The Graces, "Lay Down Your Arms", A&M....

Ah, the Go-Go's! Who can forget the innocence and joy that those lovely ladies from out West brought to the dial at the start of the decade. In the years since their demise, the only member to click on the hit parade has been Belinda Carlisle, with what was much more of a CHR success than anything else. Well, move over Belinda because lead guitarist and principal Go-Go songwriter, Charlotte Caffey has come up with a new band that can't miss. Teaming with Gia Ciambotti and Meredith Brooks, she has a new combo called The Graces and this 4 minutes of pure pop is bound to connect with now people of all ages. More of a muscular sound than her former band with all of the same "girl group" charm. Comparisons with The Bangles are inevitable, but we detect a bit of Til Tuesday as well, especially in the chorus. When it comes to singalong hooks, you won't find a bigger one than this, and the Edge-like guitar accents only add to the tune's instapleal. Co-produced by Charlotte, Ellen Shipley and former Utopian Ralph Schuckett, with the one and only Jimmy Iovine serving as exec-producer. We can honestly say that "Lay Down" is just one of the many highlights of the "Perfect View" Lp. Don't let The Graces slip by you.

Katrina And The Waves, "That's The Way",

SBK.... A splash of vintage Hammond organ kicks off the return of Katrina And The Waves, and their streak for penning Summer anthems remains intact. The first disk with that SBK logo around the hole will have countless quarters dropping in boardwalk jukeboxes and the beach blanket wireless will have suntan oil all over the volume knob every time it hits the air. You can almost hear the surfside singalong to the "Whoa, Whoa Whoa" of the chorus, and the volleyball crossing the net in perfect time with the pounding tom toms. The band has been together nearly a decade, and the two years since their last record have been spent writing and recording the material for their "Break Of Hearts" release. In the early days ex-Soft Boy Kimberly Rew was responsible for the bulk of the songwriting, but on their third longplayer the entire band has written the songs. With the original line-up still intact, they feel they have finally captured the real sound of the band on record. Many of us first heard of them through The Bangles cover of "Going Down To Liverpool", but it wasn't long before we were all "Walking On Sunshine". Get ready to discover Katrina And The Waves all over again.

Jason And The Scorchers, "Find You",

A&M.... They helped put the rock back in Nashville when they blasted out a turbocharged cover of Dylan's "Absolutely Sweet Marie" on their early 80's indie debut. That disk was picked up by EMI, and reworked into a full length Lp that set the critics corner searching for new ways to shout their praise. But unfortunately Jason and Co. have yet to reap the level of commercial success predicted, even though songs like "Golden Ball And Chain" and "Shop It Around" did get plenty of play. With a fresh start at a new label, we find Mr. Ringenberg continuing to serve up his unique blend of power chords and cowpunk, forging elements of each into a potent brew of pure rock and roll. The new "Thunder And Fire" album was produced by Muscle Shoals legend Barry Beckett, and this first track is just what you'd expect from the Scorchers. Great guitar work by Warner Hodges, a man who's been known to do 360's on stage while never missing a lightning lick, and a rhythm section that must sweat in time. Back in the early days they removed Nashville from their name so they wouldn't be labeled a country band, but one listen is all it will take for you to realize that this is rock and roll all the way. Early play at a half dozen including KABL, WBER and WHTG.

HARD ACTS TO FOLLOW**Lou Reed, "Romeo Had Juliette", Warner**

Brothers.... It is kind of symbolic to have Lou share the same front page space with Dion. These two artists have a lot more in common than most would imagine, both are proud of their New York roots, they have similar drug horror stories and they also have been lavished with much more praise from the critics than their more recent sales figures reflect. Of course with Lou's latest about 70,000 units shy of the Gold mark it appears that last point is finally starting to change, and where Dion's voice has been his main vehicle, it's Reed's uncanny ability to put those streets he loves/hates clearly into the mind's eye with words that have ingrained him in the brains of so many. This track is another example of Lou's ability to give us a front row seat in a neighborhood we'd be too afraid to wander in after dark. That it's a love song underneath the grit is only further proof of why he's regarded as an artist of the first degree. For those familiar with the album version, fear not "shit" is removed for airplay. Make sure you give it plenty, KPEZ already is.

Hoodoo Gurus, "Come Anytime", RCA....

These critics' darlings from Down Under have come back with a new label, and their first Nipperland album offering will be called "Magnum Cum Louder". They've been compared and contrasted with a number of musical newworthys, but if the truth be known, The Hoodoo Gurus are very much their own band. The reason many use comparisons could be because The Gurus' music evokes memories of rock's glory days. But while they have influences firmly rooted in the past, this is an outfit more than capable of coming up with a sound riffs ahead of the times. For "Come Anytime" we'll compare the band to themselves; howzat for a switch? It borrows from their excellent "I Want You Back", and if you were compiling a list of songs that should have been hits that one would easily make the Top 10! "Come" is a perfect Summertime radio song, and the Alternative side of the dial is already eating it up, and the Hard Hundred shows a 95* debut before the box. With guaranteed full scale label support and an upcoming tour, we see this lead off track to the band's fourth album being the one to turn the trick here in the States.

Boris Grebenshikov, "Radio Silence",

Columbia.... The title track from this historic debut has been welcomed with support from stations such as KBCO, KRZQ, WBCN, WEQX, WDRE, WDHA, WFNX, WHFS, WLVO, WNEW and many more. The Hard Hundred shows a 86-85* move, but the Holiday reporting schedule has things slowed down all over, and we anticipate a much better jump in the week ahead. Sure there's been a bundle of pre-sell press action, but the Batman movie didn't exactly sneak on the scene either, and the advance word on Boris doesn't even come close to the Caped Crusader's clippings. As you probably know, this is Boris' first attempt at composing in the English language, with all his previous work done using his native tongue. No doubt his writing and singing reveals that he has spent many hours listening to music from the West. Admittedly he has been heavily influenced by The Beatles, and they pop up throughout in the fabric of many of the record's songs. But they are not alone in the inspiration department. "The Wind", featuring Annie Lennox, reminds us of The Strawbs circa "Ghosts", and Peter Gabriel along with producer Dave Stewart's Eurythmics are definitely echoed in a few other selections. While it would be easy to write this album off as a product of politics, it would also be a major mistake. "Radio Silence" is the real thing, and even if Boris Grebenshikov came from Cleveland he would be a star on the rise worth paying attention to.

Stage Dolls, "Stage Dolls", Chrysalis....

The first track these heart throbs from Norway unleashed has gotten their latest longplayer off and running. New at KEZO, KFMG, KFMQ, KFMX, KQWB, KRZQ, WKQQ and WRCN, with steady action from KEZE, KILO, KISS, KJJO, KLOL, KUPD, WAOR, WGIR, WLVO, WLZR, WONE, WQFM, WRXX, WSHE, WTPA and many more. In a week of small moves, their 93-80* Hard Hundred jump is one that's worth noting. Andy Dean at WDHA is one of the band's earliest supporters, "I think this is one of the best sounding songs currently on WDHA, and even though it's too early to gauge the audience, my gut says this could be a multi format smash. So the time for AOR to get on it, is now. They have the look, and a mile wide hook!".... Now that their first full length Chrysalis release has arrived you'll find it full of just the kind of major hooks that Mr. Dean is referring to. Start with "Still In Love" or "Mystery", but make sure you check "Lorraine" and "Don't Stop Believin'" too. The latter is not the Journey song. The best thing on the whole shebang might be "Ammunition", but whether you agree or not, you'll have to admit that this sucker is loaded.

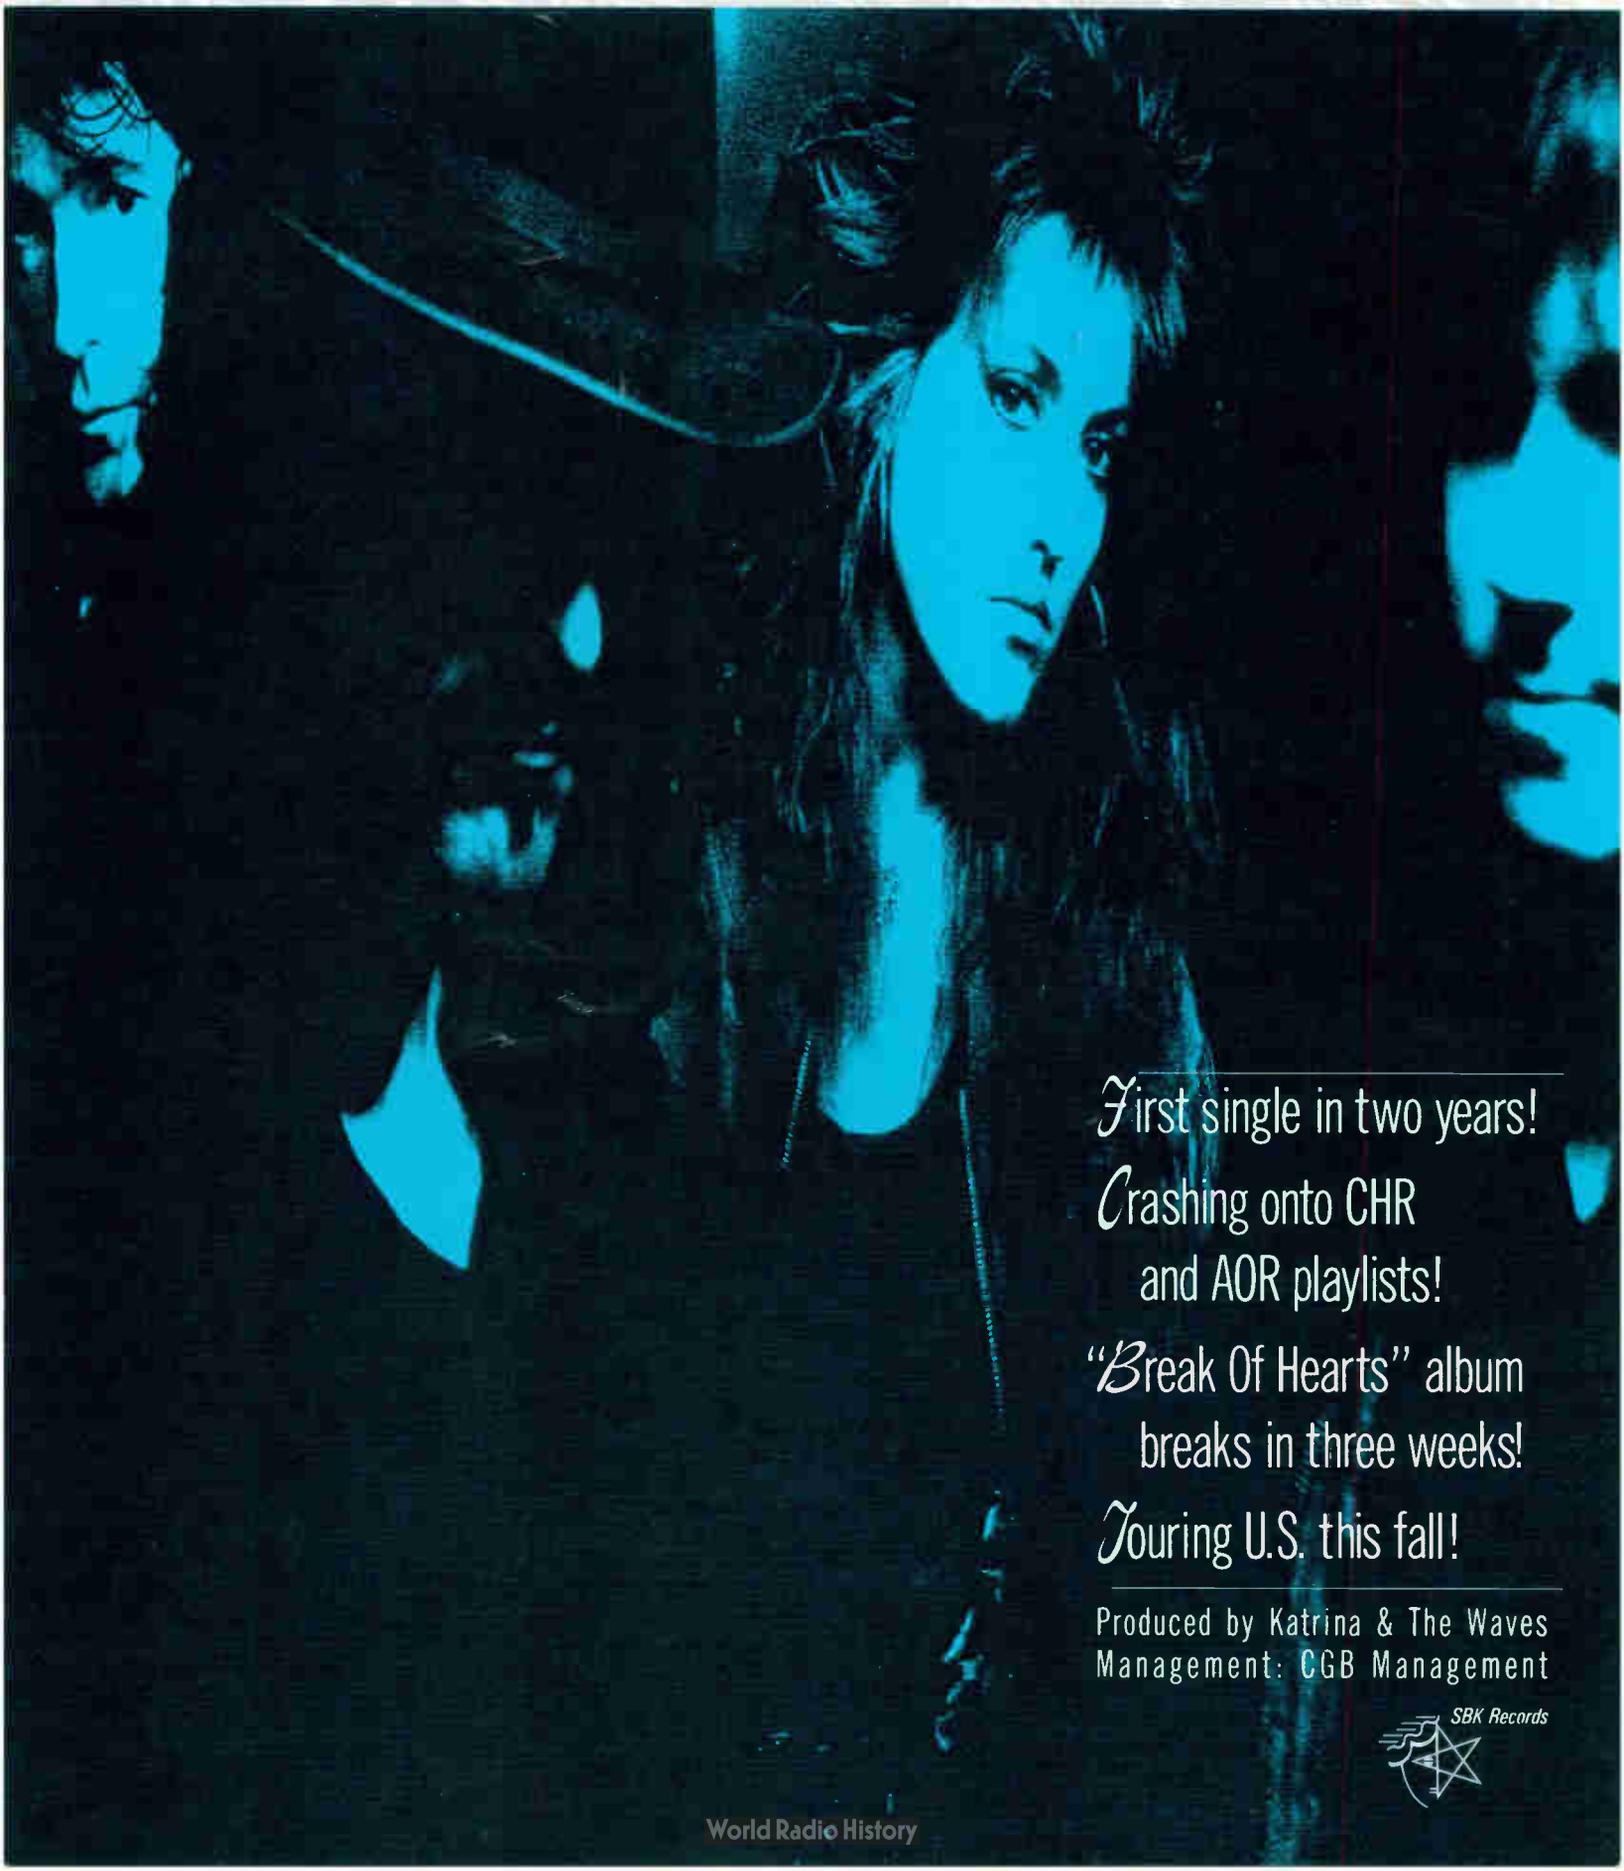

Dion, "And The Night Stood Still", Arista....

If you harbor the opinion that the Doo Wop boys of yesterday are unable to sound contemporary, than obviously "Yo Frankie" has yet to get any turntable time. If that's the case, we suggest spinning this latest emphasis cut right away. Written by Diane Warren, it's a tale of love at first sight, and finds "The Wanderer" still in possession of a mighty set of pipes. On backing vocals the king of the New York streets is joined by a lady who has sprung from the same real estate, Patty Smyth. The rest of the Dave Edmunds produced session is rounded out by names like Jim Horn on sax, Chuck Leavell on keyboards, Phil Chen on bass and Terry Williams on drums. But Mr. DiMucci could have recorded with a cast of unknowns and still gotten our attention. Because when you hear the name Dion, the first thing that pops out of the memory bank is a voice that should always be spelled in capital letters. His influence in the area of rock and roll vocals is monumental, and we're thrilled to have him back where he belongs.

Little Feat, "Rad Gumbo", Arista.... This track from the "Road House" soundtrack has been getting play from the beginning, and now the official push will move it into the upper reaches of chartland. Currently 75-72* on the Hard Hundred, with new action at KKTX, KZEW and WEQX, and steady support from KBCO, KPEZ, KSHE, KZAP, WDHA, WFBQ, WMMR, WNEW, WPYX, WTPA, WVVV, DC101 and many more. Da Feats came back in a big way with their reunion outing, and there's no reason why this won't continue to let it roll. A stomping shuffle that could have been lifted from "Dixie Chicken", "Rad" is a tasty dish that will slide down the gullet of upper demo land like ice cold brew at a Bar-B-Q. As new arrival Fran Kusala at WEQX sez, "They got some ragin' cajun boogie goin' down! This is a cool, cool record that kicks ya in the butt and keeps on kickin'.... While the "Road House" soundtrack has supplied us with many tracks for airplay, don't be surprised if this Feat number logs the most playlist miles of them all. Skin it back!

World Trade, "Revolution Song", Polydor.... When you are told that a new band from L.A. is about to make a dent on the scene, this is the last thing you expect to hear them sound like. World Trade harken back to rock's more progressive age, the days of "Fragile" and "Watcher Of The Skies", and not just because of their musical structure. These are lyrics with a purpose, a message, sharp -- distant-- meaning. Color us hippies if you must, but we love it! Produced by veteran Keith Olsen and the band, the Yes sound alike cry will be heard, but listen closer and you'll hear a lot more. This ain't Starcastle, or Klaatu, or for that matter even Flash! The main thrust of the band is the writing team of lead singer Billy Sherwood and guitarist Bruce Gowdy. Billy has been offered the front spot with Yes, but turned it down due to his belief in this band. He has been writing songs with Chris Squire, but he's staying put in World Trade. Bruce was the axe man with Lenny Wolf's Stone Fury for years, but these two aren't the only members with credentials. The remaining members of this talented quartet are Guy Allison, who was the touring keyboardist with the Moody Blues on their last tour, and drummer Mark Williams has excellent bloodlines as the offspring of famous film composer John Williams. It's hard to believe they're all 21 or under, especially after listening to this stunning debut. Do so at once!

NEW PLAY PRIORITIES

Queen, "Was It All Worth It", Capitol.... There's certainly no shortage of quality material on "The Miracle", so speculation for a follow-up cut to the chart topping "I Want It All" has been a fun guessing game. For second dip depth we have a track that is already on WBCN, KIL0, KISS, WCCC, WSHE and WYNF, and one that will appeal to fans of all stages of the band's career. It's new this week at KNCN, KRZQ and KXRX, as they get an early shot in on the closest thing to the classic Queen sound the album has to offer. You can hear the dramatic delivery of "Bohemian Rhapsody", the liquid guitar runs of "Flick Of The Wrist" and the mass appeal bombast of "We Are The Champions" merged with symphonic undertones worthy of "West Side Story". Guitar heavy and near gothic in style, this contains the right combination of cross demo elements that will enable the band to continue their solid re-entry to the rock radio rave-o-rama. Brian May has reached into his bag of licks, and in this tune alone has come up with more air guitar satisfiers than most players manage to work into an entire album. Not even Freddie's refusal to tour in support of the new album will slow Queen down. It broke the Gold barrier in three weeks, and was the #1 In-Store Play choice as soon as it hit the shelves. Need further convincing? We didn't think so!

Richard Marx, "Nothin' You Can Do About It", EMI.... Even though "Satisfied" rode up the AOR charts like a vampire at a blood bank, every programmer we talked to said "Nothin'" was the song that was perfect for the format. You know what? They were right, and now's the time to prove it. Richard rocks out, and with the guitar pyrotechnics of Steve Lukather on hand for support he's about to shed any notions of "too sweet to deliver the meat" once and for all. This pup is a full pedigreed smash, and if you can't hear that for yourself, maybe next 4th Of July you should keep those exploding M80's away from ya face. The first verse tells the whole story, and we're waiting for the comments of "Boy, I always knew you could" from those who have been waiting for this cool customer to let his hair down. Richard is about to embark on a Worldwide tour, but before he leaves the Country he will be doing about a dozen warm-up club dates in key markets. For further information make sure you get in touch with your local EMI rep. For now, look for this track to add a healthy chunk of figures on to the Million-plus the album has already rung up.

House Of Lords, "Jealous Heart", Simmons/RCA.... The very first release on Gene Simmons' custom label has been with us for a while, and judging by the continued 1,000 piece a week sales figures, it is planning to stay around a while longer. Total sales are well over the 200,000 mark, and radio is calling for another track to expose. Our ears on the street say this is the one, not to mention the already Heavy play at WQFM and steady support from others like WAPL. Gregg Giuffria's post Angel outfit has proven that they have the kind of core quality control that clicks, and this mid-tempo beauty will slide on your list with ease. Hot off a show stopping performance at Milwaukee's Summerfest, they continue to blaze one of the hardest working trails on the concert circuit. Co-produced by Andy Johns this third dip into their eponymous debut waxing will bring Gregg and the boys near the Gold mark they deserve.

Henry Lee Summer, "Treat Her Like A Lady", Epic.... Ya gotta hand it to this lanky rocker from Indiana, when he covers a tune he picks one that everybody knows but most have forgotten. Way back in 1971 The Cornelious Bros. & Sister Rose had a Top 5 Pop smash with this funky "Respect" meets Sly Stone ditty, and one hit wonder or not it still sounds great on the air today. Henry holds true to the original arrangement, complete with female backing and a very convincing soulful strut of his own. It's a built in trivia contest, since the majority of the public has always thought the song was by Sly And The Family Stone, and when you try a name the artist with this cover not only will they never guess who-- but where it came from will have them puzzled as well! He's already scored with "Hey Baby" and the title track, but it's the time of the season for fun on the dial, and this will have pleasure seekers raising the roof along with the volume. Already on WKQQ (Heavy!) and WFBQ, with new air at KRZQ.

Todd Rundgren, "Can't Stop Running", Warner Brothers.... "The Want Of A Nail" has put Todd back on firm ground at the format, but as anyone who has spent time with "Nearly Human" will admit that tune is only the tip of the iceberg. For track two we have a song that utilizes his Philly Soul roots, and marks the only album appearance of all his Utopia mates. Willie Wilcox, Kasim Sulton and Roger Powell are all on the session, along with luminaries such as Mingo Lewis (Santana/Chick Corea), Prairie Prince (The Tubes) and Brent and Larry from Bourgeois Tagg. It's getting early support from KFMU, KOME, WLAV and WLUP. We can't remember when we've heard Todd in such fine voice, and the live in the studio recording makes certain that the energy of the performance is intact. He's just hitting the road with a full eleven piece band in support. There will be no Utopians, but with members of The Tubes, Steve Miller's Band, The News and Bourgeois Tagg along you can bet the level of musicianship will be as high as it goes. Word has it that Bobby Womack will be joining Todd at a select few shows for a duet on "Want Of A Nail", and if you really want to feel old one of the background singers will be Jenny Muldaur -- Maria's daughter!

Paul McCartney, "Figure Of Eight", Capitol.... This is one of the album's Trevor Horn productions, and also the tune that we heard as single material from our first listen to "Flowers In The Dirt". Since the programming community has named this their general consensus cut for follow-up, it's only natural that the Capitol gang comply. Paul has lived up to the pre-release reports of delivering quality material, and "Figure" will fit just fine on the path blazed by "My Brave Face". With all the excitement regarding his Elvis collaborations, the fact that he has been able to author some new winners on his own has been a bit obscured. This will put Paulie's pen back in the spotlight, and he once again demonstrates his ability as a multi-instrumentalist by performing the lion's share of the backing track himself. The album is selling like crazy, and the upcoming tour is a lock to be one of the hottest tickets in history. This is the perfect way to keep Paul on the air, and your call letters involved in the upcoming tour hysteria. Already on KBCO, KIL0, KLBJ, KQRS, KUPD, WBAB, WCCC and many more, with new Adds at WGIR and WPDH. 84-83* on the Hard Hundred.

MORE HARD ACTS

Mr. Big, "Addicted To That Rush", Atlantic....

Get ready for one of the rockinest rides down the Turnpike ever envisioned by modern man. Sure, we expect those six and four-string sizzlers to push things around in the speaker, but a dual solo in the intro? Not bad, mis amigos. Face facts DLR, Mr. Sheehan's work is a pleasure no matter who he hammers his chopos with. In fact, this song is such a fluid delight, that it brings to mind many a late night jam edged on by the sheer power of abandon. These are among the more skilled residents atop the musician's food chain. They are the killer whales of the studio ladder and they fear no member of the animal kingdom. This is not just a job, it's a recreation, and isn't that the best kind of vocation? Just ask the men in top hats and worn shoes. The video has blasted bims from the corners of the club and, one thing is certain, you will end up with nothing less than 100% pure rock extract. Added this week at KZEW and on the Hundred at 65-60*.

BoDeans, "You Don't Get Much", Reprise/Slash....

At one of the seemingly endless BBQ's this past weekend, this band served to raise quite a few forehead hairs. One programmer in attendance, WXRT's Lin Brehmer, just had to testify, "When 100,000 people can sing along to a variety of songs from the BoDeans at a concert, you expect this Midwestern sensation to knockout this country coast to coast."... We have been hollering about this band for years and now the payoff is beginning to break over the horizon. Give the "Home" album that deserved place in your living room rotation and the transition to more official airplay will follow apace. Melodic charm and picturesque integrity have always been part of the BoDeans magic and these are still in prevalent abundance. Stretching into the top third of the Hard Hundred at 30-28*. New this week at KFMX, KGB, KMJX, KTXQ, WONE and WRIK and increased at KFMU, WBCN and WHFS.

Indio, "Hard Sun", A&M....

First listen nay-sayers are starting to look for an easy out on this one. Desperate to not seem too musically out of sync, they are coming up with the typical flaccid excuses... "The sun was in my eyes, I had a rock in my shoe, my Mom is calling me", anything to escape the obvious. The hook is there, but it's handed to you in such a suave manner that you just can't pin it down into a few measures. Nice going, Gordon. In fact, the choir heard throughout contains at least one famous other voice, Joni Mitchell. In this helio-centric world, this song serves as a handy theme without getting into that nasty greenhouse effect. Many calls are rolling out the red floor covering for Indio. The welcome is well deserved. Over in the data department, Heavy or better play rolls in from CHEZ, CHOM, WFNX, WGIR, WMDK and WTPA. New stations? 3 adds at KQWB, KUPD and WBLM, 2 increases at CHOM and KXRX, all tallying for a Hundred move of 64-61*.

Badlands, "Dreams In The Dark", Atlantic....

Rock just got a little prettier, and we like to think that Ray Gillen had at least a small part to play in this evolution. After all, some of us like chest hair that sprouts like a hormonal experiment gone mad. It's not exactly getting easier for a budding musician to cut the dijon without at least a passable photo portfolio and these lads have the stuff to plaster pics with the best of them. But with the searing work of these gentlemen, even their dapper appearance might be overlooked, if only for a second. Over in that quaint corner we call metal-land, only two groups have dominated the top slot over a period of weeks, that turf is not for the timid of guitar. Well, metal campers everywhere already know that this is Badlands' fourth consecutive week in that spot. On the Hard Hundred, it moves 56-52*. Airplay analysis counted 5 new stations, KFMX, KGB, WBLM, WPDH and WWTR.

Steve Winwood, "Time Is Running Out", Island....

With all the retro-mania encompassing the culture it's important to remember that much of the sounds being retread these days came from legendary players like Steve. That Island has seen fit to re-release Steve's debut solo record proves that time frequently serves to enhance, not obscure real talent. Those hypnotic psyche-keyboards and Steve's voice has been rarely heard so unencumbered by over compensating studio techs. His voice has always been an unalloyed delight and this release reminds one how fresh and clean sounding the man has always been. The fact that this has been out of print, and never available on CD, should be enough to encourage your active Adult Core to get in frenzy to know the who what and why behind this project. And guess who will be there to tell them. Added this week at KFMZ, KTAO, WGIR and WLLZ and played already at WAAF, KEZE, KLOS, WAPL and WBLM. Edging on the Hard Hundred at 100*.

Lita Ford, "Falling In And Out Of Love", RCA....

Some of us familiar with the "Lita" record predicted the success of "Close My Eyes" right from the get go. And, true to form, that one went an overwhelming distance in surpassing all our forecasts. It's hard to believe that this is still the same album making the current rounds. Once that memory surge passes, spin this little offering and watch those well blinkered CHR's across town twitch like a frog on electrodes. Remember who places those hoops in the great format universe and think back on that recent lesson learned from "Close My Eyes". Where AOR goes, the boys in polyester are bound to follow. This time around Lita switches the acoustic tone for a leaner and rawer mix of power-singed fury that provides just the right poise for that distinctive throat work. 74-66* is the HH score, and for adds, try 8 from the likes of KGB, KMJX, KWHL and WDIZ.

Tin Machine, "Heaven's In Here", EMI....

David is one of few artists compelled to rotate images like seasonal sack cloth. All we can say is, nice closet. This latest shedding of skin involves a well-mannered 3-piece approach with all the electronic politeness of warped and inverted static. The second cut from the eponymous LP happens to be the disc's opening slice of intensity and couldn't have been better positioned at that. Now that you're fresh off the wallopping chart moves of "Under The God", keep the momentum at top pace with numero dos. From what our Mr. Marrone keeps telling us about The World gig last month, this is a show not to be missed. Karen Andersen Small at WGIR says, "Tin Machine's 'Heaven's In Here' is a better tune than 'Under The God'. It's got that feel of classic Bowie with some ominous undertones, good stuff"... Steaming in with 7 adds from Karen's calls, KKEG, KMJX, KXRX, WFNX, WMDK and WTKX. With this action, it Debuts on the Hard Hundred at 99*.

Queensryche, "I Don't Believe In Love", EMI....

You know the outline by now: touring, critical acclaim, a faithful following screaming for other ears to listen. Well, several of us here are happy boys and girls that they've finally transcended Gold sales and more national exposure. Still, we can't help it, we are very greedy and we want more. So dish it up, team! Face the facts, all these laudable milestones are important, but if the band isn't ready to rest on their Mindcrime laurels, why should you be backing down? Word is that they're back in the burbs of Seattle and in a full lather to put another album out. While they slave away on even more mind movers, be sure to keep the eyes peeled for the home video coming your way this month or next. It features videos for most of the songs off the album and believe me you, "Eyes Of A Stranger" and "I Don't Believe In Love" were just teasers to an even more involved plot as you will see. Moving steadily on the HH at 94-86*.

Jackson Browne, "Chasing You Into The Light", Elektra....

Now that we've decided what track AOR should bring to our attention, let's get started with a healthy 100-92* up the Hard Hundred. This is a robust, mid-tempo kicker that appeals to the warm, passionate soul in all of us. The guitars are key to the whole sound of this album and they are nowhere more in evidence than on this track. No silly, lust driven affairs or pretentious romantic delusions motivate a Jackson Browne, just a very human statement about the ee-gawd "relationships" we face every day and night. Right? You bet, bubba. So let's all make adds together and establish this as one of Jackson's most memorable tunes yet for radio, it certainly is deserving of that treatment. Almost 20 stations are doing their bit, with 3 new plays from KFMF, KFMG and KXRX. The potential for airplay is just waiting to roll in next week, we can feel it like a fast cash run at the dice tables. Already KBCO, KLBJ, KQRS and WROV are giving this one the Heavy treatment and these folks know how to get the job done.

House Of Freaks, "When The Hammer Came Down", Rhino....

In a week where even the staunchest chart creatures found themselves stuck in a morass of frozen radio reports, one act had the stuff to slip through those cracks and muster a 99-97* move on the Hard Hundred. Once people start wandering back to their offices and their turntables, we'll see how this fares, but our expectation is that the action is just getting going for this talented duo. Rhino commands respect for their frequent trips down the dark alleys of esoteric releases and re-issues. This time they are out there in the bright sunlight of Mainstream potential with a band and song that has juiced our interest for months now. Our phone line has been getting requests for the hold button bangers that these gents crank out, so let's get the action up and running on the real thing. Let those around you decide on the absolute airplay viability of the Freaks, and take the pressure off of yourself. Your conscience wouldn't have it any other way.

“RAD” RAVES...

Curt Gary, DC101
 “More satisfying than instant soup, Little Feat’s ‘Rad Gumbo’ produces instant phones . . . Just add radio. The perfect way to spice up any daypart. This ain’t nouvelle cuisine, it’s rock and roll and its on DC101!”

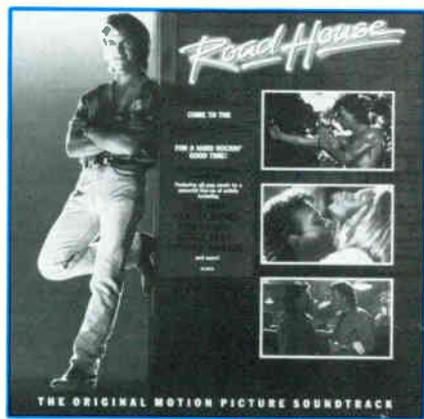

Dave Logan, WNEW
 “Little Feat has always been one of WNEW-FM’s favorite bands and ‘Rad Gumbo’ continues the love affair. Gritty and gutsy rock ‘n’ roll is what they do best and this one fits the bill. Top 5 Phones!”

Al Hofer, KSHE
 “If your audience can stand the spice, Little Feat’s ‘Rad Gumbo’ works real nice . . . This track picks up where Let It Roll left off!”

Erin Riley, WMMR
 “First you add the song. Then a pinch of airplay. A bunch of sales follow a ton of requests. What have you got? Why ‘Rad Gumbo’, of course.”

Syd Straw, "Future 40's", Virgin.... For once in this over-imaged biz, close your eyelids and get to this former Palimino vocalist. Amazed? Okay, now you can open your eyes and look at the name on the spinning circular label. Fran Kusala over at WEQX can't spit it out without revealing his mercury, "Check out the incredible Syd Straw along with Michael Stipe on 'Future 40's' sounds just great! Give this entire album 'Surprise' a listen. Syd's HOT!!" Do you want your temperature taken? A chance at seeing her live will underline the raw and ready truth, Syd Straw is a star waiting to happen. The album is an exuberant collection of great singing, and nobody nails our female turntable more securely than the Strawster. She's not just going to corral her former G.P. followers, nope, it's time for a whole new group of appreciative listeners to get next to this remarkable talent. Start your very own "String Of Pearls" with this gleaming orb of pop superiority, try "Surprise" on for size. Added at WEQX, WBCN and WMAD and increased at WHFS. Debuting on the Hard Hundred at 98*.

ON DECK

With
Mike Marrone

Welcome back to all of you trying to recover from the nutty extended Holiday. Is it only New York and New Jersey that has people blowing fingers, hands and even arms off with fireworks this time of the year, or do all of you get a share of the insanity?.... Oh well, one stop on this kid's vacation calendar was filled by seeing Tommy Keene and band live at The Green

Parrot in Neptune, N.J., and being a fan since the Dolphin Records days the anticipation of finally catching the live show was mighty

high. Tommy certainly didn't disappoint! The band ripped through favorites old and new, including most of the latest Geffen release "Based On Happy Times", and dating back to the incredible "Back To Zero Now". Why this man is not a major star is the sort of thing that keeps this reporter awake at night, and as for songwriting there are few that have the pop smarts of Mr. Keene. When he blasted out a version of "Shake Some Action" it only served to plaster a smile on the face of yours truly that lasted the entire extended weekend.... Speaking of that chestnut, "The Groovies Greatest Grooves" is about ten days away from release, and if having a Flamin Groovies retrospective

picked by Howie Klein, with tons of unavailable and non-Lp tracks doesn't wet your appetite, maybe you're waiting for Atlantic to

re-issue the Jo Mama albums! This will be available on CD, and a polite call to your Sire/WB rep might reserve a copy for your station.... While we're on the subject of re-issues, Enigma Records was smart enough to purchase the rights to Frank Zappa's old Straight, Discreet and Bizarre labels, and apart from Zappa/Mothers records have began releasing a series of long sought-after albums. Under the banner Enigma Retro they have put out the first two Alice Cooper records, "Pretties For You" and "Easy Action", Ted Nugent And The Amboy Dukes' "Call Of The Wild" and "Tooth Fang And Claw", The GTO's "Permanent Damage", Captain Beefhart's "Lick My Decals Off Baby" and the late great Tim Buckley's "Blue Afternoon", "Starsailor", "Greetings From L.A." and "Look At The Fool". They also plan to issue Lenny Bruce's "The Berkely Concert" and Lord Buckley's "His Most Immaculate-ly Hip". With Ryko taking care of the Zappa records from the period, it seems

that only Wildman Fisher's masterpiece "An Evening With" will remain out of print. Is this a great country or what?.... A band that has always straddled the avant garde and have been the inspiration for countless imitators has recently released their most accessible record. Pere Ubu's "Cloudland" on Fonana/Polydor has a song called "Waiting For Mary" that will work on any rock station if given the chance. David Thomas and gang have proved from the beginning that great things do come from Cleveland, and if you're a fan of pre-"Sledgehammer" Peter Gabriel this record will be a welcome addition.... The boys and girls at Virgin Records have a few highlights on the release horizon. The new Warren Zevon album is without a title as of yet, but the lead track will be called "Run Straight Down" and it features David Gilmour on lead guitar. Another big name is involved in this August release, Jerry Garcia lends his famous nine fingers to several cuts on the album. The same month look for Camper Van Beethoven's latest on Virgin Records called "Key Lime Pie".... August is also the ETA for a new John Lee Hooker release on Chameleon Records. "The Healer" will feature some all star guests paying homage to a man that has been a life long inspiration. Robert Cray, Bonnie Raitt, Los Lobos, Carlos Santana, George Thorogood, Charlie Musslewhite and the surviving members of Canned Heat all make an appearance on the album which is the 111th of the man's career! For those who haven't made it past the Who tracks, please check out Mr. Hooker on Pete Townshend's latest Lp. The song "I Eat Heavy Metal" is really the highlight of the album.... Geffen Records has snapped up one of the Big Apple's biggest indie groups, Sonic Youth. It may take a while, but this band will be recognized as the innovators they are. As they've progressed they have become more and more accessible, and whether that's a case of us catching up or them changing is up to you to decide. What could be their last indie release has been shipped by Blast First. It's an Ep with a remix from "Daydream Nation" and three live tracks.... For those excited by the earlier mention of Alice Cooper, be aware that Grudge Records have just shipped a new band called Deadringer that features long time Cooper co-patriots Neil Smith and Dennis Dunaway, along with former Blue Oyster Cult member Joe Bouchard. Produced by John Stronach, who's worked with The Eagles, REO Speedwagon and Dan Fogelberg. Ten high energy tunes under the title "Electrocution Of The Heart" available through RCA.... Anyone who's picked up a CD version of The Band's catalog has been mighty miffed that songs were eliminated, and who can blame them? But news from Capitol Records contains the notice of a brand new retrospective of The Band

called "To Kingdom Come, The Definitive Collection". This has been assembled with the assistance of Robbie Robertson, and he chose the title because he felt the song best described The Band. It will contain three previously unavailable live tracks, Chuck Berry's "Back To Memphis", The Four Tops "Loving You Is Sweeter Than Ever" and "Endless Highway", a tune that was included in Dylan's 1974 tour of Europe. All the favorites are included, and all we can say is that it's about time.... Also upcoming from Capitol is the long rumored album from Paul Shaffer. The leader of "The World's Most Dangerous Band" will have his "Coast To Coast" album out in August, with a single slated for mid-July. The album is said to be a representation of the regional sound of eight U.S. cities, the first single will naturally be the sound of New York and will feature guest performances from Whodini, The Fresh Prince, Dion, Johnny Maestro, Jay Siegal of the Tokens, Ronnie Bright of the Coasters, Carole King and Elie Greenwich. It combines Doo-Wop with Hip-Hop, the street music of today and is called "When The Radio Is On".... Aswad has been one of the most popular reggae bands in Europe ever since their formation in 1975. The 1988 suc-

cess of "Don't Turn Around", #1 in the U.K. for 4 consecutive weeks and a spot on Billboard's Top 40 chart in the States, turned many people on to the band for the very first time. If you feel the need to catch up on a bit of the band's history, check out "Crucial Tracks (Best Of Aswad)" on Mango/Island. Especially noteworthy is their version of The Temptations' "Beauty Is Only Skin Deep", recorded at Prince's Paisley Park studio with Bobby Z and David Z.... As we approach the half way point of the Baseball season and get ready for the All Star break, The Yankees are finally a couple of games over .500, but still a good half a dozen behind The Baltimore Orioles. Can the Baby Birds keep it up over the second half? If they stay healthy, why not. But look for The Bronx Bombers to make a serious run now that they are hitting as a team. As usual the only question is the starting pitching, but Andy Hawkins is on a 20 win pace, and the bullpen has been nothing short of spectacular. One think is certain, Steve Sax has won over the tough New York fans with his hell bent for leather style of play, and his consistent .320 batting average.... Until next week, remember to keep your ears open.

NOISEMAKER

KLOL/Houston really pulls one out of the hat this week with word that Ken Anthony has been hired for the PD shoes left empty by Ed Levine's departure for DC. Ken had been calling San Antonio home for the last four months and we were frankly surprised as hell at just how quickly Ken hopped up that Texas ladder to the stars. "It was a very difficult decision", Ken told Noise, "but they made me an offer that I could not refuse. I have been living like a bare floor bachelor for months now and all of my worldly possessions are in storage down in Houston, all for the love of radio. I do want to say that I have truly fallen in love with San Antonio. KISS is an incredible facility and Rick Joppie is one of the most professional people I have ever had the pleasure of working with. The chance to work in a top ten market with a staff like the one that KLOL has and the opportunity to work with Pat Fant was just too juicy to pass by." What battle plan will Ken be taking into his new post? "You should know by now that I'm not going to tell you any secrets Jim. Let's just say that Ed has done a great job of putting the station in shape with a great staff poised to carry things forward. We have all the requisite tools in place and the job will call on my people skills and musical sensibility." Back home things are going from good to better, "KISS is well on the way back to their previous form. The Birch shows us moving 5.3 to 6.8 and the Arbitrends show a 5.0, 5.2, 5.5 growth curve with the Classic Rock station back in the mid 3's. The station is back to doing straight ahead rock and roll and with Lisle and Hahn doing afternoons we can't do anything but explode." Sounds like a prime opening for anybody with the chops to get things done, "You've got that right. It took a truly remarkable situation like the one at KLOL to get me to leave here, I'll tell you that much." That leaves one of the most desirable PD posts in the country up for grabs. Interested candidates should possess great people skills and have a passion for rock and roll. This is a rare chance to work with one of Album Rock's legendary stations and to do so with Adams Communications, one of America's fastest growing radio companies. Interested? Send a resume along with your programming philosophy to Rick Joppie at KISS, 8023 Vantage Drive, San Antonio, TX 78230. No Calls. EOE.

**PARAMOUNT VS. TIME
WITH A SIDE OF WARNERS
THE CORPORATE BUFFET IS SERVED**

The increasingly messy battle to control Time Inc. has dragged ever growing platoons of lawyers into the corporate courts of Delaware for some serious overtime duty. Paramount has juiced the action by upping their tender offer and Time has responded by diving head first into a sea of red ink with their proposed buy out of Warner Inc. The move has been viewed as a brilliant stratagem by some observers, holding off Paramount while clouding the innate value of both Time and Warner Inc. The end result could drive Time into a huge debt profile, or it could just buy Time enough court dates to queer the deal that Paramount is trying to engineer. While the top echelon at Time pride themselves on shaking the pursuit of Paramount, for the moment, the rank and file shareholders have not been so pleased. In fact, the ground swell of opinion indicates that those same shareholders would be more pleased with a Paramount buyout then they would the disheartening vision of their company going straight into debt, do not pass Go, do not collect \$200 Million. All the while, Paramount is encouraging Time Inc. shareholders to empower them with a grass roots rebellion favoring their take-over. This maneuver might give the lawyers something else to wrangle over before it's all over. At stake here are more labels than you can shake a stick at, multiple pay cable networks, film studios and a far reaching print empire. Long run prognosis; that very many corporate chrome domes are going to have throbbing headaches as the Summer drags on in court. Nobody in this league is exactly green to the game and we anticipate lots of surprises before it's all said and done.

↑ Winger goes Platinum and here are the big boys to celebrate the fact.

I.R.S. EXPANSION CONTINUES

For the first time I.R.S. has opened their doors in Boston with a branch that will homebase for Karen Lee, recently moved from New York for the assignment, and Susan Tanner who will be working the Alternative Marketing angle of things in the region.

↑ WHCN/Hartford caught backstage at their 20th Birthday Party. The staff were enjoying a little ambience with headliners for the night, The Fabulous Thunderbirds.

JUST SAY YO

It had to happen. The amount of attention and enthusiasm building for the Anderson Bruford Wakeman Howe tour and album has spilled over into court. Key to the action is a lawsuit filed by Yes against both ABWH and their manager Brian Lane. The action seeks to stop the use of any mentions or allusions to Yes in the promotional and publicity efforts of the band. Citing incidents where advertising and/or interviews with Jon Anderson made reference to his long tenure with the band, legal representatives for Yes are moving to stop any further, "confusion in the minds of the public over which group is the real Yes." The legal argument rests on an agreement entered into by members of the band when they parted company. That agreement stipulated exactly who could make use of the name "Yes" and in what circumstances. According to attorneys for Yes, the current campaign by ABWH crosses that line. In response, attorneys for ABWH claim that it's all so much sour grapes, that the positive comparisons of ABWH to Yes have spawned this legal attempt to diminish the impact of the band. As one representative said, "It is impossible to stop people from knowing the history and evolution of musical performing groups. But that is exactly what the plaintiffs would like to accomplish here."

↑ Talk about a Promo Op! KBAT/Midland is really in the driver's seat on this one.

GORMAN GETS WILD

As hinted at last week, John Gorman has unleashed his new format, a Rock CHR at WRQK/Canton. The format is being called "Untamed Radio-Rock 107" and the new PD is Spaceman Scott Hughes who comes from WJRZ/Asbury Park, he will also be the morning man at the station. Working with the station's new ownership, John was planning on a gentlemanly three or four weeks to effect the format transition. Then somebody came up with the precious information that Bon Jovi was going to be in town for a huge show. Only thing was, could they get it together in the five days between then and the show? Forget about needless luxuries like sleep, John and his team powered through the format in record time. On Monday WRQK disappeared and in its place was All Bon Jovi Radio. "All Bon Jovi All The Time". And cheers go to Jon Bon Jovi and David Leach who pitched in and did their part, cut a bunch of ID's and Sweepers for the station to run during their 24 hour run as All Bon Jovi Radio. "Best of all", John told us, "they kept the whole project very secret. They say nobody can keep a secret in this business well Jon and David proved that theory dead wrong." The concert itself was a huge kickoff for the real format which got started with John Cale's "Ready For War" and "Welcome To The Jungle" from Guns N'Roses. This marks the debut for John's much anticipated version of a hard rocking CHR but look for another client to be named in the near future.

**WGIR-FM
STYRO-FOAM
"NOZONE"**

The much discussed PMG campaign to "Save The Future" has been getting a lot of high profile treatment lately. Most notable is the WGIR/Manchester Styrofoam No-Zone which has been expanding awareness in offices throughout the region. Best of all, Senator Gordon Humphrey took the campaign to Washington DC where he effectively turned the entire Hart Building, which houses the Senate offices, into a WGIR Styrofoam No-Zone. Kudos to all concerned, especially to those brain busters up North at WGIR.

"ACHIN' TO BE"

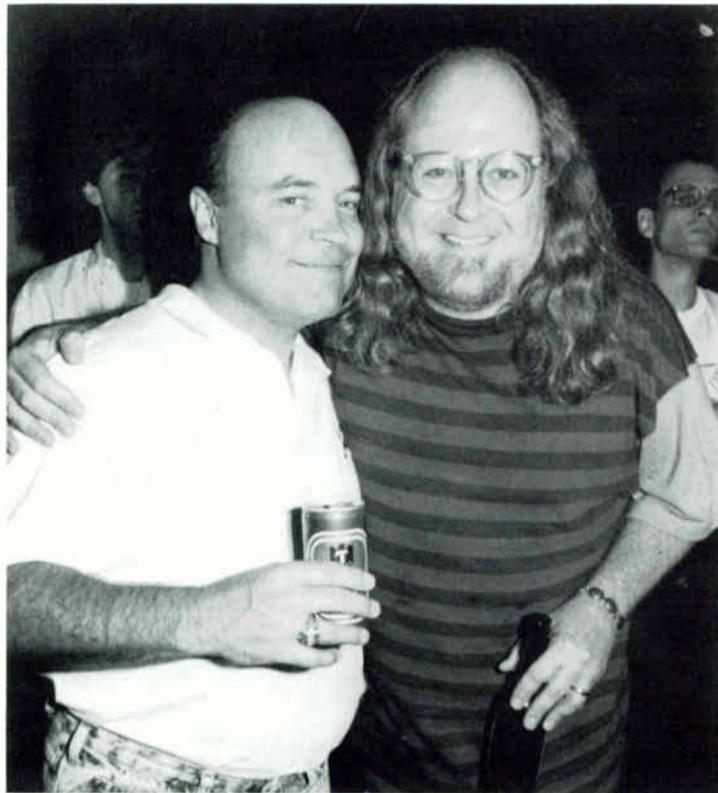

THE RADIO RUMBLE

WGTR/Miami seems ready to ink a new MD. The word we get on the street is that Brent Alberts is the next guy to slip into the Wisemobile. Brent was most recently the PD at KFMO/Lincoln and before that he was also at WQFM/Milwaukee in a similar capacity. No confirmation on this one as we go to press but we can smell ink drying down in Florida.

CILQ/Toronto Andy Frost certainly surprised us with news of his leaving the PD chair behind for a new job as yet only understood by its title, Executive Director/Special Programming. That leaves Andy in-house to keep things dove tailed but it also leaves us with a critical PD opening North of the border.

↑ **WOUR/Utica** amid a visit from Tom Keifer of Cinderella. Flanking Tom are Jerry Kraus and record rep to the stars, Eric Hodge.

↑ **WIYY/Baltimore MD** Chris Emry and Barbecue Bill McGathy shown here in a warm shoulder clinch.

KMJX/Little Rock MD David Allen Ross got back from vacation to a nice little surprise. The most recent Birch trends show the station in second place behind a well entrenched Country giant. The 10.2-10.3 trend shows the station handily leading all the contemporary competition. Nice way to hit the office, tanned and on top. That should put an extra shine on their 10th Anniversary celebrations slated for August.

KSHE/St. Louis celebrated the Fourth with Dave Mason in concert below the world famous Arch. Also in attendance was Radio Rich Dalton and the KSHE Classics Band with a guest vocal appearance by Smash from the Morning Zoo. The pipes on Smash could dent steel and we still remember when he had the balls to sing the National Anthem at a Cards game last year. Tough bit to follow.

WLLZ/Detroit marked the Fourth with a direct response to the Supreme Court's less than timely decision regarding the First Amendment and flag burning. The station responded by giving away 200 flags and stands that will not burn. That is, they gave the flags away to people who signed an agreement stating that they will not burn or deface the flag in any way. The event took place in front of the Veterans Memorial Building and drew a healthy and very vocal crowd.

↑ **WMMS/Cleveland** show greeting Saraya to their studios for the weekly Heavy Metal show Powerchord.

KFAC/Los Angeles is the central point for many a rumor this week. Locals have the station getting fired up for their new form at configuration as of July 15th. Leading format contenders include AOR or an R&B approach. The official word isn't out yet but it will be interesting to note how things shake out in the next few weeks. In the meantime, is it true that KLOS has called back one of the previous candidates for their eternal vacancy at PD? Is it also true that the pressure is finally on to make a decision? And is that possible PD a big name from South of the Mason Dixon?

Pollack Media... National Research/Music Director, if you can wrap your ego around that title, wrap an envelope around your material and contact Carol Hart at (213) 459-8556.

↑ WKDF/Nashville shown with Eddie Money after a local benefit concert to raise money for Baby Blaine. The station has been making the child, in need of an expensive liver operation, the focus of their fundraising over the last few months. This time out Eddie, Red Siren, John Kilzer and Steve Earle helped to raise the funds needed by Baby Blaine's family.

WXRC/Charlotte had a different kind of celebration in mind when the Fourth rolled around. They kicked on the juice to their new 1100 foot tower located just North of the metro. For the last four years the station has been operating from a tower 50 miles removed from Charlotte, now they can declare their independence with a city grade signal throughout the Charlotte area.

As the rock and roll red glare fades into the blurred headache of yet another holiday deadline, the Hard Report presents our new and improved Year To Date charts. As a mid year reality check we have built these charts for Mainstream Tracks and Albums, Progressive Albums and Metal Albums, all broken into both "First Quarter" and "Year To Date" ranking for your easy reference. We like to think of it as a crib sheet for your core library. Jim Trapp

Mainstream Tracks

Any quick look at this chart will testify to one thing: the chart churn rate has really kicked in since the first quarter. The quantitative effect of all this action has kept some very solid songs from doing as well as they might have if released in the comparative slow time of Jan-Feb-Mar. There were just so many big name singles banging around out there on the circuit during Apr-May-Jun that a lot of songs got short changed when it comes to their profile on the Year-To-Date Charts. Witness those first quarter entries by **The Fixx** (1-1), and **Chris Rea** (2-2), that have fared so much better when it comes to airplay in '89. These tracks have kept their positions largely on the strength of some long tenured Top Five performance. As a result, the point totals on both of these songs are such that it will be tough for anyone to catch them.

Some of the new players in this league are certainly giving it their all in the attempt though. Important releases by **Tom Petty** (D-4*), **The Cult** (D-5*), **Stevie Nicks** (D-6*) and **The**

Mainstream Albums

As usual, album emphasis tells a different tale. Here we see **R.E.M.** (3-1*), cut a direct line to the top. Straight through the **Traveling Wilburys** (2-2), and **U2** (1-3). In fact, the only real high octane blast off this time around is still arcing behind the **Tom Petty** (D-4*) nosecone, and we have no idea how just how far that one will go before splashdown. Good to report that **Melissa Etheridge** (16-9*), cracks the ice at the top of the chart by dint of strong and steady touring and some AOR airplay that has Gold written all over it. Everyone involved can be justly proud of bringing Melissa's talents to the international attention they so justly deserve.

Aside from that, the chart is most remarkable for how static it has remained across the second quarter. Aside from the **Traveling Wilburys** and **U2**, such solid albums as those by **Bon Jovi** (5-5), **The Fixx** (6-6) and **Mike + The Mechanics** (7-7), have doggedly maintained their positions on the Album Chart even though the blizzard of singles has shotgunned the

Progressive Albums

All hail the King! With a steady flow of airplay raves Elvis Costello (3-1*), makes his mark this quarter with an album that is as deep and wide as the law allows. Tremendous songs, an all star back up band and the freshly tuned up presence of The Beloved Entertainer himself has combined to put Mr. MacManus at the head of the class. The "Spike" album continues to assert both the musical and lyrical acumen of this consummate performer. The other big story in the Top Five sees a monster move by Love & Rockets (39-3*). The story started with that import 12" release of "Motorcycle" in the early part of the year. That proved to be just enough to get the pipeline humming while getting ready for a massive domestic push on the lead track. The result has to qualify as the biggest Alternative to Mainstream success story of the year and all of that on the legs of just one single!

The only Top Ten debut comes from what could very well be the swan song release from progressive perennials The Cure, (D-9*). Multiple tracks have been racking up airplay from the very first day of release and the anticipation of a farewell tour in the Fall has many stations treating the "Disintegration" album like the Star Of Delhi. Improved awareness at Mainstream AOR has managed some heretofore unimagined success in markets

Metal Albums

No reasonable doubt permitted here. With the universe of Metal spreading at near light speed, the band for the second quarter is the same as the band for the first quarter. Is, in fact, The Band. Nothing else has made such an impact as the Metallica album (1-1). Their tour backed up the boast of that first exhilarating listen and the resulting tidal wave at the cash register made it very clear; Metallica is Metal in the year 1989. No single phenomena has been able to dominate in its field of expertise with any more sure hand. Also in the Top Five and rising fast is Seattle's Metal Church (6-2*). Fans of the group have sprung up wherever their tour has taken them and the new musical configuration has made it obvious that this is a band with some teeth. The album did a double take when first released and looked about to fade away when a new rush of activity pushed it well past Exodus (2-3). As the smoke clears To Date, we get major action on our mojo wire that this is a band with a high density future.

In the passing lane and still coming on strong are mainstream darlings Tesla (7-4*), and Skid Row (8-5*). The Tesla track record has been one of the most airplay effective in the world of crossover Metal. Especially in the Top Ten where only Ozzy (5-7), can maintain a more fierce grip on the

Outfield (D-8*) are all showing impressive moves into the Top Ten. "Won't Back Down" is undeniably the strongest new song this year and it might have done even better if the format hadn't artificially shortened its run by quick shopping depth tracks from what has proven to be an equally strong album. Making a big noise right out of the chute, "Fire Woman" chewed up chart stats this season like a bailing machine out of control. When it was all over, it became clear that **The Cult** had the goods for a Summer long ride with this album. We'll see more of this band in the next Quarterly, no doubt. With a new brace of songs and some strong support play, **Stevie Nicks** leapt atop the "Ladies Of Rock" list in near record time this year. The strength of this new album has laid to rest any errant questions about the audience's appetite for Stevie. They are 100% ready, willing and able to give this talented lady yet another in her long string of successes. To a certain extent the surprise entry is "Voices Of Babylon". The album has been deemed a superlative piece of work by many observers and that opinion certainly holds up after repeated listenings in critical situations. That the debut track showed enough shelf life to run with these heavy hitters underlines the great impact of this band. Fact is, the burn rate on these guys is very slow and they make everything else in the format sound that much better. An honorable mention also goes to **Great White** (D-12*), who once again prove that their well-honed homage to the great bands of the 70's still has the stuff to move the audience.

Aside from these debuts we are glad to spy **The Replacements** (6-3*), showing some brass with a hefty advance. That's always a healthy move, but when you pull it off in this company you had better stand back and say Huh! No success story this year could be any sweeter than the turnaround executed by **The Replacements**. For all of you who were there for them on the last album and for those of you who came to the party this time around, it's Miller Time! Along with the continuing success of those boys from Minneapolis, both **Guns N' Roses** (13-7*), and **.38 Special** (18-10*), get credit for showing some very strong upward movement in the second quarter.

AOR airplay crown. As for **Skid Row**, they have an exuberance, a sheer *sound* that so identifies them and their music that a huge fan base is a given. These boys are bound for stardom, you can feel it from the first guitar hook. And when you hear them in a mainstream mix it becomes obvious that the bigtime is only a song or two away.

The only debut in the Top Ten is from **W.A.S.P.** (D-8*). The Metal machine has always been ready greased for these boys, but the new approach, stripped of so many theatrical elements has made impressive gains at Metal and Mainstream radio. The new musical maturity gets backed up by some good business sense. Releasing a line for line remake of **The Who's** "The Real Me" before the tour by Pete and da boyz was sheer brilliance. Tough as they come, **Queensryche** (16-9*), keep hammering away with an album that we firmly believe is one of the most valid rock records of this, or any year. "Operation: mindcrime" set trans-continental records for enthusiastic converts this year with a number of commercial AOR's giving the band that long-awaited solid shot at regular airplay. As usual with this band, the phones are there for even the slightest airplay and the audience pressure, combined with a strong MTV presence, has kept this band on the cutting edge of their own legend.

Two other strong contenders in the Top Ten come from some members of the thrash contingent. **Laaz Rockit** (24-12*), and **M.O.D.** (29-13*), have both elevated their radical approach with constant touring and some big believers at radio. From underground slashers both of these bands have been propelled by sheer mega-wattage and a touring schedule that would melt many other, more delicate constitutions. Aside from the big showing by **W.A.S.P.**, the other two debuts of note this quarter came from **Black Sabbath** (D-14*), and **The Cult** (D-15*). After a disappointing release in '87, the new and more potent unit that has been built around Toni Iommi is registering seismic reactions from the Metal community. As always, the real reaction is in the airplay, and that barometer of success has the new and improved **Black Sabbath** pushing mightily toward the Top Ten. Ditto **The Cult**. No amount of big name success was going to keep loyalists from playing a chunk of heat treated rock and roll this good. Those slashing guitars with their manic mantra and that now hypnotic, now flaying drum/bass work continues to mesmerize. The effect, especially when doing 95 in 95 degree heat, can be awe inspiring.

Tracks Chart beyond all recognition. This makes a solid argument for the observation that the singles strategy of many labels is putting some great music in the "Ben Johnson" phase of development. Many argue that the constant shuffling of promotional priorities have bulked up some tunes in an unnatural performance curve, making short-lived supermen out of some potentially timeless songs. So while the singles come and go at the insistence of ever increasing promotional pressure, smart programmers obviously are sticking with albums far longer and with far greater dexterity than the single. They may blow with the gale force winds of promotional pressure but they hold onto that album like the format treasure it is.

Some of the new albums getting the high sign this time out include solid offerings from **John Cougar Mellencamp** (D-14*), **The Cult** (D-17*), **Doobie Brothers** (D-18*), **The Outfield** (D-22*), and **Great White** (D-25*). These are the albums that are setting the pace for new airplay and how they do in the third quarter will prove very interesting reading. Unlike **Tom Petty**, who has thrust himself to the top in relentless fashion, these albums still have some work to do. Doubtless the talent is there to score big points but the competition is so frantic that depth play may prove more important than the singles being primed for release. For the format that takes its name from Album, it has never been more obvious that the wall to wall programmability of these releases will separate the winners from the also rans before the year is up.

Our *Brave New Band* this time around just has to be **Living Colour** (21-11*). **Vernon Reid** and company have held onto that wave for so long that they have set global records for Slo-Mo satisfaction. Last year and this, **Living Colour** was the band that drew the raves and that always essential airplay to drive home the point. Longevity on the playlists of the nation and more, not less, critical enthusiasm over time shows the band for what they are... a creative lightning rod, a stereotype-smashing chunk of format helper, a ray of innovation and power when we needed it most. Other strong, and more formulaic, showings by **Cinderella** (30-19*), and **Warrant** (48-28*), serve notice that the rock arena boppers are still alive and well, and that radio is definitely listening. These two bands continue their full court press, stacking up plenty of tour credits with a healthy retail bump and renewed listener interest paying the dividends. In both cases, stations have reported big recognition phones for the band *after* taking the tune into recurrent, prompting some to re-up their rotational commitment. The end result has been some truly beefy moves at retail and radio that proves the power of the format to keep America rocking.

across the country. Perhaps all the brinksmanship being manifest regarding the band's future will roll back on a tide of acceptance beyond anything experienced to date. One thing is certain, the album has claimed a priority status that doesn't come easy, or quick. **The Cure** have paid for this lavish curtain call and we want seats in the front row for the last show. The biggest debut by a newly signed band has to come from **The Pixies**, (D-13*). This band has fashioned a sound that has the circuit roundly proclaiming them to be the "Next Big Thing". Frequently such laudatory treatment can prove a bit of a boomerang but there is nothing to fret about in this instance. **The Pixies** have an energy and vision that rips the cover off many less talented bands. For once the build-up looks puny compared to the reality. Now it just remains for Mainstream AOR to catch a fire and **The Pixies** will launch into regions rarely glimpsed by a band on their first release. As for **The Cult** (D-14*), what can you say about these guys except that they are the only band to get major mentions on all four charts.

The return of **Joe Jackson** (D-18*), has been met with open arms and his "Blaze Of Glory" release continues to shine as one of the primary albums of the last quarter. Musical mischief has always underscored Joe's work, let's face it, the guy lives to break the rules. And this time out he has gifted us with a collection of songs that run like an inspired soundtrack for life in the era after Eisenhower. Rock sentimentalism has never been his forte but there is a lot of nostalgia wrapped in this album, superlative songs that have encased the collective experience of the past 30 years in some amazing musical amber. The other important development this quarter comes from **10,000 Maniacs** (D-19*). The record continues to notch most requested activity at a number of stations and the depth of play on this project continues to amaze. Touring has kept the band a hot topic of conversation on the Progressive podium and insures that the **Maniacs** will continue arcing upward well into the third quarter.

**SUNRISE AT SBK
THE MARTIN BANDIER INTERVIEW**

Nothing can possibly match the pure adrenalin rush of starting up your own company. Whether it's a four-wheeled deli cart on a busy street corner or a multi-million dollar record company, the joy of making something work is hard to replace. Witness the braintrust at SBK, who have been busy building a new label squarely facing the challenge of the 90's. Whether you talk about their decision to pay 100% of the established royalty rate to their artists, or that phenomenal \$6 Million in bonuses that were recently handed out, you can't help but get the idea that these guys are doing things a little different. Everywhere you look at SBK, the horizons open up and limitations fall away behind the dual leadership of both Charles Koppelman and Martin Bandier. To get close to the source of so much of this front page news, we interviewed President Martin Bandier in his corner office with a view. What follows is an interesting look at doing things the SBK way.

JT: Nice office.

Martin: Yes, well we spent a little over one year building the space that we have here and it's the only thing we didn't sell when we sold the company. We spent a fortune on the space, I'm almost embarrassed to say what we spent on it, but we decided to keep the offices when the sale went through.

JT: In a way that strikes me as a fair metaphor for the company in general. The SBK drive for quality control and those artist driven intangibles seems to translate to your physical surroundings as well. In a business that thrives or dies on a creative dynamic, the pursuit of an artist intensive philosophy can be a little like tilting at windmills. In that way, SBK would seem to be a dog with all the right spots but in different places.

Martin: We like to think that we are very unique in that regard because we have always approached this business in a certain way. That style of operation, caring about the artist and the song first and foremost, is already beginning to rub off on our new record company and it has been a big change for a lot of people who joined us from other companies. Charles Koppelman and I got into this not purely for the excuse of making another dollar because, as someone told us after the sale to Thorn-EMI, we've already won in that arena. It's not necessarily about making money but more about doing the right thing and showing that you can win as a business by approaching the industry from a creative, artist intensive angle.

JT: You mean like your groundbreaking decision regarding full payment of royalties.

Martin: Exactly, we can afford to pay 100% of the copywrite rate because the money is there and because for years we thought it was distasteful to pay somebody three quarters of their worth.

JT: Do you feel that the industry as a whole may be vulnerable to such an approach. That is, if the industry is showing itself to be bankrupt when it comes to such values, doesn't that make your approach all that more competitive?

Martin: It may very well be that what you say is true. I know that as a result of some of our positions regarding rate payment and the like, we have found that the phones have not stopped ringing with respect to artists on other labels. They want to know, "Is that really your position? Well, my contract is up in another two albums... etc. etc...." Such conversations show a very strong reaction to our policies out there on the part of the artists and their management.

JT: It all sounds very new and exciting for you. Almost like a fresh start, the enthusiasm is palpable.

Martin: That's true, but while we have this new fresh perspective on things, we still have many years in the industry which helps us to know what is and isn't feasible. That's really the exciting part, that we are starting from ground zero but with enough collective experience to avoid the more obvious pitfalls. But what it all comes down to is music and we have wonderful records coming out that we have been working on for a long time. I guess this time we have nobody else to blame for our success or failure. The

Katrina and The Waves record, for instance, will be one of our first releases. Katrina has always been associated with Summer time records and from start to finish everyone who listens to this record just smiles and walks always saying, "Wow, where has she been, what has she been doing all these years."

JT: Is there a specific music mandate coming into play at SBK? Is Pop more important than Rock or vice versa?

Martin: We always say that what's pop today was yesterday's avant garde artist. Take Tracy Chapman as an example. A few years ago people would have said, "Look, try the college route... Maybe you'll get lucky with some AOR play", and now 10 million albums later Tracy Chapman is mainstream pop music. The terms are always the same but the definitions seem to change as time has its effect. We like to start with the basics. People who write great

songs and who have the ability to put those songs in a form on record that relates to large audiences, audiences around the world. You see, we do business on an international basis, not just in America. Rather, we define music in global terms.

JT: Where does it all come from? What is the blueprint for a hit record?

Martin: It starts with the song and great production and on top of that you need terrific artistry. When you have those three elements it's hard for us to screw it up. People make all the difference. It starts in-house from the young kids in the mailroom who practically want to pay to work here, and it continues all the way up to the stack of resumes from industry executives who want to work here. The energy and the positive feeling here is amazing.

JT: Easy to believe given that \$6 Million bonus distributed to the troops. Aside from all the highs where have you found the speed bumps, the nasty surprises that always pop up when starting a new endeavor?

Martin: We really haven't encountered any obstacles so far except when our own business sense starts telling us, "God, did record companies always pay for this?" You see, as a production company we were in a much different position and it wasn't really an obstacle so much as it was illuminating to learn that some of the expenses being incurred by us are considered part of the normal freight for a record company. The cost over runs in video production and the like. That was an education.

JT: The SBK job line is obviously the hottest ticket going right now. Has that made for any difficulties?

Martin: It's true that we have had a long list of volunteer employees from the very beginning. I've seen a stack of resumes a mile high. And you know, that might have been one of those bumps in the road you were talking about. Because along the way we have made a lot of friends in the record business at the executive level and when it came time to make some hard decisions about who would make up our team we had a sense of dismay telling some of those people that we were going to hire someone else for a key position. There was resentment in some places about that, I think.

JT: Give me a quick run down of the criterion used to motivate your promotion staff?

Martin: It's important for anyone in promotion to be able to talk with radio and be able to work with and understand radio, not just deal with it at a distance. The people who work for us have to understand radio and what radio wants. Hopefully they will transmit that to us in terms of the product that we are working with. We've always been lucky in that regard but we aren't willing to rely on our instincts alone.

JT: At some labels there is an adversarial role regarding radio. No one is exactly telling tales when they say that there are Record Promotion Executives who, behind closed doors, have a strong degree of contempt for radio. It's that old Sales/Client reverse hostility working itself out.

Martin: That would be like biting the hand that feeds us. We must remain sensitive to radio because they are marching to the drumbeat of their audience, and that audience is our ultimate goal. It's a very symbiotic relationship when you think about it, and contempt has no place in it.

JT: Do you agree that music in the 90's is ready for a change? That the time is ripe for some big moves in the arena of popular music?

Martin: Yes, music today is ready for a major jolt. I don't know from where or when it's going to come, but somehow history has a way of repeating itself. I look at the music out there today and I think the time is right for something new to start developing. Something stronger than just a passing fancy. I know because we are out there, all the time, looking for whatever "it" may be. I don't know where it's coming from and, believe me, I spend a lot of time thinking about this but, if you have spent any time in the music business today, you have to get the sense that something new and important has to come out of what is going on right now.

JT: Not so much a monomaniacal phenomena, as in Elvis or the Beatles, but a trend or a synthesis of styles that creates new parameters for popular music.

Martin: I'm not sure anyone would ever believe another Elvis or Beatles success story. You just couldn't get people to sit still for it. People are far too sophisticated, even cynical now about such things. They would believe any such event to be fabricated. But there is no question that the time is right for someone to step out and redefine the way that young people think about their music, and their life. Because music is the framework for how we remember our youth and you don't effect that without changing

people's lives. With the world looking at the reduction of political borders, with the eventual unification of modern Western Europe, people everywhere are beginning to see the world as one place and not a bunch of little places. Internationalism is the key. Maybe it will come from Brazil. I don't know where it will come from, but it will happen soon and it will not be denied.

JT: Is there really room for another record company? The news is full of economic indicators that suggest a slowing transition into that next phase of growth in the 90's. When the money gets tight, will the record industry get hurt?

Martin: I like to think about the entertainment business much like the alcohol business. When people are happy they drink, and when they are sad they drink. Same thing with music. When they feel good they are buying records because it's a low end item and when they are sad they are doing the same thing. If you want to find a place to worry, worry about the guy making the \$40 Million motion picture with the theaters charging so much per ticket that the audience may stay away. You see, when you purchase a CD you have that music for life. These days the degeneration of vinyl, once an important part of the equation, is no longer a consideration. But when you go into a theater and spend roughly the same amount of money for you and a date the experience only lasts as long as the event itself.

JT: But what about the relentless expansion of the industry? Not everybody can possibly survive.

Martin: Ours is a people business, a creative business driven by creative people. And there are always some people with a better pulse beat, a better read on what is the right music for the moment. Based on that, there will always be companies that fall by the wayside because they cannot find, recognize and retain those creative people. "All men are created equal" just doesn't apply in the creative community. Some people are just better at working with people and at recognizing talent in others. Some of the other companies that have spun off separate divisions are just kidding themselves. Putting a different sign on something doesn't make it a new thing. Once again, it all starts with the artist, the song, the production. Unless you have all of those elements in line you could start 30 different companies and call them anything you want to and they still aren't going to spell *hit record*.

PICKS

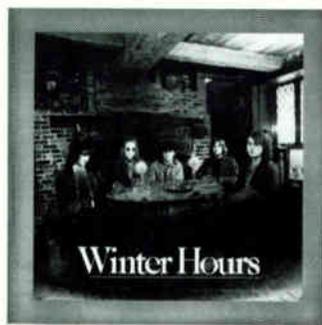

Faith No More "The Real Thing" (Slash/Reprise) After the "Introduce Yourself" album reached the top of the college radio charts and the band did a mind-blowing tour with the Chili Peppers, their future became uncertain when lead singer Mosely parted company. For the interim, Faith No More's future was a sketchy one, but now the band is equipped to rally the support they deserve. For some fans on the old bandwagon it's hard to adjust to the new configuration, but once you're over the fence, the sky's the limit. Their stormy past has been pumped into a powerful new album. It represents an aggressive, forward thinking re-emergence for this turbulent band out of San Francisco. Mike Patton is the new vocal presence, and seizes the moment with precision rap and a raging soul that claims its rightful place in the power mix. They draw from reggae, rap and metal circles and melt the sound into a rhythmic state that practically incites an anthem riot. The music bares its teeth and sweeps down on you with gale force, and the interesting keyboard parts by Roddy Bottum give way to a various montage of horns and classical piano effects. Carefully targeted licks hit you with rapid-fire succession, enhanced by a musical calm between each storm. The metal community is even applauding their new identity and cross acceptance will follow suit. Absorb the electricity in tracks like "From Out Of Nowhere", "Falling To Pieces", "Underwater Love", sample the keyboard contrast in "Epic", and the explosive instrumental, "Woodpecker From Mars". It's amazing what a break in the action can do... Now it's time to give them a break.

PRODUCED BY LENNY KAYE

New Releases

"Headache Rhetoric" arrives this week, the new Close Lobsters album on Enigma Records. If you thought this band's ringing melodies illuminated the airwaves before, then get ready for more brilliant ambience to come your way. They blend the high-pitch jangle of strings into evenly paced pop songs filled with fantasy and colorful effects. The psychedelic overtones that crowded the music before have been modified, and the influence falls into place like a transparent veil. "Nature Thing" outshines most of the other selections and soon a video will accompany it. They carve ambience right out of the grooves with this track and it's possibly their finest to date. The Close Lobsters are in full bloom as a group and we're relieved they chose not to rely on slick production, but opted to expose the new material from a deeper pool of thought. The album, produced by Phil Vinall, showcases their growth with a lively collection of ripe pop songs that glow like a full moon. The guitars float into hinterland and leave you with a light-headed aftertaste. Other tracks to slip on are "Lovely Little Swan", "Got Apprehension" and the slap-echo of percussion in "Knee Trembler". Contact Enigma Records: 11264 Playa Court, Culver City, CA 90231-3628....

Paying tribute to rock icons with a compilation album of their songs is beginning to grab on like a Full Nelson. Two recent examples include Johnny Cash ("til things are brighter", Fundamental 1988) and Led Zeppelin ("The Song Remains The Name", ILA 1988). One of this year's similar masterpieces is "Every Day Is A Holly Day" on Emergo Records. It's a collection of artists paying tribute to the unforgettable songs of Buddy Holly, whose untimely death with always darken the early days of rock'n'roll, although his everlasting light will continue to shine. It's

and album that can be loved by everyone for at least two reasons: The choice of artists and their interpretations are almost as brilliant as the original songs themselves. Everything about "Holly Day" is an unexpected surprise, making it all the more enjoyable and easy to appreciate. Pleasures range from the smooth Shoes rendition of "Words Of Love" to G-Man Chris Spedding's interpretation of "It's So Easy"; the Alex Chilton produced "Not Made Easy" by the Lolitas; Elliot Murphy's wind chime effects in "Everyday"; OFB's bouncing bliss in "Oh Boy"; and blow me down it's the Slickee Boys crankin' out "Down The Line". And we've only grazed the surface of an album that will surely keep everyone on their collective toes this summer. Now can we give it another spin? Emergo Records: 225 Lafayette Street, NY NY 10012..... Cowabunga! He's back. One of the originators of surf-beat, the Don of drums, Sandy Nelson and his first album in nearly seventeen years, "A Hunk Of Drums". Don't let the bikini-clad ladies on the cover fool you with that 007 stare. Sandy was there for the snare roll of "Wipeout", rat-a-tat-tatted to Phil Spector's "To Know Him Is To Love Him" by the Teddy Bears, and made jaws drop in "Teen Beat" ("probably the Anarchy U.K." of its time). He re-creates and updates the drum sound that helped start a spiraling trend that's still alive and well. His style is a precursor to the Beach Boys, and an important reason for the fond memories of any fan of sixties rock and roll. The album is entirely instrumental and would not be suitable any other way, as Nelson puts on the back beat and it echoes those familiar vibrations. From the "Hunk Of Drums" medley to the swamp boogie sounds of "Switchin' To Grieg" or even "Boogie #3", one can't help but fall for the nostalgia he brings to you on this great platter. Contact Veebltronics Records, P.O. Box 66858, West Los Angeles, CA 90066-0858.... Chartspeak: Just to calm suspicions about non-movement on the Alternative Airplay chart this week - it's frozen! Due to the amount of frozen playlists and only a small percentage of complete reports, we are holding chart positions to keep progress on upward moving albums consistent. Normal reporting deadlines will resume on Monday 7/10 and Tuesday 7/11.... Dawn Hood

the
The

the
The

The The has always been a mysterious entity because of its unique sound perspectives and musical outlook, created by Matt Johnson, who up until now has been the *soul* inspiration for the concept. Since the days of "Burning Blue Soul", the public has reacted feverishly to his work and anxiously awaited his next move without disappointment. Matt has explored his musical destiny for nearly ten years, pursuing new ideas, but not straying far from his disciplined style and intense focus. Matt Johnson never leads you down the garden path without an agenda. He displays his intentions outwardly, as his lyrics deal with harsh reality and the music smooths over the abrasiveness, somehow drawing you into its spell. Whether he calls for social consciousness, inner peace or points out political injustice, melody maintains its grace from beginning to end. "Mind Bomb" is the first album to portray The The as a band. After careful consideration, Matt brought in Johnny Marr on guitar, Dave Palmer on drums and James Eller on bass. His unspoken promise to deliver music that brings you into another dimension still holds. We appreciate the following insight into "Mind Bomb". Read on.

Dawn Hood: Your attention to detail, moods and musical perfection make the new album sound incredible, but people are still burning with curiosity about your decision to put a band together.

Matt Johnson: It's something I wanted to do for a while actually, beginning with a vague idea I had a few years ago and waiting for the right people to come along. David (Palmer) I'd known for some time, as well as Johnny Marr, who was going to join The The before The Smiths, and I've always wanted to work with James. I wanted to form a group that would tour and spend a long time playing, perhaps a year or so to get to know each other instead of just throwing everything together. By the time we started playing out I wanted there to be a very definite group atmosphere, one with a strong identity, not just a bunch of faceless people on stage.

Dawn: David Palmer's drums so effectively sculpt the various moods and tension of the songs. If people suspect that The The is getting softer, all they have to do is listen to the percussive elements and change that opinion.

Matt: It's good of you to point that out and recognize the style of his playing, because David and I share a real empathy about music. I think he's a brilliant drummer, very spirited and sensitive to the songs.

Dawn: The The sounds more *organic* than ever before.

Matt: Yes, more fluid and more natural...

Dawn: What makes the biggest difference for you?

Matt: I would say the great fluidity and three dimensional quality that the music takes on. There is much more freedom, unlike the earlier work with one person behind it, things tended to be a bit stiff. Now The The is warmer, more spirited and you can sense a subconscious relationship between the players.

Dawn: While Johnny Marr was in The Smiths, were you collaborating with him at all?

Matt: No, we didn't see each other for years, and then all of a sudden we bumped into each other and had a drink one day. We kept in touch after that and it was about the time I was writing "The Beat(en) Generation". I wrote it with acoustic guitar parts, but the electric guitars I just couldn't seem to do properly. Johnny came over one night at about nine o'clock to my studio, and just began filling it in. We stayed up all night discussing ways the music would sound. It was the first song I wrote for the album.

Dawn: The other songs on "Mind Bomb" seem to take on a different feel from "The Beat(en) Generation".

Matt: Yeah, well I wrote that as a single and it's a bit more light weight sounding compared to other tracks.

Dawn: There is an interesting contrast though, because the music comes off sounding light and airy, while the lyrics are frightfully true. Any reason why you chose this approach?

Matt: If music is depressing, then people generally turn it off. Also, because I think people underestimate the power of music to communicate feeling. Although I use words that tend to be harsh, the music can balance out the sentiment and make the song flow more smoothly.

Dawn: How does "Good Morning Beautiful" establish or set the tone for the album. Why did you put it first?

Matt: Originally that was going to be the last song on the album and "Armageddon Days Are Here (again)" was going to start things off. I had the order worked out in my mind as I was recording the album, and thought about it for a long time. Then one day while I was in a strange mood I just changed things around and liked the sequence. I like the fact that it starts off with radio static, because

that's how the "Infected" long form video finishes, with static and distortion. And I decided I wanted to end with "Beyond Love" because it's a much more optimistic song. "Good Morning Beautiful" was a less obvious choice to start off with. But the power builds nicely in the first three tracks, and then winds down during the course of the album. I must admit that it's a bit of an unusual song to begin with.

Dawn: Is it true that the red ink on the cover of the album contains some of your own blood?

Matt: Yes, that's true. How did you find that out?

Dawn: A little bird told me... I believe the band Kiss did that in the seventies.

Matt: Oh really? I knew we had something in common...

Dawn: How did Sinéad wind up sharing the vocal spotlight on "Kingdom Of Rain"?

Matt: I don't know... she walked in and demanded to sing (not really). While I was writing that song I was convinced that she was the only female singer who could give it the intensity it demanded. That kind of performance was what I needed, and her interpretation was perfect. I think she's a great singer, quite unique, in fact one of my favorites.

Dawn: Is there any reason why you decided to split the production duties between Roli Mosimann and Warne Livesey, instead of using one producer?

Matt: I wasn't ready to take on full production, even though I have co-produced in the past. On "Infected" I used multiple producers and for this one I wanted to trim it down to half Roli and half Warne, purely because I work in differently with each one but the music still comes out sounding the way it should.

Dawn: You mentioned the "Infected" video a few moments ago, which is a brilliant extension of the last album. Will you be pursuing another video project to accompany "Mind Bomb"?

Matt: Not yet. We're doing individual videos for the singles and preparing for a world tour so time is limited. But in the future I'm certainly going to go back and consider it.

Dawn: This tour is a big step for you, and the first time The The will officially hit the road?

Matt: I suppose it is. I love jumping into the deep end, and this is a real challenge and it means I've got to work very, very hard. If I do things that aren't much of a challenge I tend to get bored and complacent. In this instance I've got to learn fifteen years of songs for the stage, in just a few months, which is quite daunting. I'm still not sure what people are going to expect of me, obviously they aren't going to expect me to dance... are they? The good thing is that I've got four albums worth of material to work from and the audience will be able to relate to the music they know, which is half the battle, not having to prove that all over again.

The Top 40 Airplay Chart combines airplay point totals for 12" and albums listed by commercial metal and college reporters

EZO, "Fire Fire", Geffen.... Warning: Handle with Care - this is a tremendous release! Band members Masaki (vocals), Hiro (drums), Taro (bass) and Shoyo (guitar) are rocking with passion and fury these days and this record is the proof. Seems the two years that have lapsed between the release of their self-titled debut and this one, was time well spent on development and delivery. While that album served well as an introduction for them on American soil, this one will no doubt launch them easily into the metal hierarchy. And apparently, their having taken up residence in the New Jersey/New York (Hoboken), area has helped clarify their English speaking capabilities, as well as making them incredibly street saavy. One glance at the titles on this latest vision on vinyl confirms just that. From the opening burner "Love Junkie", to "Streetwalker", to the tremendously catchy "She's Ridin' The Rhythm", it's all in the grooves. Masaki's vocals are as lethal and effective as they were on the first album, (remember "Flashback Heart Attack" and "House Of 1000 Pleasures"?), but his increased fluency doubles the impact that each song delivers. The band's overall sound has developed to a point that carries them way past many of their American counterparts in terms of quality. There is an urgency and hunger simmering just below the surface on many of the tunes. You get the impression, when listening to this record, that they were barely holding themselves in check, letting loose only when appropriate and that creates a wonderful tension and suspense. Gone is the mysterious and beautiful Kabuki makeup, but here is impressive maturity and growth; making this one the best releases of the summer. Must plays include the hooky "Burn Down The Night", "Back To Zero", the energetic title track, "Million Miles Away" - watch for the vid coming soon - "Nightcrawler", "Streetwalker" and "She's Ridin'...". But just in case.... play them all!

Lion, "Trouble In Angel City", Grand Slamm....

It was 1987's release "Dangerous Attraction", that finally put these guys in front of American metal radio programmers. Unfortunately, the guys, (Kal Swan - vocals, Doug Aldrich - guitars, Jerry Best - bass, Mark Edwards - drums), never got to tour cross-country in support of the record, so it's success was understandably limited. Hopefully, now with their having undergone a label change, and the release of this new Lp, the U.S. metal contingent will finally get the opportunity to look the mighty Lion right in the mouth. Actually "new" isn't quite appropriate. According to Doug, several of the songs were lifted from their highly successful Japanese Ep "Power Love" (1986). The band took the cuts and revamped them by laying down new guitar and vocal tracks - in effect updating them and making them more viable for today's market. There are a few new tracks as well - but bets are, you won't be able to tell which are which. They're all strong and this band is arguably one of the best when it comes to laying out this kind of power-based melodic rock. Their songs hit you first with an immense guitar presence, yet they don't sacrifice any melody for effect. Kal Swan's vocals are almost like a rich blend of Graham Bonnet and Joe Lynn Turner's voices. He has a very throaty sound - but he can hit the highs when he needs to. Actually, a few of the songs remind me a lot of Rainbow. Be sure and check this band out, it would be incredibly unfair for them to get passed by this time around. They've got real talent and songs to back it up. Try "Love Is A Lie", "Stranger In The City", "Can't Stop The Rain" and the best - "Forgotten Sons".

Deadringer, "Electrocution Of The Heart", Grudge....

It seemed like we'd barely gotten the chance to catch our breath following the releases of Blue Murder, Badlands and those Big boys - when all of a sudden another star-studded project landed with a "thump" on the ol'desk. Well, don't toss this one into the "listen to later" pile - you might be sorry afterwards that you did. The Who's Who goes something like this: Neal Smith (drums) and Dennis Dunaway (bass) found fame in the form of Alice Cooper's formidable rhythm section. Neal also co-penned such Cooper classics as "School's Out", "I'm Eighteen" and "Teenage Lament '74". Keyboardist Joe Bouchard, founded the monumental musical machine, The Blue Oyster Cult, (he also produced Liege Lord's "Burn To My Touch" Lp). Then he hooked up with these guys in '83 and never looked back. Vocalist Charlie Huhn was the scream behind three of Ted Nugent's vinyl expeditions. He also stood behind the mike for Gary Moore and Victory. And last but certainly not least there's the six string magic of Jay Jesse Johnson formerly of Archangel. So, now you know the score, and one listen to the album will assure you that once again when such stellar talents unite, amazing things can happen. Deadringer dish out melodic power crunchers ("When You're In You're In", "Secret Eyes", "Double Talk", "Dangerous Love") and anthemic rockers ("Everybody Rock", "Balls Out") sure to enhance any summer metal playlist.

CHART AX-SHUN

King's X, "Gretchen Goes To Nebraska", Mega/At... What's this I see? King's X has been #1 Most Added Metal for the last two weeks and hasn't hit the chart yet? Is there a problem here? If this happens again, you'll all be getting some pretty nasty phone calls next week, and they won't just be from me. Let's just run down some of the best tracks on this record, in order to give you a hand in your selections. Other than the 12" "Over My Head", (which, of course, you should already be playing), brilliant cuts include, "Don't Believe It (It's Easier Said Than Done)", "Send A Message", "Fall On Me", "Everybody Knows A Little Bit Of Something", and "Pleiades". The slower tracks are amazing as well: "Summerland", "The Difference (In The Garden Of St. Anne's-On-The-Hill)" and "The Burning Down". I expect to hear every one of these songs on your station, when I make my surprise visit to your town. (J.L.)

Mucky Pup, "A Boy In A Man's World", Torrid... When John and Chris Milnes, David Neabore and Dan Nastasi (who's since been replaced by Sean Killkenny), set out to record their second album, they'd already been tagged a metal/punk band. With this LP however, they've stretched beyond what that label connotes, and have delivered a record that shows growth and maturity, without dumping the satirical humor that they've come to be known for. Obviously, the metal hordes are lovin' 'em, because this week they leaped up 12 spots from 37-25* on Hard Hitters. They also picked up new adds at KCSF, KGRG, WKPX, while maintaining good air on KTEC, WBNY, WCDB, WCWP, WDWN, WEOS, WJUL, WPSU and more. Track these: "Death By Cholesterol", "Batman", "Someday", "All's Cool" and of course, the now classic, oh so sensitive love song - "U Stink (But I Love You)".

METAL FILINGS

-Atlantic's video editors have been pretty busy over the past couple of weeks. On July 7th, Kix's fourth clip from the "Blow My Fuse" album debuted on MTV's Hard 60 program. The new single is "Don't Close Your Eyes" and it's the ballad from the LP.... Due to the extraordinary amount of available footage, and public outcry, the Most Requested Badlands video for "Dreams In The Dark" has been re-edited. Gone will be the grainy look and hopefully we'll be able to see what the rest of the band looks like when they're moving. F.Y.I. -- The Badlands club tour, scheduled to last from the 6th thru the 20th has been cancelled. They will resume club dates on the 21st of July. They will in the meantime be on the road with Great White and Tesla.

-Metallica will be releasing their third single, the title track from their latest, "...And Justice For All". The edit has about three minutes of missing music. No video is in the works but the band

will be taping one of their Los Angeles shows for future use. We don't know what they're gonna use it for, but... Elektra is also happenin' with George's Lynch Mob and Dee Snider's new band Desperado, who also features Bernie Torme on guitar and the long lost Clive Burr (ex-Iron Maiden), on drums. Desperado is currently scheduled for a November release.

-The one and only Michael Schnapp called in a report from out on the road with Accept - showering us with highlights of their shows with Metal Church and headliners, W.A.S.P. Looks like the band is seeing great "acceptance" and are livin' it up with the crowds goin' crazy for "Generation Clash". The Schnapp-man was sure to supply us with some more dates for this impressive tour and they are: 7/12 Houston, 7/13 San Antonio, 7/14 Dallas, 7/15 Austin, 7/21 Boston, 7/28 Philadelphia and 8/4 Chicago. "More to follow as they fly in Beb!".... Schnapp.

WHERE THE WILD THINGS ARE

Almost fifteen years ago, a band called the Sex Pistols assaulted the world with the most vicious new and raw music around. The band's first and only record, "Never Mind The Bollocks, Here's The Sex Pistols" sparked a new generation in music - the punk era. Rolling Stone magazine ranked it at #2 on their Top 100 albums of rock and roll, second to none other than The Beatles' "Sgt. Peppers" album and countless other musicians from Metallica to Guns N'Roses have been inspired by them. But what fueled the tempestuous attitudes and rebellious postures was the music. Guitarist Steve Jones co-wrote and played all the guitar and bass parts on the dozen tunes. The real bassist Sid Vicious was too messed up or didn't know how to play the parts. Well, guess what? No one's been able to put out the fire and Steve Jones is just about to release his second solo LP, "Fire And Gasoline"... His first solo LP, "Mercy" showed a more emotional and vulnerable side to Mr. Jones, but with this one, he's ready to set the house ablaze. With the help of friends like Nikki Sixx, Axl Rose and Ian Astbury, (who co-produced the platter), Steve's new record boasts of more life than some of the newer, and supposedly hungrier bands out there. The stronger cuts in my opinion include "God In Louisiana", Steve's sarcastic commentary on televangelism, the self-explanatory title track, the cover of the Sex Pistol's "I Did U No Wrong", (it was the B-side to the "God Save The Queen" single), which features Axl Rose singing along with the Englishman, and "Wild Wheels" with its obligatory Harley Davidson sample.

George Lynch's new lineup for the LYNCH MOB, contains drummer Mick Brown from the Dokken company and a young boy by the name of Oni Logan. How he got such a strange name is on your guess. He was just about to start off in a major label band with ex-Keel meister Marc Ferrari's eponymously titled bunch, but was wooed and courted away by Mr. Scary himself. As for the bass position, no one has been picked, but we've heard that Jeff Pilson (of Dokken) has declined the offer. Thus far, there are no confirmed reports on whether Don Dokken is signed to Geffen Records or just watching T.V.. The Lynch Mob will be a heavier sounding unit according to the Lynch master, and will execute a no-holds barred policy. Meaning just straight out raunchy stuff. We can expect their debut to come out in early 1990.

The first band on the Imagine/CBS label is Danger Danger. The NYC based band started back in 1987 when drummer Steve West and bassist Bruno Ravel were playing in local area New York bands. Bruno played with everyone from White Lion, to Joe Lynn Turner, to Michael Bolton and even filled the spot left open in Talas when Billy Sheehan left to join David Lee Roth's circus. Billy was the world's fastest bass man. Steve and Bruno then joined up to form the nucleus of Danger Danger. Along with vocalist Ted Poley, guitarist Andy Timmons and keyboard player Kasey Smith, they present an all encompassing style ranging from hard rock to the blues and pop they grew up with. All of it retaining a heavy commercial touch with singable choruses and catchy riffs. The debut was produced by Lance Quinn whose past includes Bon Jovi and Lita Ford and the mixing was provided by

Mike Stone (Whitesnake, Queen, etc.). The first single is "Naughty Naughty" and I'm sure you'll hear a lot of it on the radio and see it on Headbangers and Hard 60. Very easily categorized as powerful pop.

Metallica has never been a big band for the video revolution. In fact they came to the game pretty late with a collection of bootleg and T.V. documentary footage dedicated to their bassist, the late great Cliff Burton. "Cliff 'Em All" sold more than videos by artists like Madonna, Prince or Van Halen, proving that Metallica's audience was in some dire need of the video product. Now comes the second video offering from the Metallicats. This one's called "2 Of One" and features two versions of the song "One", one a performance-only clip and the other intercut with scenes from the movie that inspired the song "Johnny Got His Gun". More Metallica for just \$9.98. Ooh boyee!

Faster Pussycat have been working on a new record. In fact, they're mixing in New York City at this very moment for a release in the fall. It's titled "Wake Me When It's Over" and is being produced by John Janssen, the guy who did Britny Fox and Lou Reed among others. It'll be 58 minutes with 12 songs, some of them being "Please Dear" - about a girlfriend of singer Taime Down who died and "House Of Pain" - about Taime's home life with a disagreeable pop. Other titles include "Slip Of The Tongue", "Where There's A Whip, There's A Way" and "Poison Ivy".

I can't wait for the new Bad Brains coming in August. It's gonna be called "With The Quickness" and will feature the original lineup. Yup, H.R.'s back!

EZO held a listening party last Thursday night at the Cat Club in NYC for their new release "Fire Fire". I'll let you know the details next week.

Newly signed MCA recording artists Pretty Boy Floyd made quite an impression at the Cat Club last Wednesday night. Taking the meaning of androgyny to a new limit, they made guys like Poison and the Stryper pups look masculine. With their hair tied up in small pony tails all over their heads, pink ribbons flailing, and beautifully airbrushed scrimms, they appeared to a crowd of mostly unenthused, amused New York industry folks with a smackling of L.A. groupies thrown in for good measure. Their best song was the cover of "Rock And Roll All Night (And Party All Night)" from those kings of the 70's, Kiss. If you like Poison, Britny Fox and Neil Young's singing, you'll probably like the Floyd kids.

Daniel Ash of Love & Rockets says the band didn't set out to make "So Alive" a top-40 hit. "It's obviously commercial and you can tap your foot to it, but we can't really craft it and say, 'Oh, let's do one where everybody can tap their foot to it,'" he says. "It was one of the last (tunes) we recorded. With that particular song, it was a magic moment in the studio. There was a lot of adrenalin going around and it was just something we had to get down on tape. Sometimes you don't actually have to work at it, it just flows out. It's quite rare, but we were lucky that day." Ash says the band will be releasing a five-song EP, "Swing," later this summer. He says it's "wacky, 1930s swing music with lots of saxophone."

The family of a teenager in the small Georgia town of Fitzgerald is suing Ozzy Osbourne, claiming that the 16-year-old committed suicide because of Osbourne's "Suicide Solution" song. The family's lawyer contends there are "subliminal messages" and "hemisync" soundwaves that control the mind of listeners.

Guitarist Pat Travers says he's close to securing a record deal for the release of new material he has just recorded in Miami. "I'm totally confident that the songs I'm recording are irresistible -- they really are," Travers says. "I'm not just blowing my own horn, because I've spent the last four years working on (these tunes). There's no filler." He says he's planning to take a break from his regular touring to vacation in Italy once he gets his record contract squared away. "I would feel guilty if I didn't have things sewn up," he says. "So what I'm going to do as opposed to taking a proper vacation, is I'm going to put together a little R&B band. I'd like to get out there (on stage) and not be the total focus of attention and not have to get dolled up every night and not have to worry about a big road crew. I just want to have a bunch of guys, and we'll load our own gear. We'll play in smaller places -- a couple of sets -- and play pool and throw darts between sets."

Keyboardist Dennis Drew says Rolling Stone got it all wrong when it recently wrote that producer Peter Asher forced 10,000 Maniacs to soften their style for the band's new album, "Blind Man's Zoo." "It's all bull, that article was ridiculous," Drew says. "They took it way out of context. The point we tried to make was that Peter was like a football coach on our first record with him, and he became more of a teammate on the new one. That story blew it out of proportion." Drew also says there is no truth to talk that singer Natalie Merchant plans to leave the band. "For a while our label wanted to give Natalie top billing, like Edie Brickell & The New Bohemians, but we nixed that early on. She's lately been talking about a solo album, but everyone in a band wants to do that kind of thing. Natalie deserves to be a star, as long as we still work equally on writing songs and putting the music together. I love her ability to bring the shows down to a small space, drawing people into her private world." Drew admits to being upset about a collaboration between Merchant and Billy Bragg that will appear on the b-side of a 10,000 Maniacs single. "I hope it never comes out," he says. "We didn't play on it, and it's got nothing to do with us; but I've heard it and I'm very disappointed."

"Future 40s (String Of Pearls)," the first single from Syd Straw's solo album, "Surprise," was co-written with R.E.M.'s Michael Stipe and Jody Harris. "The only way the song relates to the 1940s is that it is supposed to remind you of your past, your present and your future," she says. "The song started out as a dusty cassette of some guitar licks that Jody Harris left at my house. After fooling around with them on my four-track tape machine, I took the tape down to Athens, Georgia, where Michael Stipe and I sat around...til we came up with a song. When it was time to record it in New York, I re-assembled the original Golden Palominos for two days."

Jazz artist Sun Ra and Housing & Urban Development Secretary Jack Kemp have something in common. They've both been given an honorary commissioner's certificate by the Jefferson County Commission in Birmingham, Alabama. Sun Ra claims to be from the planet Saturn, which prompted Commissioner John Katopodis to ask, "If we can make him (Sun Ra) an honorary county commissioner, surely we can make (one of) a white Republican who one day is going to be president of the United States but is now serving as secretary of HUD. Isn't that the equivalent of coming from another planet?"

An arbitrator in Portland, Oregon has ruled that Billy Idol must pay almost \$23,000 in medical expenses and damages to a woman who was trampled by the crowd at one of his concerts. Lucy Hammond was sitting in the second row for Idol's 1987 show at the Memorial Coliseum in Portland, when the crowd rushed the stage after Idol said, "I'm lonely. Come on down here."

Aerosmith have joined the line-up for the rock concert planned for Moscow on August 12 and 13. The band is "99 percent" set to go, according to an Aerosmith spokesman. Jon Bon Jovi says Bon Jovi recently jammed with Aerosmith in Vancouver. "Aerosmith joined us on stage when we did their song, 'Walk This Way.' We then hung out and got more comfortable with each other. We're really looking forward to having them in Russia with us," Bon Jovi says. Motley Crue, Ozzy Osbourne, Cinderella, Skid Row and Gorky Park are also on the bill for the concert.

Jon Bon Jovi has been writing and producing a song, "Peace In Our Time," for the Soviet band Gorky Park. "Last summer they came over and met me in New Jersey," he explains. "Then in the fall I went over to Russia and saw them perform in Moscow. They've got a real shot in the States. I'm not going to tell you they're the next big thing, but they're good. They perform in English and know what they're doing." Gorky Park will appear on the upcoming album to benefit the Make A Difference Foundation, doing a cover of the Who's "My Generation." "I think Gorky Park's version is by far the best song on the album," Bon Jovi says. "They've got this Russian flavor in the middle that really adds to it."

Richard Marx says he shouldn't be criticized because his lyrics are about love, not politics. "I never intended my music to be controversial," he says. "I made a decision a long time ago that I didn't want anyone to pay \$10 to buy an album and hear my political views as a human being. That's now what I'm interested in presenting. The best compliment I can get is when I'm told a song really helped someone on an emotional level, 'cos that's what I set out to do. I don't have an interest in doing anything else."

The reunited Jefferson Airplane begin a tour August 19 in Providence, Rhode Island, that will end in late September. The band says proceeds from one of its concerts this summer will go to a Chinese student group at UCLA, to show support for the students supporting democracy in China. The new Airplane album will be out around the time of the start of the tour.

A Grand Rapids, Michigan, man wants the U.S. government to make Manfred Mann's "Do Wah Diddy" the national anthem. He calls his organization "America, Change The Anthem Now." He says the national anthem right now is "stodgy, staid, not easy to dance to, and frankly, may be the worst song ever written."

A record label in France has found a novel way of celebrating the bicentennial of the French Revolution. It has asked a dozen French alternative rock bands to create and record a song related to the revolution. The result is an LP (on Eurobond Records) called "Nouveau Sang Pour 89" ("New Blood For 89").

Paul McCartney says he would like to record new music with ex-Beatles Ringo Starr and George Harrison, but only if they are willing to drop a lawsuit they have filed against him. The court case began when Starr and Harrison discovered that McCartney had allegedly signed a secret deal in the 1970s on behalf of the Beatles which gave him a larger royalty than the others.

The Cult has been recording its U.S. shows, for possible use for a live album. "We're basically at our peak, in terms of our youth, anyway," says singer Ian Astbury. "There's still that spark of naivete there -- and there probably always will be. I've always been very affectionate towards my favorite groups at this age -- like Zeppelin, the Stones, the Doors, the Who. At this age they seemed to be the most prolific. And that's something I'd really like to document for us -- because it's never going to happen again in my life."

Former Icehouse keyboardman Andy Qunta has released a solo album in Australia. Qunta also co-wrote John Farnham's "You're The Voice." "Legend In A Loungeroom." is the name of the LP. "We used to play in the front room, in front of a mirror, with a tennis racquet, miming to our favorite records," he explains. "That's how the idea of forming a band started." Qunta was with Hazel O'Connor's band around 1980 as well as spending six years in Icehouse.

Pink Floyd's first show on their Russian tour attracted 40,000 fans to the Olympic Stadium in Moscow. During the three-hour show, fans threw red roses at the stage and waved sparklers. During "Money" they showered the band with rubles and even threw wrist watches onto the stage.

Stanley Clarke has just released his 12th solo album, "If This Bass Could Only Talk." "People are always asking me if I am a frustrated guitarist, especially since I helped invent the piccolo bass," Clarke says. "I'll tell you the truth -- I don't see how anybody can play the guitar, the damn strings are like cobwebs. I feel about the guitar like I do about the violin -- I don't see how anybody but a midget can play one. So, no, I'm not a frustrated guitarist...And I don't feel like I have to prove anything."

Sunday", "When the Hoodoo Comes" and Out of Nowhere"!! Thanks to Mike Thomas at WMDK for all the kind word T.B. deserves T.B.... Tin Machine. You should all have edits of "Heaven's In Here". By now and if by chance you don't, please call! Let's do it again with this second track!!! Off to a great start already.... Well, we're off again, this time onto San Francisco to be followed by Denver where we'll be visiting KTCL and Denver's local Teletunes so stay tuned for "On The Road With Crazyhead". Damn, this is my first "road trip". They can't all be this great, can they??

Charity Kurz, Mechanic, 212-226-7272

I'm sure that anyone who works with music will agree that it is nearly impossible to retain the "fan" element while we are exposed to such large volumes of material. I was pleased to find that the "fan" in me still exists when I saw The Who last night. I feel that my life is, well, entirely better for the experience. I was sort of "The Zen of The Who" for me. And Pete Townshend is god!... On a less religious note, the first stations to get into the funky groove rock of Bang Tango are KNAC, WGIR, WQFM, WCCC, KILO, WTPA, WEZX and KPEZ. Bang Tango's video for "Someone Like You" is one of MTV's Top 15 Most Requested videos! It looks like these kids are doing alright too. Vocalist Joe Leste has one of those voices that jars your soul upon first listen. I had the same reaction when I first heard Billy Idol and Steven Tyler. It's true.

Megadon, Amuse America, 212-213-9595

As you gaze upon these words of wit, the new EZO Lp should be winging its way to your desk. The emphasis tracks, (by my standards) are "Streetwalker", "Night Crawler" and the title track "Fire Fire". The video for "Million Miles Away" was shot last Friday... You'll be pleased to know there are now two of us here to annoy you by phone, I've got an assistant. His name is Chuck Panossian, formerly of CBS fame. We're having a barrel of laughs, a new comedy team in the making, if I do say so myself. As for the social front, I've been hanging out with a band called China that we're working with (from Switzerland of all places), and I've been trying to defeat the evil Leather Goddesses of Phobos for weeks now (it's not as kinky as it sounds, it's a frustrating and complicated computer game). Until next week, I leave you with this thought -- Whenever I go to New Jersey go-go bars, why do the Japanese dancers always want to take me home? Answers on a postcard please...

Russell Gerroir, Concrete, 212-645-1360

Metal radio is really warming up to Faith No More. Their lead track "From Out Of Nowhere" is creating quite a buzz, as they have debuted at 39* on the Hard Hitters chart and came close on both FMQB and CMJ. Other strong tracks are "Epic" and "Woodpecker From Mars".... Dangerous Toys continue to be impressive. Last week the Toys jumped on the Billboard Lp chart, were added into Breakout rotation on MTV and climbed all the way to the Top 5 Requested on MTV.... Junkyard is another up and coming band. They're currently a Top 10 band on FMQB, a Top 20 on Hard Hitters and Top 30 on CMJ. The strongest tracks are "Hollywood", "Blooze" and "Hot Rod".... In the hanging tough department comes Black Sabbath. Their latest Lp "Headless Cross" has been in the Top Ten on the Metal charts for a while now, and behind the new emphasis track "Black Moon" they're looking very strong. Look for tour info soon.... Give Sir Mix-A-Lot a listen, their cover of "Iron Man" (with Metal Church) deserves your attention. Sir Mix-A-Lot has been on the added list at the Hard Report for two consecutive weeks, your audience will like this song.... On your desk now are new releases from Lion, Vain and Deadringer, please give them a spin.

Clarissa Garcia, Enigma, 213-390-9969 x215

Barren Cross was at the Country Club this weekend. I'm almost ashamed to say that it was the first time I saw 'em live, but they were very much worth the wait. Chrisby, you MUST experience "The Stage Of Intensity" live. The band is so powerful musically and lyrically that I couldn't tell if the crowd was in awe of the band's conviction or in disbelief of the intensity. Most likely, it was a little of both. You can check 'em out: 7/14 Medford, OR; 7/17 Vancouver, BC; 7/18 Seattle; 7/19 Portland, OR; 7/20 Boise, ID; and 7/25 Hollywood, CA (at the Roxy!).... Guardian begin their tour next month: 8/7 Vancouver, BC; 8/8 Seattle; and 8/13 Spokane, WA. I'll pass on new tour dates as soon as I get them. Yes, I've seen Guardian more than once. Actually, I've seen 'em lots o' times. They're wonderful!.... Laaz Rockit's "Fire In The Hole" has been on MTV's Headbanger's Ball for almost two months now -- the past couple of weeks in the second hour. Pretty impressive, huh?.... Miss Daisy is here, Miss Daisy is here. Their debut release "Pizza Connection", ships to radio this week

and you should have it before you know it.... Remember, "Head Over Heels" is the new promotional 12-inch from Girlschool. It's a modern-day love song about modern-day relationships.... 'Til next time, take care and help me make sure that Mike Colucci and Bill Fischer are at the Channel on Saturday, July 22nd. See ya!

Stewart Morales, Torrid, 914-664-3885

Saw The Who at Giants Stadium last week. I didn't fall asleep like I did at Shea stadium in 1982. I think Led Zeppelin should do the same thing. I'm sure a fifteen-piece band could make them sound great no matter how many times Page screwed up or Plant's voice cracked.... In other news, Mucky Pup Mania is spreading. Not only across radio, but across the country as well. Initial dates include: 7/10 Long Branch, NJ; 7/16 Baltimore, MD; 7/21 Norwalk, CT; 7/23 Brooklyn, NY; 7/27 New York, NY; 7/29 Detroit, MI; 7/30 Pittsburgh, PA; 8/4 Long Island, NY and 8/9 Clifton, NJ. More dates are comin'. Be sure to check them out when they're in your area. If you're lucky, you might just get the opportunity to meet the Motley Maven of the New York scene -- ME!! C-yaz.

Missi Callazzo, Megaforce, 201-254-6533

King's X are about to take over the WORLD!!! The most amazing video ever produced is on MTV now. Call 1-800-DIAL-MTV, between the hours of 4:30 and 5:30 eastern time each weekday, and request the first video from "Gretchen Goes To Nebraska" entitled "Over My Head". When you are not busy dialing MTV and watching your favorite King's X video you should take that unbelievably brilliant King's X Lp off your shelf, play a few tracks, then call your favorite trade publication and report it at #1!!! Go through these simple steps once again for Trust, M.O.D., and any other Megaforce bands you like.... Testament!! "Practice What You Preach" singles will be arriving July 17th. The album will be coming the first week in August.... Icon, that's a name you haven't heard in quite a while. Icon is back and they are better than ever. You will be getting your first taste of "Right Between The Eyes" August 28th. "Right Between The Eyes" features "Taking My Breath Away" and a special appearance by Alice Cooper on "Two For The Road" and "Holy Mans War". Until then, PLAY AND REPORT TRUST AND KINGS X AT #1!!!!

Kathie Reed-Barr, Roadracer/RC Records, 212-219-0077

Things always seem to be bubbling here at the Downtown NYC Ranch -- Have you grooved to Last Crack yet? The band's raw power will be "Slicing Steel" and scaring "Concrete Slaughterdogs" which will send them running for "Shelter". Don't miss the bus!... Sword -- have you taken the plunge yet? Well, dive right in damn it - "Trouble Is" and "State Of Shock" will keep you well above water!! Watch for the Sword video on MTV and 1-800-DIAL-MTV will help for you to see it during the day when you are home!!! Get dialing!... Keep kicking on Annihilator - These guys are filming a live video for "Human Insecticide" while on their European tour, and soon they will be here kicking butt live in your town!... Crimson Glory is going over the top with "Lonely" and next up for the killers is "Lady Of Winter" and "Masque Of The Red Death"!! I got a chance to check out David T. Chastain and Leather in Baltimore this past weekend!! What a rocking show! Check into "In Your Face" from David's "Within The Heat" and keep checking into Leather's "Shock Waves"! Cuts that are cool for Leather are "All Along The Battlefield" and "Shock Waves"!! The lady is hot and her vocals will bring you to your knees.

Tom Micucci, Metal Blade, 212-645-6208

We interrupt this Cheryl Valentine dialogue to bring you a special Metal Blade Report. Heir Apparent has been released!! It's whereabouts have yet to be determined, but the lack of immediate playback could result in total devastation. Check your mail today. We now have confirmed reports from a reputable source (us) that two bands from opposite coasts will rise together and be released in the Same Month!! Princess Paang from N.Y. and Lizzy Borden from L.A. have been rumored to be the best one-two release in years.... The E.P.A. has announced that there is a Fates Warning epidemic plaguing the country. Currently, there is no cure, but they promise that by mid-August, a Fates Warning anti-spasmodic mood-elevating suppository (i.e. Lp or CD) will be at hand. For now, drink lots of fluid and get some rest! There's been a new name on the scene that people are relating to Roman times. Little Caesar will be arriving next week and "ruler of the western world" should immediately come to mind. A new sport has been brought to our attention from O.D. called "Surf U.S.A.".... Yes, Sacred Reich has picked up their surfboards and plan to cruise the U.S. in the spirit of summer. One final note, a gang by the name of Tattooed Love Boys have been entering studios and the only way to calm them down is to spin them at high revolutions! We now return you to your regularly scheduled dialogue.
