Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of changing CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has sold hundreds of this DVD-ROM publication at a break-through price. REA created the first Riders Professional CD-Series

that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we are providing a lower cost alternative to our earlier CD-ROM database driven series. Every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. A professionally produced product.

Only \$ 199 + \$ 6 S&H (Sold only on DVD)

Coming Soon, The First 200 Sam's Photofact sets on a Radio Era DVD-ROM electronic publication - call for information

Please, no classified ads by telephone, thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

July is always the beginning of A.R.C.'s "new year." June marked our 21st anniversary, and with the 22nd year underway, it's on to doing what we do best — keeping the preservation of antique radios alive and well. To achieve that goal we continue to present in these pages what's old and what's new in the world of antique radio collecting.

As we like to remind you once in a while, we need your cooperation and support to fill those pages, and so we hope to hear from you in multiple ways — articles, photos, comments, ads, book orders, renewals — whatever you can contribute to this collaboration of collectors.

Our lead article by Gerald Schneider on the Sligh table with Philco radio is an example of the kind of collaboration needed to keep this hobby viable. First, he called upon Michael Prosis, fellow collector and coauthor with Ron Ramirez of *Philco Radio, 1928-1942* for photos and information about the Philco radio; then he sought help from the Michigan Antique Radio Club, which led him to more help from the Sligh Company; finally, he took the third step of sharing his information with A.R.C. readers.

In addition, Gerald's article shows how companies like Sligh and Philco can collaborate to make an attractive and practical product, which was unusual in its time. After all, people were used to seeing a table model sitting on top of a table. Here, the radio was inside a table that was even more remarkable because it rotated.

Speaking of the "new," we present the final installment of Richard Menta's series on collecting MP3 portables. It took only a few years for these hot new sets to become obsolete, but who knows — down the road, they may become "antique" or "vintage," and there may be folks who listen to old MP3s, just as they do to old radios.

Generally, the word "antique" means more than 100 years old; "vintage," on the other hand, may mean something from the collector's childhood, perhaps 30-40 years old and obsolete or superseded by a significantly improved product. The MP3s remind us of how fast the new can become obsolete, but, perhaps ultimately, collectible.

PRINTED WITHOUT COMMENT

We continue to receive reports from advertisers of e-mail responses to their classified ads proposing to pay them with a check, sometimes via a third party, in excess of the purchase price. The seller is asked to refund the difference by wire. In more than one case reported to A.R.C., the check received was "bad."

To minimize problems, we always suggest that you know whom you are dealing with or ask for references.

Of course, Ron Lawrence expressed a different view in his letter in last month's "Radio Miscellanea" about our wasting time and space on the likes of MP3s. However, we're delighted that Ron also champions the "antique" when it comes to sending us great reports on one of the major U.S. meets. The Carolina Chapter/AWA Conference offers a multitude of pleasures to attendees, including a flea market, seminars, a banquet, an old equipment contest and an auction. This year, Alfred Grebe, Jr., was the guest speaker, and the contest entries were exemplary, as many photos attest.

From the other side of the "pond," Erwin Macho keeps us informed about what's new on the Austrian auction stage. In the May Dorotheum auction, U.S. sets were not strong, but European models continued to bring good prices.

Photo Review features four sets from early battery and crystal set days and four later AC sets. Richard Begbie's Pandora battery set, found in Australia, illustrates how far a New York-manufactured set might travel — both literally and on its journey to antique status.

Some of you may have noticed that this month's A.R.C. seems lighter. You are correct, but the only pages pulled — to save on printing and postage costs — are our own book ads. However, the books we sell are listed on pages 64 and 65, as well as featured elsewhere, so don't hesitate to continue to send in your book orders.

A.R.C. Benefits. Continue to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; the Web, www.antiqueradio.com; books shipped free in the U. S. by USPS media mail; and for current subscribers, a 10 percent discount on all book orders.

Coming Radio Events. Easily told summer is in full swing as the events list includes 26 meetings, an Estes auction and 12 swap meets. Be sure to get out there and be part of the action.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

On our cover is the octagonal Sligh table containing a Philco Model 26 radio, the subject of Gerald Schneider's lead article. The set is owned by Michael Prosis, who took the photo after placing several Philco products on the table: left to right, a bottle of "Genuine Philco Furniture Polish;" two Philco portable A batteries; a box of Philco pilot lamps; and a Philco radio tube. The begonia plant is a decorative touch. The table is at a slight angle to show one of three cubbyholes around the edge.

WITH THE COLLECTORS

Sligh Radio Table with Philco PT-26

BY GERALD SCHNEIDER

As we know from his previous articles, Gerald Schneider and his wife Dorothy don't believe in confining their radios to a "museum room." In the following article we learn of another piece in his collection, which, like the others, is displayed and used in their home. (Editor)

I hoped for years to get this revolving-top table with built-in Philco Model PT-26 radio from my fellow radio collector friend. Readers may recall from my March 2000 A.R.C. article "Radios as Furniture" that my wife and I furnish our house with radio-furniture combinations. The attraction of this piece was that it would not have to be cleared of items and lifted for access as the more common Atwater Kent Kiel model requires. The table's wood condition was good and original, and the radio worked. Finally, when my friend moved, he sold it to me. The "radio table" or "table with radio" is shown in Figure 1.

IDENTIFYING THE TABLE

A decal on the underside of the top of the table reads, "Charles R. Sligh Company, Furniture by Sligh, Holland, Michigan." Using the Michigan Antique Radio Club's membership list (which I received at their "Extravaganza," a national radio meet), I called a collector living in Holland, Michigan. What I learned was that the Sligh Company was still in business there. From later research, I also learned that Charles Sligh, the firm's founder, is in the American Furniture Hall of Fame, as is Leo Jiranek, the designer of my bedroom set. This set includes the bed headboard with built-in Stewart-Warner ra-

Figure 1. The Philco Model PT-26 in a Charles R. Sligh Co. table. The wood is mahogany and the tabletop revolves. One of three cubbyholes can be seen on the left edge of the octagonal table.

dio mentioned in my earlier article.

A telephone call to the company was routed to a cordial employee who said she would check the company's data base to see if she could find the piece. I also sent her a photo. She found it! It was listed as "No. 91½ Radio Table" in the 1939 catalog.

"This revolving-top table is equipped with a 5-tube Philco radio installed so that the top may revolve without interfering with radio reception. All mahogany with genuine leather top," the catalog read. What could be better? The octagonal tabletop is also described as 28" x 28" and 28" high. Three of the segments in the circumference of the table are open cubbyholes; one can be seen in Figures 1 and 3.

The remaining panels in the octagon include the radio and three that are closed and simply decorative. Unfortunately, there was no record of what the

selling price had been for the piece in 1939.

IDENTIFYING THE RADIO

The radio dial (see Figure 2) was distinctive enough to identify it from a picture on page 133 in *Philco Radio 1928-1942* by Ron Ramirez with

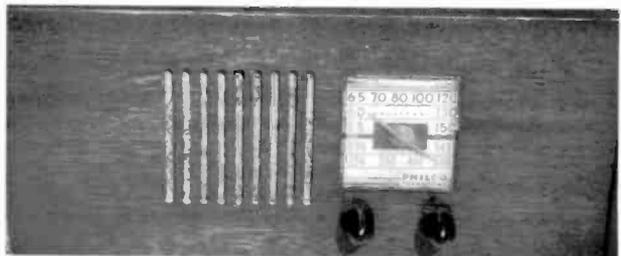

Figure 2. A close-up of the radio face.

Figure 3. Note the open shell/cubbyhole on the left.

Michael Prosize. But there is no radio-furniture combination like mine in the Ramirez/Prosize book.

I called the book's coauthor, Michael Prosize, who lives in my area. Michael had an example of this Sligh set too, but with no identifying decal like mine, and he was not sure whether it had been homemade or manufactured. I sent Ron Ramirez a photo, but he knew nothing about it. Now we all are aware that the Philco PT-26 radio table was manufactured by the Sligh Company.

The radio is an AC Philco Transitone Model PT-26 with AM broadcast band. It has five Philco octal tube types: 35A5, 35Z3, 7A8, 7B7, and 7C6. There

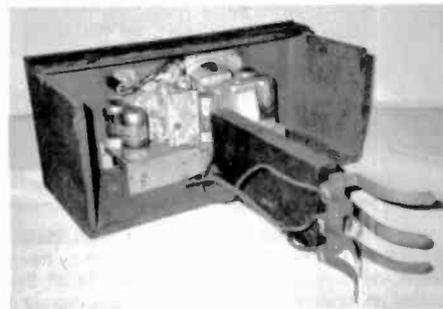

Figure 4. The three pairs of contact "fingers" are shown on the lower right in the photo above.

Ramirez, Ron with Michael Prosize. *Philco Radio, 1928-1942*. Atgen, Pa.: Schiffer Publishing, Ltd., 1993.

Sligh Company 1939 Catalog. Holland, Mich., 1939.

(Gerald Schneider, 3101 Blueford Rd., Kensington, MD 20895)

Gerald Schneider does not "stockpile" radios. Instead, he decorates his home with sets, featuring those which emphasize an oriental motif. Of note are three 1929 Crosley Gemchest radios in different colors. Almost the entire collection is tuned to WWDC-AM, which plays music of the 1940s and 1950s.

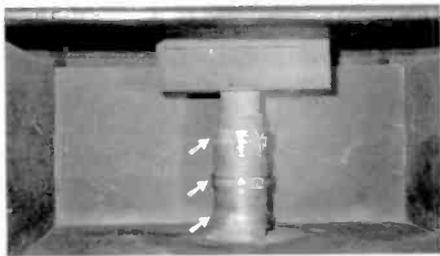

Figure 5. Arrows show the three rings against which the contacts shown in Figure 4 slide.

Figure 6. Displayed on the top of the radio/table are a few Philco products from Michael Prosize's collection. L to R: pilot lamps topped by a 500 K variable control; "Genuine Philco Furniture Polish"; a Type 26 radio tube; portable A batteries; a D-size flashlight battery; Type 46 Universal pilot lamps.

WITH THE COLLECTORS

Collecting MP3 Portables — Part 3

BY RICHARD MENTA

This is the third of Richard Menta's articles on MP3 portables. The first article appeared in the December 2004 issue, and the second in the April 2005 issue. As editor of MP3 Newswire, Richard has reviewed these sets online when new and now shares his findings with us as potential future collectibles. (Editor)

As of Christmas 2004, the Apple iPod accounted for two out of every three digital music portables sold. Christmas of 2004 also saw the emergence of dozens of "iPod Killers" from numerous makers all looking to cash in on a hot market the iPod spurred. So hot, in fact, it drew Motorola back into the consumer music device field.

But there were many players that came before the iPod, and without these groundbreaking products, the market would not be where it is. This third and final installment is a wrap-up of earlier players not covered in the first two articles.

EARLIER GROUNDBREAKING PRODUCTS

AVC Soul/D-Link DMP (1999). When I published my online review of the AVC Soul, shown in Figure 1, in December of 1999, it was the first

Figure 1. The AVC Soul/D-Link DMP, ca 1999, was the first portable to offer 128MB built-in as an option.

Figure 2. The Sensory Science MP2200, ca 2000, was considered the best MP3 player until Intel's Pocket Concert came along.

MP3 portable to offer 128MB built-in as an option. It turns out the review unit I was given may have been the only such endowed player to hit the states as most of the U.S. sales of this otherwise mediocre player came under the D-link brand without the 128MB option. It wasn't until the release of the Intel Pocket Concert that a 128MB player would be mass-produced.

Sensory Science MP2200 (2000). Sensory Science made the best MP3 players in the early digital portable days, and the MP 2200, shown in Figure 2, was their best player. Clad in a brushed aluminum body with an intuitive transfer interface, the MP2200 set a standard which held until the release of Intel's fine Pocket Concert. Sensory Science was later purchased by SonicBlue, who merged them with the best selling Rio brand the company acquired a year earlier.

Sensory Science MP2300 (2000). Sensory Science's third MP3 player, the MP2300, shown in Figure 3, utilized Iomega's then new "Clik!" technology. The tiny Clik! disks held 40MB of memory and cost only \$10 each — a tenth of what a 32MB flash memory card cost then. They provided a player that was both small and had reasonably cheap storage. Here was another so-

Figure 3. The Sensory Science MP2300, ca 2000, utilized lomega's new "Clik!" technology.

lution to the capacity/size/cost struggle with which early MP3 manufacturers had to deal. Unfortunately, Clik! didn't click with consumers, and this excellent player faded in the sunset.

lomega HipZip (2000). The HipZip, lomega's only entry into the MP3 portable market, shown in Figure 4, was developed to promote the company's Clik! technology into the digital music marketplace. Clik! was supposed to be the successor to the company's popular Zip drives, and the technology was, indeed, a jump forward in providing low cost storage for digital music portables. Unfortunately, the HipZip and Sensory Science's MP2300 failed to draw enough buyers to entice other manufacturers to support the format.

Sony Memory Stick Walkman (2000). A good player with a critical flaw, the Memory Stick Walkman, shown in Figure 5, was not an MP3 player. Instead, it played only songs compressed in So-

Figure 4. The lomega HipZip from 2000 failed to promote the company's "Clik!" technology into the digital music marketplace.

Figure 5. The Sony Stick Walkman from 2000 had the fatal flaw of playing only songs compressed in Sony's ATRAC3 format, instead of the widely used MP3 codec format.

ny's competing ATRAC3 format, a trait shared by all of Sony's digital music players. That trait turned out to be fatal, as buyers bypassed the brand for others that could play their music in the MP3 codec in which their digital collections were already formatted. Expect all early Sony portables to be scarce as the years go by.

Empeg Car/Rio Car (2000). Empeg Ltd. was a British electronics firm that built the first in-dash MP3 player for automobiles. Models possessed 10GB to 60GB of hard drive storage and offered a

(Continued on following page)

Figure 6. The Empeg Car/Rio Car, ca 2000, was the first in-dash MP3 player for automobiles. Despite the high prices ranging from \$1,199 to \$1,999, these sets were enormously popular.

(MP3 Portables, continued)

choice of a Blue, Green, Amber or Red display. Prices started at \$1,199.99 for the 10GB model going all the way up to \$1,999 for the 60GB model. The company was acquired by SonicBlue in October of 2000 and the unit was renamed the Rio Car. Despite the player's rabid popularity among owners, SonicBlue did little to promote the player, and it was discontinued in September of 2001. Only 4,500 players were produced between the two manufacturers. An example of the player is shown in Figure 6.

Bang & Olufsen BeoSound2 (2001) – This stainless steel B&O beauty had the unique looks and high price tag expected of the company (\$695 for a unit with 128MB of memory). The unit is shown in Figure 7. Overall, this offering from the status maker was just an average player, but it was also the most exclusive.

Apple iPod I (2001). The first incarnation of the player iPod, shown in Figure 8, appeared in late November of 2001 and was an instant holiday hit. The biggest reason was that the iPod finally solved the weight/dimension/capacity problem that faced all previous players. Thanks to the use of a brand new and tiny 1.8" Toshiba hard drive, the iPod was able to bring in a 5GB jukebox style portable at under seven ounces, half the size and weight of all other jukebox players on the market then.

The iPod also had the most simple and convenient interface yet to grace the display of a portable player. Within a year the iPod became a fashion statement for the plugged-in generation and sales exploded. Apple had built a better mousetrap and consumers showed their approval by buying. As of this writing almost seven out of ten digital music portables sold is an iPod, an amazing statistic.

Archos Jukebox Multimedia (2002). This MP3 portable by French manufacturer Archos was the first to play movie files in the MPEG-4 format. A video/audio media device, the 20GB Jukebox Multimedia, shown in Figure 9, invented a new market segment, which Archos owned unopposed for almost two years. Selling for \$400, each unit

Figure 7. Bang & Olufsen BeoSound2, ca 2001, a stainless steel beauty, had a unique look and a high price tag of \$695.

Figure 8. Apple iPod, ca 2001, solved the problems of weight, dimension, and capacity inherent in previous players.

came with a copy of the animated film *Ice Age* already loaded on its hard drive to show off its abilities. The unit also stored and displayed photographs in the JPEG format, a feature Apple added with the introduction of its iPod Photo in October of 2004.

All photos courtesy of the manufacturers.

A member of the New Jersey Antique Radio Club, Richard Menta is also the editor of MP3newswire.net. He started the Web publication in December of 1998, inspired by the success of the Rio PMP300. He has been collecting radios since 1996, most of them pre-1940 models.

Figure 9. Archos Jukebox Multimedia, ca 2002, was the first MP3 to play movie files in the MPEG-4 format.

AUCTION REPORT

Dorotheum Antique Radio Auction Vienna, Austria – May 11, 2005

CONTRIBUTED BY ERWIN MACHO

On May 11, 2005, at 2:00 P.M., the Auction-house Dorotheum in Vienna, Austria, held its biannual, combined antique radio and camera auction. The auction began with a total of 129 lots of photo equipment.

Following the camera lots, 29 radio lots were offered. The first radio set, a rare Ingelen Excelsior from 1934/35, started with an opening price of \$ 244. A few seconds later, it sold for twice that at \$488. Unfortunately, the only two American radios — a Crosley Model VI and a Crosley 51 — did not sell. However, most Austrian radios were sold both to bidders in the auction hall and to foreign collectors on the telephone from Italy and Switzerland.

Once again the top price — \$1,342 — was paid for an Ingelen Geographic with colored dial scale. This radio is an absolute must for any Austrian collector. The big disappointment was the Loewe "Botschafter," which sold at the opening price, although it was equipped with two very rare tubes — a Loewe WG 36 and a WG 35.

A Wurlitzer Model 2104 music box from 1957 brought a new record price. The box was partly incomplete, but a Vienna antique shop dealer paid \$5,490 for it. After complete restoration, he will sell the box for double the price.

Please note: All prices are rounded down to the next dollar (1 euro = \$1.22). The next Dorotheum auction will be held in November or December 2005. For more information please check the internet at www.dorotheum.com or see A.R.C.'s "Coming Radio Events."

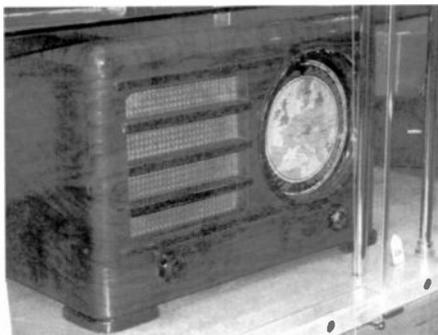

e = excellent, vg = very good, g = good, f = fair, p = poor, unk = unknown condition, wk = working.

Radios, General:

| | |
|---|-------|
| Hornlyphon Electric S4, p | \$440 |
| Ingelen Excelsior, g | 488 |
| Ingelen Geographic US-437W, g | 1,342 |
| Loewe Botschafter, vg | 220 |
| Philips Type 2531 & Philips Type 2109 speaker, e | 550 |

This Hornlyphon S4 in poor condition brought \$440.

This Ingelen Geographic sold for \$1,342

| | |
|--|-----|
| Radione GSH 4 & Radione speaker, e | 390 |
| Vindobona, g | 318 |

Gramophones and Phonographs:

| | |

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error all ways exists, and if we are notified, corrections will be reported.

PHOTO REVIEW

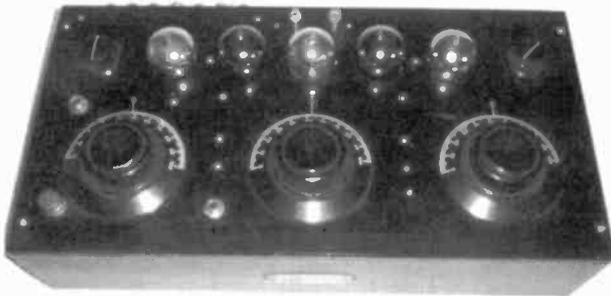

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

ZENITH MODEL 6-S128 – This rather large tombstone is a 6-tube receiver. Manufactured in 1936 by the Zenith Radio Corporation of Chicago, it receives broadcast and shortwave bands. It is another example of Zenith's "Big Black Dial" receivers. (Dave Crocker – Mashpee, MA)

CROSLY JUNIOR CRYSTAL SET – Although a reproduction, this rather simple crystal set is one of three or four sets that I know to be extant. One original set was in the vast collection of Dr. Ralph Muchow in Elgin, Illinois. I know of two other reproductions. The base of the set measures 4" in diameter and only about 1 1/8" high. The detector was made by Wireless Speciality Apparatus Co. and sold for \$4.00 in 1923. (Dave Crocker – Mashpee, MA)

PANDORA, MODEL UNKNOWN – This 5-tube TRF battery radio was made by John Lurie, Jr., of New York, even though it was found in Australia. The serial number is left blank on its oval nameplate. The cabinet is leatherette-covered wood and stands only 5 1/2" high. The battery terminals are mounted on the rear of the cabinet. Is anyone familiar with this receiver or its manufacturer? (Richard Begbie – Bungendore, Australia)

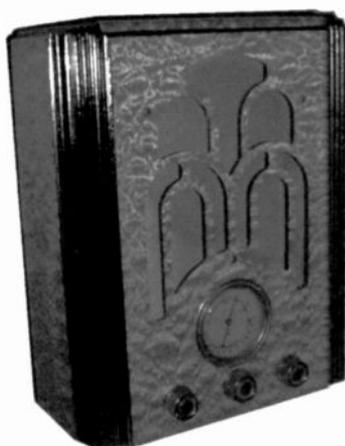

RADIOCEPTOR – This crystal receiver was manufactured by the Kansas City Radio Mfg. Co. It measures 7 1/2" x 5 1/4" x 6 1/4". It was acquired at an estate sale for \$20 because the seller believed it was a child's telegraph decoder. I agreed because next to it was a Radiola 18 selling for \$300. (Claude Chafin – Independence, MO)

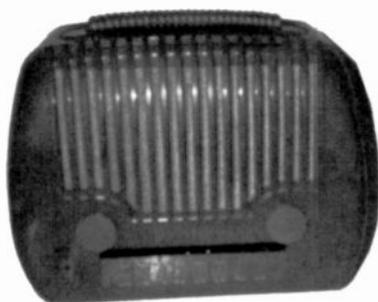

PHOTO REVIEW

ZENITH MODEL 9S263 – Housed in an unusual oval-shaped cabinet, this 1938 console uses a 9-tube shutter dial chassis with a tuning eye. The tuning range is 500 kHz to 18 MHz. *(Tom Ackerman – Germantown, IL)*

GRUNOW 545 TOMBSTONE – I gave this radio an “extreme makeover” with the application of quilted Sapele veneer over the otherwise nondescript wood on the top and sides. It looked pretty good, so I applied the veneer over the walnut on the front. A piece like this might not make the purist restorers very happy, but to me it represented a challenge in bringing back a “toasted” radio and also finding a nice place to display this unusual veneer. The radio belongs to our club president Richard Fodgers of the Southeastern Antique Radio Society. *(Mark Palmquist – Lilburn, GA)*

SENTINEL MODEL 316-P – A 1948 model, this portable radio tunes the broadcast band and can be operated using AC, DC or battery power. Manufactured by the Sentinel Radio Corporation in Evanston, Illinois, it uses four tubes and a selenium rectifier. I purchased it in a coin store. *(Louis L. D’Antuono – Brooklyn, NY)*

METEOR MODEL V3 – This 1924 receiver uses three Type UX-199 tubes. It was manufactured by the Radio Shop of Long Beach, California, and sold for \$50. It measures only 9” tall. The top cover lifts for inserting batteries for the 199 tubes. *(Dave Crocker – Mashpee, MA)*

AUCTION REPORT

Carolinas Chapter of the Antique Wireless Association 29th Annual Conference Charlotte, North Carolina— March 24-26, 2005

REPORTED BY RON LAWRENCE

March 24-26 marked another great Carolinas Chapter of the Antique Wireless Association (CC-AWA) Conference at the Sheraton Charlotte Airport Hotel. The Charlotte show has been held on the fourth weekend in March for many years now, and this was only the second time since the early 1980s that Easter fell on this weekend too. I'm sure that this conflict played a big part in the overall attendance being down a little this year. But it sure didn't put a damper on the enjoyment that everyone who did attend had.

The Program/Forum sessions on Thursday afternoon were well attended. This was the second year that we've had a special "Tube Collectors Forum," and this year, special guest host Ludwell Sibley, along with his wife, drove all the way from Oregon to be with us. Lud and Kirk Cline did a great job of talking about tube testers and testing unusual tubes. Robert Lozier showed some glass slides of early RCA tube production. Jim Oram put on a very interesting talk about German Enigma code machines and his effort to make exact reproduction parts for

Banquet speaker Alfred Grebe, Jr., left, and conference chairman Ron Lawrence, right.

them. Jim's parts are so exact they're used by the National Cryptologic Museum to keep its Enigma running.

Thursday evening we had the first part of a high quality estate auction that was consigned to us by the family of the late Larry Boyer, a retired RCA engineer. Larry, who went to work at the RCA labs in Camden, New Jersey, just after World War II, had the foresight to collect early

RCA artifacts before they were destroyed. Along with a very nice collection of mostly 1920s radios, the boxes and boxes that we found in Larry's attic were a time capsule of rare radio-related paper and catalogs, plus a lot of very rare tubes. The Thursday evening "Tube Paper & Ephemera" auction lasted four hours and netted over \$14K in sales.

Friday morning we kicked off the first Flea Market session with our now traditional "LeMans Start" where there is no buying, selling, or trading allowed before 8 A.M., and everyone has to be out of the flea market area before the 8 A.M. start.

A flea market space display of battery sets and other "treasures."

Ron Lawrence's Bristol Audiophone Senior, Audiophone Junior and Bristol one-stage amp, won second place in the speaker category.

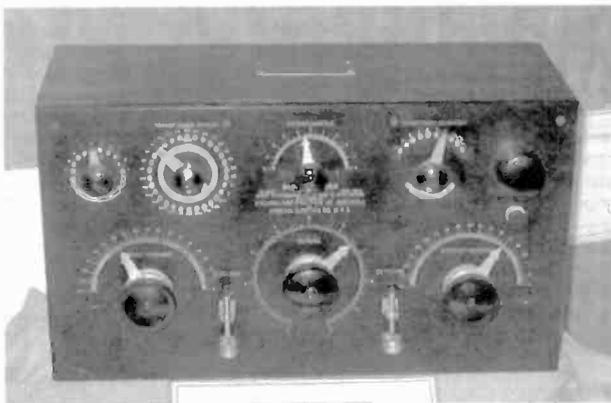

Friday afternoon was our second auction of the weekend with radios and other hardware going on the block. A couple of highlights were a one-of-a-kind engineering prototype built by GE from about 1922 with all of the original engineer's hand-written notes and drawings. Another highlight was a very rare Edison Concert 5" cylinder phonograph with both playback and record heads, its original cover, and an Edison 5" wax cylinder. There were a number of members of the phonograph-collecting community in attendance to bid on this and several other vintage machines. Total sales for the Friday afternoon auction were just over \$30K for a total of over \$44K in sales for both.

Friday evening it was time for our banquet followed by an open house to view the items entered in the Old Equipment Contest. Alfred H. Grebe, Jr., was a special guest speaker at the banquet.

Saturday morning got started early with more flea market followed by our traditional end of meet "Radio Rescue" auction which is always a good way to find that last minute bargain before heading home. The Conference wrapped up with our Saturday luncheon and Robert Lozier's contest report.

Just so you don't think all this was peaches and cream and went off without a hitch — on Wednesday afternoon, the day before the show, a group of us met at the mini-warehouse in Monroe where we had stored the Boyer estate items since August. We loaded a rented 26-foot U-Haul truck, and Robert drove it home, planning to drive it to the hotel the next morning.

Thursday morning several of us had planned to meet at the hotel early for breakfast and be there when the truck arrived. As I was walking into the hotel lobby, my cell phone rang, and the caller ID indicated it was Robert Lozier. I assumed he was calling to tell me he was leaving home with the truck. I can't repeat Robert's exact words when I answered the phone, but it was very descriptive of the current
(Continued on following page)

The auction checkout crew — Linda Barnett and Robert Lozier, two tireless workers — gladly handling the over \$44,000 results..

(CC/AWA Conference, continued)

situation as he saw it.

It seems that when he tried to start the truck that morning, the starter had jammed and was now burned up leaving us with a dead rental truck 40 miles away. Robert said he had already called U-Haul about it and was awaiting a return call from them. I asked him to call me as soon as he knew something new. I recounted the situation to the rest of the breakfast gang, and we proceeded to the hotel restaurant.

After thinking about the mess for about five minutes, I called Robert back and told him it was time to be very assertive and to call U-Haul, tell them that we had to have the truck at the hotel ASAP, and that they should send a wrecker to tow their dead truck to the Sheraton so we could unload it. The thought of having to get another truck, go to Monroe, and transfer the load just was not a option. It would have taken the better part of the day, and the show was set to start in less than four hours at 12 noon. Well, the truck, towed by a large wrecker, arrived at the hotel at about 12:30 P.M., just three hours behind schedule. A lot of folks jumped in to help get it unloaded in record time, and the show went on.

I would like to thank all the folks who stepped up to help with making this event the success it continues to be. All the preplanning is done by just a couple of people, but it takes many, many good friends to make it all happen during the show. Thanks to R.L. & Linda Barnett, Gerald Cromer, Ernie Hite and his son, Everett Hite, Clare Owens, Tom Houghtaling, Ted Bryan, Ted Miller, Robert Lozier, AWA President Geoff Bourne, our auctioneer (who made it through three auctions) Brad Jones, Richard Wayne, Gary

Ernie Hite's Nathaniel Baldwin 9-tube Superheterodyne receiver. It is a factory-produced set, made by the Nathaniel Baldwin Headphone Company in 1924, in violation of the RCA patent on the superhet circuit.

Carter and many others.

Look for us again next year, 2006, on the fourth weekend in March.

The Carolinas Chapter/AWA (CC-AWA) publishes "Radio Daze" quarterly and has quarterly swap meets. The 3-day Conference. is an annual event. Dues are \$10. For more information: Ron Lawrence at the above address or www.cc-awa.org

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address charges can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned, (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

| Page | ARTWORK SIZE (SEND IN THIS SIZE) | | As Printed (size in magazine) | |
|------------------------|-------------------------------------|----------------|----------------------------------|----------------|
| | H x W (inches) | H x W (inches) | H x W (inches) | H x W (inches) |
| Full | 7 3/4 x 4 3/4 | 7 3/4 x 4 3/4 | 7 3/4 x 4 3/4 | 7 3/4 x 4 3/4 |
| 1/2 H | 3 5/16 x 4 3/4 | 3 5/16 x 4 3/4 | 3 5/16 x 2 1/4 | 3 5/16 x 2 1/4 |
| 1/2 V | 7 3/4 x 2 1/4 | 7 3/4 x 2 1/4 | 3 5/16 x 2 1/4 | 3 5/16 x 2 1/4 |
| 1/4 | 3 5/16 x 2 1/4 | 3 5/16 x 2 1/4 | 1 5/8 x 2 1/4 | 1 5/8 x 2 1/4 |
| 1/8 | 1 5/8 x 2 1/4 | 1 5/8 x 2 1/4 | 1 1/4 x 2 3/8 | 1 1/4 x 2 3/8 |
| Business Card (1st) | 2 x 3 3/4 | 2 x 3 3/4 | 1 1/4 x 2 3/8 | 1 1/4 x 2 3/8 |
| Business Card (2nd...) | 2 x 3 3/4 | 2 x 3 3/4 | 1 1/4 x 2 3/8 | 1 1/4 x 2 3/8 |

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

| Cost for | Cost for | Cost for | Cost for | One Time to make |
|------------|----------|------------|-------------|------------------|
| 1-month | 3-months | 6-months | 12-months | up Ad |

* Full & 1/2 page, 6-mos; † 1/2 due with order; ‡ 1/2 due in 3 mos. ** Full & 1/2 page, 12-mos; † 1/4 due with order; ‡ 1/4 due at 3, 6 & 9 mos. † For 6 and 12 month ads, no ad make-up charge if no change is made to ad for entire run.

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29c each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike: for example 1, i and l (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month!

Subscribers:

- First 20 words: **FREE***
- 29c per word for extra words over 20 plus
- 10c per word for a shaded ad (count all words including free words).
- * Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47c per word plus
- 10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month
for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

FOR SALE: Galena crystal sets and parts. Tubes and old radio parts. Len Gardner, 458 Two Mile Creek Rd., Tonawanda, NY 14150. E-mail: radiolen@att.net

FOR SALE: Bang! Bang! 4th of July specials: Two Crosley 51-P portables. One (left) is the rarer first version with the tap switch at the top of the panel and the older style audio inside. The leatherette is good, (no rips), the metal hardware has some surface rust, but presentable, the Crosley warantee tag is original and intact and matches the panel numbers. It is clean inside and is exactly as it should be with all complete binding posts and battery wires down into the battery compartment. The audio is good and included inside are 2 type 199 tubes that test good. This is a working set!! - \$179. The other (right) is the later version. It too has nice leatherette, good handle, surface rust on hardware, all correct binding posts, battery wires, but no warantee tag. Inside are 2 (open) 199 tubes for display. This is a solid radio, no junk here! - \$165. Dave Crocker, 35 Santuit Pond Rd., #4B, Mashpee, MA 02649 (508) 477-1578 before 9 pm, please. E-mail: radio1@comcast.net

FOR SALE: Tube and transistor radios. **FREE:** Collectors Software. Hank Maurer, 5745 Willow Springs Way, Ferndale, WA 98248. (360) 380-0567, evenings. E-mail: hanksradioland@comcast.net. Web: <http://home.comcast.net/~hanksradioland>

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Radio Auction

Saturday, August 20, 2005 at 10 AM EDT

at the Seville Antique Auction Barn
8240 Wooster Pike Rd., Seville, Ohio

From I-76 Exit #2, then north on SR #3, 1 mile to the sale.

This sale will offer the collection of a Pennsylvania collector and will include a large amount of tubes of all types. Lots of early tubes 201-301A, UV-99, UX-99, WD-11, WD-12, many others including 80, 45, 6L6, etc. A nice collection of tombstone and cathedral style radios, many battery set radios ca. '20s. All types of speakers, cone, horn type, mantle, cabinet speakers. A large amount of radio books and magazines, lots of wood and Bakelite table radios, many pieces of home brew amateur radio pieces, some complete - some partial. Nice early loose coupler, Zenith 4R receiver. Several crystal sets, floor model radios. Edison cylinder player (standard), other phonographs. This will be a very large sale. We will start selling parts, part sets, project pieces and misc. tubes and test equipment at 8:30 AM outside, then at 10 AM we will start the main auction inside. Terms: check, Visa, M/C, cash.

to be held in September 2005**

(The date of the sale will be announced at a later time.)

Estes Auctions is pleased to have been selected to sell the large collection of the estate of Earl England of Los Angeles, California. The sale will be held at our Burbank, Ohio facility and will offer this superb collection for auction. This collection contains early radios, crystal sets, loose couplers, horn speakers, a nice headphone collection, many early tubes, a variety of phonographs including cylinder players, console style phonographs, disc players some with wood hoods, a large selection of radio related books and magazines. Earl was an amateur radio operator and we will also be selling his amateur radio items. There are advertising pieces and many parts to be offered. This will be a very good auction and will contain radios for every type of collector. We will bring the collection to our Ohio facility in mid-summer and will start readying it for our website. Watch for ads in *Antique Radio Classified* and at the AWA meet in Rochester, New York in August.

Richard Estes, K8LRY - Auctioneer
