It Pays to Be Ignorant

Visit us during the NAB Convention at the Shoreham Hotel Suite E-630

> Now, a brand new, outrageously funny series developed especially for primetime access programming by Hatos/Hall Produc-

tions, the producers of "Let's Make A Deal." IT PAYS TO BE IGNORANT is first-run, first-rate humor guaranteed to deliver more laughs per half hour than anything else on television.

IT PAYS TO BE IGNORANT has been created to show viewers how smart they really are...at least as compared to the celebrity panel.

For a weekly primetime access show that will keep your audiences laughing and you happy, schedule IT PAYS TO BE IGNORANT.

Jo Anne Worley...

whose measurements are 36-22-36, and that's just her mouth. t

Billy Baxter ... who left England in a fog and is still in it.

Charles Nelson Reilly... who has more brains in his little finger thon his whole head.

and as Master of Ceremonies... Joe Flynn...

who went underwater strapped to John Cameron Swayze's wrist and an hour later was still talking.

WORLDVISION The New Way to Say ABC FILMS

For 20 years we've established a reputation as ABC Films, supplying programming to television stations ground the world. Now the same solid management team, the same creative talent, the same dynamic and knowledgeable sales force will continue to provide the same fine service under a new Banner. Worldvision Enterprises, Inc.

For 20 years, we've offered outs and ing shows I k. "Mod Squad," "Let's Made A De I.", "The Fugitive," Len Casey." Prime Features, and Harvey Cartoons to name just a lew.

And for 20 years we've become known for our reliability, innovation, and imagination.

Stating now, look to us as Worldvision Enter prises L.c. for the best in relevision programming. We're the brand new company with two decades of expansion behind us.

WORLDVISION ENTERPRISES, INC.

660 Madison Ave., New York, N.Y. 10021 (212) 8:2-3838 New York, Los Angeles, Chicago, Atlanta, London, Paris, Rome, Sydney, Caracas, Sao Rauto, Toranto, Tokyo, Munich

Let's Make A Deal

Visit us during the NAB Convention at the Shoreham Hotel Suite E-630

"Let's Make A Deal" is a proven winner with an outstanding track record. No guesswork about this series that has been consistently delivering top ratings and shares across the country.

No longshot by any means. "Let's Make A Deal" is the favorite among viewers and station owners in nearly 150 cities.

No gamble either with this series. As a two-year old entry in the primetime access race, "Let's Make A Deal" finished first two times running against all other half-hour syndicated shows.

For a change the odds are in your favor. Don't bet against "Let's Make A Deal" in its third start. It may still be available in your market.

Visit us during the NAB Convention at the Shoreham Hotel Suite E-630

They're young ... they're adventurous ... and they've been the favorites for years among young adults across the country.

Because they know the ways and language of the young, they go where other policemen cannot...and reach audiences other shows do not.

With a four year average of seven million 18-49 women weekly, MOD SQUAD delivered the desired demographics... and in four completed network seasons dominated all competitors including "Ironside," "Beverly Hillbillies," "Lancer," "Green Acres," and "Glen Campbell" with an outstanding 33% average share.

Schedule this action-packed hour series on your station and MOD SQUAD's followers will make you a leader.

HOW DO YOU FOLLOW HEE HAW? ONLY ONE WAY!

A TOUGH ACT TO FOLLOW

"You haven't lived 'till you've played the Palace"

Seven great seasons as a network hit. Now, 26 brand new, starstudded hours for '73-74. From the same team that produced the network Palace.

the Bauer 707 was 'just right' in 1960

THE SPARTA BAUER 701B IS 'JUST RIGHT' TODAY

In the tradition of the most successful broadcast transmitter in history, the Bauer 707, now comes the SPARTA 701B:

- All solid state, right up to the finals
- 125% positive modulation
- Tally light overload indicators
- New long-lived 4-500 tubes

Plus these and other time-tested SPARTA/Bauer 'just right' quality features; oil filled modulation transformer, built-in dummy load, vacuum capacitor final tank tuning.

THE NEW MODEL 701B SPARTA/1kw AM TRANSMITTER IS THE ONLY ONE MANUFACTURED TODAY WITH EVERY ONE OF THESE (JUST RIGHT' FEATURES AS STANDARD EQUIPMENT!

SPARTA, the 'just right' company ... small enough to be first name friends ... big enough to supply EVERYTHING. Call us. Collect.

Booth 310, Sheraton-Park Hotel, Washington, during the NAB Convention

Closed Circuit_®

Jockeying

Andrew M. Ockershausen (Evening Star Stations, Washington), chairman of National Association of Broadcasters radio board, is still odds-on favorite to be elected next chairman of NAB joint radio-TV board, but other candidates are being urged to make race of it. Hamilton Shea of Gilmore Broadcasting, who was chairman of NAB TV board in 1970-71, has promised backers decision this week on whether he will declare candidacy.

It's not so much personal opposition to Mr. Ockershausen that animates talk of rivalries as objection by television-board members to radio man succeeding Richard Chapin (Stuart radio group) in top job. Custom has been to alternate joint chairmanship between radio and television. Another broadcaster who reportedly has been approached to stand for office is Carl Lee of Fetzer group. Peter Storer (Storer Broadcasting), chairman of TV board, withdrew as candidate for jointboard chairmanship early this month ("Closed Circuit," March 5).

The broom

House Commerce Committee Chairman Harley O. Staggers (D-W. Va.) is said to be determined to do something about what he feels is obscenity on radio and excessive violence on television. At hearing on renewal legislation last week he again warned that if broadcasting does not police itself, Congress will take corrective action (see page 119). Now there's indication he's in dead earnest. In what could be preparation for full-fledged inquiry, Mr. Staggers's Investigations Subcommittee has been quietly gathering, from FCC and other sources, information on specific instances of purported obscenity and violence.

Prospect

Harris - Intertype, Cleveland, originally printing-equipment manufacturer but in recent years diversified into electronics (which now accounts for 55% of its business) is looking hard for broadcast and cable-TV properties to buy, with eye open for stations closely held by families that could solve estate problems by selling to public company. It's also on lookout for newspaper acquisitions, though word is that electronic media have priority. Company went into radio-TV hardware in big way several years ago when it acquired Gates Radio, old-line manufacturer.

Distraction

Tough and prolonged grilling that L. Patrick Gray is receiving in Senate hearing on his nomination to be director of Federal Bureau of Investigation, is having impact, oddly enough, on FCC. Charles Lichenstein, special assistant to FCC Chairman Dean Burch who is to become special assistant to Mr. Gray ("Closed Circuit," Feb. 26), is now on kind of detached service to Mr. Gray, currently acting FBI director. He moved over to aid Mr. Gray during hearing. One FCC chore to which Mr. Lichenstein remains committed involves writing portion of commission documents on results of over-all fairness-doctrine inquiry. But when he gets to it depends largely on when Senate committee concludes hearing on new boss.

Little TV

FCC proposal for legislation to permit television translators to broadcast limited amount of local programing (see page 131) could become basis for congressional hearing on whether not only translators but low-cost UHF's could be used as vehicles for self-expression in rural and inner-city areas. Senator Howard Baker (R-Tenn.), ranking minority member of Senate Communications Subcommittee, regards translators and low-cost UHF as possible answer to question of providing for greater local participation in ownership and use of mass media. He will urge subcommittee to hold hearing on FCC translator bill, and to include consideration of UHF.

Senator has discussed his idea informally with commission, and he has asked Clay T. Whitehead, director of Office of Telecommunications Policy, to look into its feasibility. Mr. Whitehead, in his reply last week, said development of lowcost UHF might be desirable, and promised to confer with commission on study. Commission had under consideration for years plan for low-power community UHF's; finally abandoned it in 1969, when it transferred channels 70-83 to land mobile. OTP officials say one difficulty with that plan was that it would have required low-power stations to maintain high technical standards; Baker plan envisages relaxation of standards.

Radio Records

There's effort under way to develop monthly figures on national-spot radio business. After discussing idea with some others, Alan Torbet of Alan Torbet Associates questionnaired other leading radio rep firms 10 days ago as to willingness to report their monthly sales figures-on confidential basis-to independent accounting firm, which would compile figures into "industry" reports. Similar procedure is used by stations-mostly television-in number of markets to get composite data on national and local revenues in those markets individually. By late last week, Mr. Torbet had received replies from 13 rep firms, all but two indicating interest, but he thought it still too early to judge what outcome may be,

If it works, backers would like to have

monthly reports not only on total sales but also on sales by each market where reps maintain offices. Along with monthly figures, year-to-date totals could be maintained and compared with year-ago results. Advocates say spot radio is one of few businesses whose practitioners are flying virtually blind, each knowing his own sales figures but having little or no timely benchmark data against which to measure them.

Price of film

Though ABC Inc. has maintained silence on amount it will receive for sale of ABC Films to group of its key syndication officials (see page 126), price tag is approximately \$2.5 million. Sales price of ABC Films, to be known after March 30 as Worldvision Enterprises, compares with \$7.5 million announced for projected sale of NBC Films to National Telefilm Associates (BROADCASTING, Feb. 12). Comparison with CBS more difficult to make since that involved spin-off and included both program syndication and cable-TV operations into Viacom International. At end of first day of trading on June 4, 1971, Viacom stock closed at 18¼, giving shares that day market value of almost \$70 million.

New subject

FCC Commissioner Robert E. Lec, whose interest in technical matters has centered on UHF television, is turning to FM. He has asked office of chief engineer to do study that could result in establishment of more FM stations in outlying communities. He notes that FM channels allocated to cities are now occupied and that present adjacent-channel-separation standards prevent locating new stations in suburbs. Question is whether standards are stricter than necessary with modern interferencerejection features in FM sets.

Engineers will turn to FM project after completing similar study on UHF. Latter was initiated at request of land-mobile radio interests, which feel closer spacing of UHF's, if found possible, would free spectrum space for mobile use.

Full-time trouble

Canadian Association of Broadcasters, in existence since 1928 with either general manager or executive vice president carrying ball as chief executive, is conducting intensive search for first permanent president. Previously president has been CAB member elected at each annual meeting for one-year term. Feeling is that Canadian commercial broadcasters face many crises and it's now impossible for volunteer president to cope. Committee has been formed to recruit new president, but search is being made difficult because stipulation is that person must be fully bilingual. Appointment is expected to be announced by end of June or early July.

At Deadline

In Brief

Topper. Final touch to honors paid J. Leonard Reinsch, president of Cox Broadcasting, at International Radio and Television Society's gold medal awards dinner last Thursday, was letter from President Nixon. Chief Executive said he was pleased "to join in applauding the talent, dedication and sense of civic responsibility which you have brought to your challenging work in broadcasting; and I am especially pleased to commend your successful efforts to improve and expand relations with other nations in this vital area. At home you have set the highest standards in your profession, and abroad you have been an ambassador of good will in whom all your fellow citizens can take pride." (Also see story, page 54.) • Get the message? A 15-foot receive antenna on lawn of Sheraton Park hotel in Washington? That's promotional plan of Communications Satellite Corp. for upcoming NAB convention. Antenna will receive direct digital satellite transmission. demonstrating Comsat's newly developed techniques for transmitting television programs. • Subbing for Flip. Singer Helen Reddy will be host of weekly contemporary music-comedy series, still untitled, to replace NBC-TV's Flip Wilson Show (Thursday, 8-9 p.m. NYT) during summer. Flying South. Florida Cable Television Association has lined up high-powered program for its annual convention, March 29 in Daytona Beach. Clay T. Whitehead, director of Office of Telecommunications Policy, is to address banquet at Desert inn hotel. David H. Foster, president, National Cable Television Association, is scheduled luncheon speaker. Mr. Foster also will appear on panel with Edward J. Brown, chief of licensing and authorizations unit of FCC cable TV bureau. . Westward ho. CBS's first daytime drama to originate on West Coast, The Young and the Restless. kicks off next Monday (March 26, 12 noon-12:30 p.m. NYT). Series, created by head writer William J. Bell and produced by Screen Gems, comes out of CBS Television City in Hollywood.

License-renewal airing. Public Broadcasting Service will focus attention this week on now-heated subject of broadcast license renewal. Behind the Lines program Tuesday will deal with WHIS-TV Bluefield, W. Va.-station whose application for renewal is being opposed by citizen group. Broadcast will relate that situation to national debate now under way regarding license-renewal issue. (Also see page 58.)

Public's upper hand forces sex off air in Nevada experiment

KVVU(TV) tried X and R movies in late-night periods, still found audience unready for fast films; leave it to John Q., he tells FCC

William H. Hernstadt, owner of KVVU-(TV) Henderson, Nev., had this advice on Friday for FCC and other government officials concerned about television stations showing X-rated movies: Leave problem to local communities involved: they will take care of it (see page 118).

Mr. Hernstadt spoke from experience. He had shown X- and R-rated movies at 11 p.m. on Sunday over past several weeks, in effort to establish Adult Theatre series, but abandoned project last week. Reason, he said, was largely negative reaction from community. Of 500 letters and telephone calls received in response to his broadcast request for reaction to new program concept, 60% opposed it, 40% favored it.

Of at least equal importance in his decision was fact that chain-letter campaign was organized, aimed at advertisers sponsoring programs on station—and not only those in *Adult Theatre*. Letters threatened boycott if advertisers did not leave station.

X-rated films that Mr. Hernstadt said station carried, all without cuts, included "Venus in Furs," "The Secret of Dorian Gray" and "Paranoia." Mr. Hernstadt said announcement warning viewers of nature of film was made at start of program and again during first break. "I took the position that we were not trying to hide anything," he said. And he wasn't. He said he called Senator John O. Pastore (D-R.I.) "a hypocrite" in on-air editorial, and offered him chance to reply. Charge, he said, was based on two comments senaator had made, as quoted Feb. 26 in BROADCASTING. In one, he had said Congress would protect broadcasters against efforts by anyone, including administration, to infringe their First Amendment rights. In other, he said FCC should deny license renewals of stations carrying allegedly off-color material as means of testing its authority to deal with such programing.

Mr. Hernstadt also urged viewers to contact Senator Pastore and FCC. At least two did write to commission—complaining about films.

Commission official said Friday, "We will make inquiry" into matter. Fact that station allegedly did show uncut X-rated films conceivably could provide test case of power to act under law banning profanity, obscenity or indecency on air.

Mr. Hernstadt indicated his "noble or

ignoble experiment" reinforced him in his view that government should stay out of programing. After "objectionable material" is successfully censored, he said, it is easier to censor news.

He also said he "proved" that country is not ready for kind of sex-and-nudity films he was showing. "If these films don't go in Las Vegas [Henderson is in shadow ot that city], they won't go anywhere." Broadcaster must be attuned to needs and interests of his community as matter of financial survival, he said. "We're in the entertainment business. If you offend people, you're in trouble."

Mr. Hernstadt said he had written second letter to Senator Pastore, notifying him that "market forces had closed him down faster" than police can close down "a porno store."

Oklahoma Publishing buys KTNT-TV for \$4.5 million

Oklahoma Publishing Co., Oklahoma City, whose subsidiary WKY Television System now operates three independent television stations, will acquire its fourth property in that category—and its second independent VHF—subject to FCC approval. Station, KTNT-TV (ch. 11) Seattle-Tacoma, Wash., will be purchased from *Tacoma News-Tribune* for \$4.5 million.

WKY chain presently includes independents KTVT(TV) (ch. 11) Dallas-Fort Worth, KHTV(TV) (ch. 39) Houston and wVTV(TV) (ch. 18) Milwaukee. Firm also owns two network affiliates wKY-TV Oklahoma City (ch. 4-NBC) and wTV1(TV) Tampa-St. Petersburg, Fla. (ch. 13-CBS)—as well as WKY(AM) Oklahoma City. Parent Oklahoma Publishing Co. operates two Oklahoma City daily newspapers—*Daily Oklahoma* and *Oklahoma City Times*. E. K. Gaylord is board chairman and Edward I. Gaylord president of parent firm.

News-Tribune, which has operated KTNT-TV since its inception in 1953, is controlled by Elbert H. Baker, its president, and his family. KTNT-TV, which pulls 11% share of market audience, is generally regarded as one of nation's most viable independent stations. Station operates with 316 kw visual, 47.9 kw aural and antenna 800 feet above average terrain. News-Tribune retains KTNT-AM-FM Tacoma.

Opting for status quo at FCC

Chances for restructuring FCC along lines recommended in Office of Management and Budget study ("Closed Circuit," July 3, et seq.) did not appear bright after commission spent part of Thursday and Friday discussing proposals. Commissioner Benjamin L. Hooks, who as in so many matters appears to hold swing vote,

WTOP-TV Wrests News Crown From WRC-TV, Longtime Ruler Of D.C. Roost

Washington, March 6. Post-Newsweek's WTOP-TV has taken over news leadership in this market, long dominated by NBCowned WRC-TV, according to the Jan.-Feb. Nielsens. The achievement vindicates the heavy investment in news, and the high priority given it, at WTOP-TV in the four years since Larry Israel came over from Group W to head Post-Newsweek Broadcasting.

Last August, WTOP-TV went to a two-hour news block at 5:30 p.m. ----the only one of that length this side of the Rocky Mountains-and that has paid off in a solid win for the whole stretch. The local portion, occupying the first 90 minutes, topped WRC's programming -which included Mike Douglas, local news and the NBC "Nightly News" -with a 12 metro rating average against an 11 for WRC-TV. In the final half-hour of WTOP's two-hour block, CBS' Walter Cronkite news demolishes the competition (local news on WRC, the Smith-Reasoner ABC news on WIMAL) with a 17 rating and 30 share, against a 10 rating and 17 share for each of the other two stations.

All three network-serviced stations are head-on with local news at the 6 p.m. half hour, and WTOP-TV takes it with a 13.5 metro rating and 25 share to a 12.5 and 24 share for WRC-TV, and a 10 rating and 19 share for WMAL-TV.

Daytime, Too

WTOP-TV also came in with the market's highest-rated daytime news, with its half-hour strip at 1 p.m. scoring an 8 rating. For a daytimer it's impressive, especially against the celebrated primetime newscast on independent WTTG (at 10 p.m.) which made a 9 rating in peak viewing time in the Jan.-Feb. book.

Also winners for WTOP-TV were two regularly scheduled public affairs series, "Agronsky & Co." and the consumer-oriented "Caution!" The former, a weekly discussion of major news events helmed by Martin Agronsky and featuring regularly James J. Kilpatrick, Carl Rowan, Hugh Sidey and Peter Lisagor, pulled a 13 rating, higher than any other station's local newscasts were able to average for the measured period. And "Caution!," the 7:30 p.m. prime-access entry on Saturdays (locally produced), pulled a 10, which if it didn't win the period against entertainment was a big number for public affairs...

... TheWTOP-TV news block is actually composed of three different newscasts. The first half hour of the 90-minute local segment features J. C. Hayward and Bob Dalton and accents special local features along with hard news; the hour at 6 p.m. is co-anchored by Gordon Peterson and Max Robinson and is mostly hard news in the "Evewitness News" motif. Both pairings are black-and-white (Hayward and Robinson are black) in a metro area whose majority is black. At WTOP-TV, the network news comes at 7 p.m., and Cronkite scores the highest rating (17 and 30 share) for any program in the two-hour period. John Chancellor on NBC a half-hour earlier gets a 15 rating and 26 share, and Reasoner-Smith opposite Cronkite hit a 10 rating and 17 share.

THE NEW DIMENSION IN BROADCASTING AND PRODUCTION

The ACR-25 cassette recorder/reproducer is the ultimate in quality recording—and much more. It's the most versatile production tool yet made—and much more. It's the quickest, most flexible, no-hands automatic spot and shortsegment program player, hands down. It will have as much impact on TV broadcasting as the first commercial video tape recorder, our VR-1000—and the first high-band VTR, our VR-2000.

The ACR-25 is much more than a spot player

Certainly the ACR-25 solves the problems of multiple spotting. But it does it quicker and with more flexibility, selectability and automation than any other unit made. It provides continuous play of :30's, ID's and hitchhikers—with no black air. It doesn't just do things better. It does things no other machine can do—and never will be able to without basic design changes.

The ACR-25 is a production tool unmatched anywhere

It does more than solve today's problems, it will meet new requirements years in the future. But paramount is the challenge its capabilities present to imaginative producers. They'll be able to create things quicker, simpler and better than ever before—or perhaps things they have never been able to do before. Here's why:

The ACR-25 cassette

The rugged cassette is high impact, molded plastic to take care of all the rough handling you can give it. It's absolutely unique. The following features are exclusive...no cartridge or other cassette has them:

There are no bearings in the cassette itself. Why subject them to accidental misalignment or damage? Precision bearings are in the ACR-25 where they belong.

The cassette holds and protects the tape, that's all. Once in the transport, it has no function. The machine's bearings support the spools and the tape is lifted away from the cassette with gentle vacuum columns.

A cassette can be reloaded by the operator in seconds. It opens with three thumb-twist screws and closes just as easily.

Spools lift out to be stored or shipped in small, spool-size boxes... not heavy cartridges. This relieves storage space, cuts shipping costs and eliminates expensive cartridge inventory, a substantial saving in both investment and operating costs. Each cassette can hold up to 6 minutes of tape at 15 ips. In the interest of interchangeability, the standard spool holds 3 minutes of tape plus sufficient leader for threading up a reel-to-reel VTR.

The carrousel—random access or sequential

The ACR-25, and only the ACR-25, offers fast, shuffle-free random-access. Load and program the machine for sequential play if you like, but you also have the option of true random-access programming. Saturation spot schedules, schedule changes, and make-goods are all accomplished by simply punching up a new program. No duplicate cassettes or manual reloading of the carrousel are necessary.

For removal, any cassette can be reached, right side up with the label in reading position in one second!

The transports

There are two of them, so one segment can follow another immediately, with no black air.

A minute spot finished on one transport can be stopped, rewound, unthreaded, returned to the carrousel and the next spot loaded, threaded and cued in less time than it takes to play a :10 ID on the other transport. A full six minute cassette takes only 20 seconds!

Control

Although manual and semi-automatic control are available at any time, automatic control is standard on every ACR-25. It may even be directly controlled by an external computer with the proper interface, but the standard ACR-25 programmer is always there to back it up. The ACR-25 can program up to 40 events, divided into as many sequences as desired – several hours worth, depending on the programming.

Think how simple that could make what is now a five VTR station break! Or an hour newscast, complete with your on-the-scene production, network dubs, sports, weather, multiple spots and cuts to the anchorman.

The ACR-25 as a recorder

Translate all the above broadcast features into recording capabilities—from multiple sources—and you can see what a versatile production tool the ACR-25 can be; for example, you can dub both A and B rolls, plus cassette or cartridge audio, onto an ACR-25 cassette, pre-set it with a button for any spot in the programming and play it—all without taking the cassette out of the machine! The possibilities for the inventive producer are almost limitless!

Segments of all sizes from all sources can be gathered quickly and simply into one smooth, continuous program to be broadcast automatically. No splicing, no winding and rewinding reels, no frantic switching and reloading of VTR's.

ACR-25, the most valuable equipment in your studio

Here is, without a doubt, the most versatile production/broadcast unit ever available-the closest thing to a complete studio you'll find.

It saves money, manpower and mistakes in so many ways. It can release as many as 3 to 5 VTR's for other duties - or retirement.

Both Management, who pays for it, and Production, who gets to work with it, will agree it's the best investment since the first VTR.

Ampex Corporation Audio-Video Systems Division 401 Broadway Redwood City, Calif. 94063

Visit Ampex at the NAB Show, Exhibit Hall 2, Booth 200.

Atlanta and Indianapolis just changed (a little).

These two great cities have changed a little, because we've changed a lot. In order to provide even better service to the growing list of Cable Data customers in the Midwest, the South and the Eastern seaboard, U.S. Computer Systems is in the process of opening offices in Atlanta and Indianapolis. Dennis Garcher, formerly with GTE Data Services, will be heading up the Atlanta office and Dave Williams, formerly with IBM, will be our man in Indianapolis. Cable Data, the nation's largest supplier of data processing to the CATV industry, is now serving over 200 cable systems throughout the country. If you'd like to see a presentation on how Cable Data can help you, contact Rod Hansen in the Sacramento home office at 916-441-4760. We're ready when you are!

David Huw Williams

A DIVISION OF **U.S. COMPUTER SYSTEN** P. O. Box 13040 1931 K Street Sacramento, CA 95813 ATLANTA 404-636-7080 / INDIANAPOLIS 317-635-2184

reportedly said that plan was not viable, had not been well thought-out, and should be rejected. Majority of commissioners were said to be concerned over proposals for strengthening role of chairman; they feel it would be at expense of their policymaking authority. One aspect of problem involves proposed creation of super executive director to be called general manager. OMB briefers insisted general manager would be concerned solely with administrative matters, but some commissioners and bureau chiefs are worried that general manager would serve as "filtering agent," as one chief put it, for ideas destined for chairman.

Other major proposal, for merging Field Engineering and Safety and Special Radio Services Bureaus into General Radio Services Bureau, is said to have run into opposition not only from affected bureaus but several commissioners. Feeling was that there were other solutions to problems merger was supposed to solve, though no consensus emerged for any. Bureaus were asked to analyze their management problems and suggest solutions.

Whitehead says he favors loose rein on pay cable

Clay T. Whitehead, director of Office of Telecommunications Policy, opposes burdening pay-cable operations with kind of affirmative programing requirements now imposed on broadcasters. But he also says that, "in the early years of cable development," FCC should have authority to adopt restrictions on kind of programing that can be shown on pay cable. Purpose would be to prevent siphoning.

Mr. Whitehead made comments last week in responses to written questions submitted by Senator Howard Baker (R-Tenn.) during Senate Communications Subcommittee hearing on OTP matters last month (BROADCASTING, Feb. 26). Senator Baker had asked how government could assure pay cable would compete fairly with over-air television in view of programing requirements (news and public affairs) imposed on broadcasters.

Mr. Whitehead said broadcasters' use of spectrum provides basis for requirement that licensees make special effort to serve community needs and interests in informational programing, even though that programing is not economically viable. There are no similiar justifications for imposing same requirements on cable television systems, he said, particularly if government adopts policies and regulations that provide assurance there will not be monopolistic control "of the multiplicity of cable channels."

Opposition to fees unanimous

Opposition to FCC's new schedule of fees, calling for across-the-board increases for all industries regulated by agency, reached crest last week as deadline for filing comments expired. As has been case in virtually all comments submitted on proposal since it was announced three months ago (BROADCASTING, Dec. 18, 1972), everyone filing last week took adversary position.

Brief submitted by ABC summarized feelings of most interests filing—including broadcasters, cable operators, business and ham radio licensees and common carriers. "Whatever the basis for determining individual fees," ABC said, "the fact is that the commission has no legislative authority to adopt a fee schedule intended to generate one cent more than the pertinent year's congressionally appropriated funds."

Another Heftel acquisition runs into a protest hurdle

Joyce and Cecil Heftel, in process of building 10-station broadcast inventory, are discovering pressures citizen groups can bring against acquisition-minded entrepreneurs. Heftels, whose \$1 million purchase of KDNA(FM) St. Louis was challenged at FCC month ago, now have additional problem of fending off similar threat to their proposed buy of RKO General's wROR(FM) Boston. Committee for Community Access, group of Boston-area college students, last week asked commission to deny that sale on grounds that Heftels plan "substantial curtailment of program service both in quantity and quality" and have inadequately ascertained community needs.

Group told commission that Heftels would reduce news programing on wROR by 48%, public affairs by 65% and "other" nonentertainment programing by 29%, although they plan slight increase in station's hours of operation. In addition, it alleged, none of public-affairs efforts proposed by buyers would reflect "input and/or expression of ideas from a broad spectrum of the community." Challengers also claimed that Heftels' ascertainment efforts consisted of "splatter or shotgun" technique. "Our impression is that Mr. Heftel blew into town for a time

Mr. Comle

George R. Comte, VP, Journal Co., Milwaukee, elected president, WTMJ Inc., newly formed broadcast subsidiary that will operate WTMJ-AM-FM-TV Milwaukee and Teltron, CATV operator with systems in Stephens Point, Stettin and Wausau, all Wisconsin. Michael McCormick, manager of radio and television, elected VP and general manager.

Mr. McCormick

last August interviewing as fast and as many people as he could" to achieve quota of 100 queries of community leaders—only one of whom was black.

In another development, Heftel organization responded to challenge, by James F. Mitchell, to \$1-million KDNA sale (BROADCASTING, Feb. 26). Citing opposition brief filed earlier last week by KDNA licensee Parent Corp., which claimed that Mr. Mitchell's challenge was filed 11 weeks too late and should therefore be dismissed as untimely, firm added that while it is proposing less nonentertainment programing for KDNA than several other St. Louis stations, that action is justified when it is considered that KDNA, which is currently noncommercial and listener-supported, has no existing revenue base. Parent had claimed in its pleading that KDNA would go under if it were not sold.

Public broadcasters, in closed circuit, seek to crystallize issues before D.C. meet

Public television station licensees, in 90minute closed-circuit report from representatives of Public Broadcasting Service Television Educational and Service boards, as well as Chairmen's Coordinating Committee, on Friday (March 16) were told that central question remains who controls selection, scheduling and distribution of programs. "This is the pivotal issue to be resolved," reported Robert F. Schenkkan, chairman of PBS. He told licensees, however, that Corporation for Public Broadcasting board has reaffirmed its conviction that corporation has ultimate authority over interconnection and ultimate responsibility for its use.

Both Mr. Schenkkan and Frederick Breitenfield Jr., chairman of Educational Television Stations division of National Association of Educational Broadcasters (and who acted as chairman of closed-circuit meeting), outlined three-part agreement that previously had been reached with CPB board calling for licensees to have "free access" to interconnection, right to veto programs, and for licensees to unite into single organization, provided that such organization was governed by lay board (men and women who are members or chairpeople of local stations or their designated representatives).

Last part of agreement has been difficult for licensees to swallow, with many, apparently, insisting that public broadcasting managerial professionals should not have to answer to lay group. All licensee representatives taking part in closed circuit meeting from WETA-TV Washington — including PBS president Hartford N. Gunn Jr., NAEB/ETS director Presley Holmes and Chairmen's Coordinating Committee leader Ralph D. Rogers — urged support of concept of united organization of licensees and pointed to PBS spring meeting in Washington, March 28-30, as crucial time when vote will be taken to approve or disapprove of formation of such organization.

Questions:

What group of feature films has 15 of 20 titles that have not been shown on television since network exposure 3 or more years ago (or ever)?

What group of feature films has 14 of 20 titles that stations can play immediately? And 17 that can play in Fall '73?

What group of feature films has 15 that appeared on network television and averaged a 38% share of audience in their debuts?

4What group of feature films were sold fast to 18 owners of major station groups?

Source: NTI, Oct. 1964–Feb. 1972. Audience estimates are subject to qualifications available on request. **5**What group of feature films gives stations 16 of 20 pictures in color?

6 What group of feature films was especially put together for all-family viewing, anytime of the day?

ZWhat group of feature films gives a station such stars as Kirk Douglas, Dean Martin, Frank Sinatra, Elvis Presley, Jerry Lewis, Anthony Quinn, Shirley MacLaine, Cliff Robertson, William Holden and Kim Novak for audience-building promotion?

What group of feature films carries this paid-admission endorsement:"more than \$100 million in box office receipts"?

Nov. 26-29-Annual meeting, Television Bu-reau of Advertising. Hyatt Regency hotel, Houston.

Should a one-year-old stay up all night?

Boston's Channel 5 is only one year old, and already we've pioneered regularly scheduled all-night programming in New England. We've done a few other things that you wouldn't expect from a youngster just taking its first steps.

We're the only TV station in the country that originates all its own prime access programming. In fact, we have more locally originated programming

... nearly 50 hours per week ... than any other TV station. And our local programming is beamed at audiences as diverse as preschoolers, the elderly, underground film buffs, minorities, the unemployed, and the politically concerned. More? We have the largest non-network owned news staff in the country.

The result is as surprising as the accomplishment. Our viewers are as responsive to us as we are to them. For the first time ABC is a clear #1 in prime time in Boston ... and we are the fastest growing ABC affiliate in the top ten markets, not only in prime time, but with the ABC Evening News and late fringe as well.

It's more than you'd expect from a one-year old. But then, we don't look our age.

WELCOME !

For many years in this column, broadcasters have been reading about McHugh and Hoffman, Inc. and its services.

Now, for the first time, our new offices are located adjacent to a city hosting the NAB Convention.

Though we have offered to visit you at our expense and explain our company and what it can do for you, the thought occurs that you might like to visit our new offices and see us while you are here. We would welcome the opportunity to chat with you or put on a full-scale presentation. Just call us-we are only twenty-five minutes from downtown Washington and very easy to find. We'll give you the simple directions, and it's all parkway driving. We'd like to meet you and say welcome in person.

Learn more about what we mean when we say it's so important to know why things are happening the way they are at your station.

This is no time for modesty.

We added features to the BC-230 that make the BC-230B second to none in the industry, but we added nothing to its price.

Automatic centering The BC-230B is the first automatically centering camera made in the U.S. The operator centers the image once and from then on it stays in register automaticallyno distracting manual adjusting.

Return viewfinder feed Operators can monitor master control to preview effects-frame-up and pre-set split screens and other special effects.

Bias lighted prism and extended red Plumbicon* These features minimize plumbicon lag and maximize sensitivity over a range of light levels from bright sunlight to low-key, mood lighting in the studio.

Lens options The user can choose the lens to suit his application. The Angenieux 10/1 is standard; the Angenieux 15/1 and Canon 10/1 are optional.

New packaging There is no longer need for big, bulky cameras. The BC-230B is the lightest, most compact broadcast studio/remote camera with all these added features.

It also has a new, tilting viewfinder hood for better light shielding and more convenience. New and improved

We will match our BC-230B against any broadcast color TV camera in the world!

paging and intercom systems and a larger, 360° tally light have been incorporated. Dual handles make carrying easy. There is also a convenient script clip.

If you would like to know more about the BC-230B, contact your local Ampex representative or write Ampex Corporation, Audio-Video Systems Division, 401 Broadway, Redwood City, CA 94063.

*TM N.V. Philips

"What's My Line?" is not a game of chance.

It's about the surest show a station manager can put in a choice time slot. And keep it there for years. And avoid agonizing appraisals of new, untried programming with each coming season.

"What's My Line?" has a record of strong, long runs in first-run syndication: 3 or more years in 35 markets, 4 or more years in 28 markets, and 5 years in 18 markets.

Currently, "What's My Line?" wins time periods in 19 markets (14 in prime-access time) with an average 37% share of audience. And wins bigger audiences than lead-in programs in 25 markets (17 in prime-access time). With an average 35% more viewers.

This most famous of all game shows has proven its appeal to 18-49 women viewers. And has proven its strength as effective

First in Prime-Access Periods Bangor Boston Detroit Greenville-Spartanburg-Asheville Memphis Orlando-Daytona Philadelphia Pittsburgh Portland-Poland Spring Providence South Bend Spokane Tampa-St. Petersburg Toledo

counterprogramming against early network and local news.

"What's My Line?" with Tony Awardwinning Larry Blyden as its new host is available for September 1973 in some markets. Get it now, and rest easy for a long time to come.

Image enhancer

EDITOR: I enjoyed your special report on independent television in the March 5 issue. It was well written and I think it will do a great service to independent television's image. Reports and articles of this nature are of interest to the entire broadcasting spectrum. We look forward to seeing more of the same.-Adam G. Polacek, sales manager, WTTG(TV)Washington.

Wrong reading of the straws

EDITOR: Your March 12 "Closed Circuit" about Alan Pearce's memo to FCC Chairman Burch on the National Association of Television Program Executives conference straw poll [concerning the primetime-access rule] implies either an incorrect tally of results or some inaccurate representation of the sentiments of those

in "command" of their traffic/ accounting problems with our BCS Systems. Look what's happened since January 1st -Installed or scheduled installa-

tions for 9 new systems

CFCF-TV, Montreal, Canada our first International client

 WOOD AM/FM, Grand Rapids, Michigan-our first AM/FM

 KRDO AM/FM & TV, Colorado Springs-our first 3-way combo

BCS offers the fastest, most complete and cost efficient system in the broadcast industry. Join the others that have solved their traffic/accounting problems the BCS Way!

During the past year the broadcast industry has placed its stamp of approval on the concept of cartridge recorders. They're solving commercial and short segment programming problems in more and more stations.

IVC felt that an even more effective system could be developed and sold at substantially lower cost. So we asked broadcasters what they'd like in an automated cartridge system. Then we went to work to satisfy their needs.

First we designed a brand new broadcast tape transport that uses IVC one-inch tape cartridges. The decks are integrated into a cabinet of six, and along with broadcast electronics are married to a uniquely simple automatic programmer. A separate bank of six decks can also be used with the same programmer and broadcast electronics—making 12 in all.

The result is a dramatic new entry in

the field that is totally practical and affordable. It is the BCR-200.

You can sequentially or randomly program up to 12 events. Any event can run from ten seconds to one hour. Which means the BCR-200 is not only a spot player but is also the world's first automated television broadcast record and playback system.

Only two steps are needed to program any deck in any sequence. Any deck can be pre-set to rewind and eject its cartridge after playing, or roll forward and cue up the next program section on the tape, or rewind and cue again.

Each six-deck system has record capability permitting network delay recording even while playing back spots or full-length programming.

But that's only half the story. Operation of the BCR-200 is simplicity itself and we've built some other features into our "cart" that we think will make broadcasters pleased with what they see. Cost? Our 12-deck BCR-200 is

priced one-third less than the least expensive "cart" now available, while our 6-deck "cart" costs almost two-thirds less.

Also consider IVC's 2000-hour guaranteed minimum head life. Plus video heads that cost two-thirds less than quad heads (not to mention the fact that head wear is spread out over 6 to 12 transports instead of two). Head cost advantages become so great that comparisons are virtually meaningless.

Check the IVC exhibit at NAB. We're the company that's doing things for the broadcaster that are innovative and make good economic sense.

International Video Corporation, 990 Almanor Avenue, Sunnyvale, California 94086, Telephone (408) 738-3900.

IVC WILL ADD A NEW LEVEL OF VERSATILITY TO AUTOMATED TELEVISION BROADCASTING AT NAB:

MEET THE BCR-200

Juan Diaz is a criminal. His crime is that he wants to live in America.

Juan is an illegal alien.

One of an estimated 75,000 Spanish-Americans living in the Washington area.

They come here on student or tourist visas. And they stay, looking for what they can't find at home. Jobs. Jobs which their visas forbid them to have. And they end up living a life that's hardly better than the one they left behind.

To keep from being discovered

by immigration authorities, they have to hide by day. At night they work at menial jobs. For less than minimum wage. And for bosses who keep them under thumb by threatening to turn them in.

WMAL stations thought this was more criminal than Juan's crime itself. And in an editorial series, we did something about it.

First we brought the situation into the open, so people would realize how these Spanish-Americans were living.

Then we called for tighter enforcement of immigration laws. We also called for a crack down

Washington Star Station Group WMAL AM, FM, TV

on illegal hiring practices, so people couldn't be exploited.

And finally, we asked for amnesty for the illegal aliens who are already in this country.

We've done editorial series on other things too. Drugs. The District schools. Gun control. Criminal justice. And Woman's Lib. Because we believe these subjects should also be brought out into the daylight.

Just like Juan Diaz.

who voted. As repeatedly announced, the vote was restricted to convention registrants and the ballot was designed, at FCC suggestion, to give specific information on the voter's professional background as well as his views. A straw vote is a straw vote, not a scientific treatise.

Dr. Pearce mistakenly read that 45.5% of the voters want a specific modification of the prime-time access rule to permit [off-network] reruns. It has accurately been reported to the FCC and the public that 43.7% voted to retain the rule with some modification. Of the dozens of modifications mentioned, the rerun clause was listed by 45.5% of those listing modifications—in other words, about 19% of the total delegates voting. In all divisions—top-50 markets, be-

In all divisions—top-50 markets, below-50 markets, network affiliates. independent stations, producer-distributors and miscellaneous—the sentiment clearly favored retention of the access rule in some form. Dr. Pearce, being present for the long discussion that preceded the vote, must have detected that even before the ballots were analyzed.—Allen Sternberg, president, NATPE, New York.

Setting the line-ups right

EDITOR: The special report on baseball in the Feb. 26 issue is, as usual, quite complete and useful. I would like to correct the portion where it says the Minnesota Twins radio network will be established by North Star Productions. This name is no longer used by our company, which is now known as RWC.

Also, it says the Mutual network holds radio broadcasting rights to the National League playoffs and is negotiating for similar American League rights and Game of the Week radio rights. RWC owns the National League playoff rights (and has since 1971). RWC is also handling the negotiation for other baseball rights mentioned. We used MBS to distribute the NL playoffs in 1972 and expect to work with them on future baseball too.—Robert N. Wold, RWC, Los Angeles.

Miller memorabilia?

EDITOR: I would appreciate any information BROADCASTING readers could send me regarding the extensive broadcasting activities of the late bandleader, Glenn Miller.

Between December 1939 and September 1942 he broadcast a highly successful commercial program over CBS three times a week for Chesterfield. Between 1937 and 1942 he also had numerous sustaining broadcasts over the CBS, NBC and Mutual networks, including his privately financed *Sunset Serenade* programs for the armed forces. During 1943 and 1944, Captain Glenn Miller and the Army Air Forces Training Command Band broadcast regularly over the CBS, NBC and Yankee networks.

I am particularly interested in acquiring promotional material, photographs and program tapes or transcriptions, plus personal anecdotes and information regarding local appearances of the Miller band.—Alan F. Timpson, 7 Pearl Street, Summit, N.J. 07901.

The Colonel's quote...

"Government is an institution, and so is the press. Our founding fathers wisely foresaw that these two institutions would, in most cases, be adversaries and seldom, if ever, allies.

"It is the responsibility of government to govern. It is the responsibility of the press to report how government is functioning. Both must ultimately account to the public. When your industry is encroached upon by government, the public suffers."

The Hon, Fred Rooney U.S. House of Representatives before the Pennsylvania Broadcasters Association as recorded in the Congressional Record by the Hon, Lionel Van Deerlin 1972.

Monday Memo

A broadcast-advertising commentary from John F. Ball, vice president, J. Walter Thompson, New York

The advertising agency and innovative programs

TV copycats have nine lives—you know that. You are reminded of it each time you flip the channel changer on your set, seeking something new and different to entertain or interest you.

Each new television season, the prime producers of TV programing ladle up so much of the same old stuff, with minor theme or character delineations making what they will point to as the exciting difference. Doctors, lawyers, sheriffs, insurance investigators, madcap comediennes seem, through the years, to provide the staple base of network programing. The high cost of television programs has driven the responsible advertiser from attempting to save the situation by bringing quality series programing to the networks. Happily, but only occasionally, the networks will try a new concept or idea that works and we're all the beneficiaries.

For example, last season's All In The Family (CBS) took network courage. So did Sanford & Son (NBC). They're both big hits. This year The Waltons (CBS) was a distinguished long shot that is paying off. Anna and The King (CBS), a wonderful show, didn't make it. But it was a bold try.

The point is that there are just too few attempts being made to bring difference as well as excellence to television. Everybody is scared of being wrong, and that's no good.

Television specials provide the big hope for improved quality of TV fare. It is this arena where the advertiser can step in and help while, at the same time, looking different. It's like buying a 40line ad on the classified page. You provoke attention.

The J. Walter Thompson Co. has always believed in the importance of program environment to the commercial message. The rub-off achieved by exciting, different and mind-challenging programing, while indeed difficult to chart, is clearly there, and of inestimable value as impressive support to the advertiser's commercial impact.

But the jackpot question is: How do you find this exciting, different and intellectually stimulating programing? At the risk of oversimplification, I submit that there are three overriding musts:

1. Advertising-agency dedication.

Worldwide program development.
 Careful preparation—and then learn to live with the risk of error.

Most agencies divested themselves of involvement in programing years ago. They elected, instead, to simply buy off the network shelves. JWT has remained where it feels it belongs—right in the

John F. Ball began his career in broadcasting in the CBS mailroom in 1954. As a member of the CBS program department, Mr. Ball heid several key production assignments prior to being made head of CBS special programs in 1958. He joined J. Walter Thompson Co. in 1959 as assistant to Dan Seymour, who was then head of the radio-television department and is now chairman and chief executive officer. For the next five years he was manager of program development. He was appointed vice president and director of programing for the agency in 1968.

midst of the program mainstream.

While it's expensive to have major program facilities both in New York and Hollywood, I believe JWT's resolve has given our advertisers and their commercial messages a very real edge. You know it's working when, on commuter trains and in carpools, you hear people saying things like: "Did you see Kraft last night?" or "Did you see that AGA show from Nashville?" or even, "I hear Eastman Kodak has bought all of Man Without a Country this spring."

Program development is a year-round job. It has also become a worldwide job. JWT is determined to continue to bring to its clients the best possible quality programing available anywhere in the world. The United Kingdom is a great new source. Last season we drew two quality wildlife programs from Africa. There are exciting projects currently being developed in Germany and Russia. Italy is fast learning the needs of the U.S. market.

Careful preparation—and learning to live with the risk of error. This is critical. We must not be afraid. Most people working with television seem to be afraid and, more often than not, their fear and caution result in uninspired, uninteresting, uncertain programing.

Kraft wasn't afraid to sponsor a onehour special last season about a single tree (Secrets of the African Boabab). AGA clearly wasn't playing it safe in presenting an environmental special about a dung-infested spring (Mysterious Spring: Africa's Mzima).

These shows were different, and their success was not a sure thing. But the payoff in each case was great audience support and critical acclaim. Liza Minnelli has never had her own TV show and so her one-woman hour special (*Liza With a 'Z'*) was, I suppose, an educated risk. But it had great appeal and style, caused morning-after talk and is currently nominated for an Emmy.

JWT worked out a deal bringing Marlene Dietrich to television for the first time (Marlene Dietrich: I Wish You Love on Jan. 13). Prior to the show. there were those who questioned the appeal of this special to today's audience. But Kraft had confidence in the great quality and fascination inherent in this special presentation. To this advertiser, the presentation of this enormously talented entertainment legend was special and, whether or not it achieved the proper efficiencies that tend to govern this extremely cost-conscious medium. Kraft knew that it would be guilty of nothing more than a continuing attempt to provide television audiences with innovative, superior programing. And that's nothing for an advertiser to be afraid of.

Special programing, while providing television with exciting break-through opportunities, has to conform to the very same budget exigencies as any other form of broadcast programing. Regardless of the excitement a production team may have over the particular opportunity, it must be constantly challenged by the up-front budget. This is part of the job.

JWT was involved in a total of 27 specials last season. (There will be even more next season.) Of these, 19 were brought to the networks following development at the agency. Networks no longer inventory many special programs. This has led producers, writers and packagers of special projects to attempt to seek the proper advertiser before considering a network.

I sincerely believe that we review 99% of all pre-emptive programs before the networks are aware of them. This is indeed an edge that we are able to pass on to our clients. I can think of only one other agency that is as committed to program importance (especially in the expanding electronic future) as is JWT. Almost everybody seems to be content to buy whatever the networks offer, settling for nothing more.

I invite other agencies to re-examine their role in upgrading television. The challenge is there. Agency involvement, however, is essential.

The real struggle begins over renewal legislation

A no-nonsense Torbert Macdonald begins House hearings on broadcasters' topic number one as White House bill is introduced; FCC meanwhile moves to adopt its own answers to renewal tangle

The House Subcommittee on Communications and Power, under the firm hand of its chairman, Torbert H. Macdonald (D-Mass.), last week began a series of hearings on license-renewal procedures, which broadcasters have long contended are in critical need of reform if the industry is to continue to be economically viable.

The Macdonald hearing was only one of a series of happenings last week in Washington that saw concrete steps taken to resolve the problem. The Nixon administration finally sent its license-renewal bill to Capitol Hill with only slight alterations to the form first proposed in December (see page 40). And the FCC last week was on the verge of adopting its rules that would streamline its licenserenewal procedures and cope with the problem of an ever-increasing number of challenges (see page 35).

To open the hearing last week, Mr. Macdonald said that the principal problem in overhauling the license-renewal process is "fixing precise legal standards for judging broadcast service. . . . A workable definition of serving the public interest, convenience and necessity remains elusive. Every broadcaster claims he does just that, and every challenger and petitioner claims the opposite." But, warned Mr. Macdonald, if it is found that the FCC's present renewal system is still the best available, "then we should resist the temptation to dismantle it."

During the hearing Mr. Macdonald stated that he has not made up his mind on renewal legislation and will not do so until the hearings are concluded.

Lead-off witnesses were Representatives James Broyhill (R-N.C.) and Fred Rooney (D-Pa.), who two weeks ago reintroduced, with 74 co-sponsors, renewal legislation supported by the National Association of Broadcasters (BROADCASTING, March 12).

The bill, identical to a host of measures offered in the House, would extend the present three-year renewal term to five years. It also provides that, in a hearing, the incumbent licensee will be granted renewal upon showing "its broadcast service during the preceding license period has reflected a good-faith effort to serve the needs and interests of its area . . . and if it has not demonstrated a callous disregard for law or the commission's regulations. . . ."

From the outset Mr. Macdonald wanted to know how "good-faith effort" and "callous disregard" are defined. Mr. Broyhill said a sincere effort to serve community needs was "good-faith effort"; Mr. Rooney defined callous disregard as a situation where an applicant has paid no attention to FCC rules. But it was obvious those definitions were not precise enough for Mr. Macdonald.

FCC Chairman Dean Burch told the subcommittee that the commission believes "that there is no need to tinker" with the present statutory standard or processes in the noncomparative-renewal area. "The public-interest standard is as good a statutory guideline as is feasible in this field. We therefore do not support pending bills which would substitute in the hearing process a new standard such as 'good-faith effort' to ascertain or meet the area's needs and interests." He agreed with Mr. Macdonald that the term is unclear. And, he added, similar objections can be raised to the "callous disregard" language.

It is the comparative-renewal area that needs attention, said Mr. Burch.

"A rational comparative-renewal policy must reflect an appropriate balance between maintaining a competitive spur and insuring stability in broadcast operations —both essential elements of the public interest," said Mr. Burch. He cited four conclusions that can be drawn from those principles:

The renewal applicant in a comparative proceeding should be judged on his record.

• The "applicant's record should not have to be outstanding . . . to warrant renewal."

• The "applicant's record should not be judged against or required to be superior to some industry average."

• The "applicant's past record must be controlling."

What is needed, said Chairman Burch, is "clarifying legislation" in the comparative-renewal area. He said that legislation should be modeled after the commission's 1970 comparative policy statement on renewals (which the District of Columbia Court of Appeals ruled in May 1971 was contrary to the Communications Act). Mr. Burch offered the following draft bill: "In any comparative hearing for the frequency or channel of an applicant for renewal of a broadcast license, the applicant for renewal shall be awarded the grant if such applicant shows that its program service during the preceding license term has substantially, rather than minimally, met the needs and interests of its service area, and the operation of the station has not otherwise been characterized by serious deficiencies."

At one point, Mr. Burch referred to the June 1971 Citizens Communications

Torbert Macdonald (r) with aide Richard Krolik

Strategy session. NAB President Vincent T. Wasilewski (seated) with key aides at last Thursday's House Communications Subcommittee hearing. L to r: executive vice presidents Grover C. Cobb and James Hulbert, general counsel John Summers.

Center case, which held invalid the FCC's 1970 policy statement. "If [that] case becomes the law of the land," he warned, "then in my opinion the renewal system is up for grabs."

Chairman Burch also said the commission endorses five-year renewal terms (although he noted parenthetically that Commissioners Nicholas Johnson and Ben Hooks disagree and Commissioner H. Rex Lee questions the advisability of a five-year renewal term simply to ease administrative burdens).

Mr. Burch said that a five-year term would reduce the number of renewal applications processed from 2,700 to 1,600 a year, thereby facilitating a more thorough review of each application filed.

Mr. Burch dealt in some detail with the wHDH case, expressing the opinion that the commission's January 1969 decision to award the license to a competing applicant was an "egregious error" that "engendered a spate of competing applications to regular renewal applicants" and "struck a devastating blow to the important concept of stability."

"I'm disappointed you spent so much time on the WHDH case," said Mr. Macdonald after Chairman Burch read his prepared text. Indicating that he did not think that case was a typical one, Mr. Macdonald said if he were a broadcaster he would "look with greater alarm to the stations in Florida" (Post-Newsweek's wLPG-Tv Miami and wJxT[Tv] Jacksonville)—stations which he said had served the public interest but nevertheless have had their licenses challenged.

Mr. Macdonald expressed the opinion several times that guidelines should be established to enable the FCC's renewal branch to more accurately determine whether stations are serving their communities, and to let stations know what is expected of them.

"I must say I'm terribly wary of a government-imposed insurance policy that everyone has to meet," said Chairman Burch at one point. He noted that any such standard would provide "only numbers. We are after good quality."

When questioned by subcommittee member Clarence Brown (R-Ohio), Mr. Burch had some criticism of the administration's license-renewal bill, which was introduced last week (see page 40). He took issue with the fact that the bill makes no distinction between procedures involving denial petitions and those regarding competing applications, stressing again that it is the comparative process that needs revision. He also indicated that the measure would restrict the commission's freedom to hold comparative-renewal hearings.

Since the administration's renewal bill was introduced last Tuesday (March 13), the day before Chairman Burch testified, Mr. Macdonald said he would invite the FCC back to respond in more detail to that bill.

Indicating the urgency of renewal legislation, Mr. Burch told the subcommittee that if Congress takes no action on renewal legislation it will be incumbent upon the FCC to set guidelines for licensees. He said the commission would be "reluctant" to formulate those criteria. "We'd almost have to spell out percentages [of required programing]," he said, "and I personally think it doesn't solve anything."

In his testimony, FCC Commissioner Nicholas Johnson characterized the administration's renewal bill as "the Nixon lullaby—rocking the American people to sleep by silencing the nation's investigative journalists...."

He accused the commission of "rubber stamping license renewals." He called the legislative proposal outlined by Chairman Burch "a very slippery standard" whose "application will depend on how the commission defines and applies 'substantial and 'serious deficiencies.'" He said the FCC's policy in regard to competing applications is to renew the incumbent's license "unless his behavior is so bad that we would be forced to take away the license even if there were no competing application... In short, nothing is happening at the FCC to lend any credence to the charge that the broadcast industry is headed for some sort of a chaotic collapse."

He charged that "the purpose of this legislation is to hurt community groups." Mr. Johnson suggested that if the com-

Mr. Johnson suggested that if the commission wanted to aid small broadcasters in the renewal process, it could do so by linking a station's profits or gross revenues to its performance.

Most of the bills pending before Congress are, he said, "completely racist in application" because they exclude minority groups from applying for stations. "If I were a legislator who voted for one of these pieces of special-interest legislation," he said, "I think I know what kinds of questions my constituents and political opponents would ask. Why did you introduce and vote for the legislation? How does it help the *public*? . . . How much money did broadcasters contribute to your campaign? How much free time did broadcasters give you so you could get re-elected?"

"I reject out of hand your insinuation that renewal-bill sponsors are voting for private interests and against their constituents," Mr. Macdonald told Commissioner Johnson. "Just because someone doesn't agree with you doesn't mean you have to impugn their motives."

Subcommittee member Fred Rooney was more vehement. "You have come here to intimidate 190 members of this body," he said hotly. He said he resented Mr. Johnson's implication that congressmen are pawns of broadcasters.

Both Congressmen Macdonald and Barry Goldwater Jr. (R-Calif.) criticized Mr. Johnson for failing to address himself to the problem. Mr. Johnson, however, made it clear that he did have two principal recommendations: Having the FCC take a stronger role at renewal time through minimum or comparative standards, or-preferably-giving local community groups more opportunity to negotiate with broadcasters. He did not elaborate on those suggestions, however. The problem, he said, is that broadcasters do not want either of those alternatives.

"Congressional resolution of the [renewal] problem is necessary because of the chaotic situation in the broadcasting industry which has grown out of certain decisions of the FCC and the courts," contended NAB President Vincent Wasilewski in his testimony. "We submit that the establishment of renewal hearing standards is a matter for determination by Congress—not the judiciary." Under the rationale of the WHDH de-

Under the rationale of the WHDH decision, he said, business groups have filed competing applications (which, he noted, are automatically set for hearing) "carefully tailored so as to be preferred on all or most of the comparative criteria" and "complete with glowing paper program proposals." About 50 such applications have been filed in recent years, he said, and "the number will skyrocket if Con-
gress does not resolve the present irregularities."

Another device now being used to undermine broadcasting's stability, he said, is the petition to deny, usually filed by citizen groups and activist groups. About 200 of these have been filed thus far, he said, and "most have raised broad unspecified charges in the hopes of exacting concessions from the licensee; some have been frivolous." While few of these petitions reach the hearing stage, said Mr. Wasilewski, "it is important that the law be amended to make it clear that the issues which might be designated for hearing . . . are confined to matters relative to the licensee's service to his community and his compliance with law and the commission's regulations."

Noting that NAB's proposed legislation would neither guarantee licenses in perpetuity, preclude competing applications or denial petitions nor free broadcasters from government regulations, Mr. Wasilewski said the measure "will provide a reasonable balance between stability, without which the industry cannot function, and the need of the public and the broadcaster to maintain an open twoway channel of communication so that the station remains responsive to public needs."

During the question-and-answer period that followed, Mr. Wasilewski sided with Mr. Burch in his belief that programperformance guidelines would not insure program quality. But he indicated his support for Mr. Macdonald's opinion on the ascertainment-of-community-needs process. Mr. Macdonald called the procedure a "drag on the people involved and the broadcasters. I think that's one thing we ought to just throw out."

In answer to a question from Mr. Rooney, Mr. Wasilewski said he thought NAB could support the administration's renewal measure, provided no additional language—such as that contained in Office of Telecommunications Policy Director Clay Whitehead's Indianapolis speech—is appended to it.

Richard Stakes, executive vice president of the Washington Star Station Group, urged the subcommittee to consider a five-year renewal term and a requirement, contained in the administration's renewal bill, that a competing applicant must demonstrate that an incumbent has not performed in the public interest before the competing application can be considered in a comparative hearing.

He said it cost the station group \$400,-000 to defend its license in 1969; \$200,-000 to prepare its renewal application last July, and could cost another \$400,-000 to defend it if it is challenged again.

The fact that the Washington Star Station Group is affiliated with the Washington Star prompted Representative Lionel Van Deerlin (D-Calif.), himself a former newsman, to comment that "there is a positive value in having a newspaper affiliated with a station. I am prepared to insert in any [renewal] legislation a provision to remove this blight —requiring separation of newspapers and stations."

New renewal form emphasizes closer community dialogue

Among requirements: continuing spots explaining station's obligations; annual report to FCC on steps taken to cope with local problems; yearly breakdown of programing

Two years after it issued a notice of proposed rulemaking in the matter, the FCC is on the verge of adopting rules drastically revising its license-renewal procedures ("Closed Circuit," March 12). The object is to bring some order out of the chaos into which those procedures have fallen, and to slow if not reverse the rising tide of petitions filed by dissatisfied minorities. But for the broadcasters, particularly in television, that means government-directed involvement with their communities—and a greater role for the communities in the licenserenewal process.

The need to remain "conversant" with the needs and interests of the community and to meet them, and to maintain "a continuing dialogue" with community representatives—these are the themes that run through a draft report and order circulating within the commission. In effect, the commission is telling its licensees: Settle your problems with your communities before they erupt into petitions to deny at license-renewal time. At the same time the commission will make sure that the citizen groups have the ininformation they need to keep a close check on their local stations' service. For instance:

Radio and television stations would be required to broadcast announcements every 15 days throughout their license period reciting their public-service obligations and inviting comments and sug-gestions. During the five months preceding the deadline for filing petitions to deny and competing applications, the announcements would note that the renewal application is to be-or has been-filed, that the public may inspect a copy and submit comments on the station's performance to the FCC. One change sure to be welcomed, however, is the proposed deletion of the present requirement that notice of the renewal application be published in the local newspaper.

Television broadcasters would compile annually a list of their communities' most significant needs, and of the programs they carried to meet them, in the preceding 12-month period. (Still to be determined is whether a listing of all responsive programs would be required, or only illustrative ones, and whether issues should be limited to those strictly local or whether national issues having local impact should be considered.) The list would be retained in the station's public file-and in their 15-day announcements, broadcasters would invite members of the public to inspect the lists and comment on them. (Stations would forward their annual lists to the commission every three years, along with their renewal applications.)

■ Television licensees, in addition, would be required to file annually with the commission one-page reports on the amount of time—both in minutes and percentages of total broadcast time that they devoted to news, public affairs and "other" programing (exclusive of entertainment and sports) during the preceding year. The information would be required on a composite week basis, both in terms of 6 a.m.-to-12 midnight and 6 p.m.-to-11 p.m. programing. The reports would also be broken down between "all programs" and "local programs" only. The date for the annual filing has not yet been decided.

• Television licensees would be asked to retain on file for three years written comments and suggestions regarding the operation of their stations. The commission is still divided on whether the same obligation should be imposed on radio licensees and, if so, whether it should be limited to those in major markets.

Television as well as radio licensees would continue to be required to ascertain community needs in accordance with the guidelines laid down in the primer the commission adopted two years ago. Television licensees would not be required to report on the details of their ascertainment process to the commission; instead they would be asked to certify in their renewal applications that they have followed the commission's guidelines in conducting their surveys, and to place in their local files, for public inspection, all material relevant to the surveys. (Thus, the commission, in effect, is acknowledging what has long been suspected-that the staff rarely examine an ascertainment survey unless a challenge is filed against a renewal applicant.)

• Radio and television licensees would file renewal applications four months in advance of the date on which licenses are to be renewed instead of three, as at present, while the cutoff for filing petitions to deny or competing applications would remain one month prior to the renewal date. In providing citizen groups additional time to examine applications, the draft order says, the commission will not extend the deadline for filing petitions to deny unless both sides request an extension and declare negotiations to settle their differences are under way.

The first group of licensees to which the new filing dates will apply will receive eight months advance notice.

The commission will also adopt a new program reporting form—section IV-B —that television licensees will complete in filling out their license-renewal applications. But principally because of the data being requested annually, the new form will be comparatively streamlined —running about half the length of the present one, which contains 28 questions. However, the new Section IV-B and the annual reporting form must clear the Office of Management and Budget before they can be finally adopted by the commission and issued.

Commission officials say the new rules would be compatible with the dozens of license-renewal bills now pending in Congress—except for the administration's bill. That measure's prohibition against the commission considering any predetermined criteria regarding programing in connection with renewal applications would clash with the commission's requests for annual reports on news, public-affairs and "other" programing. However, commission officials also say the requirements for annual reports on programing and on what the stations are doing to meet community problems could be used to support proposals in the various bills, including the administration's, to extend the license period from three to five years.

The commission was scheduled to adopt the package of new license-renewal rules last week. However, the press of other matters, including the need to prepare for Chairman Dean Burch's appearance before the House Communications Subcommittee, in its license-renewal hearing, on Wednesday (see page 33) forced the commission to postpone action. The commission is not expected to return to the subject until after the National Association of Broadcasters convention next week.

Commission officials predict a lopsided if not unanimous vote for the package, although it arouses some feelings of uneasiness within the agency; some officials think the new rules could cause licensees more trouble and result in more petitions to deny than is the case today. It would be impossible to satisfy all the diverse groups in some communities, one official noted, and "the information to be provided will be fodder for petitions to deny."

In mapping out the revisions in its license-renewal procedures, the commission, in its draft order, notes with concern the continuous rise in the number of petitions to deny filed by citizen groups (some 100 renewals were on the deferred list because of such petitions two years ago: the number is now up to about 140). And it is apparent that the commission's processes cannot handle the load.

In explaining the decision to require the 15-day announcements, the draft order says: "The most common complaint raised in recent petitions to deny relates to an alleged failure of the licensee to adequately respond to the problems and needs of at least a significant segment of his service area. In most cases, the specific points raised in these filings were not communicated to the licensee during the first two-and-one-half years of the license period and little or no dialogue occurred between petitioner and licensee prior to the filing of the renewal application."

The requirement that television broadcasters file annual reports on significant local problems and the programing they have provided to meet them is designed, the draft order says, to establish a "continuous dialogue between licensees and members of the public concerning what New Orleans joins the club. Citizens United for Responsive Broadcasting (CURB), a coalition of groups and individuals in New Orleans, has announced plans to begin talks with WDSU-TV, WVUE-TV and WWL-TV there, whose licenses expire on June 1. CURB said its aim will be to "insure more equitable employment for women and minorities and more relevant public-service programing based on the real needs of the local community."

both consider to be the major problems and needs of the community . . . so that any dissatisfaction with a licensee's conception of community problems and needs or his efforts to meet them would be immediately communicated to the licensee." The aim, the draft order adds, is to provide a local mechanism for resolving "such dissatisfaction as it arises, and eliminating the need for the filing of a petition to deny license renewal."

Similarly, the reason for requiring stations to retain on file communications from the public is grounded in the desire to promote a community involvement in the renewal process. Such a file would permit an interested individual "to better determine the nature of community feed back being received by the licensee and to have a better indication of the extent to which his opinions . . . might be shared by other members of the public."

And in requiring licensees to file their renewal applications one month earlier than at present, the commission hopes to give local groups "ample time to examine renewal applications, to discuss any problems with licensees and, if desired, to file timely petitions to deny."

Although the rules, in their present form, follow the proposals issued in February 1971, they have been modified, in some respects as a result of broadcaster complaints. Originally, for instance, the announcements inviting comments on a station's performance were to be broadcast every eight days; and where, in the original proposal, they asked for "opinions, criticisms or suggestions" and spoke of the frequency as "public property," they now ask for "suggestions or comments" and refer only to broadcasters as "public trustees."

Furthermore the commission is retreating somewhat from its announced intention to rank stations on the basis of the news, public-affairs and "other" programing they report carrying annually. This was to have provided a means for enabling the commission staff to process, under delegated authority, the renewal applications of stations above a certain level of performance and to refer to the commission for closer scrutiny those below that level. The ranking proposal was one of the major aspects of the noticed proposed rulemaking.

But while stating that the commission is "not yet ready" to adopt such ranking as a routine measure, the draft order leaves open the possibility the data submitted annually will be used for selecting some stations for closer attention than others. The draft order says the Broadcast Bureau might use the data for that purpose when "the demands of staff and resources" prevent it from "devoting all the attention it would like to devote to each renewal applicant in a given group."

The draft order stresses that the annual reports would not result in de facto annual renewals, but it says annual reports would be advantageous to members of the public (which would have more information during the license period regarding the station's performance)—and the commission (which could develop information on industry trends and data that would be applicable to specific areas of inquiry and policy).

Although the new program reporting form is shorter than the one it would replace, it indicates, in its present design, a closer interest in programing matters. It asks network affiliates to report on what network public-affairs and news programs they pre-empted and the programs they substituted. However, the Broadcast Bureau is said to have opposed inclusion of the question, contending that broadcasters should only be required to keep the information the question seeks in their public file, and not report it to the commission. The point is not yet settled.

The renewal form would also indicate the commission's newly aroused interest in children's television programing—an area the commission has been exploring in an inquiry now three years old. The form asks for a description of programs carried that were designed for children 12 years of age or under.

The commission, when it adopts the draft order, which is the work largely of Dr. Barry Cole, a consultant to the agency, will leave hanging several related issues. The most significant involves the notice of inquiry aimed at establishing guidelines for determining whether a licensee, whose renewal application is in a comparative hearing with a challenger for the frequency, merits a "plus of major significance" on the basis of his performance. The proposal, largely the work of the commission's former general counsel, Henry Geller, who is now an assistant to Chairman Dean Burch, has been shelved and appears doomed. It looks to the use of percentages of various types of programing-a concept a majority of the commission is now said to oppose, and one that would be barred by the administration's license-renewal bill.

Another related issue is a proposed notice of inquiry aimed at revising the ascertainment-of-needs process. The commission's re-regulation unit, under Commissioner Richard E. Wiley, is attempting to complete work on the project in time for issuance of the notice this week before the NAB convention. The thrust of the inquiry would be aimed at determining whether different ascertainment requirements should be imposed on radio and television stations and on outlets in large and small markets, and whether the ascertainment can be conducted in different ways.

A Mountain comes to Mutual

White House talks of localism in renewal bill

It would keep FCC from counting percentages of program types, but it mentions program budgets as one substitute criterion

The Nixon administration's license-renewal bill, somewhat tighter in structure and clearer in tone but still resembling closely the measure that was first unveiled in December (BROADCASTING, Jan. 1), was sent to Congress on Tuesday (March 13).

Its major thrust, administration spokesmen said in briefing newsmen, is to provide some stability in the industry, make broadcasters more responsive to their communities' needs and interests and exclude the government, to the greatest extent possible, from interfering in programing decisions.

"Looking at programing is a necessary evil under the Communications Act," one official of the Office of Telecommunications Policy, which drafted the bill, said. "What we're saying is that there are ways of minimizing the intrusive effect."

The official even said a station could engage in "elitist gossip" if the community did not object; the government would not interfere, under the administration's bill.

OTP director Clay T. Whitehead, in disclosing the draft bill's existence, in his Indianapolis speech in December, called on affiliates to guard against "elitist gossip" and "ideological plugola" on network news shows.

The result was to fix in many minds the idea that under the White House bill affiliates would be denied renewal of license if they did not cull such programing from the material they broadcast—assuming they could identify it. Mr. Whitehead has spent the past three months trying to explain that the bill would impose no more responsibility on broadcasters for what they broadcast than they now carry.

But concern with local needs and interests is one essential of the bill. "The basic concept of the American system of broadcasting is that of localism," Mr. Whitehead said in the letter accompanying the bill to Congress.

This is borne home by one of the two criteria on which the bill would have the commission consider a renewal applicant's performance—whether the applicant "is substantially attuned to the needs and interests of the public" and demonstrates "a good faith effort" to meet them.

The other criterion is the fairness doctrine—whether the applicant on an over-all basis through the license period has afforded reasonable opportunity for the discussion of conflicting views on issues of public importance.

The bill, which joins some 80 other license-renewal measures that are the subject of a hearing that the House Communications Subcommittee began on Wednesday (see page 33), would change present commission procedures in four ways:

ways: • The license period would be extended from three to five years.

• The right to a hearing now automatically given applicants seeking to supplant a broadcaster as a licensee would be eliminated. A would-be competitor would get a hearing only if he made a prima facie case that the incumbent had failed to meet the criteria for renewal spelled out in the bill. (However, the bill would make no changes in the commission's procedures for considering petitions to deny—a source of more concern to licensees generally than competing applications.)

• The bill would preclude the commission from restructuring the industry through the renewal process. The commission, for instance, could modify its concentration-of-control-of-media policies only through the rulemaking process.

The bill reflects some of the criticisms made of it by the FCC and other agencies when it was in draft form, but not others.

In prohibiting the commission from setting up predetermined performance standards, the bill's draftsmen ignored a commission objection to the original version. The existence of such guidelines, an explanation that went with the bill said, transforms a license from a public trust carried out by an independent licensee to "a government contract, under which the licensee performs in accordance with government specifications..."

The provision would not only prohibit the commission from adopting the kind of percentage-of-programing guidelines now under consideration by the commission as a means of determining whether a renewal applicant should be favored over a competitor; it would also prohibit the commission from asking renewal applicants to report on categories of their programing, including news and public affairs.

The paragraph dealing with the comparative-renewal hearing that would be held once a challenger has made a prima facie case that an incumbent has not met the bill's two criteria is more detailed than in the original version. If the incumbent satisfied the commission he has in fact met the criteria, the license is renewed and the competing application dismissed; otherwise, the commission will either deny the renewal application or consider it with competing applications on file "or later timely filed."

One new element that turned up in the explanation is a result of FCC and Justice Department criticism of the original bill on the ground it was preventing the commission from employing standards in reviewing program performance. The explanation, which would become part of the legislative history of the bill if it were enacted, said that the commission would use "content neutral" standards such as "programing expenditures, equipment and facilities devoted to programing, policies regarding preemption of time to present special programs and the like."

FTC's battle with drug makers intensifies

Commission and three firms fail to reach consent agreement; proposed complaints become real with corrective-ad contingencies as case goes to formal hearing

Some 11 months after the Federal Trade Commission challenged the advertising claims of the three manufacturers that account for an estimated two-thirds of the \$300-million over-the-counter painkiller market, the commission announced it wasn't able to negotiate consent agreements with Bristol-Myers Co., American Home Products Corp. and Sterling Drug Inc., and had ordered the complaints to hearing before an administrative law judge.

The formal FTC complaints of last week, which also cited the five advertising agencies that serve the drug manufacturers—Dancer-Fitzgerald-Sample Inc. and Lois Holland Callaway Inc. (for Sterling Drug), Clyne Maxon Inc. (for

Under fire. This commercial for Bristol-Myers' Bufferin would be banned under, the FCC's cease-and-desist order.

American Home Products) and Ted Bates & Co. and Young & Rubicam Inc. (for Bristol-Myers)-are similar to but not identical with the proposed complaints of 11 months ago. In a key difference, both the proposed complaints of last spring (BROADCASTING, April 24, 1972) and last week's complaints contain orders requiring the manufacturers to devote 25% of their advertising budgets for two years to corrective advertising, but the more recent of the two sets of proposed complaints has an escape clause. It would allow Bristol-Myers, American Home Products and Sterling Drug to set aside, modify or alter any part of the two-year penalty period provision if the results of a consumer survey (conducted in a form and way that is approved by the FTC) shows the objectives of the corrective advertising have been achieved.

Essentially, the FTC, in last year's and last week's complaints, charged Bristol-Myers, American Home Products and Sterling Drug and their advertising agencies with misleading advertising

We believe so firmly in the selling power of television, we're on it ourselves.

"One reason more goods are available in America today is that television tells more people about them." Frame from Blair's new television campaign.

We know television. We know its influence, its selling power, and its costs . . . intimately.

That's why we'll be seen on the air wherever big ad dollars originate, lending our support to this ever-expanding medium.

We can help an advertiser more than any other station rep can. In a few hours, we can provide the amount of spot audience and budgeting data that might normally take days or weeks to prepare.

We can provide reach and frequency analyses of advertisers' spot and network schedules on a market-by-market basis, and a post analysis, to inform them of how close they've come to their audience goals.

We have a staff whose sole assignment is the development of new spot business. We call on advertisers and agency planners across the country, and we succeed daily in channeling bigger shares of budget allocations to spot TV. In short, we compete, effectively, with the major networks for advertising dollars.

We're in business to expand the business of our represented stations. Our success is their success.

We know how to make an ad budget really pay off by making a big splash with spot. See your Blair representative and let him tell you more about the medium we know more about than anyone.

The medium we're using ourselves.

(mostly claims made in television announcements). The commission generally contended that some of the claims have not been validated. The FTC complaints argue, among other citations, that it is unfair for a company to advertise a product, directly or by implication, as superior to others when there is no reasonable basis for making such a claim or any competent and reliable evidence to support it. The complaints order the drug manufacturers to cease and desist the alleged misrepresentations.

Reactions from two of the drug manufacturers were swift in coming and aggressive. Bristol-Myers pointed out that the FTC complaint didn't question the company's research and scientific evidence that support the "superior analgesic" claims for Bufferin, Excedrin and Excedrin P.M. "The commission only states that there is some scientific controversy concerning these claims," Bristol-Myers said, going on to note that "in virtually no area of science is it possible to have unanimity of opinion among experts in the field." The company, showing why a consent agreement was not reached, added: "We feel that our research data will stand up under examination."

Sterling Drug, maker of Bayer Aspirin, Bayer Children's Aspirin, Cope, Vanquish and Midol, also is going to fight the FTC's charges. In a formal statement, the company said it considers its advertising "truthful and accurate" and declared that it "will defend [itself] vigorously at the hearings."

American Home Products, maker of Anacin and Arthritis Pain Formula, had no immediate comment, with the company's Whitehall Laboratories division explaining that it was "presently reviewing the records."

The FTC's case against the drug manufacturers now is headed for a hearing before one of the commission's administrative law judges. Any decision that's forthcoming is subject to confirmation by the full five-member commission. Subsequently the case could be appealed to a federal court.

Volvo stops for FTC

The Federal Trade Commission last week announced that it has "provisionally accepted" a consent order that would specifically stop Volvo of America Corp., Rockleigh, N.J., from making economy claims for its automobiles through advertisements unless the car manufacturer "has a reasonable basis for such claims." According to FTC allegations, Volvo advertisements, some in the broadcast media, "misrepresented" that Volvo has a "reasonable basis" for claims that its cars were substantially more economical to own and operate than competing models. The consent order-which does not constitute an admission by Volvo that it has violated the law-requires that the car maker keep records of the documentation that support economy claims for a threeyear period after the last of such claims is made.

Cereal executives defend products and TV advertising

They show Senate unit messages that teach importance of nutrition, and they deny their commercials are overselling sugar to the young

Representatives of two cereal manufacturers appeared on Capitol Hill last week to refute testimony, given two weeks ago, that their products promote tooth decay and are nutritionally poor and that their advertising fails to teach children good dietary habits (BROADCASTING, March 12).

Spokesmen for Kellogg Co. at the hearing of Senator George McGovern's (D-S.D.) Select Committee on Nutrition and Human Needs were William E. LaMothe, executive vice president; Howard M. List, senior vice president-advertising, and Dr. Gary E. Costley, director of nutrition. Much of their testimony dealt with Kellogg's advertising, described by Mr. La-Mothe as "honest and tasteful advertising with messages that convey the inherent food value of [Kellogg's] products in a way that is informative and interesting."

And, according to Dr. Costley, Kellogg's cereals provide substantial amounts of nutrients, especially when used with milk, which he said is the case 94% of the time. He also contended that there is no correlation between tooth decay and consumption of presweetened cereal. And he added: "If one were to take literally the charge that TV advertising is preconditioning children to consume larger quantities of sugar, it is reasonable to expect that as TV advertising of foods has increased, a corresponding increase in sugar consumption would be noted; this has not occurred." According to the U.S. Department of Agriculture, he said, sugar consumption has remained static for the past 20 years.

Mr. List outlined the steps Kellogg is

taking in nutrition education through its television advertising. He told the committee that Kellogg recognizes its responsibility to present "products to children in a very realistic and forthright way." Kellogg ads, he said, comply with the provisions of the children's code of the National Association of Broadcasters; the code boards of the networks, codes of the Association of National Advertisers and the voluntary self-regulation of the National Advertising Review Board and the Council of Better Business Burcaus.

In addition, he said, Kellogg's procedure requires that advertising be approved by its nutrition scientists and legal authorities.

Part of Kellogg's presentation was a showing of six typical 30-second cereal commercials that have run in children's programing. Also shown were two new 60-second commercials in Kellogg's "Good Breakfast Campaign," inaugurated last January on national television and aimed primarily at children.

The spots, according to Mr. List, are designed to educate children about the need for a complete breakfast. They show a variety of breakfast foods—including cereal—and mention Kellogg only in a closing credit line: "This good breakfast message presented by Kellogg's." And: "Presented in the interest of good nutrition by Kellogg's."

In outlining Kellogg's broadcast plan, Mr. List said the spots will run on all three TV networks, will be scheduled for every week for the balance of the year, and will appear at least once on every Saturday-morning network children's program. To reach pre-school children, he said, the spots will run in shows such as *Captain Kangaroo*; to reach parents, in such programs as *Today*.

Representing Betty Crocker Kitchens of General Mills was Vice President-Director Mercedes Bates. Miss Bates also contended that presweetened cereals play a role in providing nutrition, and do not cause cavities.

A substantial part of General Mills' nutrition education campaign is addressed

How it works. Senator Hubert H. Humphrey (D-Minn.) last Monday (March 12) discusses Kellogg's TV nutritional campaign with company executives (second I-r) Dr. Gary E. Costely, director of nutrition; Howard M. List, senior vice president-advertising, William E. LaMothe, executive vice president and chief operating officer.

The Gates TE-201...

A 40 lb. color camera that's uncomplicated and economical.

The Gates TE-201 is a unique combination of long-term operational stability, superior low light level lag performance, and complete broadcast quality in a small, lightweight color camera that can be used in a wide variety of broadcast applications. The TE-201 features unsurpassed signal-to-noise ratio. A unique AGC system between preamplifiers and processor that maintains highly stable color balance. A single knob, three position sensitivity switch that provides low-light operation without loss of color balance. Easy set-up. 10 to 1 zoom. Virtually all controls are remotely located from the camera head. And the combined weight of the camera head and detachable viewfinder is only 40 lbs.!

Jim Lightfoot. His spirit is 36 years old today.

to parents and uses cereal packages as its communications medium, she said, but the company's adult-oriented TV commercials also carry the nutrition message, stressing the importance of a good breakfast and the part that cereals play in that meal. After showing some sample TV spots, Miss Bates presented a twominute cartoon program featuring Gen-eral Mills' character, Tennessee Tuxedo. The show has been on the air for the past 10 years, she said, and is currently being offered in 33 markets. The film, also stressing the importance of a balanced nutrition, carries no General Mills identification tag.

One of the committee members, Senator Hubert Humphrey (D-Minn.), indicated that he thought food companies are falling short in their use of TV advertising for nutrition education.

Pointing out that TV is the best way to reach the nation's illiterate population, the senator said several times that food companies should pool a percentage of their television ads for nutrition education.

Senator McGovern said last week that his committee will hold additional hearings for witnesses representing other members of the food industry and their agencies, representatives of the broadcast industry and spokesmen for government agencies involved in regulating nutrition advertising.

"I expect at the end of this investigation we will have a complete and thorough view of the scope and quality of nutrition advertising being directed at the American people and the degree to which that advertising is helpful or harmful to their health," Senator McGovern said.

Bates will have to share C-P

Colgate-Palmolive, New York, will decentralize its network broadcast-buying unit, effective this fall. Currently concentrated at Ted Bates & Co., New York, network buying will be distributed among C-P's four agencies: Bates; D'ArcyMacManus & Masius; Norman, Craig & Kummel, and William Esty Co. (all New York).

Rod Turner, new vice president/marketing services at C-P, said: "The change was prompted by the fact we do have four agencies and they all have fine buying capabilities. We will now receive the benefit of more than one counsel-and that's a plus. And we'll be able to maintain centralized administration of our buys. It will be a flexible system.'

Broadcasters continue to boost Pastore effort to repeal Section 315

The three networks and the National Association of Broadcasters have voiced support for Senator John O. Pastore's (D-R.I.) bill to repeal Section 315 of the Communications Act for presidential and vice-presidential candidates and establish a ceiling of 25 cents per eligible voter on all spending by federal-office candidates.

ABC Chairman Leonard Goldenson, CBS Vice Chairman Frank Stanton, NBC President Julian Goodman and NAB President Vincent Wasilewski testified before Senator Pastore's Communications Subcommittee on March 9, following testimony by FCC Chairman Dean Burch and other witnesses who generally favored the bill (BROADCASTING, March 12).

The network executives and Mr. Wasilewski also told the subcommittee that since the campaign-spending law's lowestunit-charge provision singles out broadcasters for special treatment, it should be eliminated or applied to all media. Dr. Stanton repeated CBS's offer to

provide eight free prime-time hours for major presidential and vice-presidential candidates in the 1976 campaign if partial repeal of Section 315 is enacted, and Mr. Goodman said NBC will set aside four prime-time half hours on that condition. Mr. Goldenson said the ABC radio and TV networks will continue to grant 331/3 % political discounts.

Wasilewski and Dr. Stanton Mr

pointed up one other provision of the law they said discriminates against broadcasters—the so-called "reasonable-access" clause, which empowers the FCC to revoke the licenses of stations for willful or repeated failure to allow candidates reasonable access to their faciliites.

The clause "introduced an element of coercion into the dealings of some candidates with broadcast licensecs," said Dr. Stanton, and "it is highly probable that fringe candidates will make greater use of it in future campaigns."

Wiley to ad club: Beat your own drums FCC commissioner sympathizes with attacks on advertising. but echoes Burch's concern about improper selling to children

FCC Commissioner Richard E. Wiley has suggested that, at a time when broadcast advertising is under increasing attack from various elements in society, the broadcasting and advertising industries are behaving like the cobbler whose children have no shoes.

The commissioner, in an appearance before the Broadcast Advertising Club of Chicago last week, took note of the various fronts on which broadcast advertising is being attacked-there are those who say it is false and misleading, others who say it is controversial and should be made subject to the FCC's fairness doctrine and, finally, those who contend that, in connection with certain kinds of products and certain kinds of programing, it should be banned.

In view of these attacks, he said, he is struck with the "paradoxical thought" that "advertising may well be the one product which both a successful broadcasting and advertising industry have failed to promote."

"Perhaps the time has come for you to say, and to say clearly, that in fact it does pay to advertise," he said. "Indeed, perhaps the time has come when broadcast advertising simply can no longer afford to remain an unsold product.

Commissioner Wiley made it clear he regards advertising as a plus in the American economy, so long as it is honest. And he said he could see no reason for barring the advertising of any product legally sold, "except in those rare instances involving public health.'

He is also on the side of the broadcasters and advertisers on the question of sponsorship of children's programing. How else would such programs be aired? he asked. He does not put much stock in institutional advertising, underwriting or government support as viable alternatives.

But, the commissioner warned, as Chairman Dean Burch has also (BROAD-CASTING, March 5), broadcasters and advertisers must recognize a special responsibility in advertising to children. "Chil-dren," he said, "are not just 'little consumers'. . . perhaps industry should reevaluate the kind of products being advertised to children as well as the nature of the commercial messages they receive." "This is an area . . . in which if in-

dustry does not act," he said, "the government probably will be required to do so, with consequences which may be detrimental to our basic freedoms and to the fundamentals of our free enterprise system."

Business Briefs

Katz in Superdome pact. The Katz Agency, a station rep based in New York, is establishing its first nonbroadcast sales division since it discontinued newspaper representation in 1969. Katz has been selected to represent Louisiana Superdome for all advertising time and space availabilities within New Orleans stadium. James M. Fasholz was appointed to head Katz's new Superdome sales group in New York. He had been assistant to president of Montreal Expos baseball club and was responsible for developing and administering in-park sponsorship, merchandising, promotions and broadcasting. Stadium is to be completed in fall of 1974.

Lighter turn. Wells, Rich, Greene, New York, has produced four TV commercials to introduce the Bic Pen Corp.'s first nonwriting product—a \$1.49 disposable butane lighter. Commercials will begin in 10 Southwestern markets for 10 weeks in June.

IBM's number two. International Business Machines Corp., through Conahay & Lyon, New York, will sponsor its second TV special of 1973 on April 23—Universal Television's and BBC-TV's co-production, *The Adventures of Don Quixote*, on CBS-TV. It will be on 9-11 p.m. EST and will star Rex Harrison, Frank Finlay and Rosemary Leach. First IBM-sponsored special on CBS was *Much Ado About Nothing* on Feb. 2.

For ham and salami devotees. Plumrose, Springfield, N.J., to promote 50cent refund coupon for Plumrose sliced ham and/or salami, begins today (March 19) heavy spot-TV campaign on 80 stations in 32 major markets. First flight will run for six weeks. Agency is Needham, Harper & Steers, New York.

A real good friend. After 83 years on market, Bon Ami has decided to use network television for its glass cleaner and polishing cleanser. Beginning in April and running for 52 weeks, commercials will be delivered live, twice weekly, by Barbara Walters on the *Today* show and Ed McMahon on the *Tonight* show, both on NBC-TV. Parent company is Faultless Starch, Kansas City, Mo. Agency is The Bruce B. Brewer Co., Kansas City.

DKG gets newcomer. Remington Electric Shaver Division of Sperry Rand Corp., Bridgeport, Conn., has assigned undesignated new production introduction to DKG, New York. National campaign will begin this fall and will bill in excess of \$1 million. DKG handles Remington's personal care products.

French connection. R. T. French Co., Rochester, N.Y., through J. Walter Thompson, New York, will be major sponsor of animated special, *The Selfish Giant*, Wednesday, March 28 (8:30-9 p.m. NYT). Media

Taking a fling in on-air pay TV:

Two Midwesterners gamble on survey showing public interest in sports and new motion pictures

Two Milwaukee businessmen are busily engaged in the creation of what they project as a multimilion-dollar enterprise that will be almost entirely dependent on over-the-air pay TV for its financial returns. Within recent months Robert S. Block and Marvin L. Fishman have:

Acquired the licensing rights to the Teleglobe 410 Pay TV System. the third such system to receive type approval from the FCC (BROADCASTING, March 5).

Announced their intentions to apply to the commission for a construction permit to build on Milwaukee's ch. 24 a new television station that will be an STV facility.

Contracted to purchase from United Broadcasting Co. (for \$250,000) WFAN-TV (ch. 14) Washington, on which they also plan to carry on pay transmissions (BROADCASTING, Nov. 14, 1972). They plan several further acquisitions with a similar aim.

On the surface, Messrs. Block's and Fishman's activities may seem precarious. Although pay TV has been a technological reality for over two decades, no en-trepreneur has succeeded in cashing in on the medium's potential. Its only real test-by RKO General on wHCT(TV) Hartford, Conn., during the 1960's-attained disappointing results (the experiment was abandoned after several years and whet was later donated by RKO to a California religious institution). Several other firms are currently in the process of establishing new pay-TV stations on existing facilities. Noteworthy among these are Zenith Radio Corp., which pioneered Phonevision, the first pay-TV system to receive FCC approval, and Blonder-Tongue Laboratories, Old Bridge, N.J., which is the recipient of the only other FCC system authorization (see below). At present, however, there are no operating pay-TV facilities on the air.

Mr. Block, who owns a Milwaukee advertising agency, and Mr. Fishman, a real estate developer there, view the present state of the art in pay TV as both distressing and encouraging. "Over-the-air pay TV is the forgotten child," says Mr. Block, who serves as president of the three firms he and Mr. Fishman have created to administer their project. The three companies are Telease Inc., which will license other users of the Teleglobe 410 system: B&F Broadcasting, which will be the licensee of the planned Milwaukee station as well as other outlets acquired subsequently, and MSTV Inc., which will conduct the pay-TV operations on B&F stations.

"I think that the whole concept of over-the-air pay TV is a very exciting story," said Mr. Block. "It's not really fully understood. Because it's been so

long in coming there's some doubt that it will ever come. This may be the biggest mistake at all, because it has so much more potential than pay cable." In contrast, he said: "We expect pay

In contrast, he said: "We expect pay TV to have only a slight effect on the size of commercial television audiences. Pro forma projections have been made which show that over-the-air pay TV can exist quite profitably in Milwaukee, for example, even if we attain only one percent of the total TV viewing in the market. On a national basis with only one percent of the viewing. at an average charge of \$2.50 for a two-and-a-half-hour weekly program, pay TV would gross more than \$1.5 billion annually."

Mr. Block would not reveal the financial details of the Teleglobe acquisition beyond mentioning that it involved a "multimillion-dollar" consideration. Li-censing rights were acquired from Teleglobe Pay TV System Inc., the president of which is Solomon Sagall. New Yorkbased Teleglobe has retained licensing rights for San Francisco and two other cities which are yet to be determined. In general, the Teleglobe 410 system is technologically similar to the Zenith and Blonder-Tongue processes in that all three utilize an encoding process at the transmission point to scramble the signal, which is decoded by special equipment installed in the homes of participating viewers. The Teleglobe 410 system also includes a billing mechanism at the reception point. Subscribers would be charged a nominal installation and rental fee for the equipment as well as a perprogram fee.

The projected pay-TV station in Milwaukee, which Mr. Block estimates will cost \$3 million to put on the air, will initially broadcast about 60 hours per week. At least 28 of those hours (the minimum required by the FCC) would be filled with "free" programing for which commercial time would be sold. The nonsubscription programing will deal entirely with news and public affairs, Mr. Block said.

B&F Broadcasting has not yet applied to the commission for authority to purchase the United station in Washington. WFAN-TV, which has been dark for over a year, is involved in license-renewal litigation at the commission and acquisition of the facility would be contingent on the FCC granting a waiver of certain conditions placed on the station's renewal, according to B&F attorney B. Dwight Perry. The firm has made preliminary inquiries into the availability of other TV properties but has yet to make any firm commitments. The number of markets in which pay-TV operations may be conducted is limited by the commission to those in which there are already four existing conventional stations. According to Mr. Block, there are about 80 "eli-gible" pay-TV markets in the country at present.

Messrs. Block and Fishman's enthusiasm for pay TV is based in part on a survey conducted last June in Milwaukee, in which 284 persons were questioned as to their willingness to pay for certain programs not available on conventional television. Of those questioned either on

Broadcast Automation. Schafer Electronics Invented It. Schafer Electronics Developed It. Schafer Electronics Keeps Improving It.

Schafer Electronics IS Broadcast Automation

Join us at NAB booth 225 and help us celebrate our twentieth year of service to the radio broadcast industry. And if you have a few minutes we'd be delighted to demonstrate one of our newest systems for you. If you won't be at NAB, write and we'll send you information.

Schafer Electronics Corporation

75 Castilian Drive, Santa Barbara Research Park Goleta, California 93017

Schafer Electronics Ltd. 5824 Burbank Road, SE, Calgary, Alberta, Canada T2H1Z3 In Hawaii, Mexico, Puerto Rico and the Virgin Islands contact: Schafer International 1355 Harbor Drive San Diego, California 92101 For the rest of the world contact: EMI Sound & Vision Equipment Limited 252 Blythe Road, Hayes Middlesex UB3 1HW England the street or via phone. 54.2% said they would pay a \$2 fee to view, without commercials, feature films less than two years old; 64.4% said they would pay for the monthly telecast of a film older than two years, and 55.3% disclosed a willingness to pay for certain blackedout sports events.

Blonder-Tongue previews its delivery system at the NAB convention

Broadcasters who hate, fear or merely distrust pay TV, as well as any who are more favorably disposed toward it, can get a first-hand look at it in operation at next week's National Association of Broadcasters convention in Washington.

Officials of Blonder-Tongue Laboratories Inc., Old Bridge, N.J., manufacturer of TV antennas and cable-TV equipment, whose over-the-air pay-TV system was the first to get FCC approval back in July 1971, said they would present live demonstrations at the Blonder-Tongue exhibit booth in the Shoreham Hotel.

They said actual production units of the system's encoder and decoder would be used in transmitting scrambled pictures from the exhibit booth and receiving and reconstructing them at a nearby location.

Officials said last week they expect to put their system on the air early in 1974 on ch. 68 wwro(Tv) Newark, N.J., which they said would also serve the New York area. They acquired the permit for wwRO, not yet in operation, from the Walter Reade Organization, and also received FCC authority last July to use it in subscription-TV operations (BROAD-CASTING, July 31, 1972). They had told the FCC in their initial application it would take about two years from the date of commission approval to make the system operations, offering a blend of plays, variety specials, movies and sports (BROADCASTING, March 6, 1972).

Blonder-Tongue sources said last week that pricing for the system had not yet been established.

Storer to pay \$12 million for San Diego UHF

KCST, slated to join ABC in June, will give purchaser seven TV's the maximum permitted by FCC

KCST(τv) (ch. 39), the San Diego UHF that persuaded the FCC to terminate ABC-TV's long-standing affiliation with XETV(τv), a VHF in nearby Tijuana, Mexico, will be purchased by Storer Broadcasting Co., it was announced last week. The \$12-million purchase of what was a struggling independent—until the commission stepped in and cleared the way for an ABC affiliation—will enable Storer to achieve a full complement of seven TV properties—the maximum per-

New home. Pictured above is an artist's conception of the new studios of WVUE(TV) (ch. 8) New Orleans, now under construction. The structure, which is due for completion this fall, will replace the Screen Gems station's eight-yearold facilities on Cleveland Avenue. In anticipation of the project, the station acquired two adjoining buildings at 1021-25 Jefferson Davis Parkway and is now in the process of converting them into a single structure. The venture, which a station official said will cost about \$3.5 million, involves the joining of the two existing structures to form a U-shaped building and the additional construction of wings in the rear to house two production studios. The building will also be given an entirely new facade covered with glass panels. When completed, the structure will have a total of 52,000 square feet of usable space.

mitted under FCC rules. Currently, no broadcaster can make that claim.

The transaction, subject to the commission's approval as well as that of the boards of directors of the selling and buying firms, involves the acquisition by Storer of 100% of the stock of Western Telecasters Inc., the KCST licensee. Western is a wholly owned subsidiary of Bass Brothers Enterprises, a San Diego-based group broadcaster which also owns KFDA-TV Amarillo, KAUZ-TV Wichita Falls and KDNT-AM-FM Denton, all Texas; KFDW-TV Clovis, N.M.; KFDC-TV Sayre, Okla., and WSLC-AM-FM Roanoke, Va.

Miami-based Storer, a publicly owned corporation headed by George B. Storer, its board chairman, is currently the licensee of five VHF and one UHF television stations. The V's are WAGA-TV Atlanta, WJBK-TV Detroit, WITI-TV Milwaukee, wJw-Tv Cleveland, and wSPD-Tv Toledo, Ohio. The UHF is wSBK-TV (ch. 38) Boston. The FCC's multipleownership rules specify that a single entity may own no more than seven TV's of which five may be V's. Storer also owns WJW(AM) Cleveland, KGBS-AM-FM Los Angeles, wGBS(AM) Miami, and wHN-(AM) New York. It is selling WDEE(AM) Detroit to Globetrotter Communications for \$4.2 million (BROADCASTING, Dec. 18, 1972).

The commission's refusal last June to renew the special authorization which had for 16 years permitted ABC-TV to deliver its programing to the Tijuana VHF culminated several years of litigation inspired by KCST (BROADCASTING, June 5, 1972). Western put KCST on the air in 1968 but quickly found the com-petition of three network-affiliated VIIF's a virtually insurmountable obstacle in the geographically isolated San Diego market. Its objection to the ABC-XETV affiliation was based on an argument that the Mexican station's local programing was inferior and that San Diego residents would benefit more from a domestic affiliation. The commission's decision

against ABC-XETV was upheld by the U.S. Court of Appeals in Washington. Under an agreement approved by the commission two weeks ago, ABC's day-time programing will switch over from XETV to KCST on June 1 and all other programing on July 1 (BROADCASTING, March 12).

KCST operates with 724 kw visual, 144 kw aural and an antenna 1,900 feet above average terrain.

Networks, claiming AT&T overcharges, want major rebates

Beyond that, they say proposals for reductions aren't low enough

The three major television networks made it clear last week they are dissatisfied with AT&T's plans to reduce their program-transmission costs. The networks feel the cuts should be deeper; they also said they are entitled to some \$14 million in refunds annually since the present rates went into effect, in October 1969.

AT&T and Hughes Sports Network Inc. expressed views conflicting in various ways with the networks' and with each other's. The positions were expressed in proposed findings of fact and conclusions of law that were filed in the FCC's ongoing, over-all investigation of AT&T rates. A proceeding dealing with the 1969 program-transmission tariffs is a part of the inquiry.

The networks, which claim the 1969 tariff resulted in rates that caused them, as users of monthly contract services, to subsidize occasional users, contend that the evidence in the record demonstrates they have been overcharged \$14 million annually—and they want it back. An accounting order issued by the commission when the tariffs went into effect provides for refunds if the tariffs are

The Automatics. Comes the evolution.

The age of the Automatics in broadcasting has already begun.

As you'll see in this issue of Prime Time, there's a whole array of computer-oriented automatic equipment the broadcast manager can use to keep ahead in the profit race.

New needs emerging

In today's business environment the requirements of technical operations are just about as varied as the individual stations themselves.

We at RCA see automatic operation applied in many ways. Generally these applications will fall into three categories or groups.

One group (small today, but growing) is represented by "full computer control" of all equipment, programming and business functions.

Another can be characterized as "automatic programming" of segments of varying lengths, from station breaks to the late movie to an entire weekend schedule.

Still another is concerned with "automatic performance" of equipment. It's equipment that saves time, eliminates operational complexity, and generally will pay for itself in terms of better-quality programming and production.

New for NAB

At this year's convention RCA is showing systems of automatics designed to the needs of all three categories of operation.

A perfect illustration is the new TK-45 Color Camera System. Besides everything the TK-44 had, the new system includes four new fully automatic features for faster setup time and better pictures than ever.

Another instance is the TK-28 Telecine System, which corrects for a variety of film base errors automatically. It's constantly on the job, even on a scene-to-scene basis.

Also fitting this automatic performance pattern are the new "F" line VHF transmitters, which incorporate a number of "hands-off" functions.

Expansion of the "cartridge" philosophy

Our TCR-100 Cartridge Tape Recorder ushered in the age of Automatics. Its profit-preserving performance features fit ideally into computer-oriented thinking.

Additional far-reaching news for 1973 and beyond is the RCA TCP-1624 Cartridge Film System. It'll do for your film segments what the "Cart" Machine does for your video tape spots. And combined with the "Cart", it's a system of the future.

Automatic control functions

Command and Control Systems, which RCA is announcing at this time, also exemplifies computeroriented automatic operation. These systems can integrate a mass of assorted video equipment into a (Continued on last page)

Partners in automatic operation: The new TCP-1624 joins the TCR-100 in an RCA system of automatics.

Our "Cart" Machine. An automatic philosophy.

At RCA, we believe in automatic operation. Not for its own sake, however. But to serve the user's needs better, faster, more economically.

So we avoid the kind of automatic operation that makes things more difficult in favor of the kind that makes things easier.

Take our TCR-100 Cartridge Video Tape Recorder. Since its maior purpose was complete automation of station breaks and other medium-length program segments, we included all the features really necessary for this purpose.

We feel needless sophistication means that you leave yourself vulnerable to needless complexities.

In sequencing, for instance, we opted for a "ready access" system rather than random access. This means individual carts are located at the front of the machine where they can be instantly identified and

The automatic TCR-100 "Cart" Machine at KVRL-TV, Houston.

changed quickly when necessary. It means you can see exactly which segments are ready to play and in what order. Without ever having to refer to a special log (actually a log of a log) that's subject to errors.

The cartridge itself expresses our view of user benefits. Tape is totally enclosed when it's not actually in use in the machine, for protection against dust, fingermarks and other damage. It's always in a rewound state, ready for instant use.

And there are only two oxide contacts for longer wear.

Speaking of wear, you'll find both our cart tapes and headwheels have an unusual record for long play. Users have reported more than 3,000 plays for carts and over 1,000 hours for many headwheels.

And when it comes to the recording sequence, the "Cart" Machine's simplicity is especially apparent. There are only seven steps in the total procedure.

So when you need the TCR-100's help in production work, it's likely to be available, and not involved in time-consuming preparations such

(Continued from preceding page)

as loading, locating, checking, logging and programming for some future break.

And there's more. Exclusive features like the optional EPIS (Electronic Program Identification System), play recue, audible cue tones and an error-preventing "last event" warning, to name just a few.

Your RCA representative can show you literally dozens of additional ways the TCR-100 is designed for day-to-day use.

Or ask the owners of the 90 "Cart" Machines we've already delivered.

"F-line" VHF Automatic Transmitters. The future is here.

RCA F-line transmitters have evolved to the point where "handsoff" operation is now a reality.

From the 15 kW Type TT-15FL to the fully redundant 50 kW Type TT-50FH, these transmitters take the fullest advantage possible of solidstate technology (most have only six electron tubes of only two types).

They also take full advantage of the most sophisticated metering and switching equipment for remote operation and maintenance of signal during emergencies.

What this means to you now is the utmost reliability, because human error is virtually eliminated. One operator is all that is needed for logging and monitoring functions.

Automatic transmitter functions include the following: Automatic turn-on sequencing, pedestal level control, exciter switchover, currentlimiting power supplies, automatic

The automatic TT-25FL VHF Lowband Transmitter.

shutoff if air falls below safe levels, automatic overload sensing and selfprotection circuits.

Ask your RCA representative to give you the details of how an F-line transmitter can save you money now ... and in the future.

It sees things your way. Automatically.

When you try to see things from the broadcaster's point of view, as we do, one trend of recent years stands out clearly.

The TK-45.

And that's the shift to more and more local production.

So we feel that any camera improvements we make, should help you do this more effectively.

That's the reason behind the TK-45 Color Camera System. It does everything the TK-44 did. But automatically.

What we've done is to equip the TK-45 with four new fully automatic features specifically developed with an eye to production.

Starting with automatic black level. It's accomplished every time the TK-45's lens is capped.

Next: automatic white level. Doing this is simplicity itself. Just focus on a white reference card or a white area of the scene being shot, and press a button. Variations in scene-to-scene colorimetry are corrected instantly.

Then there's the automatic iris. It responds to changes in subject lighting faster than any human could. And it has a special memory circuit that holds the aperture during lens capping to avoid damage from too much light hitting the pickup tubes on uncapping.

The fourth new feature is auto-

The automatic TK-45 Color Camera.

matic centering. All the engineer has to do is push a button, and he has automatically compensated for the centering limitations of pickup tubes. So what used to be a tedious procedure is now a snap.

These features are all integral to the control console, not add-ons, so they don't add to cable clutter. And of course, all of them are in addition to features that have been standard on the TK-44. And helped make it a standard of the industry.

Your RCA representative can tell you more about the TK-45.

Just ask him about the new color camera that produces more than just profits.

(Continued from first page)

smoothly operating, efficient entity. Specifically, they can (1) interface tape with film machines and (2) interface either of these with network feed or live studio signals.

So you can program automatic sequences to practically any length you choose.

And that's just the beginning. In production, they can act as a "computerized scratch pad", memo-

rizing the segments that the producer has created, and through switching, re-create the effects in the proper sequence with precise timing.

The automatic evolution

So there they are. The Automatics. And we're calling it an evolution because we've structured both new and existing RCA equipment so you can fit them to your needs, your style of operation, even as it may change.

You can select just the degree of computer control you want at any particular time. Without having to worry about premature obsolescence. Because all the new RCA equipment is future compatible.

And present profitable.

The TK-28 Film Camera. Our automatic movie critic.

One benefit of automatic performance features is consistently high picture quality.

For example, take our TK-28 Telecine System. It doesn't like color film errors any more than you do. Its color-balancing circuits continuously sample and balance, correcting for errors caused by film aging, improper exposure or incorrect processing.

So you get true blacks and true whites in color film.

And of course, manual control can be reestablished at the push of a button.

For other color problems—such as accurately matching the TK-28 to the colorimetry of other cameras, compensating for commonly encountered variations in film stock, correcting low-color-saturation film or adjusting for scene-to-scene variations caused by improper printing there's Chromacomp.

That's a color-masking system that was developed for the TK-44 Live Color Camera and adapted for the TK-28's special needs.

All you do is determine your most frequently encountered problems and set up their solutions, which are activated as the need arises by a preset knob on the TK-28's operating control panel. Luminance (gray scale) is not affected by Chromacomp.

Other automatic controls include automatic white level, by means of a neutral-density disc that reacts to a 2:1 overexposure in less than 100 milliseconds.

And there's automatic black level, also automatically achieved in milliseconds. And also easily converted back to manual control.

One last annoying problem the TK-28 solves automatically is system flare, caused by dust in the optics or too-contrasty film. So contrast, like color, stays true and vivid.

Ask your RCA representative for more information on how the TK-28 can help you deliver a better-quality product.

Announcing the TCP-1624. It does for film spots what the "Cart" does for tape spots.

People who are sold on the TCR-100 may have wondered why something like it hasn't been created for film.

Well, now it has.

The TCP-1624 Cartridge Film Projector and a color film camera will present a completely automated all-film station break.

And in conjunction with the TCR-100, it permits a totally automated break using both film and tape.

Here's how it works.

The TCP-1624 is a two-projector system. Up to 24 segments, from one second to two minutes in length, can be loaded into its carousel.

So while one projector is running a film, the other is automatically rewinding the previously shown spot and cuing the next.

This eliminates all the work of manually threading individual film segments onto conventional projectors. And changing film after each has played.

It also ends the drudgery, the lack of flexibility and the possibility of

The automatic TCP-1624 Cartridge Film Projector.

film damage that come from splicing segments on one reel and resplicing later to put spots into a new sequence. Because the carousel is ready-accessed.

This means you can quickly rearrange the sequence of the spots just by shifting cartridges, without splicing.

And you can easily preload a carousel and slip it into place as soon as the previous carousel has finished playing.

Once the film is threaded, the projector automatically detects whether each film's sound-track is optical or magnetic, and plays it properly.

And the system is flexible in another way. It can be programmed either to play one segment and then stop, or to run continuously until given a stop cue, at which time a TCR-100 can take over with a sequence of tapes.

In addition, since the new cartridge projector is used in combination with a TK-28 Telecine System, you get the benefit of that machine's ability to correct color film errors.

And the TCP-1624 also frees up conventional projectors for production work, like inserting filmed segments into taped programs.

This new cartridge projector is part of a system of automatics which points up our policy of using automatic performance features for the user's sake. found to be discriminatory or unlawful.

The networks did not address specifically the transmission rates AT&T has proposed, but the rates they say the evidence would warrant are lower. The networks said the interexchange channel rate should be \$41.50 per mile per month; station connections, \$1,600 per month, and local channels, \$745 per month.

AT&T in October asked the commission for permission to file new tariffs that, while lowering program-transmission rates for the networks, would raise them for occasional users, such as Hughes Sports Network Inc. The commission has not yet said whether the tariffs could be filed.

The monthly contract rates would be \$55 per mile per month for interconnection channel service, down from \$82.50; \$1,500 per month for station connections, which would result in lower costs than the networks now pay, and \$1,000 per month for local channel servvice, which would be more than they now pay on an annual basis—\$9,200.

The networks also suggested rates they said would be reasonable for occasional users-57 cents per mile per hour for interexchange channel service and \$80 per hour for station connections. (The networks maintain that a tariff rate for occasional local channels cannot be determined since, they say, there is considerable investment in part-time local channels dedicated to occasional service even though they are no longer used.) These too are lower than those in the tariffs AT&T is seeking to file-\$1 per mile per hour for interexchange channel service, \$80 for station connection and \$500 per day (but no more than \$1,000 in a given month) for local channel service. Occasional users now pay 55 cents per mile per hour for interex-change channel service. The other charges are on an hourly or daily basis and, therefore, hard to compare with those that have been proposed.

AT&T, for its part, defended its present rates, saying that the evidence justified them. It also said there was no basis for the commission prescribing rates and no need for the commission to order refunds. Furthermore, it said, as it did in proposing the new lower rates for monthly contract users of the programtransmission service, it would lose "substantial amounts" of that service to miscellaneous common carriers if it were not allowed to adjust rates as proposed.

But Hughes, the only customer of the carrier's occasional-use service to file proposed findings and conclusions of law, disputed that argument. It said the shift away from AT&T to other carriers has been relatively slight and that the concern over future losses was based only on speculation. Furthermore, it said, there is no evidence that AT&T's loss of the television business would harm the television industry or the public.

But Hughes's main argument is that AT&T's ratemaking principles are contrary to the ruling of an administrative law judge in the proceeding in which Hughes charged that AT&T's rates discriminated against occasional users. The judge, in the 1968 decision, supported that contention, and held that all users should be charged only in proportion to their use of AT&T facilities. Thus, Hughes said, both AT&T and the networks are taking positions contrary to that ruling in contending that occasional and contract services are separate and distinct.

Another broadcaster bids for FCC seat

Where that upcoming Nicholas Johnson vacancy on the FCC is concerned, it is beginning to look like Campaign '73—with broadcasters running as candidates.

First, there was the boomlet for James Quello, retired manager of WJR-AM-FM Detroit who is now a consultant to Storer Broadcasting (BROADCASTING, Jan. 8).

Now, the candidate being sold is Donald C. Keyes, president of Keyes Corp., licensee of WNYN(AM) Canton, Ohio. A news release prepared by Sal Butera Associates, of Canton, and issued last week announced that Mr. Keyes "has applied to President Nixon" for the commission seat scheduled to become vacant on June 30.

The release notes that Mr. Keyes is 42 years old, is "a 20-year veteran of broadcasting and gained national recognition in the late 50's and early 60's as vice president-programing with the McLendon Stations."

The release says that "the White House has advised Mr. Keyes that his application has been taken under advisement and is receiving careful consideration."

An even dozen for Metromedia

Metromedia Inc. has acquired a 12th radio station with the FCC's approval last week of the firm's \$2.75-million purchase of WDHF(FM) Chicago. Seller is the California-based National Science Network.

NSN operates two FM facilities on the West Coast—KMPX(FM) San Francisco and KPPC(FM) Pasadena, Calif. It is also the licensee of WNCN(FM) New York, which it is selling to group owner Starr Broadcasting Group for \$2 million. Stan Gurell is operating head of NSN.

With the addition of WDHF-FM, Metromedia's radio holdings now include KLAC-(AM)-KMET(FM) Los Angeles; KNEW-(AM) Oakland; KSAN(FM) San Francisco; WASH(FM) Washington; WCBM-(AM) Baltimore; WIP(AM)-WMMR(FM) Philadelphia; WNEW-AM-FM New York and WOMC(FM) Detroit. The firm recently sold WHK(AM)-WMMS(FM) Cleveland to Malrite Broadcasting of Ohio. Metromedia is also the licensee of KTTV-(TV) Los Angeles, WNEW-TV New York, WTTG(TV) Washington, WXIX-TV Newport, Ky. (Cincinnati), and WTCN-TV Minneapolis.

WDHF operates on 95.5 mhz with 52 kw and an antenna 230 feet above average terrain.

Patricelli group buys WTIC-AM Hartford

Its \$6-million purchase completes Travelers' exit from broadcasting

A preliminary agreement for the purchase of WTIC-AM-FM Hartford, Conn., by a new corporation headed by Leonard J. Patricelli, now president of WTIC-AM-FM-TV, and businessman David T. Chase for \$6 million was announced last Thursday (March 15) by the Travelers Corp., owner of the stations.

The Washington Post Co. is acquiring WTIC-TV for \$40 million, less the sales price derived from the radio stations (BROADCASTING, Jan. 29). On that basis WTIC-TV's price would be \$34 million. Both sales are subject to FCC approval. Closing of the WTIC-AM-FM sale would occur with and be contingent on the closing of the WTIC-TV sale.

Ten Eighty Corp., named for the WTIC(AM) dial assignment, is the company set up to acquire the radio stations. It is co-owned by Mr. Patricelli and Mr. Chase, of Chase Enterprises, a diversified interests company. But Mr. Patricelli said key employes and members of the board of Ten Eighty would be offered an opportunity to buy capital stock.

Ten Eighty is headed by Mr. Patricelli as president; Robert Tyrol, executive vice president, and Harley Park, vice president and treasurer. They currently are president, vice president-general manager and assistant treasurer - controller of Broadcast Plaza Inc., licensee of WTIC-AM-FM-TV. Other Ten Eighty board members are Mr. Chase and James E. Bent, board chairman of Hartford Federal Savings and Loan: Frank Chapman, partner in the law firm of Robinson, Robinson & Cole: Edward Hennessy Jr., senior vice president finance and administration, United Aircraft Corp.: Mrs. Gertrude H. Johnson, chief of the division of child day care, Department of Community Development: Stuart D. Watson, president of Heublein Inc., and Archibald M. Woodruff, chancellor of the University of Hartford.

Mr. Patricelli said Ten Eighty's offer covered only the assets used in the operation of WTIC-AM-FM. He also said the company agreed, as part of the offer, that it would establish retirement and other employe-benefit plans like those in effect at Broadcast Plaza Inc.

WTIC(AM) is on 1080 khz with 50 kw. WTIC-FM is on 96.5 mhz with 15 kw horizontal and 13 kw vertical and antenna height of 810 feet.

Clay Communications buying its third TV

Clay Communications Inc., a Charleston, W. Va.-based diversified communications firm, announced that it has reached agreement to purchase KJAC-TV (ch. 4) Beaumont-Port Arthur, Tex. Sale of the NBC-TV affiliate, which would be acquired from Texas Gold Coast Television Inc. for \$3 million, is subject to the approval of the FCC.

Lyell B. Clay is board chairman of Clay Communications, which currently operates $\kappa FDX(TV)$ (ch. 3) Wichita Falls, Tex., and wway(Tv) (ch. 3) Wilming-ton, N.C. The company also publishes the Charleston (W. Va.) Daily Mail.

KJAC-TV operates with 100 kw visual, 20 kw aural and an antenna 1.184 feet above average terrain.

Veteran broadcaster suggests conciliation with the government

Reinsch, receiving IRTS award, says radio-TV will survive attacks: Sarnoff honored at same event

A call for better understanding between broadcasters and their critics was sounded last week by J. Leonard Reinsch, president of Cox Broadcasting Co. and chairman of Cox Cable.

He told the 33d anniversary banquet of the International Radio and Television Society, which honored him with its gold medal—awarded annually for "contribu-tion to or accomplishment in" broadcasting-that he did not share the pessimism of those who fear that "private broadcasting and freedom of speech are both in dire peril."

"While I do not minimize the danger inherent in many of the harsh, and

enemies.

Signals swarm around TV viewers Nielsen tracks 7.2 stations available to the average home

A total of 60% of U.S. television homes can receive TV programs from at least seven stations, almost one-third (31%) can receive from nine and 20% can tune in 10 or more, the Television Information Office reported last week. And 98% of the homes, TIO said, are within range of at least three stations. The average home can tune 7.2.

TIO Director Roy Danish cited these figures and comparable ones from two earlier studies, all done for TIO by the A.C. Nielsen Co., in support of the contention that "contrary to the belief of some of television's critics, there are now more viewing choices available to more people than ever before." The Nielsen figures, which include both commercial and noncommercial stations, are as follows:

Stations received			Fall 1968	Fall 1970	Fall 1972
10	or	more	NA	17%	20%
9	11	11	24%	26%	31%
8	11	**	34%	37%	42%
7	••	11	53%	57%	60%
6	••		65%	66%	70%
5	11	11	79%	79%	82%
4	**	17	90%	90%	93%
3	**	21	97%	97%	98%

Changing Hands

Announced

The following sales of broadcast stations were reported last week, subject to FCC approval:

• KCST(TV) (ch. 39) San Diego: Sold by Western Telecasters Inc. to Storer Broadcasting Co. for \$12 million (see page 48).

WTIC-AM-FM Hartford, Conn.: Sold by the Travelers Corp. to Leonard J. Patricelli, David T. Chase and others for \$6 million (see page 53).

• KJAC-TV (ch. 4) Beaumont-Port Arthur, Tex.: Sold by Texas Gold Coast Television Inc. to Clay Communications Corp. for \$3 million (see page 53).

• KAFG(FM) Oklahoma City: Sold by Radio Oklahoma Inc. to Covenant Broadcasting of Oklahoma for sum in excess of \$365,000. Richard L. Geismar, chairman of Broad Street Communications Corp., parent company of Covenant Broadcasting of Oklahoma, heads the buying group, which also owns and operates wELI(AM) New Haven, Conn., and WGSO(AM) and WQUE(FM) New Orleans, and has agreed to buy KTOK(AM) Oklahoma City, pending FCC approval (BROADCASTING, Feb. 26). KAFG is on 102.7 mhz with 79 kw. No broker.

" WBCM-AM-FM Bay City, Mich.: Sold by Michigan Broadcasting Co. to Trimedia Inc. for \$516,000. Robert Liggett, president of wFMK(FM) East Lansing,

Mich., heads Trimedia, a new company. WBCN(AM) operates on 1440 khz with 1 kw day and 250 w night. WBCM-FM is on 96.1 mhz with 97 kw and an antenna 420 feet above average terrain.

• WBUZ(AM) Fredonia, N.Y.: Sold by Dunkirk-Fredonia Broadcasting Inc. to Catoctin Broadcasting Corp. for \$80,000. Lauren Colby, a communications attorney with the Washington law firm of Colby and Tarrant, is president of the buying firm. Catoctin also owns wTHU-(AM) Thurmont, Md. WBUZ is a daytimer on 1570 khz with 250 w. Broker: Keith W. Horton Co., Elmira, N.Y.

Approved

The following transfers of station ownership were approved by the FCC last week (for other FCC activities see "For the Record," page 131):

• WDHF-FM Chicago: Sold by the National Science Network to Metromedia Inc. for \$2.75 million (see page 53).

• WSAF-AM-FM Sarasota, Fla.: Sold to Sarasota Radio Co. by H. Edward Dillon, receiver for Stewart Broadcasting Co., for \$162,000. Commission denied request by Charles Stewart to delay action on sale application pending outcome of three Florida cases alleging that Mr. Stewart was wrongfully ousted from control of Stewart Broadcasting. Sarasota Radio is principally owned by Carroll P. Newton and Edward A. Rogers. Mr. Newton owns consultancy in Sarasota. He is also an officer and director of Connaught Public Affairs, Washington consulting firm. Mr. Rogers, former officer and stockholder of Metromedia Inc., owns FRC Group Inc., Lake Forest, Ill., entertainment production firm. WSAF operates on 1220 khz, 1 kw daytime; the FM broadcasts on 102.5 mhz, with power of 2.75 kw and antenna height of 265 feet.

KIRO in the Mutual fold

KIRO-AM-FM Scattle joined Mutual Broadcasting last Sunday (March 17) with KIRO becoming the Mutual Pacific originating station for 50 affiliates in the West. The announcement was made jointly by C. Edward Little, Mutual president, and Lloyd E. Cooney, president of the Seattle outlets. The additions bring Mutual Radio to 583 affiliates. KIRO is 50 kw full time on 710 khz; KIRO-FM is 100 kw on 100.7 mhz.

CPB funding to get airing

Senator John O. Pastore (D-R.I.) announced last week that his Communications Subcommittee will hold a hearing March 28-30 on funding for the Corporation for Public Broadcasting.

poration for Public Broadcasting. The hearing will focus on S. 1090, a bill introduced two weeks ago by Senators Pastore and Warren Magnuson (D-Wash.) (BROADCASTING, March 12). The measure would authorize \$55 million for CPB in fiscal 1974, \$75-million in fiscal 1975 (plus \$5 million in each of those years on a matching-fund basis) and facilities grants of \$25-million each for 1974, 1975 and 1976.

Springtime in Washington: It means flowers and a record NAB turnout

An agenda jammed with vital issues, a record number of exhibitors and possibility of an appearance by Nixon are a few of the lures

It may be a reflection of improved conditions in broadcasting or the attractions of Washington before the sightseers take over for spring—no matter the reason it's going to be a big 51st annual National Association of Broadcasters convention next week. It's almost assuredly going to be the biggest.

NAB officials are predicting 6,000 registered delegates. That's 700-800 more than ever before registered for an NAB convention. Add to that the usual 2,000-2,500 drop-in attendance and it could be that the four days of meetings and exhibits, wining and dining in Washington will attract upwards of 8,500 people. (Last year's totals: 4,556 paid registrations; 5,236 over-all attendance.)

And will one of those who attend be the President? It could be—at this point a 50-50 chance. It's been four years since Mr. Nixon's last appearance before the entire broadcasting fraternity, and the timing may be right for what would be a encore.

The President has been invited to the opening session on Monday, March 26. But in the NAB's letter of invitation it was stressed that any session the Chief Executive wished to attend, of course, would be just dandy—be assured he'll be welcomed and accommodated.

A presidential appearance (with its attendant worldwide publicity and newsmaking potential) is the one element of bigness about this convention that hasn't as yet been nailed down. Otherwise the superlatives are flowing as the scotch undoubtedly will at the hospitality suites. For example:

• More exhibitors (151) displaying more wares than ever before.

The world's largest display of broadcast equipment spread out over the largest area of space ever available, and all 60,000 square feet of it sold out since the beginning of February.

Preregistrations running some 700 persons over last year.

By mid-February, the two convention hotels—Shoreham and Sheraton Park—as well as two other major area hotels—Windsor Park and Washington Hilton—all with not a room to be had (and people in Washington already receiving frantic phone calls and letters of appeal to exert whatever influence possible to secure space).

What's everybody running to? Is there something special this year? Not really. It's just a fine opportunity to get information and advice, to see and be seen, to attend what seems to be a professionally programed and well-rounded industrywide convention.

Perhaps the highlight of this year's convention will be what amounts to a new feature: a Monday afternoon session at which there will be a hoped-for dialogue between the NAB executive committee and the delegates attending. This has been an on-again, off-again, on-again session. The dialogue concept had been planned from the first. Then there was consideration given to a panel format with Clay T. Whitehead, director of the Office of Telecommunications Policy, as star attraction, and Bill Monroe, Washington correspondent for NBC-TV's *Today* series, and Washington attorney W. Theodore Pierson, in the supporting cast. But NAB wasn't able to put all the pieces together in time for the convention.

The decision was made last week to go back to the original program, which calls for NAB President Vincent T. Wasilewski to break with tradition and present his keynote address at the afternoon session following the opening luncheon (in previous years the president's speech was at lunch and more recently during the first day's morning session). Mr. Wasilewski's speech will pinpoint the issues of the day that affect broadcasters.

Then NAB Board Chairman Richard W. Chapin, president of Stuart Broad-casting Co., Lincoln, Neb., will take over and introduce the other members of the NAB executive committee: Peter Storer, chairman of the TV board; Andrew M. Ockershausen, chairman of the radio board; Robert F. Wright, vice chairman of the TV board; Wendell Mayes Jr., vice chairman of the radio board, Willard E. Walbridge, the former chairman of the board, and Richard W. Jencks, of CBS, the network representative. Each executive board member will handle a problem area of special interest to him so that Wendell Mayes, for example, chairman of the ad hoc NAB task force on proprietary-remedy advertising will address himself to that subject. Microphones will be placed throughout the audience to allow delegates to ask questions.

This is the first time such a one-to-one concept has been tried at an NAB convention. Reason for it, reportedly, was an expression from the membership that

not enough of what goes on at the convention comes to grips with the everyday vital issues that affect broadcasters.

Among the other highlights of the convention which NAB staff people are touting:

• A Tuesday morning radio assembly session that features a review by NAB Board Chairman Chapin and FCC Commissioner Richard E. Wiley of radio reregulation note.

• On the television side, William F. Turner, chairman of the secondary television market committee, will spend an hour talking with Donald D. Sullivan, himself a former broadcaster and now administrative aide to Representative Wiley Mayne (R-Iowa), with the thrust being: How do you communicate with your congressman's office?

• On the small-market radio side, Clint Formby, chairman of that committee, will be asking questions of specific interest to small-market broadcasters of Representative J. J. Pickle (D-Tex.) and Michael B. Joy, administrative aide to Senator Ernest F. Hollings (D-S.C.).

• For the third year, NAB will be repeating what has proved to be one of its more popular programing features, a session during which small-market radio broadcasters can ask nuts-and-bolts types of questions of key FCC staff people, with FCC Commissioner Wiley as moderator, and such other commission participants as John W. Pettit, general counsel; Wallace E. Johnson, chief of the Broadcast Bureau; Richard J. Shiben, chief of the Renewal branch; and Richard M. Riehl, chief of the transfer branch.

• What figures to be a particularly pertinent TV-management session is the last one on Wednesday (March 28), just before the concluding convention luncheon, when Henry Goldberg, general counsel of the Office of Telecommunications Policy, moderates a cable-TV copyright panel that will include such legal heavyweights as Arthur Scheiner of MCA; Gary Christensen of Hogan & Hartson and Michael Horn of the Association of Maximum Service Telecasters.

The luncheon rostrum for the convention—lacking a dynamic newsmaker still will have a line-up of solid Washington shakers including Senator Sam J. Ervin (D-N.C.), a staunch constitutionalist who will be presented a citation in recognition of his fighting for individual and What's a turnkey studio? Silver Spring, Maryland 20910 (301) 588-4983 institutional freedoms; Senator Howard Baker (R-Tenn.), the ranking member of the Senate Commerce Committee speaking about broadcasting as he sees it from the Hill; and, as traditional, the chairman of the FCC, in this instance Dean Burch (thought had been given to having the commission scheduled en banc as the program for the Wednesday luncheon).

The FCC will be much in evidence. Last year the commission for the first time ran an information booth at the convention-a place where a broadcaster's specific problem could be given individual attention. This year the commission will not only have two information boothsmanned by such people as staffers Wallace Johnson and Harold L. Kassens as well as William B. Ray, chief of the complaints and compliance division-but will provide a direct telephone line from the convention into the Broadcast Bureau at the commission building on M Street. The telephone line, a first at this year's convention, will be open throughout the normal convention day, as will be the information booths located in the lobby of the Sheraton Park hotel.

For many attending, the most exciting moments will come at 10 a.m. on Monday morning when after a musical introduction played by the U.S. Navy Band, the house lights will go down in the Shoreham hotel's Regency Ballroom and Robert F. Wright of wTOK-TV Meridian, Miss., will say: "Ladies and gentlemen, The 51st annual convention and the 27th Broadcast Engineering Conference of the National Association of Broadcasters will please come to order."

After the presentation of colors by the joint service color guard; an invocation by Reverend Kenneth Hildebrand, pastor of the Central Church of Chicago; and the playing of the National Anthem, Mr. Wright will say: "Ladies and gentlemen —it is my pleasure and honor to present our 1973 distinguished service award winner," and Ward L. Quaal, president of won Continental Broadcasting Co. will be escorted up the center aisle onto stage. The band will play "Hail to the Victor" and NAB-1973 will be officially under way.

Before NAB, NAFMB

The annual National Association of FM Broadcasters convention, as usual, leads in to the NAB gathering, running from March 23-25. This year, the three-day convention will be held at the Washington Hilton hotel. Theme for the FM broadcasters has a cheerleader's ring: "FM: The Opportunity Medium."

Quadraphonic sound is front and center, leading off the convention at the opening Friday morning (March 23) session. Ray Norstrand, president and general manager of wFMT(FM) Chicago, is to moderate a panel of six representatives of the music industry, broadcast sales, station management and the trade press who are to discuss the timetable for realization of quadraphonic's unquestioned potential.

A key session is to take place Satur-

day morning (March 24), when FM people will engage in a dialogue with Harold Kassens, assistant chief of the FCC's Broadcast Bureau.

The fourth annual FM Pioneers brunch—a bringing together, once a year, of the veterans of the FM "wars" —is scheduled for Sunday (March 25) from 10 a.m. to noon at the Washington Hilton. Immediately following, on that same day, the annual membership meeting of NAFMB is to be held.

Man in the News

Ward Lewis Quaal, president of WGN Continental Broadcasting Co., will receive the Distinguished Servive Award of the National Association of Broadcasters at ceremonies during the NAB convention in Washington March 26.

When Ward L. Quaal was nominated by a fellow Illinois broadcaster to receive the 1973 DSA of the National Association of Broadcasters, the writer highlighted 31 separate contributions made during more than three decades of stewardship. The list was superfluous; Ward Quaal had long since won the admiration of fellow broadcasters and his co-workers. Next Monday's ceremony will only make it official.

It will, nonetheless, be a big day in the life of the 54-year-old president of WGN Continental Broadcasting Co. Even so, he hopes he will be upstaged.

It is hardly a secret that the President of the United States would like to be present when his long-time friend and West Coast neighbor (at San Clemente) is installed as the broadcasters' "man of the year." Whether the President will "drop in" as he did exactly four years earlier, when he had been in office a scant two months, depends upon the White House schedule.

In anticipation of a presidential visit, the NAB has arranged the agenda so the Chief Executive can take over the lectern, as he did for impromptu remarks four years ago, or simply pay his respects to the honoree before the some 4,000 present. Vincent T. Wasilewski, NAB president, has deferred his own "state of the broadcast nation" address until the afternoon session, leaving the morning clear for events incident to the Quaal ceremonies and his acceptance remarks.

(Mr. Quaal will be escorted into the Shoreham hotel's Regency room by Russell Egan, Washington attorney for WGN Continental; John E. Fetzer, pioneer broadcaster, owner of the Detroit Tigers and a DSA recipient; Abe Herman, Fort Worth attorney and a stockholder in the Star-Telegram (WBAP-AM-TV); former FCC Chairman Rosel H. Hyde, a DSA recipient; Clair R. McCollough, dean of NAB's past board chairmen, a DSA recipient; J. Leonard Reinsch, president of Cox Broadcasting [who, last Thursday, was honored with the gold medal award of the International Radio and Television Society]; Frank Stanton, broadcasting's foremost spokesman, a DSA recipient who retires this month as vice chairman of CBS Inc., and Sol Taishoff, chairmaneditor of BROADCASTING magazine, a DSA recipient.)

The story of Lewis Ward Quaal (Ward L. became his air credit and subsequently his legal name) is a classic in the Horatio Alger style. He was born in Ishpeming, Mich., on April 7, 1919, of first-generation Scandanavian parents. While in high school he worked as a milkman (4 to 8 a.m.) in the town of his birth, then drove 14 miles to Marquette for an announcing shift on wDMJ-(AM).

From those beginnings came enrollment three years later at the University of Michigan in 1937—and big-time radio. He became a part-time announcer on wJR(AM) Detroit, a CBS affiliate where he first learned about clear-channel stations. After graduation in 1941, Mr. Quaal joined WGN(AM) Chicago, determined to become a top announcer (he did), but also with aspirations in sales and management.

Then came the war and service in the Navy (1942-45), after which Lieutenant Quaal rejoined WGN as special assistant to the manager. This led to his selection (in 1949) as director of the Clear Chan-nel Broadcasting Service in Washington, where his skills served CCBS well in establishing important contacts and friendships. It was a role which gave him the chance to sharpen his already astute political senses. Three years later he joined Crosley (now Avco) Broadcasting as assistant general manager, moving up in those operations while keeping a watchful eye on Washington and clearchannel protection. (Today he continues as chairman of CCBS and remains its driving force.)

In 1956 the Tribune Company beckoned the return of a prodigal son. Mr. Quaal became vice president and general manager of wGN-AM-TV, a complex that had not been faring too well. It wasn't long before a transition to profit and prestige enabled expansion that included the acquisitions of KDAL-AM-TV Duluth, Minn., and KWGN-TV Denver, as well as the creation of subsidiary and associated enterprises in sales, production, syndication, cable and travel services.

Because of the phenomenal successes he has achieved in broadcasting, Mr. Quaal has been elevated in the parent Tribune Co. organization. He is presi-

1973 is a very special year for us and we'd like to share it with you. Fifty years ago, A. C. Nielsen Company opened its doors, which is about the same time many pioneer broadcasters first went on the air. Then, when you went into television, we started doing TV audience research. Over these years, we've literally grown together.

Since we're all going to be at the NAB in Washington, we hope you'll stop by and see us. We'd like to thank you in person for your support and confidence these many years.

Suite D506-8, Shoreham Hotel

Sunday afternoon through Wednesday morning

The quality that TAV produces is like the camera it uses.

Trans-American Video does great work. They really have an eye for video tape. In fact, they're quite a unique video facilities company. When it started in business over a year ago, it ordered nine of the first Fernseh cameras sold in the U.S. TAV used those cameras to cover the U.S.-Russia track meet and then proceeded to become the world's largest independent mobile color video tape facilities company. Their current credits include NFL Monday Night Football, Young Dr. Kildare series, Burt Bacharach in Shangri-La special, Duke Ellington ... We Love You Madly special, and Frankenstein, Parts I and II feature.

Today, TAV has over \$8 million worth of equipment. And here's what they have to say about Fernseh cameras:

"It took only a short training period for our operators to learn to use the cameras, and for the cameras to establish themselves as quality pieces of equipment."

"The Fernseh cameras are easy to set up and strike. Once they're registered, they're extremely stable. A video operator does not have to continually ride the pictures."

There's a lot more we can tell you about the family of Fernseh cameras. Interchangeable modules. Small diameter cabling. Performance specifications, etc. For more detailed information, contact your local Fernseh division representative at one of the offices listed below. Chicago Hdqts. (312) 681-5000 Houston (713) 681-8461 Los Angeles (213) 649-4330 New York (516) 921-9000 Ramsey, N.J. (201) 825-1550 San Francisco (415) 583-9470

Robert Bosch Corporation Fernseh Division 5 the wings of vision

dent of WGN Continental and of each of its subidiaries and is a director of the Tribune Co., which operates 45 firms in the United States and Canada.

In more than three decades Ward Quaal has accumulated two terms on the radio board of the NAB: two terms on the NAB television board; has been president of Broadcast Pioneers; a board member of the Association of Maximum Service Telecasters; was drafted as spokesman and chairman of the Council for Television Development, organized to resist FCC limitations on multiple ownerships: was president of Ohio Broadcasters Association, and a charter member of organizing committees for both Radio Advertising Bureau and Television Bureau of Advertising, aside from a dozen foundation and fund-raising projects.

In the nonbroadcast sectors, Mr. Quaal somehow found time to serve as chairman of the board of governors, Council of Better Business Bureaus International: member of the board, Sears, Roebuck Foundation: associate chairman of the U.S.-Japan Cultural TV Exchange; board member, Air Force Academy Foundation, and numerous other assignments dedicated to worthy causes.

ments dedicated to worthy causes. Along the way, Mr. Quaal gathered in four honorary doctorates: was cited as "Advertising Man of the Year" by the Chicago Advertising Club; "Communicator of the Year" by the Jewish United Fund; Distinguished Alumnus Award of the University of Michigan. He also found time in the march of events to co-author, in 1968, "Broadcast Management," a book now undergoing revision.

About that name change? He reports that only long-time friends and family ever knew him as "Lou": that since he acquired a place in the San Clemente beach area he is sometimes alluded to as "Laguna Lou": and besides, "Who remembers David Dwight Eisenhower, or Thomas Woodrow Wilson?"

Mr. Quaal, naturally and without affection, deals in superlatives. He is a compulsive letter-writer, has been known to keep five secretaries going full-tilt on a "dictated-but-not-read" basis while traveling in his chauffeur-driven cars from home to office or airport either in Chicago or Los Angeles or to Tribune Co. meetings.

Mr. Quaal confesses his greatest "sale" was in winning the hand of the former Dorothy Graham, the bright and striking beauty he married in 1944. They reside in Winnetka with their 15-year-old daughter, Jennifer. Their son Graham, 24, a sales representative for Union Oil Co. of California, is married and lives in Palatine, Ill.

The official agenda for the 51st annual NAB convention

Monday, March 26

Early bird workshops

American Women in Radio and TV. Forum room, SH. 8:30-10 a.m. Women Power: Use It or Lose Iti Panel: Rose Blyth Kemp, AWRT president; Rita Hart, Foote, Cone & Belding; Virginia Pate Wetter, WASA(AM)-WHDG(FM) Havre de Grace, Md.

Sunday, March 25

- 8:30 a.m. APBE workshops. MF.
- 9:00 a.m. Association for Broadcast Engineering Standards technical committee meeting. Calvert room, SP.

Change is in the air.

Now you can get more from your telephone. In the studio. On location. In the office.

For example, either our 30AVoice Coupler or our versatile 50A Portable Conference Telephone now allows you the flexibility of using regular telephone lines for remote broadcasts.

In addition, "hot lines" to the police and other news sources give you the news as it breaks.

And new compact switching equipment makes it easier for callers to reach your station, and makes communications more efficient for all your staff.

But with all our increased flexibility and innovative service offerings, one thing hasn't changed: Bell System dependability. Automatic test equipment monitors performance at our place, and we correct most troubles before you notice them at your place. And if you do need to call for help, it's never Long Distance. With us, it's always a local call.

For the whole story of how modern communications can help broadcasting performance and profits, telephone your Bell System Communications Consultant.

AT&T and your local Bell Company.

9:00 a.m. ABC affiliates continental breakfast. Sheraton hall, SP.

10:00 a.m. ABC Radio general affiliates meeting. Sheraton hall, SP. 10 a.m. ABC-TV affiliates meeting. Dolley Madison room, Madison hotel.

- 226. THE WORK OF THE FILM DIRECTOR by A. J. Reynartson. Gives the baginning film-maker the creative and technical knowledge and understanding he needs to carry out the director's function. Covers basics of editing, screenwriting, music, sound, camera movement and onthe-set and focation techniques. 256 pages, 6'' Q°', over 100 illustrations, diagrams, bibliography, index. \$13.50
- 227. THE WORK OF THE TELEVISION JOURNALIST by R. W. Byrell. Describes every job from writer and producer to that of cameraman, recordist, film editor and newscaster. Invaluable as a basic primer for all newcomers to television-student and professional. 176 pages, itlustrated, glossary. \$11.50
- 228. WRITING FOR TELEVISION AND RADIO, 2nd Edition by Robert L. Hilliard. Emphasizing the "Vread-and-butter" aspects of the writer's craft in the mass media, this is also practical for home study. 320 pages, 6%" x 9%4", with semple scripts and applications, index. \$7.95
- 229. THE TECHNIQUE OF DOCUMENTARY FILM PRODUCTION, Rev. Ed. by W. Hugh Baddeley. Covers all aspects of the production of the factual film. 268 pages, $512'' \times 81/2''$, 75 diagrammatic illustrations, glossary. \$10.00
- 230. THE TECHNIQUE OF FILM AND TELEVISION MAKE-UP: For Color and Black & White-Revised Edition by Vincent J-R Kehoe. "First in its fielda thorough-geing study of actual techniques for both color and b/w."-Art Direction. 288 pages, 5½" x 8½", over 200 illustrations, appendices, bibliography, index. \$16.50
- 231. THE TSCHNIQUE OF LIGHTING FOR TELEVISION AND MOTION PICTURES by Gerald Millerson. Explains how to display subjects persuasively, how to set about Nghting in all its artistic applications. 376 pages, 5½" x 8½", 106 diagrams, 8 color plates, 200 black-and-white photogrephs. \$17.95
- 232. THE TECHNIQUE OF THE SOUND STUDIO, Radio, Television, Recording, 3rd Revised Edition by Alec Nisbett. The basic approach of this widelyused text and guidebook emphasizing general principles rather then rule-ef-thumb, has the latest technological developments. 558 pages, 5½" x 8½", 234 diagrams, glossary. \$14.50
- 233. THE TECHNIQUE OF SPECIAL BEFECTS IN TELE-VISION by Bernard Wilkie. A unique, pioneering and astonishingly comprehensive book that covers everything one needs to know about "special effects" from popping champagne cork to bullet and bomb effects. 400 pages, 5/2", x 834", 200 halftones, 40 diagrams, appendix, index. \$16.50
- 234. THE TECHNIQUE OF TELEVISION ANNOUNCING by Bruce Lewis. A manual for all who appear or aspire to appear on camera. 288 pages, 51/2" x 81/2", illus. \$10.00
- 235. THE TECHNIQUE OF THE TELEVISION CAMERA-MAN, Revised Edition by Peter Jones. Deals at length with composition, movement, the essenials of good camera technique, lighting, special problems of remotes, etc. 256 pages, 51/2" x B1/2", 79 diagrems, glossary, index. \$14.50
- 236. THE TECHNIQUE OF TELEVISION PRODUCTION, Revised Edition by Gerald Millerson. The latest techniques, including color TV, are included in this encyclopedic handbook. 44Φ pages, 5½" x 8½", 1160 diagrams. \$14.50

Nuts and bolts for engineering conference

No spectacular debuts are expected in hardware department; technical men to deal with basics

What's in store for the 27th Broadcast Engineering Conference of the National Association of Broadcasters convention? Broadcasters apparently are not going to see a great innovation—another introduction of equipment comparable in impact to the video-tape recorder—on the exhibit floor. Broadcast engineers, instead, are going to see a lot of bread-and-butter hardware, a lot of solid-state equipment, a lot of streamlining of circuitry for simpler operation. Still, nothing to be introduced is likely to revolutionize the broadcast system.

The engineering assembly will pick up momentum on Monday afternoon with what always is a key technical session with the FCC staff. This year the commission will be represented by Wallace E. Johnson, chief of the Broadcast Bureau, and his assistant chief, Harold L. Kassens. Also participating will be Harold G. Kelley, assistant chief of the broadcast facilities division. The NAB staff is hoping that the FCC will have its radio reregulation team in the audience and a question-and-answer session is planned at the conclusion of the session.

On the television side of the engineering conference, the use of helical-scan video recorders will be discussed on Tuesday morning. "There's an awful lot of industry interest in this session," reports an NAB staff official. "Engineers are asking, 'Why buy a \$165,000 quadriplex video-tape recorder if a \$10,000 piece of equipment will do the same job?" They want to know, 'Can we use helical scan to replace a lot of this expensive equipment?' "

The technical papers to be presented include participation by probably more consulting engineers than at any previous convention. "For the first time many more consulting engineers seem to have responded to our invitation," verifies one of the NAB staff members programing the engineering conference. "It's very difficult to pick a consultant's brain but they seem willing to participate instead of protecting those confidential secrets that they have to sell."

The speaker list is headed by James Redmond, the BBC's director of engineering, an internationally-recognized expert in the development of color television. The engineering award presentation, to A. James Ebel of KOLN-TV Lincoln, Neb. (see "Profile," page 151) probably the big moment of the engineering conference—will have Professor Richard D. Cupka of Purdue University as featured speaker. Professor Cupka, who developed the annual NAB-sponsored engineering/management seminar at Purdue, specializes in personnel, labor relations, labor-management problems.

Following is the agenda for the engineering conference, including abstracts of technical papers. SH is Shoreham Hotel, SP is Sheraton Park.

Monday, March 26

General assembly. Regency assembly. Regency room, SH. 10:30-12 noon. (Joint session with management.)

Engineering luncheon. Blue room, SH. 12:30-2 p.m. Presiding: Leonard A. Spragg, Storer Broadcasting. Invocation: Kenneth Hildebrand, minister, Central Church of Chicago. Address: Dr. James Redmond, Director of Engineering, BBC.

Engineering assembly. Paliadian room, SH. 2:30-5 p.m. Presiding: Ralph R. Batt, WGN Continental Broadcasting. Coordinator: Royce LaVerne Pointer, ABC.

Opening of engineering conference. (2:30-2:40 p.m.). Vincent T. Wasilewski, president, NAB. NAB engineering advisory committee report. (2:40-2:50 p.m.). Benjamin Wolfe (chairman, EAC), Post-Newsweek Stations. Over the past several years, the NAB engineering advisory committee has been confronted with a multitude of technical problems of varying degrees of magnitude. The areas of concern have dealt with such diversified subjects as TV and land-mobile allocations; operator licensing, AM/FM/TV transmission characteristics, remote control, the efficient use of the spectrum, and the restructuring of the commission's technical rules and regulations. This report, presented by the chairman, will cover the most important aspects of the committee's deliberations during the past year.

Joint committee for inter-society coordination report. (2:50-3:00 p.m.). Blair Benson, Society of Motion Picture & Television Engineers. During the past several years, JCIC has been engaged in a number of committee activities looking toward enhancing the technical performance of television broadcasting. The three areas presently under review are 1) improving color compatability; 2) the use of television broadcast ancillary signals, and 3) Investigating possible improvements to television sound, the latter two being now in the formulative stage. This report will discuss in detail the status of these present efforts and the timetable for each task.

Electronics news gathering. (3-3:25 p.m.). Ray Schneider, CBS-TV. Evolutionary improvements and reductions in size of electronic cameras and video-tape equipment have reached the point where serious considerations can be given to using live transmission and videotape for coverage of hard news. A summary of the results of the results obtained from two years operating experience with portable electronic newsgathering systems for television is presented. The systems, comprising hand-held color cameras, portable video-tape recorders and microwave relay equipment,

These men will be up front at the engineering conference (more pictures on following pages)...

James Lundquist Bcst Electronics

A. E. Jackson RCA

R. E. Graiff ABC

Broadcasting Mar 19 1973 71 are described. Samples of actual program material broadcast, both live and videotaped, are displayed. The paper describes the results obtained with these newsgathering systems.

FCC/industry technical panel. (3:30-5:00 p.m.). Moderator: James D. Parker, CBS-TV. Panel: Walter Alliss Jr., KCRG-AM-TV Cedar Rapids, Iowa; Albert H. Chismark, Broadcast Division. Meredith Corp.; Robert Flanders, WRTV(TV) Indianapolis; Wallace E. Johnson, chief, Broadcast Bureau, FCC; Harold L. Kassens, assistant chief, Broadcast Bureau, FCC; Harold G. Kelley, Assistant Chief, broadcast facilities div., Broadcast Bureau, FCC, A highlight of the broadcast engineering conference has always been the exchange of ideas and information between the commission's staff and the conferees. To facilitate this exchange of information, a panel session consisting of three commission and three industry representatives has been scheduled for presentation. The panel will attempt to answer all technical questions related to broadcasting and will also engage in a discussion of the fundamental philosophy from which the present FCC technical rules were adopted.

Tuesday, March 27

Radio technical session. Diplomat room, SH. 9 a.m.-12 noon. Presiding: A. Paul Willey, Berkshire Broadcasting. Coordinator: Lesile S. Learned, Mutual Broadcasting.

The broadcast cartridge today. (9:00-9:25 a.m.). James A. Lundquist, Broadcast Electronics. The areas of concern to manufacturers to tape cartridge equipment is one of customer satisfaction with his equipment. A discussion of the cartridge as related to equipment and operational problems pertaining to both are a fundamental part of this paper. Areas concerning improvements in cartridge designed relating to overall improvements in the tape cartridge equipment are included. Also contained within this talk is a discussion of the critical phase requirements for stereo and stereo/monophonic performance including the various methods and their advantages and disadvantages.

Measuring and adjusting the FM stereo system. (9:30-9:55 a.m.). Arthur K. Peters, consulting engineer. Today's stereo FM system is composed of basic signals called left channel, right channel, main channel and sub-channel signals. This paper explores amplitudes and relative phases of these signals and determines limits of variations which will maintain the signal within the tolerances prescribed by the FCC rules and regulation. Quadraphonic encoding is discussed. Potential problem areas for the FM broadcaster are explored and remedies are recommended in case such problems should arise. System configurations are recommended which would tend to minimize potential errors and problems. Methods of testing and varification of system performance are explored using the standard FM stereo monitoring equipment required by the FCC.

The evaluation and correction of AM transmitter deficiencies. (10:00-10:25 a.m.). George Endres, RKO General. Over the past several years additional emphasis has been placed upon the use of highly processed program material. Such processing enhances in many instances the audio performance of the program content but has produced dilitory effects upon the transmitter and its ability to handle certain types of audio material. This paper will discuss the problems associated with transmitter deficiencies as they relate to handling highly processed material.

Amplitude modulation, 1973. (10:30-10:55 a.m.). Ronald E. Graiff, ABC. Recent FCC rule changes in the maximum amount of modulation permitted by AM stations, and an increased awareness of broadcasters that the percentage of modulation affects the listenability of AM radio have made 1973 the year for use use of new ideas in achieving, controlling and monitoring amplitude modulation. Described in this paper are techniques and equipment that may be employed to achieve and control higher and more consistend modulation averages. Coupled with these improved modulation techniques, methods to monitor and ascertain the effects of improved modulation on the AM broadcast system, by utilizing spectral techniques, will be described.

FM translators. (11:00-11:25 a.m.). Robert A. Jones, consulting engineer. This talk covers two important aspects of FM translator use. First is a comprehensive review of the FCC rules and regulations and engineering requirements including a slide presentation of how translators can be employed by FM broadcasters. The second half of the paper would include a description and slides of existing FM translators in use. By describing and defining the various parts of the FM translator system, its operation and simplicity can be made apparent. Emphasis will be placed upon the use of solid-state techniques.

The new WGH radio broadcast facilities. (11:30 a.m. to 12 noon). J. W. Looper, Hampton Roads Broadcasting. Several years ago an extensive modernization program was instituted and during this period the station developed into a four-site operation in three separate cities. The design philosophy of the two major studio sites and the two separate transmitter sites will be discussed, as will the attendant problems of operating a multiside facility. Slides of the construction and the finished studio and transmitter sites will be shown.

Television technical session. Palladian room, SH. 9 a.m.-12 noon. Presiding: Albin R. Hillstrom, KOOL-AM-FM-TV Phoenix. Coordinator: James H. Hoke, Southern Broadcasting.

Active if group delay correction of television transmitters. (9:00-9:25 a.m.). Leon J. Stanger, Gates Division, Harris Intertype. Television broadcasting is now at a point in

Knowledgeable CATV operators expect <u>experience</u> from Jerrold

EXPERIENCE: These 27 specialists, with a combined total of almost six centuries of CATV experience, are at your service—with practical solutions to even the most difficult CATV problems. And these men and women are just a few members of our skilled organization.

Frankly, we could write a book "telling you" about Jerrold's 1233 people, and how they can help you.

For total system capability — backed by proven performance, dependable products and skilled personnel — look to Jerrold Electronics Corporation, the leader in CATV.

FIRST IN CATV

a GENERAL INSTRUMENT company

time where both the viewer and the broadcaster are demanding better equipment for true, life-like color television transmission. This trend is leading toward and tightening of engineering specifications and we are becoming more conscious of the technical parameters associated with the transmission of the television signal. Group delay is one type of distortion whereby one signal passes through the system in more or less time than another signal. This paper will acquaint the audience with recent advances in group delay equalization techniques.

TV station weather radar-the technical considerations. (9:25-9:40 a.m.). Walter B. Miles, Technology Service Corp. TV stations frequently become interested in weather radar, because of its programing potential, without a thorough quantitative understanding of the capabilities and limitations of this equipment. This paper is written for the chief engineer and meteorologist/weather forecaster. Factors which should be considered when planning a radar installation are discussed, including the difficult trade-offs which must be made between sensitivity, penetration and resolution, all vs. r-f wavelength. The empirical relationship between rain intensity and receiver signal level is described along with some practical methods for estimating storm intensity by simple interpretation of the cathode-ray tube display. The factors involved in antenna siting, electromagnetic interference and personnel safety are also discussed.

A low-cost TV logging system. (9:45-10:10 a.m.). Robert H. Barnaby, NBC. This paper describes a low cost video logger tape machine which is in daily use to record both picture and sound signals operating with half-inch tape and a speed of ½ of an inch per second. The picture signal is recorded at a rate of 2½ frames per second and the sound signal bandwidth is 200 to 1200 Hz. The quality of both picture and sound signals is a compromise, but both signals are quite acceptable for internal legal and news reference use. The logger also has likely application as a replacement for the written program log.

Helical scan video recorders for broadcast use panel. (10:15-11:00 a.m.). Moderator: Edward H. Herlihy, Kaiser Broadcasting. Panel: Charles Anderson, Ampex Corp.; Keith Y. Reynolds, International Video Corp.; Stan Becker, Echo Science Corp.; C. R. Paulson, Television Microtime Inc. For many years the broadcasting industry has relied solely on video-tape recording equipment designed upon the Quadruplex (fourhead) principle. Within recent years another system of video recording has evolved which could have a substantial impact upon the broadcasting system. This panel composed of four experts in the field of magnetic recording moderated by a station representative will discuss in detail the feasibility and practicality of utilizing helical scan video recorders for broadcast use. TV automation design concepts. (11:00-11:25 a.m.). Robert J. Torpey, Richmond Hill Laboratories. This paper will take a brief look at the evolution of the automatic control of broadcasting, first in radio and then in television, and will discuss the shortcomings of the various approaches to the problem which have been taken in the past. The talk will travers from the early automation system to present day techniques utilizing minicomputers and will discuss in detail a system concept that will operate in parallel with the manual control.

Automatic film handling techniques for television. (11:30 a.m. to 12 noon). A. H. Lind and A. E. Jackson, Broadcast Systems Division, RCA. This paper will discuss a recent survey of automatic film handling techniques. Included will be an evaluation of the various techniques which have been proposed or employed in the past. A proposed approach for automatic film projection for use in TV station automation systems will be discussed.

Engineering luncheon. Blue room, SH. 12:30-2 p.m. Presiding: Ernest L. Adams,

Cox Broadcasting. Invocation: The Rt. Rev. John T. Walker, suffragan bishop, Episcopal Diocese of Washington. Presentation of the Engineering Award to: A. James Ebel, President, KOLN-TV Lincoln, Neb., by: George W. Bartlett, vice president for engineering, NAB. Remarks: Mr. Ebel. Address: Richard Cupka, Purdue University.

Wednesday, March 28

Engineering assembly. Palladian room. SH. 9 a.m.-12 noon. Presiding: Frank L. Flemming, NBC. Coordinator: James D. Parker, CBS-TV.

Digiplex, a digital one line machine control system. (9:00-9:25 a.m.). Al Busch, Sarkes Tarzian. This paper discusses a switching system designed to route 96 inputs to 100 outputs. Selections can be made by switch, by keyboard, or by computer from one or many positions. The crosspoint circuitry occupies ony 60 Inches of rack space. This great density is achieved with improved path delay control and increased signal path separation. A significant decrease in cost results from simplified interconnections and reduced hardware requirements. The control circuitry utilizes computer MSI transmission circuitry. A single looped line connects all control points with the central switch racks. The use of address coding and of polling techniques provides the means to simplify interconnections.

Mini-computers for the control of broadcast facilities. (Three separate papers.) (9:30-10:30 a.m.). William J. Clark, RKO General; John Webster, Moseley Associates; Robert R. Rulifson, Spantronics Engineering. Considerable interest has been expressed in recent months concerning the use of minicomputers for the control of broadcast. facilitiles. Three individual papers will be delivered on this all important subject which will include not only control of the complete transmission system but indi-

Buy The New Price Is Right from Viacom and put it in a prime-time access period.

Here is the kind of return you can expect on your investment. In its first season...

The New Price Is Right wins the highest metro rating in its time period for 31 stations;

The New Price Is Right wins the most women viewers in its time period for 38 stations;

The New Price Is Right wins an average 31% more women than year-ago programs for 40 stations;

The New Price Is Right wins an average 45% more women than lead-in programs for 40 stations.

You can clean up, too. If you're willing to play the Price. The New Price Is Right wins the highest metro rating in its time period for 31 stations

vidual system components as well.

A manual local/remote chroma level and delay corrector. (10:35-11:00 a.m.). Frederick C. Everett, engineering consultant. By now the initial problems associated with installing color TV have been largely overcome in those countries which led its introduction, more effort is now being placed upon improving the picture quality. Picture Impairment can now be quantified both in engineering parlance (K-ratings) and program parlance (just-noticeable difference ratings.) This paper describes a new low cost equipment which can be installed permanently into the video route, and provides the means by which relative chroma level, and relative chroma delay inequalitles can be corrected during or before program time. The operation and performance of this unit is described in relation to a code of practice that has been announced recently by the British Television Authority.

Recent developments in remote control of studio television cameras. (11:00-11:25 a.m.). Ian Young, Power-Optics. Recent developments in the remote control of studio television cameras are reviewed. Particular attention is paid to systems with electronic stores, and their applications in computer operated stations. These vary from simple systems in which the computer is used to recall pre-stored camera positions to more complex tracking requirements. The use of the same techniques for computer controlled X-Y tables for caption and animation is discussed. It is indicated how combinations for these and other methods can be applied specifically in making educational material, as well as news and current affairs. Finally, the use of cameras in remote studios controlled over telephone pairs is described particularly as a means of handling political and other interviews.

Modernization of television station production facilities. (11:30 a.m. to 12 noon). I. S. Rosner, Rosner Lamb. The last major television production facilities updating of

many broadcasters occurred in the mld or late 1950's when converting from monochrome to color production. Although periodic Improvements and addition to the facilities have taken place over the last fifteen years, most of these facilities are an inefficient mesh of obsolete and modern equipment. Vacuum-tube and solid-state equipment operate side by side, intercommunications facilities are inadequate for current operations, and advantage cannot be taken of recent advances in pulse distribution, switching and automation that permit space reduction, improved reliability and Improved efficiency. Recent experience with redesign of such facilities at television stations to take advantage of current cost effective techniques and equipment is described and illustrated.

Joint management and engineering luncheon. Sheraton Hali, SP. 12:30-2:30 p.m.

Equipment exhibits

Following are broadcast-equipment manufacturers that will be displaying and demonstrating their wares in the Sheraton Park and Shoreham exhibit areas (on pages 84-85 are floor plans for the exhibit areas in each hotel). Capsule listings Include the firm's name, the location at either hotel (SP for Sheraton Park; SH for Shoreham), the firm's headquarters location, the products the firm will be exhibiting and the firm's personnel in attendance. These listings are based on information available as *Broadcasting* went to press.

Acrodyne Industries

SH610

P.O. Box 5191, Huntsville, Ala. Product: Custom television-switching sys-

tems; test equipment; "preset-take" event programers; sync systems; video-pulse and audio distribution amplifiers. *Personnel:* Charles W. Byrd, Hal Bjorklund, Dwight Wilcox, Herb Holzberg, Frank Zimmerman, Dewey Radden, Dick Farris.

American Electronics SH556

P.O. Box 458, Highway 15 South, St. George, S.C.

Product: Telephone-line remote broadcasting equipment packaged in portable attache case, with complete remote amplifier built inside a model-500 type telephone, complete with microphone, headset, mike stand, and attache case. *Personnel:* Clarence Jones, Margaret Jones, Riki Middleton, Helenann Klukowski, J. T. Greene, III.

American Electronic Laboratories SP215 P.O. Box 552, Lansdale, Pa. 19446

Product: FM 2.5 KD 2500 w FM transmitter FM 25/25 KD 50 kw FM transmitter; FM exciter 2202A; Stereo generator 2213; AM-50 KD 50 kw AM broadcast transmitter. Personnel: R. Newbrook, D. Richardson, E. Sudol, N. Goldich, B. Bernard, R. Markowitz, Dr. L. Riebman, C. J. Fowler, A. Rosset.

American Telephone & Telegraph SH527 680 Fifth Avenue, New York 10019

Product: Demonstrations of PBX equipment for total administrative operation; the portable conference telephone and voice coupler for remote pickups over the Bell System network. *Personnel:* R. T. Shawhan.

Ampex Corp.

SP200

401 Broadway, Redwood City, Calif. Product: Videotape television recorders for color and monochrome broadcast use; video cassette recorders for color and mono broadcast are: RA-4000 random access programmers; videotape television recorders for color and monochrome closed-circuit use; color cameras for broadcast use; television disc recorders, professional audio recorders for studio and mastering use, magnetic tape products. *Personnel:* Charles Steinberg, Byron Olerich, Jack Porter, Tom Davis, Don Kleffman, Dick Sirinsky, Michael Felix, Frank Thompson, Norm Bounsall, Al Slater, Frank Nault, Paul Hansil, Len Hase, Ken Herring, Grant Easton, Bill Ebell, Jack Flynn, Frank Rush, Arnold Taylor, Bob Beene, Tom Johnston, Roger Miller, Keith Price, Jim Sims, Ron Alsin, Tom Clements, Dick Coomes, Chuck Wright, Tom Nielson, Marv Wachtel, Russ Williams, Len Willig, Ron Ballintine, Dave Chapman, Paul Weber, Bruce McGilaway.

Andrew Corp.

10500 West 153rd Street, Orland Park, III.

Product: Heliax cables, Rigid lines, Coaxial switches. Personnel: Harold Detlefs, John Pryjma, Stuart Sloane, William Moore, Robert Bickel, William Stansfield, H. Woodbury.

Angenieux Corp. of America SP109

440 Metrick Road, Oceanside, N.Y. 11572 Product: The only turreted lens in the world, the Angenieux 15- to 1- with electrically changed range extenders, wide-angle and extreme close focusing; all major 16mm motion-picture cameras will again be assembled at the exhibit; new 10x12AV30DA, automatic-iris zoom lens with one-inch viewfinder, will be exhibited for the first time. *Personnel:* John Wallace, Bern Levy, Ken Rice, Robert Jagemann, Bernard Angenieux, John Moret, H. Hopson, A. Masson, Walter David.

Asaca Corp. of America

1289 Rand Road, Des Plaines, Ill. 60016

Product: Three-tube color, portable, lightweight broadcast camera, that can be carried and operated by one man; black-andwhite CCTV cameras and monitors, pan and tilts and all accessories for CCTV lines for surveillance, security and educational purposes. *Personnel:* N. Shigezaki, J. Nashimoto, Y. Yamashita, J. Kudo, T. Furuta, Joseph Clark, Al. Reinberg.

Audio Devices

SP214

SH522A

100 Research Drive, Glenbrook, Conn. 06906 Product: Broadcast cartridges, magnetic film, professional tape, mastering tape, cassettes. Personnel: G. Powell, H. Preston, L. Longo, E. Dougherty, W. Clarke, R. Prescott, W. Dawson, F. Ticheli, W. Woodruff, S. Ferrara, R. Manierre, J. Mannix.

B. T. Vision, Inc.

One Jake Brown Road, Old Bridge, N.J. 08857

Product: B. T. Vision over-the-air subscription system. Personnel: Isaac Blonder, George Bahue, Joseph Glash, Kant Mistry, Pete Sepesi, Mirten Sperber.

Belar Electronics Laboratory SH544

P.O. Box 826, Devon, Pa. 19333

Product: TV, AM, FM, stereo, and SCA fre-

quency and modulation-monitoring systems. *Personnel:* Arno M. Meyer, Isobel W. Meyer, Edward S. K. Chien, John J. Quinn, Manuel Krangel, Russell Medkeff, Edward Eastlack, Harry Klaus.

Berkey Colortran SP303

1015 Chestnut Street, Burbank, Calif. 91502 Product: Lighting equipment, studio and location; dimming systems; electrical distribution. Personnel: Joseph Tawil, Marion Rimmer, Tom Pincu, Ed Gallagher, Phil Stidham, Paul Roscorla, Jon Clayton, Gene Murphy, Walter Brewer.

Beston Electronics SH700-01

#20 on the Mall Shopping Center, Prairie Village, Kan. 66208

Product: Automatic light control for large and small image film chains; video special effects unit with new Wondra-Wipe oscilloscope vector display. Personnel: B. J. Lipari, Donald R. MacClymont, Robert Bachus, Steve Stephens, David Anderson.

Bird Electronic Corp. SH539

30303 Aurora Road, Cleveland (Solon) Product: Quality instruments and components for RF power measurement: RF directional thruliner wattmeters and lab standards:

RF absorption wattmeters and line terminations; 2w to 100 kw coaxial loads and attenuators: RF power and VSWR monitors; coaxial filters, couplers and filter-couplers; coax switches. RF power sensors for OEM transmitters. New aircooled loads and selfcontained heat-exchanger loads. Personnel: T. Bonsky, R. Chakerian, G. Johns, H. O'Neill, R. J. Tanczos.

Boston Insulated Wire & Cable SP322 65 Bay Street, Dorchester, Mass. 02125

Broadcast Computer Services SH533 1500 Garden of the Gods Road, Colorado Springs, Colo. 80907

Product: Fully automated and computerized radio and television traffic/accounting system utilizing on-line, real-time mini-computers, remote batch terminals and communication network. Personnel: Richard E. W. Smith, Jack Finlayson, George Beattie, Bev Trentz, Doug Carpenter, Warren Nelson, Al Larabee.

Broadcast Electronics (Spotmaster) SP107 8810 Brookville Road, Silver Spring, Md.

Product: New Three-70 mini playback tape cartridge unit in addition to the Ten-70, mini 303s and 305c multiple-deck playback systems; Titlemaster character generator interfaced to standard audio systems for data storage; complete line of studio control audio equipment for the broadcaster; audio consoles; on-air lights and microphones. Personnel: John Neff, Leo Darrigo, Gene

Bidun, Don Herman, Mel Black, Dick Richards, D. Bain, R. Crider, M. Crosby, C. Cunningham, W. Davies, H. Decker, C. Droke, T. Duncan, W. Fisher, B. Garvin, A. Greeson, B. Hayford, J. Kellner, R. Maze. C. Overton, E. Pelly, G. Riggins, H. Segall, R. Swanson, P. Thompson.

Broadcast Products 660 Lofstrand Lane, Rockville, Md.

SH514

SP103

Product: Broadcast automation-audio consoles and equipment, computers for broadcast traffic and accounting, logging systems; 60-tray instant-access cartridge machine, stationmaster.

CBS Laboratories

227 High Ridge Road, Stamford, Conn. 06905 Product: FM stereo Volumax; automatic peak controller; audio distribution amplifier, Audimax; automatic peak controller, and the new dynamic presence equalizer; video processing amplifier, sync pulse generator, calibration test generator, and the video distribution amplifier. Also featured will be color corrector, NTSC chroma keyer, comb filter decoder, CBS Laboratorles VIR correction system and Vidifont Systems. Personnel: Joseph Amalfitano, John Camarda, Robert Cochran, Langdon Cook, Robert Daines, Michael Davis, Robert Estony, Thomas Hindle, Marvin Kronenberg, Renville McMann, Gerald Miller, Joseph Piczko, Alan Schoenberg, Clyde Smith, Patricia Siciliano, Ben Van Benthem, Stephen Kreinik.

CCA Electronics Corp.

SP224

716 Jersey Avenue, Gloucester, N.J. 08030' Product: UHF and VHF television transmitters from 10 watts to 110 kw; AM and FM broadcast transmitters from 10 watts to 50kw; VHF and UHF TV antennas; FM broadcast antennas; audio consoles; audio cartridge equipment; studio-transmitter links; VHF and UHF remote pick-up; automation and monitoring equipment. Personnel: Len West, Jorge Bicocchi, Bernard Wise, Robert D. Sidwell, Bernard Gelman, Joseph J. Fox, Joel Weinrott, Bruce Emonson, Les Davis, Jerome Bresson, John Greenbaum, Edward Perkins, Richard Raiczyk, Mel Gollub, Joseph Ponist, Herb Rand, William Hoffman, Carlos Caballero, Miguel Cabrera, Leroy Wallace, Ridie DiVietro, Alfredo Lopez, Byron Mobus, Joseph Donovan, Will Connelly, Edward De La Hunt, Claude Hill, Alan Roycroft, Jack Pruitt, Gorden DuVall, William Moats, Morris J. Jones, Howard Dempsey, Gordon Keener, William Barry, Walter Adams, Charles Hallinan, John Ring, Arthur Constantine, William Costroff.

CMX Systems

SH502

635 Vagueros, Sunnyvale, Calif. 94086 Product: Video-tape editing systems. Personnel: W. F. Emmons, M. Okamoto, W. H. Butler, G. G. Heitel, D. W. Bargen, G. V. Kaufhotz, S. McCollom, C. D. Labmeier, K. Scherzinger,

Canon USA

SH507 10 Nevada Drive, Lake Success, N. Y.

Product: Lenses for television cameras including a new 12-to-1 wide zoom lens and a double zoom lens employed with existing 17-to-1 zoom lens. Personnel: Dick Turchen, Paul Powers, Arthur Kramer, Mike Momosawa, Mark Miyaoka.

We don't play the number game at AELCC . . . except where you're concerned. Because, regardless of your company size, you're important to us. You're Number 1.

That's why you'll always receive personal attention . . . your requirements are always our prime concern.

That's why you'll always receive total customer service—regardless of the size of your requirements—from initial design and consultation through complete construction and testing that's AELCC's complete turnkey capability! That's why you'll always obtain completely flexible and convenient financial arrangements—long term or short—to fill your needs.

So, if you're thinking of acquiring, completing, up-grading or expanding a CATV system, contact AELCC . . . let us prove we back our promise with performance.

AEL COMMUNICATIONS CORPORATION The CATV Subsidiary of AMERICAN ELECTRONIC LABORATORIES, INC. P.O. Box 507, Lansdale, Pa. 19446 (215) 822-2929 • TWX: 510-661-4976 Cable: AMERLAB

Have a head

Requirements and procedures are defined on back of certificate. Ask your Ampex tape specialist for your personal copy.

rework-on us.

Ampex 175 video tape has the lowest head wear of any tape on the market.

To prove it, a certificate like this sample is yours when you buy 100 hours of our tape.

The certificate will pay the cost of reworking your Ampex video head wheel.

If Ampex 175 didn't have the lowest head wear we wouldn't make this offer.

Take advantage of it now—the offer expires June 30, 1973.

Call your Ampex tape sales office listed below. NEW YORK (Hackensack, New Jersey), (201) 489-7400 D.C. (Bethesda, Maryland), (301) 530-8800 CHICAGO (Elk Grove Village, Illinois), (312) 593-6000 ATLANTA, Georgia, (404) 633-4131 DALLAS, Texas, (214) 637-5100 LOS ANGELES (Glendale), California, (213) 240-5000

Product: Dynair series 5100 video switching system, new series-X routing switcher, audio/ video, solid-state modulator, and new SE-70A special-effects generator. Personnel: E. G. Gramman, Max Ellison, George Bates, Dwain Keller, Gary Beeson, Ken Stone, Mike Bingham, Bill Killion, F. R. C. Bernard.

Eastman Kodak Co. 343 State Street, Rochester, N.Y.

Product: Kodak Videofilm Express, located in parking lot, equipped with ME-4 processing machine and telecine film chain incorporating Eastman 16mm television projector.

model CT-500, and Eastman Super 8 Videofilm projector, model TV-M100A, Filmed interviews will be produced and displayed in Kodak booth. Personnel: M. Ciganovic, F. J. Eberhardt, R. W. Hardisty, T. J. Hargrave Jr., R. G. Hufford, P. B. Hinds, W. H. Low Jr., J. A. Pistor, F. R. Reinking, . F. Schroth, H. L. Vincent.

Echo Science Corp. SH612 485 East Middlefield Road, Mountain View, Calif.

Product: New high-band, color video-tape recorders; portable WR201C records onehalf hour on internal battery; weighs only 38 pounds; WRR411C, in tabletop and console versions, performs on a par with traditional quad VTR's; features modular plug-in head assembly, continuous time base and velocity correction, sync processing; insert and assemble editing. Personnel: J. Fred Fisher, Stan Becker, Don Prather, Sid Damron, Eric Harris, Frazier Morrison, Alex Maxey, Don Cochran, Guido Salcedo, Ben Everett, Art Strahm, Joe Chupity, Wayne Jorgensen, Doug Campbell.

Editel Productions Parking lot SH 24151 Telegraph, Southfield, Mich. 48075

Eimac Division Varian Associates SH523 301 Industrial Way, San Carios, Calif. 94070 (See listing Varian Associates.)

Electro Sound SH604 725 Kifer Road, Sunnyvale, Calif. Product: Professional recorder and accessories: in-cassette duplicator with reel-toreel; professional sound components and accessories. Personnel: Mort Fujii, Dave Lint, Hank Bogardus, George Rehklau, Al Weintraub.

Electronics, Missiles & Communications SP316

P.O. Box 116, White Haven, Pa. 18661

Product: UHF-VHF TV translators, 1 w-1 kw; UHF-VHF TV transmitters, low power to 1 kw; 2500 mhz transmitters (I.T.E.S.) and receiving converters; 2150 mhz multipoint distribution service transmitters and receivers; UHF, VHF and I.T.F.S. transmitting antennas. Personnel: Ross V. Swain, Stephan Koppelman, Don Meier, Robert Unatich, Jim DeStephans.

Fairchild/Robins Sound Equipment Corp. SP309

75 Austin Boulevard, Commack, N.Y.

Product: Professional audio equipment and systems. Custom or stock. Personnel: Herman H. Post, George Alexandrovich Sr., Rick C. Belmont.

Fax-Net Inc.

SH554 200 Park Avenue, suite 303 east, New York 10017

Product: Facsimile equipment for broadcast services will be demonstrated. Personnel: John Porterfield, William Allaun, William Berton, Fritz Doepke, W. G. H. Finch, Joseph Hall, Tom ott, Carol Winberg, Dan Samels, Ian Smith, Douglas indsley, James Schafehen, Bob Grimshaw, Ed West.

Fernseh Division Robert Bosch Corp.

SH526

2800 South 25th Avenue, Broadview, III.

Product: Color cameras; portable color cameras; hand-held color cameras; color film chain; closed-circuit TV color camera; film programmer; video monitors. Personnel: R. F. Goodspeed, T. Barker, A. R. Pignoni, R. Bass, G. Howard, L. Wolff, B. Manahan, J. Morrison, K. P. Prieur, G. R. Walker, H. H. Schirmer, G. Bego, H. P. Lachner, J. R. Schroeder, D. Schneider, H. Zarius, O. Oechsner, H. Groll, H. Wagner, H. Zahn, W. Montgomery.

Fidelipac SH511 **Division of Telepro Industries**

3 Olney Avenue, Cherry Hill, N.J. 08002

Product: Fidelipac NAB cartridges models 300, 350, 600, and 1200; cartridge racks; bulk tape erasers; test cartridges. Personnel: Dennis W. Boardman, Roger W. Cappello, Joseph A. McHugh, Peter J. Harvey, Charles L. Townsend.

Fort Worth Tower Co. SH308 5201 Bridge Street, Box 8597, Fort Worth, Tex. 76112

Product: Towers-equipment buildings-erection service. Personnel: T. W. (Tommy) Moore, T. F. (Fred) Moore, B. Moore, A. C. Tilton.

GTE Sylvania	SP304
Lighting Center, Da	nvers, Mass.

Product: Tungsten halogen lamps for studio lighting. Personnel: Jim Davis, Don Canfield, Jim O'Keefe, Bob Witt.

Every piece in the flow is essential. However, it would be a lot more profitable, for broadcasters, station reps and advertising agencies, if there weren't so many ways for communications to break down and for paperwork to pile up.

Broadcast Data Base is the independent company that provides the entire broadcast/advertising community the overview and means for day-to-day control.

BDB keeps information and dollars flowing in the right direction... for everyone.

How?

BDB gives stations and their reps access to a continually updated data base provided and maintained by the advertising agency.

When the station and the agency are in complete harmony about broadcast schedules. many positive things begin to happen. Trafficking and billing problems disappear. With discrepancies cut dramatically, there's more inventory to sell and average spot dollar values climb. Prompt, troublefree agency payments result immediately along with lower administrative costs.

Why not make 1973 the most profitable year yet for your station. You ought to find out now more about how BDB can help you and your rep strengthen your entire business relationship with customers like Young & Rubicam, J. Walter Thompson, Benton & Bowles, Foote, Cone & Belding, Compton, Grey, SSC&B, Grey-North, Needham Harper & Steers, N. W. Ayer. These and other agencies participating in the BDB service represent over \$750 million in national spot advertising. And there's more coming.

BDB can show you how effectively its service works for you in just a few minutes. There are no start up costs or changes in any of your current internal systems. You can start enjoying immediately all of the benefits that BDB provides.

Broadcast Data Base service ... it does make a difference.

For a free wall-size reproduction of this Spot TV Flow Chart, send your name and address on your letterhead.

Houston Photo Products SH613 P.O. Box 5269, Yuma, Ariz.

Product: New Houston Cine-Pro ME-4-16mm Ektachrome color-film processor, with speed of 24 feet per minute. *Personnel:* John S. Houston, Edward J. Tait, Angeline F. Tait.

IBM Corp.

1133 Westchester Avenue, White Plains, N.Y.

You won't believe what we did to the TAPEX cartridge.

We threw out pressure pads for starters. Big deal? You bet it is. Because pads cause unnecessary wear on the tape and heads. With Tapex, you get longer life on both.

So now you ask, "how do you keep the tape on the head?" Easy. Tension is set on each Tapex Cartridge at the factory, And a unique stereo phase stabilizer keeps the tension just right during use.

This is just one way we've made Tapex a little better. Find out the rest. Write for details today.

Tapex Corporation/P.O. Box 796/West Des Moines, Ia. 50265 YES! Please send me a detailed Tapex Cartridge flyer and price list.

The Chevrolet Syndication Team Welcomes TV Executives to Washington, D.C.

You are Cordially Invited to Visit Hospitality Suite 257-F at the Shoreham Hotel and View Our Series for the 1973-1974 Season . . .

- Stand Up and Cheer
- The Wacky World of Jonathan Winters

and Our Specials for This Spring . . .

- The Chevrolet Challenge Cup (International Golf)
- The 1972 All-American Football Team
- Andy Griffith Discovers the Great Roads of America

CHEVROLET Your Hosts: Bill Kennedy, Jim Beavers, Dick Peterson

Greg Garrison Productions, Inc.

Pierre Cossette Co., Inc.

ANNOUNCING. A NEW SYNDICATION DINISION AT TAV.

Let us sell your show:

We have just opened a new division to handle station clearances. Do you want high national coverage? Minimum markets? Barter? Or do you just want to sell that show station by station?

We have two fine men:

Leslie Wallwork and Jim Isaacs are the team that cleared all the Chevrolet shows and Kal Kan's Animal World in all the top 10 markets and on 80 stations. Talk about experience!

We do it all under one roof:

We'll shoot your show, edit it, place it and clear stations for you and handle all logistics. After all, we started the tape lease program.

Call us. Just about everybody does.

Product: One-gun color video monitors featuring new CR 6700 17-inch broadcast color monitors; 6210 series 12-inch broadcast color monitors; World video CCTV products. Personnel: Jack Taylor, Ron Moyer, Phil Steyaert, Paul Milazzo, Dwight Wilcox, Lew Radford, Steve Cisler, Mike Dyer, Herb Didier, Carroll Cunningham, Oliver Berliner, Roy Phillips.

Eyes will be on access slots as programers head for NAB

Production firms hope presence of station executives will prompt deals not made at the NATPE; freed prime-time periods looked to for boost in sales

With the prime-time-access rule assured of continuing through the 1973-74 season, program producers and syndicators will converge at the National Association of Broadcasters convention in Washington next week with a bumper crop of new series and specials.

More than 60 new properties will be promoted in hospitality suites, lobbies and corridors of the Shoreham, Sheraton Park, Mayflower and Washington Hilton hotels to garner a spot in coveted access time.

Only a handful of the entries can realistically hope to land available spots in the 7:30-8 p.m. niche. The competition will be fierce from the fresh product of tried-and-true series, such as Let's Make a Deal, Hee Haw, Lawrence Welk Show, Young Dr. Kildare, Truth or Consequences and other re-makes of network series.

Many of the projected series are only in the conceptual or pilot stage and fullscale production will proceed only if a key owned-and-operated sale, or a sponsor-syndicated (barter) arrangement is completed.

New product at the NAB this year has, at least, a higher degree of visibility than in previous years. The preponderance of programing was exposed at the confer-ence of the National Association of Television Program Executives in New Orleans last month (BROADCASTING, Feb. 12 et. seq.) and syndicators are hopeful that properties liked by program directors will wind up in the sales column when general managers and other station executives see them or hear about them at the NAB.

If statistics are an apt criterion, the NATPE looms as a preferred forum for syndicators. More than 60 distributors showed their wares at the NATPE last

TWO NEW TEST INSTRUMENTS FOR DIRECTIONAL ANTENNAS

FSM-1 FIELD STRENGTH METER

Frequency: Any frequency in the AM band Field Strength Range: 100µ V/m to 1 V/m **Power: Internal battery** Size: 5-1/2" x 8" x 5" (closed) Weight: 4-3/4 lbs. with batteries Calibration certificate supplied

DAM-1 DIGITAL ANTENNA MONITOR

Frequency: Any frequency in the AM band; Phase Range: +180°; Phase Accuracy: +1.0°; Phase Resolution: +0.1°; Ratio Range: 0.100 to 2.000; Ratio Accuracy: +2.0%; Ratio Resolution: +0.001; Input Impedance: 50 or 75 ohms

Delta's new Field Strength Meter and Digital Antenna Monitor will help keep your directional antenna system within FCC specifications.

The DAM-1 Antenna Monitor meets the new FCC requirements for remote control. It is a true digital instrument using the latest integrated circuit and TTL techniques. Reads phase and true current ratio for up to six towers with different reference towers and different powers for DA-2. Monitors for larger arrays available on special order.

Delta also offers remote panels and interface units for controlling and reading the DAM-1 Phase Meter over multiconductor, two wire, UHF, or microwave circuits with no reduction in accuracy.

The FSM-1 Field Strength Meter is smaller and much simpler to operate than other field strength meters because it is fixed tuned to your frequency by plug-in modules. If you have to check more than one station, order the FSM-1 with additional frequency modules. For monitor point checks and extensive proof of performance work the FSM-1 will minimize errors and speed up field measurements.

DELTA ELECTRONICS, Department A 5534 Port Royal Rd., Springfield, Va. 22151 703/321-9845

DELTA ELECTRONICS NAB Show

Booth 532

Exporter: DELTA ELECTRONICS, INC. International Division, 154 E Boston Post Rd. Mamaroneck, N. Y. 10543. Telex 1 37327, Art Rocke month, while fewer than 40, at last count, have registered for the NAB.

For the most part, it is the smaller syndication companies that attended NATPE and are passing up NAB: Show Biz Inc., Vipro, Arthur Pickens & As-sociates, Fremantle, for example. Among the reasons such firms cited for not going to Washington: NATPE provided better opportunity for showcasing programs; NAB seems more oriented towards engineering than programing; the Washington site, with dispersal of hotels, is a disadvantage.

Some of the larger distribution firms also will be missing from Washington. For several years, Independent Television Corp., National Telefilm Associates and Warner Bros. Television have failed to participate in NAB, and 1973 will not be an exception. But one major distributor that is bypassing the NAB for the first time in many years is Screen Gems. A spokesman was reluctant to elaborate, but indicated the Washington locale was a factor.

For the first time, the world's largest advertising agency, the J. Walter Thompson Co. will exhibit at the NAB. A separate company called Survival Anglia Ltd./JWT Syndication (formed out of a British production company and the agency) will have a hospitality suite and is sending a contingent of 10 executives to the convention. A JWT spokesman said the syndication organization will offer programs both for barter and direct sales to stations. Other agencies with NAB hospitality suites are Campbell-Ewald, BBDO and Young & Rubicam, exemplifying agency interest in both barter and station sales.

The meat-and-potato offerings at NAB are expected to consist of old and some recently released off-network series, feature films and syndicated programs of recent and old vintage. The cupboard seems lean for new off-networks, except for Worldvision's Mod Squad (MCA-TV earlier this year announced Adam-12, Night Gallery and The Bold Ones). Possible off-network releases for later this year are Mannix, Gunsmoke, Family Af-fair, My Three Sons and Doris Day Show.

New feature-film packages are expected to be released later this year by MGM, 20th Century Fox and United Artists Television, supplementing those

Buster Keaton \star Harry Langdon \star Willie Howard \star Bing Crosby \star Milton Berle \star Joe Cook \star Andy Clyde \star Billy Gilbert \star Danny Kaye \star Bob Hope \star Bert Lahr \star Irene Ryan \star Pert Kelton \star Ritz Brothers \star Vince Barnett \star George Shelton \star Will Mahoney \star Charlotte Greenwood \star Franklin Pangborn \star Vernon Dent \star Ernest Truex \star Tom Patricola \star Joan Davis \star Moran & Mack \star Lloyd Hamilton \star Lupino Lane \star Harry Gribbon \star Plus more great COMEDY MASTERS. Also a special package of SHIRLEY TEMPLE films as "Ouemen Of The Mongets." TEMPLE films as "Queen Of The Moppets."

> DISTRIBUTED BY: BBDO Contact: Hal Katz (212) 355-5800 383 Madison Ave., New York, N.Y. 10017

recently offered by Screen Gems and Warner Bros.

Among the array of first-run properties to be promoted at NAB are Viacom's Addams Family Fun House; Four Star's Jungle Cowboy, There's No Place Like Home and Secrets of the Deep; Vidistrib's Adventures In ESP; Syndicast Services' Arthur of the Britons; Group W's Adventures in Rainbow Country; 20th Century Fox TV's Great Mysteries and Century Theater.

Also, Metromedia Producers Corp.'s Dusty's Trail and Elephant Boy; Avco Program Sales' One for the Money, Paul Dixon Show and Johnny Bench Show; Gottlieb-Taffner's The Story of World War 11; Time-Life Films' Dad's Army, Last of the Mohicans and Tom Brown's School Days; Survival Anglia Ltd./JWT Syndications' Jim Bishop's A Day in the Life of . . . and Never A Dull Moment Starring Virginia Graham and Wolper Television's Dulcie and Popcorn Palace.

Program distributors were optimistic that 1973 would be, overall, a highly satisfactory sales year. They pointed out that 1972 provided a turn-around from 1971 when the effects of the economic recession depressed sales.

Program exhibitors

Following are capsule listings for program producers attending the NAB convention. Listings include the firm's name, its hotel and suite location (SP for Sheraton Park, SH for Shoreham, WH for Washington Hilton, MF for Mayflower), the firm's headquarters location, the programs each firm is making available (with number in parentheses), and the firm's personnel in attendance. Radio programers follow on page 108.

ve" automat can increase profits

Now you can modernize with an automated system that protects your air personality and retains your exact format. SMC protects your profits...from Sign-On to Sign-Off. 2048 separate events — music, commercials, P.S.A.s, network breaks or I.D.s, and a complete English log printed automatically. SMC provides either punched tape or magnetic tape memory loading, both furnished for format changes while your system is "on-air". Simple ten-key adding machine console controls the entire system.

An SMC areaman will glady make a survey of requirements for your particular station programming. Phone us now. Find out the complete profit facts today - without obligation of course. SMC - the broadcast systems engineered for station profitability.

"live" automation

protects your personality

SMC DIGICARD automation programming gives your station full format flexibility with a capacity of 600 program events. At an average of 60 events per hour that's equivalent to 10 full hours of virtually unattended programming. The DIGICARD automated system provides all three random elements required for "live" programming: random audio events, random Carousel tray selection, and network or local news-joins or other time-related events.

Heavy duty plastic, pre-punched cards make up the programming. Each card is one program event (music, jingle, commercial, ID., or talk). Assembled cards in order of play are YOUR PERSONALIZED FORMAT. The DIGICARD will program 16 audio channels and at random select 10 Carousels. Phone or write for complete information on this outstanding time-proven automated system that will protect your profits.

"live" automation

will improve productivity

Use the talents of your best people to their full capabilities. Staff members can actually be in production while they are "on-air" with live automation. The SMC SEQUENTIAL system permits scheduling up to 60 events (spots, music, talk, whatever) from as many as 10 different audio sources. Planned programming is significantly improved with your.

best talents being used constantly rather than on a "shift" basis.

Improve your "live" programming with this easy-to-operate SMC system that you can add to later for future growth. Phone or send for full facts today.

Broadcast Journalisme

RTNDA, NCTA spell out cases for shield law

Harrison tells Ervin hearing that protection must be all-encompassing; Foster says growing role of news in cable necessitates its inclusion

Charles Harrison, president of the Radio Television News Directors Association and David Foster, president of the National Cable Television Association, called for enactment of an absolute newsmen'sprivilege bill last week as the Senate and House wound up several weeks of hearings on legislation to protect journalists' sources and information from government subpoenas.

Appearing before Senator Sam Ervin Jr.'s (D-N.C.) Constitutional Rights Subcommittee, Mr. Harrison said legislation covering state as well as federal proceedings is needed to provide full protection for newsmen. And, in the written statement he submitted to the subcommittee, he pointed to two reasons why broadcast journalists have a particular interest in shield legislation: "First, some government officials and others seek to promote the notion that because radio and television stations are licensed, their news reporting should be less free than in the print media. We reject that concept. Broadcast news must be aggressive and hard-hitting, within professional news standards and ethics. Investigative reporting is becoming more and more an im-portant part of electronic journalism. It must not be hampered; it must receive the same protection as investigative reporting in newspapers and magazines.'

Mr. Harrison also pointed out in his prepared statement that broadcast newsgathering tools are unique and that audio and video outtakes "are as private, and often as confidential, as mental and handwritten notes." We believe they merit the same legal protection, whether they are confidential or not." If newsmen are called on to produce their unused notes, film and tapes, the media will become known as instruments of government surveillance, ...," He also pointed to

FCC

McNaughten.

Imero Fiorentino Associates

the danger that officials would seek such material to determine the fairness of news stories: "They will endeavor to impose their own views of editing on free journalism."

As he indicated he would do several weeks ago, Senator Ervin has introduced a new bill to create a testimonial privilege for newsmen. The measure (S. 1128), offered on March 8 and cosponsored by 11 Senate members, provides that a newsman cannot be compelled by federal or state bodies to disclose the identity of anyone who furnishes him information in his capacity as a newsman if he gave that source assurance that his identity would not be disclosed, and if the information was obtained in the course of the newsman's occupation. Unpublished information is also protected to the extent it was gathered in a professional capacity. But the bill also provides that the newsman may not invoke the privilege if he is called to testify about a crime he has witnessed.

NCTA's Mr. Foster told Representative Robert Kastenmeier's (D-Wis.) Judiciary Subcommittee No. 3, which is also considering shield legislation, that Congress should enact an unqualified bill that would apply to newsmen working for cable-TV systems.

Noting that an increasing number of cable systems at the local level are providing weekly and daily news and publicaffairs programing, Mr. Foster also pointed out that development of regional cable networks is under way and plans are being laid for national cable channels interconnected by satellites.

'One important use for these network channels," he said, "will be to cover news and public-affairs events not now adequately covered because of the singlechannel and time constraints on network and broadcast television." In NCTA's view, he said, "cable communications does have an important press role to play . . . and we believe that a press must be absolutely free from governmental controls. . . .

Restraints on newsmen Canadian hearing to amplify rules

for broadcasters and the police

The Canadian Radio-Television Commission has set April 10 for a public hearing on proposed guidelines for an "effective working relationship" between the com-mercial radio and television broadcasters (as represented by the Canadian Association of Broadcasters) and the country's police chiefs. The guidelines, worked out last December and announced in February, essentially establish that the peace officers of Canada "accept the principle that the public have a right to be kept informed on police and crime news and the operations of police forces," while the broadcasters accept the principle that the police, "cannot always make available specific aspects of current policy activity at any time it may be requested, and, indeed, must not do so."

In calling for an open hearing on the

agreement, the CRTC told stations of expectations "that individual broadcasters will not implement any agreement . . . until consultations with the commission have taken place." The hearing is to be held at Ottawa's Skyline hotel.

The CRTC said that the public hearing was to investigate reports that the mediapeace agencies agreement gives the police greater control over news during a crisis. The commission, in a wire to Donald Hamilton, president of the Canadian Association of Broadcasters, and to Paul Audet, president of the Association Canadienne de la Radio et de la Television de Langue Francaise Inc., pointed out that "any restraint on broadcasters" in the independent dissemination of news "would be a matter of the most serious concern."

Top TV newsmen differ on shield. Whitehead's ploy

But Chancellor, Reasoner, Smith, Cronkite agree that administration's heat on journalism is intense

The reigning anchormen of network television news disagree on the need for a shield law for newsmen, and to some extent on the seriousness of the threat seen in Clay T. Whitehead's celebrated speech on affiliate responsibility for network news, but they are united in belief

This new SMC FORMATTER can improve the flexibility of your existing automation when used as a music formatter. The FORMATTER can run your night time virtually unattended. The FORMATTER programs up to 10 events from any four audio sources you may select (recorder, cart. equipment, Carousels, etc.). There's even a provision for a digital clock for network joins.

Best of all a complete system can cost as little as \$3000 (U.S.) installed in your rack. Phone or send for complete details today on SMC's new FORMATTER.

that the Nixon administration is putting unprecedented pressures on the news media.

John Chancellor of NBC, Walter Cronkite of CBS and Harry Reasoner and Howard K. Smith of ABC gave their views in a roundtable discussion with editors and reporters of the New York Times. Lengthy excerpts from the discussion were published in the Times last Monday (March 12).

Mr. Chancellor didn't see "an awful lot" stemming from the Whitehead speech in terms of practical effects on broadcasters. In his view, "if the FCC should ever decide to take a license away because the station carried the wrong kind of news, the chances are very much that it would be overturned in the courts."

"I do sense a kind of a colder wind," he said, "but we've had a lot of that."

Mr. Cronkite thought it went further: "I think far more important is what it indicates—that there's no retreat on the part of the administration from what I believe to be its firm intent to drag down the press and all of us in broadcast journalism as well."

Mr. Reasoner said he didn't know what Mr. Whitehead meant, "and I don't know that he did," but that there is "an atmosphere within the administration in which this kind of thing is encouraged by anybody who has a bent for it and has a role."

Mr. Smith said he had not seriously disagreed with Vice President Agnew's original attack on network-TV news— "if we give them hell they've got the right to give us hell," Mr. Smith said but that Dr. Whitehead, unlike Mr. Agnew, had proposed "structural changes" and they will have a definite effect: "He will give an excuse to many local stations ... not to take [network] documentaries they would like to replace with reruns of *l Love Lucy*."

The newsmen agreed that administration attacks had not affected network news coverage, except probably to improve it by causing a tightening of professional standards. Another effect, Mr. Reasoner added, was to cause newsmen to spend a lot of energy "in just this kind of a meeting, or in various kinds of introspection," when it might be better spent working.

The fact that viewers cannot pass up unwanted news on TV, as they can in newspapers, was seen by Mr. Chancellor as a major factor in making "a lot of people unhappy with the news they got," even though "the news hadn't changed all that much." Then, he said, "into that attitude came this administration, the President and the Vice President, saying that the news isn't any good," so that dissatisfied or fearful viewers can look to the White House and be told: "Yes, you're right, and it's those bad people who are going it."

"And that's been serious," Mr. Chancellor added.

Mr. Cronkite said: "This administration, through what I believe to be a considered and concerted campaign, has managed to politicize the issue of the press versus the administration" to the point that "to defend the right of the people to know—that is, to defend freedom of speech and press—is to somehow or other be antiadministration."

In support of this contention Mr. Chancellor also noted that "the subpoenas have gone mainly to reporters for organizations that have been critical of the Nixon administration. I don't see them going after reporters who've worked on stories the administration regards as favorable."

On the question of a shield law he said he would "spare no effort" for the most embracing kind, but Mr. Smith opposed any kind, "unless things get a lot worse than they are," because "it involves too many complexities that haven't been thought out," such as how to define who a reporter is.

Mr. Cronkite said "anything short of an absolute privilege is dangerous" and that he didn't like the implication, even in an absolute law, that Congress has a right to enact measures regarding the First Amendment. But he said, the Supreme Court's Caldwell decision seemed to invite such legislation "and perhaps that's the way to do it—with an absolute privilege."

Mr. Reasoner felt that anything short of an unconditional law would be "limiting"—and, he said, "you aren't going to get an unconditional law."

AP association hopefuls

Two nominees for each of four seats on AP Broadcasters Association board of directors were announced last week by nominating committee, headed by Rex Davis, KMOX(AM) St. Louis.

For TV-stations representative in the eastern district, where incumbent C. Glover DeLaney, WHEC-TV Rochester, N.Y., asked not to be renominated, nominees are Dave Kelly, WMAL-TV Washington, and Bernard Rotman, WBEN-TV Buffalo, N.Y. For western district representatives at large, Walter Rubens, KOBE (AM) Las Cruces, N.M., incumbent, and Frank Conley, KQMS(AM) Redding, Calif. For central district, radio stations of 5 kw and over, John Chapman, WKRC(AM) Cincinnati, and Curtis Beckman wcco-(AM) Minneapolis (incumbent Thomas Frawley, Cox stations, Washington, is not eligible for re-election). For southern district, radio stations under 5 kw, W. Jack Brown, WLON(AM) Lincolnton, N.C., incumbent, and Jerry Huddleston, KVOP(AM) Plainview, Tex.

APBA by-laws call for ballots to be mailed by May 15 and returned postmarked no later than July 15. Nominations may also be made by petition of six or more members of a district except for directors at large, for which 12 members are required. Petitions must be received by April 30 by APBA secretary Robert Eunson, vice president of AP, 50 Rockefeller Plaza, New York 10020.

Journalism Briefs

Distaff side. Women's News Service has been formed to provide to all media

information and interviews important to women. First-project, by Lindsey Lambert, founder of service and former sales assistant and West Coast research director for McGavren-Guild Inc., is series of one-minute radio vignettes to be syndicated nationally. 2037 Sherbourne Drive, Los Angeles 90034. Phone: (213) 837-1977.

Honored for financial news. Four stations will receive Janus awards for financial news programs that have contributed to community understanding of commerce and finance, according to announcement today (March 19) by Mortgage Bankers Association of America, Washington. Winners: WIIC-TV Pittsburgh and WJW-(AM) Cleveland for commercial television and radio, respectively; WOUB-TV Athens, Ohio, and WUOM(FM) Ann Arbor, Mich., in corresponding noncommercial categories.

Insider's view. Steve McCormick, former vice president of Mutual Broadcasting System, has arranged with Broadcast Productions and Services Inc., Washington, to do new syndicated radio program called *Sixty Seconds*. One-minute commentaries, provided to stations five days a week beginning April 1, will examine news developments in Washington, giving special attention to problems facing broadcasters. Robert M. Johnson Associates, owner of Broadcast Productions, will produce and distribute program. 635 National Press building, Washington 20004.

Cablecasting

How Teleprompter figures to weave a cable network

With Button, a satellite expert, now on the job, the company files for earth station for starters

Teleprompter Corp., the biggest cabletelevision operator in the nation with more than 600,000 subscribers, has initiated plans to be the leader in a national broadband network. "That's the dream," says Robert E. Button, after one week on the job in Teleprompter's headquarters in New York. "It'll be a network bigger than anything we've ever seen."

Mr. Button, who spent the last eight years in Washington in government relations for the Communications Satellite Corp., is director of Teleprompter's newly-created office of satellite development. His acquisition was step number one for Teleprompter in what amounts to a determined effort to unite the entire broadband cable industry. Step two was taken March 9 with the filing with the FCC for application for an experimental transportable receive-only earth station (see story, page 130).

The basic concept that Mr. Button has taken to Teleprompter and which the company is now in the process of implementing is a bringing together of the new technologies: satellites and cable TV.

"Let's hook them up and see where we come out," is in effect what Mr. Button and Teleprompter are saying. While he was at Comsat, Mr. Button examined the cable industry and tried to figure out how cable-TV systems owners could take advantage of domestic satellites. He couldn't see any single entity in a position to buy satellite services. Then he talked to the people at Teleprompter and learned that the company was willing, if necessary, to go it alone—felt it has enough systems to make an interconnection feasible right now for Teleprompter on its own.

To Mr. Button the situation is similar to the early days of Intelsat, the International Telecommunications Satellite Consortium that established and operates the global commercial-communications system and provides service to nearly 90 countries of the world. He recalls that the U.S., when it was going to put up the first Early Bird communications satellite, felt capable of doing so by itself yet still took the position that if anybody else wanted to join that would be fine.

"All of a sudden the United States found it had a consortium of 80-odd nations wanting to do the same thing and share in it," Mr. Button explains. "Well," he continues, "I sort of look at the cable industry that way. Teleprompter could interconnect on its own, but the domestic satellite makes possible the uniting of the whole broadband cable industry." Mr. Button makes it clear he's talking about a satellite that has multiple channel capacity and could serve to interconnect every cable system.

"Teleprompter had a finger in the ac-tion right along," Mr. Button says, point-ing out that though the company hasn't applied for a domestic satellite, it has filed comments in the FCC's proceedings on the domestic-satellite issue and is associated with Hughes Aircraft Co., which is such an applicant.

"Now we're going operational with the broadband network idea," he says, noting the recent filing at the FCC for a ground station. "Always remember the time frame," he says. "We've got until about April 1794 to plan out how a satellite can be used by the cable industry.

His April 1974 reference is to the date when it is presumed that the first domestic U.S. satellite will be operational, most likely one owned by Western Union Telegraph Co. (BROADCASTING, Jan. 1). After the first domestic satellite is in orbit others will come along, Mr. Button believes. "Fairchild Industries, American Satellite Corp., RCA, they're all going to jump on the bandwagon. It's just a case of who comes up with the business concept and how to use the satellite and make money out of it.'

What's Mr. Button's role in the coming events? "I will come up with the eco-nomics," he explains, "that is to say what it costs to use a transcontinental channel which can be accessed by anybody with a ground station." Mr. Button also is charged with developing a concept for using such transcontinental channels for what he terms "premium TV" (a euphemism for pay TV).

"The guys who are experimenting with

Mr. Button

premium TV locally now are doing it in a horse-and-buggy fashion," he contends. "If they could originate their programing in one location and just put it on a satellite and have it all over the country simultaneously, people could pick it from the ground stations. There's your instant box office. This is part of our satellite philosophy."

The Teleprompter-Bob Button concept for cable TV and domestic satellites begins with a satellite capable of multiple use. Such a satellite becomes the means by which what are now "a bunch of little islands" of cable-TV activity becomes welded into a "national communications structure" (one that has ground into it service to data, computer and facsimile users as well as entertainment and informational programers). Teleprompter wants to lead in bringing about such a development, yet, claims Mr. Button, doesn't want to monopolize the field. "It can't be monopolized," he assures. "That's deadly." Instead, he maintains, Tele-prompter wants "to show the way to bringing the broadband national capa-bility into full existence."

Keeping to the example set by Intelsat, he doesn't know what the eventual corporate or consortium outlines of a national satellite service will be. His talking about the concept at meetings with other cable-TV systems owners has generated less than overwhelming enthusiasm.

"The reactions run the gamut from 'we're too busy getting new subscribers," to 'show us the numbers and when they figure up we'll go,' " he concedes.

He thinks the preoccupation of cable systems with attracting new subscribers is ironic because "the one way you get new subscribers is to offer new capability." To his way of thinking, "if we offer diversified programing over this thing-special-interest programing, professional-interest programing, minorityinterest programing, stuff that the net-works don't and can't afford to do-we get new subscribers."

How does he answer the reluctance of other cable-TV people? "It's a chickenand-egg situation," he says with a note of

CBS Laboratories Mark III Image Enhancer is preferred by most TV stations. Because it sharpens both vertical and horizontal detail automatically. And improves picture resolution as well as color fidelity. The Mark III, with unique "crispened-comb" filter, separates chrominance from luminance, providing sharper contrasts with more defined picture detail. Available for all monochrome and color cameras. From CBS Laboratories, of course.

227 High Ridge Road, Stamford, Connecticut 06905

frustration, "and I don't know which I am, the chicken or the egg."

The ground station that Teleprompter is asking the FCC to approve would be experimental, but, Mr. Button promises, only the first of many to come.

"It is our company policy to have our own ground station," he explains. "Once you oil that one up and it works then you go for a production line because you've got to have them all over. You just don't have one."

The eventual goal of Teleprompter, as he outlines it, is a ground station at practically every cable head end. By 1974, according to his calculations, if there are 6,000 cable head ends in operation in the country, he'd like to be serving them all via satellite with a mixture of ground stations and ground microwaves in certain localities (a complex of cable TV systems in one locality would be interconnected to the one ground station serving that area by microwave). Yet granting the exception of a single ground station serving a number of nearby small cable TV systems with the help of microwave transmissions, he's still predicting a need for satellite earth stations "in multiples of 1,000-well over 1,000."

An initial demonstration of Teleprompter's satellite capability is planned for the National Cable Television Association convention in Anaheim, Calif., June 17-20, when the company will demonstrate its earth-station facilities. Plans call for a transportable Teleprompter earth facility to receive signals from Canada's Anik-I satellite (subject to authorization) and display them during the convention. In addition, Teleprompter and NCTA intend to invite government and FCC officials to address the convention via satellite from Washington as indication of a satellite-cable system originating programing.

Mr. Button, who spent some 15 years early in his career with NBC, makes a point of specifically avoiding the temptation to write off the commercial over-theair television networks. "I believe ABC, CBS and NBC will keep on doing what they're doing—and doing it well—for one helluva long time to come," he says with conviction. "Just because you have a new piece of technology, doesn't mean that you go out and slaughter everybody who isn't in it."

What's the timetable for Teleprompter to put the Bob Button dream to the practical, profit-making test? "The day that any satellite merchant opens his door for business," he says with confidence, "we expect to be organized to take advantage of the satellite and start doing business."

Primary franchising goals are theme of Rand's first report

Author sounds some warnings about municipal ownership, but urges citizen participation

The social implications of CATV are the focus of a new series of reports on cable TV by the Rand Corp., Santa Monica, Calif. The first, on decision making, was released last week ("Closed Circuit," March 12).

The initial handbook is accompanied by a summary overview by Dr. Walter S. Baer, project director of the study, who sets the tone by commenting that the series of reports is designed to help communities "shape... a revolution in communications ... [that] may influence the way we live as radically as the automobile and the telephone [did] ..."

He urges those responsible for franchise decisions to make cable programing and services, not technology, their prime concern. CATV, he says, "is on the brink of turning into a genuine urban communications system with profound implications for our entire society." And, he adds, "the decisions shortly to be made will reverberate throughout the 1980's."

Responding to a growing clamor for municipal ownership, Dr. Baer warns that cable systems are unlikely to be highly profitable, resulting in income for cities, at least in this decade. He also discusses in detail the pros and cons of municipal ownership vs. private and/or noncommercial ownership of cable-TV systems. These issues, he says, can be "perhaps the most emotionally charged topic the community will confront."

He is somewhat more pessimistic than

others about the pace of construction of new cable systems in major markets. Until new services are developed, he says, cable in larger cities may not attract sufficient subscribers to warrant large-scale building, and until there are large systems with substantial concentrations of subscribers, new CATV systems will not be profitable.

But, he stresses, citizens' participation should begin at the earliest time, with the planning for the franchise.

The first handbook deals with elements to be considered in determining the issuance of a franchise, including history of CATV, technology, economics, ownership options, planning, franchising, local responsibilities, public access, public service, and a chapter on CATV's future. The book also includes appendices enumerating the top-100 TV markets, the 50 largest CATV systems, financial models of three CATV systems, and a glossary.

The remaining reports, covering such topics as citizens' participation, technology, federal regulations, municipal services, public access, and uses in education, will be issued in the next few weeks. The entire project was underwritten by a \$267,000 grant from the National Science Foundation, Washington.

Dr. Baer, who joined Rand in 1970. is the author of the 1971 Rand report on interactive television, and has done technical and economic studies of cable TV in Washington and in Dayton, Ohio. He was on the staff of the White House's Office of Science and Technology before joining Rand.

The Rand Corp., a private research organization, began investigating CATV in 1969 under grants from the Ford Foundation and the John and Mary Markle Foundation.

Cable system dumps candidate's show

Viacom Long Island subsidiary drops program when Democrats complain hostess/is up for election

Suffolk Cablevision, a Long Island, N.Y., subsidiary of Viacom that reaches 35,000 homes, will cancel a weekly one-hour discussion show because its moderator is running for office in a local political campaign.

When Nancy Zwerling, who is a newspaper publisher and whose program is called *Nancy's Show*, was chosen by Suffolk county Republicans earlier this month as their candidate for the 11th legislative district, Dominic Baranello, the Democratic chairman in Suffolk, fired off a letter to the cable company demanding equal time for the democrats "to insure fair campaign practices and full recognition of FCC rules."

A station spokesman said that because the company doesn't want to take sides and become embroiled in a political controversy, *Nancy's Show* will go off the air as of April 12 (the deadline date for candidates who want to file petitions to get their name on the ballot for the June 4 primary in Suffolk county) and stay off at least until after the election.

Eyes turn hopefully to Congress after court's cable ruling

Decision on distant signals fails to decisively solve problem in opinion of many observers

What are the implications of the U.S. Second Circuit Court of Appeals decision in the CBS vs. Teleprompter case? Less than a week after the court's unanimous decision to offer half-a-loaf (partly upholding and partly reversing a lower District Court ruling [BROADCASTING, March 12]), the reactions are beginning to pile up, and the finger is being pointed time and again to the concluding paragraph of the 29-page decision by the three-member Court of Appeals as the key indicator. "The last paragraph says this is a mat-

"The last paragraph says this is a matter for Congress, and it really is," points out Herman Finkelstein, chief counsel for the American Society of Composers, Authors & Publishers. Edward M. Cramer, president of Broadcast Music Inc., said his organization "applauds the court's language in the concluding paragraph," particularly the passage that notes:

"The complex problems presented by the issues in this case are not readily amenable to judicial resolution . . . we hope that the Congress will in due course legislate a fuller and more flexible accommodation of competing copyright, antitrust and communications policy considerations, consistent with the challenges of modern CATV technology."

Senator John L. McClellan (D-Ark.), chairman of the Copyright Subcommittee, apparently is ready to accommodate the appellate court with legislation. His office indicated that the senator would offer a copyright bill imminently, yet there was no sign of such an offering last week. And a McClellan bill, which is likely to set a copyright-fee schedule limit (a schedule setting limits of 1% to 5% of gross revenues was in the first McClellan copyright revision bill introduced in 1968), is not what the copyright owners are seeking.

"My feeling is get the damn copyright bill out of the Senate and then we'll start fighting," was the tough observation of one top-ranking representative of a copyright-owner interest. "After all, Senator McClellan doesn't have all the power in the Congress," he pointed out. "Let him do what he wants in his committee, but let's get this thing started."

Jack Valenti, president, Motion Picture Association of America, has no doubts that the Second Circuit Court of Appeals ruling that cable-TV systems are subject to copyright liability on programing imported from distant stations is "favorable" and "absolutely pleasing" to copyright owners. "I think it establishes the principle of the obligation to pay copyright, dispels all the clouds and doubts, makes the copyright obligation firm and clear," said Mr. Valenti. "The only thing left undone," he added, "is the precise definition of distant signals" (the appeals court said that any system that locates its antenna more than a few miles from the cable TV served must be ready to bear the burden of proof that the signals it brings in are not distant signals).

Where does the copyright controversy go from here in addition to the halls of Congress via a likely McClellan bill? Attorneys for Teleprompter Corp. have indicated a possible petition for U.S. Supreme Court review. Last week a Teleprompter spokesman reported that "we're still studying the options available to us" —to go to appeal, to petition for rehearing, to continue the fight in the lower court (the case of CBS Inc. against Teleprompter was sent back to the district court for determination of damages).

Mr. Finkelstein of ASCAP would like to see an appeal. "I feel the Supreme Court may go further than the Court of Appeals."

NCTA to push for law that would forbid government ownership

Foster says ban should extend to radio-TV, newspapers; says private entrepreneurs should undertake the risks of cable

The National Cable Television Association intends to propose legislation that would make it unlawful for any governmental body to own either directly or indirectly a cable - television system. What's more, NCTA wants the same legislation to include a ban on government ownership of newspapers and radio or television stations.

David Foster, NCTA president, revealed this cause in a luncheon speech last week before the Federal Communications Bar Association in Washington. From the outset of his talk it was made clear that this was to be a blunt attack against those who would turn over to the government "the development and control of the most versatile, flexible, accessible and potentially powerful communications medium that has ever been envisioned in man's history." His particular targets were the "religious-enthusiasts" (only the Rev. Everett Parker, director of the Office of Communication, United Church of Christ, was specifically identified as such in his speech) and the educators (the School of Journalism of the University of Missouri, which NCTA opposed in a referendum election in the city of Columbia [BROADCASTING, March 5 and 12], was cited in this category). Those in religion and education "have the same sort of constitutional schizophrenia," according to Mr. Foster. He claimed that both groups fight for absolute separation of governmental interference with cathedral and college on the one hand and yet "anywhere else government wants to use its might is absolutely OK," especially, he pointed out, "under the wise guidance

CBS Laboratories new Video Processing Amplifier is an outstanding performer! For monochrome or composite color restructuring, CBS Laboratories CLD 1300 is the universal amplifier. High quality restoration is accomplished through individual controls of video, chroma, reference burst, sync and blanking.

In helical or quad tape use, the CLD 1300 actually improves quality dramatically. And the CLD 1300 can even be used simultaneously as a standby sync generator. From CBS Laboratories, of course.

Broadcasting Mar 19 1973 117 of either priests or pedants."

Mr. Foster also took a swipe at those consultants (namely the Cable Television Information Office which has published a study of the cable-television options for the city of Jacksonville, Fla., that suggests that the decision for or against municipal ownership be made "without regard to any emotional arguments") who generate subtle confusion that "lurks behind the bland mask of impartiality and professional detachment."

Conceding that he has strong personal feelings about government ownership of cable television, Mr. Foster cited three principal arguments that reflect his thinking:

That "the taxing authority, the credit, the bond rating of a community ought not to be committed either directly or indirectly to the development of a high risk, capital intensive industry." (Says Mr. Foster, "Let the entrepreneurs take the risk.")

• That there isn't any municipal or county government in the country that can come up with "the creative innovations which will be necessary to cause cable to realize its promise and potential."

• That it must be recognized "that communications is not strictly a commodity nor is it a service." Instead, Mr. Foster said it's most important to know that communications, including cable TV, "is a resource and a right for all of our citizens."

Mr. Foster asked his audience to avoid thinking that because commercial interests oppose municipal ownership such government control must be a good idea. "To suggest that a city can't receive the benefits cable provides from entrepreneurs is just plain silly and irresponsible rhetoric," he concluded.

Cable, pay TV make inroads on pro sports

Pro basketball league signs up with Home Box Office

Home Box Office Inc., New York, has signed an exclusive contract to July 1, 1977, for the North American cable and pay-television rights to the games of the American Basketball Association.

Under terms of the contract with the ABA, Home Box Office will pay a minimum of \$1.5 million for the rights to preseason, regular-season and play-off contests. Home Box Office will have first negotiation rights for cable and pay-TV with individual teams in their home territories. Local-station and network-television agreements pre-empt the Home Box Office agreement.

The contract went into effect on March 9 with the telecast of the Kentucky Colonels-Virginia Squires games to more than 5,000 subscribers on CATV systems in Wilkes-Barre, Allentown and Bethlehem, all Pennsylvania. These subscribers pay a fee above the monthly charges to receive Home Box Office programing consisting of first-run feature films and live sports events. Programing

Touchiest topic on radio now: talk about sex

Originators see a social purpose; FCC will listen to selected tapes; women keep reporting intimacies

Therapy or exploitation? Public service or public nuisance? Serious discussion or leering small talk? Radio operators who program so-called "sex-talk shows" radio's copied format of late—feel their backs against the wall following attacks by members of Congress, the FCC and a body of irate listeners, whose number is as yet unknown.

To the practitioners of the femaleoriented two-way talk shows even the term "sex talk" has now become anathema. Many refuse to be interviewed by reporters, saying that sensationalized accounts of the format are what got them into trouble in the first place. They complain of shorthand terms such as "topless" and "X-rated radio," which they say are agitating government scrutiny, and they may be right. Senator John O. Pastore (D-R.I.) and FCC Chairman Dean Burch are talking about finding a test case. The FCC has scheduled a session on the subject this week (see page 119).

Ray Stanfield, manager of KGBS-AM-FM Los Angeles, is sensitive to the condition. "Articles that have mentioned KGBs as the originator of a concept that has been stolen and bastardized have been grossly unfair," says Mr. Stanfield. "We didn't pioneer dirty radio. These sex-talk shows have evolved from the Bill Ballance show, to be sure. But we do not have a sex-talk show on this station. We have a talented, clever interviewer on the air, talking to callers about man-woman relationships. Sex is an occasional by-product. But when the subject turns sexual, it is never handled in bad taste."

There is no way to characterize what has been called "sex-talk radio" in a general way; each station's version is different. The common denominator among the 50 or 60 stations programing daily shows is that only women are allowed to talk on a pre-determined topic of the day on the air. Usually the callers are not pre-screened or pre-taped—those devices dampen spontaneity, programers say and are asked to remain anonymous. They are asked their first names only, where they live and their ages.

The originators of female-only, twoway talk, and they prefer that label to "sex-talk," say that they did not go into this type of programing with the idea of talking about sex exclusively. Mr. Stanfield explained: "When we began thinking about revamping our format two years ago, we had only a limited audience, I will admit. But the bulk of our listeners were young adults, men primarily. I had experience with two-way talk before coming here [at KLAC(AM) Los Angeles and WRNG(AM) North Atlanta, Ga.], and I wanted to get into something along those lines. But talk radio has traditionally appealed to older audiences, and we wanted to marry talk radio to our youthful audience. So we thought: 'What appeals most to young women?' And the obvious answer, of course, was young men. We wanted to put on the air light, humorous conversations about the relationships between men and women."

Rose Hutton, working at KGBS to help get its female-oriented programing ready, thought up the name Feminine Forum. At that time, in late 1970, several disk jockeys at the station would take calls from female listeners, off the air, and then air the edited tapes the next day. Ron Martin, hired as program director for KGBS several weeks into the Feminine Forum experiment, believed the pre-tap-ing and various voices sounded dull. He asked the all-night man, formerly a rock disk jockey on KFWB(AM) Los Angeles and at stations from Denver to Hawaii after his KFWB days, whether he would do a live, midday version of Feminine Forum. Bill Ballance said he'd give it a try. Thus is made broadcasting history.

KGBS's success during midday convinced Storer Broadcasting, owner of the station, to start versions at its five other AM's, wJw Cleveland, wDEE Detroit, wGBS Miami, wSPD Toledo and WHN New York. It didn't take long for others, seeing a sure-fire solution for sagging midday ratings, to pick up the idea. Metromedia's KNEW(AM) San Francisco premiered California Girls-named after a hit song by the Beach Boys-in August 1972. Fairchild's KLIF(AM) Dallas simply called its female two-way talk show The Dave Ambrose Show when it went on the air last September. KILT(AM) Houston started a similar show several weeks later. WWDC(AM) Washington turned its afternoon Scott Burton Show toward personal relationships in November when "listeners began bringing sex into every conversation," as General Manager William Sanders recalled. WWDC dropped topics that involved sex when the programs became increasingly "uncomfortable" for the management.

And the Bill Ballance show was one of the hottest syndication properties in the business by the end of 1972. Handled by Dick Clark Radioshows Inc., the Ballance show is now in 22 markets and starting in another four within 30 days. Four of the stations buying the show are in Canada, and it was recently placed in Perth, Australia. The station in Australia will, more than likely, according to a spokesman, handle the syndication of the show in Australia and New Zealand if there is a demand. And the first pilots for a Bill Ballance television show, also to be handled by Dick Clark, are in the can.

It is impossible to separate sex-talk radio from the recent trend of all media to discuss and present sexual subjects in unprecedentedly frank and open terms. Long-time TV taboos have crumbled every Saturday night for two years on CBS-TV's All in The Family. The presentation of ABC-TV's made-for-television film, "That Certain Summer," about a homosexual father's relationship with his family, broke new television ground. How-to, layman-oriented sex manuals keep topping the best-seller lists.

keep topping the best-seller lists. "There's no question that this country is in the process of changing its societal mores," George Duncan, president of Metromedia's radio division, said. "Sex education in the schools was a violently controversial topic only five years ago. But now sex taught as health education is entirely proper. Now we have people discussing sex on the radio, and it was to be expected. Radio is a reflective medium."

Dave Ambrose, who is host on a female-only talk show on KLIF(AM) Dallas, says: "It's time radio kicked and screamed its way into the 20th century. Why can television, which is the same type of public media, talk about the same subjects at the same time of day—soap operas—and we can't?"

There are those who see a public demand for sex-talk shows. "If there were no need for this type of programing," says George Duncan, "it wouldn't have been an overnight success. What is called for now is the interpretation of those needs." Those needs have been interpreted in many different formats.

"There have been stations around the country that have sensationalized and abused it," Mr. Stanfield believes. "Even in this time when frank talk is accepted on TV and in the movies, it's still possible to go too far. We've gone too far at times, too. But I believe that was part of the growing pains of the format. I think that some have been going too far as a matter of policy, to build a quick audience. And we are now being indicted for their continuous excesses."

Most broadcasters have said that at some time in the gestation of this format they have "crossed the line." But, they add, it is a new form of radio—some even say revolutionary—and they needed time to bring it to maturity. There is "no one in this format who has not bordered on alienating someone's sensibilities at one time or another," Mr. Duncan said. "But there is enough redeeming value to this format that we believe it can be developed with the knowledge that our expertise will eliminate potential irritants."

The female-only, two-way talk show is indeed radically different from anything that has come before. Two-way talk, it now seems, only touched the surface of a public's desire to air personal opinions to the broad audience that radio offers. But two-way talk in its earliest form dealt with caller opinion—on politics, sports, etc. Sex-talk radio programs ask their listeners not for opinions, but personal experiences. And, considering that the subject matter is male-female relations. it has gone beyond two-way talk radio and become "cathartic" radio. Radio as therapy, even.

Many managers and programers believe, as Dave Ambrose puts it: "Far from being irresponsible broadcasting, this kind of radio can be the most responsible type. We're into the serious aspects of daily living. I'll be glad to open my files to anyone. We haven't backed off on this show because we haven't had to."

"A large portion of the world has opened up to these women for whom the world has never been a very open place," Ken Gaines of KNEW said.

Dave Ambrose of KLIF related an experience on one show recently on the topic, "Where did you learn about sex?":

"I wanted to do a show on that question after I had gotten some flack about sex doesn't belong on radio. It-belongsin-the-home-type stuff. I talked to about 50 women about how they learned sex, and not one had been taught about it by their parents."

"These callers," says KGBS's Mr. Stanfield, "Are not going to call to see how much they can get away with. They aren't strippers on a busman's holiday. They're responsible women. They're not weirdos."

A study of callers on the Bill Ballance Feminine Forum, conducted by the accounting firm of Peat, Marwick, Mitchell & Co., states: "Callers to Feminine Forum are a representative cross-section of the southern California female population, with the distinction of being significantly above average in education, income, quality of residence and level of occupation. Their specific characteristics indicate a stable and mature group, with vested family interests, a fairly conservative outlook on marriage, as shown by lower divorce rates than the national average, and social habits denoting upper middle class. None of the callers considered her interview to have been in poor taste, salacious or in any way offensive. Practically all said it had been fun."

Storer lawyers, upon investigating FCC complaint files, found fewer than 20 complaints against KGBS. Dave Ambrose says that in eight months of his show, he has

had to censor only three callers for obscene words. He talks to some 250 women a week. WHER(AM) Memphis pulled its female-only talk show from the air, due to the lack of local advertiser support, the station manager said, and on Feb. 28 the District 6 field office of the FCC in Atlanta received so many letters blaming the commission for the cancellation that Arthur T. Cline of that office said, "We couldn't acknowledge them all."

And a caller to Don Chamberlain's *California Girls* on KNEW told him: "At first I thought your show was just kind of kooky and left it at that. But you've been getting into areas lately that really concern us. I'm finding out a lot of things about myself I didn't know before. I said to myself, 'Oh, come on, at age 40 you're going to turn into a dirty old lady?' (laugh) I decided that wasn't true, that these were things that should have been going on a long time ago."

FCC deliberates need to sew a robe for topless radio

Increasing number of complaints from public and Congress sets stage for commission consideration

The seven members of the FCC will sit around a government-issue tape machine at their meeting this week, listening to a program, assembled by the commission's staff, that might be entitled *The House*wife's Delight.

It is a compilation of segments from some dozen so-called topless radio talk shows and one television program. And for an hour or so the commissioners will hear women expressing their innermost thoughts about sexual activity—theirs and others.

Whether the commissioners are bored, amused, titillated or outraged, it will all be in the line of duty. Under pressure from members of Congress and facing a rising tide of complaints from members of the public, they are looking for a means of dealing with what the complainants, in Congress and among the public, consider "indecent" programing. And as one official put it, "It's hard to discuss this matter in the abstract."

Chairman Dean Burch has already heard the tape. He listened to it on Monday, in the company of several staffers— General Counsel John Pettit; Wallace Johnson, Broadcast Bureau chief, and William Ray, chief of the Complaints and Compliance Division, and John Eger, the chairman's legal assistant. The chairman said he had "no reaction," but others in the group said they did not regard the material as "obscene"—although one staffer indicated there might be a question as to whether some of it was "indecent." A federal statute prohibits the broadcast of profane, obscene or indecent material.

As he indicated to members of Congress when pressed on the subject at two congressional hearings in recent weeks, Chairman Burch feels that censorship problems involved in attempting to deal with the issue present the commission with a difficult choice. He told the Senate Communications Subcommittee that he would rather risk his children seeing an occasional "dirty movie" on television than have "seven people downtown deciding what people should see" (BROAD-CASTING, Feb. 26).

However, Senator John O. Pastore (D-R.I.), chairman of that subcommittee, and Representative Edward P. Boland (D-Mass.) chairman of a House Appropriations Subcommittee which held a hearing on the commission's budget a week after the commission heard from Senator Pastore (BROADCASTING, March 5), both urged the commission to seek a test case of its power to crack down on programing they felt was offensive.

on programing they felt was offensive. Chairman Burch received additional pressure from Congress last week, when he appeared before the House Communications Subcommittee on license-renewal legislation (see page 33). Representative Torbert Macdonald (D-Mass.), subcommittee chairman, repeated the familiar litany of outrage and concern about what he and some constituents consider indecent programing, and warned that Congress might act to remedy the situation if the commission did not. (Representa-tive Harley O. Staggers [D-W. Va.], chairman of the parent Commerce Committee, expressed similar concern and issued the same warning when Vincent Wasilewski, president of the National Association of Broadcasters, was testifying.) The commission has been seeking a

The commission has been seeking a case in which it could test its power in connection with alleged off-color programing for years, though with a greater sense of urgency in the past few weeks. And it was as part of that search that members of the commission's Field Engineering Bureau in posts around the country monitored and taped call-in talk shows that they felt might provide material for a court case. Since some of the programs ran for up to five hours, commission staffers in Washington edited them down to two versions—one running slightly more than one hour, the other slightly less—containing illustrative examples.

Officials declined to identify the programs involved, but Bill Ballance, whose *Feminine Forum* is broadcast on KGBS-(AM) Los Angeles and who is heard on a number of other stations in syndicated excerpts from that show, is said to be represented on the tape.

The attention the Ballance phenomenon recently has been getting distorts, somewhat, the problem facing the commission. While the number of complaints, comments and inquiries the commission receives about what it vaguely categorizes as obscenity, indecency or profanity is rising sharply—the total for fiscal 1972 was 2,141 whereas the total for the single month of January 1973 was 860—most of the mail by far deals with television. In fiscal 1972, television accounted for 1,783 pieces of mail, AM radio 230 and FM 128. In January 1973 the figures were 764, 80 and 16.

Furthermore, most of the complaints about television, in recent months, at

At another forum. FCC Commissioner Charlotte Reid met sex-talk host Bill Ballance of KGBS(AM) Los Angeles at last December's Gavin programing conference. Commissioner Reid told the conference she could "understand the value of such programs." But, she went on to say, "The idea of publicly airing personal problems turns me off." She also said at that time, however, that sex-talk shows were a matter of "licensee discretion."

least, appear to be based on misinforma-tion. Without specifying titles, they deal with "X-rated movies," even though the only one known to have been shown on television was "The Damned," on CBSand that one only after being thoroughly laundered. The commission's chief of the complaints branch, Arthur Ginsberg, who has examined the mail, says much of it appears to have been the product of a letter-writing campaign inspired by religious organizations in different parts of the country. (However, the two-part episode of *Maude* concerning Maude's abortion produced more than 2,000 complaints whose authenticity was not questionedalthough there were some letters, too, from persons complaining about stations that did not carry the programs.)

Nevertheless, radio is an increasing source of concern. The FCC's mail count for February on obscenity, indecency and profanity is said to be double that for January, with the radio-to-television ratio said to be about one-to-three or one-tofour, as against January's one-to-eight. However, there is no breakdown of the kinds of programs that provoke the complaints, comments and inquiries.

The commission discussed its options

Matchmaker. KGBS(AM) Los Angeles, where BIII Ballance is said to have originated two-way talk with female listeners, has another disk jockey on the air who works a different man-woman angle: dates.

He's 39-year-old Dave Hull, whose 3-7 p.m. Hullabaloo is music and chatter. Once every hour, Mr. Hull talks to callers who have phoned in search of dates. In each five-minute segment he tries to match up pairs. No dates are arranged on the program, but if callers indicate they would like to meet, each is privately given the other's telephone number.

The segment is formally called "Action Line." At the station it is informally known as "Dial a Date." Some call it "Dial a Dog." briefly last Tuesday, and will resume the exercise this week. Officials say a wide range of possibilities came under review, from punitive, such as calling for early consideration the renewal application of a likely suspect, subjecting an alleged offender to a license-renewal or revocation hearing or imposing a forfeiture, to employment of jawboning and raisedeyebrow techniques, such as questioning licensees about the public-interest considerations involved in broadcasting a program that might be considered offensive, issuing a public notice reminding licensees of their responsibility for everything they broadcast (as it did in connection with lyrics concerning the use of drugs), or simply exhorting broadcasters with speeches. Or the commission might issue a notice of inquiry or rulemaking, and invite all interested parties in the industry to offer suggestions. The commissioner who has long been a hawk on the issue of allegedly off-color programing, Robert E. Lee, is not now pushing for punitive action. He said last week he will recommend that the commission issue a druglyrics type notice-he had been the prime agent in the issuance of that earlier notice -or ask stations carrying the topless radio talk shows to justify them in terms of community needs.

If the commission were to attempt to test its power by imposing a forfeiture as it tried in 1970, when the test-cast station, WUHY-FM Philadelphia, confounded things by paying the \$100 fine it would have to persuade the Justice Department it could successfully prosecute the case in court under the obscenity statute. (The Justice Department, if it chose, could move against a station on its own under the statute.)

Some commission attorneys feel that a successful prosecution under the statute is a real possibility, the First Amendment and the no-censorship provision of the Communications Act notwithstanding. The theory, essentially, is that since broadcasts come into the home at the flick of a switch and are thus readily available to children, the courts would not be as reluctant to convict a broadcaster under the obscenity statute as they would, say, a motion-picture theater operator or a book publisher. "The courts have held you can go further in protecting the health, safety and morals of children without skirting the First Amendment than you can in protecting adults," one official said.

The first indication of the policy decision the commission ultimately will make will probably show up in a letter to Representative James V. Stanton (R-Ohio). He wrote to Chairman Burch on Feb. 1, complaining about allegedly obscene broadcasts on WERE(AM) Cleveland in particular and on other stations in the country generally, and recommended a number of courses of action for dealing with such programing; many of the suggestions are those under consideration. A response had been prepared for Chairman Burch's signature, but it was, re-

portedly, relatively routine in content, and apparently will be revised to indicate what course of action the commission will take. Commissioner Lee said the congressman "is forcing our hand." And Chairman Burch intends to obtain comments from his colleagues before replying. The comments, presumably, will come after that hour or so of topless radio this week

Papp cools some, **CBS** stays quiet

Producer indicates if 'Sticks' is run soon, he will continue to work for the network

Producer Joseph Papp appeared to have softened his position somewhat last week in the controversy over CBS-TV's "postponement" of his Sticks and Bones (BROADCASTING, March 12), but insisted the outcome would depend on CBS-TV's showing the play reasonably soon.

In interviews and statements, Mr. Papp and associates did not back down from their charge that CBS-TV's action represented censorship. But some of the earlier fire seemed to have gone out of their words and they clearly left the way open for a reconciliation under which Mr. Papp would resume work under his CBS-TV contract, which he at first vowed angrily not to do.

CBS-TV, with 69 affiliates already on record that they would not carry Sticks and Bones after seeing it in closed-circuit showings, announced its indefinite postponement three days before its scheduled March 9 telecast. CBS-TV said the play, a bitter drama about a homecoming soldier, might be "unnecessarily abrasive to viewers at a time when former prisoners of war and other Vietnam veterans were returning home.

Mr. Papp denounced the decision as cowardly," "presumptious" and a "po-"cowardly,' liticalization" of the play, and said: wouldn't know how to work with CBS after this." But later his tone relaxed a bit.

In an interview on WNBC-TV New York's Sunday program, he said that "I understand CBS's position because they are in the middle. There is no question about it. There is a lot of pressure and you realize there has been a lot of political pressure on networks, including your own [NBC], and ABC, as well as newspapers, from the existing administration. There is kind of a very, very subtle [pressure]-maybe it's not so subtle when a man like Clay Whitehead [director of the Office of Telecommunications Policy] makes a speech and tells these affiliates they "had better do what he says is right or they will lose their license.'

He still insisted CBS-TV was wrong-"Because it happened under pressure, and that's when it's wrong"—but said he "wouldn't have minded" if CBS-TV had initially scheduled the telecast for some other date, because "we don't plan to do it to coincide with the returning POW's.'

"If it goes on within the next few

weeks or so," Mr. Papp said, "I'd be content.'

In another interview he was more specific, saying that "if they show Sticks and Bones within a reasonable amount of time, say by the end of April, I would be able to continue with CBS.

CBS-TV officials had no comment, apparently wishing to avoid any possible extension of the dispute with Mr. Papp. Some sources said privately that they planned to wait a week of two for emotions to subside before considering rescheduling, so that they can approach the question "thoughtfully" rather than "make a knee-jerk decision."

There is a subsidiary disagreement between CBS and Mr. Papp as to how much time CBS has. Mr. Papp says it has until July; that if CBS-TV doesn't show the play by then it reverts to him. CBS says it has until the end of the 1972-73 season, or about mid-September.

Noncommercial WNET-TV New York has offered to present the program, and spokesmen for Video Tape Network Inc. said VTN had asked CBS for permis-sion to distribute it to its 227 collegecampus affiliates.

Other developments in the controversy included:

• Mixed views on the postponement were offered by a former president of CBS, a former FCC chairman and a former news secretary to Vice President Spiro Agnew at an Academy of Television Arts and Sciences seminar in New York the night of March 8.

Fred W. Friendly, TV adviser to the Ford Foundation, professor of journalism at Columbia University and a former head of CBS News, called the postpone-ment "bad decision-making." He said "since the program was not only scheduled but also submitted for consideration to the Emmy awards committee, CBS had a responsibility to the affiliates that wanted to carry it and the people that wanted to see it. CBS should have sent out both Sticks and Bones and its replacement, leaving in the same number of commercial breaks and letting the affiliate take the one he wanted."

Newton Minow, Chicago attorney and a former FCC chairman, disagreed. "Because Sticks and Bones is such a terribly wrenching, sensitive and painful experience for an audience," he said, "it would have been bad taste and bad judgment to show it at a time when our POW's are coming home." He said he was convinced CBS would show it in the future.

Victor Gold, Washington media consultant and former news secretary to Mr. Agnew, said that "if Sticks and Bones had had a John Birch Society theme, you wouldn't have seen all this fuss among people on the left if the affiliates had decided to cancel it.

The American Civil Liberties Union told CBS-TV its postponement of the telecast was an act of "corporate cowardice," based on "the controversial political content of the production" and "offends the First Amendment" by interfering with the rights of creative artists and "the public's right to view a dramatic production dealing with an important issue.'

Set-up Trucks available Illustrated catalog upon request program said two CBS-owned stations, wCAU-TV Philadelphia and KNXT(TV) Los Angeles, had indicated they would not have carried the program. But W. Russell Barry, vice president and general manager of KNXT, told BROADCASTING he thought he "probably would have carried" it. Gordon L. French, vice president and general manager of wCAU-TV, could not be reached for comment but an associate quoted him as having said he had made no comment on his intentions and would make none now.

In an appearance on WNET-TV'S March 7 51st State program, Mr. Papp said one future production he'd had in mind for CBS-TV was "a new work called *Wedding Band*, that had to do with a black woman and a white man in a relationship during World War I, which began to really indicate kind of the roots of the racism in this country."

Details set for talks on children's television

WCPO-TV Cincinnati has confirmed an "ecumenical" list of 21 (let's not make personal comments) participants for the long planned children's-television workshop to be held June 4-6 at University of Cincinnati. According to general conference chairman Robert D. Gordon, vice president and general manager of the Scripps-Howard Broadcasting Co.-owned

WCPO-TV, an attendance of about 500 is expected. The three-day workshop, to be conducted in cooperation with the University of Cincinnati and the National Association of Broadcasters, is to concern itself with practical suggestions as to how to improve the quality of children's television programing and advertising. Previously scheduled for late March, the workshop, first announced last October, was postponed to avoid conflict with the National Association of Broadcasters convention ("Closed Circuit," March 12).

Confirmed, to date, as participants in the workshop (with additional participations expected) are: Christopher Sarson, executive producer, Zoom and Masterpiece Theatre, wGBH-TV Boston; Robert Choate, director, Council on Children, Media and Merchandising, Washington; Eliot Dailey, president, Small World Inc. (Misterogers Neighborhood), Princeton, N.J.; Gerald Lesser, Bigelow professor of education and development psychology, Harvard University, Cambridge, Mass. (also chairman, board of advisers for the Children's Television Workshop); and Hendrick Booraem, vice president, programing, WPIX(TV) New York.

Additional participants are to include: Elizabeth Roberts, director, children's television, FCC; Alan Pearce, economic consultant to FCC; F. Earle Barcus, professor of communications research, Boston University, Boston; Allen Ducovny, director, children's programing, CBS, New York; Lee Polk, director of children's programing, ABC-TV East Coast (an NBC-TV representative also is expected but has not as yet been confirmed); Bob Keeshan, Captain Kangaroo, CBS-TV; Sheldon Cooper, vice president, corporate programing, WGN Continental Broadcasting Co., Chicago; John Haldi, vice president, programing, WBNS-TV Columbus, Ohio; Walter Bartlett, senior vice president, television, Avco Broadcasting Corp., Cincinnati.

Also: John Froome, program directorassistant general manager, KAKE-TV Wichita, Kan.; Marvin L. Shapiro, executive vice president and president-station group, Westinghouse Broadcasting Stations; Ken Mason, executive vice president, The Quaker Oats Co., Chicago; Mimi Cazana, hostess for Uncle Uri's Treasure, WRTV-(TV) Indianapolis; Jack Harris, president-general manager, KPRC-TV Houston; Archa O. Knowlton, director of media services, General Foods Corp., White Plains, N.Y.; and George Merritt, advertising manager, Milton Bradley Co., East Longmeadow, Mass.

Plans call for a total list of between 25-30 participants.

Sports get prime-time waivers

The FCC has waived its prime-time-access rule to permit ABC and NBC affiliates to carry various sports events this month and next without any "runover" being charged against the stations' network time. The events include an afternoon professional basketball game on ABC and, on NBC, National Collegiate Athletic Association afternoon basketball doubleheaders, the NCAA final game, regular-season hockey games and some Stanley Cup hockey games in the afternoon and evening. The commission noted that some of the events for which waivers were granted and which are scheduled for the afternoon may runover into prime time, and that those scheduled for the evening may consume more than three hours of prime time.

Another waiver for 'Wild Kingdom' in prime time

FCC makes exception in access rule to accommodate off-network show

The FCC last week extended a waiver of the prime-time-access rule it granted the Mutual Insurance Co. of Omaha last year for the firm's *Wild Kingdom* series. The waiver, which was criticized by some of the access rule's advocates when it was issued initially, will permit Mutual to place the series in prime time on network affiliates, subject to the condition that 12 of the programs to be televised in the forthcoming season be new and that another six must not have previously been shown over a network.

In extending the Mutual waiver for another year—to Oct. 1, 1974—the commission said that the action is justified by the same conditions that led it to make the initial exception for *Wild Kingdom*. It said that the program was conceived and produced independently and that NBC, which carried the show until the fall of 1971, had nohing to do with the project except to put it on the air. A waiver is necessary because the access rule bars affiliates in the top-50 markets from showing in cleared prime-timeaccess periods programs previously carried on a network.

The extended waiver was opposed by two program producers—Westinghouse Broadcasting Co. and Metromedia Producers Corp.—as well as by the National Association of Independent Television Producers and CBS. With the exception of CBS, all of the opponents have consistently supported the access rule.

The commission's action last week also represented a departure from a previously expressed policy of refusing to act on prime-time waiver requests until the commission's general inquiry on the access rule is concluded (see page 124). In justifying its action, the commission noted that when it announced that policy it had stipulated that exceptions would be made in cases where "there is a showing of special circumstances which make an earlier decision appropriate and in the public interest." It found "such special circumstances to be present" in the Wild Kingdom case, noting that Mutual had insisted that continuation of the present waiver would be necessary if the series is to survive syndication.

Commissioners Robert E. Lee, H. Rex Lee and Nicholas Johnson dissented in the commission's 4-3 decision on Wild Kingdom.

Vertical and horizontal spot rotation helped increase our sales dramatically

"The Raymar system has greatly improved our ability to rotate spots spots both vertically and horizontally so that all of our clients receive maximum audience cume which in turn, has helped increase our sales dramatically."

Nobody changes original position on access rule

It's still two networks against and one for, and major studios opposing smaller syndicators; but some affiliates drop out

The debate over the FCC's prime-timeaccess rule continues to divide the industry with no sign of retreat by any of the numerous parties that have taken a stance on the matter. In reply comments filed last week by most of the interests that submitted initial briefs in the agency's inquiry into the rule two months ago (BROADCASTING, Jan. 22), former positions were buttressed rather than changed.

ABC and independent production companies affirmed their continued support of the rule with minor modifications. The two other commercial networks (CBS through its affiliates association) and major production houses proclaimed anew their desire that the FCC bring the rule, now in its second year, to a hasty end.

A leading argument among the rule's supporters was that opposition from within the broadcast industry has shown a marked decrease since the regulations were promulgated in 1970. Group W Productions, one of the rule's major supporters, noted that in 1970 over 70 parties (representing more than 100 TV stations) had petitioned the FCC for immediate repeal. In the current proceed-ing, Group W said, fewer than a dozen television licensees (representing an aggregate of 27 network-affiliated stations) are seeking repeal. ABC also touched on this issue in noting that the two affiliates that had brought about the current inquiry by petitioning the commission for RHFI-TV Austin, Tex.—had not even bothered to file comments two months ago.

That argument was countered by the opinion—expressed by the majority of the rule's opponents filing last week— that the access rule has been given an adequate opportunity to prove its worth, and has failed. Screen Gems, for one, claimed that in the 1971-72 season, the

first year of operation under the rule, 77.4% of all programing carried by affiliates in access periods complied with the provisions of the rule, despite the fact that during that first season the provision barring the presentation in prime time of off-network programs and feature films previously seen on the networks in a given market was not in effect. "An experiment of this kind," Screen Gems said, "cannot be continued once its defects become evident without risk of serious impact upon the program industry, those employed in that industry and the viewing public."

NBC amplified that theme: "What the commission seems to be sceking," it said, "is the development of a kind of programing that is as diverse and as high in quality as that provided by networks, but is trying to accomplish the result by eliminating the very thing that permits programing to approach high levels of quality and diversity in a mass medium: namely, the network process itself. This simply cannot be accomplished."

A significant area of controversy in last week's pleadings centered on a study submitted to the FCC last January by four major film producers purporting to show that, under the access rule, diversity of programing in cleared time periods has deteriorated and that those periods have been glutted by game shows and foreign-produced entertainment series (BROADCASTING, Jan. 15). A direct rebuttal to that study came last week from the Association of Independent Television Stations (INTV). The "important fact," the association maintained, "is that a very substantial body of program developers and marketers do not agree and are prepared to stake their financial and creative future accordingly." It claimed that the January study, which was com-missioned by MCA, Screen Gems, Warner Brothers and Paramount, "is largely irrelevant at this stage" because it is based on a program-distribution pattern that existed prior to the access rule. Previously, INTV said, there was no place for first-run syndicated programing in prime time because the entire evening was dominated by the networks. "It was to be expected that as the stations and syndicators adjusted to the reality of the rule, buying and selling practices would begin to be affected and that, at some point, a higher level of income

would be available to syndicators than had been the case before the rule."

In arguing for the rule's retention, many proponents cited a need for a "climate of certainty" within the industry that stations and syndicators would be free to make advance production and scheduling plans without the foreboding reminder that repeal of the rule by the commission could abruptly thwart their plans. Said ABC: "Several seasons of operation and without the chilling effect of threatened repeal will be required to gauge the ultmiate programing result to be realized. Each year has given encouraging signs. The program producers are offering more attractive programing and are obtaining higher prices for their product.'

Several of the rule's defenders indicated a willingness to support some modifications. ABC conceded that "there may be room for some relaxation" in the provision limiting networks to no more than three hours of prime time per evening. It suggested that affiliates be permitted to broadcast up to three and one half hours of network fare two evenings per week, as long as the total network prime-time allocation does not exceed 21 hours weekly.

While ABC continued its support for the off-network provisions, it acknowlcdged that "it may be possible to drop the restrictions soon." However, it requested that no basic changes be made in the rule before the 1973-74 TV season out of "basic fairness to program producers and syndicators."

There was also widespread support for blanket waivers of the rule to cover encroachment on prime time by network sports coverage. Several parties, and Metromedia Inc. in particular, expressed support for automatic waivers of the rule for sports events that unintentionally run over into cleared access periods, as well as blanket waivers to cover such popular events as New Year's Day football bowl games and the Olympics.

Changing Formats

• KWIC(FM) Beaumont, Tex. (formerly KJET-FM) on March 9 assumed new call letters and switched to a contemporary format. Formerly duplicating the rhythm and-blues programing of KJET(AM), KWIC now programs top-20 hits mixed with selected album cuts from new rock releases during daytime hours and progressive rock during nighttime operation. Overseeing the format change is a new program director, Dale Spence, formerly with KILE(AM) Galveston, Tex., and most recently a freelance producer and jingle writer.

WEZL(FM) Charleston, S.C., has introduced a country-and-western format to replace its standard pops programing. The format change was accompanied by a reduction in the hours of automation.
 WRC-FM Washington adopted a "beautiful-music" format March 5 to replace its daytime jazz-nighttime rock programing. The new format, which features in

strumentals, standards and special arrangements of current hits, is programed both for the time of day and the season of the year. With the format, commercials are now being limited to four slots and a maximum of six minutes per hour. Program operation has been extended from 18 to 24 hours daily and today (March 19) the station begins broadcasting from a new transmitter, increasing power from 20 kw to 50 kw.

• WTHI-FM Terre Haute, Ind., has switched from a middle-of-road format to a "beautiful music" sound. The station is now fully automated, and is using TM Productions' "Beautiful Island" package.

Telcom to be doctor to local programing

It offers surveys and expert help in station news and other shows, will soon add promotional service

Telcom Associates Inc., New York, which has specialized in TV programing, buying and research for stations, is expanding into news and local-live programing, promotion, and consultancy.

In announcing the move today (March 19), Herb Jacobs, board chairman, and Robert Rierson, president, said that stations seeking to be dominant in the marketplace today must "begin with local news, with all success flowing forward and backward from there."

Telcom will provide station clients, on request, with in-depth audience surveys in their markets on attitudes toward the news, according to Mr. Rierson. He noted that other firms are supplying this service, but said Telcom will add "the extra dimension of providing trained newsproduction personnel to go into the market and work directly with stations on writing, format and production techniques."

To accommodate this expansion, Telcom has brought to its staff Lee Eden as vice president of research and James Sieger as vice president of broadcasting. Mr. Eden has worked for the McHugh & Hoffman research firm and with the Post-Newsweek Stations as director of research. Mr. Sieger has been executive news producer of WBM-TV Chicago and program manager of KYW-TV Philadelphia.

Mr. Jacobs said that a promotion department at Telcom is being formed with an experienced promotion director to be named shortly. He added that Telcom's staff also will work with stations on local live creation and production of all types of shows.

Telcom evolved out of TV Stations Inc., which was organized in 1954 as a program buying, consultancy and research company. In 1970, Telcom was established and, on contract, it services 70 stations in the TV Stations Inc. group. In addition, it has 25 stations that receive the full complement of Telcom services. The latest Telcom client is the Storer Broadcasting Co., which signed last January for its six TV stations.

These stations all investigated, compared, and chose the only proven computerized on-line, real-time total management information system....

N.Y. festival this week opens Japanese exchange

Next stop for visiting delegation will be NAB convention in D.C.

A delegation of 29 Japanese broadcasting executives is slated to attend the first in a projected series of U.S.-Japanese television program festivals, to be held in New York and at next week's National Association of Broadcasters convention in Washington.

The festival opens Wednesday (March 21) with the first of two days of showings at Japan House in New York. Digest films offering highlights of 62 Japanese TV programs will be shown Wednesday and Thursday mornings, with approxi-mately 40 U.S. broadcasters expected to be on hand each day. The 62 programs will also be available in complete form in cassettes so that, during Wednesday and Thursday afternoons, the American broadcasters can take a fuller look at those they think they might like to schedule for broadcast.

The festival is part of a U.S.-Japan cultural and educational interchange program sponsored by the State Department. One of its purposes is to promote a continuing exchange of programs between broadcasters of the two countries (BROAD-CASTING, Dec. 11, 1972; Feb. 12). Next year's festival is scheduled for Japan, featuring programs by U.S. broadcasters.

Motosaburo Takata, vice president of the Broadcast Programing Center of Japan, is chairman of the Japanese delegation to the festival, which will move to Washington for the duration of the NAB convention, Sunday through Wednesday (March 25-28). Festival officials said an assembly room at the Sheraton-Park hotel had been reserved for the duration of the convention for showing the programs to interested broadcasters, and that the digest films are scheduled to be shown on Monday (March 26) at 4.05-4:45 p.m. in the Regency Room of the Shoreham hotel.

Members of the Japanese delegation also are to be honored at a reception by the State Department Sunday evening and at a dinner by the Japanese ambassa-dor to the U.S. on Tuesday (March 27). In addition, the Japanese delegates and U.S. broadcasters who visited Japan last

Up from down under. A trio of Australian broadcasters spent a hectic week in Los Angeles late last month originating an hourly, daily program from the studios of KMPC (AM) there for 3UZ Melbourne, Australia. A conventional program consisting of records and commercials was interspersed from Los Angeles with celebrity interviews plus chatter. All were relayed to Melbourne via two-way satellite voice channels. Sponsors of American 60 minutes were Pan-American World Airways, Hollywood-Pacific division of Holiday Inns of America and Avis.

fall, when plans for the festival and program exchange were refined, will have a breakfast meeting Wednesday (March 28).

The festival is scheduled to return to New York for additional showings at Japan House for U.S. broadcasters on March 30 and for members of the Japan Society on March 31.

J. Leonard Reinsch of Cox Broadcasting Corp. is chairman of the U.S. delegation. Clair R. McCollough of the Steinman Stations headed the committee that coordinated festival plans at the NAB meeting, while committees headed by E. R. Vadeboncoeur of the Newhouse Stations and Fred Weber of the Rust Craft Group coordinated the first and second New York shows, respectively.

New York shows, respectively. Members of the Japanese delegation, in addi-tion to Chairman Takata, are President Shinzo Takahashi and International Relations Manager Jiro Maeda of Mainichi Broadcasting System; executive adviser Tsunejiro Hirai, italson officer Shiro Nakajo and Hideo Tamiya, assistant director of the TV programing division, of Asahi Broad-casting Corp.; Executive Vice President Saburo Higashide and International Division Director Masao Tomita of Fuji Telecasting Co. Ltd.; Inter-national Relations Manager Yozo Shiratori, Nippon Television Network Corp.; Tadashi Yoshida, special assistant to the president, and controller Chosei Kabira and Manager Sadaya Murayama of the president's office, Japan Broadcasting Corp. (NHK); Roku Ito, deputy director of NHK's overseas broad-casting department Ichiro Amari, officer of NHK's promotion division, and Hidezo Nakanishi of NHK International. Also, Executive Director Yuklo Isomura, Con-toller Shigeo Unemoto and Assistant Vice Presi-dent Masahlko Kobayashi of the Broadcast Pro-graming Center of Japan; President Yoshihas Shimura, Sendai Broadcasting Co. Ltd.; Kiyoshi Moriyasu, chief of the technical division, Japan Science Foundation (Tokyo Channel 12); Genki Shibamura, Sendai Broadcasting Co. Ltd.; Kiyoshi Moriyasu, chief of the president's office, Chuugoku Broadcasting Co. Ltd.; Masabiko Shibamura, Sendai Broadcasting Co. Ltd.; Kiyoshi Moriyasu, chief of the president's office, Chuugoku Broadcasting Co. Ltd.; Masabiko Kubyashi, executive director, RKB Mainichi Broadcast-ing Corp.; President Tsuguhiro Tooma, Ryuukyuu Broadcasting Co. Ltd.; Micoshi Kicol, chief of the general administration divlision; Kiichi Nakai, chief of the program production section, and Hiroshi Uraoka, deputy chief of the trans-mision section. mission section.

ABC Films spun off to O'Sullivan group

Sale is in wake of earlier FCC edict telling networks to get out of domestic TV program syndication

ABC Films Inc. will officially change its name to Worldvision Enterprises Inc. on March 30 when the closing of the sale of the programing organization takes place (BROADCASTING, Aug. 21, 1972).

Contracts have been signed for the sale of ABC Films by ABC Inc. to a group of key executives headed by ABC Films President Kevin O'Sullivan. The sale follows an FCC ruling requiring broadcast networks to refrain from domestic TV program distribution as of June 1. (CBS Films was spun off into Viacom International and sale of NBC Films to National Telefilm Associates is awaiting completion:)

Worldvision Enterprises will move into new headquarters offices at 660 Madison Avenue in April and will maintain offices in Los Angeles, Chicago, Atlanta, Ca-racas, London, Rome, Paris, Sydney, Toltyo, Sao Paulo, Munich and Toronto.

Strict checks not needed for non-English programs

FCC suggests latitude in monitoring but stresses station's responsibility

The FCC has assured stations carrying foreign-language broadcasts that they are not required to employ full-time monitors to listen to every program in a language with which the broadcasters are not familiar. Indeed, it said it would not lay down a rigid formula for achieving control of such broadcasts.

But the commission, in a policy statement last week, made it clear that broadcasters are responsible for all programs they carry, including those in a foreign language. And it rejected a suggestion by the National Association of Broadcasters that licensees, after making a background check, rely on a performer to monitor his own program.

NAB had made the suggestion in requesting a clarification of a commission statement asserting that licensees must make "a systematic and regular preaudit of all foreign-language programs by a paid employe of the station who has demonstrated capability to understand the language involved." NAB said the requirement would make it difficult for broadcasters to continue foreign-language programing.

The commission said it was not requiring the preaudit of every foreign-language broadcast by a paid, outside monitor. It noted that at many stations such programs are broadcast by station employes who are familiar with all commission reauirements.

The commission said there are various ways a licensee can exercise his responsibility over the material. It said a broadcaster could hire a monitor on a spot basis, provided the monitor is familiar with the station's policies-and the commission's requirements regarding programing. It also said the broadcaster might, on occasion, use the services of an unpaid monitor.

But as for the suggestion that broadcasters rely on performers, even after a background check, to monitor their programs, the commission saw it as involving conflict-of-interest problems. The commission noted that many foreign-language programs are broadcast by independent time brokers and that there may be a major conflict of interest between the time broker's tendency to increase his income by accepting dubious commercials and his duty to observe the rules.

Program Briefs

Radio consultant. Kent Burkhart and Associates has been formed in Atlanta by former president of radio division of Pacific & Southern Broadcasting. First clients are weze(AM) Boston and wROQ-(AM) Charlotte, N.C. Stations will be programed for 18-49 age demographics, according to Mr. Burkhart, 6500 River Chase Circle East, Atlanta 30346. (404) 252-3037.

New production firm. Chromaloy-American Corp., St. Louis, has formed Schary Productions, New York, division that will produce and acquire motion pictures, plays and musical programing for theaters and pay television.

Stamps approval locally. WSAU-TV Wausau, Wis., has initiated its own system of rating feature films to be shown by station. Evaluation of films is performed by local civic organization, Key Project Group, which uses guidelines established by Catholic, Jewish and Protestant film councils and Parents magazine to form composite rating figure. Ratings, which are flashed on screen prior to every local or network feature, are: (1) Suggested for family entertainment; (2) Not recom-mended for children; (3) Not recommended for adolescents without parental guidance; (4) Not recommended for general viewing, and (5) No rating available.

Griffin in 110 markets. Metromedia Producers Corp. reported last week Merv Griffin Show has been sold in 110 markets in U.S. and Canada. Ninety-minute variety-talk series went on air March 13, 1972, with 47 stations, and figure climbed to 87 by last June. MPC Executive Vice President Ken Joseph said recently concluded agreement with wBAL-TV Baltimore places Griffin in all 30 of top-30 markets and 56 of top-60 markets.

Fun in pokey • Four Star International and Comedy Store Enterprises, both Hollywood, are producing half-hour situation comedy about prison as a pilot for sale to network and/or advertiser. Comedy series, which is being funded entirely by producing firms, is creation of Mitzi Mendelson and Pat McCormick. Latter also plays one of leads. This is first undertaking of Four Star-Comedy Store under production pact signed last Janu_ry.

39 ante up. Viacom Enterprises reported last week that 39 TV stations already have joined Viacom in financing *The Addams Family Fun House* as primetime access series for fall. Stations include five ABC-owned outlets and others belonging to Cox Broadcasting, Storer Broadcasting, Scripps-Howard, McGraw-Hill, King Broadcasting, Corinthian and General Electric Broadcasting. Viacom revealed its program concept last month (BROADCASTING, Feb. 12 et seq).

Fifty new ones. Cinerama Inc., Hollywood, with library of 50 feature films has established Cinerama Television Inc. as syndication arm to handle distribution for TV. George Mitchell, president of Olympus TV Inc., Hollywood, and previously vice president-general sales manager of Warner Bros.-Seven Arts, heads Cinerama Television.

Radio "Perils..." Formation of Hollywood Radio Theater by Jay M. Kholos Enterprises, Encino, Calif., has been announced. First production will be Zero Hour mystery series, consisting of five 30-minute installments. Each daily segment ends with cliff-hanger situation so that story is continued over five-day week. New program will begin each week. **Parets to Hubbard.** Hal Parets, who produced *The Joe Pyne Show* for radio and TV, has been assigned by Hubbard Productions, Minneapolis-St. Paul, to produce its *Charlie McCarthy Show*.

Comrades. Bob Banner Associates, Los Angeles, has entered into joint production agreement with Soviet Union for filming in USSR of one-hour television special starring figure skater Peggy Fleming. The special, which will be carried on NBC-TV during 1973-74 season, will be produced in Moscow, Leningrad, Vladimir and Susdal.

Comedy from ITC. Independent Television Corp., New York, has placed into syndication *The Kopykats*, a group of one-hour comedy specials featuring guest hosts—Robert Young, Debbie Reynolds, Orson Welles, Tony Curtis, Steve Lawrence, Ed Sullivan and Raymond Burr. Appearing regularly will be Rich Little, Frank Gorshin, George Kirby and Marilyn Michaels.

Good hearts. WKAL-AM-FM Rome, N.Y., reported last week that its fourth annual *Heartbeat Marathon* resulted in \$14,800 in pledges for Rome Heart Committee. Sixteen-hour appeal was broadcast Feb. 10.

Easter notes. Total Communications System is selling Easter 'Round the World, 75 one-minute radio featurettes describing unusual customs in connection with celebration of Easter. Suite 16M, Gateway Towers, Pittsburgh 15222. **Carney up.** Art Carney has been signed to star in new 20th Century-Fox situation comedy series, *Up the World*, for ABC-TV. Pilot shooting begins early next month. Producers are Hal Goodman and Larry Klein who conceived and are writing half-hour contemporary comedy about plight of modern man.

ABC's Phillips? ABC has signed Agnes Nixon as daytime consultant. Miss Nixon is creator and head writer of One Life to Live and All My Children, two ABC daytime serials. ABC has bought rights to One Life to Live from her production company. She will continue as head writer of All My Children.

Thursday flip-flop. CBS-TV's The Waltons, which as a new show this season has been high in critical acclaim but a near-miss in the ratings, outscored its competition in the fast Nielsen for the week ended March 4. Reaching beyond the wildest expectations of its CBS backers, the show on March 1 was rated 23.6 with a 35% share. NBC's Flip Wilson (which is programed opposite Waltons on Thursday, 8-9) had a 23.4 rating and also a 35% share of audience. Mod Squad, ABC's show in the 8-9 period, rated 15.5 with a 23% share. Waltons ranked 11th, Wilson 14th and Mod Squad 50th. Cumulatively for the season, CBS led with 19.9 to NBC's 19.6 and ABC's 18.1.

The Broadcasting#Playlist

These are the top songs in air-play popularity on U.S. radio, as reported to *Broadcasting* by a nationwide sample of stations that program contemporary, "top-40" formats. Each song has been "weighted" in terms of American Research Bureau audience ratings for the reporting station on which it is played and for the day part in which it appears. • Bullet indicates upward movement of 10 or more chart positions over previous week.

Ratings, schmatings.

In small markets, you can sell more time with promotions than with numbers.

Small Market Promotions — that's our name.

What we do is this: we package promotions for small market radio stations. Promotions that a radio station initiates. Promotions that the station sells participations in. Promotions that can sell more time than the numbers game can.

And we make promotions easy to sell. We provide the ideas. The promotional items. And all the materials you need — right down to tapes and counter displays.

So the promotion is ready for your clients to use — clients that you already have. Or new ones you've been trying to get.

Do this. Send in the coupon. We'll send you 5 promotional items that sell for \$9.84. And a descriptive brochure. The cost: five bucks. And that five bucks could sell more time than your best salesman.

Small Market Promotions

5340 Central Avenue St. Petersburg, Fla. 33707

OK. I've enclosed five bucks. Send me your promotional items and your brochure.

Satellite system promised by Aug. 1

RCA companies make joint proposal to ride Canadians' Telesat

Two RCA companies made a move last week to get into the lead among American firms seeking to provide domestic communications-satellite service.

RCA Global Communications Inc. and a subsidiary, RCA Alaska Communications Inc., applied to the FCC for authority to build and operate an interim communications-satellite system that would begin providing message and television service as early as Aug. 1.

The key to the early starting date is the Telesat Canada satellite. The RCA companies would use it in conjunction with five earth stations. The \$7.4-million system would provide links between the East and West Coasts and between both coasts and Alaska.

The RCA companies thus would be operating a domestic-satellite system in the U.S. about a year ahead of Western Union Telegraph Co., which was the first company to file for a system. It received commission approval in January for a two-satellite system that the company hopes to have fully operational by the summer of 1974.

In describing the Telesat-connected system as "interim," Eugene D. Becken, president of RCA Globcom, said that the plan is to use the Canadian satellite until the ROA domestic satellite system which was proposed in 1971 is approved by the commission and begins operation.

He also said that the earth stationsone located near New York City, another in San Francisco, one each in Juneau and Anchorage, both Alaska, and, at a later date, one in Los Angeles -would be incorporated into the full domestic U.S. system. Traffic would be shifted at no material cost, he added.

RCA Globcom plans to use the interim system to supplement its facilities in New York and San Francisco to provide private-line, voice, data and television services and would add Los Angeles as a point of communications. The company also said the system would provide service for other specialized uses, such as pro-gram transmission for cable-television operators.

The Canadian system, meanwhile, was revealed last week to be figuring in the domestic communications-satellite plans of another American company-Teleprompter. The major cable-television company is seeking FCC permission for an experimental, transportable receiveonly earth station that would be used with Telesat.

Teleprompter. either directly or through subsidiaries, has applications pending for the establishment of five receive-only earth stations to be used with domestic satellite systems for the reception and distribution of cable-television programing.

The proposed experimental earth sta-

tion, Teleprompter said, will provide information that will be useful in solving problems that may be encountered in the construction of receive-only earth stations to be used for the reception of television programing destined for cable systems. The station will be transported on a flatbed tractor-trailer truck to various locations in the U.S. where signals from the Canadian satellite can be received. A majority of the sites will be at Teleprompter CATV system locations.

Teleprompter is planning a major demonstration of the earth station at the National Cable Television Association's convention in Anaheim, Calif., in June. As a special feature, Teleprompter and NCTA plan to invite Nixon administration and FCC officials to address the convention by way of satellite from Washington as a demonstration of closed-circuit cable system originated programing (see "Cablecasting").

Intelsat governors' first

The board of governors of Intelsat, the International Telecommunications Satellite Organization that owns the global system of satellites, last week held the first of what figure to be two weeks of meetings in Washington and elected Ernest Eliasen of Canada chairman of the board and Bernhard Seidel of Germany vice chairman. Mr. Eliasen and Mr. Seidel served as chairman and vice chairman, respectively, of the Interim Communications Satellite Committee, which had preceded the board of governors as the policy-making body of Intelsat.

Also at the board of governors meetings in Washington, which got underway March 14, procedures for negotiation of a six-year technical and operating management services contract with the Communications Satellite Corp. are expected to be discussed. The board of governors became the policy-making body of Intelsat as of Feb. 12. There are now 81 countries that are members of Intelsat.

Expansion for translators

The FCC has submitted for congressional consideration legislation that would authorize translator broadcast stations to originate limited amounts of local programing, and to allow FM radio translator stations to operate unattended. The commission said that it would be in the public interest to authorize translators, which now depend on public generosity for their support, to originate a limited amount of programing. And it said that although technological advances have made FM translators possible, it is necessary to permit them to operate unattended to make them economically feasible.

Technical Briefs

Big one for Gates. In buy termed "probably the largest order for television transmitters ever received by a U.S. manufacturer," Gates division of Harris-Intertype Corp. landed \$4.5-million contract to supply 22 transmitters and associated equipment to Yugoslavia. More than half are 40 kw UHF units designed for European standards and said to be equivalent of 55 kw U.S. systems. They will be used in country's second TV network.

ABC buys RCA's. Four RCA TCR-100 video-tape cartridge recorders have been purchased for ABC's wABC-TV New York (2), wLS-TV Chicago and wXYZ-TV Detroit. Deal comes in at \$900,000. Machines handle up to 22 cartridges, each with 3 minutes capacity. RCA says shipments of TCR-100's will reach 100 mark by end of March.

For villages in India. RCA Corp. said last week that RCA Ltd. of Canada has received \$2-million contract to design key earth station for first satellite relay of TV directly to small-village receivers. This project in India involves transmission of educational programs to inexpensive receivers in several hundred settlements. RCA earth station is to be at Dehra Dun, about 100 miles from New Delhi, and will start in mid-1974.

New demodulator. Comsonics Inc., Harrisonburg, Va., has introduced broadband zero carrier keyer demodulator which company claims permits adjustment of depth of modulation of television modulator rapidly and without use of other equipment. Devices sells for \$995.00. Contact: William Edmonson Jr., Comsonics Inc., Box 1106, Harrisonburg, Va. 22801.

ETV contract. ITT Commercial Services Inc., Paramus, N.J., has received \$2.5million contract from Mississippi Authority for Educational Television to construct, maintain and lease microwave educational-TV system. It will provide color TV from center at Jackson to seven transmitters throughout state.

Federal help. Department of Health, Education and Welfare has awarded more than \$3.5 million in grants to help in start-up or improvements in 25 noncommercial radio and television stations in 16 states. Funds, awarded by Office of Education's Educational Broadcasting Facilities (under Title I of Public Broadcasting Act), is to be used by stations to acquire broadcast equipment. Grants bring total number of stations assisted during current fiscal year to 49. Total of \$7,590,531 has been awarded so far, with additional grants to be announced prior to end of fiscal year on June 30.

Visual ends suits. Visual Electronics Corp., New York, said last week it has settled out of court several law suits seeking \$2 million from Visual, its directors and others. Actions were started in U.S. Southern District of New York Court by F. Cecil Grace and Lyle O. Keys, who claimed that Visual's purchase of their shares in Visual in 1966 (when company was privately held) violated Securities Act of 1933. Settlement stipulates that total of \$25,000 and 15,000 shares of Visual stock be given to Mr. Grace and Mr. Keys, and Visual guarantees stock will be worth \$6 per share at the end of three years.

RCA's biggest breadwinners

A proxy statement issued with the notice of the annual meeting of RCA stockholders listed Robert W. Sarnoff, chairman, as having received the top compensation for 1972 (\$275,000 in salary, \$66,667 in incentive award and \$133,333 to be earned out over the next two years). Other RCA officers in the higherpaid category: Anthony L. Conrad, president, \$200,000 in salary, \$50,000 in incentive award and \$100,000 to be earned out; Julian B. Goodman, NBC president, \$160,000 in salary, \$41,667 in incentive award and \$83,333 to be earned out; Robert L. Werner, executive vice president and general counsel, \$145,000 in salary, \$36,667 in incentive award and \$73,333 to be earned out.

Financial Briefs

Investing in itself. Metromedia executive committee has authorized purchase of company stock up to aggregate of 250,000 shares. Initial shares would be used, in lieu of cash, for Metromedia contribution to employe profit-sharing trust funds and additional shares for employe stock options or for general corporate purposes.

Collins Radio Co., Dallas, said new orders of \$115-million in second quarter resulted

in gain of 26% over first quarter and brought first-half order total to \$206million, increase of 66% over first half of 1971.

Deaths

Will Roland, 63, producer and director, Arthur Godfrey's morning show on CBS from 1946 to 1958, died March 10 in London of a heart attack. Since 1958 Mr. Roland had been assistant director, London office, NBC International, with re-sponsibilities for sale of NBC films to European television stations. He is survived by his wife, Sherley, two daughters and one son.

Haley Bell, 77, president and founder of Michigan's first black-owned radio stations, died March 12 at his home in Detroit. Mr. Bell founded WCHB(AM) Inkster, Mich.-wCHD(FM) Detroit in 1955. He was the first black man to receive a license to operate a radio station. He is survived by his wife, Mary, and two daughters. His sons-in-law are Wendell Cox, VP-general manager, WCHB, and Robert Bass, VP-general manager, WCHD.

Laurence Gordon Cumming, 71, engineering management consultant, died Feb. 24 in Victoria, B.C., where he had lived since his 1966 retirement. Mr. Cumming was co-designer and engineer for WBZ-AM-FM and WEEI-AM-FM, all Boston, and WBET-AM-FM Brockton, Mass.

and assisted in development of world's first international short-wave transmitter for wBZ. He is survived by his wife. Adelaide, and one stepdaughter.

Robert Siodmak, motion-picture director and producer whose TV credits include O.S.S., adventure series about World War II secret agency, died March 10 of a heart attack in a Locarno, Switzerland, hospital. He is survived by two brothers, Curt and Werner.

James J. Quinn, 54, technical director, WPBS(FM) and Muzak, both Philadelphia, died March 8 there. Mr. Quinn had also worked for RCA and as chief engineer, wCAU(AM)'s Muzak there prior to joining WPBS in 1961. He is survived by his wife, Elizabeth, one daughter and four sons.

New TV stations

Action on motion

■ Administrative Law Judge Isadore A. Honig in Montgomery, Ala., et al. (Alabama Education Television Commission), noncommercial TV pro-ceeding, granted petition by Broadcast Bureau and extended to April 23 and to May 14 dates for filing proposed findings of fact and conclusions, and replies, respectively (Docs. 19422-30). Action March 2.

Other action

Review board in Dubuque, Iowa, TV proceeding, granted petition by Dubuque Communications Corp. for extension of time through March 12 to file re-plies to Broadcast Bureau's exceptions to initial decision which proposed grant of Dubuque Commu-nications' application for license for KDUB-TV, Dubuque (Doc. 19339). Action March 1.

Rulemaking action

■ Fresno, Calif.—FCC proposed amendment of TV table assignments to substitute ch. 34 for ch. 30 at Fresno. Action March 7.

Existing TV stations

Application

The KELP-TV El Paso-Seeks CP to change ERP to vis. 316 kw, aur 31.6 kw; transfer location to 3.9 miles north-northwest of county court house, El Paso; change type trans. to RCA TT-50FH, type ant, to RCA TW-9A13-P; make changes in ant. structure and increase HAAT to 2,000 ft. Ann. March 9.

Final actions

■ FCC denied application by Gary Lane, Cerritos, Calif., for review of FCC staff action which denied complaint against comment by David Brinkley on former federal employe Otto F. Otepka and Sub-versive Activities Control Board. Action March 2.

FCC denied complaints of Student Association of State University of New York at Buffalo, N.Y., pro-testing refusal of ABC to carry "political" half-time show presented by association during 1970 football game. Action March 14.

Banke, Action March 14.
KMUV-TV Sacramento, Calif—FCC affirmed or-der released Sept. 19, 1972 modifying CP of Gray-sun Television Co. for KMUV-TV to specify opera-tion on ch. 31 in place of ch. 15 (Doc. 19511). Pe-tition by Camellia City Telecasters Inc., licensee of KTXL(TV) Sacramento, for reconsideration of order was denied. Action March 7.

order was denied. Action March 7. • Washington—Broadcast Bureau informed Accuracy in Media Inc. that further consideration of complaint that documentary by NBC on San Fran-cisco's Chinatown was controversial issue of public importance would require clearer specification of issues it believed to be involved. together with additional information demonstrating that issues were controversial and of public importance, that broad-cast contained substantial discussion of issues. and that NBC did not afford reasonable opportunity for presentation of opposing ivews. Ann. March 6.

WCCO-AM-TV Minneapolis-St. Paul—Broadcast Bureau informed Carroll E. Crawford, president and publisher of Sun Newspapers Inc., Edina, Ninn., that no further action is warranted on alle-gations that stations had broadcast news stories and reports on finanical condition of his newspaper that were irresponsible and censtituted anti-competitive activity. Ann. March 7.

■ KORK-TV Las Vegas—FCC dismissed motion by Western Communications Inc., licensee of KORK-TV Las Vegas, for stay of hearing scheduled for March 12 in Las Vegas (Docs. 19519, 19581). Action March 7.

WPIX(TV) New York—Broadcast Bureau in-formed Richard Wolf, Columbia University, that in complaint, he did not offer "specific information

setting forth reasonable grounds" for his conclusion that WPIX violated fairness doctrine by presenting only one side of controversial issue concerning de-sirability of United States Information Agency oper-ations during broadcast of Senator Buckley Re-ports, monthly series, Ann. March 6.

Ports, monthly series, Ann. March 6.
■ New York—FCC denied request of Club Palmach Rifle and Pistol Club Inc., New York, for review of FCC staff action ruling against Club's fairness descrine complaints regarding treatment of issues of gun control and busing on news programs of WNBC-TV. WCBS and WQXR, all New York. Action March 7.

WHEN-TV Syracuse, N.Y.—Broadcast Bureau in-formed Robert H. Hauslein that further action is not warranted on complaint that WHEN-TV refused to sell half hour of prime time to McGovern for President Committee for political message by Senator McGovern on October 10, 1972. Ann. March 6.

WSA2-TV Huntington, W. Va., and WAVE-TV Louisville. Ky.—Broadcast Bureau informed John L. Franson of National Audubon Society that no action is warranted on fairness complaint against stations for denying requests for equal time to present organization's views on issue of strip min-ing. Ann. March 8.

Ing. Ann. plasted of X = XETV(TV) Tijuana, Mex—FCC modified order requiring ABC Inc. to discontinue network service to XETV to permit continued transmission of week-day programs until June 1 and all other programs until July 1 (Doc. 18606). Action March 2.

Actions on motions

Administrative Law Judge Byron E. Harrison in Largo, Fla. (WJ.CY-TV Inc. [WLCY-TV]), TV proceeding, granted petition to intervene by Mid-Florida Television Corp. to extent of resolution of

UHF impact issue, and made petitioner party to proceeding (Doc. 19627). Action March 7.

proceeding (Doc. 19627). Action March 7. Administrative Law Judge Isadore A. Honig in High Point, N.C. (Southern Broadcasting Co. [WGHP-TV] and Furniture City Television Co.), TV proceeding, granted petition by Southern to amend application to report certain changes in ownershp report and to note fact that Southern commenced operation of WEZI(FM) Memphis, on Jan. 12; by separate action, granted petition by Southern to amend application to report filing of three antitrust suits in various United States district courts against defendant corporations with which three Southern stockholders are involved; granted request by Southern to delete certain attachments of amendment and substitute; ordered that any re-newal of Southern's license to operate will be without prejudice to any action commission might deem appropriate as result of courts' dispositions of civil actions reported (Docs. 18906-7). Action March 2.

■ Administrative Law Judge Isadore A. Honig in High Point, N.C. (Southern Broadcasting Co. [WGHP-TV] and Furniture City Television Co.), TV proceeding, dismissed as moot petition by Fur-niture City to amend application (Docs. 18906-7). Action March 5.

Action March 5. Action March 5. Administrative Law Judge Isadore A. Honig in High Point, N.C. (Southern Broadcasting Co. [WGHP-TV] and Furniture City Television Co.), TV proceeding, by separate actions, granted peti-tions by Furniture City to amend application to reflect changes in business interests of principals and to reflect precise date of retirement as high school principal of 1% stockholder Samuel E. Bur-ford and his partime association with Bennett College, and accepted petitions without prejudice to consideration of effect of failure to comply with 30-day reporting requirement of rules in event these matters are made subject of inquiry by commission or review board (Docs. 18906-7). Action March 7. Administrating Law, Ludag Chester E. Naumowirz

or review poard (1905. 18906-7). Action March 7. Administative Law Judge Chester F. Naumowicz Jr. in Las Vegas (Western Communications Inc. [KORK-TV] and Las Vegas Valley Broadcasting Co.), TV proceeding, ordered that subpoena re-quested by Western Communications shall issue, but that Mr. Hendon shall not be required to pro-duce those requested documents which are not rele-vant to matters at issue. Judge had stricken, from subpoena form, those requested documents which he deemed to be irrelevant (Docs. 19519, 19581). Action Feb. 26.

19581). Action Feb. 26. **a** Administrative Law Judge Chester F. Naumowicz Jr. in Las Vegas (Western Communications Inc. [KORK-TV] and Las Vegas Valley Broadcasting Co.), TV proceeding, denied motion by Western for stay of hearing; by separate action, certified to review board Western's request for proceeding to determine whether sanctions should be imposed on Las Vegas Valley Broadcasting Co. for making, en-couraging, or soliciting unauthorized ex parte pres-entations or falling to report such presentations; cer-tified association with Western's contingent motion to add ex parte issue (Docs. 19519, 19581). Action March 7.

Other actions

Review board in Las Vegas, TV proceeding, de-nied petitions by Western Communications Inc. to add issues against Las Vegas Valley Broadcasting Co, concerning failure of Valley to submit complete information about other broadcast interests of Clark Henry Tester, proposed programing vice president, in violation of rules, and failure of Val-ley to file on time, amendment to reflect changes in financing as required (Docs. 19519, 19581). Action March 6.

■ Review board in Las Vegas, TV proceeding, dis-missed motion by Western Communications Inc., applicant for renewal of license of KORK-TV Las Vegas, for stay of all scheduled hearing dates and procedures in proceeding involving application and mutually exclusive application of Las Vegas Valley

Profile

Standout engineer: Fetzer's A. James Ebel

It has been an eventful year for Jim Ebel, an engineering man. Appointed chairman of the board of the Omaha branch of the Federal Reserve Bank of Kansas City, named president of the three Fetzer-owned television stations in Nebraska and Iowa, selected by the National Association of Broadcasters as "man of the year" in engineering that's his overflowing cup for 1973.

The big moment comes next week at the national NAB convention in Washington. At the Tuesday luncheon (March 27), A. James Ebel, a broadcaster and engineer since he was a junior in high school, will receive NAB's coveted engineering award, traditionally given to the person who is thought to have contributed the most to engineering during the year.

He's being honored for his intensive work in studying the questions involved in satellite transmission: What will be the effects of satellites on the interconnection between the network and stations? What about the ramifications of the real possibility of direct satellite-tohome broadcasting? Jim Ebel's part in this work began some five years ago, when as vice president and general manager of Nebraska's KOLN-TV Lincoln and KGIN-TV Grand Island, both CBS-TV affiliated stations, he was chosen to head a special sort of task force-a communications-satellite study committee of CBS affiliates. Subsequently, he was able to talk to ABC and NBC affiliates associations and get them to set up similar satellite committees.

By 1970, an over-all satellite study committee of the three network affiliate organizations was formed with Jim Ebel as chairman. It had become the serious concern of the affiliate groups to stake a place for themselves in a future containing the prospect of direct broadcasting from satellite to home-a potential national distribution from a single station in the sky. Thus when the FCC announced plans to take applications for domestic satellites, the three affiliate associations, led by Mr. Ebel, submitted an application for a satellite ground station in Phoenix that would be owned and operated by the three network-affiliated stations there (KOOL-TV, KTVK and KTAR-TV).

The plan of this Phoenix Satellite Corp., as it is called, is to construct a single-purpose, receive-only station to serve the nonlocal program interconnection needs of all commercial and noncommercial Phoenix-area television stations in hopes that television broadcast stations throughout the nation will be encouraged to file similar applications

Albert James Ebel--president, John E. Fetzer stations in Nebraska and Iowa (KOLN-TV Lincoln and KGIN-TV Grand Island, both Nebraska, and KMEG[TV] Sioux City, Iowa); b. May 30, 1913, Waterloo, Iowa: attended Iowa State Teachers College, Cedar Falls, 1930-34; BA. University of Iowa, 1934-36; MS, electrical engineering, University of Illinois, 1943; engineer KFJB(AM) Marshalltown, Iowa, 1930; engineer, KGDE(AM) Fergus Falls, Minn., 1931; engineer, WMT-(AM) Cedar Rapids (then Waterloo), 1931-36; engineer, WBAA(AM) Lafayette, Ind., 1936; director of engineering, WILL(AM) Urbana, III., 1936-46; assistant professor, electrical engineering, University of Illinois, 1943-46; broadcast consulting engineer, 1942-48; director of engineering, WMBD-AM-FM Peoria and WDZ(AM) Decatur, both Illinois, 1946-54; president, KXIC(AM) Iowa City, 1952-53; vice president and general manager, KOLN-TV Lincoln and KGIN-TV Grand Island, both Nebraska, 1954-73; VP, KMEG Sioux City, Iowa, 1969-73; named president of KOLN-TV, KGIN-TV and KMEG, February 1973; director, Fetzer Broadcasting Co., Kalamazoo, Mich., 1969-present; m. Elouise Hanson of Waterloo, Iowa, May 26, 1935; children-Marilyn, James, Marjorie, Douglas.

for earth-station facilities. "The result of this plan," explains Jim Ebel, "has been a favorable rulemaking from the FCC, so far as broadcasters are concerned, in establishing their right to own satellite receiving stations as opposed to only common carriers owning them."

Yet there has been more to Jim Ebel's efforts on behalf of the broadcasting industry in the uncharted satellite-transmission field. The satellite-transmission committees of the three networks financed his way as part of the U.S. delegation to the World Administrative Radio Conference on Space Telecommunications in Geneva in 1971. He was able to represent the interests of broadcasters in both specifically getting a 7 ghz allocation into the U.S. proposal (such an allocation would make possible community reception of satellite transmission instead of direct-to-home broadcasts) and generally protecting the interests of commercial broadcasters when satellite broadcasting was under consideration.

All of this study of satellite effects has, of course, left Mr. Ebel with certain conclusions. "I think it's entirely possible that we might be receiving our network programs by means of satellite in five years," he observes. "I'm not saying that it's probable. It all depends on how fast things work with the people who are putting up domestic satellites and when and if the networks decide to use satellites for station interconnections."

That's Jim Ebel, the station executive, speaking. Is it unusual for an engineerbred-and-educated broadcaster, who retains a deep interest in engineering, to rise to the top on the managerial side of the business? Not at the Fetzer stations, it isn't.

John E. Fetzer, the pioneer broadcaster who founded what is now a group of six TV, three AM and two FM stations, was a radio ham at 17, the proud builder and operator of amateur stations w9FD and w8Az. Carl E. Lee, the other top executive in Fetzer Broadcasting Co., recently named president of the Michigan Fetzer radio and television stations, rose through the ranks starting as an engineer and has never lost an infatuation that took hold when he built his own crystal set at the age of 12.

Jim Ebel, too, growing up in Waterloo, Iowa, when he was 17 visited wMT-(AM), then located there (now in Cedar Rapids), saw the engineer at work and fell in love with the idea of being able to do the same job. From the summer between his junior and senior year in high school until he joined the Fetzer organization in 1954, some 24 years later, Jim Ebel was essentially an engineer. He worked with seven different stations, taught electrical engineering at the University of Illinois, served as a broadcast consulting engineer practicing before the FCC, did extensive work in FM broadcast engineering and in early television.

Mr. Ebel went to Mr. Fetzer's KOLN-TV Lincoln, Neb., to supervise the building of a new transmitter and before the assignment was completed the manager left and the engineer was asked to take an interim turn at running the station. Now, some 19 years later, Jim Ebel is still based at KOLN-TV, but has added KGIN-TV Grand Island, a satellite station, and KMEG-TV Sioux City, to his responsibilities.

Editorials

No legislation

All of the principal parties—the National Association of Broadcasters, the National Cable Television Association, the copyright owners—profess to be pleased by the decision of the U.S. Second Circuit Court of Appeals holding cable systems subject to copyright liability for programing they import on distant signals (BROADCASTING, March 12). Then why is Senator John McClellan (D-Ark.), chairman of the Copyright Subcommittee, resurrecting his bill to place ceilings on the fees that cable systems would pay to carry copyrighted programs?

The answer may suggest a dissembling by the cable interests and may be related to the senator's close ties to cable interests. While there was doubt about the applicability of present copyright law to cable television, the senator was content to let matters stand. Now statutory limits on cable payments suddenly acquire a high priority.

If the court decision stands, it means that the free market will price the programing that cables carry, just as it prices the programing that broadcasters carry now. It's a little late for the senator to get back into the act on this issue.

Too many cooks

The Congress is now encumbered with more bills than it needs to restore stability to broadcast-license renewals. To the spate that had already been introduced or endorsed by 201 members of Senate and House (BROADCASTING, March 12) were added last week the White House legislative draft that Clay T. White-head has been obfuscating since last December and a sudden FCC revival, in legislative form, of the commission's own attempt to write off the Boston case that created this whole mess. The chances of meaningful legislation emerging from all this diminish with every submission.

In its final form the White House bill contains the virtues of the original draft, which was described here last Jan. 1. It would prohibit the FCC from dismantling broadcasting piece by piece, as its Boston decision set it up to do. It would take the government out of program surveillance.

But it still contains that offensive reference to the fairness doctrine, which has been assumed to be the instrument that Mr. Whitehead intends the FCC to use to force affiliates to keep network news departments in linc. And it is now accompanied by an "explanation and section analysis" that would all but instruct the FCC to use the bill as a whole new system of controlling radio and television programing.

As a substitute for present government requirements that affect the content of programing (X% should be agricultural, Y% news or public affairs), the White House bill is now interpreted by the White House to mean that the FCC would consider such matters as "programing expenditures; equipment and facilities devoted to programing; policies regarding preemption of time to present special programs; and the like." Here is the formula for government capture of the management function. The regulators could not wait to decide what percentage of revenues ought to be spent on programing; what kinds of programs ought to be pre-empted at what times for what kinds of specials; how many cameras or turntables must be in the inventory to qualify a station for renewal as a program source. The White House did broadcasters no favors when Mr. Whitehead linked license-renewal relief to bias in network news, and its disservice is compounded now by the comments it has appended to its message to the Congress.

The FCC takes a much simpler approach. It would merely write into law the 1970 policy statement it adopted to give licensees a preference over challengers on a showing of substantial service. At the time of its issuance, the policy was greeted as at least a measure of relief, and its subsequent reversal by the appellate court was regretted. By comparison with the White House model, the old FCC statement, rewritten into law, looks modest. It would provide no relief from the burdensome reporting that the FCC requires of renewal applicants and that will be accentuated in the agency's new rules, as a story elsewhere in this issue explains. But neither does it come with the defective trappings of the White House measure.

If the choice had to be made between the two, the FCC bill would deserve support. There is, however, the third choice of the model bill that the National Association of Broadcasters drafted and that now bears many congressional names. It is looking better every day.

Men in the news

Before this month ends two leaders in broadcasting will have been honored by their peers.

J. Leonard Reinsch on March 15 received the gold medal of the International Radio and Television Society in New York.

Next Monday at the annual convention of the National Association of Broadcasters in Washington Ward L. Quaal, the head of WGN Continental Broadcasting, will receive the distinguished service award of the National Association of Broadcasters.

The careers of these two broadcasters are strikingly similar. Each sprang from a Midwest family of modest means and worked his way through school. Each began in radio part-time as an announcer. Each eventually went into single-station management and expanded newspaper-owned operations into separate corporate ownerships.

Each has been conspicuous in extracurricular broadcast activities here and overseas. And each, in his own way, has had an avid interest in public service and politics as part of his notion of good citizenship. The parallel extends to authorship of separate books on broadcast-station management.

Mr. Reinsch, who turns 65 in June, plans to retire from the Cox Broadcasting Co. presidency at year's end. But he will continue on the boards of both Cox Broadcasting and Cox Cable. Mr. Quaal, at 54, isn't convinced he should slow down, much less contemplate retirement.

Every young person with management aspirations in broadcasting will find inspiration in the careers of these two executives who made it the hard way.

Drawn for BROADCASTING by Jack Schmidt "It's your turn to chase the kid with the kite!"

PUTA STOP TO WEAKEND PROGRAMMING

If you've got some weak ratings in your late-night weekend programming (like not beating old movies), maybe Charlie is your answer. In the four-station market of Minneapolis-St. Paul, the Charlie McCarty Show has been consistently at the top against Sunday night late movies. He does it and he's glad! He makes everything hit the fan when he straightens his carnation and unveils his first guest. He's a refreshing twist on Joe Pyne. He's a colorful character with uncommon guests and a responsive live audience. He challenges, taunts, wrangles and quips. There's nothing weak about Charlie and nothing that says he can't improve your week-end programming. Put some pleasant weekends in your life... with Charlie.

GREAT IDEA #3

This is the best idea of all—the Earl Nightingale Radio or Television Program on your station, (if you're not already one of the almost 1,000 stations now featuring the program daily.) Earl Nightingale brings prestige programming, a steady audience with good demographics in all categories and a positive listener reaction, for you and for your advertisers. Ask us about the results you can expect—or better yet, ask someone from one of our client stations. They're not hard to find.

GREAT IDEA #2

We've got a new programming concept for the Earl Nightingale television series. It's a unique idea that lets both your station and your advertisers get the maximum benefit from the prestige of Earl Nightingale himself.

GREAT IDEA #1

In fact, there are a lot of great ideas in Direct Line, a new periodical cassette publication, researched and narrated by Earl Nightingale. Issue number one is our gift to you when you visit us at our hospitality suite at the Shoreham in Washington during the N.A.B. convention. Direct Line is full of ideas you can use—in your business and personal life.

Remember to pick up your copy of the first issue of *Direct Line*...at the N.A.B. Suite G400 Shoreham Hotel, Mar. 24-28 or write or phone collect to BROADCAST DIVISION NIGHTINGALE-CONANT CORPORATION 6677 N. Lincoln Ave., Chicago, III. 60645 Phone Collect: (312) 478-0050
