AMERICAN SOCIETY OF COMPOSERS, AUTHORS AND PUBLISHERS • 575 MADISON AVENUE, NEW YORK 22, N. Y.

PREFACE

Jazz is one form of music which is uniquely American and which has become identified throughout the world with our nation. The vitality of American jazz rhythms has created a vast and enthusiastic international audience. It is one American export which hurdles all economic and political barriers.

In the repertory of the American Society of Composers, Authors and Publishers (ASCAP), one finds all types of jazz from the great standards of Dixieland to the works created by the new generation of Modern Jazz composers.

The jazz works presented in this special issue do not pretend to include all the music of this type in the repertory of the Society, but only those works available on recordings. The works are listed alphabetically by titles for ready reference and include not only the writers and publishers, but also the artists and recording labels as well. It is our belief that this brochure will prove a valuable aid to directors and producers of musical programs.

Stanley Adams
President
