## WANTED

### AIR KING SKYSCRAPERS

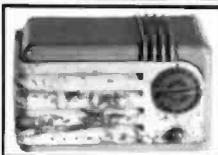

PAYING **\$14,500.00+** for near mint condition red or blue  
**\$10,000.00+** for green, lavender or yellow  
**\$3000.00+** for black and **\$2000.00+** for white or brown  
**ALSO WANTED ANY COLOR-ANY CONDITION**  
 COLLECTOR PAYING TOO MUCH, CALL ME LAST

### TOM THUMB CATALIN RADIOS WANTED

paying **\$6,750.00+** for mint cond red, green, orchid, blue  
**\$2500.00+** for any mint condition one

**ALSO WANTED ANY COLOR-ANY CONDITION**

### DETROLA PEE WEE & SUPER PEE WEE WANTED

paying **\$600.00+** for mint cond black, white

**\$1,450.00+** for beetle, gray, salt & pepper

**\$2000.00+** for red, blue **\$3500.00+** for green or lavender

**ALSO WANTED ANY COLOR-ANY CONDITION**

### WANTED ANY CATALIN RADIO

ADDISON 2 MAROON & YELL \$900.00, YELL & RED \$3,750.00  
 ARVIN 532 ANY COLOR \$2,500.00, BENDIX 526 GREEN & BLACK \$625.00,  
 DeWALD A501, A502 BROWN \$375.00, YELL & RED \$1,200.00  
 EMERSON AU 190 & BT 245 YELL \$1,300.00, GREEN \$2,500.00,  
 DARK RED \$2,700.00, BLUE \$6,850.00, BRIGHT RED \$11,000.00,  
**ESPEY MIDGET, YOU NAME THE PRICE I WILL PAY IT!**  
 EMERSON BM258 YELL \$750, GREEN \$1,350, RED \$2,150, BLUE \$4,000  
 EMERSON 564 BLACK \$500.00, GREEN \$1,150.00, RED \$1,650.00  
 FADA L56, F55, 52, 5F50, 5F60, 136, 53X, YELL \$1,500.00, LT GREEN \$1,750.00  
 MAROON & YELL \$2,200.00, YELL & BLUE \$2,500.00, YELL & RED \$3,100.00,  
 EMERALD GREEN & YELL \$7,000.00, BLUE & YELL \$7,000.00,  
 FADA 115, 116 & 1000 ALL YELL \$700.00, MAROON & YELL \$950.00,  
 YELL & RED \$1,150.00, PEA GREEN \$1,300.00, BLUE & YELL \$2,550.00  
**GAROD 6AU1 MAROON \$675.00, YELL & RED 1,350.00, RED & YELL \$1,450.00**  
**HALSON ANY COLOR \$1,500.00 TO \$5,000.00**  
 MOTOROLA 50XC ALL YELL \$1,750, BROWN & TORT \$2,750.00, RED & YELL \$6,000.00, GREEN & YELL \$6,250.00,  
 MOTOROLA 52 YELL & TORT \$1,500.00, MAROON & YELL \$1,850.00, GREEN & YELL \$2,900.00,  
 SONORA KM ANY COLOR \$1,600.00,  
 SENTINEL 284 WAVEY GRILL YELL \$700.00, SAND 950.00, RED 1,450.00, BLUE 6,500.00  
 SPARTON CLOISONNE ANY COLOR \$3,500.00 TO \$5,500.00, EMERSON 520 \$50.00

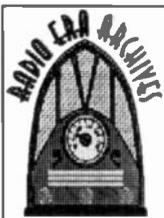

always buying any catalin or pre-war colored bakelite radios

We will buy one piece or the entire collection.

"watch out there's a new guy in town"

## Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has just released the first DVD-ROM publication at a break-through introductory price. REA created the first Riders Professional CD-Series that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we introduce the Riders Standard Series DVD using Riders' indexes for finding "that" schematic that you need occasionally. Priced at a very low introductory price, every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. Introductory Offer - Limited Time - A professional produced product.

**Only \$ 150 + \$ 6 S&H (Sold only on DVD) -  
Introductory Price - Reg. Price \$ 199**

### Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD) . . . . .  
Cunningham-Radiotron Hi-Rez CD \$ 85 . . . . .  
Sam's Photofact Sets 1-175 - 7 CD's, with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)  
**All 7 Sam's CD's (1-175) - \$ 495.00** . . . . .  
Radiophile Vol. 1 - \$ 85 . . . . .

## ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, 498-A Cross Street, P.O. Box 2, Carlisle, MA 01741. Periodicals postage paid at Carlisle, MA, and additional mailing offices. Telephone: (866) 371-0512, 9:00 AM to 5:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are \$39.49 by Periodicals mail and \$57.95 by First Class mail.

Annual foreign rates. By air: Canada - \$61.00; Mexico - \$67.00; Other foreign countries - \$105.00. Surface mail: Canada - \$51.00; Other foreign countries - \$58.00. (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two-year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

**CONTACTING ANTIQUE RADIO CLASSIFIED.** All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.

Only UPS, FedEx, etc. items to street address: 498-A Cross Street.

Telephone: (866) 371-0512; Fax: (978) 371-7129

E-mail: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com)

Web: [www.antiqueradio.com](http://www.antiqueradio.com)

Please, no classified ads by telephone, thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

## EDITOR'S COMMENTS

What should a collector do in winter? A little repair and restoration work, a bit of shop reorganization, some buying and selling through A.R.C.? All noble pursuits, but there's that urge, that need to get out and meet our fellow collectors. Over 700 folks did just that at Radio XXXV, the big meet of the year for the Greater Boston Antique Radio Collectors, hosted by A.R.C. Over and over we heard folks express their pleasure in escaping hibernation and enjoying the general camaraderie of such a gathering, especially as this cold and icy winter drags on in the Northeast.

Radio XXXV certainly was a place to buy that set to add to your collection and sell those gathering dust in the basement, attic or barn. At such events, potential contest material may abound, but if there is no contest, there is always a flea market. There the sights can range from contest candidates to musty basket cases, sometimes complete with interred wildlife.

Our lead article by John DeLoria and Richard Burton illustrates my point. At the AWA Convention last August, John's Ozarka Viking Model 93, a contest entry, caught my eye. From that encounter, John's article evolved, with the help of Ozarka expert Peter Burton. The article tells how a flea-market basket case can be transformed into a prize winner — a lesson worth repeating.

Interest in a particular set can be sparked at a meet, auction, club meeting, antique shop, almost anywhere. An old ad did it for Richard Arnold, who usually writes about AC cathedrals. In fact, in all the years that Richard has been a contributor to A.R.C. we can't recall when he's ever written about a battery set. However, that ad led to at least a momentary interest switch to a 1927, battery-operated, RCA Radiola 16.

Richard calls the Model 16 the "last of the pre-electric battery sets," and what is most interesting is that it was advertised for about half the price of the new electric Radiola 17. We wonder how it sold. Did buyers consider only price, knowing that the technology was changing and they would be behind the times buying the Model 16? Today the 16 is a good transitional piece for a collection.

Speaking of transitions, Ray Bintliff writes about the Aladdin Radio Repair Shop, which he discovered on a trip to the San Francisco area. You might say that John and Louise Wentzel's shop has been in transition since 1945. First, their concentration was on radio repair, but when TV arrived in 1950, they switched. Now they are back to repairing antique radios, much to their pleasure. Possibly the oldest continuous radio repair shop in the country, Aladdin is certainly worth a visit if you're in the area.

A radio repair shop with such a long history is a rarity. Be on the lookout for such interesting places whenever you travel and let us in on your discovery.

*Photo Review* features sets from the 1920s to the 1950s, everything from a military receiver to several traditional home sets. Perhaps most interesting is the farm set operating on 32 VDC more than likely supplied by a windmill in that heyday of wind power. The Guild set in the form of a lantern is also an eye-catcher.

We are finally catching up on the Estes auctions, this one totaling \$46,000. Among the high-end items were the Collins S-Line equipment selling at \$1,800 and the British World War I Mk II receiver at \$1,500. In addition, two breadboards sold for over \$1,000 each. There was also a good assortment of tubes, consoles, cathedrals, and even TVs.

Once again Ray Chase was our intrepid reporter assisted by his super radio wife Edith who fills in when Ray can't be at two sections of the auction at once. Of course, there are more Estes Auctions to come, so we consider ourselves extremely lucky to have the Chase reporters among the A.R.C. contributors.

*Radio Miscellanea* includes a number of restoration tips, as well as a good suggestion for getting your sets operating at meets.

**A.R.C. Benefits.** A.R.C. benefits deserve your attention: a toll-free number (866) 371-0512; the web: [www.antiqueradio.com](http://www.antiqueradio.com); Discover, Visa, American Express, and MasterCard accepted; books shipped free in the U. S. by book rate; and to current subscribers, a ten percent discount on all book orders.

**Coming Radio Events.** Two-day events are beginning to show up on the calendar as the weather becomes less threatening. The AWA Carolinas Chapter will hold its 28th Spring Conference in Charlotte, North Carolina. Of the 33 other events, 28 are meetings, four are swap meets, and one is another Estes Auction. As always, we urge you to attend at least one and lend your support to our joint avocation.

Happy Collecting!

John V. Terrey, Editor

---

## ON THE COVER

John DeLoria's handsome Ozarka Model 93 is shown on our cover in a photo taken by Editor John V. Terrey at the AWA Conference in Rochester, New York, last August. According to Ozarka, this set had "no equal as a super." It sold for \$69.50, while the Model 93B with the same chassis sold for \$49.50.

# WITH THE COLLECTORS

## The Viking Model 93 — Ozarka

COMPILED FROM INFORMATION CONTRIBUTED BY  
JOHN DELORIA AND PETER BURTON

*Sometimes a radio is so striking that almost everyone pays attention. That seemed to be the case with John DeLoria's Ozarka 93 at the AWA Convention last fall. I immediately envisioned a possible cover for A.R.C. and asked John to help us to put together an article. Peter Burton, whose Ozarka article appeared in A.R.C.'s October 1995 issue also contributed. Enjoy the result below. (Editor).*

John DeLoria has been collecting Ozarka sets since 1988. He's had good company in fellow Ozarka aficionados Don Patterson and Peter Burton. Subscribers will remember Peter's October 1995 A.R.C. article, "The Other Ozarkas," which included a Model 93. Although Peter did not have specific information on the Model 93, he was able to provide a Model 93B brochure in which, comparing the Model 93B to the Model 93, Ozarka claimed that it had "taken the same circuit, reduced its cost... and yet produced a real good super." Ozarka also boasted that "the success of the Model 93 Ozarka... has proven that, as a super, it has no equal." In 1931-1932, the Model 93 sold for \$69.50, while the Model 93B sold for \$49.50.

John's Ozarka Model 93 was one of those chance finds at a flea market in the Cape Ann area of Massachusetts last summer, just before the AWA Conference. It was a basket case, but John set to work on rebuilding everything internally, as well as on refinishing the cabinet. His thought was to enter it in the Old Equipment Contest at AWA because he knew that the set was rare and that folks would enjoy seeing it.

*A rear view of the Model 93 showing the unusual 6-tube line-up on the rear edge of the chassis.*

*The Ozarka Model 93.*

As he said, "It's nice to show something that no one has seen before." The set received recognition in the cathedrals, tombstones, and consoles of the 1930s and 1940s category.

Although the following information is from the Ozarka Model 93B brochure, John notes that the description applies to his Model 93 as well.

The chassis is 14" long, 8 $\frac{7}{8}$ " deep, and 7 $\frac{3}{4}$ " high overall. The weight is 22 lbs. The seven tube types are as follows: 227 oscillator, 235 signal amplifier, 235 modulator, 235 intermediate frequency amplifier, 227 second detector, 247 power amplifier, and 280 rectifier. The new type 235 variable  $\mu$  ( $\mu$ ) tubes used in the first three stages insure against disagreeable cross modulation and reduce hiss to a minimum.

The new 247 pentode in the output stage gives a power output of three watts or equal to two Type 245 tubes. The amplification obtained is 30 times that of a Type 245.

Complete shielding is employed, allowing maximum selectivity and sensitivity. In addition, radiation from the local oscillator is kept at a low level. The instrument will not interfere with other receivers located in the neighborhood.

Electrolytic condensers are used in the filter system. Due to their high capacity, hum is reduced to a low level, and their self-healing

characteristic makes breakdown impossible.

The large transformer is so designed that the temperature rise is low, thereby insuring long life and preventing burnouts. Resistance coupling is used between the detector and pentode. Due to the fact that there is absolutely nothing in this circuit to cause distortion, the tone quality is exceptional. The dynamic speaker of high quality is carefully matched to the receiver, insuring the best possible performance.

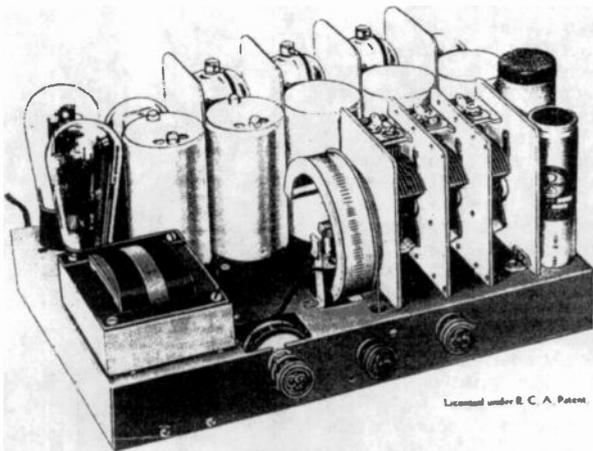

The RF system is so designed that uniform gain and selectivity are obtained over the entire frequency band. A power line filter condenser prevents RF disturbances in the power line from affecting the instrument and eliminates the necessity for a ground connection in most cases.

The sturdy 3-gang condenser for tuning is accurately balanced and adjusted to match the RF coils. Each section is fully shielded from the adjacent section of the gang.

The illuminated drum dial, calibrated in kilocycles for easy tuning, gives perfect visibility. The tuning control is simple and positive in action. Constant tension removes all chance for drag or backlash. The absence of friction throughout results in smooth easy tuning.

The strong heavy steel base is die-formed and spot-welded at corners. It is rigid enough to support a chassis twice the size and weight. It is copper-plated and has a tough, elastic coat of clear Japan, resulting in a most attractive finish.

Tube and coil shields are of heavy gauge material. The tube sockets are of the latest improved type with powerful spring contacts

A front view of the Model 93B chassis showing the component layout. (From the Model 93B brochure contributed by Peter Burton).

mounted on laminated Bakelite grips creating tubes with perfect contact.

(John DeLoria, 101 Doverbrook Rd., Chicopee, MA 01022. Peter Burton, Box 91, Belchertown, MA 01007)

In 1988, John DeLoria asked a collector uncle to repair a Radiola 18 for him — an event he describes as “the beginning of the end.” He stopped counting the number of sets in his collection at 2,600. His focus now is on speakers and rare cathedrals, and he credits his wife with supporting him in the hobby.

Peter Burton started collecting in 1975 after falling love with a Zenith 16A63 console at a church rummage sale. For many years, he researched the Ozarka Co., and he has a large collection of original Ozarka letters and papers.

## The RCA Radiola 16 Last of the Pre-Electric Battery Sets

BY RICHARD ARNOLD

As AC-operated radios reached the marketplace, battery sets were still being advertised. Richard Arnold tells us how an old ad sparked his interest. (Editor)

I am looking at a newspaper, the Oklahoma City Daily Oklahoman. It is dated September 1927 and contains a radio ad from a department store named Pettee's. In this ad, the company is advertising both the new electric RCA Radiola 17 for 1927 and the new RCA Radiola 16 battery set. In describing the Radiola 17, the ad says, “Operates directly from the electric light circuit without batteries or battery

eliminators. It is tuned with one knob. Entire set an A.C. unit in a mahogany finished cabinet.” Less the accessories, the price was \$130.

### THE RCA RADIOLA 16

However, the radio in this article, the Radiola 16, is advertised as follows: “Radiola 16, furnishes the widest musical ranges ever achieved with one dial control, a 6-tube model, less accessories, \$69.50.” This was about half the price of the all-new electric Radiola 17. The Radiola 16 sold for \$79.75 with six Radiotron tubes. This particular dealer had decid-

(Continued on following page)

*(RCA Radiola 16, continued)*

ed to sell the Radiola and Atwater Kent lines. It gave them the ability to reach the average person, as well as the more affluent customers.

The Radiola 16, shown in Figures 1 and 2, looks a lot like the Radiola 17 or 18, especially inside, but it has a somewhat shorter cabinet, measuring approximately 16 x 7 3/4 x 7 inches. It is advertised as sensitive, selective and compact. The cabinet is also mahogany finished. It is the last conventional battery set offered by RCA. For those of you who don't know, these early RCA radios were, of course, made by General Electric and Westinghouse. They were offered for sale by RCA, as the three companies were all working together at the time.

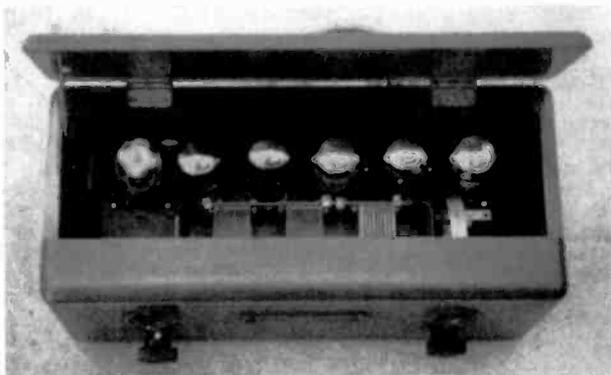

The Radiola 16 is a 6-tube, TRF type receiver with three stages of radio frequency amplification, a detector and two stages of audio frequency amplification. The Radiola 16 is of the "Uni-Selector" type, having but a single tuning control. It has excellent sensitivity and selectivity on a broadcast band range of approximately 550 to 1400 kilocycles or 545 to 214 meters. The six tubes used are: five UX-201-As and one UX-112 that is used in the last audio stage.

The Radiola 16 has an on/off switch, a volume control, and a single knob station selector that operates an unlighted drum type selector dial. This is the same as used in the Radiola 17 and Radiola 18 Models. The Model 16 does not use a lamp hood as do the models 17 and 18. The company's recommended loudspeaker is the RCA Radiola 100-A. RCA said that this loudspeaker was a new accomplishment in acoustics. It corresponded in its attainments to the receiving qualities of the Radiola 16. I will have to admit that the 100-A speaker is a very good one. I have two of them that I use most of the time when I play my battery sets, and they do have great sound.

In my research into the radio, I found that there were only 85,000 of the Radiola 16s made. These radios are not all that common nowadays, it seems, but they do show up once in a while. It looks like a neat radio and since it is the last of the early RCA battery sets, it is a piece of history that we can still have at a

*Figure 1. A front view of the RCA Radiola 16. The symmetrical arrangement of controls includes a volume control, lower left, a tuning control, lower right, and the on/off switch, upper left. The tuning dial is located above the tuning knob.*

*Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. His interest is primarily in cathedrals and 1920s battery sets, and his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. His prize is the 1932 Jackson Bell Peter Pan featured in the June 1991 A.R.C.*

# RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

## More on Open Output Transformers

Dear Editor:

In the *Radio Miscellanea* column in the January 2004 issue, Harold Wright requested information about the effect on an output tube of having the output transformer open resulting in no plate voltage. He stated that a grid was red hot.

The grid he observed was the screen grid, and this is to be expected to some extent depending on grid alignment accuracy during manufacture. No voltage on the plate will always result in excessive screen dissipation unless the circuit is designed to limit it. It may not damage the tube in the short term depending on severity. Consumer radios usually don't have screen current limiting.

I ran a quick experiment on a 6V6 and a 6F6 set up identically except for appropriate control grid bias. Plate and screen on each were set to 250 volts, a typical value. Screen current on the two test tubes was 3 mA and 5 mA respectively. Removing the plate voltage resulted in screen current of about 20 mA in both cases. This is 6 and 4 times normal respectively resulting in a dissipation of about twice rated value. This probably will cause little damage if not sustained for an extended period, but should be avoided.

During the early days of repairing TVs, I bought a batch of sweep tubes. They were GE, and I think they were 6BQ6s. I began to get calls the next day on every TV I had used one of these tubes in. I replaced some twice before I began to smell a rat. I took the rest of the batch to my distributor and swapped them for another brand. Later the answer came that the screen grid was misaligned, placing it in the direct current flow from cathode to plate, instead of in the shadow of the control grid. Due to the severe operating conditions imposed in most TV sets, this resulted very quickly in failure.

There is a very good explanation of the structure and operation of the beam power tube, types 6V6, 6L6, 6BQ6, etc., on page 8 and 9 of RCA tube manual RC-21 and possibly in others. I will send a copy of this info to anyone who asks and sends an SASE to me at 6841 Chesser Rd., Bessemer, AL 35023.

John T. Kaetz, Jr., Bessemer, AL

Dear Editor:

In response to Harold Wright's letter in the January 2004 issue, I did have a similar experience with a Truetone D-724 with push-pull output stage. One half of the output transformer was open causing the grid of one of the output tubes to glow red hot due to there being no plate voltage because of the open output transformer.

Mark Mowrey, Clear Lake, IA

## Years of Good Reading

Dear Editor:

Thanks for ten years of good reading. I hope for many more.

G. Casad, Purdy, MO

## 1938 Philco Identified

Dear Editor:

This note is written in reference to the photo on page 22 of the February 2004 A.R.C. The small unidentified tombstone is a 1938 Philco (see *Philco Radio*, page 101, by Ron Ramirez). This radio came in at least three different versions. I have the Model 38-35 (dual power supply, 115 VAC and 6 VDC vibrator supply). It also came as a Model 38-33 (battery only with 1-volt tubes) and as a Model 38-93B (115 VAC power supply).

A.M. Eisenstein, Sebastopol, CA

## Bring Your Own Power Supply

*From the Internet, an old exchange containing a suggestion that is still very worth considering:*

Comment by Larry Hagman: At the Nashua meets, which has 110 VAC available. I am able to actually plug in my restored consoles and have them playing. This is a big attraction that I'm sure sells the set.

Response from Larry Butler: Have you considered bringing your own power? Sine wave inverters are really cheap these days. Screw one on the outside of a battery box with a deep-cycle boat battery from WalMart. Cost is \$60 for 300w, \$100 for 500w, and the battery is about \$70 for 105 amp hours. With the inverter/battery, you'll have power to run sets anywhere you set up without the "electric fees" which some shows charge the vendors. A friend has a heavy cable connected to his truck batteries. He just starts the truck and then connects the cable to his "radio display power supply" battery to charge it on the way home or on the way to the next show.

Larry Butler, W4CSC, North Charleston, SC

## On Risky Tube Substitution

I enjoyed Herb Parsons' article in the November 2003 issue which describes how he got involved with antique radios, but he also describes a substitution in the article which is risky. A Type 5U4 tube doesn't make a good substitute for a Type 80 — the filament current is 3 amps (as opposed to 2 amps for the 80), and will place a greater load on the power transformer.

According to my trusty RCA tube manual (RC-16), the Type 5Y3 is electrically identical to a Type 80 and so would make a much better replacement if no Type 80 is available (and the mail-order price is deemed too high).

Here's a tip: Since the Bakelite bases are usually loose on these old tubes anyway, it's not too hard to unsolder the pins and "swap-in" the glass bulb of a 5Y3 into the 4-pin base of a bad Type 80. This way you won't need to mess with the tube socket in your valued radio. If you're lucky enough to have a 5Y3G to use (ST shape), it will even look like a real Type 80.

Mark Thierbach, Allentown, PA

# WITH THE COLLECTORS

## The Aladdin Radio Repair Shop

BY RAY BINTLIFF

*On a recent trip to the San Francisco area, Ray visited what may be the oldest radio repair shop still in business. His report follows. (Editor)*

Where do old radios go when they die on the West Coast? If they are lucky they go to the Aladdin Radio Repair Co. in San Francisco.

John and Louise Wentzel, shown in Figure 1, have operated the Aladdin Radio Repair Co. since 1946. When TV arrived in San Francisco in 1950, radio repair became a secondary activity for them and the emphasis was on television. Today, John and Louise are back to their original calling — repairing antique radios. And enjoying it immensely.

The Aladdin is an active and well-equipped radio repair shop as Figures 2 and 3 show. But, it is also a showroom with many old radios on display. Figure 4 provides a small sampling of the Wentzels' collection. While a wide range of manufacturers is represented, it is not surprising that West Coast radios seem to dominate. To see such a variety of West Coast radios was a treat for East Coast eyes. The array of Remler sets

*Figure 1. From left to right: John and Louise Wentzel, proprietors of Aladdin Radio Repair and my long-suffering radio-wife Peggy.*

was especially impressive. In addition to familiar West Coast names, John has some "bootleg sets." As he explained, these AC/DC sets were cranked out by unlicensed manufacturers in Los Angeles "until RCA caught up with them." John also recalled that the low-end AC/DC sets sold for \$12.95 with credit payments of 25 cents per week.

The shop's neatly arranged stock of tubes and parts is complemented by a set of Rider manuals and Sams publications. But the Aladdin's great-

*Figure 2. The workshop area of Aladdin Radio Repair with some display radios on the top shelf. A mechanical workshop is located in an adjoining room.*

Figure 3. A partial view of the spare parts and tubes inventory.

est asset is the knowledge and experience that the Wentzels offer.

Could it be that Aladdin Radio holds the record for the oldest radio repair shop in continuous operation?

Appropriately, the Aladdin Radio Repair Co. is located in an Art Deco-style building, shown in Figure 5, at 1609 Irving St., San Francisco, CA 94122-1813. Hours are by appointment. Telephone 415-731-1920.

My thanks to Louise and John for their hospitality and warm welcome. It was a pleasure sharing their enthusiasm for old radios. Also, a note of thanks is due to California collector Scott Robinson for telling me about Aladdin Radio Repair.

Figure 4. A small sampling of the radios on display at the Wentzels' shop.

(Ray Bintliff, W1RY, 2 Powder Horn Ln., Acton, MA 01720)

Ray Bintliff, W1RY, a member of the A.R.C. editorial staff, holds an Amateur Extra Class license. In addition to Amateur radio, his interests include electronic equipment design and audio reproduction. He also enjoys repairing and restoring pre-1945 radios and test equipment.

Figure 5. Aladdin Radio's entrance and display window. Note the building's Art Deco designs above and to the right of the display window.

## PHOTO REVIEW

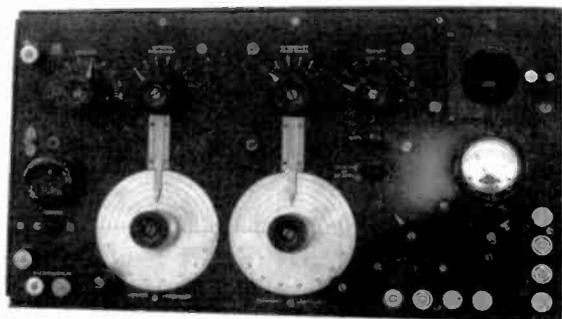

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

**CROSLY MODEL 51-S** – This 2-tube regenerative receiver has the same panel and chassis as the standard Crosley 51. However, it is housed in a bigger, more deluxe cabinet to make room for batteries, if used. (Clark Trissell – Lincoln, NB)

**BELMONT MODEL A6D-110** – This ivory-painted Bakelite radio of 1947 was manufactured by the Belmont Radio Corp. of Chicago. It has six push buttons, and the tuning knob is located on the right-hand side of the cabinet. (Adrian LaPierre – Fort Mohave, AZ)

**NAVY TYPE SE-1420** – This 1920 military receiver was designed for the reception of spark signals using either a crystal detector or an Audion tube. Its wavelength range is 250 to 8,000 meters. The manufacturer was probably Amrad of American Radio & Research Corp. of Medford Hillside, Mass. (Ross Mason – Mason City, IA)

**GUILD TOWN CRIER MODEL 380T** – This 7-tube, wood-cased, novelty radio was manufactured in the shape of a hand-held lantern by Guild Radio & Television Co., of Inglewood, California, in 1956. (Adrian LaPierre – Fort Mohave, AZ)

---

## PHOTO REVIEW

---

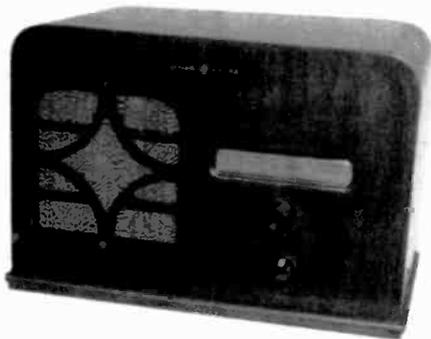

**AMPLION TYPE AR-23** – This petal-type horn speaker has an 18" wooden bell and stands 26" tall. It was manufactured by Alfred Graham & Co. for Marconi's Wireless Telegraph Co. of London. (*Ross Mason – Mason City, IA*)

**UNITED MOTORS SERVICE MODEL 4049** – This tombstone, ca. 1934, is a farm radio operating on 32 volts DC. Utilizing a self-rectifying (synchronous) vibrator in the power supply, it is a superhet with 6 tubes, including an RF stage, and Types 43, 37, 75, 6B7 and two 78s. Though only about 13" x 17" x 9" in overall size, this set weighs about 35 pounds due to the two 5" x 7" x 1/8" sheets of lead that line the power supply box to suppress vibrator noise. The appearance is not the original since 95 percent of the original veneer on the front was gone. The set once had a vertical inlay on both sides and a starburst-like decoration on each side near the top, which I could not duplicate. It is an excellent performer. (*John T. Kaetz, Jr. – Bessemer AL*)

**MAGNAVOX MODEL AW100** – This rare 8-transistor, 4-band radio is called the "Intercontinental." It is smaller than the Zenith Royal 1000 and sold for \$99 in 1957. A leather-covered portable, it is a very sensitive tuning receiver (*Don Pehlke – Bloomington, IL*)

**GENERAL ELECTRIC MODEL U50** – This battery-operated farm radio uses the following tubes: Types 30, 32, 1F4, 34, 1A6. (*Clark Trissell – Lincoln, NB*)

# AUCTION REPORT

## Estes Auction Burbank, Ohio — August 16, 2003

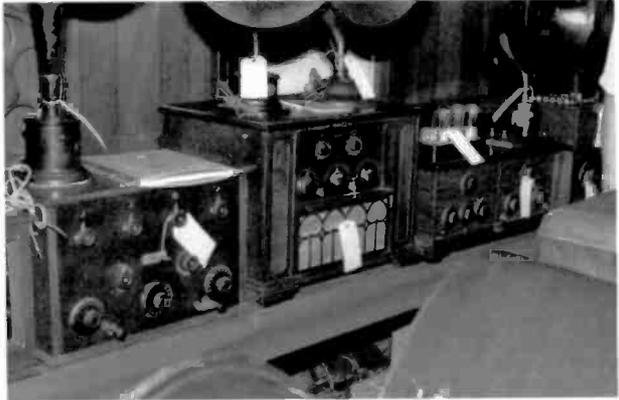

REPORTED BY RAY AND EDITH CHASE

The Estes auction in August was another large sale with a good variety of radios and equipment. The sale was heavy in Detrola, Philco and Zenith radios, as well as many transistor radios and tube lots. As in the July auction, in order to handle the number of transistor radios, parts lots, test equipment, and tube box lots, a second auctioneer was employed off to the side of the hall. Again, my wife Edith recorded the transistor radio sales as best she could; however, she could not manage the parts, test equipment, and box lots of tubes. The result was that most of these sales went unrecovered.

As usual, there were many bargains to be had, and several times I found myself running back and forth from one auction to the other to try to snag an item that piqued my interest. Usually my efforts went unrewarded, so I stuck mainly to the general auction.

The top-dollar items were a British World War I aircraft set selling at \$1,500, and a very nice Collins S-Line station at \$1,800. Most of the battery sets were fitted with tubes, and, strangely, there were quite a few empty cathedral and tombstone cabinets that were in very good condition. One wonders what happened to their innards.

If you were prepared to take on a lot of restoration work, there was a complete Zenith Wind-

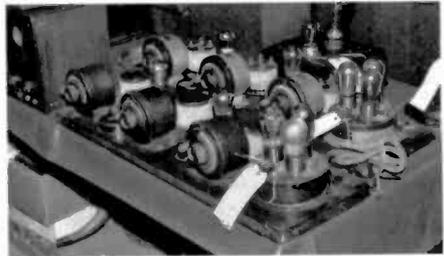

*Some early radios. Left to right: a 4-tube home brew with plenty of knobs to turn, selling at \$175; a DeForest D-12 at \$400; and an RCA Radiola VI at \$325.*

charger set that sold for only \$50. There was also a selection of nice consoles and the Zeniths drew moderate to good prices, but some of the others did not get that much interest and sold quite low. Auctioneer Bob Dobush interspersed over 100 better tube sales throughout the main auction.

I stopped recording at 4:00 P.M. and the auction probably lasted for another hour, so not all lots were recorded. However, all the better items had been sold by this time. The total sale netted over \$46,000, not counting the 5 percent buyer's premium, which is not included in this listing of sale prices.

**A warning:** Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

*What is an auction without breadboards? These Atwater Kent Model 10 sets brought \$1,150 and \$1,100.*

*This eclectic grouping includes a Federal Jr. crystal set, microphones, a horn speaker, and an assortment of AC/DC sets.*

# A.R.C. RATES & POLICIES

**GUARANTEE.** You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

**PAYMENT.** Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

**FAX & E-MAIL PROCEDURES/PAYMENT.** Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

**CHANGE OF ADDRESS.** Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

**SUBMISSION OF MATERIAL.** Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

**PUBLISHING RIGHTS.** Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**MAILING OF ISSUES.** U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

**ETHICS.** No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

## DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

*The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.*

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay, therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

# A.R.C. RATES & POLICIES

## CLASSIFIED ADS • DETAILS AND RATES

**ONE FREE 20-WORD AD** for subscribers in each issue; additional words are 29c each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

**Faxed & e-mailed ads:** Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: **Please write legibly.** Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital l and the small L.) Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

**Clubs:** Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

### CLASSIFIED AD DETAILS

**Deadline: NOON ET- 10th of the month!**

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE.** This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is **required** in all classified ads; we will add it if you forget.

#### Classified Ad Rates per Month

Subscribers:

- First 20 words: **FREE\***
- 29c per word for extra words over 20 plus
- 10c per word for a shaded ad (count all words including free words).

\* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47c per word plus
- 10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

### BOXED CLASSIFIED AD DETAILS

**Deadline: 1st of the month!**

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

#### Boxed Classified Ad Rates per Month

Nonshaded ads:

- 40c per word for all words,\* none free, plus
- 10c per word for each bold word plus
- 10c per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

- 50c per word for all words\* plus
- 10c per word for each all-caps word.

Non-Subscribers:

- Add 20c per word to above costs.

\*Three words can be bold-all-caps at no extra charge.

### PHOTO & DRAWING DETAILS

**Deadline: 1st of the month**

**for all ads with drawings or photos!**

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

#### Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing (If ad is canceled, this amount cannot always be refunded.)

### CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount; sent, pull the ad or make changes.

### IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE, etc.**, count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is **required** in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

**Tom Harris Auctions Presents**  
**The Traditional Spring 2004 Radio Auction**

**April 3<sup>rd</sup> @ 10:00 am in Marshalltown, Iowa**

**After my June 2003 purchase of the real estate and other assets of my parents, Gene & Donna Harris who have been antique & collectible auction specialists for over 50 years, I will be continuing the great tradition of specialty Radio Auctions every April. Annually or semi-annually I have held over 30 Radio related auctions and am eagerly looking forward to another great one. Please come join us for this all day event!**

**We are constantly traveling across the country picking up radios, antiques and collectibles for our upcoming sales, so call us if you need us to transport your quality items. One item or an entire lifetime collection—no sale is too small or too large for us to handle. We are a full service auction company and together we will build a package of services to fit your needs. My professional auction team and I look forward to serving you in the future.**

**This auction will consist of hundreds of antique radios including Catalins, early battery sets, great console models, collectible radios, radio advertising clocks, signs, novelties, parts, tubes, reference items & much more.**

**Call Tom to Consign Your Quality Radios Today!**

**Do not miss this auction!**

**100s of radios will come in the week of the auction,  
many surprises will be here for buyers.**

**COLLECTORS - HEIRS - EXECUTORS - PROBATE ATTORNEYS**

**We can customize a commission rate and package of services to cater to your specific needs.**

**We will travel nationwide to hold auctions or pick up fine collections.**

**\*\*\* We provide Full Service to the United States from Iowa \*\*\***

**\*\* Finders Fees Paid for Successful Referrals \*\***

**We specialize in Estates and Large Collections - 30 Years Antique Experience**

**"The Link Between Your Property and Top Dollar"**

**Very Competitive Commissions - Nationwide Advertising**

**We Will Advertise Your Auction to the World on the Internet!**

**Call Tom Now to Consign Your Radios (641) 754-4890**

**TOM HARRIS AUCTION CENTER**

**Antique Auction Specialists**

**203 S. 18<sup>th</sup> Ave., Marshalltown, Iowa 50158**

TRANS-OCEANIC AUCTION + TRANS-OCEANIC AUCTION + TRANS-OCEANIC AUCTION

Mid-Atlantic Antique Radio Club proudly presents  
**A Specialty Zenith Auction**  
featuring the personal radio collection of  
**Mr. Gregory W. Pease**

June 4, 2004 7:30PM Sheraton College Park Hotel in Beltsville, MD

Mr. Pease has spent the better part of a decade assembling one of the most outstanding and complete Zenith Transoceanic radio collections anywhere. Greg's radios are immaculately preserved examples of every variety of Transoceanic, from the first Clipper to the last R-7000, with multiple examples and variants of many models, including the excessively rare military versions in brown and green leather. The collection includes a large assortment of original documentation, advertising, cartons, store displays and stands, plus many Zenith Universal, Long Distance, and portables related to, or concurrent with the Transoceanic line. All are in excellent to mint condition. We are expecting approximately 125 lots of superb Zenith items. **Mr. Pease has agreed to sell his items without reserve! Zenith collectors should not miss this!**

Plus, take this opportunity to sell your high-end Zenith sets

MAARC is making available space for up to an additional 75 lots of high quality Zenith items.

If you are interested in consigning please contact Domi Sanchez at (202) 441-3403 (leave message), or e-mail: [radiodome@mindspring.com](mailto:radiodome@mindspring.com). Reserves are allowed and items must support a

\$25 minimum opening bid. There will be a 15% commission.

This auction is being held in conjunction with MAARC's RadioActivity 2004 Meet. Please see the ad elsewhere in this publication for information, location, and directions.

Visit [www.maarc.org](http://www.maarc.org) for more details, photos, and a listing of the offerings as they become available

# RADIOFEST XXIII

## August 5, 6, & 7, 2004

Best Western — 345 River Road, Elgin, IL 60123.  
(847) 695-5000

Large Radio Swap Meet, Radio Contest, Informational Presentations, Appraisal Tent, Auction, Fish Fry and much, much more! A presentation by Chuck Schaden is planned. Mr. Schaden is a broadcaster/historian who has produced and hosted "Those Were the Days" since 1970 and has been nationally recognized for his efforts. He was inducted into the Radio Hall of Fame in 1993, the only radio fan to be so honored. He will also be signing copies of his book *Speaking of Radio*. Also, Dan Clark is planned to give a presentation on reproducing dials and knobs and Bob Dobush will give a presentation on tubes.

Events and Schedule subject to change. Watch our website for updates at [www.antique-radios.org](http://www.antique-radios.org)

## Special

# Announcement

Estes Auctions announces the opening of their new West Coast Branch, serving the entire Western U.S., including the Rocky Mountains and West Coast. Estes Auctions have specialized in the sale of radios and radio-related items for 12 years. We are known worldwide for our radio auctions. We also specialize in amateur radio. Auctioneer Richard Estes has been a licensed ham operator for 45 years. We have conducted over 100 radio auctions. The most notable were the Henry Ford Museum Radio Auction and Muchow Historical Museum Radio Auction. We look forward to serving radio collectors in the Western United States. Our Operations Director on the West Coast is Mr. Gary Fletcher, located in Carlsbad, California. Gary will be able to assist you with any questions or concerns you may have regarding the auction process. Gary is also an avid radio collector and is well known in the radio collecting community. He has the knowledge and experience to help you in any way you desire to consign a radio or a complete collection. You may reach us at the following:

(#25-Dec-02)

# Price Guides from Radiomania Books By Mark V. Stein

## The Machine Age to Jet Age/Tabletop Radio Series

The continuing series of vintage radio pictorial reference and price guides. Each volume is a supplement to the others with virtually no overlap among the three. Over 10,000 vintage tabletop radios are individually described and valued.

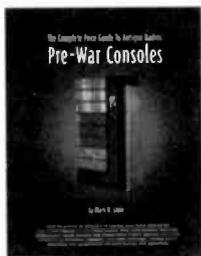

**Volume 1:** 2,500 radios. Black and white photos. Updated with 2003 market values. Includes master index for all three volumes. 239 pages. \$29.95

**Volume 2:** 2,700 radios. Black and white photos. 16 page color insert. Updated with 2001 market values and hundreds of variations not previously included. 372 pages. \$28.95

**Volume 3:** 3,000 radios. Tube and band-count information. Black and white photos. Includes 2001 market values. 256 pages. \$29.95

**Volume 4:** 2,500 new radio listings. 1,500 new illustrations. B&W photos. 239 pages. \$29.95

## The Complete Price Guide to Antique Radios Series

### Pre-War Consoles

Identification, grading, and current market values for 3,500 models focusing on the period from 1930 through the end of pre-war production in 1942. Tube and band-count information and variations. Expanded resource section. B&W photos. 240 pages. \$29.95

### Sears Silvertone Catalogs 1930-1942

Current market values for 1,000+ radios. Original advertising, options, specs and pricing. Historical preface. Manufacturer source code table. Full model cross reference with tube and band counts, variations, cabinet materials and colors. B&W photos. 240 pages. \$34.95

**Everything stocked and shipped promptly — Radio is our middle name.**

**A.R.C., P.O. Box 2, Carlisle, MA 01741 – Toll Free: (866) 371-0512  
Fax: (978) 371-7129 – E-mail: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com) – Web: [www.antiqueradio.com](http://www.antiqueradio.com)**

Free shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Mass. residents add 5% sales tax. Non-U.S. orders, write for shipping costs, or use credit card and specify air or surface (allow 2-3 months for surface shipping). Most orders shipped by next business day.
