ANTIQUÉ RADIO CLASSIFIED

Publishing Details

Antique Radio Classified (USPS 735-090) is published monthly, 12 times yearly, at a subscription rate of \$15.00 per year by G.B.S. Enterprises, 9511 Sunrise Blvd., #J-23, Cleveland, Ohio 44133, (216) 582-3094.

Second-class postage paid at Cleveland, OH.

Publisher and Editor - Gary B. Schneider.

POSTMASTER: Send address changes to address above. Copyright 1986... Antique Radio Classified

Purpose

Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby thru the buying, selling, and trading of radios and related items. In addition, there will be coverage of upcoming radio conventions, meets, flea markets, etc. Other items of interest to collectors will be included in issues as material or suggestions are received.

Display Ad Rates

Antique Radio Classified accepts display advertising for companies that provide a product or service to the radio collecting hobby. As artwork is reduced 35% when printed, original should be 1.54 times the desired finished size and must be camera ready artwork. Original size areas are available as follows:

Full Page	10-1/2" H x 7-1/2 W	\$30.00
Half Page	5-1/4" H x 7-1/2 W	15.00
1/4 Page	5-1/4" H x 3-3/4 W	7.50
1/8 Page	2-5/8" H x 3-3/4 W	3.75

Business Card - same as 1/8 page

Above rates based on circulation of 1,000 subscriptions.

Full page ads may be vertical or horizontal format.

Multiple insertions for 3 months qualify for a 10% discount.

All artwork must be received by the 1st of the month to be included in the following issue, which is mailed on the 1st day of the calendar month.

Classified Ads

Each subscriber is entitled to one 20 word classified ad free of charge per issue. Additional words over the limit are 10¢ per word. Multiple insertions of same ad are discouraged. This is to allow for a varied ad content in each issue. Multiple insertion ads for more than 2 issues must be run as a display ad. All ads must be printed neatly and be received by the 10th of the month before next issue. All issues mailed on the first of the month.

Payment

All ads must be paid for in advance. Make checks payable to Antique Radio Classified.

Subscription Rate

Subscriptions are available on a yearly basis, \$15.00 per year. Sample issues: \$1.50.

Submission of Material

Antique Radio Classified welcomes and solicits any information that pertains to the radio collecting hobby. This may include material such as upcoming radio events, meetings, radio books and publication reviews, new radio clubs and organizations, radio auctions and price reports, sources of old radio material and restoration supplies, and any other material that would be of interest to the hobby. All material submitted should be typewritten and verified for accuracy.

Change of Address

Notification of change of address should be made well in advance to receive uninterrupted copies of Antique Radio Classified. Do not depend on the Post Office to let us know.

Fine Print

The publisher is not responsible for any buying and selling transactions incurred by readers thru the content of this publication.

Antique Radio Classified subscription and ad rates subject to change, as well as frequency of publication, content, and size.

LETTERS TO THE EDITOR

I would like to respond to the "Letters To The Editor" in the December 1985 issue of ARC. In 1982, I joined the AWA. It was no problem in joining, they sent all the forms plus a sample copy of the Old Timers Bulletin. At that time, I had also joined the Antique Radio Club of America and knew of no one in either organization. Although I have never attended a radio meet, due to work, one can imagine what goes into this event to put it on. Policing the flea market area is always difficult since it is a parking lot, and accessible to anyone.

Since the big AWA meet in Canandaigua, New York, is a club event, it makes sense that it be an exclusive event open to members only. Two questions come to mind: (1) If you returned the membership form you could attend the auction. (2) If you didn't receive the necessary information with your membership form, why didn't you contact the AWA directly and ask for information, saying you were becoming a new member.

I still feel the AWA is a great organization and is always welcoming new members, however, as with any organization there are rules that must be followed and the statements made I felt were very harsh and uncalled for. Nowadays we hear everyone being treated unfairly. I see it everyday at work, as I work in a large

bank which is very customer oriented. But actually it is a lack of people being informed. This wasn't the case here, as he was told it was for members only. Maybe there was a lack of communication when he requested meet information with the membership form. If this is so he should have contacted the person who sent him the information in the first place... (Andrew Mooradian, Winchester, MA)

This letter is in response to Mr. Poster's "Letter to the Editor" in the December 1985 ARC... I am a 28 year old newcomer to the antique radio hobby and had never attended an AWA meet. I only live two hours away from Canandaigua, so I decided to go to the annual conference and was told I would have to join the AWA to attend.

I sent my request for a membership application on a Wednesday and to my surprise received my reply two days later! I mailed out my application and received my membership card, conference application, and schedule of events in five days. A little over one week later I had a receipt for my pre-registration fee for the conference in my hand! Not Bad!

Upon my arrival at the conference, I found myself quite welcome. I met many friendly, helpful "Old Timers" who were more than willing to share ideas, stories, and their sources for restoration supplies. One gentleman in particular has become a good friend who is continually helping me with my new hobby.

Let us not be too quick to condemn the AWA because of one man's bad experience. I only hope that I may someday be as helpful to other collectors as the AWA members I have met have been to me... (Bob Kerns, Niagara Falls, NY)

Just Another Radio Collector? -

Every radio collector knows of the dangers of our hobby. It can easily become an obsession, growing on the individual affected as the collection also grows and grows. Often a new house is planned to house a collection or museum, just as a family needs a larger home!

The average radio collector is honest, hard working (it takes hard work to amass those collections) and a very pleasant person. We have met many in the field and have very rarely been disappointed.

One man who has done justice to our group in a very wonderful way hasn't really ever been recognized as such (even at this time he shall remain nameless). He very quietly collected his specialty, and in 17 years accumulated an amazing amount of radios, each and every one different.

This man collected primarily "homebrews". At every radio meet, hamfest, or flea market, he quietly picked up another radio or two. These homemade sets meant a great deal to him. He knew the beginning of radio firsthand and the memories were very precious to him.

What inspires a man like this to piece together one by one hundreds of homebrews? In his case he built his first set in 1922, along with his dad. He was 13 years old then, a teenager in a time when radio was considered a marvel, and TV was yet unheard of. Along with many amateurs

throughout the country he assembled his set from parts and a radio diagram - tuning it in to receive one of the few stations within range.

So many like him have been forgotten. Commercial sets have easily established a value; why have we down-graded the worth of each man's individual effort to build and receive the first radio messages?

This one man in a very simple way has given his own message to the world. We are so wrapped up in commercialism and politics; the "big guy" takes over altogether too much. Because of ignorance, money, lack of room to store, many early records and relics have been lost forever to us all.

Every radio collector has in his own way contributed to the preservation of a beautiful history. Large or small in scale, each collection is very meaningful and should be recognized as such. Individualism and creativity have kept our country together, let us try to preserve as much as possible today and tomorrow. (Felicia Kreuzer - Buffalo, NY)

Editors note: The owner of the above mentioned large collection has decided to part with a portion of his collection. A partial list of items is advertised in this month's issue, with more to follow in coming months. Although nothing of real rarity, the diversity of many types of radios should appeal to many collectors.

SURVEY RESULTS

Survey Results - Back in July 1985, Antique Radio Classified enclosed a survey form in that month's issue. The survey was meant to determine the typical collectors' collecting interest in the antique radio field and related categories as listed below. Approximately two-thirds of the people took the time and interest to return the completed survey form. Although not an 100 percent return rate, the large number of returned survey forms present an accurate survey which should apply to all those in the hobby on a "average". As far as I am aware, this is one of the most comprehensive surveys ever conducted in the hobby, and represents countless hours in tabulating the results. To the casual observer, these tabulated figures may not seem too exciting, or of much meaning to you as an individual collector. However, an in-depth study will reveal many interesting collecting trends, especially if surveys are run in future years. Perhaps a survey two years ago would have shown a near zero interest in the collecting of bakelite radios. Hopefully in years to come, surveys can be done again on a large basis to add meaning to these figures listed below - Gary B. Schneider, Editor. *(Figures listed below are indicated in percentages, and are based only on those survey forms which were returned and answered, and indicating two or more collecting interest.*

COLLECTORS VALUE GUIDE

CONTRIBUTED BY: JAMES KREUZER, 6270 CLINTON ST., ELMA, NY 14059

This "Value Guide" is an attempt to establish a relative value of many of the more common radios of the 1920's. The values expressed are the result of past market trends as indicated in recent auctions, flea market sales, sales by individual collectors, as well as information provided by other established collectors in the hobby. The factors affecting a value of a radio are many. One must consider the more obvious factors, such as condition of the radio, whether it is complete with tubes, in working condition, originality, age, rarity and etc. Other factors contributing to value include collector demand, collecting specialties (such as collecting wireless items, crystal sets, etc.), and geographic area. Thus when using this guide, you must consider these multitude of factors when valuating your radio. Of course the final value in the end, is the price another person is willing to pay for an item. Any questions in regards to this column, information about other radios not listed, comments, or suggestions should be sent to James Kreuzer with a SASE for reply.

RADIO COMPANIES OF PAST

CONTRIBUTED BY: ALAN DOUGLAS, BOX 225, POCASSET, MA 02559

WORKRITE MFG. CO. - CLEVELAND, OHIO

For a company that offered as extensive a product line as Workrite did, and advertised as often, information about it is remarkably hard to find, almost as hard to find as the radios themselves.

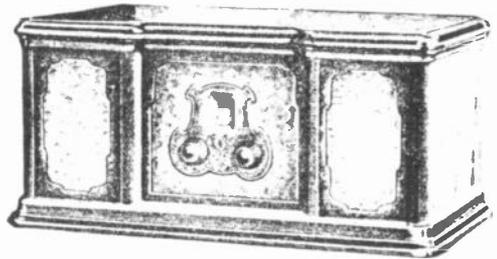

Workrite claimed to be a "conservative, well-financed company" with 12 years of manufacturing experience before getting into radio. It advertised parts and horns beginning in September 1922. Some time before the end of 1923 it joined the Independent Radio Manufacturers, Inc. and acquired a Hazeltine Neutrodyne license. It offered a knock-down model, while its "West Coast branch" factory of Kruger & Co. advertised completely wired sets in a variety of cabinets in December 1923 and January 1924. Workrite's own factory wired models came out in March, the Neutro-Grand Jr. and Sr.

In May 1924 Workrite moved from 5518 Euclid Ave. to a new plant at 1812 E. 13th St. and shortly came out with a new lineup of models, the first to look factory-made rather than kit-built. In September 1924 the new line was supposedly selling so well that Workrite opened a third factory in Chicago, and by November had doubled its floor space in the Cleveland plant. On the other hand, Workrite found it necessary to cut prices in January, and a Cleveland dealer was quoted in a trade magazine.

The reporter's question: *How is the Neutrodyne set going in your section?... Why, it wasn't going at all, until Workrite cut prices on their products. We are getting some life on the Workrite now, but if we had all the Freshman sets that we wanted, and have ordered, we would not do such a marked business on the Workrite line.* (Obviously Workrite was facing stiff price competition.)

The 1926 models, introduced in October 1925, appeared to be rearrangements of the previous models; not until July 1926 was anything really different offered. And none of these models is easy to find now, indicating that few were sold originally.

-Continued

WorkRite 37

WORKRITE "WINNER FIVE"

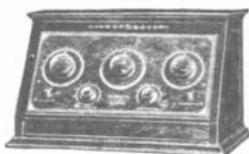

THE WORKRITE MFG. CO.

In August 1927, Workrite combined with Apex, Case, Sentinel, and Slagle to form the United States Electric Corp., to obtain an RCA patent license (none of the companies individually was large enough to guarantee RCA the necessary \$100,000 per year in seven and one-half percent royalty payments). This merger was supposed to become effective on January 1, 1928, but one of the companies (probably Workrite) failed and forced the others into receivership to protect

themselves. Workrite pulled out and tried to get along without RCA, relying on its Neutrodyne license alone. Its last model series appeared in August 1928, though so far as is known, was never advertised. Workrite was said to be re-organizing in August 1929, which would indicate that it had failed again, but nothing was heard of it afterward. (Any additional information from readers is welcomed - Alan Douglas, Box 225, Pocasset, MA 02559)

PHOTO REVIEW

TEMPLE RADIO LTD. - This set was manufactured by Temple Radio Ltd. of Toronto, Canada in 1931. (June 1931 stamped on speaker cone and inside cover of tone control potentiometer.) The nameplate bears no model number, only the serial no. 30137. The set is of TRF design using the following tube lineup: RF #1 - 235, RF #2 - 235, detector - 235, audio power output - 247, and the rectifier is a type 280 tube. I found the set at a yard sale and purchased it for \$25.00. The cabinet is in near perfect condition and did not require anything more than a good cleaning and an application of furniture polish. No parts or knobs were missing, and no alterations were made to any of the circuitry.

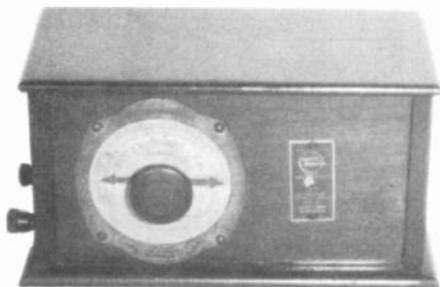

To restore the chassis it was necessary to replace 3 electrolytic capacitors, and 4 bypass capacitors inside a 4 unit condenser block, modern capacitors are much smaller than the originals, thus I installed the new capacitors inside the original housings to maintain the original appearance of the chassis. The set now works very well. Sensitivity is good. I was able to pick up WCAY in Philadelphia and WBZ in Boston at this location. Selectivity is good at the low end of the band, but deteriorates somewhat at the high end. (I assume that this is normal in a TRF circuit as the bandpass would be expected to increase with frequency.) The audio quality is quite good, though some of the bass frequencies seem to be modulated by 60 cycle hum only on certain notes. I assume this is because the #247 audio output tube uses a directly heated cathode run on AC. There is very little audible hum in the speaker otherwise.

I know nothing about Temple Radio Ltd., but when looking through some old schematics of this period I noticed that there was a Temple

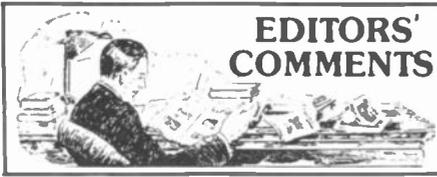

Corporation located in Chicago, Illinois which manufactured radios, perhaps my radio was made by a Canadian subsidiary of the company. (Peter Ivanchich, 30040 Jamestown, Romulus, MI 48174)

ATWATER KENT - An advertising piece used in the mid-twenties. This multi-colored paper sign stands about 16 inches and provided a bright compliment to any window display. (Randall Renne - Dixon, IL)

SUPER-BOOSTER- Manufactured by the Liberty Radio Corp. of Cleveland, Ohio and L.A. California, this booster does not contain any amplifier circuit or tubes. It is most likely just a wave trap as the circuit consist of nothing more than a coil and variable capacitor. Nicely constructed in a 9 x 5 x 4½ inch wooden cabinet. (Gary Schneider - Cleveland, OH)

Several questions have been received in regards to different problems advertisers are not sure of. The first has to do with display ads - the reason display ads are lower in price verses the cost of a lengthy classified ad is because display ad rates are based on "CAMERA READY" artwork. What this means is that we do not have to typeset and layout the ad - thus the lower effective cost to us. Another frequently requested item in classified ads is **BOLD WORDS**. These words cost extra at the rate of 10 cents each. "FOR SALE" and "WANTED" are set in bold print at no extra charge! Another point - classified ads that are not used for any particular month can not accumulated for use in later months. To use the old phrase - if you don't use it, you lose it. Remember when figuring your classified ad word count that your name and address count as part of the word count. On payments under one dollar you may pay with stamps if you prefer. Several people have sent us ads for their non-subscriber friends. We will not run ads for non-subscribers unless paid for at the rate of 20 cents per word.

We realize that many copies of A.R.C. are shared with others. We would hope that these "free loaders" consider taking out their own subscription, these "lost subscriptions" may ultimately effect the existence of A.R.C. because of the loss of badly needed income. Still getting request for separating the "For Sale" and "Wanted" ads. This subject has been covered several times in the past, and we shall keep the format of mixed ads until further notice. And finally the problem of receiving classified ads at the last minute. This is a one-man production of A.R.C. - I simply don't have enough hours in a day to be able get the 1001 details worked out because of people waiting to the last minute. **PLEASE** try to get your classified ads in early. We should all know by now that the 10th of the month is the absolute deadline for ads, and in some cases if an issue is filled up for space the deadline could be earlier. Why not just get in the habit of sending your ads in on the last week of the month (or earlier). It would make my job much easier and make you happy because your ad wasn't left out of next months issue. Incidentally, for your information the 10th of the month is the **same day** I have to have A.R.C. at the printers - no easy task! Just one more point I would like to bring up - a very important message will be printed in the next issue (March) - please take the time to read it. (GBS)

COLLECTORS Q's & A's...

COLLECTORS Q's & A's - *This column is available to the readers of A.R.C. to enable them to find answers to any questions they may have concerning restoration problems, sources to buy restoration supplies & parts, and other relevant questions pertaining to the "old radio hobby". Readers are encouraged to send to A.R.C. any questions they may have, and also any answers to the questions asked by the readers. The answers to the posed questions will be printed in the future issues.*

QUESTION #1: How do you remove rust on a radio chassis? (Vaughn Rudisill - Queens Village, NY)

QUESTION #2: What is the best way to replace a defective volume control that has a tap on it, when all you have is one without the tap? (Richard Haneline - Monroe, LA)

QUESTION #3 Is there any way to preserve the fake inlaid veneer found on sets made in the late 30's and early 40's when striping the cabinet. If not, is this available from anyone today? (Richard Haneline - Monroe, LA)

FOR YOUR INFORMATION...

PUBLICATION - MONITORING TIMES - Although not a publication for collectors of old radios, many collectors have an interest in shortwave and DX listening and therefore we make mention of this four year old publication. Published monthly, *Monitoring Times* is a tabloid type publication covering the complete range of radio communications geared to the listener. The December 1985 issue was 40 pages in length and contained various articles, features, and regular columns in addition to display and classified ads. For further information about this publication contact: Grove Enterprises, P.O. Box 98, Brasstown, NC 28902. Subscription rates are \$12.00 for 12 issues or \$23.00 by First Class Mail. (GBS)

HINTS & TIPS...

HINTS & TIPS - I have restored several adjustable grid leaks by removing one end and cleaning and repacking it with Coloidal Graphite paste. Your local pharmacist may have to help you locate a supplier of Coloidal Graphite. (William Stuber - Woodward, IA)

CLASSIFIED AD DETAILS: Each subscriber is entitled to one free 20 word ad each issue. Additional words over the free limit are 10 cents per word. Enclose correct payment with ad, as we do not bill for ads. Ads must be received before the 10th of the month to appear in the following months issue. Late ads will be held for the following issue. Limit of two multiple insertions of same ad. Ads may be sent in advance, however each ad must be submitted on a separate sheet of paper, preferably a 3 x 5" index card. Publisher reserves the right to edit ads and is not responsible for errors due to illegibly written ads. **OPTIONS:** Shaded ads are available at a cost of 10 cents per word additional, including free words. Photo ads are \$5.00 each for half-tone charge. Allow extra time for processing of photos. B&W line-art drawings also accepted at a rate of \$1.50 per vertical inch, maximum width is 3½ inches. Custom ads made to order, send sketch of your ideas for quote.

FOR SALE: Computerized, comprehensive Index of Beitman's "Most Often Needed Radio Diagrams". Complete, Volumes 1 to 23, over 11,000 entries. \$14.00 each Postpaid. Herb Parsons, 5 Surrey Lane, Peabody, MA 01960

FOR SALE: Atwater Kent 1926 - 1927 service manual. Contains information on models 10, 10B, 12, 19, 20, 21, 30, 32, 33, 35, 50, and power unit model "R". Theory, schematics, possible troubles, testing, use of "power" tubes and special detector tubes. Some continuity test charts and lots of valuable information; even if it doesn't cover your particular model set. Forty-one (41) pages, \$12.00, shipped by First Class return mail. Gerald Koske, 10204 Thayer Road, Wonder Lake, IL 60097

FOR SALE: Lots of cathedrals, tombstones, novelties, and plastic radios. SASE for best list ever. Ed Ripley, 2276 Holloway, Maplewood, MN 55109

WANTED: Hot Air Alcohol Fan by Lake-Breeze. Will buy or trade breadboard radios. Edison Mabry, 715 W. Longview, Mansfield, OH 44906 (419) 526-1175

FOR SALE: Will have new list out soon! Send SASE. Service manuals, magazines, radio books, sets, chassis, parts, tubes, speakers, plus more. AK 47 power unit less #80 tube - \$25; spark coil and pair gaps from quack machine - \$35. From a closed-up radio repair shop, small 4 or 5 tube sets, as removed, plastic/bakelite cases, price - 3 for \$10.00. All above plus shipping. Marconi stock certificate cancelled by RCA - \$16.00 Ppd. Ace Radio Repair print (see October 1985 cover of A.R.C.) - \$16.50 Ppd. F. Krantz, 100 Osage Ave. Somerdale, NJ 08083

FOR SALE: Very nice Kennedy 100 with 525 amplifier - \$950. **WANTED:** OLD JUKE-BOXES - Wurlitzer, Rockola, Seeburg, etc. Any condition. Eric von Grimmstein, 1214 North Meridian St., Indianapolis, IN 46204

WANTED: "Y" Power Unit for AK-36, above Serial number 2610000. Must have screws on terminal board for 12 wires plus ground. M.B. Gaskins, 227 Risen Ave., Campbellsville, KY 42718

WANTED: "Time For Crosley" clock; Crosley plaster Pup; Model 50 in good and complete condition. Ronnie Kaczmar, 5747 Williamson, Dearborn, MI 48126

FOR SALE OR TRADE: Majestic G24-S sprayed aluminum shield; 1 National VT224 with two top caps; 1 Arcturus 124 blue glass amplifier; 1 Arcturus 127 blue glass detector. Sell for \$60 or trade for 3 good WD-11 tubes. Glen Van Etten, P.O. Box 141, Texarkana, TX 75504

WANTED: Station selector knob for Crosley 51 or 52; Weston 301 0-50 DC MA.; old style center tap filament resistor. Rodney Schrock, 402 Lincoln St., Somerset, PA 15501

WANTED: Super-Fadalette model 106; Trans-Oceanic model 8G005 Wavemagnet. Eric Bilney, 911 Fargo Ave., Spirit Lake, IA 51360

FOR SALE: Webster-Chicago three speed record changer; remote control for Radiola 82 or 86; vintage test equipment including manuals send SASE. John Schretzmayer, 140 Southern Blvd., East Patchogue, NY 11772

WANTED: Grandfather clock radio, Philco 70-71 or Crosley 124 Playtime. Gilbert Orozco, 32804 Arbor Vine Dr., Union City, CA 94587
