## THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the QST-VIEW series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. QST Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20GB of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and QST-VIEW has on-line instructional help for operating the QST-VIEW browser!

**EACH SET \$ 39.95 (specify the years)**

**ALL 11 SETS \$ 379**

**S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter**  
**S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter**

**POSTMASTER: Send address changes to Antique Radio Classified, P.O. Box 2, Carlisle, MA 01741.**

Printed in U.S.A.

**PURPOSE.** *Antique Radio Classified* is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

**Publisher and Editor:** John V. Terrey, Assistant Publisher: Cindie Bryan, Managing Editor: Dorothy Schechter, Advertising Manager: Cindie Bryan, Staff: Bobby Lyman, Ray Bintliff, Dave Crocker, **Founding Publisher/Editor:** Gary B. Schneider, **Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Norman Braithwaite, Ray Chase, Dave Crocker, Alan Douglas, Richard Foster, Andrew Hayden, Jim Kreuzer, Phil MacArthur, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White.

#### CONTACTING ANTIQUE RADIO CLASSIFIED.

All correspondence should be sent to:

A.R.C., P.O. Box 2, Carlisle, MA 01741.

Only UPS, FedEx, etc. items to street address: 498-A Cross Street.

Telephone: (866) 371-0512; Fax: (978) 371-7129

E-mail: ARC@antiqueradio.com - Web: www.antiqueradio.com

Please, no classified ads by telephone; thanks.

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name, address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However, A.R.C. does solicit letters of interest from its readers and publishes them as space permits.

**GUARANTEE.** You may cancel your subscription at any time and receive a pro rata refund for issues not yet mailed. If errors to ads are made by A.R.C., upon request a free correction will be run in the next available issue.

**WEB.** Antique Radio Classified issues are published on the web as PDF files for subscribers. Web-only subscriptions are available. One issue is available for viewing by all on the web as a sample.

**ADVERTISING.** Classified advertising information is included on the first classified advertising page. Display advertising rates and artwork specifications are available on the web site.

**PAYMENT.** Please include full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid. Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express or Discover. Make check out to "A.R.C." Subscriptions will be prorated to amount sent if amount is incorrect. *For your protection, no credit cards by e-mail; use our secure website instead.*

**CHANGE OF ADDRESS.** Please notify us in advance of a change of address. Send your new address, your old address, your SUB# and the effective date of the change.

**PUBLISHING RIGHTS.** Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, e-mail, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**MAILING OF ISSUES.** U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). The mailing of First Class copies is staggered with faraway copies mailed before local copies. Mailing dates change each month, but mailing is usually completed by the last day of the month. First Class copies usually are received by the 5th of the month; copies by Periodicals mail, by the 10th.

**ETHICS.** No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

**NOTICE.** Subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

## EDITOR'S COMMENTS

Stop! Don't jump to conclusions before you look carefully through this issue. Yes, we have cut the number of pages, but we have not cut the content that is important to you.

In the name of cost and efficiency, we have made the following changes: (1) Removed the rates and policies pages, transferring the most pertinent details to the "Table of Contents" page and the full text to the Web. (2) Although we continue to sell books, we removed most of our in-house book advertising pages. Go to the Web for the full list, or call for information. (3) Reformatted the "Coming Radio Events" pages so that the same information will appear on fewer pages. (4) Dropped the color cover, a difficult decision, but we hope to bring it back for special occasions.

What remains are the same elements that have always been the core of this publication— articles, classified ads, and other information important to radio collecting and preservation. As a result of these changes, we have passed the savings on to you in the form of permanently reduced subscription rates. Unfortunately, we find that we have to eliminate one subscriber benefit — the 10 percent discount on books and free shipping.

In making these changes, we continue to adapt to the evolving environment of the publishing business. We know that A.R.C. is not alone in this struggle when *Newsweek* goes up for sale and *Gourmet*, a major food magazine, goes under. Some magazines have gone to Web-only publication; others, like us, try to do both; all of us, big and small, try to meet the needs of our readership, while making ends meet. We rely on your support to do just that.

Strong support is also rendered by contributors of articles. In that regard, longtime readers will recognize the name Howard Stone, author of our lead article on his prized wireless sets as they appear on his new website. Howard's contributions go back to 1988 and a series of articles on his British crystal sets. Now retired, he continues his long commitment to radio preservation. High praise is due for his efforts — and for taking up the challenge of modern technology.

Praise too is due Norman Mueller who went several extra miles to trace the history of his Ozarka-Harbert set. A little research in my own Ozarka archives revealed how much the Ozarka Company did to encour-

age individual entrepreneurship in the sale of its products. The pitch was "We make it impossible for you to fail," and Norman certainly did not fail in his search.

Failure is not in Jerry Wieland's lexicon when it comes to restoration projects. He too had a company name mystery — Freed-Eisemann or Earl — to solve, and then he had to meet the challenge of restoring a unique speaker. A true preservationist like Jerry gets as close to the original as possible.

That same uncompromising spirit struck me when we received Joseph Jackson's photo of a Zenith console jammed into his sports car for a ninety mile trip home from a flea market. No doubt Joseph would have found a way even if he had traveled via bicycle!

Our traveling auction reporter Ray Chase finds a way to ferret out even the small auctions, if they offer sets worth the trip. The Fada Catalin and the Emerson Mickey Mouse at the Clinton Gallery auction in Pennsylvania attracted serious collectors. Ray's note about the mice nests in some of the sets is a reminder of our most important crusade — to get collectors to take care of their sets.

**A.R.C. Benefits.** Be sure to take advantage of A.R.C. benefits: a toll-free number (866) 371-0512; Discover, MasterCard, American Express, Visa accepted; a secure shopping cart on the website, [www.antiqueradio.com](http://www.antiqueradio.com); a searchable auction price database, now over 25,000 entries; and the full magazine available on the website. Note: Please do not send credit card info by e-mail. Use our secure website or U.S. Mail, or call or fax.

**Coming Radio Events.** Summer events are in full swing. Listed this month are 27 meetings, 10 meets; and 6 auctions. Enjoy!

Happy Collecting!

John V. Terrey, Editor

## ON THE COVER

Our cover this month is a 1930s one-cent postcard advertising the Economy Radio Service. It is from the John V. Terrey collection. The service warns that the most costly repairs they undertake are on sets some amateur has tried to "fix." On the reverse side of the card are "Words of Wisdom" — "When the ship has sunk, everyone knows how she might have been saved."

# WITH THE COLLECTORS

## Wireless at Stone Vintage Radio — Part 1

BY HOWARD STONE

*Thrust into the new world of high tech, longtime collector Howard Stone introduces us to his website and to some of the prize sets that can be viewed there. (Editor)*

I never planned to have a website. It started one Friday when I was having lunch with a friend and colleague, Larry Brown. Larry had seen my collection of radios and tubes, and at lunch he commented, "Howard, you should have a website. It would let more people see your radios." The following Monday, when I arrived at work, Larry told me that he had already mocked up a website. Well, what was I to do? I had to use it. He structured the website so that I could do all the input of pictures and descriptions of specific radios, with the exception of the items on the front page.

I'm not exactly up to date. I like old technology but am sometimes wary of modern innovations. Computers sometimes baffle me. I rely on our Tom-Tom, but still don't even own a cellphone (though I borrow my wife's on occasion), so I wondered how I would fare at running a website! As it turns out, I have come to enjoy having a virtual museum on the web.

I talk via e-mail with people from many nations; in fact, every month I have visitors from over 80 countries throughout the world. Some may want a close-up picture of the detector of a specific crystal set; others will ask for more information on a family heirloom; still others might ask what radio would be appropriate for a play, such as *Dancing at Lughnasa*, set in Ireland in the mid-1930s. In fact, several years ago in the U. K., my AK Model 84 was the primary image on the theatre bill for another theatre production; they even had a 7-foot poster of the 84 standing in the theatre's entrance.

In this and future articles, I will include pictures and descriptions of the radios I most value, radios from before 1920. In this article, I will cover several prewireless pieces that I find especially fascinating from this period. These items and more can be seen on my website, StoneVintageRadio.com by clicking on "Wireless (pre-1920) Radios."

Figure 1. Clapp-Eastham 1-Kilowatt Spark Transmitter.

### CLAPP-EASTHAM 1-KILOWATT SPARK TRANSMITTER

The full kilowatt spark transmitter shown in Figure 1 was made by Clapp-Eastham in 1914. It is the set pictured on the opening page of StoneVintageRadio.com. The parts were assembled from several places in the U.S. The marble panel with the meter and the switches is original from the mid-tens and came with all of the components already attached. The desk is a hand-scraped, home-built piece designed after prebroadcast transmitting desks of the period. Oh yes, the transmitter works! If I operate it in the middle of a thunderstorm with lightning striking, who knows where the static comes from?

### CLAPP-EASTHAM BLITZEN RECEIVER

The Clapp-Eastham Company began manufacturing X-ray equipment in 1906, though it did not adopt the Clapp-Eastham name until 1908. The firm added wireless pieces over the next few years. I believe the Blitzen receiver, shown in Figure 2, was the first complete receiver the firm manufactured. Indeed, at a time when most transmitters and receivers were assembled from parts purchased separately, it is one of the first small complete receivers (not the first) made by any manufacturer in the U.S.

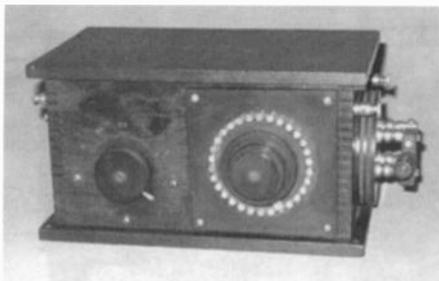

Figure 2. Clapp-Eastham Blitzen receiver.

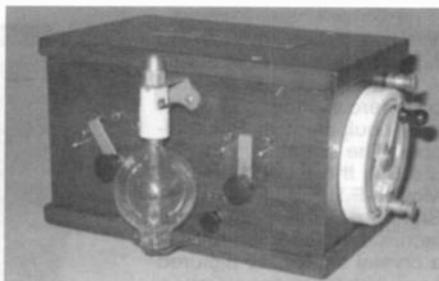

Figure 3. DeForest RJ4.

The Blitzen is a crystal receiver, which first sold in April 1912 for the princely sum of \$33. The one pictured here actually cost \$37 because it has the optional switch and loading coil seen outside of the receiver on the right. All that was needed was an antenna, a ground, and a set of headphones, and you were good to go.

This particular Blitzen came from an estate. The gentleman who sold it to me said it belonged to his grandfather, and when they were disposing of his things, they came upon the Clapp-Eastham. They did not know much about its origins, except that the grandfather had owned it for many years.

#### DEFOREST RJ4

The 1914 DeForest RJ4, shown in Figure 3, complete with a Spherical Audion, is an original set, not one of the reproduction ones that are around. It was the first commercial radio made with a triode tube in the U.S. and cost \$18 complete with a Spherical Audion. The Audion was used as a detector, instead of the more common crystal detector of the time.

#### WIRELESS SPECIALTY APPARATUS EATON OSCILLATOR

The Eaton oscillator by Wireless Specialty Apparatus (W.S.A.) is pictured in Figure 4. The label states, "Type-Triode C, Serial # 192, Wireless Specialty Apparatus." Eaton oscillators could be used as a part of a radio receiver or in the labora-

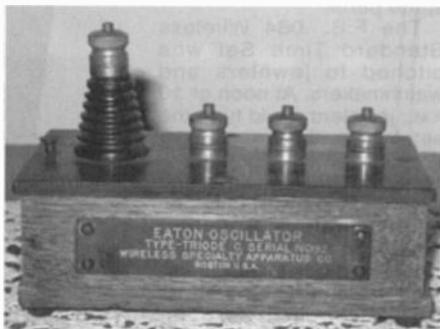

Figure 4. Wireless Specialty Apparatus (W.S.A.) Eaton oscillator.

tory to generate RF signals. Used in a radio, the external circuit is etched in white on the panel and the internal circuit is etched in red. It cost \$14.90 in 1919. Eric Wenaas has a good description of the Eaton oscillator on page 123 of *Radiola: The Golden Age of RCA*.

#### SPHERICAL AUDION BREADBOARD RADIO

Figure 5 shows a very nice Spherical Audion breadboard radio from 1915 or maybe a little later. It is a home-brew breadboard set on a solid 14" x 22" oak board. In the back is a Signal loose coupler. At the left is a Clapp-Eastham Blitzen variable condenser. In the center is a rheostat. On the right front is an Audion control box with a DeForest Spherical Audion. The white ceramic thing on the right side of the Audion control box is a rheostat to adjust the filament voltage on the audion. The Audion serves as a detector. There is no amplification.

#### F.B. CHAMBERS WIRELESS STANDARD TIME SET

F.B. Chambers & Co. began making wireless equipment in 1905. The company, according to an excellent ar-

(Continued on following page)

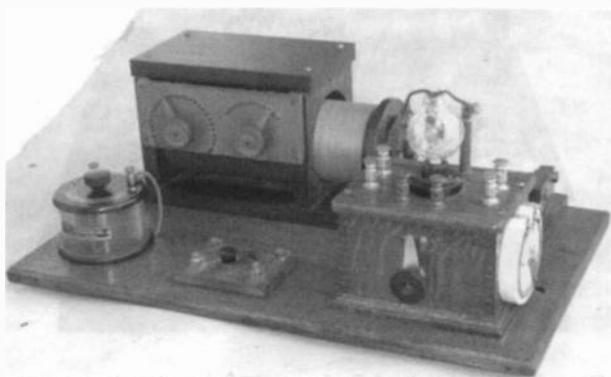

Figure 5. A Spherical Audion breadboard radio.

*(Stone Vintage Wireless, continued)*

article by Ludwell Sibley in the August 1997 issue of *Radio Age*, was probably the first commercial maker of wireless equipment in Philadelphia. The set shown in Figure 6 is the F.B. Chambers Model F.B. .084 Wireless Standard Time Set. Manufactured in 1913, it came as a crystal set, or, as pictured here, with the optional Spherical Audion. It had a unique locking drawer that could hold spare parts.

The F.B. .084 Wireless Standard Time Set was pitched to jewelers and watchmakers. At noon or 10 P.M., jewelers could tune the set to the time sent from Washington D.C. and accurately set their clocks and watches. I know of only one other Wireless Standard Time Set that exists and would appreciate any information on the Chambers Company, such as catalogues or advertising that the owner would sell or photocopy.

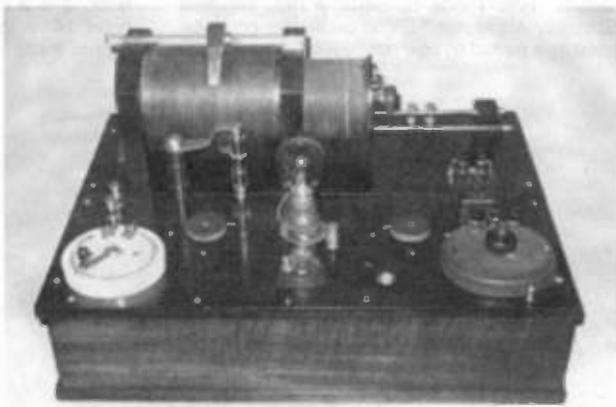

#### **FLEMING VALVE & RADIOSON ELECTROLYTIC DETECTOR RECEIVER**

The Fleming Valve & Radioson electrolytic detector radio, shown in Figure 7, was made primarily with Electro Importing parts. I don't know when it was made, but it is probably from the early teens. The operator could switch between a Fleming valve (a diode tube) and an Electro Importing Radioson electrolytic detector. The vertical glass cylinder to the left of the vacuum tube is the Radioson detector. Inside the case are two original batteries that operated the buzzer which is inside as well.

When I acquired this set, it was missing the Fleming valve and the glass part of the electrolytic detector. I had the Fleming valve and a friend found the rest of the Radioson detector about five years later. The case and all the parts were covered with  $\frac{1}{8}$  to  $\frac{3}{16}$  inch of greasy dust. It took

*Figure 6. F.B. Chambers Model F.B. .084 Wireless Standard Time Set.*

*Figure 7. Fleming Valve & Radioson electrolytic detector receiver.*

a lot of cleaning, but the greasy covering had preserved a remarkably fine finish on the case and all of the components.

#### SE-712A RECEIVER

The SE-712A, shown in Figure 8, is a naval direction finding receiver like the SE-143. The label says, "Radio Compass Receiver, made for the Navy by International Signal Company, 1917." It covers the 300-6000 meters.

#### WESTERN ELECTRIC SCR-75 RADIO AIRCRAFT RECEIVER

The Western Electric SCR-75 radio receiver, shown in Figure 9, is an aircraft receiver-interphone covering 0.355-2.0 Megahertz. It uses three VT-1 tubes. Manufactured in about 1918, it was made for the Signal Corps of the U.S. Army. I don't know much else about this set and am hoping someone can give me more information about it.

#### THE SPERRY SE-1012 RECEIVER

The Sperry SE-1012, shown in Figure 10, is a 1918 receiver that can switch between a tube and a crystal detector. It is considerably smaller than the SE-712. It covers the frequency range of 300-6000 kilohertz, and was intended as a shore receiving station for radio direction finder use. Frequently, it was used with the SE 1000 or 1600 series of audio frequency amplifiers. I have two of these receivers, one in a mahogany case and the other in a black finish case.

These are a few items from my wireless collection shown on my website: StoneVintageRadio.com. Many more items can be seen online. In a future issue, I will focus on wireless sets made by Marconi. Stay tuned.

*(Howard Stone, Texas Christian University,  
Box 298130, Fort Worth, TX 76129)*

*Howard Stone is a professor emeritus of Pastoral Counseling at Texas Christian University,*

Figure 8. The SE-712A receiver.

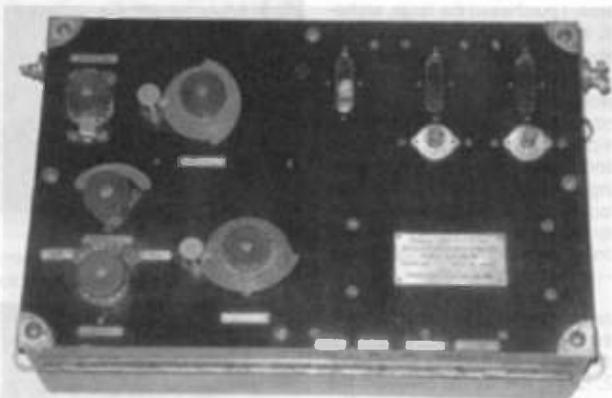

Figure 9. The Western Electric SCR-75 radio aircraft receiver.

Figure 10. The Sperry SE 1012 receiver.

*Fort Worth, Texas. A longtime collector, he is especially interested in wireless one and two-tube battery sets of the early 1920s, as well as crystal sets. His several articles for A.R.C. include a series on British crystal sets and an article on round Eckos.*

# WITH THE COLLECTORS

## My Ozarka and C.W. Harbert

BY NORMAN MUELLER

*An interesting radio picked up at auction proves to have a pretty unusual history. All it needed was a collector who cared enough to pursue that history. (Editor)*

In January 2008 at an estate auction in the Mena, Arkansas, area, I purchased the large, archaic, solid wood, box-like table radio, shown in Figure 1. It had four large dials, three selectors and earphone jacks on a slanted black front, but no name anywhere on it. Except for a piece broken from one large dial and a knob and wiper blade missing from one selector, this radio looked as if it had been well cared for. All the wood was like new with only a few minor surface scuff marks — a restorer's dream.

The A, B, and C battery compartment could be seen by tilting the radio compartment back, but all the wires were missing. See Figure 2. Lifting the top lid revealed the radio components, which were like new with a crystal detector (complete) and a 3-tube lineup, but no tubes. See Figure 3.

Centered under the top lid was a gold metallic label inscribed "Ozarka-Manufactured by C.W. Harbert-West Point, Arkansas," as shown in Figure 4. Though I had never heard this name before, at least I now have this interesting set restored. See Figure 5.

Figure 1. My Ozarka set as found. The tuning knob on the right is broken and the right-most selector switch is missing.

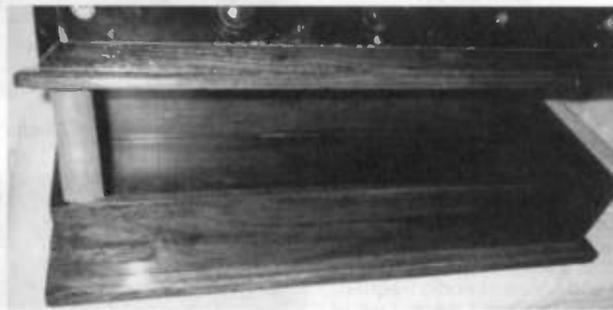

Figure 2. The lower battery compartment is revealed by tilting the radio portion of the cabinet backward.

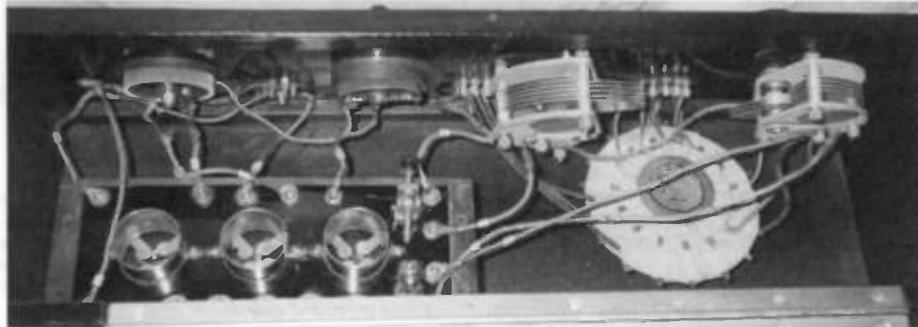

Figure 3. The components inside the set can be seen here. The 3-tube unit on the left actually is a sealed module and weighs about seven pounds! The crystal detector also is mounted on this unit.

Figure 4. The Ozarka/Harbert label

When no information for this particular Ozarka could be found on the Internet, I turned to my friend Larry Lamia in Mena, formerly of Vintage Radio in Irving, Texas, for his help through contacts in radio circles. Larry directed me to Jim Sargent in Texas whose knowledge of Ozarkas is one of the best in this region. Even he wasn't aware of an Ozarka of this description in existence and surely not one manufactured in Arkansas.

One possibility is that this particular radio was an early kit form only, never assembled and sold directly by Ozarka, and thus not listed as an Ozarka model.

#### THE SEARCH FOR C.W. HARBERT

The label on this set had so stirred my curiosity that in August 2009 I made the 130 mile trip to West Point, Arkansas, a quaint little town of about 200 located northeast of Little Rock. I wanted to find some descendants of this C.W. Harbert and obtain whatever information I could about him and the Ozarka I had purchased.

After searching for descendants and finding none, nor anyone who knew of them, I chanced upon a gracious lady who introduced me to David Hamilton who had been mayor of the town for many years. His father had grown up with the Harbert's son and he knew the family well. Needless to say, he was dumbfounded that I had come so far to inquire about a family that hadn't resided in the town for 80 years. When I related the story of my Ozarka, he, in turn, told me the Harbert history.

#### THE HARBERT RADIO STORY

C.W. Harbert arrived in West Point in 1908 as the depot manager when the Union Pacific Railroad was built through that area. He held that position until a massive strike idled the railroad in 1921.

Harbert then opened a hamburger/sandwich shop in town, and about the same time, he purchased his first radio kit from Ozarka. He assembled the kit, which became the first radio known in the region.

As word spread, many area residents began to congregate at the Harbert front porch to see and hear this modern marvel. Naturally, people began to want to have their own radios, and the enterprising Harbert seized the opportunity. He began to pur-

chase and assemble kits from Ozarka to sell in the area with his own label placed inside the lid. How long he was in this business or how many kits he assembled and sold is not known. How many of these radios like mine still exist is also unknown. I would appreciate any information that might be out there from other collectors.

#### THE HARBERT POST-RADIO STORY

In the late 1920s, C.W. Harbert's son wrote a book titled *The Steamboats Don't Come Here Anymore*. The title came from the town's history as a shipping center before the railroad arrived. It was then the farthest point north reachable by steamboats on the Little Red River. The book included the story of his father and his radios, as well as stories of other families, some less than flattering, that caused quite a riff in the community. No copy exists in the local library.

In 1928, the Harbert's house burned to the ground causing many a rumor, including that C.W.'s wife torched it in order to get out of that town. That is a possibility, since the insurance from the house allowed Harbert to purchase a new Chevrolet, pack up the family, and leave for Arizona. Thus ended all

Figure 5. My restored Ozarka set. Unfortunately, I am still missing the right dial and selector switch.

remnants of C.W. Harbert-Ozarka-West Point, Arkansas, except for the memories of a few old-timers.

(Norman Mueller, 5841 Hwy 71 S, Cove, AR 71937)

Norman Mueller's radio interest dates back to his teens and a gift of a crystal set from his grandmother. He worked for many years in a Zenith sales and repair shop, followed by a career as an industrial switch gear technician for GE and Emerson. Radio as a hobby is now the focus of his retirement years.

# RESTORATION TOPICS

## The Radio with Two Names — Freed-Eisemann or Earl?

BY JEROME WIELAND

*Vintage radios with mystery or duplicate labels always provoke interest. Jerry Wieland's anniversary gift console also turned out to be a challenging restoration project. (Editor)*

For a wedding anniversary present, my brother presented my wife and me with an old console he found at an estate sale. Figure 1 shows it in restored condition. At the time, it impressed me more than it did my wife.

The cabinet was in good condition, except for the top which had severe veneer damage. The chassis was clean and had all its tubes, as shown in Figure 2. I noticed the name C.A. Earl on the metal dial escutcheon, shown in Figure 3.

However, a large label on the back of the chassis stated it was a Freed Radio Model NR-55 or 56 manufactured by Freed-Eisemann, as shown in Figure 4. Then I noticed the speaker label also had the C.A. Earl name. See Figure 5. I had heard of the Freed-Eisemann Company but not C.A. Earl.

When I consulted my radio reference books, I learned that C.A. Earl was president of the Freshman Company, and in 1928 had bought the Freed-Eisemann Company. He planned to merge it with the Freshman Company and produce two product lines in one large new factory. He would keep the Freed-Eisemann name for one line but replace the Freshman name with his own name for the other line. Production in the new factory began in mid-1929, but both lines were in receivership by the end of

Figure 1. My restored Earl — or is it a Freed-Eisemann?

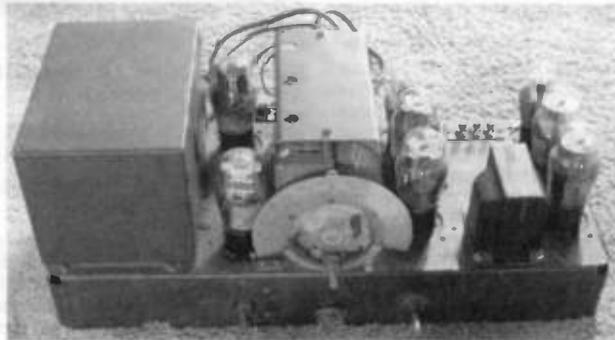

Figure 2. The very clean and complete chassis.

1929 due to the stock market crash, according to Alan Douglas in Volume 2 of *Radio Manufacturers of the 1920's*. I assume that my radio was produced as an Earl model during this period.

### THE RESTORATION PROJECT

Now that my curiosity was satisfied, I began an examination of the chassis and speaker. When I removed both from the cabinet, the speaker first caught my attention. Half of the leather surround was missing and the remainder was dried and cracked. What was left of the thin, white paper cone had curled like a potato chip. It began to tear when I tried to unravel it. The cone was history.

I set the speaker aside to determine the chassis state. The power toggle switch was not working, but some WD-40 unstuck it. An audio interstage coupling transformer had an open winding. A search of my transformer stock yielded a substitute.

The volume control is an unusual dual-stage affair. Unfortunately, the rear stage wasn't working. When I disassembled it, I found that the resistive element was badly worn and open. Searching through my control stock, I found a single-stage pot of similar design and was able to couple it mechanically to the good front stage. It pays to keep old parts!

Everything else looked OK, including the power transformer and the power supply filter capacitors, which was quite a surprise. I selected a permanent magnet speaker and an audio transformer with a primary center tap to match the push-pull 71A audio tubes. With the aid of numerous clip leads, the radio sprang to life. Some quick alignment yielded decent sensitivity and audio quality. Those power supply filter caps really did work. No hum was present.

### THE SPEAKER

Now I had to decide what to do about the speaker. I wanted to use the Earl speaker if at all possible since it seemed rather unusual. It has no field coil. The label describes it as an Inductor Dynamic Speaker Model 375.

An Internet search revealed that this type of speaker was used during the 1920s for a short time before moving voice coil speakers

Figure 3. An Earl radio or so says the escutcheon.

Figure 4. Not so quick! It's a Freed-Eisemann NR-55 or 56 according to the metal tag on the chassis.

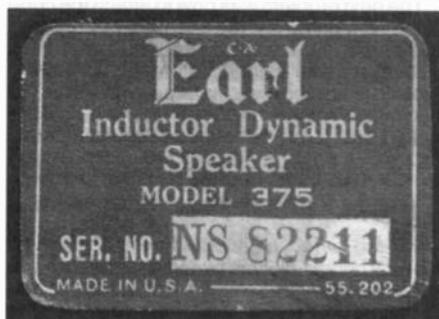

Figure 5. But the speaker label says "Earl."

became popular due to their better sound quality. The inductor type was said to have poor high frequency response, according to the Wikipedia article I found on the Internet.

With the speaker cover removed, two large pole pieces and a transformer with a center

*(Continued on following page)*

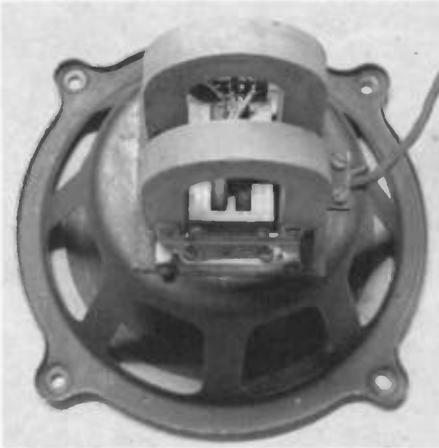

Figure 6. The Earl speaker.

(Radio with Two Names, continued)

tapped primary are visible, as shown in Figure 6. The word inductor in the speaker name refers to an induction motor which this speaker drive mechanism is said to resemble. The threaded shaft that attaches to the speaker cone is referred to as an armature and is activated by the transformer secondary field, according to a 1929 *Popular Mechanics* article.

I remembered having an old speaker of about the same diameter in the garage attic. The field coil was open, but I decided years ago to keep it because the cone was in good condition. I was able to find it, but the cone diameter was too small. It barely made contact with the edge of the Earl speaker basket. The original Earl cone had a stiff cardboard ring which I decided to use as a diameter expander. Gluing it to the edge of the smaller cone would allow me to glue the cone to the basket edge.

The next problem was how to attach the cone to the armature. My replacement cone had a spider-type attachment, but the Earl has a metal nose with a small hole for the armature shaft to pass through, as shown in Figure 7. Two nuts are used to attach the armature to the cone. I decided to remove the Earl metal nose and graft it onto the replacement cone. After I removed the spider from the replacement cone, I glued the Earl nose inside the replacement cone.

I had to lengthen the armature shaft to reach the new cone. I did this by attaching a screw to the armature with a thicker than normal nut and threading both into this nut. I then secured the metal nose to the extension with another nut behind the screw head. I carefully aligned the cone extension ring to the speaker basket, clamped it temporarily in place, and hot-melt glued the ring to the basket. The restored speaker is seen in Figure 8.

When I first tried this reworked speaker, the audio volume was low. By readjusting the nose location on the armature, I found the optimum position and the volume improved. As stated in

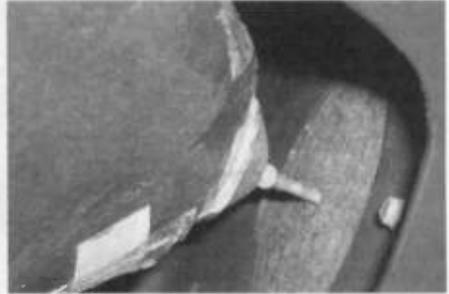

Figure 7. The armature shaft behind the speaker cone.

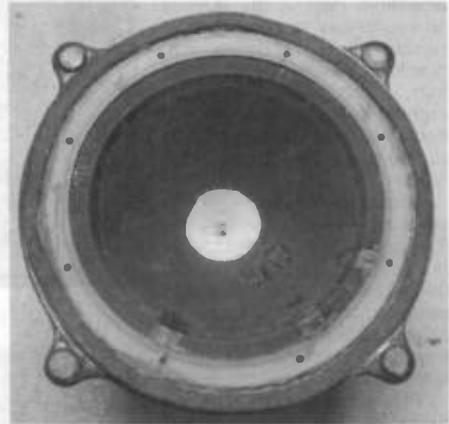

Figure 8. The armature shaft is attached to the center of the cone.

a Wikipedia article, there is a lack of high frequency response. However, I am going to keep the Earl speaker in the Earl radio just as C.A. intended.

The final tasks were to clean the cabinet, apply some stain to the scratches, and attached a new piece of walnut veneer to the top. As indicated earlier, Figure 1 shows the completed project.

# WITH THE COLLECTORS

## Radio Fever

CONTRIBUTED BY JOSEPH JACKSON

*Joseph Jackson has a very serious case of radio fever. A healthy person might balk at buying a console at a flea market after realizing that he was driving a sports car. Not Joe Jackson! (Editor)*

On a last-minute whim, I decided to run up to Scott's Antique Market in Atlanta on a recent Saturday. Good radio pickin's there are getting slim, but I occasionally find a nice Bakelite tabletop radio reasonably priced, and even an occasional Catalin set, unreasonably priced.

Not expecting too much, I hopped into my Miata, drove the 90 miles, and arrived by 9:30 A.M. Not more than 10 minutes later, I spotted a decent Zenith 12-S-265, 12-tube set with a shutter dial and motorized tuning, for under \$200. I haggled a bit with the dealer, but, realizing I didn't have my truck, I moved on and went through the rest of the buildings.

As I was about to leave, I stopped by one more time and explained my dilemma to the dealer. He joked, "There's no extra charge if you want to try shoehorning it in." I made a few measurements and decided to go for it. It did fit, just barely, but only with the top down.

I must admit I got some strange stares as I drove I-75 back home with a Zenith console as my passenger.

*(Joseph Jackson, 6331 Old Forsyth Rd., Macon, GA 31210)*

*A problem.?*

*No problem!*

# AUCTION REPORT

## Robert H. Clinton Gallery Auction Jamison, Pennsylvania – August 29, 2009

CONTRIBUTED BY RAY CHASE

The Robert H. Clinton & Co. held this sale at the Warwick Twp. Fire Company Hall located in Jamison, Bucks County, Pennsylvania. This was a fairly small general auction that had advertised a collection of antique radios. The collection was small and some of it was in very poor condition; however, a good contingent of radio collectors showed up and, fortunately, the auctioneer sold off the radios early in the sale. Most radios sold very cheaply, but enough serious collectors were there to bid up the Mickey Mouse radio to \$525 and the Fada Catalin to \$480.

I hope that the buyer of the two battery sets for \$20, had a good set of rubber gloves to dig out the early tubes that were encased in an extensive mice nest.

vg=very good, g=good, f=fair, WT=with tubes. All prices have been rounded down to the dollar. Some low cost items and items in poor condition or non-specific descriptions are omitted.

Atwater Kent 20 big box, WT, g .....	\$55
Atwater Kent 84 cathedral, g .....	120
Blaupunkt radio/phono console, w/bar space, 1950s, vg .....	5
Claratone 5-tube battery set, 3-dialer Neutrodyne W2T, (1) is a DV .....	45
Emerson 559A small plastic portable, f .....	5
Emerson Mickey Mouse radio, small, 4-tube, f .....	525

The two top items in the auction were the Emerson Mickey Mouse set on the left and the Fada Catalin which sold for \$525 and \$480 respectively.

Fada 659, Catalin, butterscotch, color very aged, but set is complete, no cracks .....	480
GE L632 table set, wood, g .....	6
Grebe Synchrophase, NT or chains, nice Brooklyn Radio Shop label in lid, f .....	70
Grunow 5B wood mantel set, w/chrome trim, g .....	40
Harkness Counterflex, 3-tube battery set, WT, g ...	35
Home brew, two battery sets, (1) w/batch of 201 type tubes among the mice nests, very poor .....	20
Majestic 45 highboy console, w/doors, 8-tube set, w/square knobs, g .....	22
Montgomery Ward Airline 35BR-1557A, small plastic, g .....	7
RCA 5BT farm tombstone, (2) knobs, g .....	32

Two Signal Electric telegraph relays sold for \$20.

**A warning:** Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists, and if we are notified, corrections will be reported.

*A table full of radios ready for the gavel.*

RCA 8R71 table set, plastic .....	5
RCA R7A tombstone, (3) knobs, g.....	35
RCA Radiola 100A speaker, g, sold with a '50s plastic set .....	18
RCA Radiola 18, WT, no hood, g .....	30
RCA Radiola UZ-1325 horn speaker, g .....	30
Saba large wood table set, German '50s radio, g..	37
Telegraph, Signal Electric relays, (2), g .....	40
Truetone D1001 clock radio, small, wood, unusual, f .....	30
Zenith G725 AM/FM table set, plastic .....	10

*Though handsome, German radios appear not to be popular as exemplified by the low bids on these two radios: the Saba, top, sold for \$37, and the Blaupunkt console sold for only \$7.*

*(Ray Chase, 1350 Marlborough Ave., Plainfield, NJ 07060; Robert H. Clinton & Co., Inc., P.O. Box 29, Ottsville, PA 18942, rhclintonauction@hotmail.com)*

*Ray Chase has been a radio enthusiast and a collector of many types of radios for years. Currently, he specializes in World War II electronics equipment, as well as early battery superheterodynes. He also has an extensive collection of radio documentation and ephemera.*

*Unfortunately, too many radios end up like this — serving as a mouse nest!*

# CLASSIFIED ADVERTISEMENTS

**FOR SALE:** Rider's Radio Manuals (new) volumes 1 thru 12 still in original dust covers, all still have manufacturers' additions in front of each volume - Best Offer for all 12. Prefer pickup, too heavy to ship. John Snow, 1910 Remington Ct., Andover, KS 67002. (316) 733-1856

**FOR SALE:** RCA T48A cathedral, nice, works - \$65. Airline 7-tube beautiful 3 color dial, plays - \$70. Philco 38-62 - \$35. Detrola #212 7-tubes has eye tube, plays nice, cabinet w/burlwood inlays - \$80. Radiola IIIA. Grunow Mod 500 tombstone, beautiful like new w/ chrome grille around spkr, has burlwood inlay. Philco 39-17 w/6 pushbuttons - \$30. McIntosh receiver w/ matching amplifier in beautiful matching walnut cabinets, working. (3) MC 60 & (2) MC 30 McIntosh amps. Many Philco and other brand cathedrals available. Bill Kalcik, Meadowbrook Resort, 1533 River Rd., Wisconsin Dells, WI 53965. (608) 253-9855. No e-mail

**FOR SALE:** Sony digital SW ICF-2001, works good - \$175. Trans-Oceanic 600, vg black stag - \$395. T-O parts transistors 1000, 3000, 7000, call. Eton FR-200 AM/FM/SW crank radio 3 way power, like new - \$35. **WANTED:** Hallicrafters TW-1200 solid-state 12-band SW 1979-80 vintage, any condition. Ted Demski, 5806 225 Pl. SW, Mountlake Terrace, WA 98043. (425) 778-7100

## New Jersey Antique Radio Club Summer Tailgate Swap Meet

NJARC's at InfoAge - 2201 Marconi Road, Wall, N.J. 07719

**Saturday, July 24th, 2010**

8:00 AM to 1:00 PM - Open to the Public - Vendor Set-up at 7:00 AM

A great old fashioned tailgate swapmeet at what was once the 1914 Marconi Belmar Wireless station. Bring your own tables, food and radios and relax under the trees in the picnic-like setting of this historic site. Take a tour of the Marconi "hotel" where the ghosts of the former age of wireless still roam the halls. Visit NJARC's over 3,000 sq. ft. Radio Technology Museum including the National Broadcasters Hall of Fame. Visit the Project Diana site where the 1946 "Moon Bounce" experiments were conducted and see the huge Talos satellite dish where the first satellite weather images were received. And much, much more!

A single space is \$20 for members and \$25 for non-members. Additional reserved spaces are \$15 (\$20 non-members). There is a \$5 club donation entrance fee for buyers. For directions, visit [www.infoage.org](http://www.infoage.org), our club website at [www.njarc.org](http://www.njarc.org) or "mapquest" 2201 Marconi Road, Wall, NJ. 07719-4081.

**Sargent Auction Service**  
presents  
**Another Great  
Radio/Phonograph Auction**

**Saturday, July 24, 2010 - 9 AM CST**  
at the American Legion Hall, 130 E. Main St.  
Mesquite, TX 75149

Sale includes items from at least 3 estates plus additional consignments. Radios, phonographs, (platter and cylinder), consoles, table models. Special to this sale are items from the late John Bryant collection. Collectors will recognize John as the co-author of the classic series of books on Zenith radios. Many of these sale items had been gathered in preparation for another book concentrating on the post-War years. There is a wide variety of items to be offered in this sale.

**Don't miss this sale!**

Check the photo line up at [www.sargentauction.com](http://www.sargentauction.com) Bid in person or live via the Internet at [www.icollector.com](http://www.icollector.com) Doors open for previewing on Friday, July 23 from 4 PM to 8 PM. Day of auction preview begins at 8 AM. First auction of non-Internet items begins at 9 am followed by the live and Internet auction beginning at 10 AM. A shipper will be on site for your convenience or make your own arrangements for removal/pickup. All items will be sold "as is, where is". Announcements made day of sale take precedence over other advertisements.

Terms: Cash, check, VISA, Mastercard, and Discover  
5% buyers premium for on site sales, 10% if sale is via Internet

## NEW DVD: RF Alignment Made Easy!

Bret's Old Radios  
Presents

### Vintage Radio Alignment

What It Is And How To Do It

A radio repair workshop hosted by  
Antique Radio Club of Illinois

DVD  
VIDEO

In this new DVD, you'll learn how the sensitive RF, IF, and oscillator circuits in your radio work, & how, with just a signal generator & a volt meter, you can fine-tune them so that your radio is as sensitive and selective as it can be! We'll discuss TRF sets, early Super-Hets, the All-American Five, plus wave-trap antennas, FM & Short Wave!

View a streaming preview here:  
[www.youtube.com/watch?v=Ec24sGJi0Uo](http://www.youtube.com/watch?v=Ec24sGJi0Uo)

Filmed live at ARCI's *RadioFest*, this hour-long video is a fun, visual, and interactive learning experience that will help you get even more fun and satisfaction from radio collecting & repair.

Run time: 52 minutes © 2009 Bret's Old Radios

# Estes Auctions

*Specializing in Vintage Radios  
Complete Auction & Appraisal Service*

## Vintage Radio Auction

**Saturday, July 24, 2010 – 10 AM EDT**

at the Expo Auction Center

8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)  
then south on SR #83 to the Love's Truck Stop, turn left  
onto Garman Rd. and follow 7/8 of a mile to the auction site.

This sale includes items from Kentucky, Ohio and Chandler, Arizona and will offer many battery sets to include several DeForest sets. A nice selection of horn type speakers, as well as other types. Many cathedral and tombstone style radios to be offered in the sale as well as over one hundred wood and Bakelite type radios also. We have several thousand tubes to sell and will offer many of these tubes in bulk lots. We will have a good selection of radio books, magazines and related radio literature in the sale. We will have our early sale from 8:30 AM until 10 AM. This sale has lots of radios in need of repair or restoration, test equipment, parts, tubes and other items. This sale also will have the rare Zenith Model 39 Spanish Deluxe console radio. A very beautiful and ornate radio. An Atwater Kent Model 10 breadboard and amateur radio pieces. It will be another good auction. Please check [auctionzip.com](http://auctionzip.com) #20507 for our website listings. We look forward to seeing you at the summer radio meets.

# Estes Auctions

*Specializing in Vintage Radios  
Complete Auction & Appraisal Service*

## Notice!

### Vintage Radio Auction – Rare Item

**Saturday, July 24, 2010 – 10 AM EDT**

at the Expo Auction Center  
8157 Garman Rd., Burbank Ohio (Exit 204 off I-71)  
then south on SR #83 to the Love's Truck Stop, turn left  
onto Garman Rd. and follow 7/8 of a mile to the auction site.

This auction will offer the very rare and ornate 1929 Zenith Model 39 Spanish Deluxe radio. This is a beautiful radio offered in 1929 just as the stock market crashed and the Great Depression began, this example was purchased directly at the Zenith factory at Plant #1 in Chicago in the fall of 1929. It has remained with the family for 81 years. The present family member has now decided to let some radio collector have the opportunity to enjoy this beautiful piece of radio history. The serial number on this radio is ZR-12, a very low number in production. All the original papers are with this radio, the bill of sale from Zenith Plant 1, the warranty paper and the instruction papers. This is a unique radio that will grace any collectors home or museum. We are very excited and happy to offer this radio at our radio auction. Watch for pictures in June. We will post them on our website. We hope you make plans to join us at this special auction.

**Richard Estes, K8LRY - Auctioneer**
