## THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the *QST-VIEW* series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. *QST* Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

*QST-VIEW* CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and *QST-VIEW* has on-line instructional help for operating the *QST-VIEW* browser!

**EACH SET \$ 39.95 (specify the years)**

**ALL 11 SETS \$ 379**

**S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter**

**S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter**

---

### 2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. Thousands sold at \$ 199. **SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts !**

POSTMASTER: Send address changes to  
Antique Radio Classified, PO Box 1558,  
Port Washington, NY 11050.

Printed in U.S.A.

**PURPOSE** - Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

**Publisher:** Jon Kummer, **Editor:** Edith Lennon, **Publisher/Editor Emeritus:** John Terrey, **Founding Publisher/Editor:** Gary B. Schneider, **Contributing Editor:** John Terrey, **Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bintliff, Norman Braithwaite, Ray Chase, Dave Crocker, Alan Douglas, Richard Foster, Jim Kreuzer, Phil MacArthur, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White.

## CONTACTING ANTIQUE RADIO CLASSIFIED

All correspondence should be sent to:

A.R.C., PO Box 1558, Port Washington, NY 11050

Telephone: (866) 371-0512; Fax: (516) 883-1077

Email: [ARC@antiqueradio.com](mailto:ARC@antiqueradio.com)

Web: [www.antiqueradio.com](http://www.antiqueradio.com)

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However A.R.C. does solicit letters of interest from its readers and publishes them as space permits.

**WEB.** Antique Radio Classified issues are published on the web as PDF files for subscribers. Web-only subscriptions are available. One issue is available for viewing by all on the web as a sample.

**ADVERTISING.** Display and Classified advertising rates and artwork specifications are available on the web site.

**PAYMENT.** Please include full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid. Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express, Discover or PayPal. Make check out to "A.R.C." Subscriptions will be prorated to amount sent if amount is incorrect. *For your protection, no credit cards by e-mail; use our secure website instead.*

**CHANGE OF ADDRESS.** Please notify us in advance of a change of address. Send your new address, your old address, your SUB# and the effective date of the change.

**PUBLISHING RIGHTS.** Unless other arrangements are made:

(1) All received materials (ads, articles, letters, correspondence, email, photos, artwork, etc.) become the property of A.R.C., may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

**MAILING OF ISSUES.** U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). Mailing dates change each month.

**DISCLAIMER.** The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

**NOTICE.** Subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

SUBSCRIBERS: All paid subscribers receive a FREE classified ad of up to 50 words in each issue.

## Publisher's Comments

The year is almost finished. It's amazing to think that this is the 12th issue of *Antique Radio Classified* that's been published since it changed hands late last year.

This past year I've attended about 10 different meets, was introduced to lots of people, and made many new friends. I'm always looking for new ideas to make the magazine and website better and would like to take this opportunity to thank the people who have helped us in making changes over the last year. In response to reader input, we've added a new column, "At Home with the Collector," and begun monthly coverage of vintage audio. We've also started running regular profiles of radio clubs, increased the size of the "Photo Review" section, and added international meets to the "Coming Events" section. We've made some changes to the website home page and now send emails to the online-only subscribers when the new issue is placed on the Internet.

To satisfy our readers' thirst for radio-related material on a broad range of topics, we continue to add book titles to the A.R.C. Book Store. We've also been approached by some authors about A.R.C. itself publishing their books in the coming year. Stay tuned.

One area that's holds a lot of interest for the hobby community is international radio collecting. At the AWA Convention in Rochester, New York, there was a special dinner honoring the international visitors. This month one of our features is on the Murphy "Station Master" radio. I had the opportunity to see this radio in person at a club meeting of the Hudson Valley Antique Radio and Phonograph Society (HARPS) in Suffern, New York. Let me tell you, it's a real beauty.

John Vuolo serves as our guide for a technical discussion of eye tubes, how and why they

work. I learned a lot of interesting facts about these tubes from John's article.

This month "At Home with the Collector" visits with A.R.C. reader Chris, a collector of novelty radios. No, he doesn't collect items like the McDonald's Hamburger radio—all his sets are tube novelty radios.

Our club profile this month is the Houston Vintage Radio Association. The HVRA is another example of a well-run club that offers well-organized and popular events like auctions, conventions, and outreach programs. It also publishes a wonderful newsletter.

Lastly, I've had many people inquire about what is happening this February with the Radio XVIII event in Westford, Massachusetts. Let's me just say for now you won't be disappointed by the answer! You'll have to read the article in this issue to find out the details, though.

Until next time, we at A.R.C. wish everyone a happy Holiday Season and the very best for the coming year!

Jon Kummer  
Publisher

*Correction: In last month's "Publisher's Comments" I incorrectly stated that John Terrey was the founder of A.R.C. The founding publisher was Gary Schneider. I apologize and stand corrected.*

The 1942 British Murphy "Station Master" multiband radio. See page 4 for the article by Bill Liers.

## WORLD RADIOS

### Murphy's "Station Master" Standing Sentry On The Home Front

BY BILL LIERS

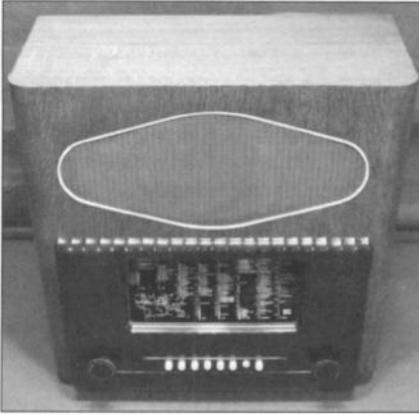

*Front of the Murphy 1940 sales brochure*

The biggest British radio companies during World War II were Bush, Ekco, Pye, and Murphy. Murphy Radio, founded in 1929 by Frank Murphy and E. J. Power, was based Welwyn Garden City, Hertfordshire. Of its offerings, the A92 "Station Master" was the best for 1940.

Most British radios I've seen have a somewhat bland exterior. In fact, when this former basket-case came in the door, my fi-

ancée, Maryann, called it the ugliest radio she'd ever seen (she has since changed her mind). I, on the other hand, thought it had "potential." And I was right—polishing the large sculpted Bakelite front panel, cleaning the detailed dial glass, and adding a new finish on the heavy oak cabinet has done a lot of good for the old gal.

When I first got it, the cabinet had little of the original finish left. The white natural

*The A92 Station Master reported for duty in 1940*

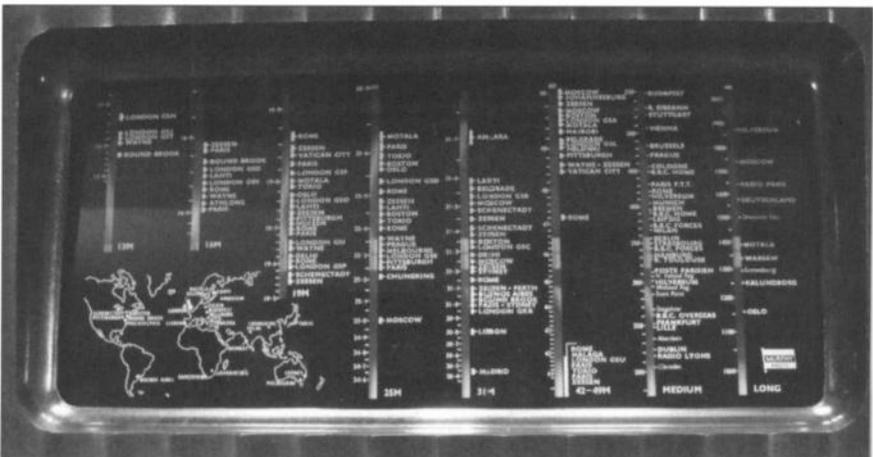

*Rear view of the receiver*

rubber band that holds the speaker grille cloth in place had darkened and deteriorated, but fortunately I was able to reverse it to expose the fresh edge of the band. The bottom of the cabinet had also seen some water damage, but I managed to straighten the frame with some bracing and gluing. I stripped off the remaining finish from the coarse grain oak veneer and replaced it with medium walnut Mohawk toning lacquer, followed by a few coats of semi gloss clear.

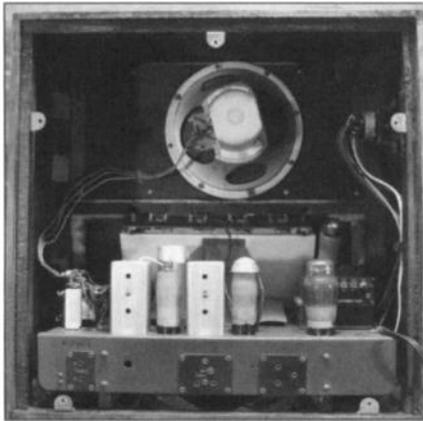

The original grille cloth had weathered the years well and looked good after the cigarette smoke residue was cleaned out of it. I encounter this particular type of damage

so often that I imagine the habit of blowing smoke at a radio must have been very common, and maybe especially so after an unwelcome news report.

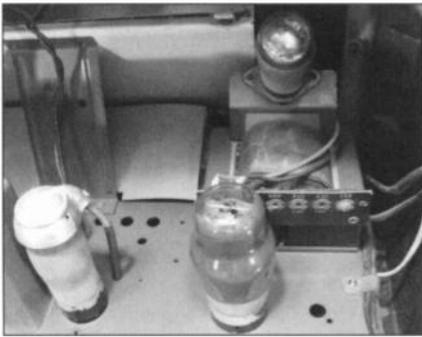

The Station Master was advertised as “valuable munitions for the home front” since, in 1940, bombs actually *were* dropping on England as this radio was being marketed. Whereas in the United States, wartime efforts meant the end of most unnecessary consumer manufacturing, the six-valve (eight-circuit) A92 was designed especially so the British could tune into all of the important news being broadcast on the short, medium, and long-wave bands.

*Detailed vertical dial showing local and world station locations*

*Inside view of the A92*

*Chassis detail*

The large Bakelite front panel provides access to the controls for volume and tuning, including tuning of the longwave, medium-wave, and six shortwave bands, divided into the standard allocations from 49 to 13 Meters. The tone control and on-off switch are on the side of the cabinet. The Bakelite on my radio was in amazingly good condition with no cracks.

The dial has 95 station location designations to insure that tuning is as "easy and certain on shortwave as it is on medium wave," as the brochure states. A small map of some locations adds an international and decorative touch to the set. On this model, a long glass illuminated dial pointer moves vertically, with higher frequency stations towards the bottom. Each shortwave band has a padder in circuit and is inductively trimmed for accuracy and sensitivity. The set has no prob-

lem pulling in stations from across the pond, and its tuning is remarkably linear.

The rear panel has antenna connections on the left. Remote speaker jacks with switch center and phono plug are on the right side. The rear cover name tag shows the radio as being manufactured in Herts (not Hertz), England, and for use on 220v mains only.

With the rear cover off, you can see an unusual blue painted chassis and, just as unusual, spray-shield-type tubes. The rectifier tube, type UU6, is to the upper right hand. It's mounted to a plate above the power transformer where its heat has apparently had little long-term effect on the other components, judging by the fact that the electrolytic capacitors were the only pieces needing replacement. All other resistors and heavily waxed capacitors tested in good condition and were kept.

The tubes used in the A92 are of the 4-volt type and fortunately are working well; it would be difficult to find replacements in this country. The tubes used are: SP 41 - RF amplifier (used for shortwave only); TH 41 - converter / oscillator; VP 41 - IF amplifier; HL 41 DD - detector / 1st audio amplifier; PEN 45 - audio output.

I'm not sure if this was intended, but the grid caps on the RF and detector tubes remind me a lot of the British military helmets used during the war. What do you think?

The power transformer has taps to operate on line voltages from 200 to 250 VAC. The radio has enough sensitivity and gain to operate acceptably even from a 120-volt source if the 200-volt tap is selected and you give it a little extra time to warm up.

The sound quality is good from the 8-inch dynamic speaker. It's interesting to note that, even in 1940, the mains switch opened both sides of the power cord for safety.

Readers may also be interested to know that during the cleaning of the chassis, the type of dirt that covered everything seemed more like coal dust than what I normally encounter in old sets. I know that coal heated almost everything in and around London back then, and I was probably breathing in a bit of that same old coal dust while working on the Murphy. It's amazing to think of all the ways that vintage radios can bring you back in time...

PAPER is short and sets are short, so I'll be short.

This Company has three jobs to do in wartime—as  
 most direct war effort as we can contribute . . . A  
 strong attack on exports to build up British finances abroad  
 . . . The care of the Home Market. We are trying to do our  
 duty in all three. These sets, which have been designed and  
 made for wartime conditions, show you how we have tackled  
 your claim on our efforts. You will see that we have given  
 you greater Short Wave facilities than ever before. You will

see that the cabinets are still as distinctive and solid  
 as ever. You won't see, but I will tell you, that are  
 things that we have always put first in our sets are  
 still first—reliability and truthful reproduction. We believe  
 that in this time of war, each wireless set we make has a  
 great rational job to perform in someone's home—perhaps  
 yours. We have tried to design and make sets worthy of  
 their job, sets which will be a comfort and a stand-by to  
 you in these days.

E. J. POWER, Managing Director

**"Standard" TABLE SUPERSET**  
 An all-wave superhet with a fine "section-pulling" performance especially on short waves, and a high standard of reproduction. Press-button wave-band selection and a special short wave logging scale are important features. Pick-up connections (A.C. model only) and switched external speaker sockets are provided. The cabinet is highly polished and has an all-ink front with a built-in battery compartment for the scales and controls. Wave ranges covered: 15.7-50 METERS 100-500 METERS 970-2,000 METERS  
 Cash Price: A.C. MODEL £11 10s. D.C. MODEL £12 6s.

**"SHORT-WAVE" Station Master**  
 This set is the year's short-wave "Special." There are 23 short-wave stations names marked on the scale, and, with the aid of Electrical Band-spreading tuning on the short waves, in as easy and accurate as it is on the medium and long waves (battery or mains), the high standard of Murphy performance is fully maintained. Single high-button control the wave-band switching. Pick-up and switched speaker sockets are fitted. The quality of reproduction is typical of Murphy sets. Cabinet in warm brown polished oak with fixed black bakelite control panel. Wave ranges covered: (mains) 15.7-50 METERS 100-500 METERS 970-2,000 METERS  
 Cash Price: (A.C. ONLY) £11 6s.

**BATTERY-OPERATED "Station Master"**  
 This is the Battery version of the Mains Station Master set described above and illustrated on the right. This model incorporates all the most important features of the mains set, and for the first time gives the battery set user the advantages of truly advanced short-wave performance. Wave ranges covered as on the Mains Station Master.  
 Cash Price (without Batteries) £12 10s.

**"Standard" RADIOGRAM**  
 All the radio features of the Standard Table set described above are combined in this all-wave superb Radio-gram with record reproduction of much higher quality than has hitherto been available in a set of this price. This is largely due to a unique design conceived by Murphy Radio. Push-button wave-change, short wave logging scale and switched speaker sockets are incorporated. The cabinet is distinguished by the all-ink front and bakelite construction. The gramophone has a Bush motor-base, and the pick-up is of a special design which considerably reduces record wear. Wave ranges covered as on the Standard Table Model.  
 Cash Price: A.C. MODEL £36 D.C.-A.C. MODEL £37 10s.

**"Economy" BATTERY SUPERSET**  
 Minimum running costs and a modern price give this set its well-earned name. The circuit provides a wide choice of stations on the short and medium wave-bands with high quality reproduction and simplified tuning controls. "Low draw" valves allow longer use of the accumulator between charges, and a special grid bias ensures maximum life from the H.T. Battery. Dials polished oak cabinet with all-ink front and bakelite control panel. Wave ranges covered: 15-50 METERS 100-500 METERS  
 Cash Price (without batteries) 29 10s.

All Murphy sets, exclusive of tubes and batteries, guaranteed for one year. Prices do not apply to Direct-Flow Purchase Terms contracts.

Bill Liers lives in Youngsville, New York, with his fiancée, Maryann, who lovingly supports his crazy hobby. He is a proud member of the Hudson Valley Antique Radio and Phono Society.

Visit Bill's website at <http://billsradioden.shutterfly.com>, which showcases his impressive collection and offers other radio-related items of interest. You can contact him at [bliers@gmail.com](mailto:bliers@gmail.com).

Attention Subscribers: You can access a color version of this article on the A.R.C. website at [www.antiqueradio.com](http://www.antiqueradio.com).

## VINTAGE AUDIO

### Taking a Look at The Tuning Eye

BY JOHN VUOLO

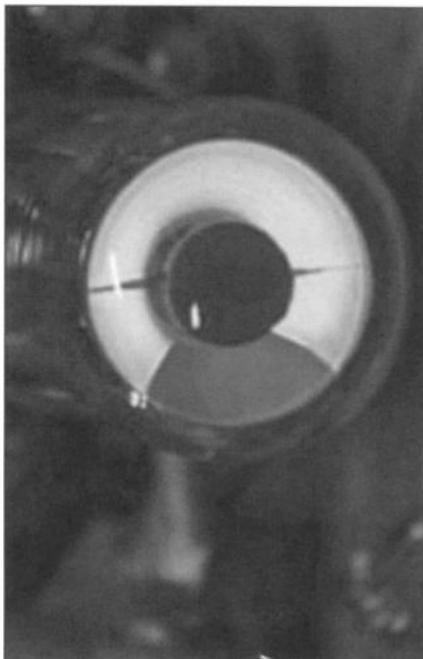

“**T**uning eye” is the common name applied to the green-glow tubes used in radio equipment to visually assist the listener in tuning a radio station to the point of greatest signal strength. Officially known as electron-ray tubes, and differ from the cathode ray tubes used to produce images in television, although the two types share a common ancestry and fundamental architecture.

#### DuMont's Invention

The electron-ray tube was invented by Dr. Allen DuMont in 1930 as a result of his related work to develop the cathode ray tube for television. Dr. DuMont had just completed the transition from his engineering job with Westinghouse to become Chief Engineer for the De Forest Radio Company in Passaic, New Jersey. He most likely used the lab in the basement of his Upper Montclair home to carry out his experiments since he, and not the De Forest Radio Company, owned the patent for the electron ray tube he created. Dr. DuMont sold the patent to RCA in 1932. Prospects at the De Forest Radio Company at the time were not very bright, as the company was in severe financial difficulties. The company went into receivership in 1933, with RCA gobbling up most of the assets. The sale of the electron ray tube patent provided the seed money for Dr. DuMont to form his own company. Over the next 30 years, the company bearing Dr. DuMont's name pioneered early oscilloscopes, television sets, and television broadcasting, and it prospered greatly during and after World War II with the development and production of defense electronics.

#### RCA Markets' "Magic"

RCA registered its first electron ray tube, the 6E5, on June 27, 1935, and it appeared in the company's console model product line that same year. RCA, fearing a loss of market share to competitors' new lines of very small and midget radios, opted for a different marketing strategy. RCA promoted the "Magic Eye" as an elegant feature of its higher-end product line, where profit margins were greatest. Not surprisingly, the 6E5 wouldn't fit inside the competitors' smallest sets.

*An example of a working eye tube*

The name Magic Eye quickly gained acceptance by the public as the standard identity for the electron-ray tube and tuning eye feature in consumer radio sets, regardless of manufacturer. Alert to the appeal and success of RCA's Magic Eye, many radio manufacturers quickly purchased RCA's license agreement for the electron-ray tube and circuit designs. The difference in cost at the retail level of this extra feature was typically five to seven dollars. Arvin, Fairbanks-Morse, Lafayette, and Westinghouse, in particular, made early use of the tuning eye feature. Arvin was among the first to introduce it into table top sets with the company's "Phantom Junior" model 618. The tuning eye was popular also with the Sears Roebuck and Montgomery Ward brands, many of which were made by Arvin. It is not unusual to see different manufacturing runs of the same 1936 or 1937 model radio where the later version includes the addition of a tuning eye tube and associated circuitry.

## Zenith Weighs In

Zenith featured visual tuning aids in their product lines more than most manufacturers did, but they avoided an exclusive engagement with the RCA product for two years. Zenith's 1936 sets featured a "Bullseye" variant of the Shadowmeter. This did not create much of a stir with the public as it was not nearly as visually appealing a display as the 6E5's. The Bullseye was dropped in 1937 in favor of the Raytheon 6T5. This unique tube appears in nearly all of Zenith's consoles for the 1937 model year as well as the seven-, nine-, and 12-tube "Walton's" tombstones and other non-console sets. Use of the 6T5 and the Shadowmeter eventually succeeded in pressuring RCA to reduce the price tag for licensing the tuning eye tube and related circuit designs. Finally, in 1938, Zenith adopted RCA's product with the same enthusiasm as they exhibited for other types of visual tuning aids. With the 6T5's principal user now switched to the 6U5\_6G5, production of 6T5s was stopped by Raytheon and Sylvania in 1939.

## Eye Tube Operation

The tuning eye tube was designed to visually indicate, by means of a fluorescent target,

*Alexander Dumont*

the effects of a change in controlling voltage. This was widely used for tuning indicators in radio receivers. The eye tube is comprised of two main parts: a triode that operates as a DC amplifier, and an electron ray indicator that's located in the bulb near the top (see Figure 1).

The target is operated at a positive voltage and, therefore, attracts electrons from

*Typical 6E5 tubes*

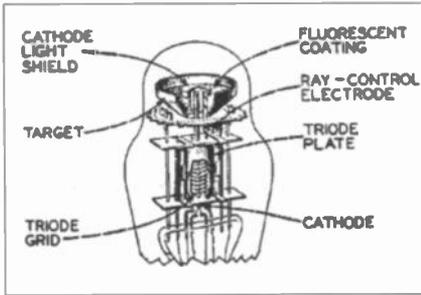

Figure 1.

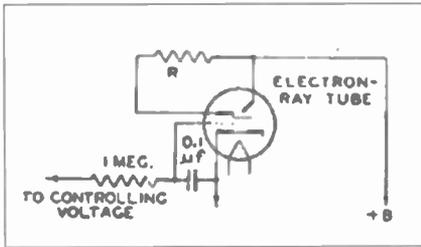

Figure 2.

the cathode. When electrons strike the target they produce a glow on the fluorescent coating of the target. Under these conditions the target appears as a ring of light. A ray control electrode is mounted between the cathode and the target. When the potential of this electrode is less positive than the target, electrons flowing to the target are repelled by the electrostatic field of the electrode, and do not reach that part of the target behind the electrode. Because the target does not glow where it is shielded from the electrons, the control electrode casts a shadow on the glowing target. The extent of this shadow varies from approximately 100 degrees of the target, when the control electrode is more negative than the target, to 0 degrees, when the control electrode is at approximately the same potential as the target.

In the application of the eye tube, the potential of the control electrode is determined by the voltage on the grid of the triode section, as can be seen in Figure 2. The flow of the triode plate current through resistor R produces a voltage drop that determines the potential of the control electrode. When the voltage of the triode grid changes in the positive direction, plate current increases, the potential of the

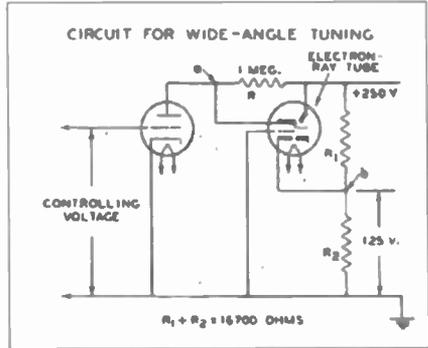

Figure 3.

control electrode goes down, because of the increased drop across R, and the shadow angle widens. When the potential of the triode grid changes in the negative direction, the shadow angle narrows.

In the design of radio receivers, the AVC voltage is applied to the grid of the DC amplifier. The AVC voltage will be at maximum when the set is tuned to give the maximum to a station; the shadow angle is at minimum when the receiver is tuned to resonance with the desired station. The choice between eye tubes depends upon the AVC characteristic of the receiver. Eye tubes like the 6E5 use a sharp cutoff triode that closes the shadow angle on a comparatively low value of AVC voltage. Other eye tubes, like the 6N5 and 6U5/6G5, have a remote cutoff triode that closes the shadow on a value of AVC voltage larger than the 6E5's.

The sensitivity indication of eye tubes can be increased by using a separate DC amplifier to control the action of the ray control electrode in the tuning indicator tube. This arrangement increases the shadow angle from the usual 100 degrees to approximately 180 degrees. An example of this circuit is shown in Figure 3.

### Typical 6E5 Example

Figure 4 shows a typical tuning indicator circuit employing the 6E5. If the strongest carrier received produces sufficient AVC voltage to exceed the cutoff bias of -8 volts, the shadow area of the fluorescent target will overlap. To overcome this effect, Resistor R3 should be connected as shown, between the

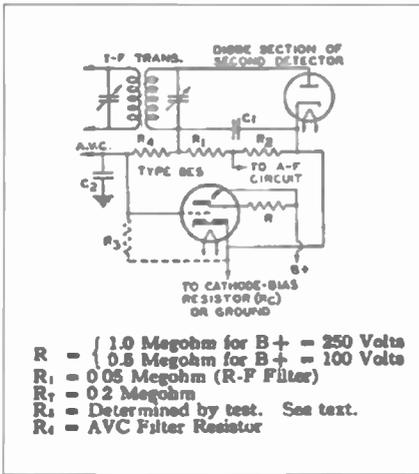

Figure 4.

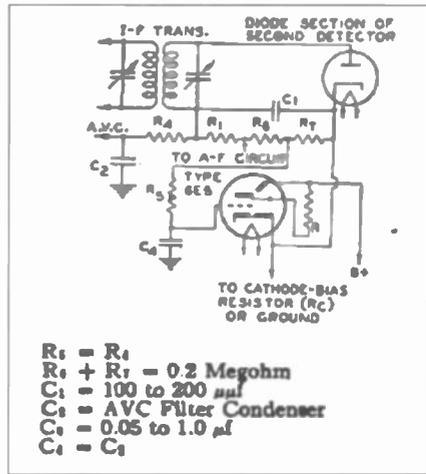

Figure 5.

triode unit grid and cathode, in order to reduce the control voltage. The value of  $R_3$  may be easily determined by applying a strong signal and adjusting  $R_3$  until the shadow angle is nearly zero. If the resultant value of  $R_3$  is so low as to reduce the AVC voltage appreciably, the DC controlling voltage for the 6E5 should be obtained from a tap on the diode load resistor as shown in Figure 5.

# AT HOME WITH THE COLLECTOR

## Not Your Father's Novelty Radio

BY JON KUMMER

This month "At Home with the Collector" visits Chris in his home on the West Coast. Chris' specialty is collecting novelty radios, and the photos you see here offer only a glimpse of his treasure trove.

For many of us, novelty sets conjure up images of a transistor radio that looks like a McDonald's hamburger, or perhaps a radio in the shape of a gas station pump from Sunoco or Sinclair (remember Dino?). Chris's collection of novelty radios, however, consists only of vacuum tube radios. Classy!

Most of the sets in his collection are the famous Abbotware "horse" radios, but the enviable menagerie also extends to book radios, globe radios, camera radios, piano radios, ship

radios, bottle radios, baseball and bowling ball radios, tire radios, lamp radios, and much more. The Abbotware horse radios alone come not just in various shapes, but in many different finishes as well. There can be close to 100 combinations. That's a lot of tubes in a lot of unusual housings!

Chris sums up his thoughts about his hobby this way: "There is no point in collecting if you can't share your collection with other collectors. If you don't share your collection you're simply a hoarder."

Not only does Chris collect, he also repairs the radios in his collection, keeping them looking great and in good working order. He also boasts an extensive collection of

*Abbotware "horse" radios, and friends*

*Bowling ball and baseball radios*

*Bottle radios*

*General Tire radio*

tobacciana items, such as aerospace lighters and ashtrays.

Not surprisingly, for someone with so many aerospace collectibles, Chris is a retired aerospace engineer and lives with his family in California. He has been collecting novelty tube radios since 1995, but says that he has always been a collector. He's also made many friends through the hobby and told A.R.C., "the second

*Camera radios*

*Coca Cola/Dr. Pepper radios*

joy is the friends I've made—even if just on the Web. They are like Pen Pals.”

Perhaps you'd like to drop Chris a note of thanks for sharing his collection with us. He can be reached through A.R.C. by email

at [arc@antiqueradio.com](mailto:arc@antiqueradio.com). We'll pass it along.

And if any other readers out there have a collection they think is worth sharing, contact us at the same Web address. Perhaps *your* novelties will make these pages!

## MEET THE CLUB

### Houston Vintage Radio Association— Good Company in the Lone Star State

BY EDITH LENNON

*President Bill Werzner acts as auctioneer and “looks for the higher,” ably assisted by club members Gilbert Hedge and John Schmitt, during the annual convention auction*

**T**he Houston Vintage Radio Association (HVRA) formed in November 1978 when 22 radio lovers, the original members of this Lone Star State club, joined forces to better promote the hobby they loved. Four of those pioneering people are still living and are no doubt extremely proud of what HVRA is today: a friendly and active group, 260 members strong, that over 30 years later remains dedicated to its founding mission of preserving and restoring antique radios.

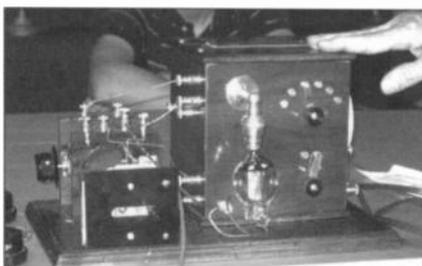

HVRA's membership roster is a testament to its success at promoting the club and its activities. It does so with a multi-pronged outreach that combines of word of mouth, its website

and newsletter, special mail notices, personal invitations, mall displays, fliers posted at retail locations and work places, and special invitations to local area ham organizations, to which many HVRA members also belong. Other outreach efforts include hosting displays in libraries, malls, at the Houston Heritage Society, and on the historic battleship, the *USS Texas*.

Providing ample opportunity to keep those hundreds of club members in close touch—and to welcome more—are HVRA's monthly meetings, held the fourth Saturday of each month, January through October, at the Bayland Park Community Center in Houston. Each meeting features a specific program, for instance a

*Convention attendees enjoy a radio auction*

*This homebuilt receiver with homemade spherical antenna won first place at a monthly meeting contest*

repair class, and an equipment auction. Many bargains show up at HVRA monthly meetings.

The monthly gathering isn't the only time to snag a bargain or swap a story, of course. The club's swapmeets are held once or twice a year, usually at a member's location and in conjunction with the annual convention, and offer a great chance to see, try, and exchange interesting collectables—and maybe take home a rare piece of radio history.

The annual convention, held in February, is the main event for the club. This gathering features several seminars, or "Tech Talks," three equipment auctions, a swapmeet, an "Old Equipment Contest" with a featured radio manufacturer, and an awards banquet. In addition, HVRA conducts two large auctions in the spring and fall and is also actively involved in assisting Texas Parks and Wildlife with radio-related restorations aboard the *USS Texas* at the San Jacinto Battleground State Park—a worthy cause indeed. If you're in the area, make sure to pay the battleship *and* the club a visit.

If you're not close enough to pop in on the club meets in person, however, the next best thing is pay a virtual visit to HVRA's website, at [www.hvra.org](http://www.hvra.org), where you'll find meeting and convention schedules, technical tips, and over a thousand photos organized alphabetically. Of course, the website also provides access to the club's attractive newsletter, "The Grid Leak," which is published bimonthly and features articles on radios and radio repair, pieces of interest to hobbyists, and club news.

For over three decades, HVRA has supported the preservation of radio history—now let's support HVRA. Contact the club today.

# A.R.C. ANNOUNCES...

## Mark Your Calendars for RADIO XLIII

BY CHARLES PERKETT AND JOHN TERREY

**R**ADIO XLIII, aka RADIO 43, is coming! The date is Sunday, February 19, 2012, in its usual location at the Westford Regency Inn & Conference Center in Westford, Massachusetts. The New England Antique Radio Club has picked up the sponsorship of RADIO XLIII.

It's hard to believe just how large this event has grown over the years. It is a far cry from its humble beginnings in June 1977 when "RADIO East" took place at the small airport in Plymouth, Massachusetts. The dozen avid radio collectors who had gathered there agreed to meet again. Thirty-four years and 42 shows later, what they began is thriving, as evidenced by 2011's RADIO XLII, which over 500 collectors attended. It's truly a successful antique radio show story.

At RADIO XLII in February, 2011, publisher/editor emeritus of *Antique Radio Classified*, John Terrey, announced that he and A.R.C. would no longer be managing the event. Terrey had sold the magazine in November of 2010 and no longer had the staff to run the show. No one at that time, including the New England Antique Radio Club, stepped forward to claim the reins of the next year's RADIO XLIII.

And so it remained, until the September 2011 Kutztown Antique Radio Meet at Renninger's Market in Pennsylvania. At Kutztown, Bruce Phillips, Tom Scarpelli, Jim Moneghan, and a few other New England collectors posed a question to themselves: "How could we enjoy old radio flea markets so much that we would drive eight long hours each way to participate in a Pennsylvania show and yet not even try to continue the highly regarded annual Westford, Massachusetts "RADIO" flea market, held at a great facility only an hour's drive away from home?" Their consensus was: "The New England Antique Radio Club needs to rededicate itself to our common purpose of having big old radio events in the northeast and reverse our earlier no-RADIO XLIII-show decision and make RADIO XLIII happen!"

Thanks to the joint efforts of catalyst Bruce Phillips, a newly recruited band of NEARC volunteers (17 at last count), NEARC's positive experience holding events at the Westford Regency venue (its fall swap meet was there), and Terrey's continuing support, the popular annual gathering is just around the corner—in more ways than one.

The next old radio flea market event, RADIO XLIII (or RADIO 43), will be held on February 19, 2012, from 8 a.m. to noon, in the Westford Regency's ballroom under the sponsorship of the New England Antique Radio Club. This "biggest radio show on the East Coast" isn't just back again in its same giant location; in reality, it never went away. We are now hard at work to make RADIO XLIII a success. Long live RADIO!

For information, contact Bruce Phillips at (603) 772-7516 or [radioorphanage@comcast.net](mailto:radioorphanage@comcast.net), or visit the NEARC website at [www.nearc.net](http://www.nearc.net).

*Charlie Perrett is the president of the New England Antique Radio Club. Contact him at [cperrett@myfairpoint.net](mailto:cperrett@myfairpoint.net).*

*John Terrey is Publisher/Editor Emeritus of Antique Radio Classified magazine.*

*Bruce Phillips, who spearheaded the New England Antique Radio Club's decision to sponsor RADIO XLIII and who has been a longtime exhibitor at the Westford RADIO shows, stands at his table at RADIO XXXVIII.*

## PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

**Zenith model 701** – Nice wood table radio made in 1933. Covered the AM band and was an AC/DC model. Ian Jarvis, Bismark, ND

**Atwater Kent model 165** – This wooden cathedral radio was sold by Atwater Kent in 1933. It uses a five-tube chassis and receives the broadcast band only. The grille decoration is very delicate. Dave Crocker, Mashpee, MA

**Emerson model AX-238 "Jewel Box"** – Rare chest-type design from 1938. Top lifts to reveal radio, which covers the AM band and is AC/DC powered. Peter Dieguez, Roslyn Heights, NY

*Attention Subscribers: You can access a color version of this article on the A.R.C. website...*

---

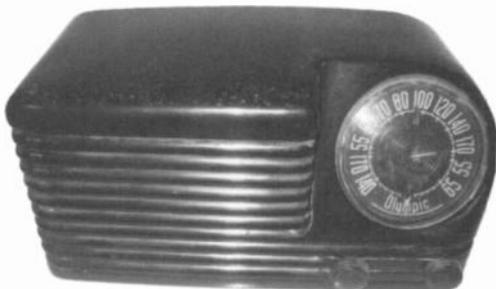

## PHOTO REVIEW

---

**Olympic model 6A-501** – Plastic table radio made in 1946. This same model was made by other manufacturers. It had five tubes, AM band, and was AC/DC. Dick Hecht, Springfield, IL

---

**Atwater Kent model 155** – This wooden table radio was manufactured in 1933. It has five tubes and receives the broadcast band only. Dave Crocker, Mashpee, MA

---

**RCA Radiola model 527** – Wood table radio from 1942. Covered both AM and SW bands. This model has the original back. Clark Henderson, Bisbee, AZ

---

*...find out how by visiting us today at [www.antiqueradio.com](http://www.antiqueradio.com).*

---

## PHOTO REVIEW

---

**Dictograph model B-20 "Silent Radio"** – Made in 1937 by Fada using a Fada chassis. Has unique sliding front door to hide radio. Peter Dieguez, Roslyn Heights, NY

---

**Emerson model 804A Radio** – This 1954 AM band clock radio also served as a desk set with holders for two pens. Telechron clock movement with built-in alarm. Peter Dieguez, Roslyn Heights, NY

---

**Arvin model 60R38** – A seven-transistor portable radio, the Arvin was manufactured by Noblitt-Sparks Insudtries of Columbus, IN. It was housed in a taupe and brown plastic carrying case with a gold wire handle. Clark Trissell, Lincoln, NE

---

*Attention Subscribers: You can access a color version of this article on the A.R.C. website...*

---

## PHOTO REVIEW

---

**Crosley Headphones Box** – The colorful package clearly advertises the headphones' \$3 price tag. Dave Crocker, Mashpee, MA

---

**Weston model 779** – Radio repairmen of the 1940s and '50s likely used this portable tester to analyze tube radio receivers. Clark Trissell, Lincoln, NE

---

**Capehart 406E Console** (above and right) – This beautiful (and expensive) piece sold for around \$.1500 when new, circa 1937. The "flipper" record changer's top door allow easy loading of up to 20 records at a time. Rob Paterson, San Diego, CA

---

*...find out how by visiting us today at [www.antiqueradio.com](http://www.antiqueradio.com).*

# CLASSIFIED ADVERTISEMENTS

**FOR SALE:** German tube radios. All working. Excellent/near mint condition. Very reasonable prices. Send for list. Ed Kalpa, 4622 Melbourne Ave., Los Angeles, CA 90027

**OLD TECH  
BOOKS  
& THINGS**

What am I doing after A.R.C.? I now have time to sort through the dozens (probably 100s) of boxes of duplicate items in my collection... books, catalogs, manuals, pamphlets, horn speakers, radios... and offer them via my long-dormant business: Old Tech - Books & Things. Old Tech handles more than just radio-related items... included are vintage television, wireless, skiing, computers, musical synthesizers, and more. For details on what's for sale, visit:

[www.oldtech.com](http://www.oldtech.com)

or contact:

John Terrey  
Old Tech - Books & Things  
P.O. Box 803, Carlisle, MA 01741

# RADIO XLIII

## An Indoor Old Radio Flea Market

**Sunday, February 19, 2012 — 8:00 AM to 12 Noon**

**Indoors in the Westford Regency Inn's large ballroom  
219 Littleton Road (MA Route 110), Westford MA**

**Buyers:** \$10 admission (spouse & children free). Registration begins at 7:30 AM

**Exhibitors:** Tables are \$25 each with a maximum of four tables.

Admission for yourself, spouse & children is free with your paid 2012 NEARC membership. Non-members may join for \$12. Pre-registered check-in begins at 7:00 AM.

**Information:** website: [www.nearc.net](http://www.nearc.net)

phone: Bruce Phillips — (603) 772-7516

**Overnight stay:** Phone Westford Regency Inn at (978) 692-8200. If reservations are made on or before February 10, 2012, mention "RADIO 43" for special rate.

**Directions:** Near Lowell, MA, take I-495 Exit 32. Head south following the "To Rt. 225" sign. At traffic light by gas stations, turn right onto Rte. 110 westbound for 0.4 miles. The Westford Regency is on the right. Enter using either of the two double-doors facing the large parking lot. If this parking lot is full, drive to other end of hotel for more parking.

# CRYSTAL CLEAR

By Maurice L. Sievers

## Volume 1

750 Illustrations – 570 Crystal Sets  
341 Detectors – 207 Crystals  
Perfect for the beginning collector!  
Useful for the experienced too!

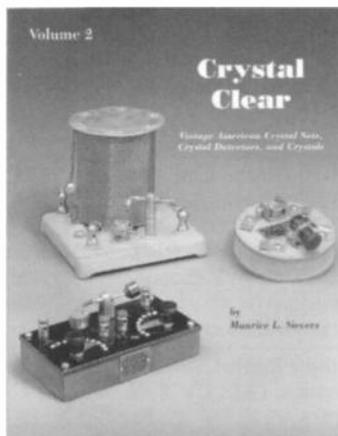

*Crystal Clear* is the most comprehensive reference for collectors, historians and anyone interested in early radio. In addition to the many excellent photos and reproductions of ads, *Crystal Clear* includes lists showing all sets by manufacturer, set name, selling price and date of manufacture. 8 1/2" x 11", 282 pages.

**\$29.95 – Softcover**

## Volume 2

*Crystal Clear, Vol. 2* supplements the first volume. It identifies an additional 172 crystal radio sets, 91 crystal detectors and 26 crystals by manufacturer, model, year produced, description and original selling price. Further research on many of the crystal sets covered in Volume 1. Detailed history on the Philmore Manufacturing Company and the Western Manufacturing Company. 8 1/2" x 11", 252 pages.

**\$29.95 – Softcover**

**Everything stocked and shipped promptly — Radio is our middle name.**

**Order today. We gladly accept:**

\$3.00 shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Non-U.S. orders, write for shipping costs, or use credit card. Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. New York residents must add sales tax.

## DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Since becoming publisher I've asked many of our subscribers about the benefits that come with a subscription to *Antique Radio Classified*.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits.

Let's take a look at them:

### ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

### ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are SEARCHABLE! If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

### ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

### FREE MONTHLY CLASSIFIED AD

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of *Antique Radio Classified* are the articles containing information that will help you in increasing your knowledge of our hobby.

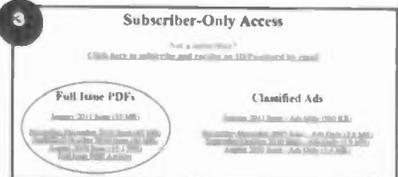

### HOW DO I ACCESS THESE BENEFITS?

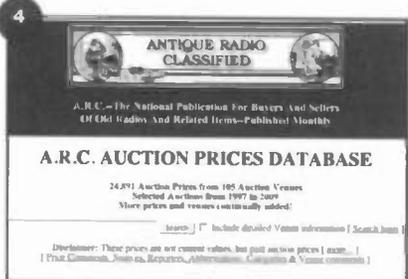

Your print subscriber user ID and password are on your mailing label. Online subscribers are emailed their user ID and password. Your user ID is the number after "SUB#" on your mailing label. Your password is the digits in brackets [xxxx] after your "SUB#".

Go to A.R.C.'s home page [www.antiqueradio.com](http://www.antiqueradio.com) and click on Subscriber Only Page.

On the Subscriber-Only Access page you can click on the Full Issue you would like to view or click on the Classified Ads section from that issue.

Or you can click on the Auction Prices Data Base. Just enter the item that you are researching.

# Season's Greetings

*This Holiday, give the gift every radio lover can use—a subscription to **Antique Radio Classified***

A subscription to *Antique Radio Classified* makes a great and affordable gift for friends (or a well-deserved treat for yourself!).

**1-year 12 print issues — \$36**  
**1-year online only — \$30**

It's easy. Just send in the postage-paid envelope found in this issue, visit our secure website, or call us toll-free at 866-371-0512.

And don't forget the A.R.C. bookstore. With over 50 books in stock, there's something for everyone. See our ad on pages 46 and 47.
