

# ANTIQUE RADIO CLASSIFIED

VOLUME 3

APRIL 1986

NUMBER 4

**PENTATRON 101**

# ANTIQUE RADIO CLASSIFIED

## Publishing Details

Antique Radio Classified (USPS 735-090) is published monthly, 12 times yearly, at a subscription rate of \$15.00 per year by G.B.S. Enterprises, 9511 Sunrise Blvd., #J-23, Cleveland, Ohio 44133, (216) 582-3094.

Second-class postage paid at Cleveland, OH.

Publisher and Editor - Gary B. Schneider.

POSTMASTER: Send address changes to address above. Copyright 1986... Antique Radio Classified

## Purpose

Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby thru the buying, selling, and trading of radios and related items. In addition, there will be coverage of upcoming radio conventions, meets, flea markets, etc. Other items of interest to collectors will be included in issues as material or suggestions are received.

## Display Ad Rates

Antique Radio Classified accepts display advertising for companies that provide a product or service to the radio collecting hobby. As artwork is reduced 35% when printed, original should be 1.54 times the desired finished size and must be camera ready artwork. Original size areas are available as follows:

Full Page	10-1/2" H x 7-1/2 W	\$30.00
Half Page	5-1/4" H x 7-1/2 W	15.00
1/4 Page	5-1/4" H x 3-3/4 W	7.50
1/8 Page	2-5/8" H x 3-3/4 W	3.75

Business Card - same as 1/8 page

Above rates based on circulation of 1,000 subscriptions.

Full page ads may be vertical or horizontal format.

Multiple insertions for 3 months qualify for a 10% discount.

All artwork must be received by the 1st of the month to be included in the following issue, which is mailed on the 1st day of the calendar month.

## Classified Ads

Each subscriber is entitled to one 20 word classified ad free of charge per issue. Additional words over the limit are 10¢ per word. Multiple insertions of same ad are discouraged. This is to allow for a varied ad content in each issue. Multiple insertion ads for more than 2 issues must be run as a display ad. All ads must be printed neatly and be received by the 10th of the month before next issue. All issues mailed on the first of the month.

## Payment

All ads must be paid for in advance. Make checks payable to Antique Radio Classified.

## Subscription Rate

Subscriptions are available on a yearly basis, \$15.00 per year. Sample issues: \$1.50.

## Submission of Material

Antique Radio Classified welcomes and solicits any information that pertains to the radio collecting hobby. This may include material such as upcoming radio events, meetings, radio books and publication reviews, new radio clubs and organizations, radio auctions and price reports, sources of old radio material and restoration supplies, and any other material that would be of interest to the hobby. All material submitted should be typewritten and verified for accuracy.

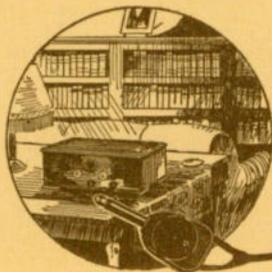

## Change of Address

Notification of change of address should be made well in advance to receive uninterrupted copies of Antique Radio Classified. Do not depend on the Post Office to let us know.

## Fine Print

The publisher is not responsible for any buying and selling transactions incurred by readers thru the content of this publication.

Antique Radio Classified subscription and ad rates subject to change, as well as frequency of publication, content, and size.

## LETTERS TO THE EDITOR...

As an older collector (80 years old) who built and used radio back in the 20's, I am a little upset by newer generation collectors who grab an old junker and want to trade it for a radio in good or first class condition. They seem to think that if a radio looks O.K. - that's it!, and trade it off with bad tubes, messed-up speakers, poor wiring, bad parts, etc. However if the item they get in trade is not about perfect they really "Squawk" about it.

I've had dealings with three different men during the past year who seemed to fit that description. These men-(names deleted by editor until facts are gathered)...

I've never had any problems with old timers Chet Wisner, Albert Warren, Paul Douglas and others. If a tube is bad or breaks in shipment they'll gladly replace it, etc. They realize that one can't make a claim with UPS very well without losing the radio.

What I've been talking about particularly applies to trades where one has a photo and description to go on. You have to trust the other fellow; if he doesn't know or care - your in real trouble. Outright sales aren't bad but trades are a real problem. One reason I'm saying this is that all three I mentioned take advantage of your free ads. It looks like free ads are overdone, doesn't it?... Sincerely, William Irvine.

---

## READERS COMMENTS...

**DEAR GARY** - I would like to see some sort of a list of people who do rebuilding of some radio items that you can no longer buy, such as the following services: (1) Speaker reconing at about \$1.00 to \$1.50 per inch. (2) Rebuilding auto radio vibrators - all types. (3) Rewinding of small audio and interstage audio transformers. (4) Rewinding of output and power transformers and speaker field coils. (5) Rewinding of oscillator and I.F. coils. (6) Sources for die-cast parts, wood knobs, decals, logos, etc... Thank you - Frank Krantz, Somedale, New Jersey.

**EDITORS COMMENTS** - Yes, I agree, there is a need for such a list of services that are available for collectors. In past issues of A.R.C. I had a column called "Where To Find It". The response to those in the hobby to have their name listed as a service or source was meet with not much success. I know many of A.R.C.'s subscribers provide a service or have

P.S. - I was wondering how it would do to make up a sort of list calling it "The Ten Commandments" (in this case - seven) on how to treat your fellow collector so that both of us prosper and remain friends. Needless to say there are many views on the subject, but here are a few of my thoughts:

1. *I will not go into old radio collecting with the intention of doing it for profit only (unless you clearly state you are a dealer, which is to be expected in any facet of business).*
2. *I will be friendly and helpful with my fellow collector so we'll both be happy.*
3. *I will be careful in describing the item in question.*
4. *I won't try to trade something in poor condition without saying so and value it accordingly (just sending a photo isn't enough to adequately judge the true condition of an item - such as the inside of a set).*
5. *If something traded to me has a problem I didn't expect, I won't be too quick about reacting and try to be sure my conclusion is right.*
6. *I won't always take someone's word about something - he may not be knowledgeable about the item.*
7. *Treat other collectors and the deals you make - as you, yourself, would expect to be treated.*

*(Editors note: Would like to hear from other readers about your problems with dealing with other collectors. A.R.C. does maintain a list of complaints received and will try to see no collectors are taken advantage of by repeated offenders.*

---

certain talents that they can provide, however it is up to them to disseminate this information to the rest of the readers in A.R.C. My original idea was to run this column every three months which would allow for proper exposure of their services. I would be willing to try it again if the response warrants it. These services would be listed on a separate page and are available at a cost of 10 cents per word. Unfortunately our high cost to print each page of A.R.C. prevents us from making this a free listing. Additionally, there are many other collectors and companies that provide services, but who are not subscribers. It is their loss if they do not see the potential gains they may receive by being a part of A.R.C.'s large readership. *(Gary Schneider - Editor)*

---

**FIND OF THE MONTH** - Through a small ad in the local newspaper, I found an unabridged set of Riders manuals 1 to 5 that are still in the burnt orange cardboard boxes they were sold in. Total cost of the set - only \$30. *(Leonard Arzoomanian - N. Prov., RI)*

# CONSTRUCTION PROJECT

CONTRIBUTED BY: ED. MONTGOMERY, 1092 WILLOWBRANCH, JACKSONVILLE, FL 32205

## BUILDING A HEADPHONE MAGNET RECHARGER

**HEADPHONE MAGNET RECHARGER - PART 1:** *This article will show you how to build a device for recharging the magnets of headphones. Due to the long length of this article, it will be present in two parts, the second part appearing next month. (GBS)*

### INTRODUCTION

Having quite a few headphones with weak magnets inspired me to desire having a device that would recharge these magnets. I ran an ad in ARC seeking to obtain a ready-built unit that would accomplish this feat or information that would aid in construction and operation of same. I received many answers to my ad, mostly from persons also interested in obtaining such a device or information that I might receive in connection therewith. Using a magazine article (c. 1938) furnished me by Herb Hayden of Jacksonville on a double coil horseshoe magnet charger as a starting point, I dug up an old heavy duty low voltage field coil and pole piece. I showed the article and the coil to John Popp, a young local fellow, collector and all-around electronic and mechanical wizard as well. I told him what I had in mind and he said, "Just give me the coil and I will bring back to you a complete magnet charger quick like a rabbit". He lived up to his word and on the very next day he delivered the goods. It proved to be functional. John manages a chain muffler shop and also does a lot of the mechanical work. He is restoring several old cars he has collected and has a nice collection of antique radios and accessories.

Over a period of weeks, I did much experimenting with the magnet charger. I conceived the idea of incorporating plate "H", and pole gap inserts Q-1, Q-2, and P (see diagram). I fabricated and installed these items, did all of the operational experimenting, mounted assembly on baseboard and built and used a power supply capable of delivering 6 to 32 Volts at 8 Amp. DC, all voltage readings made under load.

Unless you have the aptitude and proper equipment for accurate cutting to size, smoothing out surfaces, slotting thick pieces of soft iron, locating precisely centers for drilling, tapping out and cleaning holes straight through thick iron and making precise measurements, I would recommend having a qualified machinist handle some of these operations. It is very important that you use softest iron available for pole pieces to reduce or eliminate residual magnetism. Finished parts must have smooth, square, and clean surfaces. Material listings and specs along with the various sketches should facilitate construction of this device.

### CONSTRUCTION DETAILS

Materials involved and most assembly operations spelled out: **J-1 and J-2** - 2 pieces, 3 inch long cut from aluminum angle material. Drill holes for E-1 and E-2 hex bolts and lock washers. **(N)** Soft iron pole piece, drill holes in both ends and tap out for 5/16 inch x 1 1/4 inch length, coarse thread stainless steel hex bolts E-1 and E-2. Slide magnet coil "F" over pole piece and secure at central point. If you do not have and/or can't locate a suitable coil ready-built, fabricate a form and wind a coil with #18, 17, or 16 formvar or enamel copper wire. I already had a 4 inch long x 1 1/4 inch diameter pole piece and a factory made field coil 2 1/4 inch wide 3 3/4 inch diameter filled to the brim with 16 or 18 wire. A larger coil with more turns would be more efficient. **B-1 and B-2** - Soft iron upright pole pieces. Drill holes large enough to clear 5/16 inch hex bolt E-1 and E-2 and also drill holes in exact center on top surfaces and tap out for C-1 and C-2 hex bolts. **C-1 and C-2** - 1/4 inch #20 thread stainless steel hex head bolts 1 1/4 inch long. **A-1 and A-2** - Soft iron adjustable pole pieces (fit across top of surfaces of B-1 and B-2 and immediately above plate "H"). **D-1 and D-2** - Brass or s.s. spacers with 1/4 inch hole in center to go with C-1 and C-2 and add up to 7/16 inch thickness. **Q-1 and Q-2** - Soft iron pole gap inserts **(P)** Aluminum spacer 1/4 inch thick, wedges between Q-1 and Q-2. **(H)** Brass plate 5/32 inch thick and approximately

4 inch long and 3 inch wide mounts horizontally immediately below A-1 and A-2 (about 1/32 inch spacing) extending equidistant fore and aft from edges of A-1 and A-2. It serves as a bottom support for P, Q-1, and Q-2; makes A-1 and A-2 easier to adjust and helps determine center line of pole gap. It mounts with brass angles G-1 and G-2 which in turn are mounted with K-1, K-2, L-1 and L-2. Plate must be well secured and level. Holes in G-1 and G-2 are elongated to permit fine adjustment of spacing and leveling of plate "H".

K-1 and K-2 are 6-32 N.P. brass F.H. screws 1/2 inch long. L-1 and L-2 are 6-32 N.P. brass R.H. screws 1 inch lock washers and nuts also go with these. If brass angle material is not available, use soft copper strap material. At least 3/64 inch thick and 7/8 inch wide and form angles with it. Make bends square as possible.

After assembly is completed and fastened on board, slide A-1 and A-2 toward each other and see if they will meet (or almost meet) in top center. With hex bolts tightened, the mating surfaces of A-1 and A-2 should line up perfectly (or nearly so). Loosen hex bolts slightly and slide back A-1 and A-2 leaving approximate gap of 1/2 inch each side of center line and insert Q-1, Q-2 and P pole gap spacers. Close gap by pushing A-1 and A-2 back toward center line wedging the 3 pieces in place and making sure they are seated properly. Tighten hex bolts applying pressure at ends of A-1 and A-2 simultaneously wedging the 3 gap pieces firmly in place.

No particular effort was made to show sequence of assembly operations. In general you should work from bottom to top. This assembly is free standing and sturdy but is mounted on a solid walnut board 7/8 inch thick x 10 5/8 inch wide x 9 1/2 inch deep for stability, appearance, and a place to mount binding posts. Drill two holes in J-1 and J-2 and mount assembly on board with four #10 wood screws. It is centered on board from side to side and is purposely spaced farther from front than from rear to distinguish front from rear for reference and operational purposes. The right side top of assembly represents Northpole insofar as compass indication is concerned. Item "P" can be replaced and/or supplemented with thinner or thicker aluminum inserts, to accommodate headphones with uncommon pole piece spacing or speakers with headphone-like drivers. These pieces can be fabricated easily. Install two binding posts on board and connect leads

from coil thereto. The Northpole of a magnet is according to text books the "north-seeking" pole. A compass placed near a magnet pole marked "N" will read "S". In my article which is designed to cover re-charging magnets without changing their polarity, I refer to polarity indications that match compass readings consistently throughout.

## OPERATION DETAILS

All set-ups and procedures from this point on are executed with me *facing south* toward sketches and magnet charger board front. This was done to correlate text with sketches and components being tested. Use power supply with output that can be varied from 6 to 24 volts at 8 amps, well filtered DC. This supply has a momentary contact switch and an ordinary switch in parallel with each other and in series with primary winding of transformer. Affix label marked *North* at top righthand corner as shown in front view sketch and one marked *South* in top lefthand corner. Connect wires from power supply to binding posts on charger board.

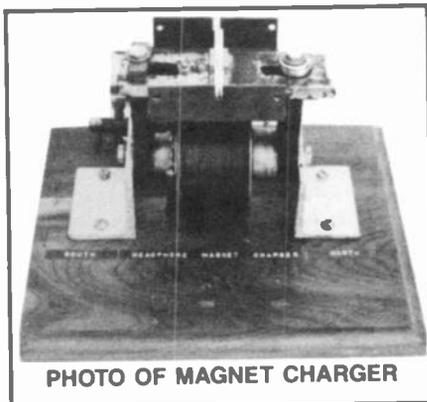

PHOTO OF MAGNET CHARGER

Switch on power supply and apply about 8 volts to charger. Hold magnetic compass about 6 inches away from righthand tip end of A-2 and take reading. If it reads *North*, make voltage polarity check at binding posts and mark posts to correspond to polarity of applied electromotive force. If *South*, use reverse polarity markings. After you operate charger for a while, you will probably find that residual magnetism will activate the compass. Make sure that you feed voltage of proper polarity into magnet charger before attempting to re-charge headphone magnets.

**ADDENDUM:** Photo of charger shows (2) "L" angle brass pieces, one each attached to front and rear of plate "H". They are not needed so I removed them and are not shown in text or sketches.

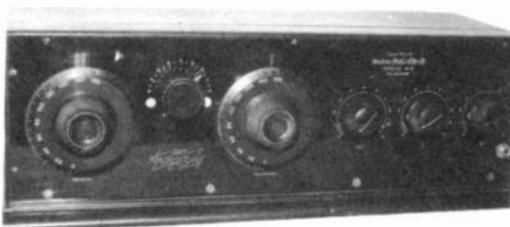

Continued next month

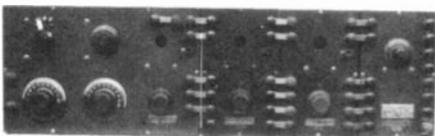

# PHOTO REVIEW

The "Photo Review" column is intended to present in pictorial form many of the radios, speakers, tubes, advertising, and other radio related items in the collections of other collectors. These photos are meant to help increase awareness of what's available in the radio collecting hobby. Photos are solicited from other collectors for use in future issues of A.R.C. Items desired are the more unusual radios and other items related to the hobby (covering the years 1900 to 1940's). Photos must be B&W (any size) and be sharp in detail, preferably with a light colored background. Please include a short description of each item submitted.

**WESTERN COIL & ELECTRIC CO. - Model WC10**, it is a 6 tube TRF set manufactured in Racine, Wisconsin, about 1924. (Walter Worth Wollaston, MA)

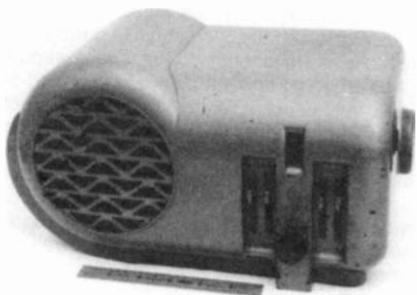

**NORTHERN ELECTRIC - This R-1** is a one-tube regenerative detector using a 215-A peanut tube designated R215-A in Canada. It is shown along with two R-5 audio amplifiers (also each with one R215-A), and a R-105 loudspeaker amplifier using a R216-A tube. The R-1 probably appeared about 1922, but its most recent patent date is 1919. Total price \$133.50. (Bob Murray - Winnipeg, Manitoba)

**CUTTING & WASHINGTON - Type 11**, 3 tube, detector & 2 A.F., manufactured about 1922 - probably one of their first sets. Nice panel and workmanship, this set was written-up a couple of years ago in the A.W.A. bulletin. (Paul Thompson - Santa Barbara, CA)

**SPLENDID DELUXE - One tube radio receiver**, it uses a 201A tube. Type "B" is in a box type cabinet 10" wide, 8" high, and 7" deep. Manufactured by W.F. Mains Radiophone Co. of Cedar Rapids, Iowa, and Chicago, Illinois. (David McKenzie - Eustis, FL)

**STEWART-WARNER - Model 97-573** ("Varsity") made in 1939. Metallic light blue finish on bakelite. Five tube AC-DC circuit with mechanical push button tuning. I would call this design & color "Art Yetcho"! (Robert Lozier, Monroe, NC)

---

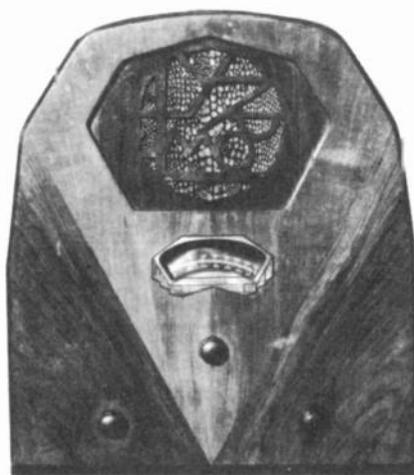

## PHOTO REVIEW

---

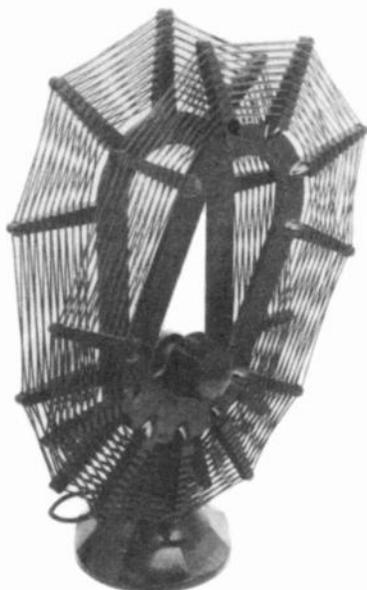

**INTERNATIONAL** - 1931 "All Wave Duo", also sold under the Emerson and Acratone names. Two discrete radios in one, the set featured both broadcast and shortwave reception. The Duo had separate tuning condensers, dials, and controls on the same chassis. Uses 8 tubes - 2-24A's and 27 in shortwave circuit (Superhet) and 2-35's and 1-24A in broadcast circuit (TRF). (Bill Moore - Huntsville, AL)

---

**LEMOUZY** - Model CZG-69, a 1932 7-tube superhet manufactured in Paris, France. It is a dual wave (long and medium) set and measures 19" tall, 17 1/2" wide, and 9" deep. It uses the most impressive tube I have ever seen in a radio, a Radiofotos Grammont G.100 pentode. The base has a 7" dia., the bu'b is 8 1/2" around the widest point and is 5 1/2" tall! If you look closely you'll see that the speaker grille-work spells out LEMOUZY and the unusual grille cloth is original. (Frank Heathcote, Logansport, IN)

---

**TUNE-A LOOP** - Loop antenna advertised in Radio News magazine 1925/26. Molded of bakelite. (Robert Lozier - Monroe, NC)

---

**ZENITH** - This 1927 console, model 11-E, uses seven tubes and cost \$175. The Walnut cabinet was manufactured by the Superior Cabinet Co. of Muskegon, Michigan. (Karl Rommel - Lansing, MI)

---

# COLLECTORS CORNER

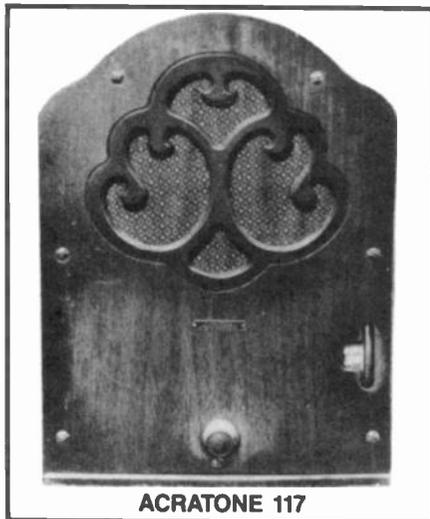

CONTRIBUTED BY: FRANK HEATHCOTE, 1235 N. 3RD ST., LOGANSPOBT, IN

## FEDERATED PURCHASER "ACRATONE 117"

Many independent radio dealers and servicemen in the 1920's and 30's sold radios purchased from various catalog sales companies that bought radios direct from factories. Federated Purchaser Inc. of 23-25 Park Place in New York City, established in 1921, was one of the best known and claimed to be the largest radio replacement parts house in the country. They sold their own line of radios under the trade names **Melorad** and **Acratone** along with other radios, usually distressed merchandise, from manufacturers big and small.

The Acratone Model 117, also found under many other model numbers, was introduced in the summer 1931 issue of the *Radio Bargain News*, Federated Purchaser's catalog, selling for \$18.85 or three for \$16.65 each. It was available in the plain front cabinet, shown pictured, or with a fancy repwood front as shown on the front cover of this issue. It was built by the Sterling Manufacturing Co. of Cleveland, Ohio, although some models say Republic Radio Corp., Cleveland. It is found with cabinet variations under other brand names such as Belnap and Pentatron. It is a 180 degree departure from Sterling's previous models such as the Jesse French Model "G", described in A.R.C., November 1984. Later Acratone sets were made by Kennedy, U.S. Radio, Clarion, Wurlitzer, and many others.

The Model 117 can be found in Rider Volume 2 under Federated, page 1 (Acratone Model 2). It is a 5 tube set using three type 24 tubes in the two RF and detector stages. The detector is direct coupled to a 47 output tube. This is the only set that I have found using the Loftin-White direct coupled output circuit with a 47 tube. This circuit was quite popular with a 45 tube in many midgets in 1930. An 80 rectifier provides direct current and due to the L-W circuit very little filtering is needed. Only 2-2Mfd. and 1-1Mfd. capacitors are used. A 4700 ohm field coil, 6 or 8 inch Rola model F is used. Volume is controlled by varying cathode voltage to the two RF tubes.

ACRATONE 117

This Acratone has an unusually shallow chassis, only 1¼ inches deep. The radio is only 13 inches tall, 10 inches wide, 8½ inches deep and weighs 22 pounds. The front panel is of walnut veneer. The arch is steel with a wood grain look finish. The base is a steel pan with wood underneath.

Although a rather cheap set and not particularly attractive, it is well built. It is quite basic and, after replacing faulty capacitors and resistors, should be trouble free. The Acratone's unusual construction makes it an interesting and usually cheap acquisition. The repwood front model is much more desirable and of course is usually more expensive. Neither set seems very rare.

Next month will feature the Model 42 "Coronet" midget set. The first midget set manufactured by "The Royalty of Radio", the Colin B. Kennedy Corp. of South Bend, Indiana. (Frank Heathcote)

The Collectors Corner will appear as a regular feature of *Antique Radio Classified*. It is an attempt to build knowledge and interest of radio collectors primarily in AC home receivers of the late 1920's to the 1940's, with emphasis on the lesser known and more unusual styles and brands. Helpful restoration hints will be given where possible. Any questions, comments, or suggestions on this column, the radios featured, or on any other radios may be sent to Frank Heathcote, 1235 N. 3rd St., Logansport, Indiana 46947. Please include a self-addressed stamped envelope for reply.

## FRONT COVER STORY

## PENTATRON 101

**PENTATRON 101** - same as the Acratone 117 featured in this issue's Collectors Corner and also shown on the front cover. A five tube TRF introduced in 1931, built by the Sterling Manufacturing Co. for the Republic Radio Co., both of Cleveland, Ohio. Sterling's manufacturing facilities in Charlotte, Michigan were bought by the Wilcox-Gay Radio Corp. in mid 1932. (From the collection of Frank Heathcote - Logansport, IN)

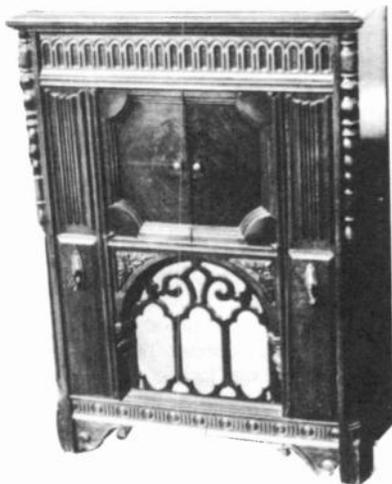

## MORE CLASSIFIED ADS

**NOTICE:** Due to the large number of ads omitted (due to lack of space) in the Apr. issue, it is imperative that your May ads be submitted **ASAP** before all available space is utilized.  
- Editor

**WANTED:** A plastic dial log for a Radiola 33, a cabinet for a 7 x 9" panel; aluminum collars as used on Westinghouse DA & RC tube sockets. **FOR SALE:** DeForest D-10, original crystal detector - \$420; 1946 & 1947 QST, 24 issues - \$10 per year; Magnavox R3-B speaker - \$80. Pictures and list of radios and stuff - send SASE. Bob Barnes, 511 N. Chestnut, Monroe City, MO 63456 (314) 735-2945

## WHAT IS IT?...

**WHAT IS IT** column is provided as a service to collectors to help them identify items in their collection which they would like to have identified by any of the readers of A.R.C. If you have any knowledge of the item pictured, please write to the person requesting help. If you have an item which you would like to have identified, send a B&W photo or sketch, along with a brief description of the item and what you would like to know about it.

**WHAT IS IT?** - What, no legs! Does anyone know what the missing legs look like on this Temple console? An illustration would help me to make them. (Alan Brehaut, 22A Cain Street, Timaru, New Zealand)

## NOW YOU KNOW...

**Now You Know** - Ever wonder what the reason three-element tubes (226's, 227's, etc.) intended for amplification with AC on the filament are designed for low filament voltage? Do such tubes have any advantage over tubes designed for higher filament voltage? When AC is used on the filament there is considerable hum, and the amount of hum depends on the value of the filament voltage as well as on the ruggedness of the filament. The lower the filament voltage the less hum and also the more rugged the filament the less the hum. Hence amplifier tubes, especially those in stages other than the last, are designed with a low filament voltage and heavy filament current. In the power stage it is not necessary to use low voltage on the filament because the hum is not amplified by any other tubes. Hence the hum is not noticeable. (RADIO WORLD - October 11, 1930)

**COMING EVENTS** - For a complete list of upcoming radio meets please see last months A.R.C. (March - page 14) for complete details. The following are new events that were just announced.

**TEXAS** - Vintage Radio and Phonograph Society is conducting their Spring Auction this coming month, April 26th, 1986. Contact VRPS for further information. VRPS, P.O. Box 165345, Irving, Texas 75016

**NEW YORK** - Greater New York Vintage Wireless Association (GNYVWA) will hold a one-day Spring meet at "Voice of the Twenties" radio museum in Orient, New York. Date is Saturday, May 17th, starting at 9:00 AM. There will be a flea market, a small auction and, if practical, a contest. The radio museum will be open all day for visiting. Information - contact: Ralph Williams, RD1 - Box 44, Orient, NY 11957

Sat **VINTAGE RADIO** MAY 3

HOUSTON ASSOC.

PROUDLY PRESENTS THEIR **SHOW & 7th ANNUAL AUCTION**

MEMORIAL CITY MALL I-10 WEST GESSNER EXIT SHOW 9:00-5:00 AUCTION 1:30-5:00

**TEXAS** - Seventh annual Houston Vintage Radio Association show and auction will be on Saturday, May 3rd, at the Memorial City Shopping Center. Information contact: Ron Taylor, 12407 Mullins, Houston, TX 77035

## RADIO TRIVIA

**RADIO TRIVIA & FOLKLORE** - I seem to recall that one company was making a tube advertised to have a "golden grid". Some of my customers were beginning to ask for those tubes as a complete replacement. As it turned out they were somehow spoofed into

## RADIO SHOW

The January show was super.... so here we go again!!! **RADIO XVI**

will be held at the Rivers School in Weston, Mass. on Sunday April 6th from 8:30-3:00. There will be an auction, food, a contest for the best "Boston Area Receiver", flea market tables and more.

If you haven't been to one of our shows, write or call for information.

Dave Crocker, 6 Old Farm Road, Duxbury, Ma. 02332  
Tel. (617) 585-5650

**NEW YORK** - N.F.W.A. Meet Saturday, May 10th, 11:00 AM to 4:00 PM. Located at Wilson Historical Society, Route 425, at railroad crossing, Wilson (Buffalo), New York. Flea Market 11:00 to 2:00, talk on British crystal sets by Andre Nolf at 2:00 PM. Nice display of rare British crystal sets and novelties. Will conduct contest on crystal sets and headphones categories. Coffee and donuts available. For more info contact Niagara Frontier Wireless Association, Box 68, Buffalo, New York 14215.

**INDIANA** - Indiana Historical Radio Society will be conducting their largest meet of the year this coming April 19th. This well attended meet draws in collectors from all over the surrounding states. Located at the Auburn-Cord-Dusenbury Auto Museum (well worth the visit just to see this great museum) in Auburn, Indiana. Meet will feature flea market, equipment auction, and contest. Information: Ross Smith, 1133 Strong Ave., Elkhart, IN 46514

**MICHIGAN**: Spring meet, Sunday, May 18th at the Sparton Clubhouse in Jackson, Michigan. Located in front of the Cascades Park. Karl Rommel and others will be displaying some of their prize Sparton items. Meet features swap session, mini-auction and Sparton items contest, for info call "Abe" Lincoln at 517-629-2376

believing an enrichment and mellowing of tonal quality could be expected from the gold plated grid tubes. Although the sets probably needed several tubes replaced anyhow, I secretly satisfied their quest for improved tone by installing an output tube plate bypass condenser. In those days most sets were lacking in bass response. (William Stuber - Woodward, IA)

# CLASSIFIED ADVERTISEMENTS

**CLASSIFIED AD DETAILS:** Each subscriber is entitled to one free 20 word ad each issue. Additional words over the free limit are 10 cents per word. Enclose correct payment with ad, as we do not bill for ads. Ads must be received before the 10th of the month to appear in the following months issue. Late ads will be held for the following issue. Limit of two multiple insertions of same ad. Ads may be sent in advance, however each ad must be submitted on a separate sheet of paper, preferably a 3 x 5" index card. Publisher reserves the right to edit ads and is not responsible for errors due to illegibly written ads. **OPTIONS:** Shaded ads are available at a cost of 10 cents per word additional, including free words. Photo ads are \$5.00 each for half-tone charge. Allow extra time for processing of photos. B&W line-art drawings also accepted at a rate of \$1.50 per vertical inch, maximum width is 3 1/2 inches. Custom ads made to order, send sketch of your ideas for quote.

**FOR SALE:** National NC-125, fair outside, plays well - \$25; Lafayette HA-520 FM Communication Receiver, 30-50 Mc, 140-174 Mc, good condition - \$20. Prices include shipping by UPS. **DESPERATELY NEED** Hallicrafters Model SX-62 receiver, must be in clean condition and playing. Will answer all - thanks! **LATE ADS...**

---

**NOTICE:** A.R.C. would like to apologize to those readers who's classified ads we were not able to include in this issue. If your ad is not in this issue then it was received too late. This issue was completely filled up by March 7th. We even added four more pages to accommodate the large number of ads received. These four additional pages caused A.R.C. to incur production and printing cost far more than the revenue we receive. However, it is our commitment to make A.R.C. #1 in the hobby. Your patience and understanding with our "growing pains" is appreciated. Thank you, Gary Schneider, editor. P.S. - The major factor for ads not appearing in the requested issue is due to many people waiting till the last minute. Please send your ads in early to avoid disappointment!

**FOR SALE:** Send large SASE for April list of radios, speakers and TV's. Jim Clark, 1006 Pendleton Dr., Lansing, MI 48917

**FOR SALE:** Over 200 battery and A.C. radios. Send large SASE with 2 stamps for list. Donald Juleen, 6250 Ledge Rd., Sturgeon Bay, Wisc. 54235 (414) 743-7922

**FOR SALE:** Philco cathedral 37-93 - \$37.50; Philco Tombstone 37-38 battery set - \$17.50. R. Haneline, 3600 Cuba Blvd., Monroe, LA 71201

**FOR SALE:** Leutz C-10 Superhetrodyne receiver, mint condition, former A.W.A. contest winner. Four complete sets of plug-in coils. Larry Wright, 131 Hilltop Dr., Lake In The Hills, IL 60102 (312) 658-5993

**FOR SALE:** New "REGAL" English style enclosed crystal detector with pre-tested Crystal Craft crystal. \$15.00 plus \$1.00 shipping. Address next ad.

**FOR SALE:** I apologize to those who missed the 1929 S.S. Kresge Radio Catalog reprint at Christmas time. This profusely illustrated reprint is now available @ \$3.00 + .50 postage. New 1986 model Battery Eliminators \$46 to \$110, all solid state, guaranteed, enclose SASE for info. RIDERS MANUALS 4 to 17, subject to prior sale, \$10 ea. plus shipping. SASE required for all inquires. I also restore catacombs. Clinton Blais, 613 Juniper DR 0'Fallon, Illinois 62269

**WANTED:** Driver and metal parts for Music Master horn speaker. Also Hallicrafters SX-17 and speaker. Charles Furtak, 241 Oak, Elmhurst, IL 60126

# BUSINESS CARD ADS - \$9.45 FOR 3 MONTHS

**SPECIAL OFFER** - Run your business card ad (or small display ad) here for only \$9.45 for 3 consecutive months. Artwork must be camera ready or a reproducible business card (no light colors). Typesetting is available at additional cost. Next available issue is June 1986. Maximum printable area is 1 7/16" high and 3 1/4" wide.
