Radiofest 2011

August 4-6

Thursday - Friday - Saturday

Willowbrook Holiday Inn
7800 South Kingery Hwy (Rte 83 & I-55)
Willowbrook, IL 60527 (1-630-325-6400)

CELEBRATING 100 YEARS OF AMATEUR RADIO

FROM SPARK TO SOLID STATE

THURSDAY

- Setup Day (**NO SALES**)
- Main Auction 6:30pm in the Ballroom using big screen video. Followed By A Free Pizza Party!! (ARCI Members)
- Pre-Registration Packets Available After 5pm

FRIDAY

- 7:00 Radiofest Opens
- Registration open
- Flea Market open All Day
- Noon - Ladies Luncheon
- Educational Programs
- Ham Radio Ops All Day
- Hospitality Tent All Day
- Hotel Food Service

AMATEUR RADIO DISPLAY

- Spark Era: Keys to QSLs
- Early ARRL items, photos
- Pre WWII Phone & CW rigs
- Postwar military, commercial
- AM to SSB and Solid State

EQUIPMENT CONTEST

- 1 Radios Pre 1930
- 2 Radios Pre WWII (1945)
- 3 Radios Post WWII (1946)
- 4 Art Deco Radios
- 5 Catlin, Rare, Plastic Radios
- 6 Speakers
- 7 Transistor, novelty radios
- 8 Vacuum Tube Audio
- 9 Radios Made In Illinois

Amateur radio display in the atrium. Not judged.

LADIES LUNCHEON
Noon

FRIDAY NIGHT BANQUET

Dinner
Recognition Awards
Contest Awards

ENTERTAINMENT

THE WISEGUYS TRIO

SATURDAY

- Free Sellers' Raffle 9:15am
- Donation Auction 9:30am
- Ham Radio License VE Tests
- Flea Market Until Noon

FRIDAY PROGRAMS

Vacuum Tube Audio Panel - *Karl Johnson, Pete Nauseda and Terry Shaver*

Vacuum Tube Numbering Systems in the US and Europe - *Bob Dobush*

The Ham Radio Forum (Amateur radio history and transistor development) - *Bill Ross (W9WR)*

The Process of Radio Broadcasting (From microphone to antenna) - *Al Germond, Broadcaster*

Seeing Sound (A presentation and demonstration of oscilloscopes) - *Bret Menassa*

Chicago Experimental Television (Early TV at WBKB) - *Steve Jajkowski Video Veteran*

IMPORTANT INFORMATION

ARCI Registration Form and Planner: <http://www.antique-radios.org>.

Hotel Reservations: Front Desk 1-630-325-6400. Ask for ARCI room rate of \$95.00 per night.

Seller Fees: First space \$45.00 pre-registered, \$50 registered on site, \$25.00 additional space. Saturday Only \$30.00. Banquet tickets \$25.00 per person, \$45 per couple. **8' TABLE RENTALS** (Pre-registration only) \$15 each. No charge for general admission. Membership required for program attendance

THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the QST-VIEW series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. QST Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and QST-VIEW has on-line instructional help for operating the QST-VIEW browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter

S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. Thousands sold at \$ 199. **SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts !**

We now have a small mountain of vacuum tubes at very competitive prices - Thousands sold since our first posting of these tubes. All types including receiving and transmitting types. Tube price listings on the web:
<http://www.radioera.com/tubes.asp>

SCHEMATIC DIAGRAM & MANUAL SERVICE

Over a Million schematics & 100,000 manuals and growing! Schematics and most manuals may be emailed instantly via the internet

POSTMASTER: Send address changes to

Antique Radio Classified, PO Box 1558,

Port Washington, NY 11050.

Printed in U.S.A.

PURPOSE. Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

Publisher/Editor: Jon Kummer, **Publisher/Editor Emeritus:** John Terrey, **Founding Publisher/Editor:** Gary B. Schneider, **Contributing Editor:** John Terrey, **Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Norman Braithwaite, Ray Chase, Dave Crocker, Alan Douglas, Richard Foster, Andrew Hayden, Jim Kreuzer, Phil MacArthur, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White.

CONTACTING ANTIQUE RADIO CLASSIFIED

All correspondence should be sent to:

A.R.C., PO Box 1558, Port Washington, NY 11050

Telephone: (866) 371-0512; Fax: (516) 883-1077

Email: ARC@antiqueradio.com

Web: www.antiqueradio.com

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However A.R.C. does solicit letters of interest from its readers and publishes them as space permits.

WEB. Antique Radio Classified issues are published on the web as PDF files for subscribers. Web-only subscriptions are available. One issue is available for viewing by all on the web as a sample.

ADVERTISING. Display and Classified advertising rates and artwork specifications are available on the web site.

PAYMENT. Please include full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid. Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express, Discover or PayPal. Make check out to "A.R.C." Subscriptions will be prorated to amount sent if amount is incorrect. *For your protection, no credit cards by e-mail; use our secure website instead.*

CHANGE OF ADDRESS. Please notify us in advance of a change of address. Send your new address, your old address, your SUB# and the effective date of the change.

PUBLISHING RIGHTS. Unless other arrangements are made: (1) All received materials (ads, articles, letters, correspondence, email, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). Mailing dates change each month.

ETHICS. No person involved in the production of A.R.C. is to act on any information in the magazine until the first delivery day after local copies are mailed.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

NOTICE. Subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

SUBSCRIBERS: All paid subscribers receive a FREE classified ad of up to 50 words in each issue.

Editor's Comments

Are you a member of a radio club?

Whether you belong to a club or not, a radio club doesn't have to be a huge organization with a Board of Directors, someone who keeps minutes of monthly meetings, large financial budgets, swap meets, a public relations officer, etc. It can simply be a group of friends who get together once in a while to boast (I mean share) of their latest find or give troubleshooting advice.

When I speak on the phone to A.R.C. readers I'm often asked how large is the local radio club in the New York/Long Island area. "It must be a large organization due the high population concentration." My local club has no formal organization, no officers, no dues, and we meet on the first Sunday of the month (all year long) in the parking lot of a railroad station. About 30 people show up to our monthly swap meets. Across the river in New Jersey, they have a very well-organized club with a museum, monthly meetings, work shops, nice web site, and about 200 members. Some people I speak with get together with fellow collectors in their homes.

If there is no antique radio club in your area you might consider joining the local ham club. Many hams share similar interests and the hamfests often have vintage radios, TVs, parts, books, and nice items.

One of the articles this month is about the California Historical Radio Society (CHRS) and how they organized their club, have use of a building,

hold workshops, meetings, and swap meets.

Also in this issue Gilbert Hedge discusses the 1924 Zenith Super Portable Radio - a self-contained radio in a traveling case.

Another article looks at the Atwater Kent model 60 in a Kiel table and its 82 year journey.

Ray Chase takes us on the road again to an Estes Auction with multiple pages of auction pricing results.

As usual we have the expanded 4 page Photo Review section. Hey, send in your latest find or something that you've been hiding for years.

Finally, we would like to start a monthly "Letters To The Editor" column. We need your comments.

Remember, "Radio" is our middle name! Until next month.

Jon Kummer

On The Cover

This month's cover features a piece of RCA advertising art from the 1920s - 1930s. Notice both the RCA and Victor logos are separate. It was the beginning of their merger. Let me know if you know the date it was first used.

CLASSIFIED AD RATES PER MONTH

Deadline NOON ET - 10th of the month!

Subscribers (First AD):

First 50 words: FREE!

10¢ per word for words over 50

Subscribers (Ads after first ad):

10¢ per word for all words

Non-Subscribers:

30¢ per word

Please do not forget to send in the extra 10¢ per word when your classified ad runs over the free 50 words; your payment will be appreciated, and it will help keep A.R.C. healthy.

PHOTO & DRAWING DETAILS

Deadline: 1st of the month for all ads with drawings and photos!

Drawings and photos are encouraged as the response to your ad is much larger and the reader knows better what you want or are selling. Send in your drawing or photograph and A.R.C. will reduce or enlarge it as needed.

Photo and Drawing Rates per Month

\$10.00 per month for each photo or drawing. (If ad is cancelled, this amount cannot always be refunded.)

Changes and Cancellations

Please check your ads carefully before sending them in. Once ads are received, it is not always possible to refund the amount sent, pull the ad, or make changes

IMPORTANT - COUNTING WORDS - IMPORTANT

The standard headings: Wanted, For Sale, etc., count as one word each time used in an ad. Name, address and (one) telephone number, count as 6 words regardless of length. Ham call letters and business name can be included in the 6 words and do not count extra. Full name (or company name) and address are required in all classified ads. Each additional word, abbreviation, model number or number group, extra telephone numbers, fax, email, etc. count as one word each. Hyphenated words count as two words.

RESTORATION REPORT

The Problem with the 1924 Zenith Super Portable Radio

BY GILBERT M. HEDGE, HVRA HISTORIAN

Zenith introduced the Super Portable (Companion) radio in early 1924. Selling for \$224, it was entirely self-contained in a traveling case, described as "smaller than the average suitcase," and included tubes, batteries, horn speaker, and built-in antenna. The controls were located outside so that the set could be played in a closed or open configuration, making it truly portable.

Zenith marketed the Super Portable radio as allowing the user to take it on camping trips, to the beach or enjoy it in the home, and the company's advertising has always maintained that the 1924 Super Portable radio was the "world's first portable radio." There was, however, a problem with this radio that resulted in fairly low production numbers.

There's some confusion as to exactly how many sets were produced, but evidently most were either returned to the manufacturer by the purchaser or were recalled by Zenith. One source states that 1,000 radios were produced, of which 600 were returned. Another says that 6,000 were produced and all went back at least twice. There's even a folklore story that Zenith President Eugene McDonald publicized the destruction of the returned radios by burning them in a huge bonfire. Judging from these reports—and the fact that there are not very many still in existence—the problem with the Super Portable was a very serious one.

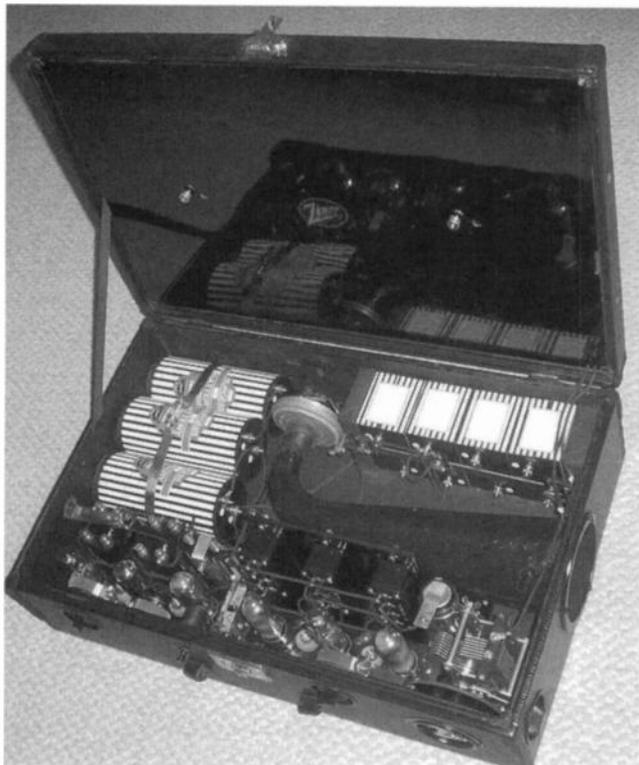

To my knowledge, there's no information available that indicates what the problem was. Did it not play well? Did the batteries run down quickly?

Did it just quit playing? What, exactly, was the problem?

I was fortunate enough to obtain a 1924 Zenith Super Portable radio in good condition. Moreover, it was complete—it even had original Zenith UV-99 tubes—so I decided to restore it, to the point of re-producing the A, B, and C batteries. The only serious problem I found during restoration involved the first and second ACME: two RF transformers were open. There was a note inside the first transformer that stated "Repaired both #2 coils 3-28-1940."

I used substitute transformers, but they didn't work very well. I purchased five used Acme transformers, but they were all open. The only option left to me was to rewind them using 30-gauge lacquer coated wire as a substitute for the original 40-gauge cloth-covered wire. All other parts in the radio remain original, except for the D battery, which required an adapter since the original had a negative case.

With that problem solved the radio stated working. I

Restored 1924 Zenith Super Portable radio.

TEST ACTIVITY LOG TABLE

19	3.49	2.74	70.90	67.30	2:35 pm	8:00 pm	4.6	83.7

theorized that the batteries might have been the original problem because of a statement in an article I came across about the Super Portable, which said that the batteries "only lasted a few minutes." I decided to perform some tests to see if I could determine if they were indeed the problem, and also to see how long they would last for me now.

TEST METHOD AND RESULTS

My test results are presented in the accompanying Test Activity Log table. The tests were conducted by recording the A voltage, the B voltage and the start time. The radio was then turned on and frequently monitored, and I would occasionally change stations. When I turned off the radio the end time was recorded along with the A voltage and the B voltage again. This was continued until the batteries were exhausted.

I used the 1930 Trav-Ler Model D Portable radio as a baseline for how long the A batteries should last (Trav-Ler suggests that A batteries should last 75 hours).

The Zenith portable actually performed better than the Trav-Ler, playing for over 80 hours on the same set of batteries. The Zenith outlasted the Trav-Ler because the Zenith had 6 - 99 tubes and the Trav-Ler only had 5 - 99 tubes, and because it

was also six years younger. Was the Zenith Super Portable radio ahead of its time?

No adjustments were made for using the D cells, 9 volt, and AAA batteries in the re-produced A, B, and C batteries. The test data confirms that battery consumption of the Zenith Super Portable radio was not a problem.

The performance of the Super Portable radio over the test period was very satisfactory. The volume (horn speaker) was always acceptable and could be heard across the room. The tuning required a little patience as the single knob control is a little misleading because rheostat knobs greatly affect the volume of the station being tuned: If the rheostats are turned too low the station cannot be heard, but if they are turned too high a hissing noise is heard (feedback). With a little tinkering, however, many stations, strong and weak, could be heard.

The antenna is located in the lid of the case and most of the tests were performed with the case in the open position; however, some were performed in the closed position. The radio seemed to perform slightly better in the open position.

The radio was also tested with head phones that resulted in excellent performance, as expected. During the testing there were never any problems or performance issues that would suggest that the

radio should be returned to the manufacturer.

After the restoration, testing, and operation of this particular radio for many hours, I could only identify one catastrophic problem that would have caused this device to be returned to the manufacturer. That problem was the failure of the Acme transformers. I now find myself speculating as to what was wrong with these transformers; was there a problem in design, materials (wire, solder, flux), workmanship?

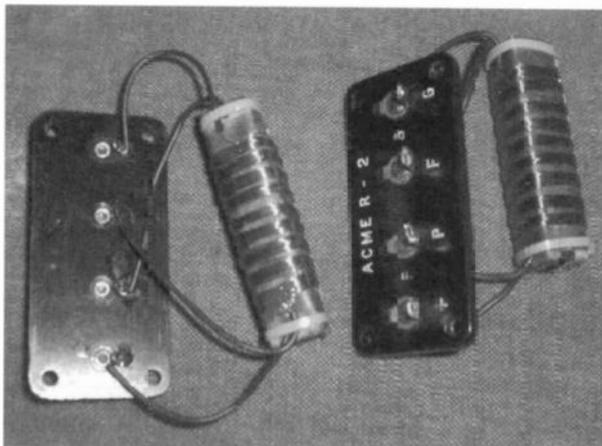

Since only one radio was tested, it isn't reasonable to attribute all those returns to the Acme transformers. It might prove enlightening if other Zenith Super Portable radio owners checked the Acme transformers, or even performed similar testing.

CONCLUSION

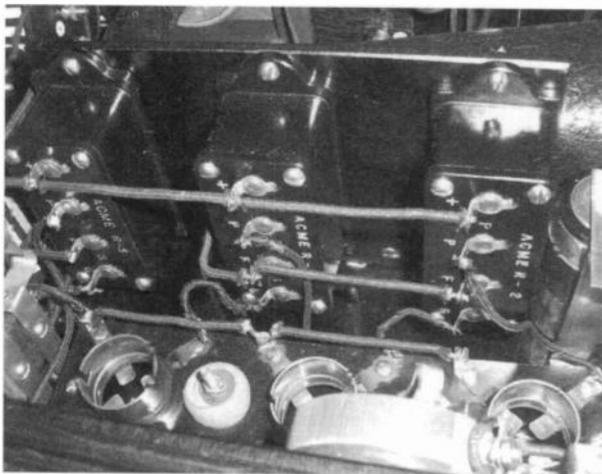

The 1924 Zenith Super Portable radio was one of the first truly portable radios manufactured for the general public. When it was introduced it would have been considered high-tech, incorporating the new low voltage UV-199 tubes and single dial tuning, as well as being fully self-contained. Based on the performance of this radio I believe the Zenith Super Portable radio might have been a real success story for Zenith if engineering had not made the decision to use the Acme transformers, which likely resulted in its failure, early death and obscurity.

Gilbert M. Hedge, 1626 Kenwick Place, Pasadena, Texas 77503, 281-487-0926, email: zen1441@sbcglobal.net

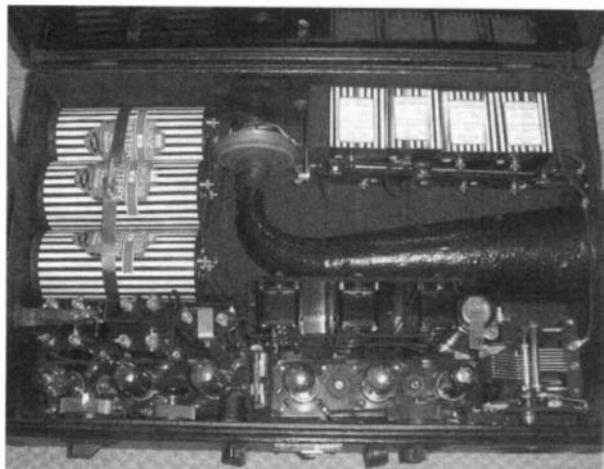

Gilbert has been collecting and restoring radios for about 30 years and specializes in Zenith radios from the 1920's. His collection includes: 1R-2M, 3R (E and L), 4R (E and L), Companion (2), Supper VII, 11, 11E, 12, 33 (some duplicates), plus the whole series of Zenith Trans-Oceanics. He also serves as the historian for the Houston Vintage Radio Association.

Re-wound Acme R-2 transformer.

Acme R-3, Acme R-2, and Acme R-2 RF transformers.

AUCTION REPORT

Estes Auction Burbank, Ohio, January 16, 2010

BY RAY CHASE

After a long spell of cold weather, the weekend of the Estes Auction was relatively mild, with the temperature at least above freezing. It was foggy and damp, however, and there was quite a bit of snow on the ground—but that's a small price to pay when hunting for great radio deals.

The usual pre-sale of low-value goods started at 8:30 a.m. and was smaller than usual but did contain some better items such as six or more AK "coffin" sets and several nice seven-tube Zenith chassis. This auction ended at 9:40 a.m. allowing for a short break before the main auction at 10:00. I did not record any items here.

Almost 100 bidders showed up for the main auction, which featured a large collection of jukeboxes. In addition to the usual battery and 1930s wood table sets, there was a collection of near-mint World War II military electronic items, about 20 very nice console radios, an exceptional Echophone cathedral mounted in a small highboy console cabinet, a Cob Organ, a pair of Leslie X77 speakers, and quite a few phonograph items. All this was in addition to the usual tubes and parts offerings. There was also some nice service literature and a side auction of transistor radios that I did not record.

The prices paid for the jukeboxes covered quite a range, possibly because some were listed as not working or partially restored. Most of them looked in good condition, and for lucky buyers who could handle and transport them, they would certainly look nice in a den or rec room. The star of the group was the Chicago Band Box Automaton. This unit did not play records or make music—it just mimicked an orchestra. It was in good working condition and sold for \$3,600.

I stopped recording the auction's results at 3:45 p.m., with maybe 15 or 20 minutes' worth of items left to sell and few bidders remaining. It being the

middle of winter, many people no doubt wanted to hit the road before it got too late. The dollar total of what I recorded came to \$43,076, not including the 5-percents buyer's premium.

Note: Auction prices are not current values. Our selection of auction items is not necessarily complete. A listing such as this cannot adequately include the condition of cabinets, chassis, transformers, tubes, the operating status of the set, and the inclusion of incorrect, restored or replica components, etc. Auction prices are the result of the excitement of the auction process, the skill of the auctioneer and the specific interests of the participants. Nevertheless, auction prices serve as useful references and as another element in the value determining process. The possibility of error always exists and if we are notified, corrections will be reported.

CLUB REPORT

Reinvigorating a Vintage Radio Organization

BY THOMAS J. BCNOMO

How do you grow and reinvigorate an antique radio organization that has been in existence for over 35 years? This has been an ongoing question faced by the California Historical Radio Society (CHRS) and its Northern California membership. As many similar groups have found, growth in the hobby has proven a challenge. Most are experiencing declines in membership. Many reasons are given, including the Internet and maturity of the hobbyists. Certainly it does not help that membership is growing increasingly gray and that today's youth are often not attracted to the hobby. When I showed my prized radio collection to my 25-year old nephew and told him that they all used vacuum tubes, he looked up from his iPhone and said, with near zero interest, "Yeah? What's that?"

If there were a catchphrase to describe how the CHRS board has tackled the "growth problem," I would pick "actively opportunistic." For the first 30-plus years of its existence, CHRS held quarterly swap meets, published a newsletter, and provided public radio displays. The first opportunity for real expansion came in 2003, when CHRS approached the owners of Inner Cities Broadcasting with a proposal to occupy the empty studios and offices of radio station KVTO, formerly KRE, in Berkeley (still an active, remotely controlled transmitter site). The owners liked the idea of dedicating the unused space to radio history and agreed to give CHRS a 10-year, rent-free lease. The 1937 building gave CHRS just what it wanted: room for meetings, workshops, and a collection of historically significant radios, along with a parking lot for swap meets (for more details about the KRE deal, see the ARC article "Bay Area Organization Takes over KRE" in the August 2004 issue).

After nearly seven years of restoration work by a dedicated band of CHRS volunteers, the once graffiti-ridden KRE building now houses an excellent collection of muse-

The "LIVE! at KRE" fundraising event draws hundreds.

um-quality radios, televisions, and test equipment, as well as a large radio repair shop and an active amateur radio station (W6CF). It also features an audio digitization service, a working 1950s control room, and an extensive library of radio manuals, technical books, magazines, and journals from the James Maxwell collection. CHRS is probably the only

Just a fraction of the CHRS collection.

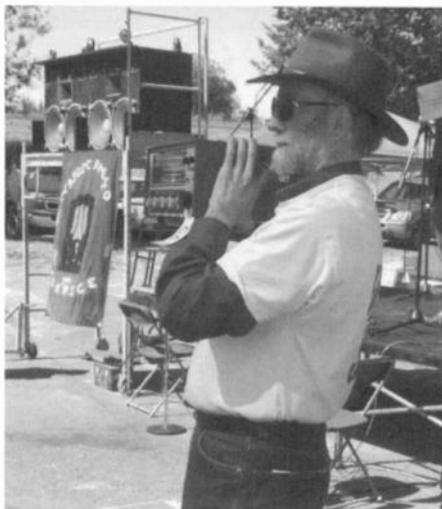

antique radio organization in the country to occupy a historically significant radio station building complete with an active transmitting tower.

Undoubtedly the highlight of the year is CHRS' radio day by the bay, which they've dubbed LIVE! at KRE. This all-day fundraising event, held under Berkeley's beautiful blue skies in mid-July, features a giant auction of vintage radios, test equipment, amateur gear, and radio ephemera. LIVE! at KRE also features an extensive flea market, hot food, live music, tours of the KRE building radio displays, interviews with radio personalities, and a live radio play put on by the Broadcast Legends. This annual event draws crowds of hundreds for a full day of radio fun. Don't miss this year's event held on Saturday, July 16. See the CHRS website at www.CaliforniaHistoricalRadio.com for details and a map.

Throughout the year, CHRS involves its members by hosting a series of volunteer days almost every weekend at KRE. On these weekends, the KRE building opens to offer members a choice of activities. Some choose to volunteer their time to help restore the building, or maintain the grounds. Others help organize the Maxwell Library of donated books, magazines, and technical journals. Others work on restoring artifacts in the CHRS collection, or volunteer time archiving historic media in CHRS' audio transfer facility. They also host several vintage radio swap meets and Radio Activity Days at KRE where members can bring a troublesome radio and participate in the popular Radio Repair Clinics. Members can attend one of the many educational lectures or video presentations offered throughout the year about some aspect of vintage radio or broadcasting. There's something for everyone, and it's hard not to feel that vacuum tube glow-in-the-dark camaraderie.

In 2010, CHRS saw another opportunity to expand and broaden its membership by merging with David Jackson's Bay Area Radio Museum. This merger provided CHRS with a vast online archive of radio broadcasts, historical documents, photographs, personality biographies, and music surveys. This collection traces the history of radio in the San Francisco Bay Area from its origins in the early 20th Century through its development into a network powerhouse in the 1930s and 1940s to today. Access to this vast online collection is available on the CHRS website (via the BARM tab). As part of the BARM acquisition, CHRS acquired the Bay Area Radio Hall of Fame (started in on-line only form in 2006). Last year, volunteers created a physical Bay Area Radio Hall of Fame in the KRE building. The walls of Studio A now proudly display 85 members from stations that made Bay Area radio great.

None of these growth efforts would have been undertaken without the incredible dedication of CHRS' president, Steve Kushman, and a persistent group of volunteers who have restored the KRE site. Thanks to this group's dedication, the organization's future looks brighter than ever. Swap meets are well attended. Membership is once again growing. That's right, growing! They had 281 members in 2008

LIVE! at KRE auction.

and 376 in February 2011. And CHRS' Sacramento and Central Valley Chapters remain active with local meetings and regional swap meets.

Certainly many challenges remain ahead. The KRE building is only leased, and CHRS would like to purchase it and renovate the studios to their 1950s glory. The board is still trying to sort out how to make the vision of housing a permanent museum-quality collection a reality. More volunteers are needed as well as generous benefactors with an interest in preserving radio history (hint: large donations greatly appreciated!).

Visit www.CaliforniaHistoricalRadio.com for membership information, events calendar, and photos. And again, don't miss LIVE! at KRE 2011, which will be held on Saturday, July 16.

Thomas Bonomo is an active amateur radio operator, K6AD, and serves on the Board of Directors of the California Historical Radio Society (k6adtom@hotmail.com, cellular phone: 650-218-5000).

Bring your troubled radio to the Radio Repair Clinic.

WITH THE COLLECTORS

The Odyssey Through Time Of One Atwater Kent Model 60

BY JOANN GROSSOEHME & BOB SANDS

Rarely does an old radio set have a chance to tell its own story. In this unique article, JoAnn Hughes Grosseohme does just that through the persuasion and assistance of Bob Sands of CARS (Cincinnati). JoAnn, who just turned 80, felt that the Atwater Kent radio she once owned should tell its own story, so she composed this little "autobiography" for it, which now sits, framed, on top of the radio's table. Read and enjoy as JoAnn imagines the family's radio life. But, first, Bob Sands tells how this all came about.

It's fortunate to have good neighbors for 37 years who share the same interests and hobbies, and it's terrific to have them offer to you an antique radio! Such is the case with my neighbors, Floyd and JoAnn Grosseohme, who live four houses away. Floyd has a degree in physics and JoAnn a degree in education. Floyd and I have common interests in motorcycling, target shooting, ham radio, and general electronics. Our families have shared dinners and many social evenings happily engaged in interesting discussions. Still it came as a total shock when the phone rang one day and I was asked if I wanted an old radio enclosed in a table. It was destined for the trash until Floyd remembered that I might want it. He even offered to put it in his van and deliver it to my house!

The radio turned out to be an Atwater Kent Model 60 housed in the original Kiel table. The top of the table was marred, as are most older wooden tables, but the real damage was found inside. Through many moves the chassis and speaker had not been fastened down with blocks and screws, and consequently the cabinet's inside and inner lid were severely damaged. The AK chassis and speaker appeared to have survived OK. We put the radio in my basement where it resided for a few years before restoration.

The Kiel cabinet had seen loving care for its 80 years of existence, so the table needed only some touch-up, a bit of glue, and a treatment of Howard's Restore-A-Finish. The top, however, needed professional help. I had it completely patched and refinished and had a glass top cut to match the Kiel's lid design.

The Atwater Kent 60 chassis was totally checked out, tubes replaced, correct resistors replaced with modern banded color-coded types, and of course, new capacitors installed. The unit now performs well, and I have DXed stations in Texas, Canada, Iowa, Chicago, Boston, New York, and elsewhere.

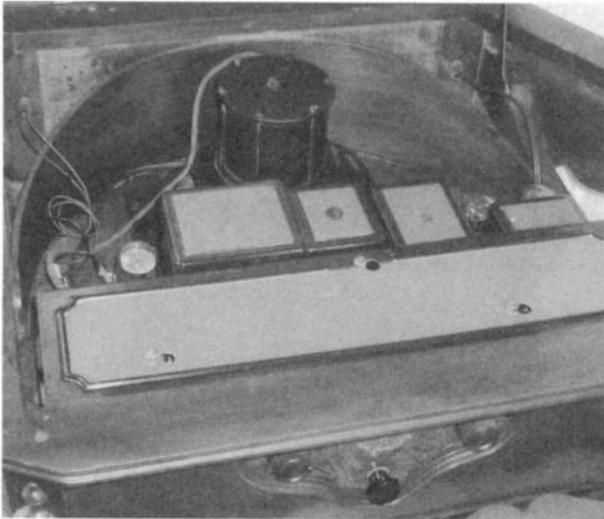

When everything was finished, my wife Sue gave her blessing to set the unit in a corner of the dining room. I phoned Floyd and JoAnn and invited them over to hear the results. JoAnn was especially pleased as this set had been in her family since its original

The restored Atwater Kent Model 60 receiver in its Kiel table cabinet. Framed and sitting on top is the "first person" story written by JoAnn Hughes Grosseohme. Also sitting on the radio is a 1941 Mitchell "Lumitone" white-painted Bakelite radio/lamp.

The wooden front section of the Kiel table pulled down reveals the wood-grained control panel of the Atwater Kent Model 60. Note that the bottom tuning knob is incorrect.

With the Kiel table lid lifted, you can have access to the Atwater Kent 60 chassis and speaker.

JoAnn Hughes Grosseohme, who submitted the radio's personal story.

Antique Radio Society) and is secretary of the Gray's History of Wireless Museum. Bob graduated from DeVry and attended Northwestern University. He worked at Allied Radio in the field industrial sales department for 17 years. Subsequently, he worked at Pioneer-Standard Electronics for 17 years. Now retired, he collects unusual radios from the 1920s-1950s.)

purchase and she, JoAnn Hughes Grosseohme, knew its full background. How fortunate! I asked her to write its provenance in the "first person" as if the radio itself were telling its own story. The result is in the accompanying sidebar, "From the Diary of an Atwater Kent Radio."

(Bob Sands, 40 Dow Court, Fairfield, Ohio 45014)

Bob Sands is president of CARS, (Cincinnati

(JoAnn Hughes Grosseohme has a degree in education from the University of Cincinnati. She taught American history and English at a local high school. JoAnn is very active and still retains a very sharp mind and has a remarkable memory. Her hobbies are traveling, reading, genealogy, and she just recently finished studying German in order to communicate with her husband's relatives who live in Manzell-schielberg, Germany. Keep in mind, that with all this, she just turned 80!)

FROM THE DIARY OF AN ATWATER KENT RADIO

I was born in 1929 and have led a long and interesting life. I was first purchased by John Eicher and placed in a spacious entry hall in the lovely home that he built at 6242 Savannah Avenue in College Hill, Cincinnati, Ohio. I was given a place of honor in the corner of the room, near the long staircase.

My earliest memory is that of my new owner sitting before me, smoking his pipe, and listening to H.V. Kaltenborn Jr. and the "Evening News." All during the 1930s he sat before me each evening, following the news of the gathering storm clouds over Europe.

I also remember the family sitting around me to listen to King Edward VIII of England abdicate the throne in 1936. This is especially vivid in my memory because the five-year-old granddaughter of our family was visiting and she was very interested in what the King said and asked many questions about it.

In the 1940s when the entry hall was re-decorated, I was moved to a corner of the large family kitchen. Mr. Eicher sat in his rocking chair in front of me and listened to every Cincinnati Reds baseball game, narrated by Waite Hoyt.

Sometimes in the afternoons Mrs. Eicher would turn me on to listen to soap operas. On Sunday evenings, if I remember correctly, any of the family who were there listened to "One Man's Family." And, of course, on December 7th, 1941, everyone huddled around to hear me tell of the terrible attack on Pearl Harbor.

When the Eichers bought a new and more modern radio, I was given to their son-in-law, Walter Hughes, to use in his office at the Herschede Hall Clock Company. By this time I was getting older and didn't work very well, so I was taken to the Hughes home in College Hill and placed in their rathskeller. Here I served mostly as a table only, although occasionally I could manage to produce some listening entertainment for them. When Mr. and Mrs. Hughes moved to Mississippi, I was given to their daughter (the Eicher's granddaughter, JoAnn), who used me as an occasional table.

Finally, the family had no use for me, but fortunately I was given to a lover of old radios who saw my potential and restored me to my days of glory.

— As relayed to JoAnn Hughes Grosseohme

DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Over the past two months I've asked many of our subscribers about the benefits that come with a subscription to Antique Radio Classified.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits.

Let's take a look at them:

ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are **SEARCHABLE!** If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

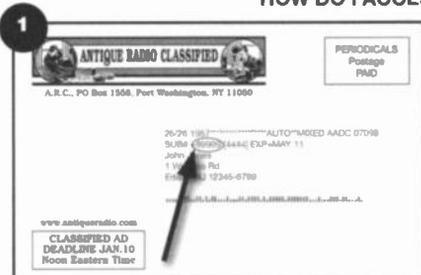

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

FREE MONTHLY CLASSIFIED AD

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of Antique Radio Classified are the articles containing information that will help you in increasing your knowledge of our hobby.

HOW DO I ACCESS THESE BENEFITS?

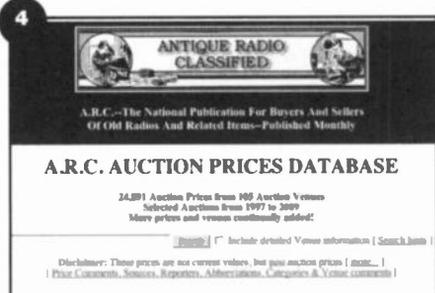

Your print subscriber user ID and password are on your mailing label. Online subscribers are emailed their user ID and password. Your user ID is the number after "SUB#" on your mailing label. Your password is the digits in brackets [xxxx] after your "SUB#".

Go to A.R.C.'s home page www.antiqueradio.com and click on Subscriber Only Page.

On the Subscriber-Only Access page you can click on the Full Issue you would like to view or click on the Classified Ads section from that issue.

Or you can click on the Auction Prices Data Base. Just enter the item that you are researching.

PHOTO REVIEW

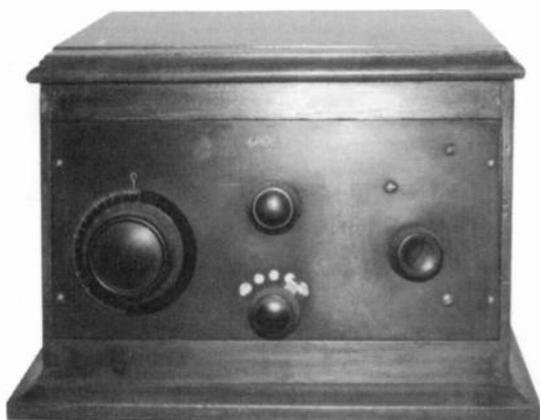

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

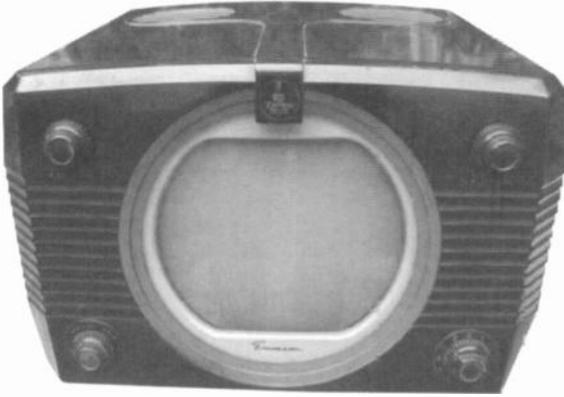

RCA TUBE CARTONS - This collection of six RCA tube boxes spans the different carton designs from 1924 to the 1960s. (Clark Trissell, Lincoln, NE)

ARVIN MODEL 451T - This five tube, white painted bakelite radio was manufactured in 1953 by Noblitt-Sparks Industries of Columbus, IN. (Clark Trissell, Lincoln, NE)

CROSLY MODEL 51-S - This two tube battery receiver was manufactured in 1925 by the Crosley Radio Corporation in Cincinnati, OH. The "S" in the model number means "Special." The chassis and panel are the same as the standard Crosley Model 51, except for having a variable plate tuning condenser instead of the older "book" type tuner and a larger more deluxe cabinet. (Dave Crocker, Mashpee, MA)

PHOTO REVIEW

Emerson Model 614 - This television was manufactured in 1950. The cabinet is made of bakelite and the chassis uses a 10" CRT. Very stylish but must weigh about 40 pounds. (*William Franken - Bogata, NJ*)

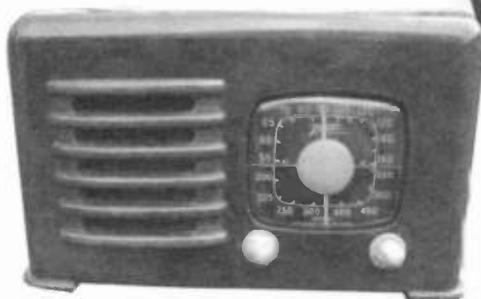

H.H. Scott Model 340B - This stereo receiver was manufactured in 1963. There are 17 tubes including 4 x 7591A output tubes. (*John Finch - Hattiesburg, MS*)

Emerson Model 425 - This nice wood-cased Emerson was manufactured in 1942 and comes with the original back cover. There is a plastic handle on top and the receiver covers the AM broadcast band. (*Walter Greer - Sharpsberg, PA*)

PHOTO REVIEW

Zenith Model 6D625 - Manufactured in 1941. This is a very popular collectable due to its unique cabinet design. It was sold with or without a carrying handle. This one came with the back panel. There are six tubes and tunes the AM broadcast band only. (*Ken Leonard - Utica, NY*)

RCA 56X3 - Circa 1946, tube line up: 12SG7, 12SK7, 12SQ7, 35L6GT and 35Z5GT. Five-inch speaker has a nice tone. It is a very sensitive set, even though a simple one with just the broadcast band. Has high/low tone control. (*Paul Buresh, Needham, MA*)

RCA 1X591 - Bakelite with curved grille. A pretty standard AA5 lineup - 12SA7, 12SK7, 12SQ7, 50L6GT, 35Z5GT. Unique in that it has an eight-inch speaker that is almost as big as the radio is tall. Has a very rich mellow sound. A different looking set with a great "Golden Throat" sound. (*Paul Buresh, Needham, MA*)

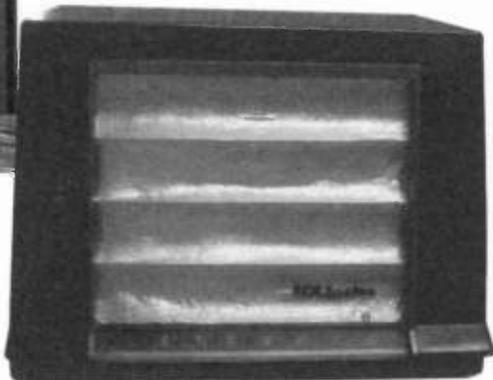

PHOTO REVIEW

RCA Orthophonic Model 6HF1 - This was RCA's answer to the Fisher high fidelity consoles of 1956. The 6HF1 consisted of a 17 tube AM/FM mono receiver (with a transistorized phono preamp stage), three-speed automatic record changer, and a reel-to-reel tape machine (similar to the Magnecord M30 series). The output tubes were 4 x 6V6GTs. The matching speaker was model RK-196 which consisted of 16" woofer, 5" midrange, and 2 x 3.5" speakers. The speaker came with a 50-foot cord for placement anywhere in the listening room. Retail price of the system was \$1600.00!

Zenith model 6G501L - One of the many Zenith portable radios made in the 1941. The chassis number is 6A19 with six tubes and it operates on both AC and DC power. It is leatherette covered and the front uses a rare wood bezel. The wave magnet was also included. (Phillip Sandweiss - Tombstone, AZ)

FOR SALE: Zenith 7H921-2 AM/FM brown bakelite re-capped missing crest nice \$25; Zenith X334 big wooden AM/FM early American cabinet plays weakly \$25; Zenith 6G601M universal AC/DC portable sailboat grill decent cabinet clean chassis has wavemagnet handle broke \$50. Dick Kromer, 88 Hole in the Wall Rd., Solon, ME 04979. (207) 643-2300.

FOR SALE: Federal 8, 9, 55, 56 reproduction cabinets. For details, contact John Terrey, Old Tech - Books & Things, PO Box 803, Carlisle, MA 01741. E-mail: jvt@oldtech.com.

which are new to you.

OLD TECH BOOKS & THINGS

What am I doing after A.R.C.? I now have time to sort through the dozens (probably 100s) of boxes of duplicate items in my collection... books, catalogs, manuals, pamphlets, horn speakers, radios... and offer them via my long-dormant business: Old Tech - Books & Things. Old Tech handles more than just radio-related items... included are vintage television, wireless, skiing, computers, musical synthesizers, and more. For details on what's for sale, visit:

www.oldtech.com

or contact:
John Terrey

RADIO SALE!

OLD BARN ANTIQUE RADIO SALE ON THE SOUTH SHORE OF MASSACHUSSETTS

I would like to announce the absolute sale of over 150 radio sets, all pre-1950's. Sale includes everything from Atwater Kent's by the dozen to Zeniths by the trunk full. Tube testers as well! Most radios will have original tubes and some will have tested tubes installed by me. No radios will have "filler tubes". This collection is not for your high end purists but for the new collector or a person who restores radios for profit or pleasure. All of the sets are good to poor with a few junkers thrown in for extra interest. All radios are priced accordingly with prices starting at \$15 and going all the way up to \$75 each for most radios. We will have chassis by the dozen, some with tubes. Find that old field coil cone speaker from our large selection. Rummage through the many parts bins for antique tubes, condensers, transformers and much more! This is NOT a picked collection but comes from the collector to you. Most radios are priced at 1/4 to 1/2 the book value. All sales cash and carry please. This is a two day sale. This sale is handicapped accessible.

This event to be held rain or shine with donuts, burgers and dogs, water, soda and coffee for cheap money served all day, both days. As a nice bonus, you get to tour the Museum of Antiquated Technology upstairs in the barn. Old jalopies, farm engines and antique tractors can be viewed in the outbuildings out back, all for no admission fee!

Come bring your van and your trailer for this one time, no auction event. Remember, there are no auction fees or buyer's premiums or taxes or expensive boxing and shipping or sign up fees. Just a bunch of collectors, myself included having a terrific weekend! No previewing please. Doors open 8 to 5 Saturday and Sunday, July 9th and the 10th. Event to be held at the residence of Mark and Helen Vess, 303 High St. Hanson Ma, 02341 Phone: 781-294-1647 A detailed sale list and some group pictures are available by email or send SASE. Email vessmuseumtech@aol.com.
