Please, no classified ads by telephone, thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

Over the past decade, the name "Bunis" has become synonymous with "Price Guide" for most collectors of antique radios. Not only did Marty and Sue Bunis supply us with the first comprehensive and illustrated price guide to antique radios, but they also produced excellent updates every few years. In addition, they arranged a partnership with a good publisher — Collector Books — who gave the guides a broad distribution.

Needless to say, the Bunises' decision not to continue the price guides was greeted with dismay by the radio-collecting community. But, the good news is heralded by our cover and in our lead article by John Slusser. The fifth edition of *Collector's Guide to Antique Radios* is hot off the press due to the efforts of John and his staff at Radio Daze. As the proprietor of this successful vintage radios and electronic sales and service company, John knows the field well. It would be hard to find a better match for the Bunis guides.

Of course, from the beginning, collectors have been of two minds about these guides. On the one hand, they provide us with a guide to a fair selling price. On the other hand, collectors sometimes see "bargains" evaporating because the noncollector/seller now also knows fair prices. Misinterpreting Bunis prices as hard and fast, he may not realize that condition is important, and that he may have to sell at a wholesale price.

However, there are at least two overall good results from using the guides wisely: 1) A fair price is the most frequent outcome; and 2) The guide may alert the uninformed to the value of a set and thereby save it from the salvage heap.

Will the reference to the guides change from "Bunis" to "Slusser"? Only time will tell. Meanwhile, John will no doubt continue the Bunis tradition of putting much effort into compiling the information so vital to collectors. Collectors and noncollectors alike can now continue to get an idea of fair prices in an ever-changing market.

Two articles this month are about companies that share a commonality. Wally Worth's Haynes-Griffin and Richard Arnold's Allied/Knight receivers are from companies who offered both ready-built and kit sets. In the early 1920s, building home brews was a common activity among experimenters, and Haynes-Griffin sets were among the most popular. In fact, they were so popular that Clapp-Eastham manufactured Haynes sets and sold them as built sets.

By the late 1930s, Haynes-Griffin and Clapp-Eastham were long gone. Allied had become a prominent parts house and the distributor of complete radios, as well as kits. So, the choice for experimenters lingered on — buy a complete set or build your own. Richard writes about an interesting, 7-tube Allied/Knight AC/DC, 2-band set with a tuning eye.

Early radio is full of such connecting threads. We're grateful to Wally and Richard who frequently call our attention to sets that fill a small void in radio history.

Once again Erwin Macho gets the prize for the most unusual set in *Photo Review* — a Japanese Geisha crystal set, which is tuned by moving the head. A rare,

1922 Magnavox 2-tube amplifier is also shown, along with an unusual cone speaker and an Emerson clock/radio that is actually just a clock.

The annual Harris Vintage Radio Auction is always a successful event. Richard Boellstorff reports that 28 states were represented by 133 bidders. Proceeds amounted to over \$50,000, with more than 125 Zeniths boosting the sales. We commend Richard for his comprehensive listing and for the outstanding photos.

Eric Wrobbel is well known to collectors for his series of eight books on transistor radios. In this issue, Ray Bintliff reviews Eric's video on restoring pocket radios, a collaboration with Ron Mansfield, a collector and videographer. Ray found the information to be of real practical value.

John Leming's old photo of an electric shop in Kentucky is another example of the little gems that are apt to show up in anyone's attic. A photo that has been found, kept and identified can be the source of a great story. We urge you to scrounge through those family albums to see if you have something to share with us.

Ray Bintliff and I brought back enthusiastic responses to our trip across the pond to the National Vintage Communications Fair (NVCF). It then fell to Managing Editor Dorothy Schecter to put together a comprehensive report. This is an outstanding show with over 300 exhibitors and more than 2,300 buyers in a facility that is truly enviable. We suggest that you find any excuse for a trip to England in September for the next fair.

Radio Miscellanea includes responses inspired by our June 2001 issue. A suggestion that writers supply us with more TV articles jogged Alton DuBois' memory about two unique, but short-lived sets. A second response is very informative on the subject of house brands. And how about recycling a hair dryer as a safety device for protecting AC/DC radios? Collector ingenuity seems to have no limits.

The Internet. Tapping into our Web site has become a daily activity for collectors of old radios. Access the ads on the target date, renew your subscription, order books, and link to other sites.

Coming Radio Events. The focus this month is on the Ralph Muchow Estate Auction on August 3-5 in Elgin, Illinois, held in conjunction with Radiofest XX, August 1-3. Among the 40 other events this month are the Museum of Radio & Technology's Summer Heat Show & Auction in West Virginia on August 11, and the IHRS Summer Meet on August 25 in Indiana.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

On our cover this month is a work by Jim Daly entitled "Radio Daze," which adorns the cover of the *Collector's Guide to Antique Radios, Fifth Edition* by John Slusser. Limited edition prints are available from Mill Pond Press 1 (800) 535-0331. The boy in the picture is, indeed, in a daze — perhaps fantasizing about the world to which radio connects him.

WITH THE COLLECTORS

Carrying on with a Classic Collector's Guide to Antique Radios, Fifth Edition

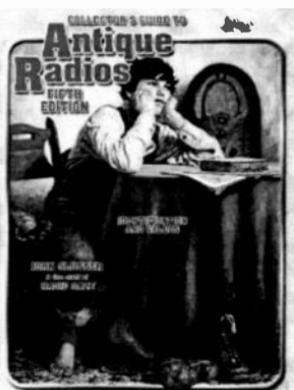

BY JOHN SLUSSER

The good news is that work of Marty and Sue Bunis has been carried on by John Slusser in a 5th edition of the well regarded "Collector's Guide to Antique Radios." Long the proprietor of Radio Daze, known for its sales and service of vintage radio and electronics equipment, John tells the interesting story of how he became an author. (Editor)

I guess I have been fascinated with the world of antique radio ever since I was in my early teens. My father, sensing a budding interest on my part in electronics, brought home an old GE console carcass for me to putter with. Although it had no cabinet or dial glass, I thoroughly enjoyed the challenge of getting the set working again. I spent hours in my darkened bedroom, mesmerized by the glow of the radio's tubes and enchanted with the ability to listen to the whole world on shortwave.

During a subsequent visit to my grandfather, I proudly told him about my GE radio. Later that day, he presented me with an Atwater Kent 84 cathedral that had been stored in his attic for many years. Although a bit dusty, it was an absolutely gorgeous radio, and the fact that it was my grandfather's made it very, very special to me. Upon reflection, I believe it was that day that my passion for radio and electronics was solidified for life.

During the balance of my high school days, I eventually accumulated a collection of antique radi-

os. Only occasionally did I test my mother's almost endless patience with having a house full of radios. Unfortunately, with the advent of high school graduation, leaving home for college in pursuit of an electrical engineering degree, and the other challenges and interests of young adulthood, I soon found little time available for my interest in radio. With space always at a premium in apartments, etc., I ultimately disposed of most of my collection.

After receiving an electrical engineering degree, I soon found myself caught up in the exploding world of computers and telecommunications. Years quickly passed by, marriage and children came along the way, and antique radio was relegated to just a fond memory. I was eventually blessed with success in a high-tech business that I had started in the early 1980s. However, with that success came a shift to a role in executive business management and more and more separation from a hands-on technology role.

RETURNING TO RADIO

About ten years ago, I began to look for a relaxing diversion from my management role and thought of the fun I had had with radio in my teens. It had been over twenty years since I had been involved with radio, and, after years engrossed in the world of digital electronics, I had no idea if there still was any appreciable interest in antique radio.

From A Collector Books Press Release

Radios of all types, styles, and ages can be found in most every antique store or flea market. There are now thousands of diehard collectors searching for these beautiful and often colorful radios. Radios are part of our memories and bring nostalgia into our modern day. John Slusser, well-known collector and proprietor of Radio Daze, a radio service and sales company, has compiled this heavily revised edition of our popular series with the help of his staff. Filling the need for an easy-to-use complete price guide to these collectibles, *Collector's Guide to Antique Radios, Fifth Edition*, gives descriptions and current values for over 5,000 models. Most other guides just list radios by model number — our guide gives com-

plete descriptions of every radio along with full-color photographs and information about the companies. The informative text provides explanations for the many confusing terms and abbreviations used in the radio field. Listed alphabetically by company, the radios are accompanied by current collector values. The book is devoted to the golden age of radios, the 1920s through the 1950s. Although the majority of these radios have long since vanished, often due to the expansion of television, many still remain as "living" examples of the quality and charm of products from this period. This book is loaded with detailed information needed to help eliminate the static for collectors everywhere. You need to tune into this one!

Radio Daze show room.

I decided to search for books that might be available on the subject and soon found a copy of the first edition of *The Collector's Guide To Antique Radios* by Marty and Sue Bunis in an antique shop. I was fascinated by the book and excited to learn that the world of antique radio was indeed alive and well.

It wasn't long before I found myself looking for radios at garage sales, flea markets, auctions, antique shops, and the classifieds, and carrying the *Collector's Guide* for reference everywhere I went. As my new collection started to grow, the *Collector's Guide* became more and more tattered from constant use. Soon, I learned a second edition of the *Guide* was available; I quickly purchased a copy and retired the first edition.

Over time, I found the *Collector's Guide* was an invaluable portable reference source. I was always amazed at the number of people who carried copies of various editions around at radio meets, auctions, and other events. It was funny to see that most of the copies were at least as worn from use as mine.

Before long, what started out as a search for a relaxing diversion turned into an absolute obsession with antique radio. I have since accumulated several hundred radios, and it could be easily said that I never saw a vintage radio that I did not like.

My good fortune in my high-tech enterprise provided me with the flexibility essentially to "retire," from the hectic business rat race and devote most of my time to the antique radio world. In the mid-1990s, I started Radio Daze, in Upstate New York to service and sell classic radios of the 1920s-1950s. Today, Radio Daze is on the Internet, offers a wide range of components and supplies for radio repair and restoration, and is staffed by a team of passionate antique radio enthusiasts.

BECOMING AN AUTHOR

I must admit a bit of melancholy when I learned that Marty and Sue Bunis had decided to pursue other interests and not continue with the *Collector's Guide*. I reflected upon the day I found the copy of the first edition and how that event had reinvigorated my interest in antique radio. I also recalled the many, many times I had carried one or more editions of the *Collector's Guide* on my quest for radio treasures. Would anyone continue with the Bunises' work, I wondered?

I had met and talked with Marty several times over the past few years at various radio functions, but we never really discussed much about his efforts with the book. My curiosity overcame me, and I contacted

Radio Daze listening room.

Marty to find out more about how he and Sue went about putting the *Guide* together.

I learned that they had quite an elaborate card file system with a great deal of descriptive and pricing information accumulated over the years. They also had an extensive catalog of radio photos that they had taken and that others had gladly contributed to their efforts. The more I learned, the more I began to think about perhaps, just perhaps, carrying on with the *Collector's Guide* with my team and myself here at Radio Daze.

Well, to make a long story short, we were hooked and have now finalized the fifth edition of the *Collector's Guide*. Early in the process, we set some important goals for the new edition. First, we wanted to maintain the quality and integrity of the work that Marty and Sue had done over the years. Second, we wanted the content and format of each existing radio listing to be as consistently detailed as possible.

Wherever possible, missing information on tubes, knobs, types of reception, power sources, etc. is being added. Pricing information is being updated to reflect current market data and trends. Additional radio listings and many new photographs are also being included. Of particular excitement to us is the new section on the radios of E.H. Scott, the focus of our personal collecting passion.

Our efforts on the fifth edition of the *Collector's Guide* have indeed turned into a labor of love. It has been most interesting to take such a close look at the hundreds of manufacturers that were involved in the "Golden Age of Radio" and the thousands and thousands of models that they produced. I am sure that many more are yet to be discovered and catalogued in future editions of the *Guide*.

Certainly it has taken a lot of work, and we now have a great appreciation for all of the efforts that the Bunises put into earlier editions. We also have appreciated the patience of the good folks at the publisher Collector Books, while we have conducted our research, etc. Our fondest hope is that the antique radio community will find the new *Guide* interesting and informative and up to the standards of the classic editions of the past.

(John Slusser, Radio Daze, 7 Assembly Dr., Mendon, NY 14506)

"Collector's Guide to Antique Radios, 5th Edition" is available from Collector Books, P.O. Box 3009, Paducah, KY 42002-3009, A.R.C., and other A.R.C. advertisers for \$19.95. Be sure to check suppliers for shipping information.

WITH THE COLLECTORS

The Haynes-Griffin DX Receiver

BY WALLY WORTH

While the name Haynes-Griffin is probably familiar to collectors of early battery sets, other readers may not know this company. For the benefit of all, Wally Worth writes about the company and its Model DX receiver. (Editor)

The Haynes-Griffin Radio Service Co., Inc., was in business in the early days of radio, about 1922 or 1923. The company made kit sets, including the DX receiver and, later, superheterodyne receivers.

Artemis J. Haynes had been in the vanguard of radio since 1917 when he was in the Naval Reserve and attended the Brooklyn Navy Yard Radio School. He became an instructor of the first principles of radio at Yale University. In addition, he worked for the De Forest Radio Co. as an engineer, and during 1920-1921, he operated the De Forest experimental station at Highbridge (2XG), along with Robert F. Gowan at 2XX.

HAYNES-GRIFFIN RADIO SERVICE CO.

In 1922, Haynes opened the Haynes Radio Shop, a small store on Lexington Ave. in New York City. Shortly after, a Mr. Griffin joined the firm to assume the position of President, as his expertise was in advertising and merchandising, whereas Haynes was the technical expert.

The company then purchased the Lexington Radio and Electric Co., along with the stock and entire personnel. This merger made the Haynes-Griffin Radio Service Co. the oldest and best in New York City, with 4,000 square feet of space devoted to the

sale and repair of radio apparatus. The firm, located on 41 West 43rd St., advertised itself as "New York's Largest Radio Store."

THE DX RECEIVER

A.J. Haynes was the developer of the single tube receiver he called the DX. He claimed that his circuit, using the same two components (variocoupler and variable condenser) as in others, was more sensitive and gave sharper tuning. I found an original list of 41 stations received in 1926 in the cabinet of my set, a fact which certainly lends credence to his statement.

In 1923, *Popular Radio* magazine ran two articles, written by Lawrence Cockaday on the set — "How to Build the Haynes DX Receiver" and "How to Build the Haynes 2-Tube Amplifier." Parts lists and cost of parts were included. Each article gave \$15 as the cost of parts, along with extensive panel layouts and wiring instructions.

The set shown in Figure 1 is from my own collection. Bought about 15 years ago at a local flea market, it came quite complete with three WD12 tubes, knobs, station cards, etc. This set has a nicely engraved separate panel on the 1-tube receiver section, showing "Haynes Tuner" and below that, "Clapp-Eastham Co." as the manufacturer. Figure 2 shows this set from your editor's collection.

Note that the front panel of my set is divided into two parts — one for the receiver and an entirely separate panel for the 2-tube amplifier. The amplifier panel is not engraved and is connected to the

Figure 1. The Haynes-Griffin DX receiver.

Figure 2. Closeup of the 1-tube receiver section. (From the John V. Terrey collection.)

receiver panel by the usual multiple binding post assemblies and tie bars.

The solid walnut cabinet apparently is a factory product, as evidenced by the excellent workman-

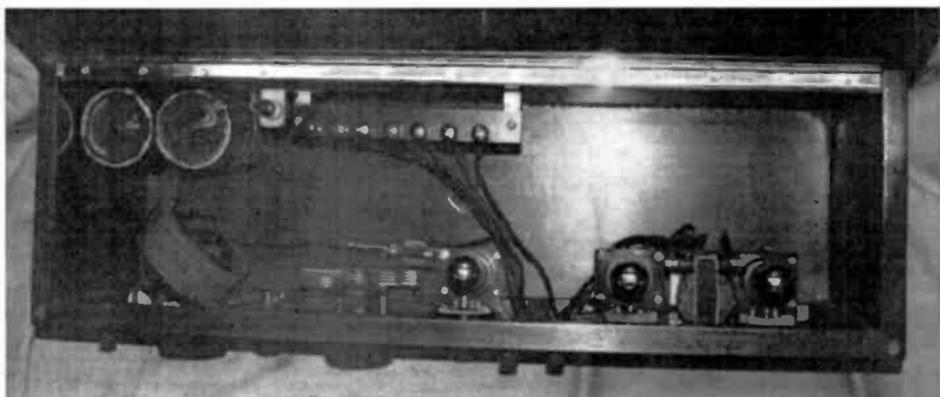

Figure 3. A view of the internal workings of the Haynes-Griffin Dx receiver showing the layout of the components.

ship and the use of a long brass piano hinge on the cabinet lid.

Figure 3 shows the layout of the internal parts revealing the Haynes variocoupler, the Haynes variable condenser, and the two Haynes audio frequency transformers, all as originally specified in the parts lists.

I believe the receiver portion is from the Haynes factory because of the engraved names and knob markings. However, the amplifier portion, having no engraving, could have been added later and then put into the cabinet. All done in a nice fashion, I might add.

Later articles in *Popular Radio*, written by L.C. Cockaday probably around 1926, gave instructions for building Haynes superheterodyne receivers.

Concerning the use of the Clapp-Eastham name on the receiver panel, I wonder if this indicates the origin of the Haynes parts in the set. Probably so, as the two audio transformers certainly look like Clapp-Eastham type units.

I believe that this set is quite rare, as Haynes certainly didn't make very many of them in the short time he was active.

Are there any more of these Haynes-Griffin combination receivers out there? I would welcome any

response to compare parts or the layout of other sets.

(Wally Worth, 2 W. Elm Ave., Wollaston, MA 02170.)

At age 15, Wally Worth began saving his paper money to buy parts to build 1-tube sets. Fifty years later, he started to collect anything that needed cabinet work. His diverse collecting tastes include crystal sets, 1920s battery radios, early AC sets, transistor and multiband sets, novelty radios, tubes, and both horn and cone speakers.

Building the Haynes Receiver & Amplifier

COMPILED BY RAY BINTLIFF, W1RY
FROM POPULAR RADIO, SEPT. & OCT. 1923

The September and October 1923 issues of *Popular Radio* included articles on how to construct the Haynes receiver and a companion audio amplifier. The figures shown on the following page have been reproduced from those magazines.

THE RECEIVING SET

The receiver is a 1-tube regenerative set for which the author, Laurence M. Cockaday, claims better selectivity than the customary regenerative set. Cockaday attributes the improved performance to the set's variocoupler arrangement. As Figure 1 shows, the variocouplers'

(Continued on following page)

WITH THE COLLECTORS

A Knight 7-Tube AC/DC Radio

BY RICHARD ARNOLD

Ever the careful shopper for antique radios, Richard Arnold is lucky enough to have a friend in the right business — an antique shop. Once again, he has found a set that inspires research in determining its history and its value. (Editor)

A friend who owns an antique store in Ardmore, Oklahoma, got the Knight radio, shown in Figure 1, in a trade with a customer. He held onto it until I came by on my weekly rounds. When he showed it to me, I was a little skeptical, as the Knight brand was hardly popular, let alone a collectible one. It was, however, a nice looking example of a 1930s wooden-cased radio and it had a tuning eye. So I asked him how much he wanted. He replied that he had to get \$45 for it.

I looked it over carefully. It was in excellent condition, it played, and I did not have a radio with a tuning eye in my collection. Also if the tuning eye tube was good, it would be worth almost as much as the asking price for the radio. When I offered him \$40, he said "OK." Now I was the owner of a mysterious Knight radio that I knew nothing about. How was I to find out more about this radio?

I knew that Knight was the brand name for radios sold by Allied Radio Corp., Chicago, Illinois. Then, I remembered getting Allied Radio catalogs in the mail back in the late 1950s when I was growing up in Brookfield, Illinois. But I really never paid much attention to them. I also recalled seeing Allied Radio ads in *Radio News* magazines from the 1930s.

While going through my March 2001 issue of *Antique Radio Classified*, I noticed Al Bernard's ad for out-of-print manuals that mentioned Allied Radio catalogs. I sent him a photo of my radio and asked for help in identifying my set. He responded with a photocopy from a 1938 Allied catalog that shows a radio that is similar in appearance to mine but with a different tube complement and lacking the tuning eye. Another radio shown had a tuning eye and the same tube line up as my radio, but its cabinet and speaker grille were different.

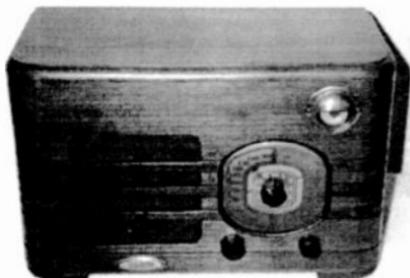

Figure 1. Knight/Allied 7-tube AC/DC radio.

However, an Allied Radio catalog for the spring and summer of 1937 brought my answer. It shows a Model A9705, which is my set. See Figure 2. The only difference is the location of the oval-shaped "Knight" nameplate.

The Model A9705 tunes the BC band and a short wave band (175 to 75 Meters). A 7-tube superhet, it uses the following tube types: 6A7 1st detector/oscillator, 6D6 IF, 75 2nd detector/1st AF/AVC, 25L6 AF output, 25Z5 rectifier, 6G5 tuning eye and L49C ballast. The radio uses a 5" electro-dynamic speaker. The left side of the colorful dial is green and is calibrated for the BC band. The SW scale on the right is red. The center of the dial is calibrated from 1 to 12 like a clock and seems to be purely decorative. The cabinet is finished in two-tone walnut and measures 12 1/2" x 8" x 7 1/4". The radio plays well and is quite selective even though it lacks an RF stage — a good buy in 1937 at \$15.25.

(Richard Arnold, P.O. Box 275, Lone Grove, OK 73443)

Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. Primarily made up of cathedrals and 1920s battery sets, his collection also includes crystal sets and a 1928 Bosch in a Pooley cabinet. The 1932 JB Peter Pan featured in the June 1991 A.R.C. is his prize.

Figure 2. The Knight 7-tune AC/DC, 2-band superhet, catalog number A9705, from the Allied Radio Corp. Spring and Summer 1937 Catalog.

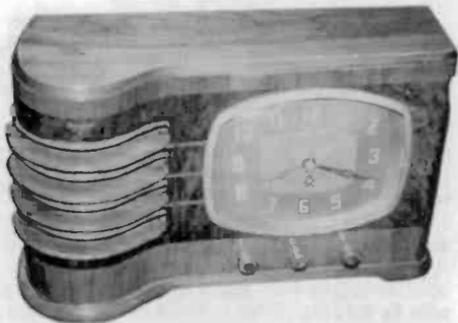

PHOTO REVIEW

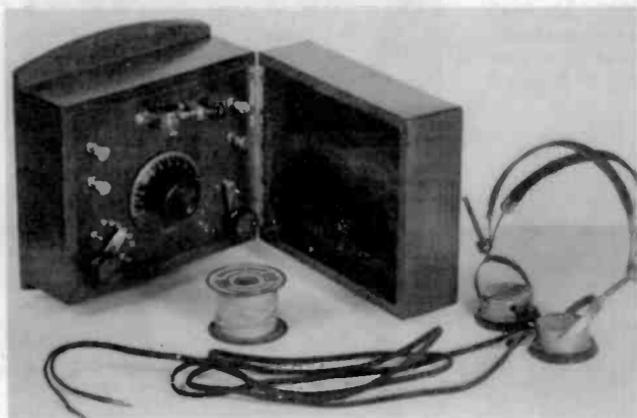

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

STERLING VARITONE MODEL R2 SPEAKER – This magnetic speaker is 11" tall and came in a very heavy metal case. The case is a greenish-bronze in a light wrinkle finish, and behind the grille is a silk cloth. In 1926, this speaker sold for \$14.70. (*Wally Worth – Wollaston, MA*)

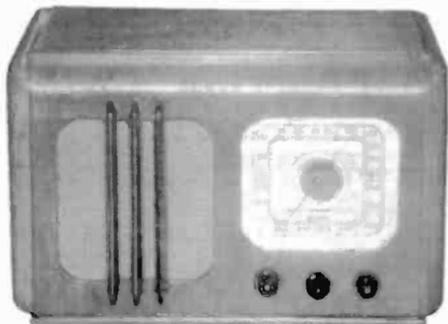

EMERSON CLOCK (RADIO) – Although this item is styled after the Emerson Models 167, 173, and 214, it is in reality a clock in a miniaturized Ingraham cabinet; it is not a radio. The Emerson logo appears just above where the speaker would be, and the Ingraham tag is on the bottom. The dial face reads, "Emerson Radio and Phonograph Co." The clock assembly indicates it was made by the Ingraham Co. (*Ed Cook – Vancouver, WA*)

HOME-BREW CRYSTAL SET – I designed and built this catwhisker type crystal set using old antique parts. Housed in an old meter case, it works very well with a pair of Western Electric headphones. (*Joseph Wood – Hodgkins, IL*)

PHOTO REVIEW

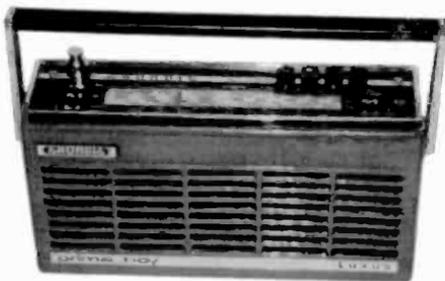

TRAV-LER MODEL 627 - This set, manufactured in 1938 by the Trav-Ler Radio Company of Chicago, has a wood cabinet. The original dial trim and glass are missing. (Michael G. Comer - Haslett, MI)

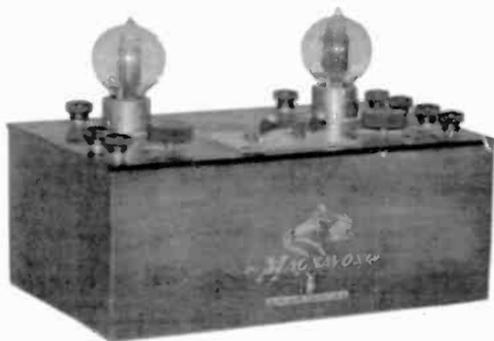

NOVELTY GERMANIUM CRYSTAL SET - This is one of the most unusual sets in my collection. It is a crystal receiver with Japanese Geisha design that tunes by moving the head! It is of wooden construction and comes with two earphones. (Erwin Macho - Vienna, Austria)

MAJESTIC MODEL 15 - This 1932 AC tombstone radio uses the following tubes: (2) Type 24A; (1) Type 35; (1) Type 47; and (1) Type 80. (Clark Trissell - Lincoln NE)

GRUNDIG PRIMA-BOY LUX - This is a fine transistor portable of the late 1960s. It has no AC power cord and operates only on batteries. It receives the following European ranges: UKW, KW, MW, and 49m. (Erwin Macho - Vienna, Austria)

MAGNAVOX TYPE AC-2, MODEL C AMPLIFIER - This 2-tube amplifier, found locally, is signed "Chas. H. Humphreys - Macon, GA" and is dated 1922. The tube sockets have double bayonet slots for either Type 01-A tubes or WE tennis ball types as shown. (Joseph G. Jackson - Macon, GA)

AUCTION REPORT

Harris Vintage Radio Auction Marshalltown, Iowa — April 7, 2001

REPORTED BY JIM BOELLSTORFF

The 11th annual antique and collectible radio auction was held at the Gene Harris Antique Auction Center in Marshalltown, Iowa, on April 7, 2001. More than 680 lots of antique radios and related items were ready for the 133 registered bidders that blew in — literally, as wind gusts were in the 40 to 60 mph range in the morning — from 28 states for the sale. The auction was called by Tom and Gene Harris.

The theme for this auction was Zenith. More than 125 Zenith radios were consigned by Martin Blankenship from his private collection. Many of these sets had been featured in the book *Zenith Radio — The Early Years* by Cones and Bryant. Mr. Blankenship issued a certificate of authenticity for each of his sets featured in the book. Also, each of his sets had been neatly tagged indicating any known problem and whether the set had been refinished and/or electrically restored.

Some highlights from the sale: A beautiful Zenith 12S370 console selling at \$950; a Musicaire MD16 (with a small crack) red, marbled Catalin at \$950; and an excellent Atwater Kent 10A breadboard at \$900. There were over 55 novelties selling from \$1 to \$70; 33 boxes and flats of various tubes were sold from \$1 to \$35; and 21 box lots of literature including three incomplete sets of Rider's manuals sold from \$2.50 to \$150.

Not many battery radios are showing up at consignment sales. If it were not for a morning of the sale consignment from Memphis, Tennessee, there would not have been a single breadboard offered! In general, the quality of the radios was quite good.

The sale was well advertised in periodicals and mailings, and on the Harris Web site. Even without many early battery radios, the sale grossed over \$50,000. Without doubt, it reinforced the benefit of early consignment and widespread advertising. Next year's auction will be April 6, 2002.

The following listing is a selection of lots from the auction. A 10 percent buyer's premium is not included in the prices. Some model numbers may

A collection of TVs. Top Photo: an Emerson 639 selling at \$145; a Pilot 3, at \$450; an Admiral 17T11, at \$130. Bottom Photo: a Motorola 10VK12R selling at \$95; an Admiral 30A14S, at \$60; and an Admiral 22, at \$300.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

VIDEO REVIEW

Restoring Pocket Radios By Eric Wrobbel & Ron Mansfield

REVIEWED BY RAY BINTLIFF

What better way to demonstrate restoration techniques than a video tape? This review describes the content and usefulness of "Restoring Pocket Radios." (Editor)

Restoring Pocket Radios is a 60-minute video tape that covers the basics of restoration and repair of small transistor radios from the '50s, '60s and '70s. It is comprised of two parts. "Part One" features professional restorer Eric Wrobbel and covers the cosmetics of radio restoration and repair. In "Part Two" collector and videographer Ron Mansfield delves into the electronics of pocket radios.

PART ONE

Wrobbel draws upon his extensive experience and provides practical information on such tasks as cleaning, polishing and filling cracks in radio cases. Figure 1 illustrates a typical cleaning operation. He has a neat trick for removing stubborn knobs as well. He provides guidance in the selection and use of sanding and polishing products. He cautions the viewer about excessive sanding and emphasizes the need for care when performing any work on radio cases so that additional damage is not incurred.

The lettering and decoration used on many pocket radios show evidence of wear. Techniques and products used to restore lettering, logos and decorative trim are covered in this part of the tape. Electroplating is one of the methods mentioned. Although the materials needed for electroplating are shown, the actual plating process is not demonstrated.

Not all repairs are practical, and Wrobbel discusses some examples of radios that are best left as-is. Although the tape centers on

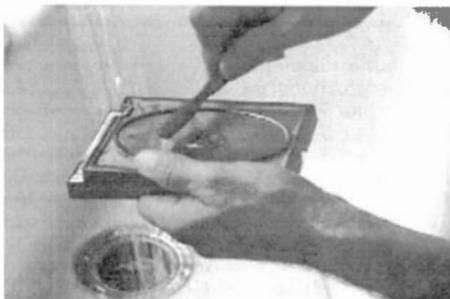

Figure 1. This cleaning operation is demonstrated in the video.

pocket radios, the information about repairing, cleaning and polishing radio cases can be applied to plastic cabinets used with larger radios.

PART TWO

This part covers the repair of the electronics in pocket radios. It moves at a quicker pace than Part One and begins with a look at essential hand-tools and test equipment used to troubleshoot and repair pocket radios. But again, these instructions can be applied to any transistor radio of simple design.

The video shows some examples of the basic test equipment that is needed. As Figure 2 shows, inexpensive Heathkit instruments will do the job nicely. However, Mansfield indicates that a contemporary multimeter, capable of measuring current, would make a nice addition to the test gear.

The tape identifies the various components used in small transistor radios with emphasis on the variety of transistors used. Remember the early sets that used plug-in transistors and sockets?

Some typical test and repair operations are demonstrated including cleaning noisy volume controls, repairing speaker cones, signal tracing, using a test speaker, and alignment.

A one-hour tape can not possibly include a course in radio theory. But, Mansfield does manage to include a brief overview of the circuit functions in TRF, superhet and reflex radios. He supplements this coverage with some suggestions for literature that covers the theory and

Figure 2. The equipment required for electronic testing of transistor radios need not be elaborate. These inexpensive Heathkit units will do the job.

servicing of transistor radios. Sources of service notes and schematics, such as Sams, are covered, as well as sources of materials and replacement parts.

SUMMARY

This video tape has been prepared for the collector with a yen to do some repairs. It is basic, but coupled with the suggested reading material and service notes should allow a beginner to gain experience and have the satisfaction of performing his or her own repairs. Even the more experienced collector may learn of a new technique or material to make restoration easier.

The production quality of the tape is very good. The camera work is impressive with close-ups that are clear and in focus.

The tape sells for \$24.95 and is also available in PAL format at a small additional cost. It may be ordered directly from www.ranmansfield.com or from Antique Electronics Supply at (480) 820-5411 or www.tubesandmore.com. Be sure to check with the suppliers for ordering and shipping information.

Glass's Electric Shop — 1926

CONTRIBUTED BY JOHN LEMING

In December 1926, my grandfather, Mark Leming, was a salesman in Glass's Electric Shop, located on Main St. in Williamstown, Kentucky. I myself worked in the store for several years. This photo pictures my grandfather behind the counter of the shop. An enlargement of the photo viewed under light enabled me to identify many of the items around him.

Most obvious is the early version of a Kolster 6D to his left on the counter. The later version of this set had a redesigned dial plate and was introduced in 1927. Directly behind him are several horns and speakers, which some readers may be able to help identify. The shelves are lined with numerous boxes of Mazda lamps, tubes, and headsets.

Directly above Mr. Leming's head is a Mazda and Westinghouse lamp chart, and sitting on a shelf, at his right shoulder, is an RCA Radiola 20. At the end of the counter is an All American Mohawk "Cherokee."

This was obviously a multipurpose shop as a Santa poster on the rear wall urges Christmas shoppers to "Give Something Electrical." A good suggestion was the mechanical phonograph (note the crank) well placed below the poster.

Perched on a stove, rear left, is a stand-up poster featuring a large light bulb and the words, "Good lighting aids housework." On the wall above is an RCA Radiola 20 poster, which reads, "RCA Tried, Tested, Perfected."

The other offerings included stoves lined up on the left, and according to the wall sign above, Easy washers. The sign reads in part "washes drier." Could the housewives of 1926 have dreamed of a day when clothes frozen on a line were a thing of the past? As always, old photos evoke a bygone era and make us wish we had asked more questions about our family's past.

(John Leming, 5 Sturbridge Dr., Cold Spring, KY 41076)

MEET REPORT

National Vintage Communications Fair Birmingham, England — April 29, 2001

BY DOROTHY SCHECTER FROM INFORMATION CONTRIBUTED
BY JOHN V. TERREY AND RAY BINTLIFF

Our resident collectors here at A.R.C. have reported that it was a great pleasure to attend Jonathan Hill's 15th National Vintage Communications Fair (NVCF) in Birmingham, England, on April 29, 2001. Next year will be the 10th anniversary of this popular event, which in earlier times took place once a year, but has grown into a semiannual affair. The next show will be on September 23, 2001, as usual in Hall 11 of the National Exhibition Centre (NEC). It is well worth fitting into your travel plans abroad.

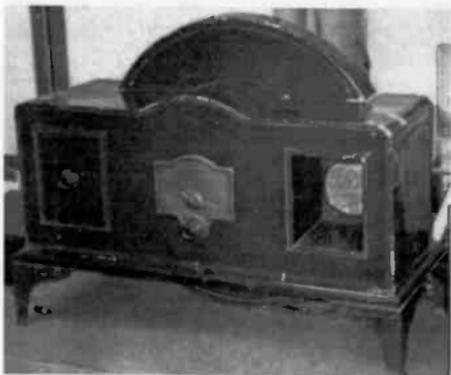

ORIGIN OF THE FAIR

Jonathan Hill, a founding member of the British Vintage Wireless Society, does a great job organizing this event. Ten years ago, Jonathan had an idea that a show covering radio and related fields would be a way to gather fellow collectors in one place for a day of exciting interaction about their avocation. The list of "related fields" is long and includes early TVs, telephones, Post Office items, records, tape recorders, crystal sets, loudspeakers, gramophones, phonographs, classic valve audio and Hi-Fi, scientific instruments, transistor radios and all electrical and mechanical antiques and collectibles.

What a success Jonathan's idea has become! This year's attendance of nearly 300 vendors set a new record, and the eager buyers numbered about 2,500.

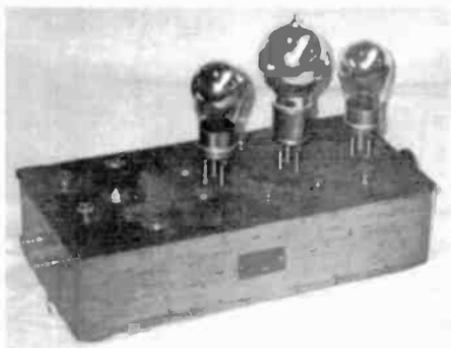

Jonathan Hill with an early British set enjoying the fruits of his labor as the event organizer.

An item in the British Vintage Wireless Society display — the Baird "Televisor" reception set, labelled, "Price Complete, Finished Brown Metal Casing. Artistically Lined. £26.50."

1924 Marconiphone Model VI, a 1-valve battery receiver for headphone use, tuning from 300 M to 4600 M in six bands.

An early 3-tube amplifier.

This SNR Excelsior from the 1950s has a tuning eye. On the back, it is marked, "Amplificateur G.P., Brevets S/F."

Jonathan is well known for his comprehensive book on radios of Britain — *Radio! Radio!*, now in its 3rd edition. His more recent book, *Audio! Audio!*, covers hi-fidelity amps and control units from the 1950s and 1960s — hi-fi's "Golden Age."

DISPLAYS

In addition to over 300 tables for vendors, recent shows have included a special exhibit area. This year, the area featured Roberts Radio, Ltd., a leading British radio manufacturing company and a household name. A retrospective display of over 35 Roberts historic products from the early 1930s to today's Classic 2000, the world's first digital portable, drew much attention.

The British Vintage Wireless Society (BVWS), marking its 25th anniversary, also had a large exhibit of working vintage radios and television sets, transported by members from all over the country. Among the many interesting items were two operating TV displays. One was an early British 1950s set operating on a 405-line system, making an interesting comparison to today's British 625-line or U.S. 525-line resolution systems.

The other item was an early 1930s, 30-line operating Baird TV receiver with a modern camera modified to supply the vintage TV signal.

A World War II German Enigma 3-rotor code machine.

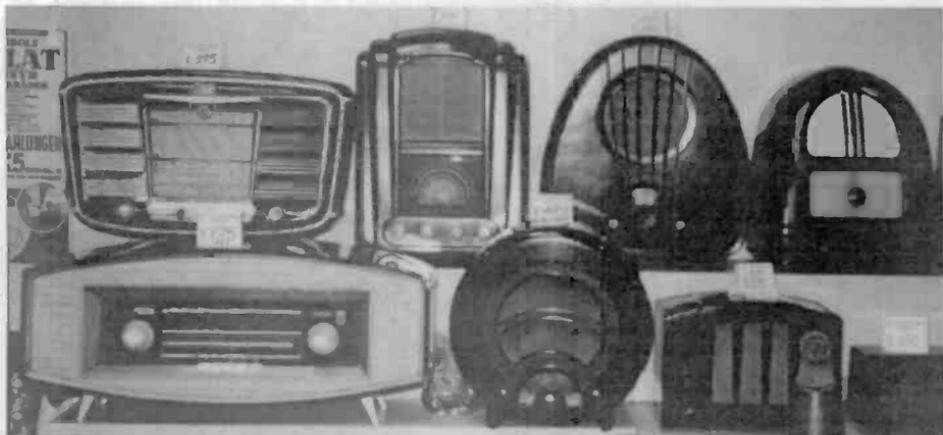

Browsers were amused to see themselves suddenly appear on the TV screen as they passed by.

As indicated by the radio-related list, this is truly a "communications" fair. Among other things, a large number of distinctive looking gramophones and telephones were in evidence. One outstanding item was a Polyphone musical device in a huge cabinet that was actually playing music. And to an American collector, it was a surprise to see so many American sets offered — far more than the European sets seen at U.S. shows. A Philco, an Atwater Kent cathedral, a Clarion, a Trans-Oceanic, and several Atwater Kent breadboards come to mind.

THE FACILITY

The National Exhibition Centre (NEC) in Birmingham would be the envy of any American city. It is a huge complex, and Hall #11 where the fair was held resembled an aircraft hangar, according to one description. The complex includes about 20 different halls under one roof, as well as a concert hall, all circled by ample parking. In a courtyard area is a small lake, woods and flowers, and a Hilton Hotel. The facility is within

(Continued on following page)

Micky Shephard's well-stocked and beautifully arranged stand is always an attraction. Top row left, a Red Star radio sits among several other European sets. Your editor also visited Micky's shop, Pedigree Collectables, in the Portobello Market, London.

(NVCF, continued)

walking distance of the Birmingham train station and a short shuttle ride to the adjacent airport.

In all, NEC offers everything a radio vendor could want, including the privilege of actually driving into the building and unloading his wares at his stall! Though the NVCF occupied only one of the halls, it was large enough for 300 exhibitors filling about two-thirds of the room, plus a cafe, food stalls, a coffee bar, and, of course, a pub. The pub lingers in our two attendees' minds as one of England's great gifts to the world. The availability of good pub food and drink made this event even more special.

Early admission to the hall was at 8:30 A.M., but vendors could buy and sell among themselves starting at 6:00. Some American collectors might call this whole arrangement a "radioman's dream."

In spite of the mad cow disease scare and the hoof and mouth disease catastrophe, Jonathan has sent word that "Britain is still open for business." And from the point of view of attendees at NVCF, a well organized, thoroughly enjoyable business it is!

Travel hints: hotels don't always supply face cloths, traffic signs are sometimes unusual — "Traffic Calming Ahead" — and the Portobello Flea Market on Saturday morning in London is a must for collectors.

BVWS Radio display item — a Pye MKIII studio TV camera head.

Two Atwater Kent breadboards, priced at the U.S. equivalent of \$1,650 and \$1,200 by vendors Brian Chesters and John McGlynn of Vintage Technology, sponsors of the May Blackpool Vintage Fair.

(Dorothy Schecter, c/o A.R.C., P.O. Box 2, Carlisle, MA 01741)

RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

More on House Brands

Dear Editor:

Regarding the Truetone D-731 in the June 2001 *Photo Review*, I believe that Western Auto, along with other retailers of the time (and now), never "produced" anything. This Truetone is similar to the Belmont radios of the era because it is a Belmont with a Truetone nameplate attached. Belmont made house brands for many retailers, among the more famous being Western Auto and Montgomery Ward. I suspect that they may have made radios for Firestone and Silvertones for Sears.

Montgomery Ward's Airline radios made by Belmont frequently had the letters "BR" (Belmont Radio) in the model number. They may also have had "WG" for Wells-Gardner in the model number.

Truetone never identified the maker in the model number to my knowledge, but the letters "BR" or "WG&Co" could often be found on the tube layout label or elsewhere.

Belmont and Wells-Gardner & Co. also made the vast majority of TV sets for Western Auto in the 1950s. I was highly involved with installation and warranty work on these sets, so I can speak with some authority.

Raytheon acquired Belmont in the early 1950s and aggressively marketed its TV receivers under the Raytheon name. They were identical to the Truetone equivalent model in every respect, except the nameplate.

There is a great void in the knowledge of the manufacturers of many house brands before consumer electronics manufacturing began to move overseas. Collectors' guides are not always too well informed on who made what for whom. A well-researched book on house brand manufacturers with dates of manufacture would be a welcome aid to collectors and restorers.

John T. Katz, Jr., Bessemer, AL

On Auction Listings

Dear Editor:

I realize how much work it is to report on an auction; however, the reporting of common items without a model number or condition is a waste of someone's precious time. It does not give readers any kind of valid information, and in fact, it is just more or less irritating to readers. I applaud those who provide information especially on large auctions, but my suggestion is to get more help collecting the information or get more details on selected items.

Clifford G. Berthelsen, Merced, CA

We do a great deal of "weeding" on auction reports and usually remove inadequately described items from the listing. However, sometimes a report slips through without this extra-critical edit. We do sometimes purposefully leave in items with missing model numbers by manufacturers who rarely appear in auctions or who made few products. As for condition, unfortunately, some auction reports come to us with no condition information whatsoever. (Editor)

Recycling a Hair Dryer GFI

Dear Editor:

My wife burned out a fairly nice hair dryer (not her fault — they self-destruct all the time) and kindly put it in my shop. She knows how I love to take things apart.

It occurred to me that the ground-fault interrupter (GFI) in its power plug could be used to provide protection from other things besides hair dryers. A GFI senses the current going into and coming out of a given piece of equipment, and if those two currents are different by 50 microamperes or so, the device trips and disconnects the load.

So, I thought that a GFI could be used to protect the operator against those old AC/DC radios, especially those neat old Hallicrafters S-38 series metal case sets. I routinely put in a 3-wire cord and a new chassis-to-case capacitor rated at 2 kV before even firing one of these radios up. The approved way, of course, is to run the radio off an isolation transformer.

As an alternative, you could take one of these burned out hair dryers, cut off the GFI and attach a 2-pole receptacle to it to make a "GFI adapter." Or, you could simply replace the cord of the offending AC/DC receiver with the cord from the dryer, since the radio's original cord is, no doubt, badly deteriorated. The GFI is then between the radio and the line, and any shorts between chassis and case and ground (or you) will trip it. The GFI is designed to run a 1.5 Kw hair dryer, so the 35 w load that a Hallicrafters S-38 puts on it should not even matter.

Any comments? Any of y'all out there ever try this?

Nick Van Vonno, Palm Bay, FL

Short-Lived TVs

Dear Editor:

In the June 2001 *Radio Miscellanea*, you mentioned that you would like to see more TV contributions. I was reminded that there were many "marriages" of chassis and cabinets for TV sets, and that many were short-lived TVs. For instance, Mad Man Muntz produced a cheap set called a "One Knob" set, or, as servicemen called it, "the gutless wonder." In this set, the high voltage tube was a Type 6BG6 in a self-oscillating circuit, and the sync signal injected right into the grid of the tube by a resistor capacitor network. The picture was bad.

Another set called the "Rembrandt" was made in White Plains, New York. Though a unique set, it also made a bad picture. The tuner was typical, but the three IFs were not. They were not over-coupled tuned. They were shunted down by loading the coils with resistors across them. Alignment was simple — you adjusted an input capacitor to set the broadband of the IFs and to locate the audio. The rest of the set was basic electronics, simple oscillators, and high voltage transformers. I saw them on a factory tour, but they disappeared rapidly, and I have never seen or heard of one since. Does anyone know any more about them?

Alton A. DuBois, Queensbury, NY

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." U.S. stamps or cash are OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. **Do not** send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. *Antique Radio Classified* welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and non-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Since artwork is reduced to 63% in the printing process, originals must be the artwork size listed below. Do not send in artwork on art board or send negatives. Ads should be typeset or typed neatly with a carbon ribbon, black ink (not pencil) on white. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Photos should be at an 85-line screen; otherwise, add \$16.00 per photo for screening. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue, additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Stamps or cash are OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: **Please write legibly.** Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike: for example 1, l and I (the number one, the capital I and the small l.) Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, and to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

CLASSIFIED AD DETAILS

Deadline: NOON ET— 10th of the month!

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET**, etc. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is **required** in all classified ads; we will add it if you forget.

To encourage varied content of the ads, the same classified ad may be run only once per issue and for only two consecutive months. (To run an ad longer, use a boxed classified or display ad.)

Classified Ad Rates per Month

Subscribers:

First 20 words: **FREE***

29¢ per word for extra words over 20 plus

10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

47¢ per word plus

10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

40¢ per word for all words,* none free, plus

10¢ per word for each bold word plus

10¢ per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

50¢ per word for all words* plus

10¢ per word for each all-caps word.

Non-Subscribers:

Add 20¢ per word to above costs.

*Three words can be bold-all-caps at no extra charge.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The **standard headings:** WANTED, FOR SALE, etc., count as **one word** each time used in an ad. **Name, address** and (one) **telephone number**, count as **6 words**, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is **required** in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

New Jersey Antique Radio Club Antique Radio Indoor Swap Meet

Saturday, August 11, 8:00 AM (7:00 AM vendor setup)
American Legion Hall, Dover, NJ

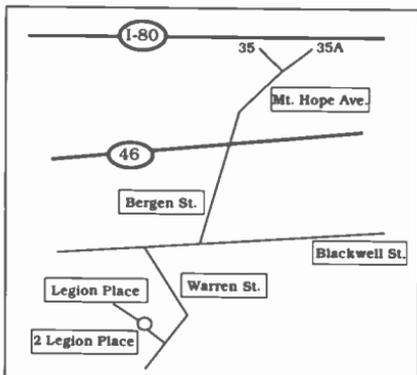

NJARC presents its Summer swapmeet at the spacious, air-conditioned American Legion Hall in Dover, N.J. Spaces are guaranteed to the first 65 reservations. A \$2.00 buyer donation is suggested.

DIRECTIONS: **From the East, North or South,** take I-80 West to Exit 35A (Dover). [I-80 West can be reached from the North via I-287 South or the Garden State Pkwy (South) or from the South via the N.J. Turnpike (North) to the Garden State Pkwy (North) to I-280 West.] **From the West,** take I-80E to Exit 35 (Mt. Hope, Dover). Follow Mt. Hope Ave. South, crossing Route 46 (where Mt. Hope Ave. becomes Bergen St.) and turn right on Blackwell St. Go to the third light and turn left on Warren St. Go two blocks, crossing the RR tracks. The American Legion is on the right (2 Legion Place).

RATES: NJARC members \$15/space; non-members \$20/space.

RESERVATIONS: Marv Beeferman, 2265 Emeraldal Park Drive, Forked River, NJ 08731 (609-693-9430). E-mail: mbeeferman@cs.com. Phil Vourtsis, 13 Cornell Place, Manalapan, NJ 07726. (732-446-2427).

NEW! RESTORATION VIDEO!

Come along as a 1936 Philco is transformed from "flea-market-find" to working, museum-ready show-piece! Along the way, you'll get basic tube theory, basic receiver theory, plus learn to trouble-shoot your set, test voltages, rebuild Bakelite-block capacitors, repair an old lacquer finish without stripping, and much more. For beginning- and intermediate-level restorers, or any old radio lover!

"I must say (the video) is most impressive! Among the things I liked most was that it addressed the subject matter in clear and simple terms without a lot of engineering doublespeak. It demonstrated refinements of several techniques I am familiar with as well as a number of useful procedures I'd never seen before. It covers a fairly elaborate troubleshooting, testing and repair regimen. I would definitely recommend this video to anyone with a couple of dead "mystery sets" they just can't figure out. I will be pulling a few out of my closet soon!"

run time: 115 minutes

The Old Timer's Bulletin *Back Issue Library on CD-ROM*

The Antique Wireless Association

The entire run of *The Old Timer's Bulletin* (*The OTB*) from Volume 1 through Volume 37 (1960-1996) available on two CD-ROMs. Set up for use with Acrobat Reader 4.0, each page is scanned full-size at 300 dpi resolution so pages are crisp and clear, and look very much like the originals both on the screen and when printed.

**Volume 1 — *The OTB* Volume 1, No. 1 (January 1960)
through Volume 25, No. 4 (March 1985)**

**Volume 2 — *The OTB* Volume 26, No. 1 (June 1985)
through Volume 37, No. 4 (November 1996)**

Each CD-ROM also contains a searchable index covering *The OTB* and other AWA publications through February 2000.

Volume 1 – \$49.95 • Volume 2 – \$49.95
Buy Both Volumes for – \$89.95

Runs on both PC and Mac.

A free copy of Acrobat Reader 4.0 for PC is included on each disc. Mac users may download a free copy of Acrobat Reader from Adobe at www.Adobe.com.

System requirements: 486 or Pentium processor, Microsoft Windows 95 or 98, minimum 8 MB RAM (16 MB recommended) and 10 MB available hard disk space.

Everything stocked and shipped promptly – Radio is our middle name.

U.S. Orders - Enclose \$3.00 per order for packing & book-rate shipping if total order is under \$35.00. If using VISA or MasterCard, include name on card, card number and expiration date. Send payment with order. Mass. residents add 5% sales tax. Money back return policy. Softcover unless stated otherwise. Most orders shipped by next business day. Typical U.S. order will be received within 7 days, but allow 2-3 weeks. Foreign orders - write for shipping costs, or use credit card and specify air or surface (allow 2-3 months for surface shipping).

SERVICES: Hickok factory authorized contact person, offering, affordable, professional service, calibration, and technical assistance. **FOR SALE:** New beautiful master crafted custom made carrying cases for your Hickok tube testers made of solid oak, cherry, maple or walnut, sides, front, and back with dove tail corners, top and bottom flush fit matching furniture plywood, all new hardware, all models under - \$200. Hickok and Military tube tester accessories and parts. Test adapters for 6000A old style tubes. Socket savers. Cool operating electronic replacement line voltage control. Knobs. Tube sockets. Selector switches. Fuse lamps and sockets. Refurbished Hickok, Military and other test equipment. Hickok compact Model 4800, solid-state, sine and square wave audio oscillator, just 1 left, for - \$75. Manuals. Manuals, for Hickok and Military test equipment with professional technical assistance, if needed; where else can you get this service? Take the challenge as many did this past month; eliminate unnecessary time wasting voltage measurements; learn to service and align radios like the pros, by using this 100 page copy of Service by Signal Substation; originally published by Precision Apparatus Co. for use with their Model E 200 R.F. signal generator; cut your service time by as much as 90%; this is not hot air or snake oil; I have used this system professionally for over 55 years; I would like to personally pass this 100 page copy on to you for - \$15 including S/H. If you do not have an R.F. signal generator or VTVM, a starter combo with calibrated signal generator, vacuum tube volt-ohm meter and the 100 page S.S.S booklet for only - \$99.95, while they last. Sold separately with S.S.S. booklet, most are previously used, assemble kits, such as Heath, Eico, etc., no junk, for - \$65 each. Or go first class and substitute a Precision E200 signal generator for an additional - \$85; or a Hickok 288X for an additional - \$135. All with operators manuals, schematics and S.S.S. booklet;
