

ANTIQUE RADIO CLASSIFIED

VOLUME 27

FEBRUARY 2010

NUMBER 2

A.R.C. — THE NATIONAL PUBLICATION FOR BUYERS AND SELLERS OF OLD RADIOS AND RELATED ITEMS — WWW.ANTIQUERADIO.COM

RADIO XLI

An Indoor Old Radio Flea Market

Biggest Show on the East Coast ★ Same Giant Location

Last Year: Over 500 Attendees ★ 55 Exhibitors ★ 87 Tables

Sunday, February 14, 2010 — 8:00 AM to 12:00 NOON

Registration begins for all at 7:30 AM — Refreshments available.

\$11 admission (spouse & children free) — Exhibitors see below.

Westford Regency Inn — Regency Room — Westford, Mass.

(I-495 at Exit 32 — directions below)

Pre-registration & Information:

A.R.C., P.O. Box 2-W20, Carlisle, MA 01741 — (866) 371-0512 — arc@antiqueradio.com

Exhibitors: \$11 per person/family for admission plus \$33 per table. Table sizes and location assigned on a first come-first serve basis. Early registration is recommended. Last year's exhibitors in the main hall may request the same location, if we receive their paid registration by February 1, 2010. Four table limit per exhibitor. Exhibitors must occupy tables for entire show. Tables unoccupied 15 minutes prior to the end of the show will not have priority for the same location in 2011. Exhibitors may register at the door (if tables are available), or may pre-register by mailing payment to: Radio XLI, c/o A.R.C., P.O. Box 2-W20, Carlisle, MA 01741. (Make check/MO to A.R.C.; Visa, MasterCard, Discover, American Express OK, too.) If paying by credit card, exhibitors may pre-register by calling (866) 371-0512 or faxing (978) 371-7129. **Note:** Show opens to all at 8:00 AM. At 7:30 AM, exhibitors may enter the hall only to deliver goods to their tables (no setup/no unpacking/no buying/no selling) and then must return to the foyer until the doors open for everyone at 8 AM. If desired, one person may sit at the table for security purposes (no setup/no unpacking/no buying/no selling). Speak with show manager for special situations. **Cancellation Policy:** Table fee will be refunded only if requested and the table is resold. If a table is not occupied by 9 AM, a table may be cancelled and resold.

Overnight stay: Westford Regency Inn at 1-800-543-7801. Mention Radio XLI for special rates. Room reservations should be made by January 22, 2010 for special rates. Bring your family to enjoy indoor pool, health club, racquetball courts, three restaurants, bar, etc.

Directions: From I-495, take Exit 32. Follow "To Rt. 225" sign. At traffic light by gas stations, turn right onto Rt. 110-West for 0.4 miles. The Westford Regency is on the right. Use doors on right (north) side of Inn. Ramps at both doors!

THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the QST-VIEW series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. QST Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and QST-VIEW has on-line instructional help for operating the QST-VIEW browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter
S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. Thousands sold at \$ 199. SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts !

We now have a small mountain of vacuum tubes at very competitive prices - Thousands sold since our first posting of these tubes. All types including receiving and transmitting types. Tube price listings on the web:

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest from its readers and publishes them as space permits. (See "Publishing Rights" paragraph.)

ANTIQUE RADIO CLASSIFIED

EDITOR'S COMMENTS

Valentine's Day always highlights the month of February, and this year it happens to fall on the long President's Day weekend when Radio XLI will take place in Westford, Massachusetts. That means that you have the opportunity to celebrate in a way that can combine a family outing — or even a romantic weekend — with your passion for antique radios at one of the most successful meets in the country.

Radio XLI sponsored by the Greater Boston Antique Radio Collectors is hosted by A.R.C. at the Westford Regency Hotel, which offers many amenities for families — swimming pool, health and fitness center, pub, excellent restaurant, even skiing within a few miles. Come for the weekend or just the day. What better way to forget the gripping cold of this particularly hard winter than to plan on a warm gathering of fellow collectors. Note the details in our ad on the inside front cover.

Valentine's Day is an upbeat kind of day and ties in with our optimism about the future of A.R.C. First, there was a strong response to our "Holiday Subscription Special," which has stopped the decline in total subscribers. Then, as seen in "Radio Miscellanea," your letters of appreciation for returning to full issues monthly and for the kinds of services we offer are testimony to your continuing support. Again, thank you.

We're also always grateful for the contributions made by writers like Daniel Schoo whose frequent articles might make him seem almost a member of A.R.C.'s staff. He is, in fact, an enthusiastic restorer of vintage equipment, always willing to share with others, as illustrated by Robert Forte's letter in "Radio Miscellanea" this month.

This time Daniel offers a complete rundown on his restoration of a Templetone "Morale Radio." Two previous articles dealt with restoring particular parts of this set. Of great value to us is Daniel's attention to detail in the process of restoration, as well as his good photos. The result of his work is always a set worthy of shelf room in any collection.

Restoration of two pieces of Hallicrafters equipment, first appearing to be nothing more than junk, also resulted in a success story for Claude Chafin. Finding the Hallicrafters SX-111 receiver and HT-37 transmitter at what appeared to be a minor house auction was one thing, but coming across the cabinets by chance in the house basement was another. Claude reminds us of the pleasure in finding such equipment and bringing it back to life.

Every Estes Auction, as reported by Ray Chase, offers similar opportunities. Whether you find a treasure fully restored or one begging for your attention, the rewards can be great. This particular auction was not full of high-end sets, but it did contain a selection of early hi-fi and broadcast equipment, some interesting parts, military equipment, and microphones.

In fact, this was not a typical radio-only auction, but offered a little of everything. Ray's report does what auction reports do best — it gives an idea of how collecting and pricing are related. We are all aware of the history of the rise in prices for high-end radios, such as those manufactured by E.H. Scott. Now we begin to see hi-fi equipment, by such companies as McIntosh, following the same trend as radio. There are many angles to the story of collecting radios.

As for stories, Jerry Berg could be called the official storyteller of the history of shortwave radio. Bart Lee has reviewed in glowing terms Jerry's two new books: *LISTENING on the Short Waves 1945 to Today* and *BROADCASTING on the Short Waves 1945 to Today*. These books are companions to Jerry's earlier book covering 1923 to 1945, so now we have the complete story of this extraordinary development in communications history. These new books will inspire you to try out the shortwave bands on the radios in your collection — you can just settle back and reenter the radio world of earlier decades.

Tom Stevens also brings our attention to an earlier decade with a 1920s W.S.A. Type Triode E 2-step amplifier. He hopes readers can come up with more information on this set. Tom's request for help is a reminder of one of A.R.C.'s chief services — making connections with fellow collectors.

Hope you make even more connections at Radio XLI on Valentine's Day or at any other radio event you may be able to attend.

A.R.C. Benefits. Be sure to take advantage of A.R.C. benefits: A New Year Special for subscription discounts; a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; a secure shopping cart on the website, www.antiqueradio.com; for current subscribers, a 10 percent discount on all book orders and the full magazine available on the website. **Note:** Please do not send credit card info by e-mail. Use our secure website or U.S. Mail, or call or fax.

Coming Radio Events. Listed this month are 10 meets, 27 meetings, and 4 auctions — plenty to keep you busy and to get your mind off winter.

Happy Collecting!

John V. Terrey, Editor

ON THE COVER

Our Valentine's Day cover is a 1920s postcard from the collection of subscriber Bill Turner. The back of the card has no stamp, but it is addressed to Alfred from George G. Not shown on our cover is the verse on the front of the card:

*Through the air fly with me
Where the heart is light and free
You are my love, and I am thine —
Don't say nay, my Valentine.*

RESTORATION TOPICS

Templetone Model BP2-A5 "Morale Radio" A Restoration

BY DANIEL SCHOO

This is Daniel Schoo's third article based on his work restoring the Templetone set. The first dealt with paper capacitor rebuilding (A.R.C., October '09); the second with dial cover making (A.R.C. December '10). Now Dan gives us the full story of this restoration. (Editor)

One day my wife Donna came home to find another orphan left on the doorstep. She e-mailed me at work and told me that there was an "old junk radio" in the driveway. When I got home I found a cute little military radio in fairly good condition considering its past. The set as found is shown in Figure 1. The nameplate, as shown in Figure 2, says "Templetone" and Type "BP2-A5." It was a little beat up, but all the parts were there and the chassis was in good condition. The tuning covered the AM broadcast band and shortwave from 6 to 18 MHz.

Templetone was a name I'd heard, but I didn't know anything about it. After some research, I found that Templetone was a fairly large company before World War II located in New London, Connecticut. A 1944 advertisement is shown in Figure 3. The story goes that they did fairly well until they manufactured their first television set. The set used a power transformer that was underrated and prone to burning up. Apparently, their problems were severe enough to bankrupt the company, and in 1949 they went out of business.

THE "AS-WAS" CONDITION

The BP2-A5 was housed in a simple plywood box painted the typical military olive drab color. The case was battered and dinged up but essentially sound and unbroken. See Figures 4 and 5. Looking over the set, I found that work had been

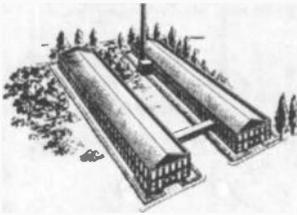

Figure 1. The Templetone BP2-A5 as found and described as "junk" by one viewer and "cute" by another. The raised cover shows a station log card.

Figure 2. The Templetone nameplate identifies the company location as New London, Connecticut.

done on it. The original carrying handle had been replaced with a leather strap handle. A loop antenna was attached inside the case, as shown in

Now, Even Greater Facilities

The new and larger Templetone plant at New London, Conn.

Within a few weeks our entire Electronics Division will move into new quarters—affording not only greater facilities to meet ever-expanding wartime production, but also greater scope to anticipate the great electronics developments of peacetime. From this vast, new plant—containing 100,000 square feet of space—will come rich contribution to the vast commercial requirements at war's end.

Electronics Division

TEMPLETONE RADIO MFG. CORP.

New London, Conn.

Figure 3. 1944 ad claims vast growth anticipating the "great electronics development of peacetime."

Figure 6, and wired to the long-wire antenna input. Also seen in the figure is the graying (actually green) on the chassis which, like many military items, had been coated with M.F.P. (Moisture Fungus Protection) varnish. The original battery plug was replaced with a different type. Also a small microswitch that switched off the filament battery when the front cover was closed had been added, as shown in Figure 7.

There were several station log cards still inside the front cover. One side of the card had a typical station log entry form, and on the other side was a schematic diagram of the radio. The sche-

(Continued on following page)

Figure 6. A loop antenna is attached inside the case.

(Templetone BP2-A5, continued)

matic was also silk screen printed on the inside of the radio back cover, as seen in Figure 8. The schematic showed a representation of the battery plug, and it did not match the plug in the radio, so I knew that it had been replaced, probably to accommodate a different type of battery that was less expensive or easier to get.

When I found that the filaments in every tube were blown, I deduced that someone had probably miswired the battery, connecting the 90-volt B battery to the 1.5-volt filaments and burning them up. Still, the connector was wired correctly as found. The battery was housed in a separate compartment inside the cabinet and below the chassis. It must have been a real job to replace the battery. Ten screws must be removed to take the back of the radio off and access the battery. The ten screw holes can be seen in Figure 5.

BEGINNING THE RESTORATION

The first thing I did was to remove the modifications. Whoever had installed the loop antenna did a really nice job. He did not cut or modify any of the original wiring, so I was able to restore it to original rather easily. He had mounted the antenna using four existing screws that were meant for the original metal carry handle.

To get more information on this radio I contacted a fellow member of the Tube Collectors of America, who is also a member of a military radio collectors' club. He got me in touch with Tom Laszynski, a military radio collector who has a BP2-A5 in his collection. Tom was an enormous help. He took several photographs showing the original handle and the control markers. He also had an original owner's manual, and he was kind enough to make photocopies of it for me. I found out from the manual that the radio was made for the British Ministry of Supply Mission through the U.S. Signal Corps in 1944.

DUPLICATING THE CONTROL MARKERS

The three control markers on the set were very unusual. I had one damaged original on the radio, seen in Figure 7, lower right, and a photo showing what the others looked like. The manufacturer had used thumbtacks with a sort of paper overlay molded around the heads. The markings were printed on them indicating the function of the switch positions and then coated with a bright green clear coating. The tacks were pressed into the plywood front panel next to the control knobs.

Figure 7. Seen at the lower front, an added microswitch that switched off the filament battery when the front cover was closed.

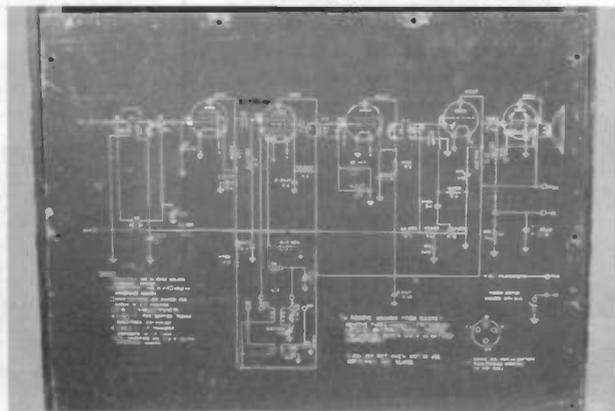

Figure 8. The silk-screened schematic on the inside back cover.

There was one labeled "OFF" next to the power switch/volume control. Two more were next to the band switch, one indicating "B" for the standard AM broadcast band and the other indicating "SW" for shortwave.

To duplicate these, I had to start from scratch and make a set of thumbtacks the size of the originals since they were a little bigger than the usual thumbtack size. I started by punching out $\frac{7}{16}$ " diameter slugs of thin mild steel on a Rotex shop punch. After that, I flattened the slugs and then drilled and countersunk the center dimple on each one. I inserted a small nail into the countersunk side and glued it in with a blob of epoxy. After the epoxy cured, I sanded the head smooth and flat, and then I rounded the edges by sanding them with a Dremel Moto tool. This got me to the point where I had a set of thumbtacks the proper size and shape.

Next, I spray painted the heads flat white to provide a neutral base for the final step. To get the heads the proper color and apply the markings, I used Photoshop Elements on the computer. Using a flatbed scanner, I scanned an image of the original tack into a digital image file. I sampled the color of the tack from that file and used the sample

to paint the background in a new image.

I went through the available fonts and picked out one that was pretty close to the one on the existing tack. I typed the appropriate lettering and then, using the photo editor functions, I tweaked the lettering a bit to make it match in size and style. Now I had the lettering on the correct background color. I printed that image onto very thin tissue paper using a high quality color laser printer. (How I did that is an article in itself!)

I cut out the individual markings and glued them to the tack heads, wrapping the paper around the sides and twisting it tightly around the nail. After the glue was dry, I trimmed the excess paper off at the back edge of the head with a sharp knife. To finish the job, I sprayed the heads with several coats of clear high gloss acrylic to fix and protect the paper covering. The various steps of the process are shown in Figure 9.

OTHER CHALLENGES

The plastic dial cover was split and needed to be replaced as shown in Figure 7. I bought a kit from Dialcover.com and made a new one. I had never made a dial cover before. That took a little practice and experimentation, but I managed, and it turned out very nicely. (See A.R.C., December '09).

The carry handle was more of a challenge. The original handle was some hardware product that probably hadn't been manufactured for many years. Donna and I searched through flea markets, antique markets, and garage sales for something close, but we didn't find anything. I found one that was really close on a website for furniture hardware, so I ordered it. When I got the handle, it was not the same as shown in the picture on the website, but it would have to do. At least the screw hole footprint matched.

On the chassis as shown in Figure 10, I had the usual things to fix. Many of the paper capacitors were leaky and needed to be replaced. I gutted them out and rebuilt them with new Mylar capacitors inside. Although this is a lot more trouble than just replacing them, I prefer to try to keep the original look under the chassis if possible, while making the radio functional. I found that several carbon composition resistors were out of tolerance.

The volume control had been replaced with a huge one that barely fit under the chassis. The shaft was too short to attach the knob so there was no knob on it. Besides that, the control shaft was frozen. To match the other shafts, the original volume control would have had a plain shaft $\frac{1}{4}$ " in diameter with no flats and 1" long. My friend Dan Johnson looked through his junk box to see if

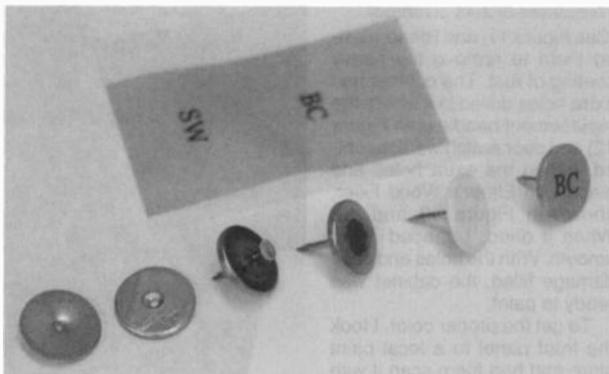

Figure 9. The various steps of duplicating the control markers.

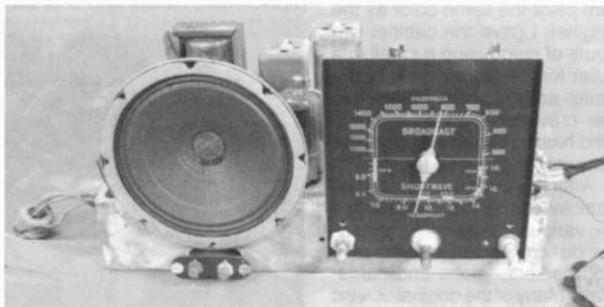

Figure 10. The chassis with several things to repair, but with a speaker cone in remarkably good condition.

he could find one like that. He found one with exactly the right shaft, with the right resistance, and with a switch attached to the back. (Some of you longtime readers might remember my July 1993 A.R.C. article about Dan Johnson's 1929 Kylelectron electrostatic speaker.)

After replacing all the tubes, I powered the radio up on my bench power supplies, and it worked. I cleaned the band switches, went through alignment, and the electrical work was done. Now I had to deal with the cabinet.

THE CABINET

Naturally, the cabinet was showing the years, and it needed some work. I removed the press fit, rusted steel feet from the bottom of the cabinet, (Continued on following page)

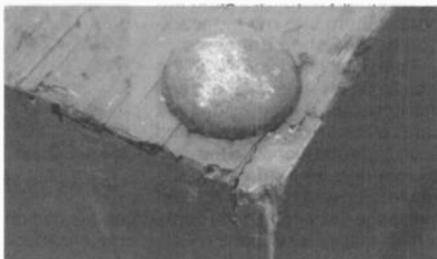

Figure 11. A rusted steel foot on the bottom of the cabinet ready to be removed and bead-blasted.

(Templetone BP2-A5, continued)

(See Figure 11) and I bead-blasted them to remove the heavy coating of rust. The cabinet had extra holes drilled in it where the replacement handle (see Figure 12) and door switch were mounted. I filled the extra holes and dings with Elmer's Wood Filler, shown in Figure 13 and 14. When it dried, I sanded it out smooth. With the holes and case damage filled, the cabinet was ready to paint.

To get the proper color, I took the front panel to a local paint store and had them scan it with their computerized color scanner. They mixed a quart of custom paint the same color as the original. I gave the cabinet two coats of paint using a small trim roller for the flat surfaces and a small artist's brush to get into the crevices. I asked a friend who has an airbrush to paint the new carrying handle for me.

After the paint was dry, I reassembled the cabinet and attached the various accessories, namely, the dial cover, carry handle, control markers, knobs and nameplate. Many of the original screws were missing, damaged, or badly rusted, so I replaced them.

FINAL STEPS

Probably the most amount of work was invested in reprinting a copy of the owner's manual. This project could be another article on its own, but I'll describe the highlights. Tom Laszynski sent me a photocopy of the manual. He offered to scan it and send it to me in digital form, but I preferred a photocopy because they are very high resolution due to the analog nature of Xerography. The downside is that copied photographs tend to get a little muddy. I scanned the copies at very high resolution and imported them into my old workhorse Photoshop Elements.

Tom described some of the lettering in the manual as red and the cover as a grey lightweight card stock. I digitally restored each page and formatted the pages into booklet form saving the whole thing as an Adobe Acrobat multipage file. I printed the pages double-sided on a high quality laser printer, using grey cardstock for the cover. I stapled the prints together and folded them into booklet form.

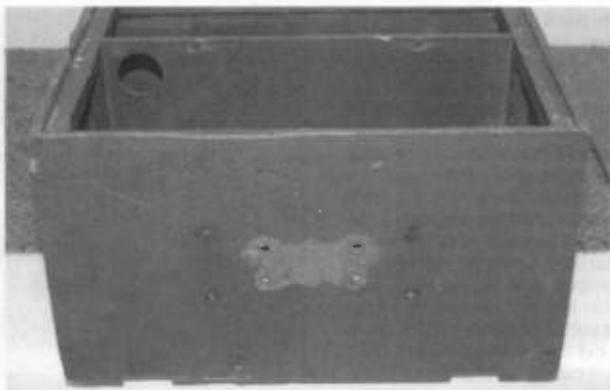

Figure 12. The cabinet showing extra holes drilled for mounting the replacement handle and door switch.

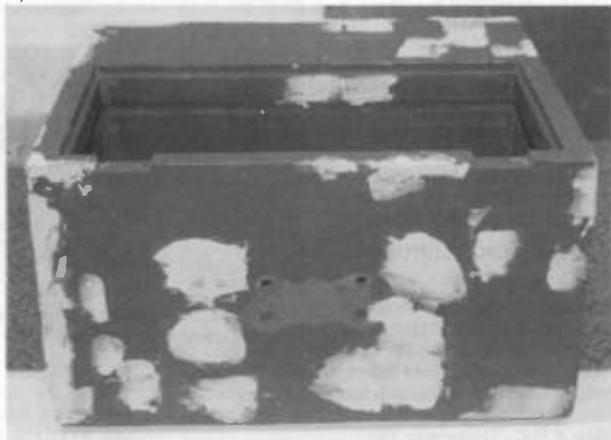

Figure 13. The holes and dings were filled with Elmer's Wood Filler.

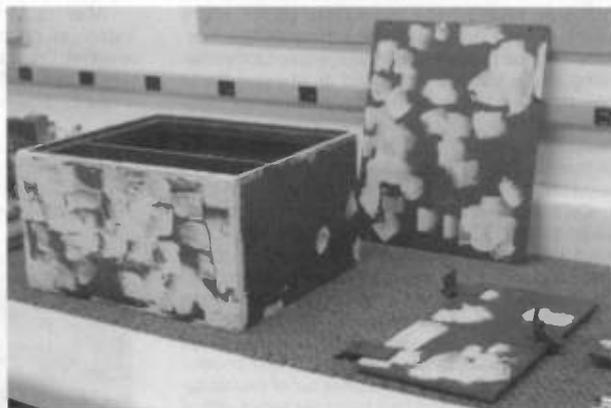

Figure 14. The holes and dings are ready for sanding and paint.

FINAL THOUGHTS

Overall, I probably spent more time and money on this project than it is worth, but in the process,

Figure 15. The finished product with the cover raised showing a station log card.

Figure 16. The finished product with the cover closed.

Figure 18. A close-up of the face of the cabinet.

I had a lot of fun, and the results are shown in Figures 15, 16, 17 and 18.

I learned how to make plastic dial covers and there was enough material for three magazine articles. The practice I had fixing up the case was good experience. And the results were very satisfying.

I would like to offer a personal thanks to Tom Laszynski for all of the time he spent and for sending me the information that I needed for the project, and also to Dan Johnson for his help.

WITH THE COLLECTORS

A Hallicrafters Junker at Auction SX-111 Receiver, R-48 Speaker and HT-37 Transmitter

BY CLAUDE CHAFIN

Never pass an "Auction Today" sign by is the moral of Claude Chafin's story. And never hesitate to look even further than the auction itself, if the opportunity presents itself. (Editor)

Imagine yourself one spring day driving home when you see a sign posting "Auction Today." Curious, you investigate, hoping to find something of interest.

In the spring of 2009, that was what happened to me here in Kansas City in a local suburb. Upon entering the house where the auction was being held, I found what appeared to be some old Amateur radio equipment. Only the chassis were present, no cabinets. Turns out the equipment was a Hallicrafters SX-111 receiver and matching R-48 speaker plus the companion HT-37 transmitter.

They didn't look very handsome without the cabinets, but I bought them anyway for very little money. Before leaving, I snooped around the empty house. There in the basement were the manuals for both radios. Then I noticed these large vented metal cabinets. Could I be so lucky? Sure enough, they were the cabinets for the radios. The auctioneer was all too happy to give them to me free of charge. "Everything left in the house," he said, "is going to be cleaned out." Figures 1 and 2 show the SX-111, R-48 and HT-37 after restoration.

RESTORATION

Once I got them home, I could begin playing with my new "old" toys. Both power cords were in sad shape. To be safe one needs to install new cords of the 3-prong variety.

I started with the receiver — cleaning the chassis, testing and cleaning all the tubes, cleaning air capacitors and the dial lens, installing the new

power cord, and replacing the electrolytics. Some of the mounting screws were missing, but a trip to the hardware store resolved that problem. In the end, I had a great receiver and matching speaker.

Figure 1. The Hallicrafters SX-111 communications receiver and R-48 speaker which were purchased at the "Auction Today."

Figure 2. The repaired Hallicrafters HT-37 transmitter, also purchased at the auction.

Then came the transmitter. It had a relay with a jumble of wires connected to it when I bought it. I thought maybe it was some sort of interconnecting relay for the receiver. Turns out I was right. The contacts were dirty and needed cleaning.

The HT-37 transmitter uses two 6146 tubes in its final stage. The original tubes tested OK. Figure 3 shows the 6146s and the clean chassis.

It also uses two 20MF/600V electrolytic capacitors. I didn't even bother testing these. Knowing that 50-year-old electrolytic capacitors are not dependable, I changed them out for brand new ones; see Figure 4. Why risk a short, open circuit, or who knows what? The power cord was again easy to replace.

The transmitter calls for a high impedance microphone. I already had an old Astatic 10-D I found at a recent Hamfest, perfect for this set up.

The receiver cabinet was in good shape, but the transmitter cabinet had to be repainted. It has an odd shade of gray and today's modern paints don't come anywhere close. Luckily, I found that you can buy an industrial brand that comes pretty close to a match.

JUNK NO MORE

Both radios are now functional, as shown in Figure 5. For me, that's part of the fun of finding, restoring, and operating an old piece of equipment that someone had discarded as "Auction Junk."

The 1960 *ARRL Ham Radio Manual* shows these radios in a new release advertisement in the back of the book. The picture in the ad has the transmitter, receiver, matching speaker and even the Astatic 10-D microphone that I already have matched up with it.

My plan is to have these radios on 20 and 40 meters for Field Day 2010 as a 50th Year Anniversary Special Event Station, *NOFMO*. A handsome QSL card will be available, if you QSL directly.

Reference:

ARRL Ham Radio Manual, 1960.

(Claude Chafin, *NOFMO*, 4223 E. 42nd Way S, Independence, MO 64055)

Claude Chafin, an antique radio collector and

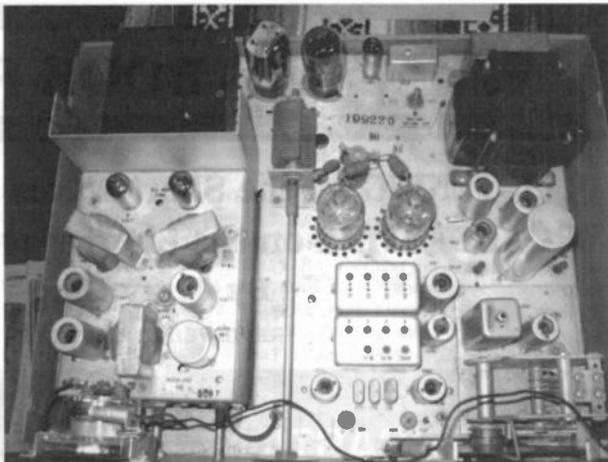

Figure 3. Hams will skip a heart beat when they see a chassis this clean. The two 6146 output tubes can be seen in the upper center of the photo.

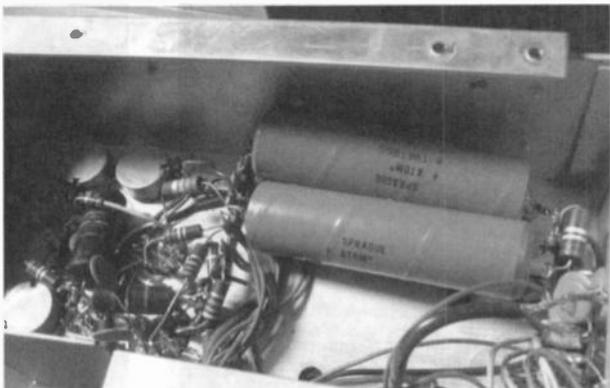

Figure 4. New electrolytic capacitors, upper right, shown installed in the transmitter chassis.

Figure 5. The Hallicrafters SX-111 receiver, HT-37 transmitter and R-48 speaker up and running in my shack — along with yours truly!

Ham operator for many years, asks three questions before taking on a repair job: Will his techniques bring it back to normal? Is it too far gone to make the time spent worthwhile? And, does it have a good collectible potential? Affirmative answers mean success, as in this article.

AUCTION REPORT

Estes Auctions

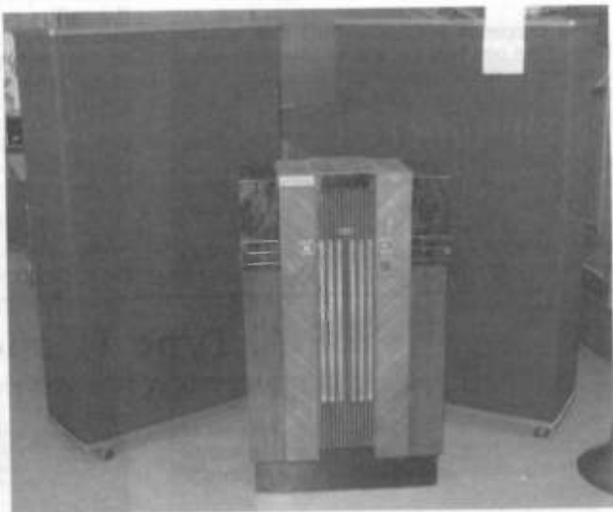

Burbank, Ohio — February 21, 2009

CONTRIBUTED BY RAY CHASE

What's the worst thing that could happen to a professional auctioneer? Well, I guess that it would be coming down with a strep throat the day before a big auction, and that is what happened to Richard Estes at the February auction. Fortunately, his brother John is also a professional auctioneer, and he stepped in to conduct the entire radio auction and did a bang-up job of it.

Original ads for this auction did not indicate much that was unusual, but quite a number of unique items showed up. This auction was originally supposed to contain much of the late Jim Fred's estate, but poor weather and a difficult location prevented the pick up of Jim's stuff, so that material will be sold at a later date. Several other estates and a few items from the Marconi Museum in New Hampshire were included.

The weather for this sale was cold and clear, but a snowstorm was predicted to move through later on Saturday. Saturday morning the temperature was 11 degrees above, and the auction hall heat was supplemented by an industrial space heater that was kept running most of the

The old and the older — the vintage Majestic Model 766 sold for \$175, and the Watkins Engineering WE-1 speakers sold for \$900.

day and added to the noise level. The room was reasonably comfortable, if you had several layers of clothing on. The snowstorm held off until after the auction was over and the outside temperature rose to the 40s in the afternoon, but some buyers who had to travel westward left early to beat the oncoming storm.

This was a large auction of more than 650 lots, not counting the early morning low-value goods auction and the two side auctions of transistor/novelty radios and bulk tube lots. None of these were recorded. The 8:30 A.M. low-value auction was packed with items, and more were coming in on Saturday morning. This auction was handled by Mark Delauder in quick fashion, but still just managed to finish at 10 A.M. I have listed a few select items from this sale; suffice it to say that quite a few cars and vans were loaded even before the main auction started.

The main auction contained a

Two display cases full of Walsco phonograph parts sold for \$225.

mix of goods, including quite a lot of audio and studio equipment, some of which had Braille markings added to the various controls. There were more than the usual Browning Drake battery sets and a lot of home-brew battery sets. In general, prices were on the low side.

As the crowd thinned out around 3:50 P.M., requests were taken for items to be brought up, and many lots sold for only \$5. The auction ended about 4:30 P.M. with a fair amount of leftovers that will be held for the next sale. The total sale value was over \$30,000, not including the 5 percent buyer's premium. Richard is fortunate in having a large crew

that includes several auctioneers and particularly a brother auctioneer who could step in and handle the complete sale in a forthright manner.

e=excellent, vg=very good, g=good, f=fair, p=poor, unk=unknown condition, N.O.S.=new old stock, wk=working, nwk=not working, gf=good fill, WT=with tubes, NT=no tubes, BB=brass based, TT=tipped tube, SW=shortwave, PS=power supply, PB=push buttons, WE=Western Electric. All prices have been rounded down to the dollar. Mixed lots, some low cost items and items in poor condition or non-specific descriptions are omitted.

Radios and Related Items:

Acme diathermy machine, old, had 2 United Type 211 type tubes, not included	\$15
Admiral 5K1 brown plastic, 2 knobs, vg	20
Altec 1590C power amp, rack mount	115
Altec 1592B mixer/amp in rack, w/paper	175
Altec 1594B amp, rack-mount	85
Altec 1594B amp	85
Altec 9473A limiters & patch panels, (2), in 3' rack, from a recording studio	85

Two TASCAM items — the M208 mixer on the left sold for \$40 and the 244 on the right sold for \$25.

Amplex 3 dialer, NT	20
Amplitone cone speaker, paper p. g driver	25
Arvin 444A cream-colored metal midget, g	35
Arvin 6441 cream-colored plastic, (3) knobs, g	20
Atwater Kent 10 breadboard, WT, g	700
Atwater Kent 20 big box, NT	55
Atwater Kent 32, NT, g	25
Atwater Kent 33, NT	30

Atwater Kent E speaker, g driver, g	20
Atwater Kent E3 speaker, g driver	30
Atwater Kent H hom speaker, g driver	75
Atwater Kent Kiel Table radio, g	20
Atwater Kent L hom speaker, g driver, g	60
Automatic 601 brown plastic set, (2) knobs	25
B&K 1646 power supply only	25
B&K small tube tester, w/paper	35
Ballantine, pair of Soundmaster 50w theatre amps	50
Bell 3030 stereo amp	85
Belmont 729 large wood table set, g	10
Bendix 526A brown plastic set, (2) knobs, g	25
Bendix 756 wood case clock/radio, g	20

(Continued on following page,

Items offered in the auction ranged from early horn and cone speakers to later day plastic cabinet sets.

A working Western Coil WC-11 Radiodyne sold for \$85.

(Estes Auction, continued)

Blaupunkt small German 50s table radio, g	40
Boes counter-top tube tester	10
Braun 99UKW large wood German table, 1950s	5
Browning Drake 5R, NT, g	40
Browning Drake V6, W5T & paper, vg	80
Browning, Tobe 35 multiband tuner, home-brew case	35
Campbell Diathermy set, w/paper, g	175
Cardwell very large tuning capacitor on insulators, from NH Marconi Museum	450
Celluloid small pillow speaker, g driver, vg	110
Cockaday LC-26 slant-front battery set, NT, g	55
Craftsman 20-12 Graphic Equalizer	55
Crosley 10-127 brown plastic set, (3) knobs	20
Crosley 52, NT, g	60
Crosley 65 plastic portable	25
Crosley 577 small wood set, (2) knobs, g	45
Crosley Dynacone speaker, g driver, g	25
Crosley E15WE, cream, modernistic, plastic, vg ...	75
Crosley E165, light blue, modernistic, plastic	20
Crosley XJ battery set, NT, f	45
Day-Fan OEM-7 battery set, NT, g	45
DBX 150 noise reducer	10
DBX 155, 4-channel noise reducer, wood case	5
DBX 224 noise reducer	20
Decker GRS battery set, NT	20
DeWald C-800, brown plastic, (4) knobs, g	25
Drake MS-4 speaker, (2)	50, 110
Drake R-4 receiver	105
Drake R-4A receiver	115
Drake SW-2 digital receiver	45
Drake SW-4A receiver & speaker	185
Dual turntable	20
DuKane 1U460 PA amp	55

This Jackson-Bell Peter Pan cathedral from 1933 sold for \$450.

ElaX EL turntable, on wood base, (German)	50
Emerson 550, wood table set, (4) knobs, vg	20
Emerson 729, modernistic, plastic set, f	55
Emerson ET 406, small wood set, (2) knobs	65
Erud 561, plastic table set, nick in top, f	5
Farnsworth ET-060, brown plastic set, (2) knobs ..	20
Fisher FM-100 tuner, no case	10
Fisher K-14 tuner/amp, no case	25
Fisher Master Audio Control, g	175
Freed Eisemann NR-6 3-dialer	10

A Fisher Master Audio Control sold for \$175.

Three McIntosh items — left to right, an FM tuner, an MA 6200 integrated amp, and a C-33 pre-amp, all in wood cases.

Two broadcast control panels sold at the auction: above, a Raytheon unit selling for \$150; below, a Gates Studioette station control panel selling for \$100.

This Philco Predicta, ca 1960, sold for \$225.

Freshman 3-dialer, NT, g	25
Gates Studioette station control panel	100
GE 11SW, cream colored plastic, w/gold trim	12
GE 500A small beetle plastic, w/small chip	75
GE K52 cathedral, (4) knobs, vg	125
GE K64 cathedral, (4) knobs, g	135
General 5CPH, brown plastic, g	75
Globe Chief transmitter	30
Gonset GSB-101, Model 3262 linear amp	85
Gonset GSB-201 linear amp	140
Graybar (Radiola 60)	25
Grebe MU-1 Synchrophase, WT, g	160
Grundig Majestic 5088, 1950s German table set, (1) foot missing, g	25
Guild Spice Chest radio, solid-state	20
Hallicrafters Civic Patrol	15
Hallicrafters HT-1 low voltage PS	15
Hallicrafters S-20R, g	35
Hallicrafters S-102 receiver, g	10

Ray Chase has been a radio enthusiast and a collector of many types of radios for years. Currently, he specializes in World War II electronics equipment, as well as early battery superheterodynes. He also has an extensive collection of radio documentation and ephemera.

RADIO MISCELLANEA

"Radio Miscellanea" includes items of general interest selected from A.R.C.'s incoming correspondence. "In The Marketplace" items are based on information submitted by the businesses themselves. "From The Internet" items are obtained from internet newsgroups and other internet resources. Submitted items should be verified for accuracy; items may be edited by A.R.C. for publication, and publication is not guaranteed. See the masthead for more details.

Ad-Only Issues Gone!

Dear Editor:

I am renewing late because I had planned not to renew at all since I did not like the Ad-Only issues. Then I received your postcard stating, "We Listened! The Ad-Only Issues are Gone! Only Full-Size Issues from Now On!" Thank you for eliminating the Ad-Only issues, so now I am renewing my subscription again.

Clark W. Hunt, Jr., Orlando, FL

Full Issue Did It!

Dear Editor:

I would not have renewed if you hadn't gone back to a full issue every month!

Clayton J. Lester, Plainwell, MI

December Special Saves the Day

Dear Editor:

Thanks for offering the December special subscription rate. I was just trying to decide what subscriptions to drop, and you saved the day! Enclosed is my renewal.

R.J. Dial, Pleasanton, CA

Estate Sold Through A.R.C.

Dear Editor,

I continue to enjoy every issue of A.R.C. It has been a big help in selling my Dad's radio estate! Virginia Chen, Kilgore, TX

Kudos to Estes Auctions

Dear Editor:

A long overdue thanks is in order. You told me about Estes Auctions because we wanted to sell my father's radio collection, and I contacted them. They are the kindest, most honorable people I have met. I'm so glad we used them to sell my father's radios, and that we were able to meet them. Thank you.

Susan Pompea, Colorado Springs, CO

Re: Philco/Billie Holiday Article

Dear Editor:

I just want to say how much I enjoyed reading the January 2010 issue of A.R.C. I especially liked the article by Mark Fitzgerald, "The Philco, Billie Holiday, and I." There is much nostalgia contained in his words, and he paints a vivid picture of past events, tying them nicely to his restored Philco. Keep up the good work! No wonder I've subscribed to A.R.C. for longer than I can remember!

Joe Patrick, Finleyville, PA

Notes of Thanks

Dear Editor,

Just a note of thanks for the great job you do!

Thank you.

H. Felden, Bethesda, MD

Talking via A.R.C.

Dear Editor:

I've been with A.R.C. starting with the "Bonzo issue" in August 1990. What I have enjoyed the most all these years is talking to many very nice people all over this country.

Keep up what you're doing.

Bob Barr, Tequesta, FL

Thanks to A.R.C. Connection

Dear Editor:

This is a letter to acknowledge publicly the kindness and thoughtfulness of one of your article contributors, Daniel Schoo. In the December 2009 issue of A.R.C., Daniel wrote about repairing the dial cover of a Templestone BP2-A5, which I also happen to own. However, it is missing the log cards, which I have been searching for unsuccessfully these past ten years. I contacted Dan to see if he had any that he could duplicate; he did and sent me two log cards, which are duplicates, but look like originals, plus an operating manual. He refused my cost reimbursement (I sent a check anyway).

This act of kindness should serve as a model to all of us who collect old radios. And, of course, thanks to A.R.C. for exposing collectors to one another.

Robert V. Forte, Belmar, NJ

Re: World Radio Corp.

Dear Editor,

In response to the inquiry about the World Radio Corp. in the November 2009 issue, I found the following information: "The Battery Set Compendium" lists this company as operating at 349 Washington St. in Boston. It offered three TRF radio models in 1926 and one in 1927. World Radio apparently appears in the "Radio Retailing Receiving Sets 1926-27" listing. The company is reported as having advertised in *Radio News* for October 1927. And sure enough, that issue contains a one-sixth-page display ad offering a rather simply styled, 5-tube 3-dialer for \$24.50.

The "Compendium" assembled by Greg Hunoldt, is an 11-meg Excel data base covering 1920s radios. The 2009 version lists 5,921 radios from 1,768 (!) companies. It's available as a free download from the Wisconsin Antique Radio Club website, www.warci.org. (See the link on the lower left corner of the home page under "Resources.") The "Compendium" has proven to be a great resource for researching obscure companies.

Ludwell Sibley, Gold Hill, OR

Enjoys Articles

Dear Editor:

I wish you continued success in these difficult times. I enjoy the radio articles.

John N. Minnich, Mason, OH

A.R.C. RATES & POLICIES

GUARANTEE. You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

PAYMENT. Please send in full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid (except for the 6 and 12 month display ads indicated below). Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express or Discover. Make check out to "A.R.C." Cash is OK for small amounts. Canadian payers may send a Canadian check but specify *U.S. funds*. Subscriptions will be prorated to amount sent if amount is incorrect.

FAX & E-MAIL PROCEDURES/PAYMENT. Subscriptions, book orders, classified ads, display ads, etc. are welcome by fax or our secure website. Deadlines are the same as for ads received by mail. Please calculate the amount due. Payment by credit card via our secure website or send a check or money order, state the amount being sent and that the payment is in the mail. Do not send another copy of your ad with your payment; simply indicate that it is a payment. If you want confirmation of our receipt of your fax, call immediately after sending your fax. For your protection, please no credit cards by e-mail, use our secure website only.

CHANGE OF ADDRESS. Please notify us 4 weeks in advance of a change of address. Send both your new and old addresses, and include your SUB# and effective date of your new address. Temporary address changes can be made also.

SUBMISSION OF MATERIAL. Antique Radio Classified welcomes and solicits information that pertains or relates to radio history or collecting. This may include articles, book reviews, photos, information on upcoming radio events, meetings, antique radio organizations, radio auctions, sources of old radio and restoration supplies, and other related and interesting material. All material submitted should be carefully researched, typed and accompanied by good photos, if appropriate. Computer disks are appreciated. Writing guidelines are available upon request.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Non-U.S. copies are mailed on the first day. Periodicals copies are mailed on the last day. Mailing dates change each month, but mailing is usually completed by the last day of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

Antique Radio Classified subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

DISPLAY AND BUSINESS CARD ADS • DETAILS AND RATES

The deadline is the first of the month for display and business card ad artwork, payment and repeat requests.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Advertising must be prepaid, except as noted below; see "Payment" paragraph above for details. Late ads will be run only if space and time permit. Originals must be the artwork size listed below. Send all artwork via e-mail or ask us to typeset it for you. Do not send in artwork on art board or send negatives. Please call for instructions on how to send your electronic ad. If used, reverse type must be limited to 25% of the ad. If you want us to prepare your ad, include the one-time cost below for A.R.C. to make up the ad.

Add \$16.00 per photo for screening unless part of an existing electronic ad. Do not cut or trim photos or glue photos to artwork; submit separately.

If you are confused by these requirements and terms, please

contact A.R.C. before beginning to prepare your ad. We will be happy to advise you on your ad ideas, estimate how much the ad will cost, recommend an ad size, etc.

We assume that advertisers want all ads which are submitted to run without delay; therefore, we will run the ad and bill for any additional work required for the ad to meet these specifications. A late ad will run beginning with the next month. "Tear sheets" will be sent only for 1/16-page or larger ads and only if requested when the ad is submitted.

First business card per advertiser is at lower rate.

The 3-month rates represent about an 11% discount, the 6-month rates 23%, the 12-month rates 30%. Placement requests: add 15% but call first. Clubs: write for discount policy.

Page	ARTWORK SIZE (SEND IN THIS SIZE)		As Printed (size in magazine)		Cost for 1-month	Cost for 3-months	Cost for 6-months	Cost for 12-months	One Time to make up Ad

E-mail: arc@antiqueradio.com

Web: www.antiqueradio.com

CLASSIFIED ADS • DETAILS AND RATES

ONE FREE 50-WORD AD for subscribers in each issue; additional words are 10¢ each. See details below. Classified ads sent by mail, fax, e-mail or by any other method must be received (not just postmarked!) by **Noon Eastern Time** on the classified ad deadline date to guarantee inclusion in the current issue. Late ads are held for the following issue. Please enclose correct payment with all ads. Cash is OK for small amounts. (Canadian and other foreign advertisers, please see "Payment" on opposite page for methods.) "Free words" cannot be accumulated from month to month; free words must be requested when ad is submitted. Free ads are OK via e-mail but for your protection, please use our secure website for longer, paid ads.

Faxed & e-mailed ads: Please see additional information on opposite page.

When including ads with other A.R.C. correspondence, write the ads on a separate piece of paper. Include SUB# with ad. Ads may be sent in advance; but, write each ad on a separate piece of paper and indicate the month (or successive months up to your subscription expiration; 12-months, maximum) you want the ad to run.

To minimize our typing errors: Please write legibly. Use both capital and small letters. Do not use a dash between words. Carefully write the following numbers and letters (especially in model numbers) since some can look alike; for example 1, I and l (the number one, the capital i and the small L.) Also: 0, O, o, Q and D; v, r and n; 6, b and G; V, U, u, v and Y; A and R; 5, S and s; 2, Z and z. We try to correct spelling errors, so when using an uncommon word or manufacturer which we might mistake as a more common word or manufacturer, note it so that we do not "correct" it. Editor's annotations are in [brackets] in ads.

Advertising is accepted only for early items related to radio, communication, etc. All items must be described fairly; reproductions, reprints and not-original items must be so identified. Advertisers must agree to respond promptly to inquiries and orders, to resolve problems promptly if the buyer is not satisfied, and to comply with a buyer's refund request on unaltered returned items.

Classified ads must have a standard heading such as WANTED, FOR SALE, FOR TRADE, FOR SALE/TRADE, SERVICES, MESSAGE, HELP, AUCTION, MEET, FREE. This heading is the only bold or all-capitalized words allowed in the ad. Capitalize only manufacturer names, model names, etc. This standard ad format makes scanning the ads easier.

Before writing your ad, please look over the ads in a recent issue of A.R.C., and try to write your ad in the same style. Full name (or company name) and address are required in all classified ads; we will add it if you forget.

The publisher reserves the right to edit ads without notification to the advertiser and to reject ads for any reason. Names other than the advertiser will be edited out of ads. Ads with non-radio-related items will be returned or edited unless the non-radio-related items are for trade of radio-related items, or they are incidental to and appear at the end of an otherwise acceptable ad. The publisher is not responsible for errors due to illegibly written ads or for any other reason. See also Publishing Rights on opposite page.

Clubs: Since club activities receive free coverage on the *Coming Radio Events* pages, the free 50 words may not be used for club activity ads. A discount on display advertising is available for clubs.

Classified Ad Rates per Month

Deadline: NOON ET- 10th of the month

Subscribers (First Ad):

First 50 words: FREE!

10¢ per word for words over 50

Subscribers (Ads after first ad):

10¢ per word for all words

Non-Subscribers:

30¢ per word

Please do not forget to send in the extra 10¢ per word when your classified ad runs over the free 50 words; your payment will be appreciated, and it will help to keep A.R.C. healthy.

NEW LOWER CLASSIFIED AD RATES!

PHOTO & DRAWING DETAILS

Deadline: 1st of the month
for all ads with drawings or photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph, and A.R.C. will reduce it or enlarge it as needed.

Photo and Drawing Rates per Month

\$10.00 per month for each photo or drawing

(If ad is canceled, this amount cannot always be refunded.)

CHANGES & CANCELLATIONS

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad or make changes.

IMPORTANT — COUNTING WORDS — IMPORTANT

The standard headings: WANTED, FOR SALE, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words, regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address are required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, e-mail, etc. count as one word each. Hyphenated words count as two words.

Estes Auctions

*Specializing in Vintage Radios
Complete Auction & Appraisal Service*

Vintage Radio Auction

Saturday, February 13, 2010 – 10 AM EST

at the Expo Auction Center
8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)
then south on SR #83 to the Love's Truck Stop, turn left
onto Garman Rd. and follow 7/8 of a mile to the auction site.

This auction will offer items from the Ron Kaczmar estate from Dearborn, Michigan. Ron collected only Crosley radios, Crosley products. He had an Icy Ball, several Crosley refrigerators and Crosley cars, a Crosley truck, pre-war Crosley two cylinder car, and hot-shot convertible. Ron loved anything Crosley. Some of the radios we will offer in this sale are Crosley Type 51, Type 52, Type 50, 51-S, 52 SD, RFL-70, Trirdyn Super, Trirdyn regular, Trirdyn 3R3, Type 5-50, Crosley dashboard radios in the different colors, a Crosley Temperator heater-fan. These are what Powell Crosley had made to use up the supply of Dynacone speakers metal cabinets. Lots of Crosley Bakelite and wood table top radios, a restored Crosley Oracle grandfather clock radio. Many Musicone style speakers. The hard-to-find Repwood Models including the rare Widget, a nice selection of table radios in the cathedral and tombstone styles. Ron had some radios that were future projects in various stages of repair or ones in as found condition, these will also be included, due to duplication of many items we will spread these out over several sales. This auction will include items from other consignors and will be a large sale. We are currently working on a large collection in Ohio which will be in the spring. The February sale will also include several thousand tubes, ham gear, books, magazines and lots of parts. We hope to see you at the sale. Terms: Cash, check, Visa, MC, Discover. 5% gallery fee. Early sales from 8:30 AM until 10 AM.
