeting of the New York Security Analysts Society while predicting a favorable financial future for the broadcasting industry generally and for Capital Cities in particular.

In a rundown of the company's current balance sheet, he asserted that the long term debt of \$32 million would show up as only approximately onethird of equity if the actual market value of Capital Cities stations was considered.

"If all of our properties were valued on the basis of comparable sales transactions of broadcast properties during the current year," he said, "our assets would be conservatively stated as \$94 million."

Mr. Smith cited a number of reasons further growth could be expected by investors in the broadcasting industry: increasing time rates; growth of advertising in general; population growth and increasing leisure time; increased set penetration in some cases; the relatively untapped local sales potential; additional advertisers who will be attracted by color TV and the prevalent interest of group station owners in "trading up" their station properties from smaller to larger markets.

RCA offers \$90 for preferred stock

RCA's board of directors last week authorized an offer to purchase its outstanding cumulative preferred stock for \$90 a share, confirming Wall Street speculation that it would do so. The stock has a redeemable or "call" price of \$100 a share.

The company's preferred—900,824 outstanding shares — guarantees their holders a cumulative dividend of \$3.50 annually.

The shares had been trading considerably under the call price but moved up 55% points to 863% on Tuesday (Dec. 1) on reports of the pending decision. With the purchase authorization Thursday, the shares opened at \$91 and closed at the same price Friday. The offer to buy the preferred stock expires Jan. 8, 1965.

Other actions taken by the board included declaration of a 10% common stock dividend, a 15-cent quarterly cash dividend and a special cash dividend of 10 cents on common shares.

First preferred holders who surrender their stock to the company at the \$90 price before Dec. 18 will receive the regular quarterly dividend of 871/2 cents a share, otherwise payable to holders of record Dec. 18 on Jan. 2, 1965.

Financial notes ...

• Universal Pictures Co., New York, has declared a quarterly dividend of 25 cents per share and an extra dividend of 25 cents per share on the common stock of the company, payable Dec. 28, to stockholders of record Dec. 15.

• Decca Records, New York, last week declared a regular quarterly dividend of 30 cents per share on the company's capital stock, payable Dec. 29, to stockholders of record Dec. 16.

• The board of directors of Emerson Radio & Phonograph Corp., Jersey City,

N. J., has voted a 10-cent dividend payable Dec. 23 to stockholders of record Dec. 9.

Sales down; profit up at General Precision

General Precision Corp., Tarrytown, N. Y., has reported consolidated net sales for the first nine months of the year lower than the comparable period last year, but increased net income.

The board of directors of the firm has declared a 30 cents per common share quarterly dividend payable Dec. 15 to stockholders of record Nov. 30. Dividends were also declared on cumulative preferred stock and cumulative convertible preference stock.

Nine months ended Sept. 30:

Income per share Consolidated	1964 \$1.55	1963 \$1.21	
net sales Consolidated income	155,930,387	163,033,173	
before federal income taxes Consolidated income after federal	4,822,145	4,199,034	
income taxes	2,857,745	2,304,934	
Common shares outstanding	1,643,101	1,643,101

Council Chairman Eugene S. Hallman, vice president, programing, CBC, reported that for the first time during 1965, Intertel will establish a production team composed of directors, cameramen, and editorial personnel supplied by member organizations. Intertel members are the CBC, Rediffusion of London, Australian Broadcasting Commission and, representing the U. S., Westinghouse Broadcasting Co. and National Educational Television.

Intertel was founded in 1960 to advance international understanding through television. Intertel has produced 19 documentaries since its organization. The programs have been shown in the four member countries.

During the Montreal meeting (I to r): Tal Duckmanton, general manager, Australian Broadcasting Commission; John McMillan, general manager, Rediffusion Television, London; John F. White, president, National Educational Television, Eugene S. Hallman, vice presidentprograming, Canadian Broadcasting Corp., and Richard Pack, vice president - programing, Westinghouse Broadcasting Co. Mr. White, elected deputy chairman of the Intertel Council, will succeed Mr. Hallman as chairman at next year's annual meeting.

ITA turns regulatory eye on program content

The just revealed terms of the Independent Television Authority's code on violence issued to all British commercial TV companies last July show that ITA has ruled that violence must not be shown for its own sake or only to attract viewers' interest.

The code says that it is necessary at times for a certain amount of violence to be shown. These are when heroes are enforcing the law and when villains have to realistically express their character. However, violence should not exceed its "dramatic usefulness." It stresses that there is a difference between violence shown close up and that seen from a distance.

Since children, says the code, are apt to model their behavior on the conduct of TV heroes, these heroes must always have a worthwhile reason for resorting to violence. In dramatic programs likely to be seen by children the initial question is whether they are pervaded with a clear sense of right and wrong. Persecution, bullying, intimidation, humiliation are forms of mental violence and, stresses the code, the suffering caused by mental violence may ex-

ceed that caused by physical violence. The primary consideration in controlling both must be the dramatic context in which they occur and the ends to which they are used. An ITA spokesman said that the TV companies have cooperated fully on the code.

Cure-all ads banned

The Australian government banned 26 TV commercials in the past 12 months, according to Dr. W. Refshauge, Australian director general of health. The most common reason for rejection was grossly exaggerated claims for the prevention and cure of illnesses.

Under Australian law Dr. Refshauge has power to ban any medical program or medicinal commercial from radio and TV.

James C. Bowling, assistant to president and director of public relations for Philip Morris Inc., New York, elected VP-director of sales and corporate relations. Ray Jones, VP-director of sales,

Now you can fully utilize the listening capabilities of your audience! Scientists for years have investigated and tabulated the various phenomena that make people want to listen. These findings come under the broad category of psycho-acoustics. Now Fairchild has harnessed many of these findings and incorporated them into a line of unique world-renown audio control devices which produce a sound easier to listen to and easier to perceive... in short a bright, crisp, lively sound which keeps your audience listening. This is the sound you need to help you sell your station to your audience and to your sponsors. .2

٨.

THE DYNALIZER

the Psycho-acoustic way to achieve a bright, full bodied easy-to-listen-to, easy-to-perceive station sound. The Dynalizer contours your station's frequency response to fully utilize the listening capabilities of your audience. Makes your station sound really big, big, big even on the smallest pocket receivers.

THE CONAX

the world-accepted way to control high frequency spillovers in FM due to preemphasis. Lets your station maintain real high levels even with brass and crashing cymbals and still avoid FCC citations.

THE REVERBERTRON

the new compact reverberation system which gives your station that real big voice. With the Reverbertron you can have that Carnegie Hall effect as close as

the gain control on the Reverbertron. And there's the added plus of an increase in apparent loudness of your station sound due to reverberation, as originally described by Dr. Maxfield.

For complete details on psycho-acoustic sound that sells write to Fairchild — the pacemaker in professional audio products.

appointed to newly created position of VP in charge of corporate sales planning, in addition to present position as director of corporation. John R. May of this year, resigned to devote time to other interests.

DEATHS

Art Gleeson, 58, former sports director of Mutual Broadcasting System and baseball announcer for Boston Red Sox, died Nov. 27 of what was believed to be a heart attack in Gold Beach, Ore. He was with Armed Forces Radio from 1946-48 and covered New York Yankees with Mel Allen before joining Mutual in 1951.

TV penetration climbs to 93%

NIELSEN COUNTY-BY-COUNTY LISTING SHOWS WHERE THE SETS ARE

Television households in the United States (excluding Alaska) increased 1,354,390 in the period between September 1963 and September 1964, according to new county-by-county estimates being released today (Dec. 7) by the A. C. Nielsen Co.

The rise, from 51,401,600 to 52,755,-990, also reflects a gain in TV penetration from 92% to 93% of the total households.

As a base for its estimates, Nielsen

used total household estimates for Sales Management magazine. The latter figures are based on growth rates applied by that publication to its own Jan. 1, 1964, counts.

The television ownership percentages are based on U. S. Census percent levels as of April 1960, revised to reflect conversion of nontelevision households to TV owners as shown by TV penetration growth rates from successive Advertising Research FoundationCensus sampling studies.

The television households have been derived by applying percent ownership estimates to the *Sales Management* estimates of total households.

Estimates for Alaska were last provided in Nielsen's 1962 report (BROAD-CASTING, Dec. 17, 1962).

The county-by-county figures, with Sales Management's total household estimates, are available from Nielsen in booklet form.

NEW 500 SERIES . . . World's Most Advanced Cartridge Tape Equipment

From the established leader in tape cartridge systems -SPOTMASTER-comes today's most advanced units, the 500B series. Featuring all-modular, allsolid-state design and your choice of 1, 2 or 3 automatic electronic cuing tones, the 500B continues the SPOTMASTER tradition of superior quality at sensible prices.

Check these other SPOTMASTER features:

- Meets or exceeds all existing and proposed NAB standards.
- Separate record and reproduce heads. A-B monitoring. Biased cue recording. Zener controlled power supply.
- Popular 500A series, today serving over 1,000 sta-BROADCASTING, December 7, 1964

tions world-wide, now available at new low prices.
14 models match every programming need: recorder-playback and playback-only...compact and rack-mount...monophonic and stereo.

- Delayed Programming option permits instant deletion of objectionable material from live originations.
- Heavy duty construction throughout, with rugged hysteresis synchronous motors, top specs and performance.
- Lease/purchase option. Ironclad guarantee for one full year.

FOR THE RECORD

STATION AUTHORIZATIONS, APPLICATIONS

As compiled by BROADCASTING, Nov. 25 through Dec. 2 and based on filings, authorizations and other actions of the FCC during that period.

This department includes data on new stations, changes in existing stations, ownership changes, hearing case, rules and standards changes, routine roundup of other commission activity.

Abbreviations: Ann.—announced. ant.—an-tenna. aur.—aural. CATV—community an-tenna television. CH—critical hours. CP— construction permit. D—day. DA—direction-al antenna. ERP—effective radiated power. kc—kilocycles. kw—kilowatts. LS—local sun-set. mc—megacycles. mod.—modification. N —night. SCA—subsidiary communications authorization. SH—specified hours. SSA— special service authorization. STA—special temporary authorization. trans.—transmitter. UHF—ultra high frequency. unl.—unlimited hours. VHF—very high frequency. vis.— visual. w—watts. *—educational.

New TV stations

Hearing cases

DESIGNATED FOR HEARING

DESIGNATED FOR HEARING Trinity Broadcasting Co. and Warner Bros. Pictures Inc., Fort Worth—Designated for consolidated hearing mutually exclusive applications for new TV's on channel 20; is-sues include determinations as to financial qualifications of Trinity; whether Warner is authorized to do business in Texas; whether grant to Warner would be consistent with provisions of Sec. 310(a) (4) of act concern-ing citizenship of stockholders, and with Sec. 73.636 of multiple ownership rules and, in light of past conduct, whether Warner has requisite qualifications to be broadcast licensee. Further ordered hearing issue con-cerning requisite qualifications of Warner Bros. In light of past conduct involving an-titrust actions and pending antitrust litiga-tion be heard at same time with similar is-sue in proceedings on application for new TV in chicago with all parties to participate in presentation of evidence on issue before single examiner who will preside in both proceedings. Action Nov. 25.

OTHER ACTIONS

OTHER ACTIONS S Commission instituted inquiry into con-tracts of broadcast station licensees with newswire services with view of proposing rules to limit tenure of such contracts. In-vited comments by Jan. 25, 1965, to follow-ing specific questions, also documented ma-terial which would assist it in making de-termination in matter: (1) extent to which long-term newswire contracts may limit broadcast licensees' exercise of program-ing responsibilities in news field (including appropriateness under Communications Act of such long-term contract provisions re-quiring any assignee of license to fulfill contract during term); (2) extent to which each newswire service to broadcasters having unfulfiled contracts or contractual disputes with other; (3) effect of long-term contracts with broadcasters on competition of other sources, and nature of any result-ing detriment to public interest embodied in Communications Act; and (4) extent, if any, to which short-term contracts with broadcasters might inhibit effective news-wire service operations and result in de-teroration of newswire service to licensees. In absence of requested material, commis-sion is not proposing specific rules at this

wire service operations and result in de-terioration of newswire service to licensees. In absence of requested material, commis-sion is not proposing specific rules at this time. It is inviting comments on advisabil-ity of adopting rules similar to network affiliation rules, to effect that no broadcast station shall have contract with newswire service for period longer than (for example) two years (the term for network affiliation contracts). While it is not contemplated that any such rules would permit contract long-er than three years, comments are requested on what time period within this range would be appropriate. Inquiry was prompted by complaints from broadcast licensees con-cerning length and conditions of newswire service contracts with Associated Press and United Press International. Usual contract term is five years, with provision requiring contracting broadcaster to guarantee, or cause assignee of license to agree in writ-ing, that contract will be fulfilled during its term. These are matters of concern to commission to extent that they may affect licensee's ability to operate in public inter-est. Newswire services are not under direct regulatory jurisdiction of FCC. Main con-cern of action in news programing. Five-year contract exceeds maximum three-year broadcast license period. Such contract would appear to be inconsistent with broad-caster's obligation if it precludes him from following his judgment as to what news programing would best meet community interests and needs. Additional information is also necessary to determine whether five-year newswire contracts deprive listening public of improved news service which might otherwise derive from possibility of onhancing competition in news yervice which might otherwise derive from possibility of ornadcast. Action Dec. 2. In absence of requested material, commis-

contracts. Action Dec. 2. By memorandum opinion and order in proceeding on applications of Dover Broad-casting Inc. and Tuscarawas Broadcasting Co. for new FM's in Dover-New Philadel-phia and New Philadelphia, Ohio. respec-tively, commission referred to review board for action petition by Dover for waiver of Sec. 73.240(a) of rules or, in alternative, for modification of issue 2 concerning de-

termination whether grant of Dover appli-cation would be in contravention of provi-sions of Sec. 73.240(a) of multiple owner-ship rules to add words "and, if so, wheth-er waiver of said rules would be in public interest." Action Dec. 2.

.

By memorandum opinion and order, commission granted applications of South Jersey Television Cable Co. for microwave facilities in business radio service to serve CATV systems in Wildwood, North Wildwood and Wildwood Crest, N. J. Ins o doing, commission granted motion by WCMC-TV (ch. 40) Wildwood, to withdraw opposing petition. Cable grant is subject to interim conditions set forth in Sec. 11.556(a) of proposed rule making in Doc. 14895 and conditions set forth in Sec. 11.556(a) of proposed rule making in Doc. 14895 and conditions contained in paragraph 3 of agreement entered into by cable company and WCMC-TV. Commissioners Bartley and Cox concurred, latter with statement: Commissioner Ford not participating. Action Nov. 25.

er Ford not participating. Action Nov. 25. ■ By order, commission denied applica-tion by Mitchell Broadcasting Co. for re-view of April 17 decision by Review Board which denied, for engineering reasons, ap-plication for new AM on 1340 kc, 250 w, unl. in Estherville, Iowa. Chairman Henry dis-sented; Commissioner Hyde absent; Com-missioner Cox not participating. Action Nov. 25.

25. ■ Commission, on own motion, instituted inquiry into alleged violations of Sec. 317 and 508 of Communications Act which en-join "payola" and "plugola" (hidden ad-vertising) practices in broadcasting. Com-mission has received allegations from many sources indicating continued existence and spread of "payola," "plugola" and other improper related practices by broadcast li-censees, their employes and others both in and out of broadcasting industry, which allegations, if true, appear to constitute vio-lations of Sec. 317 and 508 of Communica-tions Act as well as Sec. 73.119, 73.289, 73.654 and 73.789 of commission's rules; that alle-gations received by commission indicate vaand 73.789 of commission's rules; that alle-gations received by commission indicate va-riety of forms of "payola" and "plugola" and related practices including, but not lim-ited to, direct and indirect undisclosed pay-ments by record companies and others to disc jockeys and others for playing or in-fluencing play of records and undisclosed

sum. Action Nov. 25. By memorandum opinion and order, commission ordered Dubuque Broadcasting Co. to forfeit \$1,500 for willful and re-peated violation of Sec. 73.93 of rules by failing to have licensed operator on duty at WDBQ Dubuque, Iowa, and operating station after sunset with daytime power in violation of license. Action was taken after considering licensee's reply to commission's July 22 notice of apparent liability for \$2,000. Action Nov. 25. By order commission (1) affirmed Oct

\$2,000. Action Nov. 25. By order, commission (1) affirmed Oct. 14 action which dismissed application of Frank H. Accorsi for renewal of license of WFHA-FM Red Bank, N. J., for failure to respond to official correspondence, and which ordered him to cease operation of station by midnight Nov. 13, and (2) de-nied Accorsi's Nov. 13 telegraphed request for postponement of Nov. 13 cease-opera-tion do the pending consideration of informa-tion to be submitted by Nov. 16. Action Nov. 25.

Nov. 25. Commission (1) granted assignment of license of KQCY Quincy. Calif., from Pio-neer Broadcasters Inc. to John H. Boyd, but (2) notified licensee it has incurred ap-parent liability of \$500 for prior acquisition of control by Boyd without Commission ap-proval. Licensee has 30 days to contest or pay forfeiture. Action Nov. 25. Commission notified Eastern Broadcast-ing Co. it has incurred apparent liability of \$500 for willful and repeated violation of Sec. 73.93 of rules by not having properly licensed operator on duty at trans. or au-thorized remote control point of WFPG At-lantic City. N. J. Licensee has 30 days to contest or pay forfeiture. Action Nov. 25.

Rulemakings

PETITIONS FOR RULEMAKING FILED

■ KGGK(FM) Garden Grove. Calif., and KRCS-FM San Bernardino. Calif.—Jeanette B. Banoczi and Richard C. Simonton, re-spectively. Request amendment of rules to reassign channel 236 from San Bernardino to Garden Grove. Received Nov. 20.

FINALIZED

■ By report and order in Doc. 15628, commission amended FM table of assign-ments by adding second channel, 285A, to Pekin, Ill. Action Nov. 25.

PROPOSED

PROPOSED Commission invited comments on pro-posed rulemaking, based mainly on various petitions, to amend FM table of channel as-signments as follows (numerals are chan-nel numbers): assign 288A to Lyons, Kan.; either 269A or 296A to Creston. Iowa; 221A to Elwood City. Pa., and 265A to Scotts-burg, Ind.: substitute 236 for 237A at Natchez, Miss., and add 296A to Oshkosh, Wis.; add 265A to Wilmington. N. C.; assign 269A to either Martin or Milan, Tenn., or add 269A to McKenzie. Tenn.; substitute 286 for 280A at Ebensburg. Pa., and 280A for 257A at Phillipsburg, Pa., with comments also invited on issue of whether Edens-burg merits departure from commission policy of assigning class B channels to large cities and metropolitan areas and class A channels to smaller communities; assign 24A to Gouverneur, N. Y.; and on com-mission's own motion, to substitute 272A tor 240A at Merkel, Tex.

■ By separate notice of proposed rule-making, commission invited comments to proposal by Illini Publishing Co. to add 296A to Urbana, Ill., which city now has only one assignment, 280A. Action Nov. 25.

Revocations

■ By memorandum opinion and order, commisssion denied petition by Carol Mu-sic Inc. for reconsideration of July 24 de-cision which revoked license and SCA for WCLM(FM) Chicago, for willful or re-

GOHN Mullins is a man with tremendous drive and a fine flair for showmanship," an associate said last week. "John is a self-made man who seems somewhat surprised to find himself rich and he has a boyish delight in the things that money can provide," a friend commented. An employe added: "Mr. Mullins is a good boss, but a tough one. He's never too busy to help with any legitimate problem, but he has no sympathy for incompetence and no time for alibis."

Those intimate observations may help explain how a poor boy, forced by stark economics to leave high school during the Depression and go to work instead of college, has achieved membership in that select group of men who are 100% owners of television stations in major markets.

In school, Mr. Mullins recalls, "I was an average student but a better than average baseball player" and on his first job his infield position on the company team was more important than the office work for which he was listed on the payroll. The office work didn't seem important to John, either, so he transferred to sales and assistant district manager for the state of Missouri when his immediate boss quit to go into business for himself and John went along. The new company was underfinanced and went bankrupt, but when John went back to his first employer he was told, "You left when you could have stayed, so don't try to come back now.'

Debt and Taxes • "That was my first real break," he says today. "I'd gotten scared and gone back to what I thought was security, but when they turned me down I realized that I didn't want a job but to get out on my own. If I could make it for them, I could make it for myself." After an unhappy experience in the vending machine business, John took his last \$500 and made a down payment on Crystal City Park on the outskirts of Tulsa.

"It was a dilapidated, rundown amusement park with all the rides taken out. I was the proud owner of 12 acres of land, a swimming pool and a leaky ballroom with a dance floor like a ski run, or at least I would be after I'd paid the bank \$3,500 more and the state \$23,000 in ad valorem taxes which had accumulated while the park had been in receivership." Fate went to bat for John Mullins again when his attorney checked the law, decided that ad valorem taxes should not be levied against property in federal receivership and persuaded a judge to wipe out that indebtedness.

Mr. Mullins improved Crystal City, built four more open-air ballrooms and a mammoth roller-skating rink and acquired The Arena, "a small scale Madison Square Garden." In 1942, he donated The Arena for a recruitment

BROADCASTING, December 7, 1964

Making winners out of losers is his forte

dance for the Navy-Marine Mothers Club. The event obtained scores of volunteers, including John C. Mullins, who spent the next two years in the Marines.

On To Phoenix In 1947, Mr. Mullins got the idea that if he had an amusement park in Phoenix he could move a lot of light equipment there for the winter months when Tulsa is too cold for outdoor entertainment, moving it back to Tulsa in the spring when

WEEK'S PROFILE

John Christopher Mullins—President, owner, KBTV (TV) and KBTR Denver; b. Sept. 26, 1915, Sulpher, Okla; Tulsa High School; clerk, salesman, asst. dist. mgr., Marathon Oil Co., Tulsa, 1933-1936; owner, Western Sales Co., Tulsa, 1937; owner, Crystal City Park, Tulsa, 1938; owner, The Arena, Tulsa, 1940; sgt., U.S. Marine Corps, 1942-44; owner, Phoenix amusement park, 1947; pres., gen. mgr., KPHO-TV Phoenix, 1950-52; pres., KBTV, 1955; sole owner, KBTV, 1961; pres., owner, KBTR, 1963; m. Martha Halliburton; children—Michael, 23; Lyn, 21; John Jr., 14; chairman—Colorado Committee for Boys' Towns of Italy; Colorado Heart Assn. Fund Campaign, 1961-62; industry contact ambassador, Governor's Industrial Development Committee; vice chairman, Mile High United Fund; board member—Boy Scouts of America, Junior Achievement, Nursing Home for the Aging, Loretto Heights College; advisory board member—Mercy Hospital, National Defense Transportation Assn.; member— Cherry Hills Country Club (Denver), Denver Club, Kiva Club (Phoenix), Desert Inn Country Club (Las Vegas); hobbies golf, gin rummy. Phoenix gets too hot. But he had overlooked one fact, that the winter nights get plenty chilly in Phoenix. This was when he turned to broadcasting, which thrives on weather that keeps people at home.

Mr. Mullins had met a lot of Phoenix businessmen and he was invited to join a group which was applying for a radio station license there. He did, but his group lost out to one headed by veteran broadcaster Rex Schepp, whom he subsequently joined in a syndicate to purchase a TV grant. KPHO-TV went on the air in December 1949; by spring it was losing \$15,000 a month; Mr. Mullins bought out Mr. Schepp's interest and took over as general manager in May. "We went into the black in October 1950, with an operating profit of \$1,975 for the month," he recollects.

As the only TV station in Phoenix, KPHO-TV did fabulously, but in 1952 Mr. Mullins foresaw that things would be different when the freeze on TV construction was lifted and he sold the station, of which he was by then majority owner.

Denver TV Plus Radio = In 1955, Mr. Mullins and Frank Leu, a Nashville insurance man, bought KBTV(TV) for \$900,000. "It was losing \$25,000 a month at the time," he says, but under his management this situation soon changed and the following year William Zeckendorf, head of the New York real estate firm of Webb & Knapp, bought Mr. Leu's half interest for \$850,000. In 1961, Mr. Mullins bought out Mr. Zeckendorf's 50% for \$2.4 million to become sole owner of KBTV. (The dollar figures are adequate commentary on the economics of television and the effectiveness of Mr. Mullins's management.) In 1963, he added a radio station to his Denver TV operation, buying KICN and renaming it KBTR. Both stations operate from the same headquarters building, but as individual, independent entities.

The Personal Touch = The president's office, some 40 feet in length and perhaps half as wide, is entered through a 12-foot door, opened with a massive, shining brass knob. Behind his desk, at the far end, stands a Louis XIV cabinet. Behind that and overhead are plain glass panels concealing lights whose color and intensity he can alter at will from a desk control.

A hole-in-one trophy (won on the 194-yard 15th hole of Denver's Cherry Hills Country Club) is on display in the family room of the Mullins home, but John Mullins says his real hobby is his work. Up at 5:30 each morning, he reads the daily papers and business magazines with breakfast and arrives at his office early, his pockets bulging with notes and clippings. He still has real estate interests in Tulsa and Denver but broadcasting is now his prime business.

THE FCC's announcement last week of an inquiry into the broadcast contracts of the Associated Press and United Press International is another declaration of the commission's intent to extend its authority not only into every corner of the broadcasting business that it directly regulates but also into other fields of mass communication. The ambitions of the FCC, in its present composition, are getting out of hand.

Perhaps the least attractive feature of the commission's latest adventure is its origin. The FCC says its new inquiry was started at the urging of some broadcasters. If this is true, the broadcasters who have come crawling to Big Brother must share with the FCC the responsibility for whatever damage is done to the cause of journalistic freedom. Big Brother's helping hand as often helps itself as it helps others.

Now for all we know it may be true that in some instances AP and UPI have driven unfair bargains with broadcast stations. They are, of course, the only two wire services that offer anything like a comprehensive report of worldwide news, and one or the other is needed by any station that makes any pretense of being in the journalism business. In such circumstances the possibility of price fixing and other restraints of trade always exists.

Yet there is no proof—or even a hint of it—in the FCC's announcement that AP or UPI have in fact engaged in illegal acts. Indeed if either had, the FCC would be the least appropriate government authority to prosecute or judge the matter. If there is any cause for action, it is in the antitrust field.

An FCC that was not motivated by an irresistible urge to seize power would have told the complaining broadcasters that their case belonged in another jurisdiction. It would have referred them to the Justice Department and to the courts that are competent to adjudicate antitrust disputes. That the FCC welcomed the complaints and now seeks to use them as an excuse for an enlargement of its authority only confirms its fundamental wish to influence the operations and destinies of all the mass communications media. The FCC long ago discovered the route by which it can

apply indirect restraints on enterprises that are outside its direct authority. It invokes limitations on the contractural relations between its own licensees and non-licensed organizations with which they do business. It is such a limitation that the FCC now is considering for wire services.

To newspaper and magazine publishers who still cherish illusions of freedom while taking secret pleasure in each regulatory problem that broadcasters face, the FCC's inquiry into wire-service contracts may come as at least a slight jolt. AP and UPI were newspaper-originated and are newspaper-dominated. When the FCC gets into wire-service business, it's in the newspaper business too.

Fair trials: the root problem

FIND a convention of lawyers or of journalists these days, and you will find on its agenda a discussion of the difficulties of resolving the conflict between a defendant's right to a fair trial and the news media's right to practice their craft without unconstitutional restriction. Everywhere there is talk of codes that would circumscribe, in one way or another, the release or dissemination of information that might somehow prevent the assembly of 12 jurors of utterly unbiased minds.

The principal motivation for the current interest in the venerable conflict of rights comes, of course, from the publicity that attended the arrest, detention and murder of Lee Harvey Oswald. Any number of respectable bar associations and civil liberties societies have decided that Oswald, if he had lived to be brought to formal justice, could not have received a fair trial. Nowhere, according to this collective assumption, could have been found 12 jurors with both the intelligence to sit in judgment and the ignorance of reports that Oswald was the assassin of the President.

Granted that elements of law enforcement and journalism in the Oswald case suffered lapses of sensibility and selfdiscipline, we still wonder what it was that *could* have been done—aside from the obvious precaution of keeping an armed avenger out of range—to guarantee Oswald a trial before a jury that had never heard of him.

Is it to be argued that the Dallas police should have refused to admit they were holding a suspect or, admitting it, withheld his identification? That course would have been made impossible by the political pressures generated by an unsatisfied electorate. Mobs would have gathered in the streets. Is it to be argued that Oswald could have been brought to trial so swiftly that public attitudes lacked time to form? It takes weeks to prepare an orderly prosecution and defense in such a case.

The lawyers and the journalists who now talk about restraints upon disclosure of pre-trial information are displaying an astonishing disregard of the realities of criminal prosecution and the communications system of modern times. They are, in essence, suggesting that the public must and can be kept unaware of even the most sensational criminal case until the jury has delivered its verdict. If such an arrangement could be enforced, and it obviously cannot, justice would indeed be blind. No end of corruption could be practiced by the agencies of law enforcement under the guarantee of secrecy.

The attainment of fair trials depends, we suggest, much less upon the preservation of public ignorance than upon the recruitment of juries that have the intelligence to understand and judge the evidence submitted at the trial. As any trial lawyer will admit, jury duty in most venues is escaped by all but the idle, the uninfluential or the morbid. No matter how brutish or dull-witted a defendant. it is often difficult to empanel 12 jurors who are his peers. This condition needs to be corrected, but it will be affected little, one way or another, by the amount of information that is publicly distributed before or during the conduct of a trial.

The correction of the jury system is less apt to be achieved by keeping the whole citizenry in the dark than by letting some light into the jury box.
