

VOLUME 27

JANUARY 2010

NUMBER 1

Start Your 2010 Hunt Now!

**At a 2009 New England Auction
Atwater Kent Model 82 — \$525**

A.R.C. — THE NATIONAL PUBLICATION FOR BUYERS AND SELLERS
OF OLD RADIOS AND RELATED ITEMS — WWW.ANTIQUERADIO.COM

RADIO XLI

An Indoor Old Radio Flea Market

Biggest Show on the East Coast ★ Same Giant Location
Last Year: Nearly 528 Attendees ★ 55 Exhibitors ★ 87 Tables

Sunday, February 14, 2010 — 8:00 AM to 12:00 NOON

Registration begins for all at 7:30 AM — Refreshments available.

\$11 admission (spouse & children free) — Exhibitors see below.

Westford Regency Inn — Regency Room — Westford, Mass.
(I-495 at Exit 32 — directions below)

Pre-registration & Information:

A.R.C., P.O. Box 2-W20, Carlisle, MA 01741 — (866) 371-0512 — arc@antiqueradio.com

Exhibitors: \$11 per person/family for admission plus \$33 per table. Table sizes and location assigned on a first come-first serve basis. Early registration is recommended. Last year's exhibitors in the main hall may request the same location, if we receive their paid registration by February 1, 2010. Four table limit per exhibitor. Exhibitors must occupy tables for entire show. Tables unoccupied 15 minutes prior to the end of the show will not have priority for the same location in 2011. Exhibitors may register at the door (if tables are available), or may pre-register by mailing payment to: Radio XLI, c/o A.R.C., P.O. Box 2-W20, Carlisle, MA 01741. (Make check/MO to A.R.C.; Visa, MasterCard, Discover, American Express OK, too.) If paying by credit card, exhibitors may pre-register by calling (866) 371-0512 or faxing (978) 371-7129. **Note:** Show opens to all at 8:00 AM. At 7:30 AM, exhibitors may enter the hall only to deliver goods to their tables (no setup/no unpacking/no buying/no selling) and then must return to the foyer until the doors open for everyone at 8 AM. If desired, one person may sit at the table for security purposes (no setup/no unpacking/no buying/no selling). Speak with show manager for special situations. **Cancellation Policy:** Table fee will be refunded only if requested and the table is resold. If a table is not occupied by 9 AM, a table may be cancelled and resold.

Overnight stay: Westford Regency Inn at 1-800-543-7801. Mention Radio XLI for special rates. Room reservations should be made by January 22, 2010 for special rates. Bring your family to enjoy indoor pool, health club, racquetball courts, three restaurants, bar, etc.

Directions: From I-495, take Exit 32. Follow "To Rt. 225" sign. At traffic light by gas stations, turn right onto Rt. 110-West for 0.4 miles. The Westford Regency is on the right. Use doors on right (north) side of Inn. Ramps at both doors!

THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the *QST-VIEW* series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. *QST* Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and *QST-VIEW* has on-line instructional help for operating the *QST-VIEW* browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter

S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. Thousands sold at \$ 199. **SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts !**

ANTIQUE RADIO CLASSIFIED

Antique Radio Classified (ISSN:8750-7471) is published monthly, 12 times per year, by John V. Terrey, 498-A Cross Street, P.O. Box 2, Carlisle, MA 01741. Periodicals postage paid at Carlisle, MA, and additional mailing offices. Telephone: (866) 371-0512, 9:00 AM to 5:00 PM ET weekdays; machine answers phone at other times.

Annual subscription rates within the U.S. are \$45.00 by Periodicals mail and \$60.00 by First Class mail.

Annual foreign rates. By air: Canada - \$61.00; Mexico - \$67.00; Other foreign countries - \$105.00.

Two-year subscriptions are twice these rates and receive an extra month. Sample issues are available free on request.

Please, no classified ads by telephone, thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest from its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

A happy new year to all! And, many thanks to all who have responded to our holiday subscription specials. By offering each of you a saving, our monthly revenue has actually risen because more of you responded to this opportunity.

So, in the spirit of the new year, we are continuing to offer discounted subscription rates: 1-year subscriptions by Periodicals Mail will be \$36; by First Class Mail, \$48. These 20 percent lower rates are part of an experiment to restructure our revenue, but, of course, they could be discontinued at any time. Foreign rates have been discounted, also.

We also will be offering a \$30 per year, web-only subscription. The web-only subscriber can read the magazine PDF on the web and will receive all subscriber benefits, such as book discounts, free ads, etc.; however, no copy is mailed. Of course, the full issue PDF is available on the web for all subscribers as well. For web-only subscribers, as with all print subscribers, a real U.S. postal address will be verified since permanent passwords will be mailed. Web-only rates will be most beneficial to our foreign subscribers where postage drives the price up considerably. Also, the \$9.95, 2-month, web-only subscription will be discontinued.

With these practical matters covered, on with what's in A.R.C. this month! Though it may be a new year, all of our January articles reflect the same collector spirit in the perennial hunt for an old radio or knowledge about radio in general.

In our lead article on the Cockaday LC27, Art Redman proves not only that he's an inveterate hunter of radios made by Northwest manufacturers, but also that he's a perfectionist. In this case, the radio he had found did not have a Cockaday circuit. And so, his hunt goes on for the perfect Cockaday.

But, Art also reports on a happy ending to a three-year hunt for an Allwave 5 in his follow-up to his Hallock and Watson article in the June 2006 A.R.C. For that article, he had only ads for the set, but in this issue, he shows photos of the real thing, an Allwave 5 acquired at last from a fellow collector.

Help from fellow collectors is a sure way of enhancing our collections, but there are many other ways. John Miller lays them all out for us with eight tips for hunting down old radios that have led to his personal growth as a collector. John urges us to leave no stone unturned — or yard sale or curbside trash unexplored

PRINTED WITHOUT COMMENT

We continue to receive reports from advertisers of e-mail responses to their classified ads proposing to pay them with a check, sometimes via a third party, in excess of the purchase price. The seller is asked to refund the difference by wire. In more than one case reported to A.R.C., the check received was "bad."

To minimize problems, we suggest that you always know whom you are dealing with or ask for references.

— in pursuit of a great collection.

In that same spirit, Paul Moens describes his penchant for adopting old radios in the same way some people adopt stray dogs. His GE H-87 console arrived at his door in a snowstorm. Already a basketcase, its future was even less promising when the chassis and various parts fell out in the snow on the way to his front door. However, even though it took five years, Paul has restored the GE H-87, a set that he hopes his grandchildren will treasure.

Something to treasure is perhaps the driving force behind every radio collector's hunt. Mark Fitzgerald describes how he rediscovered his early interest in old radio by a chance encounter with a Philco 41-296 on its way to the dump. Restoring the Philco to working order awakened all kinds of past memories of radio programming and performers of the past. And so a new and true collector was born.

Maybe Bob Murray's unusual GE Model GRC2, made in England, will fire up a reader of these pages and give birth to a new interest in foreign sets.

Needless to say, firing up interest is not an issue at radio shows like the highly successful Kutztown show run by the Delaware Valley Historic Radio Club (DVHRC). In location, size, and amenities, this show draws people of wide interests who might also be captivated by the radio technology on display. We're always grateful for Kutztown reports from both Stan Saeger and John Hagman.

On the other hand, Dave Crocker reminds that an event need not be large to be interesting. Dave introduces us to a new-to-radio auction house, Nest Egg Auctions of Connecticut. The Herbert C. Morgan collection offered many bargains and is an example of how checking out local auctions can be another way to enhance your collection.

A.R.C. Benefits. Be sure to take advantage of A.R.C. benefits: A New Year Subscription Special; a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; a secure shopping cart on the website, www.antiqueradio.com; for current subscribers, a 10 percent discount on all book orders; and the full magazine available on the website. **Note:** Please do not send credit card info by e-mail. Use our secure website or U.S. Mail, or call or fax.

Coming Radio Events. Start the new year off right by attending at least one of the events listed this month: 2 auctions, 7 meets, and 27 meetings. Meanwhile, best wishes from all of us at A.R.C. for a happy and more prosperous 2010.

Happy Collecting in the New Year!

John V. Terrey, Editor

ON THE COVER

One way to start your hunt for old radios in 2010 is at a radio meet auction or a private auction house. An example of a \$525 find is the Atwater Kent 82 on our cover. The photo is by Dave Crocker.

WITH THE COLLECTORS

The Cockaday LC-27 Kit and Circuit

BY ART REDMAN

Once again Art Redman pursues his research on Pacific Northwest radio manufacturers. His interest in the Cockaday Co. leads him to a search for the real thing. (Editor)

Laurence M. Cockaday designed several battery radio receivers along with shortwave sets bearing his name. Among them are the Cockaday Models LC-26 and LC-27, as well as the SC11, 620, and 630 marketed by Silver-Marshall. The Cockaday Model LC-27 sold in 1927 as a kit with four 01-A tubes and an 112A or 71A as an output tube.

The Model LC-27, as shown in Figures 1 and 2, fits in a 12" x 10 $\frac{1}{4}$ " x 27 $\frac{1}{2}$ " long cabinet made by the Corbett Cabinet Manufacturing Company of St. Mary, Pa. Figure 3 shows the company's logo.

The four controls on the panel are an on/off switch, resonance variable capacitor, volume rheostat, and a 2-gang capacitor serving as a station selector. Figure 4 shows a close-up of the station selector. There is also a speaker jack on the front panel.

There are three B battery terminals: +135v, +90v, and +22.5v; and three C battery terminals: -4.5v, -9v and -22.5v. The -22.5v terminal is used when a 71A tube is in the output stage.

The other major parts of the Model LC-27 kits, many of which can be seen in Figure 5, are four Alco-shielding plates to separate each RF stage and detector stage, a Thordarson R-300 audio transformer, two Jefferson interstage transformers, three binocular RF coils, a Glaston 2-megohm grid-leak resistor, and a Sam's No. 85 Helical Wound RF choke. The set also has two antenna posts, one for a short antenna and another for the long antenna.

The length of the antenna has little effect on tuning in the Cockaday circuit also known as the "four circuit" receiver. The semi-periodic primary of the antenna with the construction of a single-turn feedback coil makes this inductance tiny compared to the total inductance of the antenna circuit. The one-turn primary is wound around the secondary winding, which is shunted by a variable capacitor forming a separate closed tuning circuit coupled to

Figure 1. The Cockaday LC-27 chassis in a Corbett cabinet.

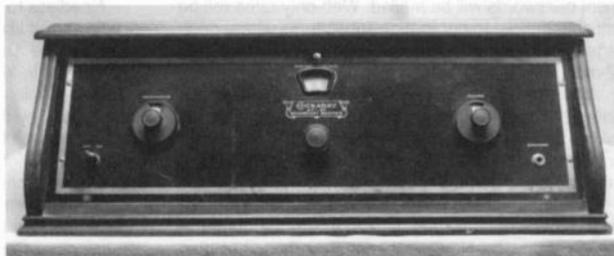

Figure 2. Another view of the Cockaday LC-27 in a Corbett cabinet.

Figure 3. A close-up of the Corbett Cabinet Manufacturing Co. logo.

the rest of the antenna circuit.

Aerials of different lengths changed the tuning of the antenna circuit, which is the one thing manufacturers could not control or design unless the set included an enclosed loop antenna.

Many of the 1-dial sets still need an antenna trimmer control. In a TRF receiver designed to be a

Figure 4. The station selector for the LC-27.

1-dial tuner, instead of the common 2 and 3-dial sets, the largest tracking error from the antenna to the first RF transformer had to be reduced.

Cockaday minimized this tracking error by loosely coupling the antenna to the secondary winding of the first RF transformer. That antenna length has minimum effect on tuning, makes the receiver more selective, and is the one advantage of the Cockaday circuit.

However, the Model LC-27 is in reality a 2-dial tuning set. The resonance variable capacitor on the left side of the set is not an antenna trimmer. Instead, this single-gang capacitor tunes the first RF stage while the 2-ganged capacitor tunes the sec-

ond RF stage and detector.

As I traced the circuit, I found to my disappointment that the wiring of the Model LC-27, assuming this set is correctly wired, does not include the famous Cockaday circuit shown in Figure 6. There is no single-wire coil or any feedback to the antenna circuit.

I wanted a Cockaday circuit receiver, despite one longtime Oregon collector's calling it the "Cockaday" circuit. My Model LC-27 is only another 5-tube TRF battery set from the 1920s sold up to the screen grid era. In fact, it is a Cockaday brand radio without the Cockaday circuit. I wonder if the LC-26 model or any of the Silver-Cockaday models have the Cockaday circuit. If so, I would like to acquire a true Cockaday battery radio.

RADIO RAMBLINGS

The Philco 41-296, Billie Holiday, and I

BY MARK FITZGERALD

One chance encounter with a radio can a collector make. Mark Fitzgerald tells the story of his rediscovery of the science and ingenuity basic to the development of early radio and the beginning of his love affair with antique radio. (Editor)

It was 1998. I stopped off at the doctor's office where my mother worked to do a little computer repair. The office was in an old Victorian that had a huge wrap-around porch. It was a great building, and I remember thinking it was a shame that they had turned it into a professional office.

As I was leaving, I happened to glance over to my left. Sitting there, waiting for the garbage collector, was an old wooden radio. It was actually a Philco 41-296, although I didn't know that at the time. I had always been interested in antiques, and had been doing woodworking of various sorts for many years. I also played around with electronics, although that always tended more toward transistors than tubes. The tired old radio and its potentially gorgeous woodwork intrigued me.

I walked back inside. "Hey, are you going to

Mark Fitzgerald's Philco Model 41-296 "that started it all."

throw that radio out?" I asked the receptionist. She said she would check, and when she came back, she told me that I could have it if I wanted it. I knew nothing about antique radios at the time.

However, radio as a technology has always fascinated me. When I was a kid, I would listen to the AM dial late at night, picking up the skip signal from stations in exotic locations like Chicago, New York City, Cleveland, and other cities. This signal was being beamed to me over absolutely nothing, which was almost like magic to my eight-year-old brain.

The first thing I did when I got the set home was to take it apart. Well, that's not entirely true. The first thing I did was get on the Internet and type in "antique radio." I was amazed at the number of hits that resulted.

It seemed there was an avid collector base out there that loved nothing better than to talk endlessly about antique radios of all sorts. I had absolutely no idea this world existed. Amazingly, I learned there were small companies making reproduction dials, knobs, and face plates, and places that stocked 60-year-

old replacement tubes and other necessary restoration parts.

POWERING UP THE PHILCO

After many hours spent consulting with experts online, and many more with a soldering gun in hand, I was finally ready to power the Philco up for the first time. I plugged the radio in and turned it on. The dial lit up, glowing. The warm smell of the tubes heating up was like a perfume to me, and still is. Slowly, the set came to life.

At first it was just a slight hum and bit of static, and then suddenly I heard someone talking. I carefully tuned it to 810, and immediately picked up WGY out of Albany, New York, one of the most powerful and historic AM radio stations in the country. I called my father and screamed, "Listen to this!" and then held the phone up to the speaker. You would have thought I had just invented the polio vaccine or something.

After I hung up the phone, I switched to the shortwave band and heard what I thought was French. I moved the dial a little farther, and picked up someone speaking Japanese. I was listening to real people thousands of miles away, and the idea of that actually happening, the absurdity of a virtual impossibility, took my breath away.

I was listening to them live, grabbing their voices from thin air, on a piece of antiquated technology that came off the assembly line when Franklin D. Roosevelt was President — a wooden radio that was half art and half science, made by American workers in an American factory, at a time when nobody anywhere in the entire world could make them better.

It was then that it hit me. I was sitting there, listening to a machine that was an integral part of American history. In 1941, for its original owner, this brand new radio was a connection to the entire world. Similar to today's ubiquitous television, the radio was the lifeblood of home entertainment. It provided music, stories, news, information, and a focal point for nightly family gatherings. It was the media center of the 1930s and 1940s, and its very existence in a household brought people together.

And I had just brought one back from the dead!

THEN AND NOW

While working on the Philco, I got to thinking about what had prompted me to go back inside the office and ask about it in the first place. It was a visceral response, I think, perhaps stemming from the fact that I used to listen to CBS *Mystery Theatre* on the radio when I was a kid in the 1970s. Also, my father was always talking about how he used to enjoy old radio shows like *The Green*

Hornet, *The Lone Ranger* and *Amos n' Andy*.

In addition, I had long ago discovered a love for big band music and artists like Billie Holiday, Satch, Count Basie and Artie Shaw. To this day I can still remember the chills I got the first time I heard "Strange Fruit," or the first time I heard Louie Armstrong play his horn.

As I listened, I was awed by the reality of the life-changing events that had once emanated from the Philco's 15" speaker. In my mind's eye, I could picture the original owners, leaning close, absorbing the horrible news that we were at war again. I could picture those same owners just a few years later, perhaps still silently mourning the death of their eldest child in Normandy, but finding enough hope within themselves to cry tears of joy and hug each other and thank God when they heard that the war was over and Germany and Japan had surrendered.

I had fallen in love with these technological wonders of another era — I couldn't help it. As my hobby progressed, and my collection of radios grew, I quickly realized that the AM dial was a veritable wasteland of talking heads with nothing much to say, so I built an AM transmitter that allows me to broadcast an AM signal to every inch of my house. Combined with a sizable MP3 collection, I have all the AM programming I'll ever need.

Some nights, when there's nothing on TV but inane reality shows and repeats of "King of Queens," I'll just turn off the television and flip on one of my favorite radios. I'll queue up some live Glenn Miller, or even a few episodes of *Lux Radio Theatre* or *Phillips Playhouse*. If I'm in a historical mood, I'll put on some original Edgar R. Murrow World War II news broadcasts.

But when it's time to just relax and enjoy the music, well, that's a different story. That's when I'll put on some Billie Holiday. Her sweet, sultry voice was, both literally and figuratively, made for these radios.

As Billie's voice envelopes me with the first notes of "Easy Livin,'" I pour myself two fingers of single malt, and kick back in my favorite chair. I close my eyes, and I'm instantly transported back to a simpler, more hopeful, somehow nobler time — and Lady Day and I have returned home once more.

(Mark Fitzgerald, 355 Ballou Rd., Porter Corners, NY 12859)

Mark Fitzgerald has a collection of pre-1945 consoles, cathedrals and tombstones that he has restored both electronically and cosmetically. He focuses almost exclusively on "saving" basket cases, because he worries that if he doesn't revive them, nobody else will. Also, they are all he can afford. His wife wishes he were not partial to consoles — after all, the couch has to go somewhere.

RESTORATION TOPICS

General Electric H-87 Restoration

BY PAUL R. MOENS

In the following article, Paul Moens shows that with patience, a collector can rescue a basketcase set and make it an important part of his collection. (Editor)

Many people adopt stray dogs and cats. I guess my claim to fame is that I adopt old radios. A case in point occurred in the fall of 2009 when I completed a 5-year project involving one of those adoptions — the 1939 GE H-87 console, shown in Figure 1.

It all started with family members being called upon to help rescue the bulky set that had been delivered to my front door at an unexpected time. It was snowing, and as we struggled with the cabinet during transport, the chassis fell out. It had not been secured to the cabinet by the retaining screws and was only held in place by the two front knobs. The Beam-A-Scope, shown in Figure 2, also fell out; in fact, we were all picking up parts out of the snow for quite a while.

THE REPAIR PROCESS

The radio's band switch was damaged well beyond repair. In the H-87, the band switch has three wires that attach to the Beam-A-Scope antenna which is part of the circuit wiring. After 70 years, the wires and the wafers on the switch are so fragile and brittle that the least little stress probably has doomed many radios using this design. I'm surprised General Electric didn't provide some type of strain relief.

Most people would have thrown the radio away as junk at this point. Now I'm not a repair technician and only have very basic radio repair skills, but I like a good challenge. I spent the next four years attempting to find a replacement switch thru A.R.C. ads and the Internet — no luck.

Next, I decided to try to obtain another chassis in workable and restorable condition. My efforts paid off in May, 2009, when I found that "Amazonmike" in Livonia, New York, had one for sale on eBay. I drove there to pick it up rather than risk shipping damage. There were issues with the band switch on this chassis also, but in this case, the band switch was repairable.

The set contained all eight of its original tubes, and all tested very good. The tube complement is as fol-

Figure 1. The 1939 GE H-87 console.

lows: (2) 5Y3 rectifiers, (2) 6Y6 AF outputs, and one each 6J5 inverter, 6SQ7 detector, 6SK7 IF amp, and 6SA7 converter. The set covers the BC and SW bands.

It didn't appear that any paper capacitors had ever been replaced, so I contacted Dave of Dave's Antique Radio & TV Restoration, an advertiser in A.R.C. He is a provider for some chassis repair work in Liverpool, New York. He corrected the band switch issues and replaced all 17 caps. Now I had a working chassis.

My next step and actually the easiest for me was restoring the cabinet. "Amazonmike" provided me with some additional cabinet parts, so I basically made one radio out of two. The lower third of the cabinet must have been subjected to moisture over the years as there was hardly any finish remaining. Again, I'm no expert at stripping and refinishing either, so I took the easier option of matching the mahogany finish, careful sanding, staining, blending and sealing.

It really came out quite nicely. The happy ending to my story is that with some patience even a mere collector like me with limited skills can complete a restoration project. You might even help to stimulate the economy in the process.

According to the *Bunis/Slusser Collector's Guides to Antique Radios*, the H-87 is listed as a 1939 console, although most of the advertising I've seen is from 1940. The suggested retail price back then was \$79.95, which is today's equivalent of over \$1,200.

I obtained many of my radios in my collection at yard sales and curbsides during my 22 years as a letter carrier for the U.S. Postal Service, as well as by word of mouth. My most prized radio is another console, my father's 1939 Westinghouse WR-366. That was our parlor radio into the early 1950s before my family had our first TV. The "H-87 Project" was tedious but very rewarding, and now this set also has sentimental value in my life. I hope my grandchildren will enjoy it as well someday.

employed as a tax & financial advisor. He has been collecting radios since the 1970s. His collection also includes battery portables, tabletops and Zenith Trans-Oceanics.

General Radio Company Model GRC2

CONTRIBUTED BY ROBERT MURRAY

Submitted for "Photo Review," this unusual item seemed interesting enough to be featured separately. (Editor)

The General Radio Company Model GRC2 is a crystal set made in London, England. Notice the attractive serpentine arrangement of the tuning dials on the front panel.

The crystal is located inside the set behind a small round glass window. The adjustment lever protrudes through a hole in the top of the set. Apparently, the first owner didn't find this arrangement very convenient because when I got the set, the original detector was bypassed, and a Philmore brand detector was mounted on top of the set.

(Bob Murray, #605 -1000 Beach Ave., Vancouver, BC, Canada V6E 4M2)

WITH THE COLLECTORS

Hallock & Watson Follow-Up

BY ART REDMAN

The June, 2006 issue of A.R.C. had a 5-page article by Art Redman covering the Hallock & Watson Radio Corporation. Art has been fortunate enough to add another Hallock & Watson set to his collection and shares photos of it in this follow-up article. (Editor)

Since I did not own the All-Wave 5 (AW-5) when I wrote the June 2006 article on Hallock & Watson, I showed only ads for the set. Made in 1926, the AW-5 was Hallock & Watson's last radio.

Recently, I was happy to obtain this set from Jay Johnston; a member of the Northwest Vintage Radio Society. Figures 1, 2, and 3 show my Model AW-5. The cabinet style is the short version style, 22" long. This style is shown in the 1926 Pacific NW Radio Exposition Program on page 15 and in the Portland Telegram for February 27, 1926. (My June 2006 article shows both of these advertisements.)

Jay sold this set to me only because he bought the longer 36" cabinet version on eBay. This version contains the side battery compartments. I consider the short version more rare because I have never seen one before. The longer version is the one in the hands of most collectors in the Pacific Northwest.

Photos by Sonny Clutter.

WITH THE COLLECTORS

The Hunt for Old Radios — Eight Tips

BY JOHN MILLER

Having been a collector for over three decades, John Miller gives us eight tips to find "something" for your collection. He also tells us how following the advice he shares here has helped him to grow as a collector. (Editor)

Back in the mid-1980s a new collector came over to view my collection, and after seeing several of my cathedral sets, he remarked, "Wow, I didn't realize how easy those are to find." While I certainly don't consider cathedrals, or many other old radios easy to find, I have stumbled onto a few tips over the last 30-odd years or so that you may find useful in locating old radios. As I reminisce about how my collection grew, perhaps you'll find an idea that will help you add more sets to your collection.

Back in the mid-1970s my collecting bible was *A Flick of the Switch 1930-1950* by Morgan E. McMahon. That book and its companion *Vintage Radio 1887-1929*, also by McMahon, were the only reference books available to collectors at the time. Since my interest leaned toward cathedral-style radios, I used to scan the pages of *A Flick of the Switch 1930-1950* dreaming of the day I'd locate my first cathedral.

It was, in fact, at least three to five years later before I located the first cathedral to grace my collection. A friend told me about a radio he saw advertised in the newspaper classifieds he thought I'd be interested in. There was no mention of the style or model number, just the description, "Old Philco radio, 110-volt." That Philco turned out to be a Model 20 cathedral that I purchased for \$25.

TIP 1

I'll never forget the thrill of finding that set and carefully bringing it home. In fact, for many years I kept a copy of that small classified ad. So TIP 1 is to look in the classified ad section of newspapers in your local area. You may also want to run a "wanted" ad in the same papers, although it has been my personal experience that those didn't yield very good results; how-

ever you may have better luck.

TIP 2

I then heard about a monthly flea market in Washington Courthouse, Ohio. That proved to be a fairly good place to find radios; in fact, I bought my 1938 Zenith 9S262 console (still one of my favorite sets) there for \$25 in 1979. If I recall correctly, I found perhaps three or four cathedrals there over a period of a few years, but not very many. Although my collection was increasing little by little, I wasn't finding the cathedrals I so

desperately wanted. In any case, TIP 2 is to hunt through flea markets whenever you see one. If you have to drive two to four hours to find a really large flea market, the trip will be worth your while. But get there early! Other radio collectors will be out in force, and if you sleep in, you'll most likely miss the best pickings.

On the other hand, if you happen on one during a late Saturday or Sunday drive, don't hesitate to stop. There's always a chance that a collectible radio showed up after the

early horde of collectors left, or the price that was initially too high has come down to a reasonable level. And don't forget about your local Hamfest. These huge events often have everything from old radios to modern computers — a great place to find parts at very reasonable prices. Once again, if looking for old radios, the key here is to get there early. It was at the 1980 Dayton, Ohio, Hamfest that I found the Philco 90 cathedral that still sits on my shelf today.

TIP 3

For me, the turning point from finding a radio scattered here and there to doing serious collecting was finding out about the Indiana Historical Radio Society (IHRS) in the late 1970s. Going to their annual spring meet, held at the time in Auburn, Indiana, was for me, like throwing a kid into a candy store! Rather than walking through a flea market trying to locate a "radio in a haystack," here was one location where the only thing people were selling were old radios!

To this day my fondest radio collecting memo-

(Continued on following page)

The early radio collector's bibles.

(The Hunt, continued)

ries are of the spring IHRS meets held at the Auburn-Cord-Duesenberg Museum in Auburn. It was at the first IHRS meet that I met my good friend and very prolific cathedral collector Frank Heathcote. It was also where, in 1981, I obtained my first West-Coast cathedral, a Zaney Gill Music Box in 1981 and my Zenith Walton in 1985.

Through membership in the IHRS, my knowledge of collecting, restoration, and historical significance of old radio grew. I've met many friends from those Auburn days in the late 70s and 80s, many of whom are still close friends.

Through the IHRS, I also learned of the Antique Wireless Association (AWA) and the Antique Radio Club of America (ARCA), which later merged with the AWA. The AWA had a very large annual meet in Canandaigua, New York, later moved to Rochester, New York, whereas ARCA had its large annual meet at different locations each year.

The AWA flea market was larger than I ever imagined. Many radios in my collection came via the 10-hour drive to Canandaigua in the early to mid-1980s — sets like my Philco 70 and my beautiful Splitdorf Abbey battery set in 1981; a rare Emerson Model 35 and a rare Radiochron large cathedral with a clock in 1982; a Sterling Little Symphony cathedral in 1983; an Arvin Hopalong Cassidy and a rare Belknap cathedral in 1984, just to name a few.

It was during a June IHRS meet, back about 1981 or so, that Illinois radio collector Joe Willis came up with the idea of three radio clubs hosting a "mega" meet in Elgin, Illinois, called Radiofest that August. And the rest, my friends, is what you call "history."

After the first year, sponsorship of Radiofest has been handled solely by Antique Radio Club of Illinois (ARCI). Now in its 27th year, Radiofest has become one of the largest radio meets in the world, drawing collectors from not only the entire United States, but also from overseas as well. Where else could you find a New Zealand radio collector selling superb, laser-cut, wood reproduction grilles for an Atwater Kent Model 165 cathedral? Some of my most coveted sets have come from Radiofest. It was during these IHRS, AWA and Radiofest years of the 1980s when my collection really began to take off.

So TIP 3 is to join several radio clubs and attend as many of their meets as possible. Not only will you find old radios to add to your collection, but you'll also make new friendships and broaden your collecting knowledge through contests and seminars. At a radio meet you have the bonus of seeing the

Zenith 9S262 (From Cones, Bryant & Blankinship, "Zenith, The Glory Years, 1936-1945").

radio or artifact "in person," not having to rely on a vague description or fuzzy photo. Plus, you don't have to worry about the newest addition to your collection getting busted up during shipping.

TIP 4

It was during Radiofest in 1984 that Cleveland, Ohio, collector Gary Schneider debuted his sample issue of *Antique Radio Classified* (A.R.C.). Gary's vision was to have a monthly publication that would become the standard publication by which a collector could buy, sell or trade radio-related items on a large national basis. And what a standard Gary set! Gary eventually sold A.R.C. to collector John Terrey. That deal was also made during a Radiofest in 1986, and today A.R.C. still sets the standard for quality articles, as well as a wealth of advertising.

So, TIP 4 is to subscribe to A.R.C. If you don't, you're missing out on the best monthly publication available for radio collectors. Through A.R.C., you'll have access to the best classified ads in our hobby, learn about new publications, read articles concerning collecting, history, and restoration, as well as have access to the most comprehensive calendar of events across the nation.

Your own local club is a great source for info via newsletters, collector meets, and another activity that is somewhat unique in the radio-collecting hobby; that is, regional members often have an occasional open house. Other members are invited over to a collector's house to enjoy his collection, visit with old radio friends, have some refreshments and sometimes do some buying and trading. I like to have one of these on occasion because it forces me to clean up my basement and make it presentable.

TIPS 5 AND 6

It was while I was hosting an open house a few years ago that a fellow local member told me about a pretty rare radio that I had been hunting for several years. This tip from a fellow collector actually led to the acquisition of one of my prize sets. Granted, the cabinet and veneer need some work (well, maybe a lot of work), but eventually this will be the pride of my entire collection. TIP 5, you guessed it, host an open house for local club members. You'll have a lot of fun, learn a lot from your guests, and if you're like me, you'll have a clean radio room for at least a few days.

Now, although I've never personally found a radio by the curb waiting for the trash collector, I know some collectors who have. So if you drive

through an older section of your city on trash day, follow my TIP 6 and keep an eye out for old radios being thrown away. Consoles are easy to spot, smaller sets will be a bit harder. Last December I spotted a garbage truck that had a console radio strapped on the back that the trash collectors had kept. I saw that it was a style that could have been a later Scott! I wanted to follow the truck and find out what it was, but we were headed out of town and my wife was not amused at the thought of our chasing down a garbage truck. But next time — when I'm by myself, I'll follow that truck all the way to the dump if I have to!

TIP 7

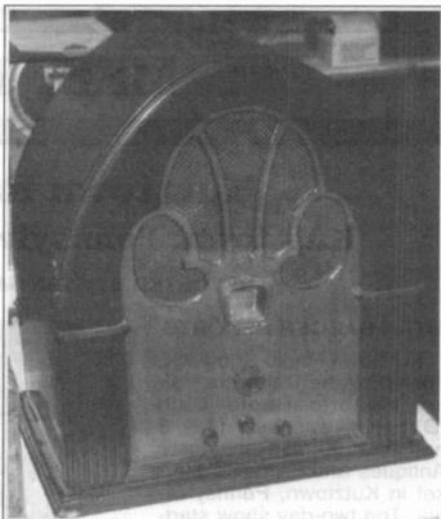

TIP 7 will take you to auctions, antique shops, malls, estate sales, and yes, even the neighborhood garage sale. Late one afternoon on July 4th, on the spur of the moment, I stopped at a yard sale and found a nice, 10-tube, 1937 Zenith console for \$25. My friend and fellow collector the late Carl Bryant found a rare 10-inch Trophy baseball radio, ca 1941, for \$6! Auctions and estate sales can be both fun and/or boring, depending on how long it takes for your item to come up for bid, and, of course, the final price. Steve Bar-on and I once drove two hours to an estate sale advertising a cathedral radio. Upon arrival, we found it to be a modern Franklin transistor reproduction!

On the other hand, many nice and quite collectible radios are sold at auction. Antique shops and malls, especially in smaller towns often turn up old radios at reasonable prices. I found my 1939 17-tube Midwest console with electric motorized tuning for \$35 at an old antique shop in Lafayette, Indiana.

TIP 8

My final tip, TIP 8, takes us to the World Wide Web (www or Internet) via computers in search of old radios and related items. Almost everyone has heard about eBay, the online auction service. On eBay, you can find anything, be it new or old. I personally don't buy old radios from eBay because I think some buyers have greatly inflated the prices. I also don't sell old radios on eBay because I'd rather do it at a radio meet and support our hobby. On the other hand, there are a lot of radio-related items, such as radio-related novelties, that I have gotten from eBay. I once spent an entire day going through Louisville antique malls and shops with the goal of finding just one radio-related novelty item. I found none.

On eBay, I have picked up at a reasonable cost Orphan Annie decoders, Crosley Bonzo postcards, and Hopalong Cassidy items to go along with my radios. Some of these items I would never have found, and if perhaps I did, they may have cost more than I paid for them. If you want something

Philco Model 70 (an A.R.C. archive photo).

Arvin Hopalong Cassidy radio (an A.R.C. archive photo).

badly enough, search eBay for it, but never bid more than you're willing to pay, and remember to factor in the shipping cost. I'm sure there are other online ways to buy or bid on radios, but I'll leave it to one of you fellow readers to write that one up. Happy Hunting!

(John Miller, 817 Edgewood Dr., Lexington, KY 40515)

John Miller's interest in old radios began in high school when an old family friend gave him a Zenith 5S127, which he restored via Jim Fred's "Radio Topics" in "Elementary Electronics" magazine. An avid collector since 1974, his collection centers primarily on cathedrals and pre-1940 Zeniths. Some of you also may remember John as one of the founders of "The Eliminator." This "Official News Letter of the A.C. Radio Renegades," was published in the late 1980s.

MEET REPORT

Kutztown Radio Show XX Kutztown, Pennsylvania — May 8-9, 2009

REPORTED BY STAN SAEGER AND JOHN HAGMAN

STAN SAEGER REPORTS

Kutztown Radio Show XX, hosted by the Delaware Valley Historic Radio Club (DVHRC), was held May 8 and 9, 2009, at Renningers Antiques and Farmer's Market in Kutztown, Pennsylvania. The two-day show started early Friday morning, and by the time I arrived at 10 A.M., two-thirds of the dealer spaces were occupied.

In the past, shows run by the DVRC were held in a number of different venues in suburban Philadelphia. However, the DVHRC and Renningers of Kutztown soon joined forces to hold the Kutztown Radio Show. From fairly modest beginnings, the show has grown into one of the premier events in the country.

Radios, speakers, parts — typical flea market offerings.

Again, Richard Estes of Estes Auctions, Burbank, Ohio, contributed his time for a Friday night auction. Approximately eighty lots were put up for auction, including a Spartan Bluebird, a number of Catalin radios, and an E.H. Scott. Prices for the higher-end items held their own, while some of the lesser items went for quite reasonable prices.

After the auction, many in attendance stayed for the unofficial bonfire, which includes burning wooden items, including junk radio cabinets. Snacks, drinks and friendly conversation made for a great end to the first day.

Saturday started bright and early with a few more dealers pulling in and quite a bit more traffic from the general public. The Saturday auction, run by the DVHRC, started at noon and continued until nearly 3 P.M.

What makes the Kutztown event so successful? There is not one reason, but rather a combination of factors. The first is location-location-location. The Renningers' large site is ideal: plenty of parking, easy to get to, outdoors in a rural setting, yet under a roof in case of rain. Nearby amenities: The adjacent Farmer's Market offers a myriad of things to see and buy. At what other radio show can you stock up on produce, get a haircut, and purchase a gravestone without leaving the area? The fact that there is no official starting time is a bit confusing at first, but setup and

A nice Emerson green Catalin was an auction item.

sales begin whenever dealers arrive. Free admission, free parking and free overnight camping make for a friendly, laid back atmosphere.

(Stan Saeger, DVHRC, 5910 Chestnut Hill Rd., Coopersburg, PA 18036. saegers@ptd.net. Rennigers Antiques and Farmers Market. www.rennigers.com)

JOHN HAGMAN REPORTS

I recall leaving the house when I was ten for some sort of recreation. I'd have to remember change for the bus, or a baseball glove. Since then, many more things have been added to what I have to do or bring with me before going on an outing or road trip. More complicated than even my trip out West last March was preparing for the 20th Delaware Valley Historic Radio Club's meet in Kutztown, Pa. I have to get sets ready to sell, have money for getting there and for buying, including change, prepare signage, tags, tarps, etc., for a selling table, and also pack for a camping trip of a couple of days.

I camped out the night before and was there first thing Friday morning. The weather was about perfect the whole two days despite the forecast of a chance of showers. The meet was a little slower to get started than last fall's meet, but I entertained myself setting up my table and enjoying the eye candy. I noted that, despite the recession, more tables had been reserved than ever. Perhaps a fifth of the overflow second pavilion had been reserved. I bought a few critical parts, and by about noon the place was about two-thirds set up. I took a good many pictures this first day and through the entire meet.

One of the great things about this meet is that, instead of the frenzied dawn starts or formal Lemans-style 8 A.M. starts of other meets, Kutztown has a "soft start." Dealers drift in all

Not a display of radios at the meet, but a close-up photo of a doll house!

A nice Sparton Bluebird radio that sold in the Friday night auction.

day Friday, and then more arrive Saturday morning. I noticed prices held pretty steady compared to last year, although I think there were more bargains to be had. One of postwar Germany's finest radios, the medium size ver-

(Continued on following page)

Yes — tables, tables and tables full of vintage radios, speakers, hi-fi and other goodies!

(Kutztown XX, continued)

sion of the Siemans "Schatulle" (jewel box in German), was on display in the overflow area. I had neglected to ask the price, but later I learned my friend Bruce had picked it up for \$75, a fraction of its value to a collector of such sets.

I had a great time meeting and greeting old and newer friends. By dusk, it was time for the usual steak dinner, excellent this year. Just after this was an auction conducted by Estes Auctions inside the "White Room" setup by Renningers, the provider of the site for the meet. I attended and noted that prices were pretty soft for phono and TV items. Still, nice sets went for decent money, such as a Sparton Bluebird selling at around \$2,000, if I recall correctly. I bid on and won a later version of the KLH Model 21 FM table radio. I find these make excellent gifts once fixed up. I may keep this one though for use in my radio shop.

Later at night there was the traditional campfire featuring far gone broken wood radio cabinets. And, of course, it was time for a glass of Peter Wieck's excellent single malt with a follow up of Lebatt's Blue Ribbon draft. I had walked the dogs some during the day but went for one last long romp around the field before bedtime about 11 P.M. The free camping part of this meet is really what makes it fun and affordable to me. I dispensed with a TV and DVD player in the van this trip, as I've learned that yakking about old radios, along with other lies and war stories, takes up all my time at Kutztown.

The next day began about 6:45 A.M. I checked the newly arrived tables and bought a few tubes and other items. I saw a few tempting consoles, but since I had to pick up a Honda lawn tractor a friend gave me on the way home, I couldn't spare the room. I sold much of what I had brought on Saturday, but I had to mark them down some from what I would have expected at previous meets. However, since I don't bring as many nice sets to sell in spring due to the press of time (it's my busy time at work), I didn't mind too much. I noted just a couple of really high-end console sets, and I think one Zenith shutterdial for sale at this meet, although I was quite tempted by an Admiral streamlined locomotive-style chairside in the Waves LTD truck. By noon, when the club auction started, there was the usual giant pile

A great selection of cone speakers in the flea market.

Cathedrals and table radios at the meet.

of test equipment, cheaper radios, and oddball gear of all types in the auction pile. Since I have a 1955 color TV to restore this fall, I picked up a couple of bar and dot generators for a total of \$8. I waited around through most of the auction, and since I was slow packing up, it was almost over when I departed at around 3 P.M.

Thanks again to all the wonderful folks at the DVHRC, some of whom are like family to me, and Renningers for another great show. You can see my photos of the meet at <http://albums.phanfare.com/2497045/3886567>, including a short video and a few color pinhole camera photos. Be sure to contact Renningers (<http://www.renningers.com/kutzradio.htm>) well ahead of the next show, and you'll avoid ending up in the "Kid's Table" pavilion. Or just come to buy — admission is free and there's a regular flea market, as well as great Pennsylvania Dutch food at the markets on site. I'm always looking forward to Kutztown — See you there!

(John Hagman, 781 Mechanicsville Rd., Hinesburg, VT 05461)

AUCTION REPORT

Nest Egg Auctions The Herbert C. Morgan Collection Meriden, Connecticut — July 18, 2009

CONTRIBUTED BY DAVE CROCKER

Herbert Morgan and his wife resided in Danbury, Connecticut. In the early 1960s, they began collecting early electronic and mechanical audio technology. Herbert could fix anything he found. His collection grew so large that it filled the attic and basement of the main house, and also continued into the garage, a barn, and nine trailers, that occupied their property. Besides radios, he amassed collections of antique cars, telephones, phonographs, prints, furniture, and clocks. A virtual treasure trove of vintage technology.

Herbert and his wife both dealt with extreme medical bills and lost the property due to foreclosure. Not everything was auctioned off. So far, only the radios, telephones, clocks, and fans have been sold. Tools and antique cars

This Atwater Kent Model 82 cathedral in very nice condition sold for \$575.

will be sold at a later date. That task became the responsibility of auctioneer Ryan Brechlin of Nest Egg Auctions LLC of Meriden, Connecticut.

Nest Egg Auctions is a family-operated auction gallery and retail antique store offering a variety of services to the antique and estate solution industries. The Morgan auction was held on Saturday, July 18, at 30 Research Parkway in Meriden. Preview began at noon on Saturday. The auction itself began at 5:30 P.M. and ended before 10:00 P.M. Over 500 lots were sold in that time span with only a 15 minute break. A monumental task, indeed!

There were no Marconis, Kennedys, DeForrests, or crystal sets, but Atwater Kent and Philco were well represented, and the short notice to the collectors made for some real bargains. It turned into a very interesting evening.

Not listed here are boxes and boxes of assorted tubes, but of note is one box of brass-based tubes that went for \$140. Most common
(Continued on following page)

A unique American Bosch console, model unknown, brought a hammer price of \$450.

Manufactured by Sovereign, this unique cathedral, model unknown, was taken home for a high bid of \$350.

(Nest Egg Auctions, continued)

speakers and horns were sold in lots of 7 to 10. The same went for common radios, such as four RCA Radiola Superhet portables, all in one lot. More than a few unique and unusual sets went under the hammer, as you will notice in the listing. Not having been there and not knowing the actual conditions of the radios, or if the battery sets included tubes, or whether the AC sets worked or not, forced me to evaluate by photographs, which Nest Egg supplied. Here are the highlights.

e=excellent, vg=very good, g=good, f=fair, p=poor, WT=with tubes. All prices have been rounded down to the nearest dollar. Many unidentified, low-cost items, as well as items in really bad condition have been omitted.

Airline "Enchanter," 3-dialer, w/speaker, vg	\$30
Atwater Kent 20, big box, (3), vg	40, 50, 55
Atwater Kent 20-C, vg	70
Atwater Kent 32, (2), vg	40
Atwater Kent 33, (2), vg	40

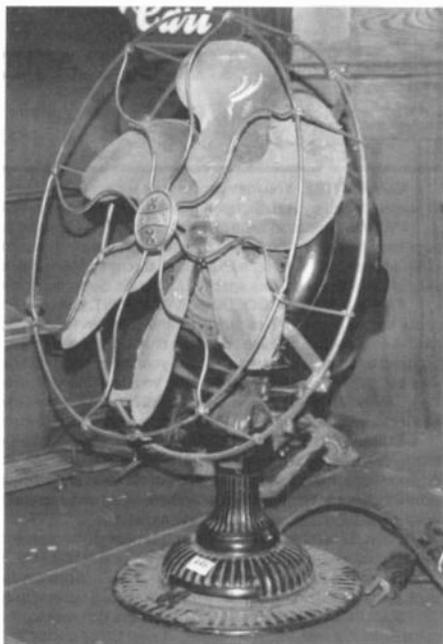

A warning: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

Up for bids was this 1929 Sparton Model 301 "Equation" console. It brought a high bid of \$400.

(Dave Crocker, 35 Santuit Pond Rd., #4B, Mashpee, MA 02649)

Dave Crocker, is a semi-retired member of the A.R.C. staff, and has been collecting radios for 40 years. Many of those years have been spent researching and collecting radios made by the Crosley Radio Company.

Nest Egg Auctions LLC, 30 Research Parkway, Meriden, CT 06450. www.nesteggauctions.com.

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express or Discover. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify U.S. funds. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or our secure website. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by credit card via our secure website or send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax. For your protection, please no credit cards by e-mail, use our secure website only.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the last day of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork via e-mail or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$18.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or give photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 50-WORD AD for subscribers in each issue; additional words are 10¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by Noon Eastern Time on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted. Free ads are OK via e-mail but for your protection, please use our secure website for longer, paid ads.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: **Please write legibly.** Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, l and I (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address are **required** in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 50 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET— 10th of the month

Subscribers (First Ad):

First 50 words: FREE!

10¢ per word for words over 50

Subscribers (Ads after first ad):

10¢ per word for all words

Non-Subscribers:

30¢ per word

Please do not forget to send in the extra 10¢ per word when your classified ad runs over the free 50 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

NEW LOWER CLASSIFIED AD RATES!

PHOTO & DRAWING DETAILS

Deadline: 1st of the month
for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$10.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address are required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Radio & Jukebox Auction

Saturday, January 16, 2010 – 10 AM EST

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love's Truck Stop, turn left
onto Garman Rd. and follow 7/8 of a mile to the auction site.

This will be a very good sale with lots of radios from the Colorado estates and jukeboxes from Ohio. Radios include lots of 1920s battery sets to include a nice Model 10 Atwater Kent breadboard radio. We will also offer a good selection of speakers to include horn speakers, a Western Electric, Atwater Kent H and L Type, Magnavox Type R-3, Rola, Stromberg-Carlson and others, cone speakers, Dynacone, Musicone, over 100 table radios, makes from Admiral to Zenith, a nice variety of cathedral radios. Also, tombstone types to be sold. This auction will also offer amateur radio items, transmitters, receivers, some military radios, many transmitting tubes also. Books & magazines, headphones, several thousand radio tubes, lots of Type 201 & 301A, UV-200, UX199-UV199, Type 80, Type 45, Type 46 & 47, Type 30, 26, 24, also selling other type tubes in bulk lots. The jukeboxes are from Columbus, Ohio and are all in good shape. A rare Aireon Type 1200 with matching speaker, a Wurlitzer Model 61, Ami Model 500, Wurlitzer Model 1250, Seeburg EBCS1, Seeburg Model 147A, Wurlitzer Model 2610, 1930s Mills Jukebox, Ami Continental Model XJCA 200, Seeburg Model PFE A1, Seeburg EB CS1, Seeburg SS-160, Chicago Coin bandbox, restored. Baldwin organ with Leslie speakers. All in all a nice variety auction. This will be the first of our auctions for the New Year. We would like to thank all those who help make our auctions a part of the radio collectors' community. Also to all the clubs and groups that work so hard each year to keep this part of our heritage alive and to keep it growing. Thank you all so very much. Terms: Cash, check, Visa, MC, Discover. 5% gallery fee. Early sales from 8:30 AM until 10 AM.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Vintage Radio Auction

Saturday, February 13, 2010 – 10 AM EST

at the Expo Auction Center
8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love's Truck Stop, turn left
onto Garman Rd. and follow 7/8 of a mile to the auction site.

This auction will offer items from the Ron Kaczmar estate from Dearborn, Michigan. Ron collected only Crosley radios, Crosley products. He had an Icy Ball, several Crosley refrigerators and Crosley cars, a Crosley truck, pre-war Crosley two cylinder car, and hot-shot convertible. Ron loved anything Crosley. Some of the radios we will offer in this sale are Crosley Type 51, Type 52, Type 50, 51-S, 52 SD, RFL-70, Trirdyn Super, Trirdyn regular, Trirdyn 3R3, Type 5-50, Crosley dashboard radios in the different colors, a Crosley Temperator heater-fan. These are what Powell Crosley had made to use up the supply of Dynacone speakers metal cabinets. Lots of Crosley Bakelite and wood table top radios, a restored Crosley Oracle grandfather clock radio. Many Musicone style speakers. The hard-to-find Repwood Models including the rare Widget, a nice selection of table radios in the cathedral and tombstone styles. Ron had some radios that were future projects in various stages of repair or ones in as found condition, these will also be included, due to duplication of many items we will spread these out over several sales. This auction will include items from other consignors and will be a large sale. We are currently working on a large collection in Ohio which will be in the spring. The February sale will also include several thousand tubes, ham gear, books, magazines and lots of parts. We hope to see you at the sale. Terms: Cash, check, Visa, MC, Discover. 5% gallery fee. Early sales from 8:30 AM until 10 AM.
