THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the QST-VIEW series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. QST Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets)! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and QST-VIEW has on-line instructional help for operating the QST-VIEW browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter

S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. Thousands sold at \$ 199. **SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts!**

We now have a small mountain of vacuum tubes at very competitive prices - Thousands sold since our first posting of these tubes. All types including receiving and transmitting types. Tube price listings on the web:
<http://www.radioera.com/tubes.asp>

**POSTMASTER: Send address changes to
Antique Radio Classified, PO Box 1558,
Port Washington, NY 11050.**

Printed in U.S.A.

PURPOSE - Antique Radio Classified is published for people involved in the radio collecting hobby. Its purpose is to stimulate growth of the hobby through the buying, selling and trading of radios and related items, and to provide a monthly forum for the interchange of ideas and information.

Publisher: Jon Kummer. **Editor:** Edith Lennon. **Publisher/Editor Emeritus:** John Terrey. **Founding Publisher/Editor:** Gary B. Schneider. **Contributing Editor:** John Terrey. **Contributing Writers & Consultants:** Mike Adams, Richard L. Arnold, Richard Begbie, Ray Bindliff, Norman Braithwaite, Ray Chase, Dave Crocker, Alan Douglas, Richard Foster, Jim Kreuzer, Phil MacArthur, Ron Ramirez, Gary Schneider, Daniel Schoo, Frank White.

CONTACTING ANTIQUE RADIO CLASSIFIED

All correspondence should be sent to:
A.R.C., PO Box 1558, Port Washington, NY 11050
Telephone: (866) 371-0512; Fax: (516) 883-1077
Email: ARC@antiqueradio.com
Web: www.antiqueradio.com

Your ads, renewals, letters, etc. can be handled faster and more efficiently if your name address and SUB# are written on each.

Unfortunately, A.R.C. is not staffed to answer all letters with questions about antique radios or requests for advice. However A.R.C. does solicit letters of interest from its readers and publishes them as space permits.

WEB. Antique Radio Classified issues are published on the web as PDF files for subscribers. Web-only subscriptions are available. One issue is available for viewing by all on the web as a sample.

ADVERTISING. Display and Classified advertising rates and artwork specifications are available on the web site.

PAYMENT. Please include full payment with your order or ad. A.R.C. does not carry accounts; all subscriptions, ads, etc. must be prepaid. Pay in U.S. funds. Checks drawn on a U.S. bank, money orders, VISA, MasterCard, American Express, Discover or PayPal. Make check out to "A.R.C." Subscriptions will be prorated to amount sent if amount is incorrect. *For your protection, no credit cards by e-mail; use our secure website instead.*

CHANGE OF ADDRESS. Please notify us in advance of a change of address. Send your new address, your old address, your SUB# and the effective date of the change.

PUBLISHING RIGHTS. Unless other arrangements are made:

(1) All received materials (ads, articles, letters, correspondence, email, photos, artwork, etc.) become the property of A.R.C. may be edited, combined with other material, published, and will not be returned. (2) For all received materials, A.R.C. is granted publishing and reprint rights in all forms of media including the monthly printed magazine, internet, etc. (3) Publication is subject to approval by A.R.C. and to time and space constraints.

MAILING OF ISSUES. U.S. subscribers can receive A.R.C. by First Class or Periodicals mail (Periodicals is the way most magazines are mailed). Mailing dates change each month.

DISCLAIMER. The publisher is not responsible for any buying and selling transactions incurred, or for any other use of the contents of this publication.

NOTICE. Subscription rates, frequency of publication, content, policies, size and ad details, and rates are subject to change at any time by A.R.C.

SUBSCRIBERS: All paid subscribers receive a FREE classified ad of up to 50 words in each issue.

Publisher's Comments

I would like start off by thanking everyone who helped make *Antique Radio Classified* a success during 2011. This is my 13th issue and it would not have been possible without the help of all so many people. So I'd like to take a moment to thank our subscribers, authors, contributors, our book customers, the people I've met who organize and attend conventions and swap meets, the antique radio clubs, Edith Lennon, our editor, the website visitors, and John Terrey, the former owner and publisher.

Part of our success to date was also achieved by a bit of "belt tightening," bringing in new books to the *A.R.C.* Bookstore, attending many meets, and the addition of some new columns, such as "Vintage Audio," "At Home with the Collector," and articles on how the various clubs operate.

One idea that recently caught my eye is the international radio restoration contest being conducted by the Quebec Antique Radio Collectors Society (SQCR), which you'll find announced on page 13 of this issue. For the past nine years they've run a club restoration contest, inviting their members to submit before and after photos as well as written details of a "basket case" radio they had restored. This year, SQCR has invited clubs from all over the world to participate in the contest. This is the kind of fun and challenging activity that brings together collectors in a common cause and helps to promote antique radio collecting and restoration. I encourage all clubs and their members to get involved. If you're not a member of a club, check out our updated club listings in the magazine or on our website.

In addition to the SQCR challenge this month's issue also brings you a Ray Chase report on the Pandur Auction in Pennsylvania. Our readers really appreciate these auction reports, with their wealth of information

on what's out there and what it's selling for, and we look forward to having more of them in the coming year. Dave Crocker submitted an excellent article on Atwater Kent cathedral radios. He adds a splash of local color with his tip on soaking up some A. Atwater Kent history of place—if you're ever in Kennebunkport, Maine...And, once again, Richard "Mr." Majestic writes about some very interesting Majestic radios. This month he covers in his inimitable fashion the "must-have" models Majestic produced.

As always, we invite your articles, "Photo Review" submissions, and letters to the editor (why doesn't anyone write us?). Perhaps you belong to a club merits a the spotlight in "Meet the Club," or maybe you're the proud owner of a one-of-a-kind radio collection that deserves a place of honor in "At Home with the Collector." Don't be shy—it's easy to contribute to *A.R.C.* Get in touch with us and we'll be walk you through the process.

Happy New Year to everyone and I look forward to meeting you at a convention or swap meet in the coming year!

Jon Kummer
Publisher

On The Cover

This month's cover shows an Emerson model A-130 wood table radio. Manufactured in 1936, it receives the AM band and contains six tubes (including the ballast). The case sustained heavy damage after it was purchased by an unnamed collector at a swap meet (who dropped it on the way to his car!). It's a good example of the kind of "basket case" radio we've all come across. If you've got a basket case of your own see the article on page 13 for info on the restoration contest being held by the Quebec Antique Radio Collectors Society.

AUCTION REPORT

Pandur Auction Richlandtown, Pennsylvania, July 30, 2011

BY RAY CHASE

Decorated horn with Edison cylinder machine

The Pandur auction was held last summer at Benner Hall in Richlandtown, a small village near Quakertown, Pennsylvania. It was advertised as a radio and phonograph auction and promoted in area auction papers and on AuctionZip.com with 157 photos of the items to be sold. The event started at 10 a.m. on Saturday, with viewing at 9 a.m., and auctioneer Joe Pandur provided gavel services. The day was sunny and warm and a fairly good crowd showed up for the viewing.

As the promotional photos showed, this was going to be an auction heavy on radio

parts, tubes, test equipment, and acoustic phonograph parts. There were only a few exceptional radios, and many of the remainder were in poor shape. Also up for auction were numerous empty radio and phonograph cabinets, seven tube caddies, and the largest pile of Rider volumes I have ever seen.

During the viewing some prospective bidders left after seeing the quality of the goods. Over the course of the auction the audience gradually dispersed further, dwindling to a few diehards and those who were waiting for the phonograph parts to be offered. The auction it-

Zenith consoles

self was rather haphazard; there were only two runners who soon were overwhelmed to the extent that members of the audience stepped in to help the auction along. The console radios were located in the rear of the room, and as there were no hand trucks available, they were auctioned in place, interspersed with items from up front. The result was that the action switched back and forth from front to back. I have to say, it was a strange auction and not very well run.

Although (or possibly because) many of the items were not in good shape, it appeared to be a real buyers' market. Of the 247 items I recorded, 37 of them were \$1 sales, and I did not bother to include them in the detail listing. Twenty-three items, including quite a few of the over 24 console radios offered, did not get a bid at all and ended up as "no sales." Of the 247 items that did sell, the average lot price was \$15.16.

Interspersed in the sale were some real bargains for the perceptive bidder. Surprisingly, a large 1940's Chinese motif Stromberg Carlson radio/phonograph/TV (it had a TV made by Dumont) that was in pretty good shape could not get a \$5 opening bid and went unsold. This

is a fairly rare TV console that would go well in any radio/TV collection, so it may have proved the old adage, "if you don't come with the means to transport it, you can't buy it," no matter how good the price is.

All in all, it was not a great sale for radio collectors, and the prices realized indicated as much. I suspect that phonograph collectors and repair people did quite well as there was a plethora of phonograph parts and those prices seemed quite reasonable, although I am

Stromberg Carlson radio TV phono combo

Radio consoles

Sparton console with Kellogg tubes

Phonographs

not that knowledgeable about acoustic phonographs. I stopped recording results at 1:05 p.m. after all the radio goods were sold, but there were still batches of phonograph motors, parts, and Victrola cabinet pieces to be auctioned. The pile of 65 or so Rider manuals had not been offered by that time, so I do not know if they sold. I wonder if the auctioneer had to cart them away along with the console radios that did not sell! If so, maybe he'll think twice before having another radio/phonograph sale.

I believe that most of the goods were from one estate. Due to the short viewing time, I was not able to record many radio model numbers, so the accompanying list basically describes the radios as they were presented at time of sale.

The 6-percent Pennsylvania sales tax was collected as was a 10-percent buyer's premium and are not included in the following prices. The sales that I recorded totaled up to only \$3,746.00.

Detail Listing

Admiral table radio/phono, 3 knobs, fair	5	Fada radio plus a portable plus 2 other radios, all poor	2.50
AK metal "coffin" set, missing a knob	7	Firestone farm wood table set, 2 knobs, VG	25
APC wood case speakers (2), heavy	5	Fisher 601 wood case receiver/amp, good	2.50
Arvin futuristic plastic set, 4 knobs, good	12.50	Fisher AM/FM stereo receiver/amp	5
B&K 500 suitcase tube tester	27.50	Freshman Masterpiece console three dialer, poor	5
Box lot of parts	3	Garod turntable & changer	3
Box lot parts	2.50	GE brown plastic, 2 knobs, good	5
Box lot, large; hardware, paper & parts	2.50	GE console radio, 4 knobs + PB, fair	2.50
Box of capacitors	3	GE console radio, 5 knobs + PB, missing one knob, good	25
Box of dial lamps	15	GE console radio, poor	2.50
Box of parts, car radio, etc., 2-meter & key	10	GE lo boy console, 3 knobs, fair	5
Box of tools & knobs	22	GE tube caddy, empty	9
Box parts	10	GE wood table set, 4 knobs + PB, fair	20
Box parts	2	GE wood table set, rounded end, 4 knobs, good	50
Box parts	24	Gloritone cathedral, 3 knobs, good	42.50
Box parts, capacitors & resistors	7.50	Gramophone case & parts, include a reproducer	100
Boxes of parts & hardware (2)	3	Grundig Majestic (German) radio/phono console	5
Case w/15 plastic drawers of parts	2.50	Grunow console radio	5
Case w/40 plastic drawers of electronic parts	30	Hallicrafters S-38, poor and RCA 100 speaker, no grill cloth else fair	7.50
CBS tube caddy w/tubes	2.50	Hallicrafters S-xx small multiband table set	12.50
Century wood case tube tester	25	Heathkit large 5" scope, good	7.50
Chalk Nipper, 12", good	55	Heathkit signal generator	5
Children's records, two trays	15	Hickok suitcase tube tester, poor	37.50
Crosley maroon plastic set w/crack, 2 knobs but one is missing	4	Home made multitester	2
Dewald wood table set, 2 knobs, good	25	Jackson suitcase tube tester, good	42.50
Drawer & boxes of parts, etc.	2.50	Lafayette large tombstone, 5 knobs but all are missing, fair	65
Edison Home cylinder machine, oak case w/crane, cover & decorated horn, VG	300	Large box of parts	2.50
Eico AM/FM tuner, no case	7	Lot of children's records	20
Eico signal tracer	6	Magnavox clock/radio, vertical orientation, nice	9
EMC wood case tube tester	27.50	Majestic small wood set, 2 knobs, good	5
Emerson "pocket" radio, cream color plastic	12	Mercury suitcase tube tester	45
Emerson AM/FM wood table set, 4 knobs but one is missing else good	5	Metal pink phonograph petal style bell	40
Emerson brown plastic set, 3 knobs but one is missing	5	Military, 1M frequency meter power supply	2
Emerson small tombstone, repainted, 3 knobs, poor	11	Military, Western Electric headset	15

VINTAGE AUDIO

Atwater Kent's First Cathedral Radio

BY DAVE CROCKER

In August of 1930, most radio manufacturers were influenced by the introduction of Philco's revolutionary model 20 "Midget" table radio with a curved top. It was dubbed the "cathedral" and Atwater Kent joined the revolution.

By all reason, the 1931 introduction of Atwater Kent's first cathedrals should have been in numeric order; that is, model 80, 81, 82, 83, and so on. You'd think so, right? Not so. The AK 84 came out first and was followed by the 80 and 82 cathedral-styled receivers (both 1932 sets). These later models used the same chassis, but added an additional 24A tube for AVC, which was quite early for Atwater Kent to be using this feature. The 80 and 82 also had different grille designs and "rope" trim on the front pilasters.

To make matters even more complicated, there were *seven* different types of the model 84 cathedrals. Let me explain, but keep in mind that I'm not a master of electrical tech-

nology and you won't see words like kilocycles, bicycles, and megacycles. I'm a history-oriented person, and I ask you to bear with me.

Lucky Seven

The Atwater Kent model 84 receivers (see **Photos A and B**) came out in early 1931 and used type 24A tetrode tubes, whereas the model 80 cathedral, which was introduced just after the 84 was announced, operated with type 35 tubes. Another important distinction is that the 84 had Atwater Kent's drawing number of 17500; the 80 had drawing number 20900 and the 82 had drawing number 21000. All this indicates that the 84 was Kent's first cathedral.

As there are so many different tube complements in 80 series of sets, I'm only mentioning those in the 84. Of the seven types of model 84s, the first was the "early" model 84, which was a six-tube superheterodyne receiver advertised as the "Golden Voiced" compact. Its tube complement was as follows: three type 24s; one type 27; one type 47; and one 80 rectifier (see the chassis pictured in **Photo C** and schematic provided as **Figure 1**). It had a pointed-top cathedral-style cabinet with somewhat plain front pilasters. Its arch mea-

Photo A. The 1931 Atwater Kent model 84

Photo B. The front dial face of both models 84

Figure 1. Schematic of the "early" model 84 receiver

sured 19 inches tall and its three control knobs formed a triangular pattern. The top knob was used for the main tuning control, the bottom left knob was for volume only, and the bottom right knob was the on/off switch. Located above these was the familiar "f-owning face" bezel with a moving pointer on a dial from 55 to 160. Its price in 1931 was \$69.50.

Shortly after that version came out, the model 84 "Deluxe" (or "late" model) was released. It featured the same style cabinet, but it was adorned with added curved woodwork from the plain pilasters up to the pointed top.

Photo C. Chassis of the early model 84

At Water's Edge

Well, I think I've thrown enough numbers at you, so now a little local color...

If you're ever in Kennebunkport, Maine, be sure to go down through the center of town to Ocean Avenue past the yacht club and the big white Colony hotel on the water. At the next curve you'll see a stone church, St. Anne's Episcopal. The rectory of the church (pictured at right), which was built in 1891 for the Nesmith family of Lowell, Massachusetts, was purchased in 1910 by A. Atwater Kent who named it Water's Edge. I don't know exactly how long he resided there, but I do know he was still there in the

1920s. Since that time the carriage house was moved and now serves as an addition to one of the houses just before the site. Take a look inside the gate—you are welcome.

On this type, the bottom left knob controlled the on/off and volume, and the bottom right knob was for tone only. The tubes used in this set were as follows: two type 35s; one type 24; one type 47; one type 27; and one 80 rectifier.

The Complete 84 Series Sets

The 84 series radios included the models 84, 84-Deluxe, 84-F (a 25-cycle set), model 84-Q (a seven-tube, battery-operated set with a price tag that went up to \$94.50), the 84-D (not "Deluxe" but a 110-volt DC receiver for inner-city use), the 84-Z (a 32-volt farm set that probably ran off a wind charger), and the

Photo D. The Atwater Kent model 80 cathedral

84-L (I am personally unfamiliar with this last one, but it is on Atwater Kent's product list).

The Complete 80 Series Sets

The models 80 (see Photo D), 82, 84, 84-D, 82, 82-F, 82-Q, and the mysterious 84-Z were all "compact" cathedral-style receivers. The models 83, 85, 85-Q, 86 (a Canadian set?), 87-D, and 89 were either lowboy or highboy consoles. The models 80, 82, and 84 were used inside Atwater Kent's grandfather clock radio, in which the entire cathedral cabinet actually slid into the rear of the tall grandfather cabinet, although some of these tall cabinets used the chassis only inside. Rumor has it that the grandfather clock sets with the slide-in chassis were actually made by manufacturers other than Atwater Kent. The model 81 was an auto radio. The 84-L could have been an export set.

Many thanks to Jim Moneghan, Lincoln, RI, for his assistance with this article.

Dave Crocker, a graphic artist who retired from Polaroid Corporation, is also a semi-retired member of the A.R.C. staff. Dave has been collecting radios for over 42 years, and many of those years have been spent researching and collecting radios made by the Crosley Radio Company.

A.R.C. ANNOUNCES

Get Ready for the First International Restoration Contest

BY STAFF

Here at *Antique Radio Classified* we're always on the lookout for ideas that help promote the hobby of antique and vintage radio collecting. And we just found a great one!

For the past nine years, the Quebec Antique Radio Collectors Society (SQCRA), a group of collectors mostly from the Canadian province of Quebec, has been holding a radio restoration contest for its members. For the 10th competition, they're taking the challenge to an international level, inviting all interested clubs to participate in a first International Restoration Contest.

Maybe you already have a restoration contest in your club. It would be interesting if all clubs join this international event, perhaps following your own local competition. This may be the perfect way to spur new friendships, stimulate exchanges between clubs, and promote conservation of antique radios through their restoration.

The rules are simple: interested participants have one year to restore a basket case radio. Photographs must be taken before the restoration starts and at all steps of the process. One year later, the participants must present their work to a panel of judges in a local club event. Photographs taken during the process will help judges better understand the challenges participants faced in order to finish their projects. The

individual clubs may give a prize (perhaps a free one-year membership) to the local winner.

The criteria for evaluation are submitted beforehand to all the clubs interested and are subject general consensus. Once every club has finished its local contest and determined the winner, a pool of all the first prizewinners would be created and submitted to an international panel of judges. This panel would comprise one member elected locally from each participating club. Pictures from each contestant would be submitted through the Internet to each judge and results compiled to determine a winner and two runners up. The clubs that don't have a contest could nominate someone to represent their club at this contest.

The goal, of course, is to promote the conservation of the technological/historical heritage, to motivate our common interest, increase the general knowledge of antique radio technology, increase club exchanges, and see what is done in other clubs.

If you are interested in participating, contact the SQCRA—they would be happy to include your club in this new international event. As a first step they will create a list of all participating clubs. Afterwards, they will invite all organizations to provide the name and email address of the selected judge who will become the contact for the club in order to create the international panel.

RESTORATION REPORT

“Must-Haves” from the Majestic Radio and Television Corporation

BY RICHARD MAJESTIC

In June of 1936, all Majestic intellectual property and trademark rights exchanged hands again, purchased this time by the Triangle Electric Company of 600 Adams Street, Chicago. Triangle Electric, owned by Davega Stores Corp., a division of Atlas Stores Corp., had been a wholesaler of radio sets and electrical apparatus in the mid-West since 1920. Their past clients, numbering some 2,000, had included Kolster and Zenith, and they now planned to manufacture and nationally distribute “a complete line of Majestic radio sets, refrigerators, and household utilities,” for which they planned an expansion and conversion of their warehouse facilities on Adams Street.

However, in October, Davega sold the rights to the Majestic Radio and Television Corporation, which it had been instrumental in forming and newly incorporating in September. The management team for this new company was, as it had been at Triangle, under Davega Stores. Davega was principal stockholder and had a cash investment exceeding \$300,000 in the new venture.

The reformed Majestic would stay in the manufacturing business through 1955. However their journey through the years was a turbulent one, with several Chapter 11 reorganizations and changes of ownership. Their products are today well known among radio collectors and include such gems as the Charlie McCarthy and Melody Cruiser models, to name just two. That is, however, another story.

—Excerpted from “The Saga of Grigsby-Grunow Majestic/Part 2,” by Paul Turney, which appeared in the September/October issue of *Antique Radio Classified*

Although I had always liked the appearance of the Majestic Charley McCarthy and Melody Cruiser novelty radios I never thought their manufacturer had any connection to Grigsby, Grunow, or Heinz. Apparently, I was wrong. Majestic Radio and Television was formed by B.J. Grigsby who ran it through 1955, which was more than Grunow had been able to accomplish. Although Roger Majestic was producing some very fine radios during the period from 1930–1942, there was no connection between the two companies; Roger Majestic radios were made and sold in Canada with Grigsby-Grunow Majestic made in the United States and sold mostly in the U.S. and Europe.

The manufacture of the Melody Cruiser started up again in 1946 after the war. A few

My recently acquired Charley McCarthy radio, pictured here, is the dark brown painted Bakelite version, chassis II, probably made 1940–41. The cabinet has been repaired and the figure of Charley McCarthy repainted, but with the wrong shirt color.

radios sold in 1946 were the same as the 1942 versions; later a third chassis was designed and a longer ship with a wider cabin was sold. This design used the same sails and three masts, but it had a larger dial opening to the right of the tuning knob. The pre-war Majestic Charley McCarthy and Melody Cruiser novelty radios still are collector "must-have" radios and command a good resale price if in good original condition. With the radio collecting market currently way down, the prices are low and it's a good time to buy. A few years ago a mint Charley McCarthy could command \$1,200 to \$1,500, but sellers are having trouble getting \$500 today. The Melody Cruisers are running about the same; I bought

my Melody Cruiser for \$173, plus shipping, but had to put into it another \$180, including parts, tubes, lacquer, and my time.

Charley McCarthy

The cabinet of the Charley McCarthy features an unusual design of "modern plastic-ivory or walnut," and the chassis holds a powerful six-tube AC-DC superheterodyne, as the 1939 Majestic Catalog boasted, stating:

Charley McCarthy Radio

The most widely publicized radio in the history of the industry. Over the air and through the movies, Charlie McCarthy has been introduced to

The Charley McCarthy radio was rousinglly promoted in this early Majestic brochure.

The speaker of my Charley McCarthy is original and in perfect condition. Note that in chassis II the 455 kHz IF transformers are in shield cans, unlike the chassis I version. Note the L49-B ballast resistor in a sealed metal tube.

America's millions. Absolutely a "must have" item for every radio department. The demand has been created and the aggressive dealer will promote and capitalize on Majestic Charlie McCarthy.

The cabinet is an unusual design in ivory plastic. The chassis, a powerful 6 tube AC-DC superheterodyne.

CHARLIE McCARTHY: You've heard him on the air, you've seen him in the movies—NOW, put him in every home.

6 Tube AC-DC Superheterodyne

Dual Purpose Tubes Equivalent to 7 Tube Performance

Electro Dynamic Speaker

Sensitivity Down to 15 Microvolt Absolute Beam Power Output Two Watt Output

Six Tuned Circuits

Highly Sensitive Superheterodyne Circuit Automatic Volume Control

Illuminated Full Vision Slide Rule Dial

Range: 535 to 1750 KCs (Geis Police Calls)

Tubes Used: 1-6A8GT 1-25L6GT 1-6K7GT 1-25Z6GT 1-6Q7GT 1-L49B

Cabinet: Modern Plastic-Ivory or Walnut

Cabinet Dimension: 53/16" Deep, 6" High, 7 1/4" Wide, Shipping Weight: Six Pounds (Packed in Individual Cartons)

On the top right of the photo is the L49-B ballast resistor in a sealed metal tube. The filament string is 0.25 amps, as is the 44 pilot lamp. Although the 1939 catalog calls it a six-tube radio, it is in reality just an All American Five. It incorporates a 6A8GT pentagrid converter, 6K7GT IF amplifier, 6Q7GT 2nd de-

The Charley McCarthy chassis after replacing all capacitors. Note that I used metallized polyester film capacitors, and the Orange Drop is a 0.01 μ F 1600V capacitor across the AC power line.

rector, AVC detector and 1st audio, 25L6GT audio power output, and 25Z6GT half-wave rectifier, both plates and cathodes tied together. The L49-B ballast drops 49 VAC and dissipation is 12.3 watts.

Because the Charley McCarthy is so compact and the case very small, the radio runs quite hot. The original Bakelite case had a small sheet of 1/8-inch asbestos at the top on the flat part of the cabinet. I can imagine if this little radio were left turned on in a book shelf surrounded with books it could set the owner's house on fire. Filaments alone are 30 watts, add the B+ load is a very hot 45 watts.

The radio has amazingly good performance and plays loud and very clear. Majestic claimed 15 μ V sensitivity, and I can verify that number.

Melody Cruiser

I recently acquired a Majestic 1S49 Melody Cruiser clipper ship radio and restored and re-finished it. The sails polished up nicely and didn't require re-chroming. It also still had the original back with original seals over the back screws and shock preventers. As you can see from the accompanying photo, its chrome sails are shining brightly on its three masts and it sports a bow plate that reads, "Majestic Melody Cruiser." This set is circa 1941 and uses a similar chassis and dial to the Majestic "Charlie McCarthy" radios.

Here's my Majestic 1S49 Melody Cruiser clipper ship radio electronically restored. The sails polished up nicely, with no re-chroming necessary, and I re-finished the attractive wood ship.

Taking the length of the extended sails into account, the Majestic's Melody Cruiser is a little over 19-1/2 inches long, 16-5/8 inches tall, and about 6 inches across. Fortunately, my ship radio required very little refurbishing to bring it up to full specs electronically. Al-

Rear view of my Majestic Melody Cruiser. It had the original back with its anti-shock seals still located over the back hardware, which screw into the electrically hot chassis.

though it had all its original tubes and played fine after warming up for 15 minutes. I recapped it and changed every tube.

The previous owner had stripped and sprayed with lacquer the interesting ship-shaped cabinet, but luckily it only required cleaning, masking and a re-stain of the dark brown lower portion, as originally done. After removing the masking, I put on seven coats of lacquer. It took a bit of elbow grease on the polishing wheel to shine up all the sails and mast pieces, which were chrome-plated brass that had been painted silver. I don't know if that was factory original, but I left the masts and hardware polished chrome over brass. I replaced all the decorative rigging wire with beading cable from Hobby Lobby. The cable is 0.019-inch diameter and made up of seven strands of stainless steel wire covered with nylon; it looks authentic and is very flexible.

The AM receiver is of extremely compact design. Its 4-inch original speaker produces

a nice full-bodied sound with a crisp highs. The radio chassis appeared to be 100-percent original, right down to its fragile celluloid frequency scale indicator and gold fabric grill cloth. All the tubes were original, with 1941 date code, and only the two separate filter electrolytics had been changed. Majestic used metalized film capacitors encapsulated in Bakelite cases that looked like large flat mica capacitors. When I found a 0.02uF 400V capacitor across the AC line, which had exploded in the Bakelite case. I decided to change all the capacitors except three real mica capacitors.

This ship radio model incorporates a five-tube AC-DC powered standard-broadcast superheterodyne receiver. The tube line-up consists of a 12SA7GT pentagrid converter, 12K7GT IF amplifier, 12Q7GT 2nd detector, AVC detector and 1st audio. 35L6GT audio power output, and 35Z5GT half-wave rectifier. This is almost, but not quite, the standard

The Majestic Melody Cruiser model 1S49 chassis from 1941, shown here, was similar to the one used in the Majestic Charlie McCarthy radios; they also used similar dials. Note the small size of this radio chassis.

The tube layout chart. Note the use of a 35L6GT, available when this Majestic 1S49 radio was made. The 50L6GT with the same heater current was not available; also the 12Q7 metal tube was later replaced with the 12SQ7 metal and 12SQ7GT glass versions.

octal AA5 tube set (12SA7GT, 12SK7GT, 12SQ7GT, 50L6GT and 35Z5GT); as the 50L6 was just becoming available about the time this radio was being manufactured, Majestic added a 68-ohm 5-watt resistor in the 0.150A filament string. The lower filament current reduced the power dissipation to 31 watts from the 45 watts of the earlier Charley McCarthy radio.

The 1S49 chassis uses open IF transformers, one above the chassis and the output below, which makes the radio very difficult to align because coupling causes the radio to oscillate. With some shielding and careful location of the wires and test equipment cables, however, I was able to obtain good alignment. To prevent the radio from setting its wood case on fire, the manufacturer installed in the cabinet a 1/8-inch sheet of long-fiber asbestos, as well as a thin copper sheet on the right side, bottom and top, for shielding of the IF transformers. As with the

Charley McCarthy radio the sensitivity is a good 15uV.

As I said before, this is a "must have" pair of radios for the serious radio collector. The good news is that because the market is down, this is a great time to get one, or both, for your collection. Good luck.

Richard Majestic has over 30 years experience in broadcast television engineering system design and engineering management and holds 10 patents for digital servo system designs, cryogenic instrumentation, and low noise analog circuit designs. He is the president of the New Mexico Radio Collectors Club, a group of engineers and scientists dedicated to preserving early radio, television, and computer products.

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

Zenith Model 6-S-128 – This set's big black dial tunes American, foreign, police, amateur, aviation, and marine bands. In 1937 it sold for \$59.95. Dave Crocker, Mashpee, MA

Motorola Model 9-VT1 TV – Manufactured in 1949. Wood tabletop radio in red mahogany. Comes with 8-inch CRT. Raymond Matthews, Orlando, FL

Fisher FM-100-B FM Tuner – This 12-tube FM tuner from 1963 featured variable muting, signal meter, and stereo indicator light. Alvin Savella, Little Neck, NY

**OLD TECH
BOOKS
& THINGS**

What am I doing after A.R.C.? I now have time to sort through the dozens (probably 100s) of boxes of duplicate items in my collection... books, catalogs, manuals, pamphlets, horn speakers, radios... and offer them via my long-dormant business: Old Tech - Books & Things. Old Tech handles more than just radio-related items... included are vintage television, wireless, skiing, computers, musical synthesizers, and more. For details on what's for sale, visit:

www.oldtech.com

or contact:

John Terrey

RADIO XLIII

An Indoor Old Radio Flea Market

Sunday, February 19, 2012 — 8:00 AM to 12 Noon

Indoors in the Westford Regency Inn's large ballroom
219 Littleton Road (MA Route 110), Westford MA

Buyers: \$10 admission (spouse & children free). Registration begins at 7:30 AM

Exhibitors: Tables are \$25 each with a maximum of four tables.
Admission for yourself, spouse & children is free with your paid 2012 NEARC membership. Non-members may join for \$12. Pre-registered check-in begins at 7:00 AM.

Information: website: www.nearc.net
phone: Bruce Phillips — (603) 772-7516

Overnight stay: Phone Westford Regency Inn at (978) 692-8200. If reservations are made on or before February 10, 2012, mention "RADIO 43" for special rate.

Directions: Near Lowell, MA, take I-495 Exit 32. Head south following the "To Rt. 225" sign. At traffic light by gas stations, turn right onto Rte. 110 westbound for 0.4 miles. The Westford Regency is on the right. Enter using either of the two double-doors facing the large parking lot. If this parking lot is full, drive to other end of hotel for more parking.

NOTE: Changes, cancellations and errors do occur. To avoid disappointment, verify place, date and time, especially for events which are new to you.

BRAND NEW!

**Lee de Forest - King of Radio, Television, and Film
by Mike Adams**

A fascinating glimpse into the early role that the designer of the audition played in developing the mass entertainment media we enjoy today.

**Publisher release date, November 1, 2011
\$27.95 - soft cover**

Everything stocked & shipped promptly. Radio is our middle name.

**A.R.C., PO Box 1558, Port Washington, NY 11050
Toll Free: (866) 371-0512 • Fax: (516) 883-1077
E-mail: ARC@antiqueradio.com; Web: www.antiqueradio.com**

Order today. We gladly accept:    

\$3.00 shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Non U.S. orders, write for shipping costs, or use credit card. Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. New York residents must add sales tax.

CLUBS: Send antique radio club and meet information to A.R.C. for free listing here, as space permits. Sorry, we don't have room for hamfests. Always send a SASE when writing to clubs!

DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Since becoming publisher I've asked many of our subscribers about the benefits that come with a subscription to *Antique Radio Classified*.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits. Let's take a look at them:

ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are **SEARCHABLE!** If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

FREE MONTHLY CLASSIFIED AD

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of *Antique Radio Classified* are the articles containing information that will help you in increasing your knowledge of our hobby.

HOW DO I ACCESS THESE BENEFITS?

Your print subscriber user ID and password are on your mailing label. Online subscribers are emailed their user ID and password. Your user ID is the number after "SUB#" on your mailing label. Your password is the digits in brackets [xxxx] after your "SUB#".

Go to A.R.C.'s home page www.antiqueradio.com and click on Subscriber Only Page.

On the Subscriber-Only Access page you can click on the Full Issue you would like to view or click on the Classified Ads section from that issue.

Or you can click on the Auction Prices Data Base. Just enter the item that you are researching.

Antique Radio Charlotte

March 22-23-24

Thursday-Friday-Saturday

At the Sheraton Charlotte Airport Hotel
I-85 South at Exit 33, The Billy Graham Parkway
Charlotte, North Carolina

Featuring a Giant 2 day flea market (starting Friday morning),
Old Equipment Contest, interesting programs and 2 great auctions.
PLUS new this year, every flea market vendor
will be eligible to win \$500 in CASH.

There will be 2 added feature events for 2012, both starting on
Thursday morning at 9 AM;

the Tube Collectors Association "TCA" will hold a special tube
collectors meeting. There will be presentations and a
tube trade & swap session.

The second special event will be the

Charlotte International Cryptologic Symposium

This will be the first event of this type ever held in the USA that's open
to the public. We have noted Crypto historians and collectors coming
from all over the world, including Norway, Canada, Germany,
Bletchley Park in England and The NSA's Center for Cryptologic
History at Ft. Mead. The programs scheduled almost completely fill
the available time for all three days. There will be Crypto equipment on
display that's never been shown in public before.

Both of these Special Events start at 9AM Thursday morning.

To take part in either of these events you must be registered
for the conference, one registration gains you admission to the
TCA meeting, the Crypto Symposium and Antique Radio Charlotte.

If you have attended our Conference in the last 4 years, you will be mailed a brochure.
For a detailed Conference schedule, registration information and a printable
Pre-registration form, please visit our web page at CC-AWA.org

Send Pre-Registrations to:

CC-AWA 2012 c/o Chip McFalls
742 Southern High School Rd.
Graham, NC 27253
