Basic Tools For Success

Billboard Directories are what you might call Basic Tools. They are, in fact, the main sources of vital information for the entire Music/Record/Tape and Video industries.

Order any one or all of the directories by filling in the coupon below today.

International Buyer's Guide - 1989 edition. The Worldwide Music and Video Business to Business Directory. Listings include name, key people, address, phone number and marketing information of record and video companies, music publishers, distributors, accessory manufacturers and suppliers. Also manufacturers and wholesalers of hardware, software and accessories for Compact Disc, Video Disc, Video Cassettes and Video Games. \$68.00

Year-End Awards Issue - Billboard "The Year In Music And Video" Year-end special double issue offers more charts and more editorial features than ever before. These charts represent the most comprehensive statistical review of the year in home entertainment of any survey in print. \$9.95

Country Music Sourcebook - 1989 edition. Radio stations, performing artists, booking agents, personal managers—everyone involved in Country Music. \$31.00

International Recording Equipment and Studio Directory - 1990 edition. All the information you need on professional recording equipment, recording studios and recording studio equipment. \$37.00

International Directory of Manufacturing & Packaging for the CD, Record and Audio/Video Tape Industries. 1989 edition. Professional services and supplies for record and video manufacturers, audio and video manufacturers, audio and video tape manufacturers, video program suppliers and buyers, video music producers and production facilities. \$30.00

International Talent & Touring Directory - 1990 edition. The source for U.S. and international talent, booking agencies, facilities, service and product. Used by everyone who buys and books talent - promotes and manages tours. \$64.00

(All prices include postage and handling)

Dolby SR. The sound investment for analog multitracks.

When everyone else was making noise about digital, we quietly developed Dolby SR. But it's no secret: Dolby SR makes analog multitrack recording a cost-effective alternative to digital.

Improves the preferred sound of analog

At both 15 and 30 ips, Dolby SR dramatically increases headroom, and virtually eliminates tape hiss and modulation noise. Dynamic range is improved by more than 25 dB over unassisted analog, preserving all the warmth and purity of the original sound.

Increases the return on your investment

Dolby SR upgrades your multitrack at a fraction of digital's cost. Add our Model XP SR (configured for up to 24 channels), or update an existing Dolby mainframe with plug-in SR modules. If you are in the market for a new multitrack, Otari and Studer offer models with Dolby SR built-in.

Simple to use

Set-up is quick and easy with Dolby SR. A unique

Auto Compare feature lets you instantly verify frequency response and playback calibration.

And editing is as convenient as ever, with no need for special equipment.

Worldwide acceptance

Tapes recorded with Dolby SR can go anywhere, anytime. In fact, with more than 25,000 channels in over 30 countries, analog with Dolby SR is a firmly-established format you can't afford to ignore.

Put it to the test

Call your Dolby dealer to arrange for a demo at your facility. Hear for yourself why Dolby SR is

the sound investment for analog multitracks in today's competitive marketplace.

From the Publisher

Dear Reader:

The 1990 edition of Billboard's **International Recording Equipment & Studio Directory** has the latest and most updated information regarding equipment manufacturers and recording studios throughout the world.

Billboard is extremely proud to have been the leader in studio directory publishing during the past twenty years. Our research staff and directory central operations have spent long hours in an effort to guarantee the accuracy of the information contained within this directory. We request users and advertisers to keep in touch with our Nashville Directories Central operation at (615) 321-4273, with regard to any and all listing changes throughout the year.

In the 1990 edition, you will find a completely new Brand Usage Study covering 528 U.S. studios who have responded to us about equipment and tape use for 17 categories.

Although the growth of the recording industry is in your hands, Billboard offers you a weekly voice, and in addition to this directory, we also publish the following: International Buyer's Guide, International Manufacturing & Packaging Directory, International Talent & Touring Directory and the Country Music Sourcebook Directory.

Thank you for your continued support and we welcome your comments and views.

Cordially yours,

Ronald E. Willman

Meyer Sound redefines the near-field monitor with the introduction of our HD-1 High Definition Recording Monitor. The HD-1 was designed to provide the most stable, accurate imaging available today. With an extended low frequency response to 32Hz, the HD-1 needs no external

subwoofer. And the control electronics and power amplifier are built in the cabinet, eliminating the need for additional equipment or rack space. Contact us or your Meyer Sound dealer and listen to the HD-1.

There's no need to wait any longer.

Brand Usage Response Survey (U.S.)

This special Billboard survey of recording studio equipment usage was compiled from questionnaires returned by 528 U.S. recording and mastering studios from June-August 1989. Not necessarily reflecting the exact total situation in studios, the calculation shows the percentage of studios using each brand and the percentage of brand responses attained by each brand.

Listed below each category heading are the number of studios reporting information for the particular category and the number of brand responses reported by the studios. Since a studio could list more than one brand, the number of brand responses always will be greater than the number of studios.

The percentage of studios figure, which measures the strength of a brand independent of the other brands, typically will have a total percentage figure per category that far exceeds 100%. The percentage of brand responses figure, which accounts for a particular brand's position relative to the other brands, will total 100% per category. Note that the percentage of brand responses does not account for the number of items of equipment used by each studio. Thus, this percentage is not a market share percentage of actual equipment pieces used.

To expand upon the difference between the two percentages, consider the following example. Assume that a category has 500 studios reporting an average of two brand responses each or a total of 1,000 brand responses (500 x 2). If 250 studios report that they use a particular brand, then it has 50% of the studios (250/500) and 25% of the brand responses (250/1,000).

	% of brand responses	% of studios

(RESPONSE SURVEY CONTINUED ON PAGE 10)

TRUTH...

OR
CONSEQUENCES.

If you haven't heard JBL's new generation of Studio Monitors, you haven't heard the "truth" about your sound.

TRUTH: A lot of monitors "color" their sound. They don't deliver truly flat response. Their technology is full of compromises. Their components are from a variety of sources, and not designed to precisely integrate with each other.

CONSEQUENCES: Bad mixes. Re-mixes. Having to "trash" an entire session. Or worst of all, no mixes because clients simply don't come back.

TRUTH: JBL eliminates these consequences by achieving a new "truth" in sound: JBL's remarkable new 4400 Series. The design, size, and materials have been specifically tailored to each monitor's function. For example, the 2-way 4406 6" Monitor is ideally designed for console or close-in listening. While the 2-way 8" 4408 is ideal for broadcast applications. The 3-way 10" 4410 Monitor captures maximum spatial detail at greater listening distances. And the 3-way 12" 4412 Monitor is mounted with a tight-cluster arrangement for close-in monitoring.

CONSEQUENCES: "Universal" monitors, those not specifically designed for a precise application or environment, invariably compromise technology, with inferior sound the result.

TRUTH: JBL's 4400 Series Studio Monitors achieve a new "truth" in sound with

an extended high frequency response that remains effortlessly smooth through the critical 3,000 to 20,000 Hz range. And even extends beyond audibility to 27 kHz, reducing phase shift within the audible band for a more open and natural sound. The 4400 Series' incomparable high end clarity is the result of JBL's use of pure titanium for its unique ribbed-dome tweeter and diamond surround, capable of withstanding forces surpassing a phenomenal 1000 G's.

CONSEQUENCES: When pushed hard, most tweeters simply fail. Transient detail blurs, and the material itself deforms and breaks down. Other materials can't take the stress, and crack under pressure.

TRUTH: The Frequency Dividing Network in each 4400 Series monitor allows optimum transitions between drivers in both amplitude and phase. The precisely calibrated reference controls let you adjust for personal preferences, room variations, and specific equalization.

CONSEQUENCES: When the interaction between drivers is not carefully orchestrated, the results can be edgy, indistinctive, or simply "false" sound.

TRUTH: All 4400 Studio Monitors feature JBL's exclusive Symmetrical Field Geometry magnetic structure, which dramatically reduces second harmonic

distortion, and is key in producing the 4400's deep, powerful, clean bass.

CONSEQUENCES: Conventional magnetic structures utilize non-symmetrical magnetic fields, which add significantly to distortion due to a nonlinear pull on the voice coil.

TRUTH: 4400 Series monitors also feature special low diffraction grill frame designs, which reduce time delay distortion. Extra-large voice coils and ultra-rigid cast frames result in both mechanical and thermal stability under heavy professional use.

CONSEQUENCES: For reasons of economics, monitors will often use stamped rather than cast frames, resulting in both mechanical distortion and power compression.

TRUTH: The JBL 4400 Studio Monitor Series captures the full dynamic range, extended high frequency, and precise character of your sound as no other monitors in the business. Experience the 4400 Series Studio Monitors at your JBL dealer's today.

CONSEQUENCES: You'll never know the "truth" until you do.

Your head is no place for information.

You want the sounds you record to stay where you can get at them and where they'll be safe. Not clogging the heads of someone's transport.

In the digital domain we don't hear the sound of the tape. Differences heard in sound are in the machine's abilities to interpret the stored data. So, your recording is unaffected by the character of the recording medium. However if your recording (data) is clinging to the heads of the recorder it is not much use. Furthermore it will cause write as well as read errors.

The old judgments on tape sonic performance become obsolete. *Quality* becomes critical: Quality tape with efficient binder and backing systems and quality equipment.

In addition to being of high quality, Panasonic DAT tape comes with our exclusive *One Year Road Hazard Warranty**. No matter what happens, if you can scrape up enough tape to send some back, we'll replace it. Guaranteed.

Don't settle for the false economy of inexpensive DAT tape. You have too much at stake. Visit a Panasonic dealer and tell him your head is no place for information.

* If Panasonic DAT tape fails to operate, for any reason, within a year of original purchase, send tape and proof of purchase to Panasonic AVSG, 6550 Katella Avenue, Cypress, CA 90630 ©1989 PIC.

JEFF BAXTER AND DIC//DAT

TAKE MUSIC TO THE Nth DEGREE.

THE DIC//DAT Musician's Musicians Series #1

PHOTOGRAPH: KOPITCHINSKI
LOCATION: SOUNDTRACK NY.

The title on the album read "Can't Buy a Thrill." But the music inside proved just the opposite. Steely Dan gave the world a thrill for the price of a record. And the guitar player that gave Steely Dan its thrills through three gold albums was Jeff "Skunk" Baxter.

Behind the console or in front of the mike, Skunk Baxter lets nothing get between him and his music. That's why his trademark clear plexi guitar synthesizer clearly isn't just for show. Its thermoplastic body means virtually zero resonance. Which means virtually zero interference. The purest sound. Music to the Nth Degree.

Like DIC//DAT. The definitive digital audio tape. The surface: Ultra-high density metal particles. The dispersion: Ultra-uniform. The result: Unsurpassed digital signal receptivity. And an unbelievable range and clarity way beyond vinyl. Beyond analog cassette. Beyond any way you've ever heard recorded music before.

The sound of the future. Available now to discerning pros.

DIC//DAT™
TAKING MUSIC TO THE Nth DEGREE.

2 University Plaza, Hackensack, NJ 07601

Ferric, Chrome	10,000;12,500;13,500		

Now there's much more to chrome than meets the eye.

The unmistakable new sound of UCR pure chrome audio tape from Sunkyoung.

UCR's optimum magnetic and mechanical properties result in digital sound quality on cassettes duplicated

What chrome once did for your eyes, it's finally doing for your ears.

at 64 to 1. If that sounds good to you, you'll be relieved to hear that you probably won't even need to readjust slaves when you switch.

You'll also appreciate the quality control you get from Sunkyoung's vertical integration. From our own

natural resources and refineries to our manufacturing plant and Technical Center in Los Angeles.

That means if you've heard one tape, you've heard them all. They're absolutely consistent.

If you can't wait to hear our

pure chrome tape, you're not alone.

Consumers can't either.

Our SKC audio cassettes are a big hit, too.

It just goes to show. Chrome was never meant to be seen and not heard.

Sunkyoung. Nobody carries a tune like we do.

SUNKYONG

Digital sound from analog tape.

Audio Tape Division, 17106 S. Avalon Blvd., Carson, CA 90746

U.S. Blank Tape Product Charts—PRO-INDUSTRIAL PRODUCTS ONLY

These products are used for superior audio performance in studios and/or duplication of prerecorded products and commercials. The video products listed are for broadcast reproduction and for high speed duplication and other professional video applications.

College for Recording Arts

665 HARRISON STREET • SAN FRANCISCO, CALIFORNIA 94107 • (415) 781-6306

To save you time and money we've just spent over 546 hours training your next employee!

When money and time are tight, you can't afford to train an employee from scratch. Our graduates have spent a full year in an intensive study of Audio Engineering, Music Production, Studio Electronics, Music Business and Finance, Copyright Laws and Entertainment Contracts. They're young, knowledgeable, and—because they're well trained—effective from the start. Graduates and referrals among the Majors!

If you are in need of someone already possessing the basic knowledge and skills of the industry, we might just have the person to fit your situation. If you know a promising and talented person that you'd like to help along, why not let us train them for you!

The school is accredited by the Accrediting Commission of the National Association of Trade and Technical Schools (NATTS), approved by the Calif. Superintendent of Public Instruction, approved for Veteran training, and is authorized under Federal law to enroll non-immigrant alien students. It is also endorsed by the National Academy for Recording Arts and Sciences Training Institute.

What Everybody Wants

But Can't Seem To Get Enough Of...

More Toys!

Why Come to Columbus?

For starters, there's a 60 input Neve V series
with GML automation.
(could a 72 input VR be far away?)

Not to mention 2 Studer A-820 24 tracks
loaded with Dolby SR.
(a Mitsubishi X-880 is also on the horizon.)

We're also adding a second room for overdubs,
centered around a Neve 8232.

Outboard toys? There's plenty to keep you
amused & confused.

Curious about sequencing, sampling, and
other such fare?

MIDILAND is the rig for the gig. A whole bunch
of way-wow stuff set up in a central room with
complete ties into both studios.

And while our downtown condo and private
limo may not make your project sound better,
they do tend to make the
whole experience a little more fun!

So call, write, or FAX us for the complete
details, and keep watching for more new toys
on the way soon!

(Sorry, the race car is the Big Guy's toy.)

394 Mt. Vernon, Columbus, Ohio 43215

The art of shaping sound.

SONEX is a high-performance acoustical foam that upgrades your studio inexpensively. Ideal for a temporary isolation booth, it can also eliminate slap echo and harsh resonances in the main room or silence noisy tape equipment in the control booth.

Write for our color brochure today.
