Your search for news and programming ends here with endless possibilities

Here is K-2. The most powerful Ku-band satellite. Ever. Delivering more than twice the power of any existing satellite. Able to send two simultaneous signals from each of its sixteen transponders.

As the ultimate delivery system, it can transmit to every commercial station in the country. Because every station will be offered—virtually free—its own K-2 receiving dish.

Think of the possibilities.

Then see us at the NAB, Booth 2130 and the Outdoor Exhibit area. Or give us a call at (612) 642-4645. Conus Communications, 3415 University Ave., Minneapolis, MN 55414.

WE OWE YOU.

For 50 years our radio station clients have made Blair the leader in national radio sales. You are the foundation on which we built our company.

We intend to honor your loyalty with a continuing commitment to excellence in radio station representation.

Our plan is to put in place an all-star lineup to manage Blair's radio rep companies. Charlie Colombo and Barbara Crooks are already on board. You know them. Their experience. Their leadership capability. They are committed to making Blair #1 in every important way you measure a rep's performance.

Jim Hilliard, John Boden and I are unequivocal in supporting this commitment. We owe you that. We will deliver.

Our thanks go to you, Blair's many friends in the radio business, for your support. We know that our strength is yours. Together, we'll keep on winning for another 50 years . . . and more.

Jack Fritz President John Blair & Company

S your corporate bank makin waves

Society Bank is.

We've been in communications financing for over 40 years, becoming specialists you can rely on. In radio, television, cable and all facets of the communications field.

For a conventional loan, a complex proposal, or specialized cash management, Society's seasoned team can prepare a package to meet your financial needs. As a communications

bank, our experience and perspective enable us to take a more creative approach to lending.

Communicate with us soon. Give Chuck Coon or Jolen Cameron of our Communications Division a call at (216) 622-8645. Or write to Society Bank, Communications Division, 127 Public Square, Cleveland, Ohio 44114. We can help you make waves.

> Join us at the MGM Grand during The NAB Convention, April 14-17. Ask at the desk for The Society Bank Suite.

To the table

Must-carry issue is forcing itself back to forefront of broadcast and cable industry concerns. De facto change in regulatory attitude on subject has been evident at FCC for some time, and pressure on cable carriage capacity grows daily. Happily for prospects of compromise, both sides appear willing to seek accommodation at bargaining table rather than fighting it out at commission or before Congress. National Association of Broadcasters President Eddie Fritts, in exclusive interview with BROADCASTING (see page 49), welcomes initiatives he's seen from cable, and National Cable Television President James Mooney, in major policy speech to be given to Washington Metropolitan Cable Club this Wednesday will take "stiff" line on subject and indicate urgency of getting to table quickly. Failing that, cable may soon find itself forced to seek court resolution of issue.

HDTV accommodation?

Chances for European acceptance of U.S.-backed Japanese high-definition television production system as international standard improve as selection process reaches highest ranks of Europe's broadcast technical management. Inclination of top-level European Broadcasting Union committee meeting early this week in Seville, Spain, is not to scuttle worldwide standard, group's head, Carlo Terzani, of Italy's RAI, is known to believe.

There's said to be increased willingness at management levels to weigh advantages of world standard against desire for further technical study of Japan's widescreen, 1,125 scanning-line system. Key technical issue is quality of conversion between HDTV system's 60-cycle-fieldper-second rate (same as NTSC) and 50cycle rate of European TV systems. Possibilities of selection of 60-cycle standard, at least provisionally, are good, Terzani believes.

Scaling down

All-Industry Television Station Music License Committee will showcase at National Association of Broadcasters convention this week how two highly rated television stations have eliminated nearly all ASCAP and BMI licensed music for locally produced programs. Stations wAGA-TV Atlanta, owned by Storer, and KWTX-TV Waco, Tex., owned by Buddy Bostick, have gone to outside sources to obtain performance rights for music that appears in local news and public affairs programing.

CBS affiliate KWTX-TV analyzed program schedule and found that during two-week period it aired 34 hours of local programing containing five hours and 24 minutes of actual music use. Because of efforts to pre-clear music rights from independent music libraries and packagers, station was able to eliminate use of BMI music and utilize only one minute of ASCAP music, WAGA-TV was able to eliminate both entirely. Bottom-line result is that both stations, although they are still paying ASCAP and BMI fees as required by law, found that for only few dollars a day they could do what costs WAGA-TV six figures and KWTX-TV \$35,000 annually to do.

End to content criterion

FCC source last week said commission is now considering elimination of "content orientation" from comparative renewals in its inquiry aimed at streamlining those proceedings. Inquiry, which has been pending since 1981, asked, among other things, whether commission should adopt more specific standards to determine when program record warrants renewal expectancy that gives incumbent broadcaster leg up over challengers at renewal time. Source said commission is exploring whether it can come up with standards for renewal expectancy that wouldn't be based on program content. One idea would be to base renewal expectancy solely on whether incumbent complied with statutory obligations and nonprograming-related FCC rules.

One after another

FCC Commissioner Henry Rivera has still not publicly announced his expected resignation, but he has now recused himself from cases involving law firm of Paul, Hastings, Janofsky & Walker. He previously recused himself from cases involving Fisher, Wayland, Cooper & Leader and White & Case ("Closed Circuit," April 1).

Ball's in another court

Look for ABC Radio to announce exclusive radio broadcast rights agreement with National Basketball Association (NBA) for 1985's best-of-seven championship series, slated to begin on either May 27 or May 30. Announcement was expected to be made at ABC Radio Networks annual affiliates meeting during this week's National Association of Broadcasters convention in Las Vegas. Mutual had carried 20-game NBA package for several years.

Daytime can wait

Madison Avenues gurus responsible for several hundred million dollars their clients annually spend on network television say they're under no pressure this year to break daytime upfront advertising buys on networks before prime time deals are negotiated. Last year, with daytime ratings up, market tight, and at least one network reportedly pushing to get daytime out of way in time for last summer's Olympics, upfront daytime sales broke before prime time. This year, with daytime ratings down and advertisers not anxious to trigger early buying spree, Madison Avenue planners see daytime not breaking until mid- or late May with prime time to follow soon afterward.

Sky's limit

Discussions are under way on possibility of satellite exchange between Radio-Television News Directors Association convention in Nashville and Radio 85 Management and Programing Convention in Dallas sponsored by National Association of Broadcasters and National Radio Broadcasters Association to be held at same time, next Sept. 11-14. If organizations can raise payment for gear and time, they'll do it.

Custom coverage

Look for announcement soon by Westinghouse Broadcasting and Cable Inc. of new service to local stations around country called D.C. Live. Service is designed to help television stations insert live interviews from Washington in news or talk programs, at price that Group W sources say can't be beaten. Cost for threeminute insert, which includes use of crew, equipment and transponder, will be \$875. Officially, it's corporate project, but subsidiary Newsfeed Network will run show. Service will be offered to Newsfeed affiliates and other stations alike, although it's understood affiliates will be offered discounted prices for D.C. Live material.

A St. Cloud Corporation Production distributed by

Decency case

For the fourth time in four cases—three of them decided in Utah courts—legislation designed to prohibit cable television systems from carrying "indecent" programing has been declared unconstitional, a violation of the First Amendment. In the case decided last week, U.S. Senior District Judge Aldon J. Anderson in Salt Lake City suggested another approach for those concerned about some of the offerings on cable television: Let parents "assume an important responsibility for maintaining a decent society."

At issue in the Utah case was a new state statute, one fashioned with an eye to avoiding the constitutional problems that had done in an earlier state law as well as an ordinance adopted by Roy City, Utah. It purports to regulate cable material according to "the time, place, manner and context in which the material is presented," and thus meet a standard under which the Supreme Court has upheld restrictions on speech.

But Anderson said the law does not meet the standard because, although the attorney general said he would not enforce the law between midnight and 7 a.m., he would be enforcing it "by reference to its content." The judge also said the law is "unconstitutionally overbroad and vague, and void on its face." He also said that the state act is preempted by the new federal cable TV policy law—but only because he found the state regulations unconstitutional.

Anderson's decision is of a piece with the two other opinions by U.S. district courts in Utah on efforts to regulate "indecent" cable television programing, as well as with one by the U.S. Court of Appeals for the 11th Circuit, in Atlanta in a case involving a Miami ordinance (BROADCASTING, April 1). Anderson said that the new Utah statute is more restrictive than the precedent established by the Supreme Court in *Miller v. California* permits—and that the rationale used by the FCC to prohibit broadcasters from airing "indecent" programing, as in the *Pacifica* case, cannot be applied to cable television.

George Shapiro, counsel for HBO, one of the plaintiffs in the case, said of the opinion: "It's a confirmation of what the other courts that considered the matter have said,"

The Decency Act, enacted in 1983, would prohibit the depiction by cable television systems of "a human sexual or excretory organ or function," "a state of undress so as to expose the human male or female genitals, pubic area, or buttocks...," "an ultimate sexual act ...," or "masturbation, which the average person applying contemporary community standards for cable television or pay-for-viewing television programing would find is presented in a patently offensive way for the time, place, manner and context in which the material is presented." The constitutionality of the act was promptly challenged in court by several cable systems, followed by HBO and a group of subscribers.

A key deficiency of the Decency Act, in Anderson's view, is its failure to meet "all three prongs of the $\it Miller$ test." (That test was devised in 1973 to define obscenity, but, Anderson noted, the state act goes beyond obscenity in the effort to attempt to regulate indecency.) He noted the act would permit banning material that does not "appeal to the prurient interest in sex or that, taken as a whole, contains serious literary, artistic, political or scientific value." Those are the first and third prongs of the Miller decision. To fall within the second prong, material must depict sexual conduct in a patently offensive way. But under the Utah statute, material would be indecent if it is patently offensive for the time, place, manner and context shown, regardless of whether the material depicts sexual conduct.

By failing to meet the *Miller* test, Anderson said, the Decency Act does not protect the values meant to be protected. It goes too far. It is, he said, "an unconstitutional regulation of cable television."

The state sought to invoke the Supreme Court's decision in the *Pacifica* case, in which the FCC was held to have the authority to impose sanctions on stations broadcasting "offensive" and "shocking" language at a time of day when children could be exposed to it. But Anderson—as have other judges in cases where that case was cited to support regulation of cable programing—said the decision is limited to the facts in the case. And, perhaps more important, he said "the fundamental differences between the broadcast medium and cable television require that *Pacifica* not be extended to cable television."

Anderson noted that the "scarcity" rationale which has been used to support government regulation of the content of broadcasting does not apply to cable television, a different medium. What's more, he agreed with the arguments made by the plaintiffs and the commission, which filed a friend-ofthe-court brief, that cable television, unlike the FM station in the Pacifica case, "is not an uninvited intruder." A subscriber must initiate the service. Anderson also said the restrictions are so vague as to infringe upon protected speech. Because the meaning of the words of the restriction are unclear, Anderson said, cable operators are left without notice of what material can or cannot be shown. "Thus, operators may be deterred from distributing protected material because they are uncertain whether the showing of such material will subject them" to the penalties that are provided for in the act.

As for his personal suggestion, Anderson said: "Following Supreme Court precedent, today's ruling delineates an area in which private individuals, particularly parents, must assume an important responsibility for maintaining a decent society. The First Amendment," he added, quoting from an earlier case, puts 'the decision as to what views shall be voiced largely into the hands of each of us...."

Cable sales aid: the VCR

Hoping to capitalize on the public's growing interest in home videocassette recorders, Jones Intercable announced last week plans to test market a VCR-cable package in four Jones systems beginning May 1.

During the two-month trial, Jones will offer consumers a General Electric VCR along with basic and two pay cable services for \$44.95 a month. Consumers will have to sign a two-year contract for the package, but, at the end of the two years, they will own the VCR.

If all goes well during the trial, said Glenn Jones, chief executive officer and president, the MSO will offer the package in its more than 50 other systems across the country. The systems serve 460,000 subscribers.

"We see a real synergy between VCR's and cable," said Jones. Cable can supply the programing to "fill up" the VCR, he said. Research has shown that VCR's are used primarily to time-shift—record and play back cablecast or broadcast programing at a more convenient time, he said.

The trial will be conducted in Jefferson county, Colo.; Oxnard, Calif., and Cedarburg-Grafton and Waupaca, both Wisconsin. The systems, which represent a cross section of Jones' cable systems, serve more than 50,000 subscribers, but pass nearly 150,000 homes, Jones said.

Jones hopes the marketing scheme will generate revenues by bringing aboard new basic and pay subscribers and by improving pay subscription retention through the twoyear contracts.

The MSO, Jones said, will also make money off the sale of the VCR's. Around 15% of Jones Intercable's subscribers are expected to purchase VCR's in the coming year, Jones said. "So why shouldn't they buy them from us?"

The cable company will sell the GE Model 6010, which features two-event, 14-day programability and wireless remote control and, according to Jones Intercable, has a "normal retail price" of \$499. Jones would not reveal what the MSO is paying for the units, but a major Washington retailer said the wholesale price would be between \$250 and \$300. The retailer sells the earlier, similarly equipped GE Model 5010 for \$439.

In the largest of the test systems, Oxnard, consumers will be asked to pay a premium of around \$12 a month to purchase the VCR or nearly \$300 over the two-year contract period. At the moment, Oxnard subscribers are paying about \$33 a month to receive basic service along with HBO and Cinemax.

The three pay combinations that will be available with the VCR and the basic service in Oxnard and the other three markets: HBO and Cinemax; Showtime and The Movie Channel, and HBO or Showtime and the Disney Channel.

Jones said that the cable company would deem the trial a success and offer the VCRcable package on a national basis if 2,000 or SO FAST, THE COMPETITION WON'T KNOW WHAT HIT THEM.

From the minute we launched our NEWSPOWER 1200 service. we knew we were on to something hot.

Because it delivers news that people want to hear. It delivers news you can believe. And it delivers it, without a glitch, at 1,200 words per minute.

That's 18 times faster than the AP Radio Wire.

Not only that, NEWSPOWER lets you pre-program your news. So you get only the news you need-state and local reports, sports, financial, world news AP ASSOCIATED PRESS BROADCAST SERVICES

With NEWSPOWER 1200, you get a direct line to the most pervasive, precise news staff in the world.

AP NEWSPOWER 1200

And when you consider all that, you realize something.

You realize that AP NEWSPOWER 1200 can be a tremendous advantage in your business, no matter what kind of competition you run up against.

For details about NEWSPOWER 1200, call Glenn Serafin, at AP Broadcast Services (800) 821-4747.

more people in the four systems sign up.

Jones promised to aiscuss preliminary results of the trial at the National Cable Television Association convention in Las Vegas, June 2-5.

Summer push

Home Box Office Inc. is announcing today (April 15) what it calls "HBO All-Star Summer," stressing its "strongest lineup of programing in years," backed by "the most extensive marketing campaign in our history."

A \$100-million lineup of films and original programing will be offered on HBO from this summer through the end of the year, and a "massive, integrated marketing effort" supporting it is intended to reach over 45 million households. It is valued at approximateto the \$10 million, according lv announcement by Seth Abraham, senior vice president, programing operations, and John Billock, senior vice president, marketing

They said the campaign will kick off with HBO's exclusive national pay-cable premiere, in June, of "The Natural," starring Robert Redford, and continue with major music events, such as "Tina Turner: Private Dancer" in June, such as "The Muppets Take Manhattan" (in July); films that will appear on no other national pay cable service, other specials featuring such stars as Olivia Newton-John, Kenny Rogers and Dolly Parton; new HBO Premiere Films, such as "Blackout," starring Richard Widmark and Keith Carradine; "Reunion at Fairborough," with Robert Mitchum and Deborah Kerr, and "Fortress," with Rachel Ward; sports events like Wimbledon '85 and World Championship Boxing, and a variety of other programing events.

Billock said that "the fully integrated nature of the advertising campaign reflects the new marketing realities. The cable business today is much more marketing-driven than it has been in the past. We must actively, aggressively and continuously market our programing to attract and keep cable viewers."

During May and June, All-Star Summer will be promoted by an HBO on-screen campaign featuring contemporary graphics and a musical theme. It will also be supported by a marketing effort featuring "television, radio and newspaper advertising, direct-response TV, direct mail, a national sweeppreviews, simulcasts. stakes. sneak community baseball games and a cable affiliate incentive program," valued at about \$10 million. Local promotions will include television, radio and newspaper advertising in 35 major cities, and advertising will also run in 12 editions of TV Guide and several other cable guides.

Billock said more cable affiliates are participating in this campaign's direct-mail effort than ever before, that more than 10 million pieces of direct mail will be delivered to homes passed and basic households, and that more than 12 million billstuffers highlighting HBO All-Star Summer will go to basic and HBO subscribers. Local promotions due to start in June include sneak previews, simulcasts and community baseball games sponsored by participating cable systems to raise funds for local charities. National advertising will run in Time Inc. publications *Time* and *People* in June and on superstation

BROADCAST FINANCIAL MANAGEMENT ASSOCIATION Serving the Broadcasting and Cable Industry

701 LEE ST. #1010 • DES PLAINES, IL 60016 • (312) 296-0200

WTBS(TV) Atlanta and the ESPN, USA, CNN and BET networks for an eight-week period beginning April 22.

Making it easy

The Southern California Cable Television Marketing Council, a consortium of Los Angeles area cable operators and national cable programers, will launch an \$800,000 direct-response television advertising campaign in Los Angeles beginning April 18. The five-week campaign is designed to produce an immediate increase in basic penetration for the 11 participating cable companies. Operating some 60 systems, the companies now serve 2.5 million basic subscribers. Two 60-second and eight 30-second spots, all variations of the same theme. will urge noncabled viewers to call a toll-free number (1-800-CABLE-85) to order. As an inducement, the spots will offer a 15-day money-back guarantee.

"For the first time, southern Californians will be able to order cable by calling one central number," said Anthony Farwell, executive director, SCCTMC. "That, combined with our strong offer, should produce significant subscription increases." According to an SCCTMC spokesman, Asher/ Gould, the council's advertising agency, will place the spots on nine stations, including two Spanish-language outlets, mostly in day and fringe time. The spots, he said, will air 1,000 times during the flight.

HBO's new BET

Home Box Office Inc., which is acquiring a minority interest in Black Entertainment Television, will also take on the management of all sales and marketing activities for the black-oriented, advertising-supported basic cable service. Don Anderson, HBO senior vice president, will head the BET sales and marketing operations, reporting to Peter Frame, HBO executive vice president, affiliate sales and operations.

BET President Robert L. Johnson said the new relationship was "exactly what we wanted and needed to grow"—access to HBO's expertise in marketing cable services. HBO President Joe Collins also saw "tremendous crossover potential between HBO and BET in terms of marketing and programing," because, he said, BET has demonstrated that it attracts nonblack as well as black viewers.

Officials said BET will pay HBO an annual fee for its services. Anderson will be supported by BET's sales organization, which will also retain primary responsibility for launch and affiliate services support.

The new alignment followed HBO's agreement to acquire approximately 14% of BET common stock in exchange for having provided BET with transponder space.

Signal action

Representative Robin Tallon (D-S.C.) introduced H.R. 1837 which would prohibit duplication of network signals under the FCC's must-carry rules. The bill applies to "certain out-of-state broadcast signals" and protects cable systems from having to carry the signals if the station is "neither in the state served by the cable system nor in a major television market, and the programing of such station is substantially duplicated by the programing of another station carried by the cable system."

ONLY ONE CAMERA SHOOTS THIS WELL IN 2 FOOTCANDLES. IMAGINE HOW IT SHOOTS IN BROAD DAYLIGHT.

The Panasonic* N-3 NiteHawk." It's one of a kind because it's the only camera with three Newvicon* tubes. And that means you get outstanding picture quality under a wide variety of lighting conditions.

When you're shooting at night or in dimly lit locations, as in the simulated example above, the N-3's unique combination of three 1/2" Newvicon tubes lets you make the most of available light by providing bright, natural video images.

In sunlight and in the studio the N-3 continues to shine with 600 lines horizontal resolution. An impressive S/N ratio. As well as minimal lag, burn-in, comet tailing and geometric distortion. What's more, the N-3 has all the professional features you'd expect from the broad line of Panasonic threetube cameras.

Still, with all the N-3 has going for it, there's another bright spot. Its price.

Audition the NiteHawk and see why from sunlight to night light no other camera can hold a candle to it.

Straight talk to AM Station Managers.

.

° '

• •

Seventy percent of all radio listening now takes place on the FM dial. AM Stations, faced with declining audience shares, are looking to ABC Talkradio for superior programming to attract new listeners and advertisers.

Many of the top-ranked ADI's are now combining ABC Talkradio with their own local talent. We're only three years old, and already 94 radio stations have joined forces with us. With flexible weekday or weekend programming, these stations are showing dramatic increases in ratings, revenues and profits.

Now when you put ABC Talkradio to work for your station, you have your choice of quality daytime, all night or weekend programming, proven listening success, greater advertising revenues, and an end to "copycat" radio.

ABC TALKRADIO DELIVERS LISTENERS.

Talk radio is a new form of learning and entertainment. It is attracting more 35- to 64-year-old premium listeners. That's the audience with the highest disposable income, leisure time and specific consumer needs. As the baby boom generation matures, ABC Talkradio speaks its language.

ABC TALKRADIO DELIVERS PERSONALITIES.

The ABC Talkradio lineup is packed with personalities and guests not available in your local market. They are informed, provocative, and entertaining. With a special toll-free number to call, audiences do more than just stay tuned; they get involved with the hosts and gyests.

Each of the weekday program hosts, Dr. Susan Forward, Öwen Spann, Michael Jackson, Dr. Toni Grant, Dr. David Viscott, Ira Fistell, and Ray Briem, have achieved national recognition. They continue to generate widespread press coverage. Let these stars and the weekend program hosts shine for your market: Bill Bresnan (Finance), Ralph Snodsmith (Gardening), Tom Shorall (Law), Leon Kaplan (Car care), Al Ubell (Home repair), Dr. Robert Atkins (Nutrition), Dr. Lawrence Balter (Child Psychology), Dr. Dean Edell (Medical), Dr. Malcolm Kram (Pet care), Larry Miller and Barbara Rosen (Children's Radio Workshop), along with Bob Fitzsimmons as host.

ABC TALKRADIO DELIVERS FLEXIBILITY.

Selecting your own flexible programming is the key to our ratings success. Flexible programming saves you time, money, and energy for the sole purpose of concentrating on your biggest money makers: morning and afternoon drive, sports, or special events. We know that, for many, drive time is when you make the bulk of your profits. ABC Talkradio can fill the rest of your regular broadcasting day with quality programming at no cost, yet saleable for greater revenues.

We provide a daily total of 12 hours of local time programming, plus 6 optional hours Monday through Friday, in addition to 9 hours of programming on Saturday and Sunday. There are windows in the format for newscasts, and many opportunities within each hour for local station identification and promotion.

ABC TALKRADIO DELIVERS COMMERCIALS.

Your commercial sales opportunities are unlimited. You can insert up to 13½ minutes of commercials per hour. Many of these programs are designed as sponsorship hours for special advertisers.

Because talk radio has the right audience, for the first time in many years, radio is winning back many of the big name advertisers. Local advertisers, many brand new to radio, are also selecting those programs that best suit their service or products.

ABC TALKRADIO DELIVERS DIRECT.

We deliver the highest-quality talk radio programming via RCA Satcom IR satellite. Depending on your satellite receiving capability, the cost of the necessary initial equipment can be as little as \$950 for a decoder. All local talk radio programming elements are customized for each station at no charge.

Be a part of ABC Talkradio and put this powerful format to work for you. To learn more, talk with Rick Devlin, Vice President, Director of ABC Talkradio at (212) 887-5638. But do it now! You can't afford to miss this exclusive opportunity for your market.

WE DO MORE THAN TALK. WE DELIVER.

RADIO ONLY

HIP of Greater New York □ In expanded use of radio in 1985, health service organization has set radio advertising in flights over 19 weeks ending in November on four stations in New York. Commercials, which will be carried in all dayparts, are aimed at small businessmen with as few as three employes. Agency: Koehler Iversen, New York.

American Cyanamid □ Six-week flight in support of company's insecticide for farm crops is scheduled to start this week in more than 20 markets. Commercials will run in farm programs. Target: farm families, 25-54. Agency: Tucker Wayne & Co., Atlanta.

Great Western Savings & Loan Oneweek flight in late April and two oneweek flights in May will support company's Florida real estate loan offices in Boca Raton, Miami, Fort Lauderdale and Tampa. Commercials will run in morning and afternoon periods. Target: adults, 25-54. Agency: Dailey & Associates, Los Angeles.

Delco Electronics Car and truck radios will be spotlighted in five-week flight set to begin this week in 11 markets, including Atlanta, Chicago and Houston. Commercials will run in daytime periods on weekdays and weekends. Target: men, 18-49. Agency: Campbell-Ewald, Warren, Mich.

Honey Baked Ham Co. □ In expansion of its summer promotion program, company is preparing 16-week flight to run in 14 markets, starting in early May. Commercials will be placed in weekday periods in daytime slots. Target: adults, 15-54. Agency: Mills Hall Walborn & Associates, Cleveland.

W.B. Roddenbery Co. Campaign for various food products will run for three weeks in late April in 12 markets in South. Fringe, daytime and prime time periods will be used for commercials.

TV ONLY

Target: women, 25-54. Agency: Evans/Atlanta.

New England Apple Co. □ Apple sauce and juice drinks will be highlighted in three-week flight to start in early May in eight New York and New England markets. Commercials will be carried in all dayparts. Target: women, 25-54. Agency: Harold Cabot & Co., Boston.

Popeye's Famous Fried Chicken & Biscuits In Doyle Dane Bernbach's first campaign since taking on account, Popeye's fried chicken is featured in

initial flight of two weeks that began last week, recesses for one week and returns on April 29 for three additional weeks. List contains 25 markets, including New Orleans, Chicago and Washington. In

Adr Vantage

Where there's Smokey... For more than 40 years, Smokey Bear advertising has tried to show that people's carelessness can start fires and destroy beauty of forest. In 1985 version of Smokey Bear TV commercial now being distributed to television stations, emphasis has shifted: Spot stresses that person who starts forest fire—even accidentally—can be arrested. Foote, Cone & Belding, Los Angeles, volunteer agency for Advertising Council's campaign, called on producer Bob Giraldi to produce spot which, in mini-documentary style, depicts agony of man as he is booked for starting fire by accident.

HOREY Dear

Americana. Eastman Kodak Co. has added new segment to its "Because Time Goes By" theme begun last year, introducing its new "America" series, starting last week on network television. "America" spot is in same emotional vein as its predecessors—"Reunion," "Goodnight" and "Baseball"—as it describes odyssey of young man riding motorcycle throughout U.S. to find his own "America."

Lots of TV money. Television advertising investment by financial services grew by 24% in 1984 to \$687.2 million, according to Television Bureau of Advertising. Largest category within financial services was banks and savings and loan companies, which spent \$203.7 million last year, up from \$171.1 million in 1983. Largest single TV advertiser within category was American Express Co., with estimated expenditures of almost \$78 million, up 112%.

commercial, patron reacts to his first bite of chicken with hair standing up in surprise at pleasant taste. Commercials are to be carried during early and late fringe periods. Target: adults, 21-49. Agency: Doyle Dane Bernbach, New York.

RADIO AND TV

TransSouth Financial Corp. D

Availability of loans will be promoted in five-week flight to run in more than 30 markets on radio and 14 on television. Market list includes Nashville, Orlando and Tampa, Fla. Commercials will be carried on radio in all dayparts and on TV in fringe, prime time and sports periods. Target: men, 25-54. Agency: Loeffler Marley Mountjoy, Charlotte, N.C.

BMW Dealers
Radio effort is scheduled to start this week in 20 markets in South for four weeks and four-week television flights will begin in April and May in about 50 markets. Commercials will be placed in all dayparts. Target: men, 25-54. Agency: Ammirati & Puris, New York.

Roy Rogers Restaurants Four-week flight in five markets, including New York and Baltimore, is set to begin this week. Commercials will be placed in all dayparts. Target: adults, 18-49. Agency: Smith, Burke & Azzam, Baltimore.

AMERICAN MUSIC MAGAZINE

Radio stations can now make RICK DEES a part of their air-staff all week long.

STARRING

"AMERICAN MUSIC MAGAZINE starring RICK DEES" ... five one hour shows, one for each day Monday through Friday, every week. Ideal for drive time adjacencies, mid-days or early evenings.

Just as TV's Entertainment Tonight lets everyone know what's happening in the entertainment world, "AMERICAN MUSIC MAGAZINE starring RICK DEES" will let your listeners know what's happening day by day in the world of music . . . from Rick's vantage point in Hollywood—the record capital of the world.

You'll find out the WHO, WHAT, WHERE, WHY AND WHEN of videos, tours, new albums and new projects. Who's hot and who's not. "AMERICAN MUSIC MAGAZINE starring RICK DEES" is filled with lots of music, Rick's ingenious wit, his irresistable charm and his entire cast of comedic characters who have made his week-end program a giant success. Drop-ins from the actual stars themselves will complete the program.

A radio advertising commentary from Robert Galen, senior VP for research, Radio Advertising Bureau, New York

Proving radio's effectiveness with a make-believe mall

The Greater Cincinnati Radio Broadcasters Association, like many radio marketers, wanted to demonstrate the effectiveness of radio. Having been exposed to advertisers and agencies who weren't really quite sure that radio worked, 17 member stations decided to do a major test during the early part of 1985 to prove radio's tremendous ability to communicate.

Working with Jerry Galvin, creative director of a local ad agency, Galvin, Menderson, Maier & Press, they developed a radio campaign and researched awareness to demonstrate the power of our medium. They built a campaign for a hypothetical mall called Plummet Mall. The copy points stressed that the mall would be Cincinnati's first vertical mall. Moving sidewalks, spiral escalators, controlled temperatures and low prices based on pass-along energy savings were selected as the distinctive features of the product. To build anticipation and demand, the campaign teased the opening at an undisclosed location in Cincinnati "soon." These points were emphasized and reinforced by a tag line, "The best value in town is a hole in the ground-Plummet Mall.'

To demonstrate how easy it would be for an advertiser to duplicate the campaign, they produced the spots with only one voice, minimal sound effects, short musical phrases and dramatic pauses. The commercials were produced by a local firm, Jay Gilbert Productions. Of four 60-second spots, the first three talked about Plummet Mall coming soon. During the fourth week, the spots announced that "heavy freezes had caused a seismological occurence" that shifted the mall to a location somewhere between Cincinnati and Lincoln, Neb.

The spots were run according to a media plan developed by Rudy Siegel at Galvin, Menderson. Using a Tapscan schedule analysis, four weekly flights were designed to generate 60%-70% reach and 2-2.5 frequency using run-of-schedule placements with even distribution through all dayparts and days of the week. Each station ran a "typical" schedule, 14 to 30 spots per week, from Jan. 14 through Feb. 10. The total cost of the "buy" would have been \$60,700.

The campaign attracted immediate attention in town. Stations referred all telephone calls to the advertising agency, which maintained the confidentiality of the project. Calls came from merchants who wanted to know what other merchants would be opening stores there, from people interested in opening stores or selling services (Muzak, Cincinnati Bell, Cincinnati Gas & Electric) and even from somebody seeking the contract for Plummet Mall's waste disposal. Ralph Leibing, the Hamilton county build-

Robert Galen was appointed senior vice president for research of the Radio Advertising Bureau in August 1984. He is responsible for the planning, conceptualization, operation and development of research efforts to support radio's sales and marketing arm and is the association's chief adviser on matters pertaining to research and media analysis. Before joining RAB, Galen served as senior vice president and general manager of the Marketing Services/Research Division of Blair Radio-a job which culminated 25 years at Blair and several key executive positions in research and marketing. His accomplishments include the conceptualization, design and development of the BRAIN radio research computer system, the planning and teaching of "The College of Radio Knowledge," a highintensity media workshop, and the design and direction of numerous qualitative and quantitative research surveys used by the radio industry. Galen is also a founder and cochairperson of the RAB Goals Committee, a member of the Electronic Media Rating Council, Radio Technical Committee and a member and former chairman of the Station **Representatives Association Radio Research** Committee.

ing commissioner, told the *Cincinnati Post* that he was flooded with calls, as did the Greater Cincinnati Chamber of Commerce, which reported 20-25 calls a day.

Now comes the research part. The radio group hired Burke Marketing Research to do an awareness study. The first question was: "Have you, yourself, heard anything recently about a new mall opening in the Cincinnati area, or not? If yes, what is the name of that mall?" Of respondents, 33.2% correctly identified Plummet Mall by name. If a person indicated that he did not know about a new mall opening, he was prompted: "Have you heard of a new *underground* mall opening soon in the Cincinnati area, or not? If yes, what is the name of the underground mall?" Plummet Mall was correctly identified by 7.5%. Of the sample of 506 people, 40.7% were able to identify the mall correctly without prompting after only four weeks of radio advertising.

The study also went further and asked those who did not remember the name whether they had heard of a new underground mall called Plummet Mall. Another 19.8% of those surveyed acknowledged awareness. This means that 60.5% of people interviewed had some awareness after only four weeks of advertising. According to Jim Russell, vice president of Burke Marketing Research, "These results are extraordinary awareness figures no matter what qualifications. A 41% unaided awareness number after just four weeks is to my knowledge unprecedented, and it was achieved with a relatively modest radio buy. Most product managers are very happy with 10%-15% figures, which are gained only after significant television advertising supplemented with couponing, sampling, etc.

In spite of several caveats—general problems in gauging consumer awareness, the brevity of the campaign and its local scope, the relative size of the product category and the difficulty in squaring this test with Burke's normal three-month ad cycle—Russell told us that many of the people on his staff were "amazed" at the impact of this campaign.

The Plummet Mall test firmly reinforces our strong belief in radio. It says that radio sure does work. It also says that certain things must be done to make radio work. First, a good commercial is needed. These spots were very well produced even though they were not expensive. Second, a radio campaign must be reasonably sized. People who buy six spots a week on one radio station and then wonder about the impact are missing the boat. The Plummet Mall's \$60,700 budget was much less than what Biggs, a department store, spent when it opened its first U.S. store in Cincinnati during 1984. Finally, radio, all alone, can develop major impact for an advertiser. This gives us two sales points. One, a radio campaign with sufficient thought and budget can pay off for advertisers. Two, if radio alone can ring the bell, radio can certainly improve the effectiveness of a TV, newspaper or direct mail campaign. Plummet Mall was strong proof of radio's ability to sell. The results say clearly that radio shouldn't take a back seat to any other medium. People listen to radio and rely on what they hear. After all, Americans didn't buy over 50 million radio sets in 1984 to use as doorstops.

WEEKLY TOP 40

Did You Hear What Rick Dees Said This Week-End?

Now every market can hear what one of America's most creative and successful air personalities is saying.

RICK DEES' WEEKLY TOP 40, a weekly four hour countdown from The United Stations, is hosted by Rick Dees, Los Angeles' premier morning personality from KIIS Radio.

RICK DEES' WEEKLY TOP 40 is already broadcast on

Rick Dees is the biggest success story in personality radio. His ingenious wit, his irresistible charm, his cast of comedic characters will attract new listeners and keep them coming back week after week. some of the hottest radio stations. The most successful program in the history of modern radio—the only long form entertainment program to be heard in every one of the top fifty markets.

 May 11—Radio-Television News Directors Association region eight meeting. Pontchartrain hotel, Detroit.

May 11-15—Broadcast Financial Management Association/Broadcast Credit Association 25th annual conference. Palmer House, Chicago.

Answering Geller

EDITOR: FCC broadcast deregulation has been the product of both the Carter and Reagan administrations. It has been upheld by the courts. And a Congress which has not been shy about taking the FCC to task has not uttered a peep as to its radio and TV deregulation actions. Yet, Henry Geller in-

sists that the FCC and the NAB have somehow taken advantage of an unwary broadcasting industry ("Monday Memo," April 1).

Let's once again stop to consider what broadcast deregulation means to radio and TV stations:

Gone are the formal ascertainment requirements of the primer's 33 questions and answers and the liability that attached to noncompliance with that precise detail.

Stations now can do remotes from business locations without risking violation of the commercial limits. A lot of potential revenue was lost prior to deregulation.

Program-length commercials are now a programing option. Previously they were ruled out by the commercial limits.

The logging rules and the liability and frequent forfeitures that resulted from them are gone. Sure, people still log, but you do it as you see fit.

• No longer do stations have to conform to arbitrary programing percentages in the news, public affairs, and other nonentertainment categories.

Those glib announcers who can run a 30-second spot into a 50 can no longer get you in trouble—witness the \$5,000 fine paid

an Francisco · Boston · Detroit · Dallas-Ft. Worth · Cleveland · Houston · Pittsburgh olumbus, GA · Atlanta · Tampa · Phoenix · San Diego · Milwaukee · Rochester · Miam an Antonio · Albany-Schenectady · West Palm Beach · Jacksonville · Orlando · Memphis **41 HILARIOUS HALF-HOURS NOW AVAILABLE FOR LATE-NIGHT!**

by WMAL(AM) Washington in 1978.

State associations can again enter into agreements with state tourist agencies whereby the association is compensated handsomely for PSA-type announcements run by member stations on behalf of those agencies

Those silly first and 16th of the month announcements are down the drain.

Annual financial reports are no more. Short-form renewals have replaced the old long forms and the tedious job of assembling a composite week.

Henry says the best and simplest approach is to keep as regulation the nonentertainment category and the logs the stations keep today. When radio deregulation was acted upon in 1981, then Commissioner Anne Jones said it was time the FCC stopped treating broadcasters like schoolchildren. Henry would seem to prefer returning to the good old days when the commission did just that. Program log regulations served no other purpose than to allow government officials and citizen groups to dissect and second-guess a station's nonentertainment programing decisions. Response to community issues is a far less intrusive and a much more meaningful way of demonstrating compliance with the public interest standard.

Henry notes that the public interest groups also want the nonentertainment category and logging requirements retained. That seems to say it all.—John B. Summers, executive vice president, National Association of Broadcasters, Washington.

Capital coverage

EDITOR: Your March 25 coverage of the Capcities/ABC story was simply superb.

I don't know if you guys in the publishing business go after Pulitzer prizes, but if there is one for masterful journalism, you should get it hands down.—Charles H. Crutchfield, president, Media Communications Inc., Charlotte, N.C.

Pricing potential

EDITOR: Your good digging for broker values of the Capcities/ABC spin-offs (April 1) caused me to figure just how crazy \$60-\$80 million is for one stand-alone AM-KGO San Francisco, a market where the hills are signal-alive with the sound of AM

The last FCC broadcast financial figures in 1980 showed net radio revenues of \$71 million in the Bay Area. A 10% annual gain rate to date would make it a \$114-million radio market.

KGO's long-lived audience rank strength with a format that tolerates higher volume avails could give KGO a 20% market revenue share, or \$22.8 million. With, say, a 33% operating profit margin, that's \$7.5 million. To get to KGO's reported top dollar value of \$60 million, in this scenario, an 8.0 multiple is necessary. The new owner could reduce it by increasing operating profit margin, revenue share, and/or projecting market growth.

The Tom Gammon \$60-million highball is more potable if some usual AM bias is balanced by unusual station/market characteris-

tics.

Your "Changing Hands," at any rate, will need space!-Charles A. Macatee, Chevy Chase, Md.

Breakdown

EDITOR: A significant inaccuracy was attrib-uted to me in the April 1 article, "Intelsat's Colino Outlines Measures to Protect Services." The quote states "... of the \$1.8 million mentioned in the PanAmSat filing, \$1.5 million was spent to generate the information, in the form of research material." What I actually did was to confirm a quote, attributed to me in the Washington Post, stating that \$300,000 had been spent on information dissemination activities; BROADCASTING did the arithmetic. In fact, much of the \$1.867 million was spent on routine business activities, including approximately \$120,000 for legal work primarily related to patents and registrations; about \$100,000 for outside accounting and auditing reviews, and a significant portion was also spent on events related to Intelsat's 20th anniverary.-Kim E. Degnan, executive assistant to the director general, Intelsat, Washington.

Editor's note: In discussing the \$1.8-million expenditure with BROADCASTING, Degnan spoke only of "generating" and disseminating the information. We are happy to make her further breakdown a part of the record.

Farm fan

EDITOR: Just back home from an absence of over three months, I have finally gotten around to reading the fine report on farm broadcasting in the Dec. 17, 1984, issue of BROADCASTING.

From the number and diversity of people interviewed for the story and the balanced handling of the various viewpoints, I feel that is the best thing that has been done in print about this unique and widely misunderstood part of U.S. broadcasting in a long time.—Layne R. Beaty, former head of ra-dio-television division, United States Department of Agriculture, Washington.

Looking for dedication

EDITOR: Most announcers fight any plans by a station to automate either by tape or by satellite. Of course, they see a loss of their job, but I can tell them a lot of broadcasters are automating because they simply can't find good announcers to make their stations sound as good as they do with some type of automation.

Radio training schools across the nation have told me that they are having trouble attracting good applicants, and thus the industry is not getting good announcers-one thing leads to another.

What we need to keep automation from taking over is dedicated young announcers who will give over 100%. I realize one reason it's hard to attract good announcers is low pay in many smaller cities, but if they can do an excellent job in a small community, they'll move up to bigger and better things.—T.S. Storck, president, KTRF(AM)-KSNR(FM) Thief River Falls, Minn.

"For visual scope, the look demands film."

Gary Lieberthal is president of Embassy Telecommunications. He is also a former member of the Board of Directors of the National Association of Television Program Executives and is a founder of the Association of Program Distributors.

"Syndication has changed dramatically over the years. Its evolution directly correlated to the decline of usable product from the network. Historically, half-hour comedy has been the backbone of our business, with as many as five series available each season for off-network play. The probability of any series surviving on the network long enough to have a syndication afterlife has decreased so enormously that, today, if two comedies a year can be offered to the stations, it's considered a bumper crop. The residual effect of this trend is that prices for comedies have escalated exponentially, turning a good business into a sensational business-if you have comedies to offer. Fortunately, we currently have seven in syndication.

"First-run syndication is also in a transitional period. The success rate is not great. Talk and game show strips are still the mainstay of first-run because viewers can turn them on anytime without thinking they've missed something. But, there is a strong movement afoot to try to re-create the results brought about by our introduction of *Mary Hartman. Mary Hartman* into the marketplace. *MH. MH.* hailed as true breakthrough programming. not only proved that entertainment could survive in first-run, but also helped create the viability of UHF television. These stations had never done better than a 2 or 3 rating anywhere in their schedule, and suddenly they were doing a 12 at 10:30 p.m. *MH, MH* did for UHF what *Happy Days* and *Laverne & Shirley* did for ABC. No one has been able to duplicate the success in this genre in first-run syndication since, but the industry is looking to change all that.

"Theatrical motion pictures have also affected the syndication business. Independent stations have successfully used films to counter-program the networks. A 12 rating in early fringe and an 8 in prime time is not uncommon. Stations are taking advantage of the viewer acceptability mind-set being created by pay television and are being more creative and more aggressive than the networks in promoting films. To attain this success, they are looking to distributors for 'fresh' movie packages such as our *Embassy Night at the Movies*.

"Comedies recorded on video tape have been an Embassy hallmark, but as the public's thirst for diversification becomes more and more insatiable, we look to broaden our horizons. We are now producers of miniseries, dramatic series, movies for television and feature films—all of which are, or will be, done on film. Film has a whole different look and feel to it. It lends the work a sense of scope, a more intense depth perception and a feeling of texture that just isn't found on tape. Our motion picture company is currently shooting *A Charus Line* on Eastman color high-speed negative film 5294 because it allows more range in lighting the set. Director Richard Attenborough is looking to maintain the feeling of a Broadway theatre without sacrificing the all-important dance numbers to lights that are too hot or to shadows that are too deep. For visual scope, the look demands film."

The people that make up an organization are the key to its quality. Just like the movement in a handcrafted watch they must work together smoothly and efficiently to deliver the desired results

That's the way it is at Torbet.

We believe the creation of quality begins with the raw materials. That means hiring only the best. Expertise and motivation we achieve by the finest system of training and reward in the industry. Promotion from within creates additional incentive. And a fine management cadre and a well planned system of internal reporting and support keep the organization running like a fine watch.

The best part is that quality works. For Torbet, it has been the essential ingredient to our growth and our achievement for our list of satisfied, diversified, quality client stations.

For more information on how Torbet quality can benef you, call us today.

🛯 TOP OF THE WEEK 🛛 🗖

The new bonanza in broadcasting

Rash of mergers, acquisitions and takeover attempts has pushed electronic media stocks into a new level of respect on Wall Street, and into a shift from earnings to cash flow orientation; change may be both profound and permanent

When broadcasters come together for the annual meeting of the National Association of Broadcasters in Las Vegas this week, many of the owners among them may feel like officers in the days when the sun never set on the British Empire—secure in the knowledge that they are part of an enterprise that at present has no parallel. And although it may not always be felt by the rank and file, a major change has occurred in the electronic media: Their net worth is considerably greater than when the NAB last met.

The frenzy of mergers and acquisitions among media companies, along with speculation of hostile takeovers of CBS and the proposed friendly takeover of ABC by Capital Cities Communications, has pushed the stock prices and trading activity of several Fifth Estate companies to record levels over the past several weeks. In the process, owners and investors of Fifth Estate companies have seen the industry undergo the kind of convulsions previously thought limited to oil concerns and multinational conglomerates.

During the past 10 weeks, deals have either been announced or attempted at a dizzying velocity:

Feb. 1. Taft announces it has reached agreement to buy Gulf Broadcasting's six TV stations and eight radio stations for \$755 million. On the same day, the management of Multimedia Inc. proposes a leveraged buyout of the company valued at \$825 million.

 Feb. 28. Counsel to Ted Turner inquires at the FCC about how it would react to an unsolicited bid to buy CBS.
 March 18. ABC and Capital Cities

March 18. ABC and Capital Cities Communications announce a \$3.5-billion "cash merger," which is widely interpreted as the latter buying the former.

■ March 19. A dissident shareholder group surfaces and announces it wants to take over the board of Storer Communications and sell off its television stations and cable systems. The "breakup" value of the company is estimated by analysts at more than \$2 billion.

Some time in March. Wesray Corp.
 makes a bid for Multimedia at \$1 billion.

documents with the Securities & Exchange Commission showing that through various companies he has acquired an 8.7% interest in CBS at an average per-share price of \$95.50, a \$247-million acquisition.

■ April 5. The management of Multimedia sweetens its proposal to acquire the company for \$890 million after rejecting Wesray offer of \$1 billion.

■ April 8. Cox Enterprises Inc., the privately held, 40.2% owner of Cox Communications, proposes to buy the balance of the group broadcaster and cable MSO's publicly traded stock for \$1.3 billion.

• April 10. Lorimar offers \$61 per share cash for Multimedia, making the total purchase price \$1.02 billion.

One of the principal effects the above events have had is a rub-off value on the stock trading of Fifth Estate companies in general, industry executives and analysts agree. The result, they say, is a fundamental-and perhaps permanent-change in the way these companies are viewed by the investment community. What the rash of proposed acquisitions and mergers among broadcasters shows, explains Carl Hirsch, president of Cleveland-based group broadcaster Malrite Communications, is something the owners have believed all along: that the stock of a publicly traded Fifth Estate company sells at a discount of its private market value-that is, the value that could be realized if the company were sold on the private market.

"There's more to it than speculation," says Hirsch. "With a hard asset industry it was easier [to determine private market values]. But we're in a cash flow business, and Wall Street didn't recognize that. I think they are just starting."

The kind of recognition from Wall Street that Hirsch and other broadcasters feel is long due is illustrated in a composite of stock trading prices of 21 publicly traded Fifth Estate companies compiled by BROADCAST-ING. The analysis shows that for the past five months, these companies have far outperformed major stock market indices. And some of the stocks have nearly doubled in value.

To conduct the analysis, BROADCASTING selected 21 broadcasting and multimedia stocks with major broadcasting/cable interests. The list includes companies that have experienced sharp rises in their trading prices recently as a direct result of acquisition or other market activity (ABC, Capital Cities, CBS, Cox, Multimedia, Storer and Taft) as well as some lesser-watched companies such as Malrite and Park Communications, which despite having limited shares available for public trading still outperformed the market.

Since the beginning of the market rally early last December, the BROADCASTING composite index has advanced 28% compared to the Dow Jones Industrial Average, which advanced 6.7%, and the Standard & Poor's list of 400 stocks, which advanced 9.9%. Since March I, the day after news of Ted Turner's inquiry to the FCC leaked to the press and nine of the 24 broadcast group owners traded on the New York Stock Exchange hit all-time highs (BROADCASTING, March 11), the broadcasting composite has increased 14%, compared to the DJIA, which is down 2.8%, and the S&P 400, which is off 2%.

The NASDAQ composite advanced 16.5% between Dec. 3, 1984, and April 11, to close at 280.12, although it is off from a 287.6 on March 1.

In March, trading volume in many Fifth Estate companies was at all-time highs. During January and February, for example, about 350,000 shares of CBS traded on an average day—but in March the average daily volume was over one million, although it has since backed off to under 500,000. Capital Cities, which traded with an average daily volume of about 50,000 shares in January and February, jumped up to 171,000 on an average day in March, and has fallen off to about 60,000 shares per day in April. A.H. Belo Corp., which traded at an average daily volume of 140,000 shares during the first two months of the year, hit nearly 500,000 shares per day in March.

The stock prices, although fluctuating, tended to move up accordingly. Outside of the big multi billion-dollar broadcasters like ABC and CBS, smaller concerns rode the wave as well. LIN Broadcasting, which was under \$20 per share in early December, steadily moved up more than eight points to close at \$28 on April 11. Malrite Communications, which closed at 16³/₂ on April 11, was trading around \$11 per share in early December. Scripps-Howard Broadcasting has moved up 10 points from 26 in early December to a close of 36¹/₂ on April 11 although the price is actually down from a 42 where it had once traded. Taft, which was

Tug-of-war for Multimedia

Greenville, S.C., group owner and MSO is sought by Simon's Wesray and Lorimar, but company's family owners are resisting takeover offers

Some big spenders are trying to woo Multimedia Chairman Wilson C. Wearn, but the owning families disapprove matrimony. Those families, the Furmans, Sisks, Jolleys and Peaces, merged their media holdings to form Multimedia Inc. 17 years ago, and last week they gave clear indication on two separate occasions that they have no intention of letting outsiders take over. Although their defense so far appears successful, billiondollar offers for the Greenville, S.C.-based company from Wesray Corp. and Lorimar forced Multimedia to scrap plans announced Feb. 1 to take the company private in a leveraged buyout (BROADCASTING, Feb. 11).

The first display of resolve was the families/management decision to reject a \$60per-share offer made by Wesray, a Morristown, N.J.-investment company headed by former Treasury Secretary William E. Simon and his partner, Ray Chambers.

Wesray's original offer was \$60 cash ("Closed Circuit," April 8) and reportedly would allow the founding families to "roll over" their holdings to the new operation, as in their own leveraged buyout proposal, enabling them to avoid paying taxes until the new stock was sold.

It was difficult to confirm details of the offer. Wearn, who refers to it only as the "third party offer," told BROADCASTING there were no specific details in writing and one participant in the negotiations opined that was because either Wesray was just testing the waters or because any formal proposal might have to be made public. Wesray officials have declined to return phone calls.

Wesray, presenting its offer as friendly, felt compelled to inform the founding families that money borrowed for the deal would be repaid by selling off newspaper properties. In fact, Wesray had already found a possible buyer for the newspapers, valued at close to \$500 million—the Toronto-based Thomson Newspapers Inc., according to one Multimedia director.

The Wesray offer was presented to a Multimedia directors' committee formed to evaluate the fairness of the initial LBO proposal. Helping the fairness committee was the New York-based investment banking firm of Brown Brothers Harriman & Co. and the law firm of Skadden, Arps, Slate, Meagher & Flom.

There are three "outside" or "disinterested" directors of the firm, but the review of the Wesray proposal was done by two of them. The third director, Richard T. Dugan, retired chairman of Cincinnati Bell Inc., has been ill and unable to participate in company business.

Of the other two directors on the fairness committee, one, George H. V. Cecil, has in recent weeks also been overseeing the sale of Asheville, N.C.-based Biltmore Dairy Farms, of which he is president. The other member of the committee is William D. Sellers Jr., chairman and chief executive officer of Baggett Transportation Co., a Birmingham, Ala.-based trucking company.

The committee's answer, which was subsequently adopted by the full board, came on Friday, April 5, rejecting Wesray's offer and accepting a new proposal from the families/managment group, this time a recapitalization of the company offering shareholders about \$54 per share.

Asked why families and management decided to drop their leveraged buyout proposal, Multimedia's president and chief executive officer, Walter Bartlett, said: "The new proposal came in response to inquiries from institutional and public stockholders who wanted to have a piece of the new company." When asked if the decision were also a result of Wesray's bid—which Multimedia describes only as a "third-party offer"—Barlett said: "Oh sure, there is no question it came in response to that, as well as questions from our directors' fairness committee and three or four stockholder suits."

The new proposal substituted a recapitalization plan in which there would be 11 million shares issued at \$10 (\$110 million in equity) instead of the 16.7 million shares hovering around 57 in early December, closed at 69¹/₄ on April 11. Cox Communications, which traded at 50 early in December, jumped 16 points to close at 76 on April 11. Park, with only about 10% of its shares available for public trading, has moved up to 34 from 27 in early December.

Roy H. Park, president of that Ithaca, N.Y.-based company, notes that the stock of his company has risen more than 80% in the year and a half since Goldman Sachs brought it out on the public market (in October 1983). "The investor public is taking a harder look at broadcasting stocks," Park commented, and it realizes "this is a growth industry regardless of what people have said in the past."

But, according to analysts, the recent activity is more than just a simple faith that the industry's future is bright and sunny. Some point out that there is a fundamental difference in the way these companies are evaluated today, having more to do with the perceived private market value than with traditional measures like earnings potential.

Barry Kaplan, a securities analyst with Bear Stearns & Co., agrees that media stocks are outperforming the market since such stocks have been undervalued in their own right and because the successive merger and acquisition announcements have brought them to investors' attention. "The two are dovetailing. The valuation [of media stocks] is shifting from an earnings orientation to a cash-flow orientation, and I think it represents a permanent shift."

Kaplan said the events of the past weeks have their roots in the leveraged buyout deals of 1983-84 (Metromedia, SFN, Harte-Hanks) and were influenced by A.H. Belo's buy of Corinthian "which entailed a lot of good will amortization, and the Taft-Gulf deal. The Capcities/ABC deal brought things to the forefront."

The question remains, however, how long these Fifth Estate stocks will sustain the momentum of the past months. Analysts expect no sudden precipitous drop in the stock prices of media companies, especially as long as the merger and acquisition activity continues. Says Gordon Crawford, an analyst with Los Angeles-based Capital Research, "it will keep going on until public market values approach private market values. The simple reality is that a VHF station is a relatively liquid asset that has an easily determinable value." That's no surprise at all to broadcasters like Roy Park, who contends "I still think my stock is worth more than it brings."

recently trading at about \$54 (\$900 million). Management said they have been told by investment bankers that the new shares might, in fact, trade for \$12-\$14.

The difference between the old and new market capitalization would be made up by exchanging some of the old stock for roughly \$400 million in 16% subordinated discount debentures. The debentures would not start paying interest until 1990, but the note holders would start paying taxes immediately on the imputed interest.

If the debentures were fully subscribed, stock in the old Multimedia would then be exchanged for either \$54.26 cash or \$49.01 plus half a share of new stock (.527 share to be exact). If the debentures were not fully subscribed, the current shareholders would get a combination of stock and debentures.

Not only would the company stay public, but families and management would still own less than a majority of the stock, according to Bartlett. "The amount of stock the managment can buy is written into the agreement and the families are controlled by federal law from continuing to own more than 80% of their holdings in the old company," he said. He added that public shareholders, as opposed to management and founding families, would determine the fate of the plan, which can not be adopted unless a majority of them approve.

Still, the perception of some observers

was that the latest proposal from Multimedia management was a delaying tactic, that they are "taking the company public again," to buy it out several years down the road.

By last Wednesday, observers were trying to figure out what, if any, options Simon and Chambers had when a third party appeared on the scene. That afternoon Wearn and other directors received a letter from Lorimar offering \$1.02 billion, or roughly \$61 per share, for the company. The bid from the production and advertising company, preceded by no feelers or forewarning, was nonetheless characterized by one Lorimar official as "friendly."

Wearn said he wasn't so sure: "I don't regard it as friendly or unfriendly... I don't how to regard it." Lorimar Chairman Merv Adelson told BROADCASTING the surprise approach could not be avoided: "You have to examine the circumstances; everything was on a short fuse. Simon had an offer in and even though we had been looking at it for a long time we didn't really have a chance to talk it over."

The offer from Culver City, Calif., did not sit well in Greenville, however, even though Lorimar officials indicated there would be no selling of newspapers or other properties. The next day the founding families and managment issued a terse statement stating that the company was not for sale. They further sought to discourage the idea of a merger, friendly or unfriendly, by noting that with their 40% control of outstanding shares, there would be no easy way for anyone to force change on the South Carolina-chartered company for which state law requires a two-thirds vote of stockholders on any major business combinations.

Also responding quickly to the Lorimar offer was Wesray, which went back to the fairness committee with a reportedly more friendly \$60-per-share offer. Simon and Chambers would probably like to be "white knights" against any possible danger to Multimedia posed by Lorimar, and, no doubt, vice versa. But at last glance, it appeared that the founding families wished both suitors would go away.

As part of the politicking to mold shareholder opinion, the recapitalization group dropped an important name—Phil Donahue. At the end of its April 5 press release the group noted that "26% of the net earnings of Multimedia in 1984 (or \$8.8 million) came from Multimedia Entertainment, and the predominant part of this was contributed by the *Phil Donahue Show.*" It was added that Donahue was also a stockholder. The implication was that Donahue had worked with the Multimedia management for 18 years, and if management were unhappy, he might be unhappy as well.

The idea of providing a contractual escape clause if ownership changed was "never ad-

Wesrey's Simon and Chambers

Lorimar's Rich

dressed" in Donahue's agreement with Multimedia, according to one source familiar with it. "Nonetheless," said a representative of families/management, "that doesn't mean he can't take a walk."

Equally important participants were also subject to some politicking. It was confirmed by sources on both sides that Wearn, Bartlett and other members of management were offered a greater participation in the Wesray proposal than was arranged for them in the leveraged buyout proposal. Unconfirmed numbers mentioned by one source indicated a 15% ownership with an option for an additional 5% by Wesray compared to 5% ownership with an option for an additional 5% provided in the LBO. When asked whether the "third party" proposal gave management a greater participation, Bartlett told BROADCASTING: "That may be true, but I cannot comment on it.'

Why have Wearn and other management so far shunned the bigger carrot from Wesray? According to one in the families/management group, "It was really out of their hands. The families are not exactly slick and sophisticated New Yorkers and they don't feel comfortable with that [Wesray] offer."

Adelson, when asked if his offer would give the families and management of Multimedia a participation in Lorimar started out by saying no, but then expanded on his response: "The offer is as it is. That is where we are right now and we have made a very fair offer for the company." The Lorimar chairman also said, "I hope to be able to communicate soon with management and the families as to why we see this as such a positive arrangement for both companies. We plan on keeping the whole company. For us, this isn't a deal deal, it's a business deal. We're not just building up interest in the stock so we can cash in our shares."

Strategists for both Lorimar and Wesray are likely calculating whether Wearn, Barlett and others can be broken away from the families or whether the families might start arguing among themselves. But according to a member of the fairness committee: "No one has yet produced the living body of someone who said they weren't going to back the deal."

At week's end, observers were contemplating various possibilities, including a possible proxy fight, more negotiation with the four families and management or yet another outside proposal for a cash merger. The situation was made interesting by the fact that the New York-based investment banker Drexel Burnham Lambert, which already had an agreement to represent Lorimar, was also talking with Wesray.

The prize in what may or may not turn out to be a fight is a group owner of four AM's, four FM's and five TV's; the 26th-ranked cable MSO with 265,000 subscribers; publisher of 13 daily and 31 nondaily newspapers, and production company whose syndicated shows include *Donahue* and *Sally Jessy Raphael.*

Cox is next

Founder's family wants to take communications company private; if it buys all outstanding shares, deal would be worth \$1.3 billion

Plans were announced last week to take another large, publicly traded media company private—the Atlanta-based Cox Communications Inc., which owns seven television, seven FM and five AM stations. It also operates the fourth largest cable MSO, which at last count had more than 1.5 million basic subscribers. The company also has interests in the radio common carrier business and owns 16 automobile auctions. As expected, the Cox board of directors decided at a meeting last Thursday (April 11) not to take a public stand on the offer.

The plan to take the company private came in the form of a proposed tender offer by the Cox family-through its privately owned newspaper chain-which has controlled Cox Communications since it was spun off from the newspaper properties in 1964. The tender offer, which took effect last Friday (April 12) and extends through May 9, is for "any and all" of the 60% of the 28 million outstanding shares not owned by Cox Enterprises. The offer is \$75 per share, which would put the value of the buyout proposal, assuming all the public shareholders decide to sell at that price, at \$1.3 billion. First Boston Corp. is the dealer-manager of Cox's tender offer.

But whether the Cox family will succeed

with its current proposal is questionable, at least in the minds of some of the analysts who were scrutinizing the offer last week and who believe the \$75 per share offer is lower than the true value of the stock, based on market appraisals of the company's various holdings. Barbara Russell, an analyst with Prudential-Bache Securities, said last week that according to her calculations the stock is worth closer to \$90 per share. "The market doesn't indicate," said Russell, that the communications company can be taken private for \$75 a share. One sign of that last week, she said, was that on Tuesday (April 9) the company's stock was trading for more than \$77, or more than \$2 higher than the tender offer. The week before the offer was made Cox was trading at around \$61 and in the fourth quarter of last year had been trading in the \$50 range. "They know it has a lot higher buyout value," she said, contending that the Cox family will have to sweeten its offer if it expects to gain full ownership of the company.

There was considerable speculation last week that perhaps the Cox family, led by the two surviving daughters of company founder, the late James M. Cox, a former governor of Ohio, were actually giving a signal to potential buyers that the company was for sale. But according to Garner Anthony, chairman and chief executive officer of Cox Enterprises, and husband of Barbara Cox Anthony, one of the daughters, that is not the case. The intention, he said, was to remerge the newspaper and communications companies under one roof and take advantage of the strength of the larger entity to explore "all kinds of situations that in the past neither company could have taken on by itself." He stressed that the purpose is to "grow the company, not liquidate it. We are not buying to sell."

The new company would explore acquisition opportunities within its current areas of expertise, said Anthony. He stopped short of saying that it would also look at new businesses, but stressed that the proposed buyout would "enable us to do so if we choose." Asked if there would be any management changes with the buyout, Anthony replied, "God, I hope not. We're thrilled with what we have." Any changes along those lines, he said, are "unplanned and unwanted."

Lee Wilder, an analyst with the Atlantabased investment banking firm, Robinson Humphrey, said the offer was "a pretty smart move." She too agreed however, that Cox Enterprises may have difficulty taking the communications company private at \$75 per share. "Is it worth \$90 to \$95 per share? Probably. Will they get a bid that high? Not probably." While it's pretty much a guessing game at this point, Wilder stressed, she said the family could successfully take the public company private with a sweetened bid, perhaps \$83 per share.

Nevertheless, sources close to the deal said that the current thinking is that most of the public shareholders will deem it an attractive enough offer to sell.

It's understood that the Cox family began contemplating some kind of move last September, when its holdings in Cox Communications slipped below 40% temporarily, due to distributions of common stock from the estate of James M. Cox. That triggered a rule established by a trust fund in the late founder's name whereby the family permanently lost the right to elect a majority of the board of directors of Cox Communications. And even though the family still maintained de facto control over the public company with its 39% block of common stock, it had lost the absolute and legal right to control.

Cox family advisers do not believe FCC approval will be an issue (a short-form transfer application [FCC Form 316] has been filed at the commission), since those seeking to take the company private have had de facto control of it since it was spun off 21 years ago. An FCC official concurred with that assessment.

The Cox Broadcasting properties include: WSB-AM-FM-TV Atlanta; WSOC-AM-FM-TV Charlotte, N.C.; WHIO-AM-FM-TV Dayton, Ohio; WKBD-TV Detroit; WAGO(FM) Elmwood Park, Ill.; KFI(AM)-KOST(FM) Los Angeles; WIOD(AM)-WAIA(FM) Miami; KTVU(TV) Oakland, Calif.; WZGO(FM) Philadelphia; WPXI(TV) Pittsburgh and KDNL-TV St. Louis. The cable division operates 50 systems in 23 states.

For the year ended Dec. 31, 1984, Cox Communications generated operating revenues of \$742,855,000 (up 21%), with operating income of \$169,645,000 (up 20%). Net income totalled \$87,292,000, or \$3.09 per share, up 12% over 1983. \Box

Rivera, Quello, Fowler, Dawson, Patrick

FCC won't stand in way of Storer proxy fight

Commission votes three-to-two that change in control at company would occur, but that since change would not be "substantial," only a short-form transfer application is needed

Publicly traded broadcast corporations are vulnerable to proxy fights—even those explicitly aimed at their dissolution.

The FCC hammered that point home last week when the commission majority—consisting of FCC Chairman Mark Fowler and Commissioners Mimi Dawson and Dennis Patrick—said it will not block the Committee for Full Value of Storer Communications from pursuing its plans to take control of Storer's board of directors at the company's May 7 annual meeting and sell off the company's TV stations and cable systems.

The commission's action last week isn't likely to be the last word on the subject. An attorney for Storer management said the company will ask the Court of Appeals in Washington to review the decision and to rule on the case before the shareholder meeting. If the court can't act by that date. Storer plans to ask the court for a stay. "And we expect to win," the attorney said.

Some on the commission were blasting the majority's decision. "With this action, I'm afraid the FCC is promoting bust-up liquidations promoted by professional raiders and causing potential anarchy throughout the communications industry," said Commissioner James Quello. "Companies carefully developed over years by current management are now sentenced to publicly announced, summary dismemberment for a quick, short-range profit."

Said an attorney for the committee, however: "The signal here is that the commission doesn't want to be put in the position of defending incumbent management in an intracorporate dispute. Now they [Storer management] are going to have to take their arguments to the shareholders,"

The commission's action followed a staff ruling on the Storer committee's proposed plans. The staff ruled that no transfer of control would occur under the committee's plans. Yet it granted a short-form transfer application (FCC Form 316, which is not subject to holding periods or petitions to deny) that the committee had filed, "so as to remove any uncertainty" about the committee's authority to proceed (BROADCASTING, April 1).

Storer management, in an application for review, asked the commission to reverse the staff and rule that a voluntary de facto transfer of control would occur under the committee's plans. Storer asserted that no such transfer could be accomplished without the prior filing and grant of a long-form transfer application (FCC Form 315, which is subject to a 30-day holding period and petitions to deny), a regulatory requirement that would appear to derail the committee's plans for a takeover at the May 7 meeting.

At an open meeting convened on short notice last Thursday afternoon (April 11), the FCC majority (with Fowler and Dawson concurring in part) overruled the staff to the extent of holding that the committee's plans would constitute a de facto transfer of control. It also voted to require the committee to file additional information on a "modified" short-form application.

In a news release, the FCC majority said it had directed the staff to prepare an item concluding that, under the specific facts of the case at hand, the proposed change in the Storer board of directors would constitute a transfer of de facto control under Section 310 of the Communications Act. But, under Section 309(c)(2)(B) of the act, the change in control would not be "substantial," and a short-form application—modified to include a list of the proposed directors and information about their citizenship, media ownership and any violations of the laws—could be used.

According to the majority, the item is also to conclude that there would be no change in ownership under the committee's plans. Nor would there be a "substantial change in control," the majority added, "because shareholders effectively delegate authority to directors under corporation law" and because no voting shares will be transferred. "In any event, under Section 309(g) the commission has the discretion to adopt reasonable classifications and fashion appropriate procedures to effect its review under Section 310," the majority said. "This modified short-form procedure fulfills the commission's obligations under Section 310 without unduly conflicting with corporation law and practice. It allows the commission to be neutral as between the parties to the contest.

"The commission has the necessary information about the proposed directors and their citizenship and media interests," the majority said. "We need information about any violations of criminal or other laws. Upon review of that information and a determination of acceptability, the commission can grant the committee's 316, as supplemented. This approval of the application prior to the transfer is required by Section 310. But, this action should not in any way be construed as endorsing either party in the contest."

The commission also announced that it will "shortly" release a notice of inquiry looking toward a policy statement on transfer of control of publicly owned licensees. "The commission will continue to act expeditiously on applications during the pendency of the inquiry," it said. Commissioners Quello and Henry Rivera

Commissioners Quello and Henry Rivera agreed with the decision to launch a notice of inquiry on the subject. But both also dissented to the majority's ruling in the Storer case.

In a statement. Quello charged that the committee's plans were a "prime example" of a substantial transfer of control requiring the filing of an FCC Form 315 up front. "The new proposed board proposes a drastic transformation from an operational business to a nonbusiness," Quello said. "It requires very substantial control to effect this complete reversal of current management directions and long-range planning.

"With a substantial transfer of control, the FCC must make a public interest finding before transfer of control and allow the public a 30-day comment period. The commission has a broader obligation in transfers than the Securities and Exchange Commission, which protects shareholders, or antitrust departments, which preserve competition. The FCC has the obligation to protect the public interest—to assure quality service to broadcast viewers and listeners. Quality service requires stability of ownership, long-range planning and development.

Rivera said he didn't want to be characterized as "protectionist" for management, but that he thought the statute required the filing of a 315 application under the circumstances. If all of the members of the Storer board are changed, "you couldn't have any more substantial a transfer of control," Rivera said. Rivera also said there were ways the commission could provide for the filings of 315's without acting as a "shark repellent" to proxy battles. After the meeting, Rivera added that he only meant that a 315 must be filed "at some point" in such proceedings, not necessarily up front as Quello would have it.

Even the majority appeared to be divided on the commission's proper course. Fowler said he and Dawson questioned whether a transfer of control would occur under the committee's plans. Fowler and Dawson were to issue a joint statement. Patrick, however, said he believed a transfer of control would occur, but not a "substantial" one for purposes of Section 309 of the Communications Act.

CBS wins a round in takeover fight

Court upholds network's change in bylaws; rumors continue over Ted Turner's interest

Last week at least one anecdote surfaced suggesting that Shearson Lehman Brothers was looking for some FCC-approved "buccaneers" to sign on with "Captain Ted" for a raid on Black Rock. An Eastern-based group broadcaster told BROADCASTING he received a call from a partner at Shearson Lehman, the New York-based investment banking firm which has been rumored to be helping Ted Turner prepare a takeover bid of CBS (BROADCASTING, April 8). "Where do you stand?" he was asked by the Shearson partner and, although no dollar figures were mentioned, it was clear to the group owner from their subsequent conversation that the inquiry related to joining a possible takeover of CBS.

But as has been the case from the start, it was still unclear how serious the threat to CBS actually is. In fact, a sampling of rumors at the end of the week suggested that Turner and Shearson had parted ways. Officials at both Shearson and Turner continued to answer questions with an unrelenting "no comment."

Meanwhile, tangible activity took place mostly in the courtroom, where Fairness In Media failed in its effort for some immediate relief against some CBS defensive action. On Monday (April 8), Judge William C. Conner of the U.S. District Court for Southern Manhattan denied a request by counsel for Fairness in Media to prevent a change in CBS's bylaws from taking effect. That change, voted by the CBS board the previous week, ended a chance for 10% or more of stockholders to call a special meeting. While denying the FIM request, Conner also indicated that the Raleigh, N.C.-based organization could return after the CBS's April 17 annual meeting to pursue the matter.

It was also less clear last week how much CBS stock investor Ivan Boesky owned. But the company wasn't counting on his having already sold his 8.7% stake—recently worth \$250 million—at a profit and filed suit against Boesky last Tuesday in U.S. District Court for Southern Manhattan. The complaint charged Boesky with misrepresentations and omissions in his April I filing with the Securities and Exchange Commission. One of the more interesting assertions was that Boesky, through various corporations he controls, had violated SEC margin rules which limit the proportion of stock that may be purchased on credit.

The complaint asserts that Boesky's holdings in CBS are dangerously leveraged, "making them extremely vulnerable to decreases in the price of CBS stock," and creating "unwarranted volatility and instability in the market for CBS stock."

John Backe, chairman of the New Yorkbased production company, Tomorrow Entertainment Inc., and a former CBS president, praised Chairman Thomas H. Wyman's handling of matters in recent months: "They have not done anything to hurt the corporation such as making dumb acquisitions or building up a lot of debt to fend off a takeover.... Right now they are probably feeling a combination of frustration and toughness."

FCC moves to implement most of cable act

Commission also turns down ACT request to prevent broadcasters from entering profit-sharing agreements with producers of children's animated fare

Cable won another big one last week. In implementing most of the Cable Communications Policy Act of 1984, the FCC gave cable much of what that industry want-

ed. Broadcasters won in another arena. Or, to put it another way, Action for Children's Television lost, again.

The major issue in the cable proceeding was the commission's definition of the "effective competition" prerequisite for deregulation of basic cable rates under the cable act. In its rulemaking, the commission had suggested as a possible definition the presence in a market of four unduplicated broadcast signals, including those of the three major networks. But the standard adopted, which could result in fewer than 20% of the nation's cable systems' basic tiers still being subject to rate regulation, was even less onerous: The commission ruled that a cable system will be considered to face effective competition when a franchise market receives three or more unduplicated broadcast signals, with no requirement that any of them be from a network. (In a press conference after the meeting, James McKinney, FCC Mass Media Bureau chief, said broadcast signals will be considered to be received when the predicted Grade B contour of a television station overlaps any part of the cable community's franchise boundaries or those signals are considered "significantly viewed.")

What's more, for those systems in which basic tiers may still be regulated, the FCC defined basic cable service as the tier of service that is regularly provided to all subscribers and includes the retransmission of all must-carry broadcast television signals (or, in the absence of at least three mustcarry signals, all "unaltered" broadcast TV signals) and public educational and government channels, if required by a franchise authority. (At the press conference, McKinney also said that "unaltered signals" included distant signals imported by microwave, but not those imported by satellite.) In addition, the FCC provided for those cable systems to hike their basic rates by 5% each year, allowed them to pass along to ratepayers any cost increases directly related to basic services. Beyond that, the commission also mandated that local franchise authorities negotiate "in good faith" with the cable operators over rate matters.

• On the children's television front, the FCC rejected Action for Children's Television request for a rulemaking aimed at prohibiting broadcasters from entering into profit-sharing arrangements in broadcasting children's programing. It also rejected another ACT request for an inquiry into product-based programing for children.

ACT had proposed a rule to prohibit "arrangements where in return for airing a particular program, TV stations share in the profits from the sale of products bearing the name of the program, its characters or program devices such as vehicles and weapons" (BROADCASTING, June 25, 1984).

In rejecting the petition, the commission (with Commissioner Henry Rivera dissenting) said profit-sharing arrangements were an "innovative technique" to fund children's programing. "Such financing is advantageous to the continuation and growth of children's television offerings, which is clearly in the public interest," the FCC said in a press release.

In a dissenting statement, Rivera said the practice of toy companies offering broadcasters a share of the profits the toy company earns from sales to induce broadcasters to air programs based on toys was "very troublesome." He said he was concerned that, in the wake of the FCC's TV deregulation, "the marketing of toys will dominate children's television, squelching other, diverse and educational shows."

Love, not war, is NAB's new lobbying strategy

On eve of national convention, President Eddie Fritts says he's narrowed list of issues association will take on, revised attitude toward adversarial process; he expresses concern over unfriendly takeovers, says NAB is ready to do its part on must-carry issue, children's programing and funding for public broadcasting community

The National Association of Broadcasters may be charting a more moderate course on Capitol Hill in this session than in the past. The new strategy appears designed to seek peaceful solutions rather than colliding with lawmakers or others over regulatory and legislative issues.

On the eve of NAB's annual convention in Las Vegas, NAB President Eddie Fritts discussed with BROADCASTING the association's legislative priorities on such issues as the threat of a ban on beer and wine commercials, the FCC's proposed cost-of-regulation fee schedule and must-carry rules for cable television. In addition, mergers, unfriendly takeovers and acquisitions of broadcast properties appeared to weigh heavily on his mind.

"I think it concerns us all that the [FCC] has no clearly defined guidelines for public company takeovers, and that is something that in our opinion has to be addressed," said Fritts, "so that in this day and age of mergers, acquisitions, takeovers, invaders, white knights, greenmailers, and all of this Wall Street terminology that is suddenly applied to the broadcast industry, one must know what qualifications it takes for a public company to change either its management or its ownership.

"Apparently, the commission views this somewhat differently than they do a private company," said Fritts, where a transfer of 50% amounts to a transfer of control. "In a publicly held company, nobody has 50% so the board elects the management and the officers, and the management runs the company. We think the commission has got to address that problem, and very quickly. And not on an ad hoc basis, because you get too much emotion and too much irrational thinking into something like that. The commission needs to establish a rational game plan of whether to file a 315 or a 316, long form or short form, and when it should be filed relative to the ownership change.

"We're very concerned about hostile takeovers, because this industry has a history of service to the community. There's a symbiotic relationship between the government, the broadcasting industry and the public, which has been maintained since the advent of the system we know as broadcasting. And that relationship I think is somewhat exposed to becoming unbalanced. Always we've had the three ingredients, the three parties, working together to provide the best service, and by that unique relationship, we have seen the best system of broadcasting—free, over-the-air radio and television—and all the other media, accommodated to where the American consumer has the widest choice of services, the most accurate information, the fastest, of any country on earth.

"We have concerns that unfriendly takeovers would tilt that delicate balance, absent a commission policy that clearly spells out the ground rules for everybody well in advance so everybody knows what the rules are.

"I'm not saying that the invaders are bad people—I don't know them. I'm saying that we have companies well established and entrenched with a historical perspective of service to their communities and to this industry that are being put at risk by the people who intend to liquidate them for the highest dollar value, and that's the new ingredient in the mix.

"Broadcasters have always recognized that their stocks lag behind other industries.

Fritts

And part of the reason is because of the regulatory process through which broadcasters serve their communities, number one, and number two, because broadcasters have to serve their communities, and without that, we'd become another business. We'd become a corner grocery store. And to me that's a significant change.

In the Capcities/ABC relationship, you have a friendly takeover. You have a company selling to another company or merging with another company for intent which is not to liquidate but to offer better service in the future of those historical values that all of us in broadcasting have grown up with and respect—and help maintain those three balanced partners—the government, broadcasters and the public—and there's a role for all three. And I think that the public could be the big loser in unfriendly takeovers provided the commission doesn't set some clear ground rules.

"At NAB and in the broadcasting industry, we've never advocated elimination of the public interest standard, but when a company announces that they're going to take over another company, not to make it a better company, except for the profit of the stockholders, then I think it gives all of us some concern. I think members of Congress are concerned, and I suspect deep down that people at the FCC, although philosophically they may be not in tune with that-depending on how they come out, I don't want to prejudge their voting on it-but I suspect they have some concern about this system, which has worked so well and has grown and offered so much to the American peoplebecoming unbalanced. And I think that gives us all need for reflection and concern.

But, if the FCC doesn't act, Fritts believes that as long as broadcasters continue to serve the public—and he doesn't think that will change—Congress will step in. "I think Congress will monitor this very carefully. They're not going to let the balance of power tip."

With a full plate of legislative issues facing it, NAB has scaled back its priorities somewhat. It has moved from a broad front, where it became involved in everything that came along, "to a shorter list of items, with more resolution for each one of those items," Fritts explained.

The must-carry issue is critical, he said. And broadcasting deregulation is a matter that "never goes away." But in light of the threat of a ban on beer and wine commercials, NAB has made that its number-one priority, Fritts said.

On must-carry, Fritts thinks an accommodation may be possible. NAB is not eager to launch a major offensive on must carry and Fritts welcomed the remarks made by Ralph Baruch, chairman of Viacom International, who spoke before Ohio cable operators on the subject (BROADCASTING, April 8). Baruch called for cable operators and broadcasters to resolve the must-carry issue without congressional or regulatory interference. He also suggested the possibility of setting aside a percentage of a cable system's channels for must-carry. Or, he said, limit the number of duplicated network affiliates or PBS stations a cable system is required to carry. Another possibility would be to limit the geographic area in which a cable system must carry broadcast signals.

Indeed, Fritts characterized Baruch's remarks as a major breakthrough. "There are inequities on both sides. There are cable operators who have to carry stations which have absolutely no viewership on their systems. There are broadcasters who have good stations providing great service and can't get on those systems. There has to be some degree of flexibility."

Fritts said he plans to pursue the matter further with the National Cable Television Association. "We think the best solution for must carry is an agreed-upon, negotiated settlement between the two. It seems to me that you just allocate a percentage of the system to must-carry and re-establish a priority system by which those stations are allocated on must-carry," he said.

"There will be a lot of bumps and bruises along the way," Fritts said. Nevertheless, "if the Ralph Baruchs and the Bill Bakers [William Baker, president, TV group, and chairman of Group W Satellite Communications] and players in that league decide that there is a reasonable, equitable solution and a formula can be developed that benefits everybody, I have no doubt then it will pass."

Must-carry may not be the only area in which NAB will seek an accommodation. It may soon mend its relationship with House Telecommunications Subcommittee Chairman Tim Wirth (D-Colo.). Wirth has already stated his interest in burying the hatchet (BROADCASTING, April 1), and last week Fritts sent a letter suggesting they meet (see box, above). Is this the start of something great? "I don't know," Fritts answered. "We re willing to do our part."

NAB has also volunteered to discuss with Wirth possible alternatives to aid public broadcasting in its search for funds. However, Fritts did not embrace a suggestion from Corporation for Public Broadcasting President Edward Pfister that commercial broadcasters match public television's programing commitment to children "dollar for dollar." Pfister made the suggestion ("Closed Circuit," April 8) in light of the U.S. Court of Appeals decision that broadcasters have broad discretion in meeting the programing needs of children, and may count children's programs provided by public broadcasting.

"We've always supported public broadcasting in our lobbying efforts," Fritts said. "Maybe rather than ask for \$86 million, we just say, 'Pfister, appropriate all this \$86 million to children's television that we're help-

NAB's response

National Association of Broadcasters President Eddie Fritts called for a meeting last week with House Telecommunications Subcommittee Chairman Tim Wirth (D-Colo.) to discuss, among other things, public broadcasting and alternative programing sources. "I read with interest the article in BROADCASTING of April 1, 1985, in which you expressed your views regarding several broadcast issues including public broadcasting. The National Association of Broadcasters would be pleased to meet with you to explore alternative methods of financing public broadcasting and to discuss your ideas concerning alternative programing sources," Fritts wrote.

He told the chairman that NAB is prepared to establish a committee of broadcasters to explore ways in which commercial broadcasters might assist "in assuring adequate funding for public broadcasting." NAB created a similar panel in 1982 to examine alternative financing methods for public broadcasting.

ing you lobby for." "He said the CPB president had not contacted him.

Fritts also maintained that commercial broadcasters are not using public television as an "excuse" to walk away from children's programing.

In the meantime, NAB keeps mustering its forces to block attempts by citizen groups to obtain a legislative ban on beer and wine commercials. Broadcasters, he noted, knew advertising issues would dominate their legislative agenda this year. "It's expanded a little bit over what we thought it would be, with smokeless tobacco and aspirin coming on." Fritts was referring to legislation that would eliminate smokeless tobacco ads on radio and television and would require a 48word health warning in aspirin commercials.

"I think we're ahead of the curve on beer and wine," the NAB president said. He believes broadcasters have made "tremendous strides" in getting their view across on the matter. "I think this is an issue that NAB's managed right from the very beginning. We organized a national task force and state task

Test case?

The first holding by the Fowler FCC that a broadcaster has violated the fairness doctrine may provide the basis for the first challenge to the constitutionality of the doctrine since the Supreme Court upheld it in *Red Lion* in 1969. The Meredith Corp. made it clear last week it will make such a challenge if it is unable to persuade the commission to reconsider its decision that Meredith's wTVH(TV) Syracuse, N.Y., violated the doctrine in a case involving commercials it had carried for the Energy Association of New York, a trade association for utilities, in the summer of 1982 (BROADCAST-ING, Oct. 29, 1984).

The commercials advocated the continued construction of the Nine Mile II nuclear plant in upstate New York, and the issue reached the commission on a complaint by the Syracuse Peace Council that the station was presenting only one side of a controversial issue of public importance. The commission, in a 4-1 decision, agreed with the SPC, and ordered the station to meet its fairness obligations.

Meredith last week, in a pleading supporting an earlier one for reconsideration, challenged the constitutionality of the doctrine, both as applied in the WTVH case and generally. "The legal underpinnings of that doctrine must be reviewed, both by the commission and by the courts, if necessary," Meredith said, adding that it "will pursue all legal remedies to achieve that review." Meredith coursel Michael Bader said later his client is prepared to take the case to the Supreme Court.

"The time," Meredith said, "is propitious for the courts to revisit this anachronism."

Last summer, the Supreme Court, in a decision overturning a law prohibiting federally funded public broadcasters from editorializing, offered what was taken as a strong signal it would welcome a new case testing the constitutionality of the fairness doctrine (BROADCASTING,July 9, 1984).

forces in every state. We've taken the high road and been very straightforward in our awareness campaign," he said, referring to NAB's national public service campaign against drunk driving.

But where does NAB draw the line? "It is impossible to have a campaign for every cause. I think we have to pick and choose the campaigns that we're involved in. And what we have done is try and rely on the stations to give us a sense of which campaigns and which issues to get involved in," he stated.

Another issue likely to draw broadcaster attention is the FCC's proposed cost-of-regulation fees. "We're opposed to fees," Fritts said. The NAB, he continued, has traditionally opposed fees. "We accepted fees as a part of S. 55, which was a broad deregulation package. Fees for the sake of fees are anathema. However, in a world of realism, if Congress in its own wisdom—and over our objections—decides to enact fees, then we have some very strong recommendations.

NAB's primary concern is a proposal to tax broadcasters with an annual fee. Many broadcasters, he argued, have absolutely no interchange with the FCC during an entire year. "And to say that they should pay the government X amount of dollars is inherently wrong." A transactional-type fee makes more sense, he added. "If the Congress decides to ask for fees, that would be a more preferable way to do it than an across-theboard-tax-everybody approach."

Fritts wasn't anxious to launch a major congressional battle over the fees. "We recognize that we only have so many chits that can be cashed—if you will—in the Congress and we have to prioritize things. It's a difficult issue. The Congress wants to offset a deficit, the FCC wants to look good in the administration's eye by helping to offset that deficit, and the broadcasters currently are not paying fees. We're opposed to fees and we will work not to have fees. Will we cash our last chit to stop from having fees? No. We're going to save our trump card for bigger issues," the NAB leader said.

What does he hope delegates to the Las Vegas convention will come away with? "We would like them to come away with a positive feeling about their industry, about their own growth potential and about the stewardship of NAB as a trade association. We are growing with them, becoming stronger year by year. And, I think, more effective."

Extra points. You can't take them for granted. They can make the difference between winning and losing. A special team called Blair Programming goes all out to score for Blair-repped stations. Our specialists make points with hard facts and figures that count in buying and scheduling programs. Research on first-run and off-network shows. Movies. Sports. Specials. Performance across every market in the country. Demos and daypart data. A unique ProFocus approach for analyzing trends, individual market and station strategies. One-on-one consultation about what's available. When. And how it fits your game plan. How a program can beat the competition. Lead-in, lead-out factors. Play-off ideas. Counter-programming tactics. Blair Programming knows what it takes to win in the sales game. Leadership. It's **BLAIRP. ONLY BLAIRP.** Television

REMINISCE ABOUT THE FUTURE.

Lmagine that it's 1986 and you've just received the ratings from the latest sweeps.

Now imagine how happy you are with the performance of "Catch Phrase," the biggest hit of '85-'86, and the newest strip that you added to your station line-up.

You reminisce about the day that you bought "Catch Phrase." You knew that instant hits don't happen by accident. They happen when all of the elements that it takes to make a successful game show come together on one project.

And you had the insight to realize that "Catch Phrase" is one of those instant successes.

You review in your mind all of the reasons why you bought "Catch Phrase."

THE GAME WAS EASY TO WATCH

You played along with the pilot program and knew that your viewers would too. You noticed that the show isn't a complicated program, yet its appeal is undeniable.

THE PUZZLES WERE ADDICTIV

As you watched the show, the "Catch Phrase" puzzles became addictive. Like eating peanuts, once you start watching, you just can't stop.

THE GAME WAS FOCUSED

You instantly realized that the catch phrases are the main focus of the show. They're the star of the program There are no questions and answers slowing down the pace and turning off young viewers, just lightning-quicl catch phrases to play along with.

THE HOST WAS WELL KNOWN

You liked the host of the show. You knew that Art James is a proven master of ceremonies, having starred on such network shows as "Say When," "Temptation," "The Magnificent Marble Machine," "Who, What, Where," and the huge hit, "Concentration." And you realized that his 15 years of experience on the networks would pay off when "Catch Phrase" debuted.

THE PERFECT FINISH

And as you watched the pilot, you were captivated by the electrifying 'Catch Phrase" bonus round, the astest-paced climax on the air. A bonus round in which a contestant can win over \$10,000 in only 60-seconds. Yes, you're glad that you decided to become a part of the biggest success of the new season.

You're proud that you made the decision to be the one station in your market that stepped up to buy the freshest, fastest and most addicting game show of the season.

Next year, don't be caught on the outside looking in. Join the growing "Catch Phrase" line-up right now.

MADD as hell and not going to take it anymore

Candy Lightner, who was founder and remains guiding light of Mothers Against Drunk Driving, is willing to work in tandem with broadcasters on beer-wine issue but insists on holding to position of independence

When Candy Lightner, founder of Mothers Against Drunk Driving, appears at the National Association of Broadcasters annual meeting in Las Vegas this week (April 15) she is likely to toss both darts and laurels at the broadcasting industry. On the one hand, she is pleased with the attention the media have devoted to drunk driving. But at the same time, she wants to see more done. Lightner, who has been linked with the NAB as part of its national campaign against drunk driving, is expected to ask the industry to "clean up its act."

Is there pressure from NAB and other organizations? No, Lightner said. "We've always chided the media for not paying enough attention to the impaired driving issue. We made our decision not to support Project SMART a year ago. Long before I even knew what the NAB was."

MADD was created in 1980 by Lightner following the death of her 13-year-old daughter, Cari, by a hit-and-run drunk driver. Her story was even depicted in an NBC made-for-television movie, Mothers Against Drunk Driving: The Candy Lightner Story. Five years later, MADD has 340 chapters in 47 states and 600,000 supporters.

Alcohol advertising is really not MADD's issue, Lightner underscored. Only certain aspects of it fall under MADD's purview. "There are portions of alcohol advertising that would be our issue if it tied into the drinking and driving aspects. It's very important that people realize we try and keep the two issues separate: alcohol from drinking and driving or drinking from drinking and driving. And that's what we're trying to do in the position that we're taking."

The group, however, is not taking a stand on counteradvertising, although it will discuss the depiction of alcohol in TV programing. Lightner, speaking for herself, is concerned about commercials that "depict alcohol combined with driving." She is particularly disturbed by those ads that show a situation in which someone has obviously driven to a place to drink and will be driving home.

She said that with the exception of Christmas and the PSA's ABC has been airing recently, there are still not enough PSA's on impaired driving. Furthermore, she contended, "they are aired at ungodly hours when the majority of the public isn't watching." Indeed, Lightner stressed that more needs to be done than just PSA's. She suggested that more drunk driving documentaries and docudramas should be produced. "Every once in a while they'll get carried away on alcohol abuse, but they really don't, in all truthfulness, do that much on impaired driving. They do news stories, but they don't do docudramas, documentaries or prime time specials on what is to me the worst crime that we have."

She was reluctant to blame advertising for the problems associated with alcohol abuse. "All marketers glamourize their products; that's part of advertising," she said. "Just because an ad might show someone who looks sexy when they have a glass of wine— I guess I think the American public is smarter than other people do—I don't think people think: 'I have to go out and have a glass of wine to be sexy.' "

The ads, she said, might contribute to younger people drinking. "And then I thought, "Well, you look at all the obese people in this world and every time they advertise Wendy's hamburgers, you know darn good and well it probably does encourage those people to go out and buy hambur-

Lightner

gers, or just munch on potato chips or anything. But do we say: 'All right, we eliminate advertising Wendy's hamburgers because of the problem of obesity'?"

"And I understand the issue of where you draw the line. And you know at some point you have to hold individuals responsible for their own actions, but at the same time the alcohol industry should also be responsible for its own actions and so should the media. And I don't think the media can take a part, for example, and continue to advertise it when there is a potential for harm, without taking some accountability."

The American people, she noted, are concerned about the media and their portrayal of alcohol. "I think unfortunately what has happened is the media have waited so long to address it that groups like the Congress will probably get involved. If the media had been astute some time ago and seen this coming and decided immediately to start taking some action, it may not have been necessary for Congress to get involved."

> Broadcasting Apr 15 1985 **54**

Still, Lightner is unsure if alcohol advertising should be a congressional issue. She compared SMART's activities to MADD's drive to raise the drinking age to 21. "We tried to raise it at the state level for four or five years without success and finally went to Congress. I feel the same way about what Project SMART has done. To me they should have tried to work with the media for a period of time before they came out calling for a ban."

She makes it clear that MADD will not work with SMART. "We will not support Project SMART ever. I have real problems with the way they came out and made derogatory remarks about our organization because we haven't supported them. I think they've been extremely callous and unfair and very biased in their whole attitude about the whole issue." MADD, she continued, will always take a separate position. "It may be a similar position, it may be the same position or same goals, but it will be ours," she said.

Moreover, she argued, a ban won't "make any difference one way or another." After visiting Norway and Sweden, which don't air any advertising, Lightner concluded that eliminating alcohol advertising wouldn't eliminate the problems of alcohol abuse. "Alcohol is not the problem here; the problem is the individuals who abuse alcohol and those are the ones who need to be dealt with."

Although the MADD leader recognized that broadcasters have increased the public's awareness about drunk driving, she criticized the media for entering the scene so late. "I have some problems here. As a victim, the feeling that I have is, 'This is nice, but where were you five years ago?" Where were you 10 years ago? Maybe if you had been there, maybe if the media had increased the awareness long before MADD came along, frankly we wouldn't need a MADD or Cari would be alive today."

However, as the leader of a cause-oriented group, Lightner said, "I have to say: 'Well, here you are; let's work together; let's see what else we can do.' " But her own views are colored with cynicism. "We are talking about the number-one crime. The most often committed crime, the most expensive crime, and lo and behold the media are doing something about it. However, they're not doing something about it because all of a sudden they're concerned about impaired driving. You tell them for five years that it's killing people and you still get 2 a.m. PSA's. You threaten to take away their revenue and money and all of a sudden you're getting prime time PSA's.'

There's a part of her, Lightner said, that is "grateful" for the media's attention. "I want the issue out, but then there's a part of me that's angry. We need the media to keep the issue alive so there's a hesitancy by groups like ours to alienate the media, because we always want drunk driving in the forefront. But on the other hand, I have to be honest and tell you, in many ways I am angry about their slow response to the issue."

Where monumental change is the order of the day

For the 63d time, the National Association of Broadcasters opens the doors on its annual convention. More than 30,000 people are expected at the Las Vegas Convention Center for five days of panels, luncheons, workshops, suites and exhibits. ¶ BROADCASTING's convention preview and complete agenda begin on page 58 with a list of hospitality suites on page 70. An examination of some of the new or innovative radio and TV products appears on page 74 and a guide to the companies exhibiting begins on page 76.

Broadcasters poised to 'Take Part...Take Pride'

That's the theme of NAB's annual convention in Las Vegas where public service will be highlighted

More than 30,000 broadcasters will descend on the Las Vegas Convention Center this week for the National Association of Broadcasters annual meeting (April 13-17) to "celebrate" their contributions as "community leaders." "Take Part... Take Pride" is the theme of this year's gathering which will focus on the industry's commitment to serve the public interest.

The association's public service campaign against drunk driving will be highlighted throughout the meeting and specifically during a joint radio and television session on Monday, April 15, featuring Candy Lightner, founder of Mothers Against Drunk Driving. The legislative outlook on proposals to ban beer and wine advertising will be discussed by a panel of key House members following that session and NAB has set up booth where its members can receive information on drug and alcohol abuse. Several other congressional panels are scheduled to explore other issues. NAB also is hosting an invitation-only congressional breakfast on Monday, April 15, where members will discuss regulatory policy. Scheduled for that session: Senator Larry Pressler (R-S.D.); Representatives Wayne Dowdy (D-Miss.); Jim Bates (D-Calif.); Mickey Leland (D-Tex.); Dan Coats (R-Ind.); Cardiss Collins (D-III.); Michael DeWine (R-Ohio); Thomas Luken (D-Ohio); Don Ritter (R-Pa.); Hal Rogers (R-Ky.); Billy Tauzin (D-La.); Tom Tauke (R-Iowa), and Michael Billirakis (R-Fla)

The general convention was to open at 2 p.m. on Sunday, April 14, with NAB President Eddie Fritts and his "State of the Industry" address. (On Saturday, April 13, a series of radio management sessions and a number of TV and radio engineering workshops were to be held.) The Radio Advertising Bureau and the Television Bureau of Advertising are sponsoring several workshops, including RAB's "Radio Sales: The State of the Art," on April 16 and TVB's "Selling TV in the Year 1985" on April 16.

Among the television management sessions likely to draw a crowd is Monday's "The Free Press Issue: A Matter of Principal & Profit," with Elie Abel, Stanford University; Walter Cronkite, CBS; Timothy Dyk, Wilmer, Cutler & Pickering, and Robert Morse, WHAS Inc. Also on Monday, "Communicating with the FCC," a panel featuring: John Lane, Wilkes, Artis, Hedrick & Lane; Richard Wiley, Wiley & Rein, and

Cuomo

FCC Commissioners Henry Rivera and Dennis Patrick. For radio, a Monday session called "AM Stereo: A Medium Whose Time is NOW," with John Gehron, wLS(AM) Chicago; Tom Glade, KSL(AM) Salt Lake City, and Dick Walsh, wABK(AM) Augusta, Me., is expected to attract an audience. Radio broadcasters can also hear FCC Commissioners Mimi Dawson and James Quello, Peter Tannenwald of Arent, Fox, Kintner, Plotkin & Kahn, and Bernard Koteen of Koteen & Naftalin discuss FCC issues on Tuesday. A one-on-one with FCC Mass Media Bureau Chief James McKinney will also be held on Tuesday. FCC Chairman Mark Fowler will speak on Wednesday. And TV broadcasters may want to sit in on "Prograining for the 1990's" featuring Michael Garin, Telepictures Corp.; Lee Rich; Lorimar; B. Donald Grant, CBS Entertainment, and Mel Harris, Paramount.

Scheduled to appear during the TV lun-cheon is New York Governor Mario Cuomo-an appearance credited to NAB board member William O'Shaughnessey, WVOX-AM-FM New Rochelle, N.Y. John Gambling, WOR(AM) New York, will address the radio luncheon on Tuesday. Radio broadcasters can also attend a special session on Monday entitled "Radio: In Search of Excellence." The session will be conducted by McKinsey & Co., the management consulting firm associated with the book, "In Search of Excellence: Lessons from America's Best-Run Companies." The firm will present its findings on 11 stations in with consistently high performances in markets of various stages.

But radio operators won't be the only ones to receive recognition during the meeting. A reception is being held on Monday to announce the winners of NAB's "Service to Children Award." The awards will be presented to 13 TV stations based on several categories including specials, special projects, public service announcements and non-broadcast activities. The event will be held in conjunction with the J.C. Penney-University of Missouri Television Awards for Community Leadership. FCC Commissioner Rivera will speak.

Some of the other related activities planned include a minority television programing exhibition on April 15 and 16. This is the second year the exhibit is being held. In addition, the NAB and the American Bar Association are sponsoring a day-long law forum on Saturday, April 13. A "Broadcasters Christian Heritage Prayer Breakfast," is scheduled for Monday, Tuesday and Wednesday mornings at 7 a.m. FCC Commissioner Mimi Dawson will hold a briefing on the Emergency Broadcast System on Tuesday at 4 p.m.and a ham radio operators reception is slated for Monday at 6 p.m. \Box

A day-by-day guide to NAB 85

The registration desk, located in the convention center rotunda, will be open 8 a.m.-5 p.m., Sunday and Monday, April 14 and 15; 9 a.m. to 5 p.m., Tuesday, April 16, and 9 a.m. to noon, Wednesday, April 17. All events are at the convention center unless otherwise noted.

Sunday, April 14

RADIO SESSIONS

Radio engineering session. 10 a.m.-12:30 p.m. Studio Maintenance Workshop. Room 21. Session chairman: AI Resnick, wLS(AM) Chicago. Opening presentation: Steve Messer, wHFB-AM-FM Benton Harbor, Mich. Participants: Messer; Dave Montgomery, ITC/3M; Steve Church, wNDE(AM)wFB0(FM) Indianapolis; Richard Adler, consultant; Jim Loupas, James Loupas Associates.

Daytimers forum. Noon-2 p.m. Room L. Presenters: Gary Capps, Capps

Broadcasting; James Wychor, KWOA(AM) Worthington, Minn.; Barry Umansky, NAB. Moderator: Michael Rau, NAB. Panelists: A.L. Anderson, KBMR(AM) Bismarck, N.D.; Robert Vickery, wLPO(AM) La Salle, III.; Joe Allen Sr., KLIQ(AM) Portland, Ore.; Charles Schott, FCC.

Session. 12:30-1:30 p.m. *Recruitment and Retention of Minorities in Radio.* Room R1. Moderator: Eugene Jackson, National Black Network. Panelists: Abe Thompson, wGCI(AM) Chicago; Joshua Jackson, KJCB(AM) Lafayette, La.; Athena Sofias, wOJO(FM), Evanston, III.

TELEVISION SESSIONS

Television engineering maintenance workshop. 10 a.m.-1 p.m. Room 18. Session chairman: Jerry Plemmons, Outlet Communications. *Common Pitfalls in Designing Transmitter Cooling and Ventilation Systems.* Michael Chiarulli, ABC. *Guidelines for Transmitter Plant Installation and Maintenance.* James Pickard, Harris Corp. *Microcomputer Control Enhances NiCad Battery Fast Charging.* D.C. Hamill, PAG Ltd. Panel discussion participants: Chiarulli; Pickard; Talmadge Ball, KSL-TV

Spectrum Management. 4-5:30 p.m. Room 21. Session chairman: George Capalbo, RKO Radio. *Future Trends in Spectrum Management*. Panel participants: FCC Commissioner Mimi Dawson; David Markey, NTIA; Robert Powers and Ralph Haller, FCC; Thomas Keller and Ralph Justus, NAB.

Tuesday, April 16

RADIO SESSIONS

Joint breakfast session. 7:45-9 a.m. *FCC/Congressional Staff* continental breakfast. Ballrooms D and E. Moderator: Belva Brissett, NAB.

Three concurrent sessions. 7:30-8:45 a.m. *Successful Collection Techniques.* Rooms R1 and 3. Presenters: Donald Willoth and Sue Cissel, WMAL(AM)-WROX(FM) Washington, and Dotti Pricer, WCLT(AM) Newark, Ohio.

Selling Big Bucks for the Barn. Rooms S1 and 3. Presenters: Tom Thompson, wHO(AM) Des Moines, Iowa; Gordon Bennett, Eric Brown and Richard Hawkins, KRVN(AM) Lexington, Neb.

Strategic Planning: A Marketing Approach that Works. Rooms R2 and 4. Presenter: Jim Hooker, Jim Hooker & Co.

Sales session. 9-10:15 a.m. *Radio Sales: The State of the Art.* Hilton pavilion. Introduction: William Stakelin, RAB. Presenter: Don Beveridge, D.W. Beveridge & Associates.

Five concurrent sessions. 10:30-11:45 a.m. *How Newspapers Sell Against Radio.* Rooms S1 and 3. Presenter: Bill Lyke, Lyke International. *Radio Allocations Through the '80's and '90's.* Rooms S2 and 4. Moderator: Barry Umansky, NAB. Panelists: John Kamp and Sheldon Guttmann, FCC; William Potts Jr., Haley, Bader & Potts; Jules Cohen, Jules Cohen & Associates.

The Rapidly Changing World of Radio Reps. Rooms R1 and 3. Presenter: Jerry Feniger, Station Representatives Association.

Building a High Performance Powerhouse Sales Staff. Rooms L1 and 3. Presenter: Ken Greenwood, Greenwood Devlopment Programs.

What's Happening at the FCC? Rooms R2 and 4. Moderator: Valerie Schulte, NAB. Panelists: Commissioners Mimi Dawson and James Quello; Peter Tannenwald, Arent, Fox, Kintner, Plotkin & Kahn; Bernard Koteen, Koteen & Naftalin.

Radio luncheon. Noon-2:15 p.m. Luncheon and hall of fame ceremony. Hilton pavilion. Inductees: Fred Palmer and Casey Kasem. Spirit of Broadcasting Award presented to William Quarton, chairman of KWMT Inc., Fort Dodge, Iowa. Keynote speaker: John Gambling, WOR(AM) New York.

Five concurrent sessions. 2:30-3:45 p.m. *The Pieces, Promotions & Parts that Build Success in Small Markets.* Rooms R2 and 4. Presenter: Jay Mitchell, Mitchell Communications.

Sales Marketing: A Strategy for Success...and Survival. Rooms S2 and 4. Presenter: Bill Weaver, KFRU(AM) Columbia, Mo.

One-on-One with Jim McKinney. Rooms E1, 2 and 3. Moderator: NAB President Edward Fritts with FCC Mass Media Bureau Chief Jim McKinney. Category Selling: Beating Newspapers at Their Own Game, Rooms R1

and 3. Presenter: Jack Sweeney, Electronic Media Consultants. Doubling and Tripling Your Station's Billing. Rooms L1 and 3. Present-

er: Pam Lontos, Pam Lontos Inc.

Seven concurrent sessions. 4-5:15 p.m. An EBS Briefing with Commissioner Mimi Dawson. Convention Center, room 1.

The Secrets of Busting Big Retail Budgets. Rooms L1 and 3. Presenter: Tony Durpetti, McGavren-Guild.

Using Research to Slay Newspapers and Other Dragons. Rooms R1 and 3. Presenters: Bob Galen, RAB; Bob Lobdell, Republic Radio Sales.

Selling Without Saying A Word: Dressing for Success. Rooms R2 and 4. Presenter: Luciano Franzoni, Hartmax Corp.

Making Money with Co-op. Rooms S2 and 4. Presenters: Joyce Reed, RAB; Stephen Strauss, Howe, Strauss & Associates.

Subcarriers: Dollars and Business Sense. Rooms L2 and 4. Moderator:

THE NEW RECORD BREAKER FOR YOUNG WOMEN!

SOLD IN OVER 40 MARKETS

Now it's a network feed. Later, a local production. Record it, replay, erase and record again. Signal after signal. Day after day on the same roll of tape. And with millions watching, every second of every show has to look perfect. But you know you're covered... because you know your tape.

We know you need a versatile videotape that you can work on for weeks and still maintain your original picture quality. That's why we created Scotch[®] 480, with a uniquely smooth surface technology. Resulting in extremely low

color noise and dropout levels—and exceedingly high picture quality. Making 480 the one videotape that can guarantee even the most demanding broadcaster superior

versatility and image durability. Plus, Scotch engineers are always just a call away. Scotch 480. One tough tape that makes us number one in the world of the pro.

Scotch 480

ONE IN

NUMBER

Marcia De Sonne, NAB. Panelists: Gene Swanzy, Mutual Broadcasting; Hi Mayo, Sinder Corp.; James Wychor, KWOA-AM-FM Worthington, Minn.; Michael Elliott, Warner Stations.

Selling Minority Radio. Rooms S1 and 3. Moderator: Glenn Mahone, Sheridan Broadcasting. Panelists: Eduardo Caballero, Caballero Spanish Media; Earl Jordan Jr., KYOK(AM) Houston; Pat Stevenson, J.P. Martin Associates.

Rap session. 7-8 p.m. AM Stereo Receivers—Is the Marketplace Responding? Hilton conference rooms 8, 9 and 10. Presenter: P. Dale Ware, KUTY(AM) Palmdale, Calif.

TELEVISION SESSIONS

Session. 9-10:15 a.m. *Programing for the 1990's*. Rooms A2, 3, 5 and 6. Moderator: Joel Chaseman, Post-Newsweek. Panelists: Michael Garin, Telepictures Corp.; Lee Rich, Lorimar; B. Donald Grant, CBS Entertainment; Mel Harris, Paramount.

Session. 10:30-11:45 a.m. *Selling TV in the Year 1985*. Presenters: William Moll, Harte-Hanks Communications; Roger Rice, TVB.

Four concurrent sessions. Noon-1:15 p.m. *A New Station in an Established Market.* Room G2. Moderator: Donna Zapata, wHAS-TV Louisville, Ky. Panelists: Michael Fisher, KTXL(TV) Sacramento, Calif.; Harry Pappas KMPH(TV) Visalia, Calif.; Steve Pruett, Media Management Corp.; Harold Protter, wNoL-TV New Orleans. Legal advisor: William Green, Pierson, Ball & Dowd.

Music Video...A Different Tune. Room G1. Moderator: Gary Smithwick, Keith Smithwick Co. Panelists: Dain Eric, Discovery Music Network; Mort Nasatir, Association of Music Video Broadcasters; Rick Sklar, Sklar Communications.

The People Meter Experiments. Room D2. Moderator: John Abel, NAB. Panelists: Norm Hecht, AGB Television Research; Pierre Megroz, Arbitron; David Traylor, A.C. Nielsen Co.

The College Sports Tangle. Room D1. Moderator: Rex Lardner, Turner Broadcasting. Panelists: James Babb, Jefferson-Pilot Broadcasting; Fred Botwinik, Katz Communications; Eugene Corrigan, University of Notre Dame; Phil Hochberg, Baraff, Koerner, Olender & Hochberg; Neal Pilson, CBS.

Session. 2:30-3:45 p.m. *One-on-One with Jim McKinney*. Rooms E1, 2 and 3. Moderator: NAB President Edward Fritts with FCC Mass Media Bureau Chief Jim McKinney.

Session. 4-5:15 p.m. An EBS Briefing with Commissioner Mimi Dawson. Convention Center, room 1.

RADIO ENGINEERING SESSIONS

Radio New Technology. 8-9:55 a.m. Room 21. Session chairman: James Hoke, Edens Broadcasting. An Evaluation of FM Signal Penetration Using a Small Computer. Michael Callaghan, KIIS(AM) Los Angeles. Newsroom Computers for Radio Broadcasting. Kenneth MacBride, NBC News. Compact Digital Disk—Broadcast Applications. Takeshi Yazawa, Sony Communications Products. Combining News Transmission and Companding Systems for Improved Reception. Emil Torick, CBS.

Radio Production Technique. 10 a.m.-noon. Room 21. Session chairman: James Hoke, Edens Broadcasting. *High Performance Telephone Interfacing Uses Digital Signal Processing Technology*. Steve Church, WNOE(AM)-WFBQ(FM) Indianapolis. *Stereo Microphone Technique for Radio Broadcasting*. Skip Pizzi, NPR. *Panel discussion*. Participants: Pizzi; Church; Mark Durenberger, Hubbard Broadcasting; John Shadle, KTAR(AM)-KKLT(FM) Phoenix; Peter D'Antonio, RPG Diffuser.

Audio Measurements and Processing. 2:30-4 p.m. Room 21. Session chairman: Russell Pope, Golden Empire Broadcasting. A Proposed Peak Program Meter Standard. Kevin Dauphinee, Dolby Laboratories. Automatic Phase Error Correction Using an Audio Cross-Correlation Technique. David Howe, Howe Audio. Audio Program Analysis—A New Approach to Evaluating Your Air Sound. David Harry, Potomac Instruments.

AM Stereo. 4:15-6 p.m. Room 21. Session chairman: Michael Rau, NAB. Audio Processing for AM Stereophonic Transmission. Ronald Jones, Circuit Research Labs. Converting AM Studio Facilities to Stereo. David Obergoenner, KUSA(AM)-KSD-FM St. Louis. Second Generation AM Stereo Exciter. Edward Anthony, Broadcast Electronics. A Modern Independent

Side-Band AM Stereo Exciter. Leonard Kahn, Kahn Communications. Legal advisor: Edward Henneberry, Howrey & Simon.

TELEVISION ENGINEERING SESSIONS

TV Satellite Systems. 8:30-11 a.m. Room 20. Session chairman: Robert Flanders, McGraw-Hill. Satellite News Gathering System Uses Ku Band. Raymond Conover, Conus Communications. News Express: The Florida News Network's Mobile Ku Band Satellite Service. Bramwell Flynn, Dalsat; Susan Kalla, GTE Spacenet. Fly Away SNG Systems Users Portable Ku Band Antenna and Digital Compression Techniques. Eric Schechter, GEC-McMichael. An Update of the ABC TV Network Distribution Plan. Brent Stranathan, ABC. "Those who would deny freedom to others deserve it not for themselves, and, under a just God, cannot long retain it?

Abraham Lincoln, 1859

Although Lincoln's eloquent words addressed the tragic contradiction of human slavery, they apply universally where one entity is unjustly restrained or restricted solely for the benefit of another.

For almost 100 years, America's railroads were bound in servitude to various special interests, and stiffing federal regulations prohibited the railroads from competing freely in the marketplace. With little hope for an equitable return on investment, railroads deteriorated. Lacking the freedom to conduct business in a reasonable manner, many became insolvent.

In 1980, the Staggers Rail Act lifted

some of the more crippling regulations. Today, after heavy investments in equipment and repair, railroads are providing the type of service the nation needs. In areas where trains once lurched and swayed at 10 mph, they now roll smoothly at 70. Where bankruptcy was once a widespread threat, financial health is slowly becoming a reality. Suffocating regulatory red tape has been replaced by marketing initiatives and innovative services.

The vast majority of rail customers appreciate the benefits of a solvent and competitive rail system. A recent study shows that 87% of rail customers surveyed believe that railroads should continue to compete in an open market. And no wonder: Rail rates were increasing twice as fast before Staggers as they are now.

Yet certain special interests, masquerading as a consumer group, are trying to persuade Congress to modify the Staggers Act, to again force the nation's railroads into economic involuntary servitude.

For more information, write: Freedom of Choice, Dept. 513, Association of American Railroads, 1920 L Street, N.W., Washington, DC

20036. Or if you're on a deadline, call us at (202) 835-9550 or 9555.

MUSIC STATIONS OF AMERICA, CAN WE TALK?

Ever want to clear a great talk show but were afraid it wouldn't quite fit because you're not News/Talk? Let's talk.

Most of the stations that carry our unique call-in programming service are actually music stations. According to a recent survey, 76 % to be exact. And that covers just about any music format from MOR to AC, from Country and Western to Oldies. In fact, that same survey showed only 26% as being News/Talk stations.

So, if you thought that music and talk didn't mix, think again. Give us a call at (212) 664-4456.

Talknet. We hit just the right note.

Zonal Ltd.

When it was sink or swim...

We got good fast!

We are Seltel. The fastest growing TV Rep firm in the U.S.A.

That's right, the fastest growing of all. And we got that way by doing what we've always done—only a whole lot better.

Look what's happening at Seltel these days.

<u>Seltel growing faster than the industry</u>.* At Seltel we've changed everything but the name.

We have totally new management, right at the top and in every department. We have new department heads in research, programming, marketing and promotion. We have many new sales people and we've opened new sales offices.

As a result of our aggressive new style we outpaced the industry in 1984. And all of this gain came in markets where we went head-to-head with the other big Rep firms.

Better business for us means better business for our stations.

Are your revenues growing faster than the rest of the industry? If not

maybe Seltel could help you.

Pick of the gear on the NAB floor

NAR 85

The full spectrum of radio and television technology is featured on floor, in sessions

Steady growth has become the hallmark of both the equipment exhibition and the engineering conference at the annual convention of the National Association of Broadcasters. This year's event, which opened April 12 at the Las Vegas Convention Center and Las Vegas Hilton, is no exception.

Six hundred and seventy-eight companies grace the exhibit halls, 10% more than 1984, 20% over 1983 and 50% above 1981. Some of the companies new to the trade show have come from other industries seeking to sell their wares in the broadcast marketplace. But many are small entrepreneurial firms, in a few cases spun off from larger full-line companies, seeking to fill specialized niches.

The same kind of expansion has come to the engineering conference, which, with 91 technical papers during 50 hours of sessions, has increased by 20% over last year's schedule and nearly doubled since 1983.

But both exhibit hall and session rooms offer more than just abundance. They serve as open houses for ongoing advances in the technology of the industry. In the exhibit hall this year, for instance, the attention of attendees may be drawn to anything from the protracted fight for dominance in small-format video technology to fresh markets in multichannel TV sound, satellite news gathering, newsroom computers and radio transmission gear, as well as continuing advancements in graphics equipment and editing gear.

In one corner of the small-format ring, Sony continues to build its half-inch videotape Betacam line with the introduction of new tape decks and a new camera, and with a spotlight on the Betacart half-inch multicassette system for the second year in a row.

But supporters of the incompatible M format, including Panasonic and RCA, are also on the offensive. Panasonic is introducing a new half-inch deck of its own and will also show a new half-inch metal particle tape format, M2, with a 65-minute cassette and studio tape player. Apparently meant as an enhancement for existing M-format gear, with which is is easily interfaceable, M2 was recently developed by Panasonic's parent Matsushita together with Japan's national TV network, NHK, and will most likely have its most immediate applications in production facilities for mastering.

RCA is pushing for M format as well, with plans to highlight a new M-format automated video cart machine meant to replace the widely used TCR-100 two-inch videotape unit. Panasonic will also show its own M-format spot player and a whole range of other companies are expected to pursue that fast-growing replacement market.

One video cart machine most likely to draw inquiries is the digital recorder/player being worked on by Ampex and rumored to use a 19 mm tape format that equals or surpasses the quality of one-inch Type C videotape. The unit also apparently uses an elevator mechanism similar to that of the Sony Betacart.

For followers of quarter-inch format developments, this NAB may not be the one to "go all the way," as predecessors were asked to do in the brighter times of 1983 and 1984. Standardization efforts have so far failed to achieve a single system from proponents of two incompatible methods at Robert Bosch and Hitachi Denshi (BROADCASTING, April 8).

Work will continue over the next six months, nonetheless, to study the potential for replacing the metal oxide tape currently used by the Hitachi format with new metal particle formulations. A modified Hitachi system was selected a year ago by an industry group as a possible standard, but it recently failed to meet quality requirements set up by the group. Also under study will be the line sequential color system used by Bosch's Quartercam equipment.

Both quarter-inch systems are expected to be on the floor, although Hitachi does not intend to offer its for sale yet, and whether Bosch will sell is also in question. Both companies have sold small numbers of the products outside the U.S.

Stereo audio is likely to be literally ringing out in many of the aisles, with numerous products for production to transmission of multichannel TV sound on display. Several MTS generator manufacturers are pushing to keep up with a growing demand (more than 30 stations are now equipped for the service, see story page 146) and will be joined by several other companies with generator products. Other transmission plant equipment, especially modulation monitors, transmitters and their retrofits, can be expected to be widely sought out by broadcasters considering MTS.

Production gear for stereo audio, including new and upgraded audio consoles, stereo synthesizers, meters and audio processors, is also anticipated to be on many MTS broadcasters' shopping lists.

New markets may be opening on the radio side of the hall, with the FCC's authorization of several hundred new FM channels likely to boost sales in many equipment areas, especially for radio transmitters made by firms like Harris, Broadcast Electronics, Continental, QEI and CSI Electronics. AM stereo continues its battle over system dominance, with contenders this year down to two— Kahn Communications and Motorola.

Newsroom computer manufacturers have their own hopes for growing sales this year, especially with the path partly cleared by NBC and CBS buys of systems for network news operations and owned-and-operated stations. Colorgraphics, which sold to CBS, and Basys, supplying NBC, will be joined by Data Communications and ANT Telecommunications/Solway. Also on the floor will be computerized weather graphics systems from Environmental Satellite Data and Alden Electronics, as well as service suppliers such as WSI Corp. and Accu-Weather. Component video continues to cast its net

Broadcasting Apr 15 1985

over a growing number of product lines. A good example is the video production switcher, with new component units expected from Shintron and Philips, and rumors of a Grass Valley Group component unit based on its last year's Model 100 switcher.

Other products expected to draw traffic on the floor include new editing systems from Interactive Systems Corp. (recently bought by Grass Valley Group), CMX, Convergence and Ampex. New cameras include units from Sony and Ikegami, while RCA has its ENG/EFP-oriented CCD cameras out in force. A range of test and monitoring equipment introductions is expected from Tektronix, Sony and Leader, and time base correction developments will come from Ampex and Sony, among others.

Accompanying and complementing the vast display of equipment in the exhibition are nearly two dozen technical sessions scheduled from Saturday through Wednesday and touching on topics such as multichannel sound, engineering maintenance, satellite broadcasting and AM stereo.

Saturday sessions, which last year drew some of the largest crowds, were expected to do the same this year with programs for radio engineers on AM technical improvement and transmitter-antenna engineering, while TV engineers were to be treated to a review of electronic graphic centers and the first of two gatherings on MTS. A second MTS session, focusing on production and studio conversion, is scheduled for Monday.

Being tried for the first time is a series of maintenance workshops, the first on RF for radio engineers Saturday, with a second on studio maintenance beginning the program Sunday. For TV engineers, studio and RF maintenance is covered in one three-hour session Sunday.

Highlighting TV sessions later in the week is a series of Monday talks on a range of TV engineering topics, from computerized newsrooms to component video. On Tuesday a satellite TV systems program focuses on satellite news gathering systems and the satellite interconnection plans of the commercial networks. Also on Tuesday is an overview of the work of the Advanced Television Systems Committee and a discussion of UHF transmission systems, including a panel on UHF spectrum use led by FCC Commissioner Henry Rivera.

Radio sessions feature a Monday discussion on AM-FM allocations, while a review of new technologies, such as digital compact disks, takes place on Tuesday. AM stereo is also a Tuesday afternoon topic.

Joint radio-TV sessions include one on spectrum management, featuring a panel with FCC Commissioner Mimi Dawson and other FCC representatives, and another on nonionizing radiation with officials of the FCC and the Environmental Protection Agency.

FCC representatives also join a final program on Wednesday—an open panel on engineering topics with Mass Media Bureau Chief Jim McKinney and Chief Scientist Robert Powers.
Think of the enormous impact these shows will have! It's like repeating the unprecedented ule unprecedenced Joe success of the "G.I. Joe Mini Series" every day of the week, every week of the year! Every Monday through Friday home to catch the latest 1/2 hour episode-already cleared in over 100 markets for 88% U.S. coverage! Can the Panasonic[®]AK-30 stand head to head with the bestselling broadcast camera in the world?

You bet it can. In fact, when you compare picture quality, automatic features and price, you'll discover the Panasonic AK-30 is far and away your best bet.

Compare pictures. You'll notice the AK-30 produces a superrefined video image. The kind of image broad-casters love to see. But that's not surprising with these kinds of specifications: Horizontal resolution is 650 lines center. S/N is a very quiet 62dB (– 6dB gain), the highest ratio in the industry. Digital registration is 0.05%, 0.1% and 0.25%. And illumination is a mere 24 lux at f1.4 (+18dB gain).

This high level of performance is achieved with a unique combination of image-enhancing circuitry and high-focus-field Plumbicon* tubes.

You'll also appreciate the AK-30's automatic circuits. Like auto-white balance with memory for setting 2 color temperatures. Presettable black stretcher. Auto-black balance, and a knee circuit for variable dynamic range. Together, they let you customize the image you're shooting for.

Still, the AK-30 has plenty more going for it. Consider its dual outputs. One works with standard NTSC. The other lets you set new standards because it's compatible with component recording. That means you can use it as part of our famous M-format Recam system.

The Panasonic AK-30. Compare it to the world's bestselling broadcast camera. And see why it stands out far ahead.

For more information call your nearest Panasonic regional office: Northeast: (201) 348-7336. Southeast: (404) 925-6772. Central: (317) 852-5973. West: (619) 941-3387. In Canada call: (416) 624-5010. "Plumbicon is a registered trademark of N.V. Philips for TV camera tubes.

Changing your station's format? BMI makes any move easier.

Without BMI's tremendous variety of music, any format change would be a lot more difficult.

That's because BMI has always licensed and encouraged all forms of music. Even when others didn't.

And no matter how many times a format changes, one thing will never change. You'll always have plenty of BMI music to play.

Wherever there's music, there's BMI.

Bowen Broadcast Service

Whenever your audience is watching you, they're listening to us.

No matter what time of day your audience tunes in, they hear music.

In every kind of program, from sitcoms and movies to daytime dramas and game shows to news and public affairs, music adds appeal that video alone can't communicate.

As the world's largest music licensing organization, BMI makes it easy for you to use

this music, hundreds of times every broadcast day.

It's the music your audience loves to watch.

Wherever there's music, there's BMI.

© Columbia Pictures Industries, Inc., 1984

Your World is char static electricity... causing a shocking of dropouts.

GED WITH

NUMBER

Your once-in-a-lifetime shots...destroyed by transient dropouts-caused by a fiber, a smoke particle, or even an eyelash that's been drawn into your videocassette by its inherent static charge. It's been an inevitable problem...until now.

We know you need a videocassette that can go anywhere and not pick up static-drawn souvenirs that will destroy your picture. So we developed the exclusive Scotch®Anti-Stat Treatment, a revolutionary cassette coating that minimizes static attraction, giving our new Broadcast Videocassettes the industry's lowest electrostatic charge levels. Auto-

matically reducing your transient dropouts. Dramatically improving your picture. And we've applied this unique technology to the lengths and formats you need. All

distinguished by our red doors and hubs for easy Anti-Stat identification. All backed by our engineers a call away. All the more reason we're number one in the world of the pro.

WKRN-TV

Nashville, Tennessee ABC Channel 2 announces the appointment of Harrington, Righter and Parsons, Inc. as national representative.

Aggressively selling for the finest television stations in America.

OUR RATINGS ADD UP TC

MORE THAN JUST NUMBERS

They add up to better sales, programming and advertising decisions. Because at Arbitron Ratings, we're constantly developing the most advanced methods of putting the ratings to work for your station and your advertisers.

For audience profiles closer to home you'd have to live there.

Product Target AIDSM designs an ideal commercial schedule for the advertiser and the television station. You use an IBM[®] XT to match the lifestyle profiles of the television viewers in your market with the lifestyle profiles of proven users for 600 heavily advertised products and services. Now, you can manage your inventory and win new advertisers, all with a database that you create just once and then use as often as you want for as many advertisers as you can call on.

Catch the trends before they catch you by surprise.

Arbitrends[™] delivers a radio market report from our computer to yours. All you do is pick up the phone, turn on your IBM XT and you're ready to keep an eye on audience trends. These computer delivered reports give you an advance picture of your market, allowing you to make timely adjustments in advertising sales or programming. The user selectable report formats let you pick the demographics, dayparts and estimates you need to study. The computer does the work of turning the numbers into useful information.

See us at the NAB and see the shape of things to come.

The latest sales and programming tools for radio and television stations will be on display at the Arbitron Ratings Booth #802 at the NAB. Stop by. We'll show you how to get more than just numbers from your Arbitron Ratings Market Report. **ARBITRON RATINGS**

"Modulation Sciences made KPLR and KRBK's move to stereo a piece of cake."

Jim Wright, Vice-President, Operations/Engineering, Koplar Communications.

"When Ted Koplar asked me: 'What're the problems when we go Stereo?', I said: 'None. The Modulation Sciences TSG[™] stereo generator will work with both our U and V RCA transmitters with a minimum of hassle."

Bob Venditti adds: "We all heard how hard and expensive MTS was going to be. For us, neither proved to

be the case. I'm glad we jumped-in early. . . the decision to go with Modulation Sciences was the right move. After some preliminary transmitter checks, we quickly and easily installed their generator. The system's architecture is definitely superior to anything

else we've seen. The bottom line—performance—is absolutely impeccable. It meets all the FCC's specs. More important, it meets our criteria for signal quality."

Jim Wright continues: "Now that we're up, both sister stations are airing as much true stereo material as possible and synthesizing everything else. In fact, we're creating our own stereo programming: Koplar's subsidiary production company (based in Hollywood) is syndicating the new Sci-Fi cartoon series, "The icing is their new Stereo Reference Decoder."

> Bob Venditti, Chief Engineer, KRBK-Sacramento.

'Voltron'-in stereo.

Just one more thing. The guys from MSI are great to work with. Given their considerable expertise and experience with MTS, that's what *I* consider the icing." Modulation Sciences can get your station up and running in stereo too. We're delivering the only fully-

> integrated stereo generator that truly meets all the technical recommendations of the FCC's OST #60. We're also the only company that's delivering a transfer standard stereo reference decoder—our new model SRD.^{TI}

> Contact us now for full information on both. We'd like

to help you—just like we helped Jim and Bob at Koplar Communications.

Call us toll-free at (800) 826-2603.

AM Stereo Without Compromise

C-QUAM[®] AM Stereo System by Delta Electronics, Inc. FCC Type Accepted

Delta Electronics, Inc. introduces the ASE-1 AM Stereo Exciter and ASM-1 AM Stereo Modulation Monitor: FCC type-accepted C-Quam System transmission equipment for the AM Stereo broadcast market. C-Quam is the *Compatible* Quadrature Amplitude Modulation system developed by Motorola, Inc. C-Quam is the system of choice for more than 200 U.S. stations plus additional Canadian stations. Users range from kilowatt day-timers to full-time network flagships. These stations report enthusiastic response from listeners using multimode and full C-Quam stereo receivers as well as typical monophonic receivers. The key is compatibility without compromise. All listeners, stereo and mono, receive a clear signal with low distortion. Delta's twenty-year leadership in the field of broadcast instrumentation solidly backs this technological advance.

The proliferation of receivers from GM's Delco Electronics, Inc., MacIntosh Labs, Sherwood Electronics, Chrysler Corporation, Concord Electronics, Samsung Electronics and others not yet announced, is creating a sizeable C-Quam audience. With the outstanding performance of this equipment, you can be sure that the audience will *stay* tuned to your Delta C-Quam AM Stereo transmission system.

For additional information, contact Bob Bousman at (703) 354-3350.

R

C-QUAM is a registered trademark of Motorola, Inc. Manufactured under license from Motorola, Inc.

An All New Animated Action-Adventure Series from King Features Entertainment and Marvel Productions

65 Half-Hours • Full Color • In Stereo

To find out more about DEFENDERS OF THE EARTH, visit King Features Entertainment at MIP, booth number 03.14/05.13.

King Features Entertainment

MARVEL PRODUCTIONS LTD.

OFTHE

rant MING THE MERCILESS, and his vast army of evil accomplices are working overtime iminate the human race.

e DEFENDERS OF THE EARTH, led by The tom, Flash Gordon, and Mandrake, challenge in a series of great adventures. Both sides owerful computers and spaceage technology. defeat Ming, the DEFENDERS must learn to effectively as a team and to cope with the conflicts that face all people of different backgrounds and ages who must join together in an important cause.

They are our last, best hope. For a frightened but determined planet, they are the DEFENDERS OF THE EARTH.

The DEFENDERS OF THE EARTH production team employs eminent child psychologists to advise on content and values.

ALKER, computer and nics genius...son of antom! One day Kit ke up the reins and rate the legend of "the who walks".

JEDDA, 17 year-old daughter of Flash Gordon and the breathtakingly beautiful Empress of Cerebra...has inherited some of her mother's super powers!

L.J.... Lothar's 18-year-old son... an intellectual, but streetwise and hard-edged. He is clever, witty and has the instincts of a winner... He knows how to get things done.

KSHIN, 10-year-old orphan, befriended by.Mandrake proficient in martial arts always tries to do more than he can young apprentice on the team.

ANTOM, enemy of evil, range and incredible powuses the secrets taught by the natives of the Voods...can draw on ngths of jungle animals.

FLASH GORDON...the swashbuckling, square-jawed, intergalactic hero! He's fearless, resourceful, clever, strong and incredibly brave. He's...Flash Gordon!

235 East 45th St., New York, N.Y. 10017 Phone: 212-682-5600 Telex; 7105812391 London Phone: (01) 434-1852 Telex: 266570 Los Angeles Phone: (818) 889-2047

LOTHAR, the big, muscular but soft-spoken Jamaican . . . Mandrake's lifetime friend and protector . . . easy-going and charming, but his fists can drive railroad spikes!

MANDRAKE THE MAGICIAN ...master of illusion. No one is more adept at hypnotic deception ...sophisticated and urbane ...he moves only in the best of circles.

HOW TO TALK TO TEENAGERS ABOUT DRINKING AND DRIVING.

KEEPING OUT OF HARM'S WAY.

Teenagers can get into a lot of trouble with alcohol. Even teenagers who don't drink. Often they aren't aware of the facts.

A new view of the statistics shows where part of the problem lies, and can lead to a better communication between adults and teenagers.

Teenagers are in the high-risk group. People between the ages of 16 and 24 represent only 20 percent of the licensed drivers of our country. But that same group is involved in 42 percent of all the alcoholrelated fatal crashes. When you think about that, two tragic things are revealed:

First, not all teenagers killed in such accidents are themselves drunk at the time. Often they have had nothing to drink at all, but are passengers in cars driven by teenagers who have been drinking. Second, teenagers are often on the roads late at night, especially on weekends, when most crashes involving alcohol occur. They are targets for cars driven by people who have had too much to drink.

Some facts about alcohol you might want to discuss with teenagers are often surprising to adults:

• One can of beer, as well as one four-ounce glass of table wine, and one 1.2-ounce drink of 80-proof liquor are all equally intoxicating. The risk is the same regardless of what you've been drinking.

• The legal definition of intoxication is based on "Blood Alcohol Concentration" or "BAC." If you have a BAC of .10 percent, you are legally drunk in most states. But for drivers or drinkers who are less experienced, a BAC of .05 percent, or sometimes lower, can be dangerous.

• Even relatively low levels of alcohol can reduce your tolerance to injury, increasing the danger in an accident. Arm your teenagers with the facts and give them time to reflect on them.

If expected to show good judgment, teenagers are more likely to live up to it.

Please discuss the problem of drinking and driving with your teenagers now, and if you think this advertisement will help, ask them to read it.

And keep in mind, that the best way to teach young people—as they may tell you —is by example.

The people of General Motors care, and urge teenagers, and their parents, to give serious thought to the dangers of drinking and driving. It's something we all can do.

This advertisement is part of our continuing effort to give customers useful information about their cars and trucks and the company that builds them.

Cetec Antennas

Excellence In Antennas

- ☑ Excellent Experience Over 25 years
- ☑ Excellent Design Computer Assisted
- ☑ Excellent Products Full Line FM & TV
- Excellent Prices Competitive
- EXCELLENT Delivery Best in the Industry

Now — For Your 80/90 Docket Planning

CETEC's JSDP Broadcaster® —, A really broadband FM community antenna. Each individual dipole measuring 1.1 to 1 or less across the entire FM band. Axial ratio is superior to any antenna available. Ultra-high power handling, optimum pattern control and beam-tilt/null-fill as specified plus multi-station combiners, too — that's excellence!

For the more typical side mounted FM antenna, the very popular **CETEC**

Penetrator, Model JSCP, gives you the edge in coverage. Over 1,500 are in service around the world. Low VSWR and superior bandwidth; just two of its excellent characteristics. The JSCP can be supplied with radomes or deicers for extreme climate conditions; the kind even broadband antennas cannot handle.

See us at NAB Booth 509

CETEC has many FCC (DA) directional antennas in service using the JSCP model and others. We measure full scale on our modern, 7100' antenna range. We can provide patterns to your consultant's requirements and furnish complete FCC antenna certification for your filing. Call us for a full range of FM & TV antenna needs.

Like all of our people, Mike is a self-starter. Getting him to stop is another story.

You may not know us firsthand, but you probably know our reputation. We're known for people like Mike, who don't stop until the job is done *right*.

And we back up our hardworking people with an unusually wide range of products at competitive prices, unprecedented parts support and our unique demo facilities.

Today, Martin is regarded by most professionals as the number one studio equipment dealer in the country. And while being the biggest may be great, being known as the best is even better.

Put us to work for you.

Martin's comprehensive product range includes: Harrison Systems. Otari MTR Series, Sound Workshop, AD&R/SCAMP, AKG, Ampex, Aphex, ATI, Audioarts, Auratone, Beyer, BGW, BTX, Calrec, Clear-Com, Crown/PZM, CSI, dbx, dbx/digital, Deltalab, Denon, DISKMIX, Dolby, Ecoplate, EV, Eventide, Fostex, H/H, HME, Klark Teknik, JBL, Lexicon, LinnDrum, Marshall, McIntosh, Micmix/Master Room, MXR, Neumann, Orban, Otari, Ramsa, RTS, Sennheiser, Shure, Simon Systems, Sony Pro Audio, Sony Video, Studer/Revox, Tannoy, TASCAM, Technics, 360 Systems, UREI, Ursa Major, Valley People, Visonik, White, Yamaha, and many more. BEFORE WE PUT IT WHERE IT BELONGS, WE'D LIKE TO PUT IT IN PERSPECTIVE.

This is our new corporate signature And, as you might expect, we think it looks terrific

But what it looks like isn't nearly as important as what it stands for And what our new signature stands for is a Scripps Howard that's growing in a variety of communications enterprises.

Sure, we're a broadcasting company. And a good one. But, beyond our radio and television stations, we're a cable company. A publishing company. And a newspaper company with 14 daily and 21 nondaily newspapers

We're the Scripps Howard News Service Feature Syndicates The World Almanac® And eleven other service companies. In a word, Scripps Howard is communications. In total

And, to us, it seems only right that our new corporate signature should get top billing. Just this once Just to put everything in perspective.

From now on, you'll be seeing it where it belongs. Right here. And you'll be SCRIPPS seeing Scripps Howard just about everywhere

You've found Bigfoot.

Dalsat, the leading supplier of mobile C-band units for over 6 years, introduces the SNG-25 ku-band transportable uplink.

In the city, or out in the wilds, our new ku-band transportable uplink gives you all the advantages of microwave and C-band technologies, plus the ability to cover live news nationwide.

You have the immediacy of microwave. You don't have to await F.C.C. approval. And there's no problem with congestion jamming your signal.

BROADCAST NEWS FASTER.

The Dalsat SNG-25 cuts the time you need to air a story by half. No flying film back to the station—just arrive, aim the antenna and you're ready to transmit live...at 5, 6 and 10. You can even edit footage in the truck's spacious command center, eliminating outtakes so you cut satellite time and costs.

EASIER ACCESS.

Unlike other ku-band systems, Dalsat doesn't restrict you to a single, one-channel satellite. You transmit via GTE's Spacenet satellites, and have a total of 8 (soon to be 10) channels available to you. Our larger 4.5 meter dish antenna gives you greater system gain and better transmissions

Now bring him back live.

even in adverse weather. And because Dalsat has IFB (interrupt feedback) and direct dial telephone through the satellite, your crew will never be stuck hunting for a phone.

> ECONOMICAL LONG-DISTANCE LOCAL NEWS.

As more news stations turn to Dalsat's SNG-25, a nationwide network is forming. Soon, this system will enable Dalsat users to economically gather local interest stories from all over the U.S. One such statewide network, the Florida News Network, incorporates 4 stations: WJXT, Jacksonville; WTSP, Tampa/St. Petersburg; WFTV, Orlando and WPLG, Miami. Now, one station can cover local news from distant parts of the state, using a closer affiliate's SNG-25.

For literature, write: Dalsat, Inc., 1205 Summit Ave. P.O. Box 1960, Plano, TX 75074. Or phone: (214) 578-7561.

NAB 85

AN OPEN LETTER TO THE BROADCAST INDUSTRY:

. The

Everyone starting a new venture hopes for success, but even the most optimistic among us have been astounded at the speed and size of Odyssey's growth.

It is truly one of the most amazing success stories in broadcasting. For example, Tom Shaw, our Director of Programming, had released a 35 day objective of 400,000 HH. That figure was reached in 3 hours ---and by the end of 35 days had climbed to 7,700,000 HH.

Odyssey is America's hottest national music/entertainment television network. To capitalize on this growth rate, I am inviting financial participation. Details may be secured by calling me at (305)632-1000.

Sincerely. La. Kassie amer

New KI/AH Systems

Two important BIAS systems have been improved and expanded in time for introduction at the N.A.B. Convention. Make plans now to drop by Booth 1014 and let our experts show you how to save time, money, and effort.

Now you can run every aspect of your news operation with IBM personal computers. Our system lets you link news director, producer, reporters, wire services, and archives into one system to save you time, increase productivity, reduce errors, and improve your on-air image. You can also start small and build to whatever size you need, regardless of how big your station is.

BIAS MasterControl Automation

BIAS MCA gives you automatic control of your on-air switching operation with machine controls and reconciliation with your traffic department. It lets you increase staff efficiency, save money on makegoods, and make schedule changes easier and faster. MCA is also compatible with virtually any automatable switcher on the market.

We've Been Telling You What We Do. Now Come See What We Can Do For You.

Recently, we've been showing you glimpses of our lives in—and out— of broadcast brokerage.

For instance, Executive Vice President Mary Bush worked one summer digging up archaeological treasures; today, she digs up valuable broadcast properties. Vice President Arnold Kaufman flew thirty-five missions over enemy territory; now his mission is to bring buyers and sellers together.

Then there's Robert W. Rounsaville hinself. He put his first station—WBAC-AM in Cleveland, Tennessee—on the air, single-handedly. Forty years later,

he had built a broadcasting empire. Visit our two hospitality suites at this year's NAB, and you'll discover how our thorough knowledge of broadcasting and "hands-ou" experience can get you started on building your <u>own</u> empire. See Mary Bush at the MGM Grand, Suite 1834-A (for television properties), Arnold Kaufman at the Las Vegas Hilton, Suite 2469 (for radio properties) and Robert W. Rounsaville, who will be dividing his time between the two suites. But should you miss us, give us a call. We think you'll like what we can do for you.

Moment of truth

You're on-air. Will your console, the heart of your control system, perform flawlessly?

Your air time is too valuable not to be sure. If it's an Auditronics, you can rest easy.

Unlike all the new companies which jumped headlong into the audio market during the last couple of years. Auditronics has proved itself the hard way with almost two decades of experience in building dependable, useroriented broadcast consoles. So when we say that our Auditronics 200 Series Console is the best long term investment on the market today, we can back it up with personal endorsements from literally hundreds of station managers and engineers across the country.

For a look at what your competition is saying about us and ours, write or give us a call. Our experience can save you money.

Appeals panel overturns Post-Tavoulareas decision

Action seen as having chilling effect on investigative journalism

The news media's recent, if short, string of victories in major libel cases came to an end last week in a decision of a panel of the U.S. Court of Appeals in Washington. And unless it is reversed, the decision could do for libel plaintiffs much of what Israeli General Ariel Sharon and Retired General William Westmoreland failed to accomplish in their suits against Time Inc. and CBS—create the kind of case law on which future libel plaintiffs can sue with increased chances of success.

The three-judge panel last week, in a 2-tol decision, reinstated the \$2,050,000 award a district court jury had made in July 1982 to William P. Tavoulareas, former president of Mobil Oil Corp., as the result of the suit he had filed against The Washington Post. Judge Oliver Gasch had overturned the verdict, not because he thought the article in question to be "a model of fair, unbiased, investigative journalism"-he didn't-but because he thought "there is no evidence...to show that it contained knowing lies or statements made in reckless disregard of the truth," the standard established by the Supreme Court to determine liability in cases involving public figures.

But the majority of the panel that acted on the appeal disagreed. Senior Circuit Judge George E. MacKinnon, writing for himself and Judge Antonin Scalia, said the plaintiffs had demonstrated that the article contained "falsehoods" and that they were not the product of "negligence" but of a "reckless disregard of whether they were false or not, *i.e.*, with actual malice." He also described the case as one "where the record demonstrates that a properly instructed jury found liability" and that "clear and convincing evidence supports its verdict." Judge J. Skelly Wright, the dissenter, was expressing concerns later heard from news executives when, in his statement, he said, "This is an extremely important First Amendment case," and added: "If this excessive jury verdict on these mundane, flimsy facts is upheld, the effect on freedom of expression will be incalculable. The message to the media will be unmistakable steer clear of unpleasant news stories and comments about interests like Mobil or pay the price. Thus we will have created a class of untouchables..."

The last word in the case is far from being written. Boisfeuillet Jones Jr., vice president and general counsel of the Washington Post Co., said the company was "surprised and disappointed" by the decision-and that it would ask the 10 members of the D.C. circuit to rehear the case. And some observers regard the chance that it will as good, since the court appears closely divided on libel issues. Last December, it ruled in favor of columnists Roland Evans and Robert Novak in a suit brought against them by a Marxist professor who said a column they had written had prevented him from getting an appointment at the University of Maryland. The decision that the statements in the column were protected by the First Amendment could not have been closer-6-5

Regardless of whether the full court rehears the case, an eventual appeal to the Supreme Court by one side or the other is likely. Even the panel's remand of the case to the district court could lead to another round of litigation. The district court is free to reduce the damages or even to set aside the verdict on other grounds.

Tavoulareas sued the *Post* because of an article written by Patrick Tyler and published on Nov. 30, 1979, that said he had "set up" his son, Peter, in a London shipping firm and then used his influence at Mobil to divert

Taishoff seminar. Thirty-five journalists whose "accomplishments and potential as leaders in the television field are judged to be outstanding" will gather in Chicago on June 1 for a daylong conference with "veteran broadcasters who are leaders in the field." The BROADCASTING-Taishoff Seminar, sponsored by the Society of Professional Journalists, Sigma Delta Chi, will be held at the news studios of wBBM-TV Chicago and will feature panel discussions on ethics, ratings, "harnessing" high technology and finding and developing future television news leaders.

Among the speakers at the seminar will be Ed Turner, executive vice president, CNN; Bill Slater, manager of personnel recruitment, NBC-owned stations; Terrence J. Connelly, vice president, news, Taft Broadcasting; Kevin D. Tiven, bureau chief and anchor, *The People's Business*, Pennsylvania Public Television Network; Kenny Boles, executive news producer, wBBM-TV; Gary Cummings, general manager, wBBM-TV; Paul Davis, news director, wGN-TV Chicago, and Arnold S. Reymer, president, Reymer & Gersin Associates Inc., a Smithfield, Mich., consulting firm.

The conference, now in its second year, honors the memory of the late Sol Taishoff, founder and editor of BROADCASTING and a national president of SPJ,SDX. Its purpose is to "identify and inspire future leaders of television news." Attendees will be chosen from journalists with at least five years' experience. Deadline for registration is April 25. some shipping business to him. Tavoulareas and his son claimed that the article defamed and embarrassed them. The elder Tavoulareas, who has since retired as president of Mobil but remains a director, issued a statement following last week's release of the decision declaring that he "felt from the beginning that *The Post* either knew the story was false or published it with reckless disregard for whether it was true or false...I think this decision will make for a more responsible press."

The jury, while finding that the son had not been libeled, awarded the father \$250,000 in compensatory damages and \$1,850,000 in punitive damages. In a separate case, the jury found that the elder Tavoulareas's former son-in-law, Dr. Philip Piro, an initial source of *The Post* story, libeled both, and had awarded \$5,000 to the father and \$1,000 to the son. Gasch had overturned the \$5,000 award, while permitting the other to stand. The panel's majority decision reinstated the \$5,000 award. And all three judges affirmed Gasch's decision overturning a libel verdict against special correspondent Sandy Golden, who had led *The Post* to the story and had worked with Tyler on it.

MacKinnon cited a number of factors as supporting the conclusion that the article was the product of "actual malice." He said the newspaper and Tyler had set out "to get" Tavoulareas, and had "deliberately slanted, rejected, and ignored evidence contrary to the false premise of the story," and had generally resolved all ambiguities in a manner most damaging to Tavoulareas. He also said *The Post* had relied on "sources of questionable credibility" for many of the "defamatory allegations."

And among the factors the majority cited as proof of *The Post's* "reckless disregard" of falsity was the failure to revise the story despite a memo that a copy editor, Christine Peterson, had written concerning the story when it was in preparation. Peterson had said: "It's impossible to believe that Tavoulareas alone could put together such a scheme for the sake of his son's business career, or that he would want to." The court said that the memo in itself does not demonstrate that the newspaper had acted with "actual malice." But, taken with other evidence, the court added, it does.

The majority's opinion was particularly disturbing to the media because appellate courts had been considered a bulwark against libel judgments that lower courts are more inclined to issue in favor of plaintiffs in libel cases. Michael P. McDonald, general counsel to the American Legal Foundation, a conservatively oriented public interest law firm that aids libel plaintiffs, said, "We were quite overwhelmed and pleased. The court has issued a landmark opinion, which will he of great value to future libel plaintiffs."

What troubled some in the media was, as Floyd Abrams, a prominent First Amendment attorney, put it, "the tone" of the decision—"it is notably unsympathetic to journalistic efforts." Indeed, one of the grounds on which the majority said the jury had been correct in inquiring into whether the newspaper had acted in reckless disregard of whether a statement was false or not was to inquire into the aggressiveness of its reporting. And from the testimony of Bob Woodward, a Post assistant managing editor who made his reputation as part of the investigative reporting team that uncovered much of the Watergate story, MacKinnon wrote, it was proper for the jurors to infer that The Post put pressure on reporters to develop high-profile stories

"Regardless of whether one chooses to characterize this policy as conducive to 'hard-hitting investigative journalism,' or (to borrow Chief Justice [Earl] Warren's description of *The Saturday Evening Post* in *Butts*) 'sophisticated muckraking,'' MacKinnon wrote, "it certainly is relevant to the [jury's] inquiry...."

That language was singled out for special attention by newspaper editors who had gathered in Washington last week for the annual meeting of the American Society of Newspaper Editors. The president of the society, Richard D. Smyser, of *The Oak Ridger*, in Oak Ridge, Tenn., said it "shocked" him—that he was "astounded" such language would be the basis of a court ruling.

Also concerning to some in the media was the majority's apparent narrowing of a Supreme Court decision issued in 1984 asserting that appellate courts should conduct an independent review of the facts in a libel case. "There is no solace [in MacKinnon's opinion] for those who thought that that holding offered relief in an ever-bleaker libel picture," Abrams said. The panel's majority said it read the Supreme Court decision in question-in Bose Corp.-as requiring independent review only of "the ultimate conclusion of clear and convincing proof of 'actual malice."" Wright said the effect of the majority's opinion is to make independent review "a mirage."

In Wright's view, the majority had erred in its basic approach. "We do not sit, even in reviewing a libel verdict, as some kind of journalism review seminar, offering our obsevations on contemporary journalism and journalists," he said. "Our mission is to see that the First Amendment is vigorously protected and that libel verdicts not supported by clear and convincing evidence do not stand. The majority's use of ... impermissible factors as evidence of actual malice" including a newspaper's policy of 'hard-hitting journalism'—seriously undermines that mission."

England bound. Potomac News, an independent newsgathering firm serving as Washington bureau to 70 television stations, is opening a London-based subsidiary, Transatlantic Video News Inc., to provide news from United Kingdom to client stations in the U.S. The bureau will be operational April 15.

Mike Wallace shares thoughts on libel suit

'60 Minutes' correspondent addresses foreign press group

"I don't want anything to do with a libel suit again," proclaimed Mike Wallace last week during a speech to the Foreign Press Association in New York. The CBS correspondent for 60 Minutes, who was one of the defendants in the Westmoreland vs. CBS trial, said he "wound up with great compassion and comradeship for Westmoreland" but also said he is proud of never having lost a libel suit.

Wallace said that Dan Burt, president of

the Capital Defense Fund, did a "less than competent job" in defending Westmoreland. However, he admitted CBS made itself "vulnerable" to a "PR campaign by Dan Burt" by commiting "minor infractions" of its own policy by, for example, asking the same subject the same questions twice.

But despite the lawsuit, Wallace said the zeal with which CBS will pursue future investigative pieces will not be compromised. He added later that the suit could "help us be more careful."

Many questions addressed to Wallace by the foreign press corps concerned the possib-

Wallace

lity of a takeover of CBS and its impact on the network's news programing. He said if a takeover occurred, which he seemed to doubt, and attempts were made to change the network's news policy or coverage, "there would be resignation en masse."

Responding to statements that the American press is not as diligent as it was three or four years ago, Wallace cited what he called the complacency of the American public, the manipulation of news by government and the "teflon Presidency" of Ronald Reagan, where bad news doesn't stick, and contrasted that with the "flypaper Presidency of Jimmy Carter."

Following the session, Wallace said that he will remain with CBS for at least the remaining three years of his contract. He will then be 70.

Vietnam 10 years after: back on America's TV sets

Networks marshal journalistic forces to produce documentaries. series offering 10-year perspective

On the eve of the 10th anniversary of the fall of South Vietnam to Communist forces (April 30), the three television networks are not letting viewers forget the trauma of that period of American history. They are bringing the war back to America's living rooms through a series of special reports that will explore the conflict and its legacy.

That the networks perceive the story as one that is still compelling, despite the passage of years, is evident from the time they are allotting to it and from the forces they have marshaled to tell it.

CBS, for example, began its series of reports on March 8, airing one report each week for several weeks, building up to four pieces to air the week of the 10th anniversary of the fall of Saigon (now known as Ho Chi Minh City), according to Lane Venardos, executive producer, CBS Evening News with Dan Rather. As the anniversary draws closer, CBS coverage will include efforts by the CBS Morning News, Weekend News and possibly the Sunday morning CBS news program, Face the Nation. CBS's reports are being grouped under the banner, Vietnam Remembered.

ABC's World News Tonight with Peter Jennings has also aired a few segments. That network's coverage will expand to include programs on Nightline, which will originate live from Thailand on April 25, 26 and 30, and, if all goes according to plan, will originate from Ho Chi Minh City with a special one-hour edition on April 29

NBC, as it did with a series of programs on the Soviet Union last fall, will tackle the subject in a 10-day project involving Today, NBC Nightly News with Tom Brokaw, Weekend Nightly News, News at Sunrise and ra-dio news shows. The project has been dubbed Vietnam-10 Years Later.

Both NBC and CBS will supplement coverage with one-hour documentaries. Walter Cronkite is principal correspondent and narrator of the CBS documentary, Honor, Duty and a War Called Vietnam, scheduled for broadcast on Thursday, April 25 (10 p.m.-11 p.m.). Cronkite's piece will focus on Vietnam veterans and the war's long-term impact on them. In the documentary, Congressman John McCain (R-Ariz.), a former Vietnam prisoner of war, will be seen with Cronkite on location in Vietnam.

Saturday, April 27, NBC will air a White Paper with the working title, "Vietnam in Retrospect." Marvin Kalb, NBC chief diplomatic correspondent, is anchor. The NBC piece will focus on emerging perspectives offered by scholars and journalists as to why the war was lost and how it might have been won

As for segments to air within regularly scheduled programs, the networks will try to outdo one another on such subjects as Amerasian children; U.S. policy and its long-term impact on Southeast Asia; American soldiers still listed as missing in action; U.S. military policy and ethics; Vietnam's stagnant economy; war protesters, and how veterans of both sides are faring.

Most of the correspondents working on the Vietnam pieces covered the war. CBS's Dan Rather, Charles Kuralt, Morely Safer, Ed Bradley and Cronkite all reported from Vietnam, and are all contributing to the current project. NBC correspondents Garrick Utley, John Hart and George Lewis also covered the war. Today's Bryant Gumbel will do live remotes from Vietnam but did not cover the war. ABC's Ted Koppel and Steve Bell, who will be filing reports for Good Morning America and World News This Morning. and Richard Threlkeld and Jim Laurie, reporting for World News Tonight, all covered the war.

What's the point of all this extensive coverage? According to Venardos of CBS, his network's effort is designed to give the viewer a sense of what was going on at the time as it relates to the situation today. "The real story is what this country and people who fought went through and are going through and what impact the war had on us as a nation." Journalistically, he contended, some of the pieces produced for the effort "are just plain fascinating." He cited a piece by Cronkite (while the correspondent was working on the documentary) that appeared on the CBS Evening News. It includes videotape of 10,000 workers constructing a stretch of road by hand. Cronkite explained

HOW DO YOU STOP A COMET?

@ 1984, MEL

You don't... so the sky's the limit! No other media event during late 1985 into 1986 will have the impact of Halley's Comet. Televised from satellites to over 3 billion viewers for the first time in history. The world will be watching the skies! The promotional value and merchandising opportunities are as astonishing as the comet. 26 half-hour live action adventure episodes based on the forthcoming motion picture. A unique biend of art and science in this fictitious portrayal, with high impact entertainment and a challenging message for a New World that will outlive the duration of the comet's appearance.

Stations picking up the Halleys[™] also pick up a dynamic promotion package for local market use, and national coverage in People Magazine!

Media Planners and Buyers get great positioning and a buy that wins more than "universal" approval.

The Halleys ... Ready for broadcast — 1st quarter '86 — exactly the time that you're ready to watch the world watching Halley's Comet ... and you.

For more Info, and a demo/sales kit: Ron Knight in San Francisco (415) 982-8088 Image One, 485A Greenwich, San Francisco, CA 94133 Telex #910-482-9003

the road will take months to construct although one bulldozer could do the same job in a week.

Both ABC and NBC have made arrangements to originate live from Vietnam at some point during coverage. Both received permission from the North Vietnamese government after months of negotiating. NBC has contracted with a British telecommunications firm for uplink facilities while ABC has made an agreement with the Soviet Union's Intersputnik, which has contracted to build an earth station system for the Vietnamese.

CBS did not make a similar arrangement of its own. Venardos contends the effort wasn't worth it because the end product would not be dramatically improved. He suggested that taking advantage of the technology to originate live simply because it is available is a wasted effort that might produce a "mild gee whiz" from viewers, and little more. NBC News Executive Vice President Tom Pettit disagreed. He argued that live programing adds a dimension that viewers have come to expect-particularly from a program such as Today. He said live interviews with Communist Vietnamese officials, for example, will display to viewers a human side of people that could not be exposed as the war was ongoing, when most of what appeared on the television screen was death and destruction.

The story is one that demands attention, said Pettit, because a good part of the record documenting what happened in Vietnam, and why, is only emerging now. Therefore, he said, the 10th anniversary of the American withdrawal represents a "very important pause in the historical perspective on the Vietnam war."

"It's not just an anniversary," said Bob Murphy, vice president of television news coverage for ABC News. "Vietnam was a period of great interest and commitment of resources based on certain assumptions and policies." He said it was appropriate, with 10 years of hindsight, to "take a look to determine whether those assumptions and policies were valid and, if not," to explain why not and perhaps explore policies that might have been valid.

Each of the networks has encountered censorship while pursuing the Vietnam story—access to Vietnamese places and things has been strictly controlled by the government. "You submit a list," said Murphy, noting that some of the requests are granted and some are not. Has the policy significantly hampered the ability of the networks to pursue the stories they seek? "It's not significant, but I wouldn't characterize it as minor," said Murphy. "There were some things we had wanted to do but couldn't" because access was restricted, he said.

Newspaper survey: TV most trusted

ASNE-commissioned study confirms what Roper has been saying about TV advantages but its deeper investigation of public attitudes finds all media suffer equally on credibility

Three-fourths of all adults have some problem with the credibility of the media, and one-fifth of all adults "deeply distrust" the news media, according to a national study, "Newspaper Credibility: Building Reader Trust," commissioned by the American Society of Newspaper Editors.

But although most of the information in the study, which was released at ASNE's convention in Washington last week, was sobering for all media, there was a silver lining for television: The study said that peo-

Each of these standard mobile units brings with it the combination of the nation's leading mobile system designer, broadcast-quality equipment and a brilliantly-engineered Wolf Coach vehicle.

The AFA2 is a 19' 2-camera ENG/EFP unit that is equipped with your choice of broadcast-quality color cameras, a Grass Valley 100-N video switcher, two Sony BVU-50 portable 3/4" VCRs and a Yamaha audio console.

The AF.B2 is a 23' 2- to 4-camera EFP unit that features your choice of broadcast-quality color cameras, a Grass Valley 1600-1L production switcher, a Yamaha 8 input audio console and two Sony BVU-800 series VCRs.

Both units can be expanded to include 1" VTRs, character generators, editing facilities and more.

The low cost of these standard mobile video systems will surprise you. The high quality is exactly what leading broadcasters and production and post-production companies have come to expect as a matter of course from AFA. Call us for details: in the East at (201) 767-1000; in the West (213) 466-5066.

A.F. ASSOCIATES INC.

ADVANCED SYSTEMS AND PRODUCTS FOR THE VIDEO INDUSTRY AFA SYSTEMS DIVISION 100 STONEHURST COURT NORTHVALE NJ 07647 1438 NORTH GOWER STREET HOLLYWOOD CA 90028

> Broadcasting Apr 15 1985 140

ple are more likely to rely on television news reports over those carried in newspapers, magazines or on radio. (Survey respondents were asked: "If you got conflicting or different reports for the same news story from radio, television, magazines and newspapers, which of the four versions would you be most inclined to believe?" According to the study, about half said television, about 25% said newspapers, 14% chose magazines, and 9% said radio.)

Moreover, 64% of those surveyed said they preferred get the news on television or radio to that in newspapers or magazines; 50% said television was their preferred source for local news (36% said newspapers; 12% radio; 2% magazines); 57% said TV was their preferred source for state news (33% chose newspapers; 8% radio; 2% magazines); and 72% identified TV as their preferred source for national and international news (18% said newspapers; 5% radio, and 5% magazines). [Roper Organization surveys commissioned by the Television Information Office have consistently reported that most people get most of their news from TV, and that they regard it as the most believable source (BROADCASTING, April 11, 1983).]

The ASNE study, however, contended that television and newspapers were generally felt to lack credibility in about the same proportions. According to the study, 25% of the respondents gave newspapers a "low" credibility rating, and 27% gave the same rating for television; 43% gave newspapers a "medium" credibility rating, the same percentage that gave that rating to television, and 32% gave newspapers a "high" credibility rating, while 30% gave television the same.

One of the study's more disturbing findings: 42% of the respondents thought "sometimes there's too much freedom of the press." (Fifty-eight percent said it was important to have a free press even when the press acts irresponsibly.) According to the study, moreover, 39% of those surveyed said the media abuse their constitutional guarantee of a free press, while the remaining 61% said the media are usually careful to be responsible.

Members of the clergy, doctors and police outrated all the media on honesty and ethical grounds. TV news anchors, however, rated above TV news reporters, newspaper editors, newspaper reporters and ad executives in the public's perception of those characteristics. According to the study, 40% of the respondents gave TV news anchors high marks for honesty and ethical standards. (Fifty-two percent said those qualities in news anchors were average, while the remaining 8% said those were low.) For the same characteristics, 28% gave TV reporters high marks (61% said average), but only 18% gave newspaper reporters high marks (with 64% contending the honesty and ethical standards of newspaper reporters were average). On the same yardstick, 33% said advertising executives rated low marks. But ad executives received a consolation prize: They beat out used-car salesmen, who received low marks from 64%.

Daily newspapers and television news ran nose-to-nose on trustworthiness. According to the study, 51% of the respondents said the daily newspapers they were most familiar with can be trusted (36% were neutral on that judgment, while 13% said newspapers couldn't be trusted). At the same time, 48% of the respondents said TV news can be trusted (38% were neutral and 14% said TV news couldn't be trusted). Along similar lines, 65% of the respondents gave TV news a positive rating for reliability (29% gave TV news a neutral rating here, while another 6% gave it a negative one); 63% of the respondents gave daily newspapers a positive rating for reliability (30% gave a neutral rating, and 7% gave a negative one). On quality of reporting, 72% of those surveyed gave TV news a positive rating, while only 59% gave the same rating to daily newspapers.

The study, conducted by MORI Research, also said that "liberals" were more likely than "moderates" or "conservatives" to give low credibility scores to newspapers, while "conservatives" were slightly more likely than the other two groups to give low credibility scores to television. It also said people aged 18-24 were less likely than their elders to give high credibility scores to newspapers. Respondents in the 18-24 age group also were more likely than others to give high credibility ratings to television.

On other issues, the study said 78% of the respondents believed that news reporters are concerned merely about getting a good story, and they don't worry much about hurting people; 63% said the press often takes advantage of victims of circumstances who are ordinary people; 54% said the press looks out for ordinary people, but the other 46% said the press looks out mainly for rich and powerful people; 71% said the media usually try to correct their mistakes; 60% said the media should never report a poll that says who will win an election while there are still four hours left to vote; 39% said the media should never run a story from an area where American troops are fighting if the President has declared the area off limits to the press (41% said the same sort of story should sometimes be reported, while 20% said it should always be reported); 56% said "investigative reporting" was very important (38% said it was somewhat important, while 6% said it was not important); 56%, however, disapproved of reporters not identifying themselves as reporters, 57% disapproved of reporters posing as something other than what they are, and 58% disapproved of running stories that quote sources who cannot be identified; 68% said they thought reporters frequently overdramatized the news; 63% said they believed the news media put too much emphasis on what's wrong with America and not enough on what's right.

On other topics, 71% of the respondents said they believed a person's right to a fair trial is more important than the public's right to be informed; 71% also agreed the media

often make people accused of crimes look guilty before they are tried in court: 76%, however, said the press helps keep public officials honest; 64% said that although there is some bias in the news media, the average person has enough sources of news to be able to sort out the facts, and 50% said it is up to individuals to sort out biases in the media and find the truth for themselves. \Box

NBC newsmen win journalism honor

Gumbel, Brokaw, Kalb, Utley share Georgetown University prize for diplomatic reporting; Gumbel chats with reporters

If it had been the first week in April 1981 instead of the first week in April 1985, Bryant Gumbel would be opening the baseball season for NBC Sports. As it was, Gumbel was in Washington to receive special recognition for his role in NBC News's coverage of the state of U.S.-Soviet relations-a week-long series of reports under the heading, The New Cold War-that won the Edward Weintal prize for diplomatic reporting, an award sponsored by Georgetown University's Institute for the Study of Diplomacy and School of Foreign Service. The ceremony at Georgetown University's Intercultural Center indicated that was not an inadequate base on which to build a career in diplomatic reporting. Gumbel shared the Weintal prize with Tom Brokaw, NBC Nightly News anchor; diplomatic correspondent Marvin Kalb, who anchored a one-hour special on The Real Star Wars: Defense in Space, which was the centerpiece for the series of reports during the week, and Garrick Utley and John Hart, who did a number of taped reports from the Soviet Union. And the prize was accepted for the division by NBC News President Lawrence Grossman, who said the correspondents had agreed to donate the \$3,700 award to the Catholic Relief Fund for Ethiopia. But Gumbel, according to Hugh Sidey, a member of the prize committee who announced the awards, was "singled out for a certificate to represent that team.'

Gumbel seemed to regard the event and his participation in it as validation of the journalistic credentials of the *Today* show. In his remarks, he said the show has been regarded as "too hard to be entertainment and too soft to be news" and that it has been greeted "without acclaim and with some derision." But he scored some impressive journalistic beats on the program he has described as "news/entertainment/information." In his first broadcast, he obtained a joint interview with Russia's Deputy Foreign Minister Georgie Kornienko and the new military chief of staff, Marshal Sergei F. Akhromeyev. (He would have preferred them individually, but, he recalled telling the Soviet official with whom he was dealing and who said it was a joint interview or none, he would be "a fool" to deny the American public the opportunity to hear their views.)

It was during that interview that Gumbel, acting on reports circulating in Washington regarding Reagan's willingness to meet with Foreign Minister Andrei Gromyko, asked whether the foreign minister would be willing to meet with the President when Gromyko visited the U.S. in connection with the opening of the United Nations in New York. To everyone's surprise, Kornienko answered in the affirmative, and the meeting—the first in which Reagan talked to a high-level Soviet official—eventually took place.

Since the week in Moscow, there has been the week in Rome, during Holy Week. Coming up next for the NBC News team will be 10 days of reporting on the 10th anniversary of the fall of Saigon. Gumbel will do a live insert for *Today* from what is now called Ho Chi Minh city on Friday, April 26, then will anchor the show from there the next week.

"Most of us don't know what to $ex_1 :ct$," Gumbel said of the first heavy influx of U.S. and other western journalists into Vietnam in 10 years. But he seems to be looking forward to it. "There's an opportunity to do some good—and to do ourselves proud... to make it possible for people to understand better Vietnam today, and what drove people to do what they did 10 years ago."

SATELLITE & TELECOMMUNICATIONS INDUSTRIES

Going Hollywood

The New York-based Museum of Broadcasting, in an aggressive attempt to increase its visibility among members of Hollywood's creative community, will co-sponsor a major "television festival" May 10-26 at Universal Studios in Los Angeles.

Robert M. Batscha, director of the non-profit institution, told BROADCASTING that the Academy of Television Arts and Sciences has agreed to co-sponsor an annual May event highlighting television and radio programs from the museum's 20,000-item collection. The museum is also continuing to look into the possibility of establishing a permanent branch in Los Angeles, he disclosed, although that is not likely to happen within the next several years. The Museum of Broadcasting presented a small exhibition in Los Angeles last year as part of an ongoing effort to make the collection available to a wider audience. Exhibitions will be held later this year in Houston and Minneapolis

Batscha emphasized there is an urgent need to make individuals and companies

In the marketplace

Fox Lorber Associates has launched sales of Beatles' The Magical Mystery Tour for domestic distribution. Broadcast window will be from Nov. 28 to Dec. 15, which includes anniversary of John Lennon's death. Show is being sold on barter basis, with five of 12 minutes being retained by distributor. All American Television Media Sales will handle barter advertising. Clearance of 80% is planned, said Fox/Lorber partner David Fox, and, based on projected five or six national rating, rate card opens at \$20,000 per 30-second spot. Blair Entertainment has sold Divorce Court in 18 more markets for total coverage of 73%. Latest stations to sign include KTVU(TV) San Francisco, WDVM-TV Washington, WBAL-TV Baltimore and KOVRITV) Sacramento, Calif. In New York and Chicago, Divorce Court premiered April 1 on WABC-TV and independent WFLD-TV, respectively. On WABC-TV, where half-hour show airs at 4:30, station averaged 6.6/18 during its first week on air, increasing rating of time period by 54% and share by 64% over comparable week year ago in Nielsen overnight survey, according to WABC-TV researchers. Show is sold on straight cash basis with six minutes of advertising. Blair Entertainment general sales manager, Tony Brown, said company will begin withholding extra 30-second spot in fall for national barter when he expects show will reach 85% coverage. Brown said he hopes to open barter at \$20,000 per spot. At present, Brown said, Divorce Court costs about \$100,000 per episode to produce. I New York-based Worldvision Enterprises reports that it has cleared 77 markets representing 70% coverage for its 90-minute weekend morning block of children's programing titled, The Funtastic World of Hanna Barbera. Twenty-seven of top 30 markets have been cleared, Worldvision said, including wtic-ty Hartford, Conn.; KPHO-ty Pheonix; Kusi-ty San Diego; Will(ty) Cincinnati; wvru-rv Milwaukee, and KzKC-rv Kansas City, Mo. Worldvision has also sold The Jetsons in 74 markets representing 65% coverage, including 29 of top 30. Only market outstanding is New York. Additions include wxon(TV) Detroit and wcix-tv Miami. Worldvision's new first-run drama series, Return to Eden, is now sold in 14 markets, including WTAF-TV Philadelphia and WDCA-TV Washington. Metromedia Producers Corp. has sold Vegas in 16 additional markets, bringing total number carrying series to 59. MPC is selling 68 episodes on straight cash basis with option of four or eight runs per episode, said Carl Menk, director of sales, MPC. Vegas has been cleared on wOR-TV New York, KTTV(TV) Los Angeles, WTAF-TV Philadelphia, KXTX-TV Dallas and wFBN(TV) Jollet, III. (Chicago), among others. ■ LBS Communications has picked up U.S. distribution rights for new first-run episodes of Witt-Thomas Productions' It's a Living from Golden West Television. Golden West launched former ABC series into first-run syndication after limited syndication run last summer. To date, according to LBS Chairman Henry Siegel, 65% of country has been cleared for 22 new first-run episodes that will premiere fall of 1985. LBS put up \$7-million guarantee for rights, Siegel said, although Golden West will retain profit participation. LBS will continue to handle advertising sales for straight barter show; LBS will retain six 30-second spots per show; stations get seven. ■ Television Program Enterprises, subsidiary of TeleRep, premiered The Start of Something Big this past weekend (April 13-14) on 167 stations representing 91% coverage. One-hour weekly series is distributed on straight barter basis with six minutes withheld for national advertisers and six minutes given to stations. TPE is offering 26 weeks of originals and 26 weeks of repeats. Lineup of stations includes wNEVTV Boston, WTVJ-TV Miami, wcco-TV Minneapolis, wsb-tvAtlanta, KING-tv Seattle and wtvT-tv Tampa, Fla. CBS affiliate wtvJ-tv Miami Is pre-empting The Jeffersons and The Lucie Arnaz Show on Tuesday at 8 p.m. to carry The Start of Something Big. Philbin S. Flanagan, vice president and general manager of TPE, said TPE is estimating 10 national rating for series with 30-second spots opening at \$45,000. National advertisers include Lever Bros., Colgate, Procter & Gamble and Bristol-Myers. Flanagan said national spots are already sold out for second quarter. Seeing Stars is title of new, weekly, first-run syndicated series showcasing movie stars and their movies, premiering last weekend (April 13-14) on stations serving 70% of U.S. television households. Stations clearing half-hour program include wcbs-tv New York, KNBC(TV) Los Angeles, KYW-TV Philadelphia, KRON-TV San Francisco, WLVI-TV Boston, WXON-TV Detroit and WJLA-TV Washington. Previously announced show is initial broadcast syndication entry from Telecom, national television programing division of Foote, Cone & Belding, which is producing Seeing Stars in association with Richard Edgar Productions. Orbis Communications is distributor. Series is hosted by Jim Finnerty, with Dick Crew as executive producer and Joe Tobin as producer. Columbia Pictures Television and The Hollywood Reporter, Hollywood-based trade newspaper, have agreed to produce daily, first-run syndicated television series scheduled for distribution "in the latter part of 1985." Untitled program is intended for late afternoon or prime access and is to be produced by Earl Greenburg Productions in association with LBS Communications, The Hollywood Reporter and CPT.

involved in the entertainment industry aware of the need to preserve broadcast materials, noting that many programs are deteriorating in private collections or are simply being discarded.

The Los Angeles exhibition will include 18 newly discovered episodes of *The Honeymooners*, four of which were believed to have been lost forever before producer Jackie Gleason retrieved them from his own archives. Gleason was prompted to resurrect the programs after participating in a Museum of Broadcasting seminar in New York. Subsequently, Viacom Productions and the Showtime cable program service agreed to syndicate the new material.

The festival will include six other themebased screenings, plus five seminars. The seminars will be led by comedian Milton Berle; the creative and news teams of KTLA(TV) Los Angeles; writer-producer Larry Gelbart; the writing team of William Link and Richard Levinson, and George Schaefer, Eva Marie Saint, Richard Thomas, Norman Rosemont and others associated with The Hallmark Hall of Fame.

"The situation is improving," Batscha said in response to a question about the state of program preservation, "mostly because of three factors: Producers are recognizing the long-term syndication value of their product; they are using better storage techniques, and banks are more willing to lend money based on these inventories." He said the museum's acquisition policy is intentionally kept vague in order to meet variable criteria that involve historical value, popularity, quality and the accumulated work of an individual or company.

While a Hollywood branch remains a high priority, top priority for the museum, said Batscha, is finding larger quarters for the New York museum, now at 1 East 53rd Street in Manhattan. "We have 12,000 square feet now, when what we really need is a building with 60,000 square feet," he contended. To acquire larger quarters, Batscha estimated the museum would need to increase its annual budget from the current \$1.5 million to between \$3.5 and \$4 million. Other planned projects include expansion of the radio collection and development of a history of the business of broadcasting, drawing on the papers of BROADCASTING magazine founder Sol Taishoff.

Mixed media

Simon & Schuster, the New York-based publishing subsidiary of Gulf + Western Industries, is going ahead with development of a magazine version of *Entertainment Tonight*, the first-run syndicated television program produced by another Gulf + Western subsidiary, Paramount Television Domestic Syndication.

Entertainment Tonight will be the first magazine published by Simon & Schuster, and is described by Harriet Fier, editor-inchief of the company's magazine development department, as "sexy...upbeat, newsy [and] on top of the whole business of show business."

Fier told BROADCASTING a launch date has not been announced but that weekly editions could be on the stands by mid-1986 "and maybe a one-shot [issue] before then." *Entertainment Tonight* is being designed as an advertiser-supported weekly publication patterned closely after its television namesake, which features celebrity profiles, interviews, reviews and entertainment industry news. "We see a lot of opportunity for cross-advertising and cross-promotion," she said. Editorial and advertising are being coordinated in New York, although a Los Angeles office may be added at a later date.

New for Newsfeed

Westinghouse Broadcasting & Cable's The Newsfeed Network has expanded its operations in two cities, setting up a teleport in Washington and revamping its Philadelphia headquarters. The Washington teleport will assist the newsgathering efforts of affiliate stations and other newsgathering organizations with uplink and downlink services, said Richard Sabreen, president of Newsfeed. He said that the new facility in Philadephia, where the network is based, includes a technical operations center and working newsroom at the studios of Group W's KYW-TV. Newsfeed has also created the position of managing editor to oversee daily newsgathering and distribution. David Foreman has been named to the new spot, moving from KSTP-TV Minneapolis where he served as producer. Foreman will report to the Newsfeed news director, Terry O'Reilly. The network has also added a full-time Washington correspondent, Bill O'Neil, former anchor/reporter at KXLY-TV Spokane, Wash.

playoffs from the best of five to a best-ofseven series for the 1985 season. At this point, the agreement applies to the 1985 season only. Whether the best-of-seven playoff series is continued will be decided in future negotiations. Under the current baseball rights agreement with ABC and NBC, which runs through 1989, baseball receives \$9 million more each season with the sevengame series.

Group W Satellite Communications said it has been selected by Major League Baseball to provide downlink and uplink facilities for distribution of MLB's new baseball news and game highlights service, *Baseball Newsatellite*. The service made its debut April 8, opening day of the 1985 baseball season. It features three daily feeds, seven days a week, of baseball news, information and game highlights. The feeds, which are transmitted via Telstar 301, air at 4 p.m., 10:15 p.m. and 1:15 a.m. NYT.

Making deals

Former $M^*A^*S^*H$ producer, Burt Metcalfe, has entered a long-term agreement with Warner Bros. Television "to create, develop and produce all forms of television programing," the Burbank, Calif.-based studio has announced. Metcalfe was casting director for the pilot episode of the long-running 20th Century Fox series in 1970, becoming its associate producer in 1971, co-producer in 1975, and producer in 1976.

Coming out swinging

Don King Sports and LBS Sports have joined forces to present a three-hour boxing event on April 29 from Buffalo, N.Y. LBS will handle the networking of the card, featuring the North American Boxing Federation heavyweight champion, James Broad, vs. Tim Witherspoon; lightweight Hector (Macho) Camacho vs. Mexican champion Roque Montoya, and the World Boxing Association heavyweight champion, Greg Page, vs. Tony Tubbs. The event will also feature a broadcast of Larry Holmes's successful March 15 World Boxing Council heavyweight title defense against David Bay.

A second event has been scheduled for June 6 at an unannounced site featuring Camacho vs. Jose Luiz Ramirez, WBC lightweight champion; Davey Hilton, Canadian welterweight champion, vs. an unnamed contender, and another fight yet to be announced.

Close to 100 stations have cleared the two boxing lineups, which are being jointly promoted. WOR-TV New York is the anchor for the first card which will air at 8-11 p.m. NYT. The two shows are being sold on a barter basis, with stations receiving 26, 30second spots. King and LBS will retain an undisclosed number of spots.

War production

PBL Productions PTY., Sydney, and D. L. Taffner/Australia PTY. Ltd., Sydney, have agreed to develop and co-produce a four-hour, dramatic mini-series, *War Brides*. Production is scheduled to start in Australia in early 1986. Based on the book by Lois Battle, the series centers on the lives of three Australian women who marry American servicemen during World War II and face harsh adjustment to life in the United States.

Via satellite. The National Association of Broadcasters is launching a new monthly video magazine, *Telejournal*, that will be broadcast via satellite to its TV members beginning next Friday, April 19. The half-hour program will air at noon the third Friday of each month. Wold Communications is donating its satellite time to carry the program on Telestar 301. *Telejournal*, explained NAB's Dick Hollands, senior vice president for television, will have a varied fare depending on what "is the important news of the industry."

This week, the broadcast will include a presentation on the new technologies by NABs John Abel, senior vice president for research and planning. Also scheduled is an interview with FCC Chairman Mark Fowler by NAB President Eddie Fritts at the NAB's annual convention in Las Vegas. And the association plans to deliver a new public service announcement, Operation Prom/Graduation, which stations can use during NAB's latest campaign against drunk driving. "We're planning to alert them to what is happening as well as disseminate information," Hollands said. He noted that the program would prove particularly useful in transmitting technical information. For example, NAB could conduct an HDTV demonstration on the program. That's information, Hollands pointed out, that can't be as easily transmitted in NAB's weekly newsletter, *Highlights*.

Contract talks

Calm may have characterized the first stage of contract negotiations between the American Broadcasting Companies and 3,400 staff members represented by the National Assocation of Broadcast Employes and Technicians, but union officials are not exactly untroubled. After the first three-anda-half weeks of talks in San Diego ended April 3, several from NABET described the proposed ABC contract in less than glowing terms.

"We're miles apart," noted Edward Lynch, NABET president, just days before members of the union negotiating team returned to locals in New York, Los Angeles, Chicago, Washington and San Francisco to discuss company proposals with their membership and to take a strike authorization vote by May 1.

Talks are set to resume in Washington on May 7 in the offices of the Federal Mediation and Conciliation Services. FMCS officials, however, will not be involved.

Several union officials believed the negotiations were "making progress," but made note of a variety of issues on which debate remains, such as control over certain equipment, live coverage jurisdictions and temporary daily hiring in the field and studio.

Also under contest is the length of the

contract, with the company seeking its fourth straight four-year contract and NA-BET pushing for the leverage of an Olympic year with a two-year contract ending in 1988. The company's wage offer, just under 5%, appears to be a secondary, but still important, concern.

Comband on the run

General Electric is taking heat from the National Association of Broadcasters and Association of Maximum Service Telecasters over the Comband bandwidth compression technology it is trying to market to cable system operators. While praising the engineering achievement of the system, which uses GE-developed time and frequency compression techniques to join two video channels in a single 6 mhz channel, NAB and AMST argue Comband may degrade a broadcast signal's video and multichannel audio, as well as limit teletext transmission.

The comments were made in early April to the FCC, which is considering a GE petition for cable systems to carry broadcast signals with Comband technology.

"Material degradation of the broadcast signal is inherent in the compression techniques GE employs with Comband," NAB noted in its filing. In particular, Comband's reduced video frequency response and color

Channel 36 The NBC Affiliate in Charlotte, North Carolina

Senior Debt Financing Provided by

Commercial Banking Division Irving Trust Company One Wall Street New York, NY 10015 information were cited as potential limits to picture quality.

Comband also is designed to strip out teletext signals in the vertical blanking interval, a feature that NAB and AMST argued was not in keeping with commission positions on stripping of the service.

Both organizations were also sharply critical of what they called a lack of "meaningful test data" supporting GE's request to the FCC to authorize Comband.

NAB suggested that more tests be required of the system by the FCC before authorization is granted, especially for retransmission of must-carry signals.

Representatives of GE, who have previously characterized Comband as producing a TV picture that is "visually equivalent to NTSC broadcasts" and "transparent" to broadcast multichannel TV sound, have refused to respond to the criticisms, other than to note the company would file a pointby-point rebuttal with the FCC by April 22.

Stereo on the Potomac

The country's capital has its first multichannel sound television station. Taft Broadcasting's WDCA-TV Washington, in the ninth market, began continuous stereo broadcasts on April 1, after a month of on-off experimentation with the new service. And the station is not the only Taft TV outlet moving into the MTS market (see chart on opposite page).

According to John Owen, Taft vice president of TV engineering, the Cincinnatibased group owner is contemplating making all of its seven TV stations MTS-capable. The next to go will most likely be wCiX(TV) Miami, Owen told BROADCASTING, with plans to install stereo gear by May 1, followed by second-language capability in September.

The group's other stations, in Birmingham, Ala., Kansas City, Mo.; Cincinnati; Columbus, Ohio, and Philadelphia, are expected to have stereo capability in several months'. The stations, which he explained have all had extensively rebuilt plants in the past several years, were redesigned with stereo in mind. "They are already 80% on the way to being MTS-ready and are in the order mode," Owens added.

Once MTS-capable, he said, the decision will be made on a market-by-market basis whether to build the service gradually as true stereo programs become available or whether to begin immediately with a full schedule mixing synthesized and true stereo material.

WDCA-TV is currently broadcasting one stereo music program that it produces inhouse for national distribution through the Black Entertainment Television service. But because true stereo programing so far is limited to a few hours a week, if that, Chief Engineer Jerry Dickson is using an Orban stereo synthesizer to complete the schedule with pseudo-stereo material.

The station is also using an Orban stereo generator, in conjunction with a Harris transmitter, to transmit the MTS service.

In fact, nobody can Xerox. Or have something Xeroxed. You can copy or have something copied, but you just can't Xerox.

That's because the Xerox trademark is not a verb. It's a proper adjective that should always be followed by a word or phrase describing one of our products. As in Xerox copiers, Xerox electronic typewriters, Xerox laser printers, etc.

We're proud of our trademark. It's valuable to us. And to you. It's how you can be sure that when you ask for a Xerox product, you'll get a Xerox product. Not something else.

So, if you would, make a copy of this advertisement and place it near your Xerox copier. Then everyone who copies will know that no one can Xerox.

Not even Xerox.

The week's worth of news and comment about radio

All-news birthday

"It's the longest running all-news radio station in the country," said John Waugaman, vice president and general manager of Group W's WINS(AM) New York, which is marking its 20th anniversary in the all-news format this week.

On April 19, 1965, when contemporary rock, especially music from England, was rising in popularity across the country, Westinghouse Broadcasting made what was considered by many in the radio industry at the time to be a bold programing move. It switched its top 40 wins(AM) New York to allnews, then a virtually unused format. "The whole idea was to differentiate ourselves from the other AM stations in the market,' said Group W Radio President Dick Harris, who, as general manager of companyowned WBZ(AM) Boston, was part of the Westinghouse Broadcasting planning task force that quietly assembled the talent for the new format in a New York City hotel room. On-air personalities who have been with the

際い

station since its rock 'n' roll days include: Stan Z. Burns, Brad Phillips, Brad Sherman and Stan Brooks, who was news director at the time of the format change.

Although wins was not profitable in the early going, Westinghouse stayed with the format. "It showed a commitment on the part of Westinghouse to a sound programing idea: A radio station that delivers all-news on a continuing basis, could attract a large audience," said Harris. Over the past several years, the station has consistently ranked among the top stations in the New York market, according to 12-plus Arbitron metro share data. And Westinghouse's commitment to WINS(AM) and its tight, all-news sound is further demonstrated by the construction of new studios, which are expected to be completed by year's end.

WINS(AM) is celebrating its anniversary with a series of 90-second vignettes that look back at major events it has covered, such as the blackout of November 1965 and the New York Mets World Series victory in 1969.

Some of the CBS Radio Stations News Service Reports that mean listeners and sponsors for you.

For details on all the features call:

Shortly after WINS(AM) went all-news in 1965, Group W's KYW(AM) Philadelphia followed suit. In 1967, the group's KFWB(AM) Los Angeles switched from top 40 to allnews.

Birch signing

Birch Radio is continuing to make inroads into Arbitron Rating's dominant standing among ad agencies. Last week, Kenyon & Eckhardt signed a three-year contract with the audience measurement company with, according to Birch officials, the intention of using Birch data as the primary source for buying radio. "I have always believed that telephone methodology represents a superior method for measuring radio," said Alan Goldin, senior vice president, media director for Kenyon & Eckhardt. (Arbitron uses a one-week diary system).

Birch Radio President Dick Weinstein noted that several other major agencies, including Ted Bates; N W Ayer; D'Arcy Mac-Manus Masius, and Bozell & Jacobs, are using Birch in conjunction with Arbitron. The company currently measures radio listening in 85 markets on a monthly basis and approximately 50 markets nonmonthy.

"Birch Radio represents the first serious alternative to the diary-based Arbitron service since 1978 when Audits and Surveys and Burke attempted to provide a telephone-based system," added Ira Sussman, media research director of Kenyon & Eckhardt.

Monumental event

It is being called the "largest, live, satellite radio broadcast event in history." The pro-gram is Culver City, Calif.-based Westwood One's three-hour Radio USA For Africa special, which, according to company president Norm Pattiz, will air on 500 stations in the U.S. including three in New York: WHTZ(FM) (licensed to Newark, N.J.), WNEW(FM) and WKTU(FM) on April 21 ("Riding Gain," March 18). Additionally, Radio USA For Africa is slated to be picked up by 15 stations in Canada, Radio New Zealand, and independent radio outlets in the United Kingdom, Australia and the Far East.

The show, which is being produced in conjunction with CBS Records and talent manager Ken Kragan, features a number of artists, many of whom recorded the USA (United Support of Artists) For Africa hit sin-gle, "We Are The World," at the A&M Recording Studios in Los Angeles on Jan. 28, which was aired in at least 25 countries at 10:50 a.m. NYT on April 5 (BROADCASTING, April 8). Scheduled to appear as in-studio guests on Radio USA for Africa are Rod Stewart, Pat Benatar, Graham Nash, Supertramp, The Beach Boys, Ray Parker Jr., Herb Alpert, Smokey Robinson, Lindsey Bucking-

ham and Quincy Jones. An additional 14 performers will be featured on tape.

Also participating in the broadcast will be radio personalities Dick Clark, Scott Muni, Casey Kasem, Scott Shannon, John Leader, Dr. Demento, Jim Ladd, Dan Ingram, Mary Turner, Walt Love and Joel Denver.

All revenue from the program, said Pattiz, will be donated to the USA For Africa foundation to fight world hunger. Major advertisers include: Pepsi-Cola, Denny's Restaurants, Velamints and Oxy skin care products.

Pattiz also noted that Westwood and Home Box Office (HBO) have worked out a cross promotion deal whereby Westwood will promote HBO's upcoming cable special premiering May 1, USA for Africa: The Story of We Are the World during its three-hour broadcast while HBO runs spots promoting the Radio USA For Africa show. The Westwood program will be delivered to stations by both Satcom I-R and Westar IV the latter through a donation of satellite time by National Public Radio.

Changing formats

Six co-owned California adult contemporary and oldies stations have adopted a new format that lets listeners choose the new releases to be added to their playlists, regardless of musical genre. On April 1, KLOK(AM) San Jose, KLOK-FM San Francisco, KWIZ-AM-FM Santa Ana and KFIG-AM-FM Fresno introduced "You Pick The Hits," a programing concept in which listeners are asked to vote "yes" or "no" on whether a particular new release should join the line-up. The format includes rock, adult contemporary, country and rhythm-and-blues songs.

The selections "become hits on KLOK long before they show up on the record charts, and that means KLOK listeners not only play a big part in picking the hits, but beat the charts," said Bill Weaver, KLOK-AM-FM general manager and program director.

A spokeswoman for Davis-Fowler-Weaver Broadcasting, which owns the six stations, said operators are available at each station to tally responses whenever a new record debuts, with a running total of yes and no votes the criterion for keeping it on the air.

Meanwhile, RKO-owned KFRC(AM) San Francisco has introduced "the game zone," six, hour-long game shows airing each weekday between 9 a.m. and 3 p.m., ranging from trivia to "secret sounds" to talent try-outs. The blocks are hosted by Dave (The Duke) Sholin and Chuck Browning, with intros by Gary Owens, Johnny Olson and other nationally known air personalities. "For an AM station to be successful today, it must appeal to the largest available audience," said vice president and general manager, Patrick W. Norman. "The KFRC game zone is designed to reach and appeal to that audience." Added program director Mike Phillips: "We feel it necessary to set aside traditional thinking about radio programing and concentrate more on audience entertainment as a whole, but music will continue to be the main ingredient in KFRC's programing."

Word watchers

An organization made up of record and radio industry representatives along with business and industry groups who would monitor lyrics of contemporary hit songs before they get on the air is being proposed by Bill Steding, vice president and general manager of Bonneville International Corp.'s KAAM(AM)-KAFM(FM) Dallas, and executive vice president of the Central Broadcast Division (Radio) for Bonneville, which is owned by the Mormon Church. Steding calls the proposed organization the National Music Review Council.

"The council will make judgments based on the lyric content as to the acceptability of music for today's youth. If it passes the guidelines, a record would get a label saying it is acceptable—just like a *Good Housekeeping* seal," said Steding.

KAFM entered the contemporary hit radio arena over two years ago and, said Steding, immediately implemented internal controls to eliminate what management felt were objectionable lyrics. According to Steding, the station's policy is to review each piece of music once a week before considering it for airplay. If the music has objectionable lyrics, one of two things is done: the lyrics are edited out or the song is not played. Two recent examples of songs that didn't make KAFM's playlist are "Baby Come and Get It" by the Pointer Sisters and "Relax" by Frankie Goes To Hollywood. "Obsession" by Animotion was edited for air play.

Why wait until now to form a national council? "We had to get some credibility to our programing approach," said Steding. "And the time now appears right for this idea," he added. Steding also said that response from station listeners and local business, industry and church organizations is positive.

Open archive

The Pacifica Radio Archive, believed to be the oldest repository of noncommercial radio programs, has completed a four-year cataloguing project that now enables broadcasters, scholars and interested listeners to easily obtain access to the more than 20,000 tapes stored at its Los Angeles headquarters. A microfiche-based filing system was developed through a grant from the National Endowment for the Humanities and contributions from subscribers to the six stations owned by the Pacifica Foundation.

According to director Nancy Angelo, the archive chronicles major developments in science, health care, psychology, foreign and domestic affairs, social movements, the arts and cultural affairs since the founding of Pacifica Radio in 1949. She said the collection is especially noted for its radio drama and civil rights material, including original recordings of speeches by Martin Luther King Jr., Malcolm X and Ralph Abernathy.

Information about programing from the Pacifica Radio Archive is available from (213) 931-1625.

Warner Publisher Services has reached the 400-station mark in clearances for *Info Radio*, its five-year-old, 90-second news and life-style feature, based on copy from 15 national magazines distributed by Warner. The services, produced and syndicated for the New York-based publisher by Cinema Sound Ltd., clears in the top 175 markets, with 70% of the stations airing *Info World* either during afternoon or morning drive or after the noon news.

Coming home. Fritz Broadcasting's WXYT(AM) Detroit has signed a three-year primary affiliation agreement with the Mutual Radio Network. The station will air Mutual's news at the top of each hour, The Larry King Show, America in the Morning and The Jim Bohannon Show, as well as other network programing. Pictured closing the deal, which becomes effective May 1, are (standing, I-r): John Harper, operations director, WXYT(AM), and Gordon Peil, regional manager/station relations, Mutual. (Seated, I-r): Ben Avery, vice president of station relations, Mutual, and Charles D. Fritz, president, wxyT-(AM). WXYT, formerly WXYZ(AM), was among original affiliates when the Mutual Broadcasting System was founded in 1934. The former Mutual affiliate in Detroit, WCXI(AM), will become a special program affiliate carrying country music.

CHECK OUT MOTOROLA C-QUAM® AM STEREO ON THE HOTLINE!

There are solid reasons our C-Quam AM Stereo system has rolled up such tremendous momentum. Technical excellence is just one! Receiver manufacturer acceptance is another! And the C-Quam system is also news in your market...big news that you can merchandise aggressively.

If you're a station owner or manager who's thinking AM Stereo, use our Hotline to get the story of the C-Quam system and its exciting potential. If you already have the C-Quam system, call to find how to build audience, advertiser interest and time sales with creative promotions.

We have ideas to help boost your visibility and your ratings. We can suggest incentive programs to psych up your sales force. We know how to make your co-op money more productive.

Whatever your questions, concerns or problems, Hotline wants to answer them. Call Steve Kravitz, Sales/ Marketing Manager, at 312-576-0554 collect.

MOTOROLA AM STEREO. THE WINNING SYSTEM.

Cable pay-per-view service set for fall debut

Former Showtime and Cable Health Network executive Jeffrey Reiss, with backing from prominent cable leaders, is putting together The Exchange, to cablecast P-P-V movies and specials

Jeffrey Reiss, the founder of Showtime and the Cable Health Network (which was merged into Lifetime), is putting together a new cable venture: The Exchange. Beginning sometime this fall, The Exchange hopes to provide a steady flow of motion pictures and entertainment and sports specials to cable systems for sale to their subscribers on a pay-per-view basis.

Reiss announced last week that he has raised sufficient funds to launch the service this fall. But, he said, he'll be seeking additional financing to help with the purchase of hardware, marketing and research.

The charter investors are prominent in the cable industry: Bill Daniels, chairman, Daniels & Associates; John V. Saeman, vice chairman, Daniels; Jerry Maglio, executive vice president of marketing, Daniels; Paul Kagan, communications industry analyst and publisher; Tom Wheeler, former president of the National Cable Television Association; Robert Rosencrans, president of Columbia International Inc.; Jay Ricks, partner in the Washington communications law firm of Hogan & Hartson, and Norman Lear, television producer and principal in Embassy Communications (Lear is also Reiss's fatherin-law).

According to Reiss, The Exchange will act as an "expediter," distributing via satellite P-P-V motion pictures and events to cable systems on behalf of producers and promoters. In addition to the transmission service, he said, The Exchange will scramble the feeds, distribute marketing materials and handle billing and collection. For the service, the programers will be charged on "cost-plus-service-fee" basis, he said.

Although The Exchange is not intended to be a full-time P-P-V network, Reiss said he believes enough programers will participate to allow The Exchange to provide between eight and 15 P-P-V films and events per month. So far, he said, the service has been "well received" by the programers.

Reiss said he had lined up a transponder on a C-band satellite, but was not yet pre-

pared to say which one. For the scrambling, he said, he is looking at systems from M/A-COM, Scientific-Atlanta and General Instrument.

Like that of other P-P-V ventures, the success of The Exchange will depend on how rapidly cable systems implement addressability, the technology that permits cable systems to deliver programing to individual homes. According to industry estimates, some 1.9 million cable homes are now addressable.

In a prepared statement, Wheeler said the Exchange will give needed momentum to P-P-V. "Many cable operators," he said, "have been reluctant to commit to pay per view because of its high cost and lack of consistent product flow. Now The Exchange will provide the necessary impetus for pay-perview to succeed as the industry's next premium home entertainment offering and it will allow cable operators to compete title for title with video rental stores. It will benefit the program suppliers, the cable operators and the viewers enormously."

"The Exchange," Reiss added, "will provide to cable operators all of the essential services so that each cable operator will benefit from an efficient, cost-effective, reliable and secure delivery system for the continuous flow of high-quality events."

Reiss, through his Reiss Media Enterprises, has been involved in P-P-V for at least the last six months. He acted as a consultant to Computer Addressable Television Systems Inc., which launched and quickly folded the Hi-Life Channel, a P-P-V service combining adult and conventional motion pictures.

Others are interested in the potentially lucrative P-P-V market, including Showtime/ The Movie Channel Inc. Spokeswomen Tola Murphy-Baran said the pay television firm's P-P-V plans are still "very much on the drawing board," but that, if a host of problems can be solved, it may introduce a "national P-P-V network" within a year.

CBS, NBC unveil children's fare

CBS debuts five shows, six returning; NBC adds two, six returning

CBS-TV will premiere five new Saturday morning children's programs Sept. 14, while renewing five others. In addition, the capsule *In the News* segments will also return. The network disclosed its 1985-86 children's programing slate last Tuesday (Apr. 9). ABC-TV announced its Saturday morning lineup last month (BROADCASTING, April 1)

Paul F. Carrazzone 216/687-8434 Chesley Y. Maddox 216/687-8432 and NBC-TV released its roster last Wednesday (April 10).

New CBS series are:

The Berenstain Bears, 7-7:30 a.m. NYT, is based on the popular book series and developed by authors Stan and Jan Berenstain for Southern Star Productions. The animated comedy-adventure features the forestdwelling Bear family from Beartown, with a long list of continuing characters.

The Wuzzles, 7:30-8 a.m. NYT, is an animated adventure series from Walt Disney Productions about "the oddest assortment of animals yet discovered by man—hybrid creatures who are two animals in one."

Jim Henson's Muppets, Babies and Monsters, 8-9 a.m. NYT, is an expansion of the half-hour The Muppet Babies program, with both live-action and animated segments featuring Miss Piggy, The Muppets and other Henson characters. The show is from Henson Associates-Marvel Productions.

Hulk Hogan's Rock 'N' Wrestling, 9-10 a.m. NYT, an animated series starring wrestler Hulk Hogan and fellow grapplers "in their never-ending quest for truth and justice." The series, from D.I.C. Productions, will be bridged with live-action segments.

The Young Astronauts, 10-10:30 a.m. NYT, is from Marvel Productions in cooperation with the White House's Young Astronaut Council and concerns the adventures of an American family living in outer space in the 21st century.

NBC-TV, which has dominated Saturday morning ratings much of the past season, is adding only two new series, while retaining six programs. In announcing the revised schedule, NBC Entertainment Vice President for Children's Programs Phyllis Tucker Vinson said: "We (at NBC) continue to be delighted with our Saturday morning schedule and its acceptance." She cited NBC research placing her network's Saturday morning ratings at 6.4/24 (through March 30), a 36% advantage over ABC-TV and 33% ahead of CBS-TV.

Premiering Sept. 14 are:

■ Punky Brewster, 10:30-11 a.m. NYT, an animated comedy-adventure based on the Sunday night series of the same name. It is produced by Ruby-Spears Enterprises and set in Punky's neighborhood "as well as in exotic locations" around the world.

The Gummi Bears, 8:30-9 a.m. NYT, a previously announced animated comedy-adventure from Walt Disney Productions "tracing the exploits of a mythological race of charming, idealistic bears who leave their own secret, magical community to help fight evil in the real world." Disney announced earlier this year that it would begin producing animated Saturday morning series for the first time in the studio's six-decade history.

CBS unveils four for summer

Network will air three entertainment series and one news production to try and stem viewer defection

To help beat the summer ratings doldrums, CBS will feature four new prime time series in a six-week run between August and September as part of a special "first-run summer" schedule that will include a new prime time hour from CBS News. The four new series are *Hometown* from Paramount, *One Hogan Place* from CBS Entertainment, *I Had Three Wives* from Warner Bros., and West 57th from CBS News.

Six episodes have been ordered for each of the entertainment series, a CBS spokesman said, although the time periods will be announced at a later date. In addition, the spokesman said, another 13 episodes of *West 57th* have been ordered on top of the previous six for a total of 19 hours "so we'll be ready to go at any time" when a permanent slot opens on the prime time schedule.

In a statement, Gene F. Jankowski, president of CBS/Broadcast Group, said: "As media competition increases, and viewers

'A-Team' and 'A.D.' turn in A + numbers for NBC

With a strong Tuesday performance that featured a first-place finish for *A-Team* with a 24 rating and 37 share, and a fourth-place finish for *A.D. Part III*, NBC took the 28th week of the season (ending April 7) with a 16 rating and 26 share based on Nielsen's prime time National Television Index. CBS, which has won 20 weeks this season, finished with a 15.4/25, and ABC with a 15.2/24.7.

Despite a second-place finish, CBS had five of the top 10 shows of the week, including the NCAA championship basketball game in which Villanova defeated Georgetown. The schedule's usual ratings victor for the season, *The Cosby Show*, was not on the air as NBC showed the five-part mini-series, *A.D.*, which had a average rating of 18.2 with two of its five parts in the top 10.

The combined rating/share this year of 46.6/73.8 was down from last year's 47.8/76.7, as was the HUT level, down from last year's 62.5 to 61.8, a 1% decrease. In nightly wins, CBS captured Monday, Thursday, Saturday and Sunday, while NBC won Tuesday and Friday, and ABC won Wednesday. The unusual victory for NBC on Friday could be attributed to CBS pulling *Dallas* and *Falcon Crest*, numbers one and nine in the seasonto-date ratings, respectively, for the *CBS Special Movie Presentation*, "Stormin' Home."

The week saw two premieres—the *Lucie Arnaz Show* on Tuesday at 8 p.m. NYT on CBS which captured a 12.6/20, placing 45th of the week's 61 programs, and *Me and Mom* on Friday at 10 p.m. on ABC which placed 44th with a 12.7/23.

In its second week on NBC's Friday night lineup, *Half-Nelson* was up from a 13.7/22 to 14.6/25. It preceded *Miami Vice*, which did a 15/23.

Thursday night on ABC saw a slight ratings rise in the third week of *Wildside* (8 p.m.) to 51st and *Eye to Eye* (9 p.m.) at 55th, with the two doing an 11.7/19 and a 10.2/16, respectively. Both still underperformed their season-to-date averages, however.

are given more choices, we have been looking for ways to extend our schedule of original programing beyond the traditional borders of the television season.³⁴

CBS officials elaborated that the first-run summer programs are part of an effort to "bring people back to the set" during a time of year when viewers increasingly turn to alternate media such as cable and independent stations as repeats fill the networks" prime time schedules. All the new summer shows, a spokesman said, were originally part of CBS's 1985 network programing development budget and do not constitute the infusion of additional monies.

CBS officials also pointed out that HUT levels in the August-September period are off about 5% from the April-May period when "heavy program investment is the norm."

The three entertainment series:

• Hometown, a one-hour comedy, is about the "lives and relationships" of a group of 1960's college students who have grown up and joined the 1980's establishment. Gene Reynolds, a former director of $M^*A^*S^*H$, is executive producer. Sisters Julie and Dinah Kirgo, formerly producers/writers with One Day at a Time, created the show and will serve as producers. The pilot was shot in and around New York, location also of the five other episodes.

■ I Had Three Wives, which stars Victor Garber (who just finished a lead role in the Broadway play, Noises Off) is a one-hour comedy about a "charming, rogiush" private investigator who is helped in his assignments by three still admiring ex-wives. (One of the former wives is played by Teri Copley, who starred in We Got It Made.) Co-executive producers are Marc Merson and Peter Lefcourt. Merson is also co-executive producer of Off The Rack (ABC), and Lefcourt is a former producer of Cagney & Lacey (CBS). Wives is directed by Bill Bixby.

■ One Hogan Place—CBS's first prime time entertainment series produced in-house since the fall of 1976—is a half-hour comedy about a Midwestern female Manhattan district attorney and the various people involved in her professional and personal life. Like Hometown, it will be taped in New York, making it the fourth CBS series to be taped on the East Coast. Diane English is the writer; she wrote the premiere episode of Call To Glory and the made-for-TV movie, Her Life As a Man. The cast will be announced.

West 57th from CBS News is described as a "fast-paced, energetic" one-hour news magazine program. Executive producer is Andrew Lack. Each hour will contain from four to six segments reported by an equal number of correspondents. An anchor has not been announced, but a pilot has been produced that included stories on venereal disease in young women and a profile of movie star Chuck Norris.

NBC may also launch an alternate summer schedule. An NBC spokesman pointed out that NBC Entertainment President Brandon Tartikoff has indicated there may be as many as three new entertainment prime time series on the NBC schedule this summer.

The idea of new, limited first-run series for summer play to combat viewer defection to the beaches and alternate media (especially cable) is not new. ABC experimented with the idea in the summer of 1983 by launching five prime time series—none of which made it on a full time basis in the fall. An ABC spokesman said the network plans no new series for this summer.

Peabody's to be presented today

The 1984 Peabody Awards, presented by the University of Georgia's school of journalism and mass communications for distinguished public service in broadcasting, were announced today. The awards will be presented during a Broadcast Pioneers meeting at the Hotel Pierre in New York May 1.

The awards were founded in 1940 and presented in six categories—public service, documentary, news, entertainment, children's programing, and individuals, institutions and organizations. Twenty-nine awards from a field of 700 were given this year.

Ongoing agony. A television documentary on the famine in Africa received high-level endorsement when Vice President George Bush hosted an Executive Office Building screening in Washington for Mohammad Amin's *African Calvary*, a 30-minute lament for the starvation claiming millions of lives on that continent. The Vice President used the occasion to sign—as president of the Senate—the African Famine Relief Bill that provides an additional \$1 billion in food and disaster aid. He noted that Amin's earlier documentary on the subject—broadcast in this country on NBC-TV—had "mobilized the conscience of mankind." Responded Amin: "Sadly, the situation does not much improve... There is a steady decline toward the ultimate nightmare." Distribution of the documentary is in the hands of Viscom International (subsidiary of Visnews Ltd.), which has not yet been able to interest a national network and likely will take the syndication route to U.S. exhibition.

Hero's reception. NBC and Gulf + Western Industries Inc. sponsored a reception for members of Congress in connection with showing of the NBC-TV mini-series Wallenberg: A Hero's Story. Shown at the microphone at the reception is Irwin Segelstein, vice chairman of the board of NBC, with (I-r), Arthur Barron, president of the entertainment group of Gulf + Western, whose Paramount Television division produced the mini-series in association with Dick Berg/Stonehenge Productions: Senator Claiborne Pell (D-R.I.), sponsor of the resolution in the Senate granting honorary citizenship to Wallenberg, and two natives of Hungary who survived the Nazi occupation because of Wallenberg's efforts-Representative Thomas Lantos (D-Calif.) and his wife. Wallenberg premiered last Monday and scored an average 20.2/33 in the Nielsen national ratings. The conclusion on Tuesday averaged a 19.7/30.

Strong U.S. dollar X-factor at MIP-TV

International program market may see foreign organizations thinking twice about U.S. programing

When U.S. program distributors arrive in Cannes, France, next week for the 21st annual Marche International des Programmes de Television (MIP-TV), they will be encountering one of the most difficult international sales markets in recent history.

It won't be for lack of product (U.S. distributors will have steamer trunks full of new shows) or for lack of delivery systems (new commercial enterprises 'are springing up all over Europe). The problem is outside the control of broadcasters and cuts across all international business—it is the strong U.S. dollar, which limits the money foreign organizations can spend to buy U.S.-produced programs.

This has not dampened the spirits of MIP-TV organizers, however. They expect attendance to match, if not exceed, last year's record crowds when more than 5,300 people from 110 countries attended the five-day event. Among the 1,340 companies represented, 230 were from the U.S., 240 from France and 205 from Great Britain. And, as any distributor will testify, the competition is fierce: Sellers outnumber buyers by over three-to-one. Last year, MIP-TV officials reported, 1,000 production and distribution companies registered, compared to 328 foreign networks and broadcast organizations.

And while no one is saying the bottom has fallen out of the international programing market, some distributors admit the old ways of doing business no longer apply. One example is exchange rates. In the past, nearly all attendees conducted transactions in U.S. dollars, with the exception of Canadians and Australians. Now some deals are being negotiated in local currencies or, as a kind of halfway point, Euro-dollars.

"The strong U.S. dollar has had a negative impact on sales, across the board," explained Archie Purvis, vice president, sales and marketing, ABC Video Enterprises, "including theatrical, home video, cable and even broadcast television." According to Purvis and other distributors, the effect of a strong U.S. dollar has forced many distributors to forgo license fee increases this year because foreign broadcasters are already paying a higher fee based on the value of the rising dollar alone.

"When the American dollar is relatively strong to the local currency," remarked Bruce Johannsen, Multimedia Entertainment West Coast sales manager, who also is trying to sell Multimedia's shows overseas, "the price for the product rises proportionately. And from the local perspective, that price appears to be unreasonable." Adds Mike Perez, vice president, international sales, NBC Enterprises: "These markets are becoming more selective. Whereas before they were buying 80% of what's available, now they are buying 40%."

Despite this obstacle, distributors see widening opportunities in international distribution as countries such as France, Germany, Italy, Spain and the U.K. slowly open their doors to new program delivery systems such as cable, home video and pay TV.

"The markets tend to shift," observed Stuart Graber, senior vice president, international sales, Telepictures Corp. "Last year, Italy was the big market." But, he noted, with the consolidated program purchasing of Italy's independent channels four and fivewhich are both owned by Italian industrialist/entrepreneur Silvio Berlusconi—prices have dropped. "Although still important, revenues [from Italy] have decreased tremendously." This year, Graber said, Telepictures is concentrating its marketing efforts on French, German and Spanish-speaking territories.

Although MIP-TV is largely perceived as a market to sell to foreign-based broadcasters, the advent of the new media in some of those countries is attracting more representatives from cable, pay television and home video. "Eighty percent of the sellers at MIP are selling to broadcasting entities," said ABC's Purvis, "but a good deal of negotiations now going on include home video and cable. The markets are dovetailing together. MIP-TV is no longer a single broadcast forum."

But for some distributors, the new outlets do not represent an instant bonanza in sales. "The pay markets overseas have yet to develop where they are meaningful sources of income," said Robert Manby, president, RKO Pictures. Instead, Manby said, RKO has elected to develop co-production deals with foreign-based broadcasting and pro-

duction entities. "Since television is a world market, you might as well co-produce it." RKO's co-productions include Cyrano de Bergerac with the Royal Shakespeare Company, which it recently sold to independent channel four in England and hopes to get on a pay cable service in the U.S.

Art Kane, vice president, managing director, CBS Broadcast International, agrees: "I don't see the impact of the new technologies until 18 months to two years from now." Although new technologies are slow to develop, Kane said there have been encouraging developments over the past year, such as French Prime Minister Francois Mitterand's statement that he supports the development of private television in France. There have been similar signals from the Spanish govemment

"It's really an attitude change," observed Brian McGrath, executive vice president, Columbia Pictures International. "Mitterand has expressed a positive attitude toward pri-vate television." In the last year, McGrath pointed out, the pay TV system Canale Plus has been launched, and, although beset by financial problems, it now reportedly has 250,000 subscribers. Although it represents a fourth outlet to France's three governmentcontrolled networks, Canale Plus has yet to become a big buyer of programing produced outside of France, distributors say.

Not only do U.S. distributors have to overcome quotas set by some foreign governments on the amount of outside-produced programing their networks are allowed to carry, they also have to cut through cultural differences that can turn a popular U.S. show into a less-than-appreciated entertainment event in another country. "When you translate American humor," noted Ron V. Brown, senior vice president, international sales, Embassy Telecommunications, "it isn't always necessarily funny." Thus, Brown said, it was a "real coup" when his company sold Silver Spoons and Diffrent Strokes to the French network TF-1 because there is very little U.S. programing on that network.

And in England, Brown said, the government has mandated that 86 out of every 100 hours of broadcast time be devoted to programing produced in the commonwealth. "That means the U.S. producer is competing with the rest of the world for 14 hours," he explained. In addition, Brown pointed out, several countries, including South Korea and Thailand, have strict quotas on the number of outside theatricals allowed to be distributed within their countries; this applies to broadcast rights as well. Brazil, he said, has gone so far as to halt all distribution of outside-produced theatricals within its borders.

However, some shows that don't have problems getting on the air in other countries are some of the most popular U.S. prime time series. Bert Cohen, senior vice presi-dent, international sales, Worldvision Enterprises, reports that Little House on the Prairie is on the air in 100 countries, The Love Boat is seen in 80 countries and Dallas in 90 (including Israel, where it broadcasts in English with Hebrew and Arabic subtitles).

In cases where U.S. distributors are unable to sell a program, they will try to sell the concept. Two examples of this are PM Magazine from Group W, and Wheel of Fortune from King World.

MIP 85

1. St. O. B. S.

According to Robert Springer, president, Western World Television, PM Magazine will soon be seen on cable television in Germany. To produce the German version, he explained, the Germans chose segments from 10,000 available episodes and will do their own wrap-arounds plus original production, just as a PM Magazine affiliate station might do in the U.S. A similar deal has been negotiated in Spain, he said, where PM will go on the air this month.

The format of America's most popular game show, Wheel of Fortune, has been sold to England, Greece, Italy, Australia and New Zealand.

For the non-U.S. distributors, the U.S. programing market is as hard to crack as some at least foreign markets are for U.S. distributors. "With very few exceptions, we'll always try to sell it to the U.S. first, explained Steve Walsh, president of Consolidated Productions Inc., a London-based production house that is breaking into international distribution. The advantage, he points out, is that a sale to one of the big three U.S. networks can recapture 80% or more of the show's original production budget: "Let's face it; the U.S. accounts for 70% of the world's television market.....If you don't sell to them [the U.S.], you're only making programs for a maximum of 30% of the world market."

Besides mini-series on the big three networks and some other projects on cable, Walsh concedes there isn't much of a commercial market for foreign-produced programing in the U.S. But one avenue Walsh wants to pursue is co-venturing with major independent broadcast groups such as Metromedia or Tribune to produce mini-series or made-for-TV movies. "The question is finding the right project," he says. Then, sounding like a stateside distributor, he said, "what the independents want is first-run programing." A list of American exhibitors to MIP-TV appears below.

Public broadcasting: a survivor

While those in noncommercial radio and TV are the first to admit there's never enough money, they somehow keep finding ways to get by

Is the wolf at public broadcasting's door?

Answers vary with the answerers. National Association of Public Television Stations President Peter Fannon, for example, says: "In some places, yes—in ready cash and support for new production, and in maintenance funding for current major series productions."

Corporation for Public Broadcasting President Edward Pfister sounds a far more optimistic note: "I am more enthusiastic about public TV and its service and its capacity to produce, acquire and broadcast programs than I have been at any time." (Public radio, he says, "has problems that it has to sort out.")

And Marvin Granger, general manager of KEMC(FM) Billings, Mont., says simply that in his 22 years in public radio, "the wolf has always been at the door."

The response from noncommercial stations and regional networks across the country are as mixed as the markets in which they are located. Some report a constant struggle for dollars; some are having their best year ever in private and corporate support; many share the view that public broadcasters are tightening their belts and honing their management skills. The executive director of the Mississippi Authority for Educational Television and Radio, F. Lee Morris, said that in his state at least, public television is a "long way from being crippled"; it's just getting "leaner and meaner."

If there is a consensus among the noncommercial stations contacted by BROADCAST-ING, it is that while most would not call themselves healthy, they are at least financially stable. None said they were in danger of going out of business. Despite recent federal budget constraints—CPB's federal appropriation fell from \$172 million in fiscal 1982 to \$137 million in FY 1983—public broadcasting's current outlook, according to Pfister, is "extraordinarily positive."

He credits Representative John Dingell (D-Mich.), chairman of the House Commerce Committee, for leading "the fight to restore some of the money [cut by Presidential veto] in the supplemental funding. And for a lot of us in this enterprise, that was the beginning of the turnaround," Pfister said, adding that the administration's recent proposal of \$214 million for FY 1988 [up from an appropriation of \$159.5 million for fiscal '86 and \$200 million for FY 1987] is "an extraordinary turnaround."

Public broadcasting is "an institution whose spine has been tested," Pfister said, adding that surviving the past three years has made public broadcasting stronger. "From 1982 through 1985—up until Oct. 1, 1986 public broadcasting will have been put in a trying position financially. If you look back over the last four years, you see an enterprise that didn't let itself slide away, that kind of girded itself up. Public broadcasting not only preserved itself, but improved itself. 1 see an enterprise that has wider acceptance now than it has ever had before in its history."

One barometer of that acceptance is the nonfederal funding support the noncommercial system receives. According to the Public Broadcasting Service, public television's annual March fund raiser, Festival '85, set "an all-time high" for viewer pledges, total dollars pledged and size of the average pledge. The nationwide drive by 135 PBS licensees (including some state networks operating more than one station) was built around the theme, "TV worth watching is TV worth paying for." This year's total revenue for participating stations increased 16% over March 1984, to more than \$36

The breakthrough new book!

101 WAYS TO CUT LEGAL FEES & MANAGE YOUR LAWYER: A practical guide for broadcasters and cable operators

In his new book, former General Counsel for the National Association of Broadcasters (and now a partner in the Washington firm of Verner, Liipfert, Bernhard, McPherson and Hand), communications "superlawyer" Erwin G. Krasnow strips away the mystique surrounding the legal profession to show broadcasters and cable operators how to:

- Select the right lawyer for you
- Enter into the best fee arrangement
- Get the most out of your lawyer
- Control legal costs
- Monitor and evaluate your lawyer's performance
- Remedy problems with your lawyer

SPECIAL INTRODUCTORY PRICE!

CPB's Pfister

million; the total number of membership pledges in FY 1985 increased by 11.6%, to 721,723, and the average pledge increased by 3.9%, from \$48.44 to \$50.34. While 20 of the participating stations

showed a decrease in revenue from last year, some stations, PBS said, showed "a tripledigit increase" over their 1984 March fund raising revenues. WTVI(TV) Charlotte, N.C., for example, showed a boost of 211%; the South Carolina Educational Television Commission, which has seven stations, increased its revenues over last year by 142%, and the Kentucky network increased its total by 106%.

The higher dollar turnout may also be due in part to a "very good television season," said a PBS spokesman, Stuart Kantor. In general, audience viewing figures were up, with record audience shares recorded in November, January and February, he said, adding that "more people are tuning into PBS."

According to NAPTS's Fannon, the "substantial private giving" reflects both a boom in the nation's economy and "the kind of confidence and expectations that individuals and families have" in the noncommercial medium.

For public radio, some stations report that their revenue from membership has increased from last year, though sometimes only slightly. At the end of this month, however, National Public Radio will join its member stations, NPR personalities and outside celebrities in conducting the radio network's first nationally coordinated, systemwide fund-raising drive—Public Radio Campaign '85—on April 22-25. The funds raised during that week of specially produced performance and news programs from NPR and its member stations will go directly to the latter, which in July 1984 assumed responsibility for paying NPR's remaining \$5.4 million debt, left over from its financial crisis in the summer of 1983.

But will audience contributions increase enough to offset other losses? NPR President Douglas Bennet Jr. says no. "It's very important to keep the other sources of funding up. That's why we're gratified that the administration is apparently supporting some increase in federal appropriations. It's also important that local institutions-universities and others that are public broadcasting licensees-maintain sufficient support to guarantee a quality product.'

NPR's Bennet

But does public broadcasting sometimes cry wolf if no wolf is at the door? According to John Jay Iselin, the president of WNET-TV New York (which, with WGBH-TV Boston, produces the majority of programing for PBS): "If things look so good, then why are [we] poor-mouthing so much? That doesn't mean we're not going to have a hell of a season next year. That's another problem; we keep appearing to be pulling rabbits out of the hat.... Maybe that's the dilemma of our life. Again and again people can't wait to hear whether we're only crying wolf, or if there's a real wolf. Our problem is we've got to keep scrambling.'

According to Pfister: CPB is "unable to say where we'll be this year in terms of all the money being spent in operating the enterprise. And that's not to suggest that we don't absolutely have the need for more money; we certainly do. It is to suggest that the institution, for the most part-through its enterprise, its ability to persuade policy makers, viewers and listeners of its valuehas managed to continue to grow."

Money remains a constant concern for public broadcasting. As CPB Chairman Sonia Landau said, funding for the noncommercial media "is a constant event in our lives; we need to know what money is coming in."

According to CPB, it took \$899.2 million to support public broadcasting in fiscal 1983. (Of that, 53.6% came from tax-based funds, and 46.4% came from private sources. Put another way, 18.2% came from

WYES-TV's Saele

federal sources, while 81.8% was from nonfederal. Public broadcasting has changed significantly since 1968, when CPB organized itself essentially with a \$1-million grant from CBS. After 25 years in public broadcasting, Pfister's memory of the noncommerical system is vivid. From 1959 to about 1967, for example, the use of an interconnection system for simultaneous distribution of product was known inside public broadcasting as the exception, not the rule, he said. "Prior to that time we literally served our stations via the U.S. mails and 10 copies of everything. I remember public broadcasting before we even had videotape, or color, when we mailed our programs, and our programs took 16-24 weeks to get across the country to every station, because a station would use a program and ship it to the next station, and so on. I remember PTV when there were 38 affiliates. So when people say to me, 'How do you think public broadcasting is doing?' a part of me says: 'Compared to what?' "

While no one expects any one financial partner to bear the full brunt of financing public broadcasting, TV and radio stations, in general, have taken up the slack in federal and state funds.

For Michael J. Ziegler, president and general manager of WSKG-FM Binghamton, N.Y., that means, in part, "spending more money raising money," through direct mail, for example. "We have had to become more adept at financial management," he said, "We've all become businessmen.

For WYES-TV New Orleans, it means cutting back operating expenses. The station is "losing ground," according to its president and chief executive officer, Vincent Saele. "It looks like we'll be reducing our operation by about 5%," he said, due in part to a 30% reduction in state funding and a "leveling of philanthropic and entrepreneurial support." The station is trying to replace its loss of government support with for-profit activities (such as assigning production personnel to the commercial networks for coverage of sporting events) which account for about 15% of WYES-TV's total operating revenue. It is a "very critical part" of the station's operation, Saele said, and although it "has taken up some of the slack of funding, we still can't keep up." He said the station planned to reduce its staff next year. It is also among a number of noncommercial stations that

H.B. La Rue

Joy Thomas

would like to see limited advertising allowed on public stations.

According to a telephone survey conducted in mid-March by the Southern Educational Communications Association (whose membership includes 50 stations from Texas to Maryland), of the 45 stations responding, 80% projected no growth in their informal FY 1986 budget projections, 10% projected more than a 5% (but less than 10%) budget increase, while another 10% showed at least a 5% budget cut.

Public radio is currently in "a tough spot," said WETA-TV Washington's president, Ward Chamberlin (who is also on NAPTS's executive committee and the director of finance on NPR's board of directors). It is still recovering from its crisis in 1983. However, although "more precarious in the short run," public radio will be "better off in the long run," Chamberlin said, since it doesn't require as much money as television.

Maintaining revenue sources is especially critical for major producing stations that, Fannon said, "by and large ... remain frustrated by the lack of available funding for demonstrably useful and good quality programs...Right now, the programing pipeline is at its driest point in recent history. There are very, very few new productions actually under contract and in the works So we're seeing, on the series level, the national level, the possibility of much slimmer seasons in the immediate years ahead." Said Iselin, "We need money to pre-finance today, tomorrow's programing hits."

As a producer, WNET-TV must get the start-

up money to develop a program-which sometimes costs from \$200,000 to \$1 million. One suggestion for easing this expense is being developed by PBS President Bruce Christensen, who has proposed to CPB that "risk capital" be provided—up-front money for the development or initial cost of a program. The risk fund would be paid back if a venture were successful. If it failed, at least it would not jeopardize the local operations of the producing station involved, Christensen said.

At a recent meeting, the NPR board of directors proposed a new, five-year business plan that would take NPR out of direct competition for federal funds from CPB and require it to rely on its member stations for financial support. The plan would begin in FY 1987. It proposes that all federal radio funds be sent directly by CPB to noncommercial stations which in turn would pay NPR an annual membership fee for such NPR services as programing, representation, development, legal and engineering support. The fee would be based on a fixed percentage of the station's revenues. Said Bennet, FY 1986 will be a "critical" year, "very important if we're to continue the recovery in which we've invested so much, not only time, but money." He feels the plan is a way to "effectively use scarce resources.

The American Public Radio network (which was formed in January 1982), on the other hand, is "on track," according to its president, William Kling. The network, he said, is "very much in favor of a marketplace

idea." He recommended that CPB "vote the majority of radio funds to the stations.'

Other suggested solutions to garnering working capital are allowing limited advertising on the noncommercial air (stations are currently allowed "enhanced underwriting") and permitting VHF-UHF swaps. The last would be an exchange of a noncommercial VHF television frequency for a commercial UHF facility in the same market-with the difference in value being made up in cash. Public broadcasters are divided on the proposal. Some, such as WNET-TV's Iselin, feel a swap "needs to be seriously studied" on a market-by-market basis. AVHF signal is "a tremendous asset," he said, to be traded as "the last possible resort." WETA-TV's Cham-berlin calls the UHF-VHF exchange the "most ridiculous idea I have ever heard ... I am amazed that some of my colleagues are considering it." He added that "any idea of solving our [financial] problems by a UHF-VHF swap would be selling our birthright, literally." The CPB board has opposed any modification of FCC procedures currently in place governing such exchanges, and favors monies resulting from an exchange being used solely for public broadcasting. Christensen said that if PBS is "lured by the siren song of a UHF for VHF swap, it may cost us our state and local funding.

Public broadcasting is "not so malnourished that we'll fade away," said Christensen, adding: "We could use substantial new revenue.

Lack of funds has hindered "innovation and experimentation in programing," Pfister said. "We're still so poor we often can't try as often as we ought to try," he said. "Much experimentation has had to be put aside, so public broadcasting can concentrate on the main stuff....We don't have the financial flexibility to get in and to try.

"I guess I'm still enough of a broadcaster to get upset when I see major pieces that we acquired from abroad that I know we have the capacity, but not the financial resources, to do. I still get a little jealous," Pfister said, "when I see some of the ventures that commercial television occasionally does. I'm delighted that those dramatic ventures are being done in the U.S. and for U.S. audiences, but... I want some of those for public TV and for public radio."

Overall, public broadcasters seem optimistic. According to Landau, public broad-casting is "doing pretty well" financially, adding, however, that "one always holds one's breath when saying that." Said Pfister: "I think public TV's time is now. Public radio still has a couple of other problems. I look at the institution with a perspective that understands all of the shortfalls in our program schedule, understands how difficult it is to aggregate money, understands how damnably expensive it is to produce television programing and high-quality radio programing. But in spite of all of that, this insti-tution in 1982, 1983, 1984 and even in 1985, has had good years."

In 1969, with \$5 million, PBS was established; in 1970 NPR was established, long lines were put in place, an interconnection system was made viable and possible. Since then, public television's viewership has increased from 33.4 million households in

1974, to 63.8 million in 1984; those listening to public radio have increased from a total of 2.6 million in 1974 to 8.7 million in 1984.

Said Christensen: "When hasn't the wolf been at the door? From the beginning, the enterprise has been underfinanced. It's never really had the stable, predictable funding that would enable us to do long-range planning. There are lots of reasons it didn't happen—and yet public broadcasting seems to have survived."

PROPOSED

KDLH(TV) Duluth, Minn. □ Sold by KDLH-TV Associates to Benedek Broadcasting of Minnesota Inc. for \$9.5 million cash. Seller is owned by Bonnie J. McCloskey, Vickie A. Miller and Jenny W. Sutton, daughters of late D.D. Palmer, founder of Palmer Communications. It has no other broadcast interests. Buyer is principally owned by Richard Benedek, who also owns WBKO(TV) Bowling Green, Ky.; WTAP(TV) Parkersburg, W.Va., and WYTU(TV) Youngstown, Ohio. KDLH is CBS affiliate on channel 3 with 100 kw visual, 20 kw aural and antenna 990 feet above average terrain. Broker: Howard E. Stark, Media Broker.

WCKS(FM) Cocoa Beach, Fla. D Sold by Southland Broadcasting Inc. to Capitol Broadcasting Co. for \$3.5 million cash. Seller is owned by William R. Corkhum (10%); Michael Metcalf (10%), and his sisters, Pauline C. Metcalf and Esther M. Mauran (30% each). Corkhum is president of Southland. Metcalf is director of Providence Journal Co., Providence, R.I.-based publisher and station group of four TV's. It publishes Providence Journal. Buyer is principally owned by James F. Goodmon, and his brother, Raymond. It is Raleigh, N.C.-based station group of two AM's and five FM's. It also owns five regional radio networks. WCKS is on 101.1 mhz with 100 kw and antenna 440 feet above average terrain. Broker: Blackburn & Co.

WGUS-AM-FM North Augusta, Ga. □ Sold by Broadcasting Associates of America Inc. to Woolfson Broadcasting Corp. for \$2 million cash. Seller is owned by E. Donald Kern and Cal Young, who have no other broadcast interests. Buyer is owned by Mark L. Woolfson, who also owns WWQQ-FM Wilmington, N.C. WGUS(AM) is on 1380 khz full time with 5 kw. WGUS-FM is on 102.3 mhz with 3 kw and antenna 280 feet above average terrain. Broker: Blackburn & Co.

WYAK-AM-FM Surfside Beach-Garden City, S.C. □ Sold by Lower Grand Strand Broadcasting Inc. to Ellek Seymour for \$1,750,000 cash. Seller is owned by Robert E. Johnson, who has no other broadcast interests. Buyer also owns WETT(AM) Ocean City, Md., and WWTR-FM Bethany Beach, Del. WYAK(AM) is daytimer on 1270 khz with 5 kw. WYAK-FM is on 103.1 mhz with 3 kw and antenna 300 feet above average terrain. Broker: Raymond-O'Grady Associates.

WFIX(AM) Huntsville, WAJF(AM) Decatur, WRAB(AM) Arab and WSHF(AM) Sheffield, all Alabama Dold by The Falt Co. to Comco Inc. for \$1.5 million cash. Seller is owned by J.B. Falt Jr. and his son J.B. Falt III. It has no other broadcast interests. Buyer is owned by James C. Robinson, chairman (8%), Joel B. Sharp (4%), Walter M. Windsor (4.8%), Willoughby T. Cox (11%), David W. Hedrick (8%) and 19 others owning less than 4%. It also owns WKIQ(AM) Inverness, Fla., and WAMR(AM)-WRAV(FM) Venice, Fla. It recently purchased WRYO(FM) Crystal River, Fla. Windsor is consultant to SFN Companies, which owns four TV's, one AM and two FM's. Comco is requesting continuance of waiver of FCC rules to allow acquisition of wFIX(AM) and WAJF(AM), despite contour overlap. WFIX is on 1450 khz with 1 kw day and 250 w night. WAJF is on 1490 khz with 1 kw day and 250 w night. WRAB is daytimer on 1380 khz with 1 kw. WSHF is daytimer on 1290 khz with 1 kw.

KERV(AM)-KRVL(FM) Kerrville, Tex. □ Sold by Chess Enterprises Inc. to Kerrville Radio Inc. for \$1,230,682, comprising \$725,000 cash and remainder assumption of notes. Seller is owned by E.C. Ebinger (43.4%), James Constance (43.4%) and Robert D. Hanna (13.1%). Hanna also has interest in KROX(AM) Crookston, Minn.; KCLW(AM) Hamilton, Tex., and KICS(AM)-KEZH(FM)

Knowing what it is does not tell you how to use it.

A baseball in the hands of a child is a toy. But in the hands of a major league pitcher, it is a precision instrument. The difference is more than size and strength; it is expertise and experience.

Heller-Oak's experience and know-how in lending money to the communications industry is why we feel "Professionalism is Priceless." We bring to each meeting the willingness to find a way to make things happen, to make things work. If you need this kind of professionalism, call Chris Flor at 312/621-7665 or Matt Breyne at 312/621-7638.

"Professionalism is Priceless"

finance is more than lending at Heller-Oak Communications Finance Corp. 105 West Adams Street. Chicago. IL 60603 Hastings, Neb. Others have no other broadcast interests. Station was originally sold last year, but deal fell through. **Buyer** is owned by Joe Abernathy (20% managing general partner) and Wayne Dayton (5% general partner). Other limited partners are to be named. Abernathy is former vice president and general manager of KNOW(AM)-KEYI(FM) Austin, Tex. Dayton is Austin building contractor. KERV is on 1230 khz with 1 kw day and 250 w night. KRVL is on 106.3 mhz with 3 kw and antenna 105 feet above average terrain.

WYNX(AM) Smyrna, Ga. □ Sold by Jonquil Broadcasting Co. to Hubert N. Hoffman for \$1 million cash. Seller is owned by Laurence N. Polk, who has no other broadcast interests. Buyer owns WGGM(AM)-WDYL(FM) Chester, Va. WYNX is on 1550 khz with 50 kw day and 500 w night. Broker: H.B. La Rue, Media Broker.

KUQQ(AM) Fort Worth \square Sold by Clifford F. McMaster, receiver for S.G.M. Broadcasting Co., to Command Broadcast Associates of Texas Inc. for \$877,000 cash. Seller has no other broadcast interests. Buyer is owned Albert E. Cameron (19%) and Command Broadcast Associates Inc., which is owned by Nelson G. Lavergne (46.2%), Premier Maldonado (30.8%) and Manuel Siverio (23%). It owns WADO(AM) New York. Lavergne is chairman. KUQQ is on 1540 khz with 50 kw day and 10 kw night.

WHAL(AM)-WYCQ(FM) Shelbyville, Tenn. □ Sold by Shelbyville Broadcasting Corp. to Tenncom Ltd. for \$850,000, comprising \$150,000 cash and remainder note. Seller is owned by Thomas H. Strawn, who has no other broadcast interests. Buyer is owned by Jerry W. Oakley, who also has interest in WIRC(AM)-WXRC(FM) Hickory, N.C. WHAL is on 1400 khz with 1 kw day and 250 w night. WYCQ is on 102.9 mhz with 100 kw and antenna 510 feet above average terrain. Broker: Blackburn & Co.

KBOE(AM)-KOSK(FM) Oskaloosa, Iowa 🗆 Sold by Oskaloosa Broadcasting Co. to Jomast Corp. for \$850,000, comprising \$250,000 cash and remainder in note. If gross revenue growth exceeds 5%, bonus payment of \$16,790 required. Seller is owned by Catherine E. Winkler, Don Hemphill, Roy Seeger, estate of Phyliss Day Herman, Dr. C.C. Kitchen, estate of Harold J. Fleck, Earl R. Jones and E.G. Wenrick. Only Wenrick has other broadcast interests WMNE(AM) Menomonie, Wis., and in KTTN(AM) Trenton, Mo. Buyer is owned by John A. Muhl, president, and family. It has no other broadcast interests. Muhl owns soft drink bottling plants in Oskaloosa, Salinas, Kans., and Norfolk, Neb. KBOE is daytimer on 740 khz with 250 w. KOSK(FM) is on 104.9 mhz with 2.9 kw and antenna 285 feet above average terrain.

KEDO(AM)-KLYK(FM) Longview, Wash. □ Sold by KEEDOH Inc. to Longview Broadcasting Corp. for \$750,000, comprising \$150,000 cash and remainder note. Seller is Bellevue, Wash.-based station group of seven AM's and five FM's, principally owned by Frederic A. Danz and family. Buyer is

owned by Gary L. White, Walter H. Meyer and Rodney J. Etherton. It also owns KITI-(AM) Centralia-Chehalis, Wash. KEDO is on 1400 khz with 1 kw day and 250 w night. KLYK is on 105.5 mhz with 3 kw and antenna 21 feet below average terrain.

WFDF(AM) Flint, Mich. \square Sold by WFDF Corp. to Flint Metro Mass Media Inc. for \$700,000, comprising \$500,000 cash and remainder note. Seller is owned by Elmer A. Knopf, who has no other broadcast interests. Buyer is owned by Vernon Merritt, who also owns WDZZ-FM Flint, Mich. WFDF is on 910 khz with 5 kw day and 1 kw night.

WTTB(AM) Vero Beach, Fla. \Box Sold by WTTB Inc. to Treasure Coast Broadcasting Inc. for \$550,000, comprising \$300,000 cash and \$250,000 note. Seller is principally owned by Harty L. Reiner and family and Simon Goldman. Reiner has interest in WLBE(AM) Leesburg, Fla. Goldman has interests in WJTN(AM)-WWSE(FM) Jamestown, N.Y., and WMVT(AM) Burlington and WSYB(AM)-WRUT(FM) Rutland, both Vermont. Buyer is owned by Howard Cohen and four others. It has no other broadcast interests. Cohen is Vero Beach businessman.WTTB is on 1490 khz with 1 kw day and 250 w night.

KKID(AM)-KAZZ(FM) Sallisaw, Okla. D Sold by Demaree Enterprises Inc. to Dove Broadcasting Corp. for \$550,000, comprising \$330,000 cash and remainder note. Seller is owned by Anthony Demaree (25%) his former wife, Sondra (25%), and Reita Diane Rhodes (50%). It has no other broadcast interests. Buyer is owned by Gary D. Gargus (51%), James H. Franklin (33%) and Dennis M. Sprouse (16%). It has no other broadcast interests. Gargus is oil well and telephone line contractor in Sallisaw. Franklin is licensed evangelist from Sallisaw with Assembly of God Church and was formerly program director at KRIZ(FM) Roswell, N.M. Sprouse is Sallislaw attorney. KKID is daytimer on 1560 khz with 250 w. KAZZ is on 95.9 mhz with 3 kw and antenna 245 feet above average terrain.

WGGG(AM) Gainesville, Fla.
Sold by U.S. Broadcasting Inc. to Micanopy Broadcasting Co. Inc. for \$500,000 cash plus 700,000 shares of stock in buyer. Seller, debtor-inpossession, is principally owned by Frederick C. Mezey, who also owns KQAK(FM) San Francisco, which has been sold ("For the Record," Jan. 28) pending FCC approval. Buyer is owned by American Communications and Television Inc., Gainesville-based station group of one FM and three TV's and owner of SMATV systems in Florida, principally owned by Mark K. Goldstein, Harvey M. Budd and Thomas G. Sonsini. It owns two LPTV's, is applicant for seven LPTV's and is applicant for new TV's in Gainesville and Palatka, both Florida. WGGG is on 1230 khz with 1 kw day and 250 w night.

WORG-FM Orangeburg, S.C. □ Sold by Radio Orangeburg Inc. to Garden City Broadcasting Co. for \$450,000, comprising \$150,000 cash and remainder note. Seller is principally owned by H. Edward Crapps, who also owns WBLR(AM)-WKQW(FM) Batesburg, S.C. Buyer is principally owned by Robert R. Hilker and William R. Rollins. It also owns WDIX(AM) Orangeburg, N.C., and WEGO- (AM)-WPEG(FM) Kannapolis, N.C. Hilker also owns WCGC(AM) Belmont, N.C., and has interest in six cable systems in North Carolina. Hilker and Rollins also own WJJ(AM) Christianburg, Va., WVVV(FM) Blacksburg, Va.; WYNR(AM)-WPIQ(FM) Brunswick, Ga.; WSVM(AM) Valdese, N.C. They are also applicants for new TV in Belmont, N.C. WORG is on 103.9 mhz with 3 kw and antenna 300 feet above average terrain. Broker: R.A. Marshall & Co.

WWWY-FM Columbus, Ind.□ Sold by Bartholomew County Broadcasting Inc. to Mid-State Media Inc. for \$391,000, comprising \$36,000 cash and remainder in note including \$55,000 noncompete agreement. Seller is principally owned by Edward W. Roehling, Gene H. Kinman, Paul D. Ford and Daniel R. Billman. It also owns WRCR(AM) Rushville, Ind. Buyer is owned by Gunther 'S. Meisse (80%) and Glenn Cheesman (20%). Meisse has interest in, and Cheesman is general manager of, WVNO-FM Mansfield, Ohio. WwwY is on 104.9 mhz with 3 kw and antenna 300 feet above average terrain.

KSZN(AM) Pampa, Tex. □ Sold by Golden Eagle Communications to Four Star Communications Inc. for \$331,664.10, comprising \$27,500 cash and remainder assumption of notes. Seller is owned by Phillip T. Zeni, Cecil J. Koonce and estate of Phillip S. Moore. It also owns KKDI(AM)-KKBE(FM) Sheridan, Ark. Buyer is owned by Robert Sailor and his wife, Clara (50%), and Glenn Dawkins and his wife, Julia Marie (50%). Clara Sailor is general manager of KSZN(AM) Pampa, Tex. Dawkins is Pampa, Tex. farmer, KSZN is on 1340 khz with 1 kw day and 250 w night. Broker: Chapman Associates.

WSAY(AM) Salem, Va. □ Sold by George H. Buck to Crusade International Ministries Inc. for \$325,000, comprising \$50,000 cash and remainder note. Seller owns wCOS-AM-FM Columbia, S.C.; wPCT(FM) Lobelville, Tenn.; wHVN(AM) Charlotte, N.C.; wEAM-(AM) Columbus, Ga.; wGMY(AM) Montgomery, Ala., and wYZE(AM) Atlanta. Buyer is owned by L.E. Willis. It is Norfolk, Va.based station group of seven AM's and four FM's. WSAY is daytimer on 1480 khz with 5 kw.

WLBN(AM)-WLSK(FM) Lebanon, Ky. D Sold byLebanon Springfield Broadcasting Co. to Lebanon Springfield Broadcasting Co. Inc. for \$300,000, comprising \$87,000 cash and \$213,000 note. Seller is owned by estate of Stokley Bowling, estate of Horace E. Tabb, and Gladys Hodges. With Moninda D. Cole, it also owns WIEL(AM)-WKMO(FM) Elizabethtown, Ky. Buyer is equally owned by J.T. Whitlock, J.B. Crawley and Cherry M. Gibson. Crawley's wife, Elizabeth, has interest in WLCK-AM-FM Scottsville, Ky., and with his children, Jim and Janie, and his brothers, Sam and Dennis, owns WMJL(AM) Marion, Ky. Whitlock is general manager and and Gibson is operations manager at WLBN(AM)-WLSK(FM). WLBN is daytimer on 1590 khz 1 kw. WLSK is on 100.9 mhz with 3 kw and antenna 200 feet above average terrain.

For other proposed and approved sales see "For the Record," page 174.

Proxmire fire. White House's new computer-driven news service has come under fire from Senator William Proxmire (D-Wis.), who said he may try to cut funding for it. Proxmire, member of Senate appropriations subcommittee with jurisdiction over White House budget, said service—which permits computer-equipped news media organizations to access media base consisting of White House press releases, speeches and other documents—could lead to nation's "first government-owned, operated and controlled 'news' service." Accordingly, he said, White House should be sensitive to "inherent dangers of this pilot program. If it is not," he added, "if the program starts growing, then this senator will try to slash its funding." He expressed concern, for instance, that White House might transmit interview with President conducted by White House employe, and asked: "How many television stations would air this interview without alerting their viewers that it was a White House public relations ploy?" he asked. And, he said, "Where the White House leads, other government agencies will follow."

Best of SDX. Broadcast winners of 1984 Sigma Delta Chi Distinguished Service Awards for journalistic excellence: radio reporting—CBS News; public service in radio journalism—wcBs-AM-FM New York; editorializing on radio—KCBS(AM) San Francisco; television reporting—wwEC-TV Norfolk, Va.; public service in television journalism, stations in top 50 markets—KPRC-TV Houston; public service in television journalism, stations in markets 51-209—woi-TV Ames, Iowa; editorializing on television—Van Carter, news director, KTIV-TV Sioux City, Iowa.

ALF seeks review. American Legal Foundation has asked full FCC to review Mass Media Bureau action denying complaint alleging that CBS's *The Uncounted Enemy: A Vietnam Deception* was in violation of news distortion policy. ALF asked that FCC reverse bureau; publicly reprimand CBS for its broadcast; direct staff to issue final report detailing policy violations; consider temporarily suspending or permanently revoking licenses of some or all of CBS's owned-and-operated stations, "and afford complainant any other equitable relief deemed appropriate."

Paley honors. William S. Paley (r), founder chairman of CBS Inc., received the Center for Communications' Annual Communication Award at a luncheon ceremony at New York's Plaza hotel last week. The actual award was an 18th century English ink well, selected by Paley's long-time associate, Frank Stanton, CBS president emeritus. Accepting the award before the Plaza ballroom audience of media executives, Paley guipped, "It's wonderful to be able to come into a room full of people and know that not more than 500 of them are trying to buy CBS." (Paley declined to comment on reports about efforts to acquire the company. He also declined to say what role, if any, he was personally playing to thwart such efforts.)

Referring to playwright William Shakespeare, Paley said that what people remember most about him, "is not what stages his plays were performed on-it is his plays." Co-chairmen of last week's award luncheon were RCA Chairman Thornton Bradshaw (I) and Dow Jones Chairman Warren Phillips. ABC News's David Brinkley introduced Paley as deserving of the communications industry's "affection, honor and respect."

Home Theater Network marketed on enhanced basic tier

Westinghouse programing service signs first affiliate; sees marketplace niche for new sales effort

Home Theater Network, the pay cable service positioned as the family network, is now being offered to affiliates for use in enhanced-basic program tiers. Last week, HTN, owned by Westinghouse Broadcasting & Cable Inc., announced the signing of its first major cable system to include the service within an enhanced-basic package of programing-Plantation Cablevision, currently serving about 13,000 basic subscribers in Hilton Head, S.C.

Kathryn Peterson, vice president, affiliate relations and administration, HTN, said the network was targetting those cable systems with low pay penetration for carriage of HTN within enhanced-basic tiers. The Hilton Head system, she noted, has many retirement-aged subscribers, who tend to subscribe less to pay services as a group than younger demographics.

Marketing efforts to promote HTN as part of a package will focus on older subscribers and basic-only subscribers. Plantation is offering HTN within a package of six other services, including USA Network, CBN, The Weather Channel, Arts & Entertainment, The Learning Channel and the Financial News Network.

Peterson said HTN is urging affiliates that elect to use the service on enhanced-basic tiers to package it with either three or six other satellite-delivered cable services. She said HTN hopes to increase its affiliate base significantly by giving systems the option of carrying it within a program tier. When offered on a stand-alone basis, she said, HBO has an advantage over other pay services because of the visibility its extensive promotion delivers. She said HTN can find a niche within a program package that subscribers will perceive as having more programing and hence better value for the price.

She said HTN also appeals to those who reject other pay services because of what is seen as racier content. HTN now claims about 300,000 subscribers with about 360 cable affiliates and 60 satellite master antenna television system affiliates.

PBS executive committee makes recommendations

It suggests budget figures, changes in annual meeting and membership policy

The executive committee of the Public Broadcasting Service board met in Washington April 9 and 10 to discuss, among other issues, PBS's mission and goals, its fiscal 1986 budget, membership and assessment policies, the corporate planning process and **Changing rules.** Knight-Ridder management has proposed two changes in its corporate by-laws. The first would end cumulative voting for directors, which gives minority shareholders a better chance for representation. The second would guarantee all shareholders the same price in the event of a tender offer and would require that substantive changes in ownership be approved by the board or 80% of the shareholders, compared with the current two-thirds.

its annual meeting. The committee's recommendations will be presented to the full board at the annual PBS/National Association of Public Television Stations meeting, to be held in San Francisco May 15-18.

The recommendations, broken down by issue:

Budget. The committee heard and endorsed the budget subgroup's recommendation calling for an 11.4% increase in the past year's member assessment of \$17.4 million, plus an additional \$250,000 earmarked for the program development fund, also to be financed through member assessment, leading to an average assessment increase of 12.9% per station. The 12.9% increase was a revision of a proposed 16.4% increase that stations claimed would be too great a burden; it also reflected their concern that not enough funds were available for program development. The assessment would cover a 5% increase in salaries of union employes and a 5% increase for all other employes, with an additional 11/2% available for nonunion employes who show extraordinary merit.

■ Membership and assessment. The committee discussed a revised membership policy requiring annual recertification of noncommercial, educational stations whose licensees might be regarded as religious or political, and restricted membership to those stations that provide nonsectarian, nonpolitical service. It then unanimously adopted a list of five membership and three assessment policies.

Annual meeting. The committee discussed at length a proposed change in the annual PBS/NAPTS meeting that would enable member stations to participate to a greater extent in the planning process. After a joint presentation by PBS President Bruce Christensen and NAPTS President Peter Fannon, attendees would be divided into 10 subgroups of approximately 30 people for a two-and-a-half-hour discussion of five issues expected to appear as central to public broadcasting in the next two to three years. Each group would be chaired by a member of the NAPTS or PBS board, and the discussion would be recorded by a designated notetaker. Following the sessions, the group chairmen and notetakers would collate their information in another session, designed to "crystallize the substance of discussion." The outcome of this session would be reported to all attendees later in the meeting. "We're looking for direction, not recommendations," said Fannon at the board meeting.

Four of the five discussion issues have been chosen. They are: (1) "What business are we in?" (2) "What is the measure of success for our programs?" (3) "How can we assure a steady flow of major new programs?" (4) "How do we proceed on the subject of enhanced underwriting and advertising?"

■ Restoration of services and facilities. The committee's discussion of restoring service and facilities following the October 1984 fire at PBS headquarters in Washington was closed due to possible litigation with PBS's insurance company.

Broadcast Group shines in CBS quarterly results

Profits rose 9% in that division despite only 3% revenue increase

In CBS's 1984 first-quarter fiscal results, singer Michael Jackson and other recording artists were the stars. In 1985's first quarter it was the CBS/Broadcast Group, which managed to get a 9% increase in operating profits out of a 3% increase in revenue. It managed that by holding cost increases to an estimated 2%. If an inflation rate of at least 3% is factored in, costs actually declined. A CBS spokesperson noted that the number of employes has remained roughly constant at the Broadcast Group. The work force is still below that of 1983 when a number of budgeted posts were not filled and some employes were laid off.

George Schweitzer, vice president, communications and information, for the CBS/Broadcast Group, said that cost savings are due to a cost-saving mentality, as well as specific changes, such as the consolidation of equipment development and purchasing in one division, headed by George E. Shannon, president.

Operating income for the group was \$56.4 million on revenue of \$660.3 million. This year the network was minus the NFL Super Bowl, which it had broadcast last year.

The company overall showed a drop in revenue of 2% to \$1,122,500,000. Net income declined 57% to \$16.7 million, or 56 cents per share. The CBS/Record Group suffered in the first quarter by comparison to last year's results. Both revenue and profits were actually below that of 1983, before inflation. The CBS/Publishing Group registered a gain in revenue, primarily because of two months' results from the recently acquired Ziff-Davis magazines, but the amortization and accelerated depreciation costs of that acquisition showed up on the books as an increase in losses. Losses also increased in the company's toy division, which continues restructuring under Fred J. Meyer, senior vice president, finance.

We're Sailing Our Own Ship Now...

and Barry Sherman is Captain! We're delighted to announce the opening of Barry Sherman & Associates, full service Media brokers and investment consultants. Burry Sherman has spent over 40 years in the broadcast industry. So he knows that a truly superlative broker is sensitive to much more than simply the cost of a property. He has to assess the quality of the potential investment, the particulars of the market involved and financing parameters. And because of Barry Sherman's tenure in the field, his firm can offer you a network of financial contacts for your plans. Law & Regulation 4

Supplemental briefs argue both sides of must-carry case

TBS cites 'Preferred' Los Angeles case in argument for dropping rules; broadcasters read case differently

Both sides in the Quincy Cable/TBS vs. FCC case that could decide the fate of the FCC's must-carry rules were continuing to file supplemental briefs with the U.S. Court of Appeals in Washington, almost on the eve of the oral argument in the proceeding, scheduled for April 16.

The appeals court decision in the *Pre-ferred* case in Los Angeles was one of several developments cited by Turner Broadcasting System as an additional reason why the must-carry rules should be ruled a violation of the First Amendment. Earlier, Quincy Cable had made a similar argument (BROAD-CASTING April 8). But the commission and a number of broadcasters who have intervened in the case did not let such arguments go unchallenged.

TBS said the *Preferred* case, in which the appeals court for the Ninth Circuit overturned Los Angeles's refusal to permit a second cable system to offer service even though the physical plant it needed was available, eliminates whatever lingering precedential value *Black Hills Video*, a 1968 decision, might afford for a defense of the constitutionality of the must-carry rules. The court in the *Preferred* case said that *Black Hills*, which endorsed the physical scarcity rationale, "is a doubtful precedent today."

TBS also said the commission has undercut its own "localism" arguments by amending its allocations tables in Florida and California in a manner that requires cable systems to carry signals of "local" stations great distances to homes whose antennas could not pick them up off the air. And it said that congressional enactment last year of the Restaurant reversed. Constitutional right of critic to use hyperbole in reviews has been upheld by U.S. Court of Appeals for Second Circuit, in New York. Three-judge panel reversed jury verdict of \$20,000 in compensatory damages—and \$35 in punitive damages—that had been reached in libel case involving review of Chinese restaurant. Mr. Chow of New York had sued French publisher and editors of restaurant guide, Gault/Millau Guide to New York, for review in April 1981 issue that complained of "heavy and greasy dough," thick pancakes and other alleged cullnary shortcomings. Number of media groups, including National Association of Broadcasters, major networks and other broadcasters, joined Guide in appealing case. And panel said that five of six statements judge had submitted to jury as basis for determining whether libel had been committed "were statements of opinion and thus constitutionally protected." Statements, such as one describing pancakes as "the thickness of a finger," court said, "cannot be proved false." Sixth statement, involving correct number of dishes in which to serve Peking duck, is objectively capable of being proved true or false, court said. But even if defamatory, court said, Mr. Chow did not prove statement was made with "malice"---that is, made with knowledge it was false or with reckless disregard of whether it was true or false-standard that must be met in libel case brought by public figure. And Mr. Chow did not contest its characterization as public figure in context of libel case. Panel vacated jury verdict and sent case back to lower court to be dismissed.

Cable Communications Policy Act is another factor in support of the argument that must-carry rules must fall. It said the rules, "which reduce diversity in cable programing and regulate content of cable service, are inconsistent" with the thrust of provisions in the new law that are designed to assure "the widest possible diversity of information sources and services to the public."

Attorneys for 12 broadcast intervenors, as well as those for the commission, do not read Preferred as outlawing the must-carry rules. The broadcaster intervenors say that under the rationale of that decision, "the must-carry rules are amply justified by the government's interest in protecting the public's unfettered access to the channels of communication allocated and licensed for television broadcasting." And the commission, in its brief, said that whereas the regulation struck down in the Preferred case sought to deny a would-be cable operator the right to operate its system, the must-carry rule does not seek to deny a cable company the right to operate an entire system "or to limit the operator's right to carry whatever programing it chooses.

Both briefs also contended that TBS had

in effect conceded its inability to persuade cable systems to take the programing of its WTBS(TV) Atlanta—the presumed basis for its suit to outlaw the must-carry rules—was attributable to the royalty fees demanded of some cable systems for carriage of the superstation. The briefs noted that TBS, in urging the Copyright Royalty Tribunal last month to lower those fees, blamed the 3.75% royalty rate—and not the must-carry rules—for the failure of larger cable systems to carry the programs of the Atlanta superstation.

DBSC informs FCC its DBS system is backed by \$5 million

In FCC filing, company claims to have met FCC's due diligence requirement; asks for slots, channels

Direct Broadcast Satellite Corp. (DBSC), a would-be direct broadcast satellite common carrier, told the FCC in an April 5 filing that a group of investors had agreed to put up \$5 million so that DBSC could firm up its satellite construction contract with Ford Aerospace and Communications.

Citing the agreement, the Bethesda, Md.based start-up company claimed that it had met the FCC "due diligence" requirement and asked for an assignment of orbital slots and channels.

All holders of DBS construction permits are required to prove "due diligence" by producing a firm contract for satellite construction. Last October, the FCC gave DBSC, which was awarded a permit in November 1982, until April 5 to make its showing.

According to the filing, the unidentified group of investors, incorporated as Direct Broadcast Corp. (DBC), are supplying the money in exchange for controlling interest in DBSC as well as in Satellite Systems Engineering Inc., a satellite consulting firm that shares offices with DBSC and that, according to informed sources, generates between \$2 million and \$2.5 million a year. The nexus between DBSC and SSE is Wilbur Pritchard. He is founder, minority shareholder and president of DBSC, as well as president and majority shareholder of SSE.

In addition to the \$5 million for the satellite contract, according to a "memorandum of understanding" among the parties, DBC will give DBSC up to \$1 million "for the retirement of DBSC's existing debts and to provide working capital to DBSC."

The filing does not identify the investors in DBC. The memorandum is signed by Thaine Mathewson, "chairman of the board and president CEO" of Direct Broadcast Marketing Group, which Pritchard said was "a unit" of DBC.

On the advice of his attorney, Pritchard refused to discuss the particulars of the filing. If the FCC needs clarification, he said, DBSC will provide it. The DBC-DBSC-SSE deal is contingent

The DBC-DBSC-SSE deal is contingent on the FCC approving changes in the DBSC-Ford satellite contract. As originally written, DBSC was to pay Ford \$5 million and deliver a letter of credit to the satellite manufacturer by March 31.

Under the terms of the contract modifications, also included in the filing, DBSC is now obliged to pay Ford \$1.8 million within 10 days and \$3.2 million within another 120 days of FCC approval "of these revised terms and/or the release to DBSC of specific orbital and frequency assignments."

"To substantiate this commitment and [DBC's] ability to discharge it," the filing said, "\$1.8 million will be deposited in escrow to be paid out to [Ford] upon commission approval of these arrangements."

Under terms of the memorandum, DBC will end up owning 55.55% of DBSC. The filing is fuzzy, however, on how much of SSE it will own. In one part of the memorandum, it says DBC will acquire all of Pritchard's stock in SSE, which amounts to more than 60% of the firm, adding that Pritchard will help DBC secure the remaining stock, which is held by other employes. But just a few paragraphs later, it says, "upon FCC approval and prior to the release of the escrow payment of \$1.8 million to [Ford], 100% of all stock in SSE... will immediately be transferred to DBC."

In March 1981, DBSC became the second company to announce its DBS ambitions (Comsat was the first). Of the first group of eight companies to receive construction permits in 1982, only three—DBSC, Dominion Video Satellite and Hubbard Broadcasting's United States Satellite Broadcasting—are still pursuing their plans. The other five have either dropped their plans or were forced out for failing to meet the FCC's "due diligence" test.

Since receiving its permit, DBSC has worked diligently to find investors for the satellite system that will require some \$250 million to build and launch. In 1982, Kansas City Southern gave DBSC a boost, buying a substantial minority interest in the firm for \$1 million.

In the lean times since Kansas City Southern's cash infusion, DBSC has paid some of its bills with convertible debentures. \Box

Washington#Watch

Urbana UHF. In summary decision, FCC Administrative Law Judge Thomas Fitzpatrick has granted application of Metro Program Network Inc. for new UHF TV station on channel 27 in Urbana, III. Metro, sole remaining applicant after settlement agreement, is owned by Gerald Fitzgerald, Cedar Rapids, Iowa, publisher of real estate guides. Fitzgerald's applications for UHF stations in Cedar Rapids and Ames, Iowa, also have been granted (BROADCASTING, April 1).

Application education. FCC Mass Media Bureau has announced it will sponsor seminars on applying for commercial FM stations under new "window" processing procedures at 9 a.m. and 1:30 p.m. on April 30 at FCC headquarters in Washington. Advance registration will be required. Contact: Donna Searcy, (202) 632-6460.

Round three. FCC has accepted for filing direct broadcast satellite applications of Advanced Communications Corp., Antares Satellite Corp. and Graphic Scanning Corp., Comments and petitions to deny third-round applications are due May 20.

Share it. FCC Deputy Chief Administrative Law Judge James Tierney has decided that San Antonio Educational Television Inc., and Hispanic Community Educational Television Inc., competitors for new noncommercial TV station on channel 23 in San Antonio, Tex., should share facility. In initial decision, judge said there was "discernible equipoise on the substance of the proposals of the parties." Judge granted both applications on condition that applicants submit written agreement by May 10 spelling out sharing arrangement. If parties can't work that out on their own, Tierney said he will will do it for them.

Green Valley. In initial decision, FCC Administrative Law Judge John Conlin has granted application of Sungilt Corp. for new UHF on channel 46 in Green Valley, Ariz., denying competing application of Alden Communications Corp. Sungilt won out with preferences on integration and diversification grounds. Sungilt is wholly owned by Arlene Stevenson, black resident of Tucson, Ariz. She teaches English as second language at Pima Community College in Tucson. She has no other media interests.

Oneida Communications

has acquired

WRUN/WKGW Utica, New York from WRUN Inc. for \$1,420,000

We are pleased to have co-brokered this transaction with The Keith W. Horton Co.

Robert A. Chaisson, Inc. 39 Locust Ave. New Canaan, Conn. 06840 203-966-6333

As compiled by BROADCASTING, April 3 through April 10, and based on filings, authorizations and other FCC actions.

Metcalf is director of Providenc Journal Co., Providence, R.I.-based publisher and statio group owner of four TV's. It publishes *Providence Journau* Buyer is principally owned by James F. Goodmon, and hi brother, Raymond. It is Raleigh, N.C.-based station group c two AM's and five FM's. It also owns five regional radio networks. Filed April 8.

WGGG(AM) Gainesville, Fla. (1230 khz; 1 kw-D; 25 w-N)—Seeks assignment of license from U.S. Broadcastin Inc. to Micanopy Broadcasting Co. Inc. for \$500,000 cas' plus 700,000 shares of stock in buyer. Seller, debtor-in possession, is principally owned by Frederick C. Mezey who also owns KQAK(FM) San Francisco, which has bee sold, pending FCC approval. Buyer is owned by America Communications and Television Inc., Gainesville-based station group of one FM and three TV's and owner of SMAT' systems in Florida, principally owned by Mark K. Gold stein, Harvey M. Budd and Thomas G. Sonsini. It owns tw LPTV's, is app. for seven LPTV's and is app. for new TV' in Gainesville and Palatka, both Florida. Filed April 5.

WZIP(AM) South Daytona, Fla. (1590 khz; 1 kw-D 500 w-N)—Seeks assignment of license from Creativ-Broadcasting Inc. to D&H Radio Inc. for \$335,000, com prising \$70,000 cash, \$260,000 note and \$5,000 noncom pete agreement. Seller is principally owned by Frank Can ale, who has no other broadcast interests. Buyer is owned by David N. Feldman (30%), Howard C. Griboff (30%) anfive others. It has no other broadcast interests. Filed April 4.

WTTB(AM) Vero Beach, Fla. (1490 khz; 1 kw-D; 25i w-N)—Seeks assignment of license from WTTB Inc. tr Treasure Coast Broadcasting Inc. for 5550,000, comprising \$300,000 cash, and \$250,000 note at prime over two years Seller is principally owned by Harry L. Reiner and family and Simon Goldman. Reiner has interest in WLBE(AM Leesburg, Fla. Goldman has interest in WJTN(AM) WWSE(FM) Jamestown, N.Y.; WMVT(AM) Burlington, and WSYB(AM)-WRUT(FM) Rutland, both Vermont. Buyer is owned by Howard Cohen and four others. It has nc other broadcast interests. Filed April 2.

WAOK(AM) Atlanta (1380 khz; 5 kw-U)-Seeks as-

signment of license from Atlanta OK Broadcasting Co. to DKM-Atlanta Broadcasting Corp. for \$4 million cash, including \$100,000 noncompete agreement. Seller is owned by Ragan Henry, principal owner of Philadelphia-based station group of four AM's and two FM's. Buyer is subsidiary of DKM Communications Corp., which is owned by Robert R. Dyson and family, John A. Moran and family and two others. It owns five AM's and six FM's. It is selling co-located WPLO(AM) (see below). Filed April 1.

■ WPLO(AM) Atlanta (590 khz; 5 kw-U)—Seeks assignment of license from DKM-Atlanta Broadcasting Corp. to Capital Cities Communications Inc. for \$6,850,000 cash. Seller is also buying WAOK(AM) (see above). Buyer is publicly owned, New York-based station group, publisher and cable MSO, headed by Thomas Murphy, chairman. It is buying American Broadcasting Companies Inc. for \$3.5 billion (BROADCASTING, March 25). Filed April 1.

■ WTAQ(AM) La Grange, III. (1300 khz; 5 kw-D; 500 w-N)—Seeks assignment of license from WTAQ Inc. to Illinois Lotus Corp. for \$1,650,000, comprising \$650,000 cash and \$1 million note at 10% over 10 years. Seller is owned by William H. Wardle and Ralph Faucher, who have no other broadcast interests. Buyer is Hollywood-based station group of seven AM's and six FM's. It is headed by Howard A. Kalmenson, president. Filed April 3.

■ WWWY-FM Columbus, Ind. (104.9 mhz; 3 kw; HAAT: 300 ft.)—Seeks assignment of license from Bartholomew County Broadcasting Inc. to Mid-State Media Inc. for \$391,000, comprising 36,000 cash and remainder \$55,000 noncompete agreement. Seller is principally owned by Edward W. Roehling, Gene H. Kinman, Paul D. Ford and Daniel R. Billman. It also owns WRCR(AM) Rushville, Ind. Buyer is owned by Gunther S. Meisse (80%) and Glenn Cheesman (20%). Meisse has interest in, and Cheesman is general manager of, WVNO-FM Mansfield, Ohio. Filed March 28.

KBOE(AM)-KOSK(FM) Oskaloosa, Iowa (AM: 740 khz; 250 w-D; FM: 104.9 mhz; 2.9 kw; HAAT: 285 ft.)—Seeks assignment of license from Oskaloosa Broadcasting Co. to Jomast Corp. for \$850,000, comprising \$250,000 cash and remainder in note at 10% over six years, note amortized over 10 years with balloon payment in seventh year. If gross revenue growth exceeds 5%, bonus payment of \$16,790 required. Seller is owned by Catherine E. Winkler, Don Hemphill, Roy Seeger, estate of Phyliss Day Herman, Dr. C. C. Kitchen, estate of Harold J. Fleck, Earl R. Jones and E.G. Wenrick. Only Wenrick has other broadcast interests, with interest in WMNE(AM) Monomonie, Wis., and KTTN(AM) Trenton, Mo. Buyer is owned by John A. Muhl, president, and family. It has no other broadcast interests. Muhl is owner of soft drink bottling plants in Oskaloosa and in Salinas, Kan., and Norfolk, Neb. Filed April 5.

WLBN(AM)-WLSK(FM) Lebanon, Ky. (AM: 1590 khz; 1 kw-D; FM: 100.9 mhz; 3 kw; HAAT: 200 ft.)—Seeks assignment of license from Lebanon Springfield Broadcasting Co. to Lebanon Springfield Broadcasting Co. Inc. for \$300,000, comprising \$87,000 cash and \$213,000 note at 10% over five years. Seller is owned by estate of Stokley Bowling, estate of Horace E. Tabb, and Galdys Hodges. With Moninda D. Cole, it also owns WIEL(AM)-WKMO(FM) Elizabethtown, Ky. Buyer is equally owned by J.T. Whitlock, J.B. Crawley and Cherry M. Gibson. Crawley's wife, Elizabeth, has interest in WLCK-AM-FM Scottsville, Ky., and with his children, Jim and Janie, and his brothers, Sam and Dennis, owns WMJL(AM) Marion, Ky. Whitlock is general manager and Gibson is operations manager at station. Filed April 5.

■ KOKA(AM) Shreveport, La. (1550 khz; 10 kw-D; 500 w-N)—Seeks assignment of license from Mid America Media Co. to TVW Inc. for \$1,150,000 cash. Seller is headed by James A. Reeder, managing partner. It also owns KCOZ(FM) Shreveport, La. Buyer is owned by John Nay Thomas (27%), John R.L. Vaughn (26.5%), J.L. Buddy Woolley (26.5%), Billy G. Wilson (10%) and David C. MacMillian (10%). Thomas, Vaughan and Woolley also own WVKI(FM) Shreveport, La., where Wilson is general manager and McMillian is sales manager. Filed April 5.

WFDF(AM) Flint, Mich. (910 khz; 5 kw-D; 1 kw-N)— Seeks assignment of license from WFDF Corp. to Flintt Metro Mass Media Inc. for \$700,000, comprising \$500,000 cash and remainder note at 9% for first two years and 12% for last three years. Seller is owned by Elmer A. Knopf, who has no other broadcast interests. Buyer is owned by Vernon Merritt, who also owns WDZZ-FM Flint, Mich. Filed March 28.

KFMO(AM) Flat River, Mo. (1240 khz; 1 kw-D; 250 w-N)—Seeks assignment of license from Greater Missouri Broadcasting Inc. to Simon Broadcasting Co. for \$350,000, comprising \$100,000 cash, \$38,801 note at 12% over six years, and assumption of \$212,000 debt. Seller is owned by Randel Boesen and his wife, Joan. It also owns KMMJ(AM) Grand Island, Neb. Buyer is owned by William Simon, his wife, Ann, and his son, William Scott Simon. It has no other

broadcast interests. Filed March 28.

KXOQ(FM) Poplar Bluff, Mo. (new station)—Seeks assignment of license from Foster Broadcasting to KXOQ Inc. for \$7,700 cash and assumption of debts. Seller is owned by Deborah Lynn Foster and Linda Cox, who have no other broadcast interests. Station is unbuilt CP. Buyer is equally owned by H. Jack Holmes, James T. Lambert and James R. Page. It has no other broadcast interests. Filed April 4.

■ WDEX(AM) Monroe, N.C. (1430 khz; 2.5 kw-U)— Seeks assignment of license from DEL Broadcasting Inc. to Norris B. Mills for \$140,000 cash. Seller is principally owned by Edward B. Bower. It has no other broadcast interests. Buyer has no other broadcast interests. Filed April 5.

KBYZ-FM Bismarck, N.D. (96.5 mhz; 100 kw; HAAT: 1,000 ft.)—Seeks transfer of control of Capitol City Communications Inc. from Kim Rudrud (100% before; none after) to James Lakoduk (none before; 100% after) for \$8,000 cash. Seller has no other broadcast interests. Station is unbuilt CP. Buyer owns KQBR(AM) Brainerd, Minn. Filed March 25.

KKID(AM)-KAZZ(FM) Sallislaw, Okla. (AM: 1560 khz; 250 w-D; FM: 95.9 mhz; 3 kw; HAAT: 245 ft.)-Seeks assignment of license from Demaree Enterprises Inc. to Broadcasting Corp. for \$550,000, comprising Dove \$330,000 cash and remainder note at 12% over 10 years. No interest payments will accrue for first two years, at close of eighth year after closing balloon payment of balance will be required. Visit our Exhibit at the National Association of Broadcasters Convention, Las Vegas, April 14-17.

Help Wanted Management

STATION MANAGER CHRISTIAN RADIO GROUP

Mid-America Gospel Radio Network now accepting applications for station manager for Denver, CO's new commercial Christian AM station, KQXI. The person we hire will have 2-4 years' experience in Christian radio; will have had exposure to sales, administration, accounting, logs, FCC requirements, on-air duties, general station activities.

- should be active member of Christian community.
- will be team player, capable of rapidly adapting to our marketing and administrative system.
- will be self-motivated, self-starting, self-disciplined, and effective organizer.

Interested applicants should be very sales-oriented; prior management level experience helpful. Our systematized administrative system frees our local managers to devote the bulk of their work day to sales of local time-strip and spot commercials.

Outstanding sales performance by our manager will earn her/him additional income through network's profit-sharing compensation plan. Thus, acceptable applicants must be very sales-oriented.

All responses treated confidentially. Resumes are now being accepted. Write to:

George Spicer Mid-America Gospel Radio Network 1817 N. Third St., Ste. 202 Phoenix, AZ 85004

For Fast Action Use BROADCASTING'S Classified Advertising

BROADCASTING'S CLASSIFIED RATES

All orders to place classified ads & all correspondence pertaining to this section should be sent to: BROADCASTING, Classified Department, 1735 De-Sales St., N.W., Washington, DC 20036.

Payable in advance. Cash, check, or money order. Full & correct payment **MUST** accompany **ALL** orders.

When placing an ad, indicate the **EXACT** category desired: Television, Radio, Cable or Allied Fields; Help Wanted or Situations Wanted; Management, Sales, News, etc. If this information is omitted, we will determine the appropriate category according to the copy. **NO** make goods will be run if all information is not included.

The publisher is not responsible for errors in printing due to illegible copy—all copy must be clearly typed or printed. Any and all errors must be reported to the classified advertising department within 7 days of publication date. No credits or make goods will be made on errors which do not materially affect the advertisement.

Deadline is Monday at noon Eastern Time for the following Monday's issue. Earlier deadlines apply for issues published during a week containing a legal holiday, & a special notice announcing the earlier deadline will be published above this ratecard. Orders, changes, and/or cancellations must be submitted in writing. (**NO** telephone orders, changes, and/or cancellations will be accepted.)

Replies to ads with Blind Box numbers should be

addressed to: (Box number), c/o BROADCASTING, 1735 DeSales St., N.W., Washington, DC 20036.

Advertisers using Blind Box numbers cannot request audio tapes, video tapes, transcriptions, films, or VTR's to be forwarded to BROADCASTING Blind Box numbers. Audio tapes, video tapes, transcriptions, films & VTR's are not forwardable, & are returned to the sender.

Publisher reserves the right to alter classified copy to conform with the provisions of Title VII of the Civil Rights Act of 1964, as amended. Publisher reserves the right to abbreviate, alter, or reject any copy.

Rates: Classified listings (non-display). Per issue: Help Wanted: 85¢ per word, \$15 weekly minimum. Situations Wanted (personal ads): 50¢ per word, \$7.50 weekly minimum. All other classifications: 95¢ per word, \$15 weekly minimum. Blind Box numbers: \$3 per issue.

Rates: Classified display (minimum 1 inch, upward in half inch increments), per issue: Situations Wanted: \$40 per inch. All other classifications: \$70 per inch. For Sale Stations, Wanted To Buy Stations, Public Notice & Business Opportunities advertising require display space. Agency commission only on display space.

Word count: Count each abbreviation, initial, single figure or group of figures or letters as one word each. Symbols such as 35mm, COD, PD,etc., count as one word each. Phone number with area code or zip code counts as one word each.

Deaths

Marvin C. Whatmore, 76, chairman, Cowles Broadcasting, Daytona Beach, Fla., until its acquisition by H&C Communications, Houston, last January, and former chairman of Cowles's former parent, Cowles Communications, died of heart disease April 9 at his home in Sarasota, Fla. Cowles Broadcasting was licensee of WESH-TV Orlando, Fla., and KCCI-TV Des Moines, Iowa, and became independent publicly owned firm when Cowles Communications was liquidated in 1983. Whatmore is survived by his wife, Lois, three daughters and son.

William H. Long Jr., 92, former chairman of Doremus & Co., New York, advertising and public relations agency, died April 8 at Huntington (N.Y.) hospital. Long joined Doremus in 1919 and was named VP in 1928. In early 1930's, he bought company from estate of Dow Jones & Co. owner, Clarence Barron. He served as chairman from 1932 to 1968, was honorary chairman since 1978, and honorary director since 1979. He is survived by two daughters.

Robert L. Bach, 70, television producer who was originator and associate producer for What's My Line, died April 9 while on vacation in Lyford Key, Bahamas. He had cancer of esophagus. Bach, who had earlier been air personality for WNEW(AM) New York, was associate producer for entire 17-year run of Goodson-Todman television quiz show, which began in 1950, and for syndicated version, which ran from 1968 to 1974. As associate producer, he was responsible for booking all mystery guests and celebrity panelists. Bach had also written book, Our Huckleberry Friend, about Johnny Mercer. Bach is survived by his wife, Jean, who was producer of Arlene Francis Show on WOR(AM) New York. Francis was frequent panelist on What's My Line.

Odes E. Robinson, 73, broadcast consulting engineer, died of cancer March 29 at Holy Cross hospital in Fort Lauderdale, Fla. He began his radio career in 1918 at age 7, with operation of transmitter. By 15, he was selling and servicing Atwater Kent radios. In 1933, he helped build wFBM(AM) Indianapolis (now WIRE) and at 22 became that station's chief engineer. In 1937, he became technical director of West Virginia Network. In early 1940's, he began engineering consulting practice. In 1950, he constructed wVMI(AM) Biloxi, Miss., where he was president and owner for next 10 years. He moved to Fort Lauderdale in 1964 to resume his broadcast consulting. It was estimated that he helped

High honor. Roy Leep, director of WTVT Television Weather Service, Tampa, Fla., was among 13 "space science pioneers" honored for their contributions to the U.S. weather satellite system. Above, Secretary of Commerce Malcolm Baldrige (I) presents Leep with a specially minted silver medal at a ceremony at the Air and Space Museum in Washington marking the 25th anniversary of the first weather satellite. According to the Department of Commerce, Leep was honored for "pioneering contributions to public safety and service, as the first television meteorologist who used weather pictures received directly from satellites to enhance the educatoin and warning of the public about the progress of hurricanes and other severe storms.

put on air between 200 and 250 stations. Rob inson is survived by his wife, Frances, three sons and three daughters.

William M. Carpenter, 67, died of heart attacl April 5 at St. Croix hospital, Virgin Islands He owned wSTX(AM) St. Croix and was it process of starting FM there. Carpenter begai his broadcast career in copy department a WRAL(AM) Raleigh, N.C. He was also sale: manger, WGKV(AM) Charleston, W. Va., and WDNC(AM) Durham, N.C., and VP and gener al manager at WLOW(AM) Norfolk, Va. Ir 1953, Carpenter, with Joseph B. Matthew: and John C. Gilmore, formed Community Club Awards Inc., radio and televison sale: promotion firm. In 1959, Carpenter became VP and general manager of WAPA-TV Sat Juan, P.R., where he remained until 1962. He purcased WRIO, changing call to WUNO(AM San Juan, which he operated until its sale is 1979. He is survived by his wife, Hope, and two daughters.

Robert H. Smith Sr., 74, retired president and general manager and founder, Appalachiar Broadcasting Corp., licensee of wCYB-TV Bristol, Va., died April 8 at Bristol Memoria hospital, Bristol, Tenn., of heart disease. He is survived by his wife, Elizabeth, daughte: and son, Robert H. Smith Jr., who is curren general manager of wCYB-TV.

Jack C. Levine, 56, director, public relations. TravelSavers, travel agency services group. New York, and former news director, WOR-TV New York, died March 29 of heart attack while on vacation in Sarasota, Fla. He begar in WOR(AM) New York's mailroom in early 1950's, then became writer and editor in radic newsroom. He was named TV news directon in late 1960's. He is survived by his wife Betty Jacobson, and three sons. One son Sol, is producer, *Crossfire*, for CNN, Washington.

_en Hensel: carrying BMI's tune

1.0

Is boss calls him BMI's "goodwill ambasador" to broadcasters.

That's a fair description, says Len Hensel, ne Nashville-based vice president of broadast relations for Broadcast Music Inc., the nusic licensing group founded and owned y U.S. broadcasters.

"Another word might be ombudsman," Iensel volunteered. "I get a lot of calls from roadcasters who might not be willing to alk to a BMI field man, whereas I have a ind of credibility with them because I am one of them. I can get their problems quared away."

Edward M. Cramer, BMI president, decribes Hensel as his "eyes and ears in the roadcasting field," noting Hensel's 35-year areer as a broadcaster, including service as vice chairman of the NAB radio board, beore he joined BMI.

"He's not involved in getting music licenses and he's not involved in collecting noney," Cramer explained. "He's there to be 3MI's presence and to answer quesions...He's also a very amusing guy who comehow has remembered every joke he's ever heard."

When not fishing for a laugh, Hensel explains to broadcasters what BMI does and how t differs from its rival, the American Society of Composers, Authors & Publishers.

"Many managers sign that check to BMI every month and don't realize what it's for," says Hensel. "It's amazing how many don't realize it's going to pay writers and publishers of the music they use on their stations. Many don't know that BMI was founded for hem by the National Association of Broadcasters as a competitor [to ASCAP]. If not for us, station managers would have to make a deal with the writer and publisher for every song they played." He estimates that slightly more than half of all music aired on U.S. stations is licensed by BMI.

Hensel maintains a high profile as the host of several dozen BMI-sponsored breakfasts each year at state broadcaster association meetings. A brief "commercial" for BMI is presented with Hensel's trademark jokes and anecdotes about local broadcasters. During 1984, Hensel attended more than 40 broadcast conferences and meetings, requiring 83 airplane trips and 18 major auto trips.

Statistics offered by Hensel during these talks underscore BMI's key position in broadcast music licensing. He reminds listeners that more than 70% of Nashville-recorded music is BMI licensed, as was the music on 46 of last year's 74 prime time television series.

, Although he tries to incorporate humor in everything he does, Hensel turns serious when talking about the extended legal wrangling between BMI and the All-Industry TV Station Music License Committee, repre-

LAWRENCE (LEN) HENSEL-vice president, broadcast relations, Broadcast Music Inc., Nashville; b. March 30, 1926, Clifton Heights, Pa.; U.S. Army, 1943-45; BS, Auburn University, Auburn, Ala., 1948; salesman, various weekly newspapers, 1948-50; air personality and salesman, wjokam) Florence. Ala., 1950-52; account executive, WAPI-TV Birmingham, Ala., 1952-54; sales field manager, Ziv Television Programs, 1954-61; sales manager, general sales manager, wsm-AM-FM Nashville, 1961-71; vice president and general manager, wsm-AM-FM, 1971-81; present position since July 1981; m. Pat Rhodes, Sept. 15, 1951; children-Lynn, 30; Jamie Sue, 27.

senting broadcasters, for establishment of licensing rates. While Hensel is not directly involved in the dispute, he thinks both sides have been hurt by its litigious nature.

"Looking at it as both a broadcaster and a representative now of BMI, I have some very strong feelings about what has happened in the last year or two," said Hensel. "I can remember when I was on the NAB board when those negotiations consisted of honorable men sitting down at a table and hammering out a deal for the industry and BMI that was generally comfortable for both sides.

"They negotiated. That to me is the key word. I sit in on these negotiations now, and I see batteries of lawyers on either side dominating the sessions. The word today is not negotiate but litigate...It is costly to both sides and I don't believe either side is getting a good deal out of it because of the intervention of the lawyers. All these lawyers want to do is litigate."

Although a loyal supporter of BMI, broadcasting is clearly Hensel's first affection.

He entered the field shortly after receiving a BS degree in 1948 from Auburn University, where he majored in English and journalism. For the next several years the Pennsylvania native worked as a salesman for various small weekly newspapers before landing his first radio job.

"I was everything but the general manager at WJOI(AM) Florence, Ala.," Hensel recalls, "including disk jockey, play-by-play sportscaster, copywriter and salesman." Hensel switched to television in 1952, serving WAPI-TV Birmingham, Ala. (now WVTM-TV), as an account executive. From 1954 to 1961 he was a field sales manager for Ziv Television, a syndication firm, based successively in Memphis, Washington and Milwaukee.

"One of my best customers at Ziv was WSM-AM-FM-TV Nashville, and they eventually hired me as national sales manager," Hensel recalls. He was named general sales manager and, in 1971, vice president and general manager of the AM-FM combination. During his last 10 years at WSM, Hensel served on its board of directors, which also oversaw The Grand Ole Opry, Opryland, and the Opryland Hotel. During the same period, Hensel spent eight years on the NAB board of directors and in 1977-78 chaired its radio board.

"By 1981, I was bored with what I was doing," says Hensel. "I made a decision to get into ownership. But about the same time BMI was after me about this job and I finally decided to take it."

Prior to joining BMI, Hensel joined Bob Duffy, former president of The Christal Company, in a joint search for broadcast properties. They lined up venture capital and unsuccessfully bid on KIOI(FM) San Francisco, KMEO-AM-FM Phoenix and other stations. Hensel bailed out when interest rates jumped to 21.5%, while Duffy went on to acquire stations in Denver and Portland, Ore.

"I've had a number of inquiries about managing stations, but I tell them I will only do it if I can have a piece of the ownership," Hensel says, conceding he is still intrigued by the idea of owning a station.

Hensel also keeps up to date on NAB activities. It was during his tenure on the radio board that Hensel feels the NAB first began to actively respond to radio's complaints that the organization was too preoccupied with television.

"Working with Charlie Jones, the vice president for radio at the NAB, we got that thing turned around to the point where, before we were through, people began to complain that the NAB was too radio oriented."

Hensel feels it is correct for the NAB to keep its distance from music licensing disputes.

"I would like to see the [license fee] negotiations get back to the point where broadcasters would sit down with Ed Cramer like they used to," said Hensel. "It would save millions of dollars in legal fees and take those negotiations out of the headlines." Hensel puts a lot of stock in the word "honorable," explaining, "I try to be that way and I like to work with people who are."

In his spare time, Hensel swims, reads and plays "terrible" golf. "My excuse is that I am left-handed," he said. "But I'm so awful that even Sol Taishoff could beat me." The late editor of BROADCASTING carried a handicap never lower than the high 20's.

Broadcast trade groups have rallied behind All-Industry Radio Music License Committee in fight over ASCAP's request for higher rates in negotiations for new five-year blanket music license contracts, which committee estimates would amount to annual increase of 18% ("Top of the Week," April 8). "I find that the fact ASCAP already has a 15%-18% increase based upon the growth of our industry seems a substantial amount for the radio industry to pay," said National Radio Broadcasters Association President Bernie Mann. "To ask for an increase of double what they are going to get is outrageous and bordering on extortion," he said. National Asso-ciation of Broadcasters President Eddie Fritts said members of NAB radio board have given "full support" for work of committee. Increase sought by ASCAP, said committee, would cost radio industry \$60 million in additional fees over five-year period. AS-CAP President Hal David told BROADCASTING request for rate hike is based on strength of organization's music catalogue and repertoire. Under consent decree of Justice Department, committee's legal counsel, New York-based law firm of Weil, Gotshal & Manges, plans to file petition with federal "rate" court in southern district of New York to decide license fee payments. Process could take up to one year or longer.

Ad Audit last week announced that it will unveil new commercial logging system on July 1 that will monitor every advertising spot run on every broadcast station and cable system in country. Electronic codes will be placed in commercials during post-production or duplication stages. Ad Audit will have computer receivers in all 210 ADI markets to record when commercials are run and note broadcast quality. Information will be fed through Telenet system to data bank in Ad Audit headquarters in Alexandria, Va. Reports to clients will be available daily, weekly or monthly. New system is said to take up very little space on videotape—with no degradation of broadcast signal—and offer complete confidentiality. System will cost less than half of visual monitoring system offered at quantity discount.

National Radio Broadcasters Association registered its opposition to FCC's proposed fee schedule with Senate Communications Subcommittee last week. NRBA President Bernie Mann, Mann Media, High Point, N.C., in letter to Subcommittee Chairman Barry Goldwater, stated association's concern about fee structure. "It is unfair to single out one sector of American business to pay additional fees assessed by the government. Radio broadcasters should not be singularly treated on a piecemeal basis to generate additional revenues for the government." If Congress is intent upon enacting fee, NRBA argued, radio broadcasters "should get something in return." And NRBA suggested that Congress might work out contractural agreement with broadcasters in exchange for deregulation. NRBA recommended same proposal in 1982: Under longterm lease, broadcasters would have proprietary interest in frequency; contract could not be altered, and funds could go to U.S. treasury or public radio.

Radio Advertising Bureau estimates that local advertising revenue in 1984 reached \$4,412.0 billion—up 18% over previous year. Data is based on compilation of local dollars from 16 markets as well as projection formula.

Turner Broadcasting System announced last week it had completed two college football packages, both of which cover 1985 and 1986 seasons. One is prime time package that will be carried on superstation wTBS and syndicated to over-air stations featuring total of 12 games in 1985 and 13 games in 1986 from Big 10, Pacific 10 and Atlantic Coast Conferences, as well as Boston College-Army game. Prime time package will contain minimum of five Big 10 games, four Pac 10 and three ACC contests. In separate package, Turner Program Services will syndicate 11 Big 10 games each season to over-air stations Saturday afternoons. Total value of deal could not be determined at deadline, but lion's share of rights fees go to Big 10, which TBS will pay about \$9 million over two-year period.

Drake-Chenault Enterprises, Canoga Park, Calif.-based radio r gram syndicator, was acquired last Wednesday (April 10) by gontrain Enterprises, Albuquerque N.M. Sources say purch price was in \$4-million range. Drake-Chenault Enterprises v formed in 1968 by Gene Chenault, its current chairman and prir pal owner, and by top-40 programer, Bill Drake. Wagontrain En prises, principally owned by William S. Sanders, was establish in 1981 and has interests in seven radio stations: KOTE(AM)-KKZZ(Lancaster, Calif.; KAAP(AM)-KKBZ-FM Santa Paula, Calif.; KPER(Hobbs, N.M., and KHEI(AM)-KVIB(FM) Maui, Hawaii, in addition cable system serving Fort Collins, Colo. Drake-Chenault currer programs and consults some 300 radio stations nationwide as v as outlets in Canada, Australia, Japan and South Pacific. Der Adkins, newly appointed president of Drake-Chenault, will rem in that position, said Sanders. Name and location of company also stay intact.

For third consecutive week, NBC's Today show edged out AB Good Morning America in early morning ratings race, but netword disagreed about numbers in what one source called "uproar." N researchers said based on Nielsen's national ratings, Today sco 5.5 rating and 23 share for week ending April 5, compared to 5.5 for ABC's GMA and 3.6/14 for CBS's Morning News. ABC, wh uses different criteria to evaluate early morning ratings, clain GMA and Today tied with 22 share each. CBS researchers, how er, gave nod to NBC after rounding up 22.5 share for Today.

State Department last week invited representatives of Intel members to visit State Department to hear U.S. position on its pol determination to authorize establishment of separate satellite s tems that would compete with Intelsat. Letter of invitation, not that number of governments have expressed "concern" about t determination, was signed by Ambassador Diana Lady Dougan Office of International Communication and Information Policy, a was delivered to all delegates to International Telcommunicat Union-sponsored World Plan Committee meeting, under way Washington Convention Center. Interesting—and mysteriou: aspect of letter was manner in which it was made known reporters: delivered in plain envelope with covering statement what appears to be ITU letterhead. Statement was unsigned, I message reflected, in tone and substance, Intelsat's views found Dougan's invitation "curious," in view of what statem

Union-sponsored World Plan Committee meeting, under way Washington Convention Center. Interesting-and mysteriou: aspect of letter was manner in which it was made known reporters: delivered in plain envelope with covering statement what appears to be ITU letterhead. Statement was unsigned, message reflected, in tone and substance, Intelsat's views found Dougan's invitation "curious," in view of what statem said was U.S. refusal at Intelsat Assembly of Parties meeting. January, to respond to questions asked then, when "more than governments protested" new American policy. It also contras Dougan's reference to "concern" of other countries with statem of Under Secretary of State William J. ("Bill," in stateme Schneider at congressional hearing two weeks ago that ot Intelsat members were not concerned. "Obviously, the confusion and contradictions" in State Department position "persist," sta ment says. Intelsat officials questioned on delivery of unsigr statement and Dougan letter said they knew nothing about Neither did ITU representatives at World Plan Committee me ing. But Moussa Manekashgar, secretary of meeting, who h seen both documents, said "ITU" letterhead was actually prod of photocopy of heading of official stationery printed on pl white paper.

CBS News correspondent Mike Wallace suggested last week CB failure to provide an outlet for public figures to reply to what th consider unfair or inaccurate attacks may have been factor **General William Westmoreland's decision to file \$120-million li** suit. Wallace, speaking to American Society of Newspaper Edit in Washington, blamed ultraconservative organizations for p voking suit that was dropped shortly before case was to go to ju And he said one possible way to avoid frivolous libel suits is require loser to pick up winner's costs—practice followed in B ain and West Germany. But he also said television, specifica including CBS, has failed to provide outlet for figures like We moreland to respond to broadcasts they regard as unfair or inacc rate. "We cannot complain about libel trials and preach the nece sity of full and free discussion of public controversies and then 1

Padden prevails. Preston Padden, 37, is the unanimous choice of the Association for Independent Television Stations search committee to succeed Herman Land as INTV president. The nomination goes to the full board in May; ratification is considered certain. Padden has worked for Metromedia in Washington since be was graduated from George Washington University's law school in 1973. He is currently Metromedia assistant general counsel.

hake our facilities available for that discussion," Wallace said. ere has to be a better way for public officials and public figures espond to criticism they feel is unfair or inaccurate. CBS has yet made a sufficient effort to come up with a workable format permit responses to our broadcasts."

ph Renick, 56, VP, news, for wrv(rv) Miami, and anchor for stan for past 35 years, resigned on air Wednesday (April 10) in recorded statement. Renick, who had anchored 6 p.m. broadit, had not appeared on air since March 7, due to broken shoulsustained in accident while he was vacationing in Switzer d. Announcement of decision followed published reports that would seek Florida governorship. And statement was worded to ve that option open. Renick closed his statement with his tradinal sign-off. "Good night, and may the good news be yours," in added, "and hopefully mine." According to station spokesin, there have been talks with WNBC-TV New York anchor John mbrick as replacement for Renick, but "no deal is final."

entieth Century Fox Film Corp. last week disclosed sharp decline revenue and earnings for quarter ending Feb. 23, compared to formance for same period in 1984. Los Angeles-based studio orted second-quarter losses (before amortization of allocated cess cost and income taxes) of \$3.9 million versus \$11.3 for same iod last year. Revenue for period dropped from \$251.7 million to 59.4 million.

rner Amex Cable Communications said last week it had finalized incing for its Milwaukee build, which will be operated by limited thership. WA will be general partner with group of limited thers led by TA Associates of Massachusetts, venture capital n. Funding package for build will total \$87.5 million, including 2.5 million in bank loans (consortium led by Manufacturers Hanar Trust, New York) and \$25 million from principals in partnerp. Some 143 miles of planned 1,250-mile system have been Istructed, with completion expected in November of 1986. To ie, about 4,000 subscribers are receiving service.

ansfer of leading responsibility for emergency broadcasting sysn from FCC to Federal Emergency Management Agency has been proved by FEMA Director Louis Giuffrida and proposal will be fore FCC commissioners within four to eight weeks, according Alan McKie, FCC deputy managing director. Transfer of voluny disaster warning program would shift national, state and local anning responsibilities and variety of administrative functions to MA, with FCC maintaining full regulatory responsibility for EBS d advising FEMA through new senior staff liaison. If approved, oposal, more than year in making, would move through congresinal appropriations procedures and action by Office of Manageent and Budget, with earliest possible implementation next Ocber. Broadcasters' input to FEMA plan development will be ined by appointment of three industry representatives from C-sponsored National Industry Advisory Subcommittee on EBS aded by John Summers, executive vice president, National Asciation of Broadcasters.

NBC Radio has named **NBC sportscasters Don Criqui and Bob Trumphy** as primary announcing team for network's **1985** National **Football League 37-game package** ("Riding Gain," March 11), which kicks off Monday evening, Sept. 9, with Washington Redskins-Dallas Cowboys game. Trumphy will also serve as host of national post-game talk show, *NFL Live*.

Ted Turner may soon be now prominent Atlanta landlord and hotel operator. Turner Broadcasting System announced last week it had reached agreement to purchase 75% interest in Omni International Atlanta Complex, which comprises offices, retail facilities and Omni International hotel. Complex is currently owned by Cousins Properties Inc., which will retain remaining 25% interest, and Daon Development Corp. TBS's stake in deal was reported to be between \$50 million and \$75 million. TBS plans to become its own principal tenant, eventually occupying 290,000 square feet of 650,000-foot complex.

FCC Chairman Mark Fowler said last, week he wants Congress to authorize commission to auction off "future releases of spectrum" on "trial basis for a limited time period." In speech before Land Mobile Communications Council in Washington, Fowler said that under his plan, existing licensees wouldn't be affected and that he wasn't proposing auction authority for "any medium of mass communications" or for public safety licenses. "At the conclusion of that trial, we would report to the Congress on our experience, with special attention to the effect of auctions, which I would expect to be positive, on decreasing processing time and increasing administrative efficiency," Fowler said. "I believe what I have outlined here is a cautious but necessary first step."

FCC has designated for hearing Weiner Broadcasting Co.'s licenses for wozw(AM) Monticello, and wozI(FM) Presque Isle, both Maine, and remote pickup station in Yonkers, N.Y., to determine whether company is qualified to remain licensee. Commission ordered Weiner Broadcasting to show cause why licenses shouldn't be revoked. Among other things, FCC designated issues on whether company operated radio station at 1616 khz without license; whether it refused to permit inspection of AM facility, and whether it used remote pickup station to broadcast directly to public on 1622 khz.

Seagram seeks time for 'PSA's.' Joseph E. Seagram & Sons filed a formal complaint with the three television networks last.week, charging them with violating the fairness doctrine for refusing to sell time for what the liquor manufacturer calls public service messages.

Seagram said at a news conference last Thursday (April II) that it has asked the networks to reconsider their decision and warned that Seagram would file a complaint with the FCC, citing the fairness doctrine, if ABC, CBS and NBC held to their position.

Edgar Bronfman Jr., president of the parent company, House of Seagram, said the networks have refused to sell Seagram time for the spots because they insist the spots attempt to promote spirit products and their policy is not to carry such commercials. Bronfman argued that the commercials should be considered "public service" since they inform the public that the alcoholic content in typical servings of beer, wine and liquor is about the same. He added that Seagram is willing to place the commercials without any mention of its name.

Bronfman told the news conference that Seagram was persisting in its efforts to gain television acceptability because it regards television as "a powerful medium" and one that can be highly effective in delivering the "public service" messages. Asked at the end of the meeting how much Seagram was prepared to spend on its TV advertising, Bronfman replied that \$10 million would be "a fair figure."

ABC, CBS and NBC later issued statements saying that Seagram's claims invoking the fairness doctrine were without merit.

Then and now

A year ago as the National Association of Broadcasters was assembling for its 1984 convention, it had come off what its president, Eddie Fritts, called a "useful exercise." What Fritts really meant was that the NAB had lost a bruising fight for deregulatory legislation in the House of Representatives but hoped to learn by the experience.

It has learned. It has licked its wounds and revised its tactics. As reported elsewhere in these pages, Fritts is even talking about accommodations with old adversaries, the National Cable Television Assocation, for example, not to mention the association's nemesis in 1984, Tim Wirth.

The association is also undertaking initiatives of a kind largely missing from its past, as Fritts will explain in as much detail as listeners will hold still for. Its campaign against drunk driving and alcohol abuse is energetic (although still falling short of the expectations of a romanced ally, Mothers Against Drunk Driving). It has other ambitious projects on its mind. Its expectations are more realistic than they were a year ago and its energies more usefully directed. Net gain.

Ouch

This being a magazine that covers the Fifth Estate, the first impulse here, upon examining research presented to the American Society of Newspaper Editors last week, was to hail the advantages that the research gave to television news over newspaper news. That impulse will not be entirely suppressed, but the ASNE's project deserves a broader interpretation.

In some of its findings, the ASNE study is squarely in accord with Roper studies commissioned by the Television Information Office over the past two decades. Which source would be most trusted if conflicting versions of the same story were broadcast and printed? In the ASNE survey, "about half" of the respondents picked television, "around a quarter" picked newspapers, 14% chose magazines and 9% radio. The latest Roper survey, asking the same question, in 1982, counted 53% for television, 22% for newspapers, 8% for magazines, 6% for radio and 11% with no opinion. The extraordinary correlation should put an end to all that newspaper criticism of Roper's research for TIO.

That said, it must be emphasized that the ASNE study of public attitudes toward the news media went deeper than Roper has gone for TIO and produced some readings that give no medium any reason for complacency. If the ASNE work is to be believed, not many people place much confidence in either newspapers or television.

MORI Research, Minneapolis, conductor of the ASNE study, in interrelated questions, asked whether media were fair or unfair, biased or unbiased, tell the whole story or don't, are accurate or inaccurate, invade or respect people's privacy, watch out or don't watch out for "your interests," are concerned or unconcerned about the community's well-being, separate facts from opinions or mix them together, can be trusted or not, think more about the public interest or about making profits, have well or poorly trained reporters. A composite of responses was compiled in the following "credibility ratings": low-newspapers 25%, television 27%; medium-newspapers 43%, television 43%; highnewspapers 32%, television 30%. Not exactly a vote of confidence in modern journalism.

Journalists in both the Fourth and Fifth Estates cannot dismiss

signs of growing disenchantment with their product. Neither should they stuff cotton up their nose for news and begin pandering in search of popularity.

Nobody ever said journalism was an easy business, as the horsewhipped editor of the old West would have testified. It won't get any easier in the competitive tensions of the modern world and its profusion of communication. It won't get any easier, but it had better get better if its credibility scores are to rise.

Infection

oria s4

In the same week that the ASNE was releasing its disquieting study of public attitudes toward contemporary journalism (see above), two of three members of a panel of the U.S. Court of Appeals in Washington issued an opinion that was equally disquieting. The court majority said a trial judge had been wrong to overturn a jury verdict that the Washington Post had maliciously libeled a former president of the Mobil Oil Corp. Reading the opinion against the ASNE report leads to the inescapable conclusion that some attitudes turned up by the ASNE research are shared by at least two members of the appellate court. If that condition spreads, big trouble is in prospect.

The court's majority criticized the newspaper's editing, the professional ambitions of participating staffers and the alleged compulsion by "the least responsible journalists" to "scoop their more careful colleagues." It added that the Post's reputation for "hard-hitting investigative journalism" was "relevant to the inquiry of whether a newspaper's employes acted in reckless disregard of whether a statement is false or not."

"Indeed," wrote Judge J. Skelly Wright in vigorous dissent, "the majority appears to criticize what it takes to be the general climate in journalism today." In doing so, it turned upside down a Supreme Court decision of a year ago (BROADCASTING, May 7, 1984) instructing appellate courts to watch for excessive or unwarranted libel judgments by juries that misunderstand the limitations of the libel law.

It is inconceivable that last week's decision will withstand the appeals that have been promised by the Post. But until the law is set back on the track that the Supreme Court has laid out, journalists have extra reason to worry about their credibility. What, this page got to wondering, would the judges in last week's majority have said if the case had featured an ambush interview by a wellknown television reporter?

Drawn for BROADCASTING by Jack Schmidt "This 'mandatory warning for aspirin' thing is giving me one

helluva headache.

Is next-day delivery giving you "Overnightmares"?

It's going to be another one of those long nights. Filled with visions of missed deadlines. Ghosts of unhappy bosses (and clients). And the endless hours before you'll know whether the package you sent out today makes it there tomorrow.

But if you had called American Airlines Priority Parcel Service, you could have avoided this overnightmare! That's because we can deliver parcels, door to door, *in hours*! Get your package on American's next flight, or any flight you specify. Just call (800) 638-7320. In Maryland, call (301) 269-5503.

There's no need to lose sleep over hot deadlines. Because when you call American, you'll know exactly where your package is. It's delivered.
AmericanAirlines Priority Parcel Service

American Airlines Priority Parcel Service We deliver in hours.

For the engineer who has everything...

We present the Ward-Beck family of DAs that offers even more!

Engineered to provide flawless performance with complete operational flexibility, the units may be arranged in numerous combinations within the MF-6B 3¹/₂" standard rack mounting frame. Each module is individually self-powered, with a choice of either actively balanced transformerless circuitry or a fully balanced transformer design, and features front panel LED level and status indicators. Fully enclosed metal construction, utilizing a unique combination of custom extrusions, provides maximum RF immunity. Remote sensitivity is also available.

The M600 Series. . created for systems focussing on the future!
