WANTED

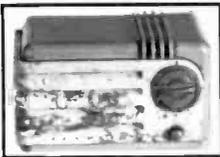

AIR KING SKYSCRAPERS

PAYING **\$14,500.00+** for near mint condition red or blue
\$10,000.00+ for green, lavender or yellow
\$3,000.00+ for black and **\$2,000.00+** for white or brown
ALSO WANTED ANY COLOR-ANY CONDITION
 COLLECTOR PAYING TOO MUCH, CALL ME LAST

TOM THUMB CATALIN RADIOS WANTED

paying **\$6,750.00+** for mint cond. red, green, orchid, blue
\$2,500.00+ for any mint condition one
ALSO WANTED ANY COLOR-ANY CONDITION

DETROLA PEE WEE & SUPER PEE WEE WANTED

paying **\$600.00+** for mint cond. black, white
\$1,450.00+ for beetle, gray, salt & pepper
\$2,000.00+ for red, blue **\$3,500.00+** for green or lavender
ALSO WANTED ANY COLOR-ANY CONDITION

WANTED ANY CATALIN RADIO

ADDISON 2 MAROON & YELLOW \$900.00, YELLOW & RED \$3,750.00
 ARVIN 532 ANY COLOR \$2,500.00, BENDIX 526 GREEN & BLACK \$625.00
 DEWALD A501, A502 BROWN \$375.00, YELLO \$425.00, RED \$1,200.00
 EMERSON AT 190 & BT 245 YELLOW \$1,300.00, GREEN \$2,500.00
 DARK RED \$2,700.00, BLUE \$6,850.00, BRIGHT RED \$11,000.00
 ESPEY MIDGET, YOU NAME THE PRICE I WILL PAY IT!
 EMERSON BM258 YELLOW \$750.00, GREEN \$1,350.00, RED \$2,150.00, BLUE \$4,000.00
 EMERSON 564 BLACK \$500.00, GREEN \$1,150.00, RED \$1,650.00
 FADA L56, F55, 52, 5F50, 5F60, 136, 53X, YELLOW \$1,500.00, LT GREEN \$1,750.00
 MAROON & YELLOW \$2,200.00, YELLOW & BLUE \$2,500.00, YELLOW & RED \$3,100.00
 EMERALD GREEN & YELLOW \$7,000.00, BLUE & YELLOW \$7,000.00
 FADA 115, 116 & 1000 ALL YELLOW \$700.00, MAROON & YELLOW \$950.00
 YELLOW & RED \$1,150.00, PEA GREEN \$1,300.00, BLUE & YELLOW \$2,550.00
 GAROD 6A11 MAROON \$675.00, YELLOW & RED \$1,350.00
 HALSON ANY COLOR \$1,500.00 TO \$5,000.00
 MOTOROLA 50NC ALL YELLOW \$1,750.00, BROWN & TORT \$2,750.00
 RED & YELLOW \$6,000.00, GREEN & YELLOW \$6,250.00

Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has just released the first DVD-ROM publication at a break-through introductory price. REA created the first Riders Professional CD-Series that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we introduce the Riders Standard Series DVD using Riders' indexes for finding "that" schematic that you need occasionally. Priced at a very low introductory price, every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. Introductory Offer - Limited Time - A professional produced product.

**Only \$ 150 + \$ 6 S&H (Sold only on DVD) -
Introductory Price - Reg. Price \$ 199**

Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD)

CONTACTING ANTIQUÉ RADIO CLASSIFIED. All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.

Only UPS, FedEx, etc. items to street address: 498-A Cross Street.

Telephone: (866) 371-0512; Fax: (978) 371-7129

E-mail: ARC@antiqueradio.com

Web: www.antiqueradio.com

Please, no classified ads by telephone, thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

Remember when simply turning on the radio was a thrill? Some of you old-timers do. Younger collectors can relate to the feeling of the lady on our cover when they turn on their vintage sets. She has only to turn a knob on a console here, a table set there in her home and she has instant entertainment. Somehow life seemed simpler before giant home theaters and crashing computer systems cluttered our world. Not that most of us would choose to live without these technological wonders any more, but the idea is sometimes tempting.

For antique radio collectors, radio continues to be the technological wonder of our world. We are confirmed "radio bugs" and may, indeed, have "bugs in our skulls," as the poem below suggests. But how much pleasure those bugs provide! Several articles this month attest to that fact.

Take, for example, the pleasure Herb Parsons recalls in building a Philmore TR201 radio at age twelve. That memory stayed with him for 25 years until he found this model again and added it to his collection. What is even more remarkable is that this new-found set had the same problem that his first set had, and he was able to apply the old remedy to cure it.

Robert Enemark displays the same kind of pleasure in reproducing a very early crystal set using all original components. This is the kind of project only a true "radio bug" would undertake.

Sometimes the pleasure of collecting antique radios over a period of many years results in a major collection. You have read about some of those collections in these pages; for example, the Ralph Muchow and Ralph Williams collections. Jack Smith has alerted us to the Sandy Deutsch collection, which will be auctioned by Richard Estes in September.

According to Jack, every piece in this outstanding collection is perfectly restored and in working condition. Before his death, Sandy and his wife Betty had decided to sell the collection in order to ensure that the sets would give others the pleasure that they had had over a 30-year period. No doubt this is an auction worth attending.

Read the end of William Demetriou's article on his restoration of an Admiral 4T11 portable radio. Here is a man in love with radio. His exuberance is catching, and most of us are susceptible to the bug.

Another collector who always conveys the pleasure of finding something new is frequent contributor Richard Arnold. This time Richard has leaped into the modern age and presents a set that would certainly be a conversation piece in any collection — a Hypersonic AM/FM neon radio and cassette player. Just turning on the neon lights would be a fun thing to do. Apparently, not many of these radios are known to have survived, but if you have one, let us know.

Good news for another major collection is that the Perham Collection of more than 20,000 electronics-related artifacts and documents has at last found a

permanent home — History San José in San José, California. Started 40 years ago and displayed from 1973 until around 1990 at Foothill College, this great collection has been in storage for 12 years.

However, we can now look forward to its being accessible to the public. Of great interest is the Lee DeForest manuscript collection, which is in the process of being cataloged and made available. No doubt, this press release will be followed by progress reports that we will certainly pass along to you readers.

Photo Review features several interesting battery and AC sets. Most unusual is the Emerson mini-radio/music box, slightly taller than a coffee mug.

Another Estes Auction, reported by our faithful reporter Ray Chase, was an obvious success, as it totalled \$33,000. Several breadboards sold for nearly \$1,000 each, but Zenith took the day — two shutter-rial radios sold for \$600 and \$650, while the prize was a Walton's radio selling at \$2,400. Watch these pages for more Estes auctions, as many more are scheduled for the near future.

Twice a year Erwin Macho reminds us of how striking European model radios can be. The Dorotheum Auction House in Vienna issues a handsome catalog for these events, and though the language can be a barrier, Erwin translates the highlights. One such is the top bid of \$450 for an Ingelen cathedral.

Getting back to the theme of pleasure in antique radio collecting, we, in turn, are always pleased by the positive responses we get to our efforts, as indicated by the letters in *Radio Miscellanea*. It's also pleasing to be able to pass on the information you send in to share with other subscribers. Keep it coming!

A.R.C. Benefits. It's easy to take advantage of A.R.C. benefits, which include a toll-free number: (866) 371-0512; the Web: www.antiqueradio.com; Discover, Visa, American Express, and MasterCard accepted; books shipped free in the U. S. by book rate; and to current subscribers, a ten percent discount on all book orders.

Coming Radio Events. Of the 50 events listed for September, 18 are swap meets and two are auctions. There's something for everyone out there — a military collectors' meet in Pennsylvania, an auction and swap meet in Missouri, a swap meet and picnic in California, etc. Be sure to join in the fun.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Our "A Radio Bug" cover is from a postcard in your editor's collection. A poem, also appearing on the card and printed below, explains some of our references above. The postcard copyright is "The Gapp Line 1946."

All Night Your Radios Blare And Squeal
Without A Let-up Or Lull
Your Neighbors Think You're A Radio Bug
With Swarms Of Bugs In Your Skull!

WITH THE COLLECTORS

The Philmore TR201 Then and Now

BY HERB PARSONS

Many radio collectors have been introduced to the hobby by building kit radios. Often, the first kit radio or home brew was scrapped for parts. Then in later years, there is an urge to find that first or favorite radio again. Herb Parsons tells us about his experience. (Editor)

The Philmore TR201, shown in Figures 1 and 2, is a radio that has always fascinated me. It was my first radio kit, which, when completed, was a portable that I could take out and show off to my family and friends.

I was 12 years old in early 1957 when I got my mother to take me into Boston. We usually went to the original Radio Shack at the end of Washington Street or to Lafayette Radio on Federal Street, but this time I wanted to visit a new place. I had heard about some radio shops near Scollay Square. They were similar to those found on Radio Row many years ago in New York. In one of those shops I found the TR201 kit from Philmore and couldn't go home without it.

THEN — BUILDING AND ADJUSTING

The next few days were spent following the step-by-step instructions to build the 2-transistor TR201. It was a pleasure to build. There was plenty of room for components, and the instructions were very clear and precise. However, I remember being disappointed when I first turned it on. Nothing but squeals and whistles emanated from the speaker.

Nevertheless, the instructions had several remedies if this condition arose. These consisted of changing several resistor values and reversing connections on the three RF coils. After experimenting with these remedies to "cool" the RF section a bit, I couldn't believe the performance of this set, with only two transistors! It tuned in most of the Boston stations and most with ample volume. I finally had a working portable radio! That radio served me well for quite a few years at home, on picnics and at the beach.

NOW — RECONSTRUCTING THE PAST

Somewhere along the way, my TR201 got scrapped for parts. About 25 years later when I started collecting antique radios. I often wondered if I could ever find one of these sets. Over the last couple of years I have submitted want ads in A.R.C. looking for one. Then, last year, I finally got a response. And what a beauty it turned out to be!

Figure 1. This Philmore Model TR201 uses two transistors in a reflex circuit for "multitransistor" performance.

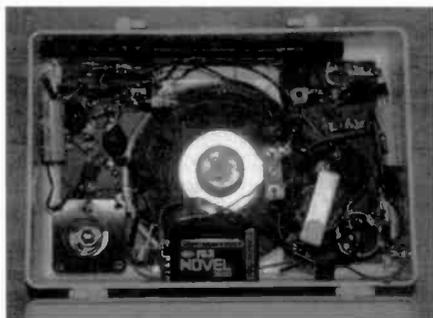

Figure 2. One look at the Philmore's "innards," and it is obvious that this is a kit radio.

The set was in excellent condition and was complete with the original instructions. After a cleaning and some paint touch-up, it looked like a new set. Examining the inside, I found that all components were there and wired properly. I fired it up. Again I heard the familiar squeals and whistles. I repeated the steps I went through many years ago and also replaced the first transistor. To my delight, this TR201 is performing just as mine did many years ago.

This set still amazes me today. The reflex circuit allows the first transistor to act as two by assigning double duty to it. The circuit used is quite unique. This radio tunes in most of the

strong local stations with ample speaker volume and requires no external antenna!

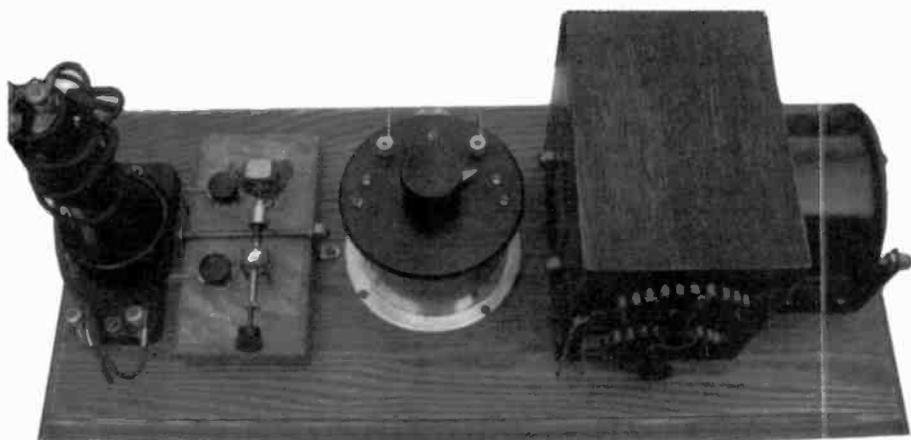

If anyone would like a copy of the schematic/instructions, write me. I am so glad I was able to obtain one of these sets. Thanks to Mr. Marvin Hess for responding to my A.R.C. ad. This set has brought back many memories.

(Herb Parsons, 5 Surrey Lane, Peabody, MA 01960-2027)

Herb Parsons has tinkered with radios since childhood when he began with crystal sets and moved on to kits and early transistor sets. In his early adulthood, he had a radio-TV repair business for about five years. Around 1980, a copy of "Antique Radio Gazette" alerted him to the existence of serious radio collecting. Since then his collection has grown to over 100 sets, and both their physical and electrical restoration continue to be a pleasure.

A Reproduction Wireless Receiver

BY ROBERT B. ENEMARK

Very early crystal sets can be difficult to find. Bob Enemark tells how he built one using a collection of old parts. The result is an attractive and authentic-looking reproduction. (Editor)

The receiver shown here is a project radio I completed some 10 years ago. It is a reproduction of an early breadboard-type crystal receiver using all original components. From left to right, the photo shows an old, exposed terminals telephone earpiece atop a Murdock phone condenser. Next is a 1914 marble-based Clapp-Eastham Ferron crystal detector, followed by a Clapp-Eastham Blitzen 43-plate tuning capacitor with glass surround. To the right is a Clapp-Eastham loose coupler. All are mounted on an oak board.

I found that a large antenna was needed to get good reception using the Ferron detector. However, a Germanium diode across its terminals worked wonders!

HISTORY OF THE FERRON CRYSTAL DETECTOR

The Ferron crystal detector was invented by Dr. Greenleaf Whittier Pickard in 1902. By 1906, Pickard had explored several thousand minerals or com-

binations thereof in seeking a better RF detector.

His discovery that silicon crystals made really good detectors led to an "old standby" unit that many radio operators used. By 1906, he had formed the Wireless Specialty Apparatus Co. with P. Farnsworth. Many years later in Needham, Mass., he founded Pickard & Eurns, Inc., with Harold S. Burns as president. I was a project manager for P & B from 1956 to 1963, at which time I formed Electro Signal Lab in Weymouth, Mass.

Dr. Pickard was a well known scientist and Ham who frequented and lectured at the South Shore Radio Club in Quincy, Mass., for years. I met him there in 1950, but he had passed away by the time I went to work at P & B.

(Robert B. Enemark, P.E., W1EC, P.O. Box 1607, Duxbury, MA 02331)

Bob Enemark, a consulting engineer since his World War II service in the Marine Corps, holds over 50 U.S. and foreign patents. A Ham radio operator since 1941 (W1EC), he has been a radio collector since 1982, when he also set up a museum display of French ocean cable telegraph in Duxbury, Massachusetts.

WITH THE COLLECTORS

The Deutsch Collection Every Collector's Dream

BY JACK SMITH

The kind of discovery Jack Smith describes in this article is one we all dream about making. Perhaps his story will prompt many of us to make the trip to the Estes' auction of this wonderful collection in September. (Editor)

As radio collectors, we all know the great lengths we go to find the radios of our dreams. Sometimes, all of the newspaper ads, yard sales, and networking come up empty. Then, there's fate!

A woman named Phyllis happened to go to an antique show on Cape Cod last summer, and she approached a dealer who was displaying just one old radio. She told him that a neighbor and her husband had a radio collection they were considering selling and asked if he knew anyone who might be interested.

I had bought some radios from the dealer a number of years before, and, believe it or not, he still had my name and number! Phyllis called me and said she'd pass my name along to her friends, Betty and Sandy Deutsch. A few months went by and, not hearing anything, I thought it was just another one of those interesting opportunities that might never happen.

However, soon after, Betty Deutsch called me and suggested that I stop by when I was in the area. I was planning a trip, so we set up a date. After arriving one evening and talking for a few minutes, Sandy, Betty, and their son Stephen took me downstairs to Sandy's "Radio Room." I've been in hundreds of basements and attics in search of old radios over the years, but I was completely unprepared for what I was about to see. The floor and walls of Sandy's "Radio Room" were filled with just about every collectible radio I'd ever heard of, and a few that I hadn't.

From Cutting & Washington, Federal and Paragon to Atwater Kent breadboards (seven to be exact), a Westinghouse SE-1012A, two Von Lieben Triodes and a rare Western Electric 4A, Sandy's collection (over three hundred pieces all together) would make most radio museums pale by comparison. The room was chock full of collectible crystal sets, keys, horns, cathedrals, consoles, books, tubes, ham gear, antennas and even an early scanning disc television.

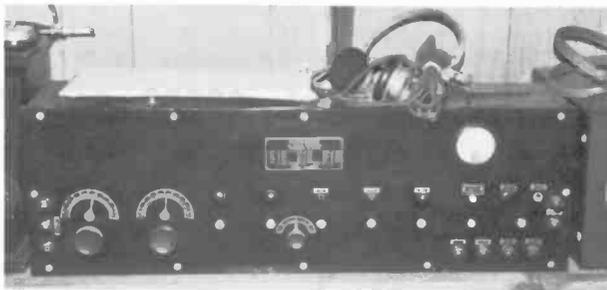

Sandy, Betty and I spent a

In the "Radio Room" with Betty Deutsch, Bob Do-bush, Estes' tube expert, holds one of the vacuum tubes in the collection.

few hours talking about Sandy's collection and how they had accumulated it during their thirty years of collecting. Sandy had an interesting story about finding and restoring each radio and really enjoyed sharing his adventures. I, on the other hand, was thrilled just to be in the same room with all of this radio history and two people that had lived it.

Each piece was perfectly restored and worked beautifully. Sandy was such a perfectionist that only the completely restored radios were allowed in the "Radio Room." The unrestored ones, including another Atwater Kent Model 10 bread-board, were relegated to the garage!

A rare 1922 Western Electric Type 4A in the Deutsch collection.

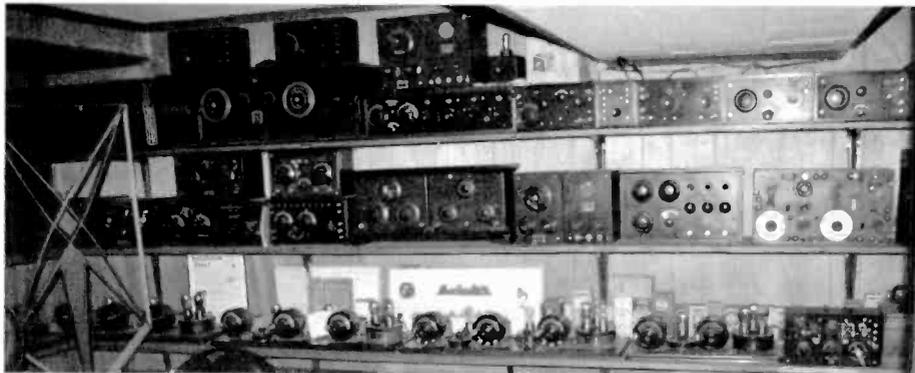

It was the radio collector's dream come true. I could have sat there for days just looking at the collection and listening to Sandy's reminiscences and his appreciation for what radio brought to their lives. In my eyes, no matter how much we think of ourselves today as "true" radio collectors, only those men and women who lived through the early days of radio and had it affect their lives so greatly can really claim that title.

Sandy was in very poor health, and they had made the difficult decision to sell the collection so that other people could enjoy these radios in the future the way they had over the years. Unfortunately, while I was helping to get the collection into the hands of an auctioneer, Sandy passed away. Betty and I just recently brought the project to completion with the help of Richard Estes and his great crew, who picked up the collection for an auction this coming September.

I doubt that I'll ever find another "Radio Room" like Sandy's again, but I'll always value the experience, and most importantly, the opportunity to get to know a man whose passion for the hobby renewed my respect for what these pieces of wood and metal really meant to the lives of that first generation of "true" radio collectors. Maybe fate does play a role in radio collecting after all. Thanks Phyllis!

(Jack Smith, 288 Winter St., North Andover, MA 01845. Estes Auctions, 7404 Ryan Rd., Medina OH 44256; (330) 469-4992; estesauctions@aol.com)

Jack Smith has been an avid radio collector for over twenty years and an A.R.C. subscriber since the beginning. He lives in the Boston area and is a member of the New England Antique Radio Club. His collecting interests run from early battery sets and radio-related periodicals to early hi-fi table radios and vintage tube audio equipment.

One wall of the "Radio Room" displays early battery sets like Radiolas AR-812, V, and RC, along with many, many Crosley radios and amplifiers. Look carefully and you'll see an early Chelsea radio, an exceptional Westinghouse Type SE-1012A receiver, and a few of the seven Atwater Kent breadboards.

Another wall of the collection shows very desirable cathedrals, tubes, early shortwave and broadcast band receivers, a Pilot 3" television, and items too numerous to mention.

(Continued on following page)

(The Deutsch Collection, continued)

This photo shows just how diverse the Deutsch collection is. Seen here are battery receivers, horn speakers, loops, cathedral radios, dealer display signs, and even a scanning disk television set.

This photo shows Bob Dobush, standing, and Richard Estes preparing to move the collection to Ohio for the auction. Several telegraph items can be seen in the lower left portion of the photo.

WITH THE COLLECTORS

Admiral 4T11 Portable Radio

BY WILLIAM DEMETRIOU

Reading the step-by-step story of this restoration, you get the message along the way that this is a collector who really loves old radios, "even the ugly ones." We, of course, understand that sentiment and applaud his efforts to preserve radio history in any shape or form. (Editor)

It was the 1950s, and everywhere you turned manufacturers were designing portable radios by the millions. The sets were every shape, color, and size imaginable.

Although my own antique radio interests go more toward the wooden radios of the 1930s and 1940s, I still like collecting those radios of the 1950s, especially the ugly ones!

One set of the period that I have purchased is the Admiral 4T11, which looks neat and compact for a tube set. Manufactured by Admiral Corp., 3800 W. Cortland St., Chicago, Illinois, its chassis number is 4T1. The power supply is 110-120 AC-DC or 7.5 volts "A" supply and 67.5 volts "B" supply. It is an AC/DC set that operates on AC, DC, or battery.

Maybe I like it because it reminds me of a set that was on the counter in my mother's kitchen in the 1960s. I never remember my parents putting batteries in it, but I do remember my mother listening to her favorite radio station every Sunday while cooking that big Sunday dinner.

THE RESTORATION PROCESS

This radio was not in too bad condition. It had all its knobs, and the case had no cracks or damage. I first took the set completely apart and soaked the case in a tub of soap and water while starting to work on the rest of the set. Looking at this nice compact chassis on my workbench, I decided to take the cover off the bottom of the chassis. I noticed that the line cord wires were frayed just before the plug, but the wire was still in good condition. So, I just replaced the plug with a plug of the same vintage as the radio.

Looking at the component side of the chassis, I saw three wax capacitors that were crummy, cracked, and melted. The three were as follows: a C6, a 0.25 mF bypass capacitor, a C13, a 0.047 mF, a C2, and a 100 mF rated at 150 volts. I also found an R15 surge limiter resistor (47 ohms at one watt) that looked very discolored. So, I replaced all the "iffy" components with fresh stock.

The radio has four tubes: 1R5 converter, 1U4 IF amp, 1U5 Det-AVC-AF, and 3V4 power output. I took the tubes out and tested them. All tested fine. I then did the norm and cleaned the tube sockets, cleaned the chassis, and blew out the dirt and dust

The 1951 Admiral 4T11 Portable.

between the plates of the tuning capacitor. I gave the tuning capacitor front bearings a dab of lubrication so it could turn freely with no resistance.

Everything looked okay, so I plugged it in and Wow! It played great! I could not believe how well it played. At this time, I put the chassis cover back on and polished the case that was soaking. I then reassembled the set back to factory specs. To my surprise, the radio looked and played great!

The best part of this restoration is that I did not use any test equipment, except a tube tester. I didn't have to do anything technical to get the radio to work, except to replace a few "iffy" components. I had never really worked on too many radios with this tube complement before. Digging around my shop, I came across two other portable radios with similar tube numbers. I will let you know how they turn out.

What is it about antique radio? I just love old radios. I love the way they look, I love the way they smell, and I love seeing those tubes glow.

'Til next time, I hope you find that radio you've always wanted!

William Demetriou, N2QGX, has been interested in electronics for 30 years. He has been a radio collector for about seven years now and is a member of the Hudson Valley Antique Radio and Phono Society. Please visit their Web site at [harspny@tripod.com](http://harspny.tripod.com).

WITH THE COLLECTORS

JC Penney Hypersonic AM/FM Neon Radio and Cassette Player

BY RICHARD ARNOLD

Richard Arnold has made another interesting find. This time it is a combination radio and cassette player in a transparent cabinet. As the advertising stated, it would "add flair to any room." (Editor)

Here is a very unusual, if not unique, novelty radio — the 1990 Hypersonic AM/FM neon radio and cassette player, Model 8802C. This radio, shown in Figure 1, was made exclusively for the JC Penney Company by the Hi-Tech Electronics Company, located at 25 Green Street, Hackensack, New Jersey. The JC Penney Company contracted for only 1,000 sets and offered them for sale in its 1990 Christmas catalog as a catalog item only. The price was \$149.95.

I was told by the JC Penney Product Service Department that fewer than 1,000 of the radios were sold, as some of them were returned as defective, some suffered shipping damage, and others were used in JC Penney's product testing program. With this information it seems that the bottom line here is that this is one rare radio.

I can remember seeing this model on display in our local JC Penney store. It was pretty sharp looking with its two neon tubes all aglow, as can be seen in Figure 2. I remember wanting one, but at the time, I was not willing to part with \$150, so I passed it up. I guess it all worked out OK. I had to wait 12 years, but I found a near mint one a few months ago here in a local antique store for only \$47. I saved \$103, plus tax and shipping.

THE HYPERSONIC'S FEATURES

The Penney Hypersonic radio is a solid-state superhet mounted in a half-round, clear plastic cabinet that measures 13 1/2" x 8 3/4" x 10 3/4". All the workings are inside the cabinet, except for the five knobs. The very nice, unique feature of the radio is the two curved neon tubes. The front tube glows blue, while the rear tube glows pink. According to JC Penny, the tubes are replaceable.

One of the five knobs turns on the radio and one more click of that knob turns on the neon lights. The radio plays with or without the neon lights being on, and the neon lights do not cause interference on the radio. The power supply is 120v/60Hz with a 15w power consumption. The frequency ranges are the following: 525-1650 kHz AM and 88-108 MHz FM. The cassette player is mounted on the right side of the cabinet.

The five knobs are used for on/off radio and neon lights, volume, tone, tuning and a band

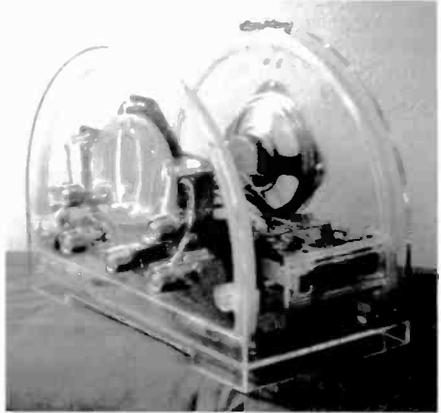

Figure 1. The Hypersonic neon radio with its transparent plastic cabinet, a feature which allowed the user to view the entire chassis components.

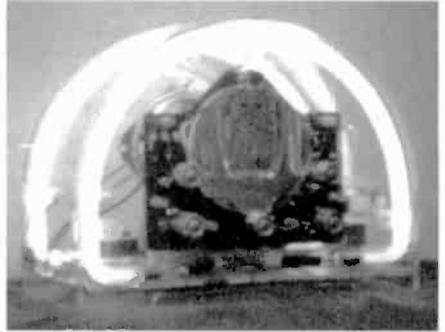

Figure 2. The Hypersonic neon radio is shown in a darkened room with its neon tubes aglow.

switch. The dial scale is round and chrome colored with dark blue markings, quite impressive looking. The radio is very well made. It has good clear sound and is very selective.

OTHER NEON RADIO STYLES

The JC Penny Model 8803C is a cathedral style radio measuring 13 1/4" x 9 1/2" x 21 1/4", and sold for \$199. The record shows that 1,750 were sold. A lunch box style was also made — the

Model 8801, measuring 11¾" x 6¾" x 9¼" — and 1,000 were made. These production numbers would indicate that more cathedrals and lunchboxes might be available than my Model 8802C.

Many thanks have to go to the JC Penney Company Product Services Department. The information they provided was pivotal in preparing this article. I think the company has added a new and unique radio to our collecting hobby.

Well, novelty collectors, I've done my part. Here is a rare one for you to start looking for. Good Hunting!

(Richard Arnold, P.O. Box 275, Lone Grove, OK 73443. E-mail: arnold@brightok.net)

Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. His interest is primarily in cathedrals and 1920s battery sets, and his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. His prize is the 1932 Jackson Bell Peter Pan featured in the June 1991 A.R.C.

History San José to Process and Exhibit Perham Collection

FROM A PRESS RELEASE BY LYNN CROCKER

Antique Radio Classified has been following the Perham Foundation collection in its pages for a number of years. Mike Adams wrote about its legal battles in the issues of March and May 1990 and May 1991. Here is a press release chronicling the latest chapter in this saga. (Editor)

History San José's recent acquisition of the Perham Collection has sparked questions about how and where this unique and fundamentally important collection of more than 20,000 electronics-related artifacts and documents will be displayed.

"Technology buffs are coming out of the woodwork with questions related to the collection and the public's access to it," said Alida Bray, Senior Curator at History San José. "I understand their excitement. These artifacts and documents comprise one of the largest and most significant electronic history collections in the country."

Since 1991, the collection has been stored at two facilities and in 32 sea-going cargo containers. In spring 2003, History San José's collection staff and contractors will begin physically moving the collection and making preliminary conservation assessments.

"The ultimate goal is to develop two publicly accessible products - an exhibit and a companion web page," said Bray. "However, it is impossible to develop these products without first processing the collection itself."

History San José proposes to process the Perham Collection in three stages:

Stage 1: Accession, Inventory, Catalog & Initial Access to the Collection

Stage 2: Record Digital Images of the Collection

Stage 3: Identify and Gather Key Stories about the Collection

Successfully completing these three stages will provide the foundation to create the exhibit: California's Second Gold Rush and the companion, Douglas H. Perham Collection Web Page. The exhibit will showcase historic developments in electronics and their direct relationship to invention of the radio, long distance telephone service, television, personal computers, and automated banking. Many of the technologies that made these daily conveniences possible were developed in Silicon Valley. The web page will serve as the gateway to the collection as a whole, through a

virtual version of the exhibit.

Collection Background: Douglas H. Perham studied electrical engineering at Stanford and worked with numerous great pioneers. Among them was Dr. Lee de Forest who developed the first electronic amplifier — the triode or as he named it the "Audion." The development of the Audion led the way to almost every electronic device we take for granted today such as computers and long distance communication. Several Audions, as well as the Lee de Forest Manuscript Collection, which includes his personal library and papers, are part of the Perham Collection.

The Perham Foundation was started 40 years ago by a group of Silicon Valley educators and engineers to care for the Perham Collection. In 1973 the collection was moved to Foothill College where it was displayed to a limited audience. It remained at Foothill until the college could no longer host the Museum. Perham Foundation stored, preserved, and expanded the collections and archives for the next twelve years, all the while seeking a new museum. History San José has worked with the Perham Foundation for over four years to secure these world-class collections and archives.

Sharing the Perham storage facility, and also publicly inaccessible, is the collection of the Computer History Association of California (CHAC), which was established in 1993. Just one of the many significant artifacts in this unique collection is the prototype for the first Apple computer. CHAC publishes a quarterly journal called *The Analytical Engine* and hosts a Web site specializing in computer history. Recently, the CHAC collection was incorporated into the Perham Collection.

With the dissolution of the Perham Foundation, the collection and the remainder of the foundation's funds were transferred to History San José with the commitment that the collection be made publicly accessible. Perham Foundation members remain a cohesive group and will continue to lend their experience and expertise to History San José as volunteers.

On February 14, 2002, at 9 A.M., there was a hearing in the Probate Department of the Santa Clara Superior Court in San José to approve the Perham Foundation and History San José agreement.

(Lynn Crocker, History San José, 1650 Senter Rd., San Jose, CA 95112. lcrocker@historysanjose.org)

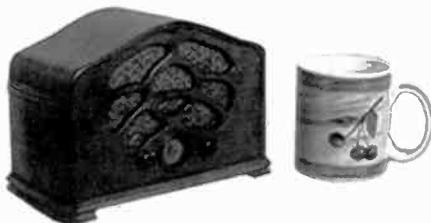

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

FRESHMAN MODEL F-1 EQUAPHASE – The production year for this tabletop set was 1927. This is a battery-operated radio using the following 6 tubes: (4) 201-A, and (1) each 200-A and 112. The instruction book pictures the Model F-4 (floor console) at a retail price of \$225, and the Model F-5 at \$250. Prices did not include the tubes. (*Michael Comer – Haslett, MI*)

EMERSON MINIATURE – This small music box is designed after the Emerson Model 32, but is only one-third as big. It is shown here beside a standard coffee mug. (*Geoff Shearer – Centreville, VA*)

KAPSCH MUCKI – Due to its very simple construction and 2-tube circuit, this set from the late 1940s is one of the most desired by Austrian collectors. It was available in red, green, blue, and brown. (*Erwin Macho – Vienna, Austria*)

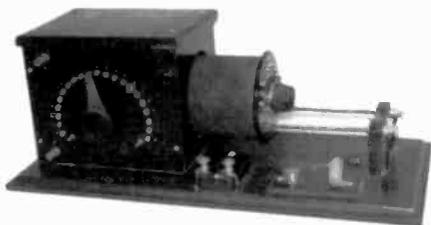

TOM THUMB MODEL ATTP – This portable radio was built in 1947 by the Automatic Radio Mfg. Co., Inc., of Boston, Mass. It is a 4-tube, AC/DC receiver, which has a rejuvenator to charge its batteries. (*Wally Worth – Wollaston, MA*)

PHOTO REVIEW

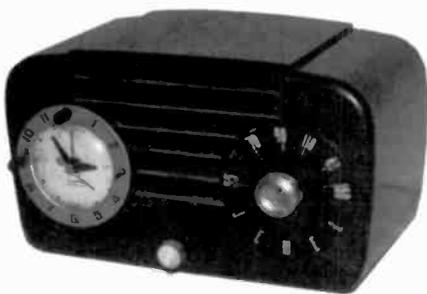

EKCO MODEL AC85 – This 5-tube AC superhet receiver was manufactured in 1935 by E.K. Cole of Southend, U.K. The cabinet is moulded Bakelite. (Jim Taylor – Bournemouth, England)

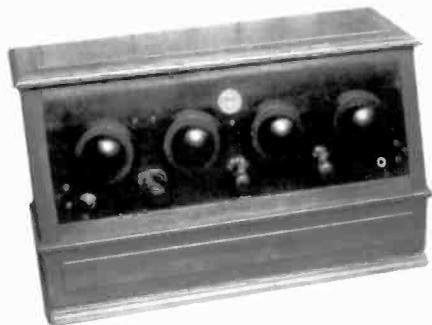

REPLICA LOOSE COUPLER RECEIVER – This is a reproduction of a 1912 crystal set built in 1969 by Bob Herbig of Oceanside, California. It uses a Navy-type loose coupler, Murdock phone condenser and a catwhisker-type crystal detector. The board measures 16½" long. (Wally Worth – Wollaston, MA)

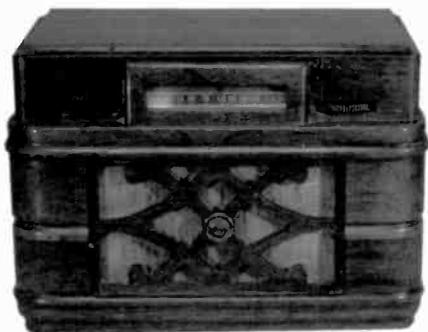

RCA VICTOR MODEL 66X11 – This brown plastic radio was sold in 1947. It has a 6-tube, AC/DC chassis and plays the broadcast band only. (Clark Trissell – Lincoln, NB)

JEWEL MODEL 935 "WAKEMASTER" – This 1949 Bakelite clock-radio, available in dark brown or white, was manufactured by the Dayton Mfg. Co. (Clark Trissell – Lincoln, NB)

OZARKA 4-DIAL RECEIVER – Manufactured in 1924 by Ozarka, Inc., of Chicago, Illinois, this 4-dial battery receiver has 5 tubes with a battery box underneath. I have seen another version in the same cabinet with 4 tubes and an internal crystal detector. (Dave Crocker – Mashpee, MA)

SILVERTONE MODEL 6406 – This 1940 wooden table radio has its chassis mounted upside down. It uses the following tubes: (1) each, Types 12B8, 12SK7, 12Q7, 35L6 and 35Z5. (Jack LaVelle – Oak Forrest, IL)

AUCTION REPORT

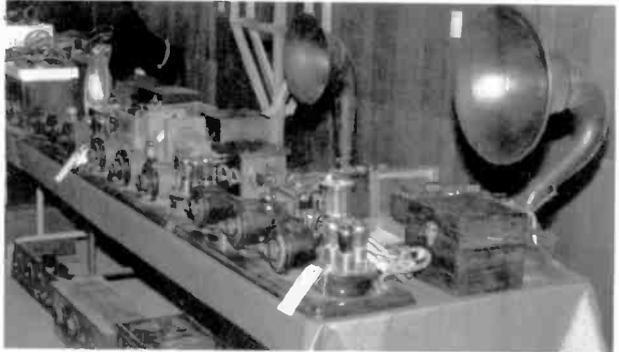

Estes Auction Burbank, Ohio – March 29, 2003

REPORTED BY RAY CHASE

The March 29, 2003, Estes auction included collections from Mexico, Missouri, and Lyndhurst, Ohio, as well as other consignments. The auction was held at the Expo Auction Center in Burbank, Ohio, a few miles from Seville, Ohio. On Saturday morning, many additional consignments arrived up to an hour before the auction's scheduled start time. The auction center has more display room than Estes' auction barn in Seville; still, radios were arranged two and three deep and sometimes two high, making careful examination somewhat difficult.

Estes' auction sales typically contain about 650 lots, and this sale was no exception. There were a great many novelty radios and later 1940s to 1960s models, but overall, there was something for every type of collector.

As usual, the auction lasted all day, ending sometime after 5:00 P.M. Some of the minor tube and parts lots towards the end of the day are not listed. Proceeds totalled over \$33,000. Most notable was the Zenith "Walton's Radio" which sold

This Estes Auction featured lots of breadboards, battery sets, and horn speakers.

for \$2,400. There was a 5 percent buyers' premium in effect at this site that is not included in the listed sale prices.

All prices were rounded down to the dollar.

e=excellent, vg=very good, g=good, f=fair, p-poor, unk=unknown maker, WT=with tubes, NT=no tubes, N.I.B.=new in box, wk=working, nwk=not working, PB=push button, N.O.S.=new old stock, gf=good fill

Some of the many 3-dial battery sets and horn speakers up for sale in the Estes auction.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

This Zenith Model 9S232 "Walton's" table radio, in decent condition, except for 1 knob missing, sold for an amazing \$2,400.

Dorotheum Antique Radio Auction Vienna, Austria – April 23, 2003

CONTRIBUTED BY ERWIN MACHO

The Dorotheum Auction House held its first historical radio auction in Vienna, Austria, on September 12, 1995. Some years have passed, and the sixteenth auction, which combined radio and photograph equipment, occurred on April 23, 2003. As usual, photo equipment was presented first at 2 P.M. with some outstanding lots from Pentax, Rolleicord, Rolleiflex and Contax. All received high bids, and Mr. Kreutzer, who is the photo expert, was very satisfied.

Exactly one hour later, number 201, the first item in the historical radios auction, came under the hammer. It consisted of 78 radio tubes from the the 1930s and 1940s. The asking bid was

\$100, and 30 seconds later a lucky bidder in the salesroom got them for \$130 — a good price for an untested tube lot!

A highlight of the auction was the Irgelen U2W cathedral from 1930/31, a well known radio but hard to find in complete original condition. This U2W was perfect, and it found a new home in a large Austrian collection for \$450. A large part of the auction was bought by collectors with written bids or by telephone. I am sure more than 50 percent went to Germany or other countries in Europe. It shows that such radio auctions are becoming more and more internationally significant.

Top, left to right: Eumig 323, Ingelen U2W. Bottom, left to right: Radione R20, Radione R25T, and HEA Exquisit N.

Top, second from right: Telefunken 33WL/O. Below, second from right: Revox A77 tape recorder. Below, center: Home-brew radio from late 1920s.

The next Dorotheum Antique Radio Auction will be held in November 2003 and will also include photo equipment. For up-to-date information, please look on the internet under: www.dorotheum.com or see A.R.C.'s "Coming Radio Events."

The following is a complete list of items sold in the auction. Most sets were untested, but in collectible condition. All prices have been rounded to the nearest dollar.

e=excellent, vg=very good, g=good, f=fair, unk=unknown make or model, wk=working, nwk=not working

RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet!" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

Crosley Photo Review ID

Dear Editor:

In response to the Crosley in the July *Photo Review*, the radio is a ca. 1935 Model 2-C-1. It is an AC/DC TRF offered in two cabinet styles — the 4AC "Ship Design" and the 4AE "Artists Pictures." The differences in cabinet styles were really in the cardboard front, which serves as the speaker. This is the only radio I know that uses this design. The "Ship Design" is usually called the "Sampler" since it looks like the candy maker. The "Artists Pictures" is a patchwork of radio personalities of the day (Amos and Andy, baseball personalities, singers, etc.). The cabinet is a gold crinkle metal, while the back cover is a gold starburst cardboard cutout.

Bob White, Cincinnati, OH

Dear Editor:

I checked my *Mallory Radio Service Encyclopedia* and find that the only Crosley listed with two tubes that matches this one is the Model 2-C-1, "Sampler." It is in Rider 6-1.

Alvin Heckard, Lewiston, PA

Dear Editor:

On page 12 of the July 2003 issue is the picture of a Crosley, Model Unknown. This set is called the "Sampler" Model 2-C-1. The schematic is found in Rider's 6-1 and in the *Crosley Service Supplement, No. 99*. What I need is someone who has this set in good condition so I can get a copy of the front to restore the set to its original look. Thank you.

Geoff Shearer, Centreville, VA

We've put Geoff Shearer and Bob White in touch and hope that even more information comes of their contact. Our research adds that this set was manufactured in 1934. Since Avco didn't buy out Crosley until 1946, it is still a true Crosley product under Powel Crosley's control. (Editor)

Auction Articles Great!

Dear Editor:

Please enter the enclosed ad. Also, the auction articles are great — keep 'em coming!

Don K. Johnson, Windfall, IN

New Subscriber Enjoys A.R.C.

Dear Editor:

Although I have been an avid radio and jukebox collector for over 30 years. I have only been a subscriber for a little over a year now. I had to let you know how much I enjoy A.R.C. and look forward each month to the new issue. I have met many new friends and obtained much needed parts, radios, literature, etc. via your publication. Why didn't I subscribe a long time ago?

Dave Oihus, Rapid City, SD

On E-mail Addresses in Ads

Dear Editor:

I have enjoyed your magazine for many years, and I still do. My one complaint is not with the magazine but with e-mail addresses in the ads. I have responded to a lot of "For sale" ads via e-mail. It seems that lately I get very few responses, if any. I would like to ask readers to treat an e-mail inquiry just as you would a phone inquiry. If the item has been sold, please reply, "Already sold, sorry." This takes all of 10 seconds.

If you are too busy to go through your e-mail, please do not use an e-mail address in your ad. E-mail is a great tool for quickly corresponding with other collectors to share information. I hope we can use it to its full potential.

Keep up the good work. A.R.C. is one of the few things I look for in the mail each month.

Patrick Franzis, Naugatuck, CT

Photo Review OOPs

Our apologies to Jerry Wieland for the errors in the description of his Universal set in "Photo Review" on page 13 of the July issue. We bungled his description which should have read as follows: (Editor)

UNIVERSAL MODEL 42 — The only identification on this small cathedral is the name "Universal." It is a TRF design using two 24As as RF amps, a 47 for audio, and an 80 rectifier. The volume pot has a grounded wiper with the antenna input on one side and the first RF amp cathode on the other. This design provides regen and antenna input control with one pot. I would like to know the manufacturer and model number.

Experts Answer A.R.C. Ads

Dear Editor:

I have subscribed to A.R.C. for many years, and I haven't used my ad option very often. I advertised for a Zenith Trans-Oceanic and parts in the July issue. I won't say that I got a lot of response, but the ones I did get were very worthwhile. It is really enjoyable to do business with more knowledgeable people, who could be called "experts." I'm tired of paying good money for junk on eBay online auctions with which I have had very bad experiences. Radios I have bought were advertised as in very good condition, but when they came, they looked as if they were picked out of a dumpster. To the people who answered my A.R.C. ad, thanks, guys. Keep up the good work, A.R.C.

Ed Kahle, Waynsboro, VA

Could it be that radios advertised in A.R.C. are more accurately described than those seen on eBay? (Editor)

A.R.C. Ads Work

Dear Editor:

Your classifieds work! I've had excellent results with them. Ed Fluehe, Salt Lake City, UT

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. **Do not send another copy of your ad with your payment;** simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. **Antique Radio Classified** welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and non-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. **Originals must be the artwork size listed below.** Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. **Do not cut or trim photos or glue photos to artwork; submit separately.**

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

| Page | ARTWORK SIZE (SEND IN THIS SIZE) | As Printed (size in magazine) | Cost for 1-month | Cost for 3-months | Cost for 6-months | Cost for 12-months | One Time to make up Ad |

* Full & 1/2 page, 6-mos.: 1/2 due with order; 1/2 due in 3 mos. ** Full & 1/2 page, 12-mos.: 1/4 due with order; 1/4 due at 3, 6 & 9 mos.

† For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29c each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example, 1, l and I (the number one, the capital l and the small L.) Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

CLASSIFIED AD DETAILS

Deadline: NOON ET— 10th of the month!

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE.** This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

Classified Ad Rates per Month

Subscribers:

- First 20 words: **FREE***
- 29c per word for extra words over 20 **plus**
- 10c per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only **one** ad each month.

Non-Subscribers:

- 47c per word **plus**
- 10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

- 40c per word for all words,* none free, **plus**
- 10c per word for each bold word **plus**
- 10c per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

- 50c per word for all words* **plus**
- 10c per word for each all-caps word.

Non-Subscribers:

- Add 20c per word to above costs.

*Three words can be bold-all-caps at no extra charge.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing (If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The **standard headings:** WANTED, FOR SALE, etc., count as **one word** each time used in an ad. **Name, address** and (one) **telephone number**, count as **6 words**, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is **required** in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

FOR SALE: Pair 12" Sp12B - \$100. EVs 15" gold back - \$50; 12" Pro-12 - \$50; 2-12 EVM-12L - \$180. JBLs 15" D140 - \$85. 2-2220H - \$150. 12" Pioneer 30-733A - \$75. Altec 15" 421A - \$60; 418-8H - \$60. EV driver 833-0990-9620 - \$60. 1977 Newark cat 103 - \$7. Ron McGee, 3921 Pinecrest Ct., Jackson, MI 49203. (517) 789-6400. E-mail: rjmccge@voyager.net

“The Sanford Deutsch Collection”

Vintage Radio Auction

Saturday, September 20, 2003 at 10 AM EDT

at the Expo Auction Center, 8157 Garman Rd.,
Burbank, Ohio, Exit 204 off Interstate 71

We are pleased to offer the collection of the late Sanford (Sandy) Deutsch of Yorktown Heights, New York. Sandy enjoyed all facets of radio and was also a ham radio operator. His collection will be combined with the Donald Rossbach collection from Canton, Ohio to make an excellent auction for any collector. Some of the items in the Sanford Deutsch collection are: Federal 59, 61, Cutting & Washington 11A, 11B, Clapp-Eastham C3, Grebe CR2, CR3, Paragon RD-5 with A-2 amp, Tuska 224, 225, Western Electric 4A, Westinghouse SE1012A (1918), Western Coil & Elect. WC-15, Shepco T-12, Michigan Midget, NY Album & Card NYACCO portable w/loop & speaker, Crosley Pup w/box, Crosley Ace, Erla K-8. Also many early tubes to include Von Lieben triode (clear) & Von Lieben triode (coated), DeForest Audion SN-125, & others. Marconi spark gap, DeForest crystal detector, a Majestic adv. sign electric w/rotating globe, Zenith 6' tall sign “Long Distance Radio” ca. 1935, McMurdo Silver 701 transmitter, Daven TV scanning disc w/motor & Raytheon neon tube, Pilot 3" TV, Colonial New World globe, Pepsi Cola cooler, crystal sets, Beaver baby grand, Howe, Lemco, Mengel, Murdock & others. Loop antennas, Deutsche Telephonwerke, Western Electric, 25 horn speakers including Western Electric 1C-D, 521CW, 521W, Timbertone, (6) Atwater Kent breadboards. Lots of AC sets, tombstones & cathedrals. We will have photos on the web soon. Make plans to be with us at this sale.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Radio and Advertising Auction

Saturday, October 25, 2003 at 10 AM EDT

at the Expo Auction Center, 8157 Garman Rd.,

Burbank, Ohio, Exit 204 off Interstate 71

Estes Auctions will offer items from the estate of the late Danny Gustafson of Chicago. Danny was a devoted RCA collector and had amassed a large selection of RCA advertising to include clocks, neon signs, back lit signs, metal flange dealer signs, wall banners, curtain type displays, stand-up dealer advertising ads, record advertising. There are over 100 pieces of advertising items to be sold. Radios will include a Radiola IV in the original wood crate, Radiola III in the original box both the Model III and IV were never used. A Radiola Special, RCA ER-753 crystal set, Marconiphone V2A, Radiola V, Radiola VII, and others. A selection of cathedral and tombstone radios. Century of Progress pieces. Also a selection of Catalin radios, a Sparton Bluebird and other mirrored radios, character radios including Snow White, The Lone Ranger, Mickey Mouse, Hopalong Cassidy, Mae West radio, Rudolph the reindeer, RCA ship radio RC-45, Charlie McCarthy, and more. We have started work on getting photos for our web site and a brochure with some of the items pictured in color. We will sell one television from the collection of RCA-TRK in nice condition. We will offer more information in next month's A.R.C. Preview 8 AM day of sale. 4PM-8PM Friday, Oct. 24. 5% gallery fee.

“The Donald Rossbach Collection”

Vintage Radio Auction

Saturday, September 20, 2003 at 10 AM EDT

at the Expo Auction Center, 8157 Garman Rd.,

Burbank, Ohio, Exit 204 off Interstate 71

After collecting for many years, Donald Rossbach of North Canton has decided to pursue other interests. We are proud to be able to offer this fine collection along with the Sanford Deutsch radio collection. The quality of both collections and the rarity of some of the pieces offered will make it an auction you will not want to miss. Some of the items in Don's collection are: Crystal Sets: Brownie #2, ET Turney, Hearever, Howe, Kodol, Levinsons, Levinsons Senior, Little Giant, Locke DC, Philmore, Revophone, Shield, Telefunken, Wireless Shop and two loose coupler type. Amateur Radio: Hallicrafters SX-76, SX-43, SX-62, S-38C, S-38EM, Sky Champion, Sky Buddy, SX-99, Hammarlund HQ-180A, HQ-129X, HQ-140X, National HRO, HRO-5TA1, SW-54, NC100 A50, S-101, dog house power supplies (2), Echophone, Signal Corps R-390-URR. Battery Sets: DeForest SP-500, Federal 61, Federal Type 200, Type 102, Type 110, Grebe CR-14, CR9, Clapp-Eastham HZ amp, Clapp-Eastham R4 detector & amp, Etherphone 1-tube w/detector, Echophone, Radiola II, Radiola RS, Tuska 224, Superdyne Jr., Tri-City 1-tube, RA-DA unit, Zenith 4R, Zenith 2M amp, Westinghouse 2-stage amp. In addition, Don has many nice speakers, a Freed-Eisemann store kit never assembled, a WWII German radio, several glass front home brew units and one in an all-glass case. Don collected AC sets also so we will offer tombstone and cathedral radios from his collection. Also his Zenith Trans-Oceanics. Please watch our website, pictures will be posted in the near future. Make plans now to attend this fine auction. Preview 8 AM. 5% gallery fee.

SPECIAL ITEMS: Wireless Specialty IP-501 with Type B amplifier.
Western Electric Type 25-B amplifier.
Cutting & Washington Type 15 tuner.

RADIO RESTORATION PARTS

Vacuum Tube Repair Wafers

These wafers are solid-state devices for quick and easy repair of early vacuum tubes. The wafer is installed by simply sliding it over the tube pins and reinserting the tube into its socket. If the filament is intact but there is little or no emission, the filament may be lit for best visual effect. However, the tube can be open filament.

No change in radio operating voltages is required. Any number of tubes may be repaired in a radio. If wafers are installed on all tubes, the B+ voltage typically may be reduced without sacrificing volume or sensitivity. Performance will vary between radio models. For best results, order one (1) "D" detector wafer for each radio. **\$10 each (2 or more, \$7.50 each)**

Model # Also fits:

| | |
|-------|---|
| 01A | 00, 00A, 01, 201A, 301A, 12, 112, WD12, 40, 71, 171 |
| WD11 | - |
| UX199 | 20, 120, X120, UX120, 30, X130, UX130 |
| UV199 | - |

Active Antenna

The active antenna allows antique radios designed for a long wire outdoor antenna to operate on an indoor whip antenna. Portable. Operates from a 9-volt battery. **\$34.95**

AUCTION: Due to events beyond my control, the auction of my collection of 30s and 40s radios and associated items, scheduled for July 26, 2003 did not take place. Oberman Auctions will reschedule it in their new building and the date for the auction will be announced in the September issue of A.R.C. See June and July issues of A.R.C. for a listing of items to be sold. Joe Svihel, 17227 Co. Rd. 54, Avon, MN 56310. (320) 356-7601

MESSAGE: The auction originally scheduled for July 26, 2003 will be held Oct. 4, 2003 in the new Oberman Auction facility, located 1 mile south of I-94 on Hwy 15 in South St. Cloud, MN. See www.obermanauctions.com for pictures in mid August. Joe Svihel, 17227 Co. Rd. 54, Avon, MN 56310. (320) 356-7601
