

ANTIQUE RADIO CLASSIFIED

VOLUME 3

MAY 1986

NUMBER 5

THE NATIONAL PUBLICATION FOR BUYERS AND SELLERS
OF OLD RADIOS AND RELATED ITEMS - PUBLISHED MONTHLY

ANTIQUE RADIO CLASSIFIED

Publishing Details

Antique Radio Classified (USPS 735-090) is published monthly, 12 times yearly, at a subscription rate of \$15.00 per year by G.B.S. Enterprises, 9511 Sunrise Blvd., #J-23, Cleveland, Ohio 44133, (216) 582-3094.

Second-class postage paid at Cleveland, OH.

Publisher and Editor - Gary B. Schneider.

POSTMASTER: Send address changes to address above. Copyright 1986... Antique Radio Classified

Purpose

Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby thru the buying, selling, and trading of radios and related items. In addition, there will be coverage of upcoming radio conventions, meets, flea markets, etc. Other items of interest to collectors will be included in issues as material or suggestions are received.

Display Ad Rates

Antique Radio Classified accepts display advertising for companies that provide a product or service to the radio collecting hobby. As artwork is reduced 35% when printed, original should be 1.54 times the desired finished size and must be camera ready artwork. Original size areas are available as follows:

Full Page	10-1/2" H x 7-1/2 W	\$30.00
Half Page	5-1/4" H x 7-1/2 W	15.00
1/4 Page	5-1/4" H x 3-3/4 W	7.50
1/8 Page	2-5/8" H x 3-3/4 W	3.75

Business Card - same as 1/8 page

Above rates based on circulation of 1,000 subscriptions.

Full page ads may be vertical or horizontal format:

Multiple insertions for 3 months qualify for a 10% discount.

All artwork must be received by the 1st of the month to be included in the following issue, which is mailed on the 1st day of the calendar month.

Classified Ads

Each subscriber is entitled to one 20 word classified ad free of charge per issue. Additional words over the limit are 10¢ per word. Multiple insertions of same ad are discouraged. This is to allow for a varied ad content in each issue. Multiple insertion ads for more than 2 issues must be run as a display ad. All ads must be printed neatly and be received by the 10th of the month before next issue. All issues mailed on the first of the month.

Payment

All ads must be paid for in advance. Make checks payable to Antique Radio Classified.

Subscription Rate

Subscriptions are available on a yearly basis, \$15.00 per year. Sample issues: \$1.50.

Submission of Material

Antique Radio Classified welcomes and solicits any information that pertains to the radio collecting hobby. This may include material such as upcoming radio events, meetings, radio books and publication reviews, new radio clubs and organizations, radio auctions and price reports, sources of old radio material and restoration supplies, and any other material that would be of interest to the hobby. All material submitted should be typewritten and verified for accuracy.

Change of Address

Notification of change of address should be made well in advance to receive uninterrupted copies of Antique Radio Classified. Do not depend on the Post Office to let us know.

Fine Print

The publisher is not responsible for any buying and selling transactions incurred by readers thru the content of this publication.

Antique Radio Classified subscription and ad rates subject to change, as well as frequency of publication, content, and size.

COLLECTORS CORNER

COLIN B. KENNEDY "CORONET" MODEL 42

Few vintage radio collectors realize that one of early radio's most respected companies ended its days in South Bend, Indiana, another casualty of the depression. The Colin B. Kennedy Corporation of San Francisco, California entered the wireless field in 1919. In 1924 the company moved to St. Louis and continued to prosper producing quality radios, living up to the company's slogan, "The Royalty of Radio". Early in 1929, several prominent members of Studebaker Automobile Corporation purchased a substantial interest in the Kennedy Corp. and moved operations to 212 West Ewing Street in South Bend. Intentions were announced to eventually hire 1000 workers and build 1000 sets a day.

Kennedy was caught by the depression, overstocked with high priced consoles and unwilling to follow the trend to cheaper mantel radios. Finally in November, 1930 they introduced the Model 42 "Coronet" based on the Model 20 circuit and selling for \$69.50 complete. It was a 6 tube TRF receiver using type 24 tubes in 3 RF stages and as detector. A type 45 output and 80 rectifier completed the tube line up. Early in the production run the circuit was revised, one RF stage was removed and an AF stage added using a type 27 tube. Two AF stages, entirely resistance coupled, replaced the former single transformer coupled AF stage which resulted in a cost savings over the early design.

The chassis is made of thick rust-proofed steel and the tuner and screen grid tubes are entirely shielded. An 8 inch Utah, Jensen, or Magnavox electrodynamic speaker is used with the 2250 ohm field coil and the 6 and 16 ufd. electrolytic capacitors providing excellent filtering of the DC voltage. Volume control is effected by varying the input signal to the grid of the first RF tube. A two position "Selectone" switch offers the listener a small degree of tone control.

The Coronet cabinet is uniquely styled and very well built. The front is covered with matching butt walnut veneer panels, the sides

KENNEDY 42

and top with plain walnut veneer. Decorative framing on the top and sides provide extra strength. The height of the set is 17 inches, width 16 inches, depth 10 inches, and it weighs 31 pounds. It can also be found with the brand name, Minerva, and also with a later model chassis using type 35/51 and 47 tubes.

My Coronet is a good performer in all respects and stands up very well against its competitors. I've found that its styling is not appreciated by many collectors but this is made up for by interest in Kennedy products. It is also the only quality Kennedy mantel set, later models were not as well made. The company lasted only until the 1933/34 season and distressed sets were sold by mail order radio outlets. Later, private brand radios using the Kennedy name were sold by Goldblatts Department Stores.

Some of the information in the above article is from "The Colin B. Kennedy Corporation South Bend Operations" by Ross Smith which appeared in the Spring, 1985 Antique Radio Gazette. Next month an Australian mantel radio of 1934 will be featured, the Healing Model 24. (Frank Heathcote - Logansport, Indiana)

The Collectors Corner will appear as a regular feature of Antique Radio Classified. It is an attempt to build knowledge and interest of radio collectors primarily in AC home receivers of the late 1920's to the 1940's, with emphasis on the lesser known and more unusual styles and brands. Helpful restoration hints will be given where possible. Any questions, comments, or suggestions on this column, the radios featured, or on any other radios may be sent to Frank Heathcote, 1235 N. 3rd St., Logansport, Indiana 46947. Please include a self-addressed stamped envelope for reply.

BUILDING A HEADPHONE MAGNET RECHARGER

HEADPHONE MAGNET RECHARGER - PART 2: *This is the conclusion of the article which was presented last month. (GBS)*

Referring to typical headphone sketch, make a duplicate drawing of headphone unit actual size on a sheet of paper or cardboard $8\frac{1}{2} \times 11$ inches centering it side to side on the 11 inch dimension with you facing *South* and with sketch sheet placed on table directly in front of you with arrow on vertical center line pointed *South* and toward top of sheet with arrow on horizontal line pointing *East* and toward left side of sheet. Align phone with sketch and put it face down after removing cap and diaphragm. Position compass adjacent to right side as shown. If it reads *North* affix "N" label to square box area at rightside of phone. If it reads *South*, use "S" label at that spot and an "N" label in square on other side of phone. This identifies magnet polarity.

Gauge strength of headphone magnet by using several pieces of soft iron that cover a wide range of weights pre-determined by weighing them on a small postal scale and marking weights on each one. They must be at least long enough to extend across both pole piece surfaces and then some, and be perfectly flat on the pick-up service and about $\frac{1}{2}$ inch wide. Take headphone units with strong magnets and those with weak magnets and try to arrive at what you consider to be normal, tagging those units that are sub-par. Unless you are comparing units of same brand, same model, and same age, it is difficult to ascertain what *is* normal. What you can do is assume that any phone you have may be weak. Measure strength of magnets in each phone unit before and after subjecting it to a re-charge procedure. Some phones just don't seem to be good candidates for improvement either because they were not very powerful to start with, or the magnet material deteriorated somehow and made it incapable of being brought back to its original strength. A more powerful charger, possibly a super-power capacitor discharge type would be necessary to re-vitalize it properly. This charger no doubt is a compromise between a combo of compactness, low cost, and simplicity in operation and one that is very bulky, expensive, and even dangerous to operate. I do know that it works fine on some magnets. I took an old pair of German phones with very powerful magnets and placed one phone unit atop a tape reel demagnetizer and in a jiffy all magnetism disappeared. I had initially made magnetic comparison of the two units and I could tell no difference in strength. I then put the dead one

on the magnet charger, applied 18 volts in rhythmic jolts and then found that it was a little stronger than the untouched one.

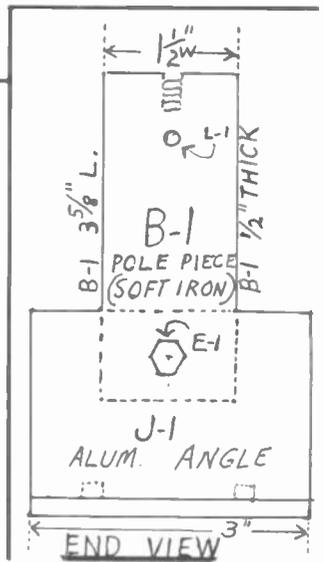

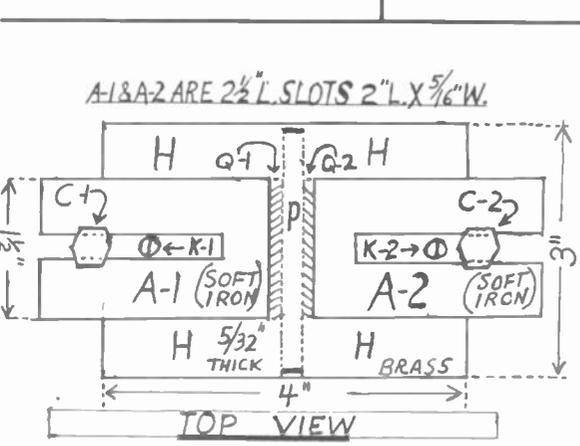

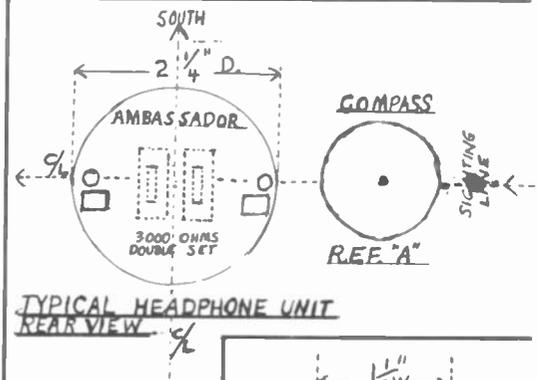

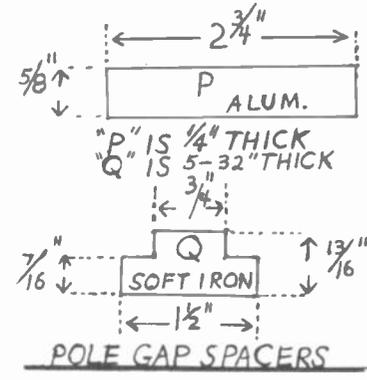

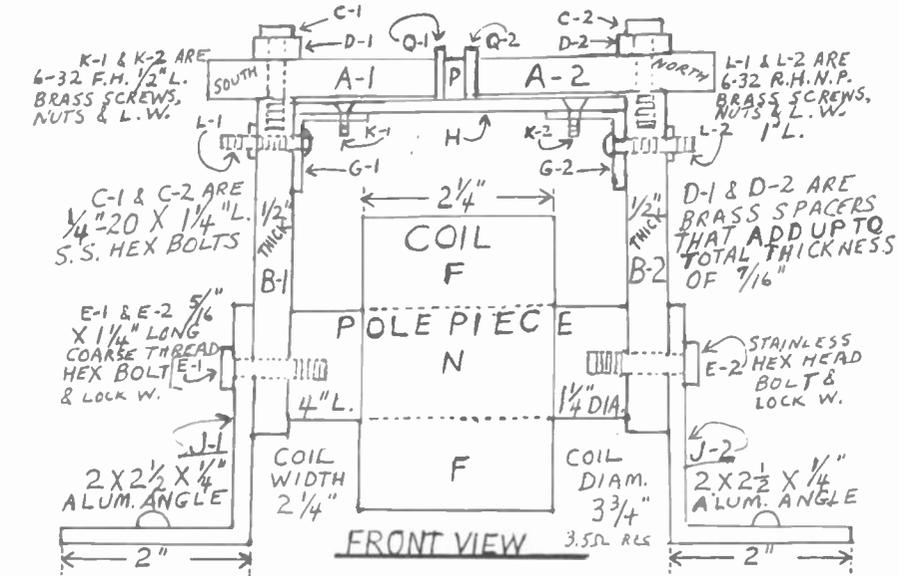

Take headphone unit to be re-charged, hold it face down and align it with mating surfaces of inserts Q-1 and Q-2. Polarity of this headphone unit you have already determined and labeled it accordingly. Position it so that *North* pole of headphone coincides with *South* pole of charger. Use momentary contact. Apply about 12 volts in rhythmic jolts spaced about 10 seconds apart over a period of 3 minutes then remove phone unit and its pickup ability with what it was before re-charging. If very little or no improvement is noted, repeat procedure with 18 volts, and if necessary 24 volts, but monitor temperature of coil and make sure it isn't overheating.

To charge horse-shoe type magnets, remove pole gap inserts Q-1, Q-2, and P and slide back A-1 and A-2 adjustable poles to afford a pole gap spacing equivalent to inside measurements of pole extremities of magnet being charged. Be sure that you have already checked magnet polarity with compass. (If it has a pole marked "N", don't go by that - go by compass reading) and place north pole of magnet atop south pole of charger and south pole of magnet atop north pole of charger and then follow same procedure used on headphones. Don't forget to tighten hex bolts after broadening pole gap before charging this magnet. (Contributed by: Ed Montgomery, 1092 Willowbranch Ave., Jacksonville, FL 32205)

ATWATER KENT

MECHANICAL DRAWINGS FOR MAGNET RECHARGER

A-K BREADBOARD REVIEW

CONTRIBUTED BY: RALPH WILLIAMS, RD 1 - BOX 44, ORIENT, NY 11957

This months "A-K Breadboard Review" is being delayed because of photographic problems. Rather than present poor photos of the sets, I have decided to re-photograph many of them to provide you with a more detailed photo. Until that time when they are available for printing here in A.R.C., I have gathered some useful information on various aspects of the Atwater Kent product line. As soon as my photographic problems are resolved, we shall return to more photos of the remainder of the breadboard line. *(Ralph Williams)*

Dates on which actual production was started on the following Atwater Kent Radio Instruments and sets

DATE	PART #	MODEL #	DESCRIPTION
05/26/22	3590	-	Det., 2 stage amp. in wooden cabinet
11/23/22	3925	1	Tuner, Detector Amplifier
11/27/22	3945	2	Tuner, Detector, 2-stage Amp.
12/02/22	3955	3	Tuner, Detector Unit 2-Stage Amp.
12/04/22	3960	-	Tuner, Detector Unit 2-Stage Amp.
12/23/22	3975	4	Vario-Coupler, Variomtr., Det. 2 Stg. Amp.
01/24/23	4066	7	Single circuit tuner, 2 Radio Freq. Trans, Two 2070 Tube Units, 1 Potentiometer 1 Detector, 2-stage Amplifier
01/14/23	4052	6	Tuner, Pot., R.F. Trans. two tube units 1 Det. 2-stage amp., Sup. by 4275
03/15/23	4120	11	Single Circuit Tuner, 1 Detector Unit, 1 Radio Freq. Trans., 1 Tube Unit
04/30/23	4205	-	See 4066 (4135 tube unit)
05/08/23	4207	14	Same as 4066 (Cabinet Board)
05/15/23	4220	15	Model 15 Cabinet Receiver (4066)
06/05/23	4275	13	Single Circuit Tuner, Potentiometer 2 Radio Freq. Trans., 1 Tube Unit 1 Detector Stage Amplifier
09/07/23	4325	8	Model 8 Duplex
09/07/23	4333	5	Single Circuit Tuner
09/07/23	4340	-	Model 10 set (Plain Gray)
10/09/23	4445	-	Model 9 - cable type
11/01/23	4480	-	Model 9 in 4217 Console with cable
11/09/23	4490	-	Model 10 in 4427 cabinet with cable
12/14/23	4535	-	Model 9 in cabinet with cable
12/14/23	4540	-	Model 10 in console with cable
12/14/23	4550	-	Model 10 in brown finish, w/cable A.B. & M.

Note: The model numbers in column 3 are hypothesized by the author. The other data was extracted from factory records.

COLLECTORS VALUE GUIDE

CONTRIBUTED BY: JAMES KREUZER, 6270 CLINTON ST., ELMA, NY 14059

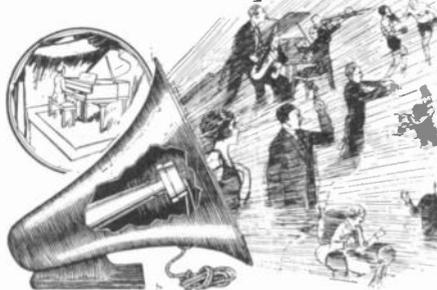

This "Value Guide" is an attempt to establish a relative value of many of the more common radios of the 1920's. The values expressed are the result of past market trends as indicated in recent auctions, flea market sales, sales by individual collectors, as well as information provided by other established collectors in the hobby. The factors affecting a value of a radio are many. One must consider the more obvious factors, such as condition of the radio, whether it is complete with tubes, in working condition, originality, age, rarity and etc. Other factors contributing to value include collector demand, collecting specialties (such as collecting wireless items, crystal sets, etc.), and geographic area. Thus when using this guide, you must consider these multitude of factors when valuating your radio. Of course the final value in the end, is the price another person is willing to pay for an item. Any questions in regards to this column, information about other radios not listed, comments, or suggestions should be sent to James Kreuzer with a SASE for reply.

HORN SPEAKER VALUE GUIDE: For most collectors of pre-1928 battery operated radio receivers a collection is not complete unless they have some horn speakers to go along with the sets. Like radios, horn speakers come in countless designs, styles, shapes, and sizes. With the many types available for collecting, some collectors soon find this a fascinating sideline to the radio hobby. In the McGraw-Hill Co. 1925 *Radio Trade Directory* there are listed over 190 manufacturers of speakers, many of which were of the horn type. With many manufacturers making more than one model, the collector has hundreds and hundreds of models to choose from. Presented below are just a few of the more common names you are likely to find for your collection. The values presented below are for a speaker in very good condition, good driver, original finish, decals or nametags, and all original parts - GBS. (James Kreuzer)

HORN SPEAKER VALUE GUIDE

American Electric - Burns 205 \$150	Orchestrian Deluxe 200
Amplion AR19 175	RCA Radiola #1320 100
Amplion AR102 160	RCA Radiola #1325 50

SPEAKER REVIEW

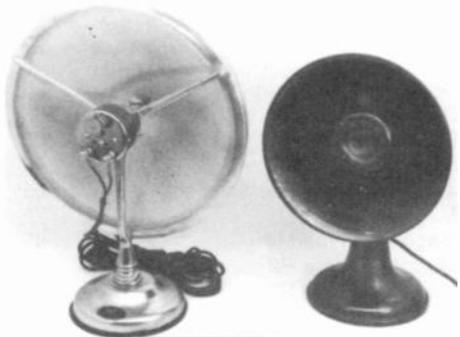

E.G. BROWN CO. - This Brown's Crystavox horn speaker has a built in carbon granule "amplifier"; just connect up a battery and you can listen to your crystal set. Made by S.G. Brown Co. in England, circa 1925. (*Alan Brehaut - Timaru, New Zealand*)

AMPLION - This small speaker stands 8 1/2" high and the bell of the horn is 5 1/2" in diameter. Two binding post on top of driver unit are for wires to receiver (not shown in photo). Tone/volume adjustment is on front of driver. Front plate reads "Amplion Loud Speaker - Type AR 102". The casting which holds the driver and attaches to the horn is imprinted on the back "Made in Great Britain". (*David McKenzie - Eustis, FL*)

MOON - Unusual speaker manufactured by the Wilson Utensil Co. of Dayton, Ohio. Made of aluminum, it is 15 inches tall and has a bell diameter of 10 inches. Headphones were placed on the two projections sticking out of the base and were used as the driver. (*Rudy Burick - Parma, OH*)

LOUDSPEAKERS - Two early loudspeakers seldom seen today. Pathe, the first cone speaker and Clarion re-entrant horn speaker. Both of 1922 vintage. (*Robert Lozier, Monroe, NC*)

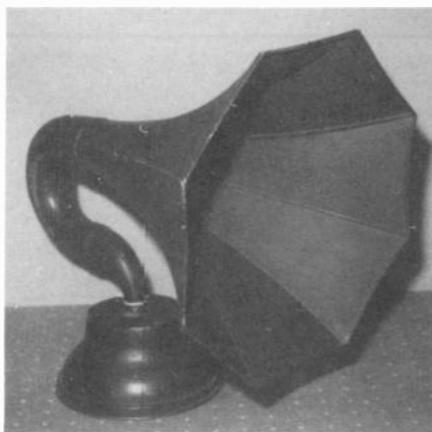

SPEAKER REVIEW

FRENCH AMPLION made by Telephones Le Las in Paris using Amplion horn and driver. (Alan Brehaut - Timaru, New Zealand)

AMPLION The Amplion Jr. DeLuxe Dragon wood horn speaker. The horn is 10 inches in diameter. Speaker stands about 15 inches high. (R.A. Hostler - Findlay, OH)

UNKNOWN SPEAKER - All brass "morning glory" radio horn finished in dark wood grain to look like wood. (R.A. Hostler - Findlay, OH)

SPEAKERS - On the left is a unit with imprint "Ace Radion" on the horn. The base has an imprint of "Utah 5 - Made in Salt Lake City". Center pictured is an AM-PLI-TONE loud speaking attachment consisting of horn and the base which is nickel plated. Headphones are placed on the lower tubes against the rubber cushions. It was recommended that high grade head sets be used. On the right is an Arkay Loud Speaker. An ad for this item states: "Radio horn will amplify without distortion and will work with one or more stages of amplification". Could be purchased in black enamel for \$5.00 or in polished nickel for \$6.00. Phone was not included with either unit. Made by Riley-Klotz Mfg. Co., Newark, New Jersey. (David McKenzie - Eustis, FL)

ANTIQUE RADIO SPECIFICATIONS

CONTRIBUTED BY: HENRY ROGERS, P.O. BOX 501, MINDEN, NV 89423

ANTIQUE RADIO SPECIFICATIONS - This column provides the collector with specifications, both physical and electrical on individual radio sets. Performance is measured and operation evaluated giving collectors a relative guide to expected results. Comments and suggestions concerning the evaluated radio are welcomed as well as additional radios you would like to see. (*Henry Rogers*)

The Radiola V was developed from commercial wireless sets G.E. sold for shipboard installation. Originally designated the AR1300 and AA1400 in 1922, the Radiola V was available through 1923 and part of 1924. Price was generally about \$140.

The circuit is a single tuned Armstrong regenerative detector with two stages of AF amplification. A two-mineral crystal detector is also included, however this circuit is independent and cannot be used with the tube AF amplifiers.

Performance of the Radiola V is somewhat disappointing. Sensitivity is adequate but the AF amplifier section is inefficient, requiring earphones to be used for any DXing. Due to the single tuned circuit, selectivity is poor. It is almost impossible to separate stations on the broadcast band. Running the INTENSITY control to the point of oscillation and tuning to the zero beat will give the best results.

Most distant stations received were: KOA, Denver, on a loudspeaker, 1000 miles distant, and using headphones station KRVN in Lexington, Neb., at 1500 miles.

It is interesting to note that two Radiola V's were used during the testing. Both were electronically original and operational. Performance results were identical for each set. The conclusion is that although the Radiola V is an impressive looking, well built receiver, its performance is not as good as many of its contemporaries. (*Henry Rogers - Minden, NV*)

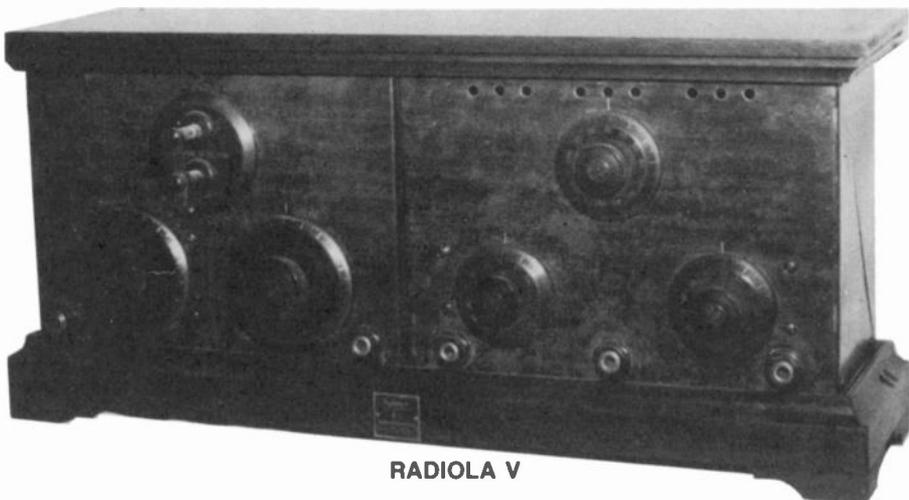

SPECIFICATIONS:

Height	11 1/8"
Width	23 3/4"
Depth	7 1/4"
Weight	36 lbs.

Frequency:	400 KHz to 1300 KHz
Circuit:	Single tuned Armstrong regenerative detector and 2 stage AF amplifier; 2 mineral crystal detector.

Construction:	Painted mahogany-woodgrain, brass EZKASE's. Wooden base and top are maple, finished dark red.
---------------	---

Variations:	1.) AR1300/AA1400 are painted green with silver dials. These came without base or top. 2.) Early Radiola V uses 1 amp fil. tubes. 3.) Later style uses 1/4 amp fil. or 199 tubes. 4.) Dimensions of wooden base and top vary by as much as 3/8". Also placement of ID tag varies, some mounted on curve. 5.) Interior painting of bottom plate is red primer or dark grey.
-------------	--

RADIOLA V

As stated in the March issue, A.R.C. needs 400 new subscribers to be able to continue publishing for a third year after August of this year. With the subscription drive deadline less than 30 days away, we have fulfilled half of the required number of new subscribers. With a concentrated effort on the part of all of us, we should be able to get 200 more subscribers within the next 30 days. With time rapidly disappearing it is of utmost importance that everyone make an earnest attempt to get a collector friend to subscribe for the remaining four months of the fiscal year (\$5.00 for the next 4 issues - May thru August).

I would like to thank everyone for their concern of A.R.C.'s future and for the many suggestions as received by telephone calls and letters. Also thanks to the many individuals and clubs who have helped spread the word about A.R.C., and who have helped recruit new subscribers. Hopefully with the help of everyone, A.R.C. can continue to grow and be able to provide a service for everyone in the hobby. Remember, we have only 30 days left in which to gain 200 new subscribers - lets everyone pitch in! You and everyone in the hobby benefits by having a large number of subscribers. The benefits include more classified ads (more buying and selling ads), more articles and written information available for publishing, and a more unified coverage of the hobby on a whole. Additionally, these new subscribers will enable A.R.C. to do the most important thing - continue publishing for a third year! (Gary Schneider - Editor)

Radio Station Treasury (1900 - 1946) - "The roots of the current communications explosion grow deep into the past - a past that is both fascinating and little known to all but a few intrepid historians who delve into early days of wireless and radio. Tom Kneitel's new book, *Radio Station Treasury (1900 - 1946)*, using faithfully reproduced rare archives, provides an in-depth view of wireless and radio stations as they evolved from the dawn of spark transmission, through the Golden Years of radio broadcasting, and right to 1946, the beginning of the TV ear." (CRB Research)

Continued...

A.R.C. has obtained a copy of this book. The book is of 8½ x 11 inches in size and 176 pages in length. The cover is of a heavy glossy stock and the pages of good quality reproduction. The main emphasis of the book is a detailed listing of radio stations in existence during the early years of radio development. The listing covers both American and foreign stations, including broadcast, shortwave, ship, police, airport, etc. Other sections cover the history of call signs and callbook directories over the years. A worthy addition to your library for those interested in radio station call sign history or to find what radio stations were in your area in the "old days". (GBS)

Radio Station Treasury (1900 - 1946) sells for \$12.95 per copy plus \$1.00 postage to USA, Canada, and APO/FPO addresses. Order from: CRB Research, P.O. Box 56, Commack, New York 11725

READERS COMMENTS...

Dear GBS: Very surprised to get a phone call, March 27th, in the evening from a collector in PA about my Crosley Set of Books Radio which was in the April issue of A.R.C. I was even thinking unkind thoughts of GBS letting his friends in on the ads before mailing them out to subscribers!!! The gentleman denied knowing you personally, and Lo and behold - I received my copy of A.R.C. the following day, March 28th. (Stan Lopes - Concord, California)

Editors Comments: As in any classified ad publication, it is always on the minds of many people that ads are culled for the "goodies" before mailing out the issues. Being in the radio hobby for 18 years, many of my subscribers know me personally. Most know me to be "disgustingly" honest. The simple truth is I don't buy from the ads or let anyone have a preview at the ads. My commitment of time and money to publish A.R.C. is not worth the meager benefit of acquiring a radio before anyone else. The success of A.R.C. speaks 100 percent for my honesty and commitment to its future. (GBS)

Time to send a message to your radio collector friends to tell them about Antique Radio Classified - it is the source to buy and sell!

CLASSIFIED AD DETAILS: Each subscriber is entitled to one free 20 word ad each issue. Additional words over the free limit are 10 cents per word. Enclose correct payment with ad, as we do not bill for ads. Ads must be received before the 10th of the month to appear in the following months issue. Late ads will be held for the following issue. Limit of two multiple insertions of same ad. Ads may be sent in advance, however each ad must be submitted on a separate sheet of paper, preferably a 3 x 5" index card. Publisher reserves the right to edit ads and is not responsible for errors due to illegibly written ads. **OPTIONS:** Shaded ads are available at a cost of 10 cents per word additional, including free words. Photo ads are \$5.00 each for half-tone charge. Allow extra time for processing of photos. B&W line-art drawings also accepted at a rate of \$1.50 per vertical inch, maximum width is 3½ inches. Custom ads made to order, send sketch of your ideas for quote.

WANTED: Vibroplex, Martin, United Electric, DeLaney, Boulter, Thomas, Albright and Bell telegraph keys. Neal McEwen, 1128 Midway, Richardson, TX 75081

WANTED: Chassis for G.E. K-50 . Also Philco Model 90 radio. Bill Lemoine (Phone 504-291-1261 nite)

FOR SALE: Heathkit V7 V.T.V.M, no manual; EICO 232 with manual, used, working - \$15 each plus shipping 5 pounds. Sel. rectifiers, N.O.S. boxed, most are Federal, 65 to 450 Ma., 20 for \$12 Ppd. SASE for parts and tube list. C.F. England, 98 Montague, Zanesville, OH 43701

NOTICE: During the last several issues A.R.C. has had to leave out many ads because of lack of space and tardiness on the part of subscribers sending in their ads in late. With this issue we have decreased the size of the type, thus allowing more ads per issue. Hopefully we should be able to get everyone's ad in, however, this DOES NOT guarantee your ad will be in an requested issue if it does not arrive before the deadline (or in some cases when all available space is used up). If most subscribers insist on sending their ads in late, we will be forced to move the deadline up a few days. Please send your ads in early! - GBS

WANTED: Dial plates for '33 Emerson Mickey Mouse radio and speaker for '39 Scott Phantom. Geo. Hausske, 1922 E. Indiana, Wheaton, IL 60187

WANTED:: Bluegrass Hardware Catalog or BelKnap Hardware catalog for research on the radio they sold, or any info you may have. Jim Seppenfield, 2101 Camargo, Louisville, KY 40207

FOR SALE: Tube sale - Radio & TV, new or used. Write for prices. **WANTED:** RCA 100A speaker. Van Etten, P.O. Box 141, Texarkana, TX 75504

WANTED: RCA 56X receiver with short wave band. Bob Becker, 17020 16th S.W., Normandy Park, WA 98166

FOR SALE: Atwater Kent speaker, model "N", Elec-Dyn - \$40. Harold Weinheimer, 504 Kreitzer, Bloomington, IL 61701

WANTED: Tangley radios, parts, information. Richard B. Jehlik, 8320 N. 28th Ave., Omaha, NE 68112

WANTED: Colorful Bakelite radios by all manufacturers! Also mirrored and novelty radios. Mark Honea, 13201 N.W. 81st St., Parkville, MO 64152

FOR SALE: Federal 110 - \$230; Music Master horn - \$100; early Dictograph horn - \$65; Bristol brass horn - \$90; Burns horn - \$125. SASE for upcoming list. Jerry Finamore, Eagle Rock Village, Bldg 25-3A, Budd Lake, NJ 07828

WANTED: Table top antenna. Have Zenith Rotor Wavemaster antenna and Radio Questionnaire game (Pat. 1928), SASE. Otto Nill, Grant Ave., Islip, NY 11751

WHAT IS IT?..

WHAT IS IT column is provided as a service to collectors to help them identify items in their collection which they would like to have identified by any of the readers of A.R.C. If you have any knowledge of the item pictured, please write to the person requesting help. If you have an item which you would like to have identified, send a B&W photo or sketch, along with a brief description of the item and what you would like to know about it.

WHAT IS IT? This vacuum tube is labeled "Manhattan Electrical Supply Co., Inc. - Bulb Number 18467. Is there anyone who could identify this tube as to what it is, and used for transmitting or receiving? (Herman Fothe, 10 Jackson St., Sloatsburg, NY 10974)

NEW YORK - Greater New York Vintage Wireless Association (GNYVWA) will hold a one-day Spring meet at "Voice of the Twenties" radio museum in Orient, New York. Date is Saturday, May 17th, starting at 9:00 AM. There will be a flea market, a small auction and, if practical, a contest. The radio museum will be open all day for visiting. Information - contact: Ralph Williams, RD1 - Box 44, Orient, NY 11957

MICHIGAN - Spring Swap Meet: Our spring swap meet will be held Sunday, May 18th, at the Cascades Park Clubhouse (the former Sparton Clubhouse - Kirby Road) in Jackson, Michigan. The theme of the meet will appropriately be Sparton. On display will be Sparton radios, advertising, etc., some of which will be from the fabulous Sparton collection of Karl Rommel. Please bring your favorite Sparton item for display. The meet will include a swap session, 50/50 raffle, and mini-auction. Starting time is about 8:00 AM. For details call Abe Lincoln at 517-629-2376

NEW YORK - Niagara Frontier Wireless Association meet Saturday, May 10th, Wilson (Buffalo), New York. See A.R.C. April issue for complete details or call 716-681-3186 for info.

CALIFORNIA - A.W.A. and Southern California Antique Radio Society meet, Saturday, May 17th. Located at the Lockhead Employees Recreation Club, 2814 Empire Ave., Burbank, California. Information: Floyd Paul, 1545 Raymond, Glendale, CA 91201

NEW YORK - ARRL Atlantic Division Convention May 16 and 17th, Fairgrounds, East Henrietta Rd., Rochester, New York. Will have A.W.A. booth in addition to one of the largest flea markets in the North-East.

NEW YORK - A.W.A. Spring meet and mini-auction, Saturday, May 3rd, American Legion, Route 5, Holcomb, New York. Information contact: Dexter Deeley, 8 Briar Circle, Rochester, NY 14618

The Antique Radio Club of America Inc.

KENTUCKY - *Antique Radio Club of America* (ARCA) will hold a convention at Louisville, Kentucky during June 11 thru 14, 1986. All interested people are invited to attend. This years convention features tours of radio collections, guest speakers, and a massive flea market where the collectors will be looking to buy or sell sets, parts, tubes, and associated literature. There will also be a large auction of similar equipment. Information on the convention and ARCA membership can be obtained by writing to ARCA, 81 Steeplechase Road, Devon, PA 19333 or calling 215-688-2976

INDIANA - The I.H.R.S. will have a meet on Saturday, May 31st. at Riverside Park, Logansport, Indiana from 9:00 to 3:00 PM. There will be a flea market, small contest, possibly an auction, and a great carry in dinner. Always more than enough good food to eat. For more info contact: Frank Heathcote, 1235 N. 3rd St., Logansport, IN 46947 (219) 722-3612

RADIO CLUBS - Please send notices of your upcoming events well in advance to be included in A.R.C.'s "COMING EVENTS" listings.

NOW AVAILABLE FOR RADIO RESTORERS - A HALF-WATT RESISTOR KIT

This kit of 5% tolerance, carbon film resistors, a total of 500, has been selected specifically for radio restoration. Both values and quantities have been chosen to follow as closely as possible those found in radios made from about 1926-1940, but are also useful for restoring newer radios.

CONTENTS OF THIS KIT
