

VOLUME 2

FEBRUARY 1985

NUMBER 2

IN THIS ISSUE - A PHOTO REVIEW OF PENNA. WIRELESS MFG. CO.

PENNA. WIRELESS MFG. CO. - AUDION CONTROL BOX

THE NATIONAL PUBLICATION FOR BUYERS AND SELLERS
OF OLD RADIOS AND RELATED ITEMS - PUBLISHED MONTHLY

ANTIQUE RADIO CLASSIFIED

Publishing Details

Antique Radio Classified is published monthly, 12 times yearly by GBS Enterprises, 9951 Sunrise Blvd., *R-9 Cleveland, OH 44133, (216) 582-3094

Publisher - Gary B. Schneider

Copyright - 1985

USPS Identification - pending

Reference - National City Bank of Cleveland, OH

Purpose

Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby thru the buying, selling, and trading of radios and related items. In addition, there will be coverage of upcoming radio conventions, meets, flea markets, etc. Other items of interest to collectors will be included in issues as material or suggestions are received.

Display Ad Rates

Antique Radio Classified accepts display advertising for companies that provide a product or service to the radio collecting hobby. As artwork is reduced 35% when printed, original should be 1.54 times the desired finished size and must be camera ready artwork. Original size areas are available as follows:

Full Page	10-1/2" H x 7-1/2 W	\$30.00
Half Page	5-1/4" H x 7-1/2 W	15.00
1/4 Page	5-1/4" H x 3-3/4 W	7.50
1/8 Page	2-5/8" H x 3-3/4 W	3.75

Business Card - same as 1/8 page

Above rates based on circulation of 1,000 subscriptions.

Full page ads may be vertical or horizontal format.

Multiple insertions for 3 months qualify for a 10% discount.

All artwork must be received by the 1st of the month to be included in the following issue, which is mailed on the 1st day of the calendar month.

Classified Ads

Each subscriber is entitled to one 20 word classified ad free of charge per issue. Additional words over the limit are 10¢ per word. Multiple insertions of same ad are discouraged. This is to allow for a varied ad content in each issue. Multiple insertion ads for more than 2 issues must be run as a display ad. All ads must be printed neatly and be received by the 10th of the month before next issue. All issues mailed on the first of the month.

Payment

All ads must be paid for in advance. Make checks payable to Antique Radio Classified.

Subscription Rate

Subscriptions are available on a yearly basis, \$15.00 per year. Sample issues: \$1.50.

Submission of Material

Antique Radio Classified welcomes and solicits any information that pertains to the radio collecting hobby. This may include material such as upcoming radio events, meetings, radio books and publication reviews, new radio clubs and organizations, radio auctions and price reports, sources of old radio material and restoration supplies, and any other material that would be of interest to the hobby. All material submitted should be typewritten and verified for accuracy.

Change of Address

Notification of change of address should be made well in advance to receive uninterrupted copies of Antique Radio Classified. Do not depend on the Post Office to let us know.

Fine Print

The publisher is not responsible for any buying and selling transactions incurred by readers thru the content of this publication.

Antique Radio Classified subscription and ad rates subject to change, as well as frequency of publication, content, and size.

ANTIQUE RADIO CLASSIFIED... COPYRIGHT 1985

TELL YOUR FRIENDS
TO PLUG INTO AN
A.R.C. SUBSCRIPTION

Here we are with the sixth monthly issue of *Antique Radio Classified*. It's hard to believe that half a year has gone by so quickly. From conception of this publication to the point where we are now has been a difficult task, but well worth the effort. I hope you agree. Although A.R.C. has been enthusiastically received by collectors all over the country, many collectors are still not aware of its existence. I am hoping that you, my subscribers, will continue to promote A.R.C. to your collector friends. Remember it is the goal of A.R.C. to be the *number one publication* for "buyers and sellers of old radios and related items". It is too bad that some of the various radio clubs refuse to acknowledge the existence of A.R.C. ... their attitude can only harm the enjoyment for all in the hobby. Instead of playing "deaf ears", it would be nice if some of these clubs could write me and explain their views.

I would like to welcome the many new subscribers to A.R.C., along with those newcomers as a result of the announcement of A.R.C. in the January issue of *Radio-Electronics* magazine. For many it is their first exposure to the radio collecting hobby. Like many of us, we didn't know that there were other people who had the same interest in collecting this "old stuff". They will soon learn that radio collecting is a respectable hobby.

TIDBITS: Speaking of *Radio-Electronics* magazine, check out the Fall 1984 issue of *Hands-on Electronics* magazine published by them. The cover shows a one tube regenerative receiver, plus a large six page construction article on how to build this receiver. A great article - make an effort to find a copy on the newsstand if still available, or write them asking for information on how to obtain a copy. Be sure to enclose a S.A.S.E. for reply... I have seen an ad by *Nytec Electronics* offering a reproduction cathedral radio, complete with an AM/FM radio, in a real wooden cabinet, not like the plastic one's on the market over the past years. The price is \$149.95, a little high, but one must consider it's not a volume production item.

I have been soliciting articles for publication in A.R.C. from other collectors, but am facing the same problem other club publications experience - little or no response. Is there anyone out there in "radio land" who can share some aspect of the hobby with his fellow readers of A.R.C.! I would like to make A.R.C. the largest classified ad publication, but at the same time articles are needed to make A.R.C. a little more interesting. Load your camera with B&W film, shoot some photos, and then write a 1 or 2 page article describing what you have just photographed. It may be a radio, group of radios, or even your whole collection. Believe me, you will get sense of accomplishment to see your article in print. Would also like to have a monthly "photo review" of unusual radios and other items. Here again, all that is needed are photos of individual radios in your collection, along with a paragraph describing them. We all like photos of unusual radios, why not contribute your share. This would be a very interesting monthly column... if we can get enough photos!

An example of collector participation is the excellent photo review of Penna. Wireless Co. by collector Jerry Finamore in this issue. Lets continue sharing our knowledge in the hobby... support A.R.C. now! (GBS)

LETTERS TO THE EDITOR

In your October 84 issue, the Collector's Corner featured a write up on a British radio called ECKO A-22. I was so interested in that set I immediately called my cousin in London and by her efforts I now own an ECKO A-22, perhaps the only one in California.

Cousin Hilary told me these radios, which are 40 years old, are quite plentiful. The one I received is flawless and is a unique collectable I must say looking very Art Deco-ish. It receives vast amounts of radio stations despite being only 4 tubes (including rectifier). Since the set operates from 240 volts, rather than alter the set in any way, i.e. replacing the power transformer, I simply installed a 240 volt outlet for it to use. Most homes have 120/240 power so this is no big task.

I'd like your readers to know of my availability to these sets and if people are interested in this one of a kind collectable, possibly I can get them one. Those interested send a S.A.S.E. and when I get enough inquiries I'll check it out.

Your radio magazine is very nice and I enjoy getting it each month.

Regards...Stan Lawson, Box 91, Villa Grande, CA 95486

COLLECTORS CORNER

CONTRIBUTED BY: FRANK HEATHCOTE, 1235 N. 3RD ST., LOGANSPORT, INDIANA 46947

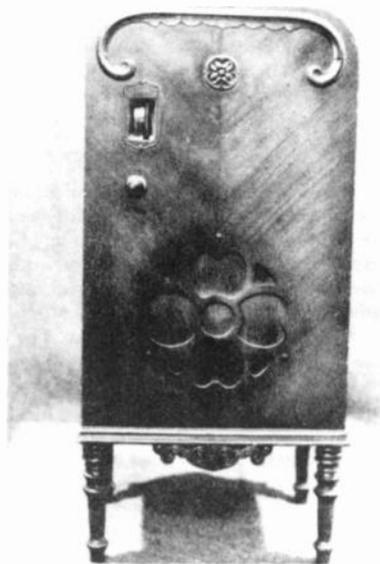

In 1930 one of the first nationally distributed brands to jump on the midget set bandwagon was the Gloritone made by the United States Radio and Television Corporation with offices in Chicago and a factory on 3301 South Adams Street in Marion, Indiana. They introduced the Model 27 in July, 1930. It was a five tube set employing an unusual chassis worthy of note. From the side it is an "L" shaped affair fastened to the upper rear of the cabinet. The tubes hang upside down from the horizontal part of the cabinet. Although a rather plain looking set, it was a great seller and is quite commonly still found.

They did the midget sets one better and came out with the 27S Spinet Console using the same chassis as the 27 mantel radio but turned it upside down. Now at least the tubes were right side up!

This particular 27S is a "Radiotrope"; one of many private brands made by U.S. Radio. It is housed in a dark walnut veneer cabinet 29" high, 14" wide, 11-1/2" deep, the entire set weighing less than 35 lbs. A tuned radio frequency circuit is used using two 24's in the RF stages, a 27 detector, a 45 output tube, and an 80 rectifier. An 8" Utah speaker is used.

The Model 27 is a well built set but some components are prone to failure. The "Canohm" shunt resistor is best replaced and frequently the audio transformer and speaker field are open. Many times these can be repaired by disconnecting the offending part and hooking a neon sign transformer of 4000 to 10,000 volts and turning it on for 10-20 seconds. It may be necessary to repeat a few times. I've had tremendous success this way.

Also, if troubled by poor reception (squealing) or no reception; but everything looks okay, try cleaning the grounding contacts between the tuner rotors and ground. All bypass and filter capacitors are best replaced. Use 400 volt or better for bypass, 450 or better for filters.

RADIOTROPE 27

The 27 is a fine sounding set although lacking in selectivity. The little console is a popular piece and quite hard to find. The cabinet legs are rather flimsy, and I imagine easily broken, probably resulting in many being discarded. Also made was the 27P which was a console radio phonograph.

Next month the 1931 Brunswick 11A mantel radio will be featured. Happy Collecting!...Frank and Diana Heathcote.

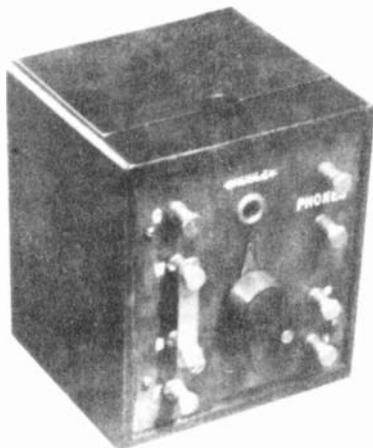

The Collectors Corner will appear as a regular feature of Antique Radio Classified. It is an attempt to build knowledge and interest of radio collectors primarily in AC home receivers of the late 1920's to the 1940's, with emphasis on the lesser known and more unusual styles and brands. Helpful restoration hints will be given where possible. Any questions, comments, or suggestions on this column, the radios featured, or on any other radios may be sent to Frank Heathcote, 1235 N. 3rd St., Logansport, Indiana 46947. Please include a self-addressed stamped envelope for reply.

CROSLLEY REVIEW

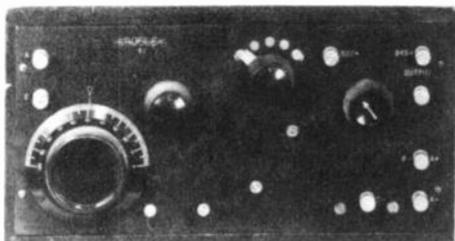

CONTRIBUTED BY: DAVID CROCKER, 6 OLD FARM RD., DUXBURY, MA 02332

Of all the radio manufacturers, one of the most popular with collectors is the Crosley Radio Corporation. Due to this wide-spread interest, Antique Radio Classified in cooperation with Dave Crocker, a Crosley specialist, will present a series of articles showing the many models of Crosleys manufactured. This will help assist the collector in identifying the many types of Crosleys made, as well as increasing ones' knowledge on the subject. Any comments or questions concerning this column should be directed to Dave with a S.A.S.E. for reply. See address above.

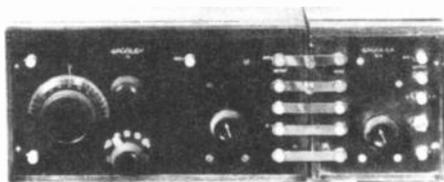

AUDION DETECTOR - The Audion Detector was available for only \$6 in 1923 and was primarily for use with the Model 1. Its binding post and cabinet were planned to hook up with a crystal receiver on the left side... and RFTA or 2-Stage Amplifier on the right side.

CROSLLEY

MODEL 51-Crosley's old Model V with an added stage of amplification became this new 2-tube Model 51 (Model V plus 1 V1 or 51). The cabinet was the same size as the models V, 2-step amplifier and "Ace" one-tubers. This early version 51 has the tap switch top-center on the panel above the transformer to make room for the added socket. Antenna and ground post are grouped upper left due to extreme low-left position of the tuner. The model 51 was one of Crosley's most successful sales items.

MODEL 51-The 2-tube Model 51 was altered later in 1924, and the panel again resembled the earlier Model V. The C- post was moved to the extreme right in order to align with the amplifier's binding post configuration. The companion one-tube 51-A amplifier, shown attached to the right, gave the 51 the same receiving characteristics as Crosley's Model 52. Note the on/off switch in line with the binding post on the amplifier's right side.

MODEL 51 - Late in 1924, Crosley produced this wood-paneled Model 51... which was not mentioned in advertising and appeared for only a brief period. Best guess has it that it was the forerunner of the wood-paneled sets to come, and was meant to test the public's reaction. Maybe Crosley simply ran out of Model 51 bakelite panels.

PENNA. WIRELESS MFG. CO.

CONTRIBUTED BY: JERRY FINAMORE, RD 2 - BOX 623, NEW CASTLE, PA 16101

One of the more obscure radio companies in the early days of radio was the Pennsylvania Wireless Mfg. Company. Collector Jerry Finamore of New Castle, PA has made a specialty of collecting this equipment, as this is the city where the equipment was manufactured. As very little is known of the company, Jerry has endeavored to trace the history of the company as well as collecting the radios made. He welcomes additional information from other collectors concerning Penna. Wireless Mfg. Co. and is always in search of additional models to add to his collection. The accompanying photos of his collection show the results of Jerry's search. The story which follows is a brief glimpse of what information he was able to acquire. (GBS)

About 1910 a man named Rex Patch was working as a telegraph operator for the railroad, and was experimenting with wireless radio on the side. Sometime in 1914 he started the Pennsylvania Wireless Manufacturing Company. In the early years of the company he was manufacturing audion control boxes, loose couplers, tuners, and crystal detectors which were sold mainly in the Western Pennsylvania area. He continued to manufacture these components until about 1919-20, at which time he began to manufacture one tube regenerative sets. After the one tube regenerative sets came three and four tube regenerative sets along with various circuit designs he was experimenting with in order to get around patents. Then in 1925 he came out with a three dial TRF set that was semi-largely advertised.

The early sets were made of a fine quality oak that was usually a blond finish. The later sets were made of walnut and had access to the tubes and circuitry from a door in the back. The quality and workmanship of the sets before 1920 was excellent, but as competition increased in the 20's, the quality of the sets had to be made compatible with the market, especially since it was a small company without large sales volume. The company managed to stay in business until 1929. At this time he had a large amount of inventory out on credit and the creditors were going out of business. (It is unknown if the company ever got into the manufacturing of electric sets... J.F.)

FIG. 1—THIS IS A AUDION CONTROL BOX DESIGNED FOR USE WITH A DOUBLE FILAMENT TUBULAR AUDION TUBE. IT RESEMBLES THE DEFOREST RJ-4 EXCEPT THE DEFOREST USES A ROUND TUBE AND THIS ONE THE TUBULAR AUDION. (PHOTO ALSO ON FRONT COVER OF THIS ISSUE.)

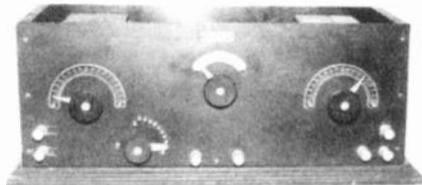

FIG. 3—VERY EARLY TUNER, IT CONSIST OF TWO WOOD VARIOMETERS AND A WOOD VARIOCOUPLER. IT DOES NOT HAVE AN ENGRAVED PANEL. IT IS OBVIOUSLY A REGENERATIVE RECEIVER, BUT IT DOES NOT HAVE THE "ARMSTRONG" LICENSE.

FIG. 2—LOOSE COUPLER USING SLIDE TUNER ON THE PRIMARY AND A TAPPED SECONDARY. IT MEASURES 19" LONG AND 7" WIDE.

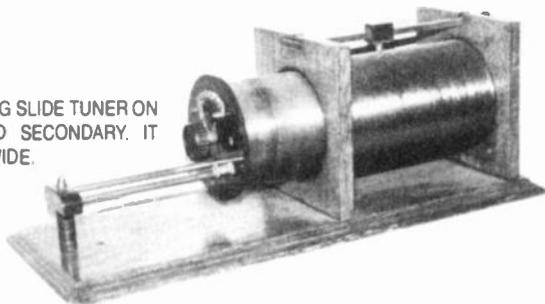

FIG. 4—THIS IS SIMILAR TO FIG. 3 EXCEPT THAT IT HAS TWO TAP SWITCHES. AS FAR AS I KNOW THIS SET IS THE FIRST TO HAVE THE ARMSTRONG LICENSE ON THE NAME PLATE. PROBABLY MADE ABOUT 1919-20. ALL OF THE REGENERATIVE SETS MADE AFTER THIS HAD THE ARMSTRONG LICENSE.

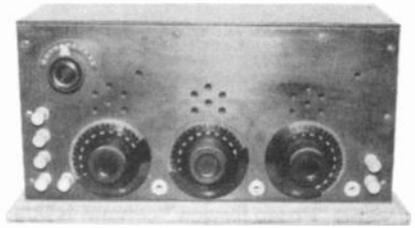

FIG. 5—DETECTOR AND TWO STAGE AMPLIFIER. THIS SET HAS AN EXTERNAL POTENTIOMETER ON THE DETECTOR TUBE. ALL OF THE REGENERATIVE SETS MADE AFTER THIS ONE HAD THIS TYPE OF CONTROL.

FIG. 6—THIS SET CONSIST OF TWO VARIOMETERS AND AN VARIOCOUPLER WITH A DETECTOR TUBE. THE KNOBS ON THIS SET ARE OF HIS OWN MANUFACTURE. THEY ARE UNIQUE IN THAT THE CENTER (WHERE YOU GRAB IT) IS 12 FLAT SIDES, RATHER THAN THE GROVED ROUND TYPE. THE TUBE IN THIS SET IS ACESSED FROM A DOOR WHICH PULLS DOWN IN THE BACK OF THE CABINET. MADE ABOUT 1921-22.

FIG. 7—A ONE TUBE REGENERATIVE SET USING A TUNING CONDENSER AND A TAPPED COIL. THIS SET WAS TYPICAL OF HIS STYLE, WITH THE DOOR OPENING IN THE REAR AND THE EXTERNAL POTENTIOMETER.

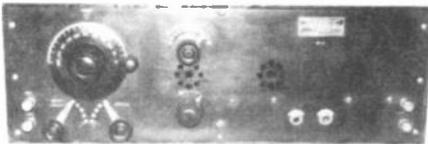

FIG. 8—THIS IS THE SAME CIRCUIT AS FIGURE 7, EXCEPT IT HAS TWO STAGES OF AUDIO AMPLIFICATION. THE CABINET IS LONGER TO INCLUDE THE EXTRA CIRCUITRY.

FIG. 9—THIS SET IS DESIGNED FOR USE WITH DRY CELL BATTERIES AND IS INTENDED TO USE THREE 199 TUBES. THE CIRCUIT AND CABINET IS BASICALLY THE SAME AS FIGURE 8.

FIG. 10—I KNOW VERY LITTLE ABOUT THIS SET. I FOUND IT IN THE ATTIC OF THE BUILDING WHERE THEY WERE MANUFACTURED. IT IS A FIVE TUBE SET AND IS INTENDED FOR USE WITH A LOOP ANTENNA. IT HAS ONE TUNING DIAL, A STABILIZER CONTROL, AND THREE TUBE RHEOSTATS.

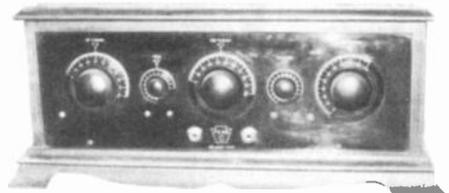

FIG. 11—THE "DELUXE FIVE", A FIVE TUBE TRF SET. THE TOP OF THE CABINET LIFTS UP TO ACCESS THE TUBES AND CIRCUITRY. HE BEGAN TO USE THE NAME "PENN C" ON THE FRONT OF HIS RADIOS, WHILE THE LABEL INSIDE STILL READS "PENNA. WIRELESS MFG. CO.". I HAVE ONE AD FOR THIS SET FROM APRIL 1925.

PHOTO REVIEW

This "Photo Review" column is intended to present in pictorial form some of the radios and related items in the collections of other collectors. These photos are meant to help increase awareness of what's available in the collecting field and/or to supplement known documented literature, both current and past. Photos are solicited from other collectors for use in future issues of A.R.C. Items desired are the more unusual radios or seldom seen ones, both battery and electric, speakers, tubes, advertising items, and any other items of interest to collectors. Photos must be black & white and be sharp in detail, preferably with a light colored background. Please include a description of the item such as manufacturer, circuit type, number of tubes, date of manufacture and etc. All photos are not returnable.

Note: These photos are from my files, and therefore no description is available on them. When known, the owner of the radio is listed. Future "Photo Reviews" will have more information, as provided by the collectors when submitting their photos. (GBS)

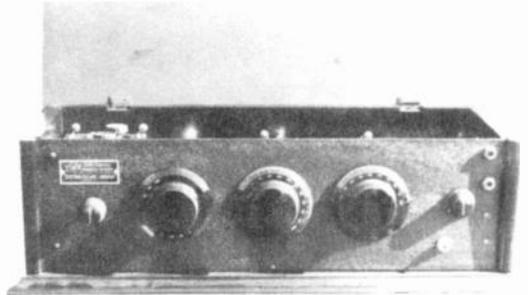

Crystal Set - Bruce Mager

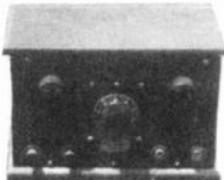

Multivalve tube - D. Szablewski

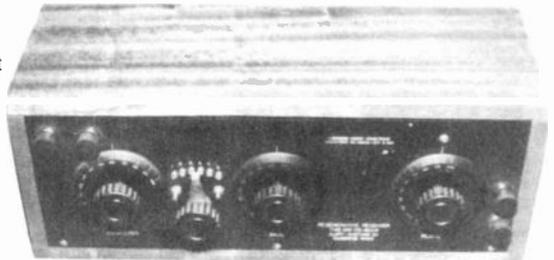

Atwater Kent Lamp - Larry Wright

Colby 5 tube - James Kreuzer

Kodel - Owner unknown

8 Clapp-Eastham ZRF - Larry Babcock

CLASSIFIED ADVERTISEMENTS

NOTICE: ADS FOR THE NEXT ISSUE, MARCH 1985, MUST BE RECEIVED BY FEBRUARY 10TH 1985. ADS FOR FUTURE ISSUES MAY BE SENT IN ADVANCE, HOWEVER EACH AD MUST BE WRITTEN ON A SEPARATE SHEET OF PAPER, PREFERABLY A 3 x 5" INDEX CARD. LIMIT OF TWO MULTIPLE INSERTIONS OF SAME AD. ENCLOSE PROPER PAYMENT FOR ADS OVER THE 20 WORD FREE LIMIT PER ISSUE. (10 CENTS EACH WORD.)

WANTED: RADIO MANUFACTURER'S AND SHOP ADVERTISING OR PROMOTIONAL ITEMS; SIGNS, TOYS, ETC. JACK GRAY, 1162 BROADMOOR DR., NAPA, CA 94558

WANTED: TYPE 11 AK TUNER AND AK RF STAGE 1 OR STAGE 2 TRANSFORMER. HAVE AK BREADBOARD PARTS TO TRADE OR PAY CASH. JERALD HUEBER, 1002 CEDAR ST., BONHAM, TX 75418

FOR SALE: RIDERS RADIO MANUALS 7 & 13 - \$15 OR TWO FOR \$25 (PPD), INDEXES 1-8 AND 1-10 - \$8 EACH, NEW VT24/864 - \$5 EA., BOX OF 100 71-A'S - \$300 (FIRM), N.O.S.
