

VOLUME 2

MAY 1985

NUMBER 5

Hear the Murdock Neutrodyne

THE NATIONAL PUBLICATION FOR BUYERS AND SELLERS
OF OLD RADIOS AND RELATED ITEMS - PUBLISHED MONTHLY

ANTIQUE RADIO CLASSIFIED

Publishing Details

Antique Radio Classified (USPS-735-090) is published monthly, 12 times yearly, at a subscription rate of \$15.00 per year by G.B.S. Enterprises, 9951 Sunrise Blvd., #R-9, Cleveland, Ohio 44133. (216) 582-3094.

Second-class postage paid at Cleveland, OH.

Publisher and Editor - Gary B. Schneider.

POSTMASTER: Send address changes to address above. Antique Radio Classified - Copyright 1985.

Purpose

Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby thru the buying, selling, and trading of radios and related items. In addition, there will be coverage of upcoming radio conventions, meets, flea markets, etc. Other items of interest to collectors will be included in issues as material or suggestions are received.

Display Ad Rates

Antique Radio Classified accepts display advertising for companies that provide a product or service to the radio collecting hobby. As artwork is reduced 35% when printed, original should be 1.54 times the desired finished size and must be camera ready artwork. Original size areas are available as follows:

Full Page	10-1/2" H x 7-1/2 W	\$30.00
Half Page	5-1/4" H x 7-1/2 W	15.00
1/4 Page	5-1/4" H x 3-3/4 W	7.50
1/8 Page	2-5/8" H x 3-3/4 W	3.75

Business Card - same as 1/8 page

Above rates based on circulation of 1,000 subscriptions.

Full page ads may be vertical or horizontal format.

Multiple insertions for 3 months qualify for a 10% discount.

All artwork must be received by the 1st of the month to be included in the following issue, which is mailed on the 1st day of the calendar month.

Classified Ads

Each subscriber is entitled to one 20 word classified ad free of charge per issue. Additional words over the limit are 10¢ per word. Multiple insertions of same ad are discouraged. This is to allow for a varied ad content in each issue. Multiple insertion ads for more than 2 issues must be run as a display ad. All ads must be printed neatly and be received by the 10th of the month before next issue. All issues mailed on the first of the month.

Payment

All ads must be paid for in advance. Make checks payable to Antique Radio Classified.

Subscription Rate

Subscriptions are available on a yearly basis, \$15.00 per year. Sample issues: \$1.50.

Submission of Material

Antique Radio Classified welcomes and solicits any information that pertains to the radio collecting hobby. This may include material such as upcoming radio events, meetings, radio books and publication reviews, new radio clubs and organizations, radio auctions and price reports, sources of old radio material and restoration supplies, and any other material that would be of interest to the hobby. All material submitted should be typewritten and verified for accuracy.

Change of Address

Notification of change of address should be made well in advance to receive uninterrupted copies of Antique Radio Classified. Do not depend on the Post Office to let us know.

Fine Print

The publisher is not responsible for any buying and selling transactions incurred by readers thru the content of this publication.

Antique Radio Classified subscription and ad rates subject to change, as well as frequency of publication, content, and size.

DON'T BE LEFT IN THE DARK AGES!

PHILIPS "VOLKSEMPHANGER"

In 1932, as the Nazi party of Adolf Hitler gained control of the government of Germany, the newly formed Ministry of Propaganda and Enlightenment, wanting to get the party message into every household, proclaimed that very cheap radios be made available. The Heinrich Hertz Institute of Berlin was given the responsibility of designing suitable radios. It could not be too good or that segment of the public that could afford it would balk at buying a more expensive set thus alienating the industry.

Hitler met with representatives of the leading companies and decreed the cost not to exceed 75 marks, about \$15. The original model introduced at the 1933 Berlin radio show was a spectacular success. In the first year 344,000 were sold. In 1934, with the ministry of Propaganda warning dealers against using "sell up" tactics on prospective owners, the price was reduced and over 811,000 were sold. Sales in 1935 were down to 470,000 even though a government supported trade-in plan resulted in the destruction of 373,000 pre-1930 sets. An improved model was introduced in 1937, total sales now reached over 2,600,000.

My Volksradio is the 1937 model VE301DynGw manufactured by Deutsche Philips, one of 28 manufacturers making the Volksempfangers. The 301 stands for 30 January to commemorate the appointment of Hitler as Reichs Chancellor. The set uses 3 tubes and operates on any voltage between 90 and 260 volts on either alternating or direct current. The cabinet is one piece black bakelite and employs a moving coil permanent magnet speaker. The linear tuning scale is lighted and has the names of German national and regional radio stations on it. Two frequency ranges are covered, 150-350 and 500-1550 kilohertz.

DEUTSCHE PHILIPS

Valvo brand 8 pin side contact tubes are used. A type VF7 pentode is used as RF amplifier and detector. A type VL1 pentode is used as AF output and a VY1 half-wave rectifier tube supplies direct current. A Urdox U3505 tube is employed as voltage regulator.

I unfortunately can't report on the operation of the VE301. The rectifier tube was missing and I didn't receive it soon enough to have the radio working in time for the article. Perhaps in the future, I'll compare it to the English Philco 444 "Peoples Set".

The Volksempfangers are as synonymous with vintage radios as the Philco cathedrals are in the USA. Over 3 million were sold but due to their fragility and the efforts of the allies to wipe out any trace of the Third Reich many were destroyed or defaced. Now they are quite rare and very collectible.

Next months featured set will be the very unusual Cavac Autovox 5 tube midget set.

The Collectors Corner will appear as a regular feature of *Antique Radio Classified*. It is an attempt to build knowledge and interest of radio collectors primarily in AC home receivers of the late 1920's to the 1940's, with emphasis on the lesser known and more unusual styles and brands. Helpful restoration hints will be given where possible. Any questions, comments, or suggestions on this column, the radios featured, or on any other radios may be sent to Frank Heathcote, 1235 N. 3rd St., Logansport, Indiana 46947. Please include a self-addressed stamped envelope for reply.

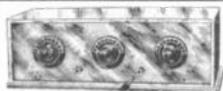

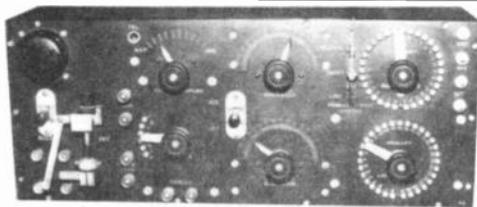

PHOTO REVIEW

This "Photo Review" column is intended to present in pictorial form some of the radios and related items in the collections of other collectors. These photos are meant to help increase awareness of what's available in the collecting field and/or to supplement known documented literature, both current and past. Photos are solicited from other collectors for use in future issues of A.R.C. Items desired are the more unusual radios or seldom seen ones, both battery and electric, speakers, tubes, advertising items, and any other items of interest to collectors. Photos must be black & white and be sharp in detail, preferably with a light colored background. Please include a description of the item such as manufacturer, circuit type, number of tubes, date of manufacture and etc. All photos are not returnable.

Note: These photos are from my files, and therefore no description is available on them. When known, the owner of the radio is listed. Future "Photo Reviews" will have more information, as provided by the collectors when submitting their photos. (GBS)

CROSLLEY REVIEW

CONTRIBUTED BY: DAVID CROCKER, 6 OLD FARM RD., DUXBURY, MA 02332

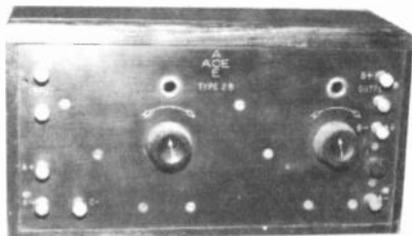

Of all the radio manufacturers, one of the most popular with collectors is the Crosley Radio Corporation. Due to this wide-spread interest, Antique Radio Classified in cooperation with Dave Crocker, a Crosley specialist, will present a series of articles showing the many models of Crosleys manufactured. This will help assist the collector in identifying the many types of Crosleys made, as well as increasing ones' knowledge on the subject. Any comments or questions concerning this column should be directed to Dave with a S.A.S.E. for reply. See address above.

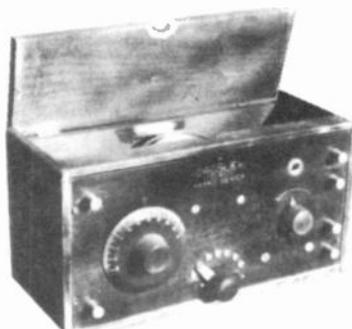

MODEL 52-P - Like the 51, the Model 52 three-tube receiver was marketed in a portable version. The black leatherette case was slightly larger than the 51-portable, but similar in design. Not many of this model seem to exist. Noticeable is the absence of panel binding posts, for they are moved inside to a bakelite strip behind the tube sockets.

MODEL 51 (CANADIAN) - The very popular Model 51 was sold in Canada under license to the DeForest Radio Corp. of Toronto. Same circuit, same parts, same cabinet except for the red and gold DeForest decal on the cover lid. The Models 50 and 52 were also sold the same way.

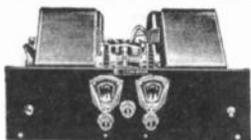

ACE 2B - The Precision division of Crosley made its own two-step amplifier to boost reception of the Ace V model one-tuber. It was called the "Ace 2B" and was exactly like the Crosley Model IV (four) amplifier. (Photo courtesy of Larry Wright)

HARKO SENIOR V - The Harko was redesigned in late 1922 and put in a more modern cabinet with finger-hole in the center. Tap switch points went to seven, the "book" tuner had a cast metal mount, the socket was still porcelain and the receiver remained non-regenerative. It's price was \$16 but advertised in a regenerative version for \$20. It was called the "Harko Senior V".

WHAT ABOUT THE I.C.A. CONQUEROR?

The name Insuline Corporation of America does not often ring a bell with antique radio collectors. Its earlier name had been Radio Panel and Parts Corporation. I.C.A. was organized in 1921 with a capitalization of \$15,000 and was located at 50 Warren Street, New York. Prior to Insuline's occupancy of the building at this location, a company called Bisbee Manufacturing was also a maker of radio parts.

David Grimes Inc. used radio panels made by I.C.A. but I.C.A. supplied only the labor as the material was manufactured by another company. Insuline enjoyed a very successful business of making panels for several of the radio companies and during the later months of 1925-26 they operated three shifts. While I.C.A. manufactured panels and radio parts, they later made radios and television sets, the television equipment was of the scanning disc type.

My only acquaintance and interest with this company was in 1930 when it announced that they were going to manufacture and sell short wave kits. One of them was called the *I.C.A. Conqueror*, both in the AC and DC models. As a boy of 16, my first endeavor was to build a Pilot Super Wasp DC kit with 4 tubes and plug-in coils. This whet my appetite for short wave which, at the time, was very popular as A.M. or broadcast receivers had limitations when it came to DX, or distant reception.

Like most of us who like to tinker, we progressed with the times to the newer tube circuited sets. It was then that I purchased the I.C.A. Conqueror AC short wave receiver kit which replaced the 22 and 201A's of my Pilot Super Wasp with the new pentode and variable- μ tubes like the 24 and 27's along with a 45 for the output. The plug-in coils for my new set were of the horizontal type rather than the vertical style as used in the Pilot Super Wasp. The I.C.A. uses two plug-in coils, one for the RF and the other for the detector. The Conqueror's circuit consists of one stage of tuned radio frequency, regenerative detector, one stage straight audio amplification and a pentode output. The set has a frequency range of 14 to 1,000 meters using seven sets of coils. As for price, the kit sold retail for \$65.00 and the power supply at \$34.75.

An interesting statement made in I.C.A.'s advertisements was all that was needed for assembly was a screwdriver to secure their respective terminals to small fastening nuts. All the leads were pre-measured and no soldering was necessary. Photographs, diagrams and working drawings were supplied along with some pre-assembled parts which made the set easy to construct.

A capacitatively-shielded inductive coupling to the antenna system was used to prevent the loading effects of the antenna from effecting the efficiency of the T.R.F. amplifier. This made it possible to use any type or size antenna.

As time passed and growing up, getting married and raising a couple of boys took priority. I did not follow up with my interest in radio. After retiring I soon met a fellow here in Arizona who sold old radio tubes. It was then I remembered the old Pilot Super Wasp. I had little hopes of again seeing one, no less of having one. Well, you guessed it, I really did find one advertised down in Florida. I bought it and had fun restoring it. But now I envisioned if I could only find an I.C.A. Conqueror.

I decided to advertise and had a photo made to go with the ad but received no replies. With the years passing and no signs of finding the set it looked like there wasn't any I.C.A.'s left in existence. I forgot about it until Gary Schneider saw me at the the 1984 Elgin meet and asked if I was still looking for an I.C.A. set. I answered by saying yes, but I didn't think I'd hold my breath 'til I found one. With that, Gary pointed to a *heap of rust and dust* and, sure enough, it was the set I had been looking for. This junker was over 50 years old. The photos show in how terrible condition the radio was when found!

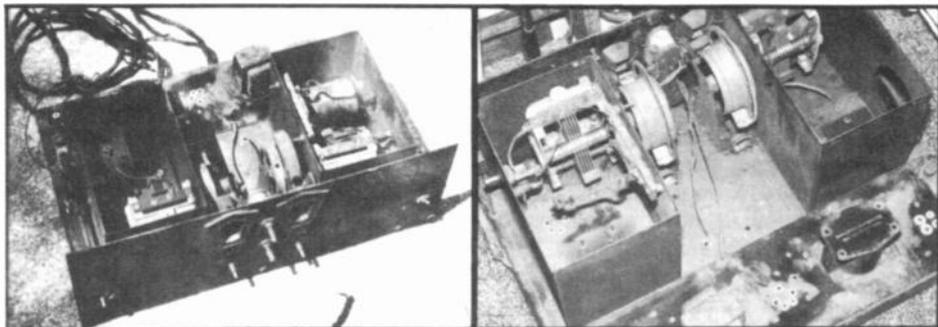

I guess I forgot how bad the set looked and accepted the challenge of bringing it back to life. Like a lot of the old sets, previous owners thought they could improve the circuit and alterations had been made, but I was determined to restore it as it was originally designed. Regarding the restoration, the rust was so bad it required peening with glass beads and some of the "white metal" parts also took the same treatment. The only difficult

I.C.A. CONQUEROR

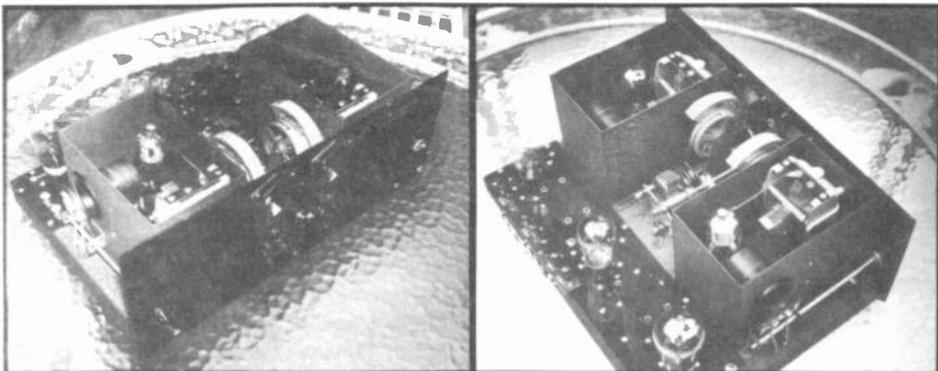

part to repair was making a new colored plastic numbered dial. Fortunately, I was able to photograph one of the damaged plastic dials then made a positive film and backed it up with colored "Zip-a Tone."

I am now glad to say the old I.C.A. Conqueror is back in circulation - Les Rayner.

Additional information obtained from: *Radio Retailer and Jobber*, February 1926 and *Radio Call Book Magazine*, September 1930. (The photos shown below show the beautiful restoration job that Mr. Rayner did on the I.C.A. - OK Les, can I buy my set back now!, Gary.)

RESTORING A CROSELY RFL-75 RECEIVER

I found the 1926 Crosley RFL "75" by placing an ad in our local shoppers paper. It is one that covers several counties and reaches farmers. I have found that it is the farmers who usually have an old radio stuck in the barn, basement or shed. This one was in a dirt floor basement, and hardly recognized as a radio. Dirt and grime covered it completely and offered a challenge. This is the type of radio I like. To see what one can do with something that looks like that. As you can see, I bought it, but not until a lot of bargaining for it.

CROSELY RFL-75

The first thing I had to do was wash the grime off. This was done with warm soapy water. The hard rubber front panel was the worst! Years of finger marks and basement grime required a lot of scrubbing, but finally was completed.

The varnish on the cabinet was a mess. One could brush it off like powder. To remove old varnish and paint, I use a putty knife sharpened. It is much easier and not as messy as using a liquid remover. To do this, I pull the putty knife towards me, not pushing it, as one does to remove wallpaper, etc. When the knife gets dull, I resharpen it. This has to be done repeatedly as the edge wears off due to the hardened varnish.

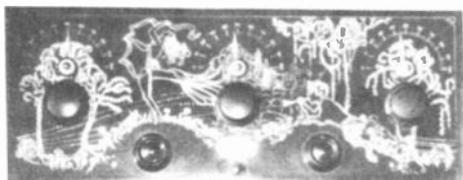

After several hours the varnish was removed and then came the sanding of the wood; to remove the varnish I had missed. I start with 220 grit sandpaper and then graduate to the final sanding with a 800 grit. The result is a mirror wood finish ready for the stain. In this case, walnut. After letting the stain cure for three days, I give the cabinet a good coat of Johnson's paste wax, especially made for wood. There is no need to apply varnish or polyurathane. The wax does the job.

The front hard rubber panel was something else! After removing the dirt and grime, I noticed a series of tiny indented dots covering the panel. Occasionally there were areas of gold lines connecting these dots. Using a large magnifying glass, I noticed that by connecting these dots, a picture would result. I consulted a local artist about a price to restore the picture on the panel. His price was \$220. Not having \$220, I asked his advice on how to go about it myself. I ended up with a four hair artists brush and a bottle of gold leaf paint.

Have you ever tried to paint a picture using a magnifying glass when you have no idea of what you are painting? This is what faced me. Holding the glass in one hand and painting (connecting the dots) with the other was a job I do not want to do again. It was painstaking work. Like putting together a jigsaw puzzle without a picture to guide you.

I completed the left side first and saw it was several trees covered with clinging vines and tiny flowers. Then I started on what turned out to be a dancing maiden (above the lower left knob). Continuing on revealed more vines and several small

towers amongst the vines (upper center). Still had no idea of what I had! I then started on what was to be the Roman God, Faunus, blowing a horn. I later found out by research that the name of this Roman God was Faunus.

FRONT PANEL VIEW

I now had a completed, beautiful mural staring at me! Yet to be done was restoring the tiny numbers above the dial pointers. This was done once again via the magnifying glass.

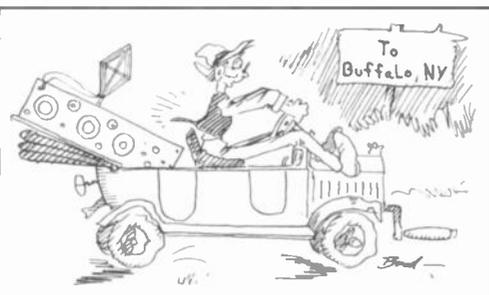

The completed mural took nine hours of labor, but as you can see, it is worth every hour. The completion depicts the Roman God playing his trumpet for a dancing wood nymph.

The interior required only a good vacuuming and washing the five O1A tubes. These turned out to test OK, lucky for me as I had only two on hand.

The moral of this is, never turn down a "pile of junk", dirt and grim, for you will never know what it will turn out to be after some "tender loving work".

Now that the challenge is over, I may sell it to someone who would give it the respect that it requires. It is one in a million.

COLLECTORS VALUE GUIDE

CONTRIBUTED BY: JAMES KREUZER, 257 HASTINGS, BUFFALO, NY 14215

This "Value Guide" is an attempt to establish a relative value of many of the more common radios of the 1920's. The values expressed are the result of past market trends as indicated in recent auctions, flea market sales, sales by individual collectors, as well as information provided by other established collectors in the hobby. The factors affecting a value of a radio are many. One must consider the more obvious factors, such as condition of the radio, whether it is complete with tubes, in working condition, originality, age, rarity and etc. Other factors contributing to value include collector demand, collecting specialties (such as collecting wireless items, crystal sets, etc.), and geographic area. Thus when using this guide, you must consider these multitude of factors when valuating your radio. Of course the final value in the end, is the price another person is willing to pay for an item. Any questions in regards to this column, information about other radios not listed, comments, or suggestions should be sent to James Kreuzer with a SASE for reply.

CLASSIFIED ADVERTISEMENTS

CLASSIFIED AD DETAILS: Each subscriber is entitled to one free 20 word ad each issue. Additional words over the free limit are 10 cents per word. Enclose correct payment with ad, as we do not bill for ads. Ads must be received before the 10th of the month to appear in the following months issue. Late ads will be held for the following issue. Limit of two multiple insertions of same ad. Ads may be sent in advance, however each ad must be submitted on a separate sheet of paper, preferably a 3 x 5" index card. Publisher reserves the right to edit ads and is not responsible for errors due to illegibly written ads. **OPTIONS:** Shaded ads are available at a cost of 10 cents per word additional, including free words. Photo ads are \$5.00 each for half-tone charge. Allow extra time for processing of photos. B&W line-art drawings also accepted at a rate of \$1.50 per vertical inch, maximum width is 3½ inches. Custom ads made to order, send sketch of your ideas for quote.

WANTED: Peerless 9" dynamic speaker, Pilot Super Wasp with coils. Ron McNeill, Box 472, Yorkton, Sask., Canada S3N 2W4

FOR SALE: W.E. Mod. 4-D Superhet, 6 215A tubes, Serial #674, plus 24" W.E. cone speaker, plus 1-C W.E. loop antenna 16" x 40". All excellent and in working condition, \$700, can not be shipped. Jim Grant, 2635 Central Park Ave., Evanston, IL 60201

WANTED: New collector wants bright colored or swirled thick plastic table top radios from 1930 to 1950. Also would like wood and bakelite radios from that period. **NEED:** 589A Supreme Tube Tester scroll and Riders *Inside the Vacuum Tube*. (I buy, sell, trade used cameras) Harry Poster, Box 1883, So. Hackensack, NJ 07606 (201)794-9606

WANTED: RCA Model 120 chassis and speaker or parts set. Uses 6 tubes - 2A5, 2A7, 2B7, 2-58's & 80. Also used in Westinghouse WR-36 and G.E. K63. **FOR SALE:** Jackson Bell model 60 early 1930 mantel radio - \$75 or trade. Always want unusual cathedral and mantel radios. Frank Heathcote, 1235 N. Third St., Logansport, IN 46947 (219)722-3612 before 10:30 PM.

WANTED: Early "Short Wave Craft" magazines by Gernsback 1930's & 40's, Pilot Super Wasp w/coils. **SELL:** 40 year collection tubes. M. Levy, 4141 Krupp Dr., El Paso, TX 79902 (915)532-2509

N.F.W.A. & ANTIQUE RADIO CLUB OF AMERICA convention June 6, 7, & 8th at Buffalo, New York. See display ad listed elsewhere in this issue of A.R.C.

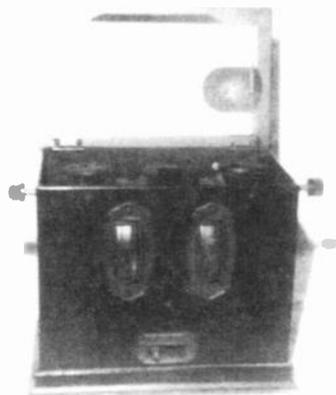

RADIO CLUBS: Send details of your up-coming meets to A.R.C. for inclusion in future issues.

LETTERS TO THE EDITOR

Along with an ad for the next issue, I just wanted to send along a quick few words of appreciation for your publication. I live in an area which, although teaming with flea markets and antique stores, is rather short on radio collectors. I know only a handful in the whole state. Needless to say, this makes it difficult when one is in search of specific items. The A.W.A. bulletin is useful, but quarterly isn't really often enough to be of much good. A.R.C. is filling a real need in the hobby, and here's one avid electronic scrounge who hopes it continues a long time. By the way, my last ad in A.R.C. brought satisfactory results within a week. Heres hoping the results are equally good this time - *T.E. McLeod, Searsport, ME.*

WHAT IS IT?..

WHAT IS IT column is provided as a service to collectors to help them identify items in their collection which they would like to have identified by any of the readers of A.R.C. If you have any knowledge of the item pictured, please write to the person requesting help. If you have an item which you would like to have identified, send a B&W photo or sketch, along with a brief description of the item and what you would like to know about it.

GERMAN TELEFUNKEN 31 G/A: Would like to find more information concerning this radio. Perhaps the readers of A.R.C. might know something about it. It uses two RE034's and a RE134, and the two little knobs sticking out the side of the case are vernier tuning knobs. I guess the switch in lower center is a band switch. It covers 150-430, 375-1000 and 750-1500 Kc. Set uses an out-board speaker, which I don't have. The operating instructions are in German so I really don't know too much about. Can not find any indication of age. I have had it about 25 years and it was "antique" when I got it. Don Iverson, 10115 NW St. Helens Rd., Portland, OR 97231

READERS COMMENTS...

You're doing a great job Gary, and I would gladly pay 20 cents a word on these ads, S.R., Minn. . . . You have an excellent publication and I am sure you will be very successful in increasing your subscribers over the years, M.L., Texas. . . . Like Jim Kreuzers value guide - this is of great value to those of us living out in the "boondocks" and not always in touch with collectors, R.M., Canada. . . . By the way, you are doing a superlative job with A.R.C., C.O., Arizona. . . . Your publication, A.R.C., is excellent, it has resparked a dormant hobby, H.H., Florida. . . . My ad in the February issue brought immediate results - first day, upon

receiving my copy, J.O., Penn. . . . I think the publication is great. I like the articles and the entire format, keep it up, C.B., Kentucky. . . . February was a very fine issue. The Penna. Wireless Co. article is very good, the Photo Review section a good idea, however don't drop Jim Kreuzer's current prices column, H.W., Ohio. . . . I hope A.R.C. is growing as it is a fine (publication), just what the collectors need monthly, F.K., New Jersey. . . . Your Antique Radio Classified is just great, I am so glad I subscribed to it, L.S., Arkansas. . . . I found your sample issue and the concept of A.R.C. most interesting, R.S., Calif

OFFICIAL RADIO SERVICE MANUAL and Complete Directory of all Commercial Wiring Diagrams -- 1930

A large (356 page) 8½ x 11 book, beautifully reprinted from the famous volume published by Gernsback 55 years ago, with literally hundreds of circuit diagrams on almost all of the radios in circulation at that time.

275 pages are devoted to actual circuits, and the rest is valuable information on service advice on technical problems encountered by the technicians of that day. . . covering power supplies, procedures, tubes, loud speakers, antennas, RF amplifiers, noises and their origins, and all sorts of good stuff to help you get antique sets back in shape.

A number of automobile radios are included, as are a variety of electrically amplified phonographs of the era.

Absolutely guaranteed to please, or your money instantly refunded. Get it from your favorite radio supplier, or direct from us for just \$19.95. Add \$2 for shipping (\$3 for UPS). NYS res. add 7½ tax. VISA, MasterCard and American Express accepted.
