Estes Auctions

Specializing in Vintage Radios
Complete Auction & Appraisal Service

Vintage Radio Auction Saturday, May 19, 2012 - 10AM EST

At the Expo Auction Center
8157 Garman Rd., Burbank Ohio

From I-71 Exit #204 turn south on SR #83 then turn left at the Love's gas station onto Garman Rd., follow it ¼ mile to the auction.

A nice variety auction with a large selection of amateur radio receivers and transmitters as well as many circa 1920's battery powered radios, lots of other type radios. Some of the amateur radio items are Ten-Tec Omni V, Ten-Tec Paragon II, Ten-Tec Triton I, Ten-Tec Argonaut 509, Ten-Tec Century 122, Ten-Tec Corsair, Ten-Tec PLS, Ten-Tec Omni A, Omni D, Ten-Tec Model 526, Rare Drake 1A Sideband Receiver, Drake TR-7A, Drake TR-7, Drake TR-5, Drake RV-7 Remote VFO, Drake TR-4, Drake RV-4, Drake TR-4C, Drake RV-4C, Drake T4-XC, Drake THXB, Drake TR-6, Drake SPR-4, W4 watt meter, Drake SW-4, Drake TR-4C, Drake MN-2000, Drake R-4B. Collins 51-S1, 51 J4, Collins 75A1, Collins KWM-2, Collins KWM-2A, Collins 30L-1, Collins 75S1, Collins 75A3, Collins 75 S 3C, Collins 75S2, Collins 75S3A, Collins 75A2, Collins 32S2, Collins 32S3, Collins PM-2. Hammarlund SP-600, Hammarlund HQ-140XA, Hammarlund Super Pro, Hammarlund HQ-170, Hammarlund HQ-200, Hammarlund HQ-110A, Hammarlund HQ-180. Heathkit SB-301 w/PS, Heathkit SB-300 w/PS, SB-401 w/PS, SB-400 w/PS, Heathkit SB-200 linear amp, SB-101, SB-100, Heathkit SB-600, Heathkit 104, Heathkit SB-303, Heathkit SB-313, Heathkit SB-110, Heathkit SB-310, Heathkit hard to find AT-1 Novice transmitter, Heathkit DX-35, Heathkit "Warrior," Heathkit "Mohawk," Heathkit "Seneca," Heathkit "Apache." We will also offer speakers, VFO's, power supplies, lots of fittings and parts for the ham radio equipment. Cathedral and tombstone radios. Very nice Atwater Kent model 90, Philco 16B, Philco 60, Grundig with chrome trim, RCA 7T, Crosley 124, Philco 70, Majestic tombstone, and others. Early radios, nice Federal Jr. set, beautiful Atwater-Kent model 10 breadboard, several Atwater Kent model 20's & 30's that look new, A Grebe MU-1, lots of other early sets. We will offer over a dozen console type radios in the sale with several very good condition Zenith consoles, a selection of table radios from a private collection in Cincinnati. Watch Auction Zip for pictures. Horn speakers, cone speakers, mantel speakers, lots of good test equipment including tube testers. A large assortment of tubes and will feature transmit tubes, early type tubes 201A, 301A, 01A, 80, 47, 46, 42, 41, 30, 27, 26, and lots more. Audio type 6V6, 12AX7, 12AU7, 2A3, 12AT7, 6L6, Two type 50 ST, and others. Our early sale will feature lots of parts, test equipment, part sets, hardware, books and manuals, starting at 8:30 am until 10 am. Then the main sale starts. The main sale will offer many radio books, magazines and manuals. Another good sale we hope you can attend.

Don't forget the Early Sale from 8:30 AM until 10 AM

Terms: Cash/Check/Visa/MesterCard; 5% Gallery Fee

THE HISTORY OF RADIO ON CD-ROM

Radio Era Archives produced the QST-VIEW series of CD's for the American Radio Relay League (ARRL) and over 1/2 million CD's have been sold. QST Magazine has been continuously published since 1915. We are now proud to announce that this small mountain of CD's (about 35) is now available exclusively from REA (All Sets) ! Every magazine published from 1915 to 1994, front cover to back cover, every article and column, all accessible with our database search engine.

QST-VIEW CD Edition truly captures the history of radio in 11 volumes. All CD's warranted to work on all Windows platforms from Windows 95 through XP. Each set is \$ 39.95 and we have all sets in stock. The sets are: 1915-1929, 1930-1939, 1940-1949, 1950-1959, 1960-1964, 1965-1969, 1970-1974, 1975-1979, 1980-1984, 1985-1989, 1990-1994. Each set of years is a self-contained set so you can operate one or all sets together. Now that large capacity hard drives are so inexpensive, the 36 CD's can be loaded on about 20Gb of hard disc space for instant searching and viewing without having to swap discs! Full information is provided with each purchase and QST-VIEW has on-line instructional help for operating the QST-VIEW browser!

EACH SET \$ 39.95 (specify the years)

ALL 11 SETS \$ 379

S&H USA for first set is \$ 5.00, add \$ 1.00 each set thereafter

S&H Export first set is \$ 15.00, add \$ 2.00 for each set thereafter

2009 1/2 PRICE SPECIAL (while supply lasts)

Don't forget, we have the entire John Rider's Perpetual Troubleshooters Manuals on a single DVD. All 23 Volumes of the Riders available at the click of a mouse! Over 120,000 different model radio schematics and related service information in an easy to use DVD. Thousands sold at \$ 199. **SPECIAL \$ 99 + \$ 6.00 S&H in the USA, add \$12 for worldwide delivery. Order Now while supply lasts !**

Publisher's Comments

We've got lots of things to tell you about this month, so let's dive right on in...

Your Radio on the Cover?

How would you like your radio on the cover of *A.R.C.*? It's possible! We're always looking for interesting subjects for the cover of our magazine, and we're guessing our readers have some *very* interesting subjects in their collections. It's easier than you might think to have your best treasure (or maybe even worst basket case!) gain fame. And not just for 15 minutes, but for the whole month of the cover date, and even into posterity in our achieves. Give it your best shot, as it were, and send your submission to ARC@antiqueradio.com, or mail a photograph (please only send duplicates as we can't return originals) to *A.R.C.*, P.O. Box 1558, Port Washington, NY 11050.

Don't think your collectibles are quite cover material? No problem—we also want to feature your radios, televisions, or related items in our "With the Collectors" or "Photo Review" sections. What an easy way to promote and show off your collection! And the issue that features it will surely take its own place of pride among your favorites things.

Speaking of featuring your pride and joy, why not tell us about it in an article? Talk about one radio or your whole collection. Or tell us about how you got into the hobby. Maybe you've got valuable information to share with fellow hobbyists, things like helpful hints on restoration, research on radio history or an inventor, or even tips about how you find items for your collection. Many of our articles are just one or two typewritten pages with four or five photographs. We're here to walk you through the process if you're new to writing for a magazine. Email us or call us at our toll free number (866-371-0512) for details.

Remember, if we accept your submission, you'll be a published author or photographer! But most important, you'll be helping to support the hobby we all love.

Radio Meets

A.R.C. will be at the Tri State Radio Fest in Monaca, Pennsylvania, this month and at the Kutztown, Pennsylvania, meet in May. We will also be at the Estes Auction in Burbank, Ohio. Be sure to attend a meet in your area to pick up new radios for your collection and to meet with old friends and make new ones. And if we're there, too, please stop by and say hello.

In This Issue...

Dick Parks talks about his beautiful 1928 Brunswick model 5NO, where he found it, and how he restored it. It's a good example of an early AC set. I recently was fortunate enough to be invited on a tour of the fascinating Alpine, New Jersey, tower facility. This site has great historical significance, too: it's where Edwin Armstrong developed FM broadcasting. Its 400-foot tower is really something to behold and definitely worth a visit, as is the W2XMN radio building and nice little radio museum. Here's a question for you: What can you do with an orphan radio chassis? Mike Tremper has a good suggestion, as he shows us how to find a new home for old radios. The RCA 9K2 console, once a treasured family radio, was just a fond memory from Richard Brewster's childhood—until he decided he wanted one again. He was able to find one—just miles from his home!—by advertising in *A.R.C.* The "new" radio is now creating memories for Richard's own children. Finally in this issue is a short piece on the February Westford, Massachusetts, New England Antique Radio Club Meet as well as an announcement on the merging of the Society of Wireless Pioneers and the California Historical Radio Society. We were very happy indeed to hear that SOWP was able to find a new home!

RESTORATION TOPICS

The 1928 Brunswick Model 5NO

BY DICK PARKS

The Brunswick Model 5NO, also known as the Radiola 60, has been described as “the first truly modern superhet design: one-dial tuning...AC tubes, chassis construction, and wire antenna instead of the bulky loop,” as used in earlier Radiolas.* In 1928 it sold for \$175 (later \$147) without any tubes. A set of radiotrons for this would set you back \$27.50 per, for a total of \$202.50 (that’s \$2,684 in 2012 money!). Let’s see what that money bought you way back then.

Figure 1 shows a Brunswick model 5NO, a nine-tube table model superhet with an IF of 180 kHz. It uses six 27 triodes for the RF, oscillator and IF stages, plus another 27 for the power detector, as well as a 71A in the output stage. The rectifier is an 80 on a separate chassis, and it has a covered terminal strip for connections to the RF chassis.

I found my 5NO on Craigslist and drove 60 miles to pick it up—since it weighs a ton, I didn’t want to trust it to shipping. Access to the innards is through the removable back panel. When I got it on the bench, I pulled out both chasses and cleaned off all the dust and dirt of the ages, thankfully noting that the radio had never been modified in any way that I could see.

* Alan Douglas, *Radio Manufacturers of the 1920’s, Volume III*, p. 45

Starting with the power supply, I made resistance checks to see if all the transformer and choke windings had continuity. In 1928, paper filter caps were the rule, and I could find no evidence of leakage, so the bench Variac came into play. I pulled the rectifier tube at first to avoid any DC overvoltage, as there was no load as yet. Other than an open power switch, I found no problems and connected an HV bench supply to the B+ feedpoint, running its output voltage up to +250 slowly, looking for sparks or smoke. Still I detected nothing out of the ordinary. The rectifier tube went in next and the Variac showed all was well. I got out the hand drill and mounted a four-place terminal strip under the chassis, connecting a new three-wire power cord, a 2 amp fuse mount, and the wires to a good ball-handle toggle switch. Next came similar tests on the RF chassis.

I’m happy to say I had one of those rare and wonderful experiences for a radio collector: there were no hard-to-find problems with this radio, and everything checked good. When I hooked the RF chassis back to the power supply, it started to play fine at an AC line voltage of about 95. Kudos to RCA! With all those 27 tube heaters drawing 10.5 amps at 2.5 volts, it takes a while to warm up, but that was prob-

Figure 1. My Brunswick 5NO.

Figure 2. The checked-out Brunswick.

ably not a big problem in 1929, even if your Radiola 18 “came on right away.” There were no fixes needed to put this radio up and running, other than protecting a few frayed wires with short lengths of heatshrink tubing.

The cabinet did need some work, though. This Brunswick had the beginnings of veneer detachment, but that was soon put right. Back when I was a newbie, a couple of nice thick coats of polyurethane pleased me no end, giving a nice shiny hard finish. The mandarins of the hobby currently frown on that sort of thing, however, so nowadays my radios get a light treatment with scratch sticks and tung oil varnish, and not much of that, either. Figure 2 shows how my Model 5NO came out after restoration.

I confess that I did stray from radio orthodoxy a bit—the escutcheons for tuning, volume, and power are thin pressed-wood pieces, artfully made on RCA’s machinery, with very fancy lettering, filigrees, acanthus leaves, floral figures, and so forth. I thought they looked pale and washed-out after the flaked-off finish was wire-brushed and picked off laboriously. So I got out the model airplane paints and did a job on them. My wife says the middle one “looks garish.” I think it looks swell.

Figure 3. The “garish” escutcheon.

Dick Park’s interest in old radios began in the junk yards behind the Westinghouse plant, East Springfield, Massachusetts, where RA-DA radios were made. A design and consulting engineer for the U.S. Navy for over 30 years, he is also a sometime musician, playing early jazz and jugband music.

Contact Dick at 2620 Lake Ridge Ct., Oakton, VA 22124.

Attention Subscribers: You can access a color version of this article on the A.R.C. website at www.antiqueradio.com.

RADIO IN HISTORY

The Alpine Radio Tower— Home of FM Radio Development

BY STAFF

A pinnacle of FM broadcast history, the Alpine tower, also known as the Armstrong tower, looms over the Hudson River from the New Jersey Palisades. Inset: The facility's W2XMN building.

This past March, members of the New Jersey Antique Radio Club had the privilege of touring the Alpine, New Jersey, radio tower facility that was built by FM radio pioneer Major Edwin Howard Armstrong.

The Alpine tower (also known as the Armstrong tower) is located on 15 acres on the Hudson River Palisades north of New York City. Construction was started in 1937 by Armstrong as a location to conduct his FM radio experiments after he was forced to remove his equipment from the Empire State Building. It was finished in 1938. The first FM transmitter, W2XMN, operated from here at a frequency of 42.8 MHz with 40 kW of power. The signals could be heard approximately 100 miles.

In the years prior to the tower's construction Armstrong had worked with RCA developing the FM system, but ties were severed when RCA realized that FM would be a serious competitor to the established AM broadcasting signals that RCA supported. Armstrong had made headlines when, in June 1936, he gave a presentation for the Federal Communications Commission, impressing the audience with the fidelity and static free signals that FM could deliver. RCA retaliated and lobbied the FCC to change the FM band, then covering 42 MHz–50 MHz, to 88 MHz–108 MHz by 1945. This rendered all of the old FM receivers useless. RCA also claimed the patents on

the invention of FM and tied up Armstrong for many years in litigation. Armstrong committed suicide in 1954, but his heirs eventually won their lawsuits against RCA.

Though lacking public recognition during his lifetime, Armstrong was a preeminent force in the development of FM broadcasting. His many awards, achievements, and honors included:

- IEEE Medal of Honor – 1917
- French Government Legion of Honor – 1919
- Franklin Medal – 1941
- AIEE Edison Medal – 1942
- National Inventors Hall of Fame – 1980
- U.S. Postage Stamp – 1983
- 42 Patents

During World War II the site was used as a radar facility, but was turned off following Armstrong's death. Columbia University maintained the site until it was sold in the late 1960s. Today the tower facility is owned by the Alpine Tower Company, a privately held concern, and is used for cellular antennas and some local television and radio stations.

The tower entered broadcasting history a second time after the events of September 11, 2001. When the World Trade Center was attacked, local television stations lost their transmitters. Needing an alternative transmission location, they turned to the Alpine tower,

A rare REL receiver and speaker.

A General Electric type BT-1-B FM transmitter, circa 1940s. Output 250 watts, 88 MHz–108 MHz. It's still in operation.

Some of the goodies in the museum.

More goodies still...

A Televue television.

which carried signals for all the New York City television stations. They broadcasted from the site for nine months until their antennas were relocated to the Empire State Building.

The tower height is 400 feet, with the highest antenna reaching 424 feet. The orientation is North – South. In the 1980s and 1990s modifications were made for safety reasons. The W2XMN building houses a museum maintained by the Alpine Tower Company. Also, the building has a microwave room.

A.R.C. would like to thank David Amundsen of the Alpine Tower Company for permission to tour the facility and Rich Lee, president of the New Jersey Antique Radio Club, for arranging and organizing the event.2

The gang from the New Jersey Antique Radio Club.

RESTORATION REVISITED

About that Chassis from a Nice Old Console...

BY MICHAEL K. TREMPER, KC2HFR

A 1958 Stromberg-Carlson chassis salvaged from a console set. The 6 x 9-inch speaker next to it shows its relatively small size.

More than once while on a road trip, something caught my eye and I abruptly stopped the car (my peripheral vision is excellent!). My wife, not seeing what I saw, would ask, "Why are we stopping?" I usually responded with, "Wait here. I'll be right back," as I headed for trunk and my tools.

In no time at all, I'd be gutting out the precious works of some discarded console combo AM/FM/phono radio, salvaging as much as I could of the innards along with the chassis, trying my best to locate a model number as I went. How much I got from would depend on all sorts of things, like

how much time I could afford, the weather, the time of day, and how safe the neighborhood was.

These impromptu stops led to a pact between my wife and me (I being a junkman at heart and she being very refined): we agreed that I could only tear into curbside refuse when it was "definitely vintage electronics-related." Fine with me!

Sound familiar?

I know I'm not alone in this. Many of us have lying around a chassis that once belonged to a very good console floor radio from the late 1940s or 1950s. Maybe the cabinet, changer, and speaker are long gone, but the

Note the decent sized output transformer on the chassis in the center towards the front. This transformer is driven in "push-pull" by the two 6V6GT output tubes, also visible. An illustration of the original console lies partially beneath the chassis. One could easily build a very nice set, about 1 cubic foot in size, around it.

nice chassis that made it all happen is still alive and well!

Building a New Radio Home

As radio lovers, we all hate to just throw away the amazing engineering and craftsmanship that went into these chassis. Even when nothing else remains of set they were once the heart of, we know that they're likely still capable of a deep, rich sound. There is a solution to this quandry, and while it does not qualify as collecting, it is a nice way to put that chassis to good use once more.

The idea, of course, is to simply take that old chassis (put back into perfect working order, made safe, and with fuses properly installed), pair it with a well-matched speaker, and then custom-build a small cabinet to house the speaker, loop antenna, dipole antenna, and chassis. This technique is not exactly original, and I have seen many examples of it at swap meets over the years, but it deserves our renewed consideration. After all, original parts are hard to come by and today's emphasis is on recycling, so why not apply this concept to radio?

Nuts and Bolts (and Knobs)

The cabinet you fashion can be as simple or as fancy as desired, and can be made from high-end store-bought lumber or from scraps from your garage. It can be stained and varnished for a natural wood finish, or be painted in attractive colors. It's all about creativity. Hopefully, you've salvaged some old knobs, but if needed you can use generic ones.

Would your new set be stereo? No, but it surely would be high fidelity if it was based on a good chassis well matched to the speaker. There were many types of good sets (using a power transformer and 6.3-volt tubes) that had AM/FM and push-pull output circuitry. For instance, Airline (often using a Wells-Gardner chassis), Silvertone, Zenith, and RCA made sets that would be ideal for this type of project.

Obviously, the larger the chassis, the less compact the final set will be. Most chassis require 3.2 ohms of load impedance, so I have found that oval 4-ohm automobile radio or German table set speakers work extremely well for this purpose. They take up less space inside the cabinet and thus allow

for the ventilation any tube unit needs for proper operation.

In short, with an old working chassis, some ingenuity, and a small time commitment, you can end up with a nice room addition that will provide abundant bass output from a relatively small unit. You can enjoy sound like that from the Bose Wave radio, from a set that's only a little bit bigger and that's tailored for the look you want.

This configuration also gives you the luxury of vacuum tube amplification, in analog, of course, without costing you a fortune. You'll likely be looking at about 7 to 11 watts of power output (RMS), which in a medium-size room is ample power. Since the unit once had a phono, there should then be at least one auxiliary input on the chassis. Take a "Y" connector and join the left and right channels of a CD player and listen to your favorite disks, too.

Sounds Good

I've made a number of custom-built sets over the years and was very pleased with each one. Now that I'm in retirement, I'm getting rid of many of those that I've had around for years, but I'm holding on to two or three. Who knows, they might end up highlighted in these pages, recycled but sounding just as good as ever.

Michael K. Tremper, KC2HFR, has been refurbishing radios for 48 years. He served in the Air Force as a radar repairman and received an electrical engineering degree in 2000. Michael specializes in higher-end, parallel-filament, heavy multiband radios from the U.S., Canada, and Germany. He is a Member of Niagara Frontier Wireless Association.

Contact Michael at 110 Lynncrest Terrace, Cheektowaga, NY 14225; e-mail: mktube@yahoo.com.

I custom built this large tombstone table radio for a client about 25 years ago. He had no objections that the information on the dial plate (volume, tuning, etc.) would have to be read sideways. Because the chassis had come from a large Fisher console, the sound was superb.

The rear of the custom-built tombstone cabinet showing the 10-inch speaker and the piece of Plexiglas I glued in place from the inside to protect the original Fisher dial scale glass on the chassis.

Attention Subscribers: You can access a color version of this article on the A.R.C. website at www.antiqueradio.com.

RADIO MEMORIES

An RCA 9K2 Is Once Again Part of the Family

BY RICHARD BREWSTER

Richard Brewster's RCA 9K2 beautifully set off by his daughters, Meghan, Rebecca, and Emily.

One of my earliest childhood memories was listening to our "hand-me-down" RCA 9K2. The set was originally purchased by my uncle in the late 1930s and was acquired by my family when my uncle got a newer set.

I was always a listener, and was especially fond of kids' after-school programs. On weekdays I would tune in at 4:45 to hear *Dick Tracy* followed by *Terry and the Pirates*, on to *Jack Armstrong, the All American Boy*, continuing with *Sky King* and ending with *Tennessee Jed*. On Saturday mornings I would eagerly tune to *Let's Pretend* and move right on to *Grand Central Station*. Sunday mornings would bring the *Comic Weekly Man*, who would read the newspaper captions of some comic strips. And, of course, Sunday afternoon at 5 would be *The Shadow*. I never missed that. Certain evenings would find the family listening to *Mr. Keen, Tracer of Lost Persons* or *Our Miss Brooks*, or perhaps my father's favorite program, *Gang Busters*. I even enjoyed some "ladies' shows." Before school I liked to listen to *Missus Goes A-Shopping*, and upon coming home for lunch, I would tune in *Ma Perkins* and *Our Gal Sunday*.

But my earliest memories are of "Beautiful Dreamer." Arthur Godfrey's intro on his 6 a.m. show. I would listen while lying on the living room sofa, as my mom got dad off to work. In those early days, I listened to everything: big bands, quiz shows, soap operas, you name it. Well, almost everything, because I hated the news. Boring! I remember asking my mother, "When the war is over, will there be no more news?" Obviously, the news was almost exclusively about the war.

Yes, it was a real treat when the 9K2 showed up. After all, it had short wave bands! My brothers and I would listen for hours to the strange noises, weird music, and foreign voices on the short wave bands. The 9K2 covered up to 60 MHz and even had a long wave band! It was very sensitive with a tuned RF stage, separate oscillator, and mixer; RCA called the tuning unit "Magic Brain." The audio consisted of a 6L6 driving a 12-inch speaker.

As I grew older, I became fascinated with

the insides of radios as well, so of course that 9K2 had to be taken apart! My brothers and I would routinely head for the local trash dump, and I would always find some old radios to bring home to disassemble. To my mother's consternation, my dresser drawer was filled with radio parts instead of clothes. Parts of the 9K2 went into that collection.

Fast forward to the 1980s. I have acquired a family of my own, but I never lost my appreciation for old radios. One day I woke up thinking that I needed to get another 9K2, so I placed an ad in *Antique Radio Classified* for one and hoped. Now bear in mind that *A.R.C.* is a national publication, and the 9K2 is a large console set. Would you believe that the only response to my ad came from a collector just a few miles from my Pittsburgh home? And it cost me nothing, as we were able to work out a trade.

I immediately did a partial restoration, which included a new 6E5 tuning eye tube. All other tubes were OK.

Recently, I did a complete restoration, checking every resistor and replacing every doubtful capacitor. I also installed a 12-volt transformer, wired to reduce the input voltage from our typical 125 to something closer to the 110 volts for which the set was designed. I even wired a varistor in series with the line, which reduces the surge when the set is turned on. Now I can feel secure about using the radio a lot. In fact it is on as I write this, and I am amazed at the sensitivity and dial calibration: 60-mile distant WHLI at 1100 kHz is spot on! Pretty good for a 75-year-old radio, huh? It's got a great sound too. In fact, it just may be my favorite radio...

Richard Brewster grew up raiding the local trash dump for interesting electronics junk. He graduated Worcester Polytechnic Institute with a degree in Electrical Engineering. He spends part of most years in Africa with Mercy Ships, having risen to the position of Chief Radio Officer on one of their ships—without even a ham license!

Contact Richard at 145 Little Peconic Bay Rd., Cutchogue, NY 11935; email: richard.brewster@mercyships.org.

MEET REPORT

The Radio XLIII Meet Westford, Massachusetts, February 19, 2012

BY STAFF

The Radio XLIII Meet was an outstanding success this past February in Westford, Massachusetts. There were great radios, great bargains, and great company.

After nearly 20 years, John Terrey Publisher/Editor Emeritus of *Antique Radio Classified* turned over the sponsorship of the Meet to the New England Antique Radio Club (NEARC). We're happy to report they've done a great job in that role.

And why wouldn't they? The NEARC has plenty of experience organizing meets—they've been doing that many times a year for a long time now. In fact, their October 2011 Meet was held at the same venue, the Westford Regency Inn and Conference Center, so they've really got this down.

At Radio XLIII all the tables were sold and the aisles were always crowded. From the looks of it, you could purchase pretty much anything related to the hobby, including battery sets, AC sets, televisions, audio equipment, communications receivers, ham gear, tubes, books, parts, and lots more. (Check out the accompanying photos for a taste of the interesting radio fare on offer.)

The next NEARC Antique Radio Show will be held on June 16, 2012, at the Brookline Event Center in Brookline, New Hampshire, just a short distance north of Boston. For more information visit www.nearc.net.

Antique Radio Classified already have its table reserved. Do you?

Hope to see you there!

Battery sets, including a Radiola III and a Kennedy.

Many types of radios were available at the meet.

An Atwater Kent breadboard battery set.

A.R.C. ANNOUNCES...

The Society of Wireless Pioneers Merges into CHRS

BY STEVE KUSHMAN

FROM THE BIRTHPLACE OF BROADCASTING
CALIFORNIA HISTORICAL RADIO SOCIETY

HOME OF THE BAY AREA RADIO MUSEUM & HALL OF FAME

The California Historical Radio Society (CHRS) and the Society of Wireless Pioneers (SOWP) are pleased to announce the merger of the Society of Wireless Pioneers into CHRS. The Society will become a program of CHRS, as is the Bay Area Radio Museum. The primary purpose of the merger is the preservation of the archives of the Society of Wireless Pioneers, founded in 1968, at the CHRS museum in the historic KRE radio station building in Berkeley, California. Additionally, to the extent practicable, CHRS will continue the work of the Society in honoring marine radio operators, ship board and shore side, and other Morse code commercial and military radio operators, by way of electronic and other publication. This will include the CHRS website, www.californiahistoricalradio.com.

Ben Russell, N6SL, the president of SOWP, and Waldo Boyd, K6DZY, its executive secretary, have expressed their pleasure at the merger and their gratitude to CHRS for its undertaking to continue the historical work of SOWP. CHRS plans to reinvigorate the Society's website as part of its own public presentation, which includes Facebook. All active members of SOWP are invited to contact CHRS, especially those in Northern California, through its website. More details of the merger will be announced as its implementation progresses.

CHRS is pleased to honor SOWP in this merger. SOWP is a unique and outstanding society of professionals and amateurs,

nearly all of whom have a common bond of having mastered the art of radio communicating over distances that stretch across the globe via Morse Code with hand key, or "bug." As SOWP has so rightly said:

Many of us have had the weight of responsibility for safety of life directly upon our shoulders. We traveled and were paid for it. At the core of everything we did was our ability to hear through atmospheric noise and make sense of "dits" and "dahs," voiced code-words, and even at times to "make sense" out of unusual silences. And in our amateur radio operating today the thrill is still present, we have a language that relatively few members of the world's population even remotely comprehend.

The art and science of wireless communicating is changing more and more rapidly as each year comes into focus and disappears over the horizon. But in spite of the adoption of geo-positioning satellites, burst transmissions at thousands of characters per second, and spread-spectrum techniques for making our communications confidential, CW is an art that we hope will be with us for centuries to come. It is done with the minds and muscles of man, the only artifacts being the key and the ear and their meld with the mind.

SOWP is dedicated to the preservation of both the history and the art of CW radio communication, and of its offshoots. We collect and preserve the history of each advance in the art, but our hearts remain with Morse, and we are content to know that one day someone's life may be in our hands and only our knowledge of Morse code will bring help to preserve that life."

Steve Kushman is president of the California Historical Radio Society.

Contact Steve at kushseal@flash.net.

PHOTO REVIEW

This column presents in pictorial form many of the more unusual radios, speakers, tubes, advertising, and other old radio-related items from our readers' collections. The photos are meant to help increase awareness of what's available in the radio collecting hobby. Send in any size photos from your collection. Photos must be sharp in detail, contain a single item, and preferably have a light-colored background. A short, descriptive paragraph **MUST** be included with each photo. Please note that receipt of photos is not acknowledged, publishing is not guaranteed, and photos are not returned.

Federal model 61 radio – The model 61 was manufactured in 1924 by the Federal Radio & Telephone Company. It is a rare battery set with 6 tubes. The front panel is made of Bakelite and the top panel lifts. Morris Wonderling, Honolulu, HI

Zenith 6S152 console radio – Manufactured in 1936 by Zenith Radio Company in Chicago. The 6 tube chassis covered the BC and SW bands. Tom Carnegie, Nashville, TN

Remler Superheterodyne radio – This battery set is from the mid 1920s. There were 7 tubes and covered the BC band. Mark Arkin, Sacramento, CA

Attention Subscribers: You can access a color version of this article on the A.R.C. website...

PHOTO REVIEW

Philco 38-4 Radiobar – This is a combination radio and bar manufactured by Philco and sold by the Radiobar Company. The Radiobars were made in various configurations with different chassis and bar glasses. Steven Weiss, Los Angeles, CA

Zenith model 8G005TZ1 – A Zenith Transoceanic model made in 1948. Powered by AC, DC, or battery. Covered AM and shortwave bands. Denny Bayer, Lincoln, NE

OLD TECH BOOKS & THINGS

A 2,000 sq. ft. museum is not enough space for my 1000+ set collection. And, hundreds of boxes await either space in the museum or sale. Some things must go! Choices must be made. As the late Dr. Muchow said, "As collectors, we truly are temporary caretakers of these historical artifacts."

Items for sale are either delicacies or the result of fine-tuning the scope of my collection.

For details on these items and much more, visit:

www.oldtech.com

IARCHS Annual Antique Radio Auction

Saturday, May 5, 2012 10:00AM

Hayrack items, if consigned, start at 9:00AM
Auction Building at Hawkeye Downs, 4400 6th Street SW

Cedar Rapids, Iowa

The Only Major Antique Radio and Related Items Auction in Iowa for 2012

Radio check in and auction set up will be Thursday and Friday, May 3rd and 4th from 9:00AM to 5:00PM. (New: \$1 per lot item minimum commission) Timely item submission allows inclusion in the printed auction list. Sellers should send digital photos of auction items to Dwight Baker for use in promoting the auction. The auction will be professionally conducted by Brent Wears, one of Iowa's leading auctioneers. Please check the Wears Auctioneering website for featured radios and the latest auction information. If you have questions, please contact us:

Dwight Baker – Club President (515) 965-0999 – e-mail: vtaudio@hotmail.com

CRYSTAL CLEAR

By Maurice L. Sievers

Volume 1

750 Illustrations – 570 Crystal Sets
341 Detectors – 207 Crystals
Perfect for the beginning collector!
Useful for the experienced too!

Crystal Clear is the most comprehensive reference for collectors, historians and anyone interested in early radio. In addition to the many excellent photos and reproductions of ads, *Crystal Clear* includes lists showing all sets by manufacturer, set name, selling price and date of manufacture. 8 1/2" x 11", 282 pages.

\$29.95 – Softcover

Volume 2

Crystal Clear, Vol. 2 supplements the first volume. It identifies an additional 172 crystal radio sets, 91 crystal detectors and 26 crystals by manufacturer, model, year produced, description and original selling price. Further research on many of the crystal sets covered in Volume 1. Detailed history on the Philmore Manufacturing Company and the Western Manufacturing Company. 8 1/2" x 11", 252 pages.

\$29.95 – Softcover

Everything stocked and shipped promptly — Radio is our middle name.

Order today. We gladly accept:

\$3.00 shipping & handling on all U.S. orders (typical U.S. order will be received within 7 days, but allow 2-3 weeks). Non-U.S. orders, write for shipping costs, or use credit card. Most orders shipped by next business day. If using credit card, include name on card, card number and expiration date. Send payment with order. New York residents must add sales tax.

DO YOU KNOW YOUR A.R.C. SUBSCRIBER BENEFITS?

Since becoming publisher I've asked many of our subscribers about the benefits that come with a subscription to *Antique Radio Classified*.

These have included both our print subscribers as well as our online edition subscribers. The only difference between the print and online subscribers is that the online subscribers pay a reduced subscription rate and don't receive the print magazine.

Many of the people I spoke with didn't know about our subscription benefits.

Let's take a look at them:

ABILITY TO LOOK AT THE MAGAZINE ONLINE

As a print or online subscriber you can look at the latest issue of the magazine online on our web site. This is the entire issue of the magazine and not an abbreviated edition. Subscribers can look at the last four issues of the magazine. Non-subscribers can look at earlier editions of the magazine at no cost.

One advantage of the online edition is that any photograph sent to us in color is posted in color!

ABILITY TO LOOK AT PAST AUCTION RESULTS

Almost every month we publish auction results in the magazine. Did you know that we have a database of the auction prices online on our web

site? Subscribers can look at the auction results and they are **SEARCHABLE!** If you want to see if a specific radio, piece of equipment, tube, magazine, etc. that has been sold, all you have to do is enter the item and see every time the item has been sold as well as the price, auction house, and date!

ABILITY TO LOOK AT ONLY THE CLASSIFIED ADS

Subscribers can also look only at the classified ads without downloading the entire magazine. This is very useful for readers who just want to read the classified ads. Readers with dial up Internet service will save a lot of downloading time.

FREE MONTHLY CLASSIFIED AD

Each month a paid subscriber is entitled to place a free classified ad in the magazine. The classified ad can be up to 50 words. Additional words are 10 cents each. Classified ads can be submitted by email, fax, or mail. Typewritten preferred to reduce possible errors. Name, address and telephone number count as 6 words. Full name and address are required in all classified ads.

Of course the most important benefit to the subscribers of *Antique Radio Classified* are the articles containing information that will help you in increasing your knowledge of our hobby.

HOW DO I ACCESS THESE BENEFITS?

Your print subscriber user ID and password are on your mailing label. Online subscribers are emailed their user ID and password. Your user ID is the number after "SUB#" on your mailing label. Your password is the digits in brackets [xxxx] after your "SUB#".

Go to A.R.C.'s home page www.antiqueradio.com and click on Subscriber Only Page.

On the Subscriber-Only Access page you can click on the Full Issue you would like to view or click on the Classified Ads section from that issue.

Or you can click on the Auction Prices Data Base. Just enter the item that you are researching.

Lee de Forest - King of Radio, Television, and Film
by Mike Adams

A fascinating glimpse into the early role that the designer of the audion played in developing the mass entertainment media we enjoy today.
