Mr. Peanut says..

Riders Schematics For Peanuts !

REA created the first Riders Professional CD-Series that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we introduce the Riders Standard Series DVD using Riders' indexes for finding "that" schematic that you need occasionally. Priced at a very low introductory price, every collector or restorer who repairs radios should own this DVD. The Riders Standard Series DVD has the equivalent of 6 CD's)

This set runs with Windows on a PC. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio schematics made from 1920 to 1954. Figure it out, 120,000 schematic models equals 806 schematics for a Dollar! This set is not a replacement for our database driven 6-CD set (now offered at a reduced price) but offers the user a complete set of schematics at a very low price, yet with no sacrifice in quality. A true price breakthrough for a legally copyrighted set of Riders. Making illegal copies or using illegally copied Copyrighted products is against Federal Law! Another fine legally produced product from the largest information archive in Radio - REA

Only \$ 149 + \$ 6 S&H (Sold only on DVD)

REA Riders Original Professional Series 6 CD-Set with database search by make, chassis, description and volume at a new lower price - ONLY \$ 299 for 6 CD-Set

Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD)

Cunningham-Radiotron Hi-Rez CD \$ 85

Sam's Photofact Sets 1-175 - 7 CD's, with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)

All 7 Sam's CD's (1-175) - \$ 495.00

Radiophile Vol. 1 - \$ 85

Radiophile Vol. 2 - \$ 85

Radiophile Vol. 3 - \$ 85

Antique Radio Repair Vol. 1 - \$ 85

Antique Radio Repair Vol. 2 - \$ 85

R390-R390A/URR Technical CD - \$ 57

RCA Radiotron Handbook - \$ 67

RCA HB-3 Tube Manual - \$ 80

Zenith Trans-Oceanic - \$ 89

The Radio Boys - \$ 44

Amos 'N Andy - Vol. 1 - \$ 26

Sam's DialCord series - \$ 49

Collins Radio - Receivers - \$ 79

Collins Radio - Xmtrs/Amps - \$ 79

Collins Radio - Transceivers - \$ 79

Collins Radio - Accessories - \$ 79

Complete 4 CD Collins Set - \$ 279

RCA Service Notes - 4 CDs covering sets manufactured from 1923-1928, 1929-1932, 1933-1936 and 1937-1940. The most detail you will find on old sets. \$ 79 each. 4-CD set - \$ 299.

REA-Riders Complete Index - \$ 34

Record Changers - \$ 85

Military Radio V1 - (Compendium) \$ 57

Military Radio V2 - (Compendium) \$ 57

QST Series - 80 years of QST (1915-1994) in 11 sets of CD-Rom's @ \$ 39.95 per set or \$ 373 for all 11 sets

The Hallicrafters CD-ROM - \$ 89

Special Editions:

Collins R1051B technical manual - \$ 79

Collins ART-13 technical manual - \$ 39

Collins 618T technical manual - \$ 79

Collins 651S-1 technical manual - \$ 79

National R1490GRR17 technical manual - \$49

Dept. of Commerce - 1929 Ham Call Book - \$ 29

ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, 498-A Cross Street, P.O. Box 2, Carlisle, MA 01741. Periodicals postage paid at Carlisle, MA, and additional mailing offices. Telephone: (866) 371-0512, 9:00 AM to 5:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are \$39.49 by Periodicals mail and \$57.95 by First Class mail.

Annual foreign rates. By air: Canada - \$61.00; Mexico - \$67.00; Other foreign countries - \$105.00. Surface mail: Canada - \$51.00; Other foreign countries - \$58.00. (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two-year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

Please, no classified ads by telephone, thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

To Americans, July 4 means the celebration of what we are — a free and democratic society. It also means the high holiday of summer fun set against the backdrop of patriotism. That patriotism has taken on a new intensity since September 11, 2001, which joined December 7, 1941, as a "date that will go down in infamy." Flags are much more in evidence everywhere, and not just for the holiday, as people seek to express pride in their allegiance to the symbol of "liberty and justice for all."

Some folks do it in a very individual way. A case in point is Norm Hertz's America crystal set pictured on our cover and featured in a short article. Norm's set was on display at the AWA Conference last fall — a perfect photo op for A.R.C. When we read Norm's account of his motivation for creating the set, the photo became an obvious choice for the July cover. What better expression of the patriotism that is the essence of the July 4th holiday?

Of course, our national holiday doesn't preclude our international interests because thinking "global" has become the way of the world. We're pleased to present an article by Bob Murray, our contributor from the north who usually keeps us informed about Canadian sets. This time Bob writes about an Eisemann radio, which is a truly international set, as Eisemann Magneto was the American sales agent for a German company.

My particular interest in Bob's article stems from the two Eisemann sets in my collection, one of which pictured in an ad has been added to the article. A measure of how little information there is on Eisemann is to note that even Alan Douglas' 3-volume *Radio Manufacturers of the 1920s* has only one page on this company.

Back to perhaps the most American of companies — RCA and Victor. Paul Bourbin has some compelling theories about why RCA was so eager to purchase the Victor Talking Machine Company. Control of performers' contracts and home entertainment programming, and more — all make interesting reading.

And just when you thought you'd heard everything about what collectors will collect, read about

PRINTED WITHOUT COMMENT

We have received several reports from classified advertisers of a response via e-mail to their classified ads proposing paying for the item via a third party. The payment would be in excess of the purchase price, and the seller is asked to refund the difference to a foreign address.

As always, we suggest that you know your buyer and seller or ask for references that he has done business with to minimize problems.

Marvin Hess and his transistor radio batteries. This should be a radio wife's dream, as batteries don't take up much room and can be tucked away in a drawer.

Photo Review also has an international flavor and a wide range of period and types — from the 1920s to the 1960s, foreign to domestic, crystal sets to superhets, home brews to novelties. Something for everyone.

For some time now, no issue of A.R.C. has been complete without a Ray Chase auction report. Ray does us a great service, and if you go to any of the auctions Ray attends, you might look him up to add to our thanks.

This Estes auction of the Ken Blakeman collection offered over 600 items and totalled more than \$114,000. As Ray points out, half of the total came from only 11 items, several of which brought over \$5,000. A Marconi 106 went for \$20,000. Any collector of early battery sets who did not attend, like me, might kick himself because he didn't make an effort to join in the spirited bidding.

Radio Miscellanea puts on record the strong response we get to articles. It's gratifying to know that you find them generally interesting and useful. Also we're glad to have corrections, warnings, questions, and just plain news. Thanks to all who take the time to write.

A.R.C. Benefits. Be sure to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; the web: www.antiqueradio.com; Discover, Visa, American Express, and MasterCard accepted; books shipped free in the U. S. by book rate; and to current subscribers, a ten percent discount on all book orders.

Coming Radio Events. The summer is always the optimum time for radio collecting activities. Events total 41, so you shouldn't have to travel far to join in at least one. There are 27 meetings, 11 swap meets, 2 auctions and a repair workshop at VRPS in Irving, Texas, on July 19. Major 2-day events are the annual Extravaganza in Lansing, Michigan, on July 11 and 12 and the Museum of Radio and Technology meet and auction on July 18 and 19, in Huntington, West Virginia. These events are the heart and soul of radio collecting, so spread the word.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Our 4th of July cover pictures the centerpiece of Norm Hertz's display at last fall's AWA Conference in Rochester, New York. The complete display is shown on page 9. Norm's account of his creation of "folk art" with a crystal set as the focus is a patriotic statement that we can all appreciate.

WITH THE COLLECTORS

Eisemann Radios from Modular Parts

BY BOB MURRAY

Atwater Kent was known for its use of modular subassemblies in its breadboard radios. However, a lesser known company took the same approach and failed. Bob Murray explains. (Editor)

Excuse me if you have heard this before, but why does one company prosper while another one fails? The company in question is the Eisemann Magneto Corporation of Brooklyn, New York. This company was the American sales agency for Ernst Eisemann & Co. of Stuttgart, Germany, makers of automotive magnetos (and not related to Freed-Eisemann).

Eisemann Magneto entered the radio market in the second half of 1922, placing ads in *QST* and *Radio Broadcast*. From its history in the magneto business, the company had the techniques and equipment to manufacture attractive modular radio compo-

nents using drawn metal and Bakelite castings. Its "radio units" were advertised to have simplified set construction since there were fewer parts to connect. Being in the auto parts business, the

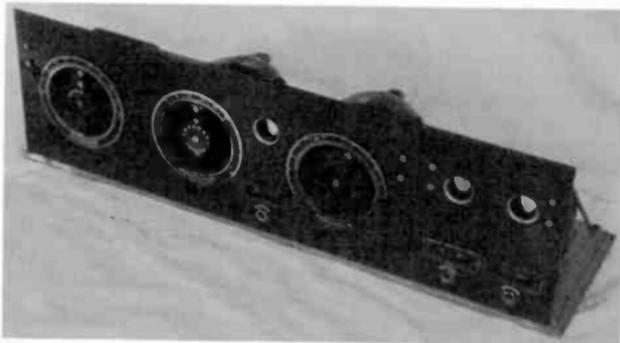

Figure 1. A front view of the Eisemann radio that utilizes modular components. The larger panel on the left, designated as the TD-3, contains the RF components. It is distinguished by the three large tuning dials and a single peephole. The smaller AF panel, the A-2, on the right features two peep holes for its tubes and two phone jacks.

Figure 2. This rear view shows the Eisemann modules.

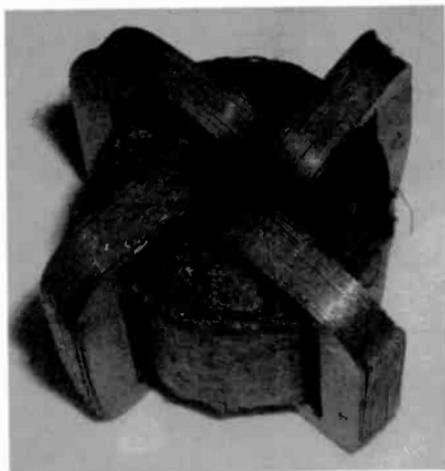

Figure 3. Eisemann used an unusual design in his audio transformers as illustrated in this internal view.

company presumably had a ready-made dealer network that gave it market access. Does this situation remind you of another contemporary radio company?

Eisemann Magneto modules were designed to be attached to one of several aluminum panels that were available, providing shielding of the set from the operator's hands. The panels were finished in black wrinkle paint. The home builder

Figure 4. An Atwater Kent Model 4 that shares features and design with the Eisemann radio.

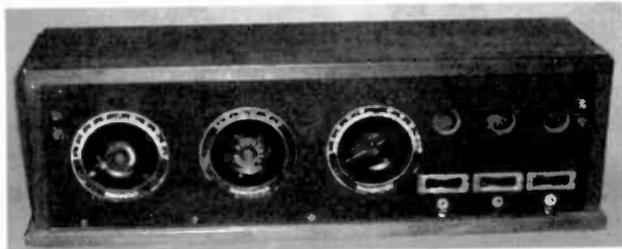

Figure 5. An Eisemann set from the Editor's collection.

would often be tempted to enclose the set in a rectangular box because of the shape of the panels.

MY EISEMANN MAGNETO RADIO

I chose to assemble this set on a breadboard, for ease of comparison with an Atwater Kent set of a similar age and design. The two panels shown in Figure 1 are the larger TD-3 on the left and the smaller A-2 on the right. These designations possibly indicate tuner-detector and amplifier. A rear view of the panels is shown in Figure 2.

The set consists of a tuning condenser, a variometer, a detector module, a variocoupler, and two audio amplifier modules. These parts represented most of the component modules made by Eisemann at the time. The completed sets were attractively colored in black and beige. Black was a popular color of technology at the time; for example, it was a common color for cars, typewriters, cameras, etc.

The variometer and variocoupler were made from glossy black Bakelite with cloth-covered windings covered presumably with shellac. The audio transformers were covered with cylindrical cans. They were designed to admit a mounting screw down through the center of the transformer. Figure 3 shows the internal construction. The detector and amplifier rheostats were custom designed to mount horizontally and fit neatly under the tube sockets.

I acquired this set still wired, although somewhat roughly, by the original owner. I traced the circuit and restored the set with its same hook-up. I then recognized that I had essentially the same circuit as the Atwater Kent Model 4, shown in Figure 4. Both sets use a variocoupler as a tuning device and a variometer as a means of regeneration control. The Atwater Kent 4 took advantage of the inductance of the variocoupler and the capacitance in the aerial to provide a tunable circuit resonant in the Broadcast Band. The Eisemann used a variocoupler and a tuning condenser to achieve the same effect. In other respects, the two sets were equivalent.

Figure 5 shows a similar Eisemann set from the Editor's collection and an advertisement from QST for the RF-2 receiver, another similar set, is shown on the following page.

It remains a mystery, to me at least, why Eisemann and Atwater Kent, starting with an apparently level playing field, went on to have such different experiences in the radio business. Eisemann appears to have abandoned radio and radio parts production in 1924 to return to magneto manufacture. Atwater Kent proceeded to enjoy conspicuous success. Does anyone know why?

(Continued on following page.)

Introducing — A new Broadcast Receiver

Type RF-2, a receiving set of surpassing excellence is offered to the radio public.

Radio frequency amplification at its best is employed—a transformer-coupled tuned radio frequency circuit, with two stages of audio frequency amplification.

There are but two controls and tuning is extremely simple. Extraordinary sensitivity is combined with a high order of selectivity. Broadcast programs from far distant points are received with marked clarity and volume.

The assembly of instruments is encased in solid mahogany.

SEE IT! HEAR IT! COMPARE IT!

In the over 20 years that Bob Murray has been collecting radios, he has gradually come to emphasize radios made in Canada during the 1920s. He is interested in research into their past and in their restoration. His collection numbers over 200.

WITH THE COLLECTORS

The "America" Crystal Set

BY NORM HERTZ

When reporting on the annual AWA Conference and Auction at Rochester, New York, in our December 2002 issue, we showed Norm Hertz's prize-winning contest display, which he called the "America" Crystal Set. The photo leaped out as the perfect choice for the Fourth of July cover. The choice seemed worth a six-month wait. (Editor)

The "America" crystal set is a crystal radio built into a ceramic form in the shape of Uncle Sam's top hat. In its red, white and blue colors, this set may be considered a work of folk art.

Folk art often documents an individual's response to critical moments in American history. Symbols of liberty, for example, became common images as soon as the nation had declared independence. They are also common in times of war. Liberty figures, American flags, and Uncle Sam are among the images adapted to the forms of weathervanes, quilts, textiles, and other decorative arts.

Shortly after September 11, 2001, I was inspired to create a work of folk art that would be dedicated to the spirit of America in this trying time. If folk art can take many different forms, I reasoned, why not in the form of an antique crystal radio. The final work would connect my love for collecting antique crystal radios with my love for this great country.

Since I was born and raised in Lower Manhattan, and later worked in the downtown area, I spent the greater part of my life close to where these buildings lay, both before and after their construction. Even my job took me to frequent meetings inside the twin towers to meet with other city and state representatives. In the period prior to the twin towers construction, I had been fortunate to be able to purchase radios and parts from the Radio Row shops in those early days.

BUILDING THE SET

In order to give this work special significance, I selected only materials that were related in

Norm Hertz's complete "America" Crystal Set display as it appeared at the 2002 Antique Wireless Association Conference

some way to the twin towers. The ceramic form came from a small shop that lay in an adjacent side street in the shadow of the towers. All of the hardware, taps, switches, as well as the crystal detector and inner coil assembly, came from Cortlandt Street, which existed in the area before the great buildings were erected.

By selecting these materials "native" to the site from two different time periods, I felt that I had also established a connection between the past and the present. In completing this work, I had unified these elements into a form that celebrates both America and radio. America reigns as the land of liberty, and radio is symbolized as the voice of liberty in the 20th century.

To preserve the uniqueness of this crystal radio, I made only two sets. One went to another member of the radio-collecting community, who shares a common interest in antique radio and a patriotic spirit. This last set will remain with me as a constant reminder of my love for our hobby and for this great country, which I pray will always remain proud and free.

(Norm Hertz, 4904 Amboy Rd., Staten Island, NY 10312)

WITH THE COLLECTORS

The "True" Reasons RCA Bought Victor

BY PAUL JOSEPH BOURBIN

Due to a filing error, the following article was put "on hold" in our system. Despite the lapse of time since the letter that inspired the article was published, the topic continues to pique interest and promote further discussion and research. Responses are always welcome. (Editor)

I read with interest the letter to the Editor written by Oliver Berliner in the August 1999 issue of A.R.C. He states that Radio Corporation of America bought the Victor Talking Machine Company in 1929 to acquire the vast manufacturing and distributing system owned by Victor, as well as the most famous trademark. Indeed, this has been the official reason given since the purchase and is correct to a point. I feel that there were other reasons RCA bought Victor that were equal to RCA's need for manufacturing and distribution facilities.

THE ROLE OF FRED GAISBERG

At the very beginning of the phonograph industry, Fred Gaisberg started to make recordings for Columbia from both sides of the horn. During one of the early industry upheavals, he started working for Berliner's Gramophone Company as a recording engineer. He wisely determined, if recordings for home entertainment were to be profitable, the recordings would have to be of famous bands, singers, etc., that people knew and wanted to hear.

This concept was quite different from that of Edison who believed that people just wanted to hear the song or tune. He seemed uninterested in acquiring the services of famous performers and probably was not interested in paying their fees.

During another upheaval in the phonograph industry, Fred Gaisberg started working as a recording engineer for Eldridge Johnson's Victor Talking Machine Company. In addition to making the records, he had to hire the people to perform in front of the horn. His musical training and engaging nature aided

him in securing the services of many of the greatest performers in the world. This brought Victor into preeminence amongst record companies. Fred Gaisberg became the senior recording expert for Victor, and later RCA, until his death.

Since Victor was the best known company, it was not difficult for Victor to sign exclusive recording contracts with most of its famous artists. Victor's lawyers were clever enough to write the contracts to prevent Victor artists from performing on radio without express permission from Victor. The management at Victor was very reluctant to permit its artists to perform on radio and only gave permission on special occasions. Victor viewed radio as a serious competitor and rightly so. The sales of records had started to decline with the advent of radio broadcasting, and the radio set was starting to displace the phonograph as the premier provider of home entertainment.

RCA AND CONTROL OF HOME ENTERTAINMENT

Meanwhile, RCA was in the business of selling radio sets regardless of the manufacturer. Doc Herrold (founder of the predecessor of KQW) knew, as did Westinghouse (founder of KDKA and manufacturer of radio sets) that, if you want to sell radio sets, you have to give the public something to listen to. One of the reasons RCA started network radio was to provide high quality radio programs to a large audience. This would stimulate the sales of more radios. It also would allow great profits to be made from the sale of advertising.

One major obstacle was in the way — Victor had exclusive contracts with many of the great performers of the time. Think of these contracts as having the same effect as the patent monopoly did for RCA earlier in the decade. Control of patents and/or exclusive contracts would give RCA much power. Therefore, a major reason to acquire Victor was to own the performers' contracts that were a part of Victor's

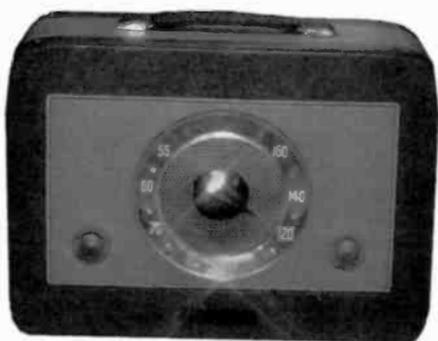

The progression of corporate logos that resulted in the RCA Victor logo. Left is the Victor Talking Machine Company's symbol taken from an original painting in 1901 by Francis Barraud, showing the dog "Nipper" listening to a Victor Type B phonograph. This trade mark was captioned "His Master's Voice." Center is the early Radio Corporation of America's logo, sometimes including the words "World Wide Wireless." Right is the familiar RCA Victor logo which incorporates both company symbols.

PHOTO REVIEW

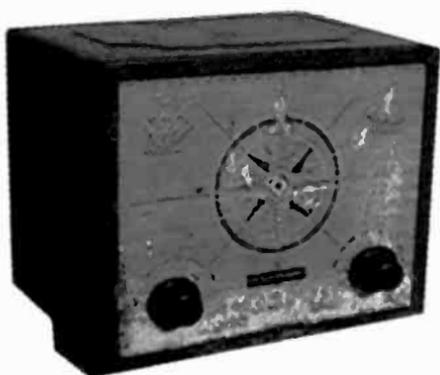

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

FIRESTONE MODEL 4-C-21 – This portable set hit the retail shelves in 1952. Specifications are BC band, 5-tube, AC/DC/battery operation. The case is two-tone leatherette. (*Michael Comer – Haslett, MI*)

KEG NOVELTY RADIO – This 6-transistor radio in the shape of a wine barrel was manufactured in Japan. It operates on a 6-volt battery. The keg tap is the on/off/volume switch, and the top plug is the tuning knob. (*John Phipps – St. Charles, MO*)

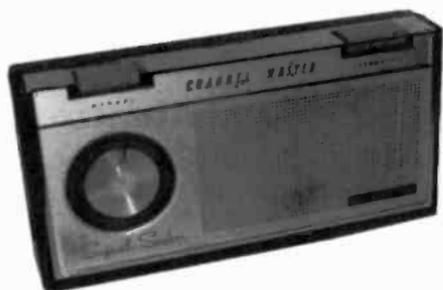

CROSLY, MODEL UNKNOWN – This 2-tube radio was manufactured by the Crosley Radio Company, then owned by Avco. The simple circuit uses only two tubes: (1) Type 12A7 and (1) Type 6F7. The front of the radio is the speaker. Does anyone know the model number? (*Geoff Shearer – Centreville, VA*)

AIR KING HOMEBREW – This nice-looking receiver was built by the late Bob Herbig of Oceanside, California, in the 1950s. It was made to look like a typical set of the 1920s. Bob was known for his beautifully engraved panels. (*Wally Worth – Wollaston, MA*)

PHOTO REVIEW

CHANNEL MASTER MODEL 6459 – This 10 transistor portable was manufactured in the late 1950's or early 1960's. It was marketed as the "Signal Seeker" which featured a motor in the rear that automatically tuned the stations by depressing the right-hand button. The left-hand button is for tuning manually. (Gerald Silver – Tamarac, FL)

DTW TYPE D.E. 3 – This German Crystal set has seven different plug-in crystal units. It was manufactured in 1926 by Deutsche Telephonwerke and Kabelindustrie A-G. The front panel is aluminum. (Erwin Macho – Vienna, Austria)

MIDWEST MODEL 18-36 – This high-end console was manufactured in 1936 by the Midwest Radio Company of Cincinnati, Ohio. It tunes 6 bands and uses 18 tubes in its chassis. It was found recently in a local yard sale and purchased for \$50. (Claude Chafin – Independence, MO)

UNIVERSAL MODEL 42 – This cathedral was manufactured by the Universal Radio & Television Corp. It has a 4-tube TRF chassis using (2) Type 24s for RF amps, (1) Type 47 for audio and (1) Type 80 as a rectifier. It sold for \$160 in 1932. (Jerry Wieland – Hoffman Estates, IL)

AUCTION REPORT

Estes Auction — Ken Blakeman Collection Burbank, Ohio — February 22, 2003

REPORTED BY RAY CHASE

Initial publicity and Web site photos indicated that the Estes radio auction for February 22, 2003, in Burbank, Ohio, would be one not to miss. The consignee, Ken Blakeman, was a collector of early battery superhets, including many Silver-Marshall radios, as well as other goodies from the 1920s and 1930s. Unfortunately, many of the radios were not in the best of condition, were incomplete, or were heavily modified; others were more recent home brews, some of which were only partially complete. On the other hand, there were some high quality early superhets, along with a few other outstanding early wireless sets and some other top quality items.

To illustrate the contrasting conditions, there were 600 lots that sold for a total sale price of \$114,302, yet only 11 of those 600 sales yielded over 50 percent of the total dollars taken in. Some of the high fliers were a Marconi 106C receiver selling at \$20,000; a Wireless Specialty IP-501 receiver in superb condition at \$17,500; a Wireless Specialty IP-501A at \$7,000; a Scott Philharmonic console at \$5,500; a Scott Imperial console at \$3,100; two Western Electric 6-foot long theatre horns and drivers at \$2,400; an Atwater Kent 9 breadboard, with tubes, at \$2,000, and so on.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

This glass display case shows just how diversified the Blakeman auction items were. It included phonographs, Catalins, speakers, early board components, plastics and more.

Some of the horn, cone, drum and cabinet speakers for sale.

Still, there were many bargains, and, in general, prices were nominal or low especially for the early superhets. These did not get the attention I thought they deserved, but then, that is one of my collecting specialties, so maybe I'm biased.

Interestingly, the consignee for most of the radios was a gentleman from Syracuse who was present during the auction. I guess the sight of most of your collection leaving your hands may not be as traumatic as one would think. Estes Auctions is increasingly the place to go to acquire radio collectibles that do not seem to be showing up any more at radio meets or conferences. Richard Estes does the auctioneering himself, going non-stop from 10:00 A.M. to 5:00 P.M. without a break. The man has stamina.

All sales were not recorded; many parts lots and low value sales were omitted. I try to get

This striking Timmons Concert Grand cone speaker with a sailing ship design brought a high bid of \$450.

model numbers whenever I can, but sometimes I only get partial numbers or make an error in recording. My apologies if a model number does not look correct. All prices are rounded down to the dollar.

e=excellent, vg=very good, g=good, f=fair, p=poor, unk=unknown condition, N.O.S.=new old stock, wk=working, nwk=not working, WT=with tubes, NT=no tubes, BB=brass based, TT=tipped tube, SW=shortwave, PS=power supply, PB=push buttons.

RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

On the AC-Powered Regen

Dear Editor:

I enjoyed reading Douglas Fox's article on the 3-tube AC-powered regen in your June 2003 issue. I also have one of those radios. My late father, J. Albert Warren, a well-known antique radio collector, built it from a kit that he had purchased around 1947. I'm pretty sure that the kit was produced by Meissner Mfg. Co. of Mt Carmel, Illinois. If I ever run across the instructions that came with it, I will know for certain whether or not I'm right about the manufacturer.

I used to use that radio a lot when I was a child, and it really worked great. I used to connect a Radiola 100-A speaker to it, and the volume output was loud enough for comfortable listening in all parts of a large room.

The only plug-in coil that I ever used with the radio was the coil that came with the kit; this was the coil for the standard broadcast band. Coils for various other frequency bands could be purchased by mail order from the company that manufactured the kit.

Thanks so much for publishing your wonderful magazine. Keep up the good work.
Bob Warren, Dalton PA

Engraving with Vibrating Tools

Dear Editor:

With the accelerating value of our old radios, some folks have engraved their driver's license number, etc., on the bottoms of their radios with vibrating tools. Tubes should be removed before engraving, especially the old delicate 4 pins and balloon types. These tubes cannot withstand that kind of vibration and can be damaged internally.

I experienced this problem after purchasing a portion of a collection where there was a 20 percent tube failure rate at test. All the radios were engraved on the bottom as a theft deterrent.

Save your scarce tubes! Take them out before you engrave!

Byron Bemor, Acton, CA

Articles Hit Right Note

Dear Editor:

I considered letting my subscription expire; however, in your June anniversary edition, there were two articles that sold me again.

Since this is the garage sale season here, I recently picked up one of those "Picnic Portables," as well as a 2-tube regen, so those two articles in the June 2003 issue really hit the right note. I only wish they had both been longer.

Enclosing a check for another year. Keep up the good work.

John H. Moser, Brewster, OH

That's our goal — good work leads to good subscribers. Thanks for your continuing support. (Editor)

Flabbergasted by Article

Dear Editor:

I just ran across your web site and read the article from your January 2002 issue by John Hagman on restoring an RCA Model 128 radio. I was flabbergasted because I have one of those radios in working condition on my desk. I obtained it from my father-in-law back in 1958 after he had used it for many years in his Ohio home. It was not working at the time and needed some minor refinishing from wear over the years. I replaced a tube and refinished portions of the cabinet. It has worked fine ever since, although not used on a daily basis.

John Glenick, Beltsville, MD

Seeks Info on Philips L6X38T

Dear Editor:

This is a real long shot, but I would like to know if anyone knows how to take a Philips L6X38T apart. Many thanks.

John R. Bartlett, Southbend, Essex, England

Ken McIntosh — An Old Friend

Dear Editor:

Our hobby lost a great asset on May 15 when Ken McIntosh passed away. We repaired many radios over the years and shared a common philosophy on collecting radios. We both tried to remember that they're just radios. They don't save lives or slack hunger; they're just old radios. Both of us would rather have had a new acquaintance than another radio, and I'd gladly trade every radio I have to see my old friend again.

Steven VanderLinden, Winston-Salem, NC

Ads Work!

Dear Editor:

Thanks you for your help. Your ads work! Keep up the good work.

Florian A. Rogowski, Warren, MI

Article Correction

Dear Editor:

The article in the June 2003 issue by Dave Crocker regarding the Atwater Kent Model 8 carries a misleading statement. Early articles by Ralph Williams did not mention the Model 8, but in 1999 AWA Review, Volume 12, he discusses both the Model 5 and 8 with pictures on pages 48 to 53. It's possible Dave did not have a copy of that book, since it has been sold out.

Elinor Williams, Orient, NY

Dave sends his regrets and acknowledges that he missed the coverage of the Model 8 in Vol. 12 of the "AWA Review." (Editor)

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. **Do not** send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and non-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below: see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you or your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29c each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) *Free words* cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike: for example 1, l and I (the number one, the capital i and the small l.) Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "co-rect" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

CLASSIFIED AD DETAILS

Deadline: NOON ET— 10th of the month!

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE.** This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is **required** in all classified ads; we will add it if you forget.

Classified Ad Rates per Month

Subscribers:

- First 20 words: **FREE***
- 29c per word for extra words over 20 plus
- 10c per word for a shaded ad (count all words including free words).
- * Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47c per word plus
- 10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

- 40c per word for all words,* none free, plus
- 10c per word for each bold word plus
- 10c per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

- 50c per word for all words* plus
- 10c per word for each all-caps word.

Non-Subscribers:

- Add 20c per word to above costs.

*Three words can be bold-all-caps at no extra charge.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing (If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE, etc.**, count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is **required** in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

42ND ANNUAL AWA HISTORICAL RADIO CONFERENCE

Antique Wireless Association, Inc.

Wednesday-Saturday, August 20th-23rd

RIT Conference Center (formerly Thruway Marriott)

Rochester (Henrietta), N. Y.

(585) 359-1800 for reservations

Easy access from the New York State Thruway

(I-90), I-390, or Rochester Airport

Four days of outstanding activities for
the radio collector and historian

- Note: All activities are open to AWA members only. Please contact the secretary for complete information.
- We will also feature a huge flea market, several auctions, visits to the AWA Museum and Annex and the popular Old Equipment Contest. An indoor Book Fair and Ladies Luncheon plus a sight-seeing trip are also planned.

2003 AWA Conference Programs:

Theme: Frequency Modulation

(Tentative schedule)

Wednesday

11:00 AM AWA Member's Forum discussion of activities led by president Geoff Bourne.

2:00 PM Shortwave and Commercial Radio, by Bart Lee.

4:00 PM Key & Telegraph Seminar moderated by Tom Perera, panel will include Gil Schliehman and Franz Pichler, Russ Kleinman.

7:30 PM Moonlight Restoration Forum, hosted by Marc Ellis.

Thursday

9:00 AM Early Television Development with Peter Yanczer.

10:30 AM FM History, a paper presented by Ludwell Sibley.

1:00 PM Who Really Invented the Transistor? by A.C. Sheckler.

3:00 PM The Status of Radio Museums. Panel discussion led by John Terrey. Curators from prominent museums will address activities and concerns.

Friday

3:30 PM Review of Amateur Operation, John Rollins, W1FPZ.

Saturday

9:00 AM The Slide Wire Bridge, operation and history by Dale Goodwin.

10:30 AM Pre-1912 Wireless & Electrical Apparatus, discussion and display of early devices, Lauren Peckham, moderator. Members are encouraged to bring items in either category.

Complete conference schedule and registration material
will be included in the August issue of the OTB.

For Details Call: (607) 739-5443. Secretary: Joyce Peckham, AWA, Box E, Breesport, NY 14816.

“The Scott McCluskey Collection” Vintage Radio Auction

Saturday, August 16, 2003 at 10 AM EDT
at the Expo Auction Center, 8157 Garman Rd.,
Burbank, Ohio, Exit 204 off Interstate 71

Estes Auctions is pleased to offer the Scott McCluskey collection from Michigan. This collection offers a huge selection of radios. Scott collected cathedral and tombstone radios, Detrola radios, hundreds of tubes, many blue Arcturus, console radios, including Zeniths, speakers, test equipment, advertising, parts sets, tube checkers, transistor radios. We will have an ad in the August A.R.C. with the highlights and flyers at MARC Extravaganza. We will be set up under the tent.

RADIO RESTORATION PARTS

Vacuum Tube Repair Wafers

These wafers are solid-state devices for quick and easy repair of early vacuum tubes. The wafer is installed by simply sliding it over the tube pins and reinserting the tube into its socket. If the filament is intact but there is little or no emission, the filament may be lit for best visual effect. However, the tube can be open filament.

No change in radio operating voltages is required. Any number of tubes may be repaired in a radio. If wafers are installed on all tubes, the B+ voltage typically may be reduced without sacrificing volume or sensitivity. Performance will vary between radio models. For best results, order one (1) "D" detector wafer for each radio. **\$10 each** (3 or more, **\$7.50 each**)
