THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the *QST-VIEW* series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. *QST* Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and *QST-VIEW* has on-line instructional help for operating the *QST-VIEW* browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter
S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. Thousands sold at \$ 199. **SPECIAL \$ 99 + \$ 6.00 S&H** in the USA, add \$12 for worldwide delivery. **Order Now while supply lasts !**

We now have a small mountain of vacuum tubes at very competitive prices - Thousands sold since our first posting of these tubes. All types including receiving and transmitting types. Tube price listings on the web:
<http://www.radioera.com/tubes.asp>

SCHEMATIC DIAGRAM & MANUAL SERVICE

Over a Million schematics & 100,000 manuals and growing! Schematics and most manuals may be emailed instantly via the internet

Check the web - On-line antique radio flea market - Radios for sale - Antique radio museum - Zenith Trans-Oceanic museum - thousands of old catalogs, manuals, literature, information, how-to data, reference, auction price section and much-much more! Visit antique radios largest web address today!

RadioActivity 2011

June 2 - 4 Beltsville, MD

Theme Manufacturer: de Forest

Highlights

- Friday Seminar topics: the Connecticut Radio Museum, Cold War Vacuum Tubes, and Ed Lyon's famous Radio Repair Clinic.
- Saturday presentation: "Influence of Women in Early Radio" (spouses encouraged to bring their favorite sets)
- Friday Night Banquet talk by Mike Murray: "History of de Forest"
- MAARC's Old Equipment Contest on Friday
- Flea Market starts 6:00 am Friday (No selling prior)
- Saturday Main Auction Starts at Noon "Junque" auction 8:30 am

Meet presented by the Mid-Atlantic Antique Radio Club

Registration Fees

Registration mailed on or before May 21:	
MAARC Members	\$15
Non-members	\$20
Registration after May 21 and at the door:	
MAARC members	\$20
Non-members	\$30
Saturday (June 4) Only Registration:	\$10
Flea Market spaces, first space:	\$15
Additional spaces, each:	\$10
Friday Evening Banquet tickets, each:	\$33

Registration includes family members.
Flea Market vendors and auction participants must register. Registration Desk will open Thursday evening.

Hotel Rooms

A block of rooms is available at \$99 ea. + tax. Please call hotel (right) to book. Cutoff date is May 12 (mention MAARC meet).

Registration Info

Mail check, for fees only, made out to MAARC to: Chris Kocsis, 7315 Oriole Ave. Springfield, VA 22150-4302 (703) 913-9143 chrisk33@cox.net [This is for meet fees only. Please call hotel to reserve rooms].

Location

Sheraton Washington North Hotel
4095 Powder Mill Road
Beltsville, MD 20705
(800) 325-3535 or (301) 937-4422
Same as last year. Easy to find between Baltimore and Washington, DC. From I-95 take exit 29B (MD Rt. 212 west), turn left at first light, drive to rear of hotel.

For updates, full agenda, auction news, and OEC categories and rules, see the March or April edition of RADIO AGE (the MAARC monthly publication) or visit our website: www.maarc.org

POSTMASTER: Send address changes to

Antique Radio Classified, PO Box 1558,

Port Washington, NY 11050.

Printed in U.S.A.

PURPOSE. Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

Publisher/Editor: Jon Kummer. **Publisher/Editor Emeritus:** John Terrey. **Founding Publisher/Editor:** Gary B. Schneider. **Contributing Editor:** John Terrey. **Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Norman Braithwaite, Ray Chase, Dave Crocker, Alan Douglas, Richard Foster, Andrew Hayden, Jim Kreuzer, Phil MacArthur, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White.

CONTACTING ANTIQUE RADIO CLASSIFIED

All correspondence should be sent to:
A.R.C., PO Box 1558, Port Washington, NY 11050
Telephone: (866) 371-0512; Fax: (516) 883-1077
Email: ARC@antiqueradio.com
Web: www.antiqueradio.com

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However A.R.C. does solicit letters of interest from its readers and publishes them as space permits.

WEB. Antique Radio Classified issues are published on the web as PDF files for subscribers. Web-only subscriptions are available. One issue is available for viewing by all on the web as a sample.

ADVERTISING. Display and Classified advertising rates and artwork specifications are available on the web site.

PAYMENT. Please include full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid. Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express, Discover or PayPal. Make check out to "A.R.C." Subscriptions will be prorated to amount sent if amount is incorrect. *For your protection, no credit cards by e-mail; use our secure website instead.*

CHANGE OF ADDRESS. Please notify us in advance of a change of address. Send your new address, your old address, your SUB# and the effective date of the change.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, email, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). Mailing dates change each month.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

NOTICE. Subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

SUBSCRIBERS: All paid subscribers receive a FREE classified ad of up to 50 words in each issue.

Editor's Comments

It's Thursday night and I'm in my hotel room at 2011 Antique Radio Charlotte, the annual conference for antique and vintage radio collectors.

I've never attended this Meet and I'm looking forward to meeting new faces, possibly making a purchase, and of course, selling copies of *Antique Radio Classified* and books.

In April I'm attending the Tri-State Radio Fest near Pittsburgh, PA, the New Jersey meet in Parsippany, NJ, and the New England Meet in Manchester, NH. For the first time in 10 years, A.R.C. will be attending the Dayton Hamvention starting May 20. The latest statistics show that approximately 10% to 15% of our readers are Hams.

How many meets are you going to attend now that the warm weather has returned? I hope many. Each month we give you three months worth of Coming Radio Events. Check out an event in your area!

The April 2011 issue of A.R.C. will be covering the following:

- The Kutztown XXII show from 2010.
- The Diefenderfer Auction from Leesport, PA
- Radio XLII in Westford, MA
- Examining the rare Hallicrafters S-2
- The Crosley 2-C-1

As always, check out our Club Listings to make sure everything is up to date with your club. It's a great way to attract new members. Every month I receive email and phone calls in the office asking about the value of a piece of equipment. I always recommend they contact their local club and introduce themselves.

Are you ready to write your masterpiece article for A.R.C.? We are always looking for articles on battery, AC sets, TVs, phonographs, tube audio, and the history of radio.

– Jon Kummer

On The Cover

This month we feature a young collector (actually the daughter of collector Roger Buttignol). We tried to convince her that the FADA colorful plastic radio wasn't worth much. She knows more about radios than all of us combined!

CLASSIFIED AD RATES PER MONTH

Deadline NOON ET – 10th of the month!

Subscribers (First AD):

First 50 words: FREE!

10¢ per word for words over 50

Subscribers (Ads after first ad):

10¢ per word for all words

Non-Subscribers:

30¢ per word

Please do not forget to send in the extra 10¢ per word when your classified ad runs over the free 50 words; your payment will be appreciated, and it will help keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month for all ads with drawings and photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph and A.R.C. will reduce or enlarge it as needed.

Photo and Drawing Rates per Month

\$10.00 per month for each photo or drawing. (If ad is cancelled, this amount cannot always be refunded.)

Changes and Cancellations

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad, or make changes

IMPORTANT – COUNTING WORDS – IMPORTANT

The standard headings: Wanted, For Sale, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address are required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, email, etc. count as one word each. Hyphenated words count as two words.

MEET REPORT

Radio XLII — a.k.a. Radio 42

Westford, Massachusetts — February 20, 2011

BY DOROTHY SCHECTER

Not to worry — bitter cold does not deter the indefatigable radio collectors from traveling to the annual Greater Boston Antique Radio Collectors (GBARC) meet held at the Westford Regency Hotel on President's Day weekend. Luckily, the persistent snow in New England this year held off for this event, and the hotel offered all its usual amenities to make everyone comfortable. What better way to spend a morning with old and new friends all dedicated to our ultimate goal — the preservation of radio history!

The total attendance was 504, close to last year's count. At the 83 tables, there were 52 exhibitors and their helpers, totaling 87. From old guard attendees, as well as new, the response was overwhelmingly positive, and there was much trepidation about the future of the show. A.R.C. had run it for several years, but the magazine's recent sale to Jon Kummer and relocation to Long Island has made the future uncertain. We're hoping that some New Englander will pick up the job of organizing what has been the most successful event in the Northeast for years.

The enthusiasm of attendees is something the lovers of this hobby don't want to see slip away. An

Greta Buttignol, holding a green Fada 1000 with an asking price of \$3,800, was helping her father Rain at Radio XLII.

example lay in the comment of Elis Guditz, a new attendee who expressed his amazement at what was going on — "It's a trip down memory lane. I didn't think so much catalog stuff still existed!" And he went on marveling from table to table.

Describing himself as "an old repairman," Elis also found he had come to the right place to find someone to help him sort out the vintage equipment in his workshop. We steered him to Ray Bintliff, who, in turn, found Jim Buliszak who volunteered to help. As always, this meet is the place not only to exchange and marvel at old treasures, but also to make valuable connections.

A FAMILY OF FRIENDS

The really great thing about this show is the feeling of "family" even for those who have

A rare A.C. Gilbert one-tube set was marked \$1,995.

This Emerson AU-190 was one of several Catalin sets selling in the 4-digit range at Rain Buttignol's table.

attended for only one or two years, or those, like past A.R.C. staff members, who are not necessarily collectors. It's not long before everyone feels like an old friend. The reason may be simple — as longtime exhibitor Lenny Provost said, "It's just a nice group of people."

And as for "family," a prime example was Lenny's exchange with the next generation of exhibitors. He easily got the attention of Rain Buttignol's children, Greta and Lorenzo, who were at their table across the small room from Lenny.

Greta is now old enough to do price tags for Dad, and naturally, she likes the ones with four digits, such as \$3,800 and \$5,200 for his Catalins. However, her attention was soon drawn to a set of Elvis miniature trucks among Lenny's novelties. Unfortunately, she had to wait for Dad to show up with the money, which Lenny managed to extort from Rain later in the day. Another happy ending to a Radio 42 family story.

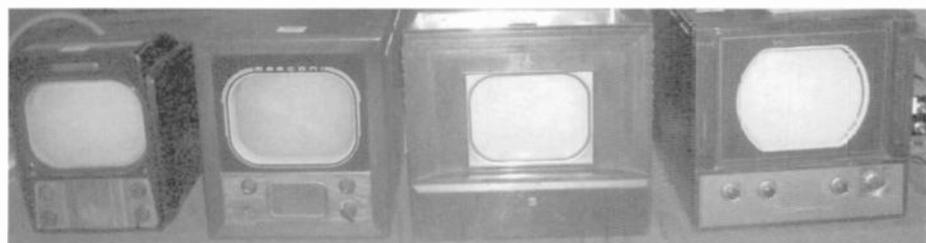

And there were many more. What could be better than seeing old friend and serious collector John De-Loria back in full swing after open heart surgery. He and his wife Judy had gotten rid of most of the 4,000 radios in nine warehouses and were now basically "on the radio road" with a 10-foot trailer hitched to their van.

A Tower ship speaker was priced at \$150 at Steve Wallace's table.

Bruce Philips discussing a Crosley Super Trirdyn with a possible buyer.

An array of television sets was a feature at Brian Edwards' table. Left to right are a GE Model 800 for \$125, a Marconi with a GE chassis for \$150, an Emerson for \$200, and a Westinghouse for \$100.

Lined up on one of their tables were seven Zenith Trans-Oceanics, four of them already sold. On another, lamps with shades made of old tube boxes caught many an eye. In all, John reported, "It was a good day — we sold 90 percent of what we brought before 10:00 A.M."

Having a good day was evident in the faces of Anita and Bob Genthner from Buskirk, New York, who said they had "hit the jackpot" early in the morning with the sale of two solid-state Zenith Trans-Oceanics. But, for them, the best reason to come to this show is not only new customers, but also new friends."

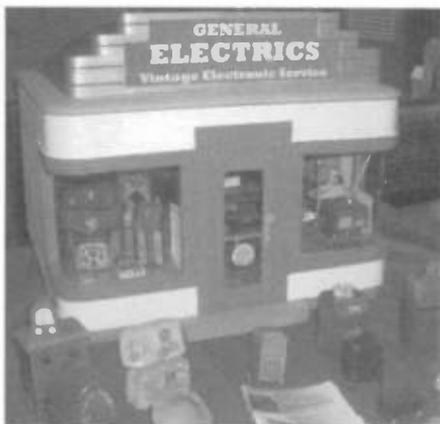

Similar satisfaction was shown by Bob and Pat Sukosky who are a kind of romantic "success story" for this show. A few years ago they came as an engaged couple, with Pat in the process of being introduced to the world of radio collecting.

A rare Adams Morgan Model RA-10 tuner was selling for \$875.

Now they are married and she has become an ardent fan with an interest in chairsides. For both, it's always well worth coming to this show.

DIFFERENT STROKES FOR DIFFERENT FOLKS

A good example of Walt Buffinton's miniatures is this "General Electrics Vintage Electronic Service."

Michael Katz brought both a Kolster Model K-60, and a Pilot cathedral to sell, each priced at \$225.

The variety at John DeLoria's table ranged from lamp shades with tube box designs to Zenith Trans-Oceanic sets.

Jim Moneghan offered a rare Kennedy Model III portable set and a Kennedy Model 281 at his table.

Attending a show like Radio 42 allows collectors to connect one-on-one — a plus that can't be matched by the Internet. It also reveals how many different ways there are to pursue this hobby. I found a good example in a conversation with Jahan Acciavatti, who jauntily attended to business wearing his period top hat, while his wife Anne Marie "held the money." When I asked how vintage phonographs had become of primary interest to him, he explained that back in the 1980s, an elderly lady had given him her collection of 78 records, and — what else? — he had to have something to play them on. Simple as that. Since then, old radios and quack medical devices have crept into the mix of his collection, and so it goes — probably on and on.

Maybe on to TVs next — like Brian Edwards who has a collection of about 125 TV sets. It was good to see some of them on his table, as they were a sign that more and more people have added this important part of communications history to their collections. Brian was showing two unusual TV sets — a Marconi and a GE with the same chassis but in different cabinets.

Lennie Provost, a.k.a. "side room Lennie," offered items from communication receivers to novelties.

Jahan Acciavatti's offerings varied from telephones to a 1902 Victor Monarch phonograph selling for \$1,100, and a Magnavox M1-A horn speaker selling for \$95.

He let it slip that he is a big fan of antique technology that now fills his attic. "It doesn't have to be practical," admitted Brian. "It just has to look interesting."

Just about everything looks interesting to John Stein and his long time partner Sharon Mayor who brought in three hotel carts of large and small, inexpensive items to sell to people looking for restoration projects and parts. Almost everything had been sold. Sharon has a collection of 400 transistor radios, but together they collaborate on all kinds of projects, including a ride-on, live steam railroad in their backyard. Soon they'll be off on a vintage motorcycle ride to the Ocala National Park in Florida. It would be hard to beat this couple's wide range of interests.

Obviously, the conversations at Radio 42 could veer off into almost anything, but radio and radio-related was the topic that had brought these folks together. And because everyone had found this show both good for sales over the years and good for picking up new information while renewing old ties, the idea that it might come to an end was not a happy thought. Let's hope that old and new friends meet again next year, maybe even "same time, same station." If you're interested in making this happen, contact John Terrey, P.O. Box 2, Carlisle, MA 01742, or JVT@oldtech.com.

(Dorothy Schecter, P.O. Box 2, Carlisle, MA 01741)

After retiring from teaching English and Drama at the secondary school level, Dorothy Schecter joined the A.R.C. staff in 1991. As Managing Editor, her concentration was on the editorial section of the magazine, which gave her the pleasure of working on perfecting the articles and of interacting with the many contributing writers over the years. Now that the magazine has moved on to new ownership, she will have more time for working at her lifelong avocation — all aspects of theatre production.

MEET REPORT

Kutztown Radio Show XXIII A View From the Trenches

CONTRIBUTED BY MIKE KOSTE

The spring Kutztown Radio Show XXIII, hosted by the Delaware Valley Historic Radio Club (DVHRC) was held on May 7 and 8, 2010, at Renningers Antiques and Farmer's Market in Kutztown, Pennsylvania. The two-day show was, as usual, a great success. When all was said and done, there was nothing left but a stack of Lawrence Welk albums, a lot of wind, a busted speaker, and some broken glass from Lewie Newhard's grandfather clock radio.

In the beginning, some 257 tables were in use. I'm not certain whether this was an event record, since I don't know if anybody ever bothered to count before. But the meat of the matter was that Renninger's two pavilions were brimming with a literal museum of everything antique radio. But unlike a museum, everything in this museum was "For Sale." You name it — it was there.

When I arrived early on Thursday to set up, it was clearly evident that this function, believe it or not, was continuing to grow in scope. The word earlier in the week had been that the demand for tables was so great that Renninger's crew had to build more of them to accommodate the throngs of last minute dealers. Knowing full well that the primary pavilion was reserved in advance, my first trip next door to Pavilion 2 revealed that radio folk could assume half of the area there commonly occupied by regular Saturday flea marketers.

By late Thursday afternoon, there were about 20 radio sellers who had come early to enjoy the

low-key opportunity to display their wares before the madness of Friday morning. Since the indoor market was closed, most of them had packed provisions for the evening, or headed into town for nourishment.

In their absence, Doug and the gang from Just Grillin' arrived to get the kitchen arranged. A cool evening, it was no surprise that they didn't wait for the customary Friday night "Radio Burn" to get a campfire going. These wonderful folks work hard keeping everyone fed during the course of the meet, and have become part of the customary friendly fabric of Kutztown, just like the vendors who attend regularly.

FRIDAY BEEHIVE ACTIVITY

The beehive of seller activity at dawn on Friday was as expected. And buyers showed up en masse as well. The advance team from the DVHRC had the club area ready to go the night before, and it didn't take long for a never ending stream of shoppers to show up to purchase tubes, capacitors, and DVHRC "bling," and to admire our exquisite Jackson Bell raffle radio.

Elsewhere, it would appear that many collectors were thinning their herd of large furniture-type pieces. Consoles ruled at Kutztown XXIII, ranging from fully restored to "project" pieces. There was also a marked increase in transistor radio inventory. And for the first time in memory, TV shoppers had their choice of five different Philco Predictas!

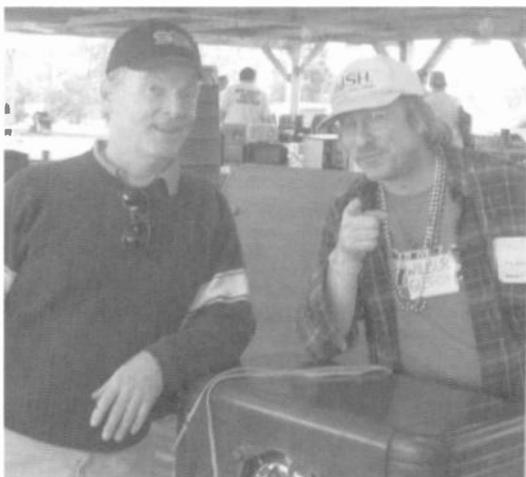

One would imagine that for a first time attendee, it was an overwhelming experience. So many cool radios! But, which one to choose? Perhaps, paired with a weak economy, none of these newbies parted with their money quickly.

My guess is they wanted to see everything before committing to a purchase. While foot traffic the first day appeared up from past meets, most sellers expressed "soft" initial sales.

But K-Town veterans know that the number of potential buyers goes hot and cold as the day progresses, and they are always willing to be flexible in their pricing. Day One peaked at about 3 P.M. A quick run-through revealed that over 90 percent of the tables were active, and even more late-comers had secured a sales area in the overflow pavilion. Traffic was up, but sales were down.

The traditional Friday night steak dinner was devoured and enjoyed by one and all. Many remained in the food court area to socialize and enjoy some adult refreshments while the pile for the Radio Burn started to take shape.

And what a glorious blaze it was. Supplementing the scrap harvested from

the tree line at the back of the property, thirteen sacrificial lambs were donated to the fuel stack.

While most of the radio cabinets were in various stages of disrepair and delamination, a couple were spared from the inferno and taken home to live again by some of our resident radio recyclers. A crowd of about sixty watched the silliness billow into the night, as others, the audiophiles in particular, remained at their tables to show off their rigs and listen to music. Overall, it made for a diverse and entertaining evening.

SATURDAY – THE SHOW GOES ON

After a good night's rest, Saturday morning found a fast moving cold front blow through the meet, causing a rather hard, albeit brief shower. Insignificant, really, when you consider the many old-timers who wear their survival of past hurricane conditions like a badge of honor. Foul weather aside, more vendors only able to attend for one day set up quickly, followed by a horde of new shoppers.

And shop, they did. A canvass of some sellers suggested that their Saturday take far exceeded Friday's. The seemingly unsellable items donated to the club's "Buy It Now" area were liquidated as quickly as the morning rain.

As far as I could see, there were only five unoccupied spaces — a far cry from previous shows where more reserved spaces remained unoccupied.

When the swap meet began winding down around noontime, many trekked indoors for the auction in the White Room. Keeping the electronic refuse outside has made a big difference for the club. There were probably fewer bidders, and fewer lots, but the quality of the items was far better than it was two or three years ago. And even with the later start time of 1 P.M., it took

considerably less time to set up, execute, and check out than in the past.

By 2 P.M. it was time to pack up and head for home, tired, but confident that the spring 2010 Kutztown was time well spent and a joy for all who made the journey from across the area, from out of state, and from faraway lands like Canada and France.

Mike Koste is president of the (DVHRC) Delaware Valley Historic Radio Club. He is also known as "Gobs of Knobs", a leading source of vintage radio knobs for collectors. Mike can be reached at gokmike@gmail.com

The Delaware Valley Historic Radio Club (DVHRC) publishes "The Oscillator" monthly, and holds monthly meetings with swap meets, as well as quarterly tailgate swaps. It also holds the spring and fall Kutztown radio shows at Rennings Antique and Farmer's Market. Dues are \$15. DVHRC, P.O. Box 5053, New Britain, PA 18901. www.dvhrc.org.

AUCTION REPORT

Diefenderfer Auction, Leesport, Pennsylvania September 27, 2010

BY RAY CHASE

This early autumn weekday auction was held to dispose of the collection of Carl Ratner of Reinholds, Pennsylvania. The collection consisted of clocks (mostly electric), radios, telephones (mostly dial phones), test equipment, tubes, parts, records and miscellaneous phonograph collectibles. As such it was an interesting afternoon and gave me a chance to get an insight on some other aspects of collecting.

The auction was held indoors at a Farmer's Market complex. The market was not active this Monday and there was ample room with good lighting to view the merchandise.

The event started at 1:30 p.m. with a "walk-around" auction of five or six tables of records, mostly 78s. I did not make any attempt to list the prices, which seemed high to me, but there was good activity nonetheless. At 1:55 p.m., while records were still being sold in the back, the main auctioneer started selling the clocks. Again, I made no attempt to record these sales. Finally, at 3:15 p.m. the sale of radio goods started with flats of parts.

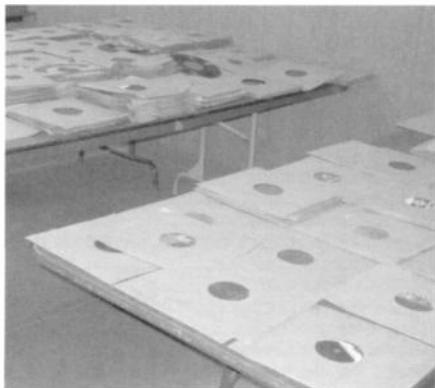

The auctioneer had attempted to sort out many parts by grouping similar-looking things together; therefore, there was not much rhyme or reason to the assortment. As a result, 21 flats of parts sold for a total of \$43, a good deal for restocking one's workbench. Most of the radios were average or below-average electric table sets, quite a few were missing knobs, and I think there was only one homebrew battery radio, but there were also a couple of high flyers.

In the latter category, first up was an original

Table of electric clocks

Sparton Bluebird in fair to good condition that sold for \$1,300. Surprisingly there were two spare mirror fronts for it, one with blue trim and one with black trim. They were sold separately for \$110 and \$10, respectively. Next auctioned were two Globe World radios, one white and one black. The white one, in good condition, sold for \$1,000; the black one, which had damage, sold for \$300. Next there was a

Tables of records and telephones

Sparton Bluebird that sold for \$1,300. Two spare mirror fronts for it, sold separately for \$110 and \$10. White globe radio sold for \$1,000. Black globe radio sold for \$300.

Above and below: Collections of old Victrola needle tins and "Nipper" dogs

very interesting wood case, trapezoid-shaped white table set with a blue mirror glass front with an aquarium motif. I could not identify a make or model, but it was a factory set and sold for \$950 in fair to good condition. There were a couple of catalins, but most had damage or parts missing. A very nice black laquered small RCA 6K10 console brought only \$105, which was a very good buy in my opinion.

At 4:30 p.m. the auction shifted to the telephones, and I was surprised at the interest in dial phones. Many were purchased by one buyer for what I thought were high prices. So the lesson is hang onto those old rotary phones, they are going up in value. (By the way, how many

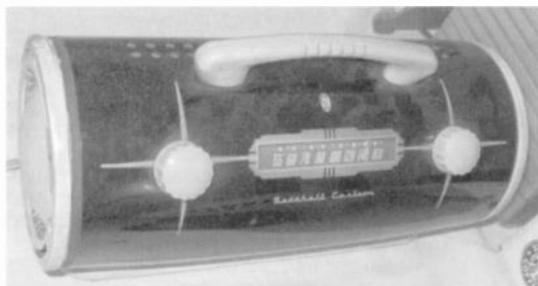

people under a "certain age" really know how to "dial" a telephone number?)

After the phones were disposed of, the radio and phonograph sales resumed. Of particular note was the extensive collection of over 50 old Victrola needle tins. These were sold "choice" and brought a total of nearly \$600. The test equipment and hi-fi items finished up the auction, and there seemed to be some good bargains here, as well.

All in all, it was an interesting event and one that presented an opportunity to gather some new acquisitions for the collector or repair shop. The auction ended at 5:50 p.m., and the total realized for only the radio items was about \$7,300. There was a buyer's premium of 10% (13% if paying by credit card) that is not included in the following listed prices. There was no sales tax at this sale.

DETAIL LISTING

Accutrac turntable w/remote.....	40
Akai GX-635D/DB reel to reel tape deck, good	140-
Akai GXC-5700 & 5700 II stereo cassette decks (2) w/paper.....	32
Allied SX-190 communications rec., VG	55
Arvin modern AM/FM hi-fi radio	5
Arvin modern AM/FM hi-fi radio	5
Arvin wood table set w/handle, 3 knobs, good	27.50
B&K frequency counter	22.50
B&K multimeter	2
Bozak speakers, large, (2)	5
Continental 1600 white clock/radio, rounded end, good	22.50
Continental clock/radio	6
Cornel Dubilier wood case capacitor analyzer w/paper, has eye tube.....	15
Crosley American/Overseas wood table set, 4 knobs but they are missing, good.....	12

(Ray Chase, 1350 Marlborough Ave., Plainfield, NJ 07060; Diefenderfer Auction Co, LLC Laureldale, PA.)

Ray Chase has been a radio enthusiast and a collector of many types of radios for years. Currently, he specializes in World War II electronics equipment, as well as early battery superheterodynes. He also has an extensive collection of radio documentation and ephemera.

Note: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists and if we are notified, corrections will be reported.

RESTORATION REPORT

Examining a Rare Hallicrafters S-2

BY JERRY WIELAND

Jerry Wieland examines and tests a Hallicrafters S-2 communications receiver which is a version of Hallicrafters' first communications receiver, the S-1. Only a few examples of the S-2 are known to exist.

After I read Ed Curran's article, "A 'Once in a Lifetime Find'" (January 2011), I thought about all the radios I had worked on through the years. None would be considered rare. However, within a month I had the opportunity to examine and operate one of the earliest and rarest Hallicrafters receivers.

Bill Ross, W9WR, a fellow member of the Antique Radio Club of Illinois, asked if I would check out his Hallicrafters Sky-Rider [seems to appear most often this way] Model S-2 that had been restored in 1994. He displayed it at various meets over the years, but has never turned it on. While Bill knew of about eight Sky-Rider Model S-1s, this model is so rare that, when he acquired it, he knew of no other original and complete Model S-2. Since then, another has surfaced.

I couldn't pass up this once-in-a-lifetime opportunity of my own. When Bill delivered the radio, he also brought Chuck Dachis' book, *Radios by Hallicrafters*,¹ from which I learned that the S-2 is a modified version of the S-1, Hallicrafters first communications receiver. Both models were introduced in 1934, but the S-2 (also referred to as a Sky-Rider S-1 "Special") had the added features of bandspread and a Send/Receive switch. It sold for \$49.95. The radio we examine here is the same S-2 pictured in Chuck's book.

THE CABINET AND CONTROLS

Figure 1 is a front panel view. The toggle switch on the left side next to the dial is the Send/Receive switch. The horizontal thumb wheel below the dial operates the coarse tuning. The clear celluloid tuning indicator has a series of holes for inserting a pencil point to mark station locations on the paper dial. The dial is divided into four bands: 1.5–3.0, 3.0–5.7, 5.7–11.5, and 11.5–22.0 MC. The top half of the dial is calibrated in megacycles (MC) and the bottom half in meters.

The four-position band switch is to the right of the tuning thumb wheel. The long pointed knob in the center of the panel is the bandspread control with dial markings from 0 to 100. The main dial is

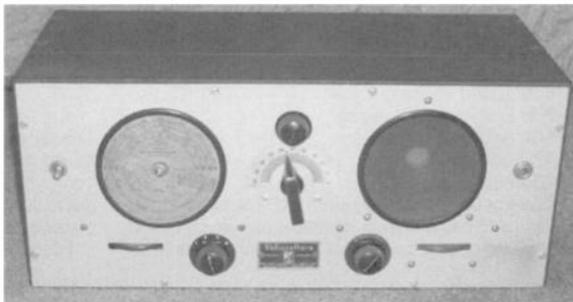

Figure 1

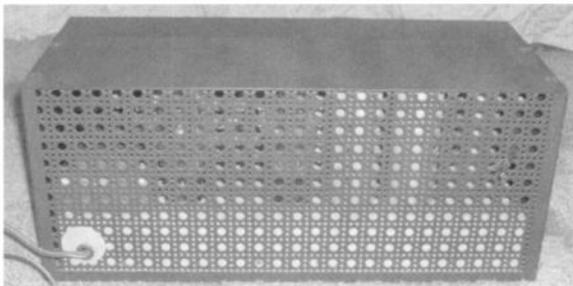

Figure 2

closest to being calibrated when the bandspread control is fully clockwise. Because of a gear reduction mechanism on the bandspread control, the knob rotates significantly beyond the dial end points. The knob directly above the bandspread is an antenna trimmer. The knob under and to the left of the speaker is the volume control and power switch. To the right of the volume control is another horizontal thumb wheel, which is the regeneration control. A headphone jack is to the upper right of the speaker.

None of the controls is labeled, although the band switch is numbered 1 through 4. Personally, I find it odd that the lowest frequency band is labeled 4 and the highest 1. Another oddity is the absence of grooves on the thumb wheel knobs, which are smooth and therefore more difficult to operate. The front panel is silver and the remainder of the cabinet is black, the original color scheme according to a 1934 receiver review article. Figure 2 is a view of the back and top of the cabinet, which is all metal. As you can see, the back is well ventilated. Three wires snake through one of the holes on the upper right side of Figure 2. One is ground and two are for a doublet antenna. Originally they were attached

to a free-floating, three-terminal Ant-Gnd strip (not shown), which was temporarily unsoldered to separate the cabinet from the chassis.

Figure 3 shows an area on the cabinet top for tube access. This panel is secured by four screws. The only way to remove the chassis is through the cabinet front. The front panel is mounted to the chassis and secured to the cabinet by eight screws.

THE CIRCUIT

The S-2 is a five-tube TRF receiver with regeneration to increase sensitivity. Figure 4 is a top view of the chassis and front panel removed from the cabinet; Figure 5 is a bottom view of the chassis. The tubes and their functions are as follows:

- 6D6 Tuned RF amp
- 6D6 Detector with regen
- 6C6 Audio pre-amp
- 4Z2 Audio driver
- 80 Rectifier

The first three tubes are shielded. The output tube drives either a five-inch speaker or headphones. There is no dial light and there are no internal adjust-

ments for alignment. Besides using the speaker field coil for supply filtering, an additional choke is also used, which is visible in Figure 5 directly under the power transformer at the top left. This choke appears to have been replaced (as were all the paper capacitors) with Mylar types. Both electrolytic power supply filter capacitors were also replaced with modern types. However, the old cans were left on the chassis, although disconnected. All these changes were probably done during the 1994 restoration. I found a paper label on the rear chassis wall indicating that Chuck had performed the 1994 cosmetic and electrical restoration in Austin, Texas. He probably took the photo for his book at this time.

THE TEST

A visual inspection did not uncover any issues. The tubes and power transformer tested OK. After lubing the moving parts and inserting the tubes, I connected a short wire antenna to one end of the doublet and connected the other doublet wire to chassis. I did not ground the chassis.

I decided to start with Band 4, which includes the top of the standard broadcast band. While slowly bringing up power and monitoring B+, I heard normal channel noise from the speaker. I found a few broadcast stations between 1.5 and 1.7 MHz. Peaking the antenna trimmer and adjusting the volume and regen controls resulted in good quality audio with decent volume.

As I ventured higher in frequency, the regen and antenna trimmer interacted more. At night, I pulled in many international stations and hams with my meager antenna. I also found I could unscramble single sideband transmissions by adjusting the regen control past the oscillation point while using the bandspread to tune to either side of the signal. Sometimes I would also have to adjust the antenna trimmer. Tuning conventional double sideband signals was much easier when I adjusted the antenna trimmer first and then adjusting the regen control to a point just before oscillation.

Chuck's restoration withstood the test of time. And now I have a once-in-a-lifetime radio memory.

RESTORATION REPORT

The Crosley Model 2-C-1 – Minor Mysteries Surround A True Depression-Era Radio

BY BOB SANDS

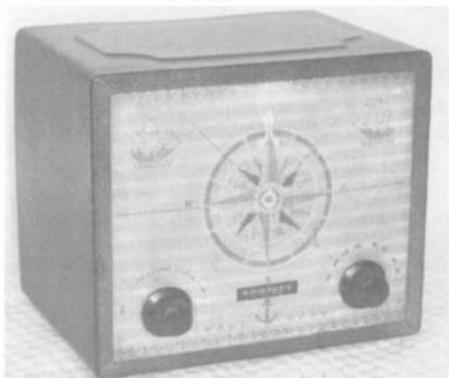

Figure 1. The "Sampler" version of the Crosley Model 2-C-1.

Figure 2. The "Artist's" version of the Crosley Model 2-C-1.

A casual phone conversation about radios often can become so engrossing that it provides enough material for a full-blown radio article. Such was the case when A.R.C. writer Bob Sands called another frequent contributor, Dave Crocker, about a unique Crosley radio he has. With editorial assistance from Dave, and photos and notes from Bob, this is the result. (Editor)

About the time Powel Crosley was awaiting delivery of the famous 500-kW WLW transmitter in Cincinnati, Ohio, his engineers were busy designing a simple cost-effective radio to meet the demands of a market hindered by the Great Depression. It was envisioned to be the "Volkswagen" of receivers of the time.

ENTER THE CROSLY MODEL 2-C-1 OF 1935

Electrically, the circuit is ingenious because it uses two dual-purpose tubes and therefore achieves four-tube performance combined with its tuned radio frequency circuit. Savings are realized in terms of space, metal chassis layout, and sockets. With the front panel of the set being the actual speaker diaphragm (or cone), the usual front panel was saved as well as a speaker frame or basket. No bezel or separate dial is needed since a pointer knob is used with the dial settings printed on the front panel.

ALL IN A VERY "VALUE-ENGINEERED" DESIGN (A CROSLY TRADITION)

Two versions of the 2-C-1's front panel were

available at the time: the "Ship's Design" and the "Artist's Design" (see Figures 1 and 2). As far as I know, examples of the Artist's Design may be the only ones to have survived as my research has located no others. (If any of our readers out there have any input on this, please write to A.R.C.)

I personally believe the artists depicted on the front panel were likely those featured on radio station WLW programming. For example, the blackface entertainers in the top left might be Amos 'n' Andy, or Hink & Dink (E. Hinkle and G. Ross), who performed "Song & Patter" on WLW and were so popular they toured theaters around Cincinnati in the late 1920s and 30s. In the upper right, we appear to have the DeVore sisters, Ruth, Billie, and Marge, who were performers in the early 1930s, in the center, that fellow with the violin could be guitarist Chet Atkins, who started on WLW as a fiddle player. The couple in the lower left corner might be Nelson Eddy and Jeanette MacDonald.

THE SAMPLER

The most common version (though still very hard to find! was known as "The Sampler." But one wonders, who would have named it that? Crosley's service notes state that the front is a Ship's Design (note the cross-stitch pattern), but by the time the information was published in Rider, the 2-C-1 was referred to as the Sampler. Were there legalities involving the use of these pictures? Why not choose a name with a nautical theme? Interesting questions like these puzzle collectors.

Figure 3. The simple construction of the Model 2-C-1's two-tube chassis with speaker removed.

Six collectors that I know of (Greg Farmer, Jim Watson, Geoff Shearer, John Miller, Bob White, and myself) possess the Sampler model, but I'm sure there are a few more 2-C-1's hiding in collections, closets, and cellars. Geoff found his set as a cabinet and chassis only, with a completely destroyed front panel, no back or identifying labels or numbers. (See The Crosley 2C1 and A.R.C.'s Helping Hand in the September 2004 A.R.C. issue.)

The chassis is extraordinarily simple (see Figure 3). It uses just two tubes, a type 12A7 and a type 6F7, situated on either side of the electrolytic condenser located at the rear of the chassis. The permanent magnetic speaker driver is shown at the top right of the Figure. Its vibrating needle (not shown) goes forward to the paper speaker. Figure 4 shows this needle attached to the back of the speaker diaphragm. The Hydrolene glue likely used to affix the front speaker panel to the square metal cabinet is a water-soluble substance patented by Sunoco in 1921. It can be mixed in many viscosities from liquid to solid and is still used in the medical industry.

Figure 4. The speaker reproducer shown attached to the paper speaker back, probably affixed with Hydrolene glue.

MORE QUESTIONS REMAIN

To the best of my knowledge, no form of advertising or dealer information has been located. The *Crosley Broadcasters*, the dealer monthly bulletin, shows nothing about this set except the circuit diagram that appeared in the February 1, 1935, issue (see Figure 5) and This same circuit diagram also appeared in the December 1934 volume of *Rider*, page 6-1. We've checked all the issues from 1933 to 1935 - and no introduction. Since there was never a model or chassis number affixed to the 2-C-1, might it have been a promotional item only? Was it an extremely limited production run? Or - my personal suspicion - was production ceased because of how difficult it is to remove the chassis (it must be unsoldered from the speaker diaphragm the motor. I'm guessing that many owners and service repairmen didn't want to perform that task, even if they tried the speaker was likely ruined when the chassis was pulled.

(Bob Sands, 40 Dow Court, Fairfield, Ohio 45014)

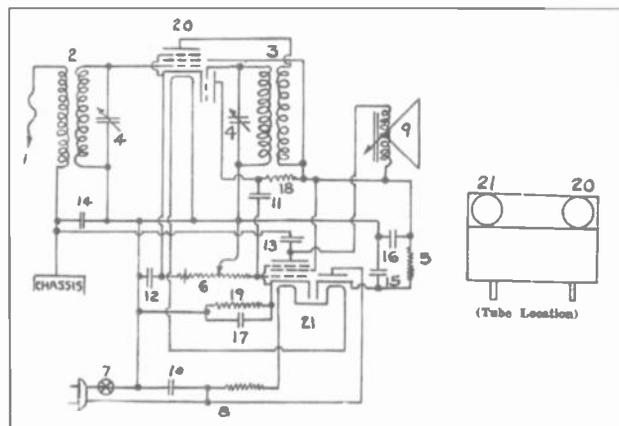

Figure 5. The 2-C-1 schematic that appeared in the February issue of *The Crosley Broadcaster*.

(Bob Sands is president of CARS (Cincinnati Antique Radio Society) and secretary of the Gray's History of Wireless Museum. Bob graduated from DeVry and attended Northwestern University. He worked at Allied Radio in the field industrial sales department for 17 years. Subsequently, he worked at Pioneer-Standard Electronics for 17 years. Now retired, he collects unusual radios from 1920-1955).

DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Over the past two months I've asked many of our subscribers about the benefits that come with a subscription to Antique Radio Classified.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits.

Let's take a look at them:

ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are **SEARCHABLE!** If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

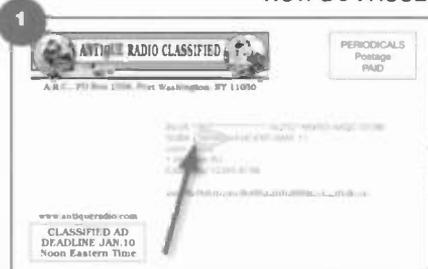

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

FREE MONTHLY CLASSIFIED AD

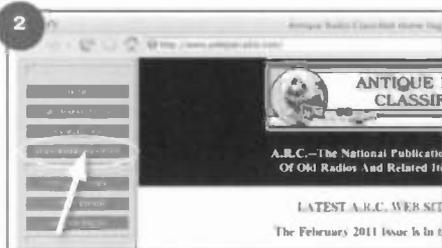

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of Antique Radio Classified are the articles containing information that will help you in increasing your knowledge of our hobby.

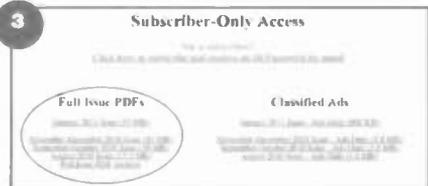

HOW DO I ACCESS THESE BENEFITS?

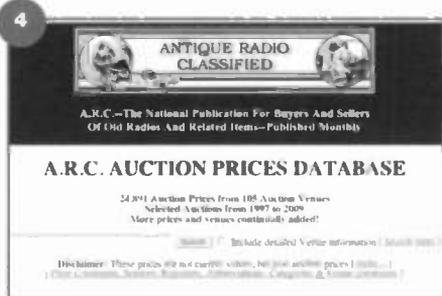

Your print subscriber user ID and password are on your mailing label. Online subscribers are emailed their user ID and password. Your user ID is the number after "SUB#" on your mailing label. Your password is the digits in brackets [xxxx] after your "SUB#".

Go to A.R.C.'s home page www.antiqueradio.com and click on Subscriber Only Page.

On the Subscriber-Only Access page you can click on the Full Issue you would like to view or click on the Classified Ads section from that issue.

Or you can click on the Auction Prices Data Base. Just enter the item that you are researching.

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

ZENITH MODEL 6G-801 – Manufactured by the Zenith Radio Corporation of Chicago, this all-plastic portable is a 6-tube broadcast band receiver with two front doors that open to show its panel. The top handle flexes when lifted up, and an antenna pulls up in the back for reception. The set was marketed in 1949. (Clark Trissell – Lincoln, NE)

SONORA MODEL RCU208 – This 6-tube radio was manufactured in 1946 by the Sonora Radio and Television Corp. of Chicago. It is an AC/DC circuit and tunes the broadcast band only. (Clark Trissell – Lincoln, NE)

HYPOWR SUPERHET – This 8-tube battery superhet from the mid-1920s is identified as HyPower Super on the panel, but inside, it uses all Victoreen coils and IF transformers. The tubes are Type 201A. (Ray Chase – Plainfield, NJ)

PHOTO REVIEW

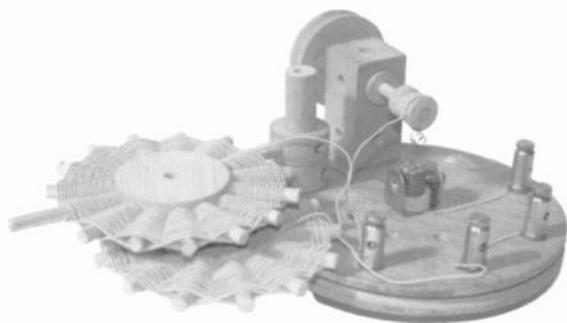

GE MODEL BX – Housed in a grey-brown case, this compact table set is an AC/DC, 4-tube receiver. It was manufactured by the General Electric Co. of Bridgeport, Conn. in 1932. (*Dave Crocker – Mashpee, MA*)

PHILCO MODEL 50-524 – This 5-tube receiver of 1950 was manufactured by the Philco Corp. of Philadelphia. It is one of the many “Transitone” radios which Philco offered in the 1950s. It uses one each of the following tubes types: 7A8, 12BA6, 14B6, 50L6, and 35Z5. It tuned the broadcast band only. (*Clark Thissell – Lincoln, NE*)

MATADOR CRYSTAL SET KIT NO. 152 – This crystal set, which I constructed with old 1924 plans and original wooden parts, was designed by Johann Korbuly of Vienna, the founder of Matador. He was famous for his wooden radio kits for children. (*Erwin Macho – Vienna, Austria*)

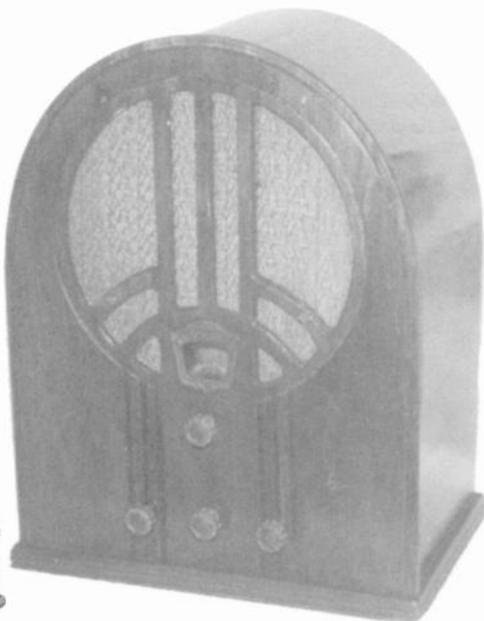

RADIODYNE MODEL WC10 – This 5-tube receiver was manufactured by the Western Coil and Electrical Co. of Racine, Wisconsin. In 1923, it sold for \$150, less tubes, batteries, and speaker. (*Wally Worth – Wollaston, MA*)

PHOTO REVIEW

COLOMBIA MODEL 20 - PHILCO MODEL 60B - Manufactured by the Philco Corp. of Philadelphia in 1934, this 5-tube cathedral-tuned both the broadcast and the shortwave bands. It was one of the many cathedral-styled receivers of the 1930s. (Clark Thissell - Lincoln, NE)

FREED-EISEMANN NR-102 - This 5-tube Neutrodyne was manufactured by the Freed-Eisemann Radio Corp. of Brooklyn, New York. It is a rarely seen 1925 radio, as it is one of only 70 produced. All five tubes stick out of the front panel in a vertical configuration. There is a wooden cover on the top that lifts and covers the binding posts which are factory-labeled on a card. (Dave Crocker - Mashpee, MA)

HORNYPHON "HORNYETTA" MODEL W147U - This 1957 Austrian radio was very popular because of its plastic cabinet and the fact that it worked with AC/DC and received MW. (Erwin Macho - Vienna, Austria)

PHOTO REVIEW

CLARION MODEL 321 – This 5-tube tombstone radio was manufactured in 1933 by the Warwick Manufacturing Corp. of Chicago. It tunes the broadcast band only. (Clark Trissell – Lincoln, NE)

EMERSON MODEL 400 – Manufactured by the Emerson Radio & Phonograph Company of New York, this 1940 table radio is of yellow Catalin with red grille bars and black knobs. Called the "Aristocrat," it has a 5-tube, AC/DC chassis. The color is now reddish brown due to its exposure to UV light, but it will polish down to a bright yellow. (Robert Kitchel – Danville, VT)

KADETTE MODEL 41 – Manufactured by the International Radio Corp. of Ann Arbor, Michigan, in 1935, this tiny set was called 'The Jewel.' It has a walnut-colored Bakelite cabinet with a cream-colored grille. Its 3-tube AC/DC chassis tunes the broadcast band only. (Robert Kitchel – Danville, VT)

CLASSIFIED ADVERTISEMENTS

FOR SALE: Zenith AM-FM clock radio 7 tube light green \$30; Zenith AM-FM 7 tube medium green \$30; RCA AM 5 tube white (low volume) \$10; RCA AM battery set brown 4 tube inoperative \$10; Motorola model TC8BW wood AM-FM clock radio \$30. OLD TECH BOOKS & THINGS

What am I doing after A.R.C.? I now have time to sort through the dozens (probably 100s) of boxes of duplicate items in my collection... books, catalogs, manuals, pamphlets, horn speakers, radios... and offer them via my long-dormant business: Old Tech - Books & Things. Old Tech handles more than just radio-related items... included are vintage television, wireless, skiing, computers, musical synthesizers, and more. For details on what's for sale, visit:

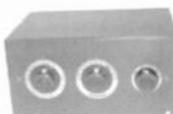

www.oldtech.com

or contact:

John Terrey
