Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest from its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

How they do roll 'round — anniversaries, that is. Here we are at A.R.C.'s 24th, and, as always, an anniversary prompts a little nostalgia, as well as the numbers that inevitably go with it. This June issue is the 287th since Gary Schnelder founded A.R.C. in 1984. Since taking it over in 1986, I have published 261 issues.

Such a calculation regarding the magazine has prompted a few personal numbers to surface. Hard though it is to believe, I have been a collector for 46 years and have had a Ham license for over 50 years! A recent highlight of those years was the completion of the long-planned barn-museum now housing my collection and the A.R.C. office.

Few could doubt that I'm in this radio business for the long haul, as are so many of you loyal subscribers and the clubs that sponsor events. The longevity of many of those events and of this magazine attest to the continuing excitement of vintage radio collecting.

Excitement and longevity were certainly manifest in the 39th Greater Boston Antique Radio Collectors (GBARC) February meet, reported in this issue by Managing Editor Dorothy Schechter. Since its modest beginnings so long ago, this meet, now managed by A.R.C., continues to grow in quantity and quality.

Though we are all aware of the draw of the Internet, a club event like Radio XXXIX reminds us that the Internet is not everything. It does not provide the hands-on, value-added approach of a meet and a magazine like A.R.C. For example, we spend much time and effort in tracking down club events and preparing the "Coming Radio Events" pages. We edit your contributed articles, often supplementing them with more information and photos. In short, we believe that the overall depth and refinement of the material in a print copy generally outweigh that found on the Internet.

With its attendance still strong at about 600, Radio XXXIX shows the far-reaching effects of our PR for a club event. Photos of the numerous radios and the crowd at the meet reflect on this event's success.

Similarly, photos of the Estes Auction, reported by Ray Chase, highlight its success. Some of the unusual sets are the Madison Moore superhet on page 20 and the 3-panel set sold as a home brew on page 21. Though unmarked as is often the case, these panels are by the William B. Duck Company of Toledo, Ohio. In fact, I have a similar set in my collection. All in all, not a super-large auction, but it brought in \$45,000 and included some very interesting items.

One item that has captured a great deal of interest in recent months is Daniel Schoo's Golden-Leutz Phantom 9. And as Dan and Ross Mason report, the interest goes on, as more variations on this set surface. This kind of exchange adds to the depth of available information on radio history, and we're glad to pass it on.

The prolific industrial designer Raymond Lowey is certainly a part of radio history. He shows up in the

Estes Auction photo of a Hallicrafters S-38-B and in Richard Arnold's article as the creator of his Emerson 535's cabinet. This small 5-tube set has a different look from the more common Bakelites and wood sets of the period. If you look at the whole range of Emerson small radios, the Model 535 is rather unusual in its clean, nonornamental lines. As Richard points out, it was part of Emerson's big success in the 1940s with small radios at modest prices for the home.

Vintage radios deserve to be repaired with vintage test equipment. That thought certainly reflects the philosophy of Chris Jones who tells us about his experience with five test meters with "maladies." His discovery of a common cause for three of them may be helpful news to many restorers.

Surely such equipment was part of the fabric of Ben Wilken's radio service business in the 1930s to 1960. This article, which we are publishing posthumously, is a wonderful portrait of an entrepreneur in the time many of us recall as the "Golden Age of Radio."

Photo Review also reflects a wide variety of sets from that same age. However, the Lewyt Vacuum Cleaner Company did not follow the trend of the day. It produced only two radios and went back to vacuum cleaners. And how about glass-enclosed radios — how many like the one pictured are out there?

Often *Radio Miscellanea* poses interesting questions. Mike Hanke is in search of a movie featuring his favorite radio, while Claude Houde deliberates about his subscription renewal. Once again the Internet comes into play when William Devlin champions A.R.C. over eBay. Many, like William, tell us that they appreciate being able to talk to a real person by simply dialing our toll-free number. We continue to strive to be a clearing house for all things radio.

A.R.C. Benefits. Be sure to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; the Web, www.antiqueradio.com; books shipped free in the U. S. by USPS media mail; and for current subscribers, a 10 percent discount on all book orders

Coming Radio Events. In many places in the country, summer is in full swing. This is evident in the number of events listed for this month — 11 meets, 6 auctions, and 23 meetings. The season to get out and really enjoy our hobby is underway. And, this month we include our full listing of collector clubs.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Our cover photo by your editor is a close-up of Dick Bergeron's DeForest BC-14A crystal receiver, which he offered at Radio XXXIX for \$3,800. According to the nameplate, the set was manufactured by the DeForest Radio Tel. & Tel. Co., New York, in July 1948, for the U.S. Army Signal Corps.

MEET REPORT

Radio XXXIX

Westford, Massachusetts — February 17, 2008

REPORTED BY DOROTHY SCHECTER

President's Day weekend and another bright, cold New England morning at the Westford Regency Hotel in Westford Massachusetts. Despite general unease about the economy, overall attendance at the 39th Greater Boston Antique Radio Collectors (GBARC) meet was approximately equal to last year's, around 600. An informal survey of the crowd indicated that the range of interests seemed to be more clearly defined to include serious hobbyists and shoppers, full-time business operators, and just casual observers. Of course, the 62 exhibitors (plus 55 helpers) at 93 tables were ready at 8:00 A.M. to do business, as well as to trade radio stories and information.

Radio XXXIX was also an occasion for some clubs to publicize their future events. Charlie Perkett of the New England Antique Radio Club was there to talk about their April meet in Manchester, N. H., while Michael Crestohl promoted the May New England Amateur Radio Festival (NEAR-Fest) in Deerfield, N. H., the successor to the "Old Hosstraders." It is primarily an Amateur radio event, but, of course, many Hams have overlapping interests in vintage radio. "The Flea at MIT" in Cambridge, Mass., was represented by Steve Finberg who handed out flyers about this large radio,

Two of three high-end foreign sets offered by Mike Urban of Urban Antique Radio & Vintage Hi-Fi in Milford, Conn. Left, a Saba Freudensstadt FD18 AM/FM shortwave receiver with FM stereo, priced at \$350; right, a Telefunken Concertino 5093W AM/FM shortwave with three speakers and nine tubes, at \$375.

At the meet was this H.H. Scott Type 350 Wide-band FM Multiplex Stereo tuner and companion stereo amplifier offered at \$350.

electronic, and computer sales/swap meet. This event is usually attended by over 1,000 once a month from April to October in a multilevel garage. Clubs have obviously decided that Radio XXXIX is a great venue to spread the word about their activities.

In fact, "spreading the word" about vintage radio collecting is really the essence of the GBARC radio meet. Time and again, exhibitors mention the importance of the one-on-one contact at this meet, as opposed to eBay transactions. This is obviously a key ingredient for sellers, but it is equally important to those who accompany them as helpers.

For example, a "radio wife" like Bobbie Stead was there to help her husband Ed, while a "radio daughter" like Jennifer Markell stood by as her dad Dennis's assistant. Bobbie liked the excitement of the big room crowd, while Jennifer preferred the less hectic smaller room. Both expressed pleasure at the friendly atmosphere and the opportunity to learn new things about the hobby and to meet new people — not exactly the eBay experience.

To carry the support system even further, Cynthia Phillips, taking the place of her son or daughter to help husband Bruce with his "Radio Orphanage," designed a way to keep track of him at the meet. He now wears a bright orange T-Shirt with a radio logo, which Cynthia had given him on their recent 32nd anniversary. Romance and radio go hand and hand.

THE SHOPPERS

Speaking of romance, I had pleasure of bumping

A regular at these meets, author and historian Alan Douglas is always willing to share his knowledge of early radio with attendees.

into a newly engaged young couple, Kristin Ohlin and Jeremy Parker, both of Massachusetts. He was there to stock up on tubes and to give her an "introduction to what married life will be like." She was undeterred and even offered to take the ring off for a minute and pretend that they had become engaged here at the meet.

They were deep in conversation with David Wunsch, a professor at their alma mater, UMass-Lowell, where he teaches the "History of Radio." Radio meets can certainly make the world smaller.

They also bring serious shoppers like Dick and Carol Secor from far upstate New York to see what might add to his collection of over 300 8-track tapes and eight players, as well as test equipment and radios. Carol's hope was that a table next year might mean "some stuff out, rather than all in." Should this be called "The Radio Wife's Old Refrain?"

THE SELLERS

Sellers varied, from longtime to brand new, as well

Rumor has it that Norm Hertz was the lucky buyer of this Kodak crystal receiver.

Longtime radio man and seller at this event, Sam Petnov, offered this unusual Guild Town Crier set for \$195. Though it looks like a lantern with a loop on top, it contains a radio.

as to longtime shoppers who finally decided to take a table and become active sellers. As always, the measure of the success of the day also varied from seller to seller. Some like Jon Golden who e-mailed us to say, "Great show — best sales I've had, ever!" obviously enjoyed a profitable day. On the other hand, A.R.C. staff member Ray Bintliff, who had brought only high-end stuff, asked, "Where are the buyers?"

In between was first-year seller Joseph Thomas and his helper Rick Towne from Degrasse, a town as far in upstate New York as you can get. They had come for 12 years as shoppers. Now it was time to enjoy the weekend at the hotel, take a table, and pursue an interest in 1920s battery sets, among other things. Their sales paid for their trip and more

(Continued on following page)

This Fada "bullet" was offered for sale at Eric Fogel's table for \$695.

Ray Bintliff, who is both a Ham and vintage radio collector/repairman, as well as an A.R.C. staff member, offered this Silverstone Super 8 short-wave communications receiver.

(Radio XXXIX, continued)

— quite a happy outcome for them.

For Brian Edwards, a seller for several years, business was also "pretty good," and he'll be back next year. As an interesting aside, he brought along some very heavy railroad signal equipment just to see if it there was interest. One sold, so you never know who out there at a radio meet might have a special interest.

That's part of the excitement — looking around to see what everyone else has, according to Andrea Maubourquette, first-time helper to Jeff Brooks. This was the primary reason she found the meet interesting. For Jeff, business was good, and for Andrea, the experience was even better.

More than one seller expressed a pragmatic approach — don't come with high expectations but hope to be pleasantly surprised. What's never a surprise is the sense of having had a great time doing and talking about the thing you love.

When you tour the smaller room, you have to stop for a pleasant chat with "Sideroom Lenny" Provost. Unlike most collectors who search for originals, Lenny collects repros, and his display is truly interesting and amusing — his "neat toys," as he calls them.

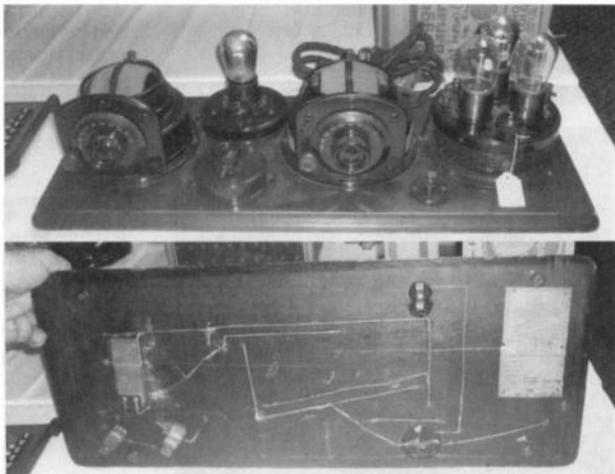

This interesting Atwater Kent Model 708 was offered at Joe Milano's table for \$550.

Lenny likes this show because it concentrates on radio, which "makes it better."

In the main ballroom, a father/son team, Mark and Jim Buliszak, reported that they had been coming for 20 years. As fellow Hams, they have much in common with their neighbor at an adjoining table, Ray Bintliff. In fact, they had communicated with Ray on his recent trip to Florida. So the talk at a radio show can take different avenues, all leading to information about and enjoyment of a mutual interest.

Information distribution sometimes goes beyond the meet. An example occurred when staff member Bobby Lyman happened to overhear exhibitor Jon Golden at the next table telling another collector to call him with microphone questions. When an inquiry about microphones came into the office soon afterwards, Bobby e-mailed Jon who, in turn, responded to the inquirer. The result — the meet

Offered for \$1,895 by Eric Fogel — an Atwater Kent Model 9 breadboard, the model with two Type 11 tuners. Note that the set is complete with tags and capacitor.

Sporting his signature cap, Dick Bergeron shows off his World War I DeForest BC-14A crystal receiver in an "OD" box.

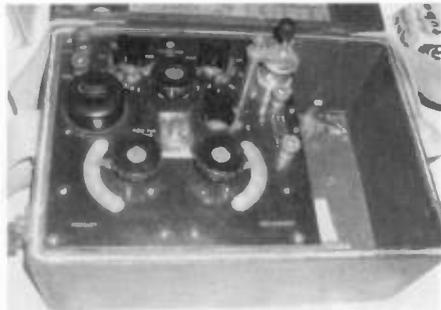

meant a future contact and putting a face to a name for a collector.

THE FULL-TIME RADIO BUSINESS OWNERS

In addition to those of us who think of vintage radio-collecting as an avocation, some who come to the meet run full-time businesses. For nine years, Mike Urban has operated his radio storefront in Milford, Connecticut — close to the beach, a plus for vacationing collectors. He buys, sells, and repairs vintage radio and audio equipment, and considers this as one of the best shows for reaching a nice mix of people.

As part of his marketing strategy, Mike can offer in this pleasant, indoor, dry setting such quality pieces as the Saba Freudenstadt and Telefunken Concertino AM/FM shortwave receivers displayed on his table. He then saves bargains for outside flea markets. In other words, he studies his market and plans for different types of venues. He gives full credit to his supportive wife Suzanne, a graphic artist who designs his company logos and website.

No full-time radio business owners are better known than Bruce and Charlotte Mager of "Waves," their shop in New York City next to

A closer view of Dick Bergeron's DeForest BC-14A crystal receiver. The asking price was \$3,800.

Madison Sq. Garden, a regular stop for collectors. So too is their corner in the side room where they hold court with their splendid offerings every year.

An example was a Pilot TV in its original case, complete with magnifier and original bill of sale, fully restored and working. They also offered a black Neutrowound that looks like a breadboard and comes in red and blue as well. Editor John Terrey confessed to having all three in his collection, and they are now displayed in his newly opened museum.

JOHN TERREY'S MUSEUM OF EARLY RADIO AND WIRELESS

Yes, it's a beautiful reality. After years of thinking about it, your editor and his wife Sarah have finally built "The Barn" to house his collection and library, the A.R.C. office, and Sarah's studio. It was open after the meet to anyone wishing to make the 5-mile trip from the hotel to Carlisle. Those who did were duly impressed, both with the collection of over 600 pre-1925 radios, amplifiers, horns, crystal sets, etc., and with the handsome facility. Enthusiasm was voiced by viewer Mark Vess who said, "I love people with such a passion for what they do." No doubt about it, this museum displays a passion for the preservation of antique radios.

(Continued on following page)

The show was open for business from 8:00 A.M. to noon, but was still going strong at 11:15 A.M. when this picture was taken — a measure of the show's success.

Jim Moneghan signs the guest book at the open house for John Terrey's museum. Of course, the desk is a Red Lion drop-front model containing an Atwater Kent 33. A Sodian set and an Amplion "dragonfly" decorate the upper shelf.

(Radio XXXIX, continued)

On seeing our new office, John Dilks, who writes the "Old Radio Column" for *QST*, had a real appreciation of what goes on here. He spoke not only of our distribution of information, but also of our great service to clubs both in print and on the website. As he said, "Pick up a magazine, and you can find a club." And he added an accolade — "A.R.C. is the only glue that holds the hobby together." This is one to put in our book of favorite kudos.

Joe Dimaggio (his real name), who is in management at an NBC-owned station in West Hartford, also tore himself away from the exhibit to come down to our office to thank us for our work on the show, as well as on the magazine. Joe typifies A.R.C. "old guard" subscribers going back to its

John Wolkonowicz and John Terrey examine an unusual RF amplifier designed to match the Kennedy Model 110 and 220 receivers.

founding 24 years ago by Gary Schneider. We appreciate that continuity of support, just as we welcome the newcomers who show up every year at the show and on our subscriber list.

With the added attraction of the museum, we hope to see many more of you at Radio XL next year on February 15, 2009. President's Day weekend at the Westford Regency hotel is a nice little mid-winter respite, and with a great show thrown in, it's worth a long-range plan.

WITH THE COLLECTORS

The Emerson Model 535 Value – Utility – Service

BY RICHARD ARNOLD

Once again Richard Arnold reminds us of the important role Emerson played in radio history. Here is another model of the kind of small table radio that became common in American homes in the 1930s. (Editor)

For years one of Emerson's slogans was "World's Biggest Selling Little Radio." With the advent of small radio, the public had a larger variety of products for its choosing — "greater value for less money — more easily utilized receivers — and sets for every purpose and purse." Emerson was going to concentrate on small radios.

Although Emerson founders Benjamin and Max Abrams started selling radios in 1924, their position in the radio industry remained insignificant until 1932. By that time, they had concluded that there was an untapped potential demand for a small, low-priced set.

PRICE COMPETITION AND SMALL SETS

Emerson was the radio company, which, perhaps more than any other, was responsible for bringing down radio prices. Under the leadership of the Abrams brothers, Emerson developed and promoted small table sets. In 1932-33, the Model 25, an important innovation in the radio industry, was developed.

Price competition and the introduction of these small sets brought the average set price down from \$133 in 1929 to \$35 in 1933. By 1941, small sets represented about 80 percent of the home sets sold.

Emerson continued to be in the vanguard of producing low-priced models, culminating in a set for \$6.95, the Emersonette. This radio was a 2-tube TRF (Tuned Radio Frequency) set that was just six inches wide and five inches high. Its price of only \$6.95 meant that more hundred-thousand sales records were stacked up, giving further stimulus to radio buying and enjoyment.

Such prices encouraged the purchase of more than one radio for the home and contributed to the phenomenal growth of the listening audience from approximately 12 million people in 1932 to 55 million in 1941. Emerson made it possible to

Richard Arnold's Emerson Model 535.

manufacture low-priced sets at a profit. Its sales volume in 1941 was \$14 million.

THE EMERSON MODEL 535

My set, the 1947 Emerson Model 535, is not a very well known model or a much desired one either, to be sure. However, it does have something going for it, as it was designed by Raymond Loewy, a famous designer of that period.

The company believed that styling was an important influence in the sale of radio. Particular attention was paid to style trends and many innovations were introduced. Now, you would think that fact alone would make this radio very desirable today, not even including the Raymond Loewy thing. Well, too bad it is not in one of those Ingraham cabinets.

This model has a look-a-like — the Model 539. The Model 535 has a rectangular dial while the Model 539 has a round one. If you look for these sets on eBay, it seems that the rectangular design is a lot harder to come by and is more popular than the round one.

The cabinet of the Model 535 is wood and measures around 11" x 8" x 6". It also has a wood back cover and a loop antenna.

The Model 535 is a 5-tube, single-band super-heterodyne that has an IF of 455 KC. It tunes the broadcast band from 540 to 1620 KC. This particular chassis design uses the following tube types:

(Continued on following page)

(Emerson Model 535, continued)

12BE6, 12BA6, 12AT6, 50B5 and a 35W4. It has a #47 pilot bulb.

There is another chassis design that uses tube types 12SA7, 12SK7, 12SQ7, 50L6GT, and 35Z5GT.

It's obvious that I kind of like these sets, as well as pretty much anything Emerson, because of the special Emerson small radio history that is built into its products. I have written a few articles for *A.R.C.* on Emerson and have really gotten to know the company. It was, for a while there, a good one.

If you are looking for a radio that has decent looks and plays pretty well, and that does not cost an arm and a leg, then the Emerson Models 535 and 539 are a good choice. I have my Model 535 sitting next to my computer and play it quite a bit. It's very selective.

In his book *Small Radio, Yesterday and in the World of Tomorrow*, founder Benjamin Abrams said:

"Price, of course, will doubtless always be a factor in the production and purchase of radio, as it is in all other items made for public use. Howev-

er, I have never regarded 'low price' as being the paramount issue. Value, utility, service have been, and always will be, greater considerations."

(Richard Arnold, P.O. Box 275, Lone Grove, OK 73443)

Richard Arnold, a frequent contributor to A.R.C., has been collecting radios since 1985. His interest is primarily in cathedrals and 1920s battery sets, and his collection ranges from crystal sets to a 1928 American Bosch in a Pooley cabinet. His prize is the 1932 Jackson Bell Peter Pan featured in the June 1991 A.R.C.

Meter Maladies

BY CHRIS JONES

Not all meter problems are caused by debris in the pole pieces, as Chris Jones points out in this article. (Editor)

Whenever I have seen advice written in these pages or elsewhere about panel meters, it has usually related to the prob-

Figure 1: Nearly everyone who reads *A.R.C.* probably built and owned a Knight-Kit VTVM similar to this, or the Heathkit equivalent. Priced at about \$25, they were the foundation of any electronics hobbyist's complement of test equipment.

Figure 2: The Heathkit IM-21 AC VTVM and its variants provided ranges covering 10mV to 300V, flat within 1dB± from 10 Hz to 500 kHz. They cost about 20 percent more than the standard VTVM.

lem of sticking meter movements and how to solve it. This problem is caused by foreign material lodged between the pole pieces and the armature.

However, I have had experiences with five meters with movement issues, only one of which seemed to be related to wayward particles. Three of the meters had different problems entirely, but they shared a common cause. Since I haven't seen this topic reported previously I thought it worth covering in print.

THREE METERS WITH PROBLEMS

My first experience with a problem meter was with my Knight-Kit KG-620 VTVM, shown in Figure 1, that I built while in high school in the early 1960s. It has had TLC in both use and storage ever since. The problem was that while most of the time the VTVM worked fine, sometimes it suddenly would stop reading and drop to zero, usually intermittently in the heat of battle troubleshooting something.

The second experience was with a Heathkit IM-21 AC VTVM. This eBay treasure, pictured in Figure 2, also seemed to have come from a good home, since it looked very good cosmetically. It had the original owner's name Dymo-labeled on the back and inside on the chassis (theft protection I presume).

The Heathkit's problem was that the movement was very nonlinear, with the needle deflection not in proportion to the current through the meter. It wasn't just off a few percent either — it was grossly nonlinear. The needle also had a propensity to be deflected badly by static charge on the meter face, such as by rubbing something across it, and it would sort of stay in that position.

The third experience was with the ammeter on an EICO Model 1060 Battery Eliminator & Charger. A 2006 AWA Conference flea market clunker, it was in positively disgusting, dirty, and rusted condition. Figure 3, believe it or not, represents a big improvement from the way I found it. Nevertheless, the Model 1060 worked with new caps installed; however, the ammeter read half the actual current right from the get-go, and ultimately quit reading completely.

THE COMMON CAUSE

The basic cause of the problems with

Figure 3: This ratty looking example of an EICO Model 1060 provides 0-8 VDC at 10A continuous or 0-16 VDC at 6A continuous using a transformer with a sliding tap on each of its dual secondaries, and a rectifier with plates the size of a slice of bread. The "Low Ripple" designation on the front panel derives from the Model 1060's extra L-C filter section, not provided in the standard model, the 1050.

each of these three meters was shrinkage of the internal insulating material (either the actual plastic internal structure of the meter movement itself, as in the case of the VTVMs, or a fish paper/cardboard insulating layer, as in the EICO). This shrinking effect, along with metal oxidation, resulted in loose electrical connections to the meter's terminal studs. These poor electrical connections caused the various problems described above.

In every case careful disassembly and tightening of the connections (also with contact surface cleaning in the ammeter's case) corrected the problem. The Knight-Kit has quite a few years on it since being repaired and has been completely trouble free.

By the way, the problem with the fifth meter, a small, circa 1905, Weston lab-type DC voltmeter with separate binding posts for each of two ranges, was a blown internal wire-wound, spool-type range resistor.

(Chris Jones, 38 South Ridge Trail, Fairport, NY 14450)

Chris Jones is a recently retired electrical engineering director and has been interested in old radios since he was offered an Aeriola Senior about 25 years ago. He still tries to limit his acquisitions to those he can use in normal everyday living. Lately, he has tended toward audio equipment, as well as test gear to help keep the music playing.

COLLECTOR PROFILE

Memories of a Lifetime in Radio

BY BEN WILKEN

From the A.R.C. Archives: Occasionally, reader contributions are long delayed finding their way into A.R.C. Often we are awaiting better photos, more information, etc. And, occasionally, the contributor has passed on, as in this case. But, these interesting photos and reminiscences belong in the pages of A.R.C. and so here is Ben's story. (Editor)

A Stewart-Warner Model R-143 in the July 2001 "Photo Review" section of A.R.C. brought back fond memories of my radio servicing days in the 1930s. But then, other memories of my long life in radio flooded in. Born in Walla Walla, Washington, I was a junk hunter from age six. In those days there was no trash pickup by the city. Some of us boys tinkered with radio junk we found in trash piles, and I also unearthed a cylinder gas engine for tinkering.

There were no organizations for kids then. Boys and girls just blocked out a ball diamond on a vacant lot and played according to our own rules. We also had "snipe" hunts for any new kids coming into the neighborhood.

One time a grade school teacher in elementary school took us on a tour of the public library, one of those endorsed by Andrew Carnegie. I found it a good reference source for my tinkering. A *Popular Mechanics* article on how to build a charger for recharging 45-volt dry cell "B" batteries inspired me to look for old batteries at the dump. Soon I was able to hook up and play a 5-tube treasure from the trash pile. I used a clothesline wire for an antenna, and — glory be! — I tuned in WGN and WLN.

HIGH SCHOOL

When I started high school, I hoped to find an auto shop class and a radio class. Much to my disappointment, all the courses were classical in nature. I petitioned my parents to allow me to attend a technical high school in Yakima or Spokane where relatives lived. However, they said they wanted to keep an eye on me — it was all a matter of their love for me.

When I was 14, the state offered a driver's license to those of that age. I passed the test, and when a year later, the state decided to withdraw the offer, I was allowed to keep the license. Then came the petition to my parents for a car. They pointed out the costs beyond the car itself: registration, gasoline, and repairs. Their expectations included buying my own school clothes and keeping up my grades.

Like most boys my age, I was "itching" for a

Ben Wilken in front of his store in the 1930s.

challenge. I had saved my money for years, as I had worked the onion and potato harvests since I was six years old. I also had an early morning paper route and mowed lawns. I decided that I would like to repair old batteries, starters, and generators. A check of the owners of wrecking yards and used car lots indicated there was interest. This called for trips to the library for technical books, and soon I was in a part-time business.

BUSINESS BEGINNINGS

After graduating from high school in those Depression years, I couldn't find a suitable job. In 1931, I met Max Barber, who had been in some of my classes and was in the same straits. We started pooling our radio parts, and then decided to go into business. We had \$150 between us to set it up.

There were several stores in town that did not have radio service departments — Montgomery Ward, Sears, Western Auto of Los Angeles, and Firestone Auto Supply. All of these stores allowed us to do their repair work. Firestone also wanted us to install its Stewart-Warner auto radios, as well as its Stewart-Warner South Wind gasoline automobile heaters. Well, we were hungry enough to bend a little.

Here in the West at that time there were a lot of dirt roads, some of which were rocky. Firstone wanted us to install under-the-running board antennas for their auto radios. That was a disaster as far as the antennas were concerned.

We had seen one of Tobe Deutschmann Co. advertisements for its line of "fish pole" auto antennas. Yes, they were metal fishing poles on which the eyelets on the rod were still in place.

Instead of the handle, Tobe placed a latex sleeve on the pole and installed a bracket which could be used either on the bumper or side cowl. We installed the antenna on the side cowl if the customer permitted us to have a short antenna lead into the set. Later, other manufacturers sold this type of antenna with style improvements.

In 1934, Max and I decided to start business in Walla Walla, Max doing the radio repairs and I continuing in auto electric. Within a year, we decided to concentrate on one line. We drew straws, and radio repair won!

I started to study Ghirardi's *Radio Physics* course and other technical magazines and made an easy transition from auto to radio. By 1936, I was doing the bench work, and Max was taking the service calls. We had good support from the businesses around town. Even though the big companies had set up their own service departments by 1940, they sent the "dogs" to us. It was nice to have a job that required brain work.

Also in 1940, Gamble-Skogno set up a warehouse in our community and wanted us to do their work, if we also would work on their electric fence chargers. Of course, we said, "Sure!"

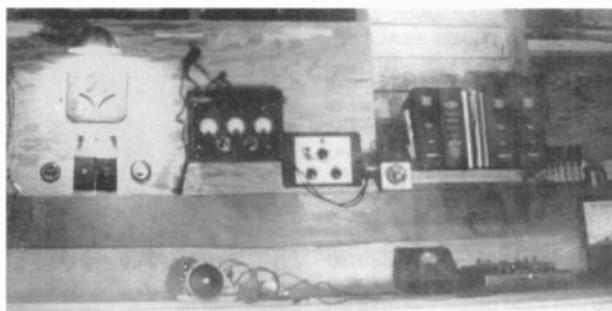

THE WAR YEARS

On December 15, 1941, Uncle Sam sent us a notice that we were drafted as radio technicians, and we were given ten days to report for duty. We liquidated at a discount and were on our way to the Navy receiving station where we found that all draftees were either radio repairmen or Hams. Uncle had done a good job of screening.

We were given a quickie course in radar and sonar and then sent to our duty stations. Max was assigned to a destroyer, while I was assigned to a small seaplane tender charged with taking care of PBV planes and their crews. We were in the Pacific and finally Okinawa. I was commissioned as a Navy officer before being discharged to inactive duty in the Reserves in

Ben Wilken's store at 104 N. Colville St. in Walla Walla, Washington, during the 1930s.

Ben Wilken's radio repair bench.

January 1946. Max had had a medical discharge in 1945.

By mid-January 1946, we were back in the radio business in Walla Walla. Since there was now a demand for a wholesale outlet, we made the necessary contacts to become jobbers on parts and equipment. It too was a success, and in 1960, an out-of-town jobber offered a price for our business that we couldn't refuse.

LATER YEARS

All in all, Max and I had a good business relationship through the years. From the start, we paid our bills and replenished our stock before we took any money for ourselves, and we maintained a good rating with Dunn and Bradstreet. In 1984, Max died of Alzheimers disease.

In these last decades, my wife and I have moved around the West, buying a house in a good location — a house that needed repairs. We did the repairs, and sooner or later someone would offer a deal we couldn't refuse. Meanwhile, I began my collection of 100 1920s radios, plus a lot of parts. All were bought through ads in A.R.C. Thanks for helping me to add to my wonderful life experience in radio.

WITH THE COLLECTORS

Follow-up — Golden-Leutz “Phantom” Type 9

BY DANIEL SCHOO AND ROSS MASON

As we've seen with the positive reaction to Daniel Schoo's restoration article on his Golden-Leutz Type 9 in the October 2007 issue, this set always excites interest. Other examples exist of this set, and here Daniel Schoo writes about John Johnson's set for which, unfortunately, no photos were available. However, we include Ross Mason's photos and captions of his set, yet another example of the Phantom Type 9. (Editor)

After the publication of my article on the Golden-Leutz Phantom Type 9, I was contacted by John Johnson, the owner of another similar Phantom. We compared the two, and I would like to follow up with a few details that were not available at the time the article was published. The serial number of my Phantom is AA 31. The serial number of Johnson's Phantom is AA 227. They are very similar, but there are enough differences to make it an interesting study. I will refer to them by these numbers to keep things straight.

First, I was able to verify that the blue, rubber-insulated wire used on the Type UX-222 tube grid caps was factory original. Johnson's set had the very same wire on the grid caps and under the chassis as did mine. In fact Johnson's had quite a bit more of it. Most of the other components and the chassis layout were pretty much the same. The same choppy handmade character of the chassis was evident in Johnson's set.

There were some notable differences though that show the nature of the built-to-order production and how things were assembled using whatever was at hand. The front panel meter on Johnson's set has 0 to 8-volt and 0 to 200-volt scales instead of the 0 to 7 and 0 to 140-volt scales that mine has. This is a minor point as the meter scales are easily changed by the values of the resistors used to scale the meter. Another point is that Johnson's set has a row of Fahnestock clips along the back panel for electrical connections instead of the thumbscrew terminals that mine has. One other notable difference is the power switch. Mine has a push-pull switch while his has a toggle. Magazine advertisements for the Phantom show the

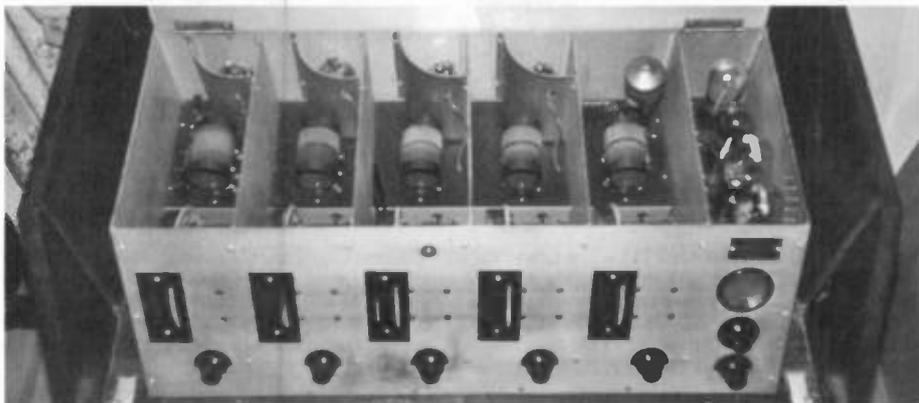

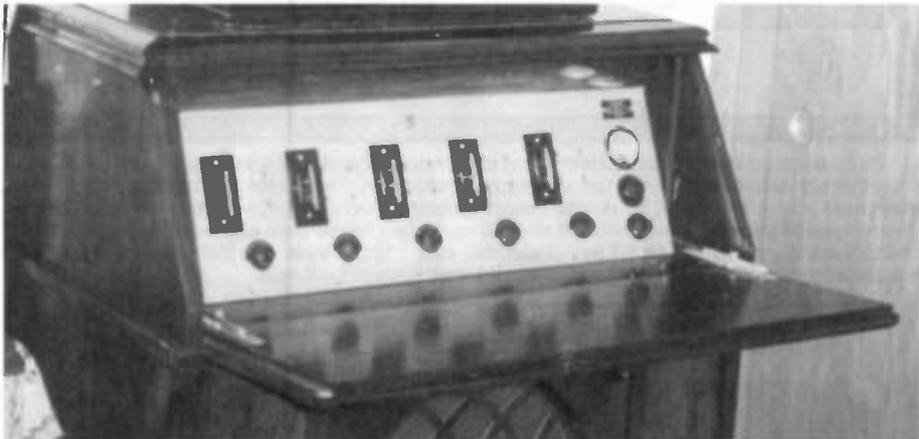

Ross Mason's Golden-Leutz Phantom Type 9 console. Ross believes that the grille cloth on his set is original.

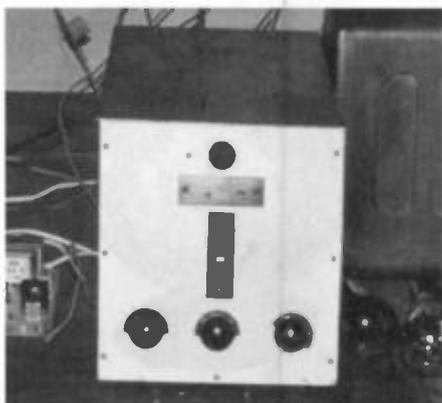

toggle installed. The switch might have been replaced but the wiring looked factory original and undisturbed.

Johnson's set has a second transformer, or center tapped choke, connected to the audio output tubes while mine has none. I believe this would more likely have been a center tapped choke providing a shunt feed plate supply for the push-pull output. The choke probably was removed from mine as there are mounting holes in the chassis where it should have been.

One thing that caught my eye in Johnson's set was the cartridge resistors installed in the audio section. You recall that mine was missing all of the cartridge resistors, and I had to make reproductions. I used a label from a Carborundum brand resistor that I found under the chassis as a source for the artwork used to label the reproductions. Well, there in those resistor clips in Johnson's set were some original Carborundum brand resistors looking

Top is a view of Ross Mason's Golden-Leutz Phantom Type 9 in the console cabinet. A close-up view of the inside of the chassis appears at the bottom.

Mason's Golden-Leutz power supply Type L operates the Golden-Leutz Universal Transoceanic Type 9 and gives 7½ volts filament to the Type UX-210 tubes and 400 volts to the plates. Also it supplies adjustable voltages to the detector, ra-dio frequency, and audio amplifying circuits.

nearly identical to the ones I had made.

Johnson's set has its associated power supply. The power supply is a conventional type with a pair of type 81 rectifier tubes, power transformer and tapped resistor voltage divider for the various power supply voltages. On the back panel are two input receptacles. One is labeled for an 'A' battery eliminator and the other is labeled for an 'A' battery confirming that the Phantom could be used either with a wet cell battery or a battery eliminator for the DC filament supply. A toggle switch on the front panel selects which of these is used.

Picking up various bits of information like this and comparing samples makes collecting and restoration that much more interesting. It's very nice when a fellow collector has an item that is similar to yours and he is willing to spend some time corresponding and answering questions.

Sincere thanks to John Johnson for sharing information and taking the time to answer a list of questions.

(Daniel Schoo, 526 Colonial Dr., DeKalb, IL 60115. Ross Mason, 715 S. Pennsylvania Ave., Mason City, IA 50401)

PHOTO REVIEW

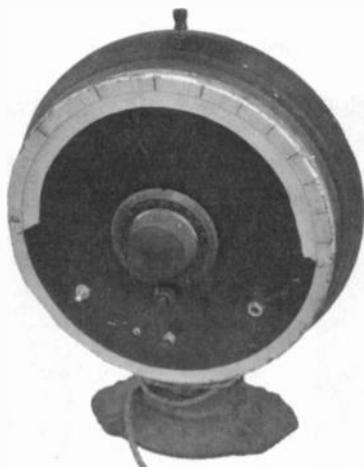

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

LEWYT MODELS 615A AND 711 – The Lewyt Vacuum Cleaner Company of Brooklyn, New York, began marketing vacuum cleaners in the 1930s. In 1946 and 1947, Lewyt marketed only two radios to take advantage of America's pent-up demand for radios after World War II. The first set was the Model 615A, a wood table model, which was a 5-tube AC/DC set. The second was a battery and AC portable, housed in a fiberglass case — the Model 711A. After only a year, Lewyt dropped radios and continued to market vacuum cleaners into the 1960s. (Charles Harper – Paris, KY)

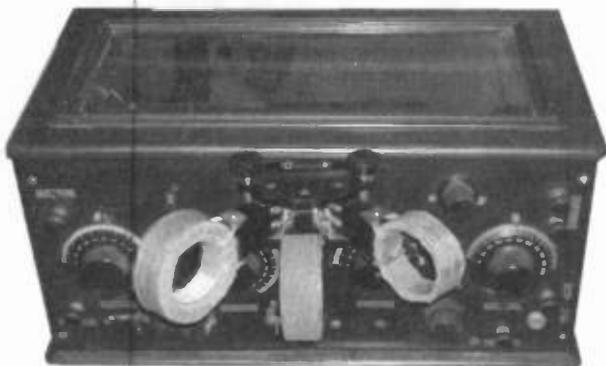

PARAGON MODEL DX-1 – This crystal set, ca 1924, is housed in a black leatherette case that measures 5 $\frac{3}{4}$ " x 3 $\frac{3}{4}$ ". It has a push button and a buzzer to test the best spot on the galena detector. (Wally Worth – Wollaston, MA)

HOME-BREW SHORTWAVE SET – This unique, home-brew, AC-powered, 2-tube set was made by a well known collector in his younger days. It appears to be a shortwave set using Types 70L7 and 32L7 tubes, all contained in a former RCA Radiola 100 speaker case. (Ray Chase – Plainfield, NJ)

PHOTO REVIEW

HERALDYNE BATTERY SUPERHET – This 8-tube battery superhet, manufactured by the Brenard Mfg. Co., Iowa City, Iowa, was called “The Real Family Set.” It uses “H-D” IFs made by Radio Products, Hudsonia Div., Jersey City, New Jersey. (Ray Chase – Plainfield, NJ)

GLASS-ENCLOSED RADIO, MANUFACTURER UNKNOWN – I recently purchased this radio at an auction. I have had only one other glass-enclosed radio in my entire 40 years of radio collecting, and it was a home brew. My radio collecting friends and I believe that this radio is professionally made. It has thick beveled glass on the top lid and both ends. The coil mechanism on the front was made by DeForest, the switches by Federal, and the tickler coils by Atwater Kent. The labels identifying the operating controls are professionally made, and the woodwork also appears to be professional. The one tube is a Western Electric 102. Are there any companies known to have manufactured glass-enclosed radios? I'm hoping that someone out there can shed some light on this subject. (Willis A. Rudolph – Cordova, TN)

HEA “JACKY” POCKET RADIO – This Austrian pocket radio was manufactured by HEA in 1963. It uses the medium wave band and sold for 599 Schillings. (Erwin Macho – Vienna, Austria)

AIRLINE MODEL 14BR-514B – This 1941 painted Bakelite radio was sold by Montgomery Ward & Co, of Chicago, Illinois. The manufacturer was Belmont Radio Co., which made many radios of this Art Deco style in Bakelite. (Clark Thrissell – Lincoln, NE)

AUCTION REPORT

Estes Auctions Burbank, Ohio — July 7, 2007

BY RAY CHASE

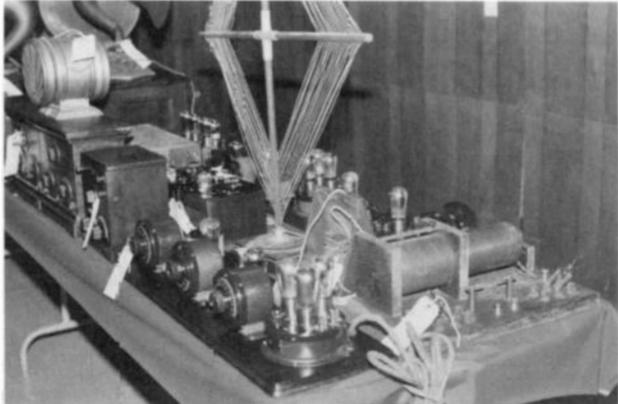

The July Estes auction consisted of a collection from Mitchell, South Dakota, along with more items from the Larry Porter estate from Pennsylvania. This was a pretty well-rounded selection: many consoles, TVs, good test equipment, some PA amps, a good selection of Ham gear, some parts and magazines. The quantity of tubes was a bit higher than usual. The weather was excellent when the usual crowd gathered on Saturday morning.

A low value item auction was held in the check-out area at 8:30 A.M. that lasted until 9:45 A.M. I did not record any items there.

There were no real "high-flyers" in this auction, but there was something for everybody. The most expensive item was an Edison 8" brass-blade fan with open frame motor that sold for \$2,700. A couple of nice battery superhets were offered, and one managed to follow me home for my own collection.

The items that I recorded totalled about \$45,000, not including the 5 percent buyer's premium that is charged. I stopped recording at 3:00 P.M., and the auction continued on lower value items until about 4:00 P.M. There were side auctions of bulk tube lots and parts that I did not record. All in all, a nice way to spend a pleasant summer day.

Abbreviations: e=excellent, vg=very good, g=good, f=fair, p=poor, unk=unknown condition, N.O.S.=new old stock, wk=working, nwk=not working, WT=with tubes, NT=no tubes, BB=brass-based, TT=tipped tube, SW=shortwave, PS=power supply, PB=push buttons, WE=Western Electric. All prices

From the early years, at the far left is a Radiola V with top cover and crystal, which sold for \$400. In the foreground is an Atwater Kent Model 12 breadboard that sold for \$1,200. The diamond-shaped loop antenna is a Hartman. In good condition, it sold for \$35. The loose coupler with a spark gap and knife switches, right foreground, sold for \$55.

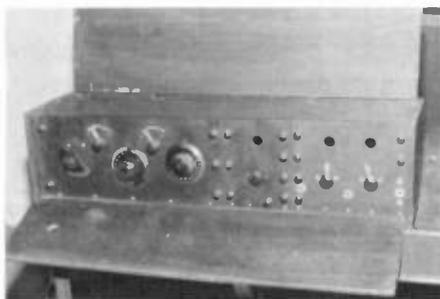

An early 8-tube superhet from Madison Moore. Complete with tubes and in very good condition, it sold for \$400. The interior view shows the component layout and copper-lined cabinet.

have been rounded down to the dollar. Some low cost items and items in poor condition or nonspecific descriptions are omitted.

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

Ray Chase has been a radio enthusiast and a collector of many types of radios for years. Currently, he specializes in World War II electronics equipment, as well as early battery superheterodynes. He also has an extensive collection of radio documentation and ephemera.

RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

What Movie Was This Radio In?

Dear Editor:

My favorite radio of all time is the RCA Victor "Globe Trotter" portable from 1946 to 1949 designed by the late John Vassos.

Many years ago I remember watching a movie on TV that had a scene in which one of these radios sat on the front edge of a desk facing the camera. I think the movie had something to do with outer space travel or something about science fiction. I'm guessing it was filmed in the late 1940s or early 1950s.

Does anyone know the name of this movie? I'd sure like to see it again. See the photo of my Globe Trotter.

Mike Hanke, Wausau, WI

The "Never Too Late" Category: On the Sentinel IU-355P

Dear Editor:

Regarding the Sentinel IU-355P in the April 2007 issue, page 15, I think there are a couple of clues here: the number of labels on the transistors and the expensive ceramic trimmers visible in the photo and commented on by the author. These clues indicate that this model had to have been an engineering prototype. What would be interesting is to identify the first Sentinel transistor model commercially produced and compare it with the circuit details in this example.

George Munsch, San Antonio, TX

Clearfield, not Home Brew

Dear Editor:

Regarding the auction report in the February 2007 issue, I have the radio shown in the upper left photograph on page 20. This set is not a home brew as stated but a very nice commercial "Clearfield Radio De Luxe." I have a brochure showing this model. I felt that A.R.C. readers would want to know this fact.

Erlich Brueschke, Hinsdale, IL

Subscription Renewal?

Dear Editor:

The title of my message could have been "To renew or not to renew, that is the question." I just received your last letter about my subscription renewal, and I find one important thing missing in the text; namely, why isn't an old subscriber like me swiftly renewing his subscription?

A few years ago, I used to renew very fast, long before my subscription would lapse, for sure. I was so excited to read A.R.C. every month when my copy would appear in the mailbox. I was so addicted at first that I would renew for two years, to be certain I would not risk missing even one issue.

Well, as the content changed from restoration and collecting to auction reports, I must confess that the novelty and fun were disappearing. So, I was renewing for only one year, but still a few months before my last issue. Then later, it was just on time or a bit late, and now I'm not sure I will renew at all.

Honestly, this year I kept putting off mailing my money order, as I was not convinced by the slim editorial content. Technical articles are not as frequent, restoration tips are scarce, and way too many pages are spent on auction reports. And these auction reports are not printed very fast after the event, but a long time after.

You might say, "Why don't you write something yourself?" And you would have a good point. But many writers would be needed to really enhance things. I don't think I could do it alone.

So while I used to have hours of fun every month with my magazine, now I barely spend 15 minutes to read what I find interesting, if and when I do find something interesting to read. I may renew — my mind is not made up yet, but the probability grows dimmer as time goes by.

Thanks for reading.

Claude Houde, Barennes, Quebec, Canada

We agree with your desire for more articles other than auctions and meets in A.R.C. However, we strive to emphasize unusual items in our reports on auctions and meets.

As we have repeatedly said, articles are contributed by readers. So, as we suggested last month on our Editor's Page, and again this month, all are invited to take up pen, pencil, or computer, and camera, and write something about what you are excited about. Send it in, we will "clean it up," and quite possibly, you will be "in print" in the pages of A.R.C. (Editor)

So Much for eBay!

Dear Editor:

I thoroughly enjoy your magazine and look forward to getting it each month. I've met a lot of real good people through it. (The H... with eBay!)

William Devlin, Rockville Centre, NY

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA or MasterCard (\$10.00 min.) are preferred. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or e-mail. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by VISA or MasterCard is preferred if your order is over \$10. If under \$10, or if you prefer to send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a fax or e-mail payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the 27th of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork on disk or ask us to typeset if for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

E-mail: arc@antiqueradio.com

Web: www.antiqueradio.com

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 20-WORD AD for subscribers in each issue; additional words are 29¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance, but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, I and l (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address is required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 20 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month!

Subscribers:

First 20 words: **FREE***
29¢ per word for extra words over 20 **plus**
10¢ per word for a shaded ad (count all words including free words).

* Subscribers may take 20 free words on only one ad each month.

Non-Subscribers:

47¢ per word **plus**
10¢ per word for shaded ad.

Please do not forget to send in the extra 29¢ per word when your classified ad runs over the free 20 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month

for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$23.00 per month for each photo or drawing
(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address is required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

Radio Auction

“The Walter Tatar Collection”

Saturday, June 21, 2008 – 10 AM EDT

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love's Truck Stop, turn left
onto Garman Rd. and follow one mile to the auction site.

Estes Auctions is pleased to offer the collection of Walter Tatar. He is a high school shop teacher in Bloomington, Illinois and has been a radio collector for many years. We will sell the collection as well as several other collections from other individuals. We will offer a nice selection of cathedral and tombstone radios. Many battery sets to include an Atwater Kent Model 10 breadboard, an IP-501A receiver, Crosley 51, Crosley Trirdyn, Grebe Type MU-1, Zenith Super VII, Aeriola Sr., Radiola III, Radiola IIIA, Westinghouse Type RA-DA, several nice homebrew kit sets, a good selection of horn speakers. Also cone type speakers, headphones, many wood and Bakelite table type radios. We will also be selling a large selection of transistor radios, many pieces of test equipment, signal generators, tube testers, lots of parts and hardware, many books and magazines, Rider manuals. A great selection of tubes and many early types including 201-301, UX-99, UV-99, 27, 26, 24, 80, 81, 45, 46, 47, 6L6, many mixed lots of tubes. Some we will sell in bulk lots. It will be another good auction and will be your chance to stock up for the outside swap meets this summer. We hope to see you at the sale. Terms: Cash, check, Visa, MC. 5% buyer's premium.

EXTRAVAGANZA '08

Hosted by the Michigan Antique Radio Club

July 11 & 12, 2008

Holiday Inn South Convention Center
6820 S. Cedar Street, Lansing, MI 48911
(517) 694-8123 or (800) 333-8123

Come join us for our 23rd Anniversary

RCA

This year we are proud to honor RCA as we celebrate the 23rd anniversary of the Michigan Antique Radio Club. We are celebrating the company that virtually created the industry. From the early days of radio telegraphy to color TV, RCA was the industry leader. Everyone has collected a RCA set.

HIGHLIGHTS:

- **HUGE 2-DAY FLEA MARKET**
- NOTE: FLEA MARKET OPENS FRIDAY!**
- HOSPITALITY UNDER THE BIG TOP
- SATURDAY AUCTION WITH RICH ESTES
- EQUIPMENT CONTEST
- INFORMAL SOCIAL HOUR WITH LIVE ENTERTAINMENT
- RCA EXHIBIT
- 4 INFORMATIVE PROGRAMS
- DAILY PRIZE DRAWINGS

For information contact: Bryan Wilemon, 9320 Quandt (new!), Allen Park, MI 48101.
E-mail: abpushpull@aol.com or check out our web page at www.michiganantiqueradio.org.

EXTRAVAGANZA '08 Registration

Please NOTE: To encourage participation by the general public, buyer's access to the flea market is free but we request that everyone attending EXTRAVAGANZA must register! The monies collected as a result of registrations are a major source of revenue that helps pay for the event. Your cooperation is greatly appreciated.

New Jersey Antique Radio Club Summer Tailgate Swap Meet

NJARC's InfoAge Cottage - 2201 Marconi Road, Wall, N.J.
Saturday, July 26th, 2008

8:00 AM to 1:00 PM - Open to the Public - Vendor Set-up at 7:00 AM

A great old fashioned tailgate swapmeet at what was once the 1914 Marconi Belmar Wireless station. Bring your own table, food and radios and relax in the picnic-like setting of this historic site. Take a tour of the Marconi "hotel" where the ghosts of the former age of wireless still roam the halls. Visit NJARC's Broadcaster's Hall of Fame radio exhibition at a cottage that once housed the station's chief engineer. Visit the site of Project Diana and its huge antenna that was the first to capture radar signals bounced off the moon. And much, much more!

A single space is \$20 for members and \$25 for non-members. Additional reserved spaces are \$15 (\$20 non-members). There is a \$5 club donation entrance fee for buyers. For directions, visit www.infoage.org, our club website at www.njarc.org or "mapquest" 2201 Marconi Road, Wall, NJ.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Radio Auction

**Fada Model K-19, Atwater Kent Model 9
breadboard, Atwater Kent Model 10 breadboard**

Saturday, July 19, 2008 – 10 AM EDT

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love's Truck Stop, turn left
onto Garman Rd. and follow one mile to the auction site.

This is the Herndon radio collection from Lexington, Kentucky. This sale offers a good selection of radios and the sale will include the Fada Model K-19 tombstone. This is one of the most beautiful tombstone radios ever built and this one is in very nice condition. It is a rare item and we are pleased to be able to offer it at auction. We have a nice selection of early radios to include the Atwater Kent Model 9 breadboard, the Atwater Kent Model 10, a Grebe CR-9, Grebe MU-1, Radiola Type 26, Radiola IIIA, Westinghouse Aeriola Sr., Atwater Kent Model 32, and many others. A good collection of cathedral and tombstone radios with a very nice Philco 90, and Philco 70, an Atwater Kent Model 84, and others. We will be selling many horn speakers and cone type speakers, over 100 wood and Bakelite table radios, many pieces of test equipment with several tube testers included, lots of radio books, radio magazines, several thousand tubes including Type 50, 45, 80, 24, 26, 27, Type 2A3, 6L6GB, 5U4GB, 201-301-A, UX-99, UV-99, many tubes to be sold in bulk lots. Also in this sale, several Zenith Trans-Oceanics, transistor and novelty radios, and we will sell parts, part sets, and items to restore in our early sale from 8:30 AM until the main sale begins at 10 AM. So please join us at this auction and we look forward to seeing you at the radio meets this summer. Terms: cash, check, Visa, M/C. 5% gallery fee. The August auction will be the 16th.
