AWARDS

KRAK, SACRAMENTO

JOHN WINKEL, SENIOR VICE PRESIDENT/GENERAL MANAGER DON LANGFORD, PROGRAM DIRECTOR GROUP: AFFILIATED BROADCASTING, JAY Q. BERKSON, PRESIDENT

John Winkel is no newcomer to the application of war strategy. He was at the helm when another client, Affiliated's WAIV in Jacksonville, Florida, rose from a 2.3 12 + share to a 10.3 with all its demos solidly in the lucrative 25 to 49 adult audience. That was a challenge we all enjoyed and now John and his excellent staff at KRAK are doing it again. This time, they have taken an AM country station that had faltered badly—falling to the four range in share as an FM country came against it—and moved it back up solidly. Most recently, in an excellent defensive maneuver, KRAK has moved its beautiful music FM to country. No doubt, KRAK and sister "KK105" FM will be Sacramento's leaders for years to come.

WLTY-FM, NORFOLK

WAYNE SIMONS, GENERAL MANAGER DALE PARSONS, PROGRAM DIRECTOR GROUP: LANDMARK COMMUNICATIONS, INC., JOHN WYNNE, PRESIDENT

WLTY-FM—Y96—has been a client for many years. In fact, when we began working together, the name of the station was completely different and its format was beautiful music, achieving a 12 + share in the four area. After executing beautifully an adult contemporary "flanker" attack, it quickly outdistanced the market's leading adult contemporary FM, WWDE—and rose to the sevens level. Today, with consultants like E. Alvin Davis and George Johns in competition for these points, WLTY is stronger than ever, scoring an 8.1 12 + share this past fall. How has it done so well? Consider its name: WLTY... We Listen To You. Some good research, and a lot of hard work.

The Research Group, therefore, is most pleased to announce the election of the management of client stations KRAK and WLTY to the honorary rank of Master Class Strategists. In bestowing these awards, The Research Group recognizes the strategic achievements of some of America's most outstanding management teams, from which will be chosen one station to receive our highest annual honor, the awarding of The Research Group's Samurai Swords.

In almost every field, there is a company that has *earned* a reputation as the leader.

A New Name:

The Same Tradition Of Excellence. Hiber, Hart & Patrick Has Become Jhan Hiber & Associates

On our fifth anniversary the nation's leading research/marketing consultancy has adopted a new name and personnel lineup. Our team now includes John Patton as Senior VP, along with 15 other key people in two offices.

If your ratings and revenues need a boost call JH&A. Put our team on your side, and we'll put our positioning research, ratings insights and sales development activities to work for you. Over the past five years more than 90% of our clients have seen their ratings and revenues improve.

han Hiber & Associates

"The Ratings, Research & Marketing Experts"

Jhan Hiber, President P.O. Box 1220, Pebble Beach, CA 93953 (408) 373-3696 John Patton, Senior VP 14440 Cherry Lane Court, Suite 215, Laurel, MD 20707 (301) 776-8855

All but done

It's not over till it's over, as someone said, but odds against ABC's overtaking CBS in this season's prime time TV ratings race are beginning to look mathematically prohibitive. Four weeks from "official" end of season on April 15, CBS is eight-tenths of rating point ahead. CBS researchers calculate that ABC would have to win each remaining week by average of five rating points just to pull even. CBS has won 16 weeks and ABC seven (and they tied one), and ABC's biggest win to date was by 3.4 rating points, for week ended Feb. 5.

Back to basics

FCC is moving on Commissioner Mimi Dawson's proposal of omnibus inquiry to determine how much broadcast content regulation is actually required by Communications Act. Source last week said FCC Office of General Counsel has already completed initial draft that is now under review by Mass Media Bureau. Source said item should be up by summer.

Consolidations

Katz Communications Inc., parent of Katz radio, is reportedly close to acquisition of The Christal Co., radio rep firm owned by Bob Duffy with clients in approximately 90 markets, and RKO Radio Sales, owned by RKO and representing 36 stations including RKO's 12 radio properties—in 22 markets. Christal deal would reportedly cost Katz between \$16 million and \$18 million, RKO between \$3 million and \$5 million. If deals go through, look for Christal and RKO Radio Sales, latter probably with new name, to operate as separate entities.

First blood

A.C. Nielsen is expected to release next week major survey measuring videocassette recorder usage in U.S. television homes. Survey is based on national sample of over 1,000 households over three-month period, with each home documenting one month's VCR usage in specially prepared diary. Survey will cover viewership for prerecorded cassettes as well as programs being taped in home and corresponding playback activity (in hopes of learning, among other things, more about frequency of commercial "zapping"). Respondents also were questioned about preferences in machines and machine-features. VCR penetration was measured by Nielsen last November to be 9%.

Lost cause

Latest six-month filing at Federal Election Commission shows National Cable Television Association's political action committee raised total of \$104,462 in 1983 of which \$44,225 was spent on contributions to federal candidates. NCTA's PAC raised \$27,825, from July 1 to Dec. 31, 1983. Largest contribution was \$5,000 to "Royer for U.S. Senate" campaign. Charles Royer is Seattle mayor and former president of National League of Cities. He played instrumental role in negotiating compromise last spring with NCTA that led to development of cable deregulation bill (H.R. 4103) in House. Subsequently cities abandoned compromise and opposed bill. And Royer lost his bid in Democratic primary during special election to fill Senate seat left vacant by death of Henry (Scoop) Jackson (D-Wash.).

HBO realities

HBO is adding one more genre to its program mix—documentaries, which will be periodically scheduled under umbrella title, *America Undercover*. Imre Horvath has produced first documentary, scheduled for April 24 and titled "Murder: No Apparent Motive," which explores serial murder phenomenon. Horvath is Emmy winning journalist and former producer for 60 *Minutes*.

Action in MDS

Microband Corp. of America, in partnership with Marquee Television Network, local single-channel MDS operator, intends to launch wireless cable service in Washington later this year (see "Fifth Estater," page 95). But by time it does, substantial portion of market may have been lost to wireless cable competitor. Capitol Connection, ITFS service of George Mason University in Washington suburb of Fairfax county, Va., plans to launch four-channel wireless cable service in April. Capitol Connection has been providing twochannel service--CNN and C-SPAN-to office buildings in downtown Washington for over year. According to George Mason's Mike Kelley, it intends to add Home Team Sports, Group W's regional

> Broadcasting Mar 26 1984 7

sports network, and yet-unknown pay movie service in April and offer package to homes throughout city for as little as \$21.95 a month.

Fall-back

United States Satellite Broadcasting, DBS subsidiary of Hubbard Broadcasting, may ask FCC for clarification of its DBS rules to determine whether it can use its high-power DBS satellites to provide fixed satellite services. USSB wants to know in case it launches costly DBS satellites and DBS business—broadcasting television directly to homes equipped with small earth stations—fails or is slow to develop.

No stereo must-carry

Major issue still outstanding in FCC's proposal to authorize TV stereo, subject of meeting Thursday, March 29, is whether to require cable systems to retransmit stereo on must-carry signals. Word is that vote could be close, but that majority will leave carriage of stereo signals to cable system's discretion.

Split in spades

Apparently breaking new ground in attorney-client relations, Robert Marmet and Harold McCombs, partners in Washington law firm that used to represent Radio Stamford Inc., licensee of WSTC(AM) and WYRS(FM) Stamford, Conn., have filed competing applications on top of renewals for those stations. According to attorney for Radio Stamford-owned by Alphonsus Donahue, CBS's Andy Rooney, and others-it's unclear what grounds challenges will be based on. Attorney said Marmet and Stamford Radio are currently involved in litigation over disputed fees. Marmet and McCombs declined to comment.

Second thoughts

Plan to launch West Coast-originated cable superstation has been put on hold by Robert Wold Co., Los Angeles-based satellite services firm, according to senior executive there. Wold has been eager to make distant signal available through one of its leased transponders, but situation has been complicated by decision of wPIX(TV) New York to begin nationwide distribution of its signal and growing reluctance of cable operators to pay distant-signal copyright fees.

Adr Vantage

Susiness Brief

Local/retail TV grows. According to Television Bureau of Advertising, local/retail television advertising climbed by 16% in 1983 to \$2,979,171,600. Largest percentage gain by category was registered by personal services (beauty shops and supplies, legal services and photographers), up 52% to more than \$30 million. Others posting substantial gains were household services, up 24% to more than \$125 million; automotive, up 33% to almost \$281 million, and retail services, up 27% to almost \$71 million. Single largest advertiser in 1983 in local/retail television advertising, according to TVB, based on Broadcast Advertiser Reports figures, was McDonald's Corp., with more than \$105 million, up 12%. The top 25 local/retail advertisers follow:

	Advertiser	1982	1983	% change
1.	McDonald's Corp.	\$105,024,400	\$ 94,148,400	+ 12

** Includes \$3,460,400 for Sears Financial Network and \$1,873,100 for Coldwell Banker Real Estate in 1983, and \$790,000 for Coldwell Banker in 1982.

Disney's minority accent. Mingo-Jones Advertising, New York, has prepared radio and print advertising for Walt Disney Productions aimed at minority audiences. Campaign, to cost about \$1.5 million this year, will spotlight all divisions of company, including Walt Disney World, Epcot Center and Disneyland. Between May and December there will be series of 60-second radio commercials carried on about 100 affiliated stations of National Black Network. Commercials will be broadcast 15 times per week over 22 weeks. Agency also is in process of creating TV commercial that will supplement radio and print efforts.

Claims against advertising. Ten challenges to national advertising, including five on television, were resolved during month of February by National Advertising Division of Council of Better Business Bureaus. NAD agreed that claims made by Eastman Kodak in TV commercial for Trimprint Instant color film had been substantiated. Modified or discontinued were TV commercials for National Coffee Association, Seven-Up Co., Beecham Inc. (Sominex 2 sleep aid) and Coca-Cola Co. (diet Coke).

ANA/RAB. Association of National Advertisers/Radio Advertising Bureau annual workshop—event designed to highlight trends in radio advertising—has been slated for June 6 at Waldorf-Astoria hotel in New York. Scheduled to keynote day-long affair is J. Jeffrey Campbell, president and chief executive officer of Burger King, who plans to discuss his company's radio advertising strategy.

U.S. Olympic Training Committee D

Fund-raising effort will be spotlighted in one-week flight in 111 markets, starting on various days in April. Commercials will be carried during late fringe and various times on weekends. Target: adults, 25-54. Agency: Kaiser Kuhn Bennett & Sharp, Atlanta.

ANTONELLI MEDIA TRAINING CENTER, INC

Martin Antonelli announces the first school devoted solely to developing all the skills necessary for successful careers in television time-sales.

We welcome inquiries from both individuals and companies.

Lightning Louie. When the Alabama Power Co. commissioned a cartoon "spokesperson for safety," little did it realize how popular Louie the Lightning Bug would become. The cartoon campaign that debuted in Alabama markets last September, is now going to be used as commercials and PSA's by power companies in cities including Hartford, Conn., Colorado Springs and Pensacola, Fla. Nickelodeon, the children's cable programer, has also approached the power company to run the spots as PSA's. The favorable response has prompted the company to expand its character's reach via posters, coloring books, stickers and T-shirts. Louie currently appears in three spots emphasizing safety, and plans call for a campaign to teach children about electricity.

In Alabama, the spots air on Saturday morning, in after-school programing and during early prime time. They are targeted to children, 4-11. Louie was created by Cargill, Wilson & Acree Inc./Advertising, Atlanta.

WLBT(TV) Jackson and WLBM(TV) Meridian, both Mississippi: To Katz Television Continental from Blair Television.

WJAS(AM)-WSHH-FM Pittsburgh: To Major Market Radio Sales from Blair Radio.

WGAC(AM) Augusta, Ga.: To Weiss & Powell from Roslin.

New business. Christal Co. has picked up national representation of *The Wall Street Journal Report*—brief business and financial news reports delivered to stations via satellite. Service, which was formerly represented by Eastman, is said to bill over \$3 million annually.

Rep move. Caballero Spanish Media has relocated its headquarters to: 18 East 53d Street, 10th floor, New York 10022; (212) 223-6410.

The story of a champion. Her stunning victory. Her personal defeat. Her courageous comeback.

She burst like a meteor onto the international gymnastics scene and captured the hearts of millions. This is the story behind a sports legend and the man who coached her to perfection and lost her to fame.

Tribune Entertainment Company proudly presents the world premiere of "NADIA," a major television event. Filmed on location in Yugoslavia, this stirring 2-hour motion picture will be available on a cash-sale basis prior to the 1984 Summer Olympics.

Already sold in New York, Los Angeles, Chicago, San Francisco, Cleveland, Minneapolis, Atlanta, Tampa, Denver, Portland OR, New Orleans, Buffalo, Oklahoma City and Jacksonville. "NADIA" is destined to be an Olympic winner this summer. Call now to see if "NADIA" is available in your market.

In New York call Dick Moran at (212) 557-7800. In Chicago call Jim Smith at (312) 222-4412. They'll help you get your station "Programmed for Success."

Ad confab

"Cable America: Too Big and Too Important To Ignore." That's the theme of the 1984 Cabletelevision Advertising Bureau's annual conference, a two-day gathering that begins in New York tomorrow (March 27). Day one will feature two concurrent session tracks, one focusing on building, equipping and motivating a productive ad sales team and the second devoted to key management issues. The second day's events will feature a number of leading advertising executives discussing new marketing and advertising strategies they are developing for cable.

Tuesday's activity will kick off with a discussion among major MSO executives of how advertising sales can become a primary source of revenue for the cable industry. Executives participating in that session will include Roger Turner, president, Colony Communications; Craig Magher, vice president/treasurer, Metrovision; Art Dwyer, senior vice president, operations, Cox Cable, and Tom Willett, vice president, marketing, Continental Cablevision.

Tuesday's luncheon speaker is Burt Staniar, president and chief operating officer of Group W Cable. His address will focus on that same subject, and is entitled "Getting Advertising into Cable's Mainstream: View from the Top."

Issue-oriented sessions scheduled for Tuesday include one on cable interconnects, and one entitled, "Can Cable Break Media Buying Traditions?" Other sessions will examine on the role of the cable representative (how it relates to that of a broadcast rep) and promotional and merchandising techniques for cable.

On Wednesday three prominent executives representing the cable, agency and advertiser viewpoints will discuss where the responsibilities lie in developing cable advertising to its maximum potential. The three scheduled to appear are Terrence Elkes, president and chief executive officer. Viacom; Tom Clark, president, BBDO, and Charles B. Fruit, vice president, corporate media, Anheuser-Busch.

CAB has also put together for the first time a Firing Line format where the audience, led by moderator Bill Lynn, media director, Coca-Cola, will be encouraged to ask a panel of agency executives, in the words of a CAB brochure, "a lot of tough clienttype questions" on issues such as network audience erosion, VCR impact, viability of cable programing and research. The panelists include Allen Banks, executive vice president, media director, Dancer Fitzgerald Sample; Greg Blaine, vice president, director of new communications technol-Foote, Cone & Belding; Ave ogies, Butensky, president, Ed Libov Associates: Phil Guarancio, senior vice president, director of media management, Benton & Bowles, and Herb Maneloveg, Maneloveg Media Marketing Services.

Burt Manning, chairman, chief executive officer, J. Walter Thompson, will address a

general session on the potential of cable's longer form and creative opportunities, in light of the current split 30-second controversv.

Wednesday's luncheon speaker will be Ira C. Herbert, executive vice president, Coca-Cola Co., who will describe his company's plans to utilize new technologies.

Other Wednesday sessions will address how to factor cable into the media mix, creativity on cable and an overview of how advertisers are getting involved in cable programing.

Moving up on Long Island

John Tatta, president of Cablevision Systems Corp. since 1982, has been named chairman and chief executive officer, replacing Charles Dolan, who remains the general partner in all of the company's oper-

Tatta

ating partnerships. Succeeding Tatta as president and chief operating officer is William Bell Jr., who has been executive vice president of the MSO since 1982.

Tatta, a 20-year cable veteran, helped Dolan found the company and is former vice president of Manhattan Cable, where he supervised construction and operation of the system.

Before joining Cablevision in 1978, Bell was assistant treasurer at General Instrument Corp. "Nothing is going to change," said Tatta as far as Dolan's role in the company is concerned. "He'll still be involved in every major decision."

CCI campaign on the way

"This year, Wendy's got all America-or at least some politicians-asking the same question: 'Where's the beef?,' " Council for Cable Information Chairman Daniel Ritchie told members of the Washinton Metropolitan Cable Club last week at their monthly luncheon. "Well, CCI is going to show America where the beef is in cable."

Ritchie, who is also chairman and chief executive officer of Westinghouse Broadcasting & Cable Inc., said CCI's \$6-million advertising campaign to improve the perception of cable television among consumers, developed by McCann-Erickson, has been approved by the CCI board, but confirmed the campaign's four-market test has

> Broadcasting Mar 26 1984 14

been postponed until September and its launch, until January 1985.

The delay was caused by the failure of McCann-Erickson's first campaign to impress consumers in preliminary testing of the CCI board. "The first campaign was good, but not good enough," said Ritchie. 'We sent them back to the drawing board.'

Apparently wishing to introduce the campaign at some point with a splash, Ritchie declined to describe it, but discussed how the campaign would change consumers' opinions of cable. "If [consumers] think that TV speaks to an anonymous mass audience, we're goint to show them that cable speaks to individuals with specific interests," he said. "If they think that TV speaks to a passive lumpen proletariat, we're going to show them that cable speaks to an active, discriminating audience. If they think that TV demands that they adjust their life to the tyranny of its schedule, we're going to show them that cable offers selectivity--the chance to be informed and entertained on their terms.

To counter negative press about cable, he said, CCI has hired the public relation firm of Manning, Selvage & Leet "I believe we can help educate journalists, particularly those working in the mass print media, about the realities of the cable business," he said.

Cable to tell its story

The National Cable Forum, a consortium of 11 national cable programing services, last Wednesday (March 21) announced its participation in the semiannual tour for television critics in Phoenix June 1-3 Representatives of the networks will show and discuss their programing with television critics from newspapers in the U.S. and Canada at the Arizona Biltmore hotel. Member of the newly formed constorium: Arts & Entertainment, CBN Cable Network, the Disney Channel, ESPN, Group W, HBO, Lifetime, Showtime/TMC, Turner Broadcasting, USA Cable Network and Warner Amex Satellite Entertainment Co. The cable services particpated in the press tours in 1982 and 1983 under the sponsorship of Women in Cable. Under the Forum's sponsorship, the cable event will be expanded from one to three days of screeenings, news conferences and question-and-answer sessions.

CNN goes overseas

Ted Turner, chairman of Turner Broadcasting System flew to Moscow last week to meet with CNN bureau staffers there and high-level Soviet broadcasting officials. Before he left, Turner told those attending an Overseas Press Club luncheon in New York that he was taking "no concrete proposals" to the Soviets, but expressed the hope that CNN and Soviet television can develop a regular exchange of programing, perhaps in

TELEVISION, Cablecastings

the form of two weekly programs highlighting the major news events in each country. Turner said it was his intention to take CNN live to European countries. "The biggest problem is getting them to allow us to come in," said Turner, noting that Canada has already refused to allow the program in via an authorized cable service because the network does not produce the minimum amount of Canadian-originated programing required for authorized services. He said about three-quarters of the world's population has access to CNN either in the U.S. or via the Armed Forces Network, which carries an 11-hour daily CNN feed.

After Moscow, Turner was to fly to Japan to participate in the launching of CNN on Tokyo's cable system and a service that brings English-language programing to apartments, hotels and embassies in that city.

New lodger

Showtime will replace HBO as the satellitedelivered entertainment service transmitted to 350 Holiday Inns across the country, effective July 1. Holiday Inns, which supplies satellite-delivered programing (free of charge to lodgers) through Hi Net Communications Inc., has turned to Showtime after a four-and-a-half-year alliance with HBO. The hotel chain will pay an estimated \$3 per room per month license fee for Showtime, said to be less than the fee for HBO.

Hi Net expects to expand its satellite-delivered programing to most Holiday Inn units nationwide by year's end. Over the course of the new five-year deal with Showtime, it expects to pay roughly \$25 million in license fees. Hi Net also supplies ESPN and provides video conferencing services. Showtime is also carried by hotels and motels in the Ramada, Sheraton, Days Inn, Howard Johnson's and Travelodge chains as well as various independent motels. HBO is offered by Marriott, Hyatt and La Quinta hotels.

Oak probe

The Securities and Exchange Commission is investigating Oak Industries, officials of the San Diego-based cable and satellite equipment manufacturer confirmed last week. The SEC probe, which began last year, reportedly concerns Oak's purchase of nearly \$3 million worth of designer services and furniture from a company owned by the wife of Oak Chairman Everitt Carter, as well as a \$100-million debenture offering in 1982 that preceded public announcement of technical problems with an Oak cable converter. Reports of the investigation surfaced in a March 18 San Diego Union article which said that the SEC had interviewed former Oak employes and subpoenaed documents from the company.

Reassurance

The National Cable Television Association has asked the FCC to reaffirm that regional Bell operating companies must offer customer premises equipment, enhanced and cellular services only through separate subsidiaries. The NCTA-filing came in response to BOC requests that the separate subsidiary requirement be reconsidered.

"Film will always play a central role in production"

Stan Marinoff is president of NATPE International and director of Broadcast Operations. WISN, Milwaukee, Wisconsin. His television career has embraced producing and directing, as well as serving as program director.

"In terms of a look and quality, some jobs cry out for film. Like the Hello, Milwaukee promotions we produce, a series of promotional spots for the city and our station. They just wouldn't have the same feeling if they had originated on video tape. It's the visual difference between a taped show like Three's Company and a filmed show like Dynasty. Each show would change radically if it were to originate on the other medium. Even someone who knows nothing about production can see the difference. Film will always play a central role in production, because there are some things, some techniques, you can do only with film.

"In the Central Time Zone (USA), the 10:30 p.m. slot is very lucrative. So stations run their best programming during this period. Over the years, the programs which have done best in this slot are filmed shows— M*A*S*H, The Mary Tyler Moore Show, Quincy. I don't think it's a coincidence. Film production is an important element in the general quality of these shows. Producers know this, and, on some level, so does the audience. There's an aura about a filmed show. And not just shows. The reason so many commercials are on film is for production and quality reasons.

"Looking to the year A.D. 2000 and beyond, cable and video cassettes and home video will all make significant use of film. As long as motion pictures are shown on television, there will be a use for film. I simply don't see the networks producing their made-for-television movies on tape. They've already tried... unsuccessfully.

"Today there's a scarcity of network programming, and pricing that's too high. So you're going to see better local coverage in the future. Narrow casting, local program development, and local production—these are the trends of the future.

"NATPE is going to be doing a lot to help improve local programming. We're having a second conference to deal with that subject. When NATPE was born, many years ago, it was for local programming. But as time and technologies changed, the group began to deal with national and international issues. Now we're getting back to grass roots, problems of low-power stations, things like that.

"The role of the TV programmers must change. They can no longer be programmers *per se*. They have to begin developing concepts independent of network-syndicated programs. With cable, 110-115 TV channels, where's all that programming going to come from? That's the challenge of the '80s."

A radio ratings commentary from Thomas Birch, Birch Radio Inc., Coral Springs, Fla.

Expanding the limits of radio ratings through microcomputers

In this Orwellian milestone year of 1984, many broadcasters and researchers have been reflecting on the major changes that are ahead in radio audience measurement. Questions are being asked about the impact of the microcomputer. Will the future of radio be locked up in machines? Will books become obsolete? Will the buyers and sellers of radio be replaced by computers? What about the measurement technologies? Are there any breakthroughs on the horizon that can increase accuracy and speed of reporting? Can microcomputer technologies be applied to the measurement of radio? How will the movement toward continuous measurement of radio audiences affect the sales environment? And how will audience reporting techniques adjust to ever-increasing fragmentation?

Weighty issues, indeed. But for those of us in the field of audience measurement, the next five years are clearly in focus, and I'd like to share some of my observations.

The microcomputer is one of the most important innovations in the history of media research, and its usage will proliferate. Already the radio rating services are actively committed to applying microcomputer technology to the delivery and analysis of radio rating information. While the systems now on the market differ in their scope and capabilities, users can look forward to exciting new offerings in the months and years ahead. The technology is here. Innovations will continue to be added.

Microcomputers provide users capabilities previously unavailable through mainframe hookups when the "clock is running" throughout the access period. With a micro, users can "fish" for information—spending as much time as necessary to find the solutions to problems—(or the keys to opportunities)—without needlessly running up the bill.

The removal of cost inhibitions to the analysis and utilization of rating data will allow programers to sharpen their understanding of the audience and give sales people tools for planning truly effective client presentations.

To be without a micro in 1984 will be a severe limitation, particularly in the medium and major markets. Stations with micros will get information more quickly, prepare more effective sales presentations and be the first on the street with them.

While computers won't replace books in the near-term, look for increasing reliance on data via micro in the future. It's all there: speed, power, cost-efficiency and convenience. You'll be able to down-load information instantly, rather than waiting days for the mailman to show up with the books. And

Thomas C. Birch is president of Birch Radio Inc., the media audience research firm headquartered in Coral Springs, Fla., that he founded in 1978. Prior to that, he held programing positions with a number of radio groups including Storz, McLendon, Heftel and LIN.

once the information is in the machine, you can print it all out or select what you need and leave the rest on file.

The microcomputer may also affect measurement techniques. We are now evaluating the utilization of microcomputer-based stations for field interviewers. Using micros, the interviewers could be guided through the interview with the computer software controlling just about everything except the speech of the interviewer.

What would these capabilities mean to you, the user? It would help improve accuracy and reliability of the estimates by imposing even greater controls on the process than those now possible manually. It would improve call-letter crediting by assisting interviewers in probing for more detailed slogan and facility information, while reducing or eliminating the need for remote-point editing. It would virtually eliminate the time lapse between completion of field interviewing and delivery of the finished estimates.

The information having been entered, edited and partially processed at the point of the interview, several time-consuming and error-prone steps in the production process are eliminated. This means overnight ratings could be transmitted to users who have communications capabilities on their micros. You could call up information current through the previous night and analyze the results. Sports broadcasters could gauge the impact of a major game. Programers could see how well a special program or promotion fared. New stations or formats could be tracked on an almost daily basis.

More frequent measurement and rapid dissemination of rating data may affect the sales environment as well. Birch Radio Monthly Trend Reports are becoming increasingly important to local and national advertisers, and Arbitron's new Arbitrend service is likely to further increase agency awareness of the need for more frequent reporting.

We believe that monthly numbers are valuable tools for agencies to use as complements to the regularly scheduled quarterly reports. We do not believe, however, that two- or three-month rolling averages should be used for basic planning and buying except in markets where major format changes have occurred. Monthly estimates are most valuable to station programers for adjustments in day-to-day operational tactics and to agency buyers for "tilting and tweaking" purposes in the station selection process. Used in this manner, monthly estimates properly contribute to better programing and more accurate spot placement.

If broadcasters position monthly or rolling-average rating data as background or supporting information while continuing reliance on the standard, published quarterly reports for rate determination, it is unlikely that agencies will alter their current approach to buying radio. If broadcasters emphasize the monthly numbers, agencies will follow suit-and a spate of major changes will then become more probable. Flights could shorten. Negotiations would be more likely to focus on the latest shifts in audience size. Sadly, radio might become even more difficult for agencies to buy. Broadcasters hold the key to the future of the buyer/seller relationship with agencies in markets under continuous measurement.

Radio provides advertisers with a smorgasbord of targeting opportunities, and qualitative descriptors of the audience help emphasize the differences in station audiences. In many major markets, more than a dozen stations are within decimal points of one another in the all-important 25-54 demographic. How can a buyer decide which stations to choose, when rates and quantitative demographic data are all equal?

The answer lies in revaluing the audience deliveries based either on available qualitative or product usage data. We have suggested to our broadcast clients that audience purchasing power can be estimated through simple extrapolations based on audience estimates in the printed quarterly summary reports. For example, a station reaching 25% of the heavy beer drinkers (those consuming eight or more glasses, cans or bottles) might be reaching an audience with aggregate weekly expenditures of \$20,000,000 or more on beer. Another station in the same market with the same quantitative audience profile may actually be delivering half as many heavy beer drinkers.

This will go down as the year of the microcomputer. More stations will purchase micros in the first half of 1984 than in all previous years combined. Rating technology will continue to improve, and increased computerization will play a vital role.

Now in its second season, the Siskel and Ebert success story continues to grow and deliver more top numbers in more top markets. And the top number of all is Women 18-49. Over 3,000,000 of them from Boston to San Francisco! Aug. 12-15—Cable Television Administration and Marketing Society 10th annual conference. Waldorf-Astoria, New York.

Sept. 6-8-Southern Cable Television Association

Eastern show. Georgia World Congress Center, Atlanta. Future show: Aug. 25-27, 1985, Georgia World Congress Center.

Sept. 16-19—"The Radio Convention," combined conventions of National Radio Broadcasters Association and National Association of Broadcasters Radio Programing Conference. Westin Bonaventure hotel, Los Angeles.

Sept. 21-25—10th International Broadcasting Convention. Metropole Conference and Exhibition Center, Brighton, England.

Oct. 28-Nov. 2—Society of Motion Picture and Television Engineers 126th technical conference and equipment exhibit. New York Hilton.

Oct. 30-Nov. 1—Atlantic Cable Show, Atlantic City Convention Center, Atlantic City, N.J. Information: (609) 848-1000.

Nov. 7-9—Television Bureau of Advertising 30th annual meeting, Hyatt Regency, Chicago. Future meetings: Nov. 11-13, 1985, Hyatt Regency, Dallas; Nov. 17-19, 1986, Century Plaza, Los Angeles, and Nov. 18-20, 1987, Washington Hilton, Washington.

Nov. 11-14—Association of National Advertisers annual meeting. Camelback Inn, Scottsdale, Ariz.

Nov. 17-20—AMIP '84, American Market for International Programs, second annual program marketplace, organized by Perard Associates with MIDEM and National Video Clearinghouse. Fontainebleau Hilton, Miami Beach.

Dec. 5-7—Western Cable Show, sponsored by *California Cable Television Association*. Anaheim Convention Center, Anaheim, Calif. Information: (415) 428-2225.

Dec. 5-7—Radio-Television News Directors Association international conference. San Antonio Convention Center, San Antonio, Tex.

Jan. 5-8, 1985—Association of Independent Television Stations (INTV) annual convention. Century Plaza hotel, Los Angeles.

Jan. 10-15, 1985—NATPE International annual convention. Moscone Center, San Francisco. Future conventions: Jan. 17-22, 1986, New Orleans Convention Center, and Jan. 24-27, 1987, New Orleans.

 Jan. 30-Feb. 1,1985—25th annual Texas Cable Show, sponsored by *Texas Cable TV Association*. San Antonio Convention Center, San Antonio.

Feb. 10-13, 1985—National Religious Broadcasters 42nd annual convention. Sheraton Washington, Washington.

 March 7-9, 1985—16th annual Country Radio Seminar, sponsored by *Country Radio Broadcast*ers Inc. Opryland hotel, Nashville.

May 15-18, 1985—American Association of Advertising Agencies annual meeting. Greenbrier, White Sulphur Springs, W. Va.

April 4-New York chapter, National Academy of

March 29—New York chapter, National Academy of Television Arts and Sciences, drop-in lungheon. Speaker: Joseph M. Cohen, president, Madison Square Garden Network, on "Television and Sports in New York." Copacabana, New York.

March 29-31—New Mexico Broadcasters Association annual convention. Speaker: Henry Rivera. FCC commissioner. Hilton Inn, Albuquerque, N.M.

March 30—Presentation of ninth annual Commendation Awards, by American Women in Radio and Television, celebrating birthday centennial of Eleanor Roosevelt. Waldorf Astoria hotel, New York. Information: Betty Jane Reed, NBC, (212) 664-5301.

March 30—Deadline for entries in Addy Awards, sponsored by American Advertising Federation. Information: Janel McKenna, AAF awards coordinator, (202) 898-0089.

March 30-April 1—Foundation for American Communications "Economics Conference for Journalists," co-sponsored by Gates Foundation. Keystone, Colo. Information: (213) 851-7372.

March 31—Deadline for entries in "Hometown U.S.A. Video Festival 1984," for community cablecast programing, sponsored by *National Federation of Local Cable Programers*. Information: Joan Gudgel, NFLCP, 906 Pennsylvania Avenue, S.E., Washington, 20003; (202) 544-7272.

April

April 1—Deadline for entries in National Cable Television Association's National Awards. Information: NCTA, 1724 Massachusetts Avenue, N.W., Washington, 20036.

April 1—Deadline for entries for Radio-Television News Directors Association annual scholarship and fellowship awards. Information: Dean Mell, KHQ Inc., South 4202 Regal, Spokane, Wash., 99203.

April 1—Deadline for entries in 20th annual Major Armstrong Awards for "excellence and originality in radio broadcasting by AM and FM stations," administered and sponsored by Armstrong Menorial Research Foundation in cooperation with National Radio Broadcasters Association. Information: (212) 280-8703.

April 1-3—Virginia Cable Television Association annual convention. Williamsburg Lodge, Williamsburg, Va.

April 2—Deadline for entries in International Radio Festival of New York. Information: Festival office, (212) 246-5133.

April 2—New York chapter, National Academy of Television Arts and Sciences, drop-in dinner, Guest: Joe Franklin, New York radio and TV personality for last 18 years on WOR-TV and WOR(AM). Copacabana, New York.

April 3—Television Bureau of Advertising regional sales training conference. Marriott, S.E., Denver.

AprII 3-4—Illinois Broadcasters Association spring meeting. Holiday Inn, Springfield, III. Information: (217) 787-6503.

April 3-4—National Association of Broadcasters executive committee meeting. NAB headquarters, Washington.

April 3-5—International Teleconference Symposium, co-sponsored by Comsat, AT&T, ITT World Communications, RCA Global Communications, TRT Telecommunications Corp. and Western Union International. Symposium will comprise conference sites in U.S., Canada, England, Australia and Japan. U.S. conference site: Philadelphia Marriott hotel. Information: Howard Briley, Comsat, 950 L'Enfant Plaza, S.W., Washington, 20024; (202) 863-6248.

Down on clears

mation: (202) 296-7245.

EDITOR: Yes sir, I actually heard it some years ago. "This is WTAM, Cleveland's Community Station." 50,000 watts of power playing the same records and giving the same news as WEOL in Elyria, just 25 miles down the road. "This is WLW, the Nation's Station, the 50,000-watt voice of the Cincinnati Bengals," playing the same records, giving the same news, and broadcasting the same Bengals and Reds as WHO in Dayton, just 35 miles up the road.

In the early days, there were only 600 stations. Powerful clear channels were created so rural people could get radio progams. We now have 10,000 stations. Network programs are on TV. All radio stations broadcast the same thing....the same records, same national news with each one giving local news. The same games-football, baseball, basketball. Technology and TV have made all radio stations local, regardless of power. Residents of Chillicothe don't listen to wLw for the local school bus report. Yet we cling to the 1930 system of clears, regionals and locals so that people in Peoria can hear the same record on wLW in Cincinnati that is being played on WMBD right there in Peoria.

The real reason is not programs. In blunt words, it's the rate card. 50,000 watts gets more money than the 1,000-watt station 20 miles down the road.

We have tolerated an intolerable situation for 25 years. Technological developments make the old, worn-out and out-moded systems ludicrous. Every local area deserves full-time service in this electronic age. The daytime station is "horse and buggy." It does not reflect well on either the FCC or Congress. There is one crying need, one overriding solution. Every neighborhood area

> Broadcasting Mar 26 1984 24

should have, must have full-time electronic service—and we better start with radio which is 25 years overdue.—Fred A. Palmer, president, WATH(AM)-WXTQ(FM) Athens, Ohio.

Fan mail

EDITOR: The format of BROADCASTING deserves the commendation of our industry. You have continued the high standards established over half a century ago, to bring essential information and news to our great media.—Jack R. Poppele, chairman, Tele-Measurements Inc., Clifton, N.J.

Applauds access

EDITOR: The Feb. 20 item on BROADCAST-ING's editorial page describes Tim Wirth's proposed access legislation (taking 2% of all cable revenues for access programing) as a "boondoggle." I disagree with the assessment of Wirth and his progressive legislation.

Unlike the editors of BROADCASTING, many TV professionals strongly believe in the kind of nonprofit local programing not displayed on your front cover. The broadcasting and cable industry has consistently displayed contempt for the public's rights to determine what kind of programing it needs, and the public's right to create it. Goldwater's legislation reducing public access requirements is more to their liking. But for those of us who got our start in public access, and those of us who realize the unique public service access provides, Wirth's legislation is a bold step in the right direction .- Robert Farago, assistant news producer, Good News, WTBS(TV) Atlanta.

Harris All-Solid-State SX Transmitters

Bring Back Your AM Listeners!

Contrary to what you may have heard, your "average" listener has a better-than-average knack for finding stations with a quality, transparent sound—even on a crowded dial. The lower your sound quality, the higher your audience tune-out.

Bring back those listeners with a Harris SX Series all-solid-state AM transmitter. Harris' exclusive Polyphase PDM modulation system provides a *discernible difference in sound*...

> a crisp transparency that virtually eliminates listener fatigue and compares with the best FM has to offer. The specs will show you why. On the SX-5, for example, Intermodulation Distortion (IMD) is less than 1%!

SX Series transmitters (available in 1, 2.5 and 5 kW) also offer diagnostic capability through a microprocessor-based, pushbutton information center. You get instant readings on vital parameters.

Solid-state design means you'll save up to 46% more power than with other transmitters currently in use. That's a plus you'll see immediately in lower power bills.

And Harris has designed the SX Series transmitters for optimum AM Stereo performance. Strict AM Stereo compatibility was a major design goal right from the start—not an add-on or an after-thought.

Make the investment in quality sound that can build and hold your listening audience. For more information on Harris SX Series AM transmitters, contact Harris Corporation, Broadcast Group, P.O. Box 4290, Quincy, Illinois 62305-4290. 217-222-8200.

See Harris SX Transmitters at NAB '84.

Dingell declines to intervene; NAB's hopes now with FCC

The National Association of Broadcasters' attempt to bypass the House Telecommunications Subcommittee (and its chairman, Democrat Tim Wirth of Colorado) and deal directly with the parent Energy and Commerce Committee (and its chairman, Democrat John Dingell of Michigan) was buried without ceremony last week. NAB President Eddie Fritts and Executive Vice President John Summers met briefly with Dingell last Thursday (March 22) to be told that he would not interfere with the subcommittee process, which continues to move toward creation of a broadcast deregulation bill, perhaps as early as this week.

The NAB sought Dingell's intervention two weeks ago (BROAD-CASTING, March 12) after concluding that the draft bill emerging from Wirth's subcommittee was "more regulatory than deregulatory," and having abandoned hope of improving it.

"We're more or less in limbo," Fritts said after the meeting with Dingell, adding that NAB has stepped away from the process and is now on the sidelines monitoring the situation.

The game plan now, as some see it, is that the subcommittee—containing at least one NAB ally, Representative Tom Tauke (R-lowa)—will try to agree on a draft bill, including an EEO provision, and then try to "sell" that package back to NAB. No one was giving odds on the success of such a maneuver; NAB's posture was to be aloof, if watchful, in its attitude toward the Hill's legislative efforts while accelerating its dealings with the FCC and its anticipated deregulation of television, which is expected to surface this summer.

Fritts said he would be surprised if the final Hill product is something broadcasters can live with. (NAB has contended all along that it can kill an unsuitable bill.) "Our members are telling us enough is enough. We've told our congressional allies that there is strong industry opposition and that our position has hardened," he said. "We're available for offers but are not actively negotiating."

The meeting last week among subcommittee members was described as "positive" by Chairman Wirth. "We're back at work," said Tauke, with the plan to come up with the best proposal possible and take it to the industry. In light of what has occurred, however, Tauke says it is "essential" to set up new procedural guidelines.

For the moment Tauke is preparing to offer some language changes in the draft. For example, he is planning to address the question of including a sunset provision for television quantification. And the subcommittee decided to broach the subject of including EEO language in the bill. Previously, discussions on that subject had been the sole province of NAB and Representative Mickey Leland (D-Tex.).

Goldwater asks Fowler to put off fin-syn for two years

🗇 TOP OF THE WEEK 🖿

Letter from 15 senators urges chairman to take no action; it says request is in keeping with wishes of Reagan

The controversy over the future, if any, of the FCC's financial interest/syndication rules, dormant since the end of last year, is showing signs of renewed and vigorous life. Some 15 senators, led by Barry Goldwater (R-Ariz.), chairman of the Communications Subcommittee, and Pete Wilson (R-Calif.), last week wrote to FCC Chairman Mark Fowler to urge that the commission take "no further action" on the issue for another two years.

The letter, delivered to Fowler on Friday, is the response of a number of senators who support the rules to the fact that the private parties involved—the Hollywood producers and independent television stations, supporters of the rules, and the networks, which want them repealed—were unable to reach an accommodation on the issue by March 15. That was the date by which some members of the Senate had said in November that legislative activity on the issue would resume if negotiations had failed because one side had acted in "bad faith."

The letter makes no charge of bad faith. Instead, it says, "With the March 15 date having passed, and because any further progress towards a private agreement is clearly not possible at this time, we are writing to ask that the commission take no further action to amend, modify, or repeal FISR for an additional two years." In that time, the letter

Goldwater

Fowler

adds, the commission and Congress can continue to monitor competitive developments in the television industry. And that "forbearance," it pointedly reminds Fowler, "would be in keeping with the President's support for a two-year delay to allow for further study of the marketplace."

President Reagan's surprise call for a twoyear moratorium, delivered to the Senate Commerce Committee in November, as it was considering legislation to enforce a delay on the commission (BROADCASTING, Nov. 7, 1983), contributed to the pressure that persuaded Fowler to back away from what seemed a stubborn determination to call up the rules for action, and to lead the commission in their repeal. The commission seemed certain to permit the networks to regain the right to negotiate for as much of the financial interest in a program as the market would allow, as well as to reenter a major share of the \$800-million syndication market. Both sides in the dispute had taken the matter to friends in Congress as well as the White House, and while those favoring retention of the rules won every legislative test of strength, no one wanted to participate in a

Simon vs. Fowler at FCC meeting

final up-or-down vote. As a result, friends and foes of the rules in the Senate prevailed on Fowler, in November, to agree to a sixmonth moratorium to give the parties a chance to work out a compromise (BROAD-CASTING, Nov. 21, 1983).

The commission—under the terms of the agreement Fowler reached with members of the Senate in November-would be free to resume consideration of the financial interest/syndication rules issue on May 10. But Senators Goldwater and Wilson and their allies in the Senate-at least 15, including Majority Whip Ted Stevens (R-Alaska)-indicated they did not expect that to happen. Their letter notes that they "appreciate the efforts" the commission has made to work with Congress on the financial interest/syndication rules issue and "other important and complex issues of mutual interest." That was a reference at least to the commission's willingness to back down on a key issue involving implementation of the breakup of AT&T after Congress made clear its opposition.

If the commission were to begin to move on the issue, Senate sources said, it was likely Congress would move swiftly to block it. One official predicted that Senator Wilson, for one, would bring the matter directly to the floor by attaching an amendment calling for a moratorium directly to a bill awaiting action. "The Congress won't allow May 10 to go by without" a formal understanding being reached with the commission on the matter. Members of the House were not asked to sign the letter-at least in part, according to one source, because Fowler was regarded as more likely to respond to the Republican-controlled Senate than to members of the Democratic House. But opposition to repeal of the rules has been at least as intense in the House as in the Senate. Representative Henry Waxman (D-Calif.) has introduced a bill that would prohibit commission action for five years. But the networks are not without powerful friends. Senator Bob Packwood (R-Ore.), chairman of the Senate Commerce Committee, has favored repeal of the rules.

The parties in the dispute began meeting in December in an effort to reach a compromise. After a few meetings, ABC and NBC dropped out of the talks, giving them up as fruitless. But CBS, represented by Thomas Wyman, chairman of the board, and Lew Wasserman, chairman of MCA Inc., continued to meet, and both sides reported progress as each made concessions. But those talks finally petered out in February.

It was not clear last week how the networks would respond to the Goldwater-Wilson letter. But, in dropping out of the talks, in January, ABC and NBC indicated a readiness to accept a moratorium. ABC had said it was willing to suspend its lobbying on the issue for the remainder of 1984, "contingent upon a like commitment from the other side." NBC said that, in view of the fixed positions of the various elements involved in the controversy, it believes there is "no alternative but a suspension of efforts to achieve repeal of the financial interest and syndication rules for a reasonable period of time." CBS did not endorse a moratorium. A spokesman said, "We'd like this resolved."□

Executive director of TRAC says chairman ignores public and should be removed; others are critical of commission's minority position

The FCC—and particularly its chairman came under attack at a special en banc meeting last week. As expected, representatives of minority and public interest groups criticized commission actions they didn't like, and encouraged the FCC to behave the way they would prefer. And Sam Simon, executive director of the Telecommunications Research and Action Center, walked out of the meeting room after a brief presentation without giving the commissioners an opportunity to respond—just as he had tipped the press beforehand he would.

Before Simon and several apparent supporters walked, he contended that the FCC had been ignoring public interest groups. Simon said that if TRAC had the resources, it would ask the courts to disqualify Fowler from several key proceedings. "Your [Fowler's] ideological bent has become a theologivantes, representing the Hispanic National Bar Association, recommended the FCC try to recruit more Hispanics for career positions, extend its equal employment opportunity guidelines to nonmedia services, and take steps to insure that potential minority applicants receive earlier notice of application opportunities than they do now.

Cervantes also said his association "vigorously" opposed efforts to elevate nonminority women to the preference level of minorities, an eventuality that would "dilute" the minority preference. Cervantes added that his group did not like to see Hispanics portrayed solely as "hoodlums and domestics" on TV. He said his group was not requesting the commission to set up stereotyping guidelines, but would like it to "acknowledge the problem."

Commissioner Mimi Dawson took issue with Cervantes's contention that minorities were more deserving of a preference than women.

In yet another presentation, Pluria Marshall, chairman of the National Black Media

cal cause. You cannot be persuaded, you cannot be reasoned with and you should not in all fairness be permitted to continue in this charade of pretending to execute the duties of your office to faithfully uphold the law of the land," Simon said.

"Having tried to make my point, I choose not to waste any more of my time. Nothing that I can say today, as nothing that has been presented previously, will make any difference. You just don't care," Simon said. After the meeting, Chairman Mark

After the meeting, Chairman Mark Fowler said the commission would continue to hold en banc meetings, which are scheduled periodically to permit parties to air their grievances and say anything they like. Fowler said the intent of the en banc meeting was to create a dialogue. "The fact that he [Simon] chose to walk out is most unfortunate...because it undercuts the reason for having the proceeding," Fowler said.

Fowler also said the commissioners approached each issue on its own merits. "We [the FCC and TRAC] might disagree, but that doesn't mean we haven't considered their argument; we have," he said.

In a separate presentation, Charles Cer-

Coalition, said he, too, was concerned about what he alleged to be the commission's "consistent preference for the rights of licensees over the rights of minorities" and its "failure, repeatedly, to even read and consider paper we file before you."

Marshall also said he was "appalled" that the FCC, in its Docket 80-90 proceeding, was proposing higher priority for first local service than for minority service, a proposal that would all but guarantee that a "nonminority clever enough to use a small suburban town as the city of license will receive preference over a minority who intends to serve the major city," he said.

In another docket, he said, the commission has proposed to permit incumbents with Class A FM's to move to Class C's, leaving minorities to fight over the abandoned Class A. "By awarding the 99% white group of incumbent FM operators an exclusive first pick of the 80-90 assignments, the commission has proposed an abrupt about-face from the eligibility approach used in the AM clear channel proceeding in 1980," Marshall said.

Among other things, Marshall recommended that the FCC, in cooperation with 7.16

the Internal Revenue Service, consider permitting broadcasters to take a tax deduction for the value of air time they donate to nonprofit organizations-thereby creating an incentive for running more PSA's; consider using paper hearings, rather than lotteries, to award low-power television and multichannel multipoint distribution service licenses in the largest markets, where most minorities live; refuse to adopt a preference for white females unless it "does not eat into the preference for racial minorities," and eliminate financial qualifications and broadcast experience from comparative hearings, items Marshall said "do little more than register the effects of past discrimination."

Marshall also said the advertising industry was the "worst culprit of all" in the minority station marketplace. "Discrimination by advertisers against black media makes it extremely difficult for these stations to compete effectively," he said. "I recognize that the commission does not have regulatory jurisdiction over the advertising business. However, you do have jurisdiction to conduct research on the impact of any marketplace-distorting factor on the industry you do regulate."

Allen Hammond, representing the National Conference of Black Lawyers, said that group appreciated all the commission particularly Commissioner Henry Rivera had done to encourage minority ownership. The commission's EEO effort, however, is still critical, he said. "We believe this should not be weakened."

Intelsat's added income plan

Colino wants to sell extra transponder time to broadcasting and cable customers

Listed on the extensive agenda of the International Telecommunications Satellite Organization's board of governors meeting in Washington last week was a proposal aimed at moving Intelsat vigorously into the business of transmitting video services. The organization's new director general, Richard Colino, who is backing the introduction of a host of new enterprises, proposed the use of currently unused transponder capacity on six satellites for pre-emptible video services, for both television and cable television.

Colino's detailed recommendation to the board, made available to BROADCASTING by a nonIntelsat source, notes that Intelsat now offers international video services on an occasional-use and leased-use basis. Those services, the proposal adds, have "stimulated extensive and rapid growth" in the use of the capacity on satellites on major routes. But, it adds, demand has outpaced supply, with the result that revenue has been lost because of "service denials."

To tap what Colino regards as a "potentially significant unmet demand" for television and cable television services, the proposal calls for the use of unused transponder capacity on other than primary or major-path satellites. Those listed in the proposal are located at 332.5 degrees east, 179 degrees

Takeover rumors at Disney

The good news for Disney Productions Inc. is that its latest film, "Splash," is doing great at the box office—it set a company weekend record of \$6.5 million and grossed \$14.9 million in the 10 days following its March 9 release. The uncertain news is that, also on March 9, Roy E. Disney, son of Roy O. Disney and nephew of Walt Disney, the company's co-founders, resigned from the board of directors, two weeks after his reelection. Some doubted the official explanation that he left for "personal reasons" and speculate that he resigned to begin a takeover of the company. Roy E. had been a vice president at Disney, but resigned in 1976, reportedly after losing a power struggle with Walt Disney's son-in-law, Ronald W. Miller, who is now president and chief operating officer.

The next uncertain news came one week later, when The News Corp. Ltd., the Australian-based media conglomerate headed by Rupert Murdoch, was also cast as a buyer, turning its attention to Disney now that its struggle to take over Warner Communications Inc. ended unsuccessfully (see page 59).

As a Disney spokesman was busy denying takeover rumors, the Burbank-based entertainment company, which owns the Disney Channel, was negotiating with banks to triple its line of credit to \$1.3 billion. According to the company, the additional credit would be for "general corporate purposes" but Dennis S. Rosenberg, an analyst at Oppenheimer & Co., indicated that Disney Productions could also use such a fund in the event of a takeover attempt, either to buy its adversary out or to make acquisitions that would make the company less attractive.

All the preceding, including the good news, has led to increased trading activity in Disney stock and an increase in its price from 50½, where it closed on March 6, to 63¾, where it closed last Friday. Daily trading volume for those 12 days averaged 784,483, well above the 158,475 shares traded daily in February. Daily volume exceeded 1 million from last Tuesday (March 20) through Friday. One industry executive noted that the stock (two-thirds owned by institutions) had been trading as high as \$84 last spring, before declining to \$47 by December (it had dropped 11½ on Nov. 10, 1983, when the company announced its fourth-quarter earnings). She concluded: "When a stock price gets that low, something is bound to happen."

east, 338.5 degrees east, 307 degrees east and 359 degrees east. Those satellites "can be utilized to meet these needs, thereby generating additional revenues without disruption or diversion of services on primary major-path satellites," the proposal says.

The proposal, which was to be acted on by the board of governors before its meeting adjourned on Friday, appears to reflect a change in Intelsat's pricing policy. Its present practice is to average costs among member countries, but Colino's proposal calls for offering the new international video services to reflect market value-or, as the proposal expresses it, "at rates reflecting the value of a wide range of combinations of basic video service parameters." The proposal notes that approach recognizes the technical distinctions within and between satellites, "which result in different value assessments" by users of the system depending on their respective needs.

"This approach," the proposal adds, "departs from the traditional approach of selling predetermined packages of power and bandwidth and thus moves away from the traditional practice of defining a 'basic service unit' for charging purposes." It says such an approach is needed if Intelsat "is to be responsive to the rapid development of the international video distribution services," since "it is not possible at this early stage of development to accurately define basic unit or standard video distribution services."

The proposal lists six parameters that were considered in devising suggested prices: type of satellite, type of transponder, type of connectivity, type of video channel, bandwidth and power. A factor tending to hold prices down is that the services to be offered on the six satellites would be preemptible "in the highly unlikely event of an outage affecting service on primary or major-path satellites." The proposed broadcast and cable television services would be offered on a full-time lease basis for a fiveyear term, or on an occasional-use basis. However, capacity would not be reserved for occasional use, and customers for that service would pay a higher rate than would those for full-time use for comparable periods of time.

The proposed annual rate for full-time television services on the Intelsat V satellite located at the five locations, employing a global beam transponder, is \$1.5 million. The occasional-use rate would be \$22 each minute. The new video services on IV-A satellites are substantially lower, in part because those satellites are expected to reach "end-of-life shortly." The proposal notes that those leasing transponder capacity on a IV would be obliged to shift to the new satellites before the expiration of their five-year leases. The proposal says the charges in all cases would not be expected to divert business from the existing system but, rather, to stimulate new business.

Before going to work on the action proposals submitted by the staff, the board of

Anxious over multiple ownership

Members of the Congressional Black and Hispanic Caucuses warned FCC Chairman Mark Fowler in a letter last week not to relax the commission's multiple ownership rules. The CBC and CHC decided to write Fowler after the FCC began lobbying members on the issue ("Closed Circuit," March 19). "We believe the commission should postpone review of the multiple ownership rules until it has had an opportunity to evaluate more fully the ramifications of eliminating or liberalizing the rule," the letter said. If the FCC eliminates the rules, the CBC and CHC threatened to forge ahead with legislation now pending in the House (H.R. 4120) to prevent the FCC from touching the rules for five years. "Should the commission attempt to eliminate the rule completely, or modify it extensively as to undermine the commission's historic policy of diversity of ownership, we will necessarily insist on expedited consideration of legislation on this issue," the letter said.

They criticized the commission's decision to examine the rules because it claims there is "an adequate degree of diverse ownership." And the letter scoffed at the commission's contention that modification of the rules would benefit minorities. That, the letter said, "is naive or rooted in bad faith." The CBC and CHC are also concerned about the FCC's plans to relax its attribution rules, which are used to determine when an entity owns a media property.

directors approved an extensive realignment and reallocation of functions within the orga-nization that, Intelsat said, "is an acknowledgement of the changing international telecommunications environment." The changes, which were recommended by Colino, resulted in the creation of a deputy director general for finance and staff support services to centralize the administrative and financial activities, as well as a deputy director general for business planning and external relations to centralize all strategic and business planning and informational activities. The deputy directorate for operations and development was left essentially unchanged. But three new directorates were established: strategic policy formulation, management and information systems and administration.

Within days of that reorganization, Intelsat suffered a loss in the death of H. William Wood, who had been deputy director general for operations and development. Wood, who was 63, was a former Navy officer who had joined the Communications Satellite Corp. in 1965 and played a key role in the development of Intelsat. He became an official of that organization in 1977.

News Council to fold

After 11 years, watchdog group calls it quits; cites lack of cooperation from the press

The National News Council, the New Yorkbased media watchdog that failed to gain anything close to full cooperation from the press during its 11 years of existence, voted last Thursday (March 22) to cease operations by the end of the month, or soon thereafter, and to formally dissolve itself by no later than July. The vote (for either suspension or dissolution) was 9-3, with Chairman Lucy Benson not voting and two members absent.

The council also decided that all of its files and its remaining fiscal 1984 funding will be donated to the University of Minne-

sota, whose school of journalism, said NNC President Richard Salant, has been active in promoting the concept of news councils. "They will try to figure out a way to bring it back" in a workable form, said Salant.

Offering a post mortem, Salant said the news council concept was a "very valid idea whose time has not yet come." It was not accepted by many news organizations (CBS, Gannett and Capital Cities being three notable exceptions), he suggested, for fear it "would do more harm than good."

One of the council's more powerful adversaries was the New York Times, which opposed the organization from its founding in 1973. At that time, recalled a recent Times article, the paper's publisher, Arthur Ochs Sulzberger, characterized the council as a "form of voluntary regulation in the name of enhancing press freedon," adding that the

Salant

Times would not participate in or cooperate with NNC investigations.

But the *Times* was not the council's only harsh critic. The American Society of Newspaper Publishers, recalled Salant, "called us a bunch of busybodies without anything better to do."

And while Salant acknowledged NNC was not very effective given the lack of support from the media, he insisted that given a

chance, a similar organization would do more good than harm. "Our ultimate goal was to vindicate and maintain the free press provisions of the Constitution. You can't do that if the public lacks confidence in the press." Under such circumstances, he said, "freedoms will be eroded."

At this point, it is unclear how much of the council's budget will be left over to give to the University of Minnesota. The council's budget generally runs between \$330,000 and \$340,000 a year. A spokesman indicated the costs of closing up shop (including severence pay for the seven staff members) were not yet known.

NNC investigated 242 complaints over the years, of which 82 were found to be "warranted." The complaints included 78 made against the television networks, while 68 involved newspapers.

The nonprofit group's budget was raised from donations from corporations (25%), media organizations (29%), foundations (42%) and individuals (4%).

As for the next move of Salant, one-time president of CBS News and later vice chairman of NBC, he said: "I haven't decided. I'm going home to think. It's about time. I should have done it sooner."

Networks run into polling problems

Illinois enforces ban on electioneering within 100 feet of polling places; networks manage to get figures, wait until polls close to announce them

To viewers at home, the networks' reports of their exit polling during the Illinois primary last week seemed as authoritative as ever, and the networks had no reason to take anything back. But there were signs that reports of the states' determination to put a crimp in the polling in an effort to prevent early projections of results may have some validity.

Heads of polling units at ABC, CBS and NBC all reported scattered efforts by authorities in some counties to enforce a ban on electioneering within 100 feet of polling places. ABC's Jeff Alderman, who reported the most serious problems, said that in some cases an interviewer was moved back into a parking lot and thus was unable to reach exiting voters in the prescribed rotation.

However, no one complained that the efforts to apply the law against poll takers affected their efforts. Alderman said that when poll takers were unable to interview departing viewers in the desired frequency, "an alternative methodology" was developed. "We went to a quota system, getting X number in a certain length of time." Alderman, Lorrie Epstein of NBC and Warren Mitofsky of CBS said the actual results proved out the accuracy of their exit polling. However, Alderman said that if the efforts to restrict the actions of poll takers keeps up, "we could have trouble."

Chicago Tribune columnist Mike Royko apparently had no effect. In his own campaign against exit polling, Royko, in three separate columns, urged his readers to lie to the pollsters who interviewed them. The only possible effect was noted by Epstein. She said "the refusal rate was somewhat higher than usual." She also reported that a woman pollster at one polling place had been "harassed" by a man who indicated he was a Royko fan. The poll taker eventually called on police for protection.

Mitovsky would not allow his poll takers to be intimidated. He had determined ahead of time that the Illinois Board of Elections, which has jurisdiction over such matters, had not issued a ruling regarding the implementation of the 100-foot ban, which does not refer to exit polling. Accordingly, when reports came in of CBS poll takers being forced back to a 100-foor perimeter, he called the county attorneys involved to complain. In all cases, he said, the attempts at enforcement stopped.

Actually, only three states have laws specifically barring exit polling. But, according to a survey by the Committee for the Study of the American Electorate, more than 20 interpret laws and guidelines restricting electioneering within a particular distance of polling places as applying to exit polling. Illinois is one of the states with guidelines that could be considered applicable. Florida has a law banning virtually everyone but voters from an area within 300 feet of a polling place, and it caused networks trouble in scattered areas of the state during the primary two weeks ago. Indeed, CBS, with the memory of the problems it ran into there in 1982, did not even bother to try to conduct exit polls.

Meanwhile, the networks and other media are gearing up for the Connecticut primary tomorrow (March 27). Connecticut bans electioneering within 75 feet of polling places, and, according to the Committee for the Study of the American Electorate, it interprets that law as applying to exit polling.

The irony of the interest in whether states will attempt to interfere with exit polling is that the networks last week did not "call" the Illinois primary before the polls closed. \Box

Geller would end cable fee cap

He calls NCTA report alleging overcharging by cities 'flimflam'

Charging that the FCC's ceiling on cable franchise fees "is beyond the [FCC's] statutory authority and unlawful," a public interest group and the former head of the National Telecommunications and Information Administration last week called on the FCC to eliminate that cap.

The nine-page petition, seeking action on a five-year-old petition for rulemaking on the validity of the cap that has been gathering dust at the FCC, was filed by the Telecommunications Research and Action Center; Henry Geller, the former NTIA head and FCC general counsel, and Donna Lampert,

Gelle

an associate of Geller's at the Washington Center for Public Policy Research of Duke University.

According to Geller, the joint petition was a reaction to a survey by the National Cable Television Association that suggested that 8% of the franchising municipalities were charging franchise fees in excess of those allowed by FCC rules (BROADCASTING, March 12). The survey was a "flimflam," to which the House Telecommunications Subcommittee Chairman Timothy Wirth (D-Colo.) and the FCC were parties, designed to put pressure on the cities in their compromise negotiations with cable on pending cable deregulation legislation (H.R. 4103).

According to Geller, the joint petition may soon be moot, however. A provision of H.R. 4103 would set a franchise fee limit of 5%, superseding the FCC's rules. If the bill were to become law, he said, the petition would no longer be "germane." And in a speech at a cable seminar sponsored by the Annenberg Schools of Communications last Friday, Geller said prospects for the bill were good. According to Capitol Hill sources, he said, representatives of NCTA and the National League of Cities were expected to reach agreement on the bill at a meeting scheduled last Saturday (March 24) that would go a long way toward insuring its passage. Going into the meeting, he said, the two parties had reportedly agreed on new language for the controversial "changed circumstances" and refranchising provisions. The only sticking point was basic rate regulation.

Geller warned that the cities should take care that gains made in their current negotiations are not lost in conference with the Senate. The Senate version of the legislation (S. 66) "is a bummer," he said. Senate Commerce Committee Chairman Robert Packwood (R-Ore.) and Senate Communications Subcommittee Chairman Barry Goldwater (R-Ariz.), the principal sponsors of S. 66, "sold out to the cable industry."

The franchise fee rules, which were established in 1972 to prevent municipalities from imposing onerous fees on cable operators as a cost of doing business within the municipalities' boundaries, set a limit of 3% of gross revenues that, with a waiver, may be raised to 5%. To win the waiver, municipalities and the franchised cable operators must convince the FCC that the fees will be used by the municipalities for cable regulation.

In 1972, the petition said, the Supreme Court affirmed by a 5-4 vote the FCC's power to require cable operators to originate local programing. But Chief Justice Warren Burger, in a concurring statement, said the origination requirement "strains the outer limits" of the FCC jurisdiction. (The FCC subsequently dropped the origination requirement.)

"The [FCC's] fee limitation is a step beyond the 'outer limits,' " the petition said. "The [FCC] just barely has the authority to require cable to contribute to program diversity by originating." With its cap on franchise fees, it said, the FCC "is seeking to protect and secure the contribution that cable can make to diversity by preventing the cities from 'over-taxing' cable. Whether or not this step is good policy, it is beyond the agency's reach." The franchise fee cap is based on the "misconception that the [FCC] has plenary 'public interest' jurisdiction over cable, akin to that of broadcasting," it said.

The petition also said that the 3% and 5% ceilings are arbitrary. The FCC presumes, it said, without any evidence, that every fee in excess of the caps "threatens the financial viability of the system. Upon what basis does the [FCC] make this assumption, particularly when local circumstances can vary so widely as it acknowledges? The subscribers may be perfectly willing to pay the additional cost, or the cable operator may absorb part or all of it, making it less profitable but in no way jeopardizing its viability."

In its on-going re-evaluation of its cable rules, the petition said, the FCC has been inconsistent. At the urging of the cable industry, it dropped most of its franchising rules and many of its carriage rules, it said, yet the FCC retains the franchise fee ceiling. "The reason why, we regret to say, appears obvious on this record: The commission simply wishes to protect the cable industry."

The petitioners concluded by saying that they don't advocate "unduly high" franchise fees. "But the balance to be struck here is a matter dependent upon local conditions and one that should be adjusted over time in the localities—not by FCC fiat stemming from speculation and assumption."

Supreme court stands with broadcasters on unit rates

But two court decisions on libel go against the news media

The Supreme Court last week struck a blow for broadcasters concerned about states imposing their own lowest-unit rate requirement for political advertising. It affirmed, without hearing oral argument and without issuing a written opinion, an appeals court decision overturning a Texas law that went beyond the lowest-unit-rate requirements

Clarifying ad substantiation

James Miller III, chairman of the Federal Trade Commission, last week unveiled a proposed policy revision to enforce advertising substantiation by rifle rather than shotgun. In a speech before the American Association of Advertising Agencies in Washington, Miller proposed that the agency stop requiring industries as a whole to submit substantiation for advertising claims. Instead, he proposed that the agency require substantiation only from firms whose advertising the commission has some reason to doubt.

Under the proposal, the FTC would continue to require that advertisers have a "reasonable" basis for their claims before claims are disseminated. The proposal also would set standards for the degree of substantiation that would be considered appropriate. "Where advertising expressly claims a particular level of support, that is the level the commission will expect the advertiser to posses," Miller said. "The same thing applies when an advertisement implies to reasonable consumers that the firm possesses a particular level of support. In its discussion of compliance matters, the commission has never formally indicated the principle's relevance for findings of liability. The policy statement makes clear that firms are liable for the level of substantiation consumers reasonably expect from express or implied claims."

When it is not clear what level of substantiation consumers expect an advertiser to possess, the commission will determine the amount of substantiation to be required by considering the type of claim, the type of product, the costs of developing substantiation and the amount of substantiation experts in the field would believe appropriate for the claim, he said. "This standard is admittedly vague and highly dependent upon the circumstances surrounding individual cases," he added. "But as desirable as more precise guidance would be, I see no way with current knowledge to provide detailed criteria covering all possible claims. The commission must continue to exercise reason when confronted with situations in which consumer expectations of the level of substantiation are unknown."

Miller emphasized that the policy statement recognized that in deciding how much substantiation to require, the commission should take into account the risks of suppressing truthful claims. "This follows from the common-sense notion that in setting the level of substantiation, two different kinds of mistakes can be made: requiring too little substantiation, thus allowing false claims to be made, and requiring too much substantiation, thereby chilling the dissemination of useful information. Either mistake can have serious consequences for consumers."

Miller said he had "circulated" the proposed policy statement to his fellow commissioners last week, and hoped the commission would endorse it soon.

that were written into federal law in 1971.

Although the court issued a summary decision, the issue had evidently caused considerable discussion within the court. In December, the court asked the Justice Department to comment on the question (BROADCASTING. Dec. 12, 1983). And three of the nine justices—William Rehnquist, John Paul Stevens and Sandra Day O'Connor—said they would have heard oral argument in the case.

The federal statute limits the lowest-unitrate requirement to candidates within 45 days of a primary and 60 days of a general election. But the Texas law, adopted in 1975, applied to political issue advertising, as well as candidate advertising, throughout the year. It was challenged by KVUE-TV Austin and Central Texas Broadcasting, which said the law caused financial hardship.

A U.S. district court rejected the complaint. But the U.S. Court of Appeals for the Fifth Circuit last July held that the federal law pre-empted the states' authority to regulate political broadcast rates. The appeals court also said the Texas law "conflicts directly with the federal statute in important ways," and "imposes a considerably heavier burden on broadcasters" than does the federal statute. What's more, the court said the state law runs contrary to congressional goals in lengthening rather than shortening political campaigns and in encouraging increased rather than less campaign spending.

Texas, in seeking Supreme Court review, defended the law as one designed "to promote an informed electorate by increasing public exposure of political candidates and issues." And since state and local elections are held throughout the year, the legislature "accordingly provided for the lowest unit charge of all such advertising." Texas was supported in its appeal to the Supreme Court by a number of groups, including the National Conference of State Legislatures, which argued that the appeals court decision "raises the fundamental question of whether it is constitutional for the federal government to preclude a state from controlling and improving its own political process."

If the decision on the Texas law was welcomed by broadcasters, the Supreme Court issued two others, in libel cases, that were a blow to the media generally. In neither did it reach the merits of the case, but the effect of both decisions is to make it easier for those complaining of being defamed to sue an offending publication or broadcaster in courts convenient to the person filing suit.

In one, in which actress Shirley Jones is

suing a National Enquirer editor and reporter, as well as the publication, for \$20 million, the court ruled, 9-0, that plaintiffs in such cases may sue in their home state and not be required to sue in the state where the defendant is based. In the Jones case, that means the actress may sue in California, rather than in Florida where the Enquirer is based. In the other case, the court, again by a 9-0 margin, held that those suing a national publication may seek out the state most favorable to their cause. The case involves an \$80-million suit against Hustler Magazine.

Both opinions were written by Justice William Rehnquist. And in both, the court rejected the argument that the First Amendment protects the media from plaintiffs who seek courts convenient to them. "We reject categorically the suggestion that invisible radiations from the First Amendment may defeat jurisdiction otherwise proper under the due process clause," Rehnquist wrote in a footnote in the *Hustler* opinion.

The Enquirer decision means that reporters and editors who are defendants in libel cases may be forced to travel considerable distances to defend themselves. (There was no dispute as to whether the newspaper, as a corporation, could be required to respond to a libel suit in a distant jurisdiction.) Some print and broadcast organizations had held that such a decision would impose a "chill" on reporting. But Rehnquist said that the First Amendment guarantee of a free press was not involved. Those who prepared the allegedly libelous material, he wrote, must be prepared to answer the Jones suit in California.

The story at issue, which appeared on Oct. 9, 1979, reported that Jones's husband, producer Marty Ingels, "terrorized his staff, cheated stars, outraged advertisers and scandalized Hollywood," and that Jones was so upset as a result that, "by 3 o'clock in the afternoon, she's a crying drunk." Rehnquist said those involved in preparing the story knew it "would have a potentially devastating impact" on the actress and that "the brunt of that injury would be felt [by Jones] in the state in which she lives and works and in which The National Enquirer has its largest circulation." Some 600,000 copies are sold weekly in the state. Accordingly, Rehnquist added, they must expect to be haled into court there "to answer for the truth of the statements made in their article.'

In the Hustler case, the court held that Kathy Keeton, an executive with the rival Penthouse magazine, is free to sue in New Hampshire, the last state where the statute of limitations had not run out on the cartoon, picture and story that accused Keeton's common-law husband, Penthouse publisher Robert Guccione, of infecting her with veneral disease. The offending material was published in 1975 and 1976. A U.S. district court and a U.S. court of appeals had ruled against Keeton on the jurisdiction issue, contending that the due process clause of the 14th Amendment forbade application of New Hampshire's six-year statute of limitations. Broadcasters and publishers supported that ruling; they expressed concern they would be exposed to litigation and heavy

damages if plaintiffs in libel suits could pick states most hospitable to their suit.

Rehnquist, however, held that Keeton's "successful search for a state with a lengthy statute of limitations is no different from the litigation strategy of countless plaintiffs who seek a forum with favorable substantive or procedural rules or sympathetic local populations." And he said Hustler's circulation of 10,000 to 15,000 in New Hampshire provides sufficient legal grounds for a libel suit there based on the contents of the magazine. Hustler, Rehnquist said, is "a national publication aimed at a nationwide audience.

There is no unfairness in calling it to answer for the contents of that publication wherever a substantial number of copies are regularly sold and distributed."

In another action last week, the court turned down a request from Universal City Studios and Walt Disney Studios for a new hearing in the Sony Betamax case. The court, by a 5-4 decision in January, held that the use of home video recorders to tape copyrighted material as it was being telecast did not violate federal copyright law-a decision that was a major setback for Hollywood program producers.

Incumbents fare well in NAB elections

A majority of the incumbents running for reelection to the National Association of Broadcasters' radio and television boards last week managed to hold onto their seats despite some reportedly close contests. Three incumbents (two of whom were on the radio board) were defeated.

Four of the six incumbents on the radio board were re-elected and eight new members chosen. On the television side, where 12 candidates were vying for the six-at-large seats, four incumbents held their own. Each member serves a two-year term, effective June 18.

The two radio board incumbents who lost their seats were Willie Davis, KACE(FM) Los Angeles, from district 24 (southern California, Hawaii, Guam and American Samoa), and Douglas Stephens, KDEN(AM) Denver, representing district 16 (Colorado and Nebraska). Davis lost his seat to Robert Fox, KVEN(AM) Ventura, Calif., in what was characterized as one of the tightest races. Stephens was defeated by Ray Lockhart, KOGA-AM-FM Ogallala, Neb.

TV board member William Faber, Media General, Tampa, Fla., was the other incumbent to lose his bid for re-election.

New TV board members are Gregory Stone, WSOC-TV Charlotte, N.C., and Wallace Dunlap, Westinghouse Broadcasting, Washington. Incumbents Bill Bengston,

Dunlap

Poole

KOAM-TV Pittsburg, Kan.; James Dowdle, Tribune Broadcasting, Chicago; Crawford Rice. Gaylord Broadcasting, Dallas, and William Turner, KCAU-TV Sioux City, Iowa, were re-elected to the TV board.

The nominees who lost their bids to be seated on the TV board were: Evans Nord, KELO-TV Sioux Falls, S.D.; James Smith, Landmark Communications, Las Vegas; James Smith, KRON-TV San Francisco; Cyril Vetter, WRBT(TV) Baton Rouge, La., and Walter Windsor, WFTV(TV) Orlando, Fla.

On the radio side, William O'Shaughnessy, wVOX(AM) New Rochelle, N.Y., defeated Walter Maxwell (reportedly 121 to 71), WGHQ(AM) Kingston, N.Y., for the district two seat (New York and New Jersey). In the fourth district (Delaware, District of Columbia, Maryland and Virginia), J. William Poole, WFLS-AM-FM Fredericksburg, Va.,

William Rollins, WEGO(AM)-WPEG(FM) Concord, N.C., from district six (North Carolina and South Carolina), beat his challengers, Terry Freitag, WHNC(AM) Henderson, N.C., and William McElveen, WNOK-AM-FM Columbia, S.C.

Incumbent John Dille III from district 10 (Indiana), WTRC(AM)-WYEZ(FM) Elkhart, Ind., became an automatic winner during the run-off election when he received more than 50% of the vote. In district eight (Louisiana and Mississippi), Ray Saadi, KHOM(AM) Houma, La., defeated Howard Cole. WHOC-(AM) Philadelphia, Miss. The seat for the 12th district (Missouri and Kansas) was picked up by John David, KFSB(AM)-KDBQ-FM Joplin, Mo., who beat Robert Templeton, KAYS(AM) Hays, Kan.

Wayne Phillips, WJJK(AM)-wBIZ(FM) Eau Claire, Wis., lost his bid for the district 14 seat (Iowa and western Wisconsin) to incumbent Paul Olson, KLEM(AM)-KZZL(FM) Le-Mars, Iowa.

Perhaps the closest race was in the 18th district (southern Texas), where incumbent Dick Oppenheimer, KIXL(AM)-KHFI-FM Austin, Tex., defeated former radio board member, Dick Osburn, KYKS(FM) Lufkin, Tex., reportedly by one vote. Roy Mapel, KIML-(AM) Gillette, Wyo., won in district 20 (Montana, Idaho and Wyoming, where he beat Raymond McLean, KZLS(FM) Billings, Mont. Incumbent Lee Shoblom, KFwJ(AM)-KBBC(FM) Lake Havasu City, Ariz., who was re-elected to represent district 22 (Arizona, Nevada, Utah and New Mexico), ran against Bill Smith, KOOL-AM-FM Phoenix.

BROADCASTING's editors and writers are at work on a number of special reporting assignments scheduled (*) to appear during the next few months. Among the more prominent prospects:

- April 9 Special report: Satellites. Ten years after the first geostationary communications satellite took its position above the equator, BROADCAST-ING assesses the state of the art. With a look back at yesterday's profits and pioneers, a look around at today's ever-expanding telecommunications horizon and a look ahead to the satellite universe of the year 2001.
- April 16 **(3)** Top 100 companies in electronic communications. Financial year review of the top 100 companies involved in broadcasting, cable, programing, manufacturing and elsewhere in the Fifth Estate.
- April 23 **[3] Pre-MIP.** An advance report on the international television program market held each year in Cannes. Plus the **Pre-NAB.** Getting ready, getting set and . . .
- April 30 💋 NAB... going on the 62d annual convention—in Las Vegas, April 29-May 2. Complete advance of the four days of workshops and sessions, and a complete list of exhibitors for the industry's largest equipment show.
- May 7 **Post-NAB.** Saturation coverage of the industry's annual taking on of new information and new gear at the premiere convention of the Fifth Estate. The next best thing to being there.
- May 14 **Post-post-NAB.** Gavel-to-gavel report on the technical side of the NAB convention, featuring a by-the-experts-themselves appraisal of the state of the equipment art.
- June 4 S NCTA. As the year's largest cable television convention gets under way, this year in Las Vegas, BROADCASTING will present a day-by-day agenda and a complete list of all the companies that will be exhibiting both hardware and software.

BROADCASTING will continue to update this schedule as appropriate, (a) to give readers an idea of what's upcoming, (b) to give sources due notice that we're at work in their territories and (c) to give advertisers a chance to plan their own marketing strategies in tandem with these editorial opportunities.

CBS INC. CHAIRMAN AND CHIEF EXECUTIVE OFFICER THOMAS H. WYMAN

In terms of top management stability and longevity, CBS for years was in a class by itself. Essentially, it was William S. Paley as chairman and Frank Stanton as president and a passing parade of lesser executives in group and divisional posts. Then began a long and arduous process to find the person who would lead CBS into the second generation. Chapter I of Book IV of that search ended on June 2, 1980, when Thomas Hunt Wyman—who had made corporate marks at Polaroid and Green Giant and Pillsbury—was named president and chief executive officer of CBS Inc. Chapter II began on April 20, 1983, when Wyman succeeded Paley as chairman of the board. ¶ Earlier this month, BROADCASTING editors sat down with Wyman to review CBS progress under his stewardship and to solicit his views on a number of issues facing that company and the industry at large. The result was a revealing portrait not only of CBS's new ship of state but also of the man on the bridge.

High sights, low visibility

How fast is the pace of change at CBS, away from the traditional businesses and toward the new ones?

It depends on your view of what change is. My view is that it's not very rapid. It's more an amplification of the businesses we're already in. If you take a broad view of our business as the reporting of information and creation and distribution of entertainment—and if you see the ownership of distribution techniques as important, but not central to, the real business that we are in, then you have a somewhat lesser view of radical changes.

On the other hand, we are doing some things that are quite new and quite different-videotex not being the most dramatic example of this, but the most recent. That involves mainly the mobilization of distribution techniques and a certain amount of information purveyance—not too much entertainment, probably—but it's quite different.

But I would characterize our lives as 80% building upon and elaborating the businesses we are in and 15% or 20% bringing in
EVEN THE HAIRIEST SITUATION CAN'T SHAKE UP THE FIRST 3-CHIP CAMERA.

Some gripping news from NEC: the ENG camera has come of age. Our new SP3 packs so many features into 7.3 lbs., it's a small wonder. With three CCD chips

instead of tubes, the SP3 can take all the abuse your crew dishes out, and never needs registering. It produces broadcast quality pictures with over 500 lines of resolution. And better still, you can use it with any format — VHS, Beta,^M or ³/₄ inch.

To find out more about the SP3, the most newsworthy camera around, call NEC at 1-800-323-6656. In Illinois, call 312-640-3792.

IMAGINE WHAT WE'LL DO NEXT

NEC America, Inc., Broadcast Equipment Division 130 Martin Lane, Elk Grove Village, Illinois 60007 some additional businesses.

How is the company doing right now?

We are having a first quarter that we think we'll be pleased to report upon in April. Earnings will be comfortably in excess of \$1 per share, up from 60 cents a year ago—and opposed to the 70 cents or so that most analysts had anticipated. As you know better than anyone, the network and station businesses are both in pretty good shape at the moment—more than pretty good shape. And it's no secret that something has happened in the music business over the last year. The momentum that we saw in the second half of last year is being sustained. It is an incredible time for the music business. Things come and go, but this cycle is up, and it's very, very strong. Publishing, in many ways, has had just as strong a year in terms of financial performance as any of our groups, and that continues nicely. The Columbia Group is right on plan for the first quarter.

All in all, I'm delighted to answer the question.

What about Wall Street? There was a period when it was very skeptical of CBS's performance. That seems to have changed now. Is that your reading of the situation?

I think that's probably correct. We read the analysts' reports and in general they are far more understanding about what our basic strategies are. I think that, on a relative basis, we seem to be viewed favorably.

In general, we're not uncomfortable with where we sit in terms of the six or eight people who are really qualified to evaluate us.

Several things are coming together at the same time. Network shares are declining. Cable is fragmenting the audience. Inflation has slowed down. And analysts seem to have two questions. One, how can you estimate that revenues can increase on an annual basis, given those factors, and, two, how can you continue to control costs?

1 think we are just warming up to the question of controlling costs. That is *the* question. It would be irresponsible for us to program our broadcast business on the basis of expecting revenues to increase on a 14% or 15% basis over the next few years, and that as a consequence of that expectation, it could be bearable if costs increase 12%, 13% or 14%.

I don't think the first assumption is appropriate, and the second, as a consequence, is totally unacceptable. We are—as I think everyone understands-deeply engaged in the kind of introspection, on the one hand, and activity, on the other, to examine as rigorously as possible every kind of relationship: the numbers of people required to do things, what you can afford to pay, what are your activities and functions, where the markets are moving, where and at what cost various kinds of creative product can be produced, and what latitude you have in terms of moving your mix to optimize-or, put another way, to reduce costs without product sacrifice-the mix of the program schedule, and offering a balanced, varying schedule that is consistent with the quality that has put us where we are today. Day, night, early, late, sports, news-clearly, we cannot give up any of the leverage that flows from that kind of performance differential. But we put at risk the benefits of our position if we accept as automatic and irreversible a cost evolution that is in continuing double digits.

That is the number-one priority: managing costs in a context of maintaining product quality.

This is not just a broadcast group priority?

Oh, absolutely not. The most dramatic example of the wisdom, the desirability, the effectiveness of cost control really took place under a little duress, to be sure—in the records group two years ago. The success of 1983 was created in 1982. We did some fairly dramatic things: We closed two of our four plants, shut nearly half of our branches and let go more than 2,000 employes. Now, for 1983, we have had a very major increase, from an on-the-floor year in 1982 to an unbelievably successful year. Volume was up, but the volume changes did not remotely explain the essentially five times increase of the records business. The volume was up 8% but the profits were up over 400%.

Now, I wouldn't want to subtract Michael Jackson from the success of '83, but the lesson that we really had a chance to demonstrate is that the mission of cost control applies not only to the broadcast group but also to the rest of CBS.

So you say that conserving costs is a principal priority. What about new ventures?

The nice thing about priorities is that they're not mutually exclusive. You can order them in some hierarchical arrangement. We have created in the last couple of years three substantial ventures: CBS/ Fox, which is up and running and performing very well; Tri-Star, with Columbia Pictures and HBO, whose first films will be on the market in April and May, and the CBS-IBM-Sears videotex venture, which was just announced.

Why did we make the CBS/Fox venture?

One, we didn't think there was a way to get started in the home video business without a film library and Fox had a considerable one. Two, Fox had a video business, with a substantial, successful operating, production and manufacturing, sales, marketing and distribution organization. And, three, we made the judgment, which turns out to be reasonably sound, that the VCR area was going to do some important things, beginning from a base of just theatrical films and broadening into other product which CBS was positioned to supply—access, for example, to music video or news division product like Walter Cronkite narrating World War II. That's what we got and that's what we have maintained.

As new ventures develop, how do you see your revenues shifting from your mainline businesses? How do you anticipate revenues downline?

If you're asking for a percentage, pie chart description for 1990, I don't have one that I can give you. But I can tell you that the broadcasting business as we know it today—radio, television, stations, network—is going to remain far and away the largest area, the heart of this company. The growth potential there is as substantial as in the new media. Since those are businesses we know well, there is every reason to focus our attention on them.

In the music business, we'll always have a risk of moving up and down. It's not too often that we have an artist who sells 30 million albums—that's a characteristic of the business. But the appetite for music is clearly timeless, and our success is going to be measured by our ability to move on the front edge of taste and to maintain our reputation and distribution capability that attracts the kinds of artists who put you there.

And there's the definition question. How do you classify video music? Is it part of CBS/Fox? Is it part of broadcasting? Our artists will be operating in cassettes, in pay cable and in nonpay cable and creating network specials as well as the same kinds of concerts they do now.

I think in the mid-90's, videotex will be a major force in our lives: the way we transact business, have access to information, and educate and entertain ourselves. partially, and the way that we reinforce the whole communication process.

By combining the technology of IBM, the retailing and marketing capability of Sears and the programing expertise of CBS, we will be able to design a system that is superlative in quality.

But are we drawing pie charts that suggest that the future of this company depends upon having videotex represent perhaps 35% of our business that far away? No.

If you look down the road, at the way the new media are developing, you can construct a scenario that there may be, in five or 10 years, a half-dozen or a dozen major program suppliers creating product for an equal number of media—DBS, MDS, cable, over-the -air broadcasting—all competing for the same product. CBS, in the past, has been primarily a user of product—a buyer of product—and with the exception of news and, I guess, sports, is not a producer of this product.

If we were to look down the road to 1990 or beyond, do you think

PEOPLE ARE LOSING SLEEP OVER GAYLORD.

TELE REP. KTVT Dallas/Ft, Worth • WTVT Tampa/St. Petersburg • KSTW-TV Seattle/Tacoma WUAB-TV Cleveland/Lorain • KHTV Houston • WVUE-TV New Orleans • WVTV Milwaukee

WUAB-TV, Cleveland

We give people something worth staying up for Great programming until 2:00 a.m. And before bedtime, we've got the 9 o'clock movie, Operation Prime Time, plus sports coverage of the Cleveland Indians, pro basketball and Ohio State basketball.

That's why people have their eyes on Gaylord's WUAB-TV.

Shouldn't you?

Call us and we'll help you wake up an audience. At rates that won't make you toss and turn.

that CBS is more likely to be one of those major producers of product?

Well, we're now touching on the financial interest-syndication discussions, and the answer is: I hope that we are not forced to become a major internal producer of product.

Let me tell you why.

It's possible that we may be driven to being more of a producer than we would like to be. For something like the news, nobody else is ever going to do that for us. But this question relates to entertainment.

The driving consideration is: Where do you find the creativity and creative skills to package materials that will offer variety, wit, humor, drama, et cetera, on a sustained basis in a schedule that responds to a variety of public tastes?

The more you move inside, the more you are obliged to have people under your own roof delivering that variety of material, the more you are risking a certain sameness, a certain narrowing of the offerings as opposed to reaching out wherever you can to find new ideas of substance and stimulating, in some cases financing, those new sources of ideas and potential product.

What we should be looking for is a far broader base of external supply. Take the earlier question you raised about cost. One of the ways that we can exercise some discipline is to be close enough to the activity in the field. We find it very instructive to be in made-fortelevision films and to be making some of those ourselves.

I think there's no question that all three networks would love to be producing some series, but I think there's a very big difference between producing one or two as opposed to evolving as a major supplier of in-house or series production.

Would that response apply to CBS/Fox as well?

Absolutely.

But I would have thought CBS/Fox would like to create a lot of product for sale to other ventures. Not so much series product as movies and pay cable product.

CBS/Fox may cause movies or other material to be produced, and each partner may supply product, but I don't see CBS/Fox developing as a substantial production entity in and of itself.

How about Tri-Star Pictures?

That's something else altogether. Tri-Star is a major studio and will be a producer of all kinds of film materials and, in time, television materials. The situation is complicated slightly by the financial interest rules.

Well, may we turn to that subject? And let me ask first why CBS took the lead in the effort to repeal the financial interest rules. What did it mean to you?

This company didn't believe there was a requirement for those rules in the beginning. It was a major moment in this company's history, obviously, when the FCC imposed the rules in 1970. As we have watched the industry take a quite different shape, and major competitive forces emerged which were not governed by the same rules, we decided that the timing was appropriate to pursue relief. And, I think that has been one of the attractive traditions of this company: that sense of leadership and responsibility. And it appeared at the Justice Department, and the Commerce Department and at the FCC that the time had come for reconsideration.

Well, it has now come to a point that Hollywood has achieved an apparent victory. Do you think such an outcome will hurt CBS?

I think you have to be a little careful. There is no question that they have a victory if victory is described as the deferral of repeal. And it's serious to the extent that we are denied access to the syndication

Wyman being interviewed in his 35th floor office at CBS headquarters

Quality Wins For 3 Books in a Row: Transtar #1 at Z-93

Satellite programming is only good for keeping costs down, right? Not necessarily.

At Transtar we're building our family of formats—Adult Contemporary, Country, and our new "Format 41"* for a lot more than cost reduction.

And they're winning. The fall ratings are in and Z-93 (KSPZ), a ratings' leader in Colorado Springs since it went to Transtar's 24-hour satellite programming, is tops in adults **again**:

	Z-93	WINS WIT	H TRANST	AR	
	ADULTS 25-49			ADULTS 25-54	
#1	Z-93 °	16.2 [†]	#1	Z-93	15.1
#2	KKCS	12.7	#2	KKCS	12.2
#3	KILO	10.5	#3	KRDO-FM	11.4

And those rating were achieved in a market of 18 good signals.

"Since we went with Transtar, we believe Z-93 is the most profitable radio station in Colorado Springs," reports Vice President and General Manager, Dave Noll.

Transtar Adult Contemporary is just one of the growing family of quality Transtar Formats designed . . . and proven . . . to win.

I WANT TO WIN. TELL ME MORE.

*Service mark of Transtar Radio Network, Inc. *(Monday through Sunday 6 AM - 12 Mid. AQH Share Fall 83 Arbitron.) market, and participation in the financial interest potential; to that extent it's serious.

Everyone overestimated how much of the much-discussed \$800 million annual syndication revenues the networks might share in. It is my personal view that if we had a combined objective of one day having \$150 million of the \$800 million, that would have been ambitious.

What is much more important is the damage of being denied the potential of having additional sourcing possibilities. With all the distribution techniques that are before us, the story is product. You cannot just replay the same product in different windows. The same material finally runs out of interest.

Can you share with us the terms you were able to reach during your negotiations with Lew Wasserman of MCA?

Our proposals involved several major concessions in the interest of creating a period of time, until 1990, in which we could demonstrate the merits of being able to participate in very limited ownership on the creative side. We were prepared to give up syndication across the board. We were prepared to limit ownership of any individual program to $27\frac{1}{2}\%$ and of the entire prime time schedule to $27\frac{1}{2}\%$, responding completely to the question of whether we would control material in ways that would affect the independents. Clearly, at $27\frac{1}{2}\%$ you don't control anything.

Also, any in-house production counted 100% toward the $27\frac{1}{2}\%$. For the studios, limiting in-house production was a very important consideration because in-house production was something they were not enthusiastic about.

Did they accept that percentage?

Yes.

But this is where we parted from the other two networks. ABC and NBC were not prepared to accept a reduction in the latter years of the current consent decree—call it the ABC consent decree—that provided for five hours of in-house production. We agreed that we would put a cap on that at three-and-a-half-hours on in-house production. That clearly was of great interest to the studios.

If you start from a broadly held view that the financial interestsyndication rules are inappropriate, our willingness to set aside a sixyear period under these terms seemed to us to be responsive to Congress's request that we endeavor to work something out.

Where we fell out with Hollywood was on a series of suggestions as to how financial interest would be defined. And we found those limiting in ways that, having conceded A, B and C, we saw virtually no revenue accruing by the time all the priorities of various people's interests were enumerated. Equally important, the narrow financial interest which Hollywood defined would have relegated us to a completely passive management role.

Are you encouraged at all that discussions can resume in any way?

Well, if the pre-condition of reconvening is that we negotiate more, which implies additional concessions, the answer is no. We've described the limits of the conditions we could accept.

We put all our cards on the table. It would be unfair to our shareholders to give away more for a relatively minor advantage.

But we were interested in going as far as we did because we thought we could prove to lots of people, including some people in Washington, that the public interest might very well be served if we had access to the different arrangements suggested.

Did the experience with the financial interest issue impress you at all in terms of the intensity with which the networks are disliked in Washington?

Yes.

Why do you think that condition exists?

I think it has to do with the business we are in. From Washington's point of view, our news division is a point of greater tangency than many others.

I think the research that was generated following the Grenada

invasion was a pretty large bulletin board, and a sobering one.

We have been insufficiently attentive to the Washington community. Not in a lobbying sense—I think we've been persuasive and generally effective in terms of making a case on a variety of subjects.

We are endeavoring to spend more time in Washington, not so much to convince people otherwise about us, but to understand that human equation better and to try to be responsive to it to the degree we can—to explain a little bit of the nature of what we can and can't do in terms of reporting the news. But we realize there are a lot of people we are interested in trying to see who have indicated they have a lot of things they want to say to us. And I can't believe that it won't be in our interest to take some of that questioning more directly.

Can you anticipate any actions you might want to take to meet the criticism?

I believe I can anticipate that we will not alter our standards in the news division. But there are some serious questions that the news division is examining on its own responsibility. How we cover the primaries, how we make use of exit interviews and how early forecasts are made. I can promise you these questions are under very thoughtful review. Those decisions will not be taken in response to heat but rather to decide what is right in terms of living up to our responsibilities.

Are you considering, or would you like to be able to make another attempt at, establishing a successful satellite-delivered cable service?

As you know, we're involved in a serious look with Comsat at DBS, in addition to our own three-year-old DBS grant from the FCC. We have set aside a period until July to see in what combination we might think regarding a partnership in that area. The distribution capabilities are clear. But there are a large number of unresolved matters. Such as: the product differentiation possibilities, the cost, the economics, how large we have to be, who are your competitors, and how we pass our own test of doing only those things that we can do better than anybody else, what kinds of partners would we have to be associated with to meet that criteria, and how to calibrate an investment requirement of \$600 million or \$800 million with the risks of bringing enough new to the American public so there would be enough business to pay the bills.

I think it will be three or four months before we have a decision. We've talked to a lot of interesting people but it's a very complicated subject.

You are talking of DBS here. What about a service delivered to cable systems?

When I think about cable systems, I think about packaging materials and delivering them through cable systems. I think about, for example, a Bruce Springsteen concert, or I can imagine a series of six or eight one-hour programs with major CBS artists, or any artists, that we produce as a cable offering, which can also be a videocassette or disk offering with overseas sales. I see it more in the area of multiple distribution of products over which we have particular control and an ability to produce. Sports may fall in that category.

But I don't see us offering full service.

The futurists, the DBS afficionados, say that the future will see a CBS network in the sky, delivered directly to the home, and without affiliates in between. Do you see that as a possible scenario?

I've seen some of the same futurist bulletins but we haven't written any of them. I think the people who have that view underestimate very substantially the mix of local and national participation in two senses. One, offering a program that has a very substantial component of both, the local news being in much demand. And the whole business of how you produce the best possible mix, plus advertising that is local as well as the large national schedules. We do not see how you could replace all that efficiently, just because you can physically deliver the programing, assuming you had it all. Two,

Scientific Atlanta

A BIG SOLUTION FOR A BIG DECISION.

Satellite transmission of broadcast programming is creating new standards of excellence in program distribution and new challenges for specifiers of broadcast equipment.

Scientific-Atlanta offers some criteria to consider in your quest for the best satellite earth station.

SCIENTIFIC-ATLANTA OFFERS THE MOST COMPLETE LINE OF SATELLITE VIDEO AND AUDIO PRODUCTS...

Your two priorities in earth station selection should be the quality of individual products as well as complete system performance. (Remember, you're buying more than just an antenna.)

Scientific-Atlanta's uplink and downlink earth stations are complete systems —antennas. exciters. receivers. lownoise amplifiers. switching equipment. highpower amplifiers. plus every accessory. Even mobile uplinks for location work. Each component is designed to function in perfect tandem with other Scientific-Atlanta components. You get a fully integrated system with no interface problems. It's more cost efficient. too, because you get only the features you need.

Scientific-Atlanta earth stations are always available. There's no waiting for your system to be specified. assembled and shipped.

Every step in the design. every component in the engineering is true state-of-the-art...to provide you unrelenting performance.

...PLUS THE MOST COMPREHENSIVE AFTER-SALE SUPPORT.

Another important factor is accountability. As a single-source manufacturer of turn-key systems, we can provide full. continuous, after-the-sale support.

We can help you install your new Scientific-Atlanta system and bring it on-line. We offer comprehensive training for your operations staff. And we inventory replacement parts to give you the fastest possible turnaround for maintenance and repairs.

WE OUTSELL ALL OTHER EARTH STATION MANUFACTURERS.

A final decision factor is track record. How long has your intended supplier been in this business? Who are their satisfied customers? Scientific-Atlanta has been instrumental in the actual development of broadcast earth station technology. Many of our innovations have shaped the earth station concept as it exists today. And. right from the beginning, we have maintained the leadership of the market. Every year we continue to outsell every other manufacturer of satellite earth stations.

It's a big decision. But there is a big solution. That solution starts now with your first call to Scientific-Atlanta. Do it today. Find out exactly how Scientific-Atlanta uplink and downlink earth stations can be your best solution. Call Dan Landreth at (404) 449-2844. Or write us at Scientific-Atlanta. Dept. AR, Satellite Communications Division, 3845 Pleasantdale Road. Atlanta. GA 30340. with DBS's technological capabilities you could even regionalize or localize. But how do you put it all together? How do you get the local supermarkets to advertise?

The current affiliate system works pretty well. We don't believe that replacing it will produce substantial advantages.

It has a disadvantage for you. You can't program whenever you'd like to, and you can't clear 100%, and you have to share compensation with affiliates.

Of course. But the proof of the pudding is that when we do have really first-class material that has important, large public appeal, the clearance problem disappears. We have the best kind of leverage: We have the resources to produce better material than affiliates.

Now, would we like to have all the hours that we're legislated out of at the moment? We'd like to have some of them, but probably not all of them. We would like to have another half hour for news.

Do you believe that? I mean, are you a fan of the hour-long early evening news?

We've all seen that MacNeil and Lehrer have not had a totally easy time of it, but their resources are not the resources that are at our disposal. We could fill that second half hour as well as we fill the

first. However, we've surrendered on that subject in terms of any Washington initiative that would permit us to program the hour news; there's nothing going on to make it happen in the foreseeable future.

There's another Washington policy question I'd like to ask you. What about seven-seven, the initiative to change the multiple ownership rules? If it goes, what will you do then?

They are two quite separate questions. First, I think the rules should be changed. If the reasons for the rules ever made sense, they no longer pertain. The principal argument against the networks being able to acquire more stations is that somehow the networks have become too powerful.

Maybe we have a view that's very different from everyone else's, but we don't see any correlation between the number of stations you own and what's on the network. It is an obvious fact that the three major networks, because they've been in the business for a very long time, have acquired major stations, but they're operated very autonomously. They are essentially affiliates. Interestingly, the clearance situation with O&O's is not any different than it is with affiliates. So I don't understand the case as to what would happen if the right to own additional stations existed.

Now, to answer your second question, it is no secret that stations have become a little more expensive. We've looked at parts of the country where station ownership is prospective. Without exception, we've discovered that our ideas are not original and that the same cities have attracted the attention of other people—including, most particularly, people other than the other two networks.

I would be very timid about entering the full-scale price-bidding market for stations. And I think the idea, for example, of our buying six or eight stations is absurd. There isn't enough money to buy six or eight stations.

Just for any of the networks to acquire a limited number of stations will require luck, planning and timing. And by limited, I could just as well say one or two stations.

It seems to me that's the perspective. I don't say that to relax anybody in Washington who's thinking about the seven-seven-seven rule. I think it's a matter of economic reality.

What about cable systems? How much further might you get into that business?

We have an operation in Texas and it has been interesting to be a small participant in the cable ownership business. If we go back to the criteria of things that you think you can do better or that you could bring more to, I don't believe there is any reason to believe we can be a better cable operator than a lot of people running systems today. You should not get confused by thinking that because it looks like broadcasting, it is broadcasting.

One of the questions that one runs into in the corridors of this building has to do with your plans to name a successor as president of the company. Are you prepared to tell us who that might be?

No, but I'm prepared to answer your question. I made an announcement in several locations, including a broadcast group management meeting, and I've said in all these forums that I have no plans to name a president. There has been no advancement of the plans I did or did not have a year ago. And the reason for that is that we have four very capable group presidents who, in the aggregate, form, with several members of the corporate staff, our management team. That is the way this company is run, and I do not want to take any of those people out of what they are doing, because they're fully engaged, very successfully, and I also don't want to get one person further away from those four businesses. And that is a categoric, absolute, complete statement.

Does it have any time frame on it?

There is no time frame on it.

So anybody who might be anxious for that spot can remain anxious.

No, anybody who remotely sees themselves as a candidate for that job has understood that that job is not going to be available for some time—an indeterminate amount of time. And later, rather than sooner, for sure.

What about Bill Paley's role in the company. I notice he's here today and is available to advise you here every day. Does that mean that the more things have changed, the more they have stayed the same? Or let me put it this way: Is he still looking over your shoulder and does he have anything to do with running the company?

Mr. Paley has 55 years of experience with this company and I welcome his advice, but he is not involved in the company's ongoing operations.

We'd like to ask a question about you. I would not say that you have been remote as the chief executive officer, but your management style is not legion outside this company. The question is, how do you run the company, and what sort of leadership role do you anticipate taking in the industry at large?

I was conscious of a number of differences between this industry and the places where I've been in former lives. Clearly, one of the potential differences, and one of my apprehensions, was the requirement of this business to be somewhat more visible—I hesitate to say flamboyant. In the grocery business, one of the businesses in which I worked formerly, there are not a large number of people who are

household names, or who appear in the pages of Women's Wear Daily or other fashion-setting publications.

That just isn't who I am. I have a belief that great companies are managed by a number of people who have a sense of doing that together. I think that the further down you can take that conviction and the manifestation of that control the better. The cliche is that the sense of participation is absolutely critical. I think it's in a linear relationship to the success of that enterprise. There is no requirement that I can see that effective leadership of this enterprise depends on visibility.

I think that on Washington matters—such as financial interest and syndication, or election coverage—that we can and should be up front and visible and I am prepared to be.

On the second chapter of financial interest and syndication, I felt that the only way to develop a solution was to take the initiative to go to Mr. Wasserman. A kind of visibility fell out of that process, but I think that's as it should be.

But I'm more interested in running the company here. I'd rather be spending time with the heads of advertising agencies, going to affiliate meetings, talking to CBS people. That's how I choose to spend my time.

How does today's CBS compare with yesterday's?

I think there are two things that are quite different about this company today.

One is that businesses within CBS used to be organized and managed quite separately. But they no longer are, for two reasons. One, they're doing a lot of business with each other because the world is changing. The publishing group wants the broadcast group to help them put production values into telecourses that accompany school textbooks. That brings some people together. CBS/Fox wants to build a Walter Cronkite narrative series on cassettes. That has broadened everyone's views. If you don't know about what the other people are doing over there in another business it's not as much fun as knowing and working with them.

The second thing is a little harder to get at because we get institutionally and personally self-conscious in talking about it. You really want to have people understand what they're doing, understand where they've been, be proud of the products they've produced, feel that they have a right to scream in pain if they're offended by something the company does.

And there's the question, not of how you give people the *sense* that you care about what they're doing, what they think, what their questions and suggestions are, but that you really *do* care. And supervisors—I've had a couple of fairly senior people who left this company because, although they were pretty good performers on their own merits, the people who worked for them were unhappy.

I think that over the next 10 years the companies that do not find the ways to wrestle with that people equation are going to be losers.

When I was at Green Giant, it was very easy to talk that way because in the valley of Le Sueur, Minn., there are no cynics who had no use for such homespun philosophy. But it is every bit as important in the city. Different parts of this company are moving at different speeds, but I think we have a little traction in this regard. Over time, that's going to make more difference than the decision of whatever else we're doing.

'Wheel of Fortune' gathers speed in Nielsen sweeps

In some markets where game show competes against traditionally top-ranked 'Family Feud,' 'Wheel' has become front runner; still, 'Feud' remains top-ranked where not pitted against 'Wheel'

The contest for the top-rated syndicated program heated up during the November Nielsen sweeps, with upstart Wheel of Fortune continuing to make inroads into top-ranked Family Feud in those markets where the shows air head-to-head. In the November 1983 sweeps period, Feud and Wheel were, respectively, the number-one and numbertwo ranked syndicated programs. In the recent February sweeps, however, a look at those markets where the two shows play against each other in syndication shows that Wheel has jumped ahead of Feud in several major markets where it had been introduced since the November 1983 sweeps period. And in other markets where Feud and Wheel were head-to-head last November, Wheel has either overtaken Feud or widened its previous margin of victory.

But in markets where *Feud* does not play opposite *Wheel*, the top-rated Goodson-Todman's *Family Feud* does noticeably better, and in some cases has even increased its ratings over the previous sweeps period.

Among the top 10 markets, Washington is an example where Wheel has overtaken Feud in the prime time access period since the last sweeps in November 1983, and has increased substantially the station's share for the period since the February sweeps a year ago.

On WDVM-TV Washington, Wheel earned a 13/24 in the Nielsen February sweeps, compared to an 8/15 in the November 1983 sweeps and a 5/9 in the February 1983 sweeps, when WDVM-TV carried *Lie Detector* at 7:30 p.m. In contrast, *Feud* has steadily lost shares since November 1983 on WRC-TV Washington. In the most recent sweeps period, it fell behind *Wheel* with a 7/13 compared to a 10/19 in last November's sweeps, and—before *Wheel*'s debut in that market a 10/19 in February 1983.

In Philadelphia, Wheel dominated the 7:30 p.m. access slot on WPVI-TV with a 23/ 36, up from a 19/32 last November, and an 8/ 13 in the February 1983 sweeps when WPVI-TV carried Lie Detector. In contrast, Feud on WCAU-TV tied last year's February Nielsen sweeps with KYW-TV's People's Court—both scored 14/22. Feud on WCAU-TV then slipped to a 13 share in the November 1983 sweeps after Wheel was introduced, and finally to a 10 share in the most recent February sweeps.

The winning margins increased for *Wheel* in Dallas as well when it hit an 18/31 in the February sweeps compared to a 14/26 last November and an 8/14 in February 1983 when the *Feud* station, KXAS-TV, carried *Entertainment Tonight* at 6:30 p.m. *Feud* on KDFW-TV, on the other hand, has seen its share fall from a 30 in last year's February sweeps, to a 21 in November and then a 19 in the most recent Nielsen sweeps.

The Chicago Arbitron sweeps also showed improvement for Wheel. In the 6:30 p.m. access period on WLS-TV, Wheel hit a 14/23, up from an 8/14 last November and a 7/12 in February 1983 when the station programed local news. Feud, on WMAQ-TV, saw its share erode from a steady 23 in February and November of last year to a 17 share in the recent February sweeps, pulling up behind The Jeffersons' 13/22 on independent WGN-TV and Three's Company's 12/19 on WFLD-TV.

One market where the rating margins between *Feud* and *Wheel* both increased their rating and share points by an equal amount between last November and the most recent February sweeps was Baltimore. In Nielsen, *Wheel* rose from a 13/23 last November on WMAR-TVat 7 p.m. to a 14/25, while *Feud* on WBAL-TV increased an equal amount, from 11/20 last November to 12/22 this past February.

But in St. Louis, where *Feud* and *Wheel* play against each other at 6:30 p.m., *Wheel* on KSDK-TV took the lead in the most recent Nielsen sweeps with a 16/26, compared to a 14/24 for *Feud* on KMOX-TV. In February 1983, Feud recorded a 16/28 Nielsen compared to an 11/18 last November on KSDK-TV which was carrying Entertainment Tonight in that time period.

And in Kansas City, where Wheel and Feud go against each other at 6:30 p.m., Wheel came in just behind Feud by two share points. Wheel on KMBC-TV scored a 12/22 compared to Feud on KCTV(TV) which recorded a 13/24 in the February sweeps. However, that was the first sweeps period for Wheel in that market. Last November, KCTV won by a wider margin when Feud's 17/32 outperformed PM Magazine on KMBC-TV with an 8/16.

The Milwaukee Arbitron also shows a share decline for *Feud* against *Wheel*. In the February Arbitron sweeps, *Wheel* scored a 17/30 on wITI-TV at 6:30 p.m., up from a 14/25 last November and a 9/16 in February 1983 when wITI-TV carried *Entertainment Tonight* in that period. *Feud*, carried on WTMJ-TV, had a 12/21 in the most recent February sweeps, compared to a 12/22 last November and a 17/30 in the preceding February.

During the November 1983 sweeps,

Wheel beat Feud in 13 of the 17 markets where the shows competed head-to-head. Those markets were Baltimore; Charleston, S.C.; Columbus, Ohio; Dallas; Greenville-Spartanburg, S.C.-Asheville, N.C.; Milwaukee; Mobile, Ala.; Orlando, Fla.; Philadelphia; Phoenix; Sacramento, Calif., and South Bend, Ind. Wheel again surpassed Feud in those markets, on top of Chicago, Philadelphia and Washington, as mentioned above.

Jack Kelley, vice president, off-network sales, Viacom, reported that 70% of *Feud* stations in the top 35 markets that play directly against *Wheel* have renewed the program for a fifth season. (Viacom only had 30% renewals going into NATPE.) "We're very bullish about the fact that we have several more years of life left and Viacom is 1000% behind the show," he said. Kelley pointed out that over 90% of the Nielsen books of the top-50 markets are in, and that *Feud* is ranked either number one or number two in 64% of those markets. "That's not bad news," he emphasized.

Al Jerome, president of the NBC Television Stations, which all carry Family Feud

in syndication, acknowledged that "Wheel has been an effective game show," but added, "I'm certainly not willing to conclude that *Feud* is not going to come back—it's a little too early to tell." Jerome also said he thought Feud had lost ground in Chicago and Washington-two of the markets where NBC owns television stations-for different reasons. In Chicago, he explained, competitor WLS-TV dropped a portion of its local news to program Wheel and thus NBCowned WMAQ-TV lost "an opportunity to counterprogram." In Washington, however, Jerome said it looked more as though Wheel had simply cut into Feud. He also noted that when Wheel premieres in New York, it goes against Feud's strongest market, where it's lately been averaging 27 shares in the Nielsen books.

King World will introduce Wheel in New York within the next week on WCBS-TV at 7:30 p.m., replacing 2 on the Town, the inhouse production that has been canceled. On March 5, Wheel will go on the air in Los Angeles on independent KCOP(TV), which will air it opposite the three network news-casts. At present, the show is carried in about 105 markets. \Box

Post-NATPE program marketplace

177 out of 300-plus shows presented at February market still show signs of life

NATPE International has issued a list of 177 programs that are still considered prospects for a start this year. The total compares to 161 in 1983, 167 in 1982, 235 in 1981 and 149 in 1980.

Excluded are a dozen recently issued feature film packages, as well as titles offered by small companies that did not take exhibit space on the Moscone Center floor or in a local hotel at NATPE.

At the 21st annual market in San Francisco, last Feb. 9-14, NATPE counted more than 300 programs offered by 205 distributors. Of those titles still in the running, a breakdown by category reveals that, once again, information (including news and magazines) and variety (including music and music video) are the leading categories, with 32 entries each, followed by drama with 27 new entries. There are 18 documentaries compared to nine last year; 15 game shows (10 last year); 11 children's shows (same as last year); 10 comedies (three in 1983); 10 instructional (11 last year); 10 sports (13 last year); eight talk (six last year), and four docudramas (the same as 1983).

One asterisk denotes a show offered on a barter basis, two asterisks mean the show is a cash-plus-barter deal.

CBS's 60 Minutes explored the world of syndicated programing in a story broadcast March 19 on the 21st annual NATPE conference which took place last month in San Francisco. The report featured many familiar names, including syndicator Sandy Frank; Lucille Salhany of Taft Broadcasting; MCA executives Al Rush, Don Menchel and Shelly Schwab; Dick Robertson of Telepictures, and David Henderson of Outlet Broadcasting, plus snippets from both old and new programs being offered.

Correspondent Morley Safer in his introduction described the show as a "billion-dollar flea market ... even the huge Moscone Center, soon to be the site of the Democratic convention, is too small to contain all the past, present and future schlock--and quality programs--that will be bought, sold and traded here." As part of the report, 60 Minutes cameras trailed Salhany and Jim Johnson, program director at KFTY-TV Santa Rosa, Calif., as they shopped the suites at the Fairmont and Moscone Center floor for new programs.

60 Minutes also captured the square-off regarding the pros and cons of cash-plus-barter programing debated by Telepictures' Robertson and Outlet's Henderson, with Henderson protesting that cash-plus-barter programing has cut into station profits by taking away station inventory.

The 60 Minutes story also followed Sandy Frank behind-thescenes as he made attempts to pitch his new show, The New \$100,000 Name That Tune. In one scene Safer interviews Frank, who tells him NATPE is "outright trench warfare this year. It's kill or be killed, and when I go out there to get an order, I go for the juqular ... "

LITTLE ADS, BIG HELP. A whopping 90.3% of viewers who recall seeing *boldface* ads in their newspaper TV listings say those ads help them in making their selections*

cost-effective. For only pennies per thousand impressions, your message gets through to viewers at the point of decision, when they are *most* suggestible.

AUTOMATED ACCURACY. TV Extra is a fullycomputerized service. Your promotion proceeds with electronic speed and accuracy. We and our sister companies handle everything, completely, from beginning to end, including the actual TV listings themselves. No other "boldface service" does this. FLEXIBILITY. With TV Extra your ads can appear in any or all of the metropolitan and suburban dailies and weeklies that we serve in more than 50 major U.S. markets.

BIGGEST DIFFERENCE. TV Extra itself! We're a division of United Media Enterprises, a Scripps-Howard Company. Together with our sister companies, we comprise a total marketing service. Let TV Extra give your ads the big difference.

CAPITAL CITIES SPECIAL REPORT: Can't Read, Can't Wide Methods of the second s

When 165 stations aired our **Capital Cities Special Report: "Can't Read, Can't Write**," hosted by Johnny Cash, they did more than broadcast a report on America's 26 million functional adult illiterates. They joined us in reaching out to the people in their communities.

They produced local literacy close-ups. They highlighted community literacy efforts on their news and public affdirs programs. They broadcast public service announcements and cosponsored local literacy drives. They broadcast a toll-free literacy hot-line. Inspired by our program and the efforts of these stations, thousands of new volunteers came forward to work as literacy tutors. Thousands more found the courage to ask for help. Capital Cities is proud our report could be a catalyst for so many people with something to give.

By helping those in need, we affirmed television's extraordinary power to stir the best in all of us.

Leahy and Kehrl

CBS celebrates Washington past and present

CBS-TV, proud as punch over its upcoming eight-hour mini-series, *George Washington*, brought much of the cast and many of the responsible executives to Washington last week for a preview and celebration in tandem with General Motors, sole sponsor (at \$10 million-\$12 million) of the April 8, 10 and 11 event. The CBS contingent was led by Thomas Leahy, executive vice president of the broadcast group, GM's by Vice Chairman Howard H. Kehrl. Among the attending dignitaries (as they appear in the pictures below): Barry Bostwick, who plays the title role; Patty Duke Astin, playing Martha Washington; Walter Cronkite; Secretary of Defense Caspar Weinberger; FCC Commissioner James Quello; CBS-TV President Tony Malara; actress Laraine Stephens and her husband, producer David Gerber; Alan Levin, executive vice president, and B. Donald (Bud) Grant, president, both of CBS Entertainment, and Linda Fernandez.

Active indies

Independent television stations put up a strong fight in at least two of the metered markets during the February Nielsen and Arbitron rating sweeps (BROADCASTING March 12). What follows are two metered markets—Philadelphia and Detroit—where at least one of the independent stations outperformed the local affiliates in the early fringe, evening news or prime access periods:

Philadelphia

Nielsen numbers in the 5-6 p.m. local news period show that independent WTAF-TV tied or surpassed CBS-owned WCAU-TV and NBC affiliate KYW-TV. At 5-5:30 WTAF-TV carries What's Happenin' and scored a 9/17 in Nielsen and a 7/14 in Arbitron. Between 5:30 and 6, WTAF-TV airs Laverne & Shirley, and recorded a 10/18 in Nielsen and an 8/15 in Arbitron. WPHL-TV for the hour programs Little House on the Prairie, and scored a 5/ 10 Nielsen and a 5/9 Arbitron.

Those compare to local news on WCAU-TV which recorded a 9/17 Nielsen and an 8/16 Arbitron. And KYW-TV had a 5/10 in Nielsen and a 5/9 in Arbitron for its local news hour. (WPVI-TV won the period far and away with over 30 shares in both services).

The two independent stations also beat out KYW-TV and WCAU-TV in both services during the third half-hour of local news from 6-6:30. During that period, WTAF-TV programs Happy Days, and earned an 11/19 Nielsen and a 9/16 Arbitron, while WPHL-TV with Barney Miller recorded a 7/11 Nielsen and a 5/9 Arbitron. In local news, KYW-TV had a 5/ 9 Nielsen and a 5/8 Arbitron, while WCAU-TV had a 9/16 in both services. WPVI-TV maintained the lead with a 33 share in Nielsen and a 42 share in Arbitron. When all three affiliates have their network news feeds between 6:30 and 7, WTAF-TV runs $M^*A^*S^*H$ and scores a 12/19 Nielsen and a 11/18 Arbitron, while WPHL-TV programs *The Jeffersons* and racks up a 9/15 Nielsen and a 7/11 Arbitron.

At 7-7:30, when all five stations in the market run syndicated programing, WTAF-TV runs a second half-hour of $M^*A^*S^*H$ episodes and scores even higher—a 12/20 in both Nielsen and Arbitron. WPHL-TV has *Three's Company* and scores an 8/14 Nielsen and a 7/11 Arbitron.

Detroit

Of the two independents in the Detroit market, WKBD-TV won 5-8 against the market's other independent, WXON(TV) and ranked second behind WXYZ-TV beating the other affiliates and non affiliates in the market.

At 5, WKBD-TV carries Mork and Mindy and earned a 7/15 Nielsen and a 9/18 Arbitron, and at 5:30-6, WKBD-TV airs Laverne & Shirley and scored an 11/21 Nielsen and a 12/21 Arbitron. During the hour, WXON(TV) carries Buck Rogers, which averaged a 7/14 in Nielsen and a 6/10 in Arbitron.

At 6, WKBD-TV runs Happy Days Again and earned an 11/21 Nielsen and a 13/21 Arbitron, while at 6:30-7 it runs WKRP in Cincinnati, and recorded a 12/22 Nielsen and a 14/22 Arbitron. From 6 to 7, WXON(TV) programs B.J. and Lobo, and recorded an average 6/10 in Nielsen and a 6/9 for the first half hour and 7/11 for the second half-hour in Arbitron.

From 7-7:30, WKBD-TV runs $M^*A^*S^*H$ and garnered a 14/23 Nielsen and a 13/20 Arbitron, while at 7:30-8 it airs *Three's Company* and picked up a 14/21 Nielsen and a 15/21 Arbitron. WXON-TV carries Vega\$ during the hour, and averages a 4/7 Nielsen and a 5/8 Arbitron.

Reliving flight #90. On an unusually snowy day in January 1982, 74 passengers enroute to Tampa, Fla., perished in the icv waters of the Potomac river in Washington, when Air Florida flight #90 crashed after takeoff. At 9 p.m. NYT on April 1, NBC will recreate that tragedy when it telecasts Flight #90: Disaster on the Potomac. Billed as a "recreation of the human drama surrounding the crash and the incredible heroism of those involved" in the rescue of the five survivors. the two hour made-for-TV movie intercuts actual news footage of the accident with staged dramatizations of events leading to the accident. The dramatizations are based on the official National Transportation Safety Board report. NBC said.

At a press conference held by NBC in Washington last week to promote the film were (l-r): Roger Olian, a Washington sheet-metal worker who jumped into the frigid water to rescue the victims, and Nikki Felch, one of the five survivors, who said they thought the film accurately recounted their experiences. They were joined at the meeting by actor Richard Masur, who plays Olian, and Barry Schiff, an airline pilot who served as the film's technical adviser.

ABC comes away with a win

ABC-TV moved into the winner's column in the prime time ratings for the week ended March 18, taking it with a Nielsen rating/share average of 16.8/27, three-tenths of a rating point better than CBS-TV's 16.5/ 26 and two rating points ahead of NBC-TV's 14.8/24. won three and NBC two. ABC did it by winning big on the nights it did win and coming close—less than a rating point out of first place—on two of the nights it lost. ABC took Wednesday and Saturday, CBS took Thursday, Friday and Sunday and NBC took Monday and Tuesday nights.

ABC won the week even though it won only two nights, while CBS

THIS COULD SAVE YOUR LIFE. BUT YOU CAN'T HAVE IT.

Today people died who shouldn't have. People who would have been saved by air bags.

In an accident, air bags automatically provide a cushioning buffer between you and the car. They protect occupants' necks, heads and faces from flying glass and other debris. They're most effective in front and front-angle collisions, the deadliest kinds of crashes.

Today you can't have this protection. Except for a few luxury imports, cars with air bags are not available.

The auto industry has opposed air bags for years. They claim they would cost twice what the government's independent experts have testified. And they say car buyers don't want to pay for the extra protection air bags provide.

We think they're wrong.

In the property and casualty insurance industry, we've studied air bags for a long time. Experts tell us they would prevent thousands of deaths a year, and eliminate hundreds of thousands of serious injuries.

How much would air bags actually cost? As standard equipment, they would add about three percent to the price of the average automobile. It sounds like a bargain, and it is.

Right now in Washington, Secretary of Transportation Elizabeth H. Dole is reviewing possible safety requirements for all new cars. And most car companies are trying to keep air bags right where they are today. Nowhere.

Do something about it while there's still time.

Send for a free copy of our new report, Air Bags: A Matter of Life or Death. It sums up the latest facts and tells how you can get involved.

Help save air bags and help save lives. One could well be your own.

Bates predicts slight rise in C-P-M

Agency's analysis of past 10 years shows media costs quickly following increases in consumer price index, but not so quickly following when it goes down

Ted Bates Advertising, New York, says media costs are slow to respond when inflation rates decline but quicker to react when inflation is on the rise.

Bates offers details in a report on "Media Cost-Per-Thousand Trends: 1975-84," the latest in a long series of annual trend analyses by the agency.

Although inflation as measured by the Consumer Price Index (CPI) dropped from 11% in 1980-81 to 6% in 1982, the report concludes, the first real drops in media costs-per-thousand (C-P-M) did not occur until 1983—and were still higher than the inflation rate, which by then was down to 3%. This year, with signs that inflation is inching up again, Bates expects that media costs will, too. But its projections anticipate "only moderate" C-P-M increases.

The report, by Bates's media information and analysis division, tracks cost efficiencies (C-P-M's) and advertising expenditures for nine media elements for the decade from 1975 through 1984. Unlike the agency's previous trend studies, it does not track trends in unit costs and audiences; officials say that with so many changes in the media universe in recent years—the explosion in the number of radio networks, for one example—such trend numbers have been "too artificial."

In 1983, when C-P-M increases began to respond to the decline in the inflation rate, the report says, "most media increases were of a single-digit nature with the exception of only two media—network radio and newspapers, which experienced a 10% increase. "Daytime network television experienced

"Daytime network television experienced one of the lowest increases in C-P-M (5%) while spot television saw a slightly higher rise (8%). Evening network television saw a sharp decline from its excessive 1982 C-P-M increase [of 24%] to a more moderate 7%. Magazines and outdoor both rose 6%. Outdoor's 6% rise was the first single-digit increase for the medium in several years. Finally, national supplements had one of the lowest C-P-M increases at 5%."

For 1984, the report notes that the Conference Board anticipates a 6% rise in the CPI, double the 1983 rate. Media C-P-M's in general will probably follow suit, the report continues but adds that "these increases should only be moderate."

"While media costs were slow to react to a decline in the inflation rate," the analysis observes, "this does not appear to be the case when an increase in the inflation rate is predicted.

Advertisers viewing 1984 in a more positive light could take the position that with inflation expected to increase substantially, inflationary-adjusted 'real' C-P-M increases should be moderate or nonexistent."

Specifically, the study expects that network radio and spot radio should maintain their 1983 rates of increase at 10% and 7%, respectively; that daytime network TV should come in at an increase of 8% and evening network television at a slightly higher 11% increase; that magazines and supplements should both increase slightly to about 7%, with newspapers declining slightly to 7% and outdoor up modestly to 8%.

The analysis doesn't buy the widespread belief that the Olympics and election-year campaigning will send TV media costs up. "These two factors combined might have some effect on network costs," the report says, "but the effect, if any, should be minimal. In fact, when examining the effect the Olympics and the elections have had on media costs in the past, no apparent or consistent trend emerges."

As in earlier analyses, Bates characterizes 1976-79 as "boom years" when "there was

1983	303	297	287	242	254	236	

Tables report trends in index form with 1975, the base year, indexed at 100. These estimates are based on unit costs of 30 seconds for TV and network radio, 60 seconds for spot radio, one page four-color for magazines, milline black and white for newspapers, one page four-color for magazines, milline black and white for showing. CPMs are based on women 18 + for day network, total persons 2 + for evening network. TV households for spot TV, persons 12 + for radio; circulation for magazines, newspapers and supplements; and total population for outdoor. Sources for audience information are: network and spot TV—A.C. Nielsen; network radio—RADAR; spot radio—Arbitron; magazines—Magazine Publishers Association: newspapers—Newspaper Advertising Bureau; supplements—Standard Rate and Data; outdoor—Outdoor Bureau and estimates. CPI is based on increases in yearly average rather than December to December.

generally a dramatic increase in C-P-M's across all media, especially among the television elements analyzed." In 1980-81, the report continues, "the rate of the media C-P-M increases abated somewhat...specifically in the all-important television area, even though the annual inflation rate increases in the 1980-81 period averaged 11% yearly." Bates found it "gratifying that none of the media elements' C-P-M increases in this in-flationary period exceeded the CPI level [11%]."

Then, in 1982, the CPI's rate of increase dropped to 6%, the report notes, but the C-P-M percentage increases remained pretty much what they were in 1980-81--except for prime time television which showed an "alarming" 24% rise. "Thus," the report continues, "with inflationary pressure subsiding and the media C-P-M increases holding fast, or increasing substantially in the case of prime time, the spread between media C-P-M and CPI increases widened substantially."

The report also looks at trends in advertising volume and finds that growth there has exceeded the growth in the gross national product (GNP) in every year but one since 1976, "and is expected to continue to do so in 1984." (The one exception was 1977, when both advertising volume and GNP grew by 12%.) In 1982, advertising volume grew 10% to the GNP's 4%, "the most dramatic difference between the two measures in the decade [and] perhaps indicative of the sluggish economy of 1982."

In 1983 advertising volume increased by 13% while the GNP growth rate doubled to 8%, and this year Bates estimates ad volume will rise by 14% and GNP by 10%. The report notes that advertising volume as a percentage of GNP has increased steadily since 1975, reaching 2.27% last year and projected to 2.36% in 1984--"levels that have not been seen since the '60's."

Wendy's kind of commercial

In the two-and-a-half months since "Where's the beef?" was first uttered by a little old lady, the hamburger chain's sales have skyrocketed

Wendy's International and its national agency, Dancer Fitzgerald Sample, New York, have no beef at all about their "Where's the beet?" television commercials.

In fact, Wendy's and DFS are exultant. The phrase has become a national craze, gripping the country like an epidemic and showing no immediate signs of losing its virulence after 11 weeks on the air. "Where's the beef?" has been spread by word of mouth in offices and restaurants and by politicians and comedians and may well go down in the annals of advertising lore along with "I wonder where the yellow went," "You can be sure if it's Westinghouse," and, back 40 years, "Lucky Strike green has gone to war."

What pleases Wendy's and DFS is that "Where's the Beef?"is much more than a pungent rejoinder. It seems to be a catalyst for sales. According to Bob Reed, senior vice president and management supervisor at DFS, the "beef" commercial has helped business at Wendy's 2,600 hamburger restaurants. Reports from restaurant managers on January and February sales, he said, show that business has improved markedly. In addition, Reed added, ongoing tracking studies that DFS conducts for Wendy's point to improved acceptance of the Wendy single hamburger over the past five or six weeks.

Reed noted that originally Wendy's "big beet" commercial was scheduled to run for only four weeks starting Jan. 9. The commercials' popularity led to another fourweek tlight with a second spot using the same catch phrase. That flight ends this week. For January-February of 1983, Wendy's had no investment in television; this year the tab for the two months will be in the \$15-\$20 million range. The spearhead is prime time advertising on the three networks, supplemented by local and national television in more than 100 markets.

The "Where's the beef" catch phrase re-

ceived one of its earliest and most potent boosts a few weeks after the commercial's initial exposure when President Reagan called the astronauts circling in space. The President mentioned that "Nancy wants to know," "where's the beef?" "

Walter Mondale used the line in a nationally telecast debate as a retort to Gary Hart, and Mondale supporters appropriated the phrase as an unofficial campaign slogan ("Ad Vantage," March 19). Two weeks ago Johnny Carson used the line as the basis of his monologue. The phrase has been used at college sports events, in church sermons and in comic strips and political cartoons, according to DFS.

The commercial focuses on three elderly women who have bought hamburgers (not Wendy's) with large, fluffy buns but little meat. They complain about it at an unmanned service counter and one character keeps calling to the back, "Where's the beef?" A voice-over announcer says, "At Wendy's, the hamburger we modestly call a

'Single' has more beef than the Big Mac or Whopper... Wendy's kind of people never ask, "Where's the beef?"

A DFS spokesman said T-shirts, buttons, underwear and other articles have appeared all over the country with the line and with likenesses of the three women who appear in the spot. (The "WTB" line is now a registered trademark.)

Bob Reed points out that Clara Peller, the over-80 former manicurist who voices the line, has become an instant celebrity. There are Clara Peller fan clubs all over the country and she has been invited to appear on dozens of TV talk shows.

Reed says that after the completion of the second four-week flight this week, the results will be discussed and evaluated and a decision made on how to proceed.

The TV commercial was produced by Sedelmaier Productions in Chicago. Cliff Freeman of DFS wrote the copy. The agency producer was Susan Scherl and the agency art director was Donna Weinheim. Did Dancer anticipate the phenomenon that would emerge from the beef commercial? According to Freeman, who wrote the copy, "Not at all; we all thought it was a good commercial, but no one could predict its wide acceptance."

'Where's the beef?'

The end of the Warner-Murdoch war

Warner buys back 5.5 million shares for \$172 million; both sides drop litigation

The seven-month entanglement between Warner Communications and The News Corp. Ltd., the international media conglomerate controlled by Rupert Murdoch, has come to an apparent end. Both companies announced on Saturday, March 17, that Warner reclaimed 5,570,000 shares of its stock (7.2% of the outstanding shares) previously held by The News Corp. for \$172 million. The buy-back and an agreement by TNC not to "acquire any voting securities, solicit proxies or seek to control or influence" Warner for 10 years put to rest questions of whether TNC would try to take control of the New York-based media and questions entertainment conglomerate, raised when the accumulation of Warner shares by TNC began in Early October, 1983.

The \$31 per share TNC got for its Warner stock is well above the \$23 to \$24 the stock is currently trading for. That differential has brought forth at least one shareholder suit. filed against Warner, which claims the company should offer all current shareholders the same deal offered TNC. Howard Squadron, partner in the New York law firm that has been long-time counsel to Murdoch and TNC, said another Warner shareholder's suit, filed in Delaware, also seeks court action against the buy-back. That suit report-edly suggests TNC, in its recent battles against Warner management, claimed to represent other Warner shareholders, a claim violated by concluding a separate deal with Warner management, headed by Stephen J. Ross.

The Saturday announcement also said that all litigation between Warner and TNC had ceased and that the latter would receive an additional \$8 million to cover expenses, mostly legal, it had incurred. To help pay the \$172 million, Warner once again linked up with a company a fraction of its size, New York-based Chris-Craft Corp. The television group owner, headed by Herbert J. Siegel. chairman and president, first appeared in the Warner-TNC spotlight when Warner and Chris-Craft announced an exchange of stock-15% of Warner stock for a 3% share in Chris-Craft's majority ownership of six TV stations (BROADCASTING, Jan. 9). That stock swap created a serious problem for any attempt TNC might have made to acquire control of Warner, for the latter, now a principal owner of broadcast properties, could not be controlled by a foreigner, such as the Australian Murdoch, without violating FCC rules.

TNC's subsequent attempts to prevent the stock swap proved unsuccessful first as a Delaware judge refused to issue a temporary injunction barring the exchange (BROAD-CASTING, Jan. 16), then when, earlier this month, the FCC said the swap violated no rules as long as Warner's 50%-owned subsidiary, MSO Warner-Amex, disposed of any cable systems located within the signal contours of the Chris-Craft stations (BRUAD-CASTING, March 12).

Murdoch said in the most recent announcement that TNC decided to sell its Warner holdings back to the issuing company because: "We saw no expeditious resolution to the conflict," which included other lawsuits.

To finance the \$172-million buy-back,

CapCities repurchase. Capital Cities Communications, New York-based station group owner, publisher and MSO, will purchase up to 500,000 shares of its own common stock from time to time at prevailing market prices. Stock will be retained as treasury stock and will be used for employe stock option plan and other corporate purposes. Capital Cities recently concluded acquisition of another 280,000 shares of its own stock, authorized last December. Company at present has 12,840,000 shares outstanding.

FCC conditions. Citing deficient equal employment opportunity programs, FCC has imposed reporting conditions on renewals of KDHL-AM-FM Faribault, Minn.; KAVU-TV Victoria, Tex.; KLBK-TV Lubbock, Tex.; WKYV-FM Vicksburg, Miss., and WLVS(FM) Germantown, Te; in. It also is requiring Centennial Wireless Inc.'s KADE(AM) and KBCO-FM Boulder, Colo., to submit EEO goals and timetables.

Gross move. Gross Telecasting, Lansing, Mich.-based group owner, has postponed scheduled shareholders meeting from April 24 to May 15. Gross recently sold, subject to FCC approval, wJIM-TV Lansing and wKBT(TV) La Crosse, Wis., to group headed by former CBS president, John D. Backe, for \$48 million ("In Brief," Jan. 30). Delay is in part to allow preparation of proxy materials on sale. Gross chairman and founder, Harold F. Gross, said board of directors would consider what to do with remainder of company assets which include wJIM-AM-FM Lansing, "considerable real property" and other investments, following approval of TV's sale by FCC. Possibilities for company's next step are open, according to chairman, and include purchase of additional broadcast properties or, on the other hand, sale of Lansing AM-FM and liquidation of company.

Paper cut. American Broadcasting Companies Inc. and McGraw-Hill Inc. reached agreement to sell jointly owned Falls Paper Mill Inc. in all-cash transaction to Kopparbergs Bergslags AB. ABC acquired 50% interest in paper mill when it bought Chilton Co. In 1981. Buyer is Falun, Sweden-based forest products company which manufactures various wood, pulp and paper products.

Malrite up. Malrite Communications Group Inc., publicly traded, Cleveland-based group owner of four TV's, six AM's and seven FM's, reported revenue of \$46,900,000 for year ending Dec. 31, 1983, 35% increase over 1982. Net income for company, which completed initial stock offering Jan. 20, increased 16% to \$5,100,000, or 73 cents per share.

K-R preview. Knight-Ridder Newspapers Inc. expects first-quarter earnings to be up more than 30%, according to chairman and chief executive officer, Alvah H. Chapman Jr., who spoke to meeting of security analysts in New York. President of Miami-based publisher, MSO and group owner of five TV's, James K. Batten, said at same meeting that "jury is still out" on results of Viewtron, company's videotex system that began operating in south Florida last October. Batten reiterated earlier company statements that plans to introduce service in 17 other major cities would not be implemented until Florida system showed "significantly positive" results.

Cable numbers. Comcast Corp., cable MSO, recorded year-end revenue of \$84,437,000, increase of 34% over 1982. Net income increased 38% t \$9,025,000 or \$1.16 per share.

S-A results. Scientific-Atlanta reported revenue of \$95,110,000, for fiscal year's second quarter which ended Dec. 31, 1983, 30% increase over last fiscal year's second quarter. Net income for period increased from \$186,000 to \$2,503,000. Earnings per share was 15 cents.

Warner will borrow \$100 million, raising the remainder through a special stock issue. Chris-Craft, which has acquired Warner stock beyond its initial 15%, is expected to purchase most of the special issue, raising Chris-Craft's holdings to between 25% and 29%, depending on how much of the new issue is bought by other Warner shareholders. Chris-Craft has filed papers with the FCC, saying it does not intend to acquire a majority of Warner, and Geoffrey Holmes, a Warner vice president, said that representation of Chris-Craft on the Warner board was not "part of the deal." Chris-Craft executive vice president, Lawrence R. Barnett, when asked whether the company would seek membership replied, "not yet."

The end result of the recent events is that an outside party will own a controlling interest in Warner though one the company regards as "friendlier" than TNC.

The \$100 million Warner will have to borrow will not put its credit rating in jeopardy, according to Noreen Williams, assistant vice president of industrial ratings at Standard & Poor's, which has three times within the past year downgraded that rating, the last time in October. She said the company's debt peaked in September, but added that "for every step forward there has been a step backward here or there."

For its part, The News Corp. has made a \$40-million or 31% gain on its \$130-million investment, ostensibly subject to short-term capital gains tax, since the money has already changed hands. Some suggest, however, that all along, TNC was after Warner's programing riches-its movie studio film library, its television production division and its cable programing interests, particularly its interest in the Showtime/Movie Channel partnership (Murdoch made an unsuccessful bid to buy Showtime last August). Whether TNC's need for that programing source was pressing during its December-through-February battles with Warner and Chris-Craft is unclear, considering that the year-and-a-half delay of TNC's proposed DBS service, Skyband Inc., was decided before those battles began (BROADCASTING, Nov. 14, 1983).

Speculation that TNC will continue to hunt for programing sources helped cause fluctuations in the stock prices of at least two studios last week, MGM/UA and Disney, leading one executive at a Holywood studio to remark: "With the investment bankers of of the world concocting grand schemes and making proposals to Murdoch, who knows what will happen."

Westwood One goes public; buys audio channels on Satcom

Westwood One, the radio program producer/ syndicator based in Culver City, Calif., filed a prospectus with the Securities and Exchange Commission for a million-share stock offering on Friday, March 16. If approved, the first public offering by the privately held company is expected in mid-April through Hambrick & Quist of San Francisco, Westwood One President Norinan Pattiz told BROADCASTING. "I can't

On the dotted line. Present at the signing of the Westwood One-RCA satellite pact were (l-r) Harold W. Rice, RCA Americom vice president/audio services; Jerry Kaplan, RCA manager/ technical programs; Norman Pattiz, Westwood One president, and Arthur Levine, Westwood One executive vice president, chief financial officer.

really comment on why we're doing what we're doing," Pattiz said, noting legal restrictions imposed during the SEC's review. The prospectus says the company expects to raise \$13 million to \$15 million, based on a share price of between \$13 and \$15. Pattiz estimated the firm's billings at more than \$10 million in 1983. The company produces 28 barter programs and employs about 100 people.

In another development, Westwood announced it has signed a \$6.7-million multiyear lease with RCA for four digital audio channels on Satcom I-R, the satellite used by ABC, CBS, RKO and NBC for radio network program distribution. RCA will begin providing uplink services to Westwood from New York prior to the opening of a new Los Angeles uplink scheduled for July. According to Pattiz, the arrangement will make Westwood programs available to an estimated 2,600 downlink-equipped radio stations and allow for the firm to sell its excess transponder capacity to other independent producers.

"We've started doing a lot of [radio] simulcasts with HBO and MTV and Showtime," Pattiz pointed out. "We're doing a lot more live shows than we have in the past. With more stations able to receive Satcom I-R and the possibility of our converting some of our disk programs to satellite distribution, the economies of this [arrangement] are something we had to look at. Even though it doesn't affect a major part of the programs that we're currently distributing, we will now have access to the one satellite that everybody in radio seems to be looking at."

He said that Westwood had been unable to get a commitment from any other Satcom I-R users for purchase of their excess channel capacity. "It was time to assure our access," he said. Pattiz said he expects the new Los Angeles uplink to be used heavily this summer for distribution of Spanish-language radio coverage of the Olympics, which is being originated by Westwood One.

Union, ABC, CBS near settlement

Networks and Writers Guild closer to agreement, except for CBS group in Los Angeles

Writers Guild of America negotiations for a new three-year contract with ABC and CBS (BROADCASTING, March 19) have moved to the stage of ratification by the membership, except for the CBS unit in Los Angeles.

That unit, consisting of about 80 members employed in national promotional posts or news writing jobs at the network's KNX(AM) Los Angeles and KNXT(TV) Los Angeles, refused to accept the proposals submitted to ABC union members throughout the country and CBS members in the East. WGA, acting on behalf of its Los Angeles members at CBS, filed for decertification with the National Labor Relations Board, which would sever these members from the union.

A spokesman for WGA in Los Angeles said the unit wanted to break away from the union and negotiate for itself. He estimated the decertification process would take two to three months.

An issue in contention at CBS (but not at ABC) was CBS's insistence on provisions that would give it the right to hire temporary employes for an indefinite period; would enable the company to employ nonmembers of WGA for graphic arts work and would enable it to assign local correspondents and anchors to write for one another. West Coast CBS members of WGA were reported to be ready to strike rather than relent on these issues.

A guild source indicated that Los Angeles members are expected to continue to work under the old contract which expired on March 2 pending a determination by the National Labor Relations Board on the decertification petition.

Media General sues Tanner for \$230 million

In midst of grand jury investigation of barter company, company owner accuses Tanner executives of fraud

Media General, the Richmond, Va.-based communications conglomerate, has filed suits against William B. Tanner, former chief of a barter company bearing his name—and two of his associates—seeking more than \$230 million in damages.

In a complaint filed in U.S. District Court for the Western District of Tennessee, Media General-which bought the William B. Tanner Co. (now called Media General Broadcast Services Inc.) in 1982 for more than \$40 million-alleged that Tanner, former company president; Earl J. Funk, former senior vice president and treasurer, and Louis R. Lucas, former vice president and general counsel, had made a variety of fraudulent claims to persuade Media General to buy the company. Media General further alleged that the threesome, whom it had kept on the payroll after the purchase, continued to engage in "fraudulent and unlawful acts" after the purchase. As a result of that behavior, Media General had been "injured in its business and property," it said.

In a separate complaint filed in Chancery Court for Shelby County, Tenn., Media General charged that Tanner also had violated a 10-year employment contract (under which Media General had agreed to keep Tanner on as company president at \$400,000 a year, plus a variety of benefits), alleging fraud and the misappropriation of company funds.

FBI agents raided the Tanner Co.'s Memphis headquarters last August, amid allegations that the company had been handing out kickbacks to clients and that Tanner had been engaging in a variety of scams to divert millions in company funds from official books and into his own pockets (BROADCASTING, Aug. 22, 1983). A grand jury has been investigating the charges since January.

Media General launched its own investigation shortly after the FBI raid. Tanner, Funk and Lucas all were granted leaves of absence from the company shortly thereafter. Media General subsequently changed the name of the company and installed a new management team (BROADCASTING, Dec. 12, 1984).

Tanner said Media General's charges against him were "totally untrue, slanderous and, in short, outright lies." Lucas said he thought it would be "inappropriate" to comment at this time. "I'm a lawyer, and I don't comment on a matter that's pending in court," Lucas said. Funk could not be reached for comment.

In the first complaint, Media General al-

leged that Tanner, Funk and Lucas had underreported the company's liabilities and exaggerated its assets. Among other things, Media General said, books of account for the company did not "fully and fairly" reflect the transactions of the company, since many transactions shown as legitimate commissions on sales were in fact bribes and kickbacks. Also contrary to representation, the company, at the time of purchase, was the subject of a federal investigation, Media General said.

According to the complaint, Tanner, Funk and Lucas continued to engage in fraudulent and unlawful acts after the purchase. Media General charged that the three, for instance, had converted company assets for personal benefit and continued the bribery and kickback schemes.

After the FBI search, Media General alleged that Tanner destroyed documents and asked company employes to destroy others; had two secretaries "fabricate" back-dated documents purporting to be relevant to the FBI search; had other documents removed from company warehouses and had some files destroyed, all "for the purposes of secreting and/or destroying documents encompassed within the scope of the search warrant and/or which subsequently would come within the breadth of the government's in-

Tanner

vestigation."

Media General also alleged that Tanner had violated the law in using "electronic devices in the phones throughout the company which enabled Tanner to intercept surreptitiously any phone conversation within the company and any conversation in a room in which a company intercom was located."

In the second complaint, Media General said it "terminated" Tanner's employment contract last Monday (March 19). It alleged that Tanner, among other things, "deliberately falsified and encouraged and allowed to be falsified, records and reports of the company so that Tanner and other employes could receive reimbursements for expenses which were not incurred."

It further alleged Tanner had diverted

company funds to pay bribes and kickbacks to various parties; disguised or caused others to disguise those payments as legitimate business expenses; misappropriated company funds to purchase slot machines for his personal use and profit; misappropriated company funds to purchase a limited partnership interest in property; misappropriated company funds to cover his personal expenses in the sale of the stock of the company to Media General, and had two of his children paid as company employes "although they essentially performed no duties for the company."

James Linen, Media General Broadcast Services president, said the litigation should have no impact on the company's current business relationships with broadcasters and vendors.

Schools argue case against NCAA

Oklahoma and Georgia tell Supreme Court that they should be able to negotiate individual television contracts

The Universities of Oklahoma and Georgia, two of the country's powerhouse football schools, have made what could be the final assault on the rules of the National Collegiate Athletic Association that control the television rights to member colleges' football games. A U.S. District Court and a U.S. Court of Appeals have both held that the rules violate the Sherman Antitrust Act, and last week counsel for the schools urged the Supreme Court to affirm those opinions. Interest in colleges would increase locally, as schools negotiate I their own television contracts and built up local followings, and the institutions would earn more money, said Andy Coats, who is also the mayor of Oklahoma City.

The NCAA's last-ditch defense of the "cooperative" arrangement under which NCAA has negotiated contracts with CBS, ABC and Turner Broadcasting System for \$281 million was conducted by attorney Frank Easterbrook. His principal argument was that NCAA lacks "market power," the test for an antitrust law violation he says should be applied, since it cannot control prices by limiting the number of games telecast."Market power is the ability to raise prices," he said."There is no way the NCAA can charge monopoly prices by reducing the number of games on television. The only people who pay money are the advertisers, and they pay only for the viewers delivered.'

Coats, however, said the contracts reflecting NCAA rules are a "classic violation of the Sherman Act." The lower courts, he noted, found that the effect of the NCAA contracts is "to fix prices of all games—to limit the availability of product in order to drive up prices. The lower courts found that without the limitation on product, there would be many more games, local and regional." Coats also expressed the belief that colleges negotiating their own contracts would receive more revenue than at present. And those extra revenues, he said, would be used to support other sports.

And the U.S. Solicitor General, Rex Lee, who entered the case on the side of Oklahoma and Georgia, supported the lower courts' finding that the NCAA contracts had the effect of driving up the prices for the games. But he indicated some Justice Department disagreement with the manner in which the lower courts decided the case. He said they "should have stopped" at declaring the contracts were illegal under the rule of reason; they should not have gone on to hold that it was a *per se* violation of the antitrust law also.

At stake in the trial are the four year contracts, extending through 1985, that the NCAA has signed with ABC and CBS, at \$131.8 million each. Under the contracts, each network allows 82 different teams to appear over a two-year period, with no school appearing more than six times. And each televises at least 35 NCAA games nationally or regionally. Colleges included in the NCAA package are barred from negotiating additional appearances on televisiona restriction that is galling to colleges like Oklahoma and Georgia that could command substantial sums for rights to their television games. Turner's two-year contract, under which it paid \$18 million, ran out last season

NCAA contracts generate revenues that are apportioned among all members, the weak and the strong. Easterbrook said the contracts earn the fees they do not because they restrict the number of games aired on television but because they offer "the most attractive" contests. He compared the NCAA agreements with the networks with the agreements networks reach with producers of entertainment programs. He said the right given to CBS to air *Dallas* makes the program more attractive to viewers and to advertisers.

But Coats said colleges should be as free to market television rights to their football games as they are to sell rights to their basketball games. The NCAA governs the televising only of post-season basketball play. "Look at other sports," he said. "Professional football regionalizes. You can't buy a ticket. That's what would happen here." He said the attention television would focus on local schools would make the schools attractive to local high school football players. "They would want to be on television in their home towns."

However, one problem one justice appeared to see in connection with the argument to declare the NCAA rules illegal is the precedent that might be set. The NCAA has argued that "almost every successful professional sport [that] has pooled and sold TV rights as a pacakage to one or more networks" would be affected. And the first court decision in the case-by U.S. Judge Juan Burciaga in Albuquerque, N.M., in September 1982 (BROADCASTING, Sept. 30,1982)-raised in the minds of some observers a question as to the effect of that opinion on the legality of the NCAA awarding television rights to college basketball playoffs. And Justice Byron White told Coats he or some other lawyer might be before the Supreme Court in some future case defending some other pooling arrangement.

Trouble in space

Satellite trade show operator and satellite trade association sue each other over overlapping Las Vegas conventions

Two trade shows promoting satellite television earth stations and related products were held in Las Vegas last week, testimony not only to the vigor of the industry but to the inability of the organizations sponsoring the rival shows to agree on a method of joining forces. Nor was the conflict in dates the only manifestation of bad feeling: The rivals are suing each other in U.S. District Court in Washington.

Norval M. (Rick) Schneringer and Satellite Television Technology Inc., of Oklahoma City, which he heads, fired first—a \$41million suit, based principally on a libel charge. He filed it against the Society for Private and Commercial Earth Stations, currently based in Washington, and two of its officers, Peter J. Dalton, of KLM Electronics, president, and Richard L. (Rick) Brown, who resigned last week as vice president (when a general manager was hired) but who remains as general counsel. In return, SPACE and Brown countersued for a total of \$5 million, with SPACE charg-

Marti update. Radio Marti may not be launched for six months—even though the hope is that it will be able to start sooner, Charles Wick, director of the United States Information Agency, said at a hearing before the House Appropriations Subcommittee last week.

Wick also said the agency didn't know what to recommend if Cuba begins jamming U.S. AM radio stations when Radio Marti is launched. There are "discussions" going on in government about what the best response would be, Wick said. But his agency can only "do our best and as faithfully as possible" follow the letter of law authorizing Radio Marti, he said.

Wick added that the agency's Voice of America has leased office space and identified 43 candidates for the 48 staff positions it wants to fill before launching Radio Marti. After the hearing, a USIA spokesman said a major reason for any delay is security checks the agency runs on potential candidates. "I'm sure you can imagine that [Cuban President Fidel] Castro would just love to infiltrate this organization," he said.

Wick also revealed that the agency would soon make available a report on its blacklist of about 100 persons—including CBS's Walter Cronkite and ABC's David Brinkley—allegedly considered to be personna non grata as agency-sponsored speakers abroad (BROADCAST-ING, Feb. 20). The report, Wick said, would make the list seem "a lot less onerous than what seems to be implied."

According to Wick, some names were apparently put on the list because they were too busy to make speaking engagements, or had let it be known they they weren't interested in participating. "Some of those people may have been turned down because of political bias, but not too many," he said.

Wick also said he would not support a blacklist; that would be "unAmerican," he said. The USIA is seeking \$885.4 million for fiscal 1985, a \$213.2 million increase over the \$672.2 million budgeted for fiscal 1984. ing breach of contract and, with Brown, abuse of process.

The litigation grows out of efforts to end the rivalry between STTI and SPACE.

Last November, at a SPACE-sponsored trade show in Orlando, Fla., officials of the two organizations talked of a joint operation under which STTI, whose business is trade shows, would conduct the shows with the assistance of SPACE, a trade association that promotes both residential and commercial satellite earth station technology and products. The immediate concern was that both organizations had scheduled trade shows in Las Vegas in March—SPACE's, at the MGM Grand Hotel, on March 8-10, and STTI, at the Riviera Hotel, on March 20-22.

On those points, there is no disagreement. The litigation flows from a dispute over the reasons that the Orlando talks failed. SPACE, last December, distributed letters to members of the satellite earth station industry alleging that Schneringer had "reneged" on an agreement the two sides had reached in Orlando. Under the alleged agreement, STT1 and SPACE would hold four joint shows a year, the first in Las Vegas in March.

Schneringer, who is seeking compensatory and punitive damages, maintains in his suit that the charge of reneging was made "falsely and with reckless disregard of the truth." He also contends that the statements were "libelous *per se*" in that they injured him in his profession and "disparaged and degraded" STTI's "goodwill, prestige, assets and standing in the business community." Schneringer says he had simply "agreed to consider" a proposal made by SPACE and that he later decided the terms were "improper." He also says he made a counterproposal that SPACE rejected and that he turned down as "unacceptable" a subsequent offer made by SPACE. At that point, he says, talks ceased.

Besides the charges that Schneringer was defamed and that STTI was the victim of an "injurious falsehood," the suit alleges that the statements at issue and the conduct of the defendants were designed to interfere with STTI's present or prospective business relationships. SPACE rescheduled its trade show for March 18-20, at Caesars Palace, and Schneringer's suit contends that SPACE "deliberately" picked a date "overlapping" STTI's to make it "impractical" for registrants to attend both shows. Schneringer also alleged that the \$550 preregistration fee SPACE charged—\$100 less than STTI's was from \$200 to \$1,250 less than SPACE normally charges, and was designed "deliberately" to induce trade members to attend the SPACE show. (Schneringer, on the opening day of STTI's show, said it was "full up" with 290 booths, but that STTI would have sold 350. "We're losing quite a number.")

SPACE, in its response and countersuit, does not say why it chose the March 18-20 date. But it says it had canceled its contract with the MGM Grand Hotel on Nov. 18, after Dalton, "with Schneringer's prior consent," had announced on Nov. 4 the alleged agreement to hold a joint show. Among its affirmative defenses, SPACE maintains that "the allegedly libelous statements were true." It also says they were "expressions of opinion and therefore could not cause any legally cognizable injury" and were "fair comments on a matter of public concern."

SPACE, in its counterclaim, seeks \$1 million for breach of contract; it says, and Schneringer denies, that SPACE and STTI entered into a contract on Nov. 4, 1983. In the alternative, it is seeking \$500,000 for "unjust enrichment"—a reference to the charge that exhibitors and others made commitments to attend the STTI show because they understood it would be a joint STTI-SPACE production-or \$1 million in compensatory damages and \$2 million punitive for "fraudulent misrepresentation." SPACE and Brown also seek to recover \$1 million for abuse of process-they contend that STTI filed its complaint for the purpose of causing Brown to stop advising SPACE to hold trade shows, and to persuade SPACE to stop holding them-and \$1 million in punitive damages.

Brown's resignation as vice president, which was announced at a banquet at the SPACE trade show while he was in Washington, came as a surprise. He helped establish the organization in March 1980 and has been the dominant figure in the organization since then. However, he is expected to continue to exercise influence as general counsel. But the day-to-day operations of the organization will be taken over by Charles Hewitt, who has headed trade associations in the past and whose most recent position was as assistant to the president of Fairchild Industries.

Whatever the outcome of the suit and the countersuit, Schneringer has whatever satisfaction comes from having lifted the name of SPACE, at least in Washington and at least temporarily. District of Columbia officials ruled that SPACE gave up its right to the name when, through what a SPACE spokesman said was an "oversight," it failed to file annual reports with the District government for two consecutive years. Schneringer be**Aural power limitation erased.** Over the Mass Media Bureau's protest, the FCC has voted to permit television broadcasters to cut back their aural power to whatever level they desire. Under current rules, TV stations must operate with aural power of from 10% to 20% of their visual power they also are required to notify the FCC of the aural power they will use. At an FCC meeting, the Mass Media Bureau recommended that the limits be set at 8% to 22% of visual power, reflecting tolerances now permitted. The bureau argued that a station's fringe viewers—those primarily living in rural areas—could suffer if a station reduced its aural power below levels that could be heard at distances. The bureau pointed out that a station lowering its aural power—in the interests of economy, for example—would still be protected to the Grade B contour of its visual signal, thus precluding possible low-power operations that might otherwise serve the viewers deprived of a signal. The commission majority voted to retain the current upper aural power limit. But it decided to make the setting of the lower aural limit a marketplace decision. The general argument appeared to be that market incentives—that is, a broadcaster's desire to retain as many viewers as possible for ratings—would discourage undue lowering of power.

came aware of that in January and reserved the name for his own use.

SPACE lawyers contend the organization has a right to the name in common law, and have gone to court to make that argument. For the present, the organization will go by a new name in Washington—Satellite Television Industry Association. It remains SPACE elsewhere in the country. And it is expected, in any case, to move its headquarters soon from Washington to nearby northern Virginia.

Review board grants new AM despite drug allegations

It agrees with original decision of ALJ that charges by ex-employes were not enough to give station to competing applicants

In a split decision, the FCC Review Board has affirmed the grant of a new AM radio station at Dillon, Colo., to Dillon Broadcasting Co., denying the competing applications of Alan K. Levin and Summit Radio Inc.

One issue in the initial proceeding was whether Dillon's 100% stockholder, Robin Theobald, had been engaged in the illegal use of narcotics, and, if so, what effect that should have on Theobald's qualifications to be a commission licensee.

Three former employes had testified that they had seen Theobald, former general manager and 50% owner of KLGT(FM) Breckenridge, Colo., use cocaine at the station. Theobald denied the specific allegations, but acknowledged having used cocaine—on one occasion only—at home with friends and claimed he frequently inhaled nasal decon-

More relief. The FCC last week announced that it was sending out presunrise authorizations to the 184 daytimers operating on Canadian Class I-A clear channels. The notices, according to the FCC, spell out the powers the daytimers can use and how long they will be able to operate before sunrise. Stations need only tell the FCC of their plans to operate presunrise and state how they will accomplish any power reduction necessary. Stations may start presunrise operations as soon as the necessary letters are returned to the commission. Stations may decline to operate presunrise, or with lower power than that authorized, if desired, the FCC said.

gestants at the station.

In his initial decision, Administrative Law Judge Joseph Chachkin sided with Theobald on the cocaine issue, noting that the witnesses against him were disgruntled former employes. He also noted that the "bullet-like" device allegedly used by Theobald to inhale cocaine could have been a medicinal inhaler. Chachkin also said that Theobald's local residence, past broadcast experience, involvement in local civic activities-and a more efficient proposal for use of the frequency-tipped the scales in his favor. Levin appealed, urging that Dillon be disqualified or at least assessed a dispositive comparative demerit for Theobald's alleged misconduct.

The Review Board majority agreed that the alleged drug use should not have been a factor. The board majority, for starters, noted that the charges against Theobald had not been resolved in a court of "competent jurisdiction." Moreover, it added, even if a court had found Theobald guilty—or if the board itself credited the charges—that still would not automatically destroy Theobald's qualifications to be a commission licensee. "Commission policy would still require us to predict or forecast from the past violations whether the applicant can be relied to comply with FCC regulatory laws and policies in its broadcast operations," the board said. "Under these circumstances, the few alleged violations of drug laws, even if true, have no predictive value as to prospective compliance with the commission's rules and policies because they are overbalanced by a [Theobald's] four-year history of broadcast operations without any demonstrated violations of the Communications Act, commission's rules or policies.

Ł

In a dissenting statement, board member Norman Blumenthal accused the majority of taking a "powder" and attempting to bring the bottom line of its decision into accord with what it is speculating the FCC will say in its pending proceeding aimed at narrowing its oversight of character issues. "The majority's abjuration in advance of the consummation of the character inquiry smacks too much of trying to 'get with the program,' even before the curtain is raised," Blumenthal said.

"If the violation of any laws should be of concern to the commission in passing upon licensee qualifications, it is especially those relating to psychoactive drugs," he said. "If Congress intended any purpose in the selective licensing of the spectrum it was to assure that television and radio stations did not fall into the hands of just such persons as drug offenders. In an era of deregulation when federal oversight is decreasing and reliance on licensees is increasing, our initial scrutiny should be heightened for exactly these reasons."

Earth station bills introduced in Congress

Senate version would allow home earth station owners to pick up scrambled signals, House version both scrambled and unscrambled; copyright fees to be established for program compensation

Legislation was introduced in the House and Senate (H.R. 5176 and S. 2437) last week to permit individuals to pick up television signals off satellites. The bills are a boost for the earth station industry, which has been in a quandary because the legality of taking signals from satellites is unclear under present laws.

The Senate legislation would permit home viewers to pick up unscrambled signals, but the House bill goes one step further and allows viewers to pick up scrambled signals as well. Unlike the Senate measure, the House bill calls for the establishment of a copyright fee system to be administered by the FCC.

Senator Barry Goldwater (R-Ariz.), who offered the Senate bill, said it only reaffirms present law and preserves the right of dish antenna owners to pick up and view programs transmitted by satellite for noncommercial purposes.

Goldwater said: "The Communications Act of 1934 is silent on the question of noncommercial home reception of unscrambled satellite programing. Some argument has recently been raised, however, to challenge the right of the individual earth station owners to view these programs on the ground that section 605 of the Communications Act may prohibit the reception and use of satellite broadcasts. I reject this argument as being entirely wrong."

Goldwater's bill, unlike the legislation in

the House, does not address the pickup of scrambled signals and it prohibits the sale of so-called "black boxes" used to unscramble signals. The senator also noted that there is a "reasonable case" to be made for the establishment of a copyright fee structure. However, he felt it was an issue that could be examined later. No hearings have been scheduled and it is uncertain if he will actively.pursue the legislation.

In the House, Representatives Albert Gore (D-Tenn.), Billy Tauzin (D-La.) and Charles Rose (D-N.C.) introduced H.R. 5176. Tauzin and Rose, in a live telecast to members of the Society for Private and Commercial Earth Stations (SPACE) during its annual trade show in Las Vegas last week, announced their plans to introduced the legislation.

Goldwater made a similar telecast, and a statement from Gore was carried on videotape during the show. Although the House bill permits reception of both scrambled and unscrambled signals, viewers receiving scrambled signals would either have to compensate copyright holders or turn to the FCC to set the rates.

It is a proposal that has stirred up opposition from major copyright holders. "Direct broadcast satellite programing is now available to those willing to pay a fair price," said Jack Valenti, president of the Motion Picture Association of America. "These bills, well intentioned as I am sure they are, will only serve the interests of those who wish to obtain satellite programing for free or at a low government-set rate. They will also retard, perhaps fatally, the DBS entrepreneurs now trying to enter the marketplace."

According to H.R.5176, "no person shall manufacture, import, distribute, sell or lease equipment intended for the unauthorized reception and decoding of encrypted satellite television programing by persons not complying with rates, terms and conditions established by agreement or by the commission."

If viewers were unable to reach agreement with the programers, they could file a petition with the FCC to set the "rates, terms and conditions for such viewing rights." The commission would be required to consider a number of factors when setting the rates, including the cost of the programing and its distribution, and the cost of the equipment for reception.

Otherwise agreements would be worked

Sideband "splitting" OK'd The FCC has proposed to permit broadcasters to use narrowband techniques for remote pickup operations. Under one option, the FCC proposed to permit the "splitting" of remote pickup channels to create more. Under another option, it proposed to permit use of amplitude compandered sideband (ACSB)-or any other technology-as long as adjacent channel interference is avoided. In a speech before representatives of state broadcasting associations gathered in Washington, James McKinney, FCC Mass Media Bureau chief, said the major reason the commission was proposing to permit the use of amplitude compandered sideband technology is to increase spectrum efficiency. "Present technology permits at least five ACSB channels to be placed into the spectrum occupied by one FM channel," McKinney said. "This efficiency will obviously relieve much of the overcrowding now experienced, such that its introduction into the service should not be delayed any further. Emphasis must be placed, however, on the fact that the notice is not only to allow the use of ACSB, but is deregulating the service to allow any modulation techniques consistent with the requirements of controlling adjacent channel interference. This action should create the proper incentive to industry to develop even more efficient techniques and technologies," McKinney said.

out between viewers and the programers. The agreements would be filed with the commission and placed on public notice. Any objections to certification of the agreement could then be filed and left to the FCC to determine the outcome. The bill would also permit parties who feel there has been a breach of the agreement to seek relief in a U.S. District Court. Fines of up to \$25,000 for the first offense and \$50,000 for any subsequent offense are included in the legislation.

"To make satellite services a regulated utility is ridiculous," said one source familiar with the controversy surrounding the legislation. "I see the bills as killing off the emerging DBS industry," he said. \Box

FCC closes in on docket 83-114

Powers says commission is likely to take another look at proceeding to clean house on technical rules

The FCC is expected to take a fresh stab at its wide-ranging proceeding (Docket 83-114) to weed out the technical rules. So said Robert Powers, FCC chief scientist, at an Energy, Telecommunications and Electrical Association conference in Houston.

And Powers made clear that few of those rules are sacrosanct. Powers noted that FCC technical regulations are intended to increase the use of spectrum. But those same regulations can stultify, he said. "We are now questioning whether many of our standards go too far toward stifling innovation rather than fostering it," he said.

One thrust of Docket 83-114 is to remove barriers to the entry of new technologies, Powers said. "If the commission had relaxed or eliminated some of its technical standards 10 years ago, consumers would long since have been enjoying the benefits of teletext, captioning, stereo sound for TV and AM stereo," he said.

Powers said he thought regulating the technical quality of transmissions, and interoperability can be unnecessary where competition is exists. "Competitive pressures among providers of entertainment programing over cable, multipoint distribution systems, and soon those using direct broadcast satellites, seem to me to provide sufficient incentives to maintain high standards of quality," he said. "The exquisitely detailed NTSC standard, designed to insure both quality and interoperability for TV broadcasting, is probably no longer a necessary part of the FCC's rules," he said.

"With 180 million TV receivers in operation there is little concern that broadcasters will employ an incompatible technique, requiring consumers to replace their TV's overnight."

Without the NTSC standard, he added, many improvements could be made without "exhaustive" rulemakings. "While some resist the deletion of transmission quality and interoperability standards, I believe that the American public deserves the earliest opportunity to make choices," he said.

The televised future of USIA

Agency unveils compressed digital video technique for two-way transmissions over Worldnet which is able to beam signals to Eastern Europe

For the U.S. Information Agency, television is the wave of the future. And not only does the agency believe it is—"on the leading edge of satellite technology"—as Al Snyder, director of its television and film service, put it last week, it wants to put that word out.

Last Monday (March 19), USIA, in cooperation with the Communications Satellite Corp., launched, with some ceremony, a project of programing beamed to London using a new compressed digital video technique. The project included two-way video that demonstrates the feasibility of world leaders conferring by satellite television. On Tuesday, Snyder addressed a Newsmaker breakfast at the National Press Club to publicize USIA's growing activity in television, particularly its developing Worldnet, the global network launched in November. And later that morning, Snyder and Charles Z. Wick, USIA director, carried the same message to Capitol Hill at a House Appropriations Committee hearing on the agency's proposed budget for fiscal 1985. The administration is seeking \$22.7 million for Worldnet in the coming fiscal year, some \$17 million more than is being spent on the enterprise in the current fiscal year.

Much of the information regarding Worldnet—which is designed to link Washington with U.S. embassies in 40 countries by the end of 1985—has already been presented (BROADCASTING, Feb. 6). It will enable the foreign press, as well as officials of foreign countries, to question American officials in Washington and around the world. It will also permit USIA to broadcast background information and reports of fast-breaking news to the embassies abroad and to television stations prepared to receive the signal directly.

But one new element revealed by Snyder is that the satellite system already in place is capable of beaming television signals into Eastern Europe, including the Soviet Union. Until last week, USIA referred only to Western Europe, Latin America, Africa, the Pacific region and the Mediterranean area as the parts of the globe to be covered by Worldnet. But Snyder said, "The technology [for transmitting television to Eastern Europe] is there for those who know how to harness it. The intention is to broadcast television into the Soviet Union, but there is no timetable."

Later, in response to questions, Snyder issued a statement stressing that he was not referring to direct-to-home television. He said the satellite that would be used is the European Communications Satellite ECS 1, whose signal reaches Eastern Europe, but he said USIA is considering its use only as part of the Worldnet system of "closed circuit broadcasting" to U.S. embassies and USIS posts abroad. Technically, those signals are available to anyone with the necessary receiving antennas. In any event, Snyder said the broadcasting "is done in accordance with local law and international conventions, and with the cooperation of local telecommunications authorities."

Snyder clearly was enthusiastic about the develoments in the television service. He noted that former Secretary of State Henry Kissinger appeared on a Worldnet program beamed to Latin America following the release of the report by the commission on that part of the world that he headed. "Kissinger reached 100 million viewers," Snyder said, adding, "We're ahead of the BBC; its world

Snyder

TV program is a year away. We're on the leading edge of satellite technology, ahead of everyone in satellite television."

Among the plans for improving Worldnet is the location of satellite earth stations at the embassies. Snyder said USIA is discussing that matter with the foreign governments. At present, the signals are transmitted to earth stations in Europe, then by cable and microwave to the embassies.

The Comsat/USIA demonstration of transmitting programing by compressed digital/video techniques ran for two hours daily for five days last week, at USIA's television and film service headquarters in Washington. Wick, Dr. Joseph Charyk, chairman of the board of Comsat, and Sir Oliver Wright, British ambassador to the U.S., attended the start of the demonstration and talked by two-way video with Charles Price, U.S. ambassador to the Court of St. James's, and Anthony Booth, managing director of British Telecom International, who were in a studio in London.

The system, which employed a small (2.4 meter) mobile earth station supplied by Comsat, did not transmit a perfect signal. Static impaired the sound, and the picture broke down on occasion. But the demonstration indicated the potential for transmitting

cultural and public affairs programing overseas."This offer from Comsat gives us an opportunity to explore a mixture of live programing options which could offer new depth and variety to our overseas communication effort," said Wick.

The advantage of the compressed digital video system is that it permits the transmission of far more television signals by satellite than the present system. A Comsat spokesperson said the system in use in the USIA test consists of a 1.544 megabit per second compressed signal, and that 1,000 of them could be transmitted on the radio bandwidth now required for 54 analog video signals, the most that can be accommodated by the 27-transponder Intelsat V satellites. The price paid for the compression is that the pictures treansmitted are not broadcast quality. However, USIA says the system will enable it to offer a variety of educational and cultural programs abroad at rates less than those available using the Worldnet technology

Hardware isn't all that is on the minds of USIA officials when they talk of television. Snyder, at the Newsmaker breakfast, talked of software, too. "We're developing programing for the international market," he said. He noted that USIA has opened a sales office in London, and has included funds in the 1985 budget for an office in Hong Kong. It was also "an active participant in the past year in the television marketplaces" in Cannes and Milan."We're looking for the opportunity to reach mass audiences in television."

Snyder said USIA goes into production with foreign networks, such as Japan's NHK, as partners. The reason, he said, is to avoid putting "the U.S. government stamp' on the television programing. There is also a close relationship with the private sector. Some Fortune 500 companies produce films on science which are translated into a video piece and incorporated in USIA's monthly Science World. (A USIA spokesperson said later it will take a piece from a private company only if it is news. "We won't use a marketing piece," she said.) Some of the material USIA distributes is hard news-the satellite file is presented weekly. And Snyder hopes to expand USIA's television news operations. The proposed budget would provide for news bureaus in Washington, New York and Los Angeles.

But if USIA is keen on television, it is because the world is, he indicated, increasingly keen on television—and not only in that part of the world considered developed. He noted that there was a nine-fold increase—from 1.1 million in 1975 to 10.2 million in 1982—in the number of television sets sold in Africa. And throughout South and East Asia, the number of sets has increased over the same time span from 57 million to 115.4 million. All of which makes for a tempting market for an information service.

Arbitrends arbitration

The Arbitron Radio Advisory Council's first 1984 meeting with Arbitron officials convenes tomorrow (March 27) at the Hyatt Regency hotel in Chicago where the first demonstration of the company's controversial Arbitrends system will take place. Arbitrends is a new computer-delivered service offering regular quarterly reports and monthly ratings—the latter based on threemonth rolling averages of six basic dayparts and four demographics (persons, 12-plus; men, 18-plus; women, 18-plus, and teenagers) updated every 28 days—which Arbitron will initially launch in 23 measured markets this May.

The system came under sharp attack by council members during the last advisory council meeting in December resulting in a resolution calling for its cancellation because the monthly portion of the service was alleged to have "the potential of causing severe market confusion" ("Riding Gain," Dec. 19, 1983). Council members are concerned that any fluctuations in ratings on a month-to-month basis will cause havoc for local stations trying to set ad rates for advertisers and agency buyers. Nevertheless, Arbitron has stuck to its plan of providing computerized monthly data, and, according to Bill Livek, Arbitron's vice president of sales and marketing for radio, the company has received approximately 30 commitments for Arbitrends from stations in the 23 markets (markets that have been measured either three or four times per year).

Other topics on the council's agenda include a discussion of the reporting of station

February rebound

After a sluggish start (down 11% in January), network radio business has bounced back, with a 5.4% gain in advertising revenues during February to \$17,869,000. The data is based on financial information collected confidentially from ABC, CBS, NBC, RKO, Mutual and Sheridan by the accounting firm of Ernst & Whinney.

call letter changes during survey periods.

Hardtimes

The suburban Los Angeles radio market recently lost two stations, with a third's fate hanging in the balance pending results of a last-ditch effort to raise operating capital.

On March 7, country format K2NS(FM) and co-owned top 40 KPRD(AM) Barstow, Calif., signed off the air after more than 30 years of broadcasting. Owners Milton Klein and Shayle Ray blamed low ratings and declining advertising revenues for the permanent shut-down. The pair, who acquired the stations in 1983, said they had been unable to find a buyer for the stations and were unable to pay employes beyond Jan. 31.

A third station owned by Klein/Ray Broadcasting, KPRO(AM) Riverside, Calif., received a 30-day reprieve just 11 minutes before its scheduled permanent sign-off at 6 p.m. on March 16. An unidentified investor contacted the station offering to meet KPRO's payroll until mid-April while the station owners negotiate for possible sources of new operating capital.

Big Apple bunch. The New York Market Radio Broadcasters Association (NYMRAD) held its ninth annual Big Apple Radio Awards hosted by ABC's wPLJ(FM) New York at the city's Sheraton Center hotel. The event, which judges the best nationally and locally produced commercial spots and public service announcements that aired on New York radio stations between Sept. 1, 1982 and Nov. 1, 1983, attracted more than 700 radio and advertising industry executives. Among the ceremony's participants and winners were (I-r): Betsy Hucker of Lord, Geller, Federico, Einstein; Howard Stein of Backer & Spielvogel; Nancy C. Widmann, vice president and general manager of wcBS-FM New York and NYMRAD chairman; actor Gordon Jump (*WKRP in Cincinnati*) master of ceremonies; Joe Parish, vice president and general manager, wPLJ New York and event chairman; Anna Knipe of Dancer Fitzgerald Sample Inc.; Henrietta Creech of NW Ayer; Fred Siegel and Bruce Dundare of Stater, Hanft, Martin (list of winners at right).

Not laughing

Wang Laboratories Inc., the Lowell, Mass.based computer products manufacturer, has brought a \$10-million suit against Metromedia Inc. and its owned WASH-FM Washington, alleging that the station used, without authorization, the Wang trade name "together with strong sexual connotations" in on-air recordings purported to be advertisements for the computer company on March 16. The broadcasters are said to have been recorded by the top 40 rocker in a humorous fashion and, according to Wang staff attorney William A. Roberts's sworn affidavit, several station employes acknowledged to him that the advertisement was a "sham." A temporary injunction order restraining WASH-FM from airing the spots was granted by Judge Thomas Hogan of the U.S. District Court for the District of Columbia on March 17. A complaint was filed with the court on the same day by Wang attorney Robert F. Ruyak of the Washington law firm of Howrey & Simon, which alleged the conduct of WASH-FM has "resulted in injury to Wang's business reputation, loss of goodwill, and weakening, tarnishing and dilution of Wang's trademark and tradename."

Playback

ABC Rock Radio Network kicked off its first live *Supergroups* concert series with Duran Duran last Wednesday night (March 21) from New York's Madison Square Garden complex. The event, produced by DIR Broadcasting, was beamed via satellite to more than 100 stations. Upcoming live *Supergroups* concerts include Judas Priest from Long Beach, Calif., on May 5.

'Apple' achievers

Eleven top awards were presented by the New York Market Radio Broadcasters Association in its ninth annual Big Apple Radio competition.

The awards, in the form of a Steuben glass apple, are given to agencies or production companies for outstanding radio commercials. The winners:

New Sounds Inc.
Patrolmen's Benevolent Association (local open/talk). Rumrill-Hoyt Inc. D Martlet Importing Co. (national open/ talk). Ogilvy & Mather Partners D Steuben Glass (local musical). Backer & Spielvogel Miller Brewing (national musical). Lawrence Weiner & Associates D Twice Around the Park and New Sounds Inc. D Uniformed Firefighters Association (tied for local new advertisers). Slater, Hanft, Martin Inc. D Muzak (national new advertisers). Dancer Fitzgerald Sample D Breast Exam Center of Harlem (local public service). N W Ayer D National Council of Alcoholism (national public service). WGSM(AM) Huntingdon, N.Y. D ABM Computer Center (local station produced). Ogilvy & Mather Partners D Friendship Dairies (local humorous). Lord, Geller, Federico, Einstein D Callard & Bowser (national humorous)

How is this for a Bluff? Claim "victory" when:

• Network station score is:

Kahn/Hazeltine	= 6
Harris	= 1
Magnavox	= 0
Motorola	= 0

 150 Major Market Delco Dealers polled voted: 23 to 2 <u>against</u> Motorola single system radio.

(Obvious to any businessman that a single system radio cannot compete with radios that work with all systems.)

• Many Motorola stations might even make some of their listeners "sick to their stomachs" due to platform motion. Sony warned FCC, the public "will never accept or overlook" image motion.

Think we are bluffing? Call for cassette proof, . . . and a free air sick bag. Phone (516) 222-2221.

Want to win with the best <u>AM Stereo system</u> using advanced independent sideband technology (we will have shipped over 100 exciters when this reaches you) for less than \$300 a month? Kahn Communications, Inc., has just made an agreement with a huge Fortune 500 firm so we can now make this offer.

New York approves single-cable request

Board of Estimate ruling allows firms to build franchises with new 550 mhz wire; cable firms say move will allow them to keep construction costs within their original estimates

New York City's Board of Estimate has approved, at the request of the cable franchises there, an amendment to the franchise agreements allowing the cable operators to build single-cable residential systems instead of the previously required dual cable systems. Minimum channel capacity remains the same, however, for all of the systems—70 channels—which can be transmitted over a single wire using 550 mhz cable, currently being field tested by several manufacturers, including C-COR, Scientific-Atlanta and Jerrold.

The action was hailed by the companies building New York systems and city officials alike as one that will expedite construction while making the systems more efficient without a proportionate cutback in service. "This allows them to save on capital costs and, perhaps more importantly, to save on maintenance costs throughout the life of the franchises," said the city's head cable administrator, Morris Tarshis.

Tarshis said that cable suppliers have told the city that field tests of the 550 mhz cable should be complete soon and that mass production of it may begin by the end of this year. "It's very possible," he said, that 550 mhz cable will be available "almost from the onset of construction" in New York. And if the manufacturers encounter delays in producing the cable, Tarshis said, the operators could begin their builds on time (at this point they are scheduled to start in October) with 450 mhz cable, and upgrade when 550 becomes available.

C-COR, S-A and Jerrold all indicated that they will be prepared to deliver 550 mhz hardware to New York operators in the fall. "Some 550 mhz cable is being delivered today," said Donald Pisarcik, vice president, sales and marketing, C-COR. "The limiting factor has been the amplifiers." Pisarcik said

his company has developed a hybrid amplifier that uses the higher frequencies that the additional channels in a 550 mhz system would occupy without a proportionate increase in noise levels and other distortions. "We're ready to gear up production," he said.

The New York franchisees were gratified by the city's action. "It's a significant development," said Richard Aurelio, who heads Warner Cable's efforts in Brooklyn and Queens. He said the 550 mhz technology gives operators an affordable method of providing cities with the minimum channel capacity they demand in a cost-effective manner. "It probably signals the end of the two cable system," he said, which "no cable company in its right mind would want to build." Dual systems, he said, were seen as "a solution to an expectation to channel capacity. But the make-ready costs and maintenance costs are higher," and the majority of the channels on the second cables of most dual systems are going unused due to the lack of programing. WA is waging a battle in two other cities (Dallas and Milwaukee) to get permission to operate single- instead of dual-cable systems, among other proposed cutbacks (BROADCASTING Jan. 16 et seq.).

Cablevision's chairman, John Tatta, described New York's action as "a fantastic and courageous decision." He said the action was essential "to get cable built in the urban areas."

Cox Cable's James O. Robbins, who is running the company's New York operations, said that the city's action "puts us right back where we were [in terms of costs] when we made our initial estimates. The passage of time has chewed up costs."

The Board of Estimate did not act on several ownership items put before it, but expects to do so during an April meeting. One involves a proposal by the two franchisees in Staten Island to form a joint partnership to operate their two systems as one. The two franchisees are Cox and a Continental subsidiary, Vision Cable. Robbins said the two companies decided to join forces because it was felt that one system would be more "community responsive."

In Queens, Cox is also seeking to become a minority (49%) partner in franchisee Queens Inner Unity, a deal that Robbins said is contingent upon the ironing out of several points with Inner Unity as well as the successful funding of the systems by way of a limited partnership that Cox is currently making efforts to put together. Although he wouldn't be specific, Robbins said that things were moving forward on both of those fronts and that he was "optimistic" that the deal with Inner Unity would be completed. Cox has been the managing agent and proposed system builder for Inner Unity. With minority partnership, said Robbins, "we'll have a 49% say in the deal."

Changing Hands

PROPOSEO

WEEX(AM)-WQQQ(FM) Easton, Pa. - Sold by Easton Publishing Co. to Donald Wilks, Michael Schwartz and James T. Shea for \$3 million. Seller is headed by Pennsylvania attorney George P. Coffin Jr. and is liquidating assets before dissolving. It formerly published The Express (Easton, Pa.) and other newspapers. The Express was sold to Thompson Newspaper Inc. in January. Easton has no other broadcast interests. Buyers, Wilks and Schwartz (40% each) and Shea (20%), also recently sold, subject to FCC approval, WKRZ-AM-FM Wilkes-Barre, Pa., for \$5 million ("Changing Hands," Feb. 27). Wilks and Schwartz are Springfield, Mass.based group owners of three AM's and four FM's. They also recently bought, subject to FCC approval, WSNE-FM Taunton, Mass., for \$3.6 million ("Changing Hands," Jan. 30). They are also majority owners of recent seller of wKZE-AM-FM Orleans, Mass., for \$2.4 million ("Changing Hands," Sept. 5, 1983) and WPET(AM) Greensboro, N.C., for \$750,000 ("Changing Hands," Nov. 14, 1983) and also of recent buyer of WOSC(AM)-WKFM(FM) Fulton, N.Y. for \$1.5 million ("Changing Hands," Nov. 14, 1983). WEEX is on 1230 khz with 1 kw dayand 250 w night. WQQQ is on 99.9 mhz with 50 kw and antenna 450 feet above average terrain.

WLYK(FM) Milford, Ohio D Sold by Beautiful Island Broadcasting Co. Inc. to Cincinnati Broadcasting Corp. for \$850,000, comprising \$800,000 cash and \$50,000 note. Price includes \$75,000 noncompete agreement. Seller is Perry J. Samuels, president and general manager of WLYK, who will remain as consultant after sale. Samuels also owns KLCL-AM-FM Lake Charles, La. Buyer is Ohio company 100% owned by Richard L. Hallberg Jr., who is president. Hallberg is vice president and one of two principal owners of Automotive International, a company selling rustproofing and aftermarket products. He has no other broadcast interests. WLYK is on 107.1mhz with 3 kw and antenna 300 ft above average terrain.

WASP(AM) Brownsville, Pa. □ Sold by Brownsville Radio Inc. to The Humes Broadcasting Corp. for \$625,000, comprising \$175,000 cash and \$450,000 note. Seller is owned by D.C. Loughry, who also owns WFRB-AM-FM Frostburg, Md. Buyer is owned by James J. Humes (75%) and brother, John L. Humes (25%). James Humes is former Bethany College professor and will become president and general manager of WASP. Brother is senior research chemist at N.J.based Merck & Co. They have no other broadcast interests. WASP is on 1130 khz with 5 kw day and 1 kw critical hours.

KSKS(AM) Conroe, Tex. Dold by Montgomery Metro Inc. to Sweeney Broadcasting Co. for \$450,000, comprising \$100,000 cash, assumption of \$138,000 note and \$212,000 note. Seller is owned by Thomas E. Spellman and wife, E. Jean (331/3% jointly); A. Boyd Kelly and wife, Joan (331/3% jointly), and Dean L. Sadler (331/3%). Boyd Kelly also is 43% owner of KKDA-FM Dallas and KKDA(AM) Grand Prairie (Dallas), Tex. Spellmans and Sadler have no other broadcast interests. Buyer is owned by George B. Sweeney Jr., Houston-based business and financial consultant. He has no other broadcast interests. KSKS is 250 w daytimer on 1140 khz. Broker: Lester Kamin.

WXVQ(AM) Deland, Fla. □ Sold by WXVQ Inc. to D&C Broadcasting Inc. for \$425,000, comprising \$80.000 cash. \$60,000 noncompete agreement, \$149,000 promissory note held by seller and \$136.000 existing note assumed by buyer. Seller is owned by John Trenton (66%%) and Rudi Gresham (331/3%), who have no other broadcast interests. Buyer is equally owned by David M. Stevenson and wife, Constance L., of Lafayette, Ind., who have no other broadcast interests. WXVQ is on 1490 khz with 1000 w day and 250 w night. Broker: Chapman & Associates.

WKBQ(AM) Garner, N.C. □ Sold by Edjoux Inc. to Christopher C. Maggio for \$300,000, comprising \$80,000 cash and \$220,000 note. Seller is owned by Edward Paul, retired, and family, who have no other broadcast interests. Buyer is Chesapeake, Va., owner of soft drink vending machine company. He has no other broadcast interests. WKBQ is 1 kw daytimer on 1000 khz. Broker: Chapman Asociates.

WDHP(FM) Presque Isle, Me. Sold by Carrie L. Linthicum, bankruptcy trustee, to Van Buren TV Cable Co. for assumption of \$215,000 previous debt, assumption of real estate taxes and other consideration. Seller was appointed by court on Jan. 27. when WDHP and other station of previous licensee. Northern Broadcasting Co., WFST(AM) Caribou, Me., both went silent ("For the Record," Feb. 27). Buyer is equally owned by Clarence B. Dow Jr., Henry E. Hebert and Philip G. Plourde. They also own cable sys-

tem serving Van Buren, Me., and have controlling interest in systems serving 11 other Maine communities. WDHP is on 96.9 mhz with 100 kw and antenna 500 feet above average terrain.

KIDA-FM Ida Grove, Iowa □ Sold by The B.F. Broadcasting Inc. to Buena Vista College for \$200,000 cash. Seller is owned by Paul A. Green and Richard L. Peterson (37.5% each) and Warren V. Nelson (25%), who have no other broadcast interests. Buyer is private liberal arts college at Storm Lake, Iowa. It is headed by Edgar E. Mack, chairman, and Dr. Keith Briscoe, president. Briscoe is also director of Iowa Public Television. He has no other broadcast interests. KIDA will be operated as commercial station. KIDA-FM is on 92.7 mhz with 3 kw and antenna 300 feet above average terrain.

□ Other proposed station sales include: WDLK(AM) Dadeville, Ala.; WFAN-AM-FM Stonington, Conn. ("Changing Hands," March 19); WNRK(AM) Newark, Del.; WJBF(TV) Augusta, Ga.; WTVJ(TV) Miami ("Top of the Week," Sept. 26, 1983); KKSI(AM) Mount Pleasant, Iowa ("Changing Hands," March 19); WJRL(AM) Calhoun City, Miss.; WBJX(FM) Goose Creek, S.C.; KCLE(AM) Cleburne, Tex., and KGUL(AM) Port Lavaca, Tex. ("Changing Hands," March 19).

Cable system serving La Grange, Crestwood, Orchard Grass Hills (all Ken-

CABLE

tucky) \square Sold by Oldham County Cable Television to ACT 2. Buyer is limited partnership formed by Daniels & Associates Inc. and Integrated Resources Inc. Daniels, based in Denver and headed by Bill Daniels, is nation's 26th largest MSO, operating total of 28 systems with 237,000 subscribers in 12 states. It will operate Kentucky system. Integrated is New York-based marketer of partnerships. Thirty-five-channel Kentucky system, to be renamed Oldham County Cablevision, will be assigned staff from contiguous system in Clark County, Ind. It operates 150 miles of plant, passing 5,860 homes 2,700 basic subscribers.

□ Prices of two suburban Birmingham, Ala., systems bought by American Television and Communications ("Changing Hands," Feb. 27) have been disclosed. Cable Systems South, serving Concorde and unincorporated areas of Jefferson County (all Alabama), sold for \$406,000. Cable Systems of Alabama, serving Bessemer, Brighton, Lipscomb, Roosevelt City, parts of Birmingham and parts of unincorporated Jefferson County (all Alabama), sold for \$6,419,000.

NBC reorders its executives

After Mulholland resignation, his duties are being assumed by Timothy, Walsh and Butler

NBC announced its management reorganization last week, in the wake of the sudden resignation of Robert Mulholland, the company's president and chief operating officer, the previous week (BROADCASTING, March 19).

Under the new structure, no one will replace Mulholland per se, and both his titles have been put on the shelf for the time being. His divisional responsibilities, and those of vice chairman, Irwin Segelstein, have been divided among Grant Tinker, NBC chairman, and three executives already at high levels of NBC management—group executive vice presidents Raymond J. Timothy

Mondays Are Bad Enough Without Emergency Meetings

If you've ever had a Monday morning meeting to tell your staff that your station's not "on the block," you should be talking to Rounsaville at the NAB.

Your inquiry to us concerning your station's marketability is always handled in the strictest confidentiality.

We only mention your station on a one-to-one basis to select prospects after we get the go-ahead from you. With Rounsaville, your station is never indiscriminately "mass-marketed"

It's the best way to protect your investment. And help you avoid an emergency staff meeting.

After all, you've got enough emergencies to deal with on Mondays.

ROUNSAVILLE SUITE #1610, LAS VEGAS HILTON NAB CONVENTION APRIL 28-May 2, 1984

Timothy

Walsh

and Robert S. Walsh, and Robert C. Butler, the company's chief financial officer, who now also becomes group executive vice president.

Mulholland's resignation, according to network sources, resulted from his steadily deteriorating relationship with Tinker. The breaking point appeared to be Tinker's hiring of Lawrence Grossman as president of NBC News, without consulting Mulholland, who was responsible for the department.

Before the reshuffling of assignments, Segelstein had six departments reporting to him, most of which were reassigned to Butler, with the exception of corporate communications, which now reports directly to Tinker. However, high-level sources at the network insist that Segelstein is not on the way out and that his role within the company is not being lessened. In fact, one source said, "he may be even closer, perhaps, as adviser and counselor to Grant [Tinker]," as a result of the reorganization. Segelstein is being positioned, the source said, to assume the role held for so many years by David C. Adams, a former vice chairman of the network, who (with minimum visibility) operated as an adviser to the top man. "That's what Grant wants Irwin to be," said the source. "It's not a lesser role and he's not on the way out. This is a way of getting him more involved in the projects that Tinker

Butler

Segelstein

wants him involved in."

Tinker has refused all comment on the Mulholland resignation and the resulting reorganization, perhaps an indication of the extent to which the relationship between the two men had soured. Tinker attended an owned-stations division meeting in Scottsdale, Ariz., during the early part of last week and did not elaborate beyond a tersely worded press announcement issued last Monday (March 19) detailing the realignment of duties, according to sources at the meeting. (The meeting itself was a strategy session among the vice president and general managers of the five owned television stations and network officials.)

As to why Tinker opted to redistribute various management functions instead of simply appointing a successor to Mulholland, a network spokesman said that "all the permutations were considered, and he thought this one was the best." Though the intent was not to duplicate the structures of the other two networks, the spokesman said NBC's reorganization "is not unlike the others" and it appears to be working for them.

The news division, which Larry Grossman will officially take over on April 30, and which previously reported to Mulholland, will, under the new plan, report directly to Tinker.

Timothy retains management responsibility for the television network and the entertainment division and acquires responsibility for the department of business affairs. Operations and technical services, which had been under Timothy's view, are now the responsibility of Butler, who also takes over the law, personnel and labor relations departments, as well as corporate planning and research, all from Segelstein. He retains responsibility for the finance department.

Robert Walsh retains responsibility for the owned stations division and radio, and adds sports and NBC Enterprises, which sells product overseas and to the home video market and is involved in other activities, such as merchandising.

Fundraising, Congress on minds of public television stations

The "legislative front" as well as new developments in private sector fund-raising activities for the Public Broadcasting Service will dominate discussion at public television's 1984 annual meeting. The four-day conference convenes March 28 in Arlington, Va., and combines the membership meetings of PBS and the National Association of Public Television Stations.

More than 300 people—slightly less than last year's number—are expected to attend the meeting, which was moved up from its normal June date to coincide with public broadcasting's reauthorization hearings in Congress this year. NAPTS and PBS members will have the opportunity to meet with Congress on new authorizing legislation and funding that will project federal support through the end of this decade.

Following that vein, the meeting's speakers list includes Senator Robert Packwood (R-Ore.), chairman of the Senate Com-

New news. At a breakfast "opening," last Wednesday (March 21), John W. Kluge, chairman and president of Metromedia Inc., cut the ribbon on the company's brand new newsroom at wTTG(TV) Washington. In his remarks, Bob Bennett (r), senior vice president, Metromedia Television (and former general manager for wTTG(TV) 1966-69), said he hoped the new facility would "illustrate Metromedia's commitment to news." The facility, replete with wall-to-wall carpeting and a technical operating center (TOC) which can record eight satellite feeds simultaneously, cost approximately \$500,000. Surrounding Kluge were (I-r): Kevin O'Brien, vice president and general manager of wTTG(TV); Bennett, and Betty Endicott, vice president, news, wTTG(TV).

merce, Science and Transportation Committee, and Representative John Dingell (D-Mich.), chairman of the House Energy and Commerce Committee—which both oversee public broadcasting legislation. In addition, a House Telecommunications Subcommittee

The National Association of Broadcasters has 25 committees charged with examining a plethora of regulatory, legislative and industry-related issues. In this series, BROADCASTING is examining each committee, focusing on its chairmen, members and goals.

CONVENTION COMMITTEE D With only five weeks left before the National Association of Broadcasters holds its annual convention (April 29-May 2) in Las Vegas, this committee and the NAB staff are busily working to put it all together. Except for a few loose ends, much of the program is complete. The convention, which carries the theme, "You've Got What it Takes," is expected to attract more than 30,000.

According to the committee's co-chairmen, William Turner, KCAU-TV Sioux City, Iowa, and Ted Snider, KARN(AM)-KKYK(FM) Little Rock, Ark. (who are are vice chairmen of NAB's TV and

radio boards, respectively), NAB has developed an "outstanding agenda," with "stimulating and meaningful workshops that not only educate, but inform."

On Sunday, April 29, the convention opens with a "state of the industry" address by NAB President Eddie Fritts. Later, he will present NAB's Distinguished Service Award to retired ABC Vice Chairman Elfon Rule.

Immediately after that presentation, NAB will launch a national voter awareness campaign, hoping to encourage broadcasters to play a bigger role in the electoral process. The campalgn kickoff will feature a mutimedia show, produced by TM Productions and accompanied by a live performance of the U.S. Marine Corp. band, and a filmed message from President Reagan. Reagan will address the convention once again, on Tuesday, May 1, via a live satellite feed from Washington.

The voter awareness campaign will continue to be emphasized throughout the convention: Many panel sessions will be devoted to related issues including political advertising, exit polling and debates.

The establishment of a Minority Television Programing Exhibition is a new item on the convention schedule this year. Viewing rooms have been set up to screen programs produced by minorities for general or special market television audiences.

Broadcast engineers can look forward to an expanded engineering conference which begins the day before the convention officially opens, Saturday, April 28, and runs through Wednesday, May 2.

A number of legal "how-to sessions" are scheduled Tuesday, May 1, and more than 15 panel sessions will be devoted to issues related to television. Some of the topics slated to be discussed are deregulation, children's programing, the future of the new technologies and marketing the news.

Radio broadcasters, Snider says, can look forward to hearing from CBS News correspondent Charles Osgood, who will speak at the radio luncheon Tuesday, May 1. He noted there is a full slate of "nuts and bolts" workshops on the agenda for radio broadcasters: new technologies, political advertising, AM stereo, in-house sales training and a daytimers' forum.

An even heftier agenda is planned by NAB's government relations department. More than 30 congressmen and senators are scheduled to participate in an array of panel sessions on deregulation, copyright, must-carry and other legislative topics. Conventioneers can also attend a "one-on-one" with Jim McKinney, chief of the FCC's Mass Media Bureau.

FCC Chairman Mark Fowler is the Wednesday, May 2, luncheon speaker, and singer/ songwriter Paul Anka will perform after Fowler's speech.

Also from the FCC, Commissioners Jim Quello, Mimi Dawson, Henry Rivera and Dennis Patrick will participate in a panel discussion with NAB executive vice president for government relations, John Summers.

Convention committee members, in addition to Snider and Turner, are: Charles Cooper, Charisma Communications Group, Columbus, Miss.; Jim Dowdle, Tribune Broadcasting, Chicago; William Dunaway, WTHR Indianapolis; William Hansen, Harris Enterprises Inc., Joliet, III.; Robert Hilker, Suburban Radio Group, Belmont, N.C.; Charles Jones, WSRZ(FM) Sarasota, Fla.; Peter Kizer, Evening News Association, Detroit; Michael McCormick, WTMJ-TV Milwaukee; Paul Olson, KLEM(AM)-KZZL(FM) Le Mars, Iowa; Mark Smith, Landmark Broadcasting, Las Vegas, and J.A. Fisher, Ampex Corp., Redwood City, Calif. reauthorization hearing, chaired by Representative Timothy E. Wirth (D-Colo.), (which is scheduled for March 29), will be televised live in the conference meeting room.

At the same time, public broadcasting officials are hopeful of announcing the approval of "enhanced underwriting" on public television. The FCC is expected to circulate a document before March 27 that would incorporate recommendations made by the Temporary Commission on Alternative Financing for Public Telecommunications last year. It would permit public broadcasters to identify supporters by using brand names, trade names, slogans and brief institutionaltype messages ("Closed Circuit," March 12).

Public broadcasting members will also focus their attention on private sector fundraising, PBS programing, a status report on PBS's National Narrowcast Service (a nationwide Instructional Television Fixed Service) and new PBS ventures. Included in the last will be a demonstration on March 29 by Merrill Lynch & Co. of its computerized Financial Services System. Merrill Lynch and PBS are now in the second stage of development of a nationwide data delivery service, slated to begin in 1985.

Tower trouble

Ice storms in Maine took a heavy toll last Tuesday (March 20) as numerous broadcast towers caked with as much as six inches of ice either collapsed or, with rising temperatures, showered chunks of ice onto transmitter buildings below. At 8:57 a.m., WVII-TV Bangor's 750-foot tower collapsed under the weight of a thick coating of ice. The station's old tower was still standing (the fallen one having been erected in 1980), and a little over seven hours later, the station was back on the air at reduced power, with approximatley 70% coverage. When the station gets FCC approval to broadcast at full power, it will reach about 95% of its original coverage area.

A little over an hour later, at 10:06, WABI-TV Bangor's 560-foot mountain-top tower collapsed—striking two fuel drums and spilling 2,500 gallons of oil—putting both WABI-TV and co-owned WBGW(FM) off the air. WBGw was able to go back on the air the next day with about 50% coverage by attaching an antenna to a piece of the fallen tower placed on top of the transmitter building. WABI-TV, which remains off the air awaiting the arrival of a temporary tower, was hoping to be up and running by last Saturday, (March 24), according to program director Towle Tompkins.

Personnel at both stations praised fellow Maine broadcasters, who responded to the catastrophes with offers of help. According to WVII-TV general manager Barbara Cyr, she received calls from "almost every station in the state offering manpower and equipment."

In Portland, Me., WGME-TV and co-owned WGAN-FM were temporarily off the air when water leaked into the transmitter and ice knocked its reflector dish out of focus. Noncommercial WCBB(TV) Augusta, Me., was forced off the air for several hours when
chunks of ice, one the "size of a basketball," crashed through the roof of the transmitter building.

And finally, in Kansas, which has also been suffering through snow and ice storms, KLDH(TV) Topeka, Kan., lost its tower to the ice March 18, and, according to a spokesman, could be back on the air in about 10 days if a portable tower can be found.

LPTV West convenes in Anaheim, Calif.

Exhibit floor, presentations by FCC officials highlight conference

About 600 registrants are expected to gather at the Disneyland hotel in Anaheim, Calif., Tuesday and Wednesday (March 27-28) for LPTV West '84, a low-power television conference and exhibition sponsored by the National Institute for Low-Power Television. The event had been rescheduled after postponement last January.

"Our major focus is two fold," said NILPTV spokesman Andrew Wallerstein. "Our sessions will deal with the nuts-andbolts of putting these stations on the air. The other purpose is getting programers and syndicators interested in low-power. We think that they will find that there are LPTV stations interested in what they have to offer."

John Reilly, director of the institute estimates that about 270 low-power stations are now on the air, with more expected to signon by years end.

The LPTV West exhibition hall will be open from 11 a.m. to 3:30 p.m. both days. Wallerstein expects 35 to 40 companies, including 15 program producers or syndicators, to be on hand.

Two FCC officials who oversee LPTV license processing will make presentations during the conference. Video Services Division Chief Roy Stewart and Low-Power Branch Chief Barbara Kriesman will participate in a forum 11 a.m. Tuesday and a separate FCC forum at 5 p.m. the same day. More than 30 other sessions, on topics ranging from financing to programing to advertising and engineering, will be conducted beginning at 9 a.m. both Tuesday and Wednesday.

New to this year at the conference this year will be an LPTV programing festival, with awards for excellence being given in nine program categories at a reception Tuesday evening. Winning programs will be screened throughout the convention. \Box

Fifty-year retrospective

Formation of the Golden Jubilee Commission on Telecommunications has been announced. Incorporated as a nonprofit organization under District of Columbia law, it will (1) commemorate the role of telecommunications in fostering the economic, social and political welfare of the nation in the last half century, and (2) celebrate the 50th anniversary of the Communications Act of 1934 and the creation that year of the FCC. Executive director of the Jubilee Commission is Max D. Paglin, formerly general counsel and later executive director of the FCC. Until undertaking this present assignment, Paglin was Washington counsel of the New York law firm of Weil, Gotshal & Manges.

With the support of private funding and through a coordinated series of studies, publications, symposia and panel sessions, the Jubilee Commission will create a permanent and integrated record of the development of telecommunications technologies and their impact on society; the history of telecommunications regulation in the past 50 years; a present-day evaluation of telecommunications and current regulatory policy, and a compilation of insights and predictions about the future in those areas.

The Jubilee Commission activities will be directed by a board of trustees of persons in

telecommunications, representing industry, the professions, government, public groups and academia. Day-to-day operations of the Jubilee Commission will be supervised by Paglin, assisted by a staff of professionals as well as advisory and steering committees made up of representatives from various facets of the telecommunications industry.

It is also contemplated that the Jubilee Committee will be the nucleus for a subsequent National Institute on Telecommunications. NIT would carry forward, on a continuing and permanent basis, the work of the Jubilee Commission and would, through the aforementioned conference and publications resources, provide a permanent structure for promoting the preservation and study of the past, as well as establishing a forum for the effective exchange of views between government and the private sector in the development of telecommunications and policy.

Debate in Chicago. Broadcasters took advantage of the recent FCC decision permitting them to sponsor as well as report political debates without incurring equal-time obligations (BROADCASTING, March 19), when they helped organize a debate between the remaining Democratic presidential candidates last week (above,I-r: Walter Mondale, Senator Gary Hart and Rev. Jesse Jackson). Two stations, wBBM-TV and wMAQ-TV both Chicago, which had originally planned to schedule separate debates, carried the event that was held at Chicago's Westin hotel and sponsored by the Chicago Bar Association. It was aired live March 18, two days before the Illinois primary. WBBM-TV was the site of the first televised presidential debates between John F. Kennedy and Richard Nixon in 1960. According to wBBM-TV spokes-woman, Joan Zucker, Nielson ratings for the debate showed a 18.2/26 for wBBM-TV (a CBS affiliate), and 10.1/15 for wMAQ-TV (an NBC affiliate).

Panelists for the debate were (below, I-r): reporters Ron Majers, wMAQ-TV, Walter Jacobson, wBBM-TV; D. Michael Cheers, *Jet magazine*; Carol Marin, wMAQ-TV, and Mike Flannery, wBBM-TV. Thomas Z. Hayward Jr., president of the Chicago Bar Association.

As compiled by BROADCASTING, March 12 through March 16, and based on filings, authorizations and other FCC actions.

ALL INTERESTED PERSONS PLEASE TAKE NOTICE THAT: The Delendant National Broadcasting Company, Inc. ("NBC") has requested a tederal district court in Los Angeles to modify the Final Judgment entered on November 28, 1977, in United States v. National Broadcasting Company, Inc., Civil Action No. 74-3601 -RIK (C.D. Cal.). The plaintiff United States has tentatively agreed to that efforted. to that reques

-RJK (C.D. Cai.). The plaintiff United States has tentatively agreed to that request. The complaints in this action and in two companion cases. United States v. Amencan Broadcasting Companies. Inc., Civil Action No. 74-3600-RJK (C.D. Cai.). and United States v. CBS Inc., Civil Action No. 74-3509-RJK (C.D. Cai.). were filed December 10. 1974. Each complaint alleged that the defendant network had vo-lated Sections 1 and 2 of the Sherman Act by combining with the television stations it owned and with affiliated stations to monopo-lize and restrain trade in television entertainment programs exhib-ited on its network during prime time hours. The complaints also alleged that each network violated Section 2 of the Sherman Act by monopolizing television entertainment programs exhibited on its network during prime time hours. The proposed modification, which is submitted under the exist-ing provisions of the NBC Final Judgment, would conform the injunctive provisions running against NBC to those entered against ABC. NBC would be allowed to increase its in-house production of prime time television entertainment programs at the same time those increases become effective for ABC. Furthermore. NBC would be allowed to renegotiate series options at any time during

would be allowed to renegotate series options at any time during an option period. The modification would also impose two addi-tional injunctions against NBC. The network would be limited in its use of exclusive agreements with essential talent employed in pilots and in prime time entertainment program series. The pre-cise terms of the modifications are found in papers filed with the Court the Court.

Interested persons may submit comments concerning this mat-ter by sending them within sixty (60) days to Stanley M. Gorinson, Chief, Special Regulated Industries Section, Post Dffice Box50125, Washington, DC 20004 (telephone: 202/1724-6633).

Washington, DC 20004 (telephone: 202/724-6693). Copies of the complaint, proposed Modified Final Judgment, motion papers, all comments submitted and all further papers filed with the Court will be available for inspection at the Legal Procedure Unit of the Antitrust Division. Room 7416. United States Department of Justice, Tenth Street and Pennsylvania Avenue, NW. Washington, DC 20530 (telephone: 202/633-2481), and at the Office of the Clerk of the United States District Court for the Central District of California, 312 North Spring Street, Los Angeles, California 90012. Copies of any of these materials may be obtained from the Legal Procedure Unit upon request and payment of the fee set by the Department of Justice regulations.

Francisco, joins Weiss & Powell, Los Angeles, as VP, West Coast division manager.

Deaths

Ernest Lee Jahncke, 71, retired NBC VP and former head of radio at ABC, died March 18 at his home in Greenwich, Conn., apparently from head injuries suffered in a fall. Jahncke joined NBC in 1937 and worked in station relations until 1941. After service in World War

Jahncke

II. he was with ABC from 1945 to 1957 in posts including head of TV-radio station relations, head of radio operations and assistant to ABC president. He was assistant to chairman of Edward Petry & Co., pioneer station rep firm, in 1957-59, then moved to NBC and was in charge of standards and practices department for 10 years before retiring in 1970. He remained active in Broadcast Pioneers, which he once headed, and Broadcasters Foundation. Survivors include daughter and three sons.

Donald King, 64, president, Philips Laboratories, New York, and president-elect. Institute of Electrical and Electronics Engineers, died March 13 at New York hospital. He is survived by his wife, Mary Anne, two sons and two daughters.

Norman H. Grant, 69, VP, planning and special projects, ABC Los Angeles, died of cancer March 14 at St. John hospital, Santa Monica, Calif. Grant began his broadcasting career in 1949 as director of operations, WNBQ(TV) Chicago. He joined ABC in 1965, as director of color coordination and administration.

J. Hayden Huddleston, 75, veteran Roanoke, Va., radio and television broadcaster died March 15 of complications following collapsed lung at his home in Roanoke. Huddleston helped put WDBJ(AM) Roanoke (now WFIR) on air in 1920's, and later worked at WROV(AM) there. In 1950's, he worked at WSLS-TV Roanoke. He is survived by his wife, Lucille.

James Duffy, 58, technician, CBS News, Washington, died of heart attack March 20 at Holy Cross hospital, Silver Spring, Md. Survivors include three sons.

Multiple channels: no strings attached

To some, "wireless cable" is a classic oxymoron, but to Mark Foster, the phrase describes a potentially lucrative medium combining the reach of broadcasting with the multiple channels of cable.

As chairman of Microband Corp. of America, the 54-year-old Foster has been promoting wireless cable as a natural evolution of Microband's multipoint distribution service (MDS) business and as an opportunity for the firm and its partners to capture a good share of the hundreds of millions of dollars Americans spend each year on pay television.

"This is an expansion of MDS that we have been hoping and praying for so many years," says Foster. "It allows us to take our business out, provide a number of program choices and be competitive in the marketplace."

(Wireless cable is broadcasting, but the wireless cable operator [broadcaster?] is not restricted to a single VHF or UHF channel in each market. Using a combination of MDS and Instructional Television Fixed Service microwave [2 ghz] channels, the operator can broadcast multiple channels of pay television to homes and apartment buildings with a line of sight to the transmitter.)

"I've always been in the same business communications," says Foster. But within that realm, he adds, "I've had the most diversified career that one could imagine."

Foster got his start in communications in the 1940's when, as a teen-ager, he did "anything to hang around" wFBR(AM) in his hometown of Baltimore. Anything included writing for and acting in radio dramas produced by the local school board. He later became "the morning man" at wASL(AM) [now wyre] Annapolis, Md. Foster claims to have learned much from his early experiences in broadcasting, including the Second Commandment. He had been at the Annapolis station for a few weeks, he says, "when I had to cue up two different turntables and read from two different scripts at the same time. I got so confused I didn't know what I was doing and I had the pot open and I said, 'Oh, God. Oh, God. Oh, God. I can't get this thing straight. Oh, God.' I was fired the next day for using God's name in vain."

But Foster was soon back in broadcasting at wGAY(AM) Washington, where he found a sponsor, a dry goods wholesaler named R. Mars, and created a program, Mark Foster: The Man from Mars, built around interviews with Mars customers. Its success got him a permanent job in the sales department.

In less than a year, however, Foster jumped to the other side of the advertising business, working for a succession of advertising firms. As a public relations specialist at McCann-Erickson, New York, he found himself unexpectedly cast as a minor player

Marvin (Mark) Foster-chairman, Microband Corp. of America, New York; b. Jan. 4, 1930. Baltimore; sergeant, special services, U.S. Army, 1947; advertising sales, wGAY(AM) Washington, 1951; account executive, Cohen 1 & Miller, Washington, 1952-53; account executive, Bozell & Jacobs, New York, 1954-56; chairman, creative plans board, and manager, business development, Communications Counselors Inc., public relations division of McCann-Erickson, New York, 1956-60; president, Inter-American Literacy Foundation Inc., New York, 1961-62; vice president, Radio New York Worldwide (Bonneville International Corp.), 1962-64; vice president, Theater Network Television Communications, New York, 1964-66; president and chief executive officer, Management Television Systems, New York, 1966-69; present position since 1971; m. Sylvia Ellin, July 30, 1951; children-Stacia, 27; Monica, 26, and Curtis, 24,

in the Cold War for the next several years. In the wake of the Hungarian revolt against the Soviet Union in October-November 1956, more than 150,000 Hungarian refugees were pouring into the country. Under contract with the federal government, McCann-Erickson made Foster the head of public information for President Eisenhower's Committee for Hungarian Refugee Relief at Camp Kilmer, N.J., where the refugees were being processed. "Thereafter," he says, "I was always the guy thrown in for government assignments."

Foster left McCann-Erickson and, as a public relations consultant, he accepted in late 1960 a White House offer to handle public relations for another refugee program this one for Cubans fleeing Castro's dictatorship. The experience left him bitter. "We were aware of the Bay of Pigs planning and we were absolutely horrified because we knew damn well it was going to fail," he says. Foster resigned in protest on April 15, 1961, two days before what he calls Cuba's "Pearl Harbor."

The experience also left him a vehement

anti-Communist. For the next three years he worked through the media to arrest Communist influence throughout the rest of Latin America. In 1962 he joined Ralf Brent at Radio New York Worldwide, a Bonneville short-wave station that broadcast "an America speaks type of programing" in English and Spanish.

By 1965, Foster says, "my children were starting to grow up and I realized I had to start making some money." He joined Theater Network Television Communications, a closed-circuit television company, and stayed just long enough to figure out what he felt was a better way of doing business. In early 1966, he raised some capital, formed Management Television Systems and became its president and chief executive officer. Breaking with the other officers and investors over the company's direction, Foster left in 1969.

In 1970, the FCC amended its rules to permit television transmission over MDS channels. Foster linked up with Don Franco, a financial lawyer, and together they founded Microband to exploit MDS. Microband quickly established itself as the nation's leading MDS common carrier, leasing single-channel MDS facilities to companies that market a single pay service (typically HBO) to subscribers. Single-channel MDS proliferated rapidly in the late 1970's, Foster says, but suffered from competition from multichannel cable. Of the 50 MDS services now in business, he says, only about 12 are profitable.

In 1981, Microband was purchased by Tymshare Inc., whose sale to McDonnell Douglas is now pending.

The salvation of Microband and its customers may lie in new FCC rules, issued last year, that give nonprofit ITFS broadcasters the right to lease excess channel capacity to commercial users. New rules in hand, Foster and Franco approached ITFS broadcasters throughout the country and offered to lease their excess capacity. What's more, they persuaded some ITFS broadcasters to apply for vacant channels in dozens of markets, promising to lease the excess capacity on any channels the broadcasters were granted. At the same time, Microband began discussing joint ventures with the local single-channel MDS operators.

Both efforts were fruitful. Microband and its local partners, Foster says, are now prepared to launch wireless cable services of at least eight channels in New York, Washington, Milwaukee and San Francisco before the end of the year and, if all goes well, in several other markets in 1985.

Although cable will be the "dominant" multichannel media of the future, Foster says, it will not prove economical in areas where population density is too low or where construction costs are too high. "We think the United States is simply not going to be a wired nation," he says. "It's going to be wired and wireless."

was safe to assume that value of Showtime/TMC pact, like one with HBO, would probably run into hundreds of millions of dollars, but that factors such as box-office performance would determine final value. At press time, Showtime/TMC board of directors had yet to give final approval to agreement, but sources said it was virtually assured. Indications are that next big deals for both Showtime/TMC and HBO will be with 20th Century-Fox. "A deal with Fox should be done fairly soon," said one HBO executive. Executive with Showtime/TMC echoed that sentiment.

CBS-TV will present live debate among three remaining major Democratic presidential candidates March 28 at 8-9 p.m. NYT with Dan Rather as moderator, CBS News said Thursday after Walter Mondale, Gary Hart and Jesse Jackson had accepted its invitations ("In Brief," March 19). Debate will be held in Low Memorial Library at Columbia University in New York. Three nights later, March 31, candidates are scheduled to debate live at 8-9 p.m. on CBS-owned wCBS-TV New York but station spokesman said Friday that WCBS-TV, although its debate was arranged first, was preparing one-hour political special that would be ready to run if candidates "decide they don't want to debate twice in three days." Meanwhile, NBC hopes to sponsor debate. It is trying to set up debate weekend before Pennsylvania primary (April 10), probably in Philadelphia. At least two of candidates have not yet responded to NBC invitation, Hart and Mondale, but their decisions are expected some time this week. Jackson campaign officials were unaware of NBC invitation, and Jackson could not be reached for comment, but he has not declined to participate in formal debate on primary trail so far. ABC indicates it does not have plans, at least at present time, to sponsor preconvention debate.

Seven court suits filed by shareholders of Metromedia against proposed management-initiated \$1.5 billion leveraged buyout (BROAD-CASTING, Dec. 12, 1983), have been settled in principle, company announced last Thursday, March 22. Settlement, which is subject to approval of court, adds additional consideration to \$30 cash and \$22.50 bond already proposed. Company will now also pay 19¢ quarterly dividend and provide 1/2 warrant to each shareholder. Half warrants may be redeemed for 50¢ each, or used in purchase of bond, costing \$950 and 40 warrants. Settlement would add \$17 million to cost of buyout. Susan Watson, company's director, financial relations, said proxy materials have yet to be sent for shareholders meeting at which proposed buyout will be considered. Meeting was originally set for April.

Washington state supreme court ruled last week that news media can use, in any form, evidence that is legally obtained and presented in open court. Court's ruling overturns 1982 Spokane superior court decision that held KHQ AM TV Spokane in contempt when it aired audio tapes played during well known "murder-for-hire" trial in Spokane. Case concerned woman convicted of trying to hire undercover policeman to kill judge and prosecutor responsible for her son's conviction on rape charge. Stations aired tapes even after judge presiding over trial ordered them not to and even though tapes were legally obtained through prosecutor. Washington supreme court decision was unanimous although three of nine judges dissented in part. They rejected finding that privilege to use evidence was absolute.

CCLA Communications Inc., wholly owned subsidiary of Beatrice Foods, is selling KIOKFM) Los Angeles to Noble Broadcast Consultants Inc. (see "Closed Circuit," Nov. 28, 1983) for \$18,500,000 cash, including \$250,000 noncompete agreement. Price is record for stand-alone FM. Buyer, radio program consultancy firm and radio syndicator based in San Diego and headed by John Lynch, president, owns XETRA-AM-FM Tijuana, Mexico (San Diego).

Warner Amex Cable Communications announced last week it has

reached agreement to sell its Pittsburgh cable system to TeleCommunications Inc., which already has cluster of systems in Pittsburgh market. Sale is valued at about \$90 million. Before deal can go through, however, companies must get approval from city, for which W-A has asked. In letter to Pittsburgh Mayor Richard S. Caliguiri seeking approval of sale, W-A Chairman Drew Lewis said company did so only with "regret." But Lewis indicated he felt he had no choice given four-year, more than \$100-million investment, with operating losses of about \$31 million, with continued and "substantial losses" projected for "foreseeable future." Lewis submitted that viability of Pittsburgh system "can be best assured if it functions as a part of a larger cable universe," such as cluster that TCI operates in market. Lewis said W-A would buy out shares held by local investors in system at close of deal.

NBC's The New Show, produced by Saturday Night Live creator Lorne Michaels, had its 10th and final showing last Friday, March 23, at 10-11 p.m., three episodes earlier than network had planned, due to poor ratings. Over nine weeks, show averaged 8.0 rating and 14 share. CBS's Falcon Crest, season to date, has averaged 22.1/37 in same time slot and ABC's Matt Houston has averaged 15.3/26. This Friday (March 30), Yellow Rose will air in 10 p.m. slot on NBC with paid political special to air in slot on April 6. Replacement programing in following weeks is yet to be announced.

All seven Metromedia television stations have agreed to pick up Dynasty reruns, serial drama set for syndication release by Metromedia Producers Corp., in fall 1985. Both original full-hour and half-hour versions are likely to be carried, said Paul Rich, vice president, MPC. Certain Metromedia stations are expected to program half-hour Dynasty adjacent to first-run episodes of syndicated strip, Rituals-which all seven Metromedia stations are carrying-to form one-hour block of drama serial programing. Pickup by Metromedia group gives Dynasty clearance in seven of top 11 markets

П

CBS told FCC in filing last week it has adequately demonstrated its ability to implement its proposed direct broadcast satellite systemin FCC parlance, met the FCC's "due diligence" test. Meeting test is critical since it would put CBS ahead of six other DBS permittees when FCC starts handing out orbital assignments and channels. CBS wants same slots and channel polarization as Comsat's Satellite Television Corp. so they can offer joint service as they proposed last December. CBS bases "due diligence" claim on fact it has developed system for broadcasting high-definition television via DBS. But other DBS permittees insist "due diligence" test can only be met by ordering construction of satellites and making attendant financial commitment. Judging from filing, CBS has yet to do so. It said it has negotiated contract with TRW, but gave no indication it was financially committed. It "may order TRW to commence construction" of satellites by late September, it said.

National Radio Broadcasters Association announced last week plans to pursue passage of radio-only deregulation bill in Congress this year, and if necessary, in next Congress as well.

CBS continued its push into daytime ratings, winning week ended March 18 for ninth straight time in row-its first nine week consecutive win since fall of 1977. CBS averaged 7.4 rating and 26 share, compared to ABC's 6.9/23 and NBC's 5.1/18. In season-todate averages, CBS also holds lead, with 7.3/25 compared tc ABC's 7.2/23 and NBC's 5/17. But in early morning news, ABC maintained number-one position for 11th consecutive week, with Good Morning, America capturing 5.8/25 against Today's 4.4/19 and CBS Morning News's 3.5/15. During first 12 weeks of fourth quarter, GMA has maintained 33% rating point lead over Today and 51% rating point lead over CBS Morning News.

Latest Nielsen cable penetration figure, for February 1984, is 41.2%,

or **34,740,300** households. That's up from 40.5%, or 34,114,000 households last December. Company's most recent figure is about two points higher than Arbitron's latest estimate, released month ago, which pegged cable penetration at 39%, or slightly more than 32.5 million homes.

State and Commerce Departments and International Telecommunications Satellite Organization are involved in bitter dispute involving leak of State Department cable to U.S. embassies in 108 countries that are members of Intelsat. Cable, unclassified, is second of three to be dispatched on U.S. policy authorizing non-Intelsat systems to provide international telecommunications satellite service. It contains text of Senior Interagency Group statement of recommendations, and itself contains nothing not already generally known, and says U.S. foreign policy interests warrant "strong continued support of Intelsat's global system" but that, at same time, "U.S. economic goals require recognition of the changing marketplace and encouragement of innovation." But furor started building when Richard Colino, director general of Intelsat, on Thursday distributed copies to members of Intelsat board of governors, meeting in Washington. Copies were delivered under covering notification declaring material was received "by mail on an unofficial basis." Commerce Department officials, long at war with State over international telecommunications jurisdiction, later expressed concern over fact that State had sent copy routinely to FCC. They said lawyers thought that could constitute improper ex parte contact, since commission is considering applications of two non-Intelsat parties-Orion and International Satellite Inc.for international satellite service. State Department official said Colino's action "has a lot of people in State and in the Intelsat area ticked off. It's very callous and rude, very abnormal."

Representative Tom Tauke (R-Iowa), key member of House Telecommunications Subcommittee, announced plans last week to wed Beverly Hubble, press secretary to Iowa Republican, Senator Charles Grassley. Details on ceremony are not final, but Nov. 17 wedding is planned.

CBS News announced several top spot management changes, effective today (Monday, March 26): **Robert Ferrante**, who has been executive producer of *CBS Morning News* since February 1983, moves over to become senior producer at CBS News special events unit, which coordinates coverage of political elections, space shots, papal visits, etc. Moving up to executive producer at *CBS Morning News* is **John Katz**, who has been senior producer of that broadcast and Ferrante's assistant since February, 1983. (No replacement was named for Katz's senior producer position.) **Mark Harrington**, senior broadcast producer for *CBS Evening News with Dan Rather*, moves to London to become CBS News bureau chief there, while **Sandy Socolow**, London bureau chief, joins *60 Minutes* in New York as producer.

Brian-Lamb, president of C-SPAN, launched campaign in Chicago last week to raise \$2 million from businesses outside cable industry to support nonprofit public affairs network. In speech before Chicago's Union League Club, Lamb said network, which covers primarily Washington political events, has annual operating budget of \$4.5 million, 90% of which derives from its cable affiliates. But "responsibility for bringing government activities to the American people via television," he told business leaders, "should not be held solely by the cable industry."

U

PBS's recently completed **1984 fund-raising marathon**, "Festival '84," generated **\$30,613,800** from 634,193 individuals. Donations were up 4.1% from last year's total of \$29.4 million, although number of pledges was down from last year's 654,333.

ABC Television Network President John C. Severino, in speech to New England Broadcasters Association, called upon advertising community to support "programing on the cutting edge." Severino said networks are often charged with putting on dull and stereotypical programing, but whenever networks offer program that is "original, thought-provoking or controversial—some friends in the A message to Congress. The board of directors of the Corporation for Public Broadcasting agreed last Friday that the government, rather than CPB, should be designated as the enforcement agency for equal employment opportunity among public broadcasting stations. At the meeting, CPB passed a resolution asking Congress to transfer the statutory responsibilities for equal employment opportunity enforcement for CPB from the Department of Health and Human Services to the Equal Employment Opportunity Commission, in the hope that the latter would take a greater role in equal opportunity reforms. It was also intended "to send a message to Congress" that CPB is "as concerned as they are about EEO," CPB board member Kathleen Nolan said. The action was chosen in place of alternative suggestions of CPB tying contract or grant incentives to EEO compliance, or denying funds to public stations that have a poor record of compliance. There was concern that giving CPB the role of enforcer would cause friction between CPB and the public stations and hinder CPB's argument that it is a private corporation rather than "a governmental enterprise."

Also last week, the terms of five CPB board members expired, allowing President Reagan to appoint two people since the number of CPB board members has been reduced from 15 to 10. Given the political makeup of the board, they must be Democrats or independents.

advertising business stop returning our calls." Severino cited ABC Theater's *The Day After* and *Something About Amelia* as specific examples where sponsor support could have been more forthcoming. "A retreat by advertisers not only fails to support our efforts to improve and invigorate the medium, it encourages caution where none is called for... It encourages the very blandness for which we are often called to task—and the sameness that turns off the very audience advertisers say they want to reach."

Seattle-based **King Broadcasting** and broadcast consulting firm of **Burkhart/Abrams/Michaels/Douglas Associates** have formed new **joint venture—to be known as Mirage—for creation and production of long- and short-form music videos.** Atlanta-based consulting company has consulted MTV: Music Television and Turner Broadcasting in their music video programing but is best known for its consultation with rock format radio stations. New venture will be headquartered at King's new \$30-million television production center in Seattle, which can also be used for remote concert recording. According to Mirage general manager Dan O'Brien, effort will be directed at production of videos specifically directed to target demographics. O'Brien told reporters last week King may ultimately create its own music video program service, delivered by satellite. King is privately held company with four television and eight radio stations.

Katz Broadcasting Co., Bridgeport, Conn.-based radio group subsidiary of Katz Communications Inc., last week agreed in principle to purchase of www.rurw) Gainesville, Ga., from John Jacobs and James A. Dunlap for \$5.5 million. Katz currently owns nine radio properties (six AM, three FM) in six markets. Brokers for transaction are Gammon & Ninowski Media Brokers Inc. and Americom Media Brokers Inc.

)

Paul Isacsson, CBS-TV sales vice president from 1977 to 1982 and since then senior vice president, **CBS/Broadcast Group Enterprises, joins Young & Rubicam USA,** New York, as executive vice president and director of network programing and purchasing. He succeeds Richard Low, who has formed Richard Low Associates to produce and consult for television, theater and motion pictures.

Lawrence K. Grossman will receive Corporation for Public Broadcasting's **Ralph Lowell award**, which honors exceptional contributions to public broadcasting. Grossman, who resigned after eight years as president of Public Broadcasting Service (BROADCASTING, Dec. 12, 1983), will become president of NBC News at end of April. Award will be presented at PBS's annual meeting March 29.

The case for responsible reporting

The Supreme Court did nothing last week to arrest the growing perception that it sides with plaintiffs in libel cases. With unusual unanimity, 9-to-0, the court ruled in one case that a publication may be sued for libel in any state where it regularly circulates and in another that individual reporters and editors may be sued in a distant state if the plaintiff lives there and the news medium is widely circulated in that jurisdiction.

The cases went against Hustler and The National Enquirer, but they could as well apply to ABC, CBS, NBC, CNN or any element of the electronic press that reaches a multistate audience. The decisions were of a piece with others that have tended to weaken the libel defenses that an earlier Supreme Court erected in New York Times v. Sullivan.

At the other end of the juridical process, there is also cause for media concern. As was reported at a New York conference marking the 20th anniversary of the Times v. Sullivan case, juries in trial courts are siding with plaintiffs in 83% of libel cases, with damages averaging \$2.2 million a case since 1980 (BROADCAST-ING, March, 19). The consolation is that appellate courts below the highest one are reversing three out of four of those juries.

Clearly, as speakers at the Practising Law Institute in New York pointed out, juries must be reflecting public discomfort with the press, while appellate courts are taking less impassioned views and abiding by judicial precedent, including Times v. Sullivan. What is to be done?

At the New York seminar, some good advice came from Conrad M. Shumadine, lawyer for Landmark Communications of Norfolk, Va. Questions to be raised about a potentially troublesome story: "Will the jury call it a cheap shot? Use the smell test. If it smells the case may have to be settled."

Good journalists understand what Shumadine was saying.

It belongs

C-SPAN, cable's public affairs network, has never made a lot of noise. It has gone about its useful business without the fanfare that has accompanied the operation of other cable networks and the demise of some. In character, it celebrated its fifth birthday with a low-key interview with the Speaker of the House of Representatives, which C-SPAN has been dependably presenting to cable subscribers in all its public sessions ("In Brief," March 19).

What does the Speaker think about exposing House proceedings to the television camera? Well, there have been Republicans who have used C-SPAN as a political vehicle to deliver messages to the folks back home, but of course Democrats wouldn't stoop to that.

Does that mean the Speaker has qualms about continued television exposure? "Oh, no," said Thomas (Tip) O'Neill Jr. (D-Mass.). "Television is here to stay permanently now ... I think if C-SPAN were to pull out and not do it, we'd have to find another organization, or we'd have to go into the business and do it ourselves.'

That is a testimonial that goes beyond mere approval of the C-SPAN operation, although C-SPAN may justly feel complimented. It says that television coverage has been accepted as a basic part of modern proceedings of the House of Representatives.

If television has proved in five years that it can get along with the contentious membership of the House, doesn't it stand to reason that television could get along at least as well in a Senate that its members do not hesitate to call the world's greatest deliberative body?

Perhaps the message from the House will find its way to the other side of the Capitol.

That said, one may consider the other side of the supplydemand equation: not where C-SPAN's cameras are allowed in, but where its signals are allowed out. To the cable industry's credit, that reach is now up to 1,350 systems and 17 million homes. But to the cable industry's discredit those constitute only one-fifth of the nation's systems, serving but half of all subscribers. Altogether that's an enormous denial of cable's proudest public affairs product to its customer universe.

The day will come, we confidently predict, when every U.S. cable home will be the beneficiary of this innovative communications effort. But we need not wait for the ultimate to improve upon the present. Extending C-SPAN's reach to every cable home is a cause in which cable operators should unite as one.

About time

Eleven years after its pointless creation, the National News Council is fading into total oblivion, as opposed to the near oblivion in which it has spent most of its existence. The wonder it that it took so long for totality to set in.

At its founding, instigated and supported by the Twentieth Century Fund, the council was described as the answer to a crying need for arbitration in what was said to be a controversy between the news media and the public. The controversy has outlasted the council, which by nature was ineffective and largely ignored.

It was not for want of energetic work by well-meaning officials that the council failed. It was for want of a real mission. Early in its life, the council announced a full-scale investigation of thenpresident Richard Nixon's charge of "outrageous, vicious, distorted" reporting of the Watergate affair, only to call it off when the White House refused to cooperate. It was all downhill from there.

For broadcast journalists, already burdened with government restraints that include the fairness doctrine, the News Council would have constituted double jeopardy if it had ever achieved its ambitions. Fortunately, the watchdog turned out to have no bite.

"Furthermore, I remind you that our agreement was to continue the show for one year despite the rating results ... '

Your winning combination for AM Stereo

Is AM Stereo ready to move up?

Market-place decisions notwithstanding, the recent introduction of receivers able to decode signals from any of the four systems in use today makes it easier for broadcasters to move ahead with AM Stereo plans. Which system is #1?

The PMX (Magnavox) System was first selected by the FCC to be the Industry Standard for AM Stereo.

We established the system's viability during the 1979 NAB Show. The politically-inspired "market-place" decision hasn't affected the technical performance of the PMX System one bit.

Hearing is believing.

With the PMX System, AM Stereo music sounds like FM Stereo music. So it makes for higher listener appeal and better numbers: For audience and the bottom line.

The Winning Combination

Our Type 302A Exciter, developed for the PMX System, and our new Type PMX-SM1 AM Stereo Modulation Monitor give you a superior package for AM Stereo broadcasting.

We've built a world-wide reputation for high-quality AM transmitters that offer unmatched on-air reliability with complete transparency.

Ultimately, the day-to-day operation of your AM Stereo System will depend upon equipment and service.

We stand on our track record of providing the best of both.

If you're considering AM Stereo, or if you just want more facts, give us a call. You can't lose.

Continental Electronics Mfg. Co. PO Box 270879 Dallas, Texas 75227. Phone: (214) 381-7161

THIS IS THE MONTH BUSINESS WEEK TAKES TO THE AIR!

ANNOUNCING THE PERSONAL BUSINESS NETWORK-LIFESTYLE PROGRAMMING FROM BUSINESS WEEK MAGAZINE.

Beginning this week, Personal Business Reports begin airing across the country. Edited by Business Week magazine, each 90-second weekday report focuses on a new lifestyle, service-oriented business topic of interest to your listeners.

Some of the subjects covered: tax tips, investments, markets, collectibles, insurance, career mobility, travel 8 1984 and leisure, personnel benefits and compensation A 2 8 1984 and more.

For more information about how your radio station can join the Personal Business Network, including details on market availability and full demo tape, contact:

CHARLES BRANDT DIRECTOR, STATION RELATIONS 1-800-225-0358 (Toll-Free Outside New York State) 1-212-686-6220 (In New York)
