WANTED

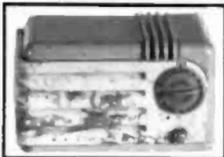

AIR KING SKYSCRAPERS

PAYING **\$14,500.00+** for near mint condition red or blue
\$10,000.00+ for green, lavender or yellow
\$3,000.00+ for black and **\$2,000.00+** for white or brown
ALSO WANTED ANY COLOR-ANY CONDITION
 COLLECTOR PAYING TOO MUCH, CALL ME LAST

TOM THUMB CATALIN RADIOS WANTED

paying **\$6,750.00+** for mint cond red, green, orchid, blue
\$2,500.00+ for any mint condition one
ALSO WANTED ANY COLOR-ANY CONDITION

DETROLA PEE WEE & SUPER PEE WEE WANTED

paying **\$600.00+** for mint cond. black, white
\$1,450.00+ for beetle, gray, salt & pepper
\$2,000.00+ for red, blue **\$3,500.00+** for green or lavender
ALSO WANTED ANY COLOR-ANY CONDITION

WANTED ANY CATALIN RADIO

ADDISON 2 MAROON & YELLOW \$900.00, YELLOW & RED \$3,750.00
 ARVIN 532 ANY COLOR \$2,500.00, BENDIX 526 GREEN & BLACK \$625.00
 DeWALD A501, A502 BROWN \$375.00, YELLOW \$425.00, RED \$1,200.00
 EMERSON AU 190 & BT 245 YELLOW \$1,300.00, GREEN \$2,500.00,
 DARK RED \$2,700.00, BLUE \$6,850.00, BRIGHT RED \$11,000.00
ESPEY MIDGET, YOU NAME THE PRICE I WILL PAY IT!
 EMERSON BM258 YELLOW \$750, GREEN \$1,350, RED \$2,150, BLUE \$4,000
 EMERSON 564 BLACK \$500.00, GREEN \$1,150.00, RED \$1,650.00
 FADA L56, F55, 52, 5F50, 5F60, 136, 53X, YELLOW \$1,500.00, LT GREEN \$1,750.00
 MAROON & YELLOW \$2,200.00, YELLOW & BLUE \$2,500.00, YELLOW & RED \$3,100.00,
 EMERALD GREEN & YELLOW \$7,000.00, BLUE & YELLOW \$7,000.00,
 FADA 115, 116 & 1000 ALL YELLOW \$700.00, MAROON & YELLOW \$950.00,
 YELLOW & RED \$1,150.00, PEA GREEN \$1300.00, BLUE & YELLOW \$2,550.00.
 GAROD 6AU1 MAROON \$675.00, YELLOW & RED 1,350.00,
 RED & YELLOW \$1,450.00
 HALSON ANY COLOR \$1,500.00 TO \$5,000.00
 MOTOROLA 50XC ALL YELLOW \$1,750, BROWN & TORT \$2,750.00,
 RED & YELLOW \$6,000.00, GREEN & YELLOW \$6,250.00,
 MOTOROLA 52 YELLOW & TORT \$1,500.00, MAROON & YELLOW \$1,850.00,
 GREEN & YELLOW \$2,900.00,
 SONORA KM ANY COLOR \$1,600.00,
 SENTINEL 284 WAVEY GRILL YELLOW \$700.00, SAND 950.00,
 RED 1,450.00, BLUE 6,500.00
 SPARTON CLOISONNE ANY COLOR \$3,500.00 TO \$5,500.00,
 EMERSON 520 \$50.00

always buying any catalin or pre-war colored bakelite radios
 We will buy one piece or the entire collection.

"watch out there's a new guy in town"

WANTED

ADDISON 2 MAROON & YELLOW \$900.00, YELLOW & RED \$3,750.00

Complete Riders Troubleshooter Manuals On A Single DVD Disc!

Tired of charging CD's? Tired of getting "that" schematic on your old radio where you can't read the values? REA has sold hundreds of this DVD-ROM publication at a break-through price. REA created the first Riders Professional CD-Series

that is the ONLY database driven system ever created and is the "standard" that others are judged by. Now we are providing a lower cost alternative to our earlier CD-ROM database driven series. Every collector or restorer who repairs radios should own this DVD. Requires Windows on a PC to use it. It requires nothing to download as it has its own built in digital browser that allows viewing, magnification, rotation and printing to your own printer. This DVD holds almost 120,000 of the early radio models made from 1920 to 1954. A true price breakthrough yet with no sacrifice in quality. A professionally produced product.

Only \$ 199 + \$ 6 S&H (Sold only on DVD)

Coming Soon, The First 200 Sam's Photofact sets on a Radio Era DVD-ROM electronic publication - call for information

Other CD-ROM Publications:

Riders Professional database driven 6-CD set - now only \$ 299 or \$ 59 per CD (4 volumes/CD)
 Cunningham-Radiotron Hi-Rez CD \$ 85
 Sam's Photofact Sets 1-175 - 7 CD's, with Sets 1-25, 26-50, 51-75, 76-100, 101-125, 126-150 and 151-175. Only \$ 79 each CD-ROM (25 sets per CD)
All 7 Sam's CD's (1-175) - \$ 495.00
 Radiophile Vol. 1 - \$ 85
 Radiophile Vol. 2 - \$ 85
 Radiophile Vol. 3 - \$ 85
 Antique Radio Repair Vol. 1 - \$ 85
 Antique Radio Repair Vol. 2 - \$ 85
 R390-R390A/URR Technical CD - \$ 57
 RCA Radiotron Handbook - \$ 67
 RCA HB-3 Tube Manual - \$ 80
 Zenith Trans-Oceanic - \$ 89

ANTIQUÉ RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, 498-A Cross Street, P.O. Box 2, Carlisle, MA 01741. Periodicals postage paid at Carlisle, MA, and additional mailing offices. Telephone (866) 371-0512, 9:00 AM to 5:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are \$39.49 by Periodicals mail and \$57.95 by First Class mail.

Annual foreign rates. By air: Canada - \$61.00; Mexico - \$67.00; Other foreign countries - \$105.00. Surface mail: Canada - \$51.00; Other foreign countries - \$58.00. (Surface delivery to countries other than Canada may take two or more months and cannot be guaranteed.)

Two-year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

Please, no classified ads by telephone, thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest to its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

EDITOR'S COMMENTS

With the advent of the New Year here in New England, and, in fact, in the entire northern sector of the U. S., winter in its full snowy garb has settled in. On the one hand, January means fun on the slopes, grog by the fire, and attention to radio projects long dormant on the workbench; on the other hand, it can mean frigid temperatures, icy travel conditions, and cabin fever!

In general, we can assume that such winter hazards weren't on Powel Crosley's inventive mind when he came up with the subject of our lead article — the Icyball refrigerator. Instead, Crosley was bent on marketing a product that would solve such summer hazards as spoiled food and the scarcity of cold fluids. Needless to say, the solution was not a radio.

This unlikely Crosley product caught Ray Bintliff's eye in an unlikely place for a New Englander — an Idaho Historical Society Center. What was Powel Crosley doing marketing a refrigerator? Naturally, Ray couldn't resist consulting Crosley expert Dave Crocker, who had written an article about another unlikely Crosley product — the *Moonbeam* aircraft. The result is an article about a Crosley nonradio product that kept its cool even in the extreme heat of a store fire.

If this doesn't strike you as improbable, read how the Icyball system works. Who knows how many more unique Crosley products might be hidden away in a forgotten archive.

Happily for our usual purposes, collectors like Richard Arnold stick to radios that can be repair projects in a warm workshop. Just the ticket for a winter's day. Richard's GE Model 410 is another of his success stories — a second look, a little TLC, and a very satisfactory radio, good for daily listening.

Ed Ripley's Emerson "Sunbeam" radio project was even more ambitious. It takes a special vision to see that a Sunbeam electric heater fan wouldn't be complete unless it had radio innards. It also takes persistence to find a chassis that fits. Ed's painstaking efforts to create an Emerson "Sunbeam" black box radio are described in detail, with photos included. Here's proof that there's more than one way to salvage a chassis.

As we look forward to the new year of radio events, we're still catching up on reports on past ones. Michigan's Extravaganza is a long-standing 2-day event that has grown steadily and became more successful over the years. It appears now to have topped all others in attendance — over 1,200 this year.

The reasons for this success are multiple,

but the primary one is that the flea market with its set starting time (Le Mans) is open to all. This is key to attracting new collectors and making up for the inevitable attrition any hobby suffers.

Another ingredient for success is the informal free reception with live entertainment to which all registered attendees are invited, rather than a banquet at an additional cost. Include all the usual offerings of a successful meet — an auction, presentations, a contest, drawings, a Ladies' Luncheon — and you have success, big time.

It's also a plus for the growth of the hobby to report on the success of a first-time event — the Tri-State Spring Radio Fest, the combined efforts of the Pittsburgh and Buckeye clubs. These clubs once had separate events, but combining them makes sense in these hurried times.

Despite poor weather conditions, there were 55 vendors in the flea market and over 200 attendees. Richard Estes presided over the auction of more than 225 lots, and plans for a second year event are already underway. The enthusiasm engendered by such events spells good news for all of us who want to keep interest in radio collecting strong.

A.R.C. Benefits. Continue to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; the Web, www.antiqradio.com; books shipped free in the U. S. by USPS media mail; and for current subscribers, a 10 percent discount on all book orders.

Coming Radio Events. Beat the onslaught of cabin fever by getting out to at least one event this month. Listed are 25 meetings, four swap meets, and one auction to choose from. A little camaraderie will go a long way in the winter doldrums.

Happy Collecting and Happy New Year!

John V. Terrey, Editor

ON THE COVER

Do you think you've seen this month's cover before? Well, if you've been a subscriber since January 1986 or 1996, you're right. It so happens that this same Father Time speaking into his WLW microphone greeted the New Year on the covers of exactly 10 and 20 years ago. Since everyone engaged in our hobby must believe that longevity is to be commended, we couldn't resist repeating this cover for our 258th issue. Besides, what could be more appropriate than an old geezer welcoming a young 'un, which is our hope for the future.

RADIO MANUFACTURERS

The Crosley Icyball

BY RAY BINTLIFF, W1RY

Powel Crosley's interests were not limited to radios. In the August 2004 issue of A.R.C. Dave Crocker described Crosley's Moonbeam aircraft. In this article, Ray tells us about another very different product manufactured and marketed by the Crosley Radio Corporation. (Editor)

During a visit to the Bonner County Historical Society Heritage Center in Sandpoint, Idaho, a Crosley exhibit caught my eye — and it certainly didn't look like a radio. Upon closer inspection, I found that it was an early refrigerator that Crosley called the "Icyball."

My first thought was to call Dave Crocker, our resident Crosley expert, and find out if he knew of this early refrigerator. Of course he did. Dave offered to send me "more than I ever wanted to know about the Icyball."

When I returned home, I found copies of the *The Crosley Broadcaster* in the mail. The March 15, 1929, cover page, featuring the Crosley Icyball, is reproduced as Figure 1. The June 1, 1929, issue contained a testimonial about Icyball's abil-

ity to survive a fire. That article is reproduced in a box on the opposite page.

The Icyball's lift-top cabinet is made of metal and is insulated with cork. One of the two pressurized tanks or balls that make up the refrigeration system can be seen at the right side of the cabinet.

THE ICYBALL SYSTEM

The Icyball system converts heat into cold. Its closed system contains a refrigerant (a mixture of water and ammonia). In use, the "hot ball" is heated by an external heat source, typically a kerosene burner. Then the hot ball is submersed in a tub of water. The condensation and evaporation process causes the temperature of the second "cold ball" to drop to below freezing.

Figure 2 shows an overall view of the Icyball on display in the Idaho museum, while Figure 3 shows a close-up of the unit's external hot ball. Figure 4 shows the cold ball positioned in the Icyball's insulated cabinet.

The heating and cooling of the hot ball, referred to as "charging" is performed with the unit removed from the insulated cabinet. After the charging operation is complete and the cold ball begins to cool, the unit is moved to the insulated cabinet. A handle was provided for this purpose.

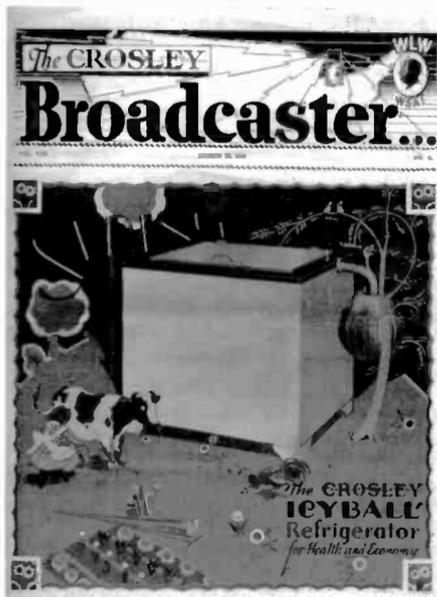

Figure 1. The Crosley Broadcaster for March 15, 1929, featured the Icyball refrigerator on its cover.

Figure 2. An overall view of the Crosley Icyball on display in the museum in Sandpoint, Idaho.

Icyball Refrigerator Laughs at Fire

At Parkin, Arkansas we have just authorized an Icyball dealer, the Parkin Furniture Company. Mr. O'Quinn is the owner and manager of the establishment. He sold the first Icyball that he had in stock within 24 hours after he had received it. Immediately after receiving his 2nd unit and had put it in operation the town of Parkin had a big fire which burned the entire block in which Mr. O'Quinn had his business with the exception of Mr. O'Quinn's store. The heat of the fire was terrific and did considerable damage to the Parkin Furniture Co., but after the fire was subdued and little but ruins were left Mr. O'Quinn still had ice in his Icyball which he had in operation at the back of his store where the heat of the fire was the worst, which goes to prove that Icyballs will maintain their cold when it gets as hot as hell-o.

From the June 1, 1929, issue of "The Crosley Broadcaster."

(Continued on following page)

Figure 3. A close-up of the Icyball's pressurized vessel, or "hot ball," that was heated by a flame.

(Crosley Icyball, continued)

Figure 5 shows a close-up of the nameplate mounted on the handle.

Figure 6, reproduced from *The Crosley Broadcaster*, shows the complete Icyball unit, including an ice cube tray that could be inserted in the "freezing tube" at the base of the cold ball.

MARKETING THE ICYBALL

As Dave Crocker has pointed out in previous articles, Crosley was a great promoter and did not limit his products to radios. He did not hesitate to manufacture niche products if he thought they would sell. And the Icyball did sell. It sold especially well in rural areas that lacked electricity. Certainly, most rural homes had an adequate supply of kerosene lamps and heaters. Production of the Icyball is estimated to have been in the thousands.

Figure 4. The cold ball portion of the refrigeration unit is shown placed in the Icyball's insulated cabinet.

Figure 5. The nameplate on the unit's handle reads "ICYBALL MADE BY THE CROSLLEY RADIO CORPORATION."

Production began in 1928 and continued until 1938. The cost of an Icyball was about \$80.

Because radio sales declined in the summer months, Crosley believed that the demand for the refrigeration units could provide extra income for Crosley dealers during that otherwise slow sales period. To make sure that the refrigeration unit was a success, he produced about 1,500 units for field trials prior to going into production. He then followed up by establishing an "Icyball School" for Crosley salesmen and later for Crosley distributors and salesmen. An article in *The Crosley Broadcaster* states, "A man who knows his product finds it easy to sell." Naturally, the Icyball was touted regularly on programs aired by Crosley's radio station WLW.

It seems that examples of Powel Crosley's wide-ranging interests just keep popping up.

WITH THE COLLECTORS

General Electric Model 410

BY RICHARD ARNOLD

In this article, Richard Arnold tells us how he scored again during one of his frequent visits to local antique shops. (Editor)

About six years ago I was making my weekly rounds through one of my favorite antique stores here in Ardmore, Oklahoma. I happened to come across the GE Model 410, shown in Figure 1, in one of the booths. It was not much to look at, and I started to walk past it. But, pick-in's were really slim that day, so I decided to give it a second look.

I found that the finish was pretty rough, the grille cloth was shot, and there was a knob missing. Well, it looked like a challenge, and, at that point, I started to look at it as a possible project radio. I remembered that I just happened to have a set of knobs that matched the one that was still on the radio, so that was not a problem. The price was apparently right — I think it was \$13 — and I went ahead and purchased it.

When I got the set home, I looked up the model number and found that it had been made in 1950. I cleaned it up some, tested the tubes, replaced the caps, added the new knob, and there it was — a little mundane General Electric radio that had come back to life.

THE GE MODEL 410

The GE Model 410 has a wooden cabinet that measures 9" x 7" x 13". It uses a slide rule dial scale that tunes the broadcast band from 540 to 1600 Kc. The two knobs are for on/off volume control and for tuning. It is an AC/DC set that operates on 105 to 120 volts. The IF is 455 Kc.

The set has six tubes: a 12SK7 RF amplifier, a 12SA7 oscillator, a 12BA6 IF amplifier, a 12SQ7 detector and audio amplifier, a 35Z3 rectifier, and finally, a 35L6GT power amplifier. The pilot lamp is a 6-8v bayonet style #47.

After getting the set working, I did a little cabinet refinishing, and put in a new grille cloth. Now I've got a 1950s radio that plays great.

I have looked on eBay for the radio a number of times and have yet to find one. I did, however, find a Model 405 that was up for auction and in

The GE Model 410 restored to life.

really good condition; it sold for only \$11.50. A 404 sold also, but I did not keep track of it. Who knows, maybe this 410 is pretty scarce.

The 410 is very selective, and the sound is great as it uses a 5-inch permanent magnet speaker. I tell you — looks were deceiving with this little radio. It's a good one, and I listen to it just about every day. Sure am glad that I salvaged it.

There are two other models that use the same chassis: They are the Model 404, which is a brown plastic, and the Model 405, which is an ivory colored plastic. The General Electric Co., Electronics Department, Electronics Park, Syracuse, New York, made these radios.

Rider, John F. *Perpetual Trouble Shooters Manual, Volume 21*, pages 19-22.

(Richard Arnold, P.O. Box 275, Lone Grove, OK 73443)

Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. His interest is primarily in cathedrals and 1920s battery sets, and his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. His prize is the 1932 Jackson Bell Peter Pan featured in the June 1991 A.R.C.

WITH THE COLLECTORS

Emerson "Sunbeam" AM Cathedral Radio

BY ED RIPLEY

As he did in an article in the August 2005 issue, Ed Ripley demonstrates that there is more than one way to salvage a radio chassis. A little imagination and a heater fan with the right shape will do the trick. (Editor)

Take a good look at the front and rear photos of the radio in Figure 1. Do you recognize it? Have you ever seen one before? You say your grandmother had one when you were a kid? You'd better look again.

Actually, I'm fooling you, big time. Grandma might have had one that looked like this, but if she did, it kept her warm on cold nights. You see, this was once a Sunbeam Heater Fan. I replaced the fan works with the chassis from an Emerson 707B, shown in Figure 2, sometimes known as the Emerson "Sunburst." It had fallen and "burst" all right, but the chassis was still good.

Originally, I bought this steel-cased heater fan because of the cathedral-mushroom shape and the chrome grille. Also, it was "radio-sized." Including the base, it measures 12" high x 5½" wide x 6" deep. I paid \$20 for it. It still worked, barely, but it looked like a radio, and, well, the rest is history.

THE HEATER FAN CASE

The restoration process went fairly smoothly. First, I removed the fan and heating elements, along with the on-off snap switch on the front of the unit, as shown in Figure 3. Left with a rectangular opening flanked by two screw holes, I decided to use the opening for a peep-window dial. So, I needed a radio chassis with a tuning capacitor low enough to line up with the hole. The adjacent screw holes could later be enlarged and used for the tuning and volume control shafts.

I disassembled the rest of the heater fan case and refinished it. The original black enamel was badly worn and scratched, and there were places where rust was beginning to show. I lightly sanded it, and masked off the nice old gold and red Sunbeam decal on the front. It wasn't perfect, but enough of it remained to keep it on and thus preserve some of the originality. I then painted the case gloss black. When it dried, I reinstalled the chrome grille assembly.

THE EMERSON 707B CHASSIS AND SPEAKER

One of the biggest problems one encounters in a project like this is finding a chassis that will fit. I

Figure 1. Front and rear views of the "Sunbeam AM Cathedral."

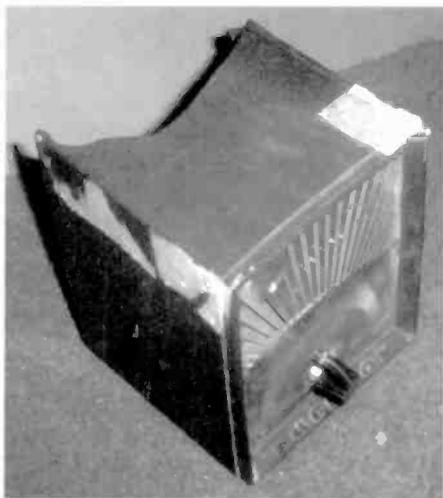

Figure 2. The Emerson Model 707B "Sunburst" in its broken cabinet. Its chassis was chosen for use in the Sunbeam cabinet.

tried several, but the Emerson 707B, shown in Figure 4, seemed to be the best candidate. This model is a 5-tube, AM superheterodyne radio with the tuner located below the chassis platform, which was perfect for what I needed. It was also small enough to fit. There was lots of room to spare at the sides and above, but it would be a snug fit from front to back.

The little speaker that was mounted on the Emerson was damaged, and would need to be replaced. I removed it and found a bigger PM speaker that would fit into the chromed housing of the cabinet. The rear of this housing is recessed, and is approximately 6½" in diameter. The speaker, which I believe was originally part of an old battery farm radio, nestled into the 6½" cavity and fit like a glove.

I then cut some grille cloth into a circle, just slightly larger in diameter than the grille cavity. Since it wasn't practical to try to glue the speaker cloth to the grille, I made the cloth piece just large enough so that it held in place when the speaker was pressed down over it. Figure 5 shows the grille cloth being installed.

There was no way to bolt the speaker directly to the case without drilling more holes and ruining the look of the chrome front. However, there were four bolts on the inside front that held the chrome housing to the case, as shown in Figure 6. I was able to use two of them to attach mounting brackets that would hold the speaker in place.

Next, it was time to modify the Emerson chassis. After removing the speaker, I unbolted the on-off-volume control, leaving the wiring intact. I cut away part of the right front chassis frame, as shown in Figure 7, so I could mount the volume control directly to the heater cabinet. I later found that I needed to extend two of the wires by a couple of inches.

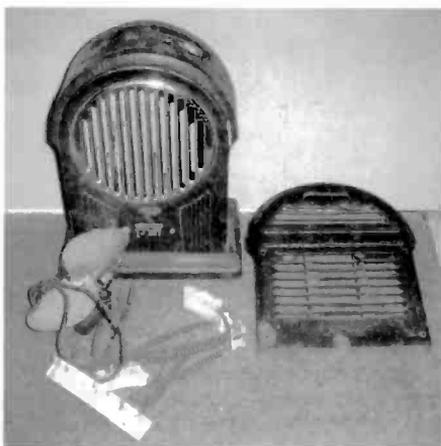

Figure 3. The Sunbeam heater after disassembly. Shown are the metal cabinet, rear panel, fan, and heating elements.

I also removed the old, damaged ferrite bar antenna and a cardboard back plate from the Emerson. The set was recapped, and one tube was replaced to put the Emerson back in working condition. A loop antenna from an old Admiral junker was used to replace the ferrite bar, and a black power cord was installed, replacing the too-short original. The Emerson 707B has a dial lamp, which I retained, using a #47 bulb. However, it doesn't really do much illuminating, and could be removed.

FITTING THE CHASSIS TO THE CABINET

Next came the all-important business of preparing the modified Emerson chassis to fit the Sunbeam cabinet. The chassis had a direct tuning shaft with no strings, pulleys, etc., which was one of the reasons I chose it. However, in order for it to line up with the left screw hole in the heater case, I had to raise the chassis about ½".

The Emerson had two mounting holes in the bottom of its chassis. I built a small ¼" wood platform for the front one, and glued two ¼" thick pieces of rubber to it. The assembly was attached

(Continued on following page)

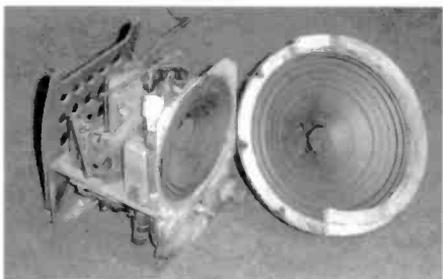

Figure 4. An Emerson Model 707B was selected to be the radio installed in the Sunbeam heater's cabinet.

Figure 5. The grille cloth is ready for installation.

(Sunbeam Heater Radio, continued)

to the front mounting hole with a small bolt. I used the rear hole to actually mount the chassis.

After lining up and measuring, I drilled a small hole in the bottom of the heater fan case, and used a longer mounting bolt. Figure 8 shows a bottom view of the cabinet with the mounting bolt and flat washer visible in the upper right. I selected a round, spool-like wood spacer, and to this, I glued a circular piece of rubber gasket material, again totaling about $\frac{1}{2}$ ". The mounting bolt went through the case and the spacer and into the chassis. I purposely did not bolt the front so I would later be able to maneuver the chassis a bit when lining up the dial.

The dial itself was a disc, fashioned from some plastic dial material I found in the junk box. I needed a disc with a radius of about $1\frac{1}{8}$ " so it would line up with the dial hole and not rub on the bottom of the case. It also needed to be thin enough so it wouldn't rub against the front of the case. The dial disc I used slipped right over the tuning shaft, and was tight enough to stay in place. Actually, one could make such a disc out of stiff cardboard and use a rubber grommet in the

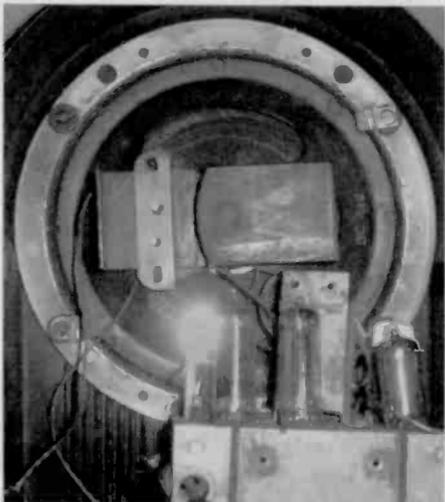

Figure 6. The PM speaker is attached to the cabinet's chrome housing in two places.

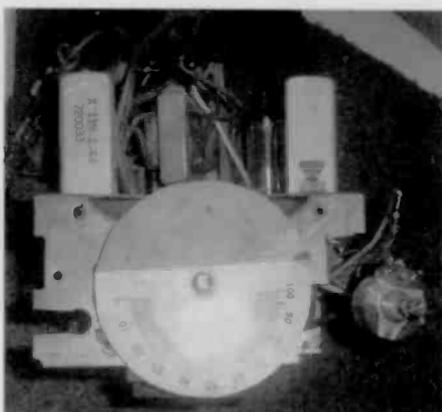

Figure 7. The Emerson chassis after its modification to fit the Sunbeam cabinet.

center. This one had a pressed metal center hole and worked perfectly.

The dial face was copied from an actual dial of an early 1930s radio and was in the 0 to 100 scale, commonly used in those days. I pasted the copy to the disc. It had black numerals on plain white paper, which would look good on a black radio. I used a thin protective plastic overlay to preserve the paper dial and give it a little shine. The numbers read sideways in the peep window, and a future project may be to modify the dial with a different scale and numbers that read straight up and down.

As Figure 9 shows, the front of the Sunbeam cabinet has a protrusion that previously held the on-off switch, giving a handy indentation on the rear side. I measured this indentation and found it to be $1\frac{1}{8}$ " wide and $\frac{5}{8}$ " high. I cut a piece of clear plastic to fit the opening and serve as a dial lens.

Also, two small pieces of black cardboard measuring $\frac{3}{8}$ " x $\frac{5}{8}$ " were cut and glued to each end of the clear plastic on the rear side. See Figure 10. This was done to hide the extra white area on the left side of the dial and the vacant space between the edge of the disc and the right edge of the dial opening. A little white paper arrow was also glued

Figure 8. This bottom view shows the mounting bolt used to secure the chassis to the Sunbeam cabinet.

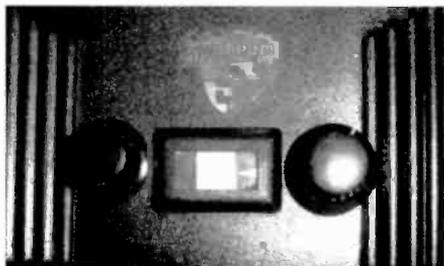

Figure 9. The slight protrusion on the Sunbeam's cabinet previously held the heater's off-on switch. It is now used as a dial window.

to the right side for a dial indicator. The completed lens assembly was glued with epoxy into the rectangular indentation.

REASSEMBLY

Now, it was time to reassemble the project. The chassis and dial numbers lined up quite well. The tuning shaft was a little short, but I knew that going into the project. I had nice black set-screw type knobs picked out that would work just fine.

However, with the dial disc in place, I was unable to push the chassis all the way to the front. I knew that the upper part of the disc would have to reach up under the grille assembly, but I didn't count on being unable to tilt the chassis enough to get it started. The solution was to remove all but one of the grille mounting bolts and leave it loosely in place. By lifting on the grille and tilting the chassis, I was able to slide the dial disc into place and complete the installation, as shown in Figure 11.

The speaker and loop antenna leads were then soldered to the Emerson chassis, and the loop was glued to the right inside wall of the case. It was a big improvement over that ferrite bar that came with the Emerson, but it still wasn't as sensitive as I liked, so I added a long-wire antenna. This not only improved reception but made the result look more like an early 1930s radio.

I call this black box beauty my "Emerson Sunbeam — the Hottest Radio in Town!"

(Ed Ripley, 230 Stanley Ave., South St. Paul, MN 55075)

Figure 10. The dial lens and masking were fashioned from clear plastic and black cardboard.

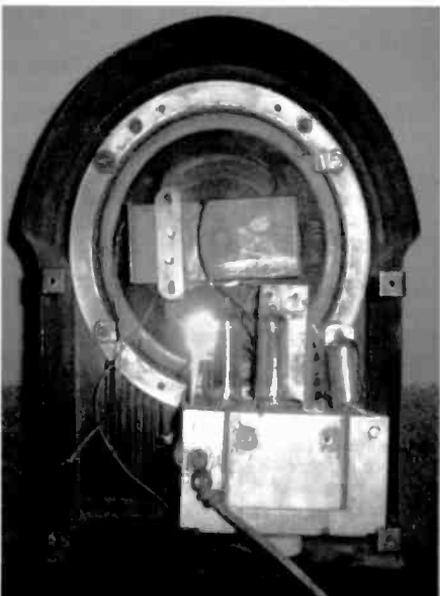

Figure 11. This rear view shows the finished project with the chassis and speaker mounted in the cabinet.

Ed Ripley, an avid old radio enthusiast for more than two decades, collects Art Deco receivers from the 1930s and 1940s. He is a retired radio broadcaster and spent 30 years as a deejay, talk show host, and program manager for stations in several states, including Florida and Minnesota. He is a past president of the Northland Antique Radio Club, of which he was one of the founders.

Principal Components

Sunbeam Electric Heater Fan case (Model unknown)

Emerson 707B radio chassis (or 706B)

One 6-inch PM speaker, preferably an old one with flanged frame to 6 $\frac{1}{2}$ "

Two generic, black, set-screw type, flanged knobs
Small quantity of stiff, clear, hobby plastic for dial lens

Small quantity of black cardboard or poster board

Tiny dial arrow indicator cut from plain white paper

Numbered dial disc

Thin plastic overlay

Two mounting brackets for speaker

Two platform spacers for raising chassis

Two chassis-mounting bolts

$\frac{1}{4}$ " gasket or other rubber material

One can gloss black spray enamel

One piece of grille cloth, approx. 7" diameter

One loop antenna, if desired

One long-wire antenna

One black line cord with molded plug (optional)

MEET & AUCTION REPORT

Michigan Antique Radio Club Extravaganza '05 Lansing, Michigan — July 8-9, 2005

REPORTED BY JOHN REINICKE

The Michigan Antique Radio Club (MARC) celebrated its 20th anniversary at Extravaganza, on July 8 and 9 at the Holiday Inn South Convention Center in Lansing, Michigan. Extravaganza has the reputation of being one of the premier antique radio events of the country, and this year was no exception. As usual, the event was well attended, and all enjoyed themselves.

Extravaganza opened with registration on Thursday afternoon, July 7. As they were last year, the flea market spots were assigned, and once things were set up, people could move into their spots and get tables set up. This process went smoothly, and, by dinner time, the flea market was largely filled. Over three hundred spots had been reserved. Estimated attendance was over 1,200.

A noted feature of Extravaganza is the "big top" — a large tent in the center of the flea market which serves as home for registration and the hospitality area, and provides 60 tables for vendors to rent. The tent also provides a gathering spot out of the

Entertainment was provided by Picks & Sticks, a popular group often seen at Greenfield Village at the Henry Ford Museum.

sun and weather and adds to the ambience of the meet.

On Thursday evening, Club President John Reinicke did a presentation on "Fun with Bakelite" in which he showed a number of techniques, from restoring the shire to otherwise fine sets to replacement of missing pieces. As a demonstration, he used a shattered Zenith set that had been repaired with a variety of materials from fiberglass to Bondo. This kind of presentation is well received, as about a hundred gathered for it in the hospitality area under the big top.

After the presentation, an old-fashioned movie projector was set up to show a *Three Stooges* short. The short was followed by a feature length movie, all under the big top. A sizeable contingent hung around for the movie and groups could be seen socializing in the flea market area throughout the evening.

FRIDAY ACTIVITIES

The Michigan Antique Radio Club has a policy of no sales before 7 A.M. on Friday. On Friday morning, almost all of the vendors adhered to the policy. Unfortunate-

Flea market activity picked up rapidly on Friday, as over 1,000 event badges had been handed out.

ly, a very few did not have the courtesy to follow the recommendation, and some complaints resulted. This is a minor flaw that can be corrected by a bit more checking in the future.

The event opened officially at 7 A.M., and the remaining spots in the flea market filled as more vendors arrived on Friday morning and things got into full swing. By mid-morning on Friday, over 1,000 event badges had been handed out, and officials had to run to the store to buy another box. The badges were not required to roam the flea market, and an additional couple of hundred attendees were in evidence in the flea market. A very good turnout indeed!

To promote Extravaganza, the Michigan Club places ads in over 60 local papers and runs spots on local radio stations. The cost of the ads is covered by the admission fees.

On Friday, the ladies got to enjoy the "Woman's Luncheon" in the Hummingbirds restaurant. This is well attended and, in a lot of cases, provides a chance for the spouses of ardent collectors to commiserate. There were door prizes, and everyone enjoyed a good meal.

The weather cooperated for the most part and the day would have been perfect if it were not for two "out of the blue" rain showers. The showers came up quite quickly and caught several flea market vendors by surprise. Since the sun came out between showers, there were two scrambles to get things covered with tarps and dropcloths.

On Friday afternoon, there were two technical presentations: one by Mike Dale on vacuum tubes, and another by Mark Oppat on soldering. Mark also did a question and answer session. Both presentations were very well received and played to a "standing room only" crowd. Mike and Mark were surprised at how much interest there was in the topics, and both ran well past the posted finish time as they answered many questions.

The contest at Extravaganza, always an amazing affair, is open for viewing at the close of judging on Friday afternoon. It is really surprising and gratifying that so many collectors will bring quite rare and valuable items for display.

This year the theme was Michigan radio manufacturers and broadcasters, and we were treated to a rare Wolverola, an almost-as-rare peach Spartan, and a number of Detrola, Wilcox-Gay, Kadette, and other Michigan sets. Speakers, test equipment, radio station memorabilia, novelties and, of course, the "open" category rounded out the display.

Some examples of radios from the Art Deco period, including a Philco Model 45C "Butterfly" on the right.

In addition to trophies, contest winners received a commemorative radio with the MARC logo and a 20th anniversary designation. The first place winners got a miniature cathedral set, and the ribbon winners received a small AM/FM set.

The highlight of Friday evening was the "Radio Reception," a social gathering open to all registered attendees. The contest is the centerpiece of the gathering and attendees can walk around to enjoy the entries. This year, in addition to the contest, there were several tables placed around the room for non-judged displays of Michigan radios. Also on these tables were many items from other Michigan manufacturers, such as Heathkit, V-M, Electro-Voice, etc.

"Radio Reception" gives attendees a chance to vote on the "People's Choice" trophy. This is an award that is given based on the selection of the

(Continued on following page)

More flea market activity under the tent.

(Extravaganza '05, continued)

general audience. This year it went to a really remarkable miniature replica of an old radio shop that was built into an old radio console. Sheri Jenicke went to considerable effort to create this replica.

The "Best of Show" was Chris Rockhey's peach Sparton. Jeff Conley captured the "Chairman's Trophy" with his restored ebony and chrome Detrola. The "Best Restoration" award went to Lowell Muhlbbrandt for his General Motors 110 with the remote control ashtray. (When did you last see the ashtray and the set together as a working pair?)

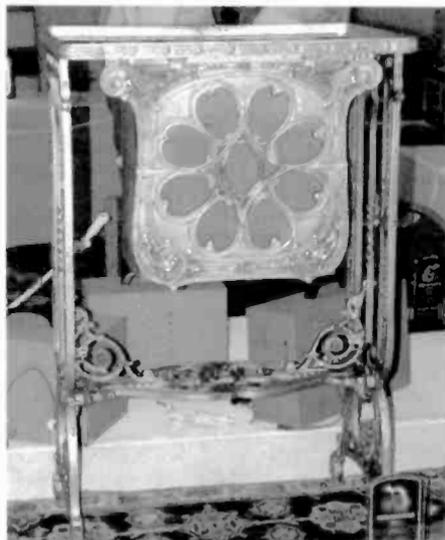

"Radio Reception" features a drawing for the Grand Prize, which was a replica of a Sparton blue "sled." This AM/FM/CD modern set is a quite good reproduction of the original. The prize drawing was done in a "Survivor" format. Five winners were drawn and invited on stage. Each winner was given the opportunity to auction off his ticket in a 50/50 format (half the sale of the ticket goes to the club). Then one of the five is drawn and that person is "off the island." Again, the survivors can auction their tickets. This continues until only one remains — the winner. This is a fun way to hold a prize drawing.

All through the reception people could enjoy the cash bar, the trays of goodies, and music by "Picks and Sticks." "Picks and Sticks" are well known in southeast Michigan and can often be seen at Greenfield Village at the Henry Ford Museum.

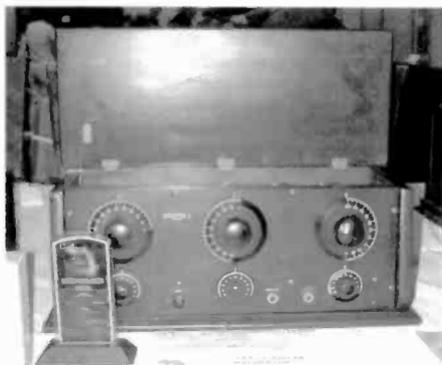

SATURDAY ACTIVITIES

On Saturday, there was an all-day flea market. In the morning, Donald Matteson did a presentation on "Sparton's History in Broadcast Radio." Like those on Friday, this excellent presentation was very well received.

Late on Saturday morning, under the big top, children of all ages participated in "Radio Craft." In

Jay Volke's prize winner in the contest was this ornate Newcombe cone speaker and its ornamental stand.

This prize-winning Wolverola was a fine example of an early Michigan radio, this year's theme.

this session, each person made a curio box, decorated it with a radio-theme decal, and lacquered it — a fun activity for all.

The highlight of Saturday is the equipment auction in the afternoon. Presided over by the premiere old radio auctioneer, Richard Estes, the auction is in a "buy back" format. Rather than placing a reserve on an item, the seller may bid on his own item in order to protect the price. This makes for a lively auction and keeps things moving.

This auction provides an opportunity for sellers to offer pieces in an auction format for very low commission rates. This year, 160 lots were offered for sale for a total bid of \$14,150. Of this, \$3,305 was buy back, and a total of \$10,845 exchanged hands.

The dynamic of a live auction is always interesting. One seller, who had placed a number of quality items in the auction, complained that he had to buy back just about all of his items. In this case he did not find a motivated bidder for many of his items. On the other hand, two sellers noted that they had placed items in the action that had not made their reserve on eBay.

At this auction, all of the items sold, and one of them managed to top the eBay reserve by double! These sellers were quite happy with the results. The response at an auction is never predicable and auctions still provide good opportunities for bargains for both sellers and buyers alike.

At the end of the auction, the second 50/50 drawing and the second "sellers drawing" were held. MARC gives each seller a raffle ticket, and one ticket is drawn on Friday for \$50 and one is drawn on Saturday for \$75. This is MARC's way of thanking the sellers.

Extravaganza closes on Saturday with the "Good Buy Affair." This is the donation auction held under the big top at the close of the main auction. The items are stacked on tables and "choice" is auctioned. That is, the bidder has his choice of any item on the table for the winning bid. He can take one or more items for the winning bid for each item. After the winning bidder takes choice, anyone else make take an item at the bid price. Then the table is put up for bid again, and the process is repeated until the table is empty.

By the end of the bidding on a table, the winning

bid price is on the order of a buck or two. When the price gets that low, the tables empty quickly. The "Good Buy Affair" gives folks a chance at some real bargains and raises money for the club to help offset the cost of the meet.

The Michigan Club and its many volunteers put a considerable effort into Extravaganza and it shows. The event is "laid back" and a lot of fun. However, it really is a lot of work to "make it look easy."

AUCTION REPORT

Tri-State Spring Radio Fest Beaver Falls, Pennsylvania — April 2, 2005

REPORTED BY CHRIS WELLS

The first annual Tri-State Spring Radio Fest auction and flea market was held on Saturday, April 2, 2005, at the Beaver Falls Holiday Inn, located northwest of Pittsburgh. The Radio Fest was co-sponsored by the Pittsburgh Antique Radio Society (PARS) and the Buckeye Antique Radio and Phonograph Club (BARPC) and was sanctioned by the Antique Wireless Association (AWA).

Vendors started to arrive at 5:00 P.M. on Friday afternoon. The welcome table was set up and ready by 5:00 A.M. for the early arrivals Saturday morning. By 8:00 A.M. there was a long line for entry.

There were 55 vendors and over 200 attendees. Every one was surprised to see linen tablecloths on the vendor tables supplied by the Holiday Inn. The attendance was very good for a first time event, taking into consideration the cold and wet conditions, along with forecasts of snow that started as the event was closing up.

There was a 50/50 raffle, a drawing for a book donated by Radio Daze and a drawing for a Zenith console provided by PARS. Richard Estes, our auctioneer, won the console.

The auction began about 1:30 P.M. There were 65 registered bidders for 229 lots of merchandise. The auction moved very quickly, thanks to our auctioneer, Richard Estes, who donated his time and services.

Next year's event will also be at the Holiday Inn but pushed to May 6, 2006, to take advantage of the warmer weather. Richard Estes will again serve as auctioneer.

We want to thank all of the vendors and attendees for making this a very successful first time event, and hope to see all of them again in May.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

Auctioneer Richard Estes moves the merchandise along at a brisk pace.

The auction prices are listed below. All prices have been rounded down to the dollar. All no-sale and some low cost items and items in poor condition have been omitted.

N.O.S. = new old stock, N.I.B. = new in box, BB = brass-based.

(Continued on following page)

This nice Zenith 9S367 Zephyr, ca 1939, was offered as a raffle prize. The lucky winner was Richard Estes.

Jonathan Novak helps out at the table featuring Tri-State's fund-raising efforts, which included a 50/50 raffle and drawings for a book and the Zenith Zephyr.

Andy Dunlop and Dave Harman display their flea market goodies on this neatly arranged table.

(Chris Wells, 110 Fawn Valley Dr., McMurray, PA 15317)

The Buckeye Antique Radio and Phonograph Club (BARPC) publishes "Soundings" bimonthly, and holds monthly meetings, a public mall show, and a March swap meet with PARS. Dues are \$10. For more information: Kevin Grimm, 1716 Chestnut Blvd., Cuyahoga Falls, OH 44223.

The Pittsburgh Antique Radio Society, Inc., (PARS) publishes the "Pittsburgh Oscillator" quarterly, and holds quarterly meetings, Spring Fever, and a March swap meet with BARPC. Dues are \$10. Write: 913 5th Ave., Patton, PA 16668, or www.pittantiqueradios.org.

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month, copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below, see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay, therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests add 15% but call first. Clubs write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed SIZE in magazine

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29c each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small l.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month!

Subscribers:

- First 20 words: **FREE***
- 29c per word for extra words over 20 **plus**
- 10c per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47c per word **plus**
- 10c per word for shaded ad.

Please do not forget to send in the extra 29c per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month
for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

**Carolinas Chapter
of the
Antique Wireless Association**

Since 1975, the best antique radio meet in the Southeast!

30th. Annual "Spring Meet in the Carolinas"

~ ~ Thursday - Friday - Saturday, MARCH 23-24-25, 2006 ~ ~

Charlotte, NC

~ The Sheraton Charlotte Airport Hotel ~

I-85 @ exit 33, the Billy Graham Parkway

For CC-AWA group rate make your reservations directly with the Sheraton by calling 704-392-1200 during regular business hours.

There will be NO Buying, Selling, Trading, or Displaying of

Merchandise before 8AM Friday March 24th.

There's no need to leave the site.

With most of our attendees being from out of town and not knowing their way around, or where to find a good place to eat. We've decided to add 2 more food events.

Our NEW Thursday "Kickoff Luncheon and Thursday evening dinner.

Due to the rising cost of hosting this event we have been forced to increase some fees. We hope you understand. Your staying at the Sheraton during the event will help with this too.

CONFERENCE FEES	In Advance	At the Door
General Admission -----	\$15 each -- (spouses free) -----	\$20 each
Vendor Space Rental -----	\$30 for FIRST space ----- \$20 for each additional space -----	\$35 each
Saturday ONLY admission -----	N/A -----	<u>FREE</u>
THURSDAY "KICKOFF" LUNCHEON ---	\$15 each person, in advance	<u>ONLY</u>

Exhibitors may register at the door or may pre-register by mailing payment to: Radio XXXVII, c/o A.R.C., P.O. Box 2-W20, Carlisle, MA 01741. (Make check/MO to A.R.C.; Visa, MasterCard, Discover, American Express OK, too.) If paying by credit card, exhibitors may pre-register by calling (866) 371-0512 or faxing (978) 371-7129. **Note:** After picking up registration materials at the registration desk, exhibitors may enter the hall only to deliver goods to their table (e.g. not to set up) and then must return to the foyer until the doors open for everyone at 8 AM. **Cancellation Policy:** Table fee will be refunded only if requested and the table is resold. If a table is not occupied by 9 AM, a table may be cancelled and resold.

Overnight stay: Westford Regency Inn at 1-800-543-7801. Mention Radio XXXVII for special rates. Room reservations should be made by January 27, 2006 for special rates. Bring your family to enjoy indoor pool, health club, racquetball courts, three restaurants, bar, etc. Night skiing at Nashoba Valley Ski Area, only 2 miles away!

Directions: From I-495, take Exit 32. Follow "To Rt. 225" sign. At traffic light by gas stations, turn right onto Rt. 110-West for 0.4 miles. The Westford Regency is on the right. Use doors on right (north) side of Inn. Ramps at both show entrances! The Westford Regency Inn and Conference Center is a 193-room hotel with 2 restaurants and over 500 parking spaces. With over 20,000 square feet of conference space, we have room to expand our future radio meets!

Vintage Radio Auction

Saturday, February 25, 2006 at 10 AM EST

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south to the Duke & Duchess Gas Station, turn left
onto Garman Rd. and follow to the auction site.

This is a collection from Missouri and will be a variety of radios, and radio-related items. A large amount of 1920s battery sets will include an Atwater Kent Model 10 breadboard radio, many horn speakers, cone-type speakers, loop antennas, headphones, console style radios, cathedral radios, tombstone-style radios, a large selection of radio-related magazines, radio books and radio catalogs. Radio tubes will include many early style brass-base, blue Arcturus, short pin UV-99, WD-12, WD-11, 201-301A, hundreds of other type tubes, lots of wood and Bakelite table radios, several phonographs and many records, 78 disc type and Edison Diamond Disc and cylinder records. We are combining this great sale with the Edward Sage mirrored radio items. We hope to see you at this event. Terms: Cash, check, Visa, M/C, 5% gallery fee.

Complete Auction & Appraisal Service*

Radio Auction

Sparton Nocturne

(Opportunity does knock twice)

This most beautiful of all Deco period style radios will be sold at our February 25, 2006 auction at our Expo Auction Center in Burbank, Ohio.* This beautiful and all original cobalt blue Sparton Nocturne is from the Edward Sage Collection. Mr. Sage of Albuquerque, New Mexico was an avid and devoted collector of Deco period furniture, mirrors, and radios. He spent many years in his quest to own objects from this period. We at Estes Auctions are very pleased to offer this beautiful radio from that era of beauty and design. Along with the Sparton Nocturne, we also offer a Sparton Bluebird, a Sparton Sleigh in cobalt blue, a Sparton Sleigh in peach and several other mirrored radios of other makes that have some damage but are fully restorable. This is a very rare opportunity to have the pleasure of bidding on these objects of beauty so make plans to be here. Terms: Cash, check, Visa, M/C. 5% gallery fee.

*The Expo Auction Center is located at 8157 Garman Rd., Burbank Ohio (Exit 204 off I-71) then south on SR #83 to the Duke & Duchess Gas Station, turn left onto Garman Rd. and follow to the auction site.

NEW DVD: Plastic Radio Repair

Bret's Old Radios
presents
**ANTIQUE RADIO
RESTORATION**

Volume 3

**Plastic Cabinet
Care &
Refinishing**

In Antique Radio Restoration Vol. 3, you'll learn to clean and polish all kinds of plastic radios - Bakelite, Plaskon, Beetle, Catalin and more - plus restore a new luster to even badly damaged cabinets! You'll repair cracks and breaks flawlessly, and learn to apply a fabulous, authentic-looking painted finish. Finally, learn to MOLD and CAST your OWN fabricated Bakelite radio parts, perfect for replicating missing louvers and filling cabinet holes! Restore all your plastic radios like new!

"If you've been thinking about trying to restore some of your old radios... these videos would be a good place for you to start! Bret... walks the viewer through old radio repair in a very laid-back, informative style... Highly Recommended!" - David Krauter, Antique Wireless Association Journal, April 2005

"I can't help but think of Bret as the 'Mister Wizard' of radio restoration... I'm compelled to recommend (the videos) highly!" - Ron Hensel, Antique Radio Club of Illinois Newsletter December, 2004

"More than any book, (these videos) and their 'You can learn to do this, too!' upbeat attitude will hopefully encourage... collectors to take the restoration plunge. I think that is their greatest contribution." - Brian Belanger, editor of Radio Age, the Mid-Atlantic Antique Radio Club newsletter, August 2004

Vintage Radio Auction

April 2006

The Collection of Dexter T. Deeley

at the Expo Auction Center in Burbank, Ohio

Estes Auctions is pleased to be selected to offer the vast collection of Dexter T. Deeley of Lake Lure, North Carolina. As a collector Dexter spent 50 years in the hobby. His first radio and the one that led to collecting all those years, was a Crosley Pup with the original box which he still had and it will be sold in this auction. Dexter was a very active member of the AWA while residing in New York. He joined the AWA in 1963 and became treasurer in 1968. He served 30 years at that position. He was the type of radio collector that would take time to help anyone who was just getting started in this great hobby. With his retirement and moving to North Carolina Dexter felt it was time to let others enjoy his collection. Among the offerings are a Grebe CR-3, CR-5, CR-6, CR-8, CR-9, CR-12, CR-13, CR-14, Grebe Clarifier, Grebe RORN, Grebe CR-18 with coils, Grebe RORD, Grebe RORH, Grebe RKAB, Grebe RORK, Grebe RORJ, Grebe Synchrophase 7, Zenith 3R, Zenith 4R, Zenith 2M, Magnavox AC-2 amp, Amrad 2634-3475, Western Electric 4D, 2B tuning unit and 7A amplifier, Western Electric loop antenna, Kennedy Type 311 portable, Kennedy 220, Kennedy 525 amp, Kennedy Model 15, Kennedy Model 5, Kennedy Model 20 Type 440, Kennedy 35 Type 445, Kennedy 281, Kennedy 521 amp, Kennedy T-3, Kennedy 110, Federal 61, Federal 58, Federal Jr. crystal set, Federal 57, Federal 110, Federal 102, Federal Pleiophone, Tuska 225, Tuska 228, Tuskadyne, Tuska Superdyne Jr., Clapp-Eastham HR, Type HZ amp, GE ER-753 crystal set, GE ER-753A, Radiola Special, Radiola 6, Radiola VII, Radiola VIII, Radiola Super VIII, Radiola Regenoflex, Radiola V, Radiola VI, Radiola 28, Radiola Grand, Radiola X, Radiola IV, Radiola III, IIIA, Radiola 24, Radiola Sr., Radiola Type RS, DeForest interpanel set, DeForest D-10 w/loop, Adams Morgan RA-10, Adams Morgan DA-2 amp, Radiola II, crystal sets DeForest DT600, AW Gamage, Radiola Bijou, Gecophone, Meago MR-101, RDO R-100A, Kilbourne & Clark, Giblin, Marvel, A.C. Gilbert and others, Crosley Type 50, 50A, 51, Type 5, 6, 52, 52SD, 51SD, Type XJ, Trirdyn 3R3, 51 portable, Super Trirdyn, Wireless Specialty 501, many horn speakers, loop antennas and **AMATEUR RADIO RECEIVERS** Breting 12, Hammarlund HQ-120, National NC-183D, National NC-300, converter & speaker for NC-300, National HRO-60 w/coils, National SW-3, RME-69, Hallicrafters HT-33 amp, HT-32 xmitr, SX-100 receiver, Hammarlund Comet Pro, Central Electronics - 100V, National HRO-500 new w/box, Heathkit DX-60, 10B, HR-10, HG-10 VFO, Knight P-55 receiver, Lafayette KT-200, Globe King 500. Also many other radios, early meters and tube testers. We will update the sale as time passes so watch *Antique Radio Classified*.
