### At Society Bank, the sky's no longer the limit.

With emerging new technologies and state-of-the-art equipment, not even the sky's the limit for today's communications companies.

But reaching new heights in the business world takes more than high-flying ideas and sophis ticated equipment. It takes a bank with experience in the communications field.

At Society Bank, we've been committed to the communications industry for more than 40 years. Last year alone, we loaned or acted as agent in over \$100 million dollars worth of business

As specialists in communications financing, we can provide your company with prompt, personalized financial assistance for acquisitions, debt refinancing mergers, divestitures, and finan cial management consulting.

So if you're looking for a new dimension in banking, come to Society. There's no limit to wha we can do. For more information or an appointment, contact Joler Cameron at (216) 622-8665.

The stars are super. The action is fast. The scripts sparkle. It's Five Star Mystery!

Night after night, day after day, your audiences will witness a parade of television's top talent in a series that comes at a time when the mystery/detective genre is at its peak of popularity!

#### JUDD HIRSCH DELVECCHIO

He's tough and he's arrogant—and he gets the job done! Judd Hirsch of Toxi fame is Delvecchio, a streetsmart, big-city cop who just happens to have a law degree. Hirsch's powerful performance places Delvecchio among the best mystery dramas!

#### JIM HUTTON ELLERY QUEEN

The time is the 1940's. The place is New York. The subject is murder! Jim Hutton stars as Ellery Queen, the legendary detective.

The uncanny plot twists, Hutton's engaging performance and a huge roster of top guest stars make Ellery Queen a first-rate whodunnit!

#### DAVID JANSSEN O'HARA, U.S. TREASURY

The crimes are smuggling, counterfeiting, narcotics trafficking, racketeering. The fighters are undercover agents of the U.S. Treasury Department.

Produced by Jack Webb, O'Hara is based on actual U.S. Treasury Department files.

#### KATE MULGREW MRS. COLUMBO

The beloved Lieut. Columbo's wife is on her own as a spunky, determined newspaper reporter whose insatiable curiousity leads her into all manner of mystery, mayhem and murder!

#### WAYNE ROGERS CITY OF ANGELS

Wayne Rogers, television's original Trapper John in M\*A\*S\*H, plays Jake Axminster, a cool, cynical L.A. private eye in the 1930's.

From the creators of The Rockford Files, The A-Teom and Simon & Simon, City of Angels captures all of the stark color and intensity of the action drama of the 30's.

#### **FIVE STAR MYSTERY**

Ideal strip programming with across-the-board appeal. 87 suspense-filled hours.

New wrap-around titles. For more details, call (212) 605-2790.

FIRST TIME IN SYNDICATION

#### All but done

Item reconsidering post-sunset power authorizations for AM daytimers was being circulated among FCC commissioners last Friday (Nov. 30), and it was expected that compromise reached by Association for Broadcast Engineering Standards and Daytime Broadcasters Association, which received no opposition (BROADCASTING, Aug. 13), would be approved as matter of course. FCC staffer noted that after order is adopted, commission will have to recalculate power levels for individual daytimers. But that shouldn't take long. "We're committed to doing that as soon as possible," source said.

#### Target: flat tax

Hallway conversations at Western Cable Show this week (see story, page 116) are likely to focus on more than usual industry issues. It's anticipated cable operators will raise strong objections to tax-simplification plan now being advanced by Treasury Secretary Donald T. Regan. Plan would boost taxes of capital-intensive industries such as cable and is considered by industry leaders as highly disadvantageous. Although it is uncertain whether proposal will go anywhere, cable is prepared to fight it.

#### Through roof

National spot radio business in October registered healthy gains, according to data to be released by Larchmont, N.Y.-based Radio Expenditure Reports which confidentially collects financial information from 16 leading rep companies each month, RER reports spot expenditures up 28.9% over October 1983 to \$72,745,500. (RER adjusted October 1983 figures to compensate for five-week standard billing month last year compared to four weeks in October 1984). Year-todate, national spot is running 14.2% ahead of comparable period in 1983.

#### New prospect

Another name on short list of candidates for president of National Association of Public Television Stations is Ronald C. Bornstein, vice president of university relations at University of Wisconsin, Madison. Former vice president for telecommunications at Corporation for Public Broadcasting, Bornstein was acting president and chief executive officer of National Public Radio during network's financial crisis last year. Search process is not officially on agenda of NAPTS executive committee (which is also search committee), scheduled to meet Dec. 12, although it is expected to be discussed. Any decision by search committee must go to NAPTS board, which meets in Houston, Jan. 24, 25.

#### Zeroing in

National Association of Broadcasters is thinking of using new computer system to refine its grass-roots lobbying. Computer would plot every broadcast signal that goes into congressional district. NAB would then be able to recruit all broadcasters serving district represented by legislator targeted for persuasion. Program may prove to cost more than it's worth.

#### Facing it

FCC is now hoping to address must-carry for TV stereo, program-related teletext and other program-related uses of vertical blanking interval at open meeting Dec. 19. Source last week said commission already was receiving "enormous" lobbying from broadcast and cable industries. Indications were that Mass Media Bureau has not yet determined where final item will come out. "We hope to be able to write an item that a majority of the commissioners will find acceptable," said Jim McKinney, Mass Media Bureau chief.

#### Cable entry, maybe

Reese Schonfeld, who heads new program development subsidiary for Cablevision Systems, Woodbury, N.Y., is understood to be working on new national cable program service concept with talk/information/call-in format. Schonfeld declined to provide details last week, except to say concept is "different" from any current service. Go-no-go decision for project is said to be "close."

#### Old school tie

FCC's decision several weeks ago to alter list of major television markets for its cable must-carry rules to include Melbourne and Cocoa, Fla., as part of Orlando-Daytona Beach, Fla. (BROADCASTING, Nov. 26), involved prominent political figure from past. Request for change was made by WMOD(TV) Melbourne and WTGL-TV Cocoa, which had encountered difficulty getting cable systems to carry them under must-carry rules. WMOD made its case on grounds it went on air after FCC established market list in 1972, and who better to make case for WMOD than Lou Frey, ranking Republican on House Communications Subcommittee from 1974 through 1978? Frey is president and part owner of WMOD. He was defeated in bid for Florida governorship in 1978.

#### **Fancier figures**

During Arbitron Radio Advisory Council winter meeting in Carlsbad, Calif. (Dec. 4-6), Arbitron will unveil mathematical formula to calculate four-week audience cume figures by use of special slide rule. Ratings company will also present ideas on redesigning and improving current Arbitron quarterly market ratings book including possibly adding ethnic audience measurements, overnight ratings and more market profile data.

#### Shower of signals

StudioLine Cable Stereo, proposed cable audio service controlled by Western Communications, will make major promotion effort at this week's Western Show in Anaheim, Calif., touting newly developed digital decoder designed to transmit up to 69 stereo audio signals, including nine StudioLine pay channels. Box, priced at about \$100, will feed audio directly through subscriber's amplifier rather than empty portion of FM band. Reston, Va.-based firm plans spring 1985 roll-out of seven noncommercial music channels, ranging from country to classical, plus two "special event" channels.

#### Pay now, get later

Compensation package paid to former Metromedia stockholders has left some with surprise tax bill on debentures for which payout is still five years down road. For each share bought, holders received cash, debentures (similar to zero-coupon bonds) and options to buy future possible issues. Debentures don't pay interest for five years and 16% after that. But in meantime, holders must pay, beginning with April 1985 tax bill, annual tax based on imputed interest they are earning on debentures but won't receive for five years. Company spokesman indicated that Metromedia will calculate imputed interest earned by debenture holders.

#### Viva Las Vegas

The National Cable Television Association, whose annual convention has experienced declining attendance and a shrinking exhibition for the past two years, is working hard to reverse the trend. Its convention committee has come up with some new ideas that it hopes will make the show, set for June 2-5 at the Las Vegas Convention Center, more attractive to cable operators and to exhibitors and, consequently, more profitable for the association.

The NCTA's most successful convention was 1982's, also in Las Vegas. That drew 16,545 people and about 400 exhibitors. But the numbers have dwindled since then. The 1983 convention in Houston attracted 15,627 people and 376 exhibitors, and last June's convention in Las Vegas pulled just 14,805 people and 330 exhibitors.

To persuade cable companies to send more people to the show, said Trygve E. Myhren, chairman and chief executive officer of American Television and Communications Corp., and convention committee chairman, the committee has planned a series of "track sessions," each one intended to provide "expert" instruction in a specific area, ranging from accounting to programing. The idea, he said, is to give someone from every department of a cable company a reason to go to Las Vegas. In the past, he said, "we are not sure we have...."

To lure more companies to exhibit at the show, Myhren said, organizers are promising to keep the exhibit floor open 20½ hours and will not schedule sessions or other events during more than half that time. The organizers, he added, are also scheduling all the general sessions in the Convention Center rotunda, which is adjacent to the exhibit floor. Last year, some of the general sessions were held in a ballroom of the Hilton hotel next door to the Convention Center.

The organizers also hope to provide a forum for the discussion of the cable business in the "deregulatory era," Myhren said. The 1984 cable act, which limits the regulatory power of cities over cable, takes effect Dec. 29. By the time the 1985 convention opens its doors, he said, cable operators will have

Myhren

had some experience dealing with the law as it applies to pricing and packaging cable services, franchise renewals, EEO, leased access, franchise fees, signal piracy and other areas. "Every one of these issues are going to be at the stage where we can really bite our teeth into it," he said. NCTA organizers will also try to convince

NCTA organizers will also try to convince companies in industries that do a lot of business with cable companies, but that have not traditionally exhibited at NCTA conventions, to exhibit next year, Myhren said. About 50 such industries have been targeted, including car, computer and office system manufacturers, he said.

At the same time organizers were thinking up ways to attract more people and exhibitors to boost convention revenues, they were figuring out ways of trimming expenses. In the past, the show has had "more glitz and pizzazz than people wanted," Myhren said. "We are going to cut into that sharply."

NCTA relies on income from the convention for a large portion of its annual operating budget. The organizers of the 1985 convention hope that as a result of their efforts NCTA will net as much from the 1985 show as it did from the 1984 show, Myhren said.

#### 'Lifetime' service

Taking exception to a New York Times article submitting that the promised world of quality programing and diversity on cable television has yet to arrive, Lifetime president and chief executive officer, Thomas Burchill, said the article failed to realize that "any network is in fact a business and needs to maintain a programing balance." Calling the article "highly biased," Burchill maintained that cable needs to provide quality programing. "But in addition to the quality programing there also needs to be a mass orientation. An orientation which allows us to improve subscriber penetration and retention....to serve not just our viewing customers but our affiliate customers as well."

Several months ago Lifetime announced intentions to revamp most of its prime time schedule with programs that would provide that "mass orientation" for the network. (It has been receiving some of the lowest ratings among cable program services.)The old format was skewed too much toward women and included too much information at the expense of entertainment, said company officials. Burchill gave a list of new programs that will be stripped across the prime time schedule beginning Jan. 14. A common theme is that each program will have a callin segment, reflecting the network's new promotional theme: "Lifetime. TV that has America Talking.

The new schedule begins at 6 p.m. with Smart Money, a program about making and spending money produced by Business Times. At 7 p.m. it's Hot Properties, featuring entertainment news and life-style trends, produced by Chelsea Communications. At 8, Regis Philbin, who has hosted a popular series on Lifetime for two years (and

Broadcasting Dec 3 1984

before that on the Cable Health Network), will host a variation of that show entitled, *Regis Philbin's Lifestyles*, focusing on the "latest trends in better living," from sports to pop psychology to gourmet cooking. Airing at 9 will be *America Talks Back Starring Stanley Siegel*, a current events talk show. At 10 a returing show will air, *Good Sex! With Dr. Ruth Westheimer*, which has proved to be one of the network's more popular series since its debut last August.

The daytime schedule remains largely the same, and is targeted to the female audi-

#### **Call to arms**

Neil Austrian, chairman and chief executive officer of Showtime/The Movie Channel Inc., outlined a plan for the cable industry to combat theft of service, which he said costs cable operators and programers "at least \$500 million a year nationwide." Speaking at a Washington Cable Club luncheon last Wednesday, Austrian named two "essential" components needed to fight theft of service: "a strong law and a powerful antitheft campaign."

For the former, Austrian stressed that every "state that has launched a successful antitheft campaign has first worked on getting specific cable theft language written into its general statutes." (There are 28 states that now have such language, Austrian said.)

"The United States Congress last session set the standard for tough legislation by making cable theft a federal crime and by providing civil remedies to aggrieved parties. Sellers of illegal equipment are punishable by a jail sentence of up to one year and a fine of up to \$25,000 for the second offense," he said, adding that "an aggrieved party can sue violators in federal court for up to \$50,000 in statutory damages... Now there is a law with teeth." He said, however, that "because prosecution is more likely un-

Austrian

der state law, it's important to get tough state statutes against cable theft." Moreover, a "strong law helps because although cable systems can say correctly that they do not wish to prosecute offenders, they must be able to carry out a threat to do so," he said.

A powerful antitheft campaign is also needed to increase consumers' awareness that cable theft "is both illegal and harmful to honest customers." To do this, and to eventually stem the illegal use of cable by an estimated four million homes, Austrian suggested that cable system operators first educate their public officials, law enforcement agencies, state attorney, franchise commission and the media about the problem; use a "no-questions-asked amnesty campaign" for violators with a follow-up "active audit and upgrade campaign," and prosecute "as many of the clear-cut piracy cases as a system's time and budget permit."

Through these marketing efforts, the industry "can reinforce the perception that is at the foundation of our industry: that pay television is television worth paying for," he said.

#### Spread sheet

A new alpha-numeric sports information service, called Cable SportsLine, is being offered by United Video in conjunction with its Cable SportsTracker service. It provides point spreads from Las Vegas for all major and professional sports and is produced by sports forecaster Jim Feist. Officials said SportsLine will be offered to SportsTracker customers, and both services will appear on the same channel at the same time. Its development was speeded because "we had many inquiries from cable system operators who were interested in receiving more than scores, schedules and sports news-they wanted forecasts," according to Reuben Gant, former tight end for the Buffalo Bills football team who is national sales director for both United Video sports information services.

#### **USA** to Cablevision

The USA network announced that its service will be carried on all systems of Cablevision Systems Inc., representing some 500,000 subscribers, under a four-year agreement. USA called it one of the largest such deals in cable network history. The systems are in Woodbury and Yonkers, both New York; Bergen county and Bayonne, both New Jersey; suburban Chicago; Fairfield county, Conn.; Boston; Brookline, Mass., and Geauga county, Ohio. The New York and New Jersey systems launched USA programing on Nov. 1 as part of their basic "Family Cable" packages. Gil Faccio, USA vice president for affiliate relations, said that among other benefits the deal adds more than 300,000 subscribers to our base in the New York metropolitan area," bringing USA's national total to more than 27 million.

#### **Brothers and families**

The Disney Channel said it will launch a new, one-hour series of original programing featuring Dr. Joyce Brothers early in 1985. Officials said The Dr. Joyce Brothers Program "will focus on family life and communication

with upbeat, positive discussions, humor and questions and answers." Brothers will be joined by celebrity guests and also by a guest comedian to provide a lighter touch to the discussions. Celebrity guests set to appear were said to include Dick and Pat Van Patten, Vicki Lawrence, Cathy Rigby, Jerry Mathers, Bruce and Linda Jenner and Lynn Redgrave and her husband, John Clark. There will also be a call-in segment in which viewers may discuss their personal concerns with Dr. Brothers. Fred Tatashore Productions is producing the Brothers show exclusively for The Disney Channel. Ron Weed is associate producer, Terry Kyne is director and Bill Morris is art director.

#### Shannon to VH-1

Scott Shannon, director of programing and operations and morning personality of WHTZ-FM Newark, N.J., has been named an on-air video jockey for VH-1: Video Hits One, the 24-hour video music service that MTV plans to launch Jan. 1. Shannon will continue as host of WHTZ-FM's *The Z-Morning Zoo*. He is also a consultant to other Malrite Communications radio stations and host of a weekly. three-hour radio show, *The Rockin' America Top 30 Coundown*, which is distributed by Westwood One.

#### **Booster child**

MTV: Music Television said its 1984 national sales promotion campaign, called "Basic Booster Bundle," will be followed in 1985 by "Son of Basic Booster Bundle," designed to help affiliates win new basic subscribers and capture "those 18-34-year-old missing cable persons." Officials said affiliates may participate in the promotion at any time in 1985. Elements include an MTV T-shirt, which may be ordered at cost, to be given to new subscribers; MTV flyers and postcards, also available at cost, and—available at no cost—ad slicks, a radio spot and posters. MTV said systems that participated actively in the 1984 promotion reported a 2% average increase in basic subscriber levels, as well as a 2.4% average increase in pay units.

#### **Texas transponder switch**

United Video, satellite carrier for KTVT(TV) Dallas-Fort Worth, will move satellite distribution of the station's programing from Satcom 4, transponder 21, to Comstar D4, transponder 22, on Thursday, Dec. 6. Bob Price, United's senior vice president, cable services, said the move is being made to allow cable systems to retrofit their satellite antennas to receive both Galaxy 1 and Comstar D4. "After polling our KTVT customers," he added, "we determined that the satellite move would help save them money and at the same time enable us to add several new KTVT customers."

#### More 'Paper' work

The Showtime pay cable service has ordered 12 additional episodes of *Paper Chase* from 20th Century Fox Television. Production has begun on the third year of the made-for-cable series with principal cast members returning, including John Houseman as Professor Kingsfield and James Stephens as Hart.

#### BMW North America D New

automobiles will be featured in four-week flight in top 50 markets starting in January. Commercials will be positioned in all dayparts. Target: men, 25-54. Agency: Ammirati & Puris, New York.

Alpo Petfoods Inc. 
Four-week flight will break in 18 markets in early January in support of Alamo dog food. Commercials will be carried in daytime and fringe slots. Target: women, 25-54. Agency: Weightman Inc., Philadelphia.

McRae's Department Store 
Flights from one week to 10 days will begin in mid-December in 11 Southern markets. Commercials will run in all dayparts. Target: adults, 21-54. Agency: Goodwin, Dannenbaum, Littman & Wingfield, Houston.

**Pizza Inn Restaurant** Two-week flight is scheduled to start this week in five Southwestern markets, complementing flights in two other markets that began

Avails nine-month tallies. An analysis of activity for the four Interep companies for the first nine months of 1984 shows that the 25-54 demographic is still the leader for spot radio availabilities, amounting to 33%, followed by 18-49, 19%, and 25-49, 11%. Interep said 15% of the availabilities requested sources other than Arbitron and 95% are based on metro ratings data.

In the spot network area, 25-54 gained the leadership position for the first nine months with 26% of requests, overtaking 18-34, which had led the first half with 21% but fell to 19% for the period ending Sept. 30. The report is based on business at McGavren Guild, Weiss & Powell, Major Market Radio and Hillier, Newmark, Wechsler & Howard.

Blair Radio reported that the 25-54 demographic continued to dominate in the first three quarters of 1984, accounting for 37% of business opportunities. In second place was 18-49, with 15.6%, followed by 18-34, with 13%. Teen-age opportunities remained flat, representing 4.2% of requests.

- STOCKING STUFFERS—Weeks of December 10 and December 17—AP celebrates Christmas and Hanukkah with twenty-five, sixty-second scripts, each with a special holiday theme.
- FLASHBACK '84–Weeks of December 17 and December 24– Relive 1984's biggest news events in our fifty-part series, Flashback '84. Twenty-five scripts move in advance December 8. Twenty-five more run December 15.
- MUSICWATCH—This regular AP feature gives listeners the inside track on country, black, adult contemporary and popular singles. It runs on Friday morning.

Computers are hot. Computer advertising is setting torrid pace in 1984. In first nine months of year, television advertising by computer manufacturers and sales and service outlets rose by 77% to more than \$105.5 million, according to Television Bureau of Advertising. Citing data compiled by Broadcast Advertisers Reports, TVB said computer-related television advertising in third quarter skyrocketed by 203% to more than \$82.8 million. Heading list of manufacturers for nine-month TV spending was IBM, up 77% to \$38.4 million, followed by Apple Computer, up 393% to \$31 million, and AT&T, \$18 million (no TV spending last year). Among sales and service companies, leading advertisers were Computerland, \$6 million, and IBM Products Center, almost \$1.2 million.

Ad growth for cable. Cable television network advertising revenue in 1984 is expected to grow by 39% to projected \$462 million, according to cable advertising newsletter of Paul Kagan Associates, Carmel, Calif. Newsletter also predicted that industry advertising total in 1985 would rise by 34% to \$621 million. Leading cable network expenditures in 1984 were listed as follows: wtbs(tv) \$158 million, ESPN \$58 million and CNN and MTV, \$52 million each.

Weather co-op. Weather Channel announced that Panasonic and Michelin Tire Corp. have signed on with unusual co-op advertising campaigns. Both are providing their participating local dealers with personalized ad tags for presentation on their local systems immediately following each of their national commercials. Panasonic is sponsoring sports weather and regional weather features; Michelin sponsors Weather Channel's travelers' and winter storm updates.

Coming to bat for Braves. Delta Alr Lines and Atlanta Braves baseball team have linked up in deal in which Delta becomes "official airline" of Braves and also one of major broadcast sponsors of Braves' games. Delta will see to air transportation needs of Braves and also take part in promotional and other programs supporting them. "We're proud of the Braves," said R.W. Allen, president and chief operating officer of Atlanta-based air line. "Delta will become a major sponsor of the Braves games being broadcast throughout the nation and even into a number of foreign countries." Braves owner Ted Turner owns superstation wTBS(TV) Atlanta.

Each of these standard mobile units brings with it the combination of the nation's leading mobile system designer, broadcast-quality equipment and a brilliantly-engineered Wolf Coach vehicle.

The AFA2 is a 19' 2-camera ENG/EFP unit that is equipped with your chaice af broadcast-quality calar cameras, a Grass Valley 100-N videa switcher, twa Sony BVU-50 partable 3/4" VCRs and a Yamaha audia cansole.

The AF.B2 is a 23' 2- ta 4-camera EFP unit that features your chaice af broadcast-quality calar cameras, a Grass Valley 1600-1L production switcher, a Yamaha 8 input audio console and two Sony BVU-800 series VCRs.

Both units can be expanded to include 1" VTRs, character generators, editing facilities and more.

The law cast of these standard mabile videa systems will surprise yau. The high quality is exactly what leading broadcasters and praductian and past-productian campanies have came to expect as a matter of caurse from AFA. White Hen Pantry D Convenience stores will stage advertising effort in five markets in Midwest on Dec. 24 and Dec. 25. Commercials will be carried in all dayparts. Target: adults, 18 and

Active billboard. Gannett Outdoor of Kansas City, Mo.; Helzberg Jewelers; Video Masters Inc., and Sony Communications Projects married video technology and billboard advertising this past summer. The companies joined to construct a video billboard. The result was a sevenand-a-half-foot-by-nine-and-a-half-foot screen upon which a commercial is projected using equipment built by Sony. Gannett supplied the billboard site and obtained the advertiser, Helzberg Jewelers. The experiment ran six weeks in July and August and, according to Conee Cowan, vice president and general manager of Gannett Outdoor, Kansas City, it was praised by consumers and by Helzberg. Cowan said her office has received many inquiries from prospective clients from as far away as Canada. She acknowledges there are some roadblocks: the size of display was too small; zoning laws vary from city to city, and some cities do not permit moving parts on a billboard. Cowan told BROADCASTING she had returned recently from Japan where she discussed with Sony the possibility of building a larger billboard. She believes the zoning problem is not insurmountable

# GALAXY III IS POSITION

22,300 miles above the earth, Galaxy III joins the Hughes Galaxy System. Hughes Communications announces the launch of our third C-band satellite, providing state-of-the-art communications for a variety of users.

At 93.5°W. longitude, Galaxy III covers the continental United States, Hawaii, the Caribbean, and parts of Alaska. Galaxy III offers a dazzling array of services, like videoconferencing, voice communications, broadcast TV distribution, and high speed data transmission.

campaigns of two to three weeks, starting in December in 24 radio and nine television markets. Commercials on radio and television will be scheduled in all dayparts in markets including Chicago, Indianapolis, Milwaukee and Minneapolis. Target: adults, 18-49. Agency: Ross Roy, Detroit.

A broadcast station sale commentary from David Schutz, DES Associates, Wyckoff, N.J.

## Tracking the rise in station values

The concept of continual appreciation in the market values of radio and television stations is an accepted tenet among broadcasters. A shortage of vacant frequencies in desirable areas, increasing interest in station ownership and the continuing rise in advertising revenues and operating profits are factors often cited as the causes for escalating station prices.

If the "real prices" (inflation-adjusted) of stations are moving steadily upward, then new capital investors will be needed both to finance additional acquisitions by established owners and to assist first-time buyers. These new investors are primarily financial institutions such as commercial banks, insurance companies and venture capital firms. But to gain greater participation by these institutions we must demonstrate that there is indeed an upward trend in station values and we must provide a measurement of the average annual rate of change in values.

There are three essential questions that must be answered:

1. Is it possible to show that the majority of radio stations are in fact appreciating in value?

2. What is the rate of appreciation in station values based upon recent sales?

3. What are the financial returns that might be realized by the typical equity investor in an appreciating station?

The answers to these questions can be found by examining the records of stations that have recently been resold. A detailed review of more than 650 major radio station transactions in 1983 provides 207 cases where it was possible to determine the original price paid by the station's current owner. This is smaller than the total number of transactions because of the elimination of partial ownership sales, situations where the station had been owned for more than 15 years, and cases where the station had been constructed by the seller and was being sold for the first time. The study was restricted to radio because of the relatively few television sales from which to extract a meaningful sample.

Among the 207 radio sales, 143 stations were resold for the same or a higher price than their original acquisition cost. Sixty-

David E. Schutz is an independent broadcast merger and acquisition consultant based in Wyckoff, N.J. Prior to the establishment of his own company, he was an associate at Frazier, Gross & Kadlec in Washington. He has also worked at several radio and television stations during his 17year career in broadcasting.

four stations were resold at a lower price, representing a capital loss to the owners. Because of the variations in the duration of ownership for different stations, it is not meaningful to consider the gross appreciation or depreciation in values. Rather, it is the effective "average annual rate" of change in value that is significant.

Overall, the 207 transactions showed that on average, station values had increased at a 14% annual compounding rate. This is greater than overall monetary inflation in recent years and clearly demonstrates that "real" station values are in fact increasing.

A 14% annual appreciation in market value is commendable in any industry. Yet this figure still understates the increase in value of successful stations.

A closer examination of the 64 stations that were resold at a loss reveals that most of them were "AM stand-alones" that were purchased in the 1978-to-1981 period. A strong argument can be made that this was an atypical time in the radio industry. Most of the AM stations that lost value were "fully developed" properties in markets where FM broadcasting was just reaching maturity.

Let's assume that the growth of FM produced a one-time adjustment in the value of these AM stations. This gives us a rationale to exclude the 64 cases where stations suffered a decrease in value. With the exclusion of these transactions the average annual increase in value among the remaining 143 stations was 25%.

We have now answered two of our three original questions and found that there is a sound justification for our belief that radio station values are moving upward. But the crucial question remains: What are the possible returns for the station's owner, who in most cases will be a primary equity investor?

Prudent station buyers obtain higher returns on their equity investments by leveraging them with funds from commercial banks and/or subordinated lenders. In today's environment it is quite common for commercial banks to lend a buyer an amount equal to from five to six times a station's demonstrated cash flow. Assuming that we buy a station for eight times cash flow and do not use any subordinated debt, our equity investment would equal two to three years of cash flow. In effect we have just leveraged our equity investment on a two-to-one basis (debt to equity). Depending upon the loan's interest rate and our income tax status, the 25% annual increase in a station's gross market value could produce an annual return on our equity investment in excess of 40%

Confirmation of the perception that station values are appreciating is beneficial to present owners and first-time buyers as well. This may be difficult for the prospective new owner to comprehend as he watches the market prices for stations continue to spiral upward and presumably beyond reach. Yet it has been the overall growth in station profits and market values that have caught the attention of commercial banks, insurance companies and venture capital firms and are prompting them to provide financing for station acquisitions. These are capital sources for the prospective station buyer that until recently had overlooked the broadcasting industry.

The financial community's interest in providing both loans and equity capital for station acquisitions will continue to increase as long as the earnings and market values of stations move upward. Since there are few foreseeable threats to either station profitability or increasing station values, these financial institutions will play an increasingly important role in financing station acquisitions both by established broadcasters and by first-time station owners.

# Every anchor talks about him.

Reenactment of interview 7/27/84; broadcast 7/31/84

On July 31, 1984, viewers of six local news programs witnessed a dramatic, new dimension in television journalism.

They saw their local anchors interviewing President Reagan in person. Asking their own questions. Getting exclusive answers from the White House.

These local stations and their viewers made broadcasting history that day.

They were pioneering an exciting new phenomenon called I ON I EXCLUSIVE. It is a breakthrough enabling local TV

anchors to interview newsmakers via satellite. Prominent national figures such as Pres-

ident Reagan, Defense Secretary Caspar Weinberger, Olympic Committee President Simon, White House hopefuls Mondale and Ferraro, as well as leading names in sports and entertainment.

These timely interviews can be tied in directly with fast breaking local developments of the day, giving your news an authoritative informative immediacy that until now was the sole franchise of the networks.

Stations can schedule these interviews on a market exclusive basis for a surprisingly modest fee

Another important element of 1 ON 1

## A PROGRAM GREAT ENOUGH TO BE CALLED

AMERICA is ambitious. Aiming high. Designed to do more for the transition between soaps and news than any program ever has. Original afternoon entertainment, with premium revenue all its own, with a stable, promotable viewer franchise that won't wear out. AMERICA will set a station apart from its competitors.

AMERICA is jam-packed with everything that makes our country exciting every day. On-location premier performances by today's best entertainers. The people, places, and happenings that make this day special and unique. And what'll be hot tomorrow: Gossip that's sizzling the grapevine. What's selling and who's buying. What's soaring and who's stumbling. All in an hourlong, day-and-date 52 week series before a live audience!

## AMERICA'S FAMILY

SARAH PURCELL. Co-host of #1 rated morning shows in San Diego and Los Angeles and star of NBC'S REAL PEOPLE.

STUART DAMON. Three-time Emmy Award nominee as Dr. Alan Quartermaine on ABC's #1 rated GENERAL HOSPITAL. Perfect appeal for the afternoon audience.

McLEAN STEVENSON. Network and syndication star in M\*A\*S\*H and veteran TONIGHT SHOW guest host.

AMERICA'S FAMILY—Sarah Purcell, Stuart Damon, McLean Stevenson —warm, believeable and personable. They're diverse and talented. Together they have fun with people and make AMERICA fun for the viewer. Only AMERICA brings top network star quality and familiarity directly to syndication.

AMERICA has another great goal to combine the strongest afternoon entertainment franchise with what every affiliate needs most: Powerful and consistent news lead-in. The Winner's Edge in news is lead-in. We know now that the ideal news leadin is not more news or expanded news, either local or syndicated. What's needed most now is an entertaining News Companion.

And Paramount Television Domestic Distribution, with station partner Post-Newsweek, are the companies with the right people to execute this bold concept. Woody Fraser and Susan Winston—the creative team behind GOOD MORN-ING AMERICA. With production credits for programs in all day parts, no one has had better experience, individually or as a team. And no other studio has the production talent and commitment to successfully mount and maintain an hour-long 52-week, day-and-date series this ambitious. A program as big as AMERICA demands a studio experienced in quality first-run series and with the demonstrated ability to deliver the excitement that delivers the audience.

\*At least one-third of all news viewers do not perceive any difference between newscasts, and are brought to the news program by the lead-in.

Source and data base available on request.

#### CONCEPT. TALENT. EXECUTION. DISTRIBUTION. PROMOTION. TO WIN, YOU MUST HAVE THEM ALL.

#### Who, us?

EDITOR: Your editorial, blaming the delay in a final presidential decision on the question of alternative satellite systems on a "turf war," is just plain wrong. Also inaccurate is your statement that "all sorts of communications interests have been affected by this disorder in the bureaucracy." Like what?

State and Commerce have worked well together on any number of cases, and will continue to do so. Our new agreement reflects an effort to make the public aware that each has responsibilities in international communications, and attempts to put more

DEADLINE: Jan. 31, 1985 Wm. Detweiler, PR Chairman structure in the relationship. On matters such as the DBS-RARC, the HF-WARC, the Space WARC, instructions to Intelsat, bilateral meetings with other countries, transborder satellite applications, transborder data flow issues, and many others, we have had a cooperative and productive effort between us.

Perhaps BROADCASTING should try to understand that differences between departments with different responsibilities and different points of view don't always add up to a "turf war," although that makes for good copy, and a lot of good gossip.—David J. Markey, assistant secretary for communications and information, Commerce Department, Washington.

#### A vote for projections

EDITOR: Can your readers stand one more comment about the networks' ability to fore-cast election winners?

All this hullabaloo against the networks reminds me of the fight I used to have in this small market with people who'd bring us a local news item and ask us not to use it until Thursday...the day the weekly paper came out.

It took us a while to teach them that we were not going to let them take away our ace in the hole...the thing the other area media couldn't match. And when they argued the point, I simply asked them what the local paper would do if it were a daily, and we were on the air one day each week. Would the paper wait for us? No answer needed.

And so you may be sure that if the nation's papers could match broadcast's immediacy, you wouldn't be reading all the ridiculous hue and cry about our ability to predict and air the answers too soon. Print knows how to use the First Amendment, but they don't know how to share it.

One more thought: Even if I knew who was going to win the top two slots, I'd still go to the polls to vote for U.S. senators and representatives and my state and local candidates. Anyone who blames low vote on the top two slots is offering puny excuses, not reasons.—B.D. Thornton, president-general manager, KMAM(AM)-KMOE-FM Butler, Mo.

# Introducing AP NewsPower 1200

#### Now you can break the AP news story you want 18 times faster.

AP has its fastest breaking news story ever. Our NewsPower 1200. It delivers AP quality news and features at 1,200 words per minute, 18 times faster than the standard AP Radio Wire.

#### Weather in a flash. Sports as soon as there's a score.

15

NewsPower 1200 is so fast it can move sports scores the moment they happen. Dow Jones averages the minute the market closes. State and regional stories the second they break.

And weather information comes to you directly from the National Weather Service!

It delivers all the quality news programming radio stations expect from AP, on a system that's been fully researched, designed and tested to meet AP's exacting standards and yours.

50

45 9

Total control, even at this high speed. NewsPower 1200 also gives you total control over the categories of

news you receive. And the volume of stories coming into your newsroom. You can get everything that's currently on the AP Radio Wire, or program the elections to your requirements.

#### The news you need, when you need it.

Every hour you'll get ready-to-air summaries of the top news stories, if that's what you want, in plenty of time for top of the hour newscasts. State and regional news moves well in advance of your busiest day parts. And AP's highly salable features arrive in a fresh morning drive package.

#### Speed, selectivity and reliability – a powerful combination.

If you're ready to get the weather faster, gain control over your news volume, and still keep the highest level of programming quality and salability you're ready for AP NewsPower 1200.

For more information call your local AP Broadcast Executive or Glenn Serafin, collect, at the Broadcast Services Division of The Associated Press. 202-955-7214.

Associated Press Broadcast Services. Without a doubt.

### 'Discount' plan roils the waters of 12-12-12

The FCC is now hoping to reconsider the television aspects of its controversial 12-12-12 multiple ownership rule fast—perhaps as soon as its open meeting Dec. 19.

As of last week, group broadcaster Metromedia appeared to have cause for optimism. The networks, however, were in a tizzy about where that item might be heading.

The shocker for the networks: FCC Chairman Mark Fowler reportedly had seized upon the notion of "discounting" the value that would be placed on independent VHF's and independent and affiliated UHF's, a concept originally broached in comments by Metromedia (BROADCASTING, Sept. 17). The networks say such a discount would unfairly limit their ownerships.

One high-level commission source said Fowler last week was pushing the concept of a double cap that would consist of 12 stations or a 27.5% audience reach, with a discount mechanism folded in for good measure. One version of the discount mechanism being discussed last week would call for counting independent VHF's and affiliated UHF's for only 50% of their theoretical reach in a market, and counting independent UHF's for only 25% of their theoretical reach.

Fowler's office declined to comment on the specifics of any proposals. But Thomas Herwitz, legal assistant to Fowler, conceded that the chairman's office was "interested" in the discount concept. "But we're looking at a number of plans," Herwitz said.

The good news for the networks, however, was that, as of last week, a majority of the commissioners did not appear to be sold on the discount concept. One high-level commission source said it was even believed, in certain circles, that Fowler's 27.5% figure was too generous to pass muster on Capitol Hill. The source said that Commissioners James Quello and Mimi Dawson had problems with the discount approach, and that Quello and Dawson "seemed" to think that a combination of Fowler's original numerical cap of 12 with Dawson's originally recommended 25% (for VHF's)/30% (with UHF's included) reach cap was the way to go. Fowler's discount approach, the source said, seemed to serve the interest of one or two independent groups at most and discriminated against the networks. "It [the combination of the original Fowler and Dawson proposals] might be easier to sell," the source said.

In comments in the proceeding, Metromedia had argued for discounts for independent VHF's and independent and affiliated UHF's—a concept the Association of Independent Television Stations later endorsed (BROADCASTING, Oct. 22)—for consideration of actual audience share discrepancies. Metromedia pointed out that in the top 50 markets, the average networkaffiliated VHF had a 23% share; the average affillated UHF had a 13% share; the average independent VHF had an 11% share, and the average independent UHF had a 6% share. "It would be irrational, and an abuse of discretion, for the commission to adopt an ownership rule which was based solely on theoretical audience reach," Metromedia maintained.

One FCC source said the networks had been registering their opposition to the discount proposal at the commission, contending that it discriminated against the networks and affiliates.

But Jim Hedlund, INTV vice president, government relations, last week said that was "absurd." He said that by failing to include the consideration of actual reach, the commission, with a theoretical reach limit, would be discriminating against the independents in favor of affiliated VHF's. "The networks have it the other way around," Hedlund said.

Some other problems being cited with the discounting mechanism: It's alleged that it would fail to take into its calculations markets in which independents are powerhouses and that it would favor those having the least success in the marketplace. Some sources say that, practically speaking, it also appears to be designed solely to permit a single group broadcaster—Metromedia—an opportunity to get 12 VHF's in the larger markets.

FCC sources, meanwhile, said there is consensus among the commissioners on eliminating the sunset provision. (The original rule would have dropped all television ownership limits in 1990.) It's also said there is a general consensus for a double cap: that is, combining the numerical limit of 12 with a limitation based on a percentage penetration of television households.

Several sources speculated that Fowler, in attempting to draw support for the discount concept, was attempting to put his brand back on the proceeding.

Whether the commission will be prepared to act on Dec. 19 its last scheduled meeting of the year—remains to be seen. Jim McKinney, FCC Mass Media Bureau chief, said the commission was hoping to be able to act then in an effort to get its reconsideration order to Congress, which stayed the effectiveness of the television aspects of the commission's original order (BROAD-CASTING, Aug. 13), as soon as possible. Other sources said the commissioners also were hoping to address the item in December so they wouldn't be plagued by ex parte problems, and would be able to avoid last-minute, ad hoc lobbying, at the Association of Independent Television Stations and NATPE International conventions in early January.

# Accommodation in the wind?

### Cable, broadcasters tiptoe toward the tulips of compromise involving must carry and/or copyright action

Representatives of the cable and broadcasting industries met last week to discuss the chances for a compromise on must carry legislation, possibly involving a quid pro quo on copyright.

Details of the discussion between National Cable Television Association President James Mooney, National Association of Broadcasters President Eddie Fritts and John Summers, NAB executive vice president for government relations, were sketchy. Described as primarily an informal discussion on must carry, Fritts said it was an "exploratory conversation" focused on two options: "Putting together a must carry-only package or a package that might include must carry and involve copyright considerations." Fritts would not disclose specifics. But there has already been some speculation within the Washington communications community that the package would affect some compulsory license fees cable systems now pay for some distant broadcast signals—the socalled syndicated exclusivity surcharge as well as the 3.75% rate for signals added after the FCC dropped its distant signal rules.

The cable industry, and particularly superstation owners, staunchly opposed those actions by the Copyright Royalty Tribunal. During the last Congress, legislation was introduced in the House (H.R. 5878, H.R. 2902 and H.R. 3419) and Senate (S. 1270) to limit the impact of the CRT decision. H.R. 5878 cleared the Copyright Subcommittee but was never considered by the par-

### Another nail in the DBS coffin: Comsat bows out

It appears unlikely that Comsat will ever be in the direct broadcast satellite business, even though it has spent five-and-a-half years and around \$140 million gearing up for it. At a special meeting in New York last week, the Comsat board voted not to move forward with a proposed DBS partnership with Prudential Insurance and Doug Ruhe, a co-owner of UPI, and to drop plans for the merger of Comsat's DBS subsidiary, Satellite Television Corp., with United Satellite Communications Inc., of which Prudential is the principal owner.

Although Comsat still professes an interest in DBS and will retain a "high-level nucleus" of between 10 and 15 STC executives to review Comsat's DBS options, most observers felt that the partnership and merger were Comsat's last best hopes to get in the business and recover its enormous investment in it.

According to Comsat President Irving Goldstein, who briefed reporters in Washington, Comsat decided to pull out of the Prudential-USCI deal because, from the way it was structured, the risk relative to the additional investment needed was simply too great. Comsat did not have "enough confidence that [it] would make a success of that business at a level of risk that was acceptable," he said. Goldstein would not discuss details of the proposed deal. But UPI reported that venture would have cost \$350 million over several years and required initial investments of \$90 million from Comsat, \$40 million from Prudential and \$25 million from Ruhe.

Although Comsat has spent \$139 million on DBS since inception of the idea in the spring of 1979, the hit on the Comsat shareholders is not nearly that big. According to Goldstein, around \$75 million of the money resides in two high-power direct broadcast satellites now under construction by RCA Astro-Electronics. Comsat still owes \$40 million on the two birds, Goldstein said, but it should be able to recover the full \$115 million through the sale or lease of the satellites or through some unspecified application. Tax write-offs will mitigate the remaining losses.

The collapse of the joint venture also probably means the end of USCI, a fivechannel DBS service serving the Northeast and Midwest that was launched Nov. 15, 1983. It managed to sign up about 10,000 subscribers before it started running out of money. The deal with Comsat was a last-ditch effort to save the venture. According to a Prudential spokesman, the company, which has poured \$68 million into the venture to this point, "has substantial concerns about its investment in USCI in light of Comsat's decision.... We are... faced with a real possibility that our investment in this promising technology will not work out." The USCI board intends to meet shortly to decide the companies future, he said.

### ent Judiciary Committee.

The concept of trading must carry for a reduction in the fees was characterized by Mooney as asking cable to "play poker with Valenti's money [Jack Valenti, president of the Motion Picture Association of America]." Roughly 70% of the royalties go to program suppliers, with the rest divided among broadcasters and professional sports interests. "I am not going to make a deal with broadcasters by spending Valenti's money. A deal like that would not have a praver for survival," he added.

But cable's interest in copyright includes more than just the 3.75% rate hike. NCTA is equally concerned about what it calls a "lack of statutory guidelines for the CRT and Copyright Office to follow." H.R. 5878, introduced by Copyright Subcommittee Chairman Robert Kastenmeier (D-Wis.), would among other things reduce the size of the CRT from five to three commissioners and authorize the tribunal to hire a chief economist and general counsel. It would also establish specific standards to be considered by the CRT in making royalty adjustments introduced since the FCC dropped its distant signal rule, including the extent to which television stations compensate copyright owners for programing sold to superstations, and the impact on subscribers.

"We're talking about the situation and what the possibilities are," Summers said.

Broadcasters, he added, are interested in heading off any major confrontations, "if we can." NAB's top priority, he said, is to achieve codification of must carry.

At this stage, however, NCTA and NAB stressed it was too soon to talk about specifics. "It's far too premature to talk about what broadcasters might give or might take," Fritts said. Furthermore, he said, no decisions would be made on the matter until his board had a chance to decide what position the industry will take. NAB, he noted, also plans to meet with MPAA "to advise them of our interest in moving forward on some form of must carry legislation."

Mooney stressed that the meeting did not mean the two industries had begun negotiating. "It was not even a conversation preliminary to a negotiation. The only firm opinion I expressed was, I didn't think it would help things along for me to read about this meeting in the trade press." And, he emphasized, there would be no negotiations "until I have some direction from my board."

Furthermore, he added, "we have not completely thought this through within our own groups." In general, Mooney didn't think NCTA's position next year on copyright legislation would change much. However, "our position in precise terms has yet to be established."

The first step, said Stephen Effros, president of the Community Antenna Television Association, is to "open up the process and ask the pertinent question: Where does cable want to go? And how far do we go?" Effros has already begun to query his membership.

A clearer picture of where cable stands is expected to emerge during this week's Western Cable Show in Anaheim, Calif., which has devoted two panel sessions to the topic (see story, page 116). Further discussion of the subject is expected to occur at the Texas Cable Show in San Antonio next month.

Effros said there were several views within the industry on how best to solve its copyright concerns. (1) There are some who want to de-emphasize the importance of distant signals; (2) others say the copyright law would be all right if it were reasonably applied and that the focus should be on the Copyright Royalty Tribunal and the Copyright Office, and (3) still others feel the CRT is out of control and that the Copyright Act must be rewritten.

CATA, Effros explained, will thrash out these issues with NCTA. Its goal, he added, is to achieve a unified position. He expects that will occur in February when the CATA and NCTA boards meet.

Other copyright matters may enter into future discussions. During the last Congress, a number of related issues arose in conjunction with cable copyright and Effros believes it will happen again. The debate over the video "first sale" doctrine and the question of whether home taping should be exempt from copyright liability-dealt with in an omnibus measure that never got off the ground-could resurface again. Effros also expects there may be requests from lowpower TV, DBS and perhaps MDS operators for must carry protection. There could be even further complications created by the upcoming proceedings at the CRT next year, Effros said (BROADCASTING, Nov. 19).

There are still other variables that could affect the outcome of any copyright negotiations. Even if cable were to reach an agreement with broadcasters on must carry, there are other forces to be reckoned with, primarily Hollywood. The MPAA is not likely to sit quietly by.

"We are prepared to defend ourself, but it's not our intention to start a battle," Valenti told BROADCASTING. The MPAA chief, who will give the luncheon address on Friday at the Western Cable Show, would not predict what might happen on Capitol Hill or reveal the association's legislative strategy. "We do not think it is right or fair for cable to try to keep lowering copyright fees. They're about as low as they can get and still be called a fee right now. We have weapons that we can bring into the battle if we have to but I don't want to fight anybody. I want to go ahead and make good programs and try to get more customers. Let's look to the future without violence.'

Then there are the professional sports interests which are expected to go back to Congress and seek more extensive exclusivity of sporting events on a geographical basis.

Another unknown is Congress. Both NAB and NCTA expect to see similar copy-

What happens to must carry in that subcommittee is another story. Most observers feel that any broadcasting legislation emerging from Congress next session will include some form of equal employment opportunity language modeled after the EEO provisions in the new cable law. Furthermore, it is unclear how much congressional support exists for must carry. "Because must carry is based on the policy that broadcasters are doing special things and are entitled to special treatment, the question must be asked what are they doing that's so special," said David Aylward, general counsel for the House Telecommunications Subcommittee. Moreover, Aylward continued, "they're not going to be able to come up here and say: 'Get rid of all this [broadcast regulation] but give us must carry at the same time."

# President extends free-market doctrine to space

### FCC may now consider applications of would-be Intelsat competitors in international satellite field

The U.S. has moved a giant step toward authorizing the establishment of international telecommunications satellite systems that would operate outside the International Telecommunication Satellite Organization. President Reagan last week, in a statement expected for months, determined that such separate systems "are required in the national interest." Although separate systems that serve regions of the world are already a fact of life, the President's determination is seen as marking the first step in what may be a major reshaping of the organization the U.S. played a leading role in bringing into being 20 years ago.

The determination—conveyed to the FCC in a letter by the secretaries of Commerce and State—is a signal to that agency to proceed with the consideration of five applications for separate service that have been pending for months, 20 months in the case of the Orion Satellite Corp. But final action is still nowhere in sight. The secretaries said that the commission should conduct a proceeding to permit interested parties to comment—and an aide to FCC Chairman Mark Fowler said such a proceeding will be held. The executive branch plans to detail the foreign and donestic policy considerations that led to the President's determination, in a comment it would file in that proceeding.

Furthermore, the letter, in response to a directive from the President that the U.S. meet its obligations under the Intelsat Agreement, calls on the commission to withhold final authorization of any system until it has coordinated its proposal with Intelsat "under Article XIV(d) to insure technical compatibility and to avoid significant economic harm." The coordination would be done in consultation with the foreign partners with whom the American applicants would provide the international service.

The critical question in the controversy to establish separate systems is whether they would have an adverse economic impact on the global system which now provides twothirds of all overseas telephone and data communications and virtually all international television service. Many of the 109 member countries have written to the FCC and the State Department expressing concern that the global organization would be harmed. They say loss of revenue to private systems would result in an increase in rates for member nations—and the applications pending before the FCC, they note, are for service over heavily trafficked communications routes.

The Reagan administration is moving to meet that concern. Commerce Secretary Malcolm Baldrige and Secretary of State George Shultz, in their letter to Fowler, said the proposed systems are to be barred from providing public telephone service—the type of service that generates some 75% of Intelsat revenues. A State Department spokesman last week expressed confidence the U.S. proposals would not harm Intelsat. While stating he did not wish to prejudge the Intelsat consultation process, he said, "The United States would not initiate consultations on any system if it believed it would cause significant economic harm."

And the Reagan administration is going beyond calling for a restriction on service in an effort to assure Intelsat's continued strength in an environment that is becoming competitive. The Commerce Department, in a press release on the President's determination, said Commerce and State have been instructed to address two related issues bearing on Intelsat's ability to compete—pricing and international carriers' access to Intelsat.

Under the agreement establishing Intelsat, the organization averages prices globally as a means of reducing the cost burden on devloping countries located on so-called

"thin" traffic routes. Intelsat Director General Richard Colino has maintained that it would be unfair to confront Intelsat with competition without it having the flexibility needed to set prices to meet competition. The Commerce Department had originally proposed that the U.S. endorse changes in the Intelsat agreement to provide that flexibility. The State Department maintained the organization has sufficient authority under the existing agreement to adjust prices. The press release said: "It is not clear whether Intelsat can vary its prices to meet actual or potential competition. Insuring full and fair competition, however, requires that all entities be allowed to compete."

As for the second issue, the press release said Commerce and State are expected to recommend to the FCC that Intelsat be allowed to deal directly with any U.S. carriers regarding "competitive communications services." At present, the Communications Satellite Corp. serves as the exclusive agent for Intelsat. And the commission in March turned down a proposal that carriers other than Comsat be permitted access to Intelsat. A Commerce Department official said the administration would ask the commission "to revisit" the matter.

Thus, U.S. policy, assuming it leads to the

**Flying high.** Two of the three communications executives who have had the highest hopes that the U.S. government would opt to open the international skies to satellite competition posed last Friday with a map of their primary target area, Western Europe. At left: Thomas McKnight, president of Orion Satellite Corp., who with Christopher J. Vizas II, Orion's executive vice president, first conceived the plan. (Vizas was out of the country last week.) At right: Thomas J. Keller, attorney with the Verner, Liipfert, Bernhard, McPherson & Hand law firm, who has represented the Orion application. Keller was general counsel of the Office of Telecommunications' Policy during the mid-70's and brought both McKnight and Vizas into that organization, and continues to play a key role in their association.

establishment of a number of international satellite systems serving major traffic routes across ocean regions (a policy Colino says would set a precedent for other countries), could lead to a transformation of the organization that was created under the leadership of the U.S. to provide a global satellite service. Instead of having a virtual monopoly on international communications satellite service with uniform pricing, Intelsat would be only another (if major) player in the arena. And in that, the U.S. sees a benefit: The State Department spokesman who answered reporters' questions on the President's action said, "Experience...tells us that the availability of alternative systems leads to increased communication of all kinds.

A number of regional systems are operating—Eutelsat, in Europe; Palapa, in Asia and the Pacific, and Arabsat, which serves Arab countries. But Intelsat found, in the coordination process, they would not cause it economic harm. They either serve proximate countries or provide service Intelsat says it could not provide. Intelsat is also on its way to approving the coordination of a number of U.S. domestic systems that will serve neighboring countries. Intelsat officials maintain such systems do not present the problems for it that would be presented by those being proposed in the applications now awaiting FCC approval.

The issue of coordination-which would not be a simple one in any case-has taken on several layers of controversy as a result of a recommendation by the Intelsat secretariat that the board of governors adopt guidelines for implementing the XIV(d) coordination process. The U.S. objected vigorously to the proposal as one that would virtually assure the failure of any effort to coordinate separate systems. Colino has rejected that view; he says the guidelines are designed to speed the process. But representatives of various U.S. agencies last week were preparing instructions for Comsat-the U.S. representative on the Intelsat board-to oppose adoption of the proposed guidelines when the matter comes up at the board of governors meeting on Dec. 11.

But that is not enough for one of the U.S. applicants, the Pan American Satellite Corp. It has asked the commission to appoint government observers to attend the board of governors meeting as advisers to Comsat. PanAmSat contends that Comsat has an "inherent conflict of interest," in that it is not only the government spokesman but a 23% investor-owner of Intelsat. And, said Pan-AmSat counsel Norman Leventhal, the interests of Comsat shareholders are at odds with the interests of the other U.S. satelliterelated firms.

The depth of the U.S.'s feeling on the issue was indicated by the State Department spokesman when he was asked what the U.S. would do about its Intelsat membership if the new criteria were adopted. "If they were, and if their operation adversely affects the interests of the U.S.," he said, "then, of course, the U.S. would have to consider the implications." The same spokesman noted, however, that Article XIV(d) consultation is nonbinding. "Intelsat's recommendations cannot bar new systems."

Colino was out of the country last week and unavailable for comment. But Comsat issued a statement in which it took comfort from what it saw as the President's "pledge to insure [Intelsat's] continued vitality." It said the key to achieving that policy objective is in finding the means for insuring that the restrictions cited in the Baldrige-Shultz letter-that separate systems be barred from providing public telephone service, be authorized by at least one foreign government and be coordinated with Intelsat-be applied in a manner that effectively limits "the impact on Inteslat's costs and revenues." And to flesh out the new communications policy it said the letter only outlines, Comsat suggested that the commission conduct a rulemaking proceeding "where all parties have an opportunity to provide their comments, recommendations and ideas....

Officials of two of the applicants greeted the President's determination with somewhat more enthusiasm than did Comsat. Orion, which filed its application on March 11, 1983, hailed the President's policy announcement as one that continues U.S. support for Intelsat "while permitting U.S. firms to provide limited alternative systems." Orion President Thomas McKnight said: "It appears to endorse precisely the commercial arrangements that we proposed 20 months ago."

As for the practical matter of government action, Orion expects the commission "to act with dispatch, now that the Reagan administration has announced the outcome of its foreign policy and national interest review." Orion plans to sell transponders to those seeking communications between the U.S. and Europe.

Fred Landman, president of PanAmSat, which intends to link the countries of the western hemisphere with a video and audio service and, in addition, provide a Latin American domestic satellite service, expressed pleasure at the President's announcement. "Now that we have this longawaited decision," he said, "we hope that the FCC will process and authorize our pending application expeditiously, which will enable PanAmSat to bring state-of-theart telecommunications to Latin America."

The President's announcement signaled the breakup of a bureaucratic logjam that had blocked government action on separatesystems issue since last winter. State and Commerce, the leading agencies on the issue, were in basic agreement on the policy to recommend to the White House. But disagreement over what were largely procedural matters led to the submission of conflicting recommendations in April. The two departments finally resolved their differences and, early in November, submitted a joint recommendation to the White House. Then it became only a matter of time until the White House machinery could issue the statement in which the President, who cited as his authority the Constitution and the Communications Satellite Act of 1962, determined that separate international satellite systems "are required in the national interest."

# CIA asks FCC to put licenses of ABC O&O's at jeopardy

### It seeks 'evidentiary hearing' of charges ABC News carried false report of murder plot

The CIA has left little doubt that it's going for ABC's jugular in the fairness complaint it filed against the network at the FCC ("In Brief," Nov. 26). "When the commission's investigation demonstrates, as it will, that ABC has engaged in the deliberate distortion outlined [in the complaint]," said the CIA, "an appropriate action that the commission can take is to frame ABC's misconduct as an issue to be considered in determining whether its stations have the character qualifications to entitle them to license renewals. This action is necessary because of the seriousness and extent of ABC's betrayal of the public interest."

In the complaint, which was signed by CIA Director William Casey, the agency alleged that action against ABC can be taken under the fairness doctrine and the personal attack rule.

At issue are ABC World News Tonight broadcasts of Sept. 19, 20 and 26. In one excerpt cited in the complaint, ABC broadcast a statement by a Scott Barnes, who asserted that a CIA contact had tried to recruit him to kill Ronald Rewald, a Hawaii investment banker who is now under indictment on 100 counts of perjury, fraud and tax evasion. Rewald's firm reportedly was involved in CIA activity; it's unclear to what extent.

In its broadcast, ABC included the CIA's denial of any attempts to kill Rewald.

The complaint also cited an interview in which another man alleged the government had offered him money to drop a lawsuit he had filed against the CIA, and that an unidentified man had asserted that if the fellow was "too much of a pain in the arse," an also unidentified "they" would kill him.

"These were only the two most egregious assertions contained in a virtually totally false and misleading broadcast," the CIA said.

Among other things, the CIA requested that the commission initiate an investigation into ABC's conduct in producing the stories. It also asked the commission to make ABC publicly retract "all false accusations" about the agency, "in particular that the CIA conspired to assassinate United States citizens."

On Nov. 21, World News Tonight anchor Peter Jennings said ABC, in attempting to obtain corroboration, had gone back and asked Barnes to provide further evidence, which he was unable to provide, and to take a lie detector test, which he refused. As a result, Jennings said, ABC News had concluded that Barnes's "charges cannot be substantiated and we have no reason to doubt the CIA's denials."

Patti Volz, a CIA spokeswoman, said the

network had informed the agency that it planned to make that statement. The agency filed its complaint at the FCC on the same date the statement was aired. According to Volz, the Barnes statement had been the report's "most shocking." But she said the network refused to revisit any other aspects of the programing to which the agency objected, and the agency felt that the statement did not go far enough. "The entire program was filled with false accusations," she said.

Said ABC News: "The CIA's involvement in the affairs of Ronald Rewald and his investment company is clearly an important news story that ABC News has fairly and responsibly reported. The CIA's complaint to the FCC was made after ABC News had informed the agency that after further investigation it would broadcast a clarification accepting the CIA's denial of one aspect of our reporting. Moreover, ABC News has afforded the CIA every opportunity to respond. We believe the CIA's complaint is totally unjustified, particularly in light of the clarification we broadcast. The CIA's complaint constitutes an unprecedented effort by a government agency to involve the power of government to suppress vigorous reporting about its activities. It raises serious and disturbing First Amendment concerns. At the CIA's instigation, the matter is now before the FCC. If further comment is necessary, it will be made there."

One broadcaster was quick to come to ABC's defense. William O'Shaughnessy, president of wVOX(AM)-WRTN(FM) New Rochelle, N.Y., told BROADCASTING that "this disturbing move by Big Brother against a major and respected news organization ought to provoke more than a little concern among all broadcasters everywhere. I voted for President Reagan and I admire him greatly, but allowing his CIA director to haul ABC News before the FCC sends a chilling signal that will surely please the President's detractors. Hopefully, the President himself can dissuade Mr. Casey from this not-so-

Herblock in the Washington Post

covert and unbecoming activity."

James McKinney, FCC Mass Media Bureau chief, said it would probably take a "few months" for the bureau to study the complaint and recommend disposition. He thought the complaint "unique" in that he was not aware of any other government agency ever having filed a fairness doctrine complaint at the commission.

In view of that novelty, McKinney said the bureau would ask the the full commission to rule on the complaint if the staff determined that there were grounds for complaint.

# Season to date: HUT's down again

### Networks are attracting fewer viewers in prime time; ABC, CBS performance down from last year while NBC gains in wanted demographics

The recent scourge of network television audience erosion—has returned. After a temporary halt last year, prime time network television ratings and shares and total homes using television have resumed their downward trend. Network analysts blame a variety of factors—everything from rising cable penetration and viewing of independents to the weather—but all take the decline seriously.

During the first nine weeks of the season (Sept. 24-Nov.25), the latest for which complete national ratings are available, the combined network rating averaged a 48.6 and the combined share averaged a 78, down 5% and 3%, respectively, from the averages for the comparable period last season. For the first nine weeks of the 1984-85 season, HUT levels averaged 62.7, down 2% from the first nine weeks of the 1983-84 season. Even given a 1.1 million upgrade in U.S. television homes by Nielsen since last season, the combined ratings still represent a drop of 1.5 million television households.

By comparison, at this time last year combined network ratings, shares and HUT levels were all up significantly over their levels of the previous season.

It was a marked departure from the fall of 1982, when a slump of 3.6 rating and 6 share points from the previous fall had many analysts and observers worried that network television was showing signs of cracking under the pressure of alternative media.

"Last year was an aberration," observed David Poltrack, vice president, research, CBS/Broadcast Group, "principally due to a competitive factor." During the fourth quarter of 1983, Poltrack recalled, the three-network race was marked by a strong lineup of theatricals and made-for-TV movies as well as mini-series. One program that especially affected the fourth-quarter ratings was ABC's The Day After, broadcast on Nov. 20, 1983, which achieved a 46/62 and still holds the record as the highest-rated, made-for-TV movie. That alone, analysts explained, was enough to increase HUT levels for the period. In addition, there were such highly rated shows as the two-part theatrical, "The Gambler" (CBS), and the mini-series, Chiefs (CBS) and Kennedy (NBC).

The latest nine weeks in prime time television have been relatively quiet in terms of special event programing, analysts point out, and that could be affecting HUT levels. Also, the start of the 1984-85 season included some of the least-watched programing ever to be offered by a network: election night coverage and its antecedent, païd-political broadcasts. As *The Day After* abnormally inflated network viewing levels a year ago, election coverage had the opposite effect. On election night, Tuesday, Nov. 6, the combined network share totaled 53, down 22 points from the average Tuesday share this season.

The whole of 1984 has been affected, good and bad, by special programing, explained Marvin S. Mord, vice president of research at ABC. "The fourth quarter is not that much different from the first, second and third quarters," he said. The third quarter had "a slight inflation" from the Olympics. The first quarter had "a slight deflation" from coverage of the primary elections and campaigns. Political broadcasts such as those of the first and fourth quarters "pull network shares down," said Mord, "and they also pull HUT's down. I expect the rate of decline we've seen has begun to stabilize." Mord thinks total network shares will eventually level out in the "high 60's" to the 70's.

Prime time demographic information is available only through Nov. 11 at this time, but the latest Nielsen report confirms the trends reported earlier: NBC has overtaken ABC and even CBS in all key demographic categories and continues to widen its margin. According to NBC researchers, among women, 18-49, NBC leads with an average 12.7 rating, 10% above its year-ago level when it was nearly tied with ABC. CBS comes in second with an 11.6 rating among women, 18-49. (The averages are based on regular series programing, said NBC researchers, and exclude the World Series, movies out of their regular time periods and specials.) NBC leads among women, 25-54, with an average 13.6 rating compared to a 12.7 for CBS and an 11.0 for ABC. Both ABC and CBS fell below their levels of last year in both of those groups, while NBC increased 1.5 rating points. NBC has also snatched men, 18-34, away from ABC, leading in the most recent period with an average 9.2 rating compared to when it trailed behind ABC this time last year by over a full rating point. Among men, 18-34, CBS averages a 7.2 rating, sixth-tenths of a rating under its year-ago level. NBC also overtook ABC among men, 18-49, and leads with an average 9.9 rating compared to ABC's average 9.1 rating. Last year at this time ABC was leading among men, 18-49, with an average 10.6 rating to NBC's 9.7. CBS remains in third place in this category with an average 8.2 rating, four-tenths of a rating point below its year-ago average. In "I don't even think you could say it's a handful of shows," said Betsy Frank, a vice president at Dancer Fitzgerald Sample, New York, about NBC's improved demographic performance. "It's more than a handful of shows," she continued, "and it's the shows that are keying in on the kind of audiences that are very vulnerable because of the weakness of ABC—the shows that are appealing to the younger audiences."

Frank noted that some ABC shows that were demographically strong have lost steam over the past year. One of them is *Monday Night Football*, which while ranking 28th in household ratings between Sept. 19 and Oct. 30 last year, was ranked second in terms of men 18-34, averaging a 15.6 rating. In the comparable period this year (Sept. 17-Oct. 28), *Monday Night Football* fell to a 13.1 rating among men 18-34 and ranked fourth in that group. Similarly, *The Fall Guy* slipped from a 13.0 among men 18-34 last year to a 10.3 in that group in the comparable period this year.

While ABC's lower demographic ratings can be traced to lower household ratings in general, analysts note that NBC has locked up teen-agers (12-17) and children (2-11) in its prime time schedule. Between Sept. 24 and Nov. 11, NBC averaged an 11.6 rating among teen-agers (up from 11.1 in the yearearlier period), compared to a 7.2 average for ABC (down from a 9.8) and a 6.9 average for CBS (down from an 8.1). Among children, NBC advanced to a 9.2 rating, but CBS slipped to a 5.7 rating and ABC fell to a 5.5 rating.

CBS's Poltrack made a similar observation. He noted that NBC has all of the top 10 and 15 of the top 20 programs among teenagers. Among children's programs, Poltrack said, NBC has eight of the top 10, 12 of the top 20, and 15 of the top 30. The top five rated teen-age audience shows are The Cosby Show, Family Ties, TV Bloopers and Practical Jokes, A Team and Gimme a Break. The top five children's shows are A Team, Knight Rider, The Cosby Show, V and Gimme a Break. "NBC has really taken ABC's franchise of teen-agers and kids,' Poltrack said. "It's the 8 o'clock period that ABC had in 1974-77 with such shows as Happy Days, Mork 'n Mindy, Welcome Back, Kotter and Charlie's Angels.

"The Cosby Show is pulling through some of those shows that had been marginal last year," explained DFS's Frank, "like Family Ties, even Cheers and certainly Night Court." While the combined network rating on Thursday is down an average of 3% this season, Frank said NBC's ratings that night are up 13%.

NBC research vice president Gerald Jaffe said that *The Cosby Show* has acted as an anchor to boost not only households but demographic flow for the whole night. He said that *Cosby* draws, on average, 51 women, age 18-49, per 100 sets compared to 44 per 100 sets for *Gimme a Break* which was in the Thursday 8 p.m. time period last season. Among men, 18-49, the percentage has risen from 26 per 100 sets last year to 36 per 100.

Overall, Jaffe pointed out, Cosby has increased the time period 12 share points. "I think it behooves the networks to come on with stronger product if we really want to maintain the network audience," Jaffee said.

But Frank warns NBC had some outside help with other parts of its schedule. "Tuesday is continuing to work for them, but it is working even better this year because ABC doesn't have the power that had been theirs on Tuesday. So NBC took an already strong night and built on it. *Remington Steele*, for example, has really come into its own."

Most analysts are skeptical that ABC can make up the ground it lost during the first one-third of the season to substantially alter its ratings position over the coming months. And they are equally critical regarding the quality of ABC's back-up series and pilots in development. But ABC is not the only network singled out for its back-up series and pilot development waiting in the wings. "CBS has a very successful schedule," commented one network advertising buyer at a top 20 agency, "but it is a very mature and graying schedule. There's very little new blood on that schedule and there are huge blocks of programing that don't have that much more life to them." Given a less than 50% failure rate among new series, the buyer said, CBS's four announced back-up series could not be enough to replace perhaps as many hours in new programing that may be needed by the end of the season. "NBC, on the other hand, is in a terrific position because their successes are still fresh. They still have an opportunity to grow."

Some media watchers see a reversal of network roles in prime time with the rub-off benefiting NBC. "NBC's demographic strength of last year is now being translated into better household strength this year," said Arnold Semsky, executive vice president and media director at BBDO International, New York. "They have hit the magical formula that ABC seemed to hit in the 1970's-which is to get strong 8 o'clock shows and get the kind of shows that appeal to the 18-49 and 25-54 audiences." Part of ABC's problem, Semsky said, is "its reli-ance on Aaron Spelling." He said "it hurts them because they are not getting the first dibs on the good stuff because Spelling gets the best time periods. So producers go elsewhere. It's the same kind of thing NBC had in the early 1970's when 40% of its schedule was from Universal. It's just not a good idea to have that much dominance by one production entity."

### CBS wins Nov. sweeps, NBC improves most

There is something in the November sweeps for everyone—even ABC. But NBC was the only network to come out ahead of where it was last year; both ABC and CBS showed declines, which continues the season-to-date trends reported elsewhere (see story, page 39). Despite its relative setback, CBS emerged the winner in both the Arbitron and Nielsen measurements.

During the Nielsen sweep period (Nov. 1-Nov. 28), CBS averaged a 16.8 rating and 27 share, 5% ahead of NBC's 16/26 and 11% ahead of ABC's 15.2/24. During the Arbitron sweep period (Oct. 31-Nov. 27), the averages were virtually identical except CBS's rating was off one-tenth of a point. ABC's sweeps rating was 14% lower than its November 1983 sweep, while CBS came in 12% under. NBC came in 5% higher during the Nielsen dates and 4% higher during the Arbitron dates.

NBC researchers claim that it was the first time NBC ranked out of third place during a November sweep since 1976. They also said that the last time ABC found itself in third place during a November sweep was 1974.

However, the November rating averages change slightly when rating analysts begin stripping away the special-event programing and begin looking at the regularly scheduled programs and series. According to CBS researchers, CBS averaged a 16.6 rating based on regularly scheduled programs, 1% ahead of NBC's average 16.4 rating and 5% ahead of ABC's average 15.8 rating. Regularly scheduled programs in this case include mini-series like NBC's Fatal Vision or ABC's The Ewok Adventure because they appeared under movie title umbrellas, but exclude CBS's three part mini-series Ellis Island. But with regular series programs only, said CBS researchers—excluding all movies and Monday Night Football—CBS averaged a 17.4 rating, 12% ahead of ABC's average 14.9 rating and 14% ahead of NBC's average 15.3 rating.

Homes using television (HUT) levels during November averaged 62.7, down from a 64.9 in November 1983. The combined network rating fell from a 52 last year to 47.9 this year with a corresponding drop in prime time household levels from 43,580,000 per average minute to 40,670,000 per average minute. The combined network share slipped to a 76.4 from an 80.1 last year.

However, analysts warned that during November 1983 ABC aired *The Day After* which increased overall network viewing levels, and thus any comparisons to last season are made against an extraordinary level. In November, 1982 HUT, levels averaged 63.1 while combined network ratings averaged 51 and combined shares averaged 80.1. Households came to 42,480,000 per average minute.

NBC improvement in the face of an overall lower viewing environment was based in large part on their made-for-TV movies and mini-series as opposed to their regular series programs, analysts said. In contrast, much of CBS's weakness was concentrated during its movie nights. Movies on NBC during the sweep period averaged a 20.8 rating, compared to movies on ABC which averaged a 16.9 and CBS's movies which averaged a 12.4.

And NBC's movies were fueled by *The* Burning Bed as well as the mini-series, *Fa*-tal Vision, among the highest-rated programs during the sweeps.

# The music dies for Turner

### TBS shuts down Cable Music Channel, selling selected assets to competitor MTV; financial loss to Turner may be nil

Ted Turner faced the music last week and shut down what only 36 days ago was billed as the first major challenge to the supremacy of MTV in cable's music video marketplace. As part of the closing of the Cable Music Channel, Turner sold "certain assets" of it to MTV Networks Inc. for \$1 million plus \$500,000 for advertising time on superstation WTBS(TV) Atlanta, Cable News Network and CNN Headline News.

In making the announcement, Turner said in a statement: "We continue to believe that Cable Music Channel is a top quality music video service, but we simply have not had enough support from the cable industry for it to become a viable part of our business. We are very disappointed, but feel that the discontinuance of the service now and the sales arrangement with MTV Networks Inc. are in the best interests of our company."

According to sources, the sale of "certain assets" includes the right to use the Cable Music Channel name and the service's subscriber list. While the former may be of dubious value, the latter is considered not. On Jan. 1, MTV is scheduled to launch a second music video service called VH-1, targeted at the 25-to-54-year-old market. An MTV spokesman said that it already has commitments from cable operators representing three million subscribers. The Cable Music Channel is believed to have about 400,000 subscribers and it was said the deal was struck with an eye to adding them to the VH-1 subscriber base.

The Cable Music Channel in its short life was not without controversy. When Turner first announced the service in August (BROADCASTING, Sept. 2), he said an "aggregate minimum" of 10 million subscribers would be required to launch the service. Company officials subsequently said privately they realistically expected to start with half that many until an internal estimate lowered the count still further to 2.2 million. Then, two weeks after the service was upand-running, TBS revealed that only 350,000 subscribers had been signed up.

At one time, a TBS executive estimated that the Cable Music Channel would have 25 million subscribers by the end of its third year.

From the beginning, the Cable Music Channel was differentiated from MTV: Music Television. CMC was designed to appeal to the 18-to-34 age group, while MTV was targeting the 12-to-34 age group. In addition, Turner vowed CMC's library of music videos would not contain the same levels of sex and violence contained in MTV's. And CMC would be produced live and with offcamera announcers as opposed to MTV, which is taped with video disk jockeys introducing videos and providing information.

But CMC never got off the ground. According to Bonnie M. Cook, an analyst with

J.C. Bradford & Co., Nashville, it was evident from the outset that CMC would not attract the advertising necessary to make it commercially viable. In a financial report dated Nov. 20, eight days before Turner announced CMC would cease operation, Cook wrote that "since this is not a pay channel but is to be supported solely by advertising, the [lack of] support given it is in our opinion a fatal problem."

Cook noted later that Turner's announcement "didn't startle me. The handwriting was on the wall from the minute they had 400,000 subscribers on start-up. And if they wanted to get anything for it at all, they had to [sell] it fast. So I'm not surprised—although I thought it may be another week or two." Cook also said that she didn't believe Turner would incur any major write-off expenses associated with CMC's closing and she estimated the total \$1.5-million price tag would probably cover most of the out-ofpocket expenses invested in the launch.

Cable operators were no less surprised upon hearing the news. "We needed another music service like we need a hole in the head," remarked one chief executive of a leading MSO. "What's it going to do for you? It's not going to increase your subscriber base any more," he said. He noted that 12and 35-channel operators had no capacity left for another service, even though CMC unlike MTV—was being offered to operators free of charge.

Also, the executive said, music videos can been seen everywhere today—from other cable services to network television to syndicated programs and even around-theclock on local full-power and low-power television stations. "MTV's going to have an equal problem with VH-1," he said.

Another cable operator ventured that there is a "substantial residue of mistrust about what happened after the SNC [Satellite News Channels] buyout" that may have hampered CMC's marketing drive. The executive was referring to the raising of CNN's carriage fees among cable operators after Turner bought out his only news competition

### How they'll line up in the Senate

Come next January, the Senate Commerce Committee will have a new chairman. John C. Danforth (R-Mo.) will assume that post as a result of last week's leadership race in the Senate (BROADCASTING, Nov. 19). The election of Robert Dole (R-Kan.) to majority leader has put into motion a series of changes within that chamber including the move of incumbent Commerce Committee Chairman Bob Packwood (R-Ore.) to chairmanship of the Finance Committee. (Senator Barry Goldwater [R-Ariz.] was next in line to succeed Packwood as head of Commerce, but he opted to become chairman of the Armed Services Committee. It is anticipated he will continue as head of the Communications Subcommittee. There are conflicting reports, however, that Goldwater may choose the chairmanship of another subcommittee he is said to be eyeing.) The committee assignments take effect in January.

Despite the new leadership on Commerce, the direction of that committee is expected to remain virtually unchanged. Danforth, whose views on some telecommunications issues have not been revealed, is not, however, likely to differ from Packwood on most matters. An aide said Packwood, who will remain on Commerce, plans to continue his efforts to achieve passage of broadcasting deregulation legislation and to obtain full First Amendment rights for the electronic media.

In the fight for majority leader, Dole won the seat by a vote of 28 to 25 in the Republican caucus, defeating Senator Ted Stevens (R-Alaska), the other finalist. Stevens, who was assistant majority leader, was not the only challenger. Senators James McClure (R-Idaho), Pete Domenici (R-N.M.) and Richard Lugar (R-Ind.) also ran, but were eliminated in the early going. In a secret ballot, McClure was defeated in the first round, reportedly receiving 8 votes, Domenici lost in the second ballot, getting only 10 votes, and Lugar finished third with 13 votes. Dole and Stevens managed to stay ahead until the third round where they were tied with 20 votes each.

In other Senate leadership races, Alan Simpson (R-Wyo.) was elected assistant leader 31-22 over Slade Gorton (R-Wash.). John Chafee (R-R.I.) defeated Jake Garn (R-Utah) 28-25 for the chairmanship of the Senate Republican Conference, and Thad Cochran (R-Miss.) beat Rudy Boschwitz (R-Minn.) 32-21 to become secretary of the conference. John Heinz (R-Pa.) was elected chairman of the Republican Senatorial Campaign Committee, defeating Malcom Wallop (R-Wyo.) 27-26. Bill Armstrong (R-Colo.) ran unopposed for the chairmanship of the GOP's legislative policy committee.

exactly one year less one day before he launched CMC.

Whatever CMC's faults, however, MTV officials are convinced they will not repeat them. "Is the same thing going to happen to us that happened to [Turner]?," rhetorically asked one MTV executive. "No, we don't think so. We're experienced music programers and we're willing to make the commitment to quality product, not just a video jukebox. In theory, he was going after a very general audience, something that never worked in radio. MTV and VH-1 have a very defined audience."

# Appeals court supports FCC regulation of SMATV

### It says commission was correct in pre-empting state rules

The FCC's decision in May 1983 to preempt state and local authority to regulate satellite master antenna television systems has been unanimously upheld by a threejudge panel of the U.S. Court of Appeals in Washington.

The panel held that the commission was within its authority in banning regulation it felt would "chill the development of SMATV service." The commission held that such regulation would conflict with its congressional mandate to foster the development of a national communications service. And the commission's "reliance on market forces to regulate the entry of SMATV into the cable television marketplace," the panel held, "is consistent with its statutory mandate." Indeed, the decision makes a strong argument in favor of marketplace regulation.

The panel acted on an appeal brought by the New York State Commission on Cable Television from the commission decision to extend its Orth-O-Vision decision of 1977 to pre-empt state and local regulation of MDS. The commission had acted on the petition of Earth Satellite Communications Inc. which was seeking relief from a New Jersey state court order that prohibited ESCOM from installing an SMATV system in a 250-unit apartment building in East Orange. The court, in turn, had acted in response to a cable television franchisee that had argued ESCOM was violating the New Jersey Cable Television Act by installing its system without first obtaining a license from the New Jersey Board of Public Utilities.

The commission based its authority over SMATV on the federal interest in "the unfettered development of interstate transmission of satellite signals." It said that development would be frustrated if each state imposed its own entry restrictions on systems that were part of the national satellite network. And it chose not to adopt restrictions of its own, on the conviction that open entry policies would create a more diverse and competitive telecommunications environment.

The New York commission made two principal arguments-that pre-emption of state and local regulation of SMATV runs counter to established policy of allowing local jurisdictions control over the franchising of traditional cable systems and that commission policies cannot be advanced by the agency's determination to allow SMATV to enter the telecommunications marketplace unregulated. The panel, in an opinion written by Judge Edward A. Tamm, rejected both. It concluded that the commission's action is, quoting the Supreme Court in another case involving commission authority, a "reasonable accommodation of conflicting policies that are within the agency's domain.

As for the first argument, Tamm noted that it "ignores the critical distinction the commission has made between cable television systems that use public rights-of-way and systems, like SMATV, that operate solely on private property." Under its "dual regulatory framework," Tamm wrote, "the commission has consistently retained exclusive authority over those elements of cable television that do not involve the use of public rights-ofway." decision not to impose entry regulations on SMATV, Tamm said that the commission does not have unlimited authority to use the marketplace as a regulatory mechanism. It cannot, for instance, "promote competition for competition's sake," since the market cannot always be trusted to operate in ways consistent with the public good, he said. But, Tamm added, quoting from a decision in another case, " 'the public interest touchstone of the Communications Act, beyond question, permits the FCC to allow the marketplace to substitute for direct commission regulation in appropriate circumstances."

regulation in appropriate circumstances.' " More than that. Tamm maintained that government regulation cannot be invoked simply because marketplace regulation might adversely affect "existing and developed [cable] franchises." He said: "Measuring the public interest standard of the Communications Act with sole reference to the impact commission action would have upon a developed technology insures a regulatory regime frozen into maintaining the status quo. We cannot read into the Communications Act a congressional intent to so prevent innovative technologies from conferring substantial benefits upon the viewing public."

As for the challenge to the commission's

### Westmoreland vs. CBS: Week eight

CBS defense attorney David Boies and General William C. Westmoreland continued their game of thrust and parry last week as Westmoreland chalked up his eighth and ninth days on the witness stand in the libel trial that is now in its ninth week. For every acusatory question raised by Boies, or every ostensibly damning exhibit cited, Westmoreland had a quick reply or explanation, the plausibility of which will ultimately be determined by the jury.

Westmoreland's testimony was limited to three days last week. He complained of back pain (said to be a recurring problem) Monday evening and was excused for two days, giving the jury an unexpected holiday.

But during the first two days that Westmoreland came under cross examination last week, he and Boies clashed repeatedly over what Boies contended were contradictions in the enemy troop strength estimates that Westmoreland delivered to President Lyndon B. Johnson in November of 1967 and the estimates published in the order of battle prepared by the general's intelligence command. The focus of those clashes was a bar chart that was prepared for Westmoreland by his staff to brief the President concerning enemy strength estimates for the years 1965-67. For the third quarter of 1966, that chart pegged enemy strength at 285,000, excluding two categories of self-defense forces and political cadre. Yet, the official order of battle estimates published a year earlier for August 1966 showed a figure of 282,452, but which did include those self-defense units not included in the estimate given the President. And the estimate given Johnson for the third quarter of 1967 was 242,000, a decline of almost 40,000 troops over a year.

Westmoreland refused to recognize any discrepency between the two estimates, at one point telling Boies, "I understand this chart, which apparently you don't." Boies, attempting to show that the only way Westmoreland could show a decline in enemy strength to President Johnson was by deleting some previously counted troops from the estimate, countered by referring to previous testimony by former national security adviser Walt Rostow. Rostow had testified that the estimate given to Johnson for 1966 included the self-defense forces, while the 1967 estimate he received did not.

Replied Westmoreland: "I don't know how to tell you this, Mr. Boies, but you don't know what you're doing." He went on to explain that Rostow was mistaken in his belief that 1966 estimate given to Johnson included the self-defense forces. "So it is your testimony that Dr. Rostow and I didn't understand the chart?" Boies asked. "Well, certainly you don't," replied Westmoreland, who went on to say that the 1965 and the 1966 estimates supplied Johnson in 1967 had been "retroactively adjusted," with the President's knowledge, because of the new policy established in the last year excluding the self-defense forces from the actual combat strength of enemy troops.

# Pioneering. Professional. Award-winning. That's RKO Television News.

RKO Television maintains an ongoing commitment of service and involvement with the markets we serve. It shows in everything we do from programming to public affairs to news.

This past year, RKO Television's WOR-TV pioneered a totally new concept in local TV news: a complete, concise news program regularly scheduled at 8 PM. We called it News 9: Primetime...the right news at the right time. Since then, it's become *the* news alternative in New Jersey and New York.

In Los Angeles, KHJ-TV's Emmy award-winning Nine O'Clock News broke away from the ever-increasing news clutter with Southern California's only early primetime news. A single newscast at a sensible hour that's steadily making gains in the market.

And in Memphis, WHBQ-TV's Eyewitness News keeps the mid-South informed and aware with its largest news gathering staff and latest, stateof-the-art equipment.

At each station in each market, RKO Television stations have built on our substantial commitment to serve our communities by keeping them informed with local, national and international news. And how it affects viewers' lives. And that's good news to the people of New Jersey, New York, Los Angeles and Memphis.

RKOVTELEVISION Where Viewers Find Answers WOR-TV, SECAUCUS KHJ-TV, LOS ANGELES WHBQ-TV, MEMPHIS

While everyone is looking for news about the new shows of the season, it's "The People's Court" that's still making the headlines.

In its 4th season, "Court" continues to retain its crown as the ENDURANCE CHAMP of first-run syndication, showing impressive gains in market after market over its lead-in to maintain its #1 position.

For winning results, look to the show that continues to get the ratings decision. "The People's Court," now being renewed for its fifth season.

ast year, when the American medical students whom U.S. military forces had evacuated from Grenada during the invasion of that island landed at Charleston Air Force Base, a camera crew from WJXT(TV) Jacksonville, Fla., was on hand, for one of the returnees was a woman whose parents live in Jacksonville. The crew interviewed the woman, live, and through a split screen, the station enabled her to talk to her parents as the station's audience viewed the scene.

And Jacksonville. remember, is the 64th market.

The event is not necessarily typical of what stations in smaller markets, or even larger ones, are doing with the technology—satellite links and three-quarter and half-inch tape—available to them as well as to the networks. But neither is it extraordinary. For today, the business of broadcast journalism is not only business but news—lots of it, driven by competition for ratings and ambition for excellence.

The fever is not confined to stations. The networks seem to have it, too. News executives in New York talk of the competitive pressures they feel to improve the product they offer. Richard Wald, ABC's senior vice president for news, says, "Competition requires that stories be better written, edited, backgrounded and presented. If you don't do it, the competition will, and the public knows it." To Wald, the competition is more than simply good for the public. He feels it has produced "a golden age of television reporting."

Perhaps. But in many cases the reach exceeds the grasp. Some news directors at stations are still concerned about television anchors and reporters who are as interested in polishing their own image as in serving the community in which they work. And there are critics who say journalism schools are producing a pool of correspondents for whom a broadcast newsroom may hold few mysteries but who lack the knowledge of the world around them that a solid grounding in the liberal arts would provide.

Still, the level of professionalism seems to be rising. And as it does, the public's appetite for broadcast news increases—but not endlessly. Some (though not all) stations have found the two-and-a-

half to three hours of local news to which they expanded in the late afternoon and early evening were a bit much, and have cut back. And surveys indicate a sharpening of criticism of local television news generally. But the quality and vitality of local news operations are more than figments of promotion departments' imaginings. Network news executives take into consideration what NBC News President Larry Grossman says is the "increasing sophistication and quality of the news service" provided by local news operations.

And well they should. For some stories that by any standard are national or even international are being handled with polish on the 5 o'clock news by stations with the wit to know how to make use of the services available to them. For instance, WDIV(TV) Detroit—like WJXT(TV) a Post Newsweek Station-did not wait for the network with which it is affiliated, NBC, to provide, on the Nightly News, an in-depth report on the assassination of Indian Prime Minister Indira Gandhi. Using material provided by Cable News Network, Group W's Newsfeed and the NBC syndicated news service, and with co-anchor Mort Crim providing the narration, it stitched together a rounded report for its 5 p.m. broadcast that included analysis and background, as well as reaction from President Reagan and British Prime Minister Margaret Thatcher. What, some may wonder, is left for the networks to do?

Indeed, Richard Sabreen, vice president and general manager of the Newsfeed network and a major booster of local news operations—Newsfeed services some 80 of them with national news—describes 1984 as "the year in which local TV took control of its destiny and was no longer dependent on the networks." To affiliated stations around the country that would feel naked without the Rathers and Brokaws and Jenningses of this world, that might sound a bit overstated. But it's true that stations are breaking out of the mold in which they once were contained to cover stories of interest to local audiences.

Stations in states with favorite sons seeking the Democratic presidential nomination, for instance, sent camera crews to cover the primary campaigns last winter and spring. Hundreds of stations were represented at the Democratic and Republican conventions by crews that sent back live reports by satellite. (That kind of coverage has become routine.) Even El Salvador can be a local story. WDAF-TV Kansas City, Mo., dispatched a crew to cover the U.S. team that was monitoring the presidential election there last spring. For the head of the team was Kansas Senator Nancy Kassebaum (R). The charity work of a group of Seattle chuch women in El Salvador was sufficient justification for KIRO-TV to send a crew to the Central American country. And when hundreds died in a natural gas explosion in Mexico City two weeks ago, KNBC(TV) Los Angeles-26% of whose viewers are Hispanic-sent a crew to provide live coverage. With a staff of some 200, news director Steve Antoniotti felt he could spare the crew even though another was in Vancouver, B.C., preparing pieces on the Michael Jackson tour that would be shown when the tour reached Los Angeles. "Local" has taken on a meaning all of its own.

### Stations Going Further Afield

As the wDIV(TV) piece on Gandhi indicates, an increasing number of tools are being made available to stations interested in providing news coverage of stories outside their areas. And services to permit such an expansion are proliferating. The 1984 BROAD-CASTING YEARBOOK's listing of radio and television news services runs about nine columns. Besides Newsfeed, which operates as a cooperative as well as a producer of some of the material offered members, one of the major services is News Information Weekly Service, with clients in 110 markets and 60

Newsfeed's Sabreen

foreign countries. NIWS, a subsidiary of Telepictures Corp., produces about half of the material it distributes; the rest is provided by client stations, which include ABC ownedand-operated outlets.

One of the newest-and most novel-aids available to stations seeking to expand their horizons is Hubbard Broadcasting's Conus Communications Inc., which provides access to and from a Ku-band transponder on Satellite Business Systems' SBS III satellite. The network, which became operational two months ago, permits member stations-they buy equity shares in the corporation-to exchange material by way of the satellite. And those who want the capability of covering an event and feeding it back by satellite to the station can buy a truck-mounted earth station for from \$260,000 to \$350,000, depending on the equipment. Before the end of this month, eight of the 10 stations that have thus far bought into the service will have taken possession of a truck. And not all are in the larger markets. One of the eight is Hubbard's KOB-TV Albuquerque, N.M., the 62d market. A more modest cooperative employing satellite technology is the Local Program Network. With the aid of a portable satellite uplink, it enables members to link up with newsmakers in interviews virtually anywhere. In July, the LPN members tied into an interview with President Reagan in the White House.

And for stations looking for a network news service other than the big four—CNN is the fourth-there is Independent Network News, a full-blown national network that is owned by the Tribune Co. and WPIX Inc. INN, now in its fifth year, focuses on perspective pieces. INN President John Corporon says studies have shown audiences tuning in to the late prime time show have already heard the hard news of the day and are interested in background and analysis. The network operates four bureaus around the country and plans the addition of three or four next year. And with the signing last month of Morton Dean, long one of CBS News's most highly regarded correspondents, as co-anchor of INN's newscast, Corporon says, INN is looking ahead to "a smashing year" in 1985.

The growing importance of local news operations has been noted by more than the networks. The Mondale campaign, during the primaries, attempted to schedule arrivals in cities in time for coverage on the local early or late evening news. And while campaign managers during the fall found it more difficult to accommodate local news program deadlines as they scheduled events for the networks' convenience, some of those involved in the campaigns were impressed with the local coverage. "Generally, it was very good," says Don Foley, a Mondale campaign deputy press secretary. In fact, he adds, "in some of the larger markets, stations were competitive with the networks. They didn't allow the network people to get in their way. They know how to push and shove.'

Because of their growing involvement in the business of broadcast journalism, affiliates occupy a position in relation to the networks that is hard to categorize. Like cable television, independent stations and other sources that are eroding the audience for network news, they are competitors. And they are powerful competitors. In two-thirds of the top 50 markets, according to tracking done by Newsfeed, affiliate news programs attract larger audiences than do the network news shows that follow them. But in the case of NBC, at least, Grossman has found a oneto-one correlation between the relative standing in a number of major markets of an affiliate's news programing and the net-work's: "Where they're first, we're first; where they're third, we're third." As a result, he says, "it's very much in our interest to help the affiliates.... We're spending an increasing amount on our affiliate news service"-which enables the affiliates to offer national and international pieces in their "local" news programs and thus remove some of the gloss from the network news programs.

#### The Local-Network Connection

However it is categorized, then, local news is a factor for the networks to consider. "We come on the air at 6:30 or 7 p.m. after affiliates put on two hours of their own news, which will include national stories," says Lloyd Siegel, senior producer for NBC's Nightly News. "We have to do something unique." Lane Venardos, executive producer of CBS's Evening News, puts the problem

# A News Director's News Director

In December 1984, Lou Adler becomes President of the Radio Television News

Directors Association. Lou Adler's career in broadcast journalism has spanned thirty years. Over those years he has been recognized by his peers with some of the industry's most prestigious awards—OHIO STATE, PEABODY, and the EDWARD R. MORROW, NATIONAL AWARD FOR BEST OVERALL NEWS PROGRAM-MING IN THE COUNTRY (1981).

As a tribute to WOR's News Director, RKO General, Inc. is sponsoring a day long semi-

nar in journalism ethics and news gathering. This seminar will be one of the highlights of the 1984 RTNDA International Con-

ference in San Antonio. The program will be produced by Media Society Seminars, whose director is Fred Friendly, and which is affiliated with the Columbia School of Journalism. Arthur Miller, prominent Boston lawyer and star of the syndicated television program "Miller's Court," will moderate.

Lee Simonson, Vice President and General Manager of WOR Radio said, "Lou Adler is not only a man of awards, he is a man who runs a first-rate newsroom, day-to-day. We proudly join his colleagues to salute him." **WORTIO-AM**

We're committed to PM Magazine. Totall But long range. We're demonstrating ou with a million dollar commitmer stronger and the program even mor

### WE'RE COMMITTED TO RESEARCH

An independent firm has just completed the most extensive research into viewers' attitudes in the history of PM Magazine. Who they are. Why they tune in. What they like. What they'd like to see more of. We're sharing details of this comprehensive study with members of the PM cooperative and we're putting the findings into action.

### WE'RE COMMITTED TO LOCAL PRODUCTION

Research confirms the importance of PM's unique "local" quality. We're helping individual stations by beefing up our staff of consulting producers and by having them counsel in all phases of local show production. And we're providing additional dollars to encourage the shooting of particularly appealing stories. Working together to come up with the best local stories ever!

### WE'RE COMMITTED TO NATIONAL PRODUCTION

We've signed top stars to do stories about topics of special interest to them and to viewers Bonnie Franklin's remarkable women. Loretta Swit's world of animals. Sally Struthers with amazing kids. Ben Vereen's stars of tomorrow. Robby Benson's adventures. Bill Rafferty with the funny side of America.

Marilyn Beck is in the field with her exclusive and provocative conversations with Hollywood's biggest stars.

**PM MAGAZINE.** More tha

Not only for this season and the next. belief in PM Magazine's future right now lesigned to make the cooperative even ppealing to audiences everywhere.

Dale Harimoto goes behind the scenes to get fascinating new angles on top names and happenings.

And our national crews are traveling more than ever to come up with unusual stories wherever they are.

### WE'RE COMMITTED TO PROMOTION

We've increased our co-op advertising for all stations. And we're furnishing lots of fresh ideas and new support for local promotions to enhance their community image and win big audiences.

### WE'RE COMMITTED FOR THE LONG RUN

We at Group W regard PM Magazine (and Evening Magazine as it is known on the Group W stations) as a staple. Just like news. Always responsive to viewers' interests. Evolving with the times. Changing for the better.

That's why the Group W television stations are constantly putting their fullest resources — the latest equipment, the finest talent — to work for Evening and PM (and are No. 1 rated in 4 of 5 markets). Source: NSI Oct. 1984 That's why Group W Productions is introducing its PM Magazine Million Dollar Commitment.

And why dozens of stations all over America are continually renewing their commitment to PM, increasingly *the quality alternative* for choice time periods.

# ı program. A commitment.

another way: "People are newsed out by the time 7 p.m. rolls around. That raises the ante. People feel they've seen it all before unless what we're doing is demonstrably better. We have to do a newscast that's substantive and touches all the bases."

In large part, that involves covering stories all over the world. The tragedy of the famine in Ethiopia and the fighting in Central America and Afghanistan, as well as the Gandhi assassination and the move toward arms reduction talks between the U.S. and the Soviet Union (a story broken by NBC's Marvin Kalb)—all were (expensive) grist for the networks' news mills. As ABC's Wald says, even with existing technology, "You forget [such coverage] is still a miracle." With the continued reduction in the size of equipment—ABC is pushing manufacturers for one-quarter-inch tape—such coverage will increase. "TV will never be as omnipresent as print," says Wald, "but it will be at more events, not just the big ones."

In terms of format, the networks are moving away from the headline-news type of service with which their evening news programs have long been identified. For the past couple of years, CBS, whose Evening News with Dan Rather continues to lead the other networks' news programs in the ratings race, has been making a four- or five-minute block of time available on occasion for longer pieces than is normal for a 211/2-minute newscast. Often, CBS will go to what its executives like to call its "strong bench" and assign a Bruce Morton or a Terry Drinkwater to a piece on a significant breaking story. Two weeks ago, Rita Braver did a three-part series on the Justice Department's investigation of General Dynamics Corp. And on one of those nights, Ed Rabel did a longish piece on removing Amerasian children from Vietnam. (But that was a kind of bonus made possible by a light news week. Time does not normally permit two such pieces in a single newscast.) Says CBS News President Ed Joyce of the in-depth stories: "The change has been institutionalized, and we're well pleased.

The look and sound of ABC's World News Tonight and NBC's Nightly News have been altered in recent weeks as the programs' anchors-Peter Jennings and Tom Brokaw, respectively-engaged in interviews with newsmakers and conversations with colleagues. Jennings has interviewed Reagan administration officials-Secretary of the Treasury Donald T. Regan was on the program on Tuesday, to discuss the overhaul of the income tax system he had officially unveiled earlier in the day-and has discussed the economy with ABC News's economics expert Dan Cordtz and medical issues with the network's medical editor, Dr. Timothy Johnson. Jennings even generates the intellectual motor of the network's new commentator, George Will, with questions. "We're involved in evolving a new format," says Bill Lord, executive producer of World News Tonight. "You look at what you've been doing, look at the talents of the anchor and realize, 'This guy understands the material, and can do more-that he can conduct interviews to flesh out the bones of the headline service." "Siegel, too, says the interview technique, as conducted by Brokaw, is an effective means of conveying information. The public, he says, will hear more in an interview with, say, Secretary of State George Shultz, whom Brokaw has interviewed on the news program, than if his remarks "were confined to a 30-second sound bite."

But there is more to NBC News these days than the increased emphasis on Brokaw as interlocutor. In September it pioneered what Gordon Manning, vice president, special projects, calls "a new art form of broadcast journalism": The dedication of all or part of all of the network's news and information slots for a week to a single subject deemed worthy of such attention. It was the answer

ABC's Wald

to the question of how time could be found to examine important issues in an industry where broadcast time is dear, and strictly rationed. The first subject was U.S.-Soviet relations, and was examined in pieces on the Nightly News, the Today show and NBC at Sunrise, that originated throughout the week of Sept. 10 in the U.S. and the Soviet Union. NBC's Meet the Press was also pressed into service: Secretary of State Shultz was the guest on the show on Sept. 9. (Among other things, the project required Manning to play the role of diplomat; he met once in Washington with Soviet Ambassador Anatoliy F. Dobrynin and made three trips to Moscow to make the necessary arrangements, including those for interviews.) Two weeks ago, during Thanksgiving week, NBC treated the subject of The New Pilgrims-the Cubans, Haitians, Cambodians and others who are now arriving in the New World, seeking a better life-in the same manner. Manning believes the network may do four week-long projects a year. One subject under consider-ation is Vietnam. "April," he notes, "will mark the 10th anniversary of the fall of Saigon.

CBS News, which claims to have taken the lead in changing the structure of evening news program—"CBS has developed its form for the 1980's; now the other two are struggling," says Joyce—is also moving ahead in decentralizing its news organization. It has a news bureau in Boston that is a satellite of its Northeast bureau, which is located in New York, and bureaus in San Francisco and Denver that are extensions of the one in Los Angeles. Next year, says Joyce, CBS "will open a bureau in Seattle and in the years ahead it hopes to establish bureaus in Minneapolis, New Orleans and other cities." These will be small offices probably staffed with a correspondent, producer and camera person—but Joyce feels they will give the network "an editorial presence" in various regions, allowing it to "sense the currents of the country."

What's more, Joyce says, in May CBS News will expand the concept of regional news exchanges for affiliates that it established in the Southwest with headquarters in San Antonio, Tex. Some 20 stations in New Mexico, Texas, Oklahoma, Louisiana and Arkansas exchange stories twice a day through a cooperative arrangement run by CBS, which does a nightly feed for them. The exchange benefits not only the stations that subscribe but the CBS News network as well, since the pieces exchanged are fed to New York. Joyce says CBS will establish four other regional exchanges in the next 18 months. "It speaks to the relationship between the network and the affiliate news organizations," Joyce adds.

### Assaults On The Networks

Network news executives, like executives in any news organization, have more to think about these days than how to meet competition. What to some in the press looks like a major assault on their freedom to engage in a robust form of journalism is visible on all sides: General William Westmoreland's \$125-million libel suit against CBS. The \$50-million suit Israel's Ariel Sharon is pressing against Time Inc. The fairness doctrine complaint the Central Intelligence Agency-which over the years has been accused of every black deed imaginable with hardly more than a "no comment" in response-has filed with the FCC against ABC, even as ABC's Jennings was preparing to go on the air to acknowledge that the network had been unable to corroborate one of the charges that had upset the agency, that it had ordered the murder of a man who claimed to have operated a business as a CIA front (BROADCASTING, Nov. 26, and see also "Top of the Week"). And the efforts of the American Legal Defense Fund to raise funds for plaintiffs in libel suits.

There is no sign network news executives plan to throttle back. Joyce—who says he feels very confident about the outcome of the Westmoreland trial—said broadcast journalists "must resist with all possible vigor" such pressures. As for CBS News, he says, "they won't blunt our aggressiveness—look at 60 Minutes."

ABC's Wald takes a philosophical approach. He sees "no immediate danger." He feels the problem is part of the pattern of questioning to which major institutions have been subjected by the public since the 1960's. The media, because of their special situation, may feel they are "getting a raw deal," he says. But they are not immune. "As for the public, as long as we provide

# **OU'RE N nn**' YOUR Clark Higgins, President, InVision

At Sony, we believe the creative process shouldn't be shortcircuited by the limitations of your video equipment. Which is why we created the BVH Series.

It's the most complete line of l-inch videotape recorders in existence. And the only videotape recorders designed to let your imagination run wild.

**INSPIRATION ENOUGH** FOR AN ENTIRE FAMILY | OF VTR'S.

As you'll realize from the examples mentioned below, the Sony BVH Series is equipped to answer everyone's creative needs.

Yet each recorder, from the three-hour BVH-2180 to the High Definition Recorder HDV-1000, is based on the same piece of Sony ingenuity: the BVH-2000. It's the backbone and the workhorse of the industry. And has brought innovations such as extended dynamic tracking, advanced onboard diagnostics and utter reliability to 1-inch videotape recording.

It's also made the following possible.

THE REAL WINNER OF THE 1984 SUMMER GAMES: THE BVH-2700.

The single most amazing thing about the Games wasn't the U.S. Gymnastics Team victory or the first women's marathon, but the Super Slow Motion replays brought to you by Sony.

This unprecedented Super Slow Mo system did more than deliver a flawless performance day in and day out, for two solid weeks, covering over 180 hours of programming. It completely redefined slow motion.

Slow motion replays have never appeared with so much definition. Undoubtedly, the Sony Super Slow Mo system will change the way the world sees sports forever.

> THE BVH-2500. WITHOUT IT, THERE WOULDN'T BE

A "2010 ODYSSEY II." Even for MGM, the creation of complex, animated action sequences seen simultaneously on 80 video monitors for the film "2010" was a monumental job. Clark Higgins, the production head, was given this seemingly impossible task made even more impossible by a shortened shooting schedule.

Sony was the only place to turn. Because only Sony has developed a stillframe videotape recorder. One so revolutionary it has been awarded an Emmy. Not only did the BVH-2500 complete 50 complicated animation sequences two weeks ahead of schedule, but it accomplished something else extraordinary: a job done on budget.

キージー

No. of the other

# VIDEO RESOLUTION THAT GIVES FILM A RUN FOR ITS MONEY.

Sony has opened a vast new universe in video with High Definition Television. The excellent picture quality has given filmmakers a reason other than economics to use video for major film and TV productions.

The HDV-1000, along with the continuing development of other peripherals, will pave the way for an even wider use of video.

A fact recently proven at Robert Redford's Sundance Film Institute, where the most prominent actors, directors and even students see their ideas come to life with the aid of the HDV-1000.

HDVS's performance was so impressive, it was deemed the future of video.

So, if your video equipment inhibits your imagination, there's one reason for it-you're obviously

not using Sony. For information, contact your Sony representative. In the New York/New Jersev area, (201)833-5350; Northeast/Mid-Atlantic. (201) 833-5375; Midwest, (312)773-6045; Southeast, (404) 451-7671; Southwest,(214)659-3600; and in the West, (818) 841- **SONY**. 8711. Broadcast

good service, the public will support us. Are we doing a good enough job? I think we are. But we can always do better."

### Content Vs. Appearance

For years news directors have complained that the business was getting a bad rap in the contemptuous dismissal of local anchors as the product of a hair dryer and make-up kit. The characterization is one that Christine Craft case, whatever its merits and facts, seemed, to the public, to justify. But Post Newsweek Stations vice president for news, Jim Snyder, spoke for many of his col-leagues in calling it "a canard—a lot of people who are successful in television are not glamour boys." And a news consultant who makes a career watching local news programs around the country, Jacques de Suze, vice president of McHugh & Hoffman, agrees. "I see people not handsome, not young, doing very well." Content. Presentation. Relevance. Those are the trilogy news directors and news consultants say is required for success.

But in being a visual medium, television seems to present a unique problem for news directors. "Young people gravitate to local news, half to serve the industry and half to serve their ego," says Ralph Renick, who is news director of wTVJ(TV) Miami and who is to receive the Paul White award "for contributions to broadcast journalism" at the Radio-Television News Directors Association Conference in San Antonio later this week (see page 94). One result, he said, is that news directors feel a greater responsibility to supervise the work of such reporters as they have in the field. Nor is that the only problem confronting news directors. "Agents," he says, are another. "Stars become a commodity of varying worth, and agents try to milk that for all it's worth." (Renick, it may be noted, is a star in his own right. He has anchored the WTVJ evening news since its inception.) And related to that is what Renick calls the "nomadic" nature of the business. He says a room at his station contains "200 cassettes from people looking to move up." (Someone suggested that Renick might show the room to a "star" whose agent was making what management thought unreasonable demands.)

Frank Magid, of the news consulting firm of Frank N. Magid Associates Inc., points up another problem news departments face in looking for personnel. "The stations are well intentioned, but there is not a sufficient pool of talent from which to draw," he says. "There is a lack of suitably trained, mature people." And for that he blames the journalism schools. "They are not doing a good enough job of preparing people for the profession. They are producing technicians instead of people aware of the world around . They have little training in the them liberal arts." The broader training, he says, is what is needed if the aim is to make broadcast journalism "a profession and not a trade

But there is another personnel problem, one that may be more serious than that involving would-be correspondents not quite sure what a city manager in a city manager form of government does, or is. It is the uncertainty of the tenure of the people whose job it is to run the news shop-the news directors. WJLA-TV Washington, for instance, has had three in the past two years. KCBS-TV Los Angeles recently hired its fourth in four years (although that CBS owned-and-operated station seems to promote rather than fire news directors). One news director at a station in one of the top 10 markets is in his third job in three yearsand is rumored to be on his way to a fourth. The precariousness of life as a news director was vividly demonstrated last Tuesday (Nov. 27) when KNBC(TV)'s Antoniotti and the station's assistant news director, Larry Perret, were fired by the station's new general man-

NBC's Grossman

ager, John Rohrbeck, a few days after Antoniotti had been interviewed for this article (see "Fates and Fortunes," page 145).

In part, at least, the turnover reflects stations' concern with ratings, with a desire for a quick fix—despite the warnings of those who have been through the mill of turning a news department around and have found that improvement takes time—two years or more.

But the turnover is only the dark side of the high stakes that local news operations represent. The bright side—according to those in the business who follow such things—is that news directors in major markets who perform are being compensated accordingly: They are finally breaking into the six-figure bracket. Of course, they will probably never catch up with the anchors in their markets, whose compensation may be bumping up against the \$l-million mark.

### Satisfying The News Hunger

This much can be said for the general manager or owner of a station who lacks the patience to stick with a news director when ratings are poor: He may know, in his heart or from the report left with him by a consultant, that there is, on the part of the public, a hunger for news, at least hard, "relevant" news. Magid says the hunger is "insatiable." And that is not because of a lack of news. According to Magid, it seems that news—at least that which is regarded as valuable whets the public's appetite for more. News that is "redundant," he says, will not hold an audience.

That observation appears to mesh with the remarks of McHugh & Hoffman's de Suze. Viewers in many markets have a number of choices as to what news programs to watch, de Suze notes. "To the degree viewers perceive stations' news to be the same, the more difficult the choice," he says. "So they'll make a decision on the basis of utility— 'what's useful to me.'" De Suze says stations attempt to make a difference by offering "self-enhancement" information. But he also noted that stations "try to make their shows look better—a lot of it is style."

And often news directors do speak of the need to use graphics to explain "complicated" stories. The networks are leading the way in that regard. Executives in New York say graphics—with their dazzling illustrative quality—can be used even to make economic stories comprehensible.

But there is no secret to the key to a successful local news program-what makes it stand out and makes it a ratings winner over the network news show that follows it. It is the success with which it presses the advantage of its relationship to the community. The Albuquerque market, which includes Santa Fe, is served by eight television stations, and the community is tricultural--Anglo, Hispanic and Indian. John Andrews, news director of KGGM-TV, sees the station's function as focusing on New Mexico and its special interests. The networks, he said, "go wall to wall with coverage...but the one thing a local station can do is be local." That approach has produced wildly different results for KGGM-TV. Its noon show has virtually wiped out the competition, capturing a 50 share. But its 4:30, 5:30 and 10 p.m. newscasts rank only third.

Of course, there are some stations in markets so small and with revenues so slight that the virtue of local coverage becomes a necessity. One traveler reports watching the local news show of a station in one of California's out-of-the-way communities that featured a softball game involving local teams. It was obvious that only one camera was employed, and the camera person had problems keeping up with the action-the balls hit to the outfield, the runners on the base paths. To the traveler, accustomed to the slickness of shows in major markets, it seemed a funny piece. But to the station's regular viewers, who were watching sons and neighbors, it might have been the high spot of the evening news.

Although there is no secret as to what it takes to be successful in local news, finding the right formula—or is it chemistry?—is another matter. For despite the apparent vitality of local news throughout the country, audiences, according to McHugh & Hoffman, are increasingly critical of it. John (Jack) Bowen, co-owner of the firm, says surveys indicate that, unlike the 1970's, when viewers accepted with little question what stations offered, viewers today are expressing dissatisfaction with the "quality, relevance, usefulness of news and the degree to which it expands knowledge of what's going on." Bowen has found those views

NOW Sold IN OVER 30 MARKETS WITH MORE CLIMBING ON BOARD **EVERY** DAY! ON & 1 **The Action Series** With The Light Touch!

particularly among the younger and better educated members of the audience, the kind most sought-after by advertisers.

That is not all of the bad news Bowen has to offer. There is the matter of increasing competition, of course—and not only from other stations (independent and affiliated) and from cable television and its diversions, but from videocassette recorders as well. Bowen says viewers, particularly working wives who do not have the time to watch the 5 o'clock or 6 o'clock news programs at those hours, use VCR's to timeshift the news to a more convenient hour. The practice of altering television schedules to fit the viewer's convenience is, Bowen says, "an important dynamic that will dominate the changes in viewing habits."

Wait, there's more. At a time when sta-

CBS's Joyce

tions should be increasing their investment in local news to meet "rising expectations," Bowen says management is resistant to spending more. He attributes the resistance to the recession that ended two years agoduring which, he says, station revenues did not achieve "the normal projected growth in profits"-and to concern about the future. He does not see an erosion of standards. But Bowen said there was "less innovation" in the production of local news "over the last two years-a slowdown in investment in investigative reporting and in new technol--and he blames that on tighter budogy" gets.

For all of that, Bowen believes an improvement in the local news product is continuing. But the public, he says, "is still demanding more."

#### How Much Is Enough?

One development that generates varying degrees of concern among those involved in local news is the reduction in that service by some stations after a steady expansion of it. Magid thinks what he calls a "bit of attrition of viewers" should be a matter of concern. For it raises the question of whether there is indeed the "enormous" appetite for news he and others perceive. To buttress his point that the hunger does exist, he cites the growing interest on the part of affiliates to cut into the networks' early morning news programs with segments of local news. And he attributes retreats from what has been a steady expansion of local news programing to a failure to provide fresh, meaningful news in the extra time. "Merely filling time is not enough to draw large audiences," he said. "It points up the need for the resourceful use of time."

Certainly the evidence of "a trend" is mixed, at best:

■ KNBC(TV) Los Angeles, which had been programing three hours of local news before 7 p.m., when it ran the NBC Nightly News, dropped the 6:30-7 half hour and now schedules the network news in that slot. "We were competing with our own viewers, as well as other newscasts," says the station manager. Jack Ingram. "No viewer is going to watch news from 4 to 7:30 p.m." But KABC-TV does not find that a problem. It is continuing to run three-and-a-half hours of local and network news, beginning at 4 p.m., and continues to dominate the ratings for all news programs. Terry Crofoot, the news director, says he has no trouble filling the time. "We do investigative reports, good life-style elements...and we have a lot of specialists."

■ KIRO-TV Seattle dropped the first half hour of the 4 p.m. news because of what station officials said was intense competition in a market served by six VHF and two UHF stations—and which is heavily cabled, to boot. "We thought we could increase ratings," said Glen Wright, the station vice president. And the station, in the October book, was in first place in the 4:30 p.m. time period. "So the half-hour is working." John Lippman, the news director, says greater resources are being put into the news gathering and production efforts. And the station is well armed—with a helicopter, a Lear jet and a cabin cruiser for patrolling Puget Sound.

■ KSNW(TV) Wichita, Kan., abandoned its half-hour 5 p.m. news two years ago, after trying it for less than a year. But KAKE-TV continues to program that period, as it has since 1980, and the remaining affiliate in the market, KWCH-TV, is now providing the competition. It inaugurated its 5 p.m. show on May 1 and, says John Mileham, vice president for administration, "we're very pleased with the results." All three stations do a halfhour of local news at 6 and 11 p.m.

■ WABC-TV New York in March gave up on the 4:30 p.m. slot for a half-hour news program after it had been on for six months. Like the other O&O's in New York, wABC-TV is now carrying two hours of local news before offering the network news at 7. "We decided not to invest the time and money to try to change viewing habits here," says Willim C. Fyffe, vice president and general manager.

■ WPXI(TV) Pittsburgh in June dropped a half-hour news program, beginning at 5:30, after it had been on for something less than two years. A new general manager, John Howell, felt it was draining viewers from the 6 p.m. local news program. But the station does not consider the program change a cutback. News Director Byron Williams says planning is going ahead to expand the 6-6:30 local news program to a full hour.

Some observers might add KRON-TV San

Francisco to the list of stations cutting back on local news. But its programing in the 4-5 p.m. slot is the kind of magazine-type show, now produced by the programing department, toward which it had been evolving while still a product of the news department. Then, too, there were the networks' unpleasant experiences with attempting to program news in the hours after midnight. NBC's and ABC's efforts failed; they went off last year after relatively short runs. CBS's, in the form of *Newswatch*, survives, but in a scaled-down version.

One other news-program expansion has attracted attention—but not because it has been abandoned. It involves the Public Broadcasting Service's MacNeil/Lehrer NewsHour. As the only one-hour network news program in the country, it is watched

PBS's Lehrer and MacNeil

with more than passing interest by news professionals as well as lay viewers. The program went from a half-hour to a full hour in September 1983, has won a couple of Emmys, was a presence at the Democratic and Republican conventions and, through discussions-civilized and informed discussions between David Gergen, a former Reagan aide, and Alan Baron, a Democratic partisan, on a regular basis during the presidential campaign-helped illuminate the issues. It wins the praise of critics-but not all the PBS stations that take it are as enthusiastic; some would be happy to see the program cut back to a half-hour. Lester Crystal, the executive producer, feels recent changes made in the program-news summaries at the top of the hour, focus pieces and the inclusion of minidocumentaries and essays-may make believers out of those calling for a new half-hour show. And he feels that part of the problem is scheduling. Some PBS stations run NewsHour against local news, some in prime time. But whatever the problem, the NewsHour, Crystal feels, provides an "honest alternative."

Whether all of this adds up to a trend is debatable. But it may indicate that the desire for ever more news has lost some of its fire.

Reaching Around The World

As for the future, the networks, at least, increasingly see their activities entwined with foreign services as they seek to cover, literally, the world. ABC has long had access

### Panasonic Industrial Monitors. **Designed for teleproduction. Priced for any production.**

When it comes to industrial monitors, it pays to come to Panasonic. Because Panasonic has just the right high prices. monitor for just about any application or specification BT-S1900N 19" monitor (all you can think of. But don't think monitors good enough for teleproduction also have to be expensive. Take a good look at the Panasonic BT and CT series. What you'll see is outstanding picture quality

of features and controls. What you won't see are

When you look at the screen sizes measured diagonally), you'll see one of our most brilliant and best defined color pictures ever. One reason is our CompuFocus<sup>™</sup> picture tube with OverLapping Field Lens gun. Another is

as well as a full complement a switchable comb filter which increases definition for easy detection of signal flaws. Behind its pushopen door lies a full array of operating controls. Like a normal/underscan switch, pulse cross, horizontal/ vertical centering controls and blue-only for easy adjustment of chrominance and hue.

The 13" BT-S1300N has the same great picture,

controls and inputs. And our 7" BT-S700N is ideal for mobile units and outdoor production because it operates on AC or DC. It also features controls for normal/ underscan, pulse cross, blue-only and much more.

The 7" BT-S701N is equipped with switchable line inputs and external sync terminals while the BT-S702 consists of two 701 monitors mounted in

a dual rack adapter.

The Panasonic CT series will also show you a picture that's clear, well-defined and brilliant in color. Because both monitors have either CompuFocus or Quintrix II® picture tubes. And, of course, all models have 8-pin video input and output connectors as well as loop-through capability for easy system adaptation. When portability and light weight are important, choose from two AC/DC monitor/receivers: the 5" CT-500V, or the CT-300VT with its 2.6" screen—the world's smallest industrial color monitor.

There are also three 10" monitors for educational, industrial, computer, medical, and scientific applications. There's the CT-1330V monitor/receiver, the CT-1330M monitor, and the CT-1350MG with NTSC composite and RGB inputs.

If you're big on 19" monitors, the CT series keeps you covered in a big way. Both our CT-1930V monitor/ receiver and our CT-1920M have comb filters for increased picture definition, while the CT-2000M lets you switch from PAL to SECAM to either NTSC 3.58 or NTSC 4.43.

So, no matter what you

are looking for, you can't afford to overlook Panasonic Industrial Monitors.

To see the Panasonic BT or CT series call your regional Panasonic office: Northeast: (201) 348-7620 Midwest: (312) 981-4826 Southeast: (404) 925-6835 Southeast: (214) 257-0763 West: (714) 895-7200

to a dedicated transponder on an international satellite over the North Atlantic to receive material, live and taped, from Europe. Wald notes that the network has a need to serve not only a morning show and one in the evening—but its late-night *Nightline* program as well. He said ABC is working out an arrangement with an Australian network, Channel 9, to meet ABC's needs for trans-Pacific service. The aim, he says, is to assure itself of satellite time "at affordable rates."

Costs of international coverage are a concern for NBC, as well. Grossman says those costs are increasing "enormously," and adds, "We're looking at ways to improve our coverage—in Africa and Central America and elsewhere—without bankrupting us." NBC is considering cooperative ventures with foreign broadcasters. It already has an arrangement under which it exchanges product with the BBC (the latter took NBC's election night coverage directly from Studio H in New York) and the British Visnews. NBC is also developing an arrangement with Globo TV of Brazil. Initially, NBC will be providing Globo with material. "More and more, the arrangements will be broadcaster to broadcaster," Grossman says. "There may be cooperative ventures, maybe joint news bureaus."

Joyce, in looking ahead, is not thinking of reducing costs as much as he is of marketing CBS News's material in the "global village" he sees developing. "We're looking toward the time in the not-too-distant future when we will be an international news presence, as we are a domestic news presence." He says foreign governments are opening their doors to new broadcasting companies and cable systems are being planned, adding, "In the decade ahead, McLuhan's global village will have arrived, and we see ourselves as a software contributor for it."

As for producers of local news, their thoughts are probably not as cosmic. When news directors are not wondering if they will encounter the same fate that befell Antoniotti last week at KNBC-TV, they will be trying to figure the key to providing the news program that has the "relevance" that is supposed to spell success. Perhaps matching the aggressiveness of WJXT-TV in arranging the split-screen meeting between a daughter returned from Grenada and her parents with the zest for community involvement demonstrated by the station in the small market in California that covered a local softball game with a single camera provides a part of the answer.

### News finds its niche on cable

### Viewers and broadcast networks take notice as CNN, C-SPAN and local cable systems provide news alternative

For the two national cable networks that provide news and public affairs information around the clock—CNN and C-SPAN—the election campaign was their raison d'etre in 1984. CNN executive vice president Ed Turner described the network's campaign coverage as perhaps its "finest hour," and C-SPAN devoted considerable resources to onlocation reports from sites across the country to get a sense of how people outside Washington stood on issues.

According to CNN's Turner, the network spent about \$15 million this year covering the campaign, producing some 1,700 separate on-the-scene packages. CNN also provided the foreign pool at both national political conventions. Turner said CNN's aim was to provide an "alternative news service" to compete with the three networks and "bring in a quality product." In Turner's view, CNN did that.

Although Turner describes CNN as the "rapidly-aging new kid" on the block, he also says: "We have a lot of growing to do." The network added about 300 staff people this year, expanding most of the existing bureaus and adding one in Miami. A new political unit was also formed, bringing CNN's worldwide staff to about 1,800. Next year, the network intends to open bureaus in Frankfurt, Germany; Paris, and Beijing.

In addition to bureau expansion, Turner anticipates the coming year will bring "fine tuning" for CNN. Energy will be devoted to specialty programing, such as the formation of a science unit, to be headed by Charles Crawford, who has covered space shots for the network. And CNN's roster of financial programs may be expanded. More live coverage is also on the agenda, Turner said.

C-SPAN, the Washington-based public affairs network supported financially by the cable industry, packed up its C-band remote uplink and went on the road in 1984. It covered five primary/caucus locations and the two national political conventions. It also visited 14 cities between Labor Day and election day in an effort to keep a finger on the pulse of voters around the country as they responded to political events.

Brian Lamb, president of C-SPAN, estimates the network produced 700 hours of election-related on-location programing, including about 150 hours at each national convention and 220 hours during the "grass roots" trip, all for a modest \$650,000.

There is little, if any, money spent promoting C-SPAN, but despite that, Lamb said 1984 "has been a visible year for us. People were talking about the fact that we were in their city."

Noting that it's a "hard sell" to cable operators, Lamb said the service is "beginning to take hold," and will make further progress as operators realize C-SPAN's value. "We're unique, innovative and different," he said, adding that the network has proved that it can "be successful on a low budget."

In 1985, C-SPAN will have a budget of between \$6.5 million and \$7 million, of which perhaps \$1.5 million will be generated from advertising and corporate underwriting. And the network will be on the road again, at least as much as it was this year, covering groups discussing policy, such as the National Governors' Association in Au-

Broadcasting Dec 3 1984

gust in Boise, Idaho. It will also cover the National Conference of Mayors and National League of Cities meetings in 1985, which are of particular interest to the cable industry.

Fine tuning also awaits C-SPAN in 1985. "We have a lot of improving to do," said Lamb, and "a lot of things to tighten up [such as] the on-air look."

Local news is finding a growing niche in cable as well, sometimes in alliance with local newspapers. From a multiple-serviceoperator standpoint, Colony Communications, based in Providence, R.I., is a leader in the field, with local news departments in operation or planned for all but one of its systems. Other MSO's have established local news operations in one or more of their systems, including Group W Cable, Cablevision Systems and Prime Cable.

Cablevision Systems, the Woodbury, N.Y.-based MSO, launched a news operation at its Long Island system, which has about 500,000 subscribers this year. The new effort there follows a short-lived operation by the local Newsday daily newpaper, which had been doing a cable news program but abandoned the project when it decided the costs couldn't be justified. Cablevision hired former CNN President Reese Schonfeld earlier this year to work on a variety of new program concepts. He brought CNN correspondent and anchor Bill Zimmerman to head the local Long Island news department. Currently the department, with about 14 full-time staff people, including three crews, produces five minutes of news every half hour. On election night, the team provided five hours of nonstop local election coverage, with live coverage of both local party headquarters and commentary from political experts. Within the next several weeks, Cablevision will decide whether to expand the operation in 1985 to a half-hour nightly news program, followed by another half-hour (both of which would anchored by Zimmerman) in which a single local issue would be discussed in depth.

Group W Cable's Danbury, Conn., system is a pioneer in the local cable news business.

We're a new company with an old philosophy: Provide the best, most entertaining first-run programming and the world will beat a path to your door. We are most happy to announce our door is open.

#### STATE OF THE ART: JOURNALISM

The operation, with one full-time person, news director/anchor/reporter Bob Morano, and several interns, produces, with the help of the production department, a nightly halfhour program carried live at 5:30 p.m. (repeated at 7 p.m.). The program has been on for about 10 years, and focuses on the three communities serviced by the cable system— Danbury, Bethel and Ridgefield. Each program contains seven or eight video pieces, one of which is usually a remote package. When there is a rapidly unfolding story, Morano said, broadcast stations from nearby Hartford or New Haven will borrow video footage captured by his news department.

"It's hard to tell who watches us," said

Morano, noting that most of the comments he receives personally seem to come from older viewers who he says generally "seem more concerned about what's going on in the local community."

Colony Communications has news divisions serving its cable franchises in the Greater Boston-Lowell, Mass., area; the New Bedford-Falls River, Mass., area; Dade County, Fla., and the mid-Hudson Valley area in New York state. Plans also call for launching a news division in the company's southern Los Angeles system in 1985. The current news programs reach almost 185,000 subscribers throughout Colony's systems, said Joe Langhan, the company's

**CNN's Ed Turner** 

director of programing. And surveys indicate the programs are "viewed regularly (about three times a week) by about 60% of all subscribers with access to the programs," he said. Each system offers a nightly halfhour newscast, which in Miami is followed by a 20-minute Spanish-language newscast. As a rule, said Langhan, Colony launches a news department in each system after it reaches the 10,000 subscriber mark—seen as the critical mass needed to justify the cost. The newscasts are advertiser supported, but Langhan said Colony would produce them regardless of their ability to generate advertiser interest. "We see the newscasts as good public relations and community relations vehicles."

One newspaper company involved in the local cable news business is Cox Enterprises Inc., an Atlanta-based chain (which is private and separate from Cox Communica-tions) of 21 daily newspapers. The chain hopes to launch a cable news project in all 21 of its markets. Last week, it launched a joint venture in Atlanta with Prime Cable for a nightly half-hour at 10 p.m., which is immediately repeated. Cox, which owns the Atlanta Journal and Constitution, has con-structed a "full-scale TV studio" on one of the floors of its newsroom where the cable program is produced. According to Frank Heflin, the papers' director of telecommunications, the concept behind Cox's cable news projects is to "use the resources of the newspaper and select a few stories each day which can be enhanced by video." The program is called The Newspaper Channel (the name that will be used for all of its cable news shows) and produced by a staff of six, with another two sales people who expect to sell an average four minutes of time per program. The program may be different from other local cable efforts because it begins with five minutes of national and international headlines before the local news. Heflin compares the approach to that used by National Public Radio.

On Dec. 10 on the Prime system, Cox will also launch a live, one-hour, call-in show that will precede the news program. A third effort is under way to produce infomercials for advertisers. All revenues are shared with

# WHY DO THE B IN CABLE GIVE RC/ A TERRIFIC

A SMALL SELECTION OF OUR BIG NAMES.

MARK OF HOME BOX OFFICE, INC

SERVICE

For good reason. In fact, for lots of good reasons. Superior satellite service is a good place to start.

It all began in 1975, when the cable TV industry was looking for expansion opportunities. It was then that RCA launched its first Satcom satellite. From that early point on, HBO; WTBS, ESPN,<sup>™</sup> CBN, Showtime\*/TMC<sup>™</sup>—all the biggest names (and initials) in programming—signed up.

There were, of course, other satellites available. But not a single one of them offered what Satcom did. Namely, the concept of a dedicated cable satellite with 24 transponders and, later, a back-up system that protected them in the event of a satellite failure. And to this day, they *still* haven't matched our protection system.

Needless to say, it is comforting for our family of programmers to find this kind of safety in RCA.

There's plenty of comfort in a reliability factor of 99.99%. It's hard to beat that kind of statistic. This exemplary record is nothing particularly out of the ordinary. RCA has always represented the most positive images in the world of communications. Since the early part of the cen-

easy mounting locations for these small receiving dishes. An estimated 22 million households not currently able to receive cable TV will become an exciting new marketing universe.

It's no surprise. It's merely typical of RCA's continuing technological leadership.

The launch is scheduled in the fall of 1985. Therefore, the timing couldn't be better for you to inquire about RCA Americom and learn more about all the benefits it can have in store for you and your business.

Call Bill Berman or Don Reinert at (609) 734-4000 for more detailed information.

tury, RCA has stood for enterprise, innovation and an extremely high level of expertise.

That high level is about to manifest itself in a new launch that a lot of people are very excited about. This new spacecraft is a 47-watt, Ku-band satellite with the capability of serving receiving antennas as small as three feet in diameter, thereby opening up a whole new world to operators and programmers. Throughout the contiguous United States, all sorts of places will become

Prime, whose function is to provide time. No one knows exactly how many local cable news operations there are today, but STATE OF THE ART: JOURNALISM

the guess is around 50. The ACE Awards for the best locally produced cable news program, sponsored by the National Cable Television Association, may be an indicator: 39 news operations submitted entries this year.

#### Radio news trends: satellite delivery and cellular phones

Multichannel digital feeds giving stations greater flexibility; computers entering newsrooms with increasing frequency; reporters using cellular phones for on-spot news

Satellite technology was the sine qua non of network radio news in 1984.

It was the first full year that ABC, CBS and NBC were fully interconnected with their stations by satellite, and all network executives were extremely bullish on what the new technology offered: flexibility in program choice through simultaneous multichannel transmissions. That aspect was clearly put to the test on election night, when affiliates of ABC, CBS and NBC were offered multichannel digital feeds via Satcom I-R. The feeds ranged from short updates to continuous election coverage by CBS and NBC.

The switch to satellite was only part of the story for ABC Radio this year. On Oct. 29, ABC unveiled a new broadcast center in New York which it is calling "the largest and most sophisticated commercial radio facility in the world" (BROADCASTING, Nov. 5). The new complex, which serves the news and sports departments of the Contemporary, Direction, Entertainment, FM, Information and Rock Radio networks, contains 13 studios, eight of which are being used for news feeds.

"The move to the new facilities has allowed us to fully utilize our satellite capability," said Kathy Lavinder, general manager, news programing, ABC Radio News. (ABC may use up to 20 digital audio satellite channels via Satcom I-R.) "Our election-night coverage broke new ground with multichannel programing [four channels] satellite feeds," she said.

Lavinder also said that in response to affiliate feedback, ABC Radio recently instituted changes in its news program schedule including feeding all network newscasts closer to the top of the hour: offering stations

ABC's Lavinder

the option of short news reports (60 seconds) in addition to the regularly scheduled newscasts, and increasing its news actuality service ("Riding Gain," Nov. 19). Lavinder said these changes are in response to what appear to be overall trends in the industry.

Lavinder said FM rock stations have been asking for more news and information. She said ABC's Rock Radio Network, which had just scheduled news in the morning, added 60-second hourly *Newsbrief* reports in the afternoon on Nov. 12, running from 3:45 p.m. to 8:45 p.m. NYT.

Jim Farley, vice president, radio news, NBC News, agreed that young-adult FM music stations are seeking more information. In addition, Farley sees a "heavier reliance" by stations on network news material for their locally produced newscasts.

Farley is also bullish on satellite technology. He said that on election night, stations were given the widest choice of programing. He gave another example of how simultaneous multichannel feeds are making programing more flexible. Farley said that on New Year's Day when the NBC Radio network airs three bowl games (Fiesta, Rose and Orange), instead of news being fed to all stations only at halftime via telephone wire, regularly scheduled newscasts will be transmitted on a separate channel by satellite. NBC Radio has a 13-channel capacity on the satellite.

Also singing the praises of the satellite revolution was Joseph Dembo, vice president, CBS News, radio networks. "A different world has opened up for stations. For the first time they have a choice," he said. "Also, communications with affiliates took a sharp turn for the better with satellites because the voice cue channel makes it possible to alert affiliates instantly about programing," he added.

In addition to satelfite technology for networks, 1984 ushered in computerized network news operations. And according to Tony Brunton, director of special events, radio, CBS News, network producers and editors used a standard Newstar terminal in the field for the first time in covering both political conventions. Both CBS and NBC have computerized newsrooms.

Meanwhile, at Mutual Broadcasting, which has been multifeeding programing to stations via Westar IV since 1980, a major research project to determine the level of interest in news among the 18-34-year-olds will soon be under way. Ron Nessen, vice president of news for Mutual, said the project received a nod of approval from the Mutual affiliates advisory board two weeks ago and probably will begin early next year.

Nessen, who sees the trend of more news and information being carried by young adult FM music stations eventually unfolding, told BROADCASTING that improving Mutual's *Lifestyle* broadcasts, aimed at the 18-34-year-old demographic, is one of his top priorities. (The three-and-a-half-minute *Lifestyle* reports are fed at 55 minutes past the hour.) Nessen also said he will be exploring the possibility of feeding newsfeeds (actualities and other "raw" news material) targeted for FM stations.

Among the technological highlights of the year was the introduction of a new satellitedelivered news wire service for radio stations by Associated Press Broadcast Services last spring at the National Association of Broadcasters Convention in Las Vegas ("Riding Gain," May 7). The new unit, called AP NewsPower 1200, transmits 1,200 words per minute, replacing the old AP Radio wire service of 66 words per minute. Stations are able to choose from a variety of different program categories, including national and world news headlines, state news, state weather forecasts and sports scores. To date, over 400 stations have signed for the service.

On the local side, radio stations are looking at both computer technology and cellular communications as a way to give them a competitive edge.

Group W's WINS(AM) New York, which will celebrate 20 years as an all-news station next April, has increased its live remote coverage by installing cellular telephones in reporters' cars, said Frank Sciortino, executive editor for the station. Sciortino also noted that the station is conducting research on newsroom computers and may add them to the newsroom. The use of computers allows for more "think time" and "productivity" for the staff, he said.

(Local AM stations that have opted to program the highly expensive all-news format have actually increased in number over the past two years. According to the New Yorkbased Radio Information Center, which tracks formats for all commercial radio stations in the U.S., the number of radio outlets programing all-news climbed from 38 in Oc-

#### Panasonic Industrial Company

CBS's Dembo

tober 1982 to 50 last month).

Charlie Seraphin, director of news and programing for news/talk KCBS(AM) San Francisco, the first radio station in the country to completely computerize its newsroom about five years ago, has integrated a news magazine concept into the station's programing. And, said Seraphin, new to the station this year is the mini-documentary. "I think you're going to hear a lot more of these on other stations," he said. In 1984, KCBS(AM) aired six in-depth documentaries, running between 12 and 20 minutes in length. At least 20 are planned for next year.

In local live reporting, Seraphin has followed the example of the networks, but on a inicro-scale. KCBS(AM) has established mini-bureaus around the city where correspondents report directly to work. For the most part, the reporters live in the same community containing the bureau, Seraphin said.

The ABC-owned news/talk KGO(AM) San Francisco plans to increase its local "live" coverage. "The public's perception is that if you're on the scene, you're doing more than the next station," said Bruce Kamen, news director, KGO(AM). He added that KGO(AM) also sends its reporters to cover breaking events worldwide.

Kamen said the station is ready to computerized its operation, but it will do so "slowly," by first using a computer on the assignment desk for storage and archiving. Among the trends Kamen sees is an increase in syndicated traffic and weather reports.

Both KCBS(AM) and KGO(AM) will likely make use of cellular telephones for better two-way communications between correspondents on the scene and the studio once they become available in the market.

Paul McGonigle, news director for adult contemporary/talk KOY(AM) Phoenix, said it has a "tentative long-term plan" to computerize its news operation. McGonigle also said that radio stations today, in the face of fierce competition from television, need to better promote their news coverage as well as do more investigative reporting. Concerning what effect the FCC's deregu-

Concerning what effect the FCC's deregulation of radio nearly four years ago has on news reporting today, the general consensus among executives canvassed by BROAD-CASTING is that the move has not dramatically lessened the amount of news aired.

The issue of future news jobs at local radio stations in the next 10 years was addressed by a Radio-Television News Directors Asso-

Mutual's Nessen

ciation-commissioned study conducted by Frank N. Magid Associates titled "Future Trends in Broadcast Journalism" (BROAD-CASTING, Sept. 3). The survey showed that jobs in radio news at the local level over the next decade will decline, but should increase at outside program suppliers. Other findings showed that two radio news functions see as assuming greater importance are specialty reporters and news producers. It also found that news directors don't have a high regard for entry-level journalists. "Entry-level people are rated lowest on two of the three most important skills-the ability to communicate well to listeners and writing skills," the study said. The radio segment of the report was based on interviews with station managers, news directors, media executives and professors.

#### Journalistic ups and downs over the past 12 months

The year has seen mixed feelings from the public over the media's job, a spate of libel suits and an FCC inquiry to change the fairness doctrine

1984 has been a mixed bag for electronic journalism.

It was a year that saw the FCC's chairman chew out TV reporting in a speech at the broadcast industry's major annual convention; it has been a year of megabuck libel suits; it was the same year the FCC's former general counsel called for eliminating the actual malice standard, which offers the media a measure of protection from libel suits by public officials. It also, however, was the year the FCC launched a notice of inquiry aimed at eliminating or reducing the scope of the fairness doctrine.

Along the way, there was plenty of talk about the public being fed up with the press. But the best news there: Most of that talk appeared to be hot air.

#### Varying Perceptions of The Media

As in the past, some criticism of the electronic media was coming from high places. Supreme Court Chief Justice Warren Burger, when asked about the prospects of permitting cameras to cover his court, had little nice to say. He characterized the TV camera as "the most destructive thing in the world" and insisted that there would "be no cameras in the Supreme Court of the United States while I sit there" (BROADCASTING, Nov. 19).

Closer to home, FCC Chairman Mark Fowler took the occasion of the National Association of Broadcasters annual convention (BROADCASTING, May 14) to cuff the electronic media around its ears. Topping his list of grievances: "overaggressive" reporting, stakeouts, a network news item that showed President Reagan riding on a horse at his Santa Barbara ranch while the voice-over described the Soviet Union's shooting down of a Korean airliner. He also took a swing at Roger Mudd's widely publicized NBC interview with Democratic presidential hopeful Senator Gary Hart. Said Fowler: "Is it political reporting worthy of Edward R. Murrow to ask a presidential contender, during the first serious public scrutiny of his candidacy, to do a comedy impression of Ted Kennedy during a live, election-night interview?"

(At the time, Eddie Fritts, NAB president, told this magazine that he thought Fowler had probably just delivered his best speech ever. Fritts identified broadcast news as a "weak" area in broadcasting. "Some people in a small number of instances have become a little loose," Fritts said.)

On another front, Creed C. Black, outgo-

ing president of the American Society of Newspaper Editors, used that group's convention to blame TV news in large part for the alleged low esteem in which the news media are being held (BROADCASTING, May 21). He suggested that newspapers, in their own best interests, distance themselves from their electronic brethren. Among other things, he picked up on the allegation of televison as "showbiz" and criticized TV news for being "a mixture of news, analysis, opinion and speculation."

On yet another front, the Institute for Applied Economics, a nonprofit organization sponsored by U.S. corporations, criticized TV network coverage of economic news (BROADCASTING, March 19). In a report, the group, in effect, contended that the networks were making President Reagan's supposed economic recovery sound like hard times. Among other things, the report contended that the networks were focusing on the minority of Americans who were poor, unemployed, homeless and hungry, almost to the exclusion of the millions of Americans who were working, who had been returned to work or who were enjoying the fruits of an economic boom.

Other measurements appeared to indicate less of a problem than some appeared to think. The Media Analysis Project at George

#### CALL THE FACTORY OR YOUR CETEC DEALER

Cetec Antennas 6939 Power Inn Rd. Sacramento, CA 95828 Tel: (916) 383-1177 Telex: 377 321 Washington University, in a continuing study supported by the American Enterprise Institute—a Washington think tank generally described as being conservatively oriented—found an absence of liberal bias in the network news coverage of the general election campaign (BROADCASTING, Oct. 1).

Yet another survey, conducted by Frank Magid Associates for Blair Radio, showed that most people are "satisfied" with coverage of political campaigns (BROADCASTING, Oct. 22).

And a nationwide poll sponsored by ABC News appeared to give TV news operations something to feel good about (BROADCAST-ING, July 9). ABC's survey found, for starters, that 79% of the public approved of the way the TV networks handled the job of reporting news; 58% believed that TV news does a good job of telling all sides of controversial issues; 65% believed TV news is telling the truth when high government officials deny a network report; 61% thought coverage of Present Reagan had been fair and balanced; a majority felt the press should have not been barred from covering the invasion of Grenada, and 65% said it was good that the First Amendment protects TV news from government interference even if television news sometimes abuses its freedoms.

On the down side however, the ABC survey indicated that 54% of the public thought the networks are too negative and often "focus on tearing things down"; 63% thought that not enough time was spent in explaining issues; 84% believed it was wrong to invade the privacy of ordinary people while covering a news story; 78% said it was not important to know the winners of elections as soon as possible, and 61% said they would favor a law requiring the networks to wait until polls are closed across the country before projecting a winner in a presidential election.

#### Libel Actions

Also during the year, libel questions took on prominence, with some law suits, such as former General William Westmoreland's \$120-million one against CBS, getting plenty of media play.

Westmoreland's case is being handled by the Capital Legal Foundation, which describes itself as a "free-market" oriented public interest law firm. Another firm, the American Legal Foundation, which bills itself as a "conservatively" oriented group (consists of two lawyers in Washington and claims a 1984 budget of about \$250,000), is trying to put together a "Libel Prosecution Resource Center" to help people who want to sue the media.

Perhaps the most important issue being advanced in the libel arena was what protection the media should be offered from suits by public officials and public figures. In its landmark 1964 decision, *New York Times v. Sullivan*, the Supreme Court ruled that public officials, to collect damages, had to show that a false and defamatory statement was made with knowledge that it was false or with reckless disregard of whether it was false or not. In its defense against the Westmoreland suit, CBS has requested additional protection for the press; it has argued that news organizations should have an "absolute immunity" from libel actions brought by high public officials concerning commentaries about their conduct in office (BROAD-CASTING, Oct. 1). Others would like to make it easier for public officials to prevail. Bruce Fein, the Fowler FCC's former general counsel and now a vice president for Gray & Co., for example, is arguing for scrapping the actual malice standard, hoping to permit public officials to collect on a showing that false and libelous statements had been made negligently (BROADCASTING, Nov. 26).

It would appear that those arguing for eliminating the actual malice standard won't have an easy time of it. Just this year, the Supreme Court, in a 6-3 decision (with Chief Justice Burger concurring with the majority and Justices William Rehnquist, Byron White and Sandra Day O'Connor dissenting), saluted the actual malice standard in Bose v. Consumer Union (BROADCAST-ING, May 7), which made it easier for appellate courts to justify reviewing actual malice determinations in federal trial court decisions. Indeed, in the decision written for the majority by Justice John Paul Stevens, the court said appellate judges in those sorts of cases "must exercise independent judgment and determine whether the record established actual malice with convincing clarity."

More good news for the media was announced by the Libel Defense Resource Center, an information clearinghouse organized by leading media groups to monitor developments in libel and privacy litigation. It released a study indicating that things are looking up for those on the business ends of libel suits. One of its principal findings was that the loss rate for the media when cases go to trial before judges or juries has dropped to 54% over the past two years—down from 89% the two years before that. Before juries, the loss rate was 62%, down from 89% during the preceding two years.

The report also provides an analysis of the success of defendants according to type of media. And it indicated that the greatest improvement over the past two years was made by broadcast defendants. They were successful in 73% (eight of 11) of their actions. as compared to only 11% (one of nine) cases in the previous two-year period. Newspapers continued to suffer the greatest number of losses, but magazines were confronted with the highest percentage of million-dollar verdicts. The report says that 75% of magazine losses exceeded \$1 million-but that all six awards affirmed on appeal involved newspaper defendants. In the earlier study, newspapers were found to have accounted only for 50% (seven of 14) of the finally affirmed awards.

No doubt unintentionally, independent presidential candidate Lyndon LaRouche Jr. would appear to have given the media a libel image boost in the public eye. The jury in LaRouche's \$150-million libel suit against NBC rejected all his claims. At the same time, the jury awarded the network \$3,002,000 on an allegation presented in a

#### Happy birthday to us.

Five years is a long run for any television show. Especially one that deals with business, economics and politics instead of "good guys and bad guys".

So, it's with tremendous pride that "It's Your Business" says thank you.

#### We couldn't have done it without you.

Here's to the stations who put "It's Your Business" on the air week after week

And to our sponsors, Amway Corporation, Anheuser-Busch Companies, Inc., Dresser Industries, Foundation for Savings Institutions, The Goodyear Tire and Rubber Company, The LTV Corporation, Loctite Corporation, PepsiCo, Inc., Shell Oil Company, U.S. Commemorative Coins and the **U.S. Committee for Energy** Awareness.

#### A special wish goes to our 780 guest stars.

Free and open discussion of the issues is vital in a free society. And free and open. you've been. Bringing widely divergent points-of-view home to our audience so that every viewer can weigh the facts for himself and make up his own mind. That's why we're making our "thank you" to you something special.

#### Instead of serving up cake and ice cream, we're giving a special lady a helping hand.

In the name of every pioneer station and every quest panelist who's

appeared on "It's Your Business" since September, 1979, we're making a contribution to the renovation of the Statue of Liberty.

Not only do we think it's a good way to express our appreciation for your contributions to our show, but also we know that it's one of the few things you'd probably all agree on.

So, to one and all—thank you, for making "It's Your Business" what it is today. Five. And

strong.

Contractor of the Contractor of the Contractor

countersuit that LaRouche followers had impersonated NBC personnel in attempting to sabotage a network interview (BROADCAST-ING, Nov. 5).

In yet another case, the Supreme Court, rejecting the argument that a broadcaster may not be held accountable for transmitting the comments of one public offical about another, refused to free WKBS-TV Philadel-phia from the necessity of defending itself against a slander suit filed by a state judge (BROADCASTING, May 21).

#### Election Year Means Projection Disputes

Network news organizations once again drew congressional fire over projections of election results.

This year, Congress approved a nonbinding resolution asking broadcasters and other news organizations to refrain voluntarily from characterizing-that is, reporting trends-or projecting the results of an election before all the polls closed (BROADCAST-ING, July 2 and Sept. 24). The Reagan administration, through the National Telecommunications and Information Administration, made it known that "voluntary action [on the media's part], not government coercion" was the preferred answer. But it also said that if those voluntary measures didn't work, "Congress might then appropriately consider the need for any remedial legislation consistent with constitutional limitations" (BROADCASTING, May 21).

The networks maintained all along that they would continue to report projections based on exit polling. But they also said they wouldn't broadcast projections until all or a majority of the polls in any particular state had closed (BROADCASTING, Oct. 8).

All three networks said they would declare a winner in the presidential contest when projections indicated a candidate had received the 270 electoral votes needed to win. Not to do so, they maintained, would constitute a suppression of the news. And on election night, with polls in 26 states still open, CBS, at 8 p.m., then ABC, at 8:13, and, finally, NBC, at 8:31, reported that, on the basis of their calculations, President Reagan had attained more than the 270 electoral votes he needed to win.

Among the three broadcast networks, only ABC said it would not report a trend until the polls closed. CBS and NBC reported trends.

In the aftermath, House Telecommunications Subcommittee Chairman Timothy Wirth (D-Colo.) said the coverage had fallen "far short of the restraint" he had hoped for and that Congress had requested in its resolution. And Representative Al Swift (D-Wash.), a member of the subcommittee, head of a House Task Force on Elections, and author of the congressional resolution, said hearings would be held in the new Congress on proposals for legislative remedies. "The glee with which the American TV networks thumbed their noses at the American public was disgusting," he said (BROAD-CASTING, Nov. 12).

#### The Fairness Fight

1984 also saw the FCC uphold its first fairness doctrine complaint under the Fowler chairmanship (BROADCASTING, Oct. 29). In upholding the complaint, the commission, led by Fowler—who has long voiced opposition to the doctrine as a violation of broadcasters' First Amendment rights—ruled against Meredith Corp.'s WTVH(TV) Syracuse, N.Y., and in favor of a group that advocates nuclear disarmament.

Months before that, the FCC launched a notice of inquiry aimed at exploring the pros and cons of the fairness doctrine and at determining what Section 315 of the Communications Act—which includes the equal opportunities law and was once generally thought to make the fairness doctrine a matter of law as well—actually requires the FCC to do. In comments at the commission, most broadcasters said the doctrine should be scrapped and many contended the FCC has the discretion to eliminate the doctrine without congressional approval (BROAD-CASTING, Sept. 10).

There were signs that the commission's timing was right. A pair of footnotes in a 5-4 Supreme Court decision striking down a federal law prohibiting public broadcasters who received federal funds from editorializing

Delta DASH<sup>\*</sup> delivers the same day to over 90 cities across the U.S and abroad, covering 10,000 communities. Why get that small package delivered tomorrow when you can DASH it today? DASH (Delta Air Lines Special Handling) delivers packages up to 70 lbs... to over 10,000 communities. So give us a ring at the Delta Marketing Office in the city nearest you. Or call DASH at (800) 638-7333 for pick up or delivery.

For top priority shipments over 70 lbs., use Delta Air Express. It guarantees your shipment gets on the flight specified. For full details, call your nearest Delta Marketing Office.

#### DELTA AIR CARGO. READY ALL'AROUND.

ON YOUR SIDE ON TIME ON THE AIR!

Antek is on to something. A new alternative consulting system that provides a clear understanding of your market and all FCC regulations. Providing the answers you need in acquiring licensing. At less cost. In less time. And with greater efficiency.

Antek utilizes the most advanced software systems and a thorough knowledge of the industry to provide you the following:

- Location of transmitter sites.
- Frequency selection.
- Prediction of service area.
- Signal level calculation.
- Understanding the relationship between your potential site and existing sites.
- Necessary assistance in completing all required exhibits for FCC applications.

Antek will provide answers to all your questions concerning licensing. Project managers Jim Swayze and Kelley Stalder are accomplished experts, with over 10,000 applications accepted by the FCC. Combining the experience and knowledge to recognize your specific needs and to adapt their own capabilities to those needs.

Now is the time to consult Antek. With the establishment of the Docket 80-90 FM Drop-Ins, the FCC is authorizing over 1,000 new additions to the Table of Allocations. Antek is clearly your alternative to licensing and market consultation. Clearly on your side. And clearly capable of getting you on the air in the least amount of time.

A LITEL I I DO B 001/00 B # TV 75000 01//100 0/5

# THE FACE MOTHERS 25 TO 54 LOVE.

Only DICK CLARK has this vast appeal. That's why this Fall, his new show will stand out as the Early Fringe "necessity."

It will have the largest budget ever allocated for this time slot. There will be a full, participating studio audience.

There will be 3 to 5 major celebrities on each and every day.

It will be an entertainment driven show for the most competitive day part. Nothing else will work harder to help you win in Early Fringe. The full presentation of this Fall's most exciting, first-run program is ready...millions of mothers (and their daughters) can't be wrong.

# DICK CLARK'S GOOD TIMES '85 READY FOR SEPTEMBER 1985

New York Office: 711 Fifth Avenue New York, NY 10022 (212) 702-6602 Los Angeles Office: P.O. Box 4048 Woodland Hills, CA 91365 (818) 954-2343

A Dick Clark Production with Executive Producers

seemed to indicate the court might be ready to re-evaluate the constitutionality of the doctrine and the underlying rationale for broadcast regulation—scarcity of spectrum (BROADCASTING, July 9).

Senator Bob Packwood (R-Ore.), chairman of the Senate Commerce Committee, tried to get the content-deregulation ball rolling on the Hill with his Freedom of Expression Act, which would have eliminated broadcast content regulation altogether. The Reagan administration, through its National Telecommunications and Information Administration, offered its support (BROAD-CASTING, April 30). But Packwood was thwarted twice by his own committee. After Packwood ran into stiff opposition in committee on his act as originally proposed, he tried again with a measure that would have lifted content regulation only for radio. But that deflated version of the bill also was defeated by the committee (BROADCASTING, June 18)

The drive for full First Amendment parity for broadcasters has strong opponents in the House. Just one example: The Democratic party platform this year included a provision, engineered by House Telecommunications Subcommittee Chairman Timothy Wirth (D-Colo.), that, among other things, endorsed the fairness doctrine and equal time law. It also called for quotas for children's programing on commercial television.

#### Wrapping Up 1984

Other blips on electronic journalism's screen in 1984:

■ The FCC, in a staff ruling, held that Section 315 of Communications Act, which prohibits broadcasters from censoring appearances of legally qualified candidates, doesn't mean broadcasters have to air obscenities (BROADCASTING, Jan. 30). The issue was raised because Larry Flynt, publisher of *Hustler* and an announced candidate for the Republican presidential nomination, had said he would use clips from X-rated movies in his campaign commercials. (He never did.)

The Court of Appeals in Washington affirmed the FCC decision permitting broadcasters to sponsor and cover political debates without incurring equal-time obligations (BROADCASTING, March 19).

• The FCC ruled that *Donahue* is a bona fide news interview program exempt from equal opportunities obligations of Communications Act (BROADCASTING, May 28), clearing the way for similar sorts of programs to be granted the same status.

The Internal Revenue Service revealed that it authorized its investigators to pose as reporters (BROADCASTING, June 4).

The FCC approved a request by the Turner Broadcasting System to pick up coverage of the so-called "Friendship Games"—the Soviet Union's answer to the Olym-

pics—from a Russian satellite (BROADCAST-ING, Aug. 20).

■ The question of propriety of broadcasters airing an 18-minute promotional film on President Reagan, which was produced by his campaign, became a major issue of the coverage of the Republican national convention (BROADCASTING, Aug. 27). The feeling that there was no news in the film led CBS and ABC to reject it. NBC agreed with the news judgment of other networks, but decided that the film had become a matter of such interest to the public that there was an obligation to air it.

• Local broadcast journalists, in pursuit of news, sometimes found themselves a part of the story—playing crucial roles in rescue situations or hostage negotations (BROAD-CASTING, Aug. 27). Lebanon, Grenada and Japan were popular global destinations.

A study sponsored by the Radio-Television News Directors Association indicated that TV broadcasters generally believe use of syndicated and network programing will decline over next 10 years, with TV stations relying increasingly upon locally produced news and other programing (BROADCAST-ING, Sept. 3).

■ The Pentagon began implementing a program providing for journalists to cover future Grenada-like military operations with the creation of a pool of 11 journalists, six of them from network TV, to accompany U.S. military forces (BROADCASTING, Oct. 15). □

# A letter from the President of Ikegami

Ikegami Electronics (U.S.A.), Inc. 37 Brook Avenue Maywood, N.J. 07607

(201) 368-9171

......

Nick H. Nishi

Dear Ikegami HL-79 Camera Customer:

On behalf of Ikegami, I want to express our grateful appreciation for your support and patronage which enabled us to achieve the sale of our 5,000th HL-79 series camera as of September 1984. We believe that this is an unprecedented quantity for such a sophisticated camera in this product category.

This great success is due to the fact that the HL-79 series cameras are made to meet our customers' needs and are designed for reliability rather than profitability.

Both high reliability of products and product appreciation by customers are mandatory for us, along with the company's unchangeable motto inherited from the founder of Ikegami.

We also want to assure you of our ongoing efforts to develop and manufacture even better products in the future which we feel will meet with your satisfaction, and I sincerely ask for your continued patronage of Ikegami and its products.

Through the press I wish to thank all our customers for using over 5,000 sets of the HL-79 series cameras.

Sincerely,

1 Nick H. Nishi

President

#### 🔳 RTNDA 84 🔳

#### **RTNDA getting back to basics in San Antonio**

#### Annual convention has outgrown hotels, meets in convention hall; how-to sessions to be featured

More than 2,200 broadcast journalists are expected to gather for the 39th annual Radio-Television News Directors Association's international conference and exposition in San Antonio, Tex., this week (Dec. 5-7). The agenda for the two-day event includes a lineup of practical workshops as well as sessions devoted to some of the major issues confronting journalists. (Pre-registration was listed at about 1,200 and last year's attendance topped 2,100.)

The conference is being held at the San Antonio Convention Center and starts Tuesday, Dec. 4, although members don't officially get down to business until Wednesday. Attendees can also visit the 120 exhibits on display during the conference.

RTNDA President-elect Lou Adler, wOR(AM) New York, is predicting a record turnout. For the first time, the association is using convention center facilities. "We've simply outgrown most of the hotels we frequented," Adler said. This year, he noted, RTNDA is taking a more "nuts and bolts" approach to its conference. The members, he added, were asking for more sessions that would provide that type of guidance and Thursday's schedule is replete with how-to

sessions. Furthermore, Adler said, Friday's "Media and Society" seminars on such subjects as libel and privacy promise to give members the tools they need to deal with those issues.

At 9:30 on Wednesday, RTNDA President Ed Godfrey, wAVE-TV Louisville, Ky., kicks off the conference, followed by a welcome from San Antonio Mayor Henry Cisneros. CBS News's Douglas Edwards is giving the keynote address and ABC's Sam Donaldson is the luncheon speaker. Paul Davis, wGN-TV Chicago, will receive the association's Distinguished Service Award prior to the keynote address. Rob Downey, former RTNDA executive secretary, will be recognized for his contributions to the association.

That afternoon, news directors may attend two workshops. At 2 p.m. Chuck Wolf, KIKK-AM-FM Houston, will moderate a panel, "Broadcasting and Marriage: Can They Co-Exist," featuring Dr. Joyce Brothers, Dr. Harry Hoewischer, Merilee Cox, ABC News, and Gary Anderson, wIS-TV Columbia, S.C. At 3:30 there will be a panel session, "Order in the Court: The New Bedford Rape Case," moderated by Ed Fouhy, ABC News Washington bureau chief. Panelists include David Layman, wLNE(TV) New Bedford, Mass.; George Gray, wBSM(AM) New Bedford; Ed Turner, CNN; Judge William G. Young, Superior Court of Massachusetts.

A number of concurrent sessions will be held Thursday at 9 a.m. on such topics as "Radio News Services—Their Role in Small and Medium Markets" and "How to Coach TV Talent." "Talent Agents: The Most Important People in TV News Are Not in News" features Richard Leibner and Carol Cooper of Leibner & Cooper N.S. Bienstock Inc.; Jim Griffin, William Morris Agency, and Alfred Geller, Geller Media Management.

NBC News President Larry Grossman will speak at Thursday's luncheon. The win-

oresidential politics, journalism e America's newsrooms at the ann of Black Journalists — the nation's organization. If you were recruiting the nat poetter gathering?	oumalists met in Atlanta, Ga. to discuss thics and the future of minorities in ual convention of the National Association ; largest minority professional joumalism ion's top black talent, could you find a BJ convention July 31-August 4, in Baltimor

RTNDA 84

ners of RTNDA's International Radio and Television Awards will be honored then. On Thursday afternoon, a radio forum moderated by Steve Vogel, RTNDA Radio Committee, is scheduled.

On Friday, there will be "media and society" seminars sponsored by RKO General Inc. A morning seminar on libel will be mo-

derated by Arthur Miller of the Harvard Law School. At 2 p.m. such topics as coverage of criminal justice and privacy will be explored. A reception and banquet will be held Friday at 6:30 p.m. for Paul White Award winner Ralph Renick, vice president, Wometco Enterprises, and news director, wTVJ(TV) Miami.

Exhibit hall is 6 to 8 p.m. on Tuesday; 9 a.m. to 6:30 p.m. on Wednesday; 9 a.m. to 6 p.m. on Thursday, and 8 a.m. to 2 p.m. on Friday. Welcome reception on Tuesday at 6:30 p.m. in the north exhibit hall.

Business meeting breakfast. 8-9 a.m. River room.

**Opening session.** 9-10:15 a.m. South banquet hall. Opening remarks by RTNDA President Ed Godfrey. Welcome by Henry Cisneros, mayor of San Antonio. RTNDA Distinguished Service Award presentation to Paul Davis, wGN-TV Chicago. Keynote address: Douglas Edwards, CBS News.

Luncheon. Noon-2 p.m. North banquet hall. Reports and presentation of Rob Downey citation to Skip Haley, wBR2-TV Baton Rouge. Address: Sam Donaldson, ABC News.

Sessions, 2-3:30 p.m. South banquet hall. *Broadcasting and Marriage—Can They Co-Exist?* Moderator: Chuck Wolf, KIKK(AM) Houston. Panelists: Dr. Joyce Brothers; Dr. Harry Hoewischer; Merrilee Cox, ABC News; Gary Anderson, wis-tv Columbia, S.C.

for you.

Source: Arbitron Oct. 1984-Oct. 1983

# you're going to talk about long distance, make sure you get the whole story.

Nowadays, long distance telephone service is big news because it's undergoing big changes.

For one thing, equal access is being instituted nationwide. What it means to your listeners is that they will be asked to choose their long distance company. Not an easy decision, but one you can help them with if you have all the facts.

Example: Among the four leaders (AT&T, MCI, Sprint and Allnet), only Allnet<sup>®</sup> offers six second billing increments after the first minute. This helps make us, on average, the lowest priced.

We invite you to call Steve Ingish or Linda Haase, **312-269-1771.** If you're going to talk about long distance, they're the right people to talk to.

#### THE UNIVERSITY OF CHICAGO ANNOUNCES THE

The William Benton Fellowship Program at The University of Chicago, now entering its third year, provides a unique opportunity for professionals-television and radio reporters, news executives, producers, writers-to expand their expertise on essential issues, free from deadline pressure.

Each Fellow works with a faculty adviser to develop an individualized academic program of course work in such fields as law, economics, religion, and public policy. The Fellows participate in a weekly seminar dealing with such fundamentals as First Amendment issues. They also meet and exchange ideas with national and international leaders in media, government, business, education, and other fields of public policy.

Stipends are normally equivalent to full-time salary for the six-month period of the Fellowship. The Foundation covers tuition and travel costs. University personnel assist with local arrangements for Fellows and their families.

The application deadline is March 1. Fellows will be notified by June 1. The 1985-86 Program begins September 23, 1985.

#### "How we perform determines how we're perceived. Simply put, good deeds precede good stories." -Robert W. Lundeen

Chairman of the Board The Dow Chemical Company

In recent years, several companies have issued "public interest reports" to highlight their contributions as socially responsible corporate citizens.

Dow's 1984 Public Interest Report-our first-is now available by request. It includes features about our efforts to protect the environment and our workers, and how we help communities across the U.S.

To obtain your copy, call our Dow information line . . . for news media only.

#### **CBS** returns to cable programing

#### It pays \$57 million for interests in four regional sports networks, Bravo, American Movie Classics and Rainbow Programing

Two years after the network ended its \$30million misadventure in the cable programing business—when it pulled the plug on CBS Cable due to a lack of advertiser support for a cultural service—CBS said last week it was prepared to plunk down almost twice that amount, \$57 million, to buy into four regional sports services owned by Cablevision Systems and the Washington Post Co., and for stakes in Cablevision's Bravo and American Movie Classics program services and Rainbow Programing Services Co., the marketing and distribution company that sells them all.

Although CBS stock dropped three-quarters of a point the day of the announcement (Nov. 26) to \$74.25, perhaps due to the expected impact of the buy on earnings next year (combined with that of CBS's \$362.5million Ziff-Davis magazine acquisition two weeks ago [BROADCASTING, Nov. 26]), analysts hailed the network's proposed re-entry into cable programing as a sensible longterm investment. The deal at this stage is an agreement in principle. The parties expect to close by year's end or early in 1985.

If the agreement goes through as proposed, CBS would receive a one-third share of three regional sports channels now owned equally by the Woodbury, N.Y.-based Cablevision and the Post company, whose interests under the new configuration would also be one-third each. The channels, which all charge a subscriber fee and carry advertising, are SportsChannel, New York; PRISM, Philadelphia, and SportsVision, Chicago. The Post company bought 50% of Sports-Channel, New York, in February 1983. As partners. Post and Cablevision bought the Philadelphia and Chicago systems later that year. The New York regional service is the largest with 394,000 cable subscribers and 100,000 STV subscribers, followed by PRISM in Philadelphia with 357,000 cable and 13,000 SMATV subscribers. SportsVision, Chicago, currently has 52,000 cable subscribers.

In addition, the agreement gives CBS a one-sixth interest in SportsChannel New England, a Hartford, Conn.-based service. The original owner, New England Prime Cable Inc., controlled by a group of financial institutions headed by Aetna insurance company, retains a 50% interest. That service currently has 71,000 cable subscribers.

Rainbow Programing Services' Bravo, a service offering foreign films and performing arts programing, has existed as a standalone pay service for several years. But almost two months ago a new service, American Movie Classics. offering pre-1970 films, was introduced by Rainbow as the second part of a pay package with Bravo. The package is known as the Rainbow Service. The two-channel combination now claims about 200,000 subscribers, and Bravo as a stand-alone service still has 100,000 subscribers, although the stand-alones are expected eventually to be folded into the Rainbow Service. Under the terms of the agreement, CBS is to acquire 50% of both the Rainbow Service and RPSC, the marketing company.

Of the \$57 million that CBS will invest, about \$37.5 million is for the sports channels with the remaining \$19.5 million going toward the stake in the Rainbow companies. The Post company said it initially spent \$45 million for its half-interest in the Sports-Channel properties and that with CBS buying in for a third, the net cost of its own one-third interest would be about \$20 million.

Rainbow will continue to manage all four regional sports ventures as well as the Rainbow Service and their marketing and distribution. As a venture partner, like the Post company, CBS will provide "knowledge and expertise," in the program area, said a company spokesman, while "learning the nuances of management in cable."

The four services have the rights to 14 professional sports teams including the New York Yankees, Mets, Islanders, Cosmos and New Jersey Nets; the Philadelphia Phillies, 76ers and Flyers; the Chicago White Sox, Bulls, Black Hawks and Sting, and the Boston Celtics and Hartford (Conn.) Whalers.

CBS executives have acknowledged since the shutdown of CBS Cable that the company hoped to re-enter the cable programing business. Commenting last week on the deal, CBS/Broadcast Group President Gene Jankowski said: "Our entry into this partnership is a logical extension of our expertise and a way to participate in these successful and growing areas of cable television." He suggested that "the demonstrated appeal of live, local sports has made these regional pay sports channels very attractive, and the Rainbow Service has also established a firm position of its own." Cablevision founder Charles Dolan welcomed CBS to the venture as a partner that he said will provide not only added financial strength to the cable services, but added programing strength as well.

Analysts contacted last week suggested that while this latest CBS move, if completed, will have a negative effect on next year's earnings, it makes good long-term strategic sense. They pointed to the added leverage the network could gain in negotiating for the rights to sports programing and to the acquisition of a new distribution network that can help defray rights costs (not unlike ABC's current position as majority owner of ESPN).

"They are getting into one segment [cable programing] with continued good growth prospects," said John Reidy, a vice president and media analyst with Drexel Burnham Lambert Inc. But the short-term costs are not insignificant. Reidy calculated that this deal, along with the network's Ziff-Davis purchase, could cut CBS earnings by perhaps \$1 per share in 1985, about what he looked for CBS to be up that year before the purchases.

Joseph Fuchs, a vice president and media analyst with Kidder Peabody, agreed there would be some "short-term negative absolute impact" on CBS's earnings. But he said that the network's move into cable sports was a "strategically justifiable risk," given the clear synergies between cable and broadcast network sports programing. "It makes sense for them to be involved," the media analyst said.

He estimated that the buy into the cable sports and Rainbow properties alone would have a negative impact on earnings next year of perhaps 25 cents a share. But when that move is considered with the Ziff-Davis buy and the current "relative softness" of the broadcast market and the uncertainty of that market for 1985, Fuchs said CBS may earn only \$8 to \$8.25 per share in 1985, compared to the \$9.30 per share he thought the network capable of earning before the recent announcements. In 1983, CBS earned \$6.31 per share and estimates are the company will earn between \$8.50 and \$8.75 per share in 1984.

#### Fifth Estate Quarterly Reports

Company	Quarter	Revenue (000)	% change*	Earnings (000)	% change*	EPS **
Acton Corp. Disney Gray Comm. Tele-Comm. Telepictures Turner Broadcasting Wrather Corp.	Third Year Fourth Third Third Third Third Third	\$6,748 \$1,655,977 \$463,198 \$10,137 \$113,670 \$24,246 \$77,669 \$35,391	-9 27 28 -5 31 -5 26 17	(\$2,100) \$97,844 (\$64,007) \$664 \$5,329 \$3,131 \$5,298 (\$1,552)	NM 5 NM 6 1,900 28 -10 NM	(\$0.36) \$2.73 \$1.89 \$1.33 \$0.12 \$0.41 \$0.26 \$0.22

\* Percentage change from same period year before. \*\* Earnings per share. Parentheses indicate loss. NM means not meaningful.

In third quarter of 1983, Acton Corp. had net income of \$685,000. Disney said fourthquarter loss was caused by write-downs of motion picture and television properties and change in accounting method for investment tax credits. Before write-downs and accounting change, net income increased 16% for year to \$107,793,000, or \$3.01 per share, but decreased 10% for quarter to \$22,053,000, or 65 cents per share. Operating income increased 32% to \$291,033,000 for fiscal year, and increased 51% for quarter, to \$86,771,000. Increases were attributed to growth of home video, "strong showing," of recently acquired real estate subsidiary, Arvida, and success of movie "Splash. Company said worldwide television revenue, including The Disney Channel, increased 171% to \$16,527,000 in quarter and 105% to \$57,479,000 for year. Home video and nontheatrical revenue increased 61% to \$16,354,000 for quarter and 42% to \$78,212,000 for year. Disney statement said increase in television revenue was attributable to Disney Channel, which sustained operating losses of \$7.5 million for quarter, compared to last year's fourth-quarter loss of \$14.8 million. For year, loss for Disney Channel was \$35.5 million. Company said there are now more than 1.4 million subscribers, in 1,700 systems covering 19.1 million homes. In 1983 Wrather posted third-quarter net income of \$1,032,000. D Tele-Communications Inc. reported cash flow margin of 43% for third quarter. Company said "increased revenues reflect the acquisition of several cable television systems, as well as growth in subscriber levels in the company's cable television systems." I Turner Broadcasting said wTBS(TV) Atlanta contributed 60% of incremental revenue growth in first nine months, with another 12% provided by program syndication activities and 26% provided by CNN. Company said it had increased average per-sub rate charged to cable operators for CNN in third quarter but that rates "remained substantially below 1982 levels." Reduced net income was attributed to increases in film amortization, interest expense, depreciation costs and sales commission expense. Also cited was higher operating loss for cable production segment, attributed largely to costs related to election year coverage and "expansion of its domestic and foreign news gathering operations.

#### French diner

New York-based Corporation For Entertainment & Learning has joined with the French FR-3 network to produce Dining in France, a series of 13 half-hour episodes that will air on PBS in the fall of 1985. The series will be hosted by Pierre Salinger, ABC's Paris bureau chief who has lived in France for 15 years and written about cuisine. Dining in France will be produced in both English and French. Telepictures will handle international distribution. Sanford H. Fisher, CEL president, said a book and home videocassette are to be spun off from the series. KOED-TV San Francisco is entry station for the series and will also oversee the marketing of the book and cassette.

Dining in France is one of several projects currently under way at CEL. Fisher said CEL has made a deal with 20th Century Fox Television to distribute CEL's Animal Express series, which was on the Entertainment Channel until the latter went dark in early 1983. At that time, 79 of 130 commissioned shows had been produced and 30 aired, but Fisher said the new deal calls for completion of the remaining 51 episodes. The 79 episodes will be re-edited for commercial breaks. 20th Century Fox will make the series available to stations at the NATPE International conference in January.

CEL researchers and editors are also updating CEL's Videotape News Library, a video reference of major news events since 1893. Fifteen hours (covering 1973 through the 1985 presidentital inauguration) will be added to the library, which is leased to stations on 60 one-hour three-quarter-inch tapes. The library is currently leased on an exclusive basis in 22 markets and to networks in Canada (CBC), Italy (RAI) and Japan (NHK).

#### All-day affair

It hasn't reached the status of a national holiday yet, but New York-based rep Katz Television is planning a "Katzday" at NATPE—an afternoon of briefings for its clients before the programing convention begins. Katzday will go beyond the two-hour

#### They say that imitation is the sincerest form of flattery...

Only a decade ago, Archer Daniels Midland introduced the idea of structured soy proteins. While there are now many textured vegetable proteins, there is still only **one** TVP<sup>®</sup> brand.

Please don't use our trademark as a generic term or abbreviation. Keep our brand name intact by imitating our letters down to the  $\mathbb{R}$ .

Using America's abundance to solve the world's needs.

presentation Katz has traditionally done for its clients at NATPE by conducting a sixhour walk-through and review of all the important programing product at NATPE.

Katzday will begin at 3 p.m. on Thursday, Jan. 10, a day before the NATPE market opens on Jan. 11 at the Moscone Center in San Francisco. Katz will meet with its cli-

Gordon Hastings (I), president of Katz Television, holds a model of the new Katz Television programing conference center with von Soosten.

ents at the Hotel Meridien for an analysis and review of the November sweeps and an overview of product to be offered at NATPE. Afterward, Katz will break up the group into smaller sessions where new shows from selected distributors will be screened.

"We will invite the distributors of those shows to present the programs to you on Thursday afternoon, almost 24 hours before the convention opens and almost 24 hours before your competition is exposed to the programs," wrote John von Soosten, vice president and director of programing of Katz Television and this year's president of NATPE, in a letter to clients. "You'll have a chance to be exposed to the shows, to consider them...to be prepared to move on those shows that interest you as soon as the convention opens."

Katz Television will also be taking out booth space on the exhibit floor. The booth, consisting of four small referal rooms and a larger conference room, will be manned by Katz's 14-member programing department.

#### First-run for FCB

FCB/Telecom, the national television programing division of Foote Cone and Belding Communications, the New York-based advertising agency, plans to enter first-run broadcast television syndication next year
# **NBC** garners another first place

Boosted by the second part of its mini-series, *Fatal Vision*, NBC came in first for the second time in the nine-week-old prime time season and ABC—lifted by a special Sunday movie titled *The Ewok Adventure*—placed second. CBS came in third.

For the week ended Nov. 25, NBC averaged a 16.5 rating and 27 share in Nielsen's NTI service, compared to a 15.9/26 for ABC and a 15.3/25 for CBS. Despite a weak showing of its total lineups, CBS managed to capture five of the top 10 shows of the week, while NBC had three and ABC two. The combined network rating/share for the week was a 47.7/78 compared to a 50.3/80 for the comparable week a year ago. HUT levels were down 3% from the comparable week last year to a 60.8 from a 63.

The second episode of NBC's *Fatal Vision* averaged a 32.7/49 and was the secondhighest rated show of the 1984-85 prime time season, ranking behind NBC's *The Burning Bed* TV movie which averaged a 36.2 rating.

NBC attained its weekly victory by winning only two nights: Monday and Tuesday. CBS won Thursday and Friday while ABC won Wednesday, Saturday and—thanks to *The Ewok Adventure*—Sunday as well. Highlights of the week, night by night:

■ NBC won Monday with a share nearly equal to that of the other two networks combined. *TV Bloopers* got NBC off to a strong start for the evening, averaging a 19.7/30 and tying with CBS's *Murder, She Wrote* for the fifth-ranked show of the week.

■ NBC's regular Tuesday lineup of *A*-*Team*, *Riptide* and *Remington Steele* delivered its usual victory.

■ ABC won every half-hour Wednesday with its regular lineup of *Fall Guy*, *Dynasty* and *Hotel*. And ABC's *Fall Guy*, as it has five out of seven times. beat NBC's *Highway To Heaven*.

■ Although CBS won Thursday, *Magnum*, *P.I.* had its worst performance of the past nine weeks, averaging a 16/30 and ranking 25th out of 68 programs. And although it came in second NBC also had a disappointing night; its entire regular lineup of *The Cosby Show*, *Family Ties, Cheers, Night Court* and *Hill Street Blues* experienced its lowest ratings of the season.

CBS won Friday based on the strength of its 9-11 schedule with *Dallas* and *Falcon Crest*. ABC captured the 8-9 period with its back-to-back comedies of *Benson* and *Webster*, and NBC's V for the second time in the past four weeks overtook CBS's *Dukes of Hazzard*.

■ ABC's Saturday victory was based on a two-hour *Love Boat* special which averaged a 16.7/30. But it was a tie between ABC and CBS between 8 and 9 as ABC's *T.J. Hooker* and CBS's *Airwolf* both pulled a 12.8/22. However, NBC won the period by two-and-a-half share points with its back-to-back comedies *Diffrent Strokes* and *Gimme a Break*.

ABC snatched a traditional Sunday victory from CBS by scheduling the special *Ewok Adventure*, which outperformed CBS and NBC by nearly 10 share points at 8 pm.

**CONTACT: MARK CARLTON (713) 792-4633** 1100 Holcombe • Suite 1900 • Houston, TX • 77030 with the introduction of *Seeing Stars: The Movie Star Show*, a weekly, first-run, halfhour series to be produced in association with Richard Edgar Productions and syndicated by Orbis Communications. The series has been in production since last May and cablecast over the USA Cable Network. The broadcast version of the program will be offered on a barter basis at January's NATPE International and Association of Independent Television Stations meetings for airing beginning in April 1985.

According to FCB/Telecom senior vice president and managing director, Jack McQueen, Seeing Stars is expected to be slated primarily during early evening weekend time slots, although some weekday, prime time access scheduling may also occur. Orbis will handle sale of the program's two-and-a-half minutes of national barter time, with Clorox (an FCB client) the first advertiser signed. Another three-and-a-half minutes are being held for local barter sale.

"The show will have exclusive, in-depth interviews with film stars and very extensive descriptions of and clips from current theatrical releases," producer Dick Crew told BROADCASTING last week. "Its most unusual aspect will be actual movie-goer reviews of the current releases ... videotaped at suburban movie theaters." Jim Finnerty is host and chief interviewer for the series, and his quests have included Paul McCartney, Ryan O'Neal, Dolly Parton, Goldie Hawn, Sylvester Stallone and Bill Murray. Crew said the scope and budget of the production "will be expanded greatly" when the series moves from cable to broadcast, including location shooting and expanded feature elements.

# FTC chairman praises 'Reagan revolution'

### In speech to Press Club, Miller says Reagan philosophy producing good results at trade commission

Federal Trade Commission Chairman James C. Miller III gave a progress report on the FTC and extolled the overall effects of the "Reagan revolution" last Tuesday in Washington. He said the FTC's "proper role" was not "to tell entrepreneurs how to run their businesses," but rather to "keep markets competitive and free of fraud and deception."

In a speech to the National Press Club, Miller spoke of the agency's "effort to bring more economic logic—and Ronald Reagan philosophy—to the operations of the FTC." It was a departure, he said, from that of the previous administration, "where the FTC's leaders were preoccupied with using the agency to achieve their version of social justice." The chairman added that since 1977, the FTC has lost more than 60% of its antitrust decisions on appeal to the federal courts. "All of these losses were based on decisions the commission made before there was a Reagan-appointed majority," Miller said.

One of the "first tasks" of his chairmanship, Miller said, was "to change priorities and restore trust" in the commission, and to answer the question: 'Are our activities truly in the public interest?' If not, we've got our hunting dogs in the wrong part of the county. It's as simple as that," Miller said.

(Asked by one attending the luncheon if Miller missed former FTC Commissioner Michael Pertschuk, who recently left the commission, Miller quipped, "Who?" He then told the story of "a fellow who lives in a watch tower, and the clock on the tower goes off every hour on the hour, 24 hours a day. And one morning at 5:58, the clock breaks. And at 6 a.m., the fellow sits up in bed and says, "What was that?".... Yes, I miss Mike," he said.)

Miller reviewed 29 recommendations for change at the FTC, which he said were set as goals at the beginning of his tenure in 1981. The chairman reviewed the list: "Done that," he said about a recommendation that "all cases based on 'social theories' " be terminated; "done that," he said about a recommendation to develop "a policy protocol declaring only those advertising practices that deceive ordinary consumers and their purchase decisions accordingly." Miller said: "We have accomplished in major measure at least 25 [of the recommendations],.... have made substantial progress on two others (both awaiting final congressional ac-

Miller

tion), and plan to carry out yet another.... at the first opportunity." The remaining recommendation is now moot, he said.

Also reviewed were the FTC's priorities for the future. They include:

Reauthorization of the commission. In a question and answer period following his speech, Miller listed not achieving reauthorization as one of his "failures" as FTC chairman.

• To further clarify "the rules of the game" through "the timely release" of FTC opinions, enforcement protocols and the issuance of other guidelines.

■ To be "more aggressive" in enforcing laws against counterfeit goods and services and to "address" alcohol advertising. For the last, Miller said the FTC is examining the Center for Science in the Public Interest's petition to the FTC to ban broadcast advertising for beer and wine or require equivalent counteradvertising (BROADCASTING, Nov. 28, 1983, July 2), and will look at "a variety of ways" to deal with the issue.

• To complete the installation of a new system "which would mean more efficient management of our case load."

• To promote "education and nonlitigation strategies where appropriate." Miller said that in dealings with business, the FTC had become "less adversarial, more professional, in hopes of securing so-called voluntary compliance as a cost-effective alternative to litigation."

Miller said he was "proud to be a part of the Reagan revolution, not only because of its success in reforming regulation, but because of the success of its broader domestic program.... If you've ever repaired an old wooden chair—like I have—taken it apart and glued it back together—you know you don't sit on it right away. Instead, you bind it up with twine or elastic cords to maintain pressure until the glue has dried. If for no other reason, President Reagan's second term was needed in order to let the glue dry," Miller said.

### On the leading edge

"Arbitron is investigating several technological developments that could lead to advancements in radio measurement techniques," said Jim Ridings, vice president, advertiser/agency radio sales, Arbitron, before a meeting of the Media Research Club of Chicago.

Ridings outlined three possible alternatives that could eliminate the present diary book system. One method is a hand-held calculator with the capacity to store information. Ridings said this "electronic" diary "would be programed to help the respondent avoid confusion over call letters or such simple points as whether a 12:00 entry referred to noon or midnight." The data would be transmitted to Arbitron over telephone lines through the use of a coupling device, he said.

Another idea being discussed at Arbitron, said Ridings, is the use of home computers in radio measurement. "It would be possible to send survey households a floppy disk that contains all the instructions and information, allow them to input individual daily listening for a week and return the disk to Arbitron," he said.

Ridings also cited Arbitron's new joint venture with Burke Market Research called ScanAmerica, designed to improve its radio listening measurement technique. Scan-America is a new meter system to be tested in Denver next year, which will measure individual television household viewing and product purchases. Ridings said the Scan-America system could also be used to deliver a questionnaire on the television screen that the respondent would answer using an input device. "There are obvious applications here for asking household members

### **October increase**

Network radio business in October jumped 7.5% from the previous month to \$28,826,996, according to the Radio Network Association, which relies on financial information collected confidentially from ABC, CBS, NBC, RKO, Mutual and Sheridan by the accounting firm of Ernst & Whinney. Year-to-date, network billings have totaled \$217,517,307-up 3.4% over the same period a year ago.

about their radio listening habits over the course of a given week," he noted.

### Super sell out

The CBS Radio Network is "close" to a sellout for the Super Bowl on Jan. 20 in Stanford, Calif., according to Steve Youlios, director of sales, CBS Radio Networks.

Youlios told BROADCASTING that CBS Radio, for the first time this year, tried to steer away from selling some advertisers a flighted schedule on a game-by-game basis for the network's carriage of NFL contests. Rather, he said, CBS focused sales efforts on season-long sponsorships for its entire NFL broadcast package comprising 37 games— 27 during the regular season, many on Monday nights, and 10 post-season contests including the Super Bowl and Pro Bowl (BROADCASTING, Aug. 6).

During CBS's series of regional affiliates meetings ("Riding Gain," Nov. 19), Youlios said the company's philosophy was to tell

Year three. NBC Radio celebrated the third anniversary of its Talknet with a party in New York. The nighttime talk network, which went on the air in November 1981 with 23 affiliates, now has 215 stations. At the celebration were (I-r) Randy Bongarten, president, NBC Radio; Maurice Tunick, director of programing, Talknet; Steve Soule, vice president and general manager, NBC Radio Network, and Dick Penn, senior vice president, NBC Radio Networks.

advertisers that they didn't have to be users of network radio to buy CBS Radio sports. "They [advertisers] are buying events and an association with the NFL," he said.

Youlios also noted that in addition to several long-standing advertisers including Anheuser-Busch, General Motors, American Honda, Buick and Delco Electronics, the network attracted several new advertisers and business categories to the 1984-85 season as well. Among the new advertisers for the NFL on CBS Radio are: Alpine Electronics, Lanier (business machines) and Sir Speedy (instant printing).

### **Planning ahead**

Ernie Schultz, Radio-Television News Directors Association executive director, has sent a letter to 12 associations and trade groups asking for a "rundown" of their planned convention and meeting dates. RTNDA is trying to prevent associations from scheduling conventions on the same dates, a situation that occurred when the National Association of Broadcasters and the National Radio Broadcasters Association rescheduled their jointly sponsored Radio Convention and Programing Conference (RCPC) next year from Oct. 6-9 to Sept. 11-14-the exact dates of RTNDA's annual meeting. RCPC will be held at the Anatole hotel in Dallas and RTNDA at the Opryland hotel in Nashville ("Closed Circuit," Nov. 5).

Besides NAB and NRBA, other organizations that received Schultz's letter include the National Broadcast Editorial Association, the Society of Broadcast Engineers, the Broadcast Financial Management Association and the National Broadcast Association for Community Affairs. The letter, which listed RTNDA's convention dates through 1986 and its proposed schedule for 1987 and 1988, also asks the organizations to send their meeting dates to one another.

### **NPR's winter schedule**

Five jazz series, including two new ones (Sidran on Record, featuring pianist and composer Ben Sidran reviewing new jazz disks, and The Jazz Beat from Berklee, with performances from the Berklee College of Music in Boston), are among the highlights of National Public Radio's winter season, which begins in January. Also scheduled are 13 programs taped on location at the Sante Fe Chamber Musical Festival, as well as A Musical Offering: Authentic Instruments and Interpretations, a 13-part, two-hour series of performances played on "authentic reproductions" of early instruments. The hourlong series, McGraw-Hill's Young Artists Showcase, which has been broadcast in New York for eight years, will be fed nationally.

On the dramatic front, NPR will offer Don Quixote, The Lord of the Rings and the Ameri-

# *IF YOU SEE SOME OBSTACLES BETWEEN YOU AND AM STEREO-*

1

1

# MOTOROLA JUST TOOK DOWN YOUR OBSTACLE COURSE.

The big obstacle was dedicated single system receivers. That one has been totally demolished. C-Quam<sup>®</sup> AM stereo receivers are available right now from a "Who's Who" of the world's leading set manufacturers and carmakers.

Then came a whole series of high hurdles—high cost installation, service, technical support, financing, delivery. Gone, all of them.

Instead, there is no additional installation cost for our C-Quam AM stereo system. Motorola, a world leader in electronics, sees to service and tech support. Third party financing can put you on the air for as little as \$1,500 down, \$300 a month. And we can ship in 3 weeks if you're ready to roll. Dick Harasek has all the facts, figures and details. His number is 312-576-2879.

Finally, you ran into a real brick wall—Return on Investment. We took the wrecking ball to that one. Our exclusive telephone"Hotline!" is a live wire that helps you build audience, advertiser excitement and time sales with creative promotions. Just call 312-576-0554 and ask for Steve Kravitz.

So now there's nothing between you and a clear run for the AM stereo gold, because Motorola pulled down all the obstacles...from start to finish.

MOTOROLA AM STEREO. THE WINNING SYSTEM.

*cans All* series, the last featuring stories by Mark Twain, Harry Truman and Edgar Allen Poe.

### Money's worth

The financial industry spent \$36,792,000 in national spot radio advertising during the first half of 1984, up 19.8% over the same period last year, according to the Radio Advertising Bureau, which bases its information on data collected from 16 rep companies by Radio Expenditure Reports Inc. (RER), Larchmont, N.Y. Expenditures placed by banks and savings and loan institutions for the first six months of 1984 were up 25% to \$18.3 million. Insurance companies increased national spot outlays from \$7.79 million during the first half of 1983 to \$10.8 million in the first six months of this year, a jump of 38.9%.

### **Classical satellite**

The newly formed Concert Music Satellite Systems (CMSS), a subsidiary of Concert Music Broadcast Sales, New York (a national rep company for classical-formatted stations), was scheduled to transmit its first program via Westar IV last Saturday (Dec. 1) with the opening broadcast of Texaco's Metropolitan Opera series ("Closed Circuit," Oct. 8).

CMSS is interconnecting the full-time commercial classical affiliates of the Concert Music Network, another subsidiary of Concert Music Broadcast Sales formed in 1978. A total of 18 stations have earth dishes installed at their sites and are part of the

NPR's slice of the federal pie. National Public Radio's board of directors met via telephone conference last Monday (Nov. 26) to make a recommendation for the distribution of fiscal year 1986 federal funds for noncommercial radio. The board decided to recommend to the Corporation for Public Broadcasting that 66% (\$23,686,500) of the \$35.9 million for radio go to noncommercial stations' community service grants and 34% (\$12,201,000) to national programing. This is roughly the same split as that for FY 1985, NPR spokeswoman Deborah A. Weingrad said.

initial hook-up. Several stations are scheduled to be added in early 1985, according to Peter Besheer, CMSS president and cofounder of Concert Music Broadcast Sales. "The satellite system has the capacity to carry live programing originating from virtually any city in the United States," he said. Plans also call for CMSS to include about 200 National Public Radio member stations in the network over the next few months.

To date, CMSS said it has secured commitments from syndicators which total more than 40 hours of programing per week. In addition to the Metropolitan Opera, some of the other broadcasts CMSS will offer its stations via satellite are the Boston Pops and Boston Symphony from WCRB Productions, Boston; the Chicago Symphony, Lyric Opera of Chicago and Lincoln's Music in America from WFMT Inc., Chicago, and the Cleve-

### **News** hour

Mutual Broadcasting is expected to announce the expansion of its new America in the Morning news magazine series hosted by correspondent Jim Bohannon (BROADCAST-ING, Sept. 10) at the Radio-Television News Directors Association annual convention in San Antonio, Tex. The network broadcast, which currently airs from 5:05 a.m. to 5:30 a.m. NYT, will be extended to 6 a.m. NYT. Fashioned after NBC-TV's Today show and ABC-TV's Good Morning, America, the program features world, national and business news including reports from Mutual correspondents; national weather and sports information, and live interviews with newsmakers. It has cleared more than 150

Other programing plans for Mutual's news department include the launch of two farm reports, one during early morning and the other at midday. Target date is April 1, 1985.

### Two to the list

The Satellite Music Network, Dallas, has added Metromedia's WNEW(AM) New York and WASH(FM) Washington to its list of stations, bringing total affiliates to 443. According to SMN Chairman and CEO John Tyler, both stations will carry SMN commercial spots.

### Supporting the arts

Classical-formatted WFMT(FM) Chicago raised \$230,000 for the Lyric Opera of Chicago in a one-day, on-air "operathon" fund raiser. The money raised exceeded the original goal of \$200,000 and surpassed last year's \$165,000. Merrill Lynch was sponsor and major contributor of the operathon, held on Saturday, Nov. 10.

Like grandfather, like father. John R. Gambling (I), air personality and co-host, Good Afternoon, New York, WOR(AM) New York, is joining his father, John A. Gambling (r), as a permanent part of the morning show, Rambling With Gambling, beginning in January 1985. John R. represents the third generation of Gamblings on work. His grandfather, John B., created the program in 1924, and was replaced by John A. in 1959. John R. will do human interest features and take over the Saturday program exclusively as well as continuing to substitute as host of the morning program when his father is on vacation.

Last week, we proudly announced our relationship with KEZW Radio in Denver, CO. This week...

# Western Cable Show: convention for a 'maturing industry'

### Agenda includes programs on new telecommunications policy

The final major cable convention of the year begins its three-day run at the Anaheim (Calif.) Convention Center this Wednesday (Dec. 5) as the 16th annual Western Cable Show addresses the theme, "Blueprint For Progress." Sponsors last week revised downward their attendance projections, predicting about 8,500 will be present, down from last year's total of 9,800 and previous estimates that as many as 10,000 might register this year.

The number of exhibitors is expected to be about 220, covering about 137,000 square feet of floor space (relocated to the center's southwest wing), down from the 325,000 square feet occupied in 1983 by 270 exhibitors. About 50 of the exhibitors will be attending for the first time.

"Speakers will be giving their listeners hard facts and how-to, not just philosophy and blue-sky," emphasized Western Show Chairman Richard J. Maul, who is also director of marketing and corporate planning for Western Communications, a Walnut Creek, Calif.-based multisystem operator. "We've tried to emphasize panels that deal with specific issues facing our maturing industry.

Maul told BROADCASTING last week there is recognition that the industry's growth has leveled off. "The approach we wanted to take is: 'Yes, it's still a very good business. There's a good future in it. There will be some more products available, but we're taking a more realistic approach to how we're going to deal with them.' The emphasis is on basics, so that anybody from operations to marketing to engineering will be able to leave the convention with some concrete information on things they want to try."

There will be the usual panel sessions and exhibits, but the Western Show will also offer special programs on the implementation of the nation's new telecommunications policy. "This has been a critical legislative year for our industry," noted Gary A. Ho-kenson, chairman of the California Cable Television Association (which co-sponsors the event with the Arizona Cable Television Association). "The Western Show is going to be a timely forum on how decisions made in Washington affect the individual cable operator." Hokenson is vice president and general manager of the Southwestern region for Cox Cable Communications.

Among issues addressed during 21 breakout sessions will be must-carry rules, copyright, pay-per-view, packaging, community relations, service theft, videocassette recorders, customer retention, co-op advertising and new technologies.

"By and large, people are pretty upbeat," Maul said, expressing confidence that attendance will not be significantly below last year's. The rescheduling of the annual CTAM conference, which has immediately preceded the Western Show during the past several years, should help, he added. "Some people left the show early when CTAM was in front of us. They couldn't afford that much time away from the office."

Registration begins Tuesday afternoon (3-6 p.m.) and resumes Wednesday at 8 a.m. The exhibit hall will be open from 9 a.m. to 6 p.m. Wednesday and Thursday, 9 a.m. to 3 p.m. Friday. Hospitality suites will be open Tuesday through Thursday nights. Scheduled social events include a CCTA-sponsored reception on Thursday evening, recognizing the contributions of the C-SPAN public affairs cable network during the past year. On Friday night, the fifth anniversary of Women In Cable will be noted during the annual Western Show banquet (beginning with cocktails at 6 p.m.), which will feature "Best of the Cable Follies," a satirical revue created by WIC's New York chapter. The agenda for the show appears below. Exhibitors begin on page 118. An asterisk denotes a product new to the market.

# The Daily Agenda in Anaheim

All events at Anaheim Convention Center unless otherwise noted.

15. Speaker: FCC Mass Media Bureau Chief James McKinney.

# Wednesday, Dec. 5

Opening general session, 1-2:30 p.m. Anaheim Hilton, California pavilion. Welcome by Spencer Kaitz, president, California Cable Television Association. Blueprint for Progress: The Dynamics of Change. Moderator: Jack Clifford, Colony Communications. Panelists: Mel Harris, Paramount Video; Neil Austrian, Showtime/The Movie Channel; Jim Mooney, National Cable Television Association. Protecting Your Investment: Preventing Theft of Service. Room 3. Moderator: Chris Forgy, Community Cable TV. Panelists: Geri Duckworth, Monterey Peninsula TV Cable; Warren Kanagy, Strategic Security Services; Steve Rust, Times Mirror of Arizona.

We Did It Our Way: Cable Entrepreneurs Look to the Future. Room 4. Moderator: Burt Harris Sr., Harris Cable, Panelists: Steven Simmons, Simmons Communications; Steven Dodge, American Cablesystems; Craig McCaw, McCaw Communications.

The Challenge of Copyright in 1985: The Congressional Perspective. Rooms 5, 6. Moderator: Ed Merlis, NCTA. Panelists: Representatives Robert Kastenmeier (D-Wis.), Carlos Moorhead (R-Calif.), Howard Berman (D-Calif.), William Dannemeyer (R-Calif.), Daniel Lungren (R-Calif.).

Legislative roundtables. 10:30-11:45 a.m. Anaheim Hilton. Laguna A room. Roundtable discussion with members of the California state legislature. Repeated Friday at 10:30 a.m.

Session. Cable and the FCC: New Rules, New Relationship. Rooms 14,

Broadcasting Dec 3 1984

Three concurrent sessions. 10:30-11:45 a.m. The Buck Stops Where?

# Don't Be Duped.

An open letter to television programming executives:

Local TV stations may be urged to air an anti-plastics film titled "The Burning Issue."

The film portrays vinyl and other plastics as unusually hazardous materials that cause needless loss of life in fires—a charge that fire statistics disprove. Interviews with fire survivors, repeated shots of dead bodies, and a questionable experiment are used to lend "credence" to misleading and sensational accusations.

Moreover, the film devotes no time to other points of view.

Significantly, one of the film's producers is Atcor, Inc., a manufacturer of steel electrical pipe, which competes with plastic.

"The Burning Issue" is not a public service. It is a public disservice. We urge you not to air it.

> The Vinyl Institute, of The Society of the Plastics Industry, Inc.

For more information, contact The Vinyl Institute 355 Lexington Avenue, New York, N.Y. 10017 (212/503-0600).

The Economics of Local Programing on Cable. Room 3. Moderator: Alan McGlade, Falcon Communications. Panelists: Kathleen Schuler, The Foundation for Community Service Cable Television; Jay April, city of Los Angeles; Thomas Pratt, Cox Cable; Randy Watson, Mile-Hi Cable.

Cable Trends Over the Next Five Years: Impact on the Investment Community. Room 4. Moderator: Rick Michaels, Communications Equity Associates. Panelists: Paul Kagan, Paul Kagan Associates; Stewart Blair, TCI; Paul Bortz, Browne, Bortz and Coddington; Jackie Hurlbutt, First National Bank of Chicago.

The Cable Communications Policy Act of 1984: an Overview. Room 2. Presentors: Brenda Fox and Bert Carp, NCTA.

CCTA and C-SPAN reception. 11:45 a.m.-12:30 p.m. Room 1.

Luncheon. 12:45-2:15 p.m. Marriott hotel's grand ballroom. Speaker: Ed Allen, chairman, NCTA.

Four concurrent sessions. 2:30-4 p.m. Co-op Media Ventures. Moderator: Linda Beech, Mary Lou Wright & Co. Panelists: Cindy Weintraub, TCI; Kathryn Creech, Council for Cable Information.

Cable/Telco: Do We Have a Good Connection, or Are Our Three Minutes Up. Room 3. Moderator: Martin McCue, Centel Corp. Panelists: Tom Casey, Mintz, Levin, Cohn, Ferris, Glovsky & Popeo; Bob Patrick, Cox Cable; John Rivenburgh III, Rogers Cablesystems; Christopher Coursen, O'Connor & Hannan. Reactor: Steve Tuttle, TV Digest.

Effective Community Relations: A Necessity, Not a Luxury. Rooms 5, 6. Moderator: Al Pross, CCTA. Panelists: Mary Lou Wright, Mary Lou Wright & Co.; Gayle Greer, ATC; William Rosendahl, Group W Cable; David Quarles, Falcon Cablevision.

Focus on a New Law: Rates, Franchise Fees and Commercial Access. Moderator: Michael Morris, CCTA; Paul Zeltner, city of Lakewood, Calif.; Tom Rogers, House Telecommunications Subcommittee; Charles Walsh, Fleischman & Walsh. Reactors: Warren Carter, city of Torrance, Calif.; Danny Radcliff, Viacom Cable.

Session. 4-5:30 p.m. Focus on a New Law: Franchise Terms and Renewals. Room 2. Moderator: Gary Hokenson, Cox Cable. Panelists: Nick Miller, Arent, Fox, Kintner, Plotkin and Kahn; Steven Fadem, Warner Amex Cable. Reactors: Kevin Northcraft, city of El Segundo, Calif.; Jim Hirshfield, Summit Communications.

# Friday, Dec. 7

Cablepac breakfast, 7:45-9 a.m. Anaheim Hilton, Huntington rooms A, B, C. Speaker: Senator Alan Cranston (D-Calif.).

Three concurrent sessions. 9-10:15 a.m. Cable and the First Amendment: Facing the Issues. Room 4. Moderator: Charles Firestone, Mitchell, Silberberg & Knupp; Nick Miller, Preston, Thorgrimson, Ellis and Holman; Harold Farrow, Farrow, Schildhause, Wilson & Reins; A. Dirk Claussen, account executive, WFYR(FM)

She's a fellow. Broadcast journalist Marlene Sanders, correspondent-producer, CBS News, was one of three recipients of the "Fellows of the Society" award, the highest award given by The Society of Professional Journalists, Sigma Delta Chi. The award goes each year to journalists who have shown "outstanding professionalism in helping the public understand social and political issues of great importance."

Bernard Kalb, 62, culture and arts correspondent for NBC News, Washington, and former State Department correspondent for that network, as well as for CBS and the *New York Times*, has been named to replace John Hughes as spokesman for the State Department. President Reagan announced his intention to nominate Kalb as assistant secretary of state for public affairs. Kalb joined *Times* in 1946, and CBS in 1962, serving as correspondent in Southeast Asia, and as Paris bureau chief. In 1970, he became Washington anchor for CBS Morning News, moving to State Department beat in 1975. He joined NBC and his brother Marvin, who is NBC's chief diplomatic correspondent, in 1980 as State Department correspondent. He was named culture and arts correspondent in October, a beat, according to an NBC spokesman,

that was originated by NBC president, Larry Grossman, and designed to take advantage of Kalb's "sophisticated" tastes and extensive travel experience.

Chicago, named local sales manager.

John Stonis, director of client services, Hiber & Hart, joins WPEN(AM)-WMGK(FM) Philadelphia as research director.

Jan Stager, producer, WNEV-TV Boston, named public affairs director.

Carol Leavitt, operations assistant, KTVX(TV)

Some changes made. Steve Antoniotti, news director; Larry Perret, assistant news director, and Richard Askin, sales director, have resigned from KNBC(TV) Los Angeles. As of last week, replacements had not been named.

There had been speculation that there would be changes in the news department since John Rohrbeck was named to succeed Tom Straszewski as vice president and general manager of the NBC-owned station (BROADCASTING, Aug. 20, 1984). KNBC has made numerous on-air changes since last March and recently became the first of the network-owned stations in the market to trim the time allotted to weekday news programing when it shifted *NBC Nightly News* from 7 p.m. to 6:30 p.m. PST. The station's local news ratings have improved in some dayparts, however, and its November ratings are expected to be similar to or better than those of November 1983. "It's surprising that they would do this at this time," said a source at a rival station. "Their ratings haven't been that bad lately."

Salt Lake City, named director of public affairs and special projects.

Barbara Ciara, reporter, *Daily News*, Portsmouth, Va., and Bruce Dunbar, from WSJV(TV) Elkhart, Ind., join WAVY-TV Norfolk, Va., as weekend co-anchors.

Steve Ross, from WCAU-TV Philadelphia, joins WLYH-TV Lancaster, Pa., as 6 and 11 p.m. anchor.

Bob Nagle, sports reporter, WSBT-AM-TV South Bend, Ind., named sports director. Mitch Henck, from WSVL(AM) Shelbyville, Ind., joins WSBT-AM-TV as sports reporter.

Ed Lewis, from wQDI(AM) Homestead, Fla., joins KQIL(AM)-KQIX-FM Grand Junction, Colo., as sports director.

Ned Smith, from WTXL-TV Tallahassee, Fla., joins WPEC(TV) West Palm Beach, Fla., as sports anchor.

Caroline Seay, reporter, WLKY-TV Louisville, Ky., named medical reporter.

Mike Whitney, assignment editor, KTVX(TV) Salt Lake City, named assignment editor. David Hoefferle, from KCLG(AM) Washington, Utah, joins KTVX as weekend weather anchor.

Mario Gomez, from KOSA-TV Odessa, Tex., joins KHOU-TV Houston as weather anchor.

# Technology

### Deaths

George S. Vecsey, 75, writer, radio department, Associated Press, New York, for 30 years until his retirement in 1975, died at his New York home Nov. 23 of complications following surgery. He had continued to work part time for AP, and had covered Mets baseball home games for AP as recently as last season. Survivors include his wife, May Spencer, three sons and two daughters.

John Francis (Jack) Carney, 52, air personality on KMOX(AM) St. Louis since 1971, died Nov. 27 of hardening of arteries-related heart attack while completing scuba diving course at suburban St. Louis swimming pool. He began his broadcasting career at WIL-AM-FM St. Louis, and later worked at wABC(AM) New York. In addition to his Monday-Saturday Jack Carney Show, he also syndicated Jack Carney Comedy Hour through his own production company, Jack Carney Productions, to 250 stations. He is survived by his wife, Jody, son and daughter.

Lord Howard of Henderskelfe, 64, former chairman of British Broadcasting Corp., died of apparent heart attack Nov. 27 at his home in Castle Howard in Yorkshire, England. He was former member of BBC board, and chairman in 1980-83. His home was used as setting for television series *Brideshead Revisited*.

# Lou Adler: RTNDA's new driving force

Lou Adler, vice president and news director of WOR(AM) New York, has been a member of the Radio-Television News Directors Association for 13 years. "I used to go to all the international conventions," he admits, "but I was never terribly active." All that has changed.

"I was like a bull in a china shop," Adler says of his debut as president-elect of the RTNDA following last year's convention. Having logged over 30,000 miles since then attending regional meetings, the bearded, 55-year-old TV and radio journalist remains outspoken in his views on the changes he wants to effect as president of RTNDA (he officially assumes the post Dec. 7 at that organization's annual convention in San Antonio, Tex.), changes that he says will make the association more responsive to its membership and more independent.

Overall, Adler says there needs to be "more feedback" from the organization to its members. "They [the members] have been screaming: 'Give us nuts and bolts. Give us some information to do our job better,' and we weren't doing that." He also wants to minimize the practice of RTNDA holding regional meetings in association with AP and UPI functions. During the campaign for his present position, Adler labeled that as "piggybacking" and said the association "shouldn't ride on the backs of those whose business it is to sell us something."

In a more reflective mood, Adler now says: "That was a big issue when I first ran in the election. I think the situation has improved considerably. We will continue to do some meetings in association with AP and UPI, but not very many... I irritated some people when I came in and said: 'You've got to cut that out and you've got to do it today.' It doesn't happen that way. I've got some learning to do. I think everybody has come to understand that the ideal is that we stand on our own two feet, and we're a better organization because of it."

Adler arrived at his RTNDA post with strong Fifth Estate credentials. He joined CBS-owned wCBS(AM) New York in 1959 as a street reporter and remained there for 22 years. (He moved to wCBS-Tv New York for one year in 1966, returning to the radio side in 1967, when wCBS switched to an all-news format.) "I was very busy there," he says of his tenure at the CBS stations, "and I just didn't have time [for RTNDA activities]."

Adler, one of the original anchors under the all-news format, became the news and program director at wCBS in 1971. Adler moved to wOR(AM) in 1981. He continues on-air news duties, anchoring 10 newscasts a day, between 5:30 a.m. and 10 a.m.

"In 1982, RTNDA was looking for some-

Louis Charles Abler—Vice President and News Director, work(AM) New York; b. April 18, 1929, Jamestown, N.Y.; BS, Education, New York University, Freedonia, N.Y., 1952; MA, speech, Purdue University, 1954; served with Counter Intelligence Corps (CIC) in Austria and Germany, 1954-1956; wesb(AM) Bradford, Pa., 1956; wiCu-Tv Erie, Pa. 1957; wBEN-AM-FM-TV (wEBN-Tv is now wiVB-TV), Buffalo, N.Y., 1957-1959; street reporter and anchor, wCBS(AM) New York, 1959-1966; correspondent, wCBS-Tv, 1966-1967; anchor, wCBS(AM), 1967-1971; director, news operations and programs, wCBS, 1971-1981; present position since 1981; married, one daughter.

one to run for Region 12 director. It's not always easy to find people to run for these offices because people don't have the time or the resources. It takes a lot of time to be active in this organization because it's a volunteer organization, totally." Adler decided to make the time.

He ran and won. Adler served as RTNDA's Region 12 director (New York, New Jersey and Pennsylvania) for about a year. "I liked working for the RTNDA more and more as I got involved," he says, "and, finally, I wanted to be as involved as much as I possibly could. In order to do that I had to run for the presidency of RTNDA." He won that one too.

Among the changes Adler wants for RTNDA is a new procedure for electing officers. At present, the votes are cast by all members in attendance at the international convention. Adler says: "The convention isn't always filled to capacity with regional members," in part, he says, because of the expense of attending. Adler favors balloting by mail. During the heat of the campaign, Adler was quoted as saying the present process "becomes an old-boy network," and that "we end up with a crowning instead of an election" (BROADCASTING, Sept. 19, 1983).

Extending the vote by mail to all RTNDA members is of immediate concern to Adler.

But, he says, "I don't know how that will go. There are some practical problems involved. The constitutional revision will probably be presented to the membership during my presidency."

In addition to his duties at WOR and RTNDA, Adler serves on the board of the New York State AP Broadcasters. He is also chairman of the national advisory board of UPI, and chairman of the UPI's state advisory board.

Adler also has a news consulting business, Eagle Media, in Bronxville, N.Y. "It's relatively inactive now," he says, "but in the past I've consulted for UPI and for Radio New Zealand. I'll be doing more active things in that, but I'll have to let it go this year."

And what does Adler see in the future for broadcast journalism?

"In TV, it's fast approaching the point where TV is doing what radio is doing, to the detriment of radio. I think we're going to see an all-news TV station, no question, like a wCBS or WINS(AM) in New York. I think it's too expensive now for a TV station to do it, but ultimately it won't be. Think of it this way: Radio with pictures. It'll come.

"If you look at the possibilities of a fourth network, I think Ted Turner's going to have some competition in the all-news front." Adler points to the Independent Network News as an example, saying INN is "an alternative service that's needed."

One aspect of broadcast journalism much in the news recently has been exit polling. While the subject hasn't been discussed at the RTNDA board level, Adler's opinion is clear. "I think it's unnecessary, and whether it's intrusive or not, the public perception is that it's wrong. I was talking to Fred Friendly about exit polling and he said: 'We're mixing what we have a right to do and what is the right thing to do.' I don't think exit polling is the right thing to do ... However, predicting races on very solid information, how can you not do that? If we know that the President is elected even though the polls on the West Coast haven't closed, we have to tell the people. It's nonsense to say that we should withhold it. The problem is created by the fact that we have become so sophisticated. The election system needs changing. You can't change the news business. There should be a uniform poll closing time across the country."

On political reporting in general, Adler says: "I think politics generally bores people. We need to stay away from the long analytical pieces about something people don't really care about." As a suggested remedy Adler offers the following variation on journalism's "five w's": "It's no longer just the who, what, why, when and where, but it's also: "Who cares?". The more we remember that, the more successful we're going to be in grabbing the listener's ear."

In major affiliation switch, Paramount Television Domestic Syndication last week announced its first-run syndicated series, Entertainment Tonight, will move from independents KTTV(TV) Los Angeles and WFLD-TV Chicago to NBC-owned KNBC(TV) Los Angeles and WMAQ-TV Chicago, effective September 1985. Network stations will clear weekday strip during prime time access, giving Paramount prime time access on network affiliates in each of top 10 markets.

### 

Paramount Television Domestic Syndication announced last week it has sold its new first-run syndicated series, America, to eight stations owned by Belo Broadcasting, H&C Corp. and Cowles Communication Inc., plus seven additional network affiliates: KTSP-TV Minneapolis; KIRO-TV Seattle; KSEE(TV) Fresno, Calif.; WOWT(TV) Omaha, Neb.; KRCR-TV Chico, Calif.; KDLT(TV) Sioux Falls, S.D., and KOBI(TV) Medford, Ore. Paramount had previously announced sale of program to four stations owned by Post-Newsweek, partner in its production. According to Robert Jacquemin, Paramount's executive vice president of sales and marketing, all stations have committed to air America as afternoon news lead-in. Daily informational program is scheduled for distribution beginning in fall 1985. Belo stations clearing the program are wFAA-TV Dallas; KXTV(TV) Sacramento, Calif.; wvEC-TV Norfolk, Va., and KOTV(TV) Tulsa, Okla. H&C's stations are KPRC-TV Houston and KVOA-TV Tucson, Ariz. Cowles's outlets are WESH-TV Orlando, Fla., and KCCI-TV Des Moines, Iowa.

From the anchor seat. News anchors (1-r) Bill Kurtis (CBS), Peter Jennings (ABC) and Tom Brokaw (NBC) pose with Warner Brothers Television's Ed Bleier (third from left), the new president of the International Radio and Television Society, at last week's IRTS luncheon in New York. The three guests made no formal presentations but answered questions submitted in advance by those in attendance. CBS's Kurtis replied that if any "chill" on the news gathering process has developed at the network as a result of the libel suit filed by General William C. Westmoreland, "it is felt personally." But as an organization, he said, "we are pushing ahead as aggressively as we can." NBC's Brokaw added that "a very hostile environment exists out there" among viewers as to "what we do and how we do it." He said it was incumbant upon journalists to "reach out and explain to our public" what it is that journalists do. Otherwise, he suggested, the news media would "look some day" and find they had lost all public support. "We won't be able to go forward" at that point, he concluded. Commenting on ABC's current difficulties with the CIA (BROADCASTING, Nov. 26), Jennings said the words in the on-air clarification aired two weeks ago concerning the CIA (see "Top of the Week") "stood for themselves." He said "you can call it a clarification or you can call it a retraction." What the network meant to convey by it, he added, was that upon review the version of events offered by the network's main source for the story "didn't hold up to the standards we apply" for stories that get on the air.

At the luncheon, Bleier also announced that the recipient of the next IRTS Gold Medal Award will be IRTS immediate past president, Ralph Baruch. Comedy-adventure series Crazy Like a Fox moves into CBS-TV' Sunday 9-10 p.m. (NYT) period effective Dec. 30. It replaces Th Jeffersons and Alice, which make their final Sunday appearance Dec. 23, then move to Tuesdays at 8-8:30 and 8:30-9 respectively effective Jan. 8. Tuesday 8-9 period is currently carrying specia holiday programing; it was formerly occupied by AfterM\*A\*S\*F. which has been canceled, and E.R., which has been moved t Wednesdays at 8:30-9. Crazy Like a Fox stars Jack Warden a bumbling private eye.

Showtime/The Movie Channel Inc. said last week it signed dea with M/A-Com for signal scrambling systems for both Showtim and The Movie Channel. Both networks will use M/A's Video Cipher system, which HBO committed to earlier this year. HBG said it will have its signals (for HBO and Cinemax) fully scramble by first quarter of 1985. Showtime and TMC signals should be full scrambled by third quarter 1985, company spokesman said.

Victor Parra, now executive director of National Time Sharin Council in Washington, will be named executive director of CTAN (Cable Television Administration and Marketing Society) durin Western Cable Show in Anaheim, Calif., this week.

Kyw-TV Philadelphia is becoming known as killing ground for new directors. Pat McCarthy was fired on Thursday (Nov. 29) after si months on job. He was third news director at Group W station i two years. Randy Covington, who had been assistant news director at Group W's Boston outlet, WBZ-TV, replaced McCarthy o Friday, to become seventh KYW-TV news director since 1975. Tui nover has done nothing to improve ratings for KYW-TV's local news which have been poor. Situation there is extreme example o problem of instability known to news directors around country (se page 58.)

Sports program consultant Barry Frank said last week that he thinks 1988 Olympic games will be last with primary coverage by over-the-air networks and that in 1992 games may well be offered on pay or pay-per-view basis. Way Frank figures it, with both winte and summer Olympic sites that year slated for European cities broadcast attraction for games will be substantially diminished because time differences prevent live-event telecasts for primtime audience in U.S. Estimates are about 30 million homes will be cable addressable by 1992, and Frank submits that perhaps 11 million of those would be willing to pay \$100 for "season ticket covering those events carried by pay network. That would be \$ billion in revenues, of which perhaps \$600 million would be ear marked for pay-network rights fee. "Plus you'd have a [broadcast network deal," said Frank, for supplementary coverage to 70 mil lion homes that won't be cable addressable.

Mexico signed diplomatic note last Friday (Nov. 30), clearing way for all but 10 U.S. Class IV AM stations to quadruple nighttime power of Dec. 15. Jim McKinney, FCC Mass Media Bureau chief, said stations needed no further authorization for power increases. H added, however, that bureau would attempt to notify each static individually. Under agreement, 10 stations will boost power in tw stages, doubling it on Dec. 15, and doubling it again by July 1! 1985. Those stations are: KSON(AM) San Diego; KSOX(AM) Raymonc ville, Tex.; KOLE(AM) Port Arthur, Tex.; KAAP(AM) Santa Paula, Calif KTUC(AM), KFLT(AM) and KAIR(AM), all Tucson, Ariz.; KDAP(AM) Doug las, Ariz.; KIBL(AM) Beeville, Tex., and KVOZ(AM) Laredo, Tex.

Senator Ted Stevens (R-Alaska) is considering raising objection t selection of John Danforth (R-Mo.) as new Commerce Committe chairman. Danforth is next in line to succeed Bob Packwood (F Ore.) as chairman, but Stevens argues he has more seniority o committee and should become its next chief. It seems unlikel Stevens's claim will be recognized. Sources say he lost much of hi seniority on committee when he left to sit on another committe back in 1970's. In other Senate news, Alex Netchvolodoff, admir. istrative aide to Danforth, is slated to be named staff director c Commerce as soon as new Congress convenes. He succeeds Jerr Kovach, general counsel under Packwood.

NBC News commentator John Chancellor has been named to receive the second annual Sol Taishoff Award presented by the National Press Foundation. Citation will recognize his insightful commentary as well as distinguished broadcast journalism career that began with NBC in Chicago during the 1950's and included postings to Moscow, London and Brussels as well as number of years as anchor of Nightly News. (Chancellor also served tour as director of Voice of America during Johnson administration.) Award—named for late founder-editor of BROADCASTING magazine—will be presented to Chancellor by former CBS News correspondent and anchor Walter Cronkite at black tie dinner in Washington Feb. 28, 1985, at Sheraton Washington hotel.

epresentative Cardiss Collins (D-III.) plans to introduce legislation at would re-create Office of Telecommunications Policy in White puse, similar to one abolished in 1977 after it became too politized. Office would coordinate activities between State and Comerce departments and would be spokesman for administration I telecommunications policy. Director of proposed OTP would be ipointed by President and confirmed by Senate. Office would so include deputy director and three full-time staff members. If fice is kept small, Collins feels administration may respond more vorably to proposal.

**m** 

FCC's Mass Media Bureau has its way, commission will use andard comparative hearings, not lotteries, to determine who gets **D0 or so new FM stations** resulting from agency's Docket 80-90 oceeding. That will be bureau's recommendation, said Jim cKinney, Mass Media Bureau chief. He said bureau believes tteries would spur filing of too many "specious" applications. ureau is planning to present its recommendation—and its final it of allocations for stations—to commission at open meeting ac. 19.

**Ibbard Broadcasting** last week entered contract **to swap**, subject FCC approval, its **UHF channel 44 in Tampa-St. Petersburg, Fla.**, **r VHF channel 3**, which is licensed to West Coast Public Broadisting Inc. for noncommercial **wEDU(TV**) in that market. Stanley S. Ibbard, president of Hubbard Broadcasting, said swap would ake its independent **wrog(TV**) "the number-one technical station the market in terms of commercial viability." Source said agreeent also calls for Hubbard to pay West Coast "close to" \$25 illion.

hakel Communications announced Friday (Nov. 30) it has purased waka(TV) Selma, Ala., from Central Alabama Broadcasters c. for \$20 to \$25 million. Seller is principally owned by Charles isham, who has no other broadcast interests. Station recently on eight-year battle with FCC for antenna height increase to 000 ft. Buyer is Charlotte, N.C.-based station group of six AM's, c FM's and seven TV's and cable MSO operating nine cable stems in Virginia and West Virginia, principally owned by Cy N. hakel. It recently received FCC approval for its purchase of .0(FM) Colorado Springs (see "For the Record," page 127). Bahal must divest wKAB-TV Montgomery, Ala., to comply with FCC opoly rule. WAKA is CBS affiliate on channel 8 with 53.7 kw sual, 10.7 kw aural and antenna 360 feet above average terrain. Lou Faust, president of Selcom Inc., last week denied reports that Blair Radio may become part of Supernet—nonwired spot sales network (grouping of stations together into one buy for advertisers) comprising Selcom Radio, Torbet Radio, Eastman Radio and Masla Radio. However, both Faust and John Boden, president of Blair Radio, acknowledged that preliminary discussions between Selcom Inc. (company which formed Supernet) and Blair did take place on possibility of Blair joining Supernet, but no agreement was reached. Blair, which currently is not engaged in highly competitive nonwired network approach to selling spot radio time, is said to have initiated talks with Selcom. Blair is continuing to examine options in nonwired field.

President Reagan appointed Mary L. Azcuenaga, Federal Trade Commission attorney since 1973, as FTC commissioner last week. Recess appointment will run until end of first session of new Congress or until Azcuenaga receives regular appointment, FTC said. President's intention to nominate Azcuenaga was reported last summer (BROADCASTING, Sept. 10).

Media critique. Elie Abel, the former NBC News correspondent who is now director of Stanford University's Communications Department, says press freedom in the U.S. would be strengthened if the media were less arrogant and more willing to publish corrections when stories are found to have contained error. Abel, who spoke at Catholic University in Washington on Friday, also expressed regret at the U.S.'s apparent determination to leave UNESCO at the end of the year.

Abel, who spoke on the occasion of being awarded the 1984 First Amendment Defender Award by the law school's Institute for Communications Law Studies, noted that the number of libel suits has climbed rapidly despite the Supreme Court's Sullivan vs. New York Times decision, in 1964, that, because of its requirement that public figure plaintiffs prove "malice," was believed to have erected barrier against such suits.

Abel sees the rash of suits and the sympathy many juries show for the plaintiffs as stemming from the media being increasingly regarded by the public as rich, insensitive corporations deserving no special consideration. The issue, he feels, "is accountability, a matter of professional ethics, rather than law." He said: "I am left to wonder how many fewer libel cases would reach the courts if media managers were more willing to investigate complaints conscientiously and, when warranted, to publish corrections or retractions."

Abel discussed the UNESCO issue against the background of his efforts as a member of U.S. delegations that fought against efforts of some UNESCO members to curb freedom of the press internationally. The Reagan administration, in announcing its intention to leave the organization at the end of this year, cited its anti-free press attitude as part of its reason. Abel recalled that he and his American colleagues won "remarkably few" of the press freedom battles they fought at UNESCO meetings. Still, he believes those who have been on the other side of the free-press issue are now on the "defensive." Accordingly, he feels leaving UNESCO would be a mistake.

"UNESCO will survive, as it should, and the debate will continue in our absence," he said. "Our walkout, if there is to be one, can only diminish those forces within UNESCO that stand, as we do, for freedom of expression." He said that would harm journalists not only in the U.S. but "in the Third World and the Second who look to us as the champions of their eventual release from arbitrary rule and the dead hand of the state."

The issue of whether countries can affect the organization more by leaving it and thereby making a statement of its displeasure has taken on additional sharpness with the announcement by the United Kingdom that it will follow the U.S. out of UNESCO in a year if it does not reform conditions and practices the British find repugnant. The U.K. is one of the countries U.S. officials had said would carry on the free-press fight within the organization after the Americans pulled out.

### Maybe it will go away

Two conclusions may be drawn from the information made available so far in the case of CIA versus ABC before the FCC: The CIA is on very shaky ground, and ABC News has done nothing to advance the credibility of broadcast journalism.

The CIA has asked the FCC to violate the First Amendment by a gross extention of the fairness doctrine. It wants the FCC to "order...the retraction," presumably by broadcast, "of all false accusations made against the [CIA]." And, oh, yes, for the single incident involved, the FCC might also want to lift ABC's television station licenses.

The guess here is that if legal principles are observed at the FCC, the CIA will be told it has no case. The dispute between the CIA and the network is over the truth or falsity of a news report, which the commission is not in the business of judging, and not over a "discussion of conflicting views on issues of public importance," where the fairness doctrine is intended to apply. If the broadcasts constituted a personal attack, as the CIA insists, they were clearly in the category of news and therefore exempt from the personal-attack rule. (The CIA offers a tortuous argument that "an investigative report" somehow falls outside the "news" definition.)

Jim McKinney, chief of the FCC's Mass Media Bureau, has said it may take months to arrive at recommendations for FCC action on the CIA complaint. Perhaps in that time tempers will subside, and this case can go into limbo before it leads to interagency embarrassments.

It may not, however, be easily forgotten that ABC News went on the air two nights with wholly unconfirmed charges of CIA threats of assassination and that it buried the CIA denial in a way that was certain to discredit it. In a third broadcast, a week after the first two, ABC's Peter Jennings noted on the air a CIA statement disputing the earlier broadcasts, but he added: "We stand by the story."

It was nearly two months later that Jennings said, also on the evening news, that the original report could not be substantiated, and "we have no reason to doubt the CIA's denials." As Jack Benny used to say, in quite another context, "We're a little late, folks, so goodnight."

### On course at last

Cable television finds itself much like the shuttlecock in a badminton game these days. One moment it's getting a bad review, as in *Newsweek* magazine; the next it's getting a good one, as in *Business Week*; then it's bad again, as in the *New York Times*; followed by good again, as in *The Wall Street Journal*. The interested observer is left with a stiff neck.

The fewer than 10,000 cable loyalists who will travel to Anaheim, Calif., this week for the Western Cable Show aren't likely to be confused. They've been at the center of things long enough to know cable's basic strengths as well as to suffer its periodic aberrations. To their credit, they've stayed the course persistently enough to be there when the needle on cable's compass finally settled on a direction that can be followed with confidence—into a future that looks inevitably brighter with each passing day.

A number of elements are responsible for this present state of affairs. Most recent, but not necessarily first, is the Cable Communications Policy Act of 1984, which will revolutionize the way cable does business as well as emancipate it from the worst of municipal regulation. But even before that came the often painful realization of economic reality that swept cable from top to bottom, shaking out those services that went beyond the limits the medium could presently support and braking to a screeching halt the visionary notion that cable could finance, build and occupy an infinite number of channels.

The happy news in Anaheim this week, and across the cabled continent henceforth, is that a new consensus is growing about what cable is, what it can do and when it can be expected to do it. That good news, we warrant, will spread first throughout the cable industry and then throughout the other electronic media and to the business world. With any luck, it may even get through to the press.

### On with it

In a policy delayed for months by disagreements between State and Commerce Departments over the roles they were to play in it, the President has at last opened the sky to competition in international satellite communications. That comes as good news to broadcasters who see in this new marketplace an opportunity for increased spectrum capability at lower costs than now obtain.

Now it is up to the FCC, advised in the matter by State and Commerce, to decide what to do with five applications for service that have been awaiting the word that came from the White House last week. Whatever the FCC does should be done as promptly as possible.

Central to the FCC's consideration is the impact of competition on the International Telecommunications Satellite Organization, Intelsat, which was organized 20 years ago at U.S. initiation. Intelsat is in business as one of this country's most productive international ventures of recent times. The 108 other nations that also participate in Intelsat's ownership are entitled to assurance that Intelsat will not be driven from the sky by America's new turn to competition.

Intelsat's interests will no doubt be represented in the comments that the FCC is expected to solicit, and there is little doubt that they will be reflected in the FCC's actions. Their protection requires no further delay in a proceeding that has been sidetracked long enough by irrelevant jealousies in the bureaucracy.

Drawn for BROADCASTING by Jack Schmidt "Well, we're in the LPTV business now. Half of our transmitter is out."
