## WANTED

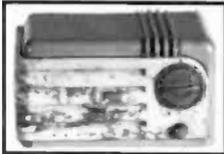

### AIR KING SKYSCRAPERS

PAYING **\$14,500.00+** for near mint condition red or blue  
**\$10,000.00+** for green, lavender or yellow  
**\$3000.00+** for black and **\$2000.00+** for white or brown  
**ALSO WANTED ANY COLOR-ANY CONDITION**  
COLLECTOR PAYING TOO MUCH, CALL ME LAST

### TOM THUMB CATALIN RADIOS WANTED

paying **\$6,750.00+** for mint cond. red, green, orchid, blue  
**\$2500.00+** for any mint condition one  
**ALSO WANTED ANY COLOR-ANY CONDITION**

### DETROLA PEE WEE & SUPER PEE WEE WANTED

paying **\$600.00+** for mint cond. black, white  
**\$1,450.00+** for beetle, gray, salt & pepper  
**\$2000.00+** for red. blue **\$3500.00+** for green or lavender  
**ALSO WANTED ANY COLOR-ANY CONDITION**

### WANTED ANY CATALIN RADIO

ADDISON 2 MAROON & YELLOW \$900.00, YELLOW & RED \$3,750.00  
ARVIN 532 ANY COLOR \$2,500.00, BENDIX 526 GREEN & BLACK \$625.00  
DeWALD A501, A502 BROWN \$375.00, YELLOW \$425.00, RED \$1,200.00  
EMERSON AU 190 & BT 245 YELLOW \$1,300.00, GREEN \$2,500.00  
DARK RED \$2,700.00, BLUE \$6,850.00, BRIGHT RED \$11,000.00  
**ESPEY MIDGET, YOU NAME THE PRICE I WILL PAY IT!**  
EMERSON BM258 YELLOW \$750, GREEN \$1,350, RED \$2,150, BLUE \$4,000  
EMERSON 564 BLACK \$500.00, GREEN \$1,150.00, RED \$1,650.00  
FADA L56, F55, 52, 5F50, 5F60, 136, 53X, YELLOW \$1,500.00, LT GREEN \$1,750.00  
MAROON & YELLOW \$2,200.00, YELLOW & BLUE \$2,500.00, YELLOW & RED \$3,100.00  
EMERALD GREEN & YELLOW \$7,000.00, BLUE & YELLOW \$7,000.00  
FADA 115, 116 & 1000 ALL YELLOW \$700.00, MAROON & YELLOW \$950.00, YELLOW & RED \$1,150.00, PEA GREEN \$1300.00, BLUE & YELLOW \$2,550.00  
GAROD 6AU1 MAROON \$675.00, YELLOW & RED 1,350.00, RED & YELLOW \$1,450.00  
HALSON ANY COLOR \$1,500.00 TO \$5,000.00  
MOTOROLA 50XC ALL YELLOW \$1,750, BROWN & TORT \$2,750.00, RED & YELLOW \$6,000.00, GREEN & YELLOW \$6,250.00  
MOTOROLA 52 YELLOW & TORT \$1,500.00, MAROON & YELLOW \$1,850.00, GREEN & YELLOW \$2,900.00  
SONORA KM ANY COLOR \$1,600.00, SENTINEL 284 WAVEY GRILL YELLOW \$700.00, SAND 950.00, RED 1,450.00, BLUE 6,500.00  
SPARTON CLOISSONNE ANY COLOR \$3,500.00 TO \$5,500.00, EMERSON 520 \$50.00

always buying any catalin or pre-war colored bakelite radios

We will buy one piece or the entire collection.

"watch out there's a new guy in town"

## Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has just released the first DVD-ROM publication at a break-through introductory price. REA created the first Riders Professional CD-Series that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we introduce the Riders Standard Series DVD using Riders' indexes for finding "that" schematic that you need occasionally. Priced at a very low introductory price, every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. Introductory Offer - Limited Time - A professional produced product.

**Only \$ 150 + \$ 6 S&H (Sold only on DVD) -  
Introductory Price - Reg. Price \$ 199**

### Other CD-ROM Publications:

**CONTACTING ANTIQUÉ RADIO CLASSIFIED.** All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.  
Only UPS, FedEx, etc. items to street address; 498-A Cross Street.

Telephone: (866) 371-0512; Fax: (978) 371-7129

E-mail: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com)

Web: [www.antiqueradio.com](http://www.antiqueradio.com)

Please, no classified ads by telephone: thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

## EDITOR'S COMMENTS

As our report on the Greater Boston Antique Radio Collectors Meet in Westford, Mass., says, luck was with us again. A winter meet in New England is always a risk, but somehow we beat the odds and can take justifiable pride in our success. The meet organizers — namely the A.R.C. staff — certainly have the right to do a little bragging, as attendees continue to tell us that this is the best meet on the East Coast.

First among the reasons given are the amenities of the hotel which provides a large, comfortable venue for the meet and some entertainment for families. Second, effective advertising brings in new buyers and potentially new collectors, and the result is that our attendance continues to rank among the top tier of one-day meets in the U. S. And last but not least is the prevailing camaraderie that just can't be beat. Can you blame us for tooting our own horn a bit?

Richard Arnold also has reason to congratulate himself — in this case, for finding a replacement for the Silvertone 6050 that he had made the mistake of selling. Why a mistake? Because it related to his wife's family history, and she was not at all pleased that it was gone. He not only got back in her good graces with the replacement, but also won the set a place in the "forbidden living room." Furthermore, Richard does all of us a good service by writing about his discoveries in his favorite Oklahoma antique shop. That seems like another extension of the sense of "radio family" that goes on at meets like Radio XXXVI.

Though radio is our primary subject we're always interested in its close relatives like Robert Enemark's collection of early telegraph equipment. In Bob's description of his museum quality resonator and a homemade learner set, we are reminded of the importance of examining items very carefully in case a stamp or identifying mark has been overlooked.

If you should happen to be looking for another

aspect of our hobby to vary your collection, you might consider following Robert's path to the unusual, or Walter Hall's interest in test equipment, which is even more closely related to radio. Walter undertook the challenge of restoring a high quality Western Electric Primary Frequency Standard. We salute his expertise and his interest in a different side of radior preservation.

Once again Ray Chase reports on a large Estes Auction with items so extensive in almost all categories that we have pulled them out and reported them separately. For example, a battery set collector like me found so much that was interesting on the Estes website that I decided to go to the auction myself. I did have some success and concluded that collectors of varying interests are drawn to Estes events because of Richard's success in finding quality consignments.

I was also able to add to Ray Chase's photos and decided that overall, the number of detailed photos in this issue amounts to "Photo Review" sections almost throughout the magazine. In the auction report alone you will see a Zenith Military Trans-Oceanic, an Air-Way G receiver, a Zenith Porthole TV, an Amrad SE-1420C medium wave receiver, and two versions of the Amplion AR-102 speaker, one of which shows the word "Dragonfly" on the label. I suggest that you keep tabs on the previews to these auctions to see what might enhance your own collection.

**A.R.C. Benefits.** Continue to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; the Web, [www.antiqueradio.com](http://www.antiqueradio.com); books shipped free in the U. S. by USPS media mail; and for current subscribers a 10 percent discount on all book orders.

**Coming Radio Events.** Good weather means more meetings are possible — 15 are listed, including Kutztown, IHRS, and Radio Daze. There are 26 meetings and 3 auctions listed, with a grand total of 44 events. Be sure to attend at least one in your area.

Happy Collecting!

John V. Terrey, Editor

## OOPS!

Several letters this month commented on the "Resistance Line Cord and Ballast Tube Replacement" article in the March issue to which we will respond in detail in a future issue. The significant error was one made by our printing contractor — the square root sign was replaced by a divide sign. This error makes the equation in the March issue unusable. The correct equation is below:

$$C = \frac{1000 \times I_H}{0.377 \times \sqrt{V_L^2 - V_H^2}}$$

## ON THE COVER

Our cover photo, taken by Editor John Terrey at Radio XXXVI, shows the Bernd family of Fairfield, Connecticut, displaying their transistor radios and Beatlemania items for sale. Walter, a longtime A.R.C. subscriber, his wife Jane and son Chris, who had just bought his first radio, epitomized the supportive family teams prevalent among the sellers at this popular meet.

# MEET REPORT

## Radio XXXVI

Westford, Massachusetts — February 20, 2005

BY DOROTHY SCHECTER

Luck was in the air at the 36th Greater Boston Antique Radio Collectors (GBARC) Meet in Westford, Massachusetts, on Sunday, February 20, 2005. First, a threatened storm held off until Monday, and though cold, the day dawned bright and sunny. The effect was a generally upbeat mood that pervaded the Westford Regency Hotel ballroom. From 8 a.m. to noon, collectors gathered to engage in their favorite "sport" — buying and selling, or just exchanging favorite stories about their latest finds and projects.

Luck was also evident in the positive comments that prevailed at the end of the show. Several sellers were heard to remark that they had sold everything they brought, many within the first hour. Our A.R.C. colleague Ray Bintliff said that even his repair business card container was empty.

The room was sold out, with 60 exhibitors displaying their wares on 90 tables. Attendees totalled 725. Among those with multiple tables was Dick Bergeron, down from Maine, offering a spread of tubes on four tables. A retired IBM engineer, Dick is fairly typical of those with the longtime radio bug — he's now in the radio "business" full time as a dealer in tubes.

The kind of camaraderie inherent in this annual meet was evident in the good-natured kidding Dick was taking about the plaid cap he was wearing. He tells a good down-Maine story about it. At his local post office recently, the clerk commented on his cap. Dick let it be known that his wife had made it for

Jeffrey Gardner and son Ben of Gloversville, New York, first-time vendors, show a 1948 Globe Electronic 558 clock/radio mounted on wood. Ben's share for his help was 10 percent of the profits.

him. The response was, "Well, how long do you have to wear it for?"

No doubt the cap will become a talisman, especially if it draws attention and helps to keep Dick's business as brisk as it was. After many years of attendance, he still says, "This is the best show."

### RADIO "FAMILIES"

Perhaps the pleasantest side of a show like this is the sense of family that manifests itself in different

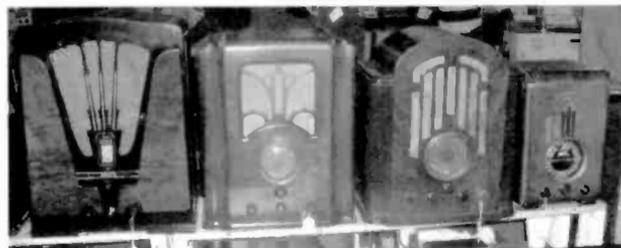

Jay Ballard, a Ham, audio, and old test equipment collector, finds a pair of 7591A vacuum tubes at Dick Bergeron's table.

A "few" of Dick Bergeron's 4-table spread of tubes.

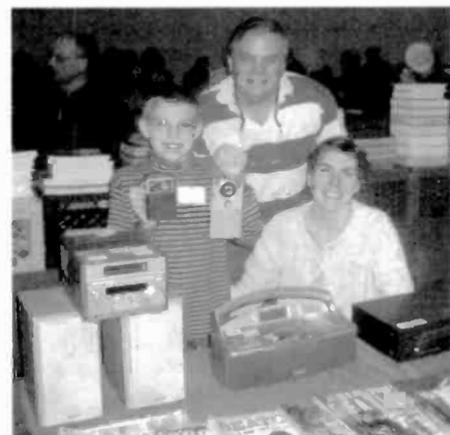

Debbie Johns "keeps the store" for husband Ken. The Johns can always be relied on to bring a wide variety of transistor radios to entice collectors.

John DeLoria's table displayed some handsome sets: left to right, a Philco 168, selling at \$395; a Crosley 1055, at \$295; an RCA Victor 128, at \$395; and a Zenith 5S228 at \$250.

groupings — husbands and wives, parents and children, longtime friends — who work together to make the experience a success. For example, fourteen-year-old Ben Gardner, from Gloversville, New York, kept the "store" while Dad Jeffrey toured the room. The deal was that Ben would take home 10 percent of the profits. The sale of a Majestic Melody Cruiser in the first ten minutes must have given his bank account a boost. Though Jeff had come other years

The Bernd family — Walter, Jane, and son Chris, who had just purchased his first radio. Music, especially the Beatles, and transistor radios are their primary interests. The Bernds also appear on our cover.

as a buyer, this was his first time as a seller. We expect to see this team back next year.

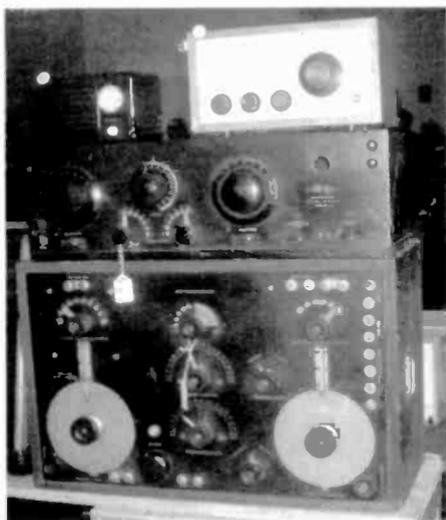

Lurene and Edward Melvin with son Mike of Arlington, Mass., made a trio fully engaged in the business of the day. In this radio family, the driving force is Lurene, who sold 15 table radios in the first hour of the sale. As I spoke to Ed and Mike, Lurene was hard at work selling one of her last remaining items — a framed 1937 Philco ad — to Keith Hutchins of East Hampton, Connecticut. Happy sellers and satisfied buyers are what this meet is all about.

Music and transistor radios were featured at the Bernd family table where another trio held sway. Walter and Jane, and especially son Chris, seemed to be enjoying the day — Chris had just purchased his first radio, and his parents were finding Beatles fans, like themselves, in the crowd.

There must be a maxim that "people who collect together stay together." Our prime example in the "old timer" category has to be Ray and Edith Chase. It would be impossible to tally up the shows they have attended and the auctions they have covered for A.R.C.

This is a team extraordinaire, and it was a pleasure to see them enjoy this show to the very end.

Lurana and Keith Dennison of Victory Mills, New  
(Continued on following page)

From his "Waves" store in New York City, Bruce Mager's display featured early to late sets: bottom, an IP-500 selling at \$6,250; above, a Grebe CR-8, at \$650; top right, a KLH Model 8, selling at \$125; and top left, a small Detrola, at \$185.

(Radio XXXVI, continued)

York, are another husband-wife team, who, like many others from out of state, stayed at the hotel and enjoyed its many amenities. In this case, Lurana kept the store as she has done attending this show for several years. Meanwhile, Keith cruised the room looking for the plastics, Catalins, cathedrals, and crystal sets that interest him. At a fairly early hour, they had sold almost everything — a happy beginning, to say the least.

Still another team, Larry and Lynn Whitlock, married for 39 years, continue to collect early battery sets, while he also does restoration work. Larry said he has been at it ever since he "stuck a fork in a light circuit" and that he is "the luckiest guy in the world" to have a wife involved in the give and take of his avocation. "Radio wives" are not as rare as we once thought.

Bob and Louise Masterson from northern New Jersey started collecting Deco radios, plastics, and transistor radios 12 or 13 years ago. They have been coming to this show for 10 of those years, and again, illustrate that cooperation seems to be the norm in "radio families."

Other combinations also make productive teams. Though a collector since age 15, Dave Sousa was attending this show for the first time. Interested in battery sets, as well as Ham radio and stereo equipment, he brought along his wife Kathy and his friend Tom Hodges, both good helpers, to join in the action of the show.

And how about buyer John Flynn from the greater Boston area, accompanied by his daughter, as they enjoyed stopping at each table for a look? This father/daughter team already had arms full of a Silver-tone and a cute little Philmore. By show's end, they may have needed a dolly to get to the parking lot.

In the "just happened to drop in" category, Herb Goldberg and Nancy Cronin found much that reminded him of his early days in this country by way of Germany and Israel. They browsed at A.R.C.'s book table and decided that the *Xtal Set Society Newsletter*, Volumes 6 and 7 would be a good beginning to a building project with Herb's grandson. At age 90, Herb is always ready for a new project.

David and Kathy Sousa enjoy showing their Heathkit communications equipment: left, a HW-100 single sideband transceiver with speaker; bottom right, an SB-401 transceiver; and above, an SB-610 scope monitor.

"Have tools, will travel! Ready to drop to the floor on a moment's notice." On-the-spot repair service offered by A.R.C. staffer Ray Bintliff. In this case, James Mazur needed to find the retaining screw to remove the chassis from the cabinet of this American Bosch console.

As for a parent/child team, no one has a better support system than Max Lewontin, now 13 and in his third year as a seller at this meet. Max's mother provides transportation and moral support, but, as we learned two years ago, "Max the Art Deco Man" can handle his own business.

We worry, however, that he's moving on to other pursuits, as rumor has it that he has used his radio proceeds to pay for a movie camera. Still, he was in the process of selling a very nice Emerson 544 to first-time attendee Alan Sharky from Lincoln, Rhode Island. A man with Max's ingenuity can no doubt

A Dynakit Stereo 70, bottom, and a Dynakit PAS-2 preamp, top, were offered for sale by Jeff Brooks. Jeff is a 10-year buyer at this meet, but a first-time seller. He began collecting when he found his first radio in the trash many years ago.

have multiple interests.

Alan, incidentally, commented that although flea markets don't yield as many treasures as they did in the 1970s, he still finds a few. One was a 1929 U.S. T.V. radio that he had promptly shorted out. Swapping such tales, whether of cheer or woe, with old and new friends is part of the sense of family at a show like this one.

### LOOKING TO THE FUTURE

What does a show like Radio XXXVI tell us about the future of antique radio collecting? One striking thing is the age range of the attendees. Even among longtime collectors, many are first-timers at this long-running show, a fact that could indicate a renewed interest in what's happening beyond their shops or computers. For example, John Nowacki, a collector for over 30 years, came down for the first time from Kennebunk, Maine, primarily to sell a lot of accumulated literature. John describes himself as one who buys and sells in cycles — he can't do both at the same time. Now that he's seen what's possible at this show, maybe he'll find a way to do both next year.

Gordon Bello, a collector for 36 years and Vice-President of the Framingham Amateur Radio Association, set up a table for the first time to spread the word about the club activities. These include an FCC License weekend and a flea market. Naturally, he caught the ear of 82-year-old Maurice Bpolayes, N1CRK, who still collects after 35 years and just recently restored a Hallicrafters and two Zeniths.

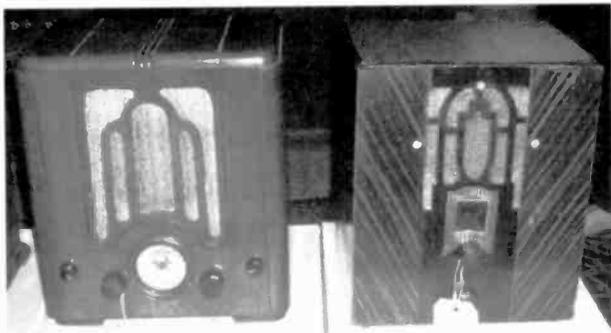

Whether the interest is longtime or renewed, it's a good sign for the future of antique radio collecting. But, even more hopeful is the sign that young people are tuning in. Already mentioned are the children who come as sellers themselves or as aides to parents. Then there are the young adults who happen to have an unexpected exposure to the hobby.

One such example is Todd Szahun who showed up at this his first show. Only three months ago, Todd happened upon a 1935 Zenith 970 console in a thrift shop in Andover, Mass. It was in great shape and had tubes, but no sound. Todd thought this beauty should be repaired, and he surfed the Internet for help.

Whose name should come up but that of our own staff member Ray Bintliff. Todd talked to Ray, and decided, as we know from first-hand experience, that this was a man who knew his stuff. The radio now plays and lacks only the glass dial front for which he was on the lookout.

Todd, who once interned in college for NPR as a reporter, was beginning to sound like one of the converted. He liked the friendliness of folks at the show who were open to newcomers and ready to share information. We feel confident that he'll be back next year.

Of course, the youngest newcomer was 8-month old Christina Monaghan who still thinks radios are toys. In a sense, we have to admit she's right. Christina was there with parents Jim and Myra, first-

Two handsome tombstones on Phil Guinan's table: Left, a Crosley 515, ca. 1935, selling at \$189; and right, a Crosley 5M3, ca. 1934, at \$135.

time sellers, whose specialty is Atwater Kent. Who knows — Christina may be a leader in the next generation of Atwater Kent collectors.

From Christina on up the age scale, the folks at this meet had a great time, if their reluctance to close down was any indication. Many lingered on for more radio talk. More than a dozen collectors with family members went on to John Terrey's home/museum to view his impressive collection and to enjoy more radio talk. As usual, the star of that show was the RCA Theremin, on which everyone had to make a vain attempt at playing a tune.

If winter gets you down next year, be sure to think of Radio XXXVII on February 19, 2006, to pick up your radio spirits. The consensus is that it's a show not to be missed.

*(Dorothy Schechter, c/o A.R.C., P.O. Box 2, Carlisle, MA 01741)*

Christina Monaghan, age eight months, knows a good toy when she sees one. Her mother Myra minds both Christina and the table while dad Jim may be looking around for Atwater Kent products, his primary interest.

# WITH THE COLLECTORS

## The Sears Silvertone Model 6050

BY RICHARD ARNOLD

*The moral of this Richard Arnold story of another successful search for a radio is never sell a radio your wife really likes. If you do, you have to get lucky to find another. (Editor)*

I just recently found the Silvertone Model 6050, shown in Figure 1, in an antique store here in Ardmore, Oklahoma. I had one just like it back in the mid-1980s when I first started collecting, and for some forgotten reason, I had decided to sell or trade it.

My wife really liked the radio and got upset with me when she realized that I had disposed of it. Seems she had one like it in her parents' home when she was a kid. She told me to go ahead and purchase it if I ever found another one. So, when I saw this radio sitting there on the shelf at the antique store, I thought that I should at least look at it.

I looked the set over really carefully and decided that it was in pretty good condition. What was wrong with it was restorable or fixable. The chassis, even though it didn't work, was complete and in good condition with no rust. The cabinet had no major problems. The price was right, so I went ahead and bought it.

When I got the set home and took it apart, I found that it was in very good condition. About all that I had to do was recap it and replace a tube, and it came to life. I did a little work on the cabinet, mostly just cleaning off 56 years of dirt and crud and then giving it a good oiling. The radio looks and plays great. It is however; very sensitive to the way you put the plug into the wall. Put it in the wrong way, and the set really howls.

### THE SILVERTONE MODEL 6050

The 1947 Model 6050 is a 6-tube AC/DC super-heterodyne. It tunes the broadcast band only, from 540 Kc to 1600 Kc. The tube complement is one each of the following: a 12SK7 RF amp, a 12SA7 converter, a 14R7 IF/AVC/detector, a 12SK7 AF amp, a 35L6 power output, and finally, a 35Z5 rectifier. The dial is lighted with a 7-watt candelabra-based bulb.

This set has a silver-toned, Deco dial/speaker bezel, while others have either a gold tone or black bezel. The cabinet is walnut and has vertical striated front corners that I think enhance the overall design.

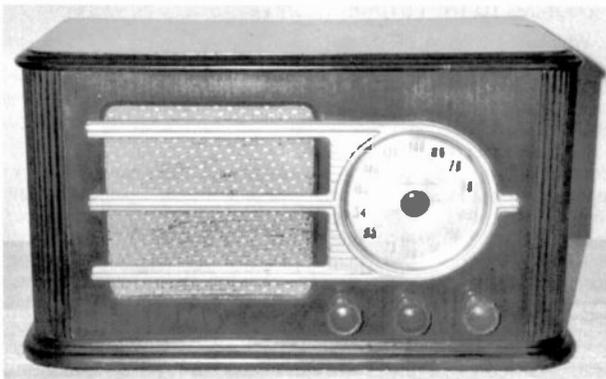

Figure 1. The Sears Silvertone Model 6050.

There are at least three other models of this radio using the same cabinet style, but with different chassis designs. All of them are 1947 models — my 132-286-2, the 132-286-3 and the 132-825-4. The only difference that I know of is that the 132-286-2 uses a 14R7 tube in lieu of a 12SQ7.

### SILVERTONE RADIO MANUFACTURERS

Sears, of course, did not make Silvertone radios, even though they were sold in Sears stores using the trade name. According to W. Rupert MacLaurin in his book *Invention and Innovation in the Radio Industry*, Sears Roebuck Company had around \$700,000 dollars in radio sales in 1941. Sears and Montgomery Ward accounted for around \$1,600,000 in combined radio sales in that same year.

At that time, Sears had a controlling interest in an RCA licensee company named Colonial Radio. Colonial, along with many others, such as Stewart-Warner, Detrola and Arvin, made the Silvertone radio sets for Sears. In doing research for this article, I found that the first three digits of the chassis number indicated which company had made the radio for Sears. The number 132 in my set's chassis, 132-826-2, indicates that Noblitt-Sparks (Arvin) made this radio.

### PRICES TODAY

I kept track of the Model 6050s that were on sale on eBay from November of 2003 to February of 2004. Five of them showed up for sale. The condition of the sets varied, of course, but the selling prices ranged from a low of \$33 to a high of \$203. Can you believe that? Two of the other sets sold for \$41.00 and \$45.44, while another brought \$61.06.

Well, I gave \$38 for mine so I guess I did all right. My wife was sure happy to see that I had finally located another Silvertone 6050. She made me promise that I would never trade or sell it. I promised. She has even placed it on a table in the forbidden living room.

## Telegraph Learner Set and Resonator

BY ROBERT B. ENEMARK

*Robert Enemark can always be counted on to come up with interesting antique telegraph equipment, a focus of his own collection over many years. (Editor)*

Figure 1 shows a homemade learner set that can be switched between land-line and radio Morse or Navy blinking light code. It uses components similar to Bunnell's Blinko-buzzerplex #9028, except for the added land-line sounder.

A 6-volt battery or four #6 1½-volt cells allow operation of all three functions. The components are mounted on a maple board with wiring concealed underneath. The key is a Bunnell brass frame unit with a nickel-plated arm. Markings on the left rear key base show "N.Y.L.E.&W.R.O.," indicating original company ownership. I restored it myself.

The museum quality Postal Telegraph Cable Co. resonator pictured in Figure 2 is a modified Bunnell Mascot model built for table mounting feed-through, and includes a brass pipe and base that can swivel for best sound hearing. The operating set mounted on an oak veneer base includes a 3-volt battery holder/box and a nice Western Electric, AT&T #A1 brass key that has a nickel-plated arm.

The sounder is of mint quality and all brass, except for magnetic components and its aluminum beam. The coils total four ohms. Inside the resonator, the mounting of the sounder is designed for quick replacement in case of failure through means of two forked connectors and a clamp consisting of a wing-nut and screw through its base. On its left side, the resonator has a brass message holder complete with an old Postal Telegraph blank message form. The smooth mahogany wood box has the letters "Postal Tel. Cable Co." stamped into the front of the base.

*since 1941, he collects pre-World War II shortwave sets and telegraph equipment in particular.*

# VINTAGE TEST EQUIPMENT

## Western Electric Primary Frequency Standard

BY WALTER H. HALL

*In general, old test equipment is not as widely collected, or as valuable, as old radios. But, restoring old test equipment and putting it to work can be a rewarding experience. In this article, Walter Hall describes how he restored a high quality piece of Western Electric test equipment. (Editor)*

A number of years ago I acquired an interesting piece of equipment with a nomenclature that indicated that it was intended to be the major part of a system functionally equivalent to existing Primary Frequency Standards used by industry for many years for frequency reference purposes. This unit was made by Western Electric and designated Primary Frequency Standard 100 Kc D-151231. The basic unit, shown in Figure 1, consists of a heavy (38 pounds) steel box and components appropriate to a signal generating device. It is 19 inches wide, 10½ inches high and 8 inches deep and is suitable for mounting in a standard 19-inch relay rack.

### CONSTRUCTION

The general construction details are the typical Western Electric style of the earlier period. The front panel is removable for access to the interior. However, the panel is not similar to the then usual Western Electric designs, which use a flat steel panel with an attached plate identifying the unit and indicating a serial number and model number. This unit departs from the usual Western Electric product in that the front panel is thicker than usual and was designed so that the identifying nomenclature and part number, along with a peripheral frame, are raised above the panel by approximately ⅓ inch, by what appears to have been an etching process.

For operational purposes, the front panel includes a Weston 100 microampere meter, a precision tuning dial for minor frequency corrections, a screw driver-operated rotary switch for larger incremental corrections and a similar type of switch for measuring plate currents of the vacuum tubes and the output level of the generated signal.

Figure 1. A front view of the Western Electric Primary Frequency Standard shows the controls and connectors, including the precision tuning dial and meter.

Since this type of device is intended to be operational for long periods of time, the panel controls were essential to assure that performance had not deteriorated and to enable documentation of daily performance.

A rear view of the unit is shown in Figures 2 and 3. The frequency standard uses four Type 6AC7 tubes and one Type 6V6GT. The large chrome-plated shield can at the lower left houses the crystal oven. It contains a 100 Kc crystal and thermostatically controlled heating elements.

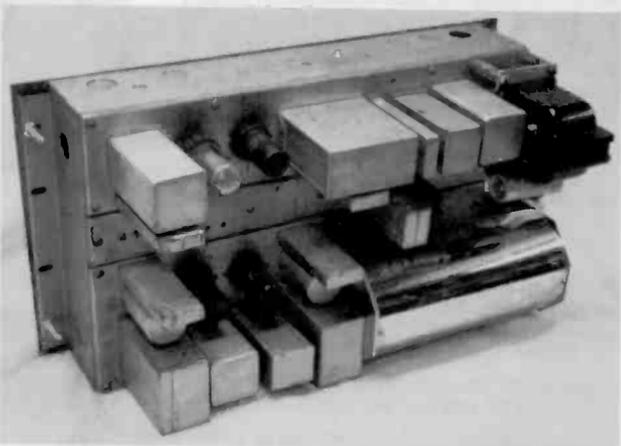

Figure 2. A rear view of the Frequency Standard shows the neatly arranged components and tubes. The crystal oven is the shiny chrome-plated device in the lower right.

It measures approximately 4 inches in diameter and 8½ inches long.

### MAKING IT WORK

With such an impressive nomenclature and also with a Western Electric label, this unit seemed worth the time to take any actions necessary to make it operational. Since it lacked a power supply, one had to be built. Fortunately, there is a small unoccupied space in the rear of the unit, so a compact AC-powered supply of conventional design was made to fit the space and to satisfy the power requirements. The added power supply can be seen in the upper right corner of Figure 3.

I realized at the time that the addition of a nonstandard power supply could change its potentially museum-quality status forever; however, since my goal was to make it a useful working unit if possible, I proceeded, regardless of the consequences.

While the power supply worked very satisfactorily, the unit refused to function. Investigation of internal wiring disclosed evidence of previous efforts. Since specific technical data was not available, the investigation was based largely on visual examination and point-to-point testing. Because the internal wiring was principally of small diameter, shielded-wire circuit tracing was difficult since the short exposed ends of the wire had lost their original color codes over the years.

To facilitate testing, I found it necessary to employ a 5-volt, 1000-cycle signal applied to terminal points and a signal tracer to find the other end of the wires. This enabled investigation of all circuits and ultimately located the faulty circuit. After I had corrected the fault, the 100 Kc oscillator started functioning and ultimately provided an output of 1.05 volts at a frequency of 100,000.7 cycles, in short-term tests.

Since the unit now satisfied my operational objective, I included a few changes to satisfy some of today's standards. These were a 3-conductor power cord, a pilot light, a switch, a fuse holder and a BNC connector for the output.

When operational, the unit also emitted a measurable sound found to be 570 cycles. This sound was from the output transformer for the 6V6GT electron tube. Further exploration identified the sound as the output of a separate oscillator which functioned as the power source for the crystal oven heaters. The heaters were deemed to be functioning adequately since the crystal oven became slightly warm to the touch (100 degrees F).

### A LATER MODEL — THE D-175730

My search for specific technical information on the D-151231 was unsuccessful. I did, how-

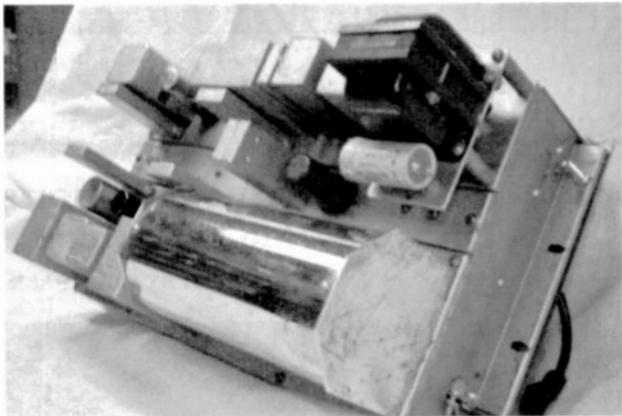

Figure 3. This rear view of the unit shows the added power supply at the upper right.

ever, obtain some useful information pertaining to a later model, the D-175730, which was somewhat similar — same tube line-up — but otherwise, significantly different.

It is of interest to note that while the D-151231 was identified as a "Primary Frequency Standard," the D-175730 was identified as a "Frequency Standard Crystal Oscillator." It would appear that the more stringent requirements for a Primary Standard may have been abandoned as an impractical goal at that time. The fact that the D-151231 had no conventional WE nameplate or serial number could suggest that it was a prototype engineering model.

The later model included other refinements intended to improve frequency stability and also used more of Western Electric's established mechanical design features. In addition, it included a name plate and serial number typical of the WE product line.

Regardless of its uncertain history, the D-151231 represents a level of technical expertise commensurate with those challenging times when there were still many unexplored areas in the field of electronics. For practical reasons, a device designed to provide accurate frequencies at 100 Kc is mostly of historic interest in today's technology. Nevertheless, I am sure that the D-151231 was seriously intended to be an important Western Electric product and is possibly one of the few ever built.

*(Walter H. Hall, 405 Ludlow Ave., Spring Lake, NJ 07762)*

*Walter Hall has been a longtime collector of electronic test equipment, some old, some newer. He has a large collection of restored items related to much earlier times and continues to seek new candidates. The WE item was of particular interest because of the unusual aspect of its origin.*

## AUCTION REPORT

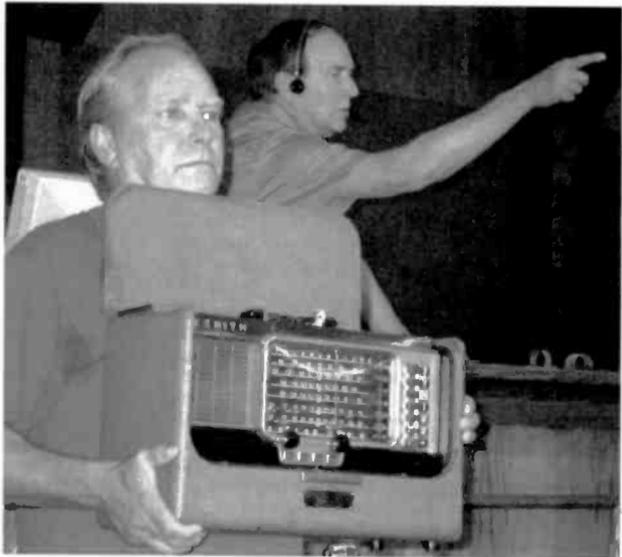

### Estes Auctions Burbank, Ohio — September 25, 2004

REPORTED BY RAY CHASE

The September Estes auction was advertised as a huge auction, and it was that and more. Three estates from Minnesota, Illinois, and Pennsylvania were offered, and this turned out to be one of the largest one-day auctions that I have covered. It started at the usual 10:00 A.M., and I stopped recording at 5:45 P.M., though about another hour of goods was to be offered. I did record all the major items, as the last hour dealt with box lots, parts, and some remaining lesser value items. My detailed listing contains a little fewer than 700 lots, and at this point, the auction bottom line was \$116,880.

The major categories of this auction ran the gamut for most collectors: early items, crystal sets, crystal detectors, military, Ham gear, Zenith, early phonographs, books & paper, tubes, microphones, telegraph and early parts. Something for everyone, except perhaps transistors and novelty radios.

Attendance at the Friday evening viewing seemed sparse, and the possibility of light competition at auction time was beginning to surface. However, it was not to be, as buyers streamed in on Saturday morning bringing the bidding crowd

*Richard Estes, rear, with his helper, takes a bid on this Zenith URR/R-520, a Trans-Oceanic in military dress. The final bid was \$1,400.*

*This Air-Way Type G 5-tube receiver sold for \$1,100.*

to 100 or more. Likewise, there was little activity in added goods coming in on Friday night; the undersides of the tables were nearly empty. However, this also changed on Saturday when many consoles arrived along with other goods that helped fill up previously empty spaces.

I have said before that an Estes auction is like a visit to a radio museum, and this one had lots of museum goodies that you could touch and drool over. Just to mention a few: an Amrad SE-1420C, an RCA IP-501A, four very nice Atwater Kent breadboards, two Western Electric Model 4 series superhets and two of the antenna tuners, an Air-Way G, a DeForest 200 2-step amp, a DeForest Interpanel, a Kennedy 110, a NESCO 2-step amp, a Norden Hauck C10 superhet, a Ware AD-2, and on and on, along with a batch of Weingarten repro Audions.

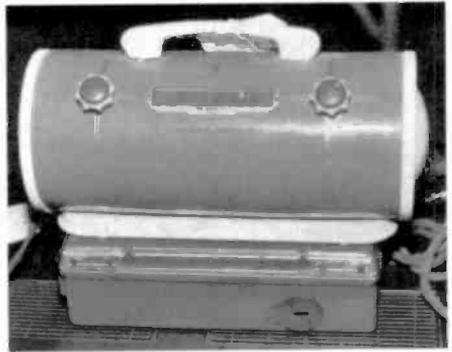

Among the Zenith items, the military URR/520 Trans-Oceanic in excellent condition was notable. Working and including the instruction manual, it sold for \$1,400. All in all, a memorable auction and one that was not to be missed.

e=excellent, vg=very good, g=good, f=fair, p=poor, unk=unknown condition, N.O.S.=new old stock, wk=working, nwk=not working, WT=with tubes, NT=no tubes, gf=good filament, BB=brass-based, TT=tipped tube, SW=shortwave, PS=power supply, PB=push buttons, WE=Western Electric. All prices have been rounded down to the dollar. Some low cost items and items in poor condition or with descriptions that are not specific have been omitted.

(Continued on following page)

**A warning:** Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

The Philips Model 2100 horn speaker that sold for \$150 sits atop a Majestic Model 300 that sold for \$550.

DeForest honeycomb coil set, on wood base ...	65
DeForest large condenser in glass case, vg, (2) .....	175, 175
DeForest plug-in coils, (6) .....	65
Duotone phonograph needles, about 50 packs of 25 each .....	95
Faradyne transmitting caps (2), N.I.B. ....	150
French loose coupler on wood base, small ...	20
GR variable cap in wood case .....	45
Hilco Type E variometer, in box .....	20
Kellogg variometer, on wood base, ca. 1921..	30

Two versions exist of the small, 9" high Amplion AR-102 horn speaker. Although both are called the "Dragonfly," only the version shown on the left includes the word "Dragonfly" on the label, and, in fact, also carries a line drawing of the insect. The version on the left, with a small "ding" on the bell sold for \$450. The other sold for \$500. Enlarged views of the tags are shown in the center.

**PAYMENT.** Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

**FAX & E-MAIL PROCEDURES/PAYMENT.** Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

**CHANGE OF ADDRESS.** Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

**SUBMISSION OF MATERIAL.** Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

**PUBLISHING RIGHTS.** Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**MAILING OF ISSUES.** U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

**ETHICS.** No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

## DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

*The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.*

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)	
	H x W (inches)	H x W (inches)	H x W (inches)	H x W (inches)
Full	7 3/4 x 4 3/4	7 3/4 x 4 3/4	7 3/4 x 4 3/4	7 3/4 x 4 3/4
1/2 II	3 5/16 x 4 3/4	3 5/16 x 4 3/4	3 5/16 x 4 3/4	3 5/16 x 4 3/4
1/2 V	7 3/4 x 2 1/4	7 3/4 x 2 1/4	7 3/4 x 2 1/4	7 3/4 x 2 1/4
1/4	3 5/16 x 2 1/4	3 5/16 x 2 1/4	3 5/16 x 2 1/4	3 5/16 x 2 1/4
1/8	1 5/8 x 2 1/4	1 5/8 x 2 1/4	1 5/8 x 2 1/4	1 5/8 x 2 1/4
Business Card (1st)	2 x 3 3/4	1 1/4 x 2 3/8	1 1/4 x 2 3/8	1 1/4 x 2 3/8
Business Card (2nd....)	2 x 3 3/4	1 1/4 x 2 3/8	1 1/4 x 2 3/8	1 1/4 x 2 3/8

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Cost for	Cost for	Cost for	Cost for	One Time to make up ad

# A.R.C. RATES & POLICIES

## CLASSIFIED ADS • DETAILS AND RATES

**ONE FREE 20-WORD AD** for subscribers in each issue; additional words are 29c each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

**Faxed & e-mailed ads: Please see additional information on opposite page.**

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: **Please write legibly.** Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike, for example 1, l and I (the number one, the capital i and the small L). Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as **WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE.** This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

**Clubs:** Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

### Classified Ad Rates per Month

**Deadline: NOON ET- 10th of the month!**

Subscribers:

First 20 words: **FREE\***  
29c per word for extra words over 20 plus  
10c per word for a shaded ad (count all words including free words).

\* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

47c per word plus  
10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

### PHOTO & DRAWING DETAILS

**Deadline: 1st of the month**  
**for all ads with drawings or photos!**

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

### Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing  
(If ad is canceled, this amount cannot in any way be refunded.)

### CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

### IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: **WANTED, FOR SALE, etc.** count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. -1am call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

**FOR SALE:** Working stereo system, pick up only, Altec Valencia speakers, Dynaco PAT5, Harman Kardon Citation 12 PA, Dynakit stereo 70 PA, Heathkit AJ1214 tuner, Sony TC228 8 track, Tandberg 64X 7 in. tape deck, Garrard SL95 phono, Sony ST-JX411 tuner, Onkyo TARW411 cassette deck, Koss 727 headphones, manuals for all. # EXTRAVAGANZA '05

Hosted by the Michigan Antique Radio Club

July 8 & 9, 2005

Holiday Inn South Convention Center  
6820 S. Cedar Street, Lansing, MI 48911  
(517) 694-8123

Come join us for our 20th Anniversary

This year we are proud to honor MICHIGAN RADIOS as we celebrate the 20th anniversary of the Michigan Antique Radio Club. We are celebrating the achievements of Arbo-phone, Jewett, Klitzen, Wolverine, Sparton, Detrola, Wilcox-Gay, Kadette, Sonora, Heathkit, VM and a host of Michigan manufacturers and broadcasters. Come and remember "The Lone Ranger", "Green Hornet", and "The Challenge of the Yukon".

## MICHIGAN RADIOS

# Estes Auctions

*Specializing in Vintage Radios  
Complete Auction & Appraisal Service*

## Radio Auction

The Steve Kenyon Collection

**Saturday, July 16, 2005 at 10 AM EDT**

at the Seville Antique Auction Barn  
8240 Wooster Pike Rd., Seville, Ohio

From I-76 Exit #2, then north on SR #3, 1 mile to the sale.

Mr. Kenyon of Aurora, Ohio specialized in European radios and has selected Estes Auctions to sell his collection at our auction. All the radios are in pristine condition, in addition he collected American-made radios from the 1930s. These will also be in the auction including a 28-tube custom-built Scott radio, lots of table radios, books, magazines, speakers, lots of radio tubes. We will combine another collection of radios from a Kentucky collector to include 1920s battery sets, horn speakers, headphones, parts, and more tubes. We will have more details in the June issue of *Antique Radio Classified*. We look forward to seeing you at the radio meets this summer.

# Price Guides from Radiomania Books By Mark V. Stein

## The Machine Age to Jet Age/Tabletop Radio Series

The continuing series of vintage radio pictorial reference and price guides. Each volume is a supplement to the others with virtually no overlap among the three. Over 10,000 vintage tabletop radios are individually described and valued.

**Volume 1:** 2,500 radios. Black and white photos. Updated with 2003 market values. Includes master index for all three volumes. 239 pages. \$29.95

**Volume 2:** 2,700 radios. Black and white photos. 16 page color insert. Updated with 2001 market values and hundreds of variations not previously included. 372 pages. \$28.95

**Volume 3:** 3,000 radios. Tube and band-count information. Black and white photos. Includes 2001 market values. 256 pages. \$29.95

**Volume 4:** 2,500 new radio listings. 1,500 new illustrations. B&W photos. 239 pages. \$29.95

## The Complete Price Guide to Antique Radios Series

### Pre-War Consoles

Identification, grading, and current market values for 3,500 models focusing on the period from 1930 through the end of pre-war production in 1942. Tube and band-count information and variations. Expanded resource section. B&W photos. 240 pages. \$29.95

### Sears Silvertone Catalogs 1930-1942

Current market values for 1,000+ radios. Original advertising, options, specs and pricing. Historical preface. Manufacturer source code table. Full model cross reference with tube and band counts, variations, cabinet materials and colors. B&W photos. 240 pages. \$34.95

**Everything stocked and shipped promptly — Radio is our middle name.**

A.R.C., P.O. Box 2, Carlisle, MA 01741 – Toll Free: (866) 371-0512

Fax: (978) 371-7129 – E-mail: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com) – Web: [www.antiqueradio.com](http://www.antiqueradio.com)

Free shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks).

Mass. residents add 5% sales tax. Non-U.S. orders, write for shipping costs, or use credit card and specify air or surface (allow 2-3 months for surface shipping). Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. Money back return policy.

Subscribers, ask for discount when placing order. 10% off books; order must be mailed to address on file.

# THANKS!

*Thanks for suggesting  
A.R.C. to your friends.*

*Did you know that nearly 20% of  
our new subscriptions come from  
referrals from subscribers?*

*So spread the word about A.R.C.!*

*Give the center coupon to a  
collector, or ask us to send a  
friend a free sample copy.*

*Help A.R.C. and  
radio collecting grow!*

# From the A.W.A.

## The Old Timer's Bulletin Back Issue Library on CD-ROM

The entire run of *The Old Timer's Bulletin* (*The OTB*) from Volume 1 through Volume 37 (1960-1996) available on two CD-ROMs. Set up for use with Acrobat Reader 4.0, each page is scanned full-size at 300 dpi resolution so pages are crisp and clear, and look very much like the originals both on the screen and when printed.

**Volume 1:** *The OTB* Vol. 1, No. 1 (Jan. 1960) through Volume 25, No. 4 (Mar. 1985). \$49.95

**Volume 2:** *The OTB* Vol. 26, No. 1 (Jun. 1985) through Volume 37, No. 4 (Nov. 1996). \$49.95

Buy the two-volume set for \$89.95

Each CD-ROM also contains a searchable index covering *The OTB* and other AWA pubs. through Feb. 2000.

Runs on both PC and Mac. A free copy of Acrobat Reader 4.0 for PC is included on each disc. Mac users may download a free copy of Acrobat Reader from Adobe at [www.Adobe.com](http://www.Adobe.com). System requirements: 486 or Pentium processor, Microsoft Windows 95 or 98, Minimum 8 MB RAM (16 MB recommended) and 10 MB available hard disk space.
