Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest from its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

EDITOR'S COMMENTS

Radio and clocks have become such a team (like the horse and carriage of a familiar song) that it's hard to remember when the union became an integral part of our lives. This thought came to mind as we changed our clocks to daylight savings a month earlier than usual.

Somehow, this schedule change made us more aware of how complex the once simple task of resetting clocks has become. Now we find that when setting the clocks on computers, as well as the clocks on appliances, including clock radios, the process is different for each one. Even resetting a watch can be a challenge.

That's why it's a pleasure sometimes to be able just to move the hands on a grandfather clock or turn the knobs on a simple alarm clock. But, clocks, like radio, have evolved, from decorative to utilitarian, from relatively simple to more complex operations, so the union of the two was a natural course of events.

It was inevitable that radio would become an almost universally used "alarm clock," and Steve Auyer describes one of the examples — a 1950 GE Model 64. This is a nice, simple clock radio, but Steve uses it to illustrate a feature that we can't imagine living without — glow-in-the-dark dials. However, few of us may know that, in these early sets, the source of the illumination was radium-containing paint.

The link between clocks and radio is also illustrated by Richard Arnold's article tracing the history of the Sonora Company. This company evolved from a manufacturer of clocks in the early 1900s, to a manufacturer of windup phonographs, and, eventually, of radios and vacuum tubes.

A Model WAU-243 table set first piqued Richard's interest, but he then followed the company's history through changing products, international connections, two bankruptcies, and its demise in 1958. It's interesting that the company motto "Clear as a Bell" prevailed no matter what the product, clock or radio.

Restoring a set to its original condition, just as it came from the store, is another way of pursuing radio history. Don Watson achieved this goal in restoring the cabinet, as well as the chassis, of his Sears Silver-tone 8052. However, he has had a little more trouble with the history of his set — the year of manufacture is in question. As always, we

hope Steve gets some input from readers.

Ray Chase continues to give us more valuable input on what's going on out there in the auction world. This time he covers three smaller auctions, which together totaled less than \$40,000. Though there were no highly collectible items, over four dozen microphones selling from \$3 to \$350, highlighted the Dale Putt auction of the Robert Wilson collection.

In the Parzow auction of the Lee Kemp collection, radios were a small percentage of a general auction and were disposed of in about 20 minutes. Four items — two Atwater Kent breadboards, and two Federals, a 61 and a 110 — accounted for \$2,800 of the total of about \$5,000.

The September Estes auction is described as an old-fashioned, clean-out kind of sale. Only one item, an Atwater Kent breadboard, sold for over \$1,000, and only 47 items, for over \$100. Ray emphasizes that these were not "soft" prices, but that they simply reflect the fact that many of the items were left over and had not been included in previous auctions due to space or time.

This auction also illustrated the doggedness of collectors when on the auction circuit. To an outsider, Ray's description of the auction weather conditions would have made giving the whole thing up an easy choice. Not so for the radio collectors — they hung in there despite the rain and cold.

A.R.C. Benefits. Be sure to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; the Web, www.antiqueradio.com; books shipped free in the U. S. by USPS media mail; and for current subscribers, a 10 percent discount on all book orders.

Coming Radio Events. Spring in the air prompts collectors to begin to emerge from hibernation and get to more events. Among the choices this month are 24 meetings, 15 meets, and 5 auctions. Be sure to get out and enjoy at least one of each.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

On the cover is a photo of Steve Auyer's GE Model 64 table radio, an example of the subject of his lead article "Glow-in-the-Dark Radios." Superimposed on the radio is an enlargement of the radio's glowing dial.

WITH THE COLLECTORS

Glow-in-the-Dark Radios

BY STEVE AUYER

In this article, Steve Ayuer wonders about how many of us have thought about the literal meaning of "radioactive" when we joke about our hobby. He points to some interesting facts that give us food-for-thought as we look at our clock radios. (Editor)

I always get a kick out of seeing a radio collector wearing one of those "I'm Radio-Active" badges. Depending upon what they collect, there may be more truth in their badges than they know. Why? Well up until the mid-1970s a number of clocks, including those used in clock radios, used luminescent paint that contained radium!

Backing up a bit, we need to remember that there are a number of materials that can "store" energy, and then later release it as light. Depending upon the material, the source of the energy may be heat, mechanical deformation, an electric field, visible light, ultraviolet light, etc.

A commonly used material is zinc sulfide, which, after exposure to sunlight, will give off a green glow for several hours. The only problem with using this on clocks is that when you wake up at 3 A.M. and try to read the time, the zinc sulfide has used up its stored energy and is no longer glowing.

However, early in the 20th century, experimenters found that by mixing small quantities of a radioactive material, such as radium in with the zinc sulfide and some sort of binder, they would end up with a paint that would continue to glow "forever." Basically, the radiation released by the radium was continuously recharging the zinc sulfide.

THE GE MODEL 64 CLOCK RADIO

A good example of a clock radio that uses

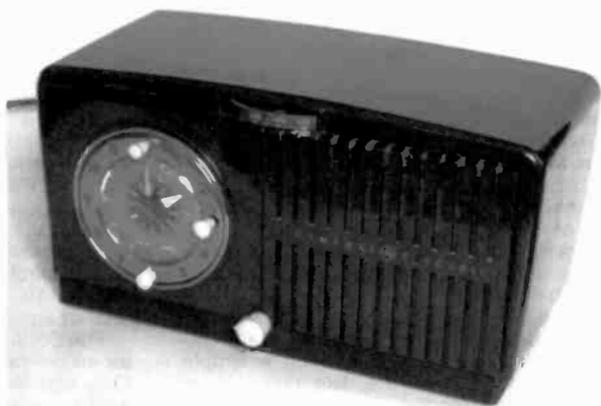

Figure 1. The GE Model 64 clock radio.

Figure 2. The clock face of the GE Model 64 in daylight.

such paint is the General Electric Model 64, which sold in 1950, and is shown in Figure 1. Actually the same basic chassis was used in a whole series of radios: the 64, 65, 500, 501, 505, 506, 507, 509 and 530, with differ-

ent model numbers indicating different cabinet colors, whether a switched AC outlet was included, and whether a model had a glow-in-the-dark clock.

The clock face of the Model 64 in daylight, shown in Figure 2, is the same clock face in the dark, shown in Figure 3. Figure 3 is a time exposure — the actual glow isn't quite this bright.

Just because your clock face doesn't appear to glow, doesn't mean that it's not painted with a radium-containing paint. What happens over time is that the glow becomes fainter and fainter. This is not due to the radium decaying, as it has a half life of 1,600 years, but appears to be due to the fact that extended exposure to the radiation damages the zinc sulfide crystals. The result is that they lose their ability to absorb energy and release it as light.

A tip-off is to take a close look at the hands and markings on the clock, shown in Figure 4. If they appear to be painted with a light greenish/yellowish paint, especially if the coating is a little "lumpy" or discolored in spots, as in Figure 4, you've probably got radium-containing paint.

So, if you have one of these sets, do you need to be worried? The answer is probably not — just as long as you are not physically close to the set for many hours every day. It would not be a good idea to have one of these sets on the nightstand by your bed with the clock face a foot from your head!

Use of this radium-containing paint was not limited to clocks. During World War II many controls and instruments used liberal amounts of this paint to provide a strong glow in a darkened cockpit. There have been accounts, possibly anecdotal, of some collectors setting off radiation detectors when they shipped a large quantity of these items at one time.

So to the casual collector, the risk is low — but still something to be aware of.

(Steve Auyer, 3925 Cloverdale Circle, Liverpool, NY 13090)

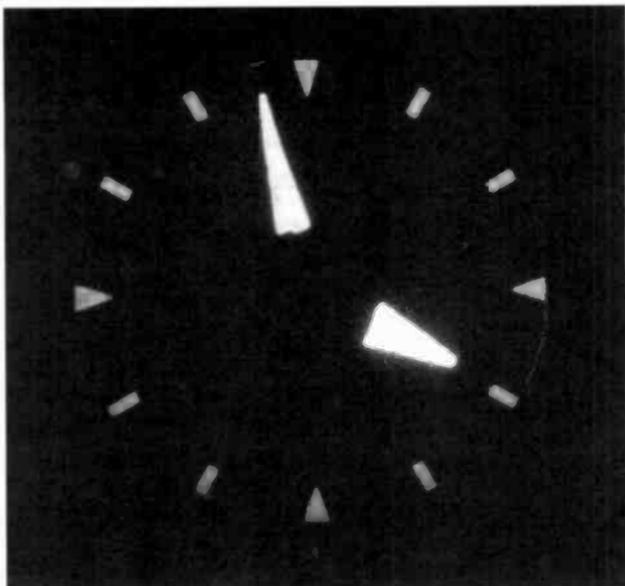

Figure 3. A time exposure of the face of the GE Model 64 in the dark.

Figure 4. The hands and markings on this clock are a little lumpy and discolored, indicating the likelihood of radium-containing paint.

Steve Auyer has been interested in the history of radio since he toured the WLW 500 KW transmitter site in 1963. Lately, his interests have turned to researching and documenting local AM broadcasting history. Since his retirement from Lockheed Martin, he has spent time coordinating the Amateur Radio exhibit at the Museum of Science & Technology in Syracuse, New York.

WITH THE COLLECTORS

Sonora — From Chimes to Radio “Clear as a Bell”

BY RICHARD ARNOLD

The focus of this article was first going to be the Sonora Model WAU-243. However, one bit of information led to another, and before he knew it, Richard Arnold was deep into the story of a company with an interesting history in radio. (Editor)

The image of a bell and a slogan “Clear as a Bell” proved to be appropriate no matter what product the Sonora Company was touting throughout its history — from clocks to phonographs to radios. Beginning in 1908 as the Sonora Chime Company at 5 Cedar St., New York City, the company patented its system of chiming bells to be put into its clocks. These Sonora chime bells, actually shaped like bells, were so very melodious and had such an accurate pitch that they were patented on their manufacture and quality.

Sonora Chime Company started making two-movement chime clocks around 1900. The company made only a few of its own clocks before Seth Thomas acquired the patent rights in 1908.

Seth Thomas's first Sonora chime models appeared in the company's 1909-1910 catalog. These clocks, using the Sonora “nest of bells”

chiming mechanism, are highly sought after today. Sonora also made a chime rod mechanism. An example of a Seth Thomas clock with a Sonora chime mechanism is shown in Figure 1.

THE SONORA PHONOGRAPH COMPANY

Back around 1910, many companies were trying to get into the manufacturing and selling of one of the hottest items on the market, the phonograph. One of these companies was Sonora, which used “Clear as a Bell” as its slogan, touting the fidelity of its machine's sound reproduction.

The Sonora Chime Company was reincorporated in February of 1913 as the Sonora Phonograph Company by its founder George Brighton. It was located at 78 Reade St., New York City.

An earlier attempt by the Sonora Phonograph Company in 1909 to sell horns and hornless machines made by a Swiss company named Paillard had run into legal problems and went nowhere. Paillard at that time was also a major manufacturer of music boxes.

A company named Presto Products produced the Sonora phonographs. Sonora also bought thousands of its phonograph motors from a Swiss Company named Bawdy.

Sonora was one of the companies that were allowed to exist by the big three (Victor, Edison and Columbia) to avoid threats of a trust suit. Because Sonora had paid a lot of money in royalties on patents held by the big three on a per unit basis, it could only compete with them on their high-end machines.

In fact, Sonora ads say, “The Highest Class Talking Machine in the World.” The prices ranged from \$60 to \$2,500. The hardware varied from unit to unit indicating that they were most likely made by various manufactures. The fancy cabinets were Sonora's best selling point, along with its “award-winning magnificent, pure, clear, rich mellow tone.” In

Sonora
Clear as a Bell

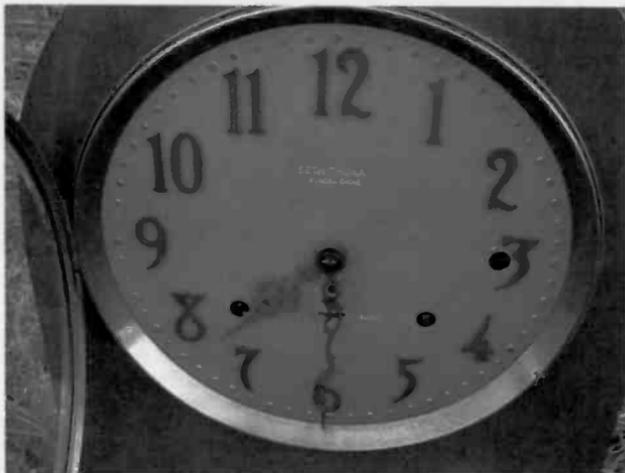

Figure 1. The face of this Seth Thomas windup clock is marked “Seth Thomas, Sonora chime.”

Figure 2. Sonora also produced phonograph records. This record label carries the Sonora name and "Clear as a Bell" slogan.

1915, the Sonora Phonograph Company won the award for tone at the Panama Pacific Exposition.

Sometime in the middle of 1919, the Sonora Phonograph Company opened an assembly factory in Saginaw, Michigan, and the company headquarters was moved there in the summer of 1927. At that time, Michigan was the center of cabinet production, especially in the Grand Rapids area. Sonora at this time also had a branch in Oakland, California, that later became Magnavox.

SONORA RADIO AND TELEVISION CORP.

During the late 1920s and the Depression years, Sonora had many rough times, including going into receiverships and bankruptcy. The company emerged from bankruptcy on March 10, 1938, under the Articles of Incorporation as the Sonora Radio and Television Corporation.

The new company's corporate offices were located in Room 14108 of the very large Merchandise Mart building in Chicago, Illinois. It was estimated that the gross amount of business that would be transacted during the following year (1939) would be \$40,000.

Sonora sales in the year 1940 were \$200,000. On a list of 18 companies it was Number 14. It

Figure 4. Sonora exported radios to France, such as this Sonora Model F1.

was doing better than Detrola, Farnsworth and Sparks Withington and tied with Wells-Gardner. Then the company moved again in September of 1943 to 325 N. Hoyne Ave., Chicago, Illinois.

I came across a 78 rpm record put out by the Velvetones in 1946-1947 that was released on the Sonora label, shown in Figure 2. The label reads, "The Sonora Radio and Television Corporation." The songs are, "It Just ain't Right" and "Reverse the Charges."

Another point of interest here is that if you have a Sears Silvertone radio with the first three numbers of the chassis as #135, that means your radio was made by Sonora.

THE FRENCH CONNECTION

In 1923, Sonora phonographs were being sold in two stores in France. The stores, both in Paris, were called "The Innovation" and "Champ."

I found a picture of a Sonora radio factory located at 5 Rue de la Mairie, Paris, France. Actually it was located in a prosperous suburb of Paris called Puteaux. There is a sign in front of the plant that says "L'Amerique Garantie avec un Sonora Radio" — you are guaranteed to hear American stations on a Sonora radio. See Figure 3.

In 1932, the American Sonora Company exported cathedral-style radios to France. A typical radio is shown in Figure 4. Figure 5 shows a French advertisement for Sonora.

In the same year, after about a year or so of gearing up for production, the French
(Continued on following page)

Figure 3. Sonora also had an European presence. This illustration shows a French Sonora factory.

Figure 5. A French Sonora advertisement.

(Sonora, continued)

Sonora Company, (Sonora SA France), started making a Model F1, the "Puissant," for the French market. This set is shown in Figure 6. Sonora became an important and popular brand in France, and the French company never exported any of its radios to the United States.

There is a new French Sonora website that has all kinds of information, including a lot of color photos of French Sonora radios — www.radio-sonora.com/index.php. The owner of the site is Mr. Philippe Delmotte, who has been very helpful and has given me permission to use whatever information from his site that I need.

THE CANADIAN CONNECTION

Sonora also did business in Canada. The company called the Sonora Corporation of Canada Ltd. had two addresses: in 1924, the address was in Bridgeburg, Ontario; in 1931, it was 79-181 King Street West, Toronto, Ontario. The company made only 15 models, and in 1932, due to the Depression, moved back to the U. S.

I have talked to Lloyd Swackhammer, author of the book *Radios of Canada*, who has been very helpful in my Sonora research. Looking for the

Canadian Sonora models listed in the schematic books of the Radio College of Canada, Mr. Swackhammer found the following information on Sonora radios made for the years 1929-1933.

Model Year	Models
1929-30	A 40, A 44, 31, 33
1930-31	36, 36A & C38
1931-32	D50, D70
1932-33	S7, S10, S12, 8AW, D90

The D90 was also identified as a chassis, and used in the Frasser and Cartier models of Sonora Radios. The 1930-31 Sonora Models C34 and C35 were made for Sonora by the Stewart-Warner Speedometer Corporation of Belleville Ontario, which changed its name in 1931 to the Stewart-Warner Almirite Corp. Ltd., and continued in business for many years.

SONORA MODEL WAU-243

The Sonora set that piqued my interest in the company is my Model WAU-243, shown in Figure 7 and 8. My sales catalog has very good descriptions of Sonora sets. Here is what it says about the Model WAU-243:

"Sonora's special knack for quality and heads-up creative styling is dramatized in this peer-

(Continued on page 12)

Figure 6. The French-made Sonora Model F1.

Their Song

A chance spin of the dial and the room fills with music... music and memories. Memories of a boy and girl, slowly circling the dance floor... aware only of each other and the throbbing rhythm of their favorite song.

Now, as her heart beats in tune with that same familiar melody, it seems the orchestra is right there in the room... playing for them again.

Such is the flawless, life-like quality of tone achieved by SONORA Radios in the reproduction of music and the human voice.

At SONORA's modest and reasonable prices, this triumph of tone fidelity becomes all the more a miracle of radio engineering.

When it is again possible for you to choose a new radio, a SONORA audition will prove a delightful and convincing experience.

SONORA RADIO & TELEVISION CORPORATION
325 North Hoyne Avenue, Chicago

Bring the Boys Home Sooner — Buy War Bonds and Stamps

War Bonds are the world's safest investment... guaranteed by the U. S. Government. They cannot go down in value. The longer you hold them, the more they're worth. Later, they'll assure you of the money to buy the radio, and many other necessities you will want and need.

Sonora
Clear as a Bell

Figure 7. A World War II-era magazine advertisement for Sonora.

(Sonora, continued)

less plastic model. You will take a keenest pride of possession in the rare beauty of this original Sonora design. You'll get a lll-tening-lift and everlasting pleasure from that famous "Clear as a Bell" tone. And you'll marvel at the tuning ease of this sensitive performer, whether you bring in your favorite stations by automatic push button, or by fingertip touch of the smooth giant rotor dial. Finally, you'll be pleased as punch with the sensible price of this refreshingly different Sonora."

The Model WAU-243 is an AC-DC superhet ivory plastic table model that sold for \$29.75. It tunes the complete standard broadcast band from 535 to 1720 KC, plus police calls. It has push-button tuning for four favorite stations; a built-in "Sonorascope" loop antenna, so that no aerial or ground is needed; a 5-inch dynamic speaker; and an automatic volume control. It is Underwriters approved.

The streamlined, ivory plastic, molded cabinet has a giant maroon rotor dial and a graceful louvered grille. The dimensions are 11.4" x 6.75" x 6.4". The tube complement is one each of the following: 12SA7, 12SK7, 12SQ7, 35L6, and 35Z5. The shipping weight is nine pounds.

SONORA TUBES

Sonora was also putting its name on radio tubes. I found an address for the Sonora Tube Company located at 220 South State Street, Chicago, Illinois. I have come across pictures of blue Arcturus tubes with the Sonora name engraved into the base. According to George H. Fathauer at tubes@qwest.net, Sonora, along with other tube types, had a series of 15V filament tubes that were unique to Sonora radios. They came in boxes printed "Sonora A-C Tubes made especially for Sonora Radio sets." Developed by Arcturus, the tube used a carbon rod for the heater. It had a long thermal time constant allowing operation on AC. Some of the tube numbers were RA-1 and RE-1.

When Sonora Radio and Television Corp went bankrupt in 1929/1930, they owed the Arcturus Tube Company \$18,458.

Looking over all of this history, it seems that Sonora Corporation had a rough existence — moving in and out of receivership a number of times, fighting receiverships, having to sell off assets to make others happy, bankruptcies, big shots stealing money. Finally, on January 1, 1957, the State of Illinois decreed the Sonora Radio & Phonograph Corporation bankrupt again and for the last time. Then on December 23, 1958 a decree — Number 164184 — was issued by the State of Illinois dissolving the corporation

Figure 8. The Sonora WAU-243 features a large tuning dial on the top of the radio and mechanical push buttons.

Special thanks to the following for providing information included in this article: Philippe Delmotte, France, www.radiosonora.com.php; Lloyd Swakenhammer, author of *Radios of Canada*; Sonny Clutter, *The Radiola Guy*, sonny@radiolaguy.com; and all of the radio collectors that I have contacted over the course of this research who have contributed a little bit here and a little bit there. All of these "little bits" helped to put this article together. Now because of a cumulative effort, we know quite a bit more about this elusive company.

(Richard Arnold, P.O. Box 275, Lone Grove, Oklahoma 73443)

Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. His interest is primarily in cathedrals and 1920s battery sets, and his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. His prize is the 1932 Jackson Bell Peter Pan featured in the June 1991 A.R.C.

RESTORATION TOPICS

Sears Silvertone 8052

BY DON WATSON

Another flea market find for Don Watson offers the opportunity for a satisfactory restoration project. But as always, questions arise which some reader may be able to answer. (Editor)

Part of the enjoyment of the radio collecting hobby is pursuing the next restoration project or parts required for it. My wife and I like to attend as many flea markets as possible during the summer months, and many times we come home with nothing more than tired feet. We are always looking to give new life to an old radio, and we found this one at the flea market in Elkhorn, Wisconsin.

Half the fun is negotiating a price, something you can't do online. After the trip home from the flea market with a set, the next phase is disassembling it to see just what you have purchased. This is where it gets very interesting. For example, on a previous occasion, I brought home a small Bakelite radio and upon removing the chassis, I found that it had been home to thousands of bugs. Where had this radio spent its working life?

THE SILVERTONE 8052

The Silvertone, shown in Figure 1, was a pleasant surprise, considering that I had no idea of what I had purchased. Still, I could see that it had a lot of potential.

The radio is a 6-tube AC/DC set using local tubes typical of the era. The cabinet has a walnut veneer on top and sides and what appears to be burled walnut on the front. The secondary wood appears to be poplar. The cabinet was refinished in satin polyurethane, and these hardwoods are elegant. My restoration goal was to bring it back to the same working order and appearance that it had the day it was brought home from the Sears Roebuck store.

The controls are volume, power, tone, and tuning, with four push buttons. The chassis uses a 3-gang tuning capacitor for a true tuned RF stage, and it has provisions for an external antenna. The speaker is a 5-inch PM mounted on a baffle board. The output transformer is tapped and is used as a hum-bucking coil. I replaced all the paper capacitors; however, the electrolytic

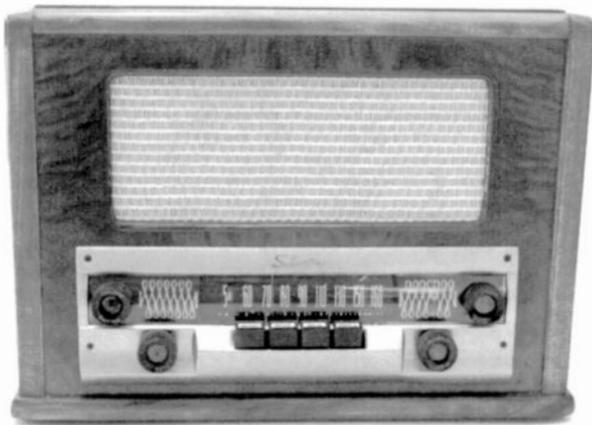

Figure 1. The restored Sears Silvertone 8052.

is an FP type can that is still good.

There was one problem: After playing for a few minutes the radio would go silent. The only capacitor I didn't change was a mica that was leaky and loaded down the first audio stage. After I replaced the leaky mica, everything worked fine. The push-button assembly is very well engineered and has a backlash adjustment.

Here is where the history trail starts to run cold. This radio was manufactured in 1949 and the chassis is Number 101.808. The same chassis with few changes was used in the Model 7054, which Rider dates to pre-March of 1942. *Radio Daze* dates the Model 7054 to 1947.

Rider makes reference to the Models 8052 and 7054 in Volume XVIII. Perhaps some A.R.C. readers can unravel the mystery. Could this chassis have been produced prior to World War II and reintroduced after the war in a different cabinet? This radio has the quality that faded away in succeeding years.

(Don Watson, 538 Yarmouth Rd., Elk Grove Vlg., IL 60007-3455)

Don Watson, a retired communications repair technician, has been collecting radios since the 1950s. He received his Amateur license at age 16 and has been an Extra Class Ham radio operator, K9DDO, since 1961. His hobby is restoring the electronics and cabinetry of vintage sets.

AUCTION REPORT

Dale Putt Auction — Robert Winter Collection Blue Ball, Pennsylvania — July 1, 2006

REPORTED BY RAY CHASE

This was a rather unusual radio auction, not the massive Estes style affair and not having a great many high-end radios. What it did have was a large collection of microphones, a lot of phonograph records, many post-World War II radios, and a lot of paper goods. This was the collection of Robert Winter of Lancaster County, Pennsylvania, who was a World War II net radio operator and a professional musician.

Blue Ball, Pennsylvania, is located in the heart of Pennsylvania Dutch country and this was a typical country auction held in the local firehouse. There was neither a buyers' premium nor a state sales tax at this sale since it was a single owner's sale. The sale was also an opportunity for new collectors or flea market dealers to obtain goods at very reasonable prices.

Approximately 334 lots were sold for a total sale price of about \$9,500. Although the average price per lot was \$28.50, nearly half the lots sold for \$10 or less and fully one-third sold for \$5 or less. While many of the radios were not in the highly collectible category, they were generally in decent shape and would make a good starting point for a fledging collector.

On the other hand, the microphone collectors made their presence known, and many of the microphones were sold in the \$100 or more range, as were some of the more collectible or older radios. One could also witness the decline of the collectibility of phonograph records by the minimum prices realized. Certainly the continuing technical advances in music storage have made the need to collect phonograph records a declining hobby. The auction started at 9:10 A.M. and was completed at 12:45 P.M.

Although many items are included without model numbers to give a sense of the event, many other low cost items and items in poor condition or nonspecific descriptions are omitted. Also not included in the listing are several parts lots of knobs, cords, capacitors, etc., which sold for \$1 to \$22 per lot, and over a dozen tube lots of all types, of up to 100 tubes per lot, which sold for \$3 to \$55 per lot.

e=excellent, vg=very good, g=good, f=fair, p=poor, wk=working, nwk=not working, PS=power supply, PB=push buttons. All prices have been rounded down to the dollar. Some low cost items and items in poor condition or nonspecific descriptions are omitted

This auction included moderately priced radios. Shown are some plastic cabinet sets, along with earlier sets in modern cabinets.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

Parzow Auction — Kemp Collection Frederick, Maryland — December 16, 2006

REPORTED BY RAY CHASE

This was a very large general auction just before Christmas that also happened to contain a collection of radios from Lee Kemp of Frederick, Maryland. Toy motors, steam engine parts, and telegraph equipment were also included. The venue was the Frederick, Maryland, Fairgrounds Building. It is fairly common to have large-scale auctions just before Christmas when people are supposedly in a "buying mood." Fortunately, the radios, etc., here were sold first thing, so one did not have to wait all day for them to come up.

The auction started at 9:00 A.M. and probably continued well into the evening, as there was that much to sell. The radio, telegraph, and toy motors were dealt with in the first 20 minutes or so.

There were quite a few desirable collector items in this auction, and some of them were sold to "left bids" — bids that are left with the auctioneer when the bidder cannot attend in person. While most auctions are advertised as "with no reserves," the left bid is sometimes a disguised reserve that the consignor decides is the minimum that he will sell the item for. In that case, the item returns to the seller.

I have no idea if that was the case here, but, since there was no viewing or inspection prior to the morning of the auction, one can only specu-

This early Atwater Kent Model 10 with binding posts on the coils sold for \$800.

Another Atwater Kent breadboard, a Model 12, also sold for \$800.

late. However, most of the desirable radios were type-listed in the preauction advertising, so perhaps someone left bids without examining the merchandise.

The magazines were not grouped with like titles or age and were rather haphazardly presented. Many were not in good condition, although there were some desirable selections among them. Some of the telegraph items were grouped and sold "by the piece, take them all," so you had to take four sounders even if you only

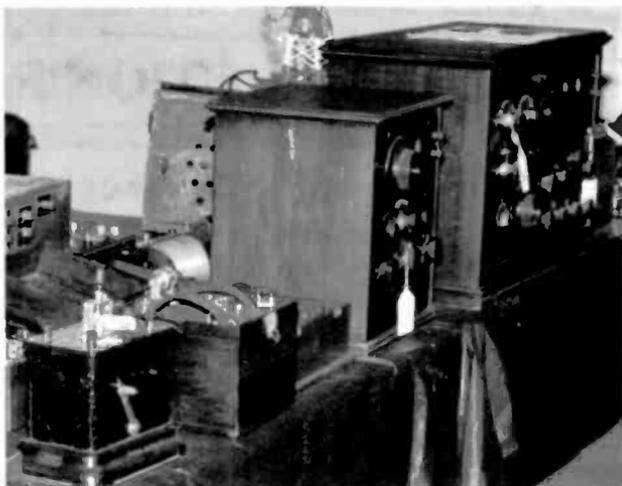

wanted to bid on one.

Auctioneers have some conventions that may or may not be applicable to specialty items. The lesson here is to deal with an auctioneer who has knowledge of the merchandise that you are planning to sell and is familiar with the type of buyers who are apt to be interested in those items.

Not included in the listing below were several vacuum tube lots which sold for \$5 to \$65 per flat. I have included the listing of toy motors etc., in case they may be of interest. A 10 percent buyers' premium was charged at this auction.

e=excellent, vg=very good, g=good, f=fair, p=poor, wk=working, nwk=not working. All prices have been rounded down to the dollar. Some low cost items and items in poor condition or nonspecific descriptions are omitted

Some samples of the toy motors and steam engines also offered in the auction.

AUCTION REPORT

Estes Auctions Seville, Ohio – September 30, 2006

REPORTED BY RAY CHASE

This auction at the end of September was held in the Estes auction barn in Seville, Ohio, and was sort of a clean out auction to deal with an accumulation of moderate quality radios. It really was an old-fashioned barn sale, as the facilities at Seville are quite primitive. It is an old barn with a dirt floor and old church pews arranged in a tiered fashion. Richard Estes planned a similar sale a few weeks later, but I could not attend that one.

On first viewing, it looked like all the world's "3-dialers" were assembled here, but there were some better items mixed in as well. There was a large selection of vintage TVs, some good, some not so good, along with many magazines, miscellaneous paper and tubes.

As usual at this site there was an outside sale of box lots and lesser quality items on Saturday morning at 8:00 A.M., prior to the main sale.

The weather on Friday evening was cold and damp with spotting rain. The outside area was loaded with about 15 tables where stuff was piled on and under the tables and then covered with the ubiquitous blue tarps. In between rain showers, one could peek under the tarps to see what goodies were hidden there. The weather was not promising for Saturday so a dreary weekend was in the offing.

True enough, Saturday was cold with intermittent light showers. A "salamander" portable space heater was used in the barn to raise the inside temperature. It was helpful, but then had to be turned off during the auction due to the noise it generated. During the latter part of the day, the barn

became quite cool.

Outside, at 8:00 A.M. the rain was fairly strong but eased off by 8:30, so the outside crew gathered, and the auction commenced at about 8:45. The modus operandi was to uncover one table at a time and sell off the goods as fast as possible while the rain was light or intermittent. In addition to the auctioneer (one of Richard's staff of licensed auctioneers), the clerk, and several handlers, one worker was detailed to hold an umbrella above the clerk so her tally sheets would stay dry. The rest of the crew and all the prospective buyers had to tough it out with whatever protection they came with.

This was a typical "walk-around" auction where you have to be nimble to stay positioned in the crowd in order to see what is going on. You also must be ready to move quickly out of the way any goods that you buy while trying to keep pace with the next lots coming up. You end up staking out a spot of real estate where you can assemble your pile of purchases pending later removal to your vehicle. Not for the faint-of-heart, especially in bad weather.

There was a horde of goods, many sold in large batches and many sales logged at \$1 or \$2. An occasional goodie would get up into the two or even three figures. It was a lot of fun in a macabre way, and many trucks and car trunks were stuffed with flea market goods. It took until 10:10 A.M. to finish off the outside sale, and after a short break, we retired to the warmed up barn to participate in the main auction.

Shown here are some of the more interesting items in the auction: the two Atwater Kent breadboards, center and right, an Atwater Kent 32 on the left, with a Crosley 51 next to it; rear left, are several Zenith Trans-Oceanics, and on the shelf are several unidentified battery set items.

Row-upon-row of battery-operated radios, mostly 3-dialers.

In the beginning there was a good crowd of buyers in the barn, as there were some better items in this sale. But, by 3:00 P.M., the crowd had thinned considerably, and by 4:30 only the hardiest remained. The weather stayed grim all day with some rain continuing and the barn was getting quite chilly. At one point many of the tube box lots, which I did not record, were gathered at the side and auctioned off separately.

After 3:00 P.M., I did not record many lots, as most were selling for \$5 or less; therefore, the total of the 483 lots that I did record is probably short by 100 to 200 lots. At 4:30, the audience was invited to choose what of the remaining items they wanted put up for auction. Anything left unsold would be carried over to the next barn sale.

I left at about 4:45 P.M., at which time the auction was essentially over. Unfortunately, as happens at many of these auctions, I occasionally miss the sale of an item, and this time I could not find in my notes the record of a nice RCA TV on a stand that I had photographed. Overall, the 483 lots I did record totaled up to a bit over \$25,000.

As indicated earlier, this was not a high-end sale as only one item sold for over \$1,000 — an Atwater Kent breadboard for \$1,700. There were only 47 sales that drew bids of \$100 or more. Yet there were some good items here and if you were willing to brave the weather and the chilly temperature, there were many bargains to be had. As usual, there were many tubes organized and han-

dled by Bob Dobush. An added plus was that there is no buyer's premium at this location, so the listed final bid price is the sale price.

e=excellent, vg=very good, g=good, f=fair, p=poor, unk=unknown condition, N.O.S.=new old stock, wk=working, nwk=not working, WT=with tubes, NT=no tubes, BB=brass based, TT=tipped tube, SW=shortwave, PS=power supply, PB=push buttons, WE=Western Electric. All prices have been rounded down to the dollar. Some low cost items and items in poor condition or nonspecific descriptions are omitted

AC Dayton 3-dialer, NT, g	\$55

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

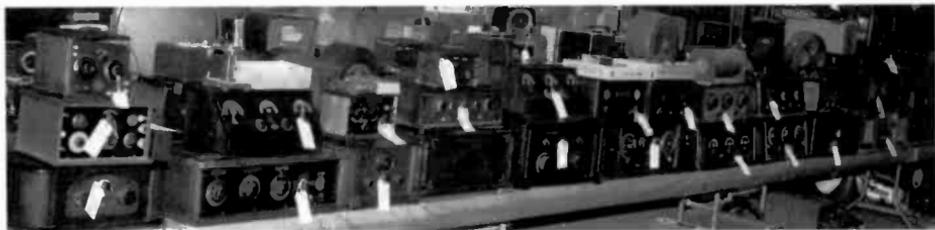

Cathedrals and tombstones from the 1930s, plus some cone speakers.

(Ray Chase, 1350 Marlborough Ave., Plainfield, NJ 07060; Estes Auctions, 7404 Ryan Rd., Medina, OH 44256; (888) 769-4992; estesauctions@aol.com)

Ray Chase has been a radio enthusiast and a collector of many types of radios for years. Currently, he specializes in World War II electronics equipment, as well as early battery superheterodynes. He also has an extensive collection of radio documentation and ephemera.

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. *Antique Radio Classified* welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

Business Card (2nd....)	2 x 3 3/4	1 1/4 x 2 3/8	1 1/4 x 2 3/8	1 1/4 x 2 3/8

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

	Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

A.R.C. RATES & POLICIES

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.); Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and non-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month!

Subscribers:

- First 20 words: FREE*
- 29¢ per word for extra words over 20 plus
- 10¢ per word for a shaded ad (count all words including free words)
- * Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

- 47¢ per word plus
- 10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing (If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e mail, etc. count as one word each. Hyphenated words count as two words.

WANTED: Victor 245 amplifier; oval bezel for 1930s Airline; AK20 w/box, Bakelite 2-tube chassis. Frank Kamer, 12432 Elizabeth Cove, Midwest City, OK 73130-4931. (405) 769-4645. E-mail: fkamer@cox.net

RATE FOR ADDITIONAL WORDS:

29¢ per word

FIRST 20 WORDS FREE!

Cash OK for small amounts.

Your payment helps to keep A.R.C. healthy!

WANTED: Would like to buy a vintage crystal radio.

FOR SALE: Beitman radio books and Sams Transistor books. Kenneth Gregory, 5180 Ada Ave., Beaumont, TX 77708. (409) 898-7270. E-mail: kenspage38@hotmail.com

IMPORTANT ELECTRONIC COLLECTABLES FOR SALE!

1. Exceedingly Rare 100 year old Nernst Light Bulbs

Early incandescent lighting that proved impractical therefore unsuccessful. - Larger bulb w/filament \$3500 - Smaller bulb w/o filament \$1500

2. Col-R-Tel 1955 Color Television Converter. \$4500

Turns a B&W TV into a true color television using a mechanical wheel-like a color scanning disc. Superb working example comes with restored Philco 50T-1404 B&W TV.

3. Edison C-2 Radio Phonograph Combination ~1928 \$4200

Near mint restored condition. The only electronic phonograph to play both vertical & lateral recordings. Low production—only a few still exist.

4. Edison C-4 Radio-Phonograph ~1929 \$2200

The last of the great Edison phonographs! Excellent restored condition. A very scare piece.

5. Philco 48-700 B&W 7" Table Model TV ~1948 \$950

Uses pre-war electronics. A never sold example that was purchased from the dealer. It still has the price tag on it!

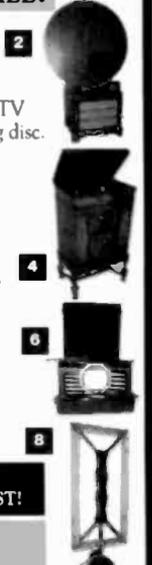

6. Pilot 3" B&W TV ~1949 \$750

In an original carrying case with a very rare original clip-on accessory magnifier lens. Very clean piece that was restored 15 yrs ago by Dave Johnson of Chicago.

7. Stromberg-Carlson No.10 Floor Model \$450

Cone speaker. Nearly new condition.

8. Loop Antenna - \$125.00

Sargent Auction Service

Complete Auction Services in the South and Southwest

Vintage Radios at Auction

Saturday, May 5, 2007 – 10 am Central

Regency Hotel and Conference Center

11350 LBJ Freeway at Jupiter Road, Dallas, Texas

Also, this sale will be conducted live via internet. www.NAALive.com

Items are available for viewing now at www.sargentauction.com

Sargent Auction Service will be offering for sale radio and related items from several consigned collections, including the fine private collection of Mr. Keith McManus. Because of needs beyond his control, Mr. McManus has decided to sell his excellent collection of 20+ years. This collection consists primarily of battery and early electric sets, of which many have been cosmetically restored. Included is one of the finest original examples of a Blue Neutrowound radio. Includes horns, speakers, tubes, Zenith Transoceanics and other portables, Collins 75-A4, DeForest F-5 and D-12, Radiola 26 portable with home battery box, etc. Additionally, numerous cathedral and tombstone radios will be offered. Most items will be sold without reserve.

Auction items will be available for viewing on location beginning at 8 am, May 5 or now at www.sargentauction.com. Contact us for information concerning internet bidding, either live or proxy at Jim@sargentauction.com

Terms: Cash, check, Visa, M/C and Discover 5% Buyers premium, (10% if via internet bidding)

All items will be sold "as is, where is". Shipper will be onsite to handle packing and shipping needs.

Please contact us with any questions concerning this or future auctions.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Radio Auction Sparton Nocturne

at the Expo Auction Center
8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love's Truck Stop, turn left
onto Garman Rd. and follow one mile to the auction site.

Estes Auctions will be offering this beautiful Deco-style radio at our April 28, 2007 auction. This radio has the original frame, the original cobalt blue mirrored glass. The radio cabinet is original and has the factory paint, the receiver is correct and also original. This radio was a Teague-designed radio for the Sparton Radio Company. It was the very essence of Deco when it was introduced. Only the very affluent, movie stars or the large luxury hotels of that period could afford the purchase of these radios. As a bonus to this auction, we will also offer a large diameter cobalt blue Sparton dealer mirrored advertising sign. It would be a perfect match with the Sparton Nocturne. Consider the purchase of this radio an investment as it will certainly keep climbing in value. Make plans to be at this superb auction. Terms: Cash, check, Visa, MC. 5% gallery fee.

Radio Auction

The WLW

“Crosley Super Power Receiver”

at the Expo Auction Center
8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love's Truck Stop, turn left
onto Garman Rd. and follow one mile to the auction site.

Estes Auctions has the rare privilege to offer one of the rarest console radios ever produced. The Crosley “WLW” is a radio that stands as a monument to the great radio era in the 1930s. Powell Crosley was a visionary in the early days of radio, the WLW Super Power receiver was a crowning achievement for Powell Crosley, very few were produced and sold. I am sure the number of these radios number less than five. This is an opportunity for a collector to own a piece of radio history. It would be a major find for a museum. We will offer this most important item of radio history at our **April 28, 2007** auction. Also selling that day: a 25-tube Zenith 1000Z Stratosphere, a Sparton Nocturne with all original glass, cabinet, and receiver. Please make plans to be at this one-of-a-kind radio auction. Terms: Cash, check, Visa, MC. 5% gallery fee.

Radio Auction

Zenith Stratosphere

at the Expo Auction Center
8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love's Truck Stop, turn left
onto Garman Rd. and follow one mile to the auction site.

A beautiful Model 1000-Z 25-tube Zenith Stratosphere to be sold in our **April 28, 2007** auction. This radio is complete and in working condition. The Zenith Stratosphere is the "ultimate" prize for a Zenith collector or the devoted radio collector of quality-made radios. This beautiful piece of radio history will be sold in the same auction with the "WLW" Crosley Super Power receiver and the "Sparton Nocturne." We are fortunate to be able to bring these rare radio objects of beauty to the radio collectors and provide the opportunity for someone to be an owner and caretaker of these important radios. Make plans to attend this very rare radio event. Terms: Cash, check, Visa, MC. 5% gallery fee.

Plaskon, Beetle, Tenite & Styrene sets.**

Includes history, 3,000 radio listings with photos,
120 manufacturers

\$37.95 - Softcover

Everything stocked and shipped promptly — Radio is our middle name.

**A.R.C., P.O. Box 2, Carlisle, MA 01741 — Toll Free: (866) 371-0512
Fax: (978) 371-7129 — E-mail: ARC@antiqueradio.com — Web: www.antiqueradio.com**

Free shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks).

Mass. residents add 5% sales tax. Non-U.S. orders, write for shipping costs, or use credit card and specify air or surface (allow 2-3 months for surface shipping). Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. Money back return policy.

Subscribers, ask for discount when placing order: 10% off books.

(#37-Oct06)

WANTED: N.O.S. Delco auto radio parts, must be in original box. Hans Kleeman, 1070 Riviera Ave., Banning, CA 92220. (951) 845-4222
