Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has just released the first DVD-ROM publication at a break-through introductory price. REA created the first Riders Professional CD-Series that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we introduce the Riders Standard Series DVD using Riders' indexes for finding "that" schematic that you need occasionally. Priced at a very low introductory price, every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. Introductory Offer - Limited Time - A professional produced product.

**Only \$ 150 + \$ 6 S&H (Sold only on DVD) -
Introductory Price - Reg. Price \$ 199**

Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD)
Cunningham-Radiotron Hi-Rez CD \$ 85
Sam's Photofact Sets 1-175 - 7 CD's, with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)
All 7 Sam's CD's (1-175) - \$ 495.00
Radiophile Vol. 1 - \$ 85
Radiophile Vol. 2 - \$ 85

POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.

Printed in U.S.A.

PURPOSE. Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

STAFF:

Publisher and Editor: John V. Terrey
Assistant Publisher: Cindie Bryan
Managing Editor: Dorothy Schecter
Office Manager: Pat Wedge
Advertising Manager: Cindie Bryan
Issue Coordinator: Pat Wedge
Publishing & Editorial Staff: Ray Bintliff, Dave Crocker, Bobby Lyman

Founding Publisher/Editor: Gary B. Schneider
Contributing Writers & Consultants: Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Paul J. Bourbin, Norman Braithwaite, Dave Crocker, Dick Desjarlais, Alan Douglas, Richard Foster, Jim Kreuzer, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White, Walter Worth

CONTACTING ANTIQUE RADIO CLASSIFIED. All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.
Only UPS, FedEx, etc. items to street address: 498-A Cross Street.
Telephone: (866) 371-0512; Fax: (978) 371-7129

E-mail: ARC@antiqueradio.com
Web: www.antiqueradio.com

Please, no classified ads by telephone; thanks.
Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

EDITOR'S COMMENTS

A bridge to spring — that's how we like to describe the Greater Boston Antique Radio Collectors' (GBARC) annual February meet, the subject of our lead article. At this writing, we can fantasize that this bridge needed to be only a short one because we are now enjoying record-breaking 60 degree temperatures. But, New Englanders are realists and know that in a minute all that can change. Since outdoor meets are not in our immediate future, we can reflect on the success of Radio XXXV, the product of the hard labors of our own A.R.C. staff.

"Short and sweet" best describes this fast moving, single morning event. Starting time is a carefully monitored 8:00 A.M., and then the fun begins. Despite the frigid weather, over 700 attendees filled the Westford Regency ballroom and spilled over into the lobby and two adjoining rooms. On view were 94 tables laden with radio and related treasures. As Dorothy Schecter points out in her article, this is a family affair, and this event also offers the pleasure of talking to people of all ages from as far away as Hawaii.

In fact, camaraderie is key to a meet like this. This year, the good fellowship extended beyond the regular meet hours when I opened my museum to anyone who wanted to drop by to view my collection. More than a dozen people made the short five mile trip and enjoyed seeing my collection of 600 plus items, including over 100 horns, as well as over 100 crystal sets. Their enthusiasm for sets like the 37 Grebe items has made me think more seriously about a barn/museum in the future.

In general, Radio XXXV proved to be well received as in preceding years. We seem to have found the right venue in a location convenient to highways, and because of our advertising, dealers know that serious buyers will attend. Buyers, in turn, know that a wide variety of quality goods will be offered.

At this meet, a buyer might find an item he's tried to find for seven years, as Tom Collins did, or how about a whole new area of collecting, like Jon Golden's miniature tape recorders? Whatever your pleasure, you can't ask for more in the dead of winter when you need to get out to connect with the real radio world.

Speaking of reaching out, Richard Arnold's Atwater Kent 84 article tells how he acquired this set in his early collecting days via a unique advertising scheme. As his frequent byline in A.R.C. attests, Richard is one of our most prolific writers. Unfortunately, I had a memory lapse last month when I said on this page that I could not recall Arnold articles other than those on AC cathedrals. Richard has reminded me of a dozen battery set articles written from 1986 to 1994. Apologies for a "senior moment" that may send an alarming signal

that ten years might be my memory limit!

Thanks to Loren Ashworth whose photos of a CBS Col-R-Tel converter became the inspiration for a short "photo essay." This early color TV converter utilized the CBS field-sequential color system, which resulted in an excellent color picture, but was beaten out by the RCA NTSC system used today.

Early television collecting is becoming more and more in evidence, and we're glad that Dave Sica alerted us to the second Early Television Convention to be held April 24 and 25. Like the first convention last spring, which Dave and friends describe in an article, this one will be held at what must be the perfect venue — the Early Television Foundation Museum in Hilliard, Ohio. This museum containing Steve McVoy's extensive collection of television artifacts is well worth a visit.

In its heyday, radio was used by advertisers to promote almost everything. The gas pump advertising globe in *Photo Review* piques the imagination, as we wonder if folks sought out the station with "Radio" gas and oil. Also mixed with an assortment of interesting sets is a relatively rare Magnavox 1-tube amplifier.

In his latest Estes Auctions report, Ray Chase suggests that this may have been a historic event in that a single vacuum tube sold for \$14,500, while another sold for \$7,000. In fact, 25 items sold for over \$1,000 each. Certainly, these and other prices are impressive, but prices weren't the only outstanding thing about this auction. Quality too was much in evidence because a large percentage of the offerings came from the Sanford Deutsch (see September 2003) and Donald Rossbach collections, both noted for their very fine condition.

A.R.C. Benefits. When you start to think "spring" think A.R.C. benefits: a toll-free number (866) 371-0512; the Web: www.antiqueradio.com; Discover, Visa, American Express, and MasterCard accepted; books shipped free in the U. S. by book rate; and to current subscribers, a ten percent discount on all book orders.

Coming Radio Events. Events begin to increase in number with the advent of April. Of the 46 listed, six are auctions and ten are swapmeets. Be sure to get to at least one in your area.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Our cover photo of Sam Petnov, a 65-year veteran of the radio business, was taken at Radio XXXV by Editor John Terrey. What Sam holds is not a radio, but a highly unusual Guide output meter used to measure the intensity of auto headlights. This was certainly one of the curiosities of the show. Sam's expression speaks to his love of everything "radio."

MEET REPORT

Radio XXXV

Westford, Massachusetts — February 15, 2004

BY DOROTHY SCHECTER

What's the best way for a collector to defeat the winter doldrums? Leave the shop projects behind and get out to a major meet, such as the Greater Boston Antique Radio Collector's (GBARC) Radio XXXV in Westford, Massachusetts. Despite the frigid temperatures outside, over 700 collectors did just that. From 8 A.M. to 1 P.M., they gathered in the Westford Regency Hotel ballroom, foyer, and two adjacent rooms to enjoy a show that "brightens up the winter," according to John Hagman, down from Vermont for the pleasure of hobnobbing with fellow radio aficionados.

This is definitely a meet for everyone — not just the collector in pursuit of a coveted item, but also families and friends. If you were not among them this year, we try in this report to give you an idea of the offerings — everything from AC battery sets, crystal sets, communications equipment, and TVs to vintage audio equipment.

In addition, after the meet, there was the opportunity to visit Editor John Terrey's museum about five miles away. A number of collectors stopped by to see a collection that centers on pre-1925, pre-superhet, broadcast and early wireless sets. Among the more than 600 items were over 100 horns and over 100 crystal sets. For many, if there was a single highlight, it was the more than 37 Grebe items. The collection is spread throughout three rooms in the spacious Terrey house, but John envisions a barn/museum in the near future.

YOUNG, OLD, AND NEW COLLECTORS

Perhaps the most striking thing about a meet like this one is the fact that it brings young, old,

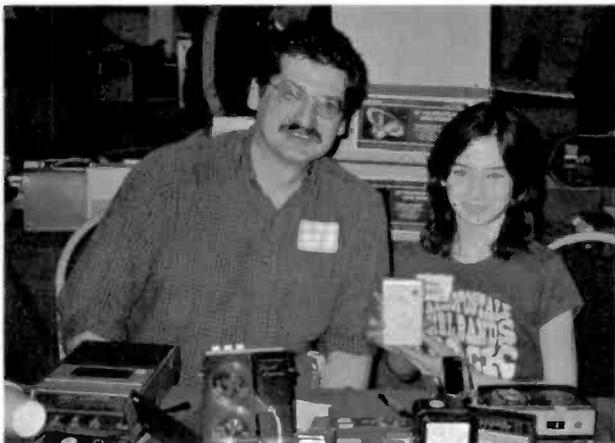

This unusual RCA San Francisco Exposition set with an asking price of \$1,800, is not often seen at meets. It was offered by Bob Renkar of Southington, Conn.

and new collectors together. Seasoned collectors come to communicate with old friends in the "business" of buying and selling old radios, TVs, and related equipment for the ultimate purpose of preserving radio history. But they must also be heartened by the presence of young and/or new collectors who may well carry on their mission.

For example, it was good to see Max Lewontin back for a second year. Now 12 years old, Max asked to have a table in the ballroom instead of in an adjacent room so that he would see more of the action. Three years ago, Max came as a buyer, but now he's committed to his slogan "Max Lewontin, the Art Deco Man." We expect to see

Bob Sayre of Hudson, New Hampshire, offered this Guild Buccaneer Chest radio for \$45, condition unknown. It is shown, at left, with the lid closed, and, at right, open.

For the first time, Michelle Wood, age 11, of Stafford Springs, Connecticut, opted to help Dad Roger at his table rather than join Mom and her brother in the hotel swimming pool.

Two and a half year old Ella Beauport already knows a good radio when she sees it.

him as a "regular" at the GBARC show primarily because he says, "This show is a lot of fun."

Max had a little competition in the age department this year. He's one of the old guard compared to two and one-half year old Ella Beauport who clutched her first purchase of a transistor radio and patiently did the rounds of tables with her parents.

This was the Beauports' first trip to the GBARC meet to check out tube gear and antique radios. Becca and Pierre Beauport are both musicians — he in a rock and roll band and she a player and collector of synthesizers. Much to the surprise of our editor John Terrey, Becca owns one of his synthesizers, which he had previously sold to a dealer in New York. Another small world story. Given Ella's interest in her new-found transistor, as well as her parents' involvement, we can have high hopes of her becoming one of us in the future.

Among the exhibitors' helpers we found faithful young returnees, like teenager Lyndsey Eslinger who comes with dad Peter from Enfield, Connecticut. Another was recent college grad Ross Phillips up from Philadelphia to help dad Bruce with his "Radio Orphanage," always an impressive display. Teenager, Amanda Markell, is dad Dennis' "chief financial officer." Both were eager to show his Heathkit Model H-7 CW transmitter and his "favorite radio in the whole world" — a Deco Westinghouse Model 104.

A first time helper was 11-year old Michelle Wood from Stafford Springs, Connecticut, whose dad Roger Wood is a collector with a strong interest in tape recorders. Michelle's mom and brother were enjoying the hotel amenities, especially the swimming pool, but Michelle had opted to be a helper. A good beginning in our book.

EDUCATING THE YOUNG AND NOT-SO-YOUNG

Seeing a representative group of young people at this meet must have pleased Ron Roscoe, a radio engineer, who teaches analog circuit de-

sign at M.I.T. Ron worries about the interest of the next generation in the preservation of radio history, and so he has started a course at the university in radio repair. His hope is to infect his students with the "radio bug." To that end, Ron had picked up a candidate for repair — a German Grundig AM/FM, which was his next project for the students back in Cambridge.

Ron also keeps a radio library in his office for students to use as reference. He was carrying a copy of David Rutland's *Behind the Front Panel*, just purchased at the A.R.C. book table. Ron already has several copies of this book, which he says is the best one on circuits of early battery sets for his students.

In addition to his education plan, Ron encourages friends to come to the meet and maybe

(Continued on following page)

Max Lewontin, a serious collector at age 12, with his helper mom Amy Lewontin. Max was back for the second year, this time, at his request, at a table in the main ballroom where he can have a better view of the main action.

John Golden takes his interest in tape recorders to a unique extreme — miniature reel-to-reel replicas inside a poison ring compartment and a Zippo cigarette lighter case. Precision lathe components and actual circuit boards are used to make these “props” look quite authentic. They are in the spirit of the props seen in '60s and '70s TV shows and movies.

(Radio XXXV, continued)

become first-time buyers. One of those was Adryann Strauss whom he described as having “a good eye.” As a first-time attendee, she was attracted to a 1948 Fada AM/FM set on Dick Desjarlais’ table. Dick described the set as unique because it had a mix of tubes and was one of the earliest AM/FM sets. Everyone lucked out — Dick made a sale, Adryann was delighted with her purchase, and Ron was happy because he could go to a friend’s house to see the set, which would now be loved and appreciated. End of happy radio meet story.

Self-education is another reason for attending this meet. Bill MacDonald, a designer of digital

circuits, had decided it was time to learn something about a few sets he owns, particularly, a 1935 American Bosch and a 1940 Zenith. The Bosch hasn’t played for 30 years, while the Zenith plays but needs work. Bill seemed to find his answers at Art Joly’s table. Bill consulted Art who

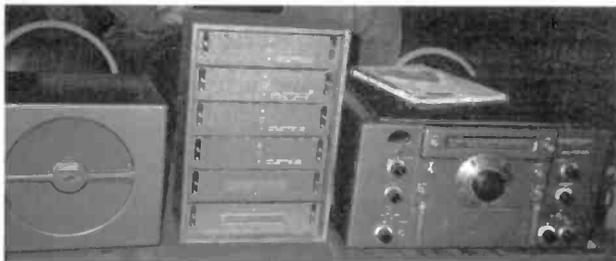

(Text continued on page 10)

Lots of pocket transistor radios.

Perhaps the happiest collector at the meet, Tom Collins with his new-found Clapp-Eastham condenser — the end at last of a seven-year search.

A complete HRO-50 with manual, speaker, calibrator, and plug-in coils, including the original coil box, was priced at \$650.

At one table, an odd Coca-Cola AM/FM radio, and at another, an assortment of early high fidelity items in the foreground.

Highlights from John Terrey's Museum

A Grebe Model 18 receiver was one of 39 Grebe items in the collection.

Below, a Chicago Radio Labs PAR tuner; above, a Model AGN-2 detector/2-stage amplifier.

A Federal Model 61 driving a large Federal horn was playing during the open house using an ARBE-III battery eliminator.

(Radio XXXV, continued)

runs Art's Attic, a radio and audio service and repair shop in Manchester, New Hampshire. Bill came away saying, "I'd recommend Art on his advice alone." This kind of satisfying exchange could create a new serious collector.

SUCCESS STORY

Success stories are another great aspect of meets like Radio XXXV. Collectors come to search for special items, and sometimes we almost hear cries of "Eureka!" across the ballroom. Tom Collins of Charlton, Massachusetts, had been coming to this event for thirteen years, and for the last seven, he had been looking for a tuning capacitor for a Clapp-Eastham set in his collection. Shortly after his arrival, he found it, and so, this collector smiled for the rest of the meet.

Tom is the fortunate owner of a two-story building which houses his extensive collection ranging from a DeForest Audion, early radios, electro-medical equipment, and electronics, to a 1960 TV camera. The 28' x 32' building is fully heated and well lit. Though the museum is still a work in progress, Tom is glad to open it on request. We hope to have more information in a future issue, but you may call (508) 248-1976 if

This Precision tube tester, offered at \$75, was used in drugstores as a convenience for radio owners to test their tubes. It caught your editor's eye because the meter says, "Replace" rather than the more common, "Bad."

you wish to view the collection.

MULTIPLE REASONS TO ATTEND

For Joseph Lagana, aided by daughter Nancy, this was a first time at this meet. Now they know that it's a good beginning to "cleaning out the cellar." But, Dave Sutherland and wife Karen have a different take on what to bring to this meet — no cellar "junk" or hardware, just paper and ephemera. Dave wants to open a different market, including everything from radio food products, radio soda bottles, and radio cookie jars to a collector's item of the future — a poster for the current presidential primary showing the ABC logo and a copy of a speech by John Kerry. An observer called it the "best thing in the show."

Richard Sharisky comes to socialize and to "prospect," not to sell, though he has a table at which he hangs his "Wanted" sign. Frank Murphy comes to help

his friend Lenny Provost man his table full of multitype items. A radio wife's superb apple pies seems to be one of the rewards of this partnership.

Some folks are willing to go to great lengths to attend an event like this one. Sean Adkins arranged to fit this meet into his business trip from Hawaii. Apparently the effort was worth it, as

Comments on Radio XXXV From The Internet

From Lou deGonzague:

Just got back from this old favorite meet only three hours away from home. Got to chat with Alan Douglas and John Hagman — worth the price of admission. I had a table with mostly old test gear, of which I sold about 75 percent at rock-bottom prices. I had a fairly nice old Silvertone console from the 1930s that needed restoration, but was complete. I let it go for \$10... Apparently, you have to have a completely restored radio to sell at this meet. This tells me that there aren't too many out there who want to get into the innards of these old relics... I had a good time and hope to go to Nashua in the spring.

From Adam Vaughn:

I had an excellent time at the Westford meet where I picked up an outstanding collection of stuff, much of it video-related. My lone radio purchase was an RFT "Telephone" Model Super 5080C AM/SW set, an interesting East German radio that works well... I would appreciate info on this set from overseas collectors.

From John Hagman:

The event at the Regency in Westford, Mass., is usually one of the busiest East Coast shows, and this year's was no exception. I had decided to shop and socialize, as opposed to getting a table as I have in the past... This is an 8 A.M., controlled-start event, and although we all get more sleep, it is a bit chaotic as sellers enter and exhibitors set up at the same time. Oddly enough, there was far more in the way of buyers than of merchandise.

[On the stage, an area set aside for consoles,] I saw a bunch of restored, \$500-plus consoles, Silvertones and such, early in the show and expected them never to sell. Wasn't I surprised when the stage was nearly empty before noon, and not because any sellers had already left... I regretted not getting a table and plan to do so next year...

I thank the staff of A.R.C. for putting on a great show as usual... If you want to buy or sell radios, don't miss this event next year.

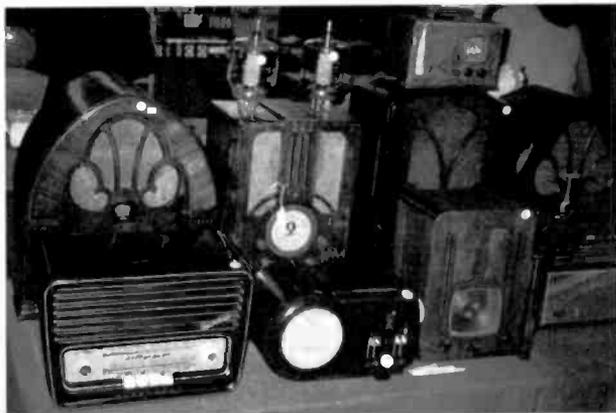

when we met him, he had bought a few things and was arranging to have them shipped home. We hope to see Sean here again next year.

John Golden from our hometown here in Carlisle, Mass., comes to pursue his interest in very small tape recorders, which he has exhibited in area libraries. John also sells beautifully designed miniature reel-to-reel tape recorders disguised in gadgets, like a cigarette lighter, or in jewelry, like a ring — something unexpected for new shoppers at the meet.

We know we can rely on Sam Petnov and his helper Steve Caron to come back every year. After 65 years in the business of selling, repairing and collecting old radios, Sam continues to be a regular at shows. As an aside, he is also a regular supplier of radio props for the entertainment industry. That old set you may have seen in a regional, community, or TV show may well have come from Sam.

Sam's personal collection contains models he says are so old that they are not even seen in old catalogs — sounds like a special exhibit should be in order. Sam paid us the ultimate compliment — "Your magazine is the best magazine in the country." Spoken like a true supporter of everything radio.

John and Jean Hartman come to show, sell and maybe even to pick up something just right for their 1890 farmhouse in Eaton, New Hampshire. In fact, what should stay in the house is often a deciding factor in what to sell. A nonradio

Bob Renkar displayed a variety of sets, including two Philcos, a Lafayette C13 tombstone, the San Francisco Exposition set shown earlier, a Santos and a Stewart-Warner set.

novelty was a lure to the Hartman table — a working Super Sieben "Rotamrin" — an early slot machine that might have been found in bars in Germany.

Some collectors come because, like Doris and Lowell Shultz of Ambler, Pa., they found that it was worth the trip after their first try last year. The Shultz radio story is a fairly typical one. In the army, Lowell was a radio repair man, then in his professional life, he became an electrical engineer, and now in retirement, he's back to old radios. Life comes 'round full circle.

Most people who attend this show seem to agree with the sentiment expressed by Giselle and Philip Guinan of Litchfield, New Hampshire, — "This is just a great show, not to be missed." So be sure to put next year's date on your calendar — February 20, 2005. See you there.

(Dorothy Schecter, c/o A.R.C., Box 2, Carlisle, MA 01741)

The asking price was \$300 for this 10" Raytheon/Belmont, black and white, porthole, television set, from the late 1940s. Behind the door on the right is a radio, and, on the left, a 45 RPM record changer. The set was working with a VCR playing a vintage TV program, and it sold — a sign that live demos pay off.

Three different KLH radios designed by Henry Kloss offered by local collector Ed Dinero at the meet: Top left: the earliest of the three, a Model 18 tuner, designed by Kloss when he was at KLH; Below: a Model 21 II, a version of the KLH 21 II but designed for Singer; Right: a Tivoli Audio Co. Model PAL, the latest of the three Kloss designs and still manufactured today.

WITH THE COLLECTORS

Atwater Kent Model 84

BY RICHARD ARNOLD

"It pays to advertise" is the message sent by Richard Arnold's article telling how he acquired a nice Atwater Kent Model 84. (Editor)

I purchased this Atwater Kent Model 84, shown in Figure 1, sometime in the fall of 1985 when I was a brand new collector. At the time, I was selling insurance and used to include radio cards in monthly statements. I had one customer who brought a radio to my office where we agreed upon a price of \$75. This was my first cathedral, the Atwater Kent Model 84. Needless to say, I was so impressed by the beauty and size of this radio that from that time on I was hooked not only on collecting radios, but also on cathedrals in particular.

THE ATWATER KENT MODEL 84

Mr. Charles S. Bradley first designed the Atwater Kent 84 in 1931. The design patent was applied for on February 17, 1931, and the patent #84316 was issued on June 9, 1931.

Since it measures 19" x 15 7/8" x 9 7/8" with its Gothic arch, the Atwater Kent 84 is considered a compact style. In the fall of 1931, an Atwater Kent radio ad states the following: "Model 84, golden voiced compact with the pentode tube. The cabinet has a Gothic front of matched butt walnut. The sides are of selected striped walnut. A quick-vision dial. New electro-dynamic speaker. Antenna adjuster, securing full efficiency on an antenna of any length. It has an armored chassis, fully shielded to prevent radiation and has a full rich tone." The radio sold for \$69.50. That seems like nothing now, but back in the Depression era that was a large sum of money. Actually, the radio was more expensive than most of its competition.

There were four versions of the Model 84 made. All models had both an early and late version. The model numbers are the following: 84 (part numbers 17500 and 19000; 84F (part numbers 17600 and 19200); 84D (part numbers 17800 and 19300); and 84Q (part numbers 18300 and 19400). The 84Q is the battery version of the model.

The radio pictured in this article is the early version of the Model 84. This set is a 6-tube superheterodyne, listed as part number 17500. The six tubes used are as follows: three Type 24 used as 1st IF, 1st and 2nd detector; one Type 47 1st AF; one Type 27 oscillator; and one Type 80 rectifier. The radio has no tone control, but the later version of the Model 84, part number 19000, does have tone control, as do all other late versions. It also has a slightly different cabinet style and tube type lineup consisting of two 35s, one 24,

Figure 1. The Atwater Kent Model 84.

one 47, one 27 and one 80.

The tube lineups for the other three models are as follows:

Model 84F (early): three Type 24s, one 27, one 47 and one 80.

Model 84F (late): one 24, one 27, two 35s, one 47 and one 80.

Model 84D (early): one 33, three 36s, and two 37s.

Model 84D (late): one 33, three 36s, and two 37s.

Model 84Q (early): two 30s, four 32s and one 33.

Model 84Q (late): two 30s, four 32s, and one 33.

The 84F is a 110v 25-cycle; the 84D is a 110v DC; and, as stated earlier, the 84Q is a battery set.

This Model 84 tunes only the broadcast band. The three Bakelite knobs are for controlling the tuning, on/off and volume. The radio uses a 180-degree, or half-moon, lighted, dial scale, with a metal escutcheon. The grille cloth is the original diamond pattern.

Of all the Atwater Kent cathedrals, this Model 84 is considered the most common. It has a plain looking cabinet when compared to the other Atwater Kent cathedral cabinet styles. However, it is still a very desirable radio and commands a high price.

Over the years I have continued to collect cathedrals. Even though I have many other styles of

radios in my collection, the cathedrals still hold a special place.

Richard Arnold, P.O. Box 275 Lone Grove. OK. 73443. E-mail: arnold@brightok.net

Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. His interest is primarily in cathedrals and 1920s battery sets, and his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. His prize is the 1932 Jackson Bell Peter Pan featured in the June 1991 A.R.C.

Col-R-Tel Converter

BY LOREN P. ASHWORTH AND A.R.C. STAFF

In the early days of color television, there were two major systems proposed, one by RCA and the other by CBS. The Col-R-Tel converter, manufactured by Color Converter, Inc. of Columbia City, Indiana, was a device that decoded the CBS signals. It used a 12" black and white television receiver and a rotating color wheel.

At the transmitter, the CBS field-sequential color broadcasting system utilized a rotating wheel placed in

front of the camera tube. The wheel had three sets of filters: red, blue and green. The result was a stream of complete pictures: red, blue, green, red, blue, green, etc. At the receiving end, a similar rotating disk was placed in front of the television picture tube. This rotating disk was synchronized with the transmitted pictures so as to show a red filter in front of the tube when the red picture was received, blue for the blue picture, and green for the green picture. The result was an excellent color picture. In 1946, the *New York Times* called CBS color "superior to the Technicolor seen in the movies."

The Col-R-Tel circular wheel unit, which is placed in front of the black and white television receiver, is shown in Figure 1. Figure 2 shows a rear view of the Col-R-Tel circular wheel unit. Figures 3 and 4 show the 7-tube control chassis.

Ultimately, the CBS field-sequential color broadcasting system was rejected by the FCC and the RCA-promoted NTSC system used today was adopted.

Fisher, David E. and Fisher, Marshall Jon. *Tube: The Invention of Television*. Washington, D.C.: Counterpoint, 1996.

(Loren P. Ashworth, 1768 State Route 722, New Paris, OH 45347.)

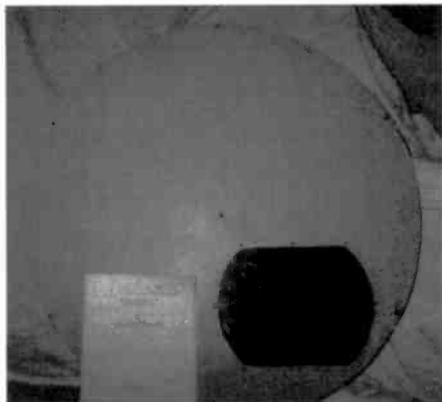

Figure 1. The Col-R-Tel converter wheel unit shown with its factory manual.

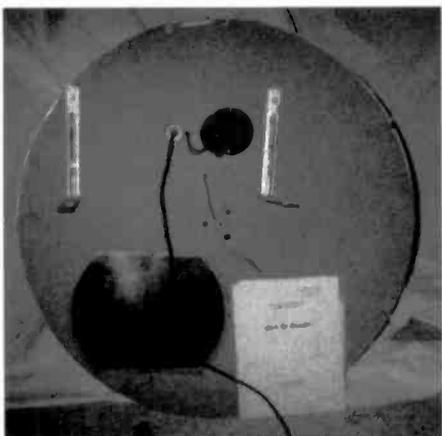

Figure 2. The rear view of the wheel unit shows the drive motor, the cable, and the support brackets that rest on the TV top. The unit contains three sets of automotive type point-switches that turn on and off, as one of the color filters passes in front of the picture tube.

Figure 3. A front view of the chassis. From left to right are the on/off switch, color lock, color gain and meter speed controls. At the far right is the motor start switch.

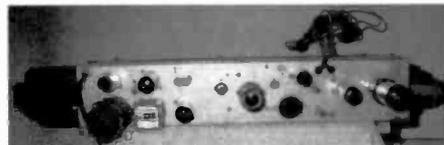

Figure 4. The top of the 7-tube chassis. A cable connects the chassis to the wheel motor switches. The wires at top connect to the TV deflection yoke, the plate of the horizontal output tube and grid of the picture tube (to obtain the video color signal). The following is the tube lineup: 6U8 gated color burst amp, 6U8 color burst amp and limiter, 6BC7 phase selection diodes, 6BE6 chroma detector, 12AH7 chroma amplifier and wheel sync, 6BL7 scanning wheel motor control, and 6X4 power rectifier.

VINTAGE TELEVISION

Early Television Museum and Convention Hilliard, Ohio — April 24-25, 2004

FROM INFORMATION CONTRIBUTED BY DAVE SICA, ALEX MAGOUN, SCOTT MARSHALL, DAVE ABRAMSON, AND DAVE JOHNSON

The following article reports on the upcoming second Early TV Convention. It also recalls the events of the first convention in March 2003, which will certainly give interested collectors an incentive to attend. (Editor)

The second Early TV Convention will be held at the Early Television Museum in Hilliard, Ohio, a suburb of Columbus, on April 24 and 25, 2004. The event will include a swapmeet, an auction, presentations by collectors, demonstrations of sets in the museum collection, and a buffet dinner. The admission fee is \$25, with an additional \$15 for a spouse, and it includes lunch on Saturday and refreshments. The buffet dinner on Saturday is not included and will be moderately priced.

Among the presentations scheduled are the following: "A 1953 15-inch Philco Prototype Color Set," presented by Chuck Azzalina; "CBS Field Sequential Color Lives Again" by John Folsom and Ed Reitan; "A 1938 GE 7-inch Prototype Set" by Darryl Hock; "Visionette Receiver and Camera" and "A Sanabria History Display" by Dave Johnson; "RCA's 1939 TV Program in Russia" (a video presentation) by Alex Magoun; "Frozen Out in the 1940s and 1950s? Distant Reception (TVDX-ing) in the NTSC Era" by John Pinckney; and "Brought to You in Living Color" by Peter Stonard.

A list of motels in various price ranges is

listed on the Early Television Foundation (ETF) Web site http://www.earlytelevision.org/swapmeet_motels.html

THE EARLY TELEVISION FOUNDATION MUSEUM

From humble beginnings, starting literally from scratch less than four years ago, Steve McVoy's collection of early televisions quickly grew to the point where he really did need a museum to hold it. Today, the Early Television Foundation Museum contains an extensive collection of historic television artifacts. It has just completed a 2,200 square foot addition to its display space, more than doubling the original area.

In the beginning, Steve focused his attention on the early history of the technology, from the 1920s (the days of the earliest successful demonstrations of mechanical television) through 1955 (the second year of electronic color). He established a nonprofit foundation to buy a warehouse, hired a staff, and enlisted friends and family to help with renovations. The result is a series of display rooms defined by nation, brand, or era. Many of the sets are in working condition.

The immediate downside of Steve's intense collecting is that some of the best current items are headed for Ohio and not to our collections. But the longterm upside is the institutional knowl-

A 1939 TV camera.

Dave Sica with a 1930s Baird Televisor on display in the museum.

edge that the special fans of this particular slice of history will have. We will all be the keepers of this part of broadcasting history.

Steve does more to encourage and publicize and help other collectors of early televisions than anyone else. We all can surely marvel at and learn from his collection and restorations. His foundation and Web site have become the de facto center of the television collecting universe, a registry that benefits everyone. Steve makes sure that we all know what is happening.

THE FIRST EARLY TELEVISION CONVENTION

The first of its kind Early Television Convention, held in March 2003, promised to be a fascinating event, and given the fanaticism, demographics, and, yes, the money involved in antique TV collecting, perhaps the start of something big. The event far exceeded museum founder Steve McVoy's expectations, with collectors converging from 20 states, Canada and Germany.

The convention came together rather casually. Steve had asked Nat Pendleton, Dave Johnson and Geoff Bourne if they'd be willing to bring some of their treasures to his museum in Hilliard and make a presentation about them. They agreed, and Steve posted a notice on his Web site announcing the "First Annual Early Television Convention."

Several local collectors had already been talking about making a pilgrimage to the museum. And, lo and behold, here was the perfect excuse! It was too good an opportunity to pass up. We'd get to meet our collecting colleagues and Internet friends, as well as the one collector who had changed the face of our hobby and worked the hardest to get all of us together. We'd get to see what sort of artifacts exist and how they are

Geoff Bourne with a 1939 TV camera with its cover removed.

presented in one of the most ambitious television museums in the world.

As the number of people registering for the event continued to rise, it quickly became apparent that the existing museum area itself was going to be too small. As a result, an unfinished space was hurriedly gussied up with some floor paint, and sheets from Wal-Mart were hung from conduit to serve as walls.

The first day began with visits to the museum by the 75 attendees (out of a total population of perhaps 80-some acknowledged collectors of these mahogany monsters). All of us were competitors for the earliest and rarest of the examples of arguably the greatest cultural influence of modern times. And all of us gathered in the house of the modern day champion of the collectors — Steve McVoy. There are certainly others with collections to rival Steve's, but none so visible or accommodating.

During the tour, we enjoyed viewing a 1954 *Milton Berle Show* on the black-and-white televisions and clips from *The Wizard of Oz* on the color sets. Some ogled the 1930s British sets, others preferred browsing the postwar extravaganza, the military marvels, the tube displays or the early color sets, most in working condition! Others were mesmerized by the setup enabling people to see their friends televised on a working 1920s Nipkow-disc camera, photocell, and RCA neon-tube vertical-scan television.

It was an awesome and humbling experience to stand in the middle of a room with virtually every set you might ever wish to have in your collection, there on display and running! Standing next to every one of the RCA TRK series, each one with a period program flickering on its prewar CRT had to qualify as... well, certainly as an extraordinary experience.

There's little doubt that most of the attendees of this first convention will return for the second. Hope to see you there.

The Early Television Museum is located at 5396 Franklin St., Hilliard, OH 32026. The museum is open Saturdays from 10 to 6, Sundays from noon to 5, and during the week by appointment.

(David R. Sica, 30 Reynolds Ave., Parsippany, NJ 07054)

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

MURDOCK MODEL 65 – This "single dial tuning" receiver was manufactured by the Wm. J. Murdock Co. of Chelsea, Mass. It uses six Type 201-A tubes and a Type 71 output tube. In 1927, it sold for \$65. (Ray Chase – Plainfield, NJ)

PHILCO MODEL 60B – Because Philco was one of the leading radio manufacturers of the 1930s, the company made many different cathedral styles. However, this is one of the classic 1934 designs offered with the revolutionary 5-tube superheterodyne chassis. (Carl D. Sutton – Ironton, OH)

MAGNAVOX TYPE A1 – This 1-tube amplifier in a metal case sold for \$27.50 in 1923. The tube being used here is a rainbow Type 201-A. (Ross Mason – Mason City, IA)

MINERVA MODEL UNKNOWN – This 5-tube, battery-operated radio was found at a local flea market. The vendor stated that the set was used as a prop in a Chicago gangster movie. The warranty label names the Sparks-Withington Co., (Sparton), of Jackson, Michigan. Any further information on this set would be appreciated. (Don Pehlke – Bloomington, IL)

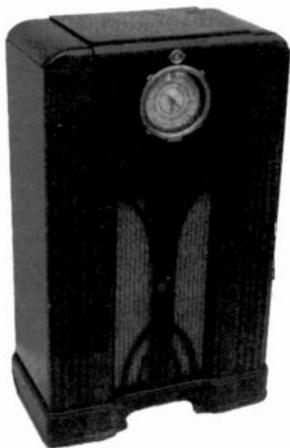

PHOTO REVIEW

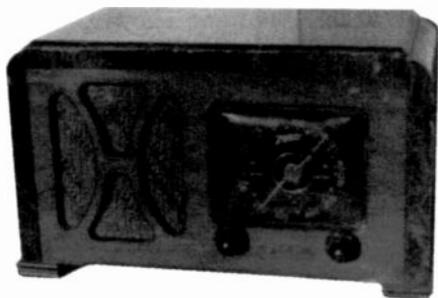

KADETTE MODEL 86X – This 6-tube, AC/DC radio tunes shortwave and broadcast bands. It was manufactured in 1936 by the International Radio Corp. of Ann Arbor, Michigan. (*Ray Chase – Plainfield, NJ*)

RADIO GAS PUMP GLOBE – This glass gasoline pump advertising globe is the result of manufacturers' attaching the word "RADIO" to products during the radio craze. Imagine the boost your Ford Model A got with a tank full of RADIO gasoline! This vintage item was found hiding in a local antique shop. (*Carl D. Sutton – Ironton, OH*)

ARCADIA MODEL 2CM – This 12-tube, 1929 console radio, was purchased at a local flea market. The speaker area is padded with what looks like brown fibrous sound insulation, and it looks as if there was some sort of back panel covering the speaker area. There is a curious-looking small black box, that seems original, hanging in the speaker area just under the main chassis, but I don't know what that would have been used for. (*Don Pehlke – Bloomington, IL*)

ZENITH MODEL 5D627 – This 5-tube receiver was manufactured for sale in 1942, although Zenith, as well as almost all civilian radio manufacturers, had halted production during the war years. (*Clark Trissell – Lincoln, NB*)

AUCTION REPORT

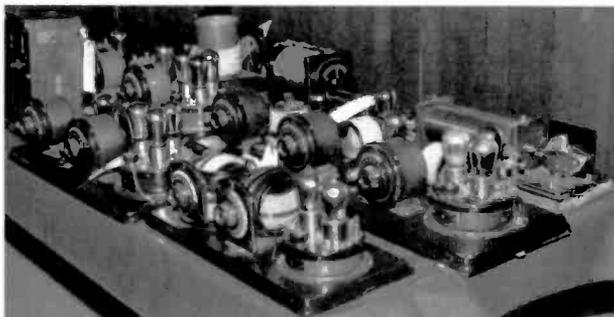

Estes Auctions — Deutsch and Rossbach Collections Burbank, Ohio — September 20, 2003

REPORTED BY RAY CHASE

An historic event? Maybe not, but it surely set the current record for the sale of a single vacuum tube — \$14,500. This was the final bid for a German Von Lieben LRS relay tube with a measurable filament, circa 1910. A second similar tube with an open filament was sold for \$7,000. Heady numbers for the vacuum tube collecting fraternity. Both tubes were from the Sanford Deutsch collection of Yorktown Heights, New York (see A.R.C., September 2003, for a preview). Having one of these rare tubes for public sale would be a momentous event; two of them, well, incredible! For more details on the Von Lieben tube, see Gerald Tyne's *Saga of the Vacuum Tube*.

The Deutsch collection was highlighted in the September 2003 issue of *Antique Radio Classified*, and review of that article is suggested along with this auction report. The radios from the Deutsch estate were truly in outstanding condition and could move right into the new owner's collection with no more than a dusting off.

Historic tubes were not the only items setting records at this auction. A mint condition Wireless Specialty IP-501 paired with a rare Type B 2-step amplifier was hammered down at \$31,000. Among the many other exceptional items from this superlative collection were a Westinghouse SE-1012A shortwave receiver at \$10,000, a Western Electric 4A receiver at \$8,000, a Grebe CR-2 at \$5,600,

"Wall-to-wall" Atwater Kent breadboards with crystal sets in the background.

and a Waterbury, Conn., Bristol B receiver at \$3,600. Interestingly, in this 750 plus lot sale that totalled over \$196,000, 25 of the lots that sold at \$1,000 or more contributed to over 50 percent of the final proceeds.

Other radios came from the Donald Rossbach collection and these were also in very fine condition. One interesting aspect of some of the early battery radios in this sale is that they were outfitted with "transistorized tubes" so that the radios were immediately playable with very moderate battery supplies. Printed instructions were included with most of the radios so equipped. I tried to identify these radios in the following listings but

Something different — a Nyacco 3-dialer portable with a loop and horn speaker in a fabric-covered case showing some damage. The set sold for \$900.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

A Magnavox speaker and its carton, a combination that sold for \$275.

may not have noted all of them.

Now one should not come away with the impression that this sale was strictly for the "high rollers." As indicated previously, there were over 750 lots in this auction, and, as is usually the case at Estes auctions, there is something for everybody. This sale had a more than the usual selection of books and paper items, along with good groupings of parts, military sets, Ham gear, televisions and miscellaneous moderately priced radios of all sort. In addition to the rare tubes, there was a very large selection of other collector tubes available to power up your battery and AC sets. There were few box lots and no transistor radios, but Estes had a follow-up auction scheduled for his auction barn a week later that would have a good supply of these items.

As usual, the detailed price listing does not include the 5 percent buyer's premium that is charged at this site. Also, I stayed until 5:30 P.M. recording this auction but then had to leave while the sale continued for another 20 to 30 minutes. Prices have been rounded down to the dollar.

This nice Bristol "single control radio receiver" was another high dollar item at the auction. It sold for \$3,600.

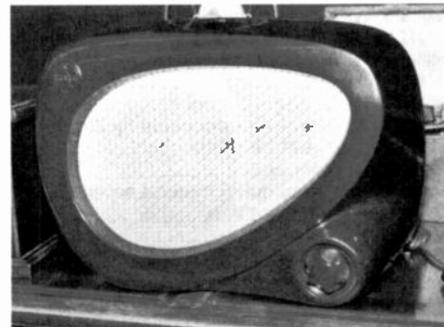

Front: The Western Electric Model 4A, 7-tube superhet brought \$8,000, although the panel meter may not be original. The Atwater Kent breadboard variocoupler, in box, sold for \$225. At the rear: the loop antenna by Deutsche TelephonWerke sold for \$1,500, and the large Music Master wooden horn speaker sold for \$850. In front of the loop antenna is the Western Electric 25B amplifier, which sold for \$1,300.

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

* Full & 1/2 page, 6-month; 1/2 due with order; 1/2 due in 3 mos. ** Full & 1/2 page, 12-month; 1/4 due with order, 3/4 due at 3, 6 & 9 mos. † For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) *Free words* cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike: for example 1, l and I (the number one, the capital i and the small L). Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to Inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

CLASSIFIED AD DETAILS

Deadline: NOON ET— 10th of the month!

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE.** This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

Classified Ad Rates per Month

Subscribers:

First 20 words: **FREE***
29¢ per word for extra words over 20 plus
10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

47¢ per word plus
10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

40¢ per word for all words, * none free, plus
10¢ per word for each bold word plus
10¢ per word for each all-caps word.

Shaded Ads (All words are bold at no charge):

50¢ per word for all words* plus
10¢ per word for each all-caps word.

Non-Subscribers:

Add 20¢ per word to above costs.

*Three words can be bold-all-caps at no extra charge.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month
for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23 00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, put the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE, etc.**, count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

QUALITY AUCTION

MUSIC BOXES, PHONOGRAPHS, RADIOS & RELATED ARTICLES

To be held in the 4-H building on the Eaton County Fairground, Charlotte, Michigan on:
Friday, April 30th beginning at 11:00 a.m.
Saturday, May 1st beginning at 10:00 a.m.

Three excellent collections to be sold over the course of this two (2) day event. The Lowell Gearhart Estate (Joyce Gearhart, owner) from Fenton, Michigan that contains phonographs, advertising, records of all types with a great emphasis on Vogues, The Estate of John Auraden from Cincinnati that includes a good representation of machines (Hexaphone, Reginaphone, other music boxes and phonographs) and finally the Collection of James Gullet of Detroit. Mr. Gullet's collected radios (a very nice, restored group), phonographs, glass Keystone slides, and other small items. Read on and plan on attending... this will be a good sale.

- ★ Regina Hexaphone coin operated machine.
- ★ Reginaphone Style 155 - 15-1/2" disc music box and phonograph in mahogany serpentine case. Complete.
- ★ Regina Style 11, 15-1/2" disc music box.
- ★ Peerless Forte Piccolo (Mermod Freres) #372 interchangeable cylinder music box.
- ★ Sublime Harmonie 13" (Mermod Freres) cylinder music box.
- ★ A wonderful large cylinder "Organ" music box. L.A. Grosclaude, Geneva, Ca. 1876-1878. Geneva.
- ★ Very nice Swiss cylinder music box in serpentine inlaid walnut case.
- ★ Polyphon 8" disc music box in serpentine inlaid walnut case.
- ★ Antique Jones and Clayton Harpsichord.
- ★ Over 135 antique phonographs, all makes, types and models with many wooden horn examples.
- ★ Mae Starr phonograph doll with records.
- ★ Fantastic group of advertising items coming from the Gearhart collection including a huge group of postcards, dusters, premiums, Nipper statues (paper mache and plaster - a very nice collection in various sizes), pictures, trade cards, premium records, needle tins, a great deal of company catalogs and advertising sheets as well as lots more.
- ★ The Gullet Collection from Detroit is one of the nicest collections of radios that we have had to sell in quite some time. In a group of over 50 radios, there is a **Very Rare Spartan Model 558 Blue Mirror**. (4 knob rectangular example) Grandfather clock/radios including Grebe, Philco, Majestic, Stewart Warner, Stromberg Carson, Westinghouse, Curtis Mathis, Crosley, Metrocane speaker, Freed Eisermann, Amrad, Day Fan, Colonial (Zeeland), American Bosch, Gloritone and Gloriette, Jackson Bell, Imperial Tombstone, Kroeber, 2 Detroit's including a Scarce clock/radio example and many more.
- ★ Collection of Cameras, Projectors, Clocks including Eli Terry wood works and general antiques.
- ★ 1300+ glass projector slides and a number of various projectors for glass slides and stereoscope cards.
- ★ Over 75 Vogue Records including the **RARE "Rum & Coca-Cola"** example. Many sets, etc.
- ★ Lots of other records including Pink Lamberts, Diamond Discs, Childrens, Bubble Books, Cylinders, Berliners, Zon-o-phone, Black Memorabilia, Presidential/Political, A nice grouping of Uncle Josh, etc.
- ★ Large Library of Reference Books from all three of the collections.

This is only a sampling of what will be sold. We estimate that there will be 1,000 lots to be sold over the course of this event. Catalogs available for \$12. Everyone purchasing a catalog will receive the post sale price list.

TRANS-OCEANIC AUCTION + TRANS-OCEANIC AUCTION + TRANS-OCEANIC AUCTION

Mid-Atlantic Antique Radio Club proudly presents A Specialty Zenith Auction featuring the personal radio collection of Mr. Gregory W. Pease

June 4, 2004 7:30PM Sheraton College Park Hotel in Beltsville, MD

Mr Pease has spent the better part of a decade assembling one of the most outstanding and complete Zenith Transoceanic radio collections anywhere. Greg's radios are immaculately preserved examples of every variety of Transoceanic, from the first Clipper to the last R-7000, with multiple examples and variants of many models, including the excessively rare military versions in brown and green leather. The collection includes a large assortment of original documentation, advertising, cartons, store displays and stands, plus many Zenith Universal, Long Distance, and portables related to, or concurrent with the Transoceanic line. All are in excellent to mint condition. We are expecting approximately 125 lots of superb Zenith items. **Mr. Pease has agreed to sell his items without reserve! Zenith collectors should not miss this!**

Plus, take this opportunity to sell your high-end Zenith sets

MAARC is making available space for up to an additional 75 lots of high quality Zenith items.

If you are interested in consigning please contact Domi Sanchez at (202) 441-3403 (leave message), or e-mail: radiodome@mindspring.com. Reserves are allowed and items must support a \$25 minimum opening bid. There will be a 15% commission.

This auction is being held in conjunction with MAARC's RadioActivity 2004 Meet. Please see the ad elsewhere in this publication for information, location, and directions.

Visit www.maarc.org for more details, photos, and a listing of the offerings as they become available

Radio Auction

Saturday, May 22, 2004 at 10 AM EDT

at the Seville Antique Auction Barn
8240 Wooster Pike Rd., Seville, Ohio
(Exit #2 off I-76 North 1 mile on SR #3)

Estes Auctions will be selling the inventory of the late Howard Granoff. Howard was the owner of "Olde Tyme Radio Company" in Silver Spring, Maryland. Howard did mail orders through his catalogs and was well known by radio collectors. We will offer the inventory of that business. Included are hundreds of tubes, N.O.S. capacitors, resistors, radio dials, wire, headphones, tube testers, transformers, battery set parts, books, manuals. Also we will offer a collection of radios from Illinois and also amateur radio receivers and transmitters. Lots of ca. '20s battery sets, horn speakers, cathedral and tombstone style radios, several crystal sets, test equipment, radio magazines, Dumont and Crosley TV sets, console radios, Rider manuals, Edison Standard phonograph. Lots of parts and part sets to be sold prior to the main auction. Another nice radio sale. We hope to see you at the sale. Terms: cash, check, Visa, M/C.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Special

Announcement

Estes Auctions announces the opening of their new West Coast Branch, serving the entire Western U.S., including the Rocky Mountains and West Coast. Estes Auctions have specialized in the sale of radios and radio-related items for 12 years. We are known worldwide for our radio auctions. We also specialize in amateur radio. Auctioneer Richard Estes has been a licensed ham operator for 45 years. We have conducted over 100 radio auctions. The most notable were the Henry Ford Museum Radio Auction and Muchow Historical Museum Radio Auction. We look forward to serving radio collectors in the Western United States. Our Operations Director on the West Coast is Mr. Gary Fletcher, located in Carlsbad, California. Gary will be able to assist you with any questions or concerns you may have regarding the auction process. Gary is also an avid radio collector and is well known in the radio collecting community. He has the knowledge and experience to help you in any way you desire to consign a radio or a complete collection. You may reach us at the following:

Amateur Radio Books

COMMUNICATIONS RECEIVERS

Communications Receivers 4th Edition by Raymond S. Moore. A comprehensive guide to 750, 1932 to 1981, vacuum tube receivers by 66 manufacturers. Three pages of military receivers. 448 radios pictured! Sharper, clearer photographs. 8 1/2" x 11", 136 pages. Softcover. — \$19.95

Heathkit, A Guide to the Amateur Radio Products, 2nd Edition by Chuck Penson. Updated and expanded documentation of Heathkit's amateur radio products and a history of the company. 8 1/2" x 11", 328 pages. Softcover. NEW — \$29.95

Radios by Hallicrafters, 2nd Ed. by Chuck Dachis. This book includes over a thousand photographs (b/w & color) of radio receivers, transmitters, electronics accessories and advertising material. Technical descriptions are provided for every known Hallicrafters model, including dates of production, model numbers, accompanying pieces and original prices. This 2nd edition includes additional coverage of receivers and updated pricing. 8 1/2" x 11", 225 pages. Softcover. — \$29.95

A Pictorial History of Collins Amateur Radio Equipment by Jay Miller. The most complete story of Collins. Told in hundreds of photos & in the words of the men who made it happen. — \$39.95

Shortwave Receivers Past & Present Communications Receivers 1942-1997 3rd Edition by Fred Osterman. This book is designed for the radio collector, the informed receiver buyer or anyone interested in the history and development of shortwave radios. Over 770 receivers from 98 manufacturers. 8 1/2" x 11", 473 pages. Softcover. — \$24.95

Ham Price Guide, 2nd by Eugene Rippen. Prices for over 3,800 transceivers, receivers, tuners, transmitters, amplifiers, antennas, test equipment, books, tubes and catalogs. Small print. 8 1/2" x 11", 81 pages. Softcover. — \$10.95

Tube Type Transmitter Guide

MANUFACTURED Pre-War and Post-War from 1922 to 1970 using all or mostly tubes.

A. HEATH COMPANY

8 1/2" x 11"

A SOUND SOURCE PUBLICATION

\$ 17.95

Tube Type Transmitter Guide by Eugene Rippen. Provides a wealth of information on transmitters and transceivers. Includes ancillary items such as linear amplifiers, converters, modulators and VFOs. Over 500 illustrations. 8 1/2" x 11", 145 pages. Softcover. — \$17.95

Transmitters, Exciters & Power Amplifiers 1930-1980 by Ray Moore. Pictorial and descriptive guide to amateur high frequency transmitters and amplifiers manufactured in the U.S.A. Over 500 photos. 8 1/2" x 11", 144 pages. Softcover. — \$21.95

TRANSMITTERS EXCITERS & POWER AMPLIFIERS 1930-1980
