## Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has sold hundreds of this DVD-ROM publication at a break-through price. REA created the first Riders Professional CD-Series

that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we are providing a lower cost alternative to our earlier CD-ROM database driven series. Every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. A professionally produced product.

**Only \$ 199 + \$ 6 S&H (Sold only on DVD)**

*Coming Soon, The First 200 Sam's Photofact sets on a Radio Era DVD-ROM electronic publication - call for information*

### Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD) .....  
 Cunningham-Radiotron Hi-Rez CD \$ 85 .....  
 Sam's Photofact Sets 1-175 - 7 CD's, with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)  
**All 7 Sam's CD's (1-175) - \$ 495.00** .....

If A.R.C. inadvertently has infringed on a copyright, A.R.C. will pay an appropriate usage fee when notified.

POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.

Printed in U.S.A.

**PURPOSE.** Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

## STAFF:

**Publisher and Editor:** John V. Terrey  
**Assistant Publisher:** Cindie Bryan  
**Managing Editor:** Dorothy Schecter  
**Office Manager:** Pat Wedge  
**Advertising Manager:** Cindie Bryan  
**Issue Coordinator:** Pat Wedge  
**Publishing & Editorial Staff:** Ray Bintliff, Dave Crocker, Bobby Lyman  
**Founding Publisher/Editor:** Gary B. Schneider  
**Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Paul J. Bourbin, Norman Braithwaite, Dave Crocker, Dick Desjarlais, Alan Douglas, Richard Foster, Jim Kreuzer, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White, Walter Worth

**CONTACTING ANTIQUÉ RADIO CLASSIFIED.** All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.

Only UPS, FedEx, etc. items to street address: 498-A Cross Street.

Telephone: (866) 371-0512; Fax: (978) 371-7129

E-mail: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com)

Web: [www.antiqueradio.com](http://www.antiqueradio.com)

Please, no classified ads by telephone, thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

## EDITOR'S COMMENTS

June 2005 marks another anniversary for A.R.C. This time it's Number 21 — a step into our third decade and a good time to reflect on past accomplishments. Tops on the list is the feat of turning out over 250 monthly issues (this is the 251st) on time, and covering numerous subjects related to radio.

Those subjects range from Telegraph to TV, Marconi to MP3s, Hertz to Hi-fi, Tubes to Transistors — some the usual and expected, some the unusual and unexpected, and some a little of both. In this issue, for example, Dave Crocker's lead article on Powel Crosley, a familiar radio manufacturer, would fit the "usual and expected" category, except that it has a different twist.

Dave's focus is not on products but on Crosley's salesmanship; that is, his ability to take what was often a bargain brand and market it in eye-catching ways. He encouraged dealers to move the product along through flamboyant gestures like airplane deliveries or flashy electric signs like the one on our cover. We appreciate Dave's reminder that, in his time, Crosley knew the advertising game as well as any Madison Avenue salesman of today.

For those of you whose collecting concentrates on the early days of radio, Andrew Hayden's article on KLH might be unexpected. But now, hi-fi has become very collectible. Like Crosley, KLH products were compact and a less expensive alternative to the larger hi-fi systems that became the rage in the 1960s. Both companies offered quality products at reasonable prices.

The subject of Richard Arnold's article — a Montgomery Ward Airline 5-tube, AC set — is not unusual. However, it too has a different angle in that some collectors see an American Indian head outlined on the grille, and some do not.

There's no argument about whether or not Frank Moore's hay radio sculpture is unusual. One of over forty "works of art" made of hay displayed along 23 miles of a Montana highway, this is truly a unique way of spreading the word about the importance and the fun of radio collecting. Next baling season, we should all head for the Montana "What the Hay Contest."

*Photo Review* items range from large — a Patterson console, to small — a Swedish crystal set with a coil serving as a base. Of note also is the unusual

## PRINTED WITHOUT COMMENT

We continue to receive reports from advertisers of e-mail responses to their classified ads proposing to pay them with a check, sometimes via a third party, in excess of the purchase price. The seller is asked to refund the difference by wire. In more than one case reported to A.R.C., the check received was "bad."

To minimize problems, we always suggest that you know whom you are dealing with or ask for references.

Atwater Kent 3925, sometimes called the Model 1.

We're happy to report that there are other commercial auction houses featuring radios, in addition to Estes Auctions. Thanks to Ron Ramirez, we have a report on the auction held by Eric's Auction Barn on Halloween 2004. Though the highlight was an Atwater Kent breadboard selling at \$700, this auction also offered a wide assortment of battery sets, cathedrals, and consoles in good condition.

A report on the annual Harris radio auction will be forthcoming, as will reports on the continuing activity at Estes Auctions.

As A.R.C. articles go, the subject of Bill McKewen's "The Coloradapter" ranks among the unexpected. First, television is not a regular topic in A.R.C., and second, the Coloradapter, like the Col-R-Tel described in previous A.R.C. articles, could be mistaken for a CBS colorwheel unit. Again, it's a pleasure to find that folks with a strong interest in TV also read our magazine closely.

Volume 17 of the *AWA Review* is reviewed in detail, thanks to Geoff Shearer. AWA deserves kudos for keeping this excellent publication of extended articles going.

In *Radio Miscellanea*, Ron Lawrence's letter hits on the theme of the unexpected: an MP3 player on the April cover of an antique radio magazine. This seemed a stretch to him. And like the Zenith model years discussion, also in the April issue, Andrew Hayden makes us aware of confusion about Majestic model numbers — Is it a Model 300 or 307?

**A.R.C. Benefits.** Continue to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; the Web at [www.antiqueradio.com](http://www.antiqueradio.com); books shipped free in the U. S. by USPS media mail; and for current subscribers, a 10 percent discount on all book orders.

**Coming Radio Events.** Good weather means more action on the radio front. Among the seven swap meets listed for June are two multiday events — RadioActivity in Maryland and Radiorama in Ohio. Two auctions and 29 meetings are also listed, so be sure to get to as many events as possible in your area.

Happy Collecting!

John V. Terrey, Editor

## ON THE COVER

Our cover photo is of a colorful 1931 Crosley electric display sign from Dave Crocker's collection of Crosley treasures. Dave is an A.R.C. staff member and author of our lead article on Powel Crosley's salesmanship. The bright colors on the sign, against a black background were eye-catching enough to make dealers of the day willing to invest three dollars in Crosley's sales pitch. The photo was taken by Editor John Terrey.

# RADIO MANUFACTURERS

## Powel Crosley Super Salesman

BY DAVE CROCKER

*Powel Crosley, Jr., and his radios have been the subject of several articles by Dave Crocker. In this article, Dave provides information about Crosley's marketing skills and his use of advertising. (Editor)*

Although Powel Crosley, Jr., may not have known just what was going on inside his radios, he sure knew how to sell them! Powel had no extensive engineering background, but his career before the radio boom of 1920 was in sales. The multitude of products sold with the Crosley name were not invented by Powel; however, either he bought out their patents or he hired the inventor/engineer to develop and later market them. Powel had the ability to know what would be profitable and what to pass over.

Powel was good to his distributors and dealers. He was a true believer in the slogan: "Advertise, Advertise, Advertise." He took every opportuni-

Figure 1. Front view of the electric display sign which could be purchased from the sign's manufacturer in Springfield, Ohio.

Figure 2. Rear view of the electric display sign which is tin, painted in a black "wrinkle" finish.

ty to expose the Crosley name to the public, including delivering radios to his dealers by airplane for photo-ops, sponsoring sporting events with teams having the Crosley name on their uniforms, bathing beauty contests crowning "Miss Crosley," and offering his dealers a wide variety of display items for their stores. Of course, the store owners loved it, as it made them feel connected to the manufacturer.

Each month the dealers' newsletter, called *The Crosley Broadcaster*, would show static and electrical eye-catchers they could purchase at very reasonable prices. These displays would certainly dress up the stores, and they included selling aids for (besides radios), washing machines, ironers, refrigerators, household appliances, etc., etc. Anything sold by Crosley.

One particularly colorful item was the "87 Stations In One Night" electric display sign, shown in Figures 1 and 2. It appeared as a selection in the September 1931 issue of *The Crosley Broadcaster* and was available to the dealers for just \$3.00!

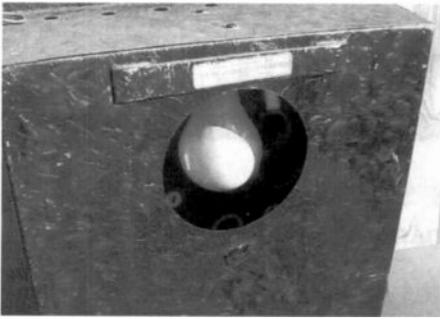

Figure 3. Back of the display sign with the access panel removed for replacing the bulb.

Figure 4. One of the top corner rings for hanging the electric sign in the store window.

This display consisted of a reverse painted glass in yellow, red, and silver on a black background, in a 15" square wooden frame. This is attached to a metal (tin) housing, inside of which is the light bulb for illumination. A rear view of the sign showing the exposed light bulb is provided in Figure 3. On both of the top, front corners are metal rings to hang this sign in a store window, as Figure 4 shows. However, it could also stand alone on its own on a shelf.

It is a truly colorful dealer display, which is simply beautiful when lit. The "87" and "In One Night" are in yellow; the "Stations" is in green; "Crosley Radio" is in red; and "You're THERE With a Crosley" is in clear with everything outlined in silver. The remainder of the glass is in black.

This display piece, as well as the similar "Moto-Iron" display unit (shown on the same Crosley Broadcaster page, Figure 5), was manufactured by the McSavane Corporation of Springfield, Ohio. The rest of the display items were F.O.B. Cincinnati, Ohio.

# WITH THE COLLECTORS

## KLH Raises the Bar

BY ANDREW HAYDEN

*A KLH product, the Model Eight, was the subject of an article by Chris Jones in the November 2002 issue of A.R.C. Here Andrew Hayden describes other KLH products, and the many accomplishments of the fertile mind of Henry Kloss. (Editor)*

By the late 1950s there were ever expanding choices if one was looking for a table radio, anything from a small plastic AM model in a vibrant color to a hefty Zenith or RCA AM/FM, with many sizes and quality levels in between. Most had stylized cabinets, having a delta-wing shape, chrome trim, etc. The upper-end models did perform well, with eight or nine tubes and large speakers enabling them to fill a room with sound. The drawback — they were bulky, being at least as big as a breadbox, and weighing 15 to 25 lbs.

By 1960 something different had come along. In 1957, a colorful character named Henry Kloss (pronounced Close) started his company, KLH, in Cambridge Mass. In the early 1950s while in the Army, he had been an electronics instructor at the Signal Corps School in New Jersey, and he also attended MIT. He then became a partner at Acoustic Research, which he had cofounded. There he played a major role in inventing and patenting the acoustic suspension loudspeaker (a speaker in an airtight enclosure), which today is considered one of the most important developments in speaker history. He proceeded to build a diverse line of highly rated hi-fi speakers.

### KLH MODEL EIGHT

Kloss's first radio was the Model Eight (model numbers were always spelled out by KLH), shown in Figure 1. Introduced in 1960, it was a hand-wired, 7-tube chassis, FM-only receiver. It had a highly selective and sensitive tuner, using a concentric planetary dial and tuning knob for precise tuning. One of the problems with FM in those days was drift. Model Eights had a 2-hour recording and chart made to measure drift. This was done on every set produced before it was sold!

The speaker employed the acoustic suspension technology, and to my knowledge, this was the only tube radio to use this type of speaker. It had two 4" long throw drivers with very large magnets. Each unit is only 11" x 6" x 6". The cabinet was made of solid walnut, though later examples were plywood with wal-

Figure 1. The KLH Model Eight mono-FM receiver and its speaker.

nut veneer to save costs. The Model Eight had a no frills, minimalist styling, with a form-follows-function concept, and looked like something one might find in a communications lab or radio station. Its performance surpassed any table radio of the day, with the exception of a \$250 Grundig or Telefunken from Germany.

Many considered the Model Eight to be the world's first mini hi-fi. Model Eights produce crisp clear sound with impressive bass response for such a small speaker. When Kloss was confronted about the \$159 selling price, he was heard to say, "It's a lot of money for a radio... but it's a lot of radio for the money!"

The Model Eight was monophonic, but shortly after the FCC authorized FM stereo broadcasting to begin on June 1, 1961, KLH introduced a solid-state, multiplex-stereo adapter unit, the Model Thirteen, which had auxiliary and phono inputs. The Model Thirteen and its associated speaker are shown in Figure 2. Add one more speaker, and you had full stereo sound. With fewer than 2,000 having been produced, this Model Thirteen adapter is a very hard item to find today.

KLH relied heavily on vertical integration, making most components in-house — transformers, knobs, chassis, speaker frames. The company even wound voice coils and made its

Figure 2. The KLH Model Thirteen, a multiplex-stereo adapter, and its associated speaker.

own paper for speaker cones! One of the first things KLH did in 1957 was to set up a paper-making laboratory, experimenting with leather, cotton and wool fibers, which is why KLH speakers are an orange-brown color. Needless to say, these Model Eights were very nicely put together.

Production lasted four years and was fairly limited with only about 12,000 being made. Note that the majority of these had black knobs and tuning dials; a limited number had white knobs and dial to match the adapter unit.

A stereo version of the Eight was briefly considered, but Kloss felt that stereo broadcasting and decoders were imperfect at that time. Since stereo LP records were widely available by the early 1960s, KLH put its resources into the radio/phonograph systems most of us remember so well. They too were an excellent product.

#### 1964 TO TODAY

In 1964 Singer Co. of sewing machine fame

purchased KLH, but Kloss stayed in charge of product development through 1967. Singer merely allowed widespread distribution. Sales doubled and then tripled during this period of time.

Following the Model Eight and the Model Thirteen, KLH's next radio was the solid-state Model Twenty One of 1965, shown with its speaker in Figure 3. This time a single speaker was enclosed in a sealed radio cabinet. A KLH extension speaker with one 4" driver could be used by itself or in conjunction with the radio. Once again, the sound is fantastically good, and sales went way up, with over 100,000 being sold.

By the late 1960s, Henry Kloss had left KLH, going on to start Advent in 1967 and in the 1980s, Cambridge Soundworks. Sadly, in the 1970s KLH suffered the fate of so many great American electronics companies by shifting its production overseas, eventually being sold to an Asian firm. Today the KLH label is placed on rather generic home audio equipment.

There is now a serious crowd of KLH collectors who pay in the \$250 range for a Model Eight, though I've noticed even higher prices recently. And as for the rare Model Thirteen adapter, it sells for \$500 plus, but it's not often you see one offered for sale. A Model Twenty One can turn up at yard sales or flea markets because quite a few were made. Internet prices are in the \$100 range. Recently, an extension speaker for a Model Twenty One, which was new in its original box, sold for \$141. Not too many years ago, these would have been unheard of prices.

#### THE KLOSS RECORD

Henry Kloss is credited with several inventions. The first transistorized high fidelity portable phonograph, the KLH Model Eleven (suitcase), was introduced in 1960. The KLH Model Forty reel-to-reel tape player was the first consumer product with Dolby noise reduction. Later Kloss made the world's first large screen color projection TV. His last project before his death in January 2002 was the Tivoli Audio table radio, which is visually very reminiscent of the KLH models but is technically a modern

*(Continued on following page)*

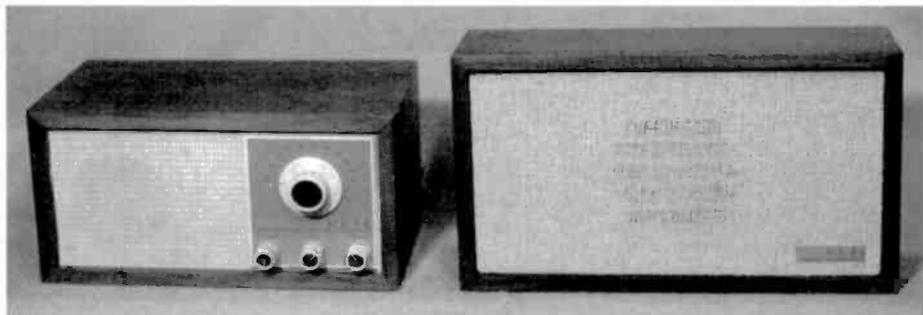

Figure 3. The KLH Model Twenty One and its speaker.

(KLH, continued)

product. These are currently available, and they even have wooden cabinets!

Kloss was honored with an Emmy award, and was inducted into the Audio Hall of Fame and the Consumer Electronics Hall of Fame for his work. The legacy of KLH is one of the more interesting stories of the New England-made radios, phonographs and speakers. The Models Eight and Twenty One were very innovative and set the industry standard for the high quality table radios which became so popular in the 1970s and 1980s. In the words of the man himself, "I just wanted to bring great products to the public for a fair price."

## Making Radio with Hay

FROM INFORMATION CONTRIBUTED BY FRANK MOORE

*New forms of entertainment are always cropping up — in this case literally. A crop, namely hay, is used to create sculpture for entry in a contest. Thanks to Frank Moore, radio became part of the local fun. (Editor)*

What do farm families do in the Utica, Montana, area for fun in the haying season? Well, they join in the "What the Hay Contest" now in its fifteenth year. What started as a joke between two neighbors in 1989 has become the "Event of the Year," according to the State Department of Tourism.

Sponsored by the Utica Rod and Gun Club, the contest has just one rule — only hay may be used in creating a work of art as a contest entry. Sculpture is the primary mode of expression, and for roughly two weeks, weather permitting, the creations are displayed along the 23 miles of Highway 238/23 running through the towns of Hobson, Utica, and Windham.

Part of the fun is that some farmers make

their sculptures in secret and then place them along the road at dawn.

Frank Moore's radio made of hay, shown below, has two large knobs, also made of hay, labeled "Volume" and "Tuning." An escutcheon "Hay-dee-ho!" and a label "The Adventures of Lone R-hay-ner!" are above the long AM/FM dial. A roadside sign reads "KHAY Radio Utica."

Among the other 41 entries in the most recent contest were cartoon characters like "Ton-Hay the Tiger" or "Tweet-Hay the Bird" and historic characters like "The Great Sp-hay-nx." About 4,500 people from far and wide cast their ballots for the People's Choice winner, and three judges selected the top ten. Unfortunately, Frank's radio wasn't among them, but we thank him for finding a unique way of keeping the importance of radio in the public eye.

(Frank Moore, 4623 Phillip St., Billings, MT 59101)

*KHAY Radio Utica, Frank Moore's entry in the Montana "What the Hay Contest."*

# WITH THE COLLECTORS

## Montgomery Ward Airline Model 62-425 The "Indian Head"

BY RICHARD ARNOLD

*Whether or not it's a "mundane radio" hyped by a fancy nickname, the important thing about Richard Arnold's Airline set is that it gives pleasure to its owner as "a nice looking wooden set from the 1930s." This simple appeal should be the bottom line for all collectors. (Editor)*

The subheading of this article obviously stretches a point with the "Indian Head" reference to the shape of the speaker grille cutout. It vaguely resembles an Indian head, facing to the left, with the headdress of feathers a large nose and jutting chin. Some can see it that way while others cannot. I guess it is all in the eye of the beholder. That being said, somewhere along the line this nickname has been given to this radio. Though not generally known, the name is one a number of collectors, including me, recall hearing over the years.

### CATALOG AD DESCRIPTION

Indian Head or not, the Airline Model 62-425 is a nice, wooden, 1937, AC set made for Montgomery Ward by Belmont. You will no doubt notice that the set uses two of the Philco rosette style knobs. These are original knobs. I have a 1933 Belmont Model 777 in my collection that has these knobs on it also.

Thanks to Dr. Steve Kissinger of Thousand Oaks, California, I am able to quote here some from a 1937 Montgomery Ward spring and summer catalog ad that he sent to me:

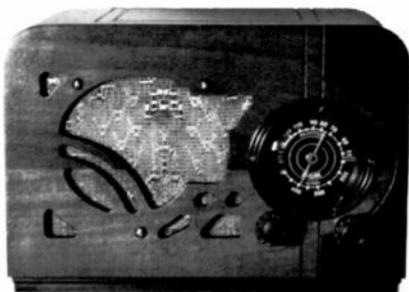

"60,000 users say — Greatest Radio Buy Ever... Ask any of these enthusiastic owners. They'll tell you, 'It's sure a great little radio, I couldn't buy a better set for \$20.00... Doesn't have that tinny tone of most small radios.'"

"Here are five reasons why this is \$20 worth of quality in tone, power and beauty:

1. The set has the latest superheterodyne circuit not found on other sets at this low price. It makes full use of the patents from the famous RCA and Hazeltine Laboratories, listed by Underwriters' Lab, Inc.
2. Its lighted full vision airplane dial is accurate and easy to use. The kilocycle scale covers the regular broadcast band of from 535 to 1720 Kc
3. It has automatic volume control — no fading.
4. It has a full-size, 5-inch Dynamic speaker.
5. The beautiful veneer wood cabinet is 7" x 10" x 5"."

The Model 62-425 is a 5-tube superhet AC radio that uses the following tube types: a 6A7 oscillator and 1st detector, a 78 IF amp, a 75 2nd detector and AVC, a 41 output, and either a 5Z4 or a 5Y3 full-wave rectifier. This radio still has some of the Montgomery Ward tubes in it. It also uses a 6-8v bayonet pilot light bulb. The IF is 465 Kc.

The cabinet has some engraved lines around the

dial scale area that gives the radio the very popular Art Deco look. Along with the Philco Bakelite rosette knobs, there is a very nicely decorated round Bakelite dial scale escutcheon.

### VALUE THEN AND NOW

This model originally sold for \$9.45 in a walnut finish and for \$10.45 in an antique ivory finish, complete with Super Airline tubes and instructions. The shipping weight was 10 pounds. Recent eBay prices were \$56, \$83.01 and \$111.15.

While discussing this radio with other collectors on the Antique Radio Forum in order to get their input on the Indian Head idea, I heard a collector say that one should not "invent names to hype mundane radios." That made me wonder what would have happened if this set had been the one sitting on that table in the Walton television series, instead of that old Zenith? I suppose it might now be called the Walton Indian Head radio and be worth in excess of \$1,500!

Well, I guess we will never know the answer to that question. However, other than being just a curiosity or a conversation piece, this set is a nice looking wooden radio from the 1930s, and it looks pretty good up there on the shelf.

*Richard Arnold, a frequent contributor to A.R.C., has been collecting since 1985. His interest is primarily in cathedrals and 1920s battery sets, and his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. His prize is the 1932 Jackson Bell Peter Pan featured in the June 1991 A.R.C.*

## PHOTO REVIEW

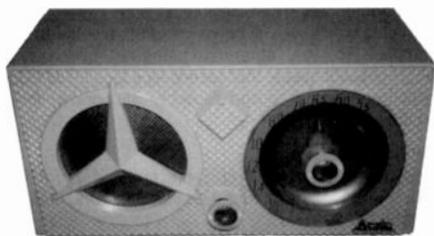

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

**SILVERTONE MODEL 724** – This 6-tube set was sold in 1939 by Sears Roebuck Co. The lift top reveals a 78 rpm phonograph. (Carl D. Sutton – Ironton, OH)

**SPLITDORF CONETONE** – This elliptical paper cone was manufactured in 1927 by the Splitdorf Radio Corporation of Newark, New Jersey. It was offered as a companion speaker to the Splitdorf Abbey radio. It has a wooden back and sits atop a papier-mâché stand that swivels. It stands 26" tall and 22" wide. (Ross Mason – Mason City, IA)

**ARVIN 855T** – This is an attractive, small 1955 tabletop radio. The grille is especially interesting with its "Mercedes" type logo. Also, it has a very smooth and precise tuning mechanism. (Paul Check, Lodi, NJ)

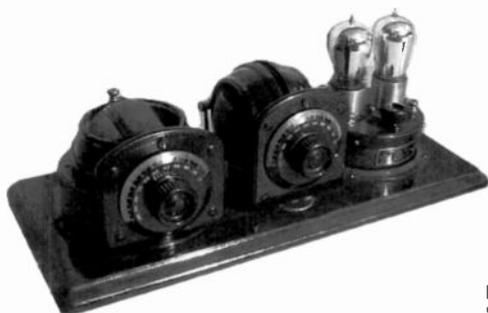

**KADETT MODEL 87** – This 6-tube set, plus ballast, was manufactured in 1936 by the International Radio Corp. of Ann Arbor, Michigan. It tunes broadcast and shortwave bands. (Ray Chase – Plainfield, NJ)

---

## PHOTO REVIEW

---

**ATWATER KENT TYPE 3925** – This 1925 breadboard receiver is sometimes called the Model 1, for it was the first of this type of Atwater Kent board receivers. On the left is a coupled circuit tuner; in the middle, (installed only by the local dealer), is a variometer to make it regenerative; at right is a 2-tube TA unit, all mounted on a mahogany board. This set sold for \$32, without the variometer, and \$42 complete, without tubes. (*Dave Crocker – Mashpee, MA*)

---

**MOTALAREN** – This crystal set was made in Sweden. It is an outstanding design built in a coil and using a plug in-detector, which was also made by a Swedish company called EKA. (*Erwin Macho - Vienna, Austria*)

---

**ATWATER KENT MODEL 82** – This Gothic cathedral was manufactured in 1931. It is a 7-tube, AC-operated, superheterodyne radio and is one of the many 80 and 90 Series radios Atwater Kent manufactured in 1931 and 1932. The Model 82-D was a DC version, while the Model 82-Q was a battery (or farm) receiver. (*Dave Crocker – Mashpee, MA*)

---

**PATTERSON, MODEL UNKNOWN** – This 17-tube, 4-band console, was manufactured by the Patterson Electric Co., ca. 1934. Patterson was more widely known for military and Amateur receivers. The set was advertised in our local newspaper as a "1920s, floor model transistor radio in very good condition." I was glad to relieve the owner of what he called, "this old thing." (*Carl D. Sutton – Ironton, OH*)

# AUCTION REPORT

## Eric's 14th Annual Antique Radio Auction Olney, Illinois — October 31, 2004

REPORTED BY RON RAMIREZ

Eric's Auction held its fourteenth annual antique radio auction on Halloween 2004, at Eric's Auction Barn in Olney, Illinois. The annual event, which draws collectors from many surrounding states, had a very good selection of items. The quality seemed to be mostly higher than the previous year; however, prices seemed to be lower. This might have been due to the uncertainty of the upcoming Presidential election, which at the time was only a couple of weeks away; I observed that auction prices on eBay seemed to be down during the same time, but they picked back up after the election.

The unquestioned highlight of this year's auction was an Atwater Kent Model 10 breadboard which brought \$700. A Majestic G-G-H horn speaker with celluloid horn fetched \$425, and a Grebe CR-9 with no tubes brought \$240. Zenith black dial sets, which usually command premium prices, went relatively cheap; as an example, a Zenith Model 9S367 shutter-dial console, which did need work to the shutter-dial mechanism, sold for only \$120.

Most items listed below are in good condition unless otherwise noted. As usual, model numbers were not called out during the sale, so it was not always possible to record every item. Prices have been rounded to the nearest dollar.

vg=very good, g=good, f=fair, p=poor, WT=with tubes, NT=no tubes, wk=works, unk=unknown model number

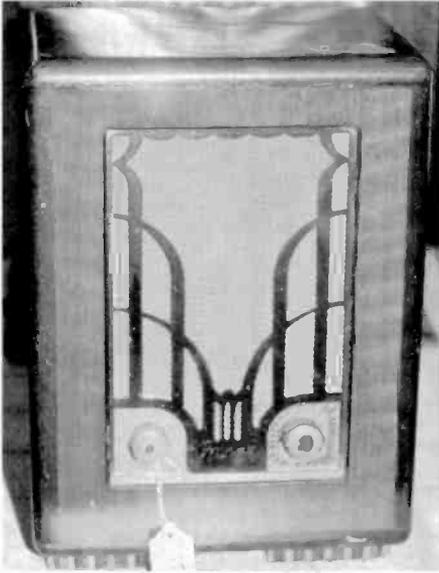

One of auctioneer Eric Bruner's helpers displays a 1938 Zenith 5S218 cube. It sold for \$140.

An uncommon brand name, this Northome Model VI 2-dialer battery set sold for \$60 with tubes.

**A warning:** Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

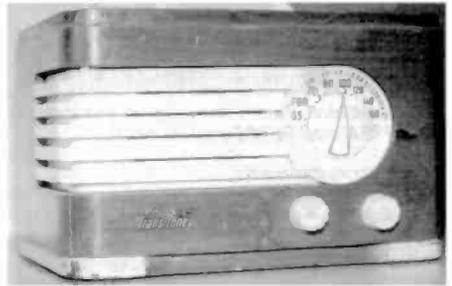

This 1934 Grunow Model 450 tombstone with a chrome grille brought \$70 in the auction.

This Grunow tombstone with a chrome grille is listed as a Model 4A, but may be a Model 500. It sold for \$85.

(Ron Ramirez, 2512 N. Heidelberg Ave., Evansville, IN 47711. 812-425-8827. E-mail: mrphilco@philcoradio.com. Eric's Auction Barn, 1000 Southwest, Olney, IL 62450. martinwm@brick.net)

# VINTAGE TELEVISION

## The Coloradapter

BY BILL MCKEOWN

*The Col-R-Tel converter became a topic of discussion in both the April and August 2004 issues of A.R.C. Here Bill McKeown adds to the story with yet another such converter. (Editor)*

In the August 2004 issue of A.R.C., I read with great interest the comments by Loren P. Ashworth and James O'Neal, relative to the "Col-R-Tel" converter. It brings back fond memories of my experience during the 1950s with another such converter, known as the "Coloradapter."

This converter was advertised in *Radio and Electronics* and was offered in various stages of completion, from "plans-only" to a system ready to connect to a TV set. I elected to purchase only a set of plans and a much-abbreviated kit that included only the key elements — all of the inductors and capacitors for a 3-stage phase shift network, a 3579.545 Kc crystal, a 1.4 microsecond delay line and some sheets of gelatin color filter material. The crystal was (and still is) mounted and sealed inside a 7-pin miniature vacuum tube envelope the size of a 6AL5.

### THE DESIGN

The cleverly designed Coloradapter scheme uses vertical sync to electronically switch three color reference signals into a single color demodulator. The NTSC color burst is gated into a 3.58 Mc crystal, using the crystal as a "flywheel" (I think of it as a repetitively rerung bell). The crystal gets resync'd (rerung) once for each horizontal line. The crystal provides an essentially continuous signal for each TV horizontal scan line because its decay is very slow, relatively.

This continuous signal, phase-locked to the color burst, feeds into a 3-stage phase shift network. A 3-position electronic switch sequentially takes a signal from each of three taps on the network, the switch output providing a different reference phase signal for the single demodulator, one for each color. In this way the NTSC signal is converted to a field-sequential color signal applied to the picture tube as the Chrominance signal. The delay line makes the Luminance signal match time-wise with the color signal.

The color filter wheel has two complete sets of red-blue-green color filters. A signal from a magnetic pickup on the wheel shaft is used, with a phase detector, to phase-lock the color wheel to the vertical sync.

### MAKING THE SYSTEM WORK

Starting in 1956, I worked on getting the sys-

tem to work. I built my chassis from scratch from their schematic diagram. However, there were a number of problems with the kit design. First, the instructions called for electrolytic capacitors to bypass screen-grid voltages, resulting in parasitic oscillations. Bypassing the electrolytic caps with ceramic caps cured that problem.

Second, when I installed the delay line in the TV video signal the way they suggested, there were really bad ghosts caused by signal reflections from unmatched termination impedances. I had to install a cathode-follower amplifier circuit in the TV to create source and load impedances that matched the delay line characteristic-impedance. This totally cured the problem.

The first TV I "converted" was an old 1950 Philco 12-inch set. My color wheel was 36 inches in diameter, made from two sheets of 1/8-inch Plexiglas. It was pretty heavy, and I had to add a stabilization network and redesign the servo electronics that slaves the wheel drive to the vertical sync. A control reactor, in my configuration, controls a large AC shaded-pole motor.

After working long and hard to get it all basically going, I found that the picture performance was mediocre, at best. The Philco did not lend itself to being realigned so as to stretch the IF bandwidth out as near as possible to 4 Mc, and so it never worked very well. There wasn't much color TV being broadcast in those days.

In 1958 I changed the Philco TV to a 14-inch Zenith TV. There was still not much color broadcast on the air. Without its cabinet, the 36-inch diameter wheel was big enough to cover the Zenith 14-incher's screen. This set lent itself to realignment, stretching the IF bandwidth to about 3.9 Mc. What a difference!

### SYSTEM PERFORMANCE

This system produced very good color pictures (mostly from Bonanza and Kraft Dinner Theater). The quality of the color was much better than any commercial TV because the gelatin color filters created a very natural red, whereas the color phosphors in color TV tubes produced a red-orange (this was true until the rare-earth phosphors were developed).

My family watched this color set until about 1963. There are three notable properties of this system. First, the total color field is updated 20 times per second, instead of 60. This results in somewhat objectionable flicker, especially for yellow objects, because of the way the human eye works.

Second, picture objects moving rapidly across

the screen leave a rainbow "trail" from the two previous colors. This is not too objectionable. Third, when a station switches from local to network programs, their two vertical synch signals are not locked, so the colors are all wrong until the wheel servo can resync to the new source. This is more of an idiosyncrasy of the system and not too bothersome when you are watching a program that has few switches to and from the station network.

In recent years, one of my fellow radio club members, Bob Olinger, wanted to recreate a color-wheel TV, so I sold my Coloradapter chassis and drive motor to Bob. My color wheel was long-gone. Bob and his brother put the chassis to work once more, using a restored RCA 630TS as the TV set and building a new wheel. They were successful in this endeavor and put their set on working display at one of our VRPS annual conventions. Many attendees were mys-

tified when they looked behind the color wheel and saw a black-and-white picture on the ancient TV!

I have never heard of anyone else that built a working Colordapter system, but surely there must have been others?

*Bill McKeown, 1401 Woodridge Circle, Euless, TX 76040. E-mail: wilmac@flash.net*

*Bill McKeown is interested in both radio and TV, as well as clocks, watches, music boxes, music machines, projectors and player pianos. His interest in radio goes back to the 1950s when an aunt gave him a Zenith 5S119 that he still uses in his workshop. His collection includes crystal, battery, early AC, Bakelite, and early transistor sets. He has a few TVs, including a Motorola 8-inch electrostatic-deflection set that works and looks as-new.*

## The AWA Review Volume 17

REVIEWED BY GEOFF SHEARER

Once again *AWA Review* Editor Brian Belanger asked me to take a look at this year's *AWA Review* and provide commentary. I always look at these challenges with mixed feelings. This year's *Review* is 214 pages long, and along with my daytime job, it requires a great deal of time to get through the material and understand it sufficiently to make intelligent comments. It became a lunchtime project.

The upside to reviewing the *Review* is that I learn new information in radio preservation that I was oblivious to before. I will break it down and provide comments to individual articles. Overall, they are well written and edited.

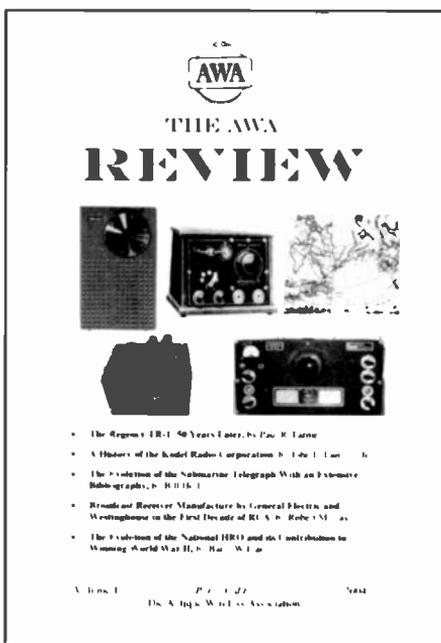

The first article is "The Regency TR-1: 50 Years Later," by my friend and club member Paul R. Farmer. The article is very well written and flows easily. It has a friendly, folksy tone to the description of the early stages of Regency production. I appreciated the brief interlude discussing the hearing aid and how it aided the

development, production, and distribution of the transistor radio. Now, I'll hold onto those two early hearing aids I have. (By the way, you can't sell them on eBay.) The first Regency sold for \$49.95 and it surprised me that the company charged much more for the hearing aids because people "needed" them and would pay the price.

Paul makes a nice tie-in with IBM and the Regency Division of IDEA and Argus Plastics. He describes the design features of the first cabinet and the fact that the radio components didn't need to produce "high fidelity" because of the "sound" of rock and roll. Maybe rock and roll wouldn't have gotten off the ground if we were still listening to Bing Crosby and the big band sound. A lot of text was devoted to the design and looks of the cabinets and the different colors they came in.

I also liked the discussion of the rebranded radios. I was unaware that the cabinet was

(AWA Review, continued)

essentially available in about four other brands. One would think they would be worth more because of the scarcity. The percentage table was a little confusing for me, but I finally deduced that we were looking at eBay offerings and comparing the various colors/companies against the total found on eBay. If you're looking for the guide to the Regency TR-1, this is it.

I would love to see a sequel to this article that researches answers to my many questions: What happened with the other cabinet design? Was there a lime opalescent cabinet made? Could shoppers buy clear-back sets or were they give-aways? Were the completely clear sets preproduction prototypes? Who made the Mike Todd book cases? Did they manufacture a chrome set or was it an after-market add on? And where did those Neiman Marcus rhinestone sets get their face-lift? There must be a remnant from those times that could answer some of those mysteries.

The next article, "A History of the Kodol Radio Corporation" by John E. Leming, Jr." had a particular interest for me. I use to own a Kodol S-1 crystal set that I bought at Renningers Extravaganza about 12 years ago. Kodol founder Clarence Ogden was a self-made man who saw and seized opportunities as they came along. When his various enterprises merged in 1925, Kodol was the second largest manufacturer of medium-priced receivers — I didn't know that!

There are a lot of other facts I was unaware of that this article presented in detail. As an example, Kodol focused on rectifiers for radios and made them well. I will not go into a lot of detail here because you need to get your *Review* and read this excellent account of Clarence Ogden and Kodol Radio yourself.

"The Evolution of the Submarine Telegraph With an Extensive Bibliography" by Bill Holly gives an account of the daunting challenge of laying cable across the Atlantic. This is an excellent source of reference on cable laying from about 1830 through the early 1900s. It is incredible the number of articles and books that have been written on the subject, and Bill Holly seems to have included every reference in his bibliography.

The only exception I took to this article was the statement that the "technology required... was almost like asking Orville and Wilbur Wright in 1903... to produce a complete space station and shuttle system." Not even close.

I would like to have read more about why some lines worked while others did not. As an example, in 1845, 12 miles of copper cable was run under the Hudson River for 12 miles in a lead pipe insulated with cotton. How did it work? In 1858, the British and the Navy made a line from Newfoundland to Ireland that ceased working after one month. Why? In 1861, the line from Malta to Alexandria was a permanent success. Why?

I thoroughly enjoyed "Broadcast Receiver Manufacture by General Electric and Westing-

house in the First Decade of RCA" by Robert Murray. Though taken from a Canadian perspective, I believe Mr. Murray's assumptions about U.S. and Canadian manufacture are correct. I have a few early RCA sets and this article provided history that I can retain with my sets.

It all began in 1919 with the Navy and GE. The article goes on to explain that American Marconi became RCA and that companies like AT&T, with its sub Western Electric, joined ranks with RCA in 1920. Westinghouse and United Fruit & Wireless Specialty Apparatus Co. joined in 1921. What do fruit and wireless have in common? One big happy family?

As a result of all this friendliness, there were political barriers that RCA had to break down, and as a result, Atwater Kent, Crosley, and Zenith got a headstart. Charts in the article specify which companies made which sets and even mention some "in between" sets like the CW-53 and CGE-93. This is an excellent article that is worth the price of the volume.

The last article, "The Evolution of the National HRO and its Contribution to Winning World War II," by Barry Williams was intriguing. I am not a communications equipment collector or aficionado of these heavy pieces of equipment, but this article sparked my interest. I'm always ready to learn, and this article is an excellent piece of education. I was getting frustrated when after 42 pages I hadn't read a word of the HRO's contribution but I was not disappointed because the following pages went into that subject.

In 1934, the HRO was designed by two teams — the mechanical part by the National group in Malden, Mass., and the electronics by the California group led by Herbert Hoover, Jr. The 20 to 1 ratio gearbox was designed by Graden Smith and was unsurpassed for 20 years. It was built to overcome deficiencies in the previous AGS model. The initial HRO (which stands for "Hell of a Rush") had a few problems — the BFO had to be reset each time the set was turned off, and the frequency vs. dial reading gave only a general indication of frequency. As a result, they had to come up with a calibration booklet.

The article covers the history of the HRO through the last HRO 600 and discusses the impact of the set on World War II operations. This set was so good, the Japanese and Germans copied the design after the war. What a tribute! So this *AWA Review* comes with five excellent articles and 200+ pages for your library and research files. Enjoy!

The *AWA Review, Volume 17*, is published by the Antique Wireless Association, which is the sole distributor. To order, send a check payable to the AWA Museum for \$19.95 to Edward M. Gable, 187 Lighthouse Rd., Hilton, NY 14468. Be sure to check shipping charges with AWA.

(Geoff Shearer, President, Mid-Atlantic Antique Radio Club (MAARC), 1400 Brookmere Dr., Centreville, VA 20120)

## RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

### 36 Manufacturers for Sears

Dear Editor:

Let me add a note to Richard Arnold's article on the Sears Silvertone Model 6050 which appeared in the May issue. As Richard points out, various companies manufactured radios for Sears. A list of 36 such companies appears on page 239 of Mark Stein's *Sears Silvertone Catalogs, 1930-1942*. The book is, of course, available from A.R.C.

Ted Hannah, Silver Spring, MD

*We appreciate the plug. [Editor]*

### Majestic Model 300 or 307?

Dear Editor:

I just wanted to send a note about a possible correction for the May issue of A.R.C. In the auction report on page 16, there's a photo of what's listed as a Majestic Model 300, which sold for \$300. I've discussed model number discrepancies with several Majestic collectors on various models of the 1920s and early 1930s. This model, of which I have one, has a chassis marked Model 300, but in all Majestic literature from 1932, it's listed as Model 307. In Stein's console book, it's also listed as Model 307. Similar model mix-ups exist with the Models 91 and 92.

Through the years, I have seen this console referred to as both Model 300 and also 307. I don't know if one can say which is the correct number, but I'm inclined to go with the Majestic literature showing it as a 307.

I'm also not sure it's worth debating, but radio collectors love detailed and correct information, so I've introduced the Majestic model number topic. I can say, without a doubt, it's a beautiful console that has fantastic sound quality.

Andrew Hayden, Newburyport, Mass.

### Was April Cover an April Fool?

Dear Editor:

I don't know if the cover of the April issue was intended as a joke or not. But to waste the cover of A.R.C. on something that's (1) not a radio and (2) not an antique! Please, let's get back on topic. There's so much great stuff out there in the antique radio world to write about.

Ron Lawrence, Matthews, NC

*The April cover was not an April Fool joke. True, about the "great stuff" but we rely on our readers to write about that "great stuff." And future collectibles are a topic for some writers. Most of us remember when AC radios, TVs, transistor radios, hi-fi equipment, computers, calculators, etc. were not considered collectibles.*

*We try to publish something for everyone, but every reader does not necessarily collect everything we write about. (Editor)*

### Dutch Boy with Horn

Dear Editor:

This is my eight-year old grandson Joppe. He carries a small Type H4 speaker, manufactured by S.G. Brown, Ltd., in 1925. It has a cast metal body with spun flare and brown enameled finish. It stands 10 1/4" high and has a 7" diameter flare. Be sure to look at Joppe's wooden shoes!

Gerard Faassen - The Netherlands

### Radio Lightning Arrester?

Dear Editor:

Enclosed is my renewal for your great publication. Keep up the great articles!

I recently purchased a 1927 Cape house, and in the living room, on the baseboard near a window was mounted a black porcelain (under layers of white paint) item (3 1/2" x 2 1/4" labeled "Fleron Sentinel Radio Lightning Arrester" with one terminal labeled "Aerial" and the other, "Ground." My question is this: How was it used and does it have a practical use with a restored radio or a modern radio? In the same nouse attic is a 1929 Majestic console Model 90/91. Thanks in advance.

Bill De Vries, Dixfield, ME

### Cover-To-Cover Reader

Dear Editor:

Thanks for your work. I enjoy each issue and get many "flashback" hours reading them cover-to-cover.

Dean Gagnon, Milton, VT

# A.R.C. RATES & POLICIES

**GUARANTEE.** You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

**PAYMENT.** Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

**FAX & E-MAIL PROCEDURES/PAYMENT.** Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

**CHANGE OF ADDRESS.** Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

**SUBMISSION OF MATERIAL.** Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

**PUBLISHING RIGHTS.** Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**MAILING OF ISSUES.** U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

**ETHICS.** No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

## DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

*The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.*

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below: see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

# A.R.C. RATES & POLICIES

## CLASSIFIED ADS • DETAILS AND RATES

**ONE FREE 20-WORD AD** for subscribers in each issue; additional words are 29c each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

**Faxed & e-mailed ads: Please see additional information on opposite page.**

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L). Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

**Clubs:** Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

### Classified Ad Rates per Month

**Deadline: NOON ET— 10th of the month!**

Subscribers:

- First 20 words: **FREE\***
- 29c per word for extra words over 20 **plus**
- 10c per word for a shaded ad (count all words including free words).
- \* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47c per word **plus**
- 10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

### PHOTO & DRAWING DETAILS

**Deadline: 1st of the month**  
for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

### Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing  
(If ad is canceled, this amount cannot always be refunded.)

### CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

### IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc. count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

# CLASSIFIED ADVERTISEMENTS

**FOR SALE:** Radio drive cable, N.I.B., 100' - \$5; Boonton Mod. meter - \$10; Dublier book capacitors, metal, dated 1920 - \$4 ea.; Mallory rotary switches (2), w/pointer knobs, 2 & 5 position - \$5 ea.; Variable tuning caps. # EXTRAVAGANZA '05

Hosted by the Michigan Antique Radio Club  
July 8 & 9, 2005

Holiday Inn South Convention Center  
6820 S. Cedar Street, Lansing, MI 48911  
(517) 694-8123

Come join us for our 20th Anniversary

This year we are proud to honor MICHIGAN RADIOS as we celebrate the 20th anniversary of the Michigan Antique Radio Club. We are celebrating the achievements of Arborphone, Jewett, Klitzen, Wolverine, Sparton, Detrola, Wilcox-Gay, Kadette, Sonora, Heathkit, VM and a host of Michigan manufacturers and broadcasters. Come and remember "The Lone Ranger", "Green Hornet", and "The Challenge of the Yukon".

## MICHIGAN RADIOS

# Estes Auctions

*Specializing in Vintage Radios  
Complete Auction & Appraisal Service*

## Radio Auction

The Steve Kenyon Collection

**Saturday, July 16, 2005 at 10 AM EDT**

at the Seville Antique Auction Barn  
8240 Wooster Pike Rd., Seville, Ohio

From I-76 Exit #2, then north on SR #3. 1 mile to the sale.

Mr. Kenyon of Aurora, Ohio specialized in European radios and has selected Estes Auctions to sell his collection at our auction. All the radios are in pristine condition, in addition he collected American-made radios from the 1930s. These will also be in the auction including a 28-tube custom-built Scott radio, lots of table radios, books, magazines, speakers, lots of radio tubes. We will combine another collection of radios from a Kentucky collector to include 1920s battery sets, horn speakers, headphones, parts, and more tubes. We will have more details in the June issue of *Antique Radio Classified*. We look forward to seeing you at the radio meets this summer.

**Richard Estes, K8LRY - Auctioneer**

# Estes Auctions

*Specializing in Vintage Radios  
Complete Auction & Appraisal Service*

## Radio Auction

**Saturday, August 20, 2005 at 10 AM EDT**

at the Seville Antique Auction Barn  
8240 Wooster Pike Rd., Seville, Ohio

From I-76 Exit #2, then north on SR #3, 1 mile to the sale.

This sale will offer the collection of a Pennsylvania collector and will include a large amount of tubes of all types. Lots of early tubes 201-301A, UV-99, UX-99, WD-11, WD-12, many others including 80, 45, 6L6, etc. A nice collection of tombstone and cathedral style radios, many battery set radios ca. '20s. All types of speakers, cone, horn type, mantle, cabinet speakers. A large amount of radio books and magazines, lots of wood and Bakelite table radios, many pieces of home brew amateur radio pieces, some complete - some partial. Nice early loose coupler, Zenith 4R receiver. Several crystal sets, floor model radios, Edison cylinder player (standard), other phonographs. This will be a very large sale. We will start selling parts, part sets, project pieces and misc. tubes and test equipment at 8:30 AM outside, then at 10 AM we will start the main auction inside. Terms: check, Visa, M/C, cash.

# Price Guides from Radiomania Books By Mark V. Stein

## The Machine Age to Jet Age/Tabletop Radio Series

**Volume 1:** 2,500 radios. Black and white photos. Updated with 2003 market values. Includes master index for all three volumes. 239 pages. \$29.95

**Volume 2:** 2,700 radios. Black and white photos. 16 page color insert. Updated with 2001 market values and hundreds of variations not previously included. 372 pages. \$28.95

**Volume 3:** 3,000 radios. Tube and band-count information. Black and white photos. Includes 2001 market values. 256 pages. \$29.95

**Volume 4:** 2,500 new radio listings. 1,500 new illustrations. B&W photos. 239 pages. \$29.95

The continuing series of vintage radio pictorial reference and price guides. Each volume is a supplement to the others with virtually no overlap among the three. Over 10,000 vintage tabletop radios are individually described and valued.

## The Complete Price Guide to Antique Radios Series

### Pre-War Consoles

Identification, grading, and current market values for 3,500 models focusing on the period from 1930 through the end of pre-war production in 1942. Tube and band-count information and variations. Expanded resource section. B&W photos. 240 pages. \$29.95

### Sears Silvertone Catalogs 1930-1942

Current market values for 1,000+ radios. Original advertising, options, specs and pricing. Historical preface. Manufacturer source code table. Full model cross reference with tube and band counts, variations, cabinet materials and colors. B&W photos. 240 pages. \$34.95

**Everything stocked and shipped promptly — Radio is our middle name.**

# Estes Auctions

*Specializing in Vintage Radios  
Complete Auction & Appraisal Service*

## Vintage Radio Auction

**Notice of a Future Auction  
to be held in September 2005**

**(The date of the sale will be announced at a later time.)**

Estes Auctions is pleased to have been selected to sell the large collection of the estate of Earl England of Los Angeles, California. The sale will be held at our Burbank, Ohio facility and will offer this superb collection for auction. This collection contains early radios, crystal sets, loose couplers, horn speakers, a nice headphone collection, many early tubes, a variety of phonographs including cylinder players, console style phonographs, disc players some with wood hoods, a large selection of radio related books and magazines. Earl was an amateur radio operator and we will also be selling his amateur radio items. There are advertising pieces and many parts to be offered. This will be a very good auction and will contain radios for every type of collector. We will bring the collection to our Ohio facility in mid-summer and will start readying it for our website. Watch for ads in *Antique Radio Classified* and at the AWA meet in Rochester, New York in August.

# From the A.W.A.

## The Old Timer's Bulletin Back Issue Library on CD-ROM

The entire run of *The Old Timer's Bulletin* (The OTB) from Volume 1 through Volume 37 (1960-1996) available on two CD-ROMs. Set up for use with Acrobat Reader 4.0, each page is scanned full-size at 300 dpi resolution so pages are crisp and clear, and look very much like the originals both on the screen and when printed.

**Volume 1:** *The OTB* Vol. 1, No. 1 (Jan. 1960) through Volume 25, No. 4 (Mar. 1985). \$49.95

**Volume 2:** *The OTB* Vol. 26, No. 1 (Jun. 1985) through Volume 37, No. 4 (Nov. 1996). \$49.95

Buy the two-volume set for \$89.95

Each CD-ROM also contains a searchable index covering *The OTB* and other AWA pubs. through Feb. 2000.

Runs on both PC and Mac. A free copy of Acrobat Reader 4.0 for PC is included on each disc. Mac users may download a free copy of Acrobat Reader from Adobe at [www.Adobe.com](http://www.Adobe.com). System requirements: 486 or Pentium processor, Microsoft Windows 95 or 98, Minimum 8 MB RAM (16 MB recommended) and 10 MB available hard disk space.
