Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has just released the first DVD-ROM publication at a break-through introductory price. REA created the first Riders Professional

CD-Series that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we introduce the Riders Standard Series DVD using Riders' indexes for finding "that" schematic that you need occasionally. Priced at a very low introductory price, every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. Introductory Offer - Limited Time - A professional produced product.

**Only \$ 150 + \$ 6 S&H (Sold only on DVD) -
Introductory Price - Reg. Price \$ 199**

Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD)
Cunningham-Radiotron Hi-Res CD \$ 85
Sam's Photofact Sets 1-175 - 7 CD's, with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)
All 7 Sam's CD's (1-175) - \$ 495.00

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

It's always good news for antique radio collectors when "radio today and yesterday" come together in the pursuit of historical preservation. Such is the news of the California Historical Radio Society's acquisition of the classic 1937 radio station KRE in Berkeley, the subject of our cover story. Mike Adams describes every club's dream — space for wide-ranging radio activities —and not just any space, but a building still functioning as the transmitter for KRE (now KVTO) and KFRC-AM. A better blend of past and present would be hard to imagine.

Of course, such luck doesn't come without cost. Though rent-free, the building will take much money, equipment, and good old-fashioned elbow grease to restore and support. With its past experience with the Perham Foundation's projects, CHRS would seem to be the right club to take on this big enterprise, and, of course, we encourage your participation in any way possible. We look forward to reporting CHRS's progress.

Station KRE is "now," but the Crosley Corporation is "then." Though the company per se no longer exists, the name lingers on in reproduction products, as well as in the collections of devotees like A.R.C. staff member and Crosley expert Dave Crocker. Dave often comes up with new anecdotes about the great entrepreneur Powel Crosley, but the topic of Dave's article may be a real surprise to many of you — the short-lived Crosley 3-place airplane. For Powel Crosley, perhaps the sky really was the limit.

Unlike the Crosley Company, Zenith still exists today, and as frequent contributor Richard Arnold attests, its early models are highly collectible. For him, a Zenith 7J259 console with a robo/shutter dial was a must for his collection. Still, the price wasn't right. In his article, Richard reminds us that, if you think the price is unreasonably high, try a trade. It worked for him and the result was quite satisfactory.

A.R.C. is fortunate in its frequent contributors as well as its careful readers. Both Loren Ashworth and James O'Neal corrected our erroneous assumption that the Col-R-Tel converter described in the April 2004 issue was designed for the CBS field-sequential color system. Although Loren, the originator of the article, apologized for his "misinformation," in fact, it was not misinformation, but simply *incomplete* information. We, in turn, filled in the blanks with the wrong information, sorry to say.

Furthermore, James O'Neal points out that this error was really illogical because the Col-R-Tel device was built after the CBS system had become obsolete. So, we have to say our "mea culpas" loud and clear. Fortunately, when we augment articles with further information, as we sometimes do, the authors thank us for the enrichment. This time, we must apologize for the error and any confusion it may have caused.

Technical errors are something we can pretty much discount in articles by staff member and engineer Ray

Bintliff. However, we may be entitled to giving him a hard time about the four-year lapse between his first three articles on vintage capacitors and Part 4. Vintage capacitor testers, he warns, are no longer practical, but, in his next article, we're promised testers of the 1930s still usable today. Can Part 5 be far behind?

The eye-catcher on the *Photo Review* pages is the so-called "Wireless Vacuette" vacuum cleaner, named no doubt because of the popularity of everything wireless in the early days of radio. It is, indeed, wireless, as its blower and brush are powered by the motion of the wheels. If this oddity doesn't grab you, there is a good mix of others from which to choose.

Two Estes Auctions, reported by Richard himself, wind up the Estes Auctions in our backlog for 2003. Given that Richard had 14 radio auctions last year, many of them of considerable size, it's little wonder that we could hardly keep up. What many of you may not realize is that these auctions take a great deal of time on the part of our faithful reporter Ray Chase, and, in turn, our staff. We edit for accuracy, best descriptions, and consistency in form, and we must spend time choosing and processing photos. We're now ready for Estes and other auctions of 2004.

Though these two auctions were not "barnburners," they totalled well over \$100,000. Both auctions included the usual battery sets, breadboards, consoles, and cathedrals that bring strong prices. Highlights were the McMurdo Si ver Masterpiece that went for \$2,900 and the E.H. Scott Philharmonic for \$1,800.

However, of special interest was the strong showing of less commonly seen Amateur gear. Two Collins 75A-4 receivers went for \$1,000 and \$1,050 respectively, while Hallicrafters, National, Johnson, and other names familiar to Ham collectors brought solid prices.

A.R.C. Benefits. Augment your summer reading list with books on radio and related subjects ordered from A.R.C. They are shipped free by book rate in the U. S., and to current subscribers, there is a 10 percent discount on all book orders. Discover, Visa, American Express, and MasterCard accepted. Toll-free number: (866) 371-0512; the Web: www.anticueradio.com.

Coming Radio Events. The August listing includes two multiday events: Radiofest XXIII in Elgin, Illinois, and the 43rd AWA Convention in Rochester, N.Y., where we hope you'll stop by our table to say, "Hi!"

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Our cover shows the California Historical Society's newly acquired building, the classic 1937 radio station KRE in Berkeley, California. Volunteers are currently restoring the building to its 1950s look, in preparation for wide-ranging, radio-related activities. They need all the help and encouragement the radio-collecting community can give them.

CLUB SPOTLIGHT

Northern California Radio Group Gets Classic Radio Station

BY MIKE ADAMS

Our congratulations to CHRS on the acquisition of the 1937 KRE building with its almost limitless possibilities for radio-related activities. According to the following good-news report, the deal is for ten years, and we sincerely hope that plans go well beyond that time. (Editor)

The California Historical Radio Society (CHRS) has a new, almost rent-free home in classic radio station KRE, AM 1400, in Berkeley, across the Bay from San Francisco. This is very exciting because we may be the only regional radio history organization with such a radio-themed place of our own. It is the ultimate radio restoration project.

In my two decades of up-close involvement in radio history organizations and collector clubs (SCARS, Perham, CHRS), the one wish that we all had was that we could have a building for a headquarters — offices, museum space, even a parking lot for the flea markets. What regional radio organization hasn't wanted a build-

Figure 2. A publicity still showing Wolfman Jack in the 1973 George Lucas movie *American Graffiti* filmed in part at KRE.

Figure 1. The KRE facility as it appeared in 1950, the period designated for its restoration.

Figure 3. Inner City Broadcasting Company (ICBC) President Harvey Stone, left, turns over KRE, graffiti and all, to California Historical Radio Society (CHRS) President Steve Kushman.

ing, preferably rent-free, as a meeting space, a place to display radio devices in a museum format, a library and other educational endeavors? Instead, most groups have been "virtual," meeting in parking lots and restaurants, and on the Web.

As lovers of antique radio, we did not want to follow the lead of the big museums and spend all our time and efforts on fund-raising to create an expensive "attraction" needed to compete for the attention of museum-going families. Such a venture would mean that a regional radio club would have to forego a collection, restoration and history mission for one of community advancement and development. Most of those in our hobby would rather stand in front of their open car trunks and talk to fellow hobbyists about radios than

collect money from gift shops and I-MAX theaters. Trust me, I have been through this before.

But CHRS has been given a building, an abandoned radio station to restore. After a year of negotiation, we have just signed an agreement to take over the 1937 KRE building. We plan to restore it to its 1950 appearance, as shown in Figure 1. We will use it for Society headquarters and a Bay Area radio museum. Needless to say, we need plenty of help from the radio history community. We need ideas, labor, and money. Actually, we need lots of money.

We are a mature organization. CHRS was chartered 30 years ago as a nonprofit radio history organization, our original goal, the study, collection and preservation of old radio technology. Although we are

Bay Area-based, we were "virtual" — on the Web, in a newsletter, with an address, but with meetings, flea markets and displays. CHRS was a major contributor to the very fine old radio exhibit at the San Francisco Airport several years back. Our president is Steve Kushman of KGO-TV, Channel 7, in San Francisco.

KRE HISTORY

KRE-1400 AM, licensed in 1922 and in its current location since 1937, followed the path of low power AM stations in the 1970s. It made format changes to try to hang onto a dwindling audience, and to meet the challenge of FM, deregulation, ownership changes, and the fact that many of these stations were worth more as real estate than broadcast properties.

KRE was different. Built on landfill in the Berkeley wetlands, its location is perfect for AM transmission; (Continued on following page)

Figure 4. This group of volunteers has high hopes that the newly painted building will remain clear of graffiti, the artistic output of neighborhood kids.

(KRE, continued)

however, as it became surrounded by freeways in an industrial neighborhood, the site became undesirable as a location for the studios, sales and promotion offices of its FM sister, KBLX. While KRE/KBLX moved to San Francisco, two rooms in the rear of the building remain "on the air" — the transmitter site for KRE (now KVTO) and KFRC-AM, an oldies and baseball powerhouse in San Francisco.

KRE did have its fifteen minutes of fame in the 1973 George Lucas film *American Graffiti*. The parking lot, front exterior door and the combo studio were the locations for the Wolfman Jack sequences. Figure 2 shows a publicity still from the movie.

THE DEAL

We approached the owners of KRE/KBLX, Inner City, with a proposal to restore and occupy the studios and offices and dedicate them to Bay Area radio history. Attorneys worked out a 10-year lease agreement: KBX General Manager Harvey Stone and CHRS President Steve Kushman, shown in Figure 3, were on hand for the lease signing.

CHRS will not pay rent, but we are responsible for insurance, repairs, security, and the nontransmitter part of the utility bills. Because some of our members are local broadcast engineers, Inner City trusts us to coexist with and respect the KFRC/KVTO technical facility. Visitors can look through the old studio window and take transmitter readings every half hour if they feel nostalgic.

THE RESTORATION

But now comes the difficult part, the restoration, and this is going to take some time. We have already replaced all the broken upper windows. As the photographs show, the building is a graffiti magnet, and while the state has continued to repair the fence, neighborhood kids seem to like this formerly abandoned location as a giant art studio. We will be installing security devices, and a group of volunteers have recently painted the exterior with a temporary coat of white, as shown in Figure 4. The painting goes on in Figure 5, but, keeping the exterior clean will be a challenge.

Figure 5. Two faithful volunteers on the job.

Figure 6. A view of the lake on the property with the KRE building and tower in the background.

We hope to have enough events and traffic to solve some of these problems. We hope to see fans of old radio happily picnicking on the banks of our lake after touring our radio station/museum. That inviting possibility is evident in the view of the lake with the KRE building and tower in the background in Figure 6.

We have received a large amount of donated old broadcast equipment, even transmitters. We were also just given the extensive Jim Maxwell (W6CF) library — of all things, radio and electronics. We have already held a well-attended swap meet in our parking lot.

Alas, we are not a wealthy or well-connected organization, and for 30 years, we've needed only member dues to pay for site rental and newsletter printing and mailing. Now we must quickly shift gears and find supporters who can donate carpet, windows, and interior detail. We need carpenters and other restoration artists who can gradually bring KRE back to the way it looked in 1950. Because of our membership, we do have the support of local broadcasters and broadcast engineers, some of whom are radio collectors.

We invite you to visit our Website www.CaliforniaHistoricalRadio.com for more details — the proposal, the lease signing event, a history of KRE, and many photos of the ongoing cleanup, painting and restoration of KRE.

(Mike Adams, 112 Crescent Ct. Scotts Valley, CA 95066)

Mike Adams is the chair of the Department of Television, Radio, Film and Theatre at San Jose State University, and the advisor to its KSJS-90.5 FM. He is also the Chairman of the Board of the California Historical Radio Society.

The California Historical Radio Society (CHRS) publishes "The Journal" quarterly, "20 Years of CHRS" and "Hints and Kinks" free with membership. Dues are \$20. There are 13 events per year. For more information: Box 31659, San Francisco, CA 94131; CHRS Hotline: (415) 821-9800; President Steve Kushman, 4233 25th St., San Francisco, CA 94114. www.californiahistoricalradio.com

RADIO MANUFACTURERS

Crosley Takes to the Air The Moonbeam

BY DAVE CROCKER

When we say "Crosley takes to the air," were not talking about the "air waves," as in the Crosley's Radio Station WLW broadcasting. This article is about one of the many ventures of Powel Crosley who manufactured anything he thought would make an honest buck. Editor).

As collectors, we all know that the Crosley Company made radios and speakers for the home. Lots of them! And, some collectors are aware that Powel Crosley, great entrepreneur that he was, also made the highly successful Crosley Shelvador refrigerator and the tiny Crosley automobile. But, did you know it didn't end there?

Digging deeper, we find he also manufactured and marketed a line of radio transmitters, farm wind chargers, generators, home heaters, fans, phonograph pick-ups, automatic furnace coal stokers, hair restorers, gymnasium exercisers, water coolers, air conditioners, facsimile machines, clocks, timers, bug zappers, sporting equipment, washing machines, electric ironers, waffle irons, coffee makers, baby walkers, wind-up flashlights, cameras, motor scooters, tractors, and, yes, televisions. Though I probably missed a few others, I must also include airplanes!

Having owned many seaplanes to travel from Cincinnati to his "Seagate" mansion in Sarasota, Florida, Powel Crosley decided to venture into aircraft manufacture. As described in *The Crosley Broadcaster* for June 1, 1929, a prototype, 3-place, parasol-type airplane was introduced. It was powered by a 7-cylinder, 110 horsepower, Warner-Scarab rotary engine.

Powel named it the *Moonbeam* after the mythical daughter of Luna. It had a wing span of 40 feet and was just over 25 feet long. The *Moonbeam's* design is credited to Edward Stalker, a professor at the University of Michigan's Aeronautics Department, where he specialized in stress analysis. The *Moonbeam* was intended to be a mass-produced, inexpensive (of course) aircraft for the commercial market. A factory site and test field was being sought in the Cincinnati area.

It is interesting to note that the last paragraph of the article reads, "The manufacture of the 'Moonbeam' is a purely personal venture of Mr. Crosley. The 'Moonbeam' factory will not be affiliated in any way with the Crosley Radio Corporation."

Although the airplane had good acceleration and landing capabilities, fewer than six were ever built, as Powel quickly realized that aircraft manufacture was not his niche. With a little help from the Great Depression of 1929, the *Moonbeam's* future died.

Reference: *The Crosley Broadcaster*, June 1, 1929.

(Dave Crocker, 35 Santuit Pond Rd., #4B, Maspee, MA 02649)

Dave Crocker, a graphic artist and a semi-retired member of the A.R.C. staff, has been collecting radios for over 30 years. Many of those years have been spent researching and collecting radios made by the Crosley Radio Company.

The Crosley manufactured 3-place Moonbeam.

WITH THE COLLECTORS

Zenith Model 7J259 Robot/Shutter Dial Console

BY RICHARD ARNOLD

Richard Arnold tells us about another of his finds in an Oklahoma junk store. Along the way, he learns that money isn't everything. (Editor)

About a year ago I was looking through a dirty window at a dirty radio that was inside a junk store here in Ardmore, Oklahoma. The store was closed, but I could see enough of the radio to realize that it was a nice Zenith console, as shown in Figure 1. What really got my attention though, was that the radio had a "robot/shutter" dial, as shown in Figure 2. The cabinet looked all original, the knobs were all there and even the grille cloth looked to be in pretty good shape. Since I did not have a Zenith console in my collection yet — never mind a robot/shutter dial — I was rather anxious to see what the owner wanted for it.

I went home and continued calling the store until I got an answer. I told the guy that I was interested in the Zenith radio and that I would be down to talk to him. When I got there, I looked the radio over really carefully and determined that it

Figure 2. The "robot/shutter" dial.

was in overall good condition. The chassis was complete and had no rust; it even played some, but with major distortion.

When I asked the dealer how much he wanted for it, he said \$100. Well, I didn't have \$100, so I counter offered him \$60. He refused my offer. As I was leaving the store, I told him that I would go home and think about it.

I went home again, really wanting the radio, but still not wanting to part with a \$100 bill. I gave it some thought and knowing that he also traded for stuff, I thought that I might be able to trade him out of it.

Now, what did I have that he might be interested in? I had a black powder replica pistol that I had not used in over 20 years. It was in my radio tool box, and was in really good overall condition, needing only a minor part replacement. I took the gun down to his store and after some discussion he decided to trade me even. So, now I had my new Zenith console, and as far as I was concerned, it had cost me virtually nothing. I only wish that it had one of those green tuning-eyes.

Figure 1. The 1938 Zenith Model 7J259.

The Zenith Model 7J259 has an unusual tube lineup. All tubes have 6.3-volt filaments, except for the 1J6G audio output tube that has a 2-volt filament. The 2-volt filament is wired in series with two dial lamps to permit operation with a 6.3-volt filament supply. Each lamp is shunted by a 27-ohm resistor.

THE ZENITH 7J259

The Zenith 7J259 is a 1938 model. It has seven tubes and a vibrator, as it operates on either 115v AC or 6v DC. There is a 6-110v knob attached to the back of the chassis that switches the power as wanted.

The seven tubes used in this radio are two Type 6S7s, used as RF and IF amplifiers, and one each of the following tube types: a 6D8 converter/oscillator, a 6T7 2nd detector/1st audio, a 6L5 2nd audio, a 1J6 audio output, and a 6ZY5 rectifier. This model 7J259 uses a 10" electrodynamic speaker. The IF is 456 Kc.

I had to do some refinishing work, and I did have to replace the grille cloth. I had the chassis worked on by a professional and now I have a

beautiful 1938 Zenith robot/shutter dial radio that looks and plays great.

Sure am glad I had that old pistol.

(Richard Arnold, P.O. Box 275, Lone Grove, Oklahoma 73443. E-mail: arnold@bightok.net)

Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. His interest is primarily in cathedrals and 1920s battery sets, and his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. His prize is the 1932 Jackson Bell Peter Pan featured in the June 1991 A.R.C.

OOPS! — Col-R-Tel Converter Article Correction

COMMENTS BY LOREN P. ASHWORTH AND JAMES O'NEAL

In the April 2004 issue of A.R.C., we ran some photos and captions on the Col-R-Tel converter that we received from Loren Ashworth. To augment the information he sent in, I added a description of the CBS field-sequential color system for which I assumed the Col-R-Tel was designed. Unfortunately, the Col-R-Tel was designed for the NTSC color system. So, here are comments from Loren himself and from James O'Neal that we received pointing out my error. I apologize to all, but am glad that there are knowledgeable readers out there! (Editor)

Loren P. Ashworth wrote:

What a treat to see my Col-R-Tel converter in the April issue. And, you did a great job of thumbnail sketching the CBS system.

However, the Col-R-Tel is a *second* generation color wheel! The unit is designed for current NTSC color programming and to achieve this, it converts the present system to a sequential field, lower than CBS's. I'm told that it can result in some flicker on large items in the picture. Enclosed is a copy of the Col-R-Tel manual to atone for misleading you a bit.

My unit was rescued from our attic after probably 30 or 40 years and was partially restored by a previous owner. He said a vacuum cleaner belt worked with it. We had it running on my 1952 Admiral 16-inch set. The sound of its humming is just great; it sounds like a sewing machine spinning away. I need to reinstall the unit and check it out again.

By the way, the latest RCA D2P "digital light processing" high definition television projection unit utilizes a miniature color wheel! It is computer-controlled with the light projected through the color wheel. If interested, I could do a piece on it. When my RCA dealer friend was describing this set, it hit me that it used the Col-R-Tel approach.

I naturally would be interested in any info on Col-R-Tel and its development.

James O'Neal wrote:

Remember me? I wrote about the RCA Russian TV connection in the August 2002 A.R.C.

I just had a look at the latest A.R.C. and had to take a moment and fire off this e-mail. No personal offense, but the piece you ran on the "Col-R-Tel Converter" was a real zinger.

The Col-R-Tel device had nothing to do with decoding CBS color transmissions and did not even exist when such noncompatible color broadcasting was authorized by the FCC in 1950.

The Col-R-Tel appeared on the market some time after NTSC compatible color was approved by the FCC in late 1953. It demodulated the NTSC color signal and converted it to "imitation" field sequential color signals. Its purpose was to provide an economical means for receiving NTSC colorcasts in color on an existing black and white set.

The article mentions tubes in the Col-R-Tel used for burst gating and amplification and also chroma detection and amplification. The CBS color system did not incorporate a "burst," nor were there any separate chroma signals to detect or amplify. That technology is only associated with NTSC color signal processing.

This is probably not the only communication you'll be getting on the Col-R-Tel, as it is known to several collectors. There is a picture of the device in Scott Wood's *Classic TVs*, 1992. A working Col-R-Tel was demonstrated at the 1989 AWA Canandaigua fall meet. It is mentioned briefly in the November 1989 *Old Timer's Bulletin*. And, your own November 1989 publication ran a picture of it in the AWA conference wrap-up story.

I have more than a passing acquaintance with this technology, as I constructed a similar device as a high school science fair project. The color really wasn't that excellent.

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

RCA "SELECT-O-METER" – This RCA battery selector for portables would be found at a repair counter for public use. First, one would locate the radio of interest from the spiral-bound center pamphlet, and then, using the wire, plug into the jack indicated. One of the lights on either side would then indicate what battery combination was required. A "D" battery, placed in the space at lower right, powered it all. (Paul Check – Lodi, NJ)

ACME REFLEX RECEIVER – This kit radio uses four tubes — "equal to 7 tubes," claimed Acme. It includes a crystal detector inside the front panel. Acme's celluloid-enclosed tuning condenser is at the left; the remaining components are all Acme manufactured. A unique aspect of this set is how the top, sides, and back all hinge upwards for access to the chassis. (Wally Worth – Wollaston, MA)

B.T.H. WIRELESS RECEIVER – This 1923 crystal set was manufactured by the British Thomson Huston Co., Ltd., of London. It has a unique twin crystal detector, both of which are enclosed in a single celluloid mount. (Jim Taylor – Bourmemouth, England)

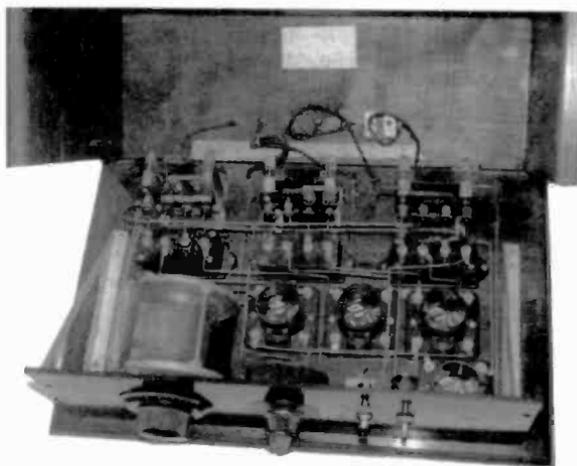

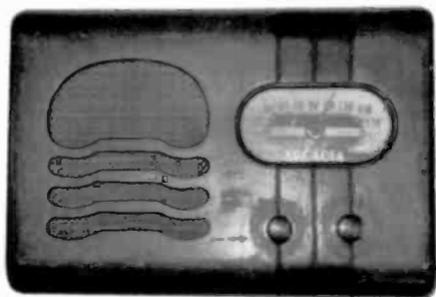

PHOTO REVIEW

MIDWEST, MODEL UNKNOWN – This 9-tube, multiband console was manufactured around 1932 by the Midwest Radio Co. of Cincinnati, Ohio. The paper labels are missing, but Serial #C-13725 is stamped on the chassis. (Carl D. Sutton – Ironton, OH)

ARCADIA MODEL 423 – This 5-tube table radio of the 1940s was manufactured by Dominion ElectroHome Inc., Ltd., of Ontario, Canada. The tube complement is as follows: (1) Type 1C5, (1) 1A7, (1) 1H5, and (2) 1N5. I would like to restore the radio and donate it to Arcadia University, but would like to know more about the company and the exact date of manufacture. Can any readers add information? (Julian Brook – Birmingham, AL)

VACUETTE WIRELESS VACUUM CLEANER

– This household appliance has a radio theme on its dust bag. I bought it at an old radio auction for \$5. It has no motor, but forward motion works the blower and brush. It is pretty effective and collects the dirt in a bag rather than just moving it around. This \$5 bargain brought \$300 on the Internet! Turned out to be one of the best buys at the old radio auction! (Tom Ackerman – Germantown, IL)

MINERVA CORDLESS SPORT – For Austrian portable radio collectors, this set is a must. Built in 1962, it operates only on batteries and has UKW/SW/MW/LW bands. (Erwin Macho – Vienna, Austria)

RESTORATION TOPICS

Capacitors in Old Radios — Part 4 Capacitor Testers

BY RAY BINTLIFF

After a long hiatus, Ray continues his series on capacitors. In Part 4, he describes some early capacitor testers. Parts 1, 2, and 3 appeared in the December 1997, December 1998 and February 2000 issues. (Editor)

Very early radios were not very complicated devices and so the test equipment required to service them was quite basic. But as radio circuitry became more intricate, radio repair shops began adding test equipment to troubleshoot the newer radios. Voltmeters, ammeters, ohmmeters, and set analyzers were used to test a wide range of components. For example, an ohmmeter could be used to check resistors, circuit continuity, wiring harnesses and coil windings. But single purpose testers were just around the corner. Tube testers were probably the first test instruments to be dedicated to testing a single component. And capacitor testers, the subject of this article, began to appear.

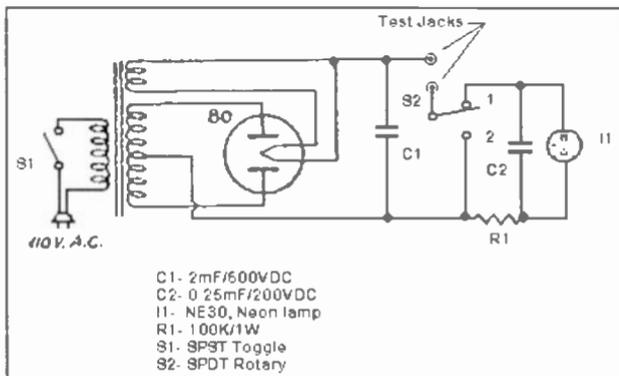

Figure 2. A schematic diagram of the Model 60 tester. Note the presence of high voltage at the test terminals.

EARLY CAPACITOR TESTERS

As you would expect, the earliest capacitor testers were basic devices. Figure 1 shows an example of such a tester. This Model 60 Analyzer, produced by the T&H Manufacturing Company, Kansas City, Missouri, is described in the manufacturer's literature as "The World's Best Trouble Shooter and Circuit Tester." It appears to have been designed primarily for testing automotive components, but included in the list of the items it is capable of testing are condensers, motorcar antennas and variable condensers. A paper label in the lid provides instructions for testing paper capacitors. The tester's schematic diagram, shown in Figure 2, reveals that this is a potentially lethal device. There is 490 VDC present at the test lead jacks.

USING THE T&H MODEL 60

The manufacturer's instructions for testing paper capacitors read as follows: "Turn the black switch to the No. 1 position. Plug in any 110-volt A.C. socket. Turn on the on and off switch. With the test leads shunted across a condenser you will be able to determine its condition by noting the glow tube.

1. One flash of glow tube about every 10 seconds indicates a good condenser.
2. A steady intermittent glow indicates a leaky capacitor.
3. A steady glow indicates a shorted capacitor."

TESTING THE TESTER

After rebuilding the two capacitors in the analyzer and replacing the line cord, I tried testing some

Figure 1. T&H Manufacturing's Model 60 Analyzer is an example of an early capacitor test set.

paper capacitors with the following results (I used resistors to simulate leaky capacitors).

1. A shorted capacitor caused the neon lamp to glow steadily.
2. A leaky capacitor with an internal resistance of approximately 1 megohm or less produced a steady glow. For leakage values greater than 1 megohm, the neon tube blinked. The blinking rate diminished as the leakage resistance increased.
3. A good capacitor caused the neon lamp to blink once at turn-on.
4. An open capacitor did not produce a blink or steady glow.

Test position 2 is used for what the manufacturer calls "The Flash Test." In this position, the high voltage supply is connected directly to the test lead jacks. Typical applications include testing insulation and locating high-resistance connections.

T&H MODEL 100

T&H Manufacturing also made the Model 100 shown in Figure 3. It offered the leakage checking capability of the Model 60 plus a direct-reading capacitance meter. The manufacturer's blurb reads "The Model 100 Meter Analyzer is specially calibrated to indicate open, weak, good and shorted condensers, measuring their capacity in microfarads. It also has a 0 to 15-volt D.C. voltmeter for checking voltages."

The T&H testers and literature are not dated, but appear to be from the early to mid-1930s.

Although these two testers were not used exclusively for testing capacitors, they are representative of the designs used in capacitor testers of that era.

READRITE MODEL 800

Another example of a direct-reading capacitance meter is the Readrite Model 800 shown in Figure 4. This tester is used solely for capacitor testing and measures capacity values only. It does not have the ability to test for leakage.

Its meter has two scales. The high scale reads capacitance values from 0.1 to 10 microfarads and the low scale reads from 0.008 to 0.25. The Model

Figure 3. T&H also sold this Model 100 Analyzer. It has the capability of measuring capacity in addition to leakage testing.

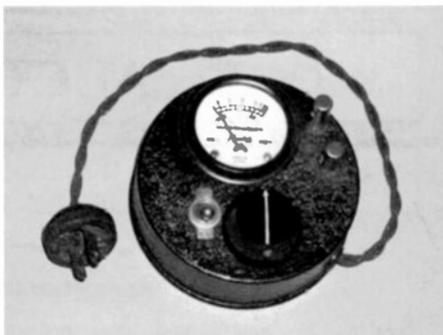

Figure 4. A Readrite Model 800 direct-reading capacitance measuring device. Line voltage appears at its test terminals, and the unit lacks an on-off switch.

800 uses the AC line voltage for capacitor testing and its exposed test terminals present a shock hazard. The tester does not have an on-off switch.

Figure 6 shows the schematic diagram for this tester. The meter is an AC voltmeter that reads 110 volts at full scale. When the test terminals are shorted, the meter will read full scale if the line voltage is 110 VAC. The rheostat (R1) is used to compensate for changes in the line voltage.

When a capacitor is connected to the test terminals, the voltage measured by the meter will decrease because of the voltage drop across the capacitor under test. The amount of voltage drop will depend upon the capacitor's capacitance value. Thus, the voltmeter can be calibrated directly in microfarads. The high or low scale is selected by the toggle switch. When the high scale is selected, the meter is shunted with the 800-ohm resistor (R2).

This inexpensive, but not a very accurate, tester dates from the mid-1930s

MORE TO COME

The testers described in this article are not practical instruments for present day use. Part 5 will cover capacitor testers from the late 1930s that are still useful for radio repair.

(Ray Bintliff, W1RY, 2 Powder Horn Ln., Acton, MA 01720)

Ray Bintliff, W1RY, a member of the A.R.C. editorial staff, holds an Amateur Extra Class license. In addition to Amateur radio, his interests include electronic equipment design and audio reproduction. He also enjoys repairing and restoring pre-1945 radios and test equipment.

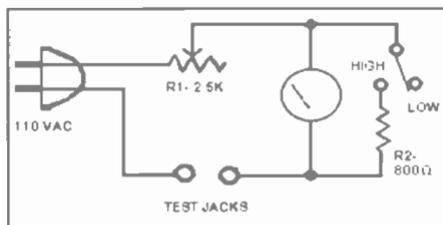

Figure 5. This schematic diagram for the Readrite Model 800 reveals the tester's simplicity.

AUCTION REPORT

Estes Auctions Burbank, Ohio — November 15, 2003

REPORTED BY RICHARD ESTES

Estes Auctions held its November 15, 2003, auction at the Expo Auction Center in Burbank, Ohio. This auction dispersed several collections, including those of the late Harold Parschall of Dayton, Ohio, and the late Eugene Mayo of Canton, Ohio. Total attendance was 155 bidders with 12 states represented. The large variety of tubes amounted to \$8,500 of the gross sale amount. Total proceeds were \$46,000.

This sale featured a large selection of amateur radio equipment and an assortment of parts and part sets. Amazingly, even with three breadboards, the prices held up very well. An Atwater Kent 10-C sold at \$1,200, an Atwater Kent 10-A at \$1,000, and another 10-C needing some repairs at \$700. Many box lots of tubes sold in the \$20 to \$75 range, while books and magazines sold in the \$10 to \$25. range.

An auction highlight — this Federal Model 59 receiver sold for \$1,100.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

Estes Auctions Blakeman/Spriggel/Farkas Estates Burbank, Ohio — December 13, 2003

REPORTED BY RICHARD ESTES

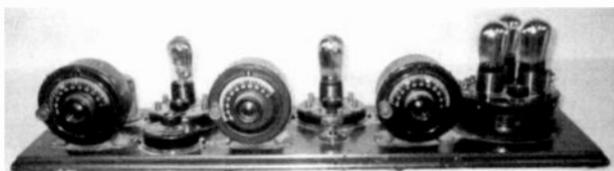

The Estes Radio Auction, held December 13, 2003, at the Expo Center, Burbank, Ohio, combined three collections: those of the late Kenneth Spriggel of Akron, Ohio; the late Kenneth Blakeman of New York; and Andrew Farkas, an Amateur Radio collector also of Akron, Ohio. It made a nice variety of offerings, and the majority of items were in very good condition. Buyers came from 15 states, and there were 155 registered bidders.

Many items were in the \$76 to \$100 range. Horn speakers, wood and Bakelite radios, and lots of test equipment were in the \$10 to \$35 range. Tubes continue to be strong price-wise, as we continue to test all tubes before they come up for sale. This was our 14th radio sale in the year 2003, and it grossed just over \$63,000.

We look forward to serving the radio collecting community with a full schedule throughout 2004.

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors do to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month, copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset if for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay, therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/8-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests, add 15% but call first. Clubs, write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29c each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SJB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive two months) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, I and l (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; r and n; 6, b and G; V, U, u, v and Y; A and R; S, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets].

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and non-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights or opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

CLASSIFIED AD DETAILS

Deadline: NOON ET- 10th of the month!

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE.** This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is **required** in all classified ads; we will add it if you forget.

Classified Ad Rates per Month

Subscribers:

First 20 words: **FREE!**
29c per word for extra words over 20 plus
10c per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

47c per word plus
10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

BOXED CLASSIFIED AD DETAILS

Deadline: 1st of the month!

Boxed classified ads can run unchanged for three months or more. No words are free. Ads may be shaded and may include bold and all-capitalized words freely. The ad need not begin with "For Sale," etc. Minimum run is 3 months, prepaid. Discount: 10% for 6 months; 20% for 12 months.

Boxed Classified Ad Rates per Month

Nonshaded ads:

40c per word for all words,* none free, plus
10c per word for each bold word plus
10c per word for each all-caps word.

Shaded Ads (A1 words are bold at no charge):

50c per word for all words* plus
10c per word for each all-caps word

Non-Subscribers:

Add 20c per word to above costs.

*Three words can be bold-all-caps at no extra charge

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing
(if ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE, etc.**, count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is **required** in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Radio Auction

Saturday, August 28, 2004 at 10 AM EDT

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)

Estes Auctions has been selected to auction the radios of the late Leonard Lacue of Johnstown, Pennsylvania. Leonard repaired Zenith radios and was active on the internet as "Z Black Dial". This collection consists of Zenith consoles, tombstone and table radios, many other makes of radios, some parts, tubes, and chassis. Some of the radios have been restored, others in partial restoration. We will combine this collection with a collection from Mechanicsburg, Pennsylvania and the A.G. Tannenbaum auction. We will pick up the collection after our July 17 sale and will have a description of some of the radios at that time. This will be a very nice sale. Terms: cash, check, Visa, M/C. 5% gallery fee. Make plans to attend!

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Radio Auction

“The Kenneth McCall Collection”

Saturday, October 23, 2004 at 10 AM EST

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71),

then turn left at the Duke gas station onto Garman Rd.

Estes Auctions is pleased to announce they have been selected to sell the large radio collection of Kenneth McCall of Escanaba, Michigan. Ken has been collecting for many years and will now downsize. This collection offers many cathedral style radios, breadboards, Burns horn speakers, lots of other speakers including Music Master, table radios, wood and Bakelite, advertising pieces. Many battery sets, console floor models, several military items. We have just signed the collection and will be bringing it to Ohio in the future. There are approximately 300 radios in this collection. We will have flyers at the Elgin & Rochester meets.

Richard Estes, K8LRY – Auctioneer

**WANTED: FOR SALE OR TRADE:
VINTAGE HI-FI & RADIO EQUIPMENT,
PHONOGRAPHS AND OTHER EARLY
TECHNOLOGY FOR OUR PRIVATE
MUSEUM**

We are a hi-fi audio/video store with product lines including McIntosh, Yamaha, and Marantz. We have a passion for vintage audio equipment and technology, which led us to start a private museum to display these relics. In addition, we are seeking WWII Italian, German, French, and Japanese military radio equipment.

We may also be able to supply your audio/video system needs. Visit our website or call for details.

We have 45 years of experience in the audio business!

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Auction Notice

August 28, 2004

Estes Auctions has moved the inventory of **A.G. Tannenbaum** Vintage Parts and Service Supply to our Ohio warehouse and will offer this at auction. All items are mostly new old stock. There are thousands of tubes, capacitors, resistors, knobs, hardware, test equipment, books, magazines, service manuals, scopes. Everything to be sold at our auction. Also at this sale we will combine a collection of radios from Mechanicsburg, Pennsylvania. Over 100 radios of all types, an assortment of amateur radio receivers and transmitters and all types of misc. equipment. We will have more details before auction time.

Note: We have a sale September 25 that will include Mike Tannenbaum's DeForest Interpanel, Grebe CR-8, Kennedy Type 110, Nesco 2 step amp, SE-1420, Model 10 breadboard. This is to be combined with a super radio collection from Minnesota.

FOR SALE: Restoration Video Volume 2! New! Full color, full length video sharing the fun and satisfaction of restoring old tube radios! Volume 1 of this video series traces the restoration of a 1936 Philco from beginning to end, including basic tube & receiver theory, testing voltages, repairing a lacquer finish without stripping, and more. Volume 2 picks up where Vol. 1 left off, using nearly a dozen different radios to demonstrate scores of intermediate-to-advanced restoration techniques! Included is in-depth tube & receiver theory, schematic reading, how heterodyning works, how capacitance, resistance and inductance work to tune your radio, detailed explanations of various power supplies, testing coils and transformers, replacing a resistance line cord, aligning a radio with or without a signal generator, and much more! Explained in Bret's easy-to-understand, non-technical style. Go to www.bretsoldradios.com to view a 2-minute streaming preview! Single price: \$34.99 VHS, \$39.99 DVD. Add \$3 S&H to each. Set discount: get both volumes for just \$59.99 VHS or \$69.99 DVD w/free U.S. shipping! Save over \$15! PayPal accepted. Send check or M.O. payable to Bret Menassa to: Bret Old Radios, PO Box 51671, Denton, TX 76206. E-mail: bretsoldradios@att.net

(#16-Nov-02)

Price Guides from Radiomania Books By Mark V. Stein

The Machine Age to Jet Age/Tabletop Radio Series

The continuing series of vintage radio pictorial reference and price guides. Each volume is a supplement to the others with virtually no overlap among the three. Over 10,000 vintage tabletop radios are individually described and valued.

Volume 1: 2,500 radios. Black and white photos. Updated with 2003 market values. Includes master index for all three volumes. 239 pages. \$29.95

Volume 2: 2,700 radios. Black and white photos. 16 page color insert. Updated with 2001 market values and hundreds of variations not previously included. 372 pages. \$28.95
