## WANTED

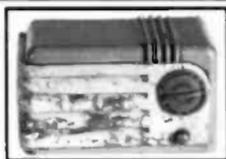

### AIR KING SKYSCRAPERS

PAYING **\$14,500.00+** for near mint condition red or blue  
**\$10,000.00+** for green, lavender or yellow  
**\$3000.00+** for black and **\$2000.00+** for white or brown  
**ALSO WANTED ANY COLOR-ANY CONDITION**  
**COLLECTOR PAYING TOO MUCH, CALL ME LAST**

### TOM THUMB CATALIN RADIOS WANTED

paying **\$6,750.00+** for mint cond. red, green, orchid, blue  
**\$2,500.00+** for any mint condition one  
**ALSO WANTED ANY COLOR-ANY CONDITION**

### DETROLA PEE WEE & SUPER PEE WEE WANTED

paying **\$600.00+** for mint cond. black, white  
**\$1,450.00+** for beetle, gray, salt & pepper  
**\$2000.00+** for red, blue **\$3500.00+** for green or lavender  
**ALSO WANTED ANY COLOR-ANY CONDITION**

### WANTED ANY CATALIN RADIO

ADDISON 2 MAROON & N & YELL. W \$900.00, YELL. W & RED \$3,750.00  
 ARVIN 532 ANY 144 OR \$2,500.00, BENDIX 526 GREEN & BLACK \$625.00,  
 DeWALD A501, A502 HRO 90N \$375.00, YELL. W \$425.00, RED \$1,200.00  
 EMERSON AU 190 & BT 245 YELL. W \$1,300.00, GREEN \$2,500.00,  
 DARK RED \$2,700.00, BLUE \$6,850.00, BRIGHT RED \$11,000.00  
 ESPEY MIDGET, YOU NAME THE PRICE I WILL PAY IT!  
 EMERSON BM258 YELLOW \$750, GREEN \$1,350, RED \$2,150, BLUE \$4,000  
 EMERSON 564 BLACK \$500.00, GREEN \$1,150.00, RED \$1,650.00  
 FADA L56, F55, 52, 5F50, 5F60, 136, 53X, YELLOW \$1,500.00, LT GREEN \$1,750.00  
 MAROON & YELLOW \$2,200.00, YELLOW & BLUE \$2,500.00, YELLOW & RED \$3,100.00,  
 EMERALD GREEN & YELLOW \$7,000.00, BLUE & YELLOW \$7,000.00,  
 FADA 115, 116 & 1000 ALL YELLOW \$700.00, MAROON & YELLOW \$950.00,  
 YELLOW & RED \$1,150.00, PEA GREEN \$1300.00, BLUE & YELLOW \$2,550.00  
 GAROD 6AU1 MAROON \$675.00, YELLOW & RED 1,350.00,  
 RED & YELLOW \$1,450.00  
 HALSON ANY COLOR \$1,500.00 TO \$5,000.00  
 MOTOROLA 50XC ALL YELLOW \$1,750, BROWN & TORT \$2,750.00,  
 RED & YELLOW \$6,000.00, GREEN & YELLOW \$6,250.00,  
 MOTOROLA 52 YELLOW & TORT \$1,500.00, MAROON & YELLOW \$1,850.00,  
 GREEN & YELLOW \$2,900.00,  
 SONORA KM ANY COLOR \$1,600.00,  
 SENTINEL 284 WAVEY GRILL YELLOW \$700.00, SAND 950.00,  
 RED 1,450.00, BLUE 6,500.00  
 SPARTON CLOISONNE ANY COLOR \$3,500.00 TO \$5,500.00, EMERSON 520 \$50.00

always buying any catalin or pre-war colored bakelite radios  
 We will buy one piece or the entire collection.

"watch out there's a new guy in town"

## Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has just released the first DVD-ROM publication at a break-through introductory price. REA created the first Riders Professional

CD-Series that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we introduce the Riders Standard Series DVD using Riders' indexes for finding "that" schematic that you need occasionally. Priced at a very low introductory price, every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. Introductory Offer - Limited Time - A professional produced product.

**Only \$ 150 + \$ 6 S&H (Sold only on DVD) -  
Introductory Price - Reg. Price \$ 199**

### Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD).....  
Cunningham-Radiotron Hi-Rez CD \$ 85 .....  
Sam's Photofact Sets 1-175 - 7 CD's, with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)  
**All 7 Sam's CD's (1-175) - \$ 495.00** .....  
Radiophile Vol. 1 - \$ 85 .....  
Radiophile Vol. 2 - \$ 85 .....  
Radiophile Vol. 3 - \$ 85 .....

If A.R.C. inadvertently has infringed on a copyright, A.R.C. will pay an appropriate usage fee when notified.

**POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.**

Printed in U.S.A.

**PURPOSE:** Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

### STAFF:

**Publisher and Editor:** John V. Terrey

**Assistant Publisher:** Cindie Bryan

**Managing Editor:** Dorothy Schecter

**Office Manager:** Pat Wedge

**Advertising Manager:** Cindie Bryan

**Issue Coordinator:** Pat Wedge

**Publishing & Editorial Staff:** Ray Bintliff, Dave Crocker, Bobby Lyman

**Founding Publisher/Editor:** Gary B. Schneider

**Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Paul J. Bourbin, Norman Braithwaite, Dave Crocker, Dick Desjarlais, Alan Douglas, Richard Foster, Jim Kreuzer, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White, Ralph Williams, Walter Worth

**CONTACTING ANTIQUe RADIO CLASSIFIED.** All correspondence should be to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.

Only UPS, FedEx, etc. items to street address: 498-A Cross Street.

Telephone: (866) 371-0512; Fax: (978) 371-7129

E-mail: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com)

Web: [www.antiqueradio.com](http://www.antiqueradio.com)

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

## EDITOR'S COMMENTS

The long, lazy days of summer suggest the need for a wake-up call — a way to counter the “dog days” often associated with August. And so we decided to try something different in this our twentieth summer. Why not a contest inspired by our cover photo, contributed by Mike Grimes? “Name the radios” is the challenge. We invite you to come up with a list based only on the radios on the cover, not on those in the fuller photo on page 13. Send your entry by any means you wish, but please include your full name and postal address.

The pile of “scrap” in this photo cries out for some sort of organization. Please start from the top and work left to right, row by row, to the bottom. Since there is no way for us to really identify each radio in the old photo, of course, there is no megabucks prize, just the pleasure of knowing you’re among those who can identify the “dear departed.” We expect that there will be more than one “champ,” and we’ll publish the best entries in a future issue. Perhaps there will be debates about what’s what in the photo, and that will add to the fun of the contest. We look forward to hearing from you.

In contrast to the “scrap heap” radios on our cover, Thomas Boyd’s 1934 “All Star” kit radio, the subject of our lead article, has no identity crisis. Thomas didn’t just find the kit; instead, he did the research and validated it as a kit. An article followed, and all of us are the richer for this process.

Kit construction might be added to Jim Menning’s article that is full of sound advice to “newbies” who want to learn more about radio collecting. In a detailed way, Jim takes on the educational component so necessary to the encouragement of new collectors. He aims the inquiring person in the right direction, and what is even more important, invites him to consult the newsgroup any time. Such an ovation to newcomers is essential to our common goal — radio preservation.

Newbies might well aspire to the long experience of the late Alton DuBois. Our files still contain a number of unpublished Alton “Vignettes” about his life as a TV serviceman, which, of course, had many a humorous twist. It’s a good legacy.

On the other hand, we’re not necessarily encouraging newbies to go as far as Jack LaVelle and acquire a large radio-related tattoo. In a “Collector Profile,” Jack describes how a Kolster K20 got him hooked on radio and led to his museum of over 500 items. Interesting

## PRINTED WITHOUT COMMENT

We have continued to receive reports from classified advertisers of a response via e-mail to their classified ads proposing paying for the item via a third party. The payment would be in excess of the purchase price, and the seller is asked to refund the difference to a foreign address.

As always, we suggest that you know your buyer and seller or ask for references that he has done business with to minimize problems.

though that is, Jack’s giant tattoo might be an even bigger draw. However, his tale of the painful process of acquiring the tattoo will guarantee its being unique.

As for the educational component of radio collecting, Walter Heskes and his friend RadioBob are doing their best. They have started with very young candidates — Walter’s five year-old twin boys. Though a five-year-old’s attention span is short, the boys did have some input on the repair of the Hallicrafters S-38A sent as a present by RadioBob. These young newbies are the hope of the future for our avocation.

The present is well taken care of by folks like Ray Chase who never misses sending great auction reports to A.R.C. The Carolina/AWA meet in Charlotte, North Carolina, continues to be a big success. One reason may be the adherence to the “LeMans Start,” which means that sellers, as well as buyers, are not allowed on the grounds until the 8:00 start. How civilized! No one has to get up at 4:00 a.m. and everyone gets a fair start. This is a plan we have found to be most successful at the GBARC meet here in Westford, Mass., every February. Carolina has all the ingredients of a good meet — flea market, auction, camaraderie, and, by Ray’s account, an outstanding contest.

Table models from the 1920s to the 1940s are definitely “in” on the *Photo Review* pages. There are two striking foreign sets, an E.G.L. single-stroke tap bell, and a most unusual Zenith “Twin Midget” set. Variety we definitely have.

In answer to a request from John Bartlett in the July issue, *Radio Miscellanea* contains detailed instructions for disassembling a Philips L6X36, sent by Scott McAuley. We also offer suggestions for solving a Web search problem. Exchanging information: is what A.R.C. is all about.

**A.R.C. Benefits.** Be sure to take advantage of A.R.C.’s benefits: a toll-free number (866) 371-0512; the Web: [www.antiqueradio.com](http://www.antiqueradio.com); Discover, Visa, American Express, and MasterCard accepted; books shipped free in the U.S. by book rate; and to current subscribers, a ten percent discount on all book orders.

**Coming Radio Events.** August events total 36, including two auctions, one in Ohio and one in Michigan. The major events are Radiofest XXII in Elgin, Illinois, and AWA’s 42nd Conference in Rochester, New York. Hope you’ve made your plans to attend.

Happy Collecting!

John V. Terrey, Editor

## ON THE COVER

Our cover photo contributed by Mike Grimes surfaced when the townspeople of Gladwater, Texas, were asked to contribute historic pictures to a town exhibit. This is a “see it and weep” kind of photo when we learn that the old radios were to be used for World War II salvage material. Thanks to Mike for reminding us to be vigilant and to look out for salvage heaps everywhere.

# WITH THE COLLECTORS

## The 1934 "All-Star" Kit Radio

BY THOMAS BOYD

*Tom Boyd revives a bit of radio history for us. Kit radios of the 1930s are not common, and so Tom's research about his All-Star kit find in Texas makes interesting reading. (Editor)*

Kit radios have been around since the 1920s, appealing to hobbyists and the cost-conscious alike. The shortwave craze of the 1930s helped fuel the kit market, and a variety of all-wave receiver kits can be seen advertised in magazines of the period, such as *Short Wave Craft*, *Radio News and Short Wave Radio*, and others. Unfortunately, few of these kit radios seem to have survived.

A number of years ago, I purchased a piece of old tube gear in an antique store in Austin, Texas. Although clearly a receiver, it had no markings indicating its manufacturer. I brought it home and began poring through books and old magazines in hopes of identifying it. Before long, I spotted it in Moore's volume on communications receivers — it was an All-Star, a kit radio from the mid-1930s, shown in Figures 1 and 2. Further research revealed quite a bit more.

In the fall of 1934, Laurence M. Cockaday, editor of *Radio News and Short Wave Radio*, began advertising an all-wave kit radio, which he dubbed the "All-Star," as seen in Figure 3. Initially, he had a group of eight suppliers behind his venture, but this number quickly grew to eleven. The list included some familiar names and some not-so-familiar: Thordarson, Cornell-Dubilier, Hammarlund, Meissner, Ohmite, Belden, Electrad, Crowe Name Plate & Mfg., Erie Can, Oxford Radio, and Oak Manufacturing. The kit could be obtained through most jobbers, some of whom advertised in his magazine.

### THE COMPLETE ALL-STAR KIT

A complete All-Star kit included a prepunched and drilled front panel and chassis, along with all

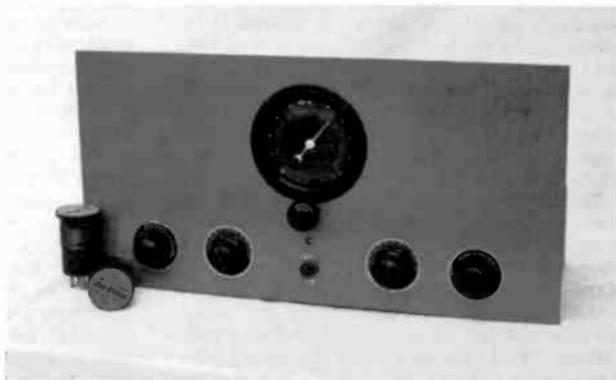

Figure 1. The front panel of the All-Star. Left to right, the four controls along the bottom: volume, antenna tuning, oscillator tuning, and tone. The airplane dial is for bandspread and provides a 0-100 logging scale over a 270 degree arc.

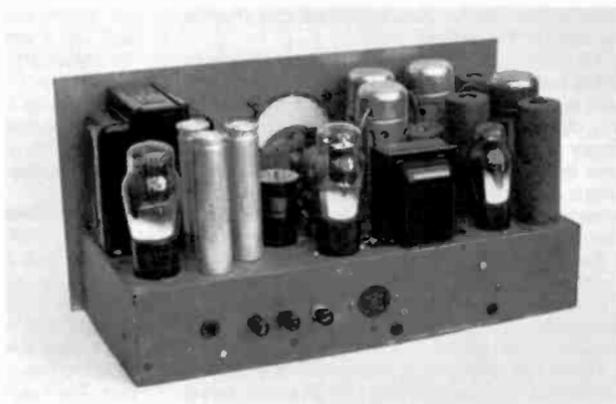

Figure 2. A rear view of the All-Star.

components and hardware. Tubes and speaker were extra, as was typical of the period. Alternatively, builders could elect to purchase a "foundation kit" consisting of just the chassis and front panel at a cost of \$2.50, and then choose their own parts sources. An optional wood cabinet for the All-Star was offered by Crowe Name Plate and Mfg. Co., as shown in Figure 4.

The All-Star was originally designed as a 6-tube superheterodyne receiver with a tuning range

*(The 1934 All-Star Kit Radio, continued)*

All-Star's development period was short and that the kit was rushed to market.

My All-Star had been built with the optional BFO and came with about half the original plug-in coils. I have since acquired a couple of additional coils with the help of fellow hobbyists. Cleaned up and repaired, it now enjoys light duty for shortwave listening, though Cockaday's enthusiastic claims about its performance seem a bit overstated.

It seemed that the All-Star had hardly arrived when in the spring of 1935 Cockaday introduced a revised model, the All-Star Junior, a 5-tube set using the newer 6-volt tubes (6A7, 42, etc.). Many basic features were retained, however, like the separate oscillator and mixer tuning, the 370 kHz IF, and the plug-in coils. The Junior model was also distinguished from the original by its black front panel and slightly different knobs.

The price of a complete All-Star kit (less tubes, speaker and cabinet) was about \$31 or so, varying slightly depending on the jobber. There were less expensive 6-tube "all-wave" kits advertised in 1934, but having his own magazine gave Cockaday an effective sales tool. A note in the *Thordarson Transmitter Guide* of this period claimed that "...over 6,000 units have been built."

Credible figure or not, it is certain that far fewer have survived.

*(Thomas Boyd, 3910 North 37<sup>th</sup> St., Tacoma, WA 98407)*

*After subscribing to A.R.C. for about a decade, Tom Boyd decided to try his hand at writing an article for the magazine. Needless to say, we are delighted at the result. Tom began collecting and restoring antique radios in the late 1980s after finding the RCA tombstone his father had bought new in the mid-1930s stored in his parents' attic.*

---

## Advice to "Newbies"

BY JIM MENNING

*Internet newsgroups are often a valuable resource for newcomers such as Jason Pramas, who recently posted the following notice on the newsgroup rec.radio-phonos:*

*"My wife and I were two of the 'newbies' at the recent [New England] show, and we enjoyed ourselves, although it's a bit bewildering to people like us not in-the-know... So, we thought it might be nice to have an intro seminar or two at shows for people new to antique radio collecting/restoration. Perhaps it would help sales if more people had more of a clue. Just a thought."*

*Jim Menning, an experienced collector, decided not to wait for a club to offer such a seminar, but responded via the newsgroup to Jason's suggestion. With Jim's permission, we are reprinting his words of wisdom, which should prove valuable to others just beginning to collect.*

*In addition to Jim's suggestions of useful resources, we, of course, suggest "Antique Radio Classified." (Editor)*

Welcome to the hobby, Jason, (and your wife, too!). Many of the larger shows (two- and three-day meets) offer seminars on different levels of radio repair, different collecting interests, and even general question and answer forums. It is a good idea to offer a "basic" course for the new collectors and general public, but because most of the event participants are "regulars," an "introduction to the hobby" lecture would have relatively low atten-

dance. Therefore, you would have to watch to make sure that you attend a show that has that particular type of program listed in its schedule. These live demonstrations are a very good resource, and I agree that they are very helpful to the newcomers to the hobby.

### NEWSGROUPS

There are other forums to learn from. A newsgroup like this one, for example, helps beginners through experts. Many times no one here knows the correct answer to all of the questions, but the group is pretty resourceful at finding where to look to get an acceptable answer to most queries. You can ask almost any type of question here and get many different responses depending on the experience and the mood of the participants responding. This is a lively group of characters, both good and bad, both selfish and philanthropic, but always entertaining.

### BOOK BENEFITS

Books are of great benefit. You mention that you have already found one to study from. Many of the better books on fixing up old time radios are out of print, but can be found through sources such as [www.abebooks.com](http://www.abebooks.com) and Ebay. Some are tailored to the absolute beginner, and some are for far advanced restorers. I'd recommend starting with books low in theory and high in procedure. Too much theory can not only be confusing, but can

lead to the feeling that the repair is above one's abilities.

Reading three or four of the basic repair books will show you that there is a lot of overlap in the recommended procedures for starting to repair a radio from the first moment it is acquired. Such basic things as what to look for before you ever plug it in can save a lot of money and effort in the long run. In each book you will learn some of the "secrets" or tips and hints that the authors have learned from their experiences and will share with the readers.

Many of the books discuss the same topics, but you will notice that some explain things better than others. You may find one book that explains something like detector stages in an easy to understand format, and another book will leave you totally confused. But the next book may discuss a different topic better than the first one did. Therefore, I would recommend having at least three or four basic books to glean understanding from. Just ask the group for suggested titles and authors. Some (not heavy in theory) that I would recommend are:

*Fixing Up Nice Old Radios* by Ed Romney; *Antique Radio Restoration Guide (2nd edition)* by David Johnson; *Old Time Radios! Restoration & Repair* by Joseph J. Carr. [These three are in print and available from A.R.C.] *How To Repair Old-Time Radios* by Clayton L. Hallmark; *Rapid Radio Repair* by G. Warren Heath; *Radio Troubleshooting Guide* by John F. Rider & J. Richard Johnson. [These may be found in secondhand bookstores or on eBay.]

## THE INTERNET

The internet has many sites for the radio restorer and collector. Sites such as the very comprehensive one set up by this group's own Phil Nelson are a great resource for beginners to servicing, and radio/TV collectors as a whole. <http://antiqueradio.org/>. [We also suggest [www.antiqueradio.com](http://www.antiqueradio.com), A.R.C.'s web site.] As you travel from website to website, always check out the links provided. It is by following those links that will put you on the path to discovery of amazing radio-related things most could never imagine. You can find more in one weekend on the internet than you could in years of travel and searching bookstores, libraries, and radio events. The internet is not a substitute to a real life radio experience, but it is a great resource for gaining knowledge about the hobby.

## VIDEOS

Videos can also assist in learning some basic repair information. Both Bret Menassa and Ron Mansfield have put out interesting videos on restoring radios. Bret has done one on antique radio restoration, and Ron's is about servicing older transistor type radios. Bret took a 1936 Philco radio from flea market to restoration, sharing along the way the steps he took to return the set to good operating condition. Ron takes transistor radios, and with the help of Eric Wobble, shows how to clean and repair them. There are also a lot of good pointers in this video to help you understand some of the cosmetic issues with the transistor radios,

and what can and can't be fixed. Good information before spending big bucks on some of the rarer models.

Both videos are listed at the bottom of this link: <http://www.antiquesupply.com/index.shtml>. Now I wouldn't say that I agree with everything shown in these videos, but that is because I have developed my own techniques from my own experiences. Also, some of the references to other materials that Bret makes mention of are common knowledge to those who have been in this hobby for a while, but might need further explanation for a beginner. He briefly mentions some of the work that he had to do to the Philco off-camera, that a newcomer might not be familiar with.

## PRICE GUIDES

In answer to your question of how to begin — first, remember not to use a price guide to determine the value of a radio. These books are often good references for identifying radios, but the prices can be ridiculously high or low.

These books often give a false impression of what radios may be worth. I've brought clean, working radios to large swap meets that have price guide values over \$400. But many came back home with me, even though priced as low as \$60.

On the other hand, I have a nice Philco 37-690 console that "books" for only \$500 that I gladly paid \$1,250 for. I wanted the set, and it was in great condition. I've since turned down three offers in the \$1,600-2,000 range for this set. These examples are only given to show the relative value of the price guides. Don't trust them!

## FINAL COMMENTS

One thing you will soon learn if you study the books, videos, and other information available — there is no one right way to approach repair and restoration. But the more you study, the more you'll learn of what to avoid in the way of purchases, and repair blunders. You'll eventually develop your own procedure, adapting different techniques depending on the particular radio or problem you are trying to fix.

Some very tempting radios are out there, at very reasonable prices. But some can be nearly impossible to restore or get replacement parts for, especially some of the cosmetic and mechanical pieces. Certain dials, grille cloths, and cast parts will be impossible to find or remanufacture. Only experience will give you the knowledge of what you can handle, and what you must learn to avoid.

To start to learn to repair tube-type radios, study the resources listed above, and purchase the cheapest radios you can find locally — \$5 rummage sale radios are great to learn on. If you screw up, you haven't invested much. And you need to start with these to learn the basics of soldering, identifying and replacing parts, and trouble shooting/aligning. Start small, and advance at your own pace. Any time you have a question along the way, feel welcome to come back to us.

(Jim Menning, 300 E. Wisconsin Ave., Appleton, WI 54911-4123)

# WITH THE COLLECTORS

## The Hallicrafters S-38A A Gift From RadioBob

BY WALTER M. HESKES

*When an antique radio enthusiast has twin sons, we're delighted to find that he is raising them right; that is, that at the ripe old age of five, the boys are already excited about preserving old radios. It's also a pleasure to know that there are surrogate uncles out there who also contribute to encouraging the next generation in the art of radio collecting. Thanks to Dad and RadioBob. (Editor)*

A few days past their fifth birthday and awash in a sea of 21st century toys, brothers Max and Aaron, aka our RadioTwins, alerted us about an exciting e-mail they had received from their beloved RadioBob. A long-term cyberpal, RadioBob is a treasure, as he regularly scours the local flea markets in his hometown at the New Jersey border near Philadelphia, Pa., keeping a sharp look-out for restorable old radios atop, under, and hidden between the tables of the vendors.

Frequently, we get colorful e-mails describing these wonderful adventures. Often, there are enticing photos of his latest prizes, such as a prewar Korting tabletop, multiband receiver or a pristine little Zenith Zenette, 4-tube, AM portable in a smooth, shiny, maroon-colored plastic cabinet. At times we have commended him on a particularly remarkable find. Other times, when something is totally irresistible, we have shared that with him too, often learning, to our delight, that a tantalizing gem is on its way to us.

On heaven-sent days, the postman lugs a large cardboard carton up to our front doorstep, rings the bell, and waits for my wife Lisa to respond. If the boys are home, they will peek at him through the glass sidelights at the front doorway. He will smile at them and point to the large box as he snaps them a knowing wink, indicating that the big brown box is really special — it's from our beloved RadioBob.

RadioBob never forgets that youngsters love toys of all sorts, and he often has filled these cartons with goodies for young and old. It was in just such a box that we met little Blabbermouse, a novelty radio featuring a friendly-looking mouse standing atop a large wedge of plastic Swiss cheese. To our delight, when we powered up the radio, Blabbermouse proceeded to move his mechanized mouth mimicking everything the radio announcer was saying. When last we saw him, Blabbermouse was living in his original factory carton.

### BIRTHDAY SPECIAL

In this latest e-mail, RadioBob promised the RadioTwins something really special for their

*Aaron and Max with the big box!*

birthday, and they could hardly contain their excitement. When the big box arrived at last, RadioBob did not disappoint. The boys struggled to move the large, heavy box from the front hallway into the living room where they could open it. Quickly, they grabbed a pair of their safety scissors and pressed and rubbed a blade against the heavy gauge clear plastic tape that bound all of the flaps tightly closed. Soon, the tape was cut and the flaps were free.

Inside the box, under a thick cushion of newspapers from South Jersey, were several items wrapped in bubble packing. The smallest of these was an S-scale 0-4-0 steam locomotive showing crisp detailing in heavy black plastic. An internal electric motor powered by two D-cell batteries worked the drivers. A radially-oriented knife switch

atop the boiler applied power in either forward or reverse directions.

Beside the loco in the package was a lunchbox-sized plastic toy barn complete with several pairs of working doors. Inside, it was filled with a menagerie of small, stuffed animals including one creature dressed in a cloak covered with religious icons. Max named him Bible Bear. Max removed all of the animals scattering them around him on the floor. Then, he lay in the middle of this mess and started rolling the locomotive back and forth in front of the little structure.

"It's the Choo-Choo Barn!" he exclaimed. "Daddy, do you remember the Choo-Choo Barn?"

Yes, I remembered the Choo-Choo barn from a springtime trip we'd taken to the Amish country near Lancaster, Pa. Good old Maxie had put it all together in his mind.

Meanwhile, Aaron was struggling to lift the largest item out of the big box. We looked inside and saw, through several layers of translucent bubble packing, the dark outline of something RadioBob had described to us in a recent e-mail. We lifted the item out of the box and tore off the wrappings. RadioBob had sent the twins a complete, but totally inoperative hulk of a Hallicrafters S-38A, which is an entry-level general communications receiver, circa 1947.

### THE HALLCRAFTERS S-38A

Saying this receiver was complete meant that all of the essential and hard-to-find parts, such as original knobs, dial pointers, dial glass, tuning capacitor, IF transformers, RF coils, and audio output transformer were present and accounted for.

On closer inspection, we learned that both dial strings were broken, that the top face of the chassis was coated with rust, and that the rubber-coated insulation on the power cord was crumbling into little black granules as we touched it. In short, this was a project radio.

Aaron fondled the knobs and fell in love with the little tabletop junker. Soon, he insisted that I restore it for him. "Make it work, Dad. I want you to make it work. Can we go downstairs and fix it right now? Can we? Huh? Can we?"

Careful not to promise too much, I agreed to take the radio downstairs to the shop for a cleaning and further inspection. Once downstairs, Aaron quickly pulled a stool up to the bench beside me as I examined the receiver. He pointed to the speaker inside the cabinet.

"I know what that is, Dad. Do you know what that is?" he asked.

"What do you think that is, Aaron?"

"That's the speaker, right Dad?"

"Yes, it is Aaron. That was very good identifying. You really know your radios, don't you?"

Aaron's face filled with a brilliant smile. "And, do you know what else, Dad?"

"What?" I asked.

"That's the tuner and that's a tube and that's another tube and another tube and another tube and another tube."

"Aaron," I said, "you've really earned this radio. We're going to fix it up and get it running, and then,

Aaron's new radio.

it'll be your very own special radio, okay?"

"Yes, Dad." He was beaming excitedly. "When are you going to fix my radio?"

"Saturday. We'll do it Saturday, okay?"

"Okay, Dad. When is Saturday?"

"The day after tomorrow," I answered.

"Well, why can't tomorrow be Saturday," he asked.

"Because this is Thursday and it's nearly bath time, and then, it's bedtime. So, it's time to close up shop and head upstairs, okay?"

"Okay, Dad, but what day is tomorrow?" he asked.

"Friday."

"When is Saturday?"

"The day after Friday."

"How many days away is that, Dad?"

"Two days, Aaron."

"But Friday is only one day, right Dad? And, that's the only day between us and Saturday, right, Dad?"

"Yes."

"So, why is it two days until Saturday?"

"Well, Saturday is the second day after tomorrow," I tried to explain.

"But, it won't be a full day because when it's just the first part of Saturday, and not the other parts, then it won't be a whole day away, right Dad?"

"Aaron, it's BATH time," I announced, as I pulled a power cord out of its outlet to shut off one of the two overhead lights. I started to reach for the pull chain to shut off the other light but Aaron stopped me.

"Let me get that one. Let me," he demanded as he clambered up onto the benchtop to reach upward and pull the chain to shut off the light.

Friday came and went. A dark, stormy night was followed by a bright, sunny Saturday morning. While Lisa was out driving around and spending money, I took the boys to a nearby park for some important swinging and cycling through the numerous puddles of rainwater that had not yet evaporated. The day was hot, and humid, and when we returned home, we planned to cool off in the basement shop and begin to explore the remains of the S-38A.

### RESTORING THE S-38A

Aaron and Max followed me downstairs as I headed into the shop. I removed the knobs of the set from their shafts and placed them in one section of one of the trisectioned plastic cookie

*(Continued on following page)*

*(The Hallicrafters S-38A, continued)*

trays that we had salvaged from boxes of Snack-wells brand cookies.

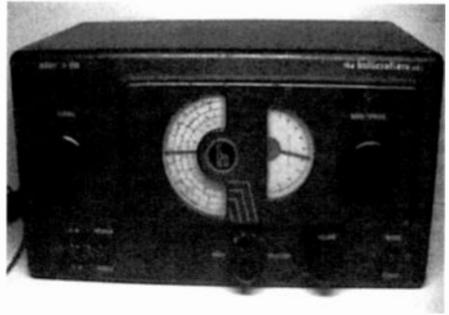

After I had removed the knobs, I flipped the cabinet on its back and removed the remaining two of what once had been a quartet of rubber feet. Hallicrafters combined form with function by using the rubber feet to secure a cardboard panel that, once removed, permits access to the chassis' underside components without requiring complete removal of the chassis from the cabinet.

Upon reviewing the innards, I was relieved to find all of the factory-installed paper caps intact and the RF coils and trimmer caps undisturbed. Some of the cloth-covered wiring had disintegrated, but none of the lengths of denuded wiring appeared to make unwanted contact with other wiring or chassis members. The wax was slowly popping out of the cardboard tubes of two or three paper caps, but I'd planned the venerable shotgun approach to simply yank all of those critters and take no prisoners.

Not so with the many mini mica dot boxes. In my experience, they rarely go out of tolerance, so I just ignored them, preferring, instead, to focus on the notoriously leaky electrolytics and their paper brethren. Ditto the handful of blistered resistors, especially the high-meg units. Resistors live to tease and deceive. More than once, I have been taken in by a clean, shiny body that had doubled its indicated value, wreaking havoc between stages of a circuit. Equally deceptive are the scrawny-looking units with their discolored bands and blemished bodies that beg to be liberated from the chassis but ultimately yield within 10 percent of their indicated value.

I opted to do the replacements while I had the chassis open. I combed through my wiring junkbox and located a vintage line cord with excellent rubber. As is often the case with old line cords, upon stripping the ends of the wire, I find that the exposed bare strands rarely absorb hot solder unless they are scraped to a gleaming shine; no exceptions here. After that task was complete, I inspected the pair of stranded wires leading to the panel lamp. The rubber insulation was falling off in long stretches but the #47 lamp socket tested good for low voltage continuity, so I cut the wiring near the source terminals at the 35Z5 and slipped lengths of shrink tubing over the naked strands. Then, I resoldered the connections and closed the book on chassis rewiring.

When I removed the chassis from the cabinet, I found the remnants of the twin dial strings still hanging from their respective bandspread and main tuning capacitor pulleys. Having recently acquired 50 feet of 0.028-inch nylon dial cord from Ocean State Electronics, I tied the free end of the cord to a loop on one of the salvaged springs and wrapped the cord around the main tuning pulley continuing over to the driveshaft where I wound two and a half turns before returning to the pulley to complete the circuit. I thanked the Hallicrafters engineers for the simplicity of their dial stringing, as I recalled the recent nightmare of restringing the Broadcast band drive pulleys on my Nordemende Globetraveler.

*The Hallicrafters S-38A receiver.*

With the strings reinstalled on both pulleys, I worked the tuning caps and discovered that there was some unwanted blade clashing in the bandspread. After a few minutes of bending the offending blade, I had restored smooth operation.

By this time, Aaron had returned to the bench. He wanted to know when his radio would be fixed. I showed him the newly-installed capacitors and resistors and line cord, and also, the new dial strings. He seemed impressed, but he repeated his question. I wanted very much to power up the rig, at this point, but caution told me to test the tubes, lest I power up only to find the set still dead due to a blown filament. Incredibly, as often is the case with both rusty metal tubes and glass tubes that have loosened in the base, everything tested good.

Fearing I'd neglected something, I delayed powering up the receiver and, instead, hauled out a plastic bottle of naval jelly and an old toothbrush. As Aaron watched, I began to swab the deck of the rusty chassis little by little until all of the rusty areas were thoroughly saturated.

"Ooh, that smells really awful," Aaron said, holding his tiny nose in his thumb and forefinger.

"Yes, that sure is smelly stuff," I replied.

I thought about how useful this chemical has been to remove the rust and oxidation between the plates of noisy tuning caps. I had first applied the stuff to a noisy cap in our Zenith 7G605. After saturating the cap in the jelly and allowing the assembly to dry for three days, I blew out the white dust from between the plates, and, when I retested the cap, the noise was gone.

"Well, we're almost ready to power up your radio, Aaron," I announced.

As usual, powering up a radio for the first time after a major overhaul can make your pulse race just a tad past the legal limit. Such was the case here. Certain as I was of the integrity of the workmanship, I am never completely certain that the radio will power up and immediately generate radio frequency modulated audio output; that is, that I'll hear anything other than crackling noise in the loudspeaker.

How often have the major troubles in a radio made themselves known only after you've spent much time and energy correcting what you thought were the underlying problems that kept the set out of service? Aaron and Max stood nearby, watch-

ing as I inserted the power plug into the AC receptacle at the bench. I turned to them and, with an optimistic grin, asked, "Ready?" They nodded. We clicked the switch.

### DISASTERS AVERTED

BOOM! POP! A plume of black smoke and a wisp of flame lit from the socket of the #47 pilot lamp. The boys were aghast; speechless; shocked at the sight. I quickly pulled the plug from the outlet to shut the power. The flame withered and died. The #47 was blackened. The socket was burned and broken. The top of the tuning capacitor, directly below the pilot lamp, was fringed with grey soot.

"Not a problem," I told the boys. "It'll just take another minute or two to replace that pilot lamp assembly." Something I should have done in the first place, I thought to myself.

The boys wandered off to play elsewhere and I combed through the junkbox once more to find a replacement pilot lamp assembly. I was in luck, as there were several salvaged items. I chose the one with the longest leads and installed it. Then, without any fanfare or audience, I powered up the rig, but this time, there was silence. The set was dead. What was wrong?

Hauling out the digi-VOM, I read "continuity" across each of the filaments and discovered that the 12SQ7 filament had blown. Ha! Not a problem. I simply fished around in the tube caddy until I located one of several spares. Confident that the

problem was solved, I plugged in the new tube and powered up the set but, again, there was silence. The filaments were dark. Hmmm.

Again using the digi-VOM, I checked for volts at the AC line input to the 35Z5. I had line current at the tube, but when I checked on the far side of the on/off switch there was no power. The switch had been fried during the explosion. No problem. I jumped the switch and applied power to the set and voila! It was alive!

"Aaron," I called, "come and see your radio. It's working. Come here and see."

"I'm busy, Dad. I'm working on something." "But, your radio . . . can you hear it? It's working. Remember it was all rusty and dead and you wanted me to fix it?"

"Dad, I'm hungry," Aaron complained. "Me too," Max added.

"Hey Dad, can you fix my locomotive? Something's wrong. It's not working. Do you see? Dad? Dad? Hey, Dad?"

*(Walter H. Heskes, 49 Marlin Ave. W., Edison, NJ 08820)*

*Walt Heskes is a mechanical engineer, a technical writer, and an electronics hobbyist who enjoys discovering, restoring, and operating radio equipment almost as much as he enjoys swapping stories with other collectors. He is an active member of the New Jersey Antique Radio Club and the ARRL, and he operates Amateur radio station KC2KML.*

## Old Radios — Gladewater, Texas — Ca. 1942

CONTRIBUTED BY MIKE GRIMES

*This photo was among those in a collection displayed by the Hibernia Bank, Gladewater, Texas, after a call had gone out for historical pictures. Others in the exhibit were of the town in the late 1930s and 1940s. As far as we can tell, this one was donated by the late Ray Bumpus, a longtime resident of the town. The photo shows the result of a call to the general public for*

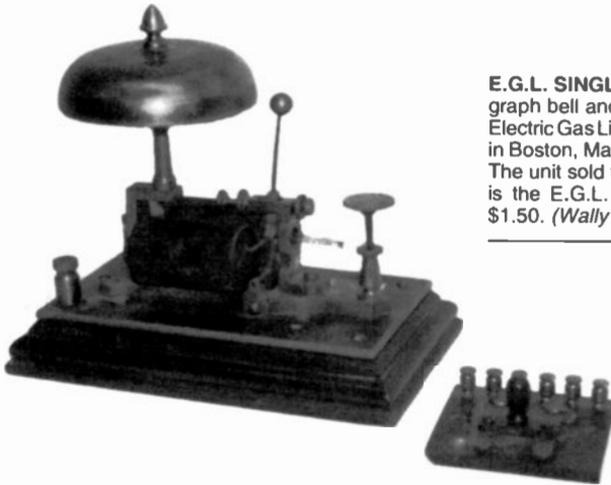

*salvage material during World War II. Old and unwanted radios were among the things requested, and my hometown complied in 1942. Today, the radios would make a collector proud. It is unclear whether they actually made it to the war effort. The old car in the background is a 1936 Chrysler Airflow, a collector's prize in itself.*

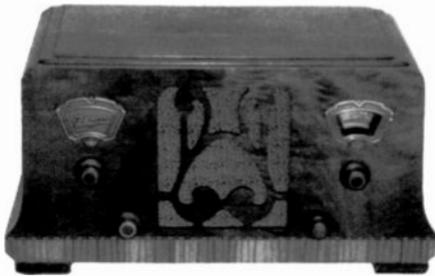

## PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

**E.G.L. SINGLE-STROKE TAP BELL** – This telegraph bell and sounder was manufactured by the Electric Gas Lighting Company of Devonshire Street in Boston, Mass. The brass bell has a 4" diameter. The unit sold for \$6.50 in the catalog. To the right, is the E.G.L. pole-changing switch that sold for \$1.50. (*Wally Worth — Wollaston, MA*)

**ZENITH MODEL 825** – Known as the "Twin Midget," this 7-tube, AC superheterodyne (BC + SW) has a large number of tubes for a table model and uses a separate oscillator tube. Progress in tube design allowed later models to combine the oscillator with the mixer/detector tube. The set has a relatively rare, series-tuned wave trap stated to "eliminate code interference" at the IF frequency. The cabinet has a unique wooden inlay running along the bottom. (*Mike Grimes — Plano, TX*)

**MARSHALL, MODEL UNKNOWN** – This 4-tube, wooden radio is very similar to the Detrola Model 440. The following tubes are used: Types 6A8, 6J7, 25L6 and 25Z6. The cabinet finish and resistance line cord are original. The filter caps were replaced, and it works fine. It was found at a local garage sale. (*Max Stephenson — Port Clinton, OH*)

---

## PHOTO REVIEW

---

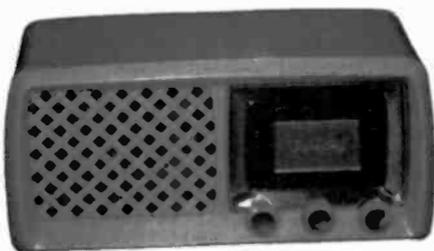

**KING HINNERS/SILVERTONE** – This 5-tube radio was the first receiver made by King Quality Products of Buffalo, New York. It was sold under the Silvertone brand name, as well as under the Adler-Royal name, which was a subsidiary of Sears Roebuck. *(Dave Crocker – Mashpee, MA)*

---

**BRUCKNER "LUMOPHON" TYPE D CRYSTAL SET** – Made in Nürnberg, Germany, this 1924 crystal set is maybe one of the best German-made sets. It has condenser and coil tuning and still has its original crystal detector. A highlight of my collection! *(Erwin Macho – Vienna, Austria)*

---

**SILVERTONE MODEL 2016** – This is a plastic tabletop set manufactured in 1956. It is an AC/DC operation, tunes broadcast band, and has 6 tubes. *(Michael Comer – Haslett, MI)*

---

**TROUBADOR, MODEL UNKNOWN** – This 6-tube AM band radio, ca. 1947, was made by Warwick Manufacturing Company. It features the "Troubascope Looptenna." *(John Phipps – St. Charles, MO)*

---

**GECOPHONE RECEIVER** – This 3-tube (valve) receiver is shown in its "Smoker's Cabinet." It was manufactured in 1923. *(Jim Taylor – Bournemouth, England)*

---

# COLLECTOR PROFILE

## Jack Lavelle — From T-Shirt to Tattoo

BY JACK LAVELLE

*Sometimes articles for A.R.C. turn out to be a long time in the making. A casual conversation at Antique Radio Club of Illinois' Radiofest in 1998 with Jack LaVelle about his collection, and his very large Philco tattoo, led to this "Collector Profile." But, in the interim, Jack took a few years to send all the information and meanwhile his photos were somehow misplaced. At long last, we've put all the pieces together and can present Jack's story. We're beginning to think that tattoos have a special attraction to radio collectors, as revealed in previous articles — most recently about John Hagman (January 2003) and further back, about Steven Berkule (June 1993). Jack's tale of the tattoo process certainly proves that antique radio collectors will suffer anything for the cause. Perhaps a "Most Creative Tattoo Contest" is in our future. (Editor)*

I have to go back to my dad. I think it was 1948 when I was 12, and my dad asked me to help him change a 10-inch Admiral picture tube. I was so proud. I really didn't do anything. But I was there. It was great. My dad wasn't an electrician or TV man, but his attitude was, if it's broke, let's find out why. In high school, I was fixing radios for my friends and neighbors. After high school, I went to work for a local TV store.

When I was 19, I entered DeVry Institute, but I was doing repair jobs on the side. Once I was installing a TV antenna that required running the wire into the basement and up a center wall. While

Jack LaVelle and the radio that started it all, a Kolster Model K-20.

in the basement, I spotted a Kolster K20 with a speaker. This was the day I became a collector.

My collection has grown to over 500 pieces now. In addition to my subscription to A.R.C., I belong to several clubs: Illinois (ARCI), Indiana (IHRS), Michigan (MARC), Minnesota (NARC), New York (GNYVWA), and Maryland (MAARC). I go to some Indiana and Michigan meets and to all the Illinois meets, where my wife runs the hospitality tent. She's the "Cookie Lady."

### THE MUSEUM

Well, those 500 radios were all over the house.

A view of the museum, showing just a few of the more than over 500 items collected since 1955.

*This view shows some of the many tombstones and cathedrals in the museum.*

Obviously, we needed another place to put them. So, three years ago, I built a two-story, 26' x 30' building. I thought I had made it big enough, but it filled up very quickly. Last year, I added a 20' x 20' addition. Yes, that's as big as it's going to get. (My wife said so.)

Most of my radios are early 1920s, as I like them best. But, I have everything up to the 1950s. My museum is open to the public by appointment. And I enjoy showing it.

### THE TATTOO

It turned out that a new employee at work was also a tattoo artist. Quite a few guys were getting tattoos, but I had thought about getting one long before this.

My wife had bought me a T-shirt with a Philco radio on the front and the interior on the back. I put the shirt on our copy machine and went to a couple of tattoo shops. They all wanted to spread the process over a few months with five to seven sittings.

*Larry and his unique tattoo, which cost \$100, lots of pain, and lots of beer.*

The price was \$900 to \$1,500. No Way! All I could think of was the many nice radios I could get for that kind of money.

Then the guy at work said he would do it for \$100. I was a little nervous. He lived in a not-so-clean basement, and his name was "Cheese." Well, two 30-packs of beer and seven hours later it was done. I have to say it hurt BAD. And you REALLY need the beer.

*(Jack LaVelle, 4616 W. 152nd St., Oak Forest, IL 60452)*

## A Serviceman's Vignettes

BY ALTON A. DUBOIS, JR.

*Alton DuBois, who, we regret to say, passed away recently, left us with a series of humorous vignettes about his life as an RCA serviceman. Alton was a steady contributor to A.R.C., and it seems appropriate to continue to publish a little of his legacy. His tales always reveal much about the challenges of working in the service sector. (Editor)*

One time I went out on a call on an RCA Model 630 TV set. The customer claimed that it wouldn't work. Checking the set, I found that the first RF tube in the tuner was upside down in the tube shield. I corrected that problem, but the set was out of horizontal hold, and the hold control wouldn't make it stay still. A slight

adjustment on the wave form coil, and the picture was O.K. When I explained the whole thing to the customer, he turned to his son and asked him if he had fooled around with the set. The kid said, "Yes, the picture wouldn't stay still."

Another time, a TV customer said that she heard a knocking sound, but when she went to the door a couple of times, she found no one there. We traced the sound to the TV set. Checking the set, I found the picture was O.K., but I still heard the knocking. What I found was that the delivery man had left the delivery tag hanging on the high voltage lead to the picture tube. It was coated with soot, and it would become charged up and be attracted to the side wall of the cabinet.

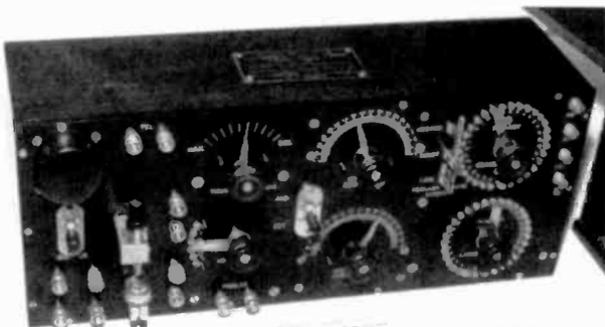

# MEET & AUCTION REPORT

## Carolina Chapter/AWA Spring Meet Charlotte, North Carolina — March 21, 2003

REPORTED BY RAY CHASE

The Carolina Chapter/AWA spring meet held in Charlotte is always a good meet, and this year was no exception. The weather did not look promising and the opening day on Thursday was heavy with rain, but since all activities that day were indoors, it did not matter that much. Friday dawned very cloudy and misty, and although the club had made provision for an indoor flea market, everybody took heart in the optimistic weather forecast and set up in the parking lot. The 0800 "LeMans" start is well appreciated — no 4:00 A.M. hunting around with flashlights, and everybody, dealers included, gets a fair chance at the goodies. Keep in mind that the sellers cannot unpack any goods and must be out of the parking lot along with the buyers before the 0800 start.

I found one seller with many parts and small items who had very reasonable prices and stuck with him for the first twenty minutes or so. The weather forecasters got it right, and by 10:00, the sun was out, and the rest of the weekend was glorious. I thought that the flea market was a little lighter than last year; perhaps the rain kept some people away, although the number of

A contest entry was this prize-winning National Electric Supply Co. (NESCO) Type CN113 receiver. It is a crystal detector radio made for use by the Navy in 1917.

A view of the flea market at the Carolinas meet, which featured the "LeMans" entry for buyers, as well as sellers.

**A warning:** Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

people signed up for the meet was reported to be higher than ever. Without any kind of an accurate survey, I can report that I met people from Massachusetts, New York, Georgia, Florida, Colorado, Montana, New Jersey, and West Virginia, just to name some of the states represented.

The Friday afternoon auction was touted as the best to date, and there were some interesting entries. A highlight was the Wurlitzer "Side Man" rhythm box which was played extensively.

The best event, however, was the contest which clearly was the most impressive I've seen at a regional meet. It's hard to decide which was the top entry, and I'm glad I didn't have to judge it.

A unique entry in the contest was this large display of transistor radios having the M&M candy theme.

All in all, a long trip for me but well worth the effort. The auction results are listed below with prices rounded down to the dollar.

f=fair, vg=very good, g=good, PB=push buttons, BB=brass based, TT=tipped tubes, gf=good filament, NT=no tubes, WT=with tubes, wk=works, nwk=not working

Airline, Deco, brown plastic, w/eye & PB, needs grille, dirty .....	\$60

(Ray Chase, 1350 Marlborough Ave., Plainfield, NJ 07060)

The Carolinas Chapter of AWA publishes "Radio Daze" quarterly and holds quarterly swap meets. Dues are \$10. For more information: Ron Lawrence, P.O. Box 3015, Mathews, NC 28106. [www.cc-awa.org](http://www.cc-awa.org)

# RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

## Web Search Problem

Dear Editor:

Giving feedback to improve things, not complaining. I tried to search your ads, first using AOL, which did not work for me, and then Internet Explorer browser Version 5.5, which gave these coupon pop-up ads that just wouldn't quit, so I gave up. I have never found a Web site that didn't have a search function, and I'm not smart enough to use the browser search yours mentions. If your Web site provided a little bit of an example, it might help others besides me and give your site more use.

I was looking for Walter Ashe Ham gear.

John Shell, from the Internet

There are three ways to search for items:

1. **Browser.** Go to a particular category of classified ads and under "Edit" (usually), click "Find." Enter your search word, such as "Walter." Note it's best to try only one word at first, and the first occurrence will be highlighted. Click "Find Next" to get the next occurrence, etc. When finished with that page of ads, go to the next page of ads and repeat the procedure.

2. **Word Processor.** Go to the classified ad page, and under "Edit," "Select All," and then "Copy." Open a word processor (WP), Word perhaps, and "Paste." Go back to your browser and move to the next classified ads page. Again, "Select All," "Copy," go to your WP and following the first group of ads, "Paste." Repeat until you have all of the ads pasted in your WP document. Then use the "Find" feature in your WP.

3. **Search Engine.** In Google, Yahoo, Altavista, etc., click on the "Advanced Search" function and search only the A.R.C. domain for the ads: [www.antiqueradio1.com](http://www.antiqueradio1.com). (Note the "1" after antiqueradio.) This will search only the previous month's ads; search engines cannot access the subscriber-only ads. Also, the search engine may not have yet indexed the A.R.C. ad pages.

Good Luck. However, I searched over all of the classified ads for A.R.C. in 2003, I did not find a single occurrence of Walter Ashe. Sorry! (Editor)

## Great Publication

Dear Editor:

Just a note to let you know that I have just renewed my subscription to A.R.C. for another year. Each month I await the next issue to arrive. I read with regret the number of people who express dissatisfaction with your publication. I have every issue since the first one arrived many years ago. They are still a source of invaluable information, and I browse through them whenever I have a problem with a set. I almost always find an article that is of help or refers me elsewhere. Thanks for all the pleasure and help that A.R.C. has provided to me and many others. A.R.C. is truly the first source of information, help, items, and pleasure. Many thanks to you and your dedicated staff for a great publication.

Joe Burke, Weehawken, NJ

## Philips L6X38T Disassembly

Dear Editor:

In the July 2003 edition of your magazine, you published a letter from John R. Bartlett concerning the disassembly of a Philips L6X38T. I have one of these sets, and it's a great performer.

Disassembly is as follows: 1) Remove all knobs from the front panel. These are held on the shaft with set-screws. 2) Remove the handle assembly. 3) Make sure that the telescopic antennas are fully retracted. 4) Remove the small Philips head screw between the antennas. 5) Open the battery access door and remove three screws that attach the rear cover. 6) Carefully remove the rear cover. The top edge of the rear cover is a friction fit in the center of the front hinge. 7) Desolder the hinged SW loop from its leads. 8) Four small Philips head screws hold the chromed front panel to the front of the chassis. These are accessible along the edges of the side panels with a long thin Philips driver. The two adjacent to the printed circuit board side of the set are partially hidden and extremely difficult to see and access. A long thin screw starting tool must be used to reassemble. 9) Once the front and rear panels are removed, the battery box can be removed by removing four screws and desoldering two power leads. 10) With the front panel, rear panel and battery box removed, you will have access to the screws that hold the side panels to the chassis.

My set was a basket case set I purchased at an AWA meet several years ago. Once you get your set disassembled, I would be interested in knowing how a C124 is mounted on an original set that has not been tampered with. I have a copy of the schematic if you need one. It is in Sams TM-76 listed as a Norelco.

Scott McAuley, Cayce, SC

We, of course, forwarded the instructions, but we reprint them here because they may also be useful for similar sets. John Bartlett called his call for help a "long shot," but Scott's prompt reply proved him wrong. The answer was found via A.R.C. Thank you, Scott. (Editor)

## More on Alton A. DuBois, Jr.

Dear Editor:

Thank you and Harry Goldman for including information in the June issue about the passing of Alton A. (Andy) DuBois, Jr. I met Andy through *Antique Radio Classified* when I initiated correspondence about some article he had written. We exchanged letters and photographs on our mutually favorite subject — early Sparton sets and their restoration.

Andy was an enthusiastic supporter of our hobby, and his contributions to A.R.C., as well as his personal correspondence with many of us, will be missed.

As a friend and collector, Andy leaves us a rich legacy of information, good humor, and anecdotes. I would like to extend my sympathy to the DuBois family.

Dale Davenport, Fort Smith, AR

## A.R.C. RATES & POLICIES

**GUARANTEE.** You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

**PAYMENT.** Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount; sent if amount is incorrect.

**FAX & E-MAIL PROCEDURES/PAYMENT.** Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

**CHANGE OF ADDRESS.** Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

**SUBMISSION OF MATERIAL.** Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

**PUBLISHING RIGHTS.** Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**MAILING OF ISSUES.** U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

**ETHICS.** No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

## DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

*The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.*

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

# A.R.C. RATES & POLICIES

## CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and i (the number one, the capital i and the small l.) Also: 0, O, o, Q and n; 6, b and n; G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

### CLASSIFIED AD DETAILS

**Deadline: NOON ET— 10th of the month!**

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is **required** in all classified ads; we will add it if you forget.

#### Classified Ad Rates per Month

Subscribers:

- First 20 words: **FREE\***
- 29¢ per word for extra words over 20 **plus**
- 10¢ per word for a shaded ad (count all words including free words).
- \* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47¢ per word **plus**
- 10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

### BOXED CLASSIFIED AD DETAILS

**Deadline: 1st of the month!**

Boxed classified ads can run uncharged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

#### Boxed Classified Ad Rates per Month

Nonshaded ads:

- 40¢ per word for all words,\* none free, **plus**
- 10¢ per word for each bold word **plus**
- 10¢ per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

- 50¢ per word for all words\* **plus**
- 10¢ per word for each all-caps word.

Non-Subscribers:

- Add 20¢ per word to above costs.

\*Three words can be bold-all-caps at no extra charge.

### PHOTO & DRAWING DETAILS

**Deadline: 1st of the month**

**for all ads with drawings or photos!**

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

#### Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing (If ad is canceled, this amount cannot always be refunded.)

### CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, put the ad or make changes

### IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc. count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is **required** in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

**WANTED:** Volume control 2 meg. tapped at 5K GE # RV029, used in GE Models F65, F63, F80, F85, F88. IF coil 175 KC for RCA R28P. Inv Eilers, 4540 Palmero Dr., Los Angeles, CA 90065-4237. (323) 254-0987

**WANTED:** Tube hi-fi/commercial amps, preamps, tuners, compressors, tube testers, etc. Altec, Fisher, Scott, Marantz, Eico, McIntosh, Leak, newer. Sonny Goldson, 520 Pocahontas Dr., Ft. Walton Beach, FL 32547. (850) 314-0321. Fax: 0284. E-mail: SonnySound@aol.com

**RATE FOR ADDITIONAL WORDS:**

29¢ per word

**FIRST 20 WORDS FREE!**

*Cash OK for small amounts.*

*Your payment helps to keep A.R.C. healthy!*

**WANTED:** Hallicrafters SX-100 or National NC-183, good condition, working, price plus shipping. Juan Farran, 1855 W. 60 St. Apt. 231, Hialeah, FL 33012

**WANTED:** Your N.O.S. vacuum tubes. We are always buying tubes in quantity - send us your list - we will promptly quote. Radio Daze, LLC, 7620 Omnitech Pl., Victor, NY 14564. (585) 742-2020. Fax: (800) 456-6494. E-mail: info@radiodaze.com. Web: www.radiodaze.com

**WANTED:** Zenith 6 volt wincharger, horn and cone speakers, 20s battery sets. Joe Chambers, 6967 Kimberly Ln., Lithia Springs, GA 30122. (770) 819-0822

## “The Scott McCleskey Collection” Vintage Radio Auction

Saturday, August 16, 2003 at 10 AM EDT  
at the Expo Auction Center, 8157 Garman Rd.,  
Burbank, Ohio, Exit 204 off Interstate 71

Estes Auctions is pleased to offer the Scott McCleskey collection from Taylor, Michigan. Due to remodeling this garage and basement, Scott is downsizing his collection. The auction will offer loads of tombstone and cathedral radios, including Tatro, Sterling, Gloritone, Atwater Kent 84, Philco 19, 20, 70, Jr., Zenith, Silvertone, GE, RCA, US Apex, Jessefrench, Crosley Widget, many more. Console radios, Zenith 52 w/remote, 12S367, 10S587, 10S669, 1005, 12H689, Detrola chairside, Zenith chairside, large assortment of table radios, Kadette, ivory & green K-12, also black & ivory, Detrola 199, Atwater Kent Model 10 breadboard. Also AK-55 in a Kiel table, hundreds of tubes, lots of 01-A type, blue Arcturus, & others. Special item: complete Zenith Windcharger. Lots of books, magazines. Plus loads of radios that will be great for the individual who likes restoration. Please watch our website for this sale and plan now to come to this great auction.

**Radio! Radio! 3rd Edition** by Jonathan Hill. *Comprehensive coverage of British radios from the 1920s to the 1970s. Includes a directory of nearly 3,000 different transistor models made in Britain or imported between 1956 and 1972. 8 1/2" x 12", 320 pages. Hardcover. — \$64.95*

**Old Radio Sets** by Jonathan Hill. *The development of the radio in Britain from the late Victorian era until the late 60s. 60 photos. 6" x 8", 32 pages. Softcover. — \$4.95*

**Everything stocked and shipped promptly — Radio is our middle name.**

**A.R.C., P.O. Box 2, Carlisle, MA 01741 — Toll Free: (866) 371-0512**

**Fax: (978) 371-7129 — E-mail: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com) — Web: [www.antiqueradio.com](http://www.antiqueradio.com)**

Free shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Mass. residents add 5% sales tax. Non-U.S. orders, write for shipping costs, or use credit card and specify air or surface (allow 2-3 months for surface shipping). Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. Money back return policy. Subscribers, ask for discount when placing order. 10% off books; order must be mailed to address on file.

(#31-Mar-03)

**WANTED:** Speaker assembly for a Zenith 6S27 radio. Prefer working and in good condition. Allen Dishman, 2405 E. Court St., Dyersburg, TN 38024. (731) 676-9927. E-mail: ks4kn@ecsis.net

**WANTED:** One N.I.B. type 183/483 radio tube. Larry Daniel, 3112 Seton Hill Dr., Bellbrook, OH 45305. (937) 848-8892. E-mail: LDaniel1102@aol.com

## One Month Free!

### BONUS FOR EARLY RENEWALS

If you renew **before** the month shown on your mailing label (your expiration month), you will receive an extra month on your subscription: 13 months instead of 12! 26 months for an early 2-year renewal!

**WANTED:** Belmont Boulevard. William Van Lennep, PO Box 211, Pepperell, MA 01463. (978) 433-6031. E-mail: anaps4@aol.com

**WANTED:** Emerson Catalin radios. Nobody pays more than I. What an arrogant and inaccurate thing to say. I mean, like there isn't anyone wealthy enough, dumb enough, desperate enough – or any combination of the three – to pay even a dollar more than I would pay. I mean, c'mon, who am I trying to kid! Please write or call collect: Rain Buttignol, 214 State St., #7, Portsmouth, NH 03801. (603) 427-1384

**WANTED:** Radiola V perikon detector, Radiola IV speaker driver, Radiola II headphone plug adaptor, microphone for WE 47A stand. Geoff Shearer, 14408 Brookmere Dr., Centreville, VA 20120. (703) 818-2686. E-mail: radioEE@aol.com

**WANTED:** Horn speakers, woofers, drivers, horns, crossovers, coaxial/triaxial, crossovers. Atec, JBL, Electro-Voice, Jensen, Western Electric, Tannoy, etc. Sonny Goldson, 520 Pocahontas Dr., Ft. Walton Beach, FL 32547. (850) 314-0321. Fax: 0284. E-mail: SonnySound@aol.com

**WANTED:** Zenith Stratosphere or cabinet, any condition. Will trade from vast supply of fine radios or buy. Will pick-up. Go to our website at GN4RADIOS.COM for an extensive listing of items for sale. Alan Jespersen, PO Box 17338, Minneapolis, Minnesota 55417. Tues-Fri 11 am - 4:30 pm Sat 10-3. (612) 727-2489. Fax: (612) 821-4820. E-mail: MTE612@aol.com

**WANTED:** Tunable TV signal boosters (preamps). Examples at <http://tv-boxes.com>. Mark Nelson, 17 Wentworth Rd., Natick, MA 01760. (508) 955-5951. E-mail: aj2x@comcast.net

“The Sanford Deutsch Collection”

## Vintage Radio Auction

Saturday, September 20, 2003 at 10 AM EDT

at the Expo Auction Center, 8157 Garman Rd.,

Burbank, Ohio, Exit 204 off Interstate 71

We are pleased to offer the collection of the late Sanford (Sandy) Deutsch of Yorktown Heights, New York. Sandy enjoyed all facets of radio and was also a ham radio operator. His collection will be combined with the Donald Rossbach collection from Canton, Ohio to make an excellent auction for any collector. Some of the items in the Sanford Deutsch collection are: Federal 59, 61, Cutting & Washington 11A, 11B, Clapp-Eastham C3, Grebe CR2, CR3, Paragon RD-5 with A-2 amp, Tuska 224, 225, Western Electric 4A, Westinghouse SE1012A (1918), Western Coil & Elect. WC-15, Shepco T-12, Michigan Midget, NY Album & Card NYACCO portable w/loop & speaker, Crosley Pup w/box, Crosley Ace, Erla K-8. Also many early tubes to include Von Lieben triode (clear) & Von Lieben triode (coated), DeForest Audion SN-125, & others. Marconi spark gap, DeForest crystal detector, a Majestic adv. sign electric w/rotating globe, Zenith 6' tall sign “Long Distance Radio” ca. 1935, McMurdo Silver 701 transmitter, Daven TV scanning disc w/motor & Raytheon neon tube, Pilot 3" TV, Colonial New World globe, Pepsi Cola cooler, crystal sets, Beaver baby grand, Howe, Lemco, Mengel, Murdock & others. Loop antennas, Deutsche Telephonwerke, Western Electric, 25 horn speakers including Western Electric 1C-D, 521CW, 521W, Timbertone, (6) Atwater Kent breadboards. Lots of AC sets, tombstones & cathedrals. We will have photos on the web soon. Make plans to be with us at this sale.

**FOR SALE:** Victor talking machine, needs exhibition head - \$500 as is. Harry Moore, W5BXV, 102 Louise Ln., Athens, TX 75751. (903) 675-1878

## RADIO RESTORATION PARTS

### Vacuum Tube Repair Wafers

These wafers are solid-state devices for quick and easy repair of early vacuum tubes. The wafer is installed by simply sliding it over the tube pins and reinserting the tube into its socket. If the filament is intact but there is little or no emission, the filament may be lit for best visual effect. However, the tube can be open filament.

No change in radio operating voltages is required. Any number of tubes may be repaired in a radio. If wafers are installed on all tubes, the B+ voltage typically may be reduced without sacrificing volume or sensitivity. Performance will vary

between radio models. For best results, order one (1) "D" detector wafer for each radio. **\$10 each (3 or more, \$7.50 each)**

01A WD11 UX199 UV199

#### Model # Also fits:

01A 00, 00A, 01, 201A, 301A, 12, 112, WD12, 40, 71, 171

WD11 -  
UX199 20, 120, X120, UX120, 30, X130, UX130  
UV199 -

### Active Antenna

The active antenna allows antique radios designed for a long wire outdoor antenna to operate on an indoor whip antenna. Portable. Operates from a 9-volt battery. **\$34.95**

Complete Auction & Appraisal Service*

“The Donald Rossbach Collection”

## Vintage Radio Auction

Saturday, September 20, 2003 at 10 AM EDT

at the Expo Auction Center, 8157 Garman Rd.,

Burbank, Ohio, Exit 204 off Interstate 71

After collecting for many years, Donald Rossbach of North Canton has decided to pursue other interests. We are proud to be able to offer this fine collection along with the Sanford Deutsch radio collection. The quality of both collections and the rarity of some of the pieces offered will make it an auction you will not want to miss. Some of the items in Don's collection are: Crystal Sets: Brownie #2, ET Turney, Hearever, Howe, Kodel, Levinsons, Levinsons Senior, Little Giant, Locke DC, Philmore, Revophone, Shield, Telefunken. Wireless Shop and two loose coupler type. Amateur Radio: Hallicrafters SX-76, SX-43, SX-62, S-38C, S-38EM, Sky Champion, Sky Buddy, SX-99, Hammarlund HQ-180A, HQ-129X, HQ-140X, National HRO, HRO-5TA1, SW-54, NC100 A50, S-101, dog house power supplies (2), Echophone, Signal Corps R-390-URR. Battery Sets: DeForest SP-500, Federal 61, Federal Type 200, Type 102, Type 110, Grebe CR-14, CR9, Clapp-Eastham HZ amp. Clapp-Eastham R4 detector & amp, Etherphone 1-tube w/detector. Echophone, Radiola II, Radiola RS, Tuska 224, Superdyne Jr., Tri-City 1-tube, RA-DA unit, Zenith 4R, Zenith 2M amp, Westinghouse 2-stage amp. In addition, Don has many nice speakers, a Freed-Eisemann store kit never assembled, a WWII German radio, several glass front home brew units and one in an all-glass case. Don collected AC sets also so we will offer tombstone and cathedral radios from his collection. Also his Zenith Trans-Oceanics. Please watch our website, pictures will be posted in the near future. Make plans now to attend this fine auction. Preview 8 AM. 5% gallery fee.

Complete Auction & Appraisal Service*

## Radio and Advertising Auction

Saturday, October 25, 2003 at 10 AM EDT

at the Expo Auction Center, 8157 Garman Rd.,

Burbank, Ohio, Exit 204 off Interstate 71

Estes Auctions will offer items from the estate of the late Danny Gustafson of Chicago. Danny was a devoted RCA collector and had amassed a large selection of RCA advertising to include clocks, neon signs, back lit signs, metal flange dealer signs, wall banners, curtain type displays, stand-up dealer advertising ads, record advertising. There are over 100 pieces of advertising items to be sold. Radios will include a Radiola IV in the original wood crate, Radiola III in the original box, both the Model III and IV were never used. A Radiola Special, RCA ER-753 crystal set, Marconiphone V2A, Radiola V, Radiola VII. and others. A selection of cathedral and tombstone radios. Century of Progress pieces. Also a selection of Catalin radios, a Sparton Bluebird and other mirrored radios, character radios including Snow White, The Lone Ranger, Mickey Mouse, Hopalong Cassidy, Mae West radio, Rudolph the reindeer, RCA ship radio RC-45, Charlie McCarthy, and more. We have started work on getting photos for our web site and a brochure with some of the items pictured in color. We will sell one television from the collection of RCA-TRK in nice condition. We will offer more information in next month's A.R.C. Preview 8 AM day of sale. 4PM-8PM Friday, Oct. 24. 5% gallery fee.

I bring 15 years of experience and a passion for perfection to the process. Send me your wretched radios yearning to be fixed! Mike Simos, 100 Commonwealth Ave., Merrick, NY 11566. (516) 223-1470. E-mail: mike\_simos@yahoo.com

**SERVICES:** Television, pre-1960s repair & restoration, Predictas, auto radios & jukebox amp repairs. Tom's Antique Radio & TV, 8 Howe Ln., Millbury, MA 01527. (508) 865-6293

**SERVICES:** Schematic service information, Rider/Sams 1920-1970 - \$4 ppd. Send make/model. Richard A. Lerche, 1561 Bluebell Ct., Livermore, CA 94551. (925) 447-9365. E-mail: rlerche@comcast.net

**SERVICES:** Phono/tape idlers rebuilt like new, any brand. Ed Crockett, Vintage Electronics, 128 Buccaneer Dr., Hattiesburg, MS 39402. (601) 264-4755. E-mail: phonoed@aol.com

**SERVICES:** Expert repair on any domestic vintage tube type radio. Most needed parts in my large stock. Call or correspond before shipping your radio. Thank you. Mal Fuller, 624 N. Main St., Wolfeboro, NH 03894. (603) 569-1946. E-mail: radiodoc@localnet.com

**HELP:** Need brass dial escutcheon for an Eveready console. They all use the same. Ed Mondor, 121 Gateway Dr., Greenville, SC 29615. (864) 268-0952

**HELP:** Need owners manual for RCA RF signal generator, Type WR-50B. Thanks. Don Mier, 4009 N. Foxdale Ave., Covina, CA 91722. (626) 338-9225

**HELP:** Need schematic and alignment data for National rvc Model N.C-121 and Midland Model 11-500. Fielding Grigsby, 1523 Towson Ave., Fort Smith, AR 72901. (479) 782-0111

**MESSAGE:** Well folks, our 350+ radio collection is still here, and more added, including two great horn speakers. It's a long way to where you are but someone is going to realize opportunity like this may come only once in a lifetime. They are getting scarcer and more valuable but I am 81 and ready to sell. Way Out West Antiques, WOCFL, Box 712, Libby, MT 59923

**PHONE NUMBER FOR ANTIQUE RADIO CLASSIFIED TOLL FREE (866) 371-0512**  
**Best time to call is weekdays: 9 am to 5 pm Eastern Time**  
**(Please no classified ads by phone. Thanks!)**

**AUCTION:** Due to events beyond my control, the auction of my collection of 30s and 40s radios and associated items, scheduled for July 26, 2003 did not take place. Oberman Auctions will reschedule it in their new building and the date for the auction will be announced in the September issue of A.R.C. See June and July issues of A.R.C. for a listing of items to be sold. Joe Svihel, 17227 Co. Rd. 54, Avon, MN 56310. (320) 356-7601

**FREE:** Wooden speaker out of 1923 Brunswick record player 12 x 13 x 15. H.F. Brammell, 907 Waverly Way, Emporia, KS 66801. (620) 342-3074

**FOR TRADE:** Zenith 10S549 chairside, nice original. plays, needs capping, for RCA 10T big tombstone. Jay Myers, 1010 Graybar Ln., Nashville, TN 37204. E-mail: jimymers3@highstream.net
