ANTIQUe RADIO ON CD-ROM

Sam's Photofacts

Sets 1-100 now available on 4 CD-ROM's, 1-25, 26-50, 51-75, 76-100

Only \$ 79 each prepaid USA

"The Best Resource One Can Have For Old Radios!" - acclaimed to be the most comprehensive and most detailed service information on old equipment. Each CD contains 25 sets and each set contains between 25-35 service manuals and data for equipment produced after the end of WWII. Sets 1-100 cover all sorts of radio, TV, amplifiers produced from 1946 - 1950. The 4-CD's will contain approximately 3,000 service manuals for all of these types of old electronic equipment. A must for any serviceman or restorer!

Please, no classified ads by telephone, thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

EDITOR'S COMMENTS

Once again Bonzo lends his musical talents to A.R.C.'s cover — this time to celebrate our 18th birthday. In choosing him, we thought he reflected our pleasure in reaching a very respectable age for a specialty magazine. We might even have been a little smug as we began production, thinking that this issue should be a breeze. After all, with our long experience, we know how to do it. No problem.

Well, we all know about the best laid plans of mice and men. As the deadline for the printer loomed, we suddenly became seriously shorthanded, and a new product took center stage. Rachel Page Bryan decided to surprise her mom and dad with an early arrival on May 14. Mom is Cindie, whom many of you know as our assistant publisher responsible for production.

Of course, we too had to greet Rachel on her first day in the world with a visit to the hospital and flowers, promising not to bring a laptop for Cindie to continue work. We hope to see the two of them rejoining the A.R.C. staff before long.

But even before we were jolted out of our complacency by Rachel's interruption to our publishing schedule, we had an agonizing time with modern technology — you know, that amazing tool that is supposed to make our lives so much easier. Not if you run a business that today relies a lot on communication by e-mail; not if your e-mail is lost for several days due to a snafu at the service provider. But, be assured that our e-mail is now up and running, so don't hesitate to use it.

However, May 7 to 11 were dark days. If at that time you sent ads, book orders, renewals, etc., that have not been acknowledged or filled, please resubmit your order. Also, please indicate that this is a repeat of an order sent on those problematic days.

Although we did notify advertisers whose orders we were expecting of the trouble we were having, we could not know of many other new orders. If you do not see your ad in the magazine, let us know, and we'll run it in the July issue. We managed to retrieve about one-third of the lost ads, but yours may not have been among them. We apologize for the inconvenience, but like everyone else, we're at the mercy of the provider.

Despite our troubles with e-mail, the articles in this issue have a fun component and picked up our birthday spirits. Wally Worth's Wurflitzer radios, made by the All American Mohawk Corp., reminded us of jukebox dancing days. Even the escutcheon on the "Navaho" model looks like a jukebox. Did these radios coincide with the production of jukeboxes? Some historian among us must know the connections.

And speaking of connections, Richard Arnold makes one between the manufacturer of the Lyric 546T — the Rauland Corporation — and the Mohawk Corp mentioned above. Richard has had luck finding uncommon radios, especially when his wife is shopping for them.

Phil MacArthur's article on the Realistic Flavradio alerts us to the demise of the era of commercially

produced AM home radio. Phil surmises that there are millions of these sets hiding out there looking for new homes to brighten up, as they do his display area.

We're always glad to have one more little, personal story about sets discussed in an earlier issue. Thanks to Alton DuBois and Harley Ryan for their short pieces on Rembrandt and Muntz TVs.

All shapes and sizes seem to be represented in this month's *Photo Review*. A most interesting set is the ornate cathedral that we hope someone out there can identify. The 1933 grandfather clock is also unusual in that it is a TRF made by a lesser known company.

If you're at all squeamish about rodents, don't read Jerry Wieland's "wildlife" article. On the other hand, you'll miss a good tale (no pun intended) of the perils of repair work.

As always Ray Chase can be relied on to send reports on the many auctions he attends. All items in the Uniques and Antiques Auction in Pennsylvania were outdoors by a single one — an Emerson green Catalin selling at \$3,300.

The Paul Corrette Collection Auction in Connecticut offered more variety, from early battery sets to cathedrals and consoles. Highlights were a Ware Music Master with a Brandes "Table Talker" horn selling at \$410, and a 1931 Victor radior banner selling at \$250.

Radio Miscellanea shows that some folks like what we do, while others think we could do better. Mailing processes are an ongoing issue. We try to explain our choices and welcome your comments.

A.R.C. Benefits. A toll-free number, 866-371-0512; Discover, American Express, Visa, and MasterCard accepted; books shipped free in the U. S. by book rate; and for current subscribers, a ten percent discount on all book orders. Let us know that you're a subscriber and please tell us your number. Shipping must be to the address to which we send your magazine.

Coming Radio Events. Many events dot the June calendar. Be sure to look for one in your area, as there is no better way to meet folks whose interests are the same as your own — possessing and preserving old radios and their history.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Our "For a Happy Birthday" cover illustration is from a postcard in your editor's collection. Like the cover of our July 2001 issue, it pictures Bonzo, the pre-1920 creation of British artist George Studdy. Not shown is the caption that reads, "May fortune broadcast a happy time for you." The copyright is Valentine & Sons, Dundee and London. On the back of the card is a message reflecting a bygone era, as the writer says she will "be along for tea tomorrow." Could we rely on the mails today to get a postcard delivered tomorrow?

WITH THE COLLECTORS

Jukebox Radios – Gee Dad, It's a Wurlitzer

BY WALLY WORTH

The name Wurlitzer is most often associated with juke boxes, but the company also sold radios. In this article, Wally describes some Wurlitzer radios and tells us who really made them. (Editor)

Recently I had the opportunity to purchase a Wurlitzer radio. The name Wurlitzer intrigued me, and, in spite of the dour description of the set's condition, I bought it.

It was described as coming from a large and diverse collection that had been stored for 20 years or more in a shed and a garage. Unfortunately, the shed and garage burned down, and what the fire didn't ruin, water from the firemen's hoses did. The collection was also exposed to the elements in this condition for a long time, further reducing their value as collector items. However, I like to fix up old radios that are considered beyond repair.

LOW EXPECTATIONS

When the radio arrived, I wasn't expecting much and wasn't disappointed. The brass escutcheon on the front panel read "Wurlitzer," a name that I knew but only from jukeboxes. The metal tag inside the cabinet read "Wurlitzer Co." and "By the AAM Co. NY." I quickly researched both names in the Rider and Gernsback books and found that AAM was the All American Mohawk Corporation of Tonawanda, New York.

Pictures of Mohawk table models and consoles also appear in Alan Douglas' *Radio Manufacturers of the 1920s, Volume I*. In addition, his book covers the origin of the company and mentions Rauland's

Figure 1. A front view of the restored Wurlitzer "Navaho" Model. The large knob is the tuning control and the small knob controls volume. The toggle switch below the escutcheon is the on-off switch.

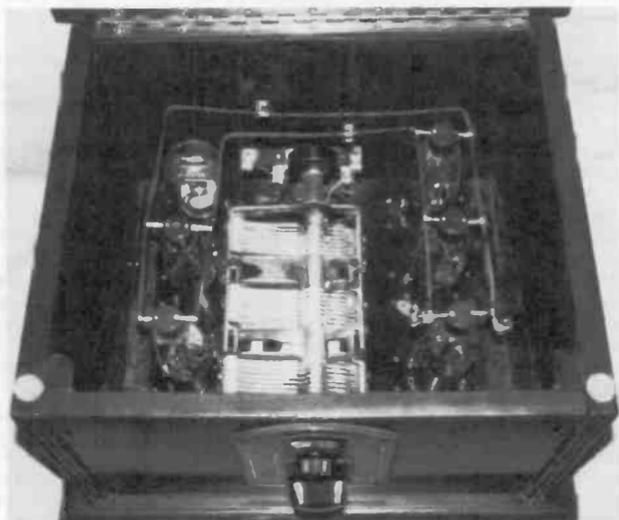

Figure 2. An interior view of the set shows the 3-section tuning capacitor, the five Kellogg tubes and the Type 71A tube. The two pieces of U-shaped bus bar make the filament connections to the snap-on filament connectors used with the Kellogg tubes. The volume control is located at the rear of the chassis.

Figure 3. This Mohawk "Cherokee" model bears a strong resemblance to the Wurlitzer "Navaho." From top to bottom, the controls are the on-off switch, tuning and volume.

All American audio frequency transformers that I collected in years past.

The puzzle started to come together now, and after looking into chassis layouts and cabinet designs, I ventured to place the Wurlitzer in the 1926 era. I also determined that the radio was marketed as the "Navaho" model.

MY WURLITZER NAVAHO

A front view and an interior view of the Navaho are shown in Figures 1 and 2. As these figures show, the radio is a 6-tube TRF set. The audio output tube can be either a Type 201-A or 71-A. The other five tubes are Kellogg Type 401s, which employ an indirectly heated cathode that permits the filament, or heater, to be powered by alternating current. Unlike conventional tubes, the filament connections are made at the top of the tube by what resembles a grid cap. Figure 2 shows the bus bar wiring and top cap connectors used in the filament circuit of the radio. (The Kellogg Type 401 tube was described in the October 1993 issue of A.R.C.)

Clearly the radio needed a lot of work. Because of the extensive damage to the cabinet, only the front panel could

be salvaged, and I had to reconstruct the rest of the cabinet. The bus bar wiring for filament circuit of the Kellogg tubes was in place but several of the snap-on filament connectors were missing. Fortunately, the three-section tuning capacitor and its knob were in good shape.

CONSTRUCTION

The RF coils and AF transformers are housed in copper cans. These components, the audio output transformer and most of the wiring are located under the chassis. One interesting detail is the use of concentric shafts for volume and tuning. An inner concentric shaft actuates the volume control and an outer shaft connects to the tuning capacitor. The volume control is located at the rear of the chassis.

THE CHEROKEE

The appearance of my restored Wurlitzer reminded me of another set that I had previously owned — a Cherokee model made by the Mohawk Corporation of Illinois. I was unable to make a connection between the All American Mohawk Corporation in New York and the Mohawk Corporation of Illinois. Perhaps some A.R.C. reader

(Continued on following page)

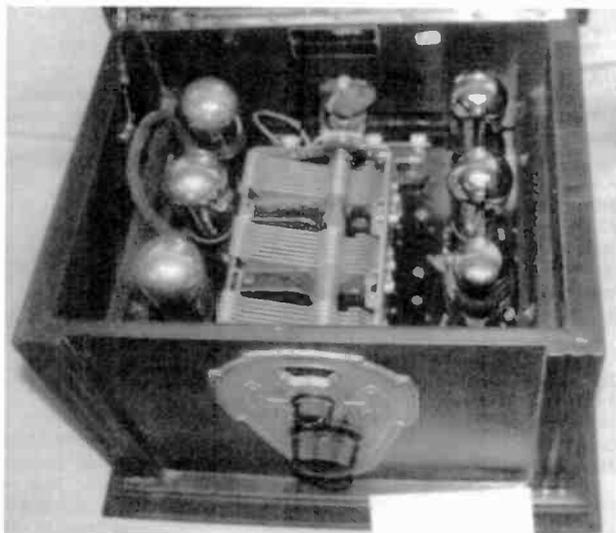

Figure 4. Except for the tube types, the Cherokee's chassis layout seems identical to the Wurlitzer.

(Jukebox Radios, cont.)

can provide an explanation.

A front panel and an interior view of this radio are shown in Figures 3 and 4. Note the similarity in chassis layout to that of the Navaho model. The tube complement differs in that this set uses five Type 01-As and one Type 71-A.

The small knobs at the top and bottom of the escutcheon control the on-off switch and volume respectively. The large knob is the tuning control and the brass escutcheon carries the legend "One Dial."

Figure 5 shows the nameplate for the Cherokee.

A 9-TUBE WURLITZER

A few months after I had purchased the Navaho, I saw an ad in A.R.C. for another. Being on a Wurlitzer kick, I bought that one as well.

When the radio arrived, I was surprised by its weight and cabinet style. The cabinet weighs 56 pounds and is 28" long x 9" high. It looks like an oversized Radiola 17. The cabinet is constructed of 3/4-inch walnut and has rounded corners. The back panel is plywood. A front view of the radio is shown in Figure 6. An interior view of the radio in Figure 7 shows a chassis layout that is similar to the Radiola.

The radio uses the following tube types: 26, (4); 27, (2); 71A, (2); and one Type 80 rectifier. The metal nameplate inside the cabinet identifies the set as a "Wurlitzer A.C. Tube Electric Radio." Although it carries the Rudolph Wurlitzer Co. name, the nameplate also reads "Mfd. By A.A.M. Corp." I believe this radio is from the same period as the Navaho.

After talking to some fellow collectors, I believe that the sets are quite rare and I feel fortunate to have them in my collection. I welcome any comments or additional information regarding these or other Mohawk radios.

(Wally Worth, 2 W. Elm Ave., Wollaston, MA 02170)

At age 15, Wally Worth began saving his paper route money to buy parts for 1-tube

Figure 5. This close up of the Cherokee's nameplate indicates the manufacturer to be the Mohawk Corporation of Illinois.

Figure 6. This 9-tube AC-operated Wurlitzer is housed in a cabinet that resembles a Radiola 17.

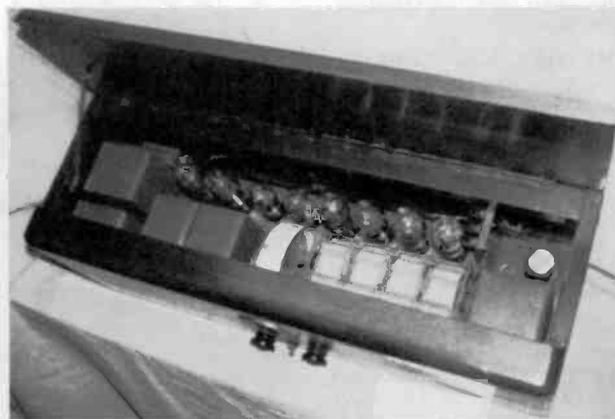

Figure 7. A top view of the 9-tube Wurlitzer shows a chassis layout that looks like a Radiola 17.

sets. Then in 1986, fifty years later, he started to collect anything that needed cabinet work. His diverse collecting tastes include crystal and 1920s battery AC sets, as well as transistor multiband, and even novelty sets. He also collects early tubes and both horn and cone speakers.

WITH THE COLLECTORS

The Lyric Model 546T

BY RICHARD ARNOLD

Richard Arnold is a lucky man — he has a wife who purchases radios for him. She, in turn, is also lucky in that she has a husband who trusts her judgement in such serious matters. Sounds like the ideal "radio pair." (Editor)

The Lyric model 546T is a radio we don't see very often. This is another radio that my wife purchased for me last year on her vacation to Galveston Island, Texas. I like this one a little more than the RCA 8X541 that she purchased at the same time. The 8X541 is described in the May 2001 issue of *Antique Radio Classified*.

The Lyric 541T, shown in Figures 1 and 2, is a 1947 model made by the Rauland Corporation, Chicago, Illinois. E.N. Rauland, previously associated with All-American Mohawk, started the company in 1929. By 1941, Rauland was a major contributor to the World War II war effort, and in 1947, Rauland also manufactured a Zeus Survey Meter for the Atomic Energy Agency.

On December 6, 1948, the Rauland Company was acquired by Zenith when Zenith bought up the capital stock. In 1968, Rauland became a division of Zenith and produced television picture tubes used worldwide.

THE LYRIC MODEL 546T

There are at least three radios that I know of that used the Lyric trade name. There is a cathedral Model J, ca. 1930, and a large tombstone that has the radio mounted at the top of the cabinet with the speaker on the bottom.

The subject of this article is a 5-tube AC/DC super-het that uses a 5-inch permanent magnet speaker and covers the AM broadcast band from 535 to 1620 Kc. The IF is 455 Kc.

The radio uses a version of the All American Five tube complement a 12SK7, a 12SQ7, a 12SA7, a 35Z5, and instead of the usual 50L6, a 50A5 loctal. In 1946, the 50A5 was usually used in concert with other loctal tubes such as a 14Q7, 14A7, 14B7 and 35Y4. I would suppose the reason for the use of this tube was that Rauland must must have gotten a good deal on the bulk purchase of 50A5s.

The plastic, wrap-around, Deco looking cabinet was available in brown and ivory. It measures 9" x 7 3/4" x 6". Both the grille and dial scale are a brown/tan mix and are really sharp looking. The dial is lighted by a single #47 bulb. The loop antenna works pretty well, and the two knobs are for on/off-volume and tuning.

In my research, I found that this cabinet was used earlier. A Burnstein Applebee advertisement in 1937 shows the cabinet used as an office intercom. There were two models available. One was the OC-2 that had a 2-station capability and sold for \$66.50 per

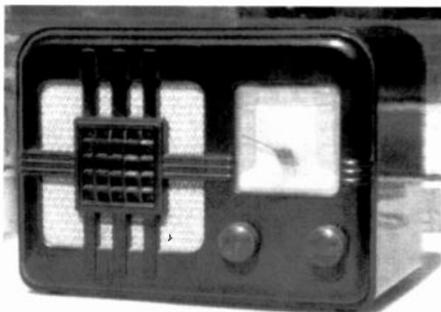

Figure 1. The Lyric Model 546T from 1947 is housed in an attractive Bakelite cabinet.

station. The other model was the OC-M that had a 2 to 10 station capability and sold for \$38 per station.

This is a nice, not so common, and unusual looking radio. I am glad that my wife found it for me.

Pelham, John. *Radiophile*. www.radiophile.com/lyric.htm

(Richard Arnold, Box 275, Lone Grove, OK 73443)

Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. Primarily interested in cathedrals and 1920s battery sets, his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. The 1932 Jackson-Bell Peter Pan featured in the June 1991 A.R.C. is his prize.

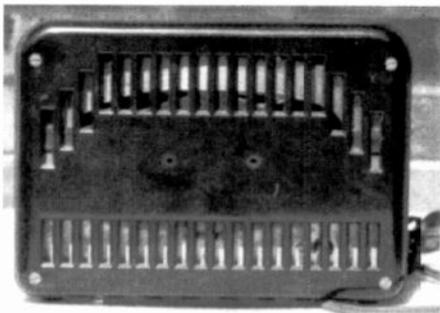

Figure 2. While many AC/DC radios from the 1940s used cardboard back covers, the Lyric used a Bakelite cover.

WITH THE COLLECTORS

The Realistic Flavoradio: 1971-2001

BY PHIL MACARTHUR

Although threatened by FM, and now satellite radio, that venerable mode, amplitude modulation, continues to survive. However, the production of AM-only radios appears to be ended, as Phil MacArthur relates in the following story. (Editor)

I recently visited my local Radio Shack store and picked up the 2002 catalog. For the first time in 30 years, there was no Flavoradio listed. The Flavoradio was the last AM-only radio to be mass-produced anywhere. Its demise thus brings to an end an era begun in 1920 with the introduction of the commercially produced AM home radio.

MODELS 12-166, AND 12-166A

These shirt-pocket portables were made in three different case styles in as many as nine different colors. Figure 1 shows the three cabinet styles. The first model, 12-166, was introduced in 1971 in six colors: strawberry, orange, lemon, avocado, blueberry, and grape. Later in the 1970s, two more colors were added: chocolate and peaches 'n cream, a 2-tone radio with a peach front and cream back.

In the first few years of production, the Flavoradio had the Realistic name on the front and "Allied Radio Shack Division of Tandy Corp." on the back. Later, that was changed to "Radio Shack, a Tandy Corporation Company."

Made in Korea, this set had a 5-transistor chassis. During the 1980s, production was moved to Hong Kong, and then later to the Philippines, where a transistor was added to the chassis making it the Model 12-166A. This chassis had the earphone jack installed on the circuit board and protruding through a hole in the back of the case. This change saved the labor-intensive process of hand-wiring a jack in the side of the case.

MODELS 12-201 AND 12-201A

The original case style, with vertical grille bars, a carrying strap, and a window dial, remained unchanged for about 15 years. However, in the late 1980s, the case was redesigned, taller and slimmer and given an exposed thumbwheel dial, and a perforated grille. This was the Model 12-201, and it ran for just five or six years in three

Figure 1. The Flavoradios were produced in three basic case styles. Left to right, the Models 12-166/12-166A, 12-201, and 12-201A.

colors: blackberry, blueberry and strawberry. It had the same 6-transistor chassis and carrying strap.

In the early 1990s, the final model was designed, returning to the window dial and sporting a completely new chassis based on an integrated circuit. This new radio, the Model 12-201A, was released in four colors: blackberry, strawberry, blueberry and grape. It was during this production run that the Realistic name was being purged by Tandy.

FLAVORADIOS NOW

For a while, the Radio Shack name was used on the Flavoradios, finally replaced by the Optimus name. During this time, all the colors but black were phased out, and for the last three years of production, blackberry was all that remained of the once colorful group. During the first few months of 2002, the blackberry will disappear from Radio Shack stores at a closeout price of \$3.99.

I was able to get some information for this article from Tandy headquarters in Ft. Worth, Texas, but they refused to release sales figures for any of the models. One would think that for a marketing dynamo like Radio Shack to keep a model in production for 30 years, sales must have risen to 50,000 per year and totaled several million overall. Thirty years for a given product name is quite a mark to reach in the radio business. After all, the venerable Zenith Trans-Oceanic hit forty, so these Flavoradios are in good company.

Of the original production, the red and blue are the most plentiful, followed by yellow, then orange, then green. The grape is quite scarce and the peaches 'n cream and the chocolate are impossible to find. I own the only examples of those two I've ever seen.

I've enjoyed collecting these colorful little guys (I have about 60 of 'em), and they really brighten up a room dominated by a lot of old brown radios. They appear on eBay about once a week and sell for \$2 to \$40. I see about a dozen a year at flea markets and yard sales and wonder, "Where are those millions hiding?"

Phil MacArthur, a graduate in engineering from Rochester Tech in Upstate New York, teaches mathematics at the Florida Keys Community College in Key West. He has been collecting radios since 1955, and would like to hear from other collectors at keywestmac@cs.com.

More on Rembrandt and Muntz TVs

BY ALTON A. DUBOIS, JR. & HARLEY RYAN

My letter that mentioned Muntz and Rembrandt TVs as short-lived products appeared in the August 2001 A.R.C. Later I received a call from a Mrs. Knight in Huletts Landing, New York, a summer colony on Lake George. She had heard about me from her brother who was visiting from Long Island. When I told her that I had once worked for RCA, she said she was quite familiar with RCA because she had gone to school with Dr. Zworykin's daughter.

The reason for her call was that she had a Rembrandt TV that had been in her father's home, and she invited me to come up and photograph it. I took her up on the invitation and went to photograph the set. Shown in Figure 1, the set is housed in a dark wood cube cabinet measuring 18" x 18" x 18". It has a 10" picture tube.

Mrs. Knight said the set also had had a radio, but I wonder about that because it has a rotary dial that looks like the tuner on an earlier DuMont TV.

The set does not receive any pictures now because there is little or no signal in that area, since the lake is surrounded by mountains. She has a modern TV set but receives only CBS from a remote repeater on a mountaintop across the lake.

(Alton A. DuBois, Jr., 67 Peggy Ann Rd., Queensbury, NY 12804)

In the August 2001 issue of A.R.C., Alton DuBois mentions Muntz and Rembrandt TV sets. For 41 years I was a technician at a large service shop in Ohio. Thirty-eight of those years were spent mostly repairing TV sets. I don't recall the Muntz model Mr. DuBois mentioned, but I did repair many Muntz sets with conventional circuits.

The major failure in the Muntz TV was what we called the "doorknob." This was the 500 pF high-voltage capacitor that filtered the high voltage to the CRT. This was used before they were using the CRT shell as a filter. These doorknobs would arc and the TV was then unusable.

Picture quality, as I remember it, was no better or worse than most TVs of the time. The sets were not much good in a weak signal area. Also, they had poor adjacent channel rejection.

Figure 1. A Rembrandt 10" black and white TV from the mid-1950s.

The Rembrandt was a larger more complex TV that also had a chronic failure. They had a power supply system that developed around 700 volts DC before the tubes warmed up, at which time the voltage dropped quite a lot. The input filter capacitor also shorted out very often and just replacing that with the same type did not help.

There was at least one tube in these sets that had a diode section that was not used. I wired up this diode to a relay that kept the center tap of the high-voltage section of the power transformer open until the diode started conducting, which then energized the relay grounding the power transformer center tap. There were delay type tubes to do this job, but that required more labor and expense. There were few of these sets sold in the Columbus, Ohio, area where I worked, and they soon disappeared from the market. The picture quality I do not remember well.

(Harley Ryan, 4178 Chandler Dr., Columbus, OH 43213)

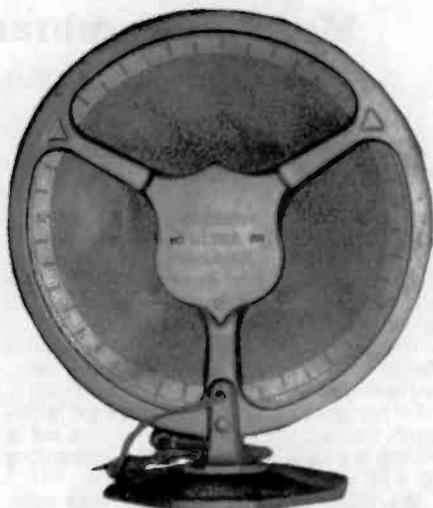

PHOTO REVIEW

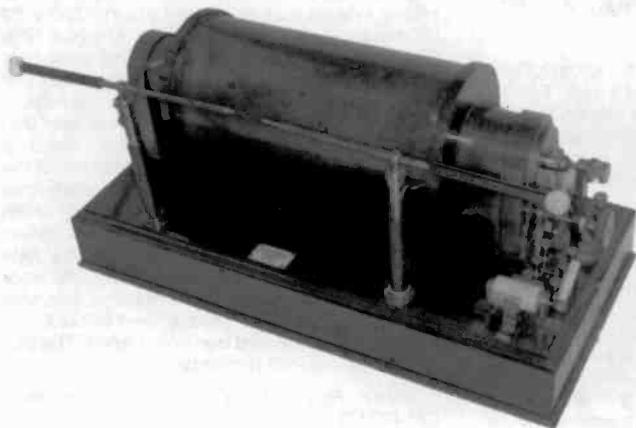

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

CATHEDRAL, MANUFACTURER AND MODEL UNKNOWN – This early 1930s cathedral with no identification was purchased at an estate sale. Its tube complement is Type 24 (3), Type 47 (1), and Type 80 (1). Can anyone identify the make and model? (*Jack LaVelle – Oak Forest, IL*)

CROSLY ULTRA MUSICONE – This green and gold paper cone speaker was manufactured in 1926 by the Crosley Radio Co. It has a gold-finished frame with a magnetic coil reproducer and measures 11" across the cone. (*Allan Deeg – Admral, Sask., Canada*)

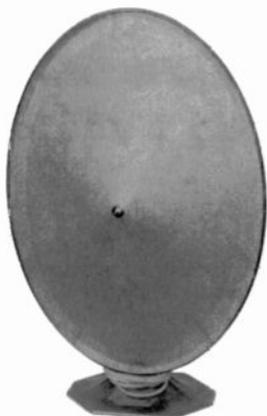

MARCONI SPARK COIL – This very heavy piece of wireless equipment was manufactured by the Marconi Wireless Telegraph Company, Ltd., London. The nameplate states that it is "No. 404." (*Jim Taylor – Bournemouth, England*)

PHOTO REVIEW

SIMPLEX MODEL R – Manufactured in 1933 by the Simplex Radio Company of Sandusky, Ohio, this grandfather clock radio has a 4-tube TRF receiver and measures 65" tall. It was purchased for \$25 at a local flea market. (*Claude Chatin – Independence, MO*)

FARRAND OVAL SENIOR (MODEL 24) – This oval-shaped, paper cone speaker was manufactured by the Farrand Mfg. Co., Inc., of Long Island City, New York. The Senior (Model 24) sold originally for \$32.50. (*Merrill Bancroft – Townsend, MA*)

CHERRY CRYSTAL RADIO – This tiny, plastic, germanium crystal radio was manufactured in the 1960s. Notice the small compass built into the center of the tuning dial. (*Erwin Macho – Vienna, Austria*)

ZENITH 1R – This 1-tube receiver was manufactured by the Chicago Radio Laboratory in 1922. It has Serial Number 2369 and is licensed under the Armstrong U.S. patent of October 6, 1914. The front panel is made of hard rubber with a red coloration. The rear has a pull-down door to access the chassis. (*Wally Worth – Wollaston, MA*)

RESTORATION & REPAIR

Radio Wildlife — A Restoration Surprise

BY JERRY WIELAND

Removing a chassis from a radio that has been in storage is frequently an interesting event. In this article, Jerry Wieland describes his discoveries while restoring a nice, but neglected AM-SW table model. (Editor)

I like a challenge. I search for sad looking radios that appear to have been stored in a barn for a few years (or decades). Besides the challenge of bringing these back to life, significant grime and dirt usually means a lower price. I am no longer surprised to find chicken feathers, spider eggs, spider carcasses, hornet mud nests, mouse droppings, and a whole mouse nest on occasion. However, I did get a surprise while working on a recent project.

It started in February when my brother alerted me to a wooden table radio in a secondhand store he frequents. He had found interesting electronic items there in the past, including collectible radios, some as early as the mid-1920s. We both took a close look at what was a rather large radio with a slide rule dial and eight push buttons. The radio, shown in Figure 1, had AM plus two continuous coverage shortwave bands to 18 MHz. The only ID was a metal plate on the back of the chassis with the name R.P.C. Chicago. [This radio is more than likely a product of the Radio Products Corp. and sold under the Camden name.]

There was no model number. It contained eight tubes and a 3-gang tuning capacitor indicating an RF stage. There was some veneer damage, a worn finish, plus plenty of chassis dust and dirt. My kind of radio! It seemed a rather impressive layout, but the price was \$120. Too much for me.

This store has a habit of cutting the price on items that don't sell. I told my brother to watch for a price cut to the \$30 area. After about 6 months, the price was cut to \$60. Occasionally, they have a half price sale day. My brother was lucky enough to

Figure 1. The 8-tube, 3-band radio in its "as found" state. Note the missing veneer on the lower edge of the cabinet.

visit during such a sale and got the radio at my target price. He then gave it to me as a birthday present. Such a deal!

THE RESTORATION PROCESS

I started my restoration by pulling the chassis from the cabinet. As Figure 2 shows, the top of the chassis was covered with dirt and assorted grime. I pulled the tubes and started sucking up the dirt with the shop vacuum. The tube numbers were marked on the sockets, which is a good

Figure 2. This view of the chassis provides an idea of the cleaning effort that was required.

thing since no diagram was in or underneath the cabinet. All tubes matched the socket numbers.

The chassis top was now relatively clean, so I turned it over to clean underneath. This is when I saw what looked like a wad of dirty fiberglass insulation. No doubt a mouse house, I thought. And sure enough, there were mouse droppings scattered around. I slowly began pulling the insulation out being careful not to damage any wires or components that may be caught in the mass. It all came out in a clump, and then I got my surprise. A mouse was still in the radio! Figure 3 shows the mouse carcass and the mound of fiberglass insulation.

Needless to say, he didn't seem very lively. A screwdriver poke revealed him to be solid as a rock, tail and all. The power supply dual electrolytic filter capacitor negative wire was tightly compressed between his rear leg and body, and he appeared to have some cloth insulation in his mouth. By the way he was positioned in the power supply section, I wondered if he had hit the high voltage near the rectifier tube while touching chassis ground. Or maybe he just died of natural causes while the radio was stored. Rather than try to pry him loose from the wire, I unsoldered it from the ground point and pulled it free from his body. This allowed me to remove the little mummy intact. My brother got a kick out of it, but his wife did not seem to appreciate it as much.

After extensive chassis cleaning, the radio required little electrical repair. All tubes tested good. I replaced the electrolytic capacitors in the power

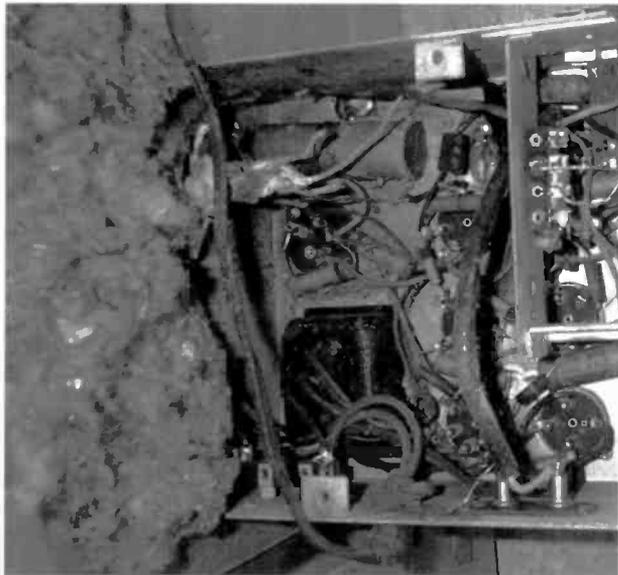

Figure 3. An under-chassis view shows the dead mouse in the upper left corner. The fluffy mass at the far left is the fiberglass insulation.

supply, connected a broken wire on the volume control, replaced the line cord, and removed a solder splash in an IF filter can. The radio then performed well on all bands with just minor alignment.

I decided to replace the damaged cabinet veneer. I also stripped all the old finish, restained, and applied shellac. The push-button and dial bezels are metal. Cleaning with fine steel wool revealed a bright brass finish on the highlighted areas. I did not clean through the darker finish on the other areas. The dial is multicolored, indicating the different bands with many AM station call letters listed, as well as shortwave station locations. It is an impressive set, definitely not a low cost model. The refinished cabinet is shown in Figure 4.

I would appreciate more information on the R.P.C. Company and this model. I have enough information on the mouse.

(Jerry Wieland, 780 Charles-ton Ln.,
Hoffman Estates, IL 60195.
jpawieland-netzero.net)

Jerry Wieland is an electrical engineer working in cellular phone development at Motorola. His interest in old radios began at age 12 when he started listening to shortwave broadcasts on a 1930s Silver-tone console.

Figure 4. The effort required to clean the chassis and refinish the cabinet was well worth it, as evidenced by the appearance of the restored, and mouseless radio.

AUCTION REPORT

Uniques & Antiques Auction Aston, Pennsylvania – October 16, 2001

REPORTED BY RAY CHASE

This auction by Uniques & Antiques Auction Sales was held in Aston, Pennsylvania, on October 16, 2001. It was a general auction, but the radio-related goods were segregated and auctioned separately at 5 P.M. There was a large quantity of German radios, tape decks, transistor radios, tape decks, transistor radios and 45 rpm players, as well as bulk lots of parts and commercial electronic assemblies and test equipment. The highlight was an Emerson AU190 green Catalin selling at \$3,300.

Some sets were in very poor condition, and I have listed only items of interest and not those sold in bulk lots. A 10 percent buyer's premium was charged, but is not included in the prices below.

e=excellent, vg=very good, g=good, f=fair, p=poor, wk=works

Admiral radio & record player, Bakelite \$20
 AKAI reel-to-reel tape deck, w/8 track, vg 10
 Atwater Kent drum style dynamic speaker 15
 Boston Acoustics speaker 55
 Denon turntable 130
 Emerson AU190, green Catalin, original, no cracks, cord cut off, vg 3,300
 Fisher speakers, pair, vg 12
 GE A65 console, Deco, (4) knobs, g 90
 Grundig large speakers for the above radio, blonde, (2), g 20
 Grundig Majestic 4065 wood-cased stereo, g.. 60

Many of the 1950s consoles did not sell.

Grundig multiband table 15
 Grundig multiband, w/2 small speakers 30
 Grundig reel-to-reel tape decks in suitcase, (3), ea. 5
 Grundig solid-state stereo, w/2 speakers, wk ... 25
 Grundig table, stereo, w/2 speakers, dark color. 25
 Grundig table, tube type 50
 Grundig w/small speaker 10
 Lafayette HE10 communications radio, f-p 40
 Motorola early 6" portable TV, no bezel, f 25
 Philco portable, "roll top" style 12
 Philco Predicta floor model, p 125
 Philco Predicta chairside TV, vp 160
 Philco Predicta floor model, modern repro w/color tube & remote, wk, vg 170
 Phonograph cartridges, box, (±60) 20
 RCA 45 rpm record players, (2) ea. 30
 RCA 45 rpm record players, (3) ea. 12
 RCA 45 rpm record players, (4), (2) ea. @ 22
 (2), ea. @ 12
 RCA Radiola 18, no hood, g 60
 RCA Radiola 100 speaker 20
 RCA table, Bakelite, w/record player 5
 Silvertone table, wood, (4) knobs + PB, w/eye tube, f 20
 Technic Quartz DD turntable, (2), g, ea. 220
 Telefunken OPUS table 60
 Telefunken table, g 30
 Tube(s): box, (2) 5, 40
 Westinghouse green plastic portable, 1950s . 17

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

This Philco Predicta repro, working and in very good condition, sold for \$170.

This GE A-65 Deco console sold for \$90.

(Ray Chase, 1350 Marlborough Ave., Plainfield, NJ 017060; Uniques and Antiques, 142 Conchester Hwy., Aston, PA 19014. 610-485-7400)

The Paul Corrette Collection Auction Manchester, Connecticut – December 16, 2001

REPORTED BY RAY CHASE

The Paul Corrette Collection Auction was held at the Manchester Mall, 811 Main St., Manchester, Connecticut, on December 16, 2001. The mall is actually a cooperative antique shop and small auction hall located in a storefront in downtown Manchester. Advertised as the 60-year collection of Paul Corrette from Bloomfield, Connecticut, the auction seemed to indicate that Paul was actually "thinning out" some overstock, as many of the radios were in fair to poor condition.

Auctioneer Bill Surrell started at 2 P.M. and completed the auc-

(Continued on following page)

Some of the auction's offerings: Foreground, left to right, a Crosley 51, a Browning shortwave receiver, and a 5-tube home brew.

(Corrette Auction, Continued)

tion of around 250 lots in about two hours. An abbreviated catalog was provided for most of the items and its order was generally followed. A 10 percent buyer's premium was charged, which is not included in the prices below.

e=excellent, vg=very good, g=good, f=fair, p=poor, NT=no tubes, WT=with tubes

Album, w/about 150 QSL cards	\$40
Apex, single dial battery set, NT, f	20
Atwater Kent "stove" model, no speaker, p	10
Atwater Kent 20, NT, g	80

RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

Tab Problem

Dear Editor:

Thanks for the replacement copy. Here's the problem I have: When I try to remove the plastic tabs from the magazine, the residue from the glue will become dirty with very little handling. Please reconsider this method of mailing and thanks.

Brett Saylor, State College, PA

Dear Editor:

Could you please tell me why you have to put the clear plastic tabs on the books? They are a pain. All they do is rip my copy every time I try to remove them. Not a good idea! Thanks.

Tom Pamula, Erie, PA

We're damned if we do and damned if we don't! Over the years, readers have suggested we "tab" the magazines to avoid the problem of letter carriers reading them and delaying delivery. Tapping does keep the magazine closed during the handling by the postal service and thus also reduces damage. For a short time we polybagged copies and had similar complaints from readers. However, the postal service now requires taping, and so, as the saying goes, "Write your Congressman!" On the other hand, copies sent by First Class Mail have the tab on the wrap, so that after the wrap has been removed, the magazine is clean. (Editor)

UK Morse Signaling Closure

Dear Editor:

Your readers may be interested in a video, titled QRT500, celebrating the 1997 closure of Morse signalling on 550 Kc from UK coast stations. A spoken introduction by a senior radio operator covers the history of the service, and the official transcript from the *Titanic* distress signals is shown courtesy of the National Record Office.

The remainder of the video has a Morse soundtrack, including the actual closing down sequence with support messages coming in from around the world

Full details of the video and how to order it may be found on our Web site at www.discoveryfilms.co.uk.

Terry Rutter, Solihull, England

The Fun of the Hunt

Dear Editor:

Although I thoroughly enjoy your publication and look forward to seeing it each month, it has been rather "thin" recently. I guess computers and eBay are taking their toll on the advertising — too bad, as half the fun is in the hunt, and I have met some really nice people over the years responding to these ads.

William Devlin, Rockville Centre, Long Island, NY

The competition is keen, but we do our best to keep your kind of "un" — not possible on eBay — going. (Editor)

More on Navy-Type Loose Couplers

Dear Editor:

Ray Bintliff discusses several Navy-type loose couplers in the May 2001 A.R.C. [as a follow up on Wally Worth's article in the August 2000 issue]. The one supplied by Jim Sargent was manufactured by the Menominee Electrical Manufacturing Company, and the other (Wally's set), of similar design, has no identifying label.

Almost surely Wally's set is not a Menominee because of the profound differences noted. Many companies made similar "Navy" models (e.g., Duck Model 5A, Wireless Specialty Apparatus, Halcon, Eico, Wireless Shop). I don't know if other companies, such as Murdock and Signal, might have made this style of Navy receiver, but there are probably more.

The physical arrangement of parts and general construction are almost identical on Menominee, the Duck 5A, the Eico, and the Wireless Shop (not small manufacturers). I would speculate that their similarity in appearance is the result of having been manufactured to Navy specifications, rather than companies copying each other's designs.

Navy specifications required that there be no sliders of any kind; thus, the rotary switches. The switches were needed to control the coil winding in steps of ten turns, and in individual turns. The set needed to tune a wide band of short and long waves, and all controls were to be easily available to the operator. Navy models also always seem to have a front panel and a cover over the coil, which suggests these features may also have been included in the Navy's specifications.

Sets with a front panel and coil cover and no sliders, regardless of placement of binding posts and arrangement of secondary switches and with nonconcentric primary switches, were sometimes referred to as "Navy" models when advertised for sale to the general public.

Walt Sanders, Terre Haute, IN

A.R.C. Ads Really Work

Dear Editor:

Enclosed is a check for renewal of my subscription to A.R.C. Your ads really work. Keep up the good work!

Florian Rogowski, Warren, MI

Good Luck With Ads

Dear Editor:

I have been collecting radios since 1948, and I have had good luck with A.R.C. ads. Thanks.

Frank Vaillancourt, Woodstock, VT

Welcome Kudos

Dear Editor:

Hello A.R.C. I just wanted to say that I really enjoyed Dorothy's article on the Radio XXXIII meet in Westford, Mass., in the April A.R.C.

Charles Harper, Paris, KY

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, Internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. **Originals must be the artwork size listed below.** Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. **Do not cut or trim photos or glue photos to artwork; submit separately.**

If you are confused by these requirements and terms, please contact A.R.C. before beginning to prepare your ad. We will be

happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		AsPrinted (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up ad

* Full & 1/2 page, 6-mos.: 1/2 due with order; 1/2 due in 3 mos. ** Full & 1/2 page, 12-mos.: 60% due with order; 1/4 due at 3, 6 & 9 mos.

† For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Stamps or cash are OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we don't "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

CLASSIFIED AD DETAILS

Deadline: NOON ET—10th of the month!

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE**. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is **required** in all classified ads; we will add it if you forget.

Classified Ad Rates per Month

Subscribers:

First 20 words: **FREE***

29¢ per word for extra words over 20 plus

10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

47¢ per word plus

10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

40¢ per word for all words, * none free, plus

10¢ per word for each bold word plus

10¢ per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

50¢ per word for all words* plus

10¢ per word for each all-caps word.

Non-Subscribers:

Add 20¢ per word to above costs.

*Three words can be bold-all-caps at no extra charge.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE, etc.**, count as **one word** each time used in an ad. Name, address and (one) telephone number, count as **6 words**, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is **required** in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

EXTRAVAGANZA '02

Hosted by the Michigan Antique Radio Club
July 12-14, 2002

Holiday Inn South Convention Center
6820 S. Cedar Street, Lansing, MI 48911
(517) 694-8123

Come join us for our 17th annual convention

This year we are proud to honor a notable mid-western business leader and manufacturer who made a significant contribution to radio broadcasting as well as radio manufacturing. Powell Crosley left a legacy of ingenuity, creativity and productivity from radios, broadcasting and appliances to automobiles that carried his name.

CROSLY

RESTORATION VIDEO!

Come along as a 1936 Philco is transformed from "flea market find" to working museum-ready show-piece! Along the way, you'll get basic tube theory, basic receiver theory, plus learn to trouble-shoot your set, test voltages, rebuild Bakelite-block capacitors, repair an old lacquer finish without stripping, and much more. For beginning- and intermediate-level restorers, or any old radio lover!

run time: 115 minutes

A GREAT GIFT IDEA!

SEND ALL A.R.C. MAIL TO
Antique Radio Classified
P.O. Box 2, Carlisle, MA 01741

SERVICES: Hickok factory authorized contact person, offering affordable, professional service, calibration and technical assistance. **FOR SALE:** Now taking orders for all new Hickok replacement meters for 533A, 600A, 800, 800A, 539A, B and C, 6000, 6000A. A major long established, U.S. manufacturer has agreed to an exclusive production run for me providing I can furnish a large enough order for each type to offset cost of tooling an art work. Cost for 4 & 5 inch Hickok replacement quality meters should be affordable at under \$135 each based on sufficient quantities. You install. First come first served. This deal may not be available later. Please respond before 25 June 2002 for more details. Do not send money at this time. Delivery should be within 45 days after your order is accepted. This would be a good time to order a spare. I expect to sell over 100 each of the more popular models. Inquiries on other models welcome. Satisfaction guaranteed. Please note that the above top quality replacement meters are not manufactured by or for the Hickok Co. but exclusively for Wendell E. Hall. Other service items of interest. New beautiful solid wood carrying cases for Hickok tube testers - \$150 to \$195. Cut your old radio troubleshooting time by as much as 90%. Learn to service and align radios like the pros by using this 100 page copy of service by signal substitution. Several hundred of your fellow technicians have made great progress with this system. Now it can be your turn for only \$15 including S/H. Satisfaction guaranteed.

MESSAGE: See last issue of A.R.C. for other services offered. Service that satisfies for over 58 years. Wendell E. Hall, 3 Mockingbird Cir., Jeffersonville, IN 47130.
