Yessir—our Pulse is stronger than ever!

YUP, at the ripe old age of 37, WDAY-Radio is as frisky as ever—with a 1958 “Area Pulse” that pumps us *all over* our 55 counties, 215,900 radio homes!

As for many years past, 1958 Pulse figures again show that WDAY-Radio gets—

More than TWICE as many listeners as the No. 2 station!

More listeners than the No. 2 and No. 3 stations **COMBINED!**

More than THREE times as many listeners as the No. 4 station!

Truth is—WDAY-Radio just doesn't have any real competition in the fabulous Red River Valley. Ask Peters, Griffin, Woodward!

SERVING THE HEART OF
OHIO'S RICHEST
FARM LAND WITH
STUDIOS IN
MARION
AND
BUCYRUS

Marion trading area offers national and regional distributors an ideal test market. Small enough to be economical, large enough to be indicative. It is a steady, conservative market. It is not a war boom baby--was not bankrupted in the depression. Competition for trade is intense. Merchandise and services which make the grade in the Marion. Market will succeed in any American community. Advertisers who seek test tube performance formulae will find Marion a profitable laboratory.

THE "FRIENDLY NEIGHBOR STATION" CHANGES STATISTICS INTO SERVICE AND SERVICE INTO SALES FOR YOU!

➔ **YOUR BEST DOLLAR BUY FOR SPOTTING NORTH-CENTRAL OHIO**

IT ONLY TAKES ONE

TO TAKE TOLEDO!

FAMOUS ON THE LOCAL SCENE

By whatever yardstick you want to measure radio in Toledo, you'll find WSPD head and shoulders on top. Ratings, community acceptance, around-the-clock news reporting, public interest programming, established personalities . . . you name it, WSPD has it! And when buying time to capture the Toledo market, it's important to remember that SPeeDy carries more national advertising than all other Toledo stations combined. Reason: SPeeDy is Toledo radio—and has been for 37 years!

... a Difference that counts

★ in programming

Tulsa's only balanced program station

★ in audience

Tulsa's largest by every measurement

★ in believability

The trusted "Voice of Oklahoma" since 1925. NBC since 1927.

★ in sell-ability

Year in, year out, advertising renewals

★ in facilities

Finest equipment and studios in the southwest

★ in personnel

Experienced, Tulsa "home folks" who know Tulsa and the Southwest and accept community responsibility.

Today, when advertising dollars must deliver full value, KVOO RADIO is your *outstanding must* in Oklahoma. After all, markets are people with *spendable income* who hear and respond to advertising — the KVOO kind of market — your kind of prospect!

TWO MEN WITH MORE THAN 600,000 FRIENDS IN PHILADELPHIA

Alex Klein, National Sales Manager, WDAS • Bill Vogt, Commercial Manager, WDAS

BV:

Philadelphia's Negro market is a city within a city—larger than 90% of all other American cities. Its population exceeds 600,000 people, that's 23% of Philadelphia's total population, with a spendable annual income of one half billion dollars.

AK:

Negroes do not want cheap, second-rate imitations. When they buy food, they prefer the best brands. When they buy automobiles, appliances, and other home furnishings, they buy the best. Branded merchandise has always enjoyed the strongest acceptance. Keep in mind the Negro Market can make or break the sales program of even the biggest advertiser.

BV:

Ever since Negro listening has been measured in Philadelphia, WDAS has always been the top-rated Negro Pulse station. Our Negro ratings have increased in the past two years by percentages ranging from 21.2% to 106.7%.

AK:

WDAS has more Negro Pulse quarter hour firsts than all other Philadelphia stations combined. No one, but no one, can deliver your message, motivate listeners and gain their acceptance for you, as can these top Negro performers communicating directly with and programming specifically for their community. Our Negro on-the-air staff is not a hit or miss, on and off group of changeover personalities, but a team of professionals whose longevity in the business is unequalled by any similar group.

BV:

Here at WDAS we are proud to work for BEECHNUT BABY FOODS, BOSCU COFFEE, CARNATION MILK, COCA-COLA, DULANY FROZEN FOODS, GILLETTE, KREY, QUAKER OATS, TETLEY TEA, UNITED FRUIT AND WRIGLEYS among others.

AK:

Advertisers who know, realize that the recognition they afford the Negro as an individual and a consumer, through a station utilizing Negro personalities, pays off in sales.

BV:

At WDAS your on-the-air campaign will be backed up by the first and only full time, fully staffed Merchandising Department in Philadelphia, devoted exclusively to furthering the cause of your product at the consumer level of the Negro Market.

AK:

Be sure you get your share of PHILADELPHIA'S VITAL CENTER, the size and importance of which is growing while you read this.

WDAS

THE BIG SWITCH IN COLUMBIA IS TO

The All New **WCOS** Station of the Stars

Both listeners and advertisers are switching to the ALL NEW WCOS. Listeners like the sound . . . advertisers like the results. WCOS commands respect in Columbia. Local advertisers prefer WCOS for they know the audience reached by this outstanding pioneer South Carolina broadcasting facility . . . one of the South's leading and most progressive radio stations.

- ★ Top Personalities
- ★ Award Winning News
- ★ Top Music Programs
- ★ Exclusive Sports Coverage

COLUMBIA'S BIG MUSIC & NEWS STATION WITH ADULT LISTENING AND BUYING APPEAL

National Representative: Headley-Reed Co.

WCOS sells the heart of South Carolina's No. 1 city.

(1958 census—180,000 population within six miles radius of State Capitol Building)

You get no waste coverage of sparsely populated areas with low per thousand cost on WCOS.

a string of pearls à la wis

These are the salesmen most heard in South Carolina—WIS are sales personalities with the experience, ability and fresh ideas to hold listeners' interest and direct it! WIS, broadcasting leader since 1930, backs them with modern techniques, promotion and merchandising facilities.

The salesmen people believe—the station they believe in—a combination that creates success stories. Ask your PGW Colonel . . . all this and ratings, too!

Our selling pearls as strung from left to right: Mackie Quave, John Wisley, Audrey Hunt; Bill Curry, Ken Kurtz, John Evans

RADIO TIME BUYERS

Prefer
Varied Programming Stations

BROADCASTING, JUNE 30, 1958

Eight to ten times as many timebuyers prefer the "varied programming" and "standard music and news" stations, according to a timebuyer opinion survey published by BROADCASTING Magazine, June 30, 1958.

For more than a generation, KRLD in Dallas has delighted Texas listeners with the best in radio entertainment from comedy, drama and variety shows to frequent, dependable news.

This varied programming means *foreground* listening which influences buying decisions and produces sales.

Why not join the hundreds of competent time

buyers who specify that their schedules get full listener attention on KRLD, which covers more listeners than any other full-time station in Texas (NCS No. 2).

KRLD is the radio service of The Dallas Times Herald, owners and operators of KRLD-TV, and is represented nationally by The Branham Company.

IMAGE . . . ATTENTION .

Interest . . . RESPECT .

Belief . . . RESPONSE!

OUR STATION'S IMAGE IN LISTENERS' MINDS IS IMPORTANT TO YOU!

On the parking lots of eight leading Roanoke area supermarkets shopping housewives were asked (among other things):

1. In your family — which Roanoke Radio Station is listened to most?
Ans.: WDBJ — 33.9%
(Nearest competitor — 21.8%)
2. ———next most?
Ans.: WDBJ — 30.8%
(Nearest competitor — 21.8%)
3. What is your favorite station?
Ans.: WDBJ — 44.7%
(Nearest competitor — 18.9%)
4. Which Roanoke station do you think of as most "dependable", — "believable", — "best all-around"?
Ans.: WDBJ — 61.1%
(Nearest competitor 15%)
5. ———and if you could have only one?
Ans.: WDBJ — 52.9%
(Nearest competitor — 15.5%)

Those housewives interviewed listen an average 3 hours and 53 minutes each day.

WDBJ's image can furnish the best Radio climate for your product's sales in Roanoke and Western Virginia.

International Radio Stations Operating in the U. S.

Note: These stations, located in the U.S. but beaming overseas, operate in the 6-25 mc band with powers up to 200 kw.

Crosley Broadcasting Corp.—**KQ2XAU** Cincinnati, Ohio (special experimental station).

KGEI Inc.—**KGEI** Belmont, Calif. (cp granted 7/24/58).

World Wide Broadcasting System Inc.—**WRUL**, five installations at Scituate, Mass.

Other privately-operated international stations owned by or leased to the Voice of America are as follows (operating firms in parentheses): ***WLWO** Bethany, Ohio (Crosley), 6 transmitters; **WBOU** Bound Brook, N. J. (NBC), 6 transmitters; **WDSI**, 3 transmitters in Brentwood, N. Y.; 2 in Wayne, N. J. (both CBS); **WGEO** Schenectady, N. Y. (G.E.), 3 transmitters; ***KCBR** Delano, Calif. (CBS), 5 transmitters; ***KNBB** Dixon, Calif. (NBC), 5 transmitters.

*Stations which are owned 100% by U.S.

U. S. Am Radio Stations Grouped by Frequencies

Key to symbols:

*Construction permit granted for increase in power.
 †Construction permit granted for new station.
 ‡Special authorization for power or frequency.
 CF—Construction permit for frequency.
 L—Limited time; operates night hours only when dominant station is not operating.
 DA—Directional antenna.
 D—Daytime operation.
 LS—Local sunset.
 N—Night.
 U—Unlimited time.
 SH—Specified hours.
 Note: Class of station is shown in parentheses. For explanations of various station classes see FCC Rules, page B-12.

Group Ownership of Broadcast Stations in the United States

Note: Listed here are individuals and companies with multiple station holdings. Included are all those controlling three or more am radio stations and/or two or more television stations. FCC rules limit multiple ownership to seven radio stations and seven television stations, of which not more than five tv stations can be vhf. Unless otherwise noted, the first station listed is group headquarters.

ABC OWNED STATIONS—WABC-AM-FM-TV New York, WLS (50%) and WENR-FM, WBKB (TV) Chicago, KGO-AM-FM-TV San Francisco, KABC-AM-FM-TV Los Angeles, WKYC-AM-FM-TV Detroit and KQV Pittsburgh, Pa. Some
trees
are seen
in spite
of the
forest!

The unknown sage who noted that "sometimes you can't see the trees for the forest" might well had today's television industry in mind. The "forest" has been growing steadily thicker — and the job of making your station stand out from the rest gets correspondingly harder.

Only a few stations have the ingredients of leadership — the prestige, community stature, programming and acceptance — to tower above the rest. It is for them that specialized representation, as developed by Harrington, Righter and Parsons, has been created. Tailored to each station's individual character, it translates local leadership to levels of national recognition.

Specialized representation, by its very nature, is for only a few. Perhaps (like the stations listed here) you are one of them.

working

partners

recipe for sales . . .

There is a distinguishing *flavor* about representative organizations which comes principally from the type of men who actively head up each firm.

Here, this consists of the group of Working Partners who started H-R, and who today still actively continue to serve all of our stations and buyers of time.

Supplemented by a carefully selected staff of *properly aged* and sales *seasoned* men, each following the H-R practice of providing time buyers with a complete and *easily digestible* presentation of station and market facts, we have a *recipe* for sales which appeals to the business *appetites* of the stations we serve.

FRANK HEADLEY, President
DWIGHT REED, Vice President
FRANK PELLEGRIN, Vice President
PAUL WEEKS, Vice President

ABC RADIO NETWORK RATES (As of Sept 15, 1958)

ABC Radio has a single rate. Discounts, however, are higher at night than in the morning and higher yet in the afternoon. Rates for periods less than one hour are charged at the following percentages of the hour rate: 55 minutes 95-1/4%; 50 minutes 86-3/4%; 45 minutes 80%; 40 minutes 73-1/4%; 35 minutes 66-3/4%; 30 minutes 60%; 25 minutes 53-1/4%; 20 minutes 46-3/4%; 15 minutes 40%; 10 minutes 26-3/4%; 5 minutes 13-3/4%. Rates for news, sports and "Breakfast Club" programs available on request.

These are gross hour rates.

ABC RADIO: DESIGN IT TO FIT YOUR SELLING PLANS

Sell all around the clock — daytime, nighttime, weekends — in low-cost, high cumulative schedules.

Associate with famous John Daly and his award-winning 125-man news staff and 22 overseas reporters.

Cash in on Don McNeill's Breakfast Club audiences, which make him radio's biggest success story.

Score with play-by-play audiences and with listeners to exclusive sports interviews by Howard Cosell.

Make network cut-ins more effective with ABC's superior inside coverage of nation's top 200 markets.

Use low-cost ABC radio for full national coverage — "make sure" in areas covered by high-cost media.

There's a place for ABC Radio in every sales planner's profit picture. Use ABC as your major advertising-media buy, or as low-cost protection against lower-than-expected sales from expensive media buys. ABC Radio Network and its strategically located affiliates are ready to fit into your plans for sales success — in a variety of ways — whatever your product.

ABC-TV NETWORK RATES

(As of Sept. 15, 1958)

Below are gross rates for Class A hour. Class A time is 6-11 p.m., Sunday through Saturday. Class B rate (75% of Class A rate) applies to stations not primarily affiliated with ABC-TV. Class C time (50% of Class A rate) is 11 p.m. to sign-off Sunday through Saturday, 9 a.m. to 6 p.m. Saturday and Sunday, and 5-6 p.m. Monday through Friday. Class D time (33 1/3% of Class A rate) is daytime hours up to 5 p.m. Monday through Friday, except for special programs on national holidays, which are charged as Class C. Rates for periods less than one hour are charged at these percentages of the hour rate: 80% for 45 minutes; 60% for 30 minutes; 40% for 15 minutes; 33 1/3% for 10 minutes and 26 2/3% for 5 minutes. One-minute participations are priced as follows: in Class A time 22%; in Class C and D (4 commercials per half-hour) 16 2/3%; in Class C and D (6 commercials per half-hour) 15%.

ABC has a must-buy list of basic stations. Its rate classes: Advertisers are required to purchase for each program a minimum clear gross for station time equivalent to \$66,000 for each Class A hour telecast.

Canadian stations are not subject to ABC discounts or rebate. Special frequency and group discounts allowed by CBC will be given on request. Rate classification and percentage of the hour are not the same as the ABC Television rates and percentages. All other charges (such as microwave, CBC kinescope recordings, sales tax, distribution, telecine rehearsal, editing, importation, cut-ins, production and facilities services for commercial messages and billboards, etc.) will be billed to the Agency by CBC.

**How
do you
measure
a
network ?**

BY COST?

ABC-TV's cost per thousand is consistently the lowest of the three networks.

BY ADVERTISING?

ABC-TV's billing gains are consistently larger than those of the other two networks.

BY PROGRAMMING?

ABC-TV's vital programming is aimed at the young, large-family audience. Personalities like Bing Crosby, Maverick, Pat Boone and Donna Reed keep it right on target.

BY AUDIENCE?

ABC-TV's audience is the most valuable for advertisers because it's made up mostly of GET AGE families—the most acquisitive families in America!

It was a hard fight

Still is. In television the competition never lets up. It keeps going day and night, 52 weeks a year. And each year it gets tougher.

The figures for the latest 12-month period (July 1957–June 1958) show that all three networks delivered larger audiences than ever – an average of 15% more at night and 14% more during the day.

They also show that in the same period the CBS Television Network – again attracted the largest average audiences in broadcasting

– achieved the largest average audience for a single program, the 48 million who watched a Gunsmoke show

– presented more of the most popular programs than any other network, a monthly average of 7 of the top 10

– won the largest number of program awards for adding new dimensions to the presentation of entertainment and the promotion of public information and understanding, a total of more than 60

– earned a 19.3% larger investment from advertisers than the second largest advertising medium.

Whether you consider it in terms of the biggest audiences, the most important awards, or the largest advertising investment, the decision is plain. The winner and still champion in every round, as it has been for the last 72 consecutive Nielsen Reports, is still . . .

THE CBS TELEVISION NETWORK

Networks CONTINUED

OBS-TV NETWORK RATES

(Note: In following, effective Sept. 29, 1958, all time designated as Class B becomes Class C and will be sold at Class C rate. Class B will be eliminated.) Following are gross rates for Class A hour. Class A time is 6-11 p.m. Monday through Sunday. Class B time (for which rate is 75% of Class A rate) is 5-6 p.m. Monday-Friday, 2-6 p.m. Saturday and Sunday. Class C time (50% of Class A rate) is all other times except between sign-on and 9 a.m. in eastern and central time zones. Class D time (37 1/2% of Class A rate) is between sign-on and 9 a.m. in eastern and central time zones. All rates are based on local time in each city. Rates for periods less than one hour are the following percentages of the applicable hour rate: 80% for 45 minutes; 60% for 30 minutes; 50% for 20 minutes; 40% for 15 minutes; 33-1/3% for 10 minutes; 30% for 5 minutes.

M.; Durward Tucker, WRR Dallas, Tex.; Robert Webber, KWMD Des Moines, Iowa; E. Z. Jones, WBBB Burlington, N. C.

MUTUAL NETWORK RATES

(As of Sept. 1, 1958)

These are gross rates for one hour.
Day and night rates are the same (although full network costs about 7% less at night because some MBS affiliates are daytime only).
Mutual has special rate schedules for shorter periods. Five-minute periods in premium time (9:30 a.m., 10:30 a.m., 12:30 p.m., 1:30 p.m., 5:30 p.m., 6:30 p.m. and 7:30 p.m.) cost \$725 (full network). Five-minute periods at other times are \$500. Twenty-second announcements are \$300 in premium time, \$200 at other times. Eight-second announcements are \$150 in premium time, \$100 at other times.

**You
need
this
new
24"x36"
map**

loaded with C & D market facts!

If you're bewitched, bothered and bewildered by the merchandising and marketing merry-go-round in the A & B (discount) markets why not take a look at the Keystone C & D markets . . . where men are men and a list price and a profit are still stylish.

Here are a few quick facts gleaned from our brand new C & D marketing map—yours for the asking:

- Total retail sales in 275 "A" and "B" Counties—132 Billions of dollars or 68.6% of the total.
- Total retail sales in Keystone's C & D markets \$60½ Billions of dollars or 31.4% of the U. S. total. (usually forgotten or overlooked)
- K.B.S. gives you 86% coverage of these C & D markets! Nuff said?

Write for your Free 24"x36" map and station list—you'll find them very useful!

NBC-TV AFFILIATES

Board of Delegates

Walter Damm, WTMJ-TV Milwaukee, chairman; Jack Harris, KPRC Houston, vice chairman (basics); Harold Essex, WSJS-TV Winston-Salem, vice chairman (optionals); Harold Stuart, KVOO-TV Tulsa, sec-treas.; Richard O. Dunning, KHQ-TV Spokane; Robert Ferguson, WTRF-TV Wheeling, W. Va.; Ewing C. Kelly, KCRA-TV Sacramento, Calif.; Ralph Evans, WOC-TV Davenport, Iowa; John H. DeWitt, WSM-TV Nashville, Tenn.; Joseph H. Bryant, KCBD-TV Lubbock, Tex. [Note: Mr. Damm retires from WTMJ-AM-TV Sept. 27, 1958.]

NBC RADIO NETWORK RATES

NBC Radio does not list rates for affiliates individually. It sells on a "full network" basis. Privately it has set up a schedule of percentages to compute rebates to advertisers for stations that fail to clear. These percentages are not made public.

Gross costs of participations, full network, follow:

Participation or Segment	Mon-Fri Sign On to 8 p.m. and "Monitor"	Mon-Fri 8 p.m. to Sign Off
5 minutes	\$1,300	\$1,150
1 minute	1,150	1,000
30 seconds	850	750
6 seconds	300	250

These prices guarantee clearances of stations whose aggregate percentage is equivalent to 85% of the full network rate.

Gross costs of five-minute units, full network, effective Oct. 1, 1958, follow:

Number of 5-minute Units Used Weekly	Cost per 5-minute unit
1 unit	\$1,735.74
2 units	1,633.62
3 units	1,531.50
4 units	1,429.41
5 units	1,352.82
6 units	1,276.25
7 units	1,225.20
8 units	1,174.16
9 units	1,123.10
10 units	1,072.05
Over 10	1,021.00

Larger time units are computed as multiples of five-minute units. Thus gross time charges for a quarter-hour are three units times \$1,531.50 or \$4,594.50. A half-hour is six times \$1,276.25 or \$7,657.50. An hour is 12 times \$1,021 or \$12,252. Programs of 15 minutes and longer cost 75% of quoted prices at or after 8 p.m. Monday through Friday.

DAVE GARROWAY'S TODAY, *Monday-Friday, 7:00-9:00 AM (NYT)*

Entertaining or selling, Dave Garroway and Jack Paar give it everything! The warmth, excitement and enthusiasm they generate is ready *now* to sell for you.

These gentlemen are natural-born audience-builders. TODAY's audiences are up 34% since last year—a single participation now nets you 4,500,000 all-family viewer impressions! The JACK PAAR SHOW now clocks

3,750,000 adult viewer impressions per participation. Jack's audience has zoomed 125% in just one year to hit the all-time high for any late-evening network show!

And Dave and Jack get *results* for their sponsors, results that keep leading advertisers coming back for more. On TODAY: The Insurance Co. of North America (4th year); Evinrude Motors (4th year); Grove Labs. (4th

they
really throw
themselves
into their
work
!

THE JACK PAAR SHOW, Monday-Friday, 11:30 PM-12:30 AM (NYT)

year); Beltone Hearing Aids (4th year); Time, Inc. (3rd year). On the JACK PAAR SHOW: Polaroid; Bristol-Myers; Marlboro Cigarettes; Norelco; Coopers, Inc.; Block Drugs – all with Jack for his second year!

These shows are *specifically* designed to deliver network television with maximum flexibility. What's more, the TODAY-JACK PAAR SHOW Dividend Plan gives

you 10 bonus participations for every 30' purchased.

As showmen and as salesmen, Dave and Jack are *personal* friends to millions and millions of viewers who like them, look up to them, and – more important – *believe* them. They'll sell your product to beat the band!

Radio Stations in Mexico And the Caribbean Area

Note: The following list of Mexican and Caribbean radio stations is based on available data from the U. S. Federal Communications Commission, the communications ministries of the various countries and from other sources. Like other countries in the North American Regional Broadcasting Agreement area, most follow the 1950 NARBA, although all are not signatory. The 1950 NARBA has not yet been ratified by the U. S. Senate.

.....
: "Think this is a good place to make a stand, son?" :
.....

IT PAYS
TO KNOW
THE
ANSWERS..

Poor Gen'l Custer, alas, *didn't* when he picked the site for his famous last stand. People in today's television and radio business who *have* to be right as often as possible are a lot more fortunate. For over a quarter-century they've found up-to-date answers on virtually everything about TV-&radio in BROADCASTING Magazine, *THE* authoritative businessweekly in this multi-million dollar field. Edited *by* professionals *for* professionals, BROADCASTING stands alone as the best way to *know* about TV-&radio and to advertise to those who make its major decisions.

BROADCASTING

THE BUSINESSWEEKLY OF TELEVISION AND RADIO

1735 DeSales Street, N. W., Washington 6, D. C.

YOUR FUTURE IS GREAT IN A GROWING AMERICA

THE CITY THAT DIDN'T EXIST A MONTH AGO

Every 30 days the U. S. adds as many new Americans as live in Norfolk, Va.—creating brand-new wants and needs which must be satisfied.

What does this mean to you? It means greater opportunities than ever before—in all fields. Home construction is expected to double by 1975. Power companies plan to increase output 250% in the next 20 years to provide the power for scores of new labor-saving devices. Clothing suppliers predict a one-third increase in 7 years.

With 11,000 new citizen-consumers born every day, there's a new wave of opportunity coming.

7 BIG REASONS FOR CONFIDENCE IN AMERICA'S FUTURE

- 1. More people . . .** Four million babies yearly. U. S. population has *doubled* in last 50 years! And our prosperity curve has always followed our population curve.
- 2. More jobs . . .** Though employment in some areas has fallen off, there are *15 million* more jobs than in 1939—and there will be *22 million* more in 1975 than today.
- 3. More income . . .** Family income after taxes is at an all-time high of \$5300—is expected to pass \$7000 by 1975.

4. More production . . . U. S. production *doubles* every 20 years. We will require millions more people to make, sell and distribute our products.

5. More savings . . . Individual savings are at highest level ever—*\$340 billion*—a record amount available for spending.

6. More research . . . *\$10 billion* spent each year will pay off in more jobs, better living, whole new industries.

7. More needs . . . In the next few years we will need *\$500 billion* worth of schools, highways, homes, durable equipment. Meeting these needs will create new opportunities for everyone.

Add them up and you have the makings of another big upswing. Wise planners, builders and buyers will act *now* to get ready for it.

FREE! Send for this new 24-page illustrated booklet, "Your Great Future in a Growing America." Every American should know these facts. Drop a card today to: ADVERTISING COUNCIL, Box 10, Midtown Station, New York 18, N. Y.

Your
Great Future
in a
Growing America

Planning a Radio Station ?

RCA presents
3 basic plans to
meet all
requirements !

These versatile plans illustrate how the very latest equipment can be arranged to perform efficiently with a minimum of capital and personnel. Since programming requirements vary, three basic plans, representing three specific categories of operation, are provided.

Plan "A" is for a typical small station and requires a minimum investment. A "combined" studio-transmitter operation contributes to its overall efficiency.

Plan "B," also is for a "combined" operation, but it provides additional facilities to allow for announce booth and other local program material. A typical

community station of moderate size, it meets the widest range of applications.

Plan "C," with separate studio and transmitter locations, is functionally designed for big city operation. It highlights the advantages of a spacious two-studio station.

Building layouts, together with a discussion of equipment requirements and current trends, are included in a new Brochure. For your free copy, write to RCA Department YB-23, Building 15-1, Camden, N. J. In Canada: RCA VICTOR Company Limited, Montreal.

RCA . . . your first source of help in station planning

Regulation, imposed and voluntary

How to Apply for a Broadcasting Station.....	see below
The Tv Code of the National Assn. of Broadcasters.....	page B-2
The Radio Code of the National Assn. of Broadcasters.....	page B-8
FCC Rules Regulating Radio and Television.....	page B-12
FCC Commissioners, Executives and Staff.....	page B-32

How to Apply for a Broadcasting Station

Any qualified citizen, firm, or group may apply to the Federal Communications Commission for authority to construct a standard (am), frequency modulation (fm), or television (tv) broadcast station.

Licensing of these facilities is prescribed by the Communications Act of 1934, as amended, which sets up certain basic requirements. In general, applicants must satisfy the Commission that they are legally, technically and financially qualified, and that operation of the proposed station would be in the public interest.

The licensing procedure is detailed in Part 1 of the Commission's Rules, "Practice and Procedure," while station operation is covered by Part 3, "Radio Broadcast Services." The latter includes technical standards for am, fm, and tv stations; fm frequency allocations by classes of stations, and tv channel assignments by states and communities.

Following is a summary of the consecutive steps to be followed in applying for authorization to build and operate a broadcast station. The application procedure is substantially the same whether the facility sought is am, fm, or tv.

Selecting a Frequency

Am broadcast stations operate on "local," "regional," or "clear" channels. Stations of 250 watts power serve small communities; stations of 500 watts to 5 kilowatts power cover centers of population and surrounding areas; stations of 10 to 50 kilowatts power are for large area coverage, particularly at night. There is no separate classification for am operation by educational stations. To determine whether an am frequency is available for assignment in a particular area, it is necessary for the applicant to have a frequency search made by a competent engineer. The Commission does not make such studies for prospective applicants.

An applicant for a commercial fm station must specify a frequency available to the area to be served. The Commission has allocated geographic blocks of frequencies to accommodate Class A stations, 250 watts to 1 kilowatt in power, for community service; and Class B stations, up to 20 kilowatts power, for metropolitan or rural coverage. Operating fm stations may apply for a "Subsidiary Communications Authorization" to furnish background music and other supplemental program service. Noncommercial educational fm stations are in a separate category.

An applicant for a commercial tv station must request a vhf (very high frequency) or a uhf (ultra high frequency) channel assigned to the community involved for operation there or a place within a 15-mile radius. "Satellite" and tv "translator" stations serve communities unable to afford regular tv stations. They pick up and rebroadcast locally the programs of outside stations, with the latter's permission. "Satellites" operate on channels assigned to the places in which they are located; "translators" operate on the upper 14 uhf channels. Channels are set apart for noncommercial educational tv operation.

Applying for a Construction Permit

Once a prospective licensee has decided upon the type of station he desires, and the place where it would be located, the next step is to apply for a construction permit. This is done on FCC Form 301, "Application for Authority to Construct a New Broadcast Station or Make Changes in an Existing Broadcast Station," which covers am, fm, or tv broadcast. This form requires information about the citizenship and character of the applicant, as well as his financial, technical, and other qualifications, plus details about the transmitting apparatus

to be used, antenna and studio locations, and the service proposed. A specific channel or frequency must be requested. Triplicate copies are required, one of which must be executed under oath or affirmation.

Application Processing

Applications for new broadcast stations are twice reported by the Commission—when first tendered and, again, when accepted for filing. Such an application is not acted upon until at least 30 days after public notice is given of its acceptance.

Applications are, in general, processed in the order in which accepted. They are reviewed in their engineering, legal, and financial aspects by the Broadcast Bureau, which makes recommendations to the Commission.

If, upon examination of an application, the Commission determines that there are no engineering or other conflicts, that the applicant is qualified, and that all other requirements are met, the application is granted without hearing and a construction permit is issued. All such grants are announced publicly.

Any grant made by the Commission without hearing is subject to protest within 30 days, during which the protesting party may request a hearing. Within 30 days thereafter the Commission determines whether the objection merits a hearing.

The law requires that, in general, decision on noncontested applications be made within three months from the date of the original filing, and within six months from the conclusion of a hearing in those cases which go through a hearing.

Hearings

Where it appears that an application violates the Commission's rules and regulations; that serious interference would be caused; or that the minimum separation requirements for tv stations are not met; or if other serious questions of a technical, legal, or financial character are involved, a hearing is usually required. The Commission must accord a hearing to competing applicants.

If unable to grant an application, the Commission is required to notify the applicant and other known parties in interest as to the reason. The applicant is usually given 30 days in which to reply. After that, if the Commission is still unable to make a grant, a hearing is ordered.

In designating an application for hearing, the Commission gives public notice of the issues for the information of the applicant and others concerned. Findings are made upon the basic qualifications (legal, financial, and technical) of the applicant in the hearing order. The hearing notice generally allows the applicant 60 days or more in which to prepare. Even after being designated for hearing, an applicant may find it possible to amend his application to resolve engineering or other problems.

Hearings are customarily conducted by an examiner. The hearing examiner has authority to administer oaths, examine witnesses and rule upon the admission of evidence. A pre-hearing conference is generally held within a few weeks after a case has been designated for hearing, either at the request of one of the

parties or on the examiner's own initiative. Additional prehearing conferences may be held as needed.

Within 20 days after the close of a record by the hearing examiner, each party and the chief of the Broadcast Bureau of the Commission has the privilege of filing proposed findings of fact and conclusions to support their contentions. After review of the evidence and statements, the hearing examiner issues an initial decision.

If he wishes to contest the initial decision, the applicant or any other interested party has 30 days from the date on which the initial decision was announced to file exceptions. In all cases heard by an examiner, the Commission will hear oral argument on timely request of any party. After oral argument, the Commission may adopt, modify, or reverse the hearing examiner's initial decision. Within 30 days thereafter, any party involved may petition for rehearing.

If no exceptions are filed, and the Commission does not initiate a review of the hearing examiner's initial decision, the latter becomes effective 60 days after its issuance, unless otherwise ordered by the Commission. Court appeals can be taken within 30 days following announcement of the Commission decision.

Construction Permit

When and if an application meets requirements, it is granted and a construction permit is issued. The permittee may then suggest call letters which, if available and conforming to the rules, are issued. A maximum of 60 days from date of the construction permit is provided in which construction shall begin, and a maximum of 6 months thereafter as the time for completion (or 8 months in all). Application to modify a broadcast construction authorization, or to make changes in an existing station, or to modify a license, is made on the same form (301) used in seeking initial construction authorization. If the permittee is unable to build his station within the time specified, he must apply for extension of time on Form 701 ("Application for Additional Time to Construct a Radio Station"), giving the reasons. Upon completion of construction the permittee conducts equipment tests.

License

The final step is to apply for the actual license on Form 302 ("Application for New Broadcast Station License"). Applicants must show compliance with all terms, conditions, and obligations set forth in the original application and the construction permit. After applying for a license and receiving authority from the Commission, the holder of a construction permit then conducts program tests. A station license is issued if no new cause or circumstance has come to the attention of the Commission that would make operation of the station contrary to public interest.

Am, fm, and tv broadcast stations are licensed for the statutory limit of three years. Applications for renewal of license are made on Form 303 ("Application for Renewal of Broadcast Station License").

Forms for Other Purposes

If the holder of a construction permit or license desires to assign the same to someone else, he makes application on Form 314 ("Application for Consent to Assignment of Radio Broadcast Station Construction Permit or License").

Should the permittee or the licensee wish to transfer corporate control, he applies on Form 315 ("Application for Consent to Transfer Control of Corporation Holding Radio Broadcast Station Construction Permit or License"). In certain cases Form 316 ("Application for Assignment or Transfer—Short Form") may be used when the transfer or assignment involves no substantial changes in interest.

CONCERNING FCC RULES AND REGULATIONS

"How to Apply for a Broadcast Station License" is a concise report prepared by the FCC Office of Reports & Information as a lay language guide. Serious applicants will also wish to study the FCC Rules & Regulations. Excerpts of the rules begin on page B-12.

The Television Code of the National Assn. of Broadcasters

Preamble

Television is seen and heard in every type of American home. These homes include children and adults of all ages, embrace all races and all varieties of religious faith, and reach those of every educational background. It is the responsibility of television to bear constantly in mind that the audience is primarily a home audience, and consequently that television's relationship to the viewers is that between guest and host.

The revenues from advertising support the free, competitive American system of telecasting, and make available to the eyes and ears of the American people the finest programs of information, education, culture and entertainment. By law the television broadcaster is responsible for the programming of his station. He, however, is obligated to bring his positive responsibility for excellence and good taste in programming to bear upon all who have a hand in the production of programs, including networks, sponsors, producers of film and of live programs, advertising agencies, and talent agencies.

The American businesses which utilize television for conveying their advertising messages to the home by pictures with sound, seen free-of-charge on the home screen, are reminded that their responsibilities are not limited to the sale of goods and the creation of a favorable attitude toward the sponsor by the presentation of entertainment. They include, as well, responsibility for utilizing television to bring the best programs, regardless of kind, into American homes.

Television and all who participate in it are jointly accountable to the American public for respect for the special needs of children, for community responsibility, for the advancement of education and culture, for the acceptability of the program materials chosen, for decency and decorum in production, and for propriety in advertising. This responsibility cannot be discharged by any given group of programs, but can be discharged only through the highest standards of respect for the American home, applied to every moment of every program presented by television.

In order that television programming may best serve the public interest, viewers should be encouraged to make their criticisms and positive suggestions known to the television broadcasters. Parents in particular should be urged to see to it that out of the richness of television fare, the best programs are brought to the attention of their children.

Advancement of Education and Culture

1. Commercial television provides a valuable means of augmenting the educational and cultural influences of schools, institutions of higher learning, the home, the church, museums, foundations, and other institutions devoted to education and culture.

2. It is the responsibility of a television broadcaster to call upon such institutions for counsel and cooperation and to work with them on the best methods of presenting educational and cultural materials by television. It is further the responsibility of stations, networks, advertising agencies and sponsors consciously to seek opportunities for introducing into telecasts factual materials which will aid in the enlightenment of the American public.

3. Education via television may be taken to mean that process by which the individual is brought toward informed adjustment to his society. Television is also responsible for the presentation of overtly instructional and cultural programs, scheduled so as to reach the viewers who are naturally drawn to such programs, and produced so as to attract the largest possible audience.

4. In furthering this realization, the television broadcaster:

a) Should be thoroughly conversant with the educational and cultural needs and desires of the community served.

b) Should affirmatively seek out responsible and accountable educational and cultural institutions of the community with a view toward providing opportunities for the instruction and enlightenment of the viewers.

c) Should provide for reasonable experimentation in the development of programs specifically directed to the advancement of the community's culture and education.

Acceptability of Program Material

Program materials should enlarge the horizons of the viewer, provide him with wholesome entertainment, afford helpful stimulation, and remind him of the responsibilities which the citizen has towards his society. Furthermore:

a) (i) Profanity, obscenity, smut and vulgarity are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words. (ii) Words (especially slang) derivative of any race, color, creed, nationality or national derivation, except wherein such usage would be for

the specific purpose of effective dramatization such as combating prejudice, are forbidden, even when likely to be understood only by part of the audience. From time to time, words which have been acceptable, acquire undesirable meanings, and telecasters should be alert to eliminate such words. (iii) The Television Code Review Board (see Regulations and Procedures of the Code, VI, Section 3, Authority and Responsibilities) shall maintain and issue to subscribers, from time to time, a continuing list of specific words and phrases which should not be used in keeping with this subsection. This list, however, shall not be considered as all-inclusive.

b) (i) Attacks on religion and religious faiths are not allowed. (ii) Reverence is to mark any mention of the name of God, His attributes and powers. (iii) When religious rites are included in other than religious programs the rites are accurately presented and the ministers, priests and rabbis portrayed in their callings are vested with the dignity of their office and under no circumstances are to be held up to ridicule.

c) (i) Contests may not constitute a lottery. (ii) Any telecasting designed to "buy" the television audience by requiring it to listen and/or view in hope of reward, rather than for the quality of the program, should be avoided. (see Contests).

d) Respect is maintained for the sanctity of marriage and the value of the home. Divorce is not treated casually nor justified as a solution for marital problems.

e) Illicit sex relations are not treated as commendable.

f) Sex crimes and abnormalities are generally unacceptable as program material.

g) Drunkenness and narcotic addiction are never presented as desirable or prevalent.

h) The administration of illegal drugs will not be displayed.

i) The use of liquor in program content shall be de-emphasized. The consumption of liquor in American life, when not required by the plot or for proper characterization, shall not be shown.

j) The use of gambling devices or scenes necessary to the development of plot or as appropriate background is acceptable only when presented with discretion and in moderation, and in a manner which would not excite interest in, or foster, betting nor be instructional in nature. Telecasts of actual sport programs at which on-the-scene betting is permitted by law should be presented in a manner in keeping with Federal, state and local laws, and should concentrate on the subject as a public sporting event.

k) In reference to physical or mental afflictions and deformities, special precautions must be taken to avoid ridiculing sufferers from similar ailments and offending them or members of their families.

l) Exhibitions of fortune-telling, astrology, phrenology, palm-reading, and numerology are acceptable only when required by a plot or the theme of a program, and then the presentation should be developed in a manner designed not to foster superstition or excite interest or belief in these subjects.

m) Televised drama shall not simulate news or special events in such a way as to mislead or alarm. (see News).

n) Legal, medical and other professional advice, diagnosis and treatment will be permitted only in conformity with law and recognized ethical and professional standards.

o) The presentation of cruelty, greed and selfishness as worthy motivations is to be avoided.

p) Excessive or unfair exploitation of others or of their physical or mental afflictions shall not be presented as praiseworthy.

q) Criminality shall be presented as undesirable and unsympathetic. The condoning of crime and the treatment of the commission of crime in a frivolous, cynical or callous manner is unacceptable.

r) The presentation of techniques of crime in such detail as to invite imitation shall be avoided.

s) The use of horror for its own sake will be eliminated; the use of visual or aural effects which would shock or alarm the viewer, and the detailed presentation of brutality or physical agony by sight or by sound are not permissible.

t) Law enforcement shall be upheld, and the officers of the law are to be portrayed with respect and dignity.

u) The presentation of murder or revenge as a motive for murder shall not be presented as justifiable.

v) Suicide as an acceptable solution for human problems is prohibited.

w) The exposition of sex crimes will be avoided.

x) The appearances or dramatization of persons featured in actual crime news will be permitted only in such light as to aid law enforcement or to report the news event.

y) The use of animals, both in the production of television programs and as a part of television program content, shall at all times, be in conformity with accepted standards of humane treatment.

Responsibility Toward Children

1. The education of children involves giving them a sense of the world at large. Crime, violence and sex are a part of the world they will

be called upon to meet, and a certain amount of proper presentation of such is helpful in orienting the child to his social surroundings. However, violence and illicit sex shall not be presented in an attractive manner, nor to an extent such as will lead a child to believe that they play a greater part in life than they do. They should not be presented without indications of the resultant retribution and punishment.

2. It is not enough that only those programs which are intended for viewing by children shall be suitable to the young and immature. (Attention is called to the general items listed under Acceptability of Program Materials). Television is responsible for insuring that programs of all sorts which occur during the times of day when children may normally be expected to have the opportunity of viewing television shall exercise care in the following regards:

a) In affording opportunities for cultural growth as well as for wholesome entertainment.

b) In developing programs to foster and promote the commonly accepted moral, social and ethical ideals characteristic of American life.

c) In reflecting respect for parents, for honorable behavior, and for the constituted authorities of the American community.

d) In eliminating reference to kidnapping of children or threats of kidnapping.

e) In avoiding material which is excessively violent or would create morbid suspense, or other undesirable reactions in children.

f) In exercising particular restraint and care in crime or mystery episodes involving children or minors.

Decency and Decorum in Production

1. The costuming of all performers shall be within the bounds of propriety and shall avoid such exposure or such emphasis on anatomical detail as would embarrass or offend home viewers.

2. The movements of dancers, actors, or other performers shall be kept within the bounds of decency, and lewdness and impropriety shall not be suggested in the positions assumed by performers.

3. Camera angles shall avoid such views of performers as to emphasize anatomical details indecently.

4. Racial or nationality types shall not be shown on television in such a manner as to ridicule the race or nationality.

5. The use of locations closely associated with sexual life or with sexual sin must be governed by good taste and delicacy.

Community Responsibility

A television broadcaster and his staff occupy a position of responsibility in the community and should conscientiously endeavor to be acquainted fully with its needs and characteristics in order better to serve the welfare of its citizens.

Treatment of News and Public Events

News

1. A television station's news schedule should be adequate and well-balanced.

2. News reporting should be factual, fair and without bias.

3. Commentary and analysis should be clearly identified as such.

4. Good taste should prevail in the selection and handling of news: Morbid, sensational or alarming details not essential to the factual report, especially in connection with stories of crime or sex, should be avoided. News should be telecast in such a manner as to avoid panic and unnecessary alarm.

5. At all times, pictorial and verbal material for both news and comment should conform to other sections of these standards, wherever such sections are reasonably applicable.

6. Pictorial material should be chosen with care and not presented in a misleading manner.

7. A television broadcaster should exercise due care in his supervision of content, format, and presentation of newscasts originated by his station, and in his selection of newscasters, commentators, and analysts.

8. A television broadcaster should exercise particular discrimination in the acceptance, placement and presentation of advertising in news programs so that such advertising should be clearly distinguishable from the news content.

9. A television broadcaster should not present fictional events or other non-news material as authentic news telecasts or announcements, nor should he permit dramatizations in any program which would give the false impression that the dramatized material constitutes news. Expletives, (presented aurally or pictorially) such as "flash" or "bulletin" and statements such as "we interrupt this program to bring you . . ." should be reserved specifically for news room use. However, a television broadcaster may properly exercise discretion in the use in non-news programs of words or phrases which do not necessarily imply that the material following is a news release.

Public Events

1. A television broadcaster has an affirmative responsibility at all times to be informed of

RCA-6806—The Beam Power Tube that made 1 million watts of ERP on UHF possible.

11,000 hours on Ch. 28

...and still going strong!

Chief Engineer Charles Sakoski, Sr. checking life records of the RCA-6806 (note the 6806 in the PA cavity).

Read what WBRE-TV's Chief Engineer Charles Sakoski, Sr. says about the RCA-6806 high-power beam tube:

"It is my candid opinion that you have something big in the 6806. One of our 6806 final amplifiers has passed its 11,000th hour of highly satisfactory transmission at full output power and the other 6806 is approaching its 10,000th hour of useful life. The drive power required and output efficiency of these tubes are the same as the day they were installed.

"I wish to point out that we are not squeezing out the last few hours of life from these tubes. All applied voltages including filament remain the same as the day the tubes were installed. Considering the initial cost of the 11,000 plus hour tube, the cost per hour to us is approxi-

mately 56 cents and is still going down each hour it is used. Consider the fact that UHF frequencies, one megawatt of power, and color transmission are involved."

Authorized to operate with a visual power of 1000 kw, ERP, and an aural power of 515 kw, ERP, WBRE-TV is not only making TV station history on Channel 28—WBRE-TV also is setting a record for long tube life in high-power UHF.

WBRE-TV's enthusiastic report on low tube cost per hour of transmitter operation is just one instance among many in which broadcast and television stations are getting "high mileage" on RCA power tubes.

Where lower transmitter tube cost is the goal, RCA power tubes are the answer. Your RCA Electron Tube Distributor stands ready to serve your needs promptly. Just call him.

Tv Code CONTINUED

public events, and to provide coverage consonant with the ends of an informed and enlightened citizenry.

2. Because of the nature of events open to the public, the treatment of such events by a television broadcaster should be effected in a manner to provide for adequate and informed coverage as well as good taste in presentation.

Controversial Public Issues

1. Television provides a valuable forum for the expression of responsible views on public issues of a controversial nature. In keeping therewith the television broadcaster should seek out and develop with accountable individuals, groups and organizations, programs relating to controversial public issues of import to its fellow citizens; and to give fair representation to opposing sides of issues which materially affect the life or welfare of a substantial segment of the public.

2. The provision of time for this purpose should be guided by the following principles:
 a) Requests by individuals, groups or organizations for time to discuss their views on controversial public issues, should be considered on the basis of their individual merits, and in the light of the contribution which the use requested would make to the public interest, and to a well-balanced program structure. b) Programs devoted to the discussion of controversial public issues should be identified as such, and should not be presented in a manner which would mislead listeners or viewers to believe that the program is purely of an entertainment, news, or other character.

Political Telecasts

Political telecasts should be clearly identified as such, and should not be presented by a television broadcaster in a manner which would mislead listeners or viewers to believe that the program is of any other character.

Religious Programs

1. It is the responsibility of a television broadcaster to make available to the community as part of a well-balanced program schedule adequate opportunity for religious presentations.

2. The following principles should be followed in the treatment of such programs: a) Telecasting which reaches men of all creeds simultaneously should avoid attacks upon religion. b) Religious programs should be presented respectfully and accurately and without prejudice or ridicule. c) Religious programs should be presented by responsible individuals, groups and organizations. d) Religious programs should place emphasis on broad religious truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

3. In the allocation of time for telecasts of religious programs it is recommended that the television station use its best efforts to apportion such time fairly among the representative faith groups of its community.

Subliminal Perception

The use of the television medium to transmit information of any kind by use of the process called "subliminal perception," or by the use of any similar technique whereby an attempt is made to convey information to the viewer by transmitting messages below the threshold of normal awareness, is not permitted.

Presentation of Advertising

1. Ever mindful of the role of television as a guest in the home, a television broadcaster should exercise unceasing care to supervise the form in which advertising material is presented over his facilities. Since television is a developing medium, involving methods and techniques distinct from those of radio, it may be desirable from time to time to review and revise the presently suggested practices:

a) Advertising messages should be presented with courtesy and good taste; disturbing or annoying material should be avoided; every effort should be made to keep the advertising message in harmony with the content and general tone of the program in which it appears.

b) A sponsor's advertising messages should be confined within the framework of the sponsor's program structure. A television broad-

caster should avoid the use of commercial announcements which are divorced from the program either by preceding the introduction of the program (as in the case of so-called "cow-catcher" announcements) or by following the apparent sign-off of the program (as in the case of so-called "trailer" announcements). To this end, the program itself should be announced and clearly identified, both audio and video, before the sponsor's advertising material is first used, and should be signed off, both audio and video, after the sponsor's advertising material is last used.

c) Advertising copy should contain no claims intended to disparage competitors, competing products, or other industries, professions or institutions.

d) Since advertising by television is a dynamic technique, a television broadcaster should keep under surveillance new advertising devices so that the spirit and purpose of these standards are fulfilled.

e) Television broadcasters should exercise the utmost care and discrimination with regard to advertising material, including content, placement and presentation, near or adjacent to programs designed for children. No considerations of expediency should be permitted to impinge upon the vital responsibility towards children and adolescents, which is inherent in television, and which must be recognized and accepted by all advertisers employing television.

f) Television advertisers should be encouraged to devote portions of their allotted advertising messages and program time to the support of worthy causes in the public interest in keeping with the highest ideals of the free competitive system.

g) A charge for television time to churches and religious bodies is not recommended.

Acceptability of Advertisers and Products—General

1. A commercial television broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentations for such advertising. However, a television broadcaster should, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements. Moreover, in consideration of the laws and customs of the communities served, each television broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. The foregoing principles should be applied with judgment and flexibility, taking into consideration the characteristics of the medium and the form and content of the particular presentation. In general, because television broadcast is designed for the home and the family, including children, the following principles should govern the business classifications listed below:

a) The advertising of hard liquor should not be accepted.

b) The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable subject to Federal and local laws.

c) Advertising by institutions or enterprises which in their offers of instruction imply promises of employment or make exaggerated claims for the opportunities awaiting those who enroll for courses is generally unacceptable.

d) The advertising of firearms and fireworks is acceptable only subject to Federal and local laws.

e) The advertising of fortune-telling, occultism, spiritualism, astrology, phrenology, palm-reading, numerology, mind-reading or character-reading is not acceptable.

f) Because all products of a personal nature create special problems, such products, when accepted, should be treated with especial emphasis on ethics and the canons of good taste; however, the advertising of intimately personal products which are generally regarded as unsuitable conversational topics in mixed social groups is not acceptable.

g) The advertising of tip sheets, race track publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.

2. Diligence should be exercised to the end that advertising copy accepted for telecasting complies with pertinent Federal, state and local laws.

3. An advertiser who markets more than one product should not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.

4. "Bait-switch" advertising, whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes, is not acceptable.

Advertising of Medical Products

1. The advertising of medical products presents considerations of intimate and far-reaching importance to the consumer, and the following principles and procedures should apply in the advertising thereof: a) A television broadcaster should not accept advertising material which in his opinion offensively describes or dramatizes distress or morbid situations involving ailments, by spoken word, sound or visual effects; b) Because of the personal nature of the advertising of medical products, claims that a product will effect a cure and the indiscriminate use of such words as "safe," "without risk," "harmless," or terms of similar meaning should not be accepted in the advertising of medical products on television stations.

Contests

1. Contests should offer the opportunity to all contestants to win on the basis of ability and skill, rather than chance.

2. All contest details, including rules, eligibility requirements, opening and termination dates should be clearly and completely announced and/or shown, or easily accessible to the viewing public, and the winners' names should be released and prizes awarded as soon as possible after the close of the contest.

3. When advertising is accepted which requests contestants to submit items of product identification or other evidence of purchase of product, reasonable facsimiles thereof should be made acceptable.

4. All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time allowances as herein provided. (See *Time Standards for Advertising Copy*.)

Premiums and Offers

1. Full details of proposed offers should be required by the television broadcaster for investigation and approved before the first announcement of the offer is made to the public.

2. A final date for the termination of an offer should be announced as far in advance as possible.

3. Before accepting for telecast offers involving a monetary consideration, a television broadcaster should satisfy himself as to the integrity of the advertiser and the advertiser's willingness to honor complaints indicating dissatisfaction with the premium by returning the monetary consideration.

4. There should be no misleading descriptions or visual representations of any premiums or gifts which would distort or enlarge their value in the minds of viewers.

5. Assurances should be obtained from the advertiser that premiums offered are not harmful to person or property.

6. Premiums should not be approved which appeal to superstition on the basis of "luck-bearing" powers or otherwise.

Time Standards for Advertising Copy

1. In accordance with good telecast advertising practices, the time standards for advertising copy as follows [see chart below]:

2. Reasonable and limited identification of prize and statement of the donor's name within formats wherein the presentation of contest awards or prizes is a necessary and integral part of program content shall not be included as commercial time within the meaning of paragraph 1, above; however, any oral or visual presentation concerning the product or its donor, over and beyond such identification and statement, shall be included as commercial time within the meaning of paragraph 1, above.

3. The time standards set for [in chart] do not affect the established practice of reserving

Time Standards for Advertising Copy

Length of Program (In Minutes)	5:00	10:00	15:00	20:00	25:00	30:00	35:00	40:00	45:00	50:00	55:00	60:00
"AA" and "A" Time	1:00	2:00	2:30	2:40	2:50	3:00	3:30	4:00	4:30	5:00	5:30	6:00
All Other Time	1:15	2:10	3:00	3:30	4:00	4:15	4:45	5:15	5:45	6:10	6:35	7:00
Length of Program (In Minutes)	65:00	70:00	75:00	80:00	85:00	90:00	95:00	100:00	105:00	110:00	115:00	120:00
"AA" and "A" Time	6:30	7:00	7:30	8:00	8:30	9:00	9:30	10:00	10:30	11:00	11:30	12:00
All Other Time	7:35	8:10	8:45	9:20	9:55	10:30	11:05	11:40	12:15	12:50	13:25	14:00

Above time standards are for sponsored programs. "Participation" programs, carrying announcements for different individual advertisers, may not exceed one minute of advertising per five minutes of programming. (See paragraph 4.)

Broadcasters can benefit

by Graybar's wealth of experience
in selecting and supplying thousands
of maintenance and equipment items

Graybar suppliers and Graybar Broadcasting Specialists were active participants in the beginning of radio broadcasting and telecasting. Graybar aided in the choice of original equipment for many famous radio and TV stations, and Graybar's ground-floor knowledge of these fast growing plants led naturally to the supply of everything electrical for their maintenance.

That's the sort of experience that goes to work for you today when you order any piece of apparatus or equipment from Graybar. At each of more than 130 offices and warehouses, men

familiar with your electrical needs will furnish you with complete catalog and price information. And, at nineteen strategically located district offices, Graybar Communications Specialists are available for consultation on technical problems.

Call Graybar for technical help with anything you need. Supplement your own broad experience with the scientific and practical broadcasting know-how of the Graybar organization. *Graybar Electric Company, Inc., Graybar Building, 420 Lexington Avenue, New York 17, N. Y.*

PHILCO TV Microwave

... provides reliable, low-cost, unattended TV relaying!

Philco television microwave systems provide economical transmission of NTSC compatible color or monochrome TV signals . . . plus full audio channel. Here is modern microwave . . . especially designed to meet the needs of community TV operators for thoroughly dependable operation. Philco TLR systems provide S-T-L relaying in the 5900 to 7400 mc bands.

Heavy duty power supply provides 1 full watt output to insure outstanding operational reliability in continuous unattended service.

All components mount in standard 19" racks.

Unitized circuit construction simplifies maintenance. Built-in test and metering circuits combine with automatic stand-by to assure uninterrupted service at all times.

Here is reliability of performance unaffected by severe weather, free from the many limitations of wire and pole lines, unhampered by problems of difficult terrain, overwater transmission or expensive rights-of-way.

Philco engineers will be happy to help you with your special Microwave requirements. Please contact us for further information. Look ahead . . . and you'll choose Philco.

- Highly reliable, unattended one-watt operation
- Field proven in extended multi-hop applications
- True repeater permits top quality, long haul operation
- Highest power in the industry
- Full voice channel multiplexing
- Philco offers complete turnkey service . . . surveys . . . installation . . . maintenance

◀ **Repeater**—The Philco TLR-4 Microwave Repeater is a true repeater utilizing the heterodyne principle to produce high performance quality and simplicity of operation and maintenance.

Because video performance of a microwave system is determined mainly by the transmitting and receiving terminals, the introduction of the TLR-4 Heterodyne Repeater, which is essentially transparent, results in optimum overall system performance.

The output frequency of the TLR-4 Repeater is derived from the input signal (± 190 mc) provided by a crystal. Therefore, the output frequency is independent of adjustment or drift of the microwave local oscillator.

Field maintenance testing of the TLR-4 Repeater is rapid, consisting only of RF and IF bandpass checks. Only simple IF sweep equipment is needed to obtain original factory alignment of the IF strips for differential phase and differential gain requirements. No special phase testing nor phase correction adjustments need be made.

▶ **Transmitter**—The Philco Model TLR-6 Transmitter consists of three basic units: (1) a transmitter chassis, (2) a +750 volt dc power supply and (3) a +300 volt dc power supply. All units are designed for rack mounting in a standard 19" relay rack.

Transmitter chassis contains the reflex klystron r-f generator and associated modulator, a-f-c circuits; wavemeter and amplifier, metering circuits for monitoring within the equipment, a built-in test signal generator, and a -500 volt power supply. All operating controls and the more frequently used maintenance controls are located on the front panel of the transmitter chassis.

◀ **Receiver**—The Philco Model TLR-6 Receiver consists of seven basic units: (1) a Pre-Amplifier and Mixer Assembly, (2) a Receiver Chassis, (3) an Automatic Frequency Control Chassis, (4) a Local Oscillator Chassis, (5) a Video Chassis, (6) a 300 Volt Power Supply and (7) a 105 Volt Power Supply.

The Pre-Amplifier and Mixer Assembly is connected to the waveguide support at the rear of the rack, while the remaining six units are rack mounted.

The Receiver Chassis contains an IF amplifier plus metering circuits for monitoring critical points within the equipment.

The Automatic Frequency Control Chassis contains a repeller power supply in addition to the AFC circuits.

To meet the challenge of advancing technology, support the rapid expansion of scientific education. At Philco, opportunities are unlimited in electronic research and engineering—transistor circuit applications—computer logic design, test and evaluation and input/output equipment design.

PHILCO.

GOVERNMENT & INDUSTRIAL DIVISION

4708 Wissahickon Avenue • Philadelphia 44, Pennsylvania

In Canada: Philco Corporation of Canada Limited, Don Mills, Ontario

for station use the last 30 seconds of each program for station break and spot announcements.

4. Announcement programs are designed to accommodate a designated number of individual live or recorded announcements, generally one minute in length, which are carried within the body of the program and are available for sale to individual advertisers. Normally not more than 3 one-minute announcements (which should not exceed approximately 125 words if presented live) should be scheduled within a 15-minute period and not more than six such announcements should be scheduled within a 30-minute period in local announcement programs; however, fewer announcements of greater individual length may be scheduled, provided that the aggregate length of the announcements approximates three minutes in a 15-minute program or six minutes in a 30-minute program. In announcement programs other than 15 minutes or 30 minutes in length, the proportion of one minute of announcement

within every five minutes of programming is normally applied. The announcements must be presented within the framework of the program period designated for their use and kept in harmony with the content of the program in which they are placed.

5. Programs presenting women's services, features, shopping guides, market information, and similar materials, provide a special service to the listening and viewing public in which advertising material is an informative and integral part of the program content. Because of these special characteristics the time standards set forth above may be waived to a reasonable extent.

6. More than two back-to-back announcements plus the conventional sponsored 10 second station ID are not acceptable between programs or within the framework of a single program. Announcements scheduled between programs shall not interrupt a preceding or following program.

7. Any casual reference by talent in a program to another's product or service under any trade name or language sufficiently descriptive to identify it should, except for normal guest identifications, be condemned and discouraged.

8. Stationary backdrops or properties in television presentations showing the sponsor's name or product, the name of his product, his trade-mark or slogan may be used only incidentally. They should not intrude on program interest or entertainment. "On Camera" shots of such materials should be fleeting, not too frequent, and mindful of the need of maintaining a proper program balance.

Dramatized Appeals and Advertising

1. Appeals to help fictitious characters in television programs by purchasing the advertiser's product or service or sending for a premium should not be permitted, and such fictitious characters should not be introduced into the advertising message for such purposes.

2. Dramatized advertising involving statements or purported statements by physicians, dentists, or nurses must be presented by accredited members of such professions.

Sponsor Identification

Identification of sponsorship must be made in all sponsored programs in accordance with the requirements of the Communications Act of 1934, as amended, and the Rules and Regulations of the Federal Communications Commission.

Portable
Versatile
Dependable
CECO* Vidicon
SUPPORT EQUIPMENT

gives top performance—Indoors or Outdoors

Expressly designed for the ever increasing TV field, this equipment consists of a pan and tilt Tripod Head with internal Balancing spring, Vidicon Cameras with electronic viewfinder can be easily mounted and operated. The head mounts on the CECO Professional Tripod (or any other standard mounting flange) and the CECO Pro Senior Collapsible Three Wheel Dolly makes this a complete versatile package.

Specifications:

CECO Vidicon Head designed for use with a variety of Vidicon cameras, weighing from 45 pounds up. Vertical and horizontal movement of tilt head controlled by independent friction locking devices. Super-smooth action.

Tripod folds quickly and compactly. Offers a height range from 36 to over 53 inches. Double leg locks.

Pro Senior Collapsible Dolly is lightweight and compact. Rubber-tired wheels may be locked or set in a straight line position.

Professional Jr. Spring Head

Ideal for Viewfinder Vidicon Cameras weighing up to 35 lbs. Internal balancing spring. Built-in spirit level. Fits standard Pro Jr. Tripod, Baby and Hi-Hat (low mount).

The Radio Code of the National Assn. of Broadcasters

The Radio Broadcaster's Creed

We Believe:

That radio broadcasting in the United States of America is a living symbol of democracy; a significant and necessary instrument for maintaining freedom of expression, as established by the First Amendment to the Constitution of the United States;

That its influence in the arts, in science, in education, in commerce, and upon the public welfare is of such magnitude that the only proper measure of its responsibility is the common good of the whole people;

That it is our obligation to serve the people in such manner as to reflect credit upon our profession and to encourage aspiration toward a better estate for all mankind; by making available to every person in America such programs as will perpetuate the traditional leadership of the United States in all phases of the broadcasting art;

That we should make full and ingenious use of man's store of knowledge, his talents, and his skills and exercise critical and discerning judgment concerning all broadcasting operations to the end that we may, intelligently and sympathetically:

Observe the proprieties and customs of civilized society;

Respect the rights and sensitivities of all people;

Honor the sanctity of marriage and the home;

Protect and uphold the dignity and brotherhood of all mankind;

Enrich the daily life of the people through the factual reporting and analysis of news, and through programs of education, entertainment, and information;

Provide for the fair discussion of matters of general public concern; engage in works directed toward the common good; and volunteer our aid and comfort in times of stress and emergency;

Contribute to the economic welfare of all by expanding the channels of trade, by encouraging the development and conservation of natural resources, and by bringing together the buyer and seller through the broadcasting of information pertaining to goods and services.

Toward the achievement of these purposes we agree to observe the following:

PROGRAM STANDARDS

News

Radio is unique in its capacity to reach the largest number of people first with reports on current events. This competitive advantage bespeaks caution—being first is not as important as being right. The following standards are predicated upon that viewpoint.

NEWS SOURCES. Those responsible for news on radio should exercise constant professional care in the selection of sources—for the integrity of the news and the consequent good reputation of radio as a dominant news medium depend largely upon the reliability of such sources.

NEWSCASTING. News reporting should be factual and objective. Good taste should prevail in the selection and handling of news. Morbid, sensational, or alarming details not essential to factual reporting should be avoided. News should be broadcast in such a manner as to avoid creation of panic and unnecessary alarm. Broadcasters should be diligent in their supervision of content, format, and presentation of news broadcasts. Equal diligence should be exercised in selection of editors and reporters who direct news gathering and dissemination, since the station's per-

formance in this vital informational field depends largely upon them.

COMMENTARIES AND ANALYSES. Special obligations devolve upon those who analyze and/or comment upon news developments, and management should be satisfied completely that the task is to be performed in the best interest of the listening public. Programs of news analysis and commentary should be clearly identified as such, distinguishing them from straight news reporting.

EDITORIALIZING. Some stations exercise their rights to express opinions about matters of general public interest. Implicit in these efforts to provide leadership in matters of public consequence and to lend proper authority to the station's standing in the community it serves, is an equal obligation to provide opportunity for qualified divergent viewpoints.

The reputation of a station for honesty and accuracy in editorializing depends upon willingness to expose its convictions to fair rebuttal.

Station editorial comment should be clearly identified as such.

Public Issues

A broadcaster, in allotting time for the presentation of public issues, should exert every effort to insure equality of opportunity.

Time should be allotted with due regard to all elements of balanced program schedules, and to the degree of interest on the part of the public in the questions to be presented or discussed. (To discuss is "to sift or examine by presenting considerations pro and con.") The broadcaster should limit participation in the presentation of public issues to those qualified, recognized, and properly identified groups or individuals whose opinions will assist the general public in reaching conclusions.

Presentation of public issues should be clearly identified.

Political Broadcasts

Political broadcasts, or the dramatization of political issues designed to influence an election, should be properly identified as such.

Advancement of Education and Culture

Because radio is an integral part of American life, there is inherent in radio broadcasting a continuing opportunity to enrich the experience of living through the advancement of education and culture.

The radio broadcaster, in augmenting the educational and cultural influences of the home, the Church, schools, institutions of higher learning, and other entities devoted to education and culture:

- Should be thoroughly conversant with the educational and cultural needs and aspirations of the community served;
- Should cooperate with the responsible and accountable educational and cultural entities of the community to provide enlightenment of listeners;
- Should engage in experimental efforts designed to advance the community's cultural and educational interests.

Religion and Religious Programs

Religious programs should be presented respectfully and without prejudice or ridicule. Radio broadcasting, which reaches men of all creeds simultaneously, should avoid attacks upon religion.

Religious programs should be presented by responsible individuals, groups, or organizations.

Religious programs should place emphasis on broad religious truths, excluding the presentation of controversial or partisan views not directly or necessarily related to religion or morality.

Dramatic Programs

In determining the acceptability of any dramatic program containing any element of crime, mystery, or horror, proper consideration should be given to the possible effect on all members of the family.

Radio should reflect realistically the experience of living, in both its pleasant and tragic aspects, if it is to serve the listener honestly. Nevertheless, it holds a concurrent obligation to provide programs which will encourage better adjustment to life.

This obligation is apparent in the area of dramatic programs particularly. Without sacrificing integrity of presentation, dramatic programs on radio should avoid:

- Techniques and methods of crime presented in such manner as to encourage imitation, or to make the commission of crime attractive, or to suggest that criminals can escape punishment;
- Detailed presentation of brutal killings, torture, or physical agony, horror, the use of supernatural or climatic incidents likely to terrify or excite unduly;
- Episodes involving the kidnapping of children;
- Sound effects calculated to mislead, shock, or unduly alarm the listener;
- Disrespectful portrayal of law enforcement;
- The portrayal of suicide as a satisfactory solution to any problem.

Children's Programs

Programs specifically designed for listening by children should be based upon sound social concepts and should reflect respect for parents, law and order, clean living, high morals, fair play, and honorable behavior.

They should convey the commonly accepted moral, social, and ethical ideals characteristic of American life.

They should contribute to the healthy development of personality and character.

They should afford opportunities for cultural growth as well as for wholesome entertainment.

They should be consistent with integrity of realistic production, but they should avoid material of an extreme nature which might create undesirable emotional reaction in children.

They should avoid appeals urging children to purchase the product specifically for the purpose of keeping the program on the air or which, for any reason, encourage children to enter inappropriate places.

General

Sound effects and expressions characteristically associated with news broadcasts (such as "bulletins," "flash," etc.) should be reserved for announcement of news, and the use of any deceptive techniques in connection with fictional events and non-news programs should not be employed.

When plot development requires the use of material which depends upon physical or mental handicaps, care should be taken to spare the sensibilities of sufferers from similar defects.

Stations should avoid broadcasting program material which would tend to encourage illegal gambling or other violations of Federal, State and local laws, ordinances, and regulations.

Simulation of court atmosphere or use of the term "court" in a program title should be done only in such manner as to eliminate the possibility of creating the false impression that the proceedings broadcast are vested with judicial or official authority.

When dramatized advertising material involves statements by doctors, dentists, nurses, or other professional people, the material should be presented by members of such profession reciting actual experience, or it should be made apparent from the presentation itself that the portrayal is dramatized.

In cases of programs broadcast over multiple station facilities, the originating station or network should assume responsibility for conforming such programs to these Radio Standards of Practice.

ADVERTISING STANDARDS

Advertising is the principal source of revenue of the free, competitive American system of radio broadcasting. It makes possible the presentation to all American people of the finest programs of entertainment, education, and information.

Since the great strength of American radio broadcasting derives from the public respect for and the public approval of its programs, it must be the purpose of each broadcaster to establish and maintain high standards of performance, not only in the selection and production of all programs, but also in the presentation of advertising.

Time Standards for Advertising Copy

As a guide to the determination of good broadcast advertising practice, the time standards for advertising copy are established as follows:

The maximum time to be used for advertising, allowable to any single sponsor, regardless of type of program, should be—

5 minute programs	1:15
10 " "	2:10
15 " "	3:00
25 " "	4:00
30 " "	4:15
45 " "	5:45
60 " "	7:00

The time standards allowable to a single advertiser do not affect the established practice of allowance for station breaks between programs.

Any reference in a sponsored program to another's products or services under any trade name, or language sufficiently descriptive to identify it, should, except for normal guest identifications, be considered as advertising copy.

While any number of products may be advertised by a single sponsor within the specified time standards, advertising copy for these products should be presented within the framework of the program structure. Accordingly, the use on such programs of simulated spot announcements which are divorced from the program by preceding the introduction of the program itself, or by following its apparent sign-off should be avoided. To this end, the program itself should be announced and clearly identified before the use of what have been known as "cow-catcher" announcements, and the programs should be signed off after the use of what have been known as "hitch-hike" announcements.

Presentation of Advertising

The advancing techniques of the broadcast art have shown that the quality and proper integration of advertising copy are just as important as measurement in time. The measure of a station's service to its audience is determined by its over-all performance, rather than by any individual segment of its broadcast day.

Programs of multiple sponsorship presenting commercial services, features, shopping guides, marketing news, and similar information, may include more material normally classified as "commercial" or "advertising," if it is of such nature as to serve the interests of the general public and, if properly produced and intelligently presented, within the established areas of good taste.

The final measurement of any commercial broadcast service is quality. To this, every broadcaster should dedicate his best efforts.

Acceptability of Advertisers and Products

1. A commercial radio broadcaster makes his facilities available for the advertising of products and services and accepts commercial presentations for such advertising. However, he should, in recognition of his responsibility to the public, refuse the facilities of his station to an advertiser where he has good reason to doubt the integrity of the advertiser, the truth of the advertising representations, or the compliance of the advertiser with the spirit and purpose of all applicable legal requirements. Moreover, in consideration of the laws and customs of the communities served, each radio broadcaster should refuse his facilities to the advertisement of products and services, or the use of advertising scripts, which the station has good reason to believe would be objectionable to a substantial and responsible segment of the community. The foregoing principles should be applied with judgment and flexibility in taking into consideration the characteristics of the medium and the form of the particular presentation. In general, because radio broadcasting is designed for the home and the entire family, the following principles should govern the business classifications listed below:

- a) The advertising of hard liquor should not be accepted.
 - b) The advertising of beer and wines is acceptable only when presented in the best of good taste and discretion, and is acceptable subject to existing laws.
 - c) The advertising of fortune-telling, occultism, spiritualism, astrology, phrenology, palm-reading, numerology, mind-reading, or character-reading is not acceptable.
 - d) All advertising of products of a personal nature, when accepted, should be treated with special concern for the sensitivities of the listeners.
 - e) The advertising of tip sheets, publications, or organizations seeking to advertise for the purpose of giving odds or promoting betting or lotteries is unacceptable.
2. An advertiser who markets more than one product should not be permitted to use advertising copy devoted to an acceptable product for purposes of publicizing the brand name or other identification of a product which is not acceptable.
3. Care should be taken to avoid presentation of "bait-switch" advertising whereby goods or services which the advertiser has no intention of selling are offered merely to lure the customer into purchasing higher-priced substitutes.

Contests

Contests should offer the opportunity to all contestants to win on the basis of ability and skill, rather than chance.

All contest details, including rules, eligibility requirements, opening and termination dates, should be clearly and completely announced or easily accessible to the listening public; and the winners' names should be released as soon as possible after the close of the contest.

When contestants are required to submit items of product identification or other evidence of purchase of product, reasonable facsimiles thereof should be made acceptable.

All copy pertaining to any contest (except that which is required by law) associated with the exploitation or sale of the sponsor's product or service, and all references to prizes or gifts offered in such connection should be considered a part of and included in the total time limitations heretofore provided.

All such broadcasts should comply with pertinent federal, state, and local laws and regulations.

Premiums and Offers

The broadcaster should require that full details of proposed offers be submitted for investigation and approval before the first announcement of the offer is made to the public.

A final date for the termination of an offer should be announced as far in advance as possible.

If a consideration is required, the advertiser should agree to honor complaints indicating dissatisfaction with the premium by returning the consideration.

There should be no misleading descriptions or comparisons of any premiums or gifts which will distort or enlarge their value in the minds of the listeners.

Take your pick from the industry's most complete, most advanced line of audio equipment

At the entrance to Electronics Park, Syracuse, New York, Hal Condo, Broadcast Sales, is shown surrounded by representative pieces from the most advanced line of audio equipment in broadcasting. Many of these units represent significant breakthroughs in broadcast engineering design.

Consider the AGC units. Tried-true and available, hundreds are in use in studios throughout the country.

The Uni-Level Amplifiers—either the plug-in or self-powered rack-mounted model—automatically control level differences between two or more program sources. The Audiomatic Limiting Amplifier practically eliminates “thumping,” gives greater range. The exclusive Plug-in Uni-Level Preamplifier maintains near constant signal output, even when the talent moves around.

Find out how and where General Electric audio equipment can pay off for you. Call your Broadcast Equipment representative or write Broadcast Sales Manager, Technical Products Dept., Electronics Park, Syracuse, New York. In Canada, Canadian General Electric Company, Broadcast Equipment Sales, 830 Lansdowne Ave., Toronto, Ontario.

Lower step, left to right: Bridging volume control; transcription equalizer; plug-in relay assembly; line-to-voice coil transformer; microphone plugs and receptacle; bridging-to-line transformer; line-to-line transformer; plug-in pre-amplifier; plug-in program/monitoring amplifier; and equalized transcription pre-amplifier.

Second step, left to right: audiomatic limiting amplifier (AGC); rack-mounted uni-level amplifier (AGC); plug-in uni-level pre-amplifier (AGC); plug-in uni-level amplifier (AGC); jack strip, includ-

ing jack panel and patch cords; and switch and fuse panel.

Third step, left to right: equalizer panel; program level indicator panel; sound effects filter panel; plug-in power supply.

Top step, left to right: transistorized audio console; audio control panel; studio wall speaker; and broadcast shelf. (The transistorized audio console will be available in early 1959, has 18 inputs, and not a tube in the circuitry.)

Equipment shown, plus other items are described in the Audio Data Book. For your free copy, write Section 1Y8 at the above address.

GENERAL  **ELECTRIC**

FCC Rules Regulating Radio-Television

(Selected sections amended to July 1, 1958. Compiled with the cooperation of Pike & Fischer Inc., publisher of Pike & Fischer Radio Regulation.)

ALLOCATIONS AND DEFINITIONS

In am rules . . .

§3.1 Standard broadcast station.—The term "standard broadcast station" means a station licensed for the transmission of radio-telephone emissions primarily intended to be received by the general public and operated on a channel in the band 535-1605 kilocycles, inclusive.

§3.2 Standard broadcast band.—The term "standard broadcast band" means the band of frequencies extending from 535-1605 kilocycles.

§3.3 Standard broadcast channel.—The term "standard broadcast channel" means the band of frequencies occupied by the carrier and two side bands of a broadcast signal with the carrier frequency at the center. Channels shall be designated by their assigned carrier frequencies. The 107 carrier frequencies assigned to standard broadcast stations shall begin at 540 kilocycles and be in successive steps of 10 kilocycles.

§3.4 Dominant station.—The term "dominant station" means a class I station, as hereinafter defined, operating on a clear channel.

§3.5 Secondary station.—The term "secondary station" means any station except a class I station operating on a clear channel.

§3.6 Daytime.—The term "daytime" means that period of time between local sunrise and local sunset.

§3.7 Nighttime.—The term "nighttime" means that period of time between local sunset and 12 midnight local standard time.

EDITOR'S NOTE: On March 11, 1954, the FCC proposed to amend this section to specify that "nighttime" means that period from local sunset to local sunrise.]

§3.8 Sunrise and sunset.—The term "sunrise and sunset" means for each particular location and during any particular month, the time of sunrise and sunset as specified in the instrument of authorization.

§3.9 Broadcast day.—The term "broadcast day" means that period of time between local sunrise and 12 midnight local standard time.

§3.10 Experimental period.—The term "experimental period" means that time between 12 midnight and local sunrise. This period may be used for experimental purposes in testing and maintaining apparatus by the licensee of any standard broadcast station on its assigned frequency and with its authorized power, provided no interference is caused to other stations maintaining a regular operating schedule within such period. No station licensed for "daytime" or "specified hours" of operation may broadcast any regular or scheduled program during this period.

§3.11 Service areas.—(a) The term "primary service area" of a broadcast station means the area in which the ground wave is not subject to objectionable interference or objectionable fading.

(b) The term "secondary service area" of a broadcast station means the area served by the sky wave and not subject to objectionable interference. The signal is subject to intermittent variations in intensity.

(c) The term "intermittent service area" of a broadcast station means the area receiving service from the ground wave but beyond the primary service area and subject to some interference and fading.

§3.12 Portable transmitter.—The term "portable transmitter" means a transmitter so constructed that it may be moved about conveniently from place to place, and is in fact so moved about from time to time, but not ordinarily used while in motion. In the standard broadcast band, such a transmitter is used in making field intensity measurements for locating a transmitter site for a standard broadcast station. A portable broadcast station will not be licensed in the standard broadcast band for regular transmission of programs intended to be received by the public.

§3.13 Auxiliary transmitter.—The term "auxiliary transmitter" means a transmitter maintained only for transmitting the regular programs of a station in case of failure of the main transmitter.

Allocations—(am)

§3.21 Three classes of standard broadcast channels.

(a) Clear channel: A "clear channel" is one on which the dominant station or stations render service over wide areas and which are cleared of objectionable interference within their primary service areas and over all or a substantial portion of their secondary service areas.

(b) Regional channel: A "regional channel" is one on which several stations may operate with powers not in excess of 5 kilowatts. The primary service area of a station operating on any such channel may be limited, as a consequence of interference, to a given field intensity contour.

(c) Local channel: A "local channel" is one on which several stations operate with powers not in excess of 1 kilowatt daytime, and 250

watts nighttime. The primary service area of a station operating on any such channel may be limited as a consequence of interference to a given field intensity contour.

NOTE: The power ceiling for Class IV stations under the North American Regional Broadcasting Agreement (NARBA) is 250 watts. The Agreement between the United States of America and the United Mexican States Concerning Radio Broadcasting in the Standard Broadcast Band would permit daytime operation of Class IV stations with a maximum power of 1 kilowatt in all areas of the United States more than 100 kilometers (62 miles) from the United States/Mexican border. Accordingly, before the Commission will take final action with respect to an application proposing the use of daytime power in excess of 250 watts by a Class IV station, appropriate coordination of the rules providing for the use of such power must be effected with other North American countries. (See Note under Section 3.28(b).)

§3.22 Classes and power of standard broadcast stations.—(a) Class I station: A "class I station" is a dominant station operating on a clear channel and designed to render primary and secondary service over an extended area and at relatively long distances. Its primary service area is free from objectionable interference from other stations on the same and adjacent channels and its secondary service area free from interference except from stations on the adjacent channel, and from stations on the same channel in accordance with the channel designation in section 3.25 or in accordance with the Engineering Standards of Allocation. The operating power shall be not less than 10 kilowatts nor more than 50 kilowatts. (Also see section 3.25 (a) for further power limitation.)

(b) Class II station: A "class II station" is a secondary station which operates on a clear channel (see section 3.25) and is designed to render service over a primary service area which is limited by and subject to such interference as may be received from class I stations. A station of this class shall operate with power not less than 0.25 kilowatt nor more than 50 kilowatts. Whenever necessary, a class II station shall use a directional antenna or other means to avoid interferences with class I stations and with other class II stations, in accordance with §3.182.

EDITOR'S NOTE: Since 1945 the FCC has been considering various changes in the Clear Channel assignments, including the question of a daytime skywave. On April 15, 1958, FCC issued a Notice of Further Rule-Making in which it proposed to break down various clear channels. This is still pending FCC action.]

(c) Class III station: A "class III station" is a station which operates on a regional channel and is designed to render service primarily to a metropolitan district and the rural area contiguous thereto. Class III stations are subdivided into two classes:

(1) Class III-A station: A "class III-A station" is a class III station which operates with power not less than 1 kilowatt nor more than 5 kilowatts, and the service area of which is subject to interference in accordance with §3.182.

(2) Class III-B station: A "class III-B station" is a class III station which operates with a power not less than 0.5 kilowatt and not more than 1 kilowatt night and 1 kilowatt daytime, and the service area of which is subject to interference in accordance with the Engineering Standards of Allocation.

NOTE: The term "metropolitan district" as used in this paragraph is not limited in accordance with the definition given by the Bureau of the Census but includes any principal center of population in any area.

(d) Class IV station: A "class IV station" is a station operating on a local channel and designed to render service primarily to a city or town and the suburban and rural areas contiguous thereto. The power of a station of this class shall not be less than 0.1 kilowatt and not more than 0.25 kilowatt nighttime, and 1 kilowatt daytime, and its service area is subject to interference in accordance with Section 3.182.

§3.23 Time of operation of the several classes of stations.—The several classes of standard broadcast stations may be licensed to operate in accordance with the following:

(a) "Unlimited time" permits operation without a maximum limit as to time.

(b) "Limited time" is applicable to class II (secondary stations) operating on a clear channel only. It permits operation of the secondary station during daytime, and until local sunset if located west of the dominant station on the channel, or if located east thereof, until sunset at the dominant station; and in addition during night hours, if any, not used by the dominant station or stations on the channel.

EDITOR'S NOTE: On March 11, 1954, the FCC proposed to amend this section in line with its proposed new definition of "nighttime." See Sec. 3.7 above. It also proposes other changes.]

(c) Daytime permits operation during the hours between average monthly local sunrise and average monthly local sunset. Daytime stations operating on local channels with a power of 0.1 kw or 0.25 kw may, upon notification to the Commission and to the Engineer in Charge of the radio district in which they are located, operate at hours beyond those specified in their license.

(d) "Sharing time" permits operation during hours which are so restricted by the sta-

tion license as to require a division of time with one or more other stations using the same channel.

(e) Specified hours means that the exact operating hours are specified in the license. (The minimum hours that any station shall operate are specified in Section 3.71.) Specified hours stations operating on local channels with a power of 0.1 kw or 0.25 kw, except those sharing time with other stations may, upon notification to the Commission and the Engineer in Charge of the radio district in which they are located, operate at hours beyond those specified in their license.

§3.24 Broadcast facilities; showing required.—(a) Applications for new stations or for modifications of existing authorizations shall be filed on FCC Form 301; for licenses, on FCC Form 302; for renewal of licenses, on FCC Form 303.

(b) An authorization for a new standard broadcast station or increase in facilities of an existing station will be issued only after a satisfactory showing has been made in regard to the following, among others:

(1) That the proposed assignment will tend to effect a fair, efficient, and equitable distribution of radio service among the several states and communities.

(2) That objectionable interference will not be caused to existing stations or that if interference will be caused the need for the proposed service outweighs the need for the service which will be lost by reason of such interference. That the proposed station will not suffer interference to such an extent that its service would be reduced to an unsatisfactory degree (For determining objectionable interference, see §§3.182 and 3.186).

(3) That the applicant is financially qualified to construct and operate the proposed station.

(4) That the applicant is legally qualified. That the applicant (or the person or persons in control of an applicant corporation or other organization) is of good character and possesses other qualifications sufficient to provide a satisfactory public service.

(5) That the technical equipment proposed, the location of the transmitter, and other technical phases of operation comply with the regulations governing the same, and the requirements of good engineering practice. (See technical regulations of this subpart and §3.183.)

(6) That the facilities sought are subject to assignment as requested under existing international agreements and the rules and regulations of the Commission.

(7) That the population within the 1 v/m contour does not exceed 1.0 percent of the population within the 25 mv/m contour; Provided, however, that where the number of persons within 1 v/m contour is 300 or less the provisions of this subparagraph are not applicable.

(8) That the public interest, convenience, and necessity will be served through the operation under the proposed assignment.

§3.25 Clear channels: Class I and II stations.—The frequencies in the following tabulations are designated as clear channels and assigned for use by the classes of stations given:

(a) To each of the channels below there will be assigned one class I station and there may be assigned one or more class II stations operating limited time or daytime only: 640, 650, 660, 670, 700, 720, 750, 760, 770, 780, 820, 830, 840, 870, 890, 890, 1020, 1040, 1100, 1120, 1160, 1180, 1200 and 1210 kilocycles. There also may be assigned to these frequencies class I stations operating unlimited time in Alaska, Hawaii, Virgin Islands and Puerto Rico which will not deliver over 5 microvolts per meter groundwave day or night or 25 microvolts per meter 10 percent time skywave at night at any point within the continental limits of the United States. The power of the class I stations on these channels shall not be less than 50 kilowatts.

(b) To each of the channels below there may be assigned class I and class II stations: 680, 710, 810, 850, 940, 1000, 1030, 1060, 1070, 1080, 1090, 1140, 1130, 1140, 1170, 1190, 1500, 1510, 1520, 1530, 1540, 1550, and 1560 kilocycles.

NOTE: Class I and II stations on 1540 kilocycles shall deliver not over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point of land in the Bahama Islands, and such stations operating nighttime (i.e., sunset to sunrise at the location of the class II station) shall be located not less than 650 miles from the nearest point of land in the Bahama Islands.

(c) For class II stations which will not deliver over 5 microvolts per meter groundwave or 25 microvolts per meter 10 percent time skywave at any point on Canadian border and provided that such stations operating nighttime (i.e., sunset to sunrise at the location of the class II station) are located not less than 650 miles from the nearest Canadian border: 540, 690, 740, 860, 990, 1010, and 1580 kilocycles.

NOTE: A station on 1010 kilocycles shall also protect a class I-B station at Havana, Cuba.

(d) In continental United States, for class II stations which operate daytime only with power not in excess of 1 kilowatt and which will not deliver over 5 microvolts per meter groundwave at any point on the Mexican border, and in Alaska, Hawaii, Puerto Rico, and the Virgin Islands, for class II stations which will not deliver over 5 microvolts per meter groundwave or 25 microvolts per meter 10 per

Split-Second Timing

Make your own critical test

Here is studio equipment meeting today's needs for greater flexibility, speed, accuracy.

EMT precision equipment is manufactured in the Black Forest area of Western Germany. It is the unmatched standard for all modern European stations.

The Nagra Portable Recorder is made in Switzerland. It too is unexcelled in precision construction and performance.

EMT Model 140 Reverberation Unit

1. True echo chamber characteristics from 0.8 to 6 seconds instantly selectable
2. Remote control available
3. Echo range 30-12000 cycles
4. Mobile, no location problems
5. Non-sensitive to environment
6. Vibrating plate (Dr. Kuhl design) and electronic assembly robust and trouble-free
7. No coloration of original sound
8. Line level input/output

EMT 140 can be effectively used to brighten up "dead" pickups or older releases. Unit shown with side cover removed.

Nagra Model III Portable Recorder

1. Studio Quality in a 10 lb. unit
2. Monitor speaker
3. Pushpull high freq. bias & erase
4. Completely transistorized
5. Volume level indicator
6. Stabilized, printed circuit electronics
7. Three speed series B: 3 3/4-7 1/2-15 ips.
8. Provision for condenser microphones
9. Wide range of output impedances
10. Swiss, precision manufacture
11. "Speech" filter for noisy area pickups
12. Standard, available flashlight batteries give up to 200 hours of operation

The Nagra guarantees studio quality from man-on-the-scene pickups.

EMT Model 930 Compact Turntables

1. Preselection and cue of syllables
 2. Remote switching operation
 3. Line level output (active pre-amp)
 4. All equalization US and Foreign
 5. Highest quality for stereo playback
 6. Tone-arm raise lower mechanism
 7. Exceeds NAB standards for wow/flutter/speed stability/signal to noise.
 8. Built-in speed strobe and vernier adjust
 9. 78/45/33.33/16.6 rpm
- A group of EMT 930's can be cued up in advance in seconds, and played back on the syllable in any combination, from a remote point.

EMT Models 414 and 418 Wow & Flutter Test Sets

1. Instrument and Oscilloscope presentation
2. 3000 and 5000 cycle standards
3. FM and AM readings
4. Standards for comparison in manufacturing
5. Disc, film, tape applications
6. Wide measuring ranges
7. Calibration incorporated
8. Extensive built-in filters simplify fault determination (interference frequencies a function of r.p.m.)

Quality stations should check their recording equipment on a weekly schedule. How long since you checked your film, tape, or disc equipment for wow & flutter?

TOWERS you
need, check
ROHN
FIRST!

AMERICA'S FINEST
COMMUNICATIONS
TOWER OF ITS KIND
... WITH EXCLUSIVE
BUILT-IN ECONOMY

✓ **Reduce Costs**

—by getting a tower specifically for your job. These towers are suitable for use up to 300 feet guyed—or self supporting to 50-60 ft.! ROHN towers are in daily use for micro-wave, radio and dozens of all type communications requirements throughout the U.S.—at big savings—yet more than do the job! Can be used for a multitude of jobs.

✓ **Proven design**

—get full engineering data to prove superiority. Gleaming, hot-dipped galvanized finish available—stays shiny and new—no painting needed. Design fully tested—proved by thousands of installations. Easily shipped and inexpensively installed. Cross pieces form natural ladder for servicing.

✓ **Special Towers**

—you're invited to submit your requirements. Towers will be built to your specifications if practical. Let us know your needs—ROHN can satisfy them BEST when it comes to towers of this type.

Close-up of a Rohn No. 30 Tower used for radio communications. Note guying arrangement, triangular tower design—natural "ladder" for antenna maintenance. This tower is easily erected—very moderate in cost.

FREE

Send for new "Specifications & Price" catalog for Rohn Communications Towers. Your inquiry will receive prompt attention. Rohn representatives are coast-to-coast to serve you. Write—phone—wire

FCC Rules CONTINUED

cent time skywave at any point on the said border: 730, 800, 900, 1050, 1220 and 1570 kilocycles.

NOTE: See North American Regional Broadcasting Agreement for use of 1050 kc by a station in New York (Appendix I, Table IV).

NOTE: See agreement with Mexico for further use of 1220 kc.

§3.26 Regional channels: Classes III-A and III-B stations.—The following frequencies are designated as regional channels and are assigned for use by class III-A and III-B stations: 550, 560, 570, 580, 590, 600, 610, 620, 630, 790, 810, 920, 930, 950, 960, 970, 980, 1150, 1250, 1260, 1270, 1280, 1290, 1300, 1310, 1320, 1330, 1350, 1360, 1370, 1380, 1390, 1410, 1420, 1430, 1440, 1460, 1470, 1480, 1590, and 1600 kilocycles.

NOTE: See North American Regional Broadcasting Agreement for special provisions concerning the assigning of class II stations in other countries of North America to 560, 570, 590, 630 and 1270 kcs. Such stations shall be protected from interference in accordance with Appendix II, Table I, of said agreement.

§3.27 Local channels: Class IV stations.—The following frequencies are designated as local channels and are assigned for use by class IV stations: 1230, 1240, 1400, 1450, and 1490 kilocycles.

§3.28 Assignment of stations to channels.—(a) The individual assignments of stations to channels which may cause interference to other United States stations only shall be made in accordance with the provisions of this Part for the respective classes of stations involved. (For determining objectionable interference see §§3.182 and 3.186.)

(b) In all cases where an individual station assignment may cause interference with or may involve a channel assigned for priority of use by a station in another North American country, the classification, allocation requirements and engineering standards set forth in the North American Regional Broadcasting Agreement shall be observed.

NOTE: Pending action with respect to ratification and entry into force of the North American Regional Broadcasting Agreement, Washington, 1950 (referred to herein as NARBA) and the agreement between the U.S.A. and the United Mexican States Concerning Radio Broadcasting in Standard Broadcast Band (referred herein to as the U.S./Mexican Agreement), no assignment for a standard broadcast station will be made which would be inconsistent with the terms of those agreements. (Remainder of footnote describes procedures to carry this out.)

(c) Upon showing that a need exists, a class II, III or IV station may be assigned to a channel available for such class, even though interference will be received within its normally protected contour; provided: (1) no objectionable interference will be caused by the proposed station to existing stations or that if interference will be caused, the need for the proposed service outweighs the need for the service which will be lost by reason of such interference; and (2) primary service will be provided to the community in which the proposed station is to be located; and (3) the interference received does not affect more than 10% of the population in the proposed station's normally protected primary service area. However, in the event that the nighttime interference received by the proposed station would exceed this amount, then an assignment may be made if the proposed station would provide either a standard broadcast nighttime facility to a community not having such a facility or if 25% or more of the nighttime primary service area of the proposed station is without primary nighttime service.

§3.29 Class IV stations on regional channels.—No license will be granted for the operation of a class IV station on a regional channel, provided, however, that class IV stations presently authorized to operate on regional channels will not be required to change frequency or power but will not be protected against interference from class III stations.

In fm rules . . .

§3.201. Numerical designation of fm broadcast channels.—For convenience, the frequencies available for fm broadcasting (including those assigned to non-commercial educational broadcasting) are given numerical designations which are shown in the table below:

[EDITOR'S NOTE: The band is 88-108 mc. Non-commercial educational fm occupies 88-92 mc. Class A commercial channels are shown in §3.203 (b), below. The rest are class B.]

§3.202 Areas of the United States.—For the purpose of allocation the United States is divided into two areas. The first area—Area I—includes southern New Hampshire; all of Massachusetts, Rhode Island, and Connecticut; southeastern New York as far north as Albany-Troy-Schenectady; all of New Jersey, Delaware, and the District of Columbia; Maryland as far west as Hagerstown; and eastern Pennsylvania as far west as Harrisburg. The second area—Area II—comprehends the remainder of the United States not included in Area I.

NOTE: In some of the territory contiguous to Area I, the demand for frequencies requires that applications be given careful study and

consideration to insure an equitable distribution of facilities throughout the region. The region includes the remainder of Maryland, Pennsylvania, and New York (except the northeastern corner) not included in area I; Virginia, West Virginia, North Carolina, South Carolina, Ohio and Indiana; southern Michigan as far north as Saginaw; eastern Illinois as far west as Rockford-Decatur; and southeastern Wisconsin as far north as Sheboygan. Other regions may be added as required.

§3.203 Class A Stations.—(a) A class A station is a station which operates on a class A channel and is designed to render service primarily to a community or to a city or town other than the principal city of an area, and the surrounding rural area. The coverage of a class A station shall be not more than the equivalent of 1 kilowatt effective radiated power and antenna height of 250 feet above average terrain, as determined by the methods prescribed in §3.311.

[NOTE: For the purpose of determining equivalent coverage, the 1 mv/m contour should be used.]

A class A station will not be licensed with more than 1 kilowatt effective radiated power. The power rating of the transmitter used for a class A station shall be not less than 250 watts nor more than 1 kilowatt. The signal intensity requirements of §3.311 shall determine the minimum coverage of a class A station. Class A station will normally be protected to the 1 mv/m contour; however, assignments will be made in a manner to insure, insofar as possible, a maximum of service to all listeners, whether urban or rural, giving consideration to the minimum signal capable of providing service.

(b) The following frequencies, except as provided in paragraphs (c) and (d) of this section, are designated as class A channels and are assigned for use by class A stations:

Frequency	Channel	Frequency	Channel	Frequency	Channel
92.1	221	96.7	244	102.3	272
92.7	224	97.7	249	103.1	276
93.5	228	98.3	252	103.9	280
94.3	232	99.3	257	104.9	285
95.3	237	100.1	261	105.5	288
95.9	240	100.9	265	106.3	292
		101.7	269	107.1	296

These channels are available for assignment (1) in cities which are not the central city or cities of a metropolitan district, and (2) in central cities of metropolitan districts which have fewer than six class B stations.

(c) In the Territory of Hawaii, the frequency band 98-108 mc is allocated for non-broadcast use. The frequencies 98.1 through 107 mc, inclusive, (channels 251 through 300 inclusive) will not be assigned in the Territory of Hawaii for use by fm broadcast stations.

(d) In the Territory of Alaska the frequency band 88-108 mc is allocated to Government radio services and the non-Government fixed service only. The frequencies 88.1 mc through 99.9 mc (channels 201 through 260 inclusive) will not be assigned in the Territory of Alaska for use by fm broadcast stations.

§3.204 Class B Stations.—

(a) A class B station is a station which operates on a class B channel and is designed to render service primarily to a metropolitan district or principal city and the surrounding rural area, or to rural areas removed from large centers of population. The service area of a class B station will not be protected beyond a 1 mv/m contour; however, class B assignments will be made in a manner to insure, insofar as possible, a maximum of service to all listeners, whether urban or rural, giving consideration to the minimum signal capable of providing service. Standard power ratings of transmitters used for class B stations shall be 1 kw or greater. The signal intensity requirements of §3.311 shall determine the minimum coverage of a class B station. In the following sub-sections, antenna height above average terrain and effective radiated power are to be determined by the methods prescribed in the technical standards of this subpart.

(1) The coverage of a class B station in Area I shall be not more than the equivalent of 20 kilowatts effective radiated power and antenna height of 500 feet above average terrain. A class B station in Area I will not be licensed with an effective radiated power greater than 20 kilowatts [NOTE: for the purpose of determining equivalent coverage, the 1 mv/m contour should be used.]

(2) The coverage of a class B station in Area II shall normally be not more than the equivalent of 20 kilowatts effective radiated power and antenna height of 500 feet above average terrain. The use of greater power and antenna height will be encouraged in those portions of Area II where such use would not result in undue interference to stations already authorized or to probable assignments insofar as can be determined at the time of the grant. In such case, the power, antenna height, and area will be determined on the merits of each application with particular attention being given to rural areas which would not otherwise receive service. [NOTE: For the purpose of determining equivalent coverage, the 1 mv/m contour should be used.]

41	632-638	82	878-884
42	638-644	83	884-890

(b) In the Territories of Alaska and Hawaii the frequency bands 76-82 mc and 82-88 mc are allocated for nonbroadcast use. These frequency bands (Channels 5 and 6) will not be assigned in the Territories of Alaska and Hawaii for use by television broadcast stations.

§3.606. Table of Assignments. (a) The following Table of Assignments contains the channels assigned to the listed communities in the United States, its Territories, and Possessions. Channels designated with an asterisk are assigned for use by non-commercial educational broadcast stations only. A station on a channel identified by a plus or minus mark is required to operate with its carrier frequencies offset 10 kc above or below, respectively, the normal carrier frequencies.

§3.607. Availability of channels.—(a) Subject to the provisions of paragraph (b) of this section, applications may be filed to construct television broadcast stations only on the channels assigned in the Table of Assignments and only in the communities listed therein. Applications which fail to comply with this requirement, whether or not accompanied by a petition to amend the Table, will not be accepted for filing provided, however, that applications specifying channels which accord with publicly announced Commission orders changing the Table of Assignments will be accepted for filing even though such applications are tendered before the effective dates of such channel changes.

(b) A channel assigned to a community listed in the Table of Assignments is available upon application in any unlisted community which is located within 15 miles of the listed community. In addition, a channel assigned to a community listed in the Table of Assignments and not designated for use by noncommercial educational stations only, is available upon application in any other community within 15 miles thereof which, although listed in the Table, is assigned only a channel designated for use only by noncommercial educational stations. Where channels are assigned to two or more communities listed in combina-

tion in the Table of Assignments the provisions of this paragraph shall apply separately to each community so listed. The distance between communities shall be determined by the distance between the respective coordinates thereof as set forth in the publication of the United States Department of Commerce entitled "Air Line Distances Between Cities in the United States." (This publication may be purchased from the Government Printing Office, Washington, D. C.) If said publication does not contain the coordinates of either or both communities, the coordinates of the main post office in either or both of such communities shall be used. The method to be followed in making the measurements is set forth in Section 3.611 (d).

§3.609. Zones. (a) For the purpose of allocation and assignment, the United States is divided into three zones as follows:

(1) Zone I consists of that portion of the United States located within the confines of the following lines drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°; North American datum): Beginning at the most easterly point on the State boundary line between North Carolina and Virginia; thence in a straight line to a point on the Virginia, West Virginia boundary line located at North Latitude 37° 49' and West Longitude 80° 12' 30"; thence westerly along the southern boundary lines of the States of West Virginia, Ohio, Indiana and Illinois to a point at the junction of the Illinois, Kentucky, and Missouri State boundary lines; thence northerly along the western boundary line of the State of Illinois to a point at the junction of the Illinois, Iowa, and Wisconsin State boundary lines; thence easterly along the northern State boundary line of Illinois to the 90th meridian; thence north along this meridian to the 43.5° parallel; thence east along this parallel to the 71st meridian; thence in a straight line to the intersection of the 69th meridian and the 45th parallel; thence east along the 45th parallel to the Atlantic Ocean. When any of the above lines pass through a city, the city shall be considered to be located in Zone I. (See Figure 1 of §3.699.)

(2) Zone II consists of that portion of the United States which is not located in either Zone I or Zone III, and Puerto Rico, Alaska, Hawaiian Islands and the Virgin Islands.

(3) Zone III consists of that portion of the United States located south of a line, drawn on the United States Albers Equal Area Projection Map (based on standard parallels 29½° and 45½°; North American datum), beginning at a point on the east coast of Georgia and the 31st parallel and ending at the United States-Mexican border, consisting of arcs drawn with a 160 mile radius to the north from the following specified points:

North Latitude	West Longitude
a) 29°40'00"	88°24'00"
b) 30°07'00"	84°12'00"
c) 30°31'00"	86°30'00"
d) 30°48'00"	87°58'30"
e) 30°00'00"	90°38'30"
f) 30°04'30"	93°19'00"
g) 29°46'00"	95°05'00"
h) 28°43'00"	98°30'30"
i) 27°52'30"	97°32'00"

When any of the above arcs pass through a city, the city shall be considered to be located in Zone II. (See Figure 2 of §3.699.)

§3.610. Separations. (a) The provisions of this section relate to assignment separations and station separations. Petitions to amend the Table of Assignments (§3.606(b)) (other than those also expressly requesting amendment of this section or §3.609) will be dismissed and all applications for new television broadcast stations or for changes in the transmitter sites of existing stations will not be accepted for filing if they fail to comply with the requirements specified in paragraphs (b), (c) and (d) of this section.

NOTE: Licensees and permittees of television broadcast stations which were operating on April 14, 1952 pursuant to one or more separations below those set forth in §3.610 may continue to so operate, but in no event may they further reduce the separations below the minimum. As the existing separations of such stations are increased, the new separations will become the required minimum separations until separations are reached which comply with the requirements of §3.610. Thereafter, the provisions of said section shall be applicable.

(b) Minimum co-channel assignment and station separations:

Zone	Channels 2-13	Channels 14-83
I	170 miles	155 miles
II	190 miles	175 miles
III	220 miles	205 miles

(2) The minimum co-channel mileage separation between a station in one zone and a station in another zone shall be that of the zone requiring the lower separation.

(c) Minimum assignment and station adja-

FCC Rules CONTINUED

cent channel separations applicable to all zones:

(1) Channels 2-13 60 miles Channels 14-83 55 miles

(2) Due to the frequency spacing which exists between Channels 4 and 5, between Channels 6 and 7, and between Channels 13 and 14, the minimum adjacent channel separations specified above shall not be applicable to these pairs of channels (see §3.603).

(d) In addition to the requirements of paragraphs (a), (b) and (c) of this section, the minimum assignment and station separations between stations on Channels 14-83, inclusive, as set forth in Table IV of §3.698 must be met in either rule making proceedings looking towards the amendment of the Table of Assignments (§3.606(b)) or in licensing proceedings. No channel listed in column (1) of Table IV of §3.698 will be assigned to any city, and no application for an authorization to operate on such a channel will be granted unless the mileage separations indicated at the top of columns (2)-(7), inclusive, are met with respect to each of the channels listed in those columns and parallel with the channel in column (1).

(e) The zone in which the transmitter of a television station is located or proposed to be located determines the applicable rules with respect to co-channel mileage separations where the transmitter is located in a different zone from that in which the channel to be employed is located.

§3.614. Power and antenna height requirements.—(a) Minimum requirements. Applications will not be accepted for filing if they specify less than—10 dbk (100 watts) visual effective radiated power in any horizontal direction. No minimum antenna height above average terrain is specified.

(b) Maximum power. Applications will not be accepted for filing if they specify a power in excess of that provided for in this paragraph. Except as provided in subparagraph (1) below, the maximum effective radiated powers of television broadcast stations operating on the channels set forth below with antenna heights not in excess of 2000 feet above average terrain shall be as follows:

Channel Nos.	Maximum visual effective radiated power in db above one kilowatt (dbk)
2-6	20 dbk (100 kw)
7-13	25 dbk (316 kw)
14-83	37 dbk (5000 kw)

(1) In Zone I, on Channels 2-13, inclusive, the maximum powers specified above for these channels may be used only with antenna heights not in excess of 1000 feet above average terrain. Where antenna heights exceeding 1000 feet above average terrain are used on Channels 2-13, or antenna heights exceeding 2000 feet above average terrain are used on Channels 14-83, the maximum power shall be based on the chart designated as Figure 3 of §3.699.

NOTE: This limitation shall not apply to any licensee or permittee in Zone I who received an authorization after March 22, 1951, to relocate its transmitter site and construct a new tower and antenna to a height in excess of 1000 feet above average terrain and who constructed or who had substantially completed construction of said tower and antenna prior to April 14, 1952. In such case, maximum power may be utilized at the height above average terrain specified in the authorization. The limitation shall apply, however, where the tower or other principal supporting structure had been constructed prior to the date of such authorization.

(2) In Zones II and III, the maximum powers which may be used by television broadcast stations operating on the respective channels set forth in the above table with antenna heights exceeding 2000 feet above average terrain shall be based on the chart designated as Appendix III, Figure 2b.

(3) The effective radiated power in any horizontal or vertical direction may not exceed the maximum values permitted by this section and Appendix III, Figures 2(a) and 2(b).

(4) The maximum effective radiated power in any direction above the horizontal plane shall be as low as the state of the art permits and may not exceed the effective radiated power in the horizontal direction in the same vertical plane.

(c) The zone in which the transmitter of a television station is located or proposed to be located determines the applicable rules with respect to maximum antenna heights and powers for vhf stations when the transmitter is located in Zone I and the channel to be employed is located in Zone II, or the transmitter is located in Zone II and the channel to be employed is located in Zone I.

MULTIPLE OWNERSHIP

In am rules . . .

§3.35 Multiple ownership.—No license for a standard broadcast station shall be granted to any party (including all parties under common control) if

(1) such party directly or indirectly owns, operates or controls another standard broadcast station, a substantial portion of whose primary service area would receive primary service from the station in question, except upon a showing that public interest, convenience and necessity will be served through such multiple ownership situation; or

(2) such party, or any stockholder, officer or director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other standard broadcast station if the grant of such license would result in a concentration of control of standard broadcasting in a manner inconsistent with public interest, convenience, or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of area served, the number of people served, classes of stations involved and the extent of other competitive service to the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven standard broadcast stations.

NOTE: The word "control" as used herein, is not limited to majority stock ownership but includes actual working control in whatever manner exercised.

NOTE: In applying the foregoing provisions to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

In fm rules . . .

§3.240 Multiple ownership.—No license for an fm broadcast station shall be granted to any party (including all parties under common control) if

(1) such party directly or indirectly owns, operates, or controls another fm broadcast station which serves substantially the same service area; or

(2) such party, or any stockholder, officer or director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other fm broadcast station if the grant of such license would result in a concentration of control of fm broadcasting in a manner inconsistent with public interest, convenience or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of areas served, the number of people served, classes of stations involved, and the extent of other competitive service to the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven fm broadcast stations.

NOTE: The word "control" as used herein, is not limited to majority stock ownership but includes actual working control in whatever manner exercised.

NOTE: In applying the foregoing provisions to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

GATES

GATES RADIO COMPANY

QUINCY, ILLINOIS

In tv rules . . .

§3.638. Multiple ownership.—(a) No license for a television broadcast station shall be granted to any party (including all parties under common control) if

(1) such party directly or indirectly owns, operates, or controls another television broadcast station which serves substantially the same area; or

(2) such party, or any stockholder, officer or director of such party, directly or indirectly owns, operates, controls, or has any interest in, or is an officer or director of any other television broadcast station if the grant of such license would result in a concentration of control of television broadcasting in a manner inconsistent with public interest, convenience, or necessity. In determining whether there is such a concentration of control, consideration will be given to the facts of each case with particular reference to such factors as the size, extent and location of areas served, the number of people served, and the extent of other competitive service to the areas in question. The Commission, however, will in any event consider that there would be such a concentration of control contrary to the public interest, convenience or necessity for any party or any of its stockholders, officers or directors to have a direct or indirect interest in, or be stockholders, officers, or directors of, more than seven television broadcast stations, no more than five of which may be in the vhf band.

(b) Paragraph (a) of this section is not applicable to non-commercial educational stations.

NOTE 1: The word "control" as used herein is not limited to majority stock ownership, but includes actual working control in whatever manner exercised.

NOTE 2: In applying the provisions of paragraph (a) of this section to the stockholders of a corporation which has more than 50 voting stockholders, only those stockholders need be considered who are officers or directors or who directly or indirectly own 1% or more of the outstanding voting stock.

STUDIO LOCATION ORIGINATIONS

In am rules . . .

§3.30 Station location and program origination.—(a) Except as provided in paragraph (b) of this section, each standard broadcast station will be licensed to serve primarily a particular city, town, or other political subdivision, which will be specified in the station license and the station will be considered to be located in such place. Unless licensed as a synchronous amplifier transmitter, each station shall maintain a studio, which will be known as the main studio, in the place where the station is located, provided that the main

studio may be located at the transmitter site whether or not the transmitter site is in the place where the station is located. A majority (computed on the basis of duration and not number) of a station's programs or in the case of a station affiliated with a network two-thirds of such station's non-network programs, whichever is smaller, shall originate from the main studio or from other studios or remote points situated in the place where the station is located.

(b) Stations will be licensed to serve more than one city, town, or other political subdivision only where a satisfactory showing is made that such place meets all the requirements of the Rules and Standards of Good Engineering Practice with respect to the location of main studios; that the station can and will originate a substantial number of local live programs from each such place; and that the requirements as to origination of programs contained in paragraph (a) of this section would place an unreasonable burden on the station if it were licensed to serve only one city, town, or other political subdivision. A station licensed to serve more than one place shall be considered to be located in and shall maintain main studios in each such place. With respect to such station the requirements as to origination of programs contained in paragraph (a) of this section shall be satisfied by the origination of programs from any or all of the main studios or from other studios and remote points situated in any or all of the places in which the main studios are located.

(c) The transmitter of each standard broadcast station shall be so located that primary service is delivered to the borough or city in which the main studio is located in accordance with the Standards of Good Engineering Practice, prescribed by the Commission.

§3.31 Authority to move main studio.—The licensee of a station shall not move its main studio outside the borders of the borough or city, state, district, territory, or possession in which it is located, unless such move is to the location of the station's transmitter, without first securing a modification of construction permit or license. The licensee shall promptly notify the Commission of any other change in location of the main studio.

In fm rules . . .

§3.205—[EDITOR'S NOTE: In substance the same as §3.30, above, except that subsection (c) reads as follows:

"The transmitter of each fm broadcast station shall be so located that satisfactory service is delivered to the city where the main studio is located in accordance with the technical standards of this subpart; provided, however, upon special showing of need, authorization may be granted to locate the transmitter so that adequate service is not rendered to this city, but in no event shall this city be beyond the 50 uv/m contour."

In tv rules . . .

§3.613 Main studio location.—(a) The main studio of a television broadcast station shall be located in the principal community to be served. Where the principal community to be served is a city, town, village or other political subdivision, the main studio shall be located within the corporate boundaries of such city, town, village or other political subdivision. Where the principal community to be served does not have specifically defined political boundaries, applications will be considered on a case-to-case basis in the light of the particular facts involved to determine whether the main studio is located within the principal community to be served.

(b) In cases where an adequate showing is made that there is good cause for locating a main studio outside the principal community to be served and that to do so would not be inconsistent with the operation of the station in the public interest, the Commission will permit the use of a main studio location other than that specified in paragraph (a) of this section. The licensee or permittee of a television broadcast station shall not move his main studio outside the principal community in which it is located without first securing a modification of construction permit or license. Such a licensee or permittee shall notify the Commission promptly of any change of the location of the main studio within the community. In any case where the main studio is located outside the principal community to be served, the licensee or permittee of a television broadcast station shall not move his main studio without first securing a modification of construction permit or license.

OPERATING SCHEDULES

For am stations . . .

§3.71 Minimum operating schedule.—Except Sundays, the licensee of each standard broadcast station shall maintain a minimum operating schedule of two-thirds of the total hours that it is authorized to operate between 6 a.m. and 6 p.m., local standard time, and two-thirds of the total hours it is authorized to operate between 6 p.m. and midnight, local standard time, except that in an emergency when, due to causes beyond the control of the licensee, it becomes impossible to continue operating, the station may cease operation for a period of not to exceed 10 days, provided that the Commission and the engineer in charge of the radio district in which the station is located shall be notified in writing immediately after the emergency.

§3.72 Operation during experimental period.—The licensee of each standard broadcast station shall operate or refrain from operating its station during the experimental period as directed by the Commission in order to facilitate frequency measurement or for the determination of interference.

§3.73 Specified hours.—If the license of a station specifies the hours of operation, the schedule so specified shall be adhered to except as provided in sections 3.71 and 3.72.

§3.79 License to specify sunrise and sunset hours.—If the licensee of a broadcast station is required to commence or cease operation, or to change the mode of operation of the station at the times of sunrise and sunset at any particular location, the controlling times of each month of the year are set forth in the station's instrument of authorization. Uniform sunrise and sunset times are specified for all of the days of each month, based upon the actual times of sunrise and sunset for the fifteenth day of that month adjusted to the nearest quarter hour. In accordance with a standardized procedure described therein, actual sunrise and sunset time are derived by interpolation in the tables of the 1946 American Nautical Almanac, issued by the Nautical Almanac Office of the United States Naval Observatory.

§3.80 Secondary station; filing of operating schedule.—The licensee of a secondary station authorized to operate limited time and which may resume operation at the time the dominant station (or stations) on the same channel ceases operation shall, with each application for renewal of license, file in triplicate a copy of its regular operating schedule, bearing a signed notation by the licensee of the dominant station of its objection or lack of objection thereto. Upon approval of such operating schedule, the Commission will affix its file mark and return one copy to the licensee authorized to operate limited time, which shall be posted with the station license and considered as a part thereof. Departure from said operating schedule will be permitted only in accordance with the procedure set forth in section 3.77.

§3.81 Secondary station; failure to reach agreement.—If the licensee of a secondary station authorized to operate limited time and a dominant station on a channel are unable to agree upon a definite time for resumption of operation by the station authorized limited time, the Commission shall be so notified by the licensee of the station authorized limited time. After receipt of such statement the Commission will designate for hearing the applications of both stations for renewal of license, and pending the hearing the schedule previously adhered to shall remain in full force and effect.

§3.82 Departure from schedule; material violation.—In all cases where a station licensee is required to prepare and file an operating schedule, any deviation or departure from such schedule, except as herein author-

FCC Rules CONTINUED

ized, shall be considered as a violation of a material term of the license.

§3.83 Local standard time.—All references herein to standard time or local standard time refer to local standard time as determined and fixed by the Interstate Commerce Commission.

§3.84 Daylight saving time.—If local time is changed from standard time to daylight saving time at the location of all stations sharing time on the same channel, the hours of operation of all such stations on that channel shall be understood to refer to daylight saving time, and not standard time, as long as daylight saving time is observed at such location. This provision shall govern when the time is changed by provision of law or general observance of daylight saving time by the various communities, and when the time of operation of such stations is specified in the license or is mutually agreed upon by the licensee; provided, however, that when the license specifies average time of sunrise and sunset, local standard time shall be observed. In no event shall a station licensed for daytime only operate on regular schedule prior to local sunrise, or shall a station licensed for greater daytime power than nighttime power or for a different radiation pattern for daytime operation than for nighttime operation operate with the daytime power or radiation pattern prior to local sunrise.

§3.85 Changes in time; agreement between licensees.—Where the local time is not changed from standard time to daylight saving time at the location of all stations sharing time on the same channel, the hours of operation of such stations shall be understood to have reference to standard time, and not daylight saving time, unless said licensees mutually agree upon a new schedule which shall be effective only while daylight saving time is observed at the location of some of these stations.

§3.86 Local standard time; license provisions.—The time of operation of any broadcast station which does not share time with other stations on the same channel shall be understood to have reference to local standard time unless modification of such license with respect to hours of operation is authorized by the Commission.

§3.87 Program transmission prior to local sunrise.—(a) The provisions of sections 3.6, 3.8, 3.9, 3.10, 3.23, 3.79 and 3.84 shall not prevent the transmission of programs between four o'clock a.m., local standard time, and local sunrise of standard broadcast stations with their authorized daytime facilities, provided, that the provisions of this rule shall not extend to:

(1) Stations regularly sharing time during daytime hours either under licenses pursuant to which time-sharing agreements have been entered into or licenses specifying hours of operation, unless time-sharing agreements have been reached covering such operation prior to local sunrise. Sections 3.74, 3.77, and 3.78 of these rules shall be applicable to such agreements.

(2) Any class II station causing interference as determined by the standard broadcast technical standards of this subpart by use of its daytime facilities within the 0.5 mv/m 50% skywave contour of any class I station either of the United States or of any country party to the North American Regional Broadcasting Agreement, except (a) where the class I station is located East of the class II station, in which case operation may begin at local sunrise at the class I station; (b) where an agreement has been reached with the class I station to begin operation prior to local sunrise.

(3) Operation by use of its daytime facilities of any class II station on any class I-A channel not assigned to the United States under the North American Regional Broadcasting Agreement.

(b) Any station operating during such hours receiving notice from the Commission that undue interference is caused shall refrain from such operation during such hours pending further notice from the Commission.

(c) Nothing contained in outstanding instruments of authorization for such stations shall prohibit such operation except as herein provided.

(d) The period 4 a.m. to 6 a.m., local standard time, shall not be included in determining compliance with section 3.71.

§3.88 Blanketing Interference.—The licensee of each broadcast station is required to satisfy all reasonable complaints of blanketing interference with the 1 v/m contour.

For fm stations . . .

§3.261 Time of operation.—All fm broadcast stations will be licensed for unlimited time operation. A minimum of 36 hours per week during the hours of 6 a.m. to midnight consisting of not less than 5 hours in any one day, except Sunday, must be devoted to the fm broadcast operation; time devoted to operations conducted pursuant to a Subsidiary Communications Authorization (see § 3.293-3.295) shall not be included in meeting this 36-hour broadcast requirement. In an emergency, however, when due to causes beyond the control of the licensee, it becomes impossible to continue operation, the station may cease operation for a period not to exceed 10 days, provided that the Commission and the engineer in charge of the radio district in which the station

is located shall be notified in writing immediately after the emergency develops.

§3.262 Experimental operation.—The period between 1:00 a.m. and 8:00 a.m., local standard time, may be used for experimental purposes in testing and maintaining apparatus by the licensee of any fm broadcast station on its assigned frequency and not in excess of its authorized power, without specific authorization by the Commission.

For tv stations . . .

§3.651 Time of operation.—(a) All television broadcast stations will be licensed for unlimited time operation. Each such station shall maintain a regular program operating schedule as follows: not less than two hours daily in any five broadcast days per week and not less than a total of twelve hours per week during the first eighteen months of the station's operation; not less than two hours daily in any five broadcast days per week and not less than a total of sixteen hours, twenty hours and twenty-four hours per week for each successive six month period of operation, respectively; and not less than two hours in each of the seven days of the week and not less than a total of twenty-eight hours per week thereafter. "Operation" includes the period during which a station is operated pursuant to special temporary authority or during program tests, as well as during the license period. Time devoted to test patterns, or to aural presentations accompanied by the incidental use of fixed visual images which have no substantial relationship to the subject matter of such aural presentation, shall not be considered in computing periods of program service. If, in the event of an emergency due to causes beyond the control of a licensee, it becomes impossible to continue operation, the Commission and the Engineer in Charge of the radio district in which the station is located shall be notified in writing immediately after the emergency develops and immediately after the emergency ceases and operation is resumed.

(b) Noncommercial educational television broadcast stations are not required to operate on a regular schedule and no minimum number of hours of operation is specified; but the hours of actual operation during a license period shall be taken into account when considering the renewal of noncommercial educational television broadcast licenses.

(c) (1) The aural transmitter of a television station shall not be operated separately from the visual transmitter except for the following purposes:

(i) For actual tests of station equipment or actual experimentation in accordance with Section 3.666; and

(ii) For emergency "fills" in case of visual equipment failure or unscheduled and unavoidable delays in presenting visual programs. In such situations the aural transmitter may be used to advise the audience of difficulties and to transmit for a short period program material of such nature that the audience will be enabled to remain tuned to the station; for example, music or news accompanying a test pattern or other visual presentation.

(2) During periods of transmission of a test pattern on the visual transmitter of a television station, aural transmission shall consist only of a single tone or series of variable tones. During periods when still pictures or slides are employed to produce visual transmissions which are accompanied by aural transmissions, the aural and visual transmission shall be integral parts of a program or announcement and shall have a substantial relationship to each other: Provided, That nothing herein shall preclude the transmission of a test pattern, still picture or slides for the following purposes and periods:

(1) To accompany aural announcements of the station's program schedule and aural news broadcasts or news commentaries, for a total period not to exceed one hour in any broadcast day.

(2) To accompany aural transmissions for a period of time not to exceed fifteen minutes immediately prior to the commencement of a programming schedule.

Examples: (1) Duplication of am or fm programs on the aural transmitter of a television station while the same program is broadcast on the visual transmitter (i.e., a "simulcast") is consistent with this paragraph.

(2) Duplication of am or fm programs on the aural transmitter of a television station while a test pattern is broadcast on the visual transmitter is not consistent with this paragraph, except for the specific purposes and periods specified in paragraph (c) (2).

(3) A travel lecture in which the words of the lecturer are broadcast simultaneously with still pictures or slides of scenes illustrating the lecture, and a newscast in which the words of the newscaster are broadcast simultaneously with still pictures or slides of the news events, are examples of programs in which the aural and visual transmission are integral parts of the same program having a substantial relationship to each other, within the meaning of paragraph (c) (2). Mood music unrelated to the visual transmission is not consistent with this paragraph.

(4) The broadcast of a test pattern accompanied by a musical composition for the purpose of demonstration, sale, installation or orientation of television receivers, or receiving

antennas is not consistent with this paragraph.

(5) Music accompanying the transmission of a test pattern upon which is visually imposed a moving text consisting of continuous program material, such as a running newscast or news commentary, is consistent with this paragraph.

(6) Music accompanying the transmission of a test pattern upon which is visually imposed a clock indicating the time of day, or a text that is changed at spaced intervals, is not consistent with this paragraph.

OPERATOR REQUIREMENTS

In am rules . . .

§3.93 Operator requirements.—(a) One or more radio operators holding a valid radiotelephone first-class operator license, except as provided in paragraph (b) of this section, shall be in actual charge of the transmitting apparatus and shall be on duty either at the transmitter location or remote control point.

(b) A station which is authorized for non-directional operation with power of 10 kilowatts or less may be operated by persons holding commercial radio operator license of any class, except an aircraft radiotelephone operator authorization or a temporary limited radiotelegraph second-class operator license, when the equipment is so designed that the stability of the frequency is maintained by the transmitter itself within the limits of tolerance specified, and none of the operations, except those specified below, necessary to be performed during the course of normal operation may cause off-frequency operation or result in any unauthorized radiation. Adjustments of transmitting equipment by such operators, except when under the immediate supervision of a radiotelephone first-class operator, shall be limited to the following: (1) Those necessary to commence or terminate transmitter emissions as a routine matter. (2) Those external adjustments that may be required as a result of variations of primary power supply. (3) Those external adjustments which may be necessary to insure modulation within the limits required. (4) Those adjustments necessary to effect any change in operating power which may be required by the station's instrument of authorization. Should the transmitting apparatus be observed to be operating in a manner inconsistent with the station's instrument of authorization and none of the above adjustments are effective in bringing it into proper operation, a person holding other than a radiotelephone first-class operator license and not acting under the immediate supervision of radiotelephone first-class operator, shall be required to terminate the station's emissions.

NOTE: A person holding any class of radio operator license or permit who is authorized thereunder to perform limited operation of a standard broadcast station may, when a Conelrad Radio Alert is called, make adjustments necessary to effect operation on a Conelrad authorization; provided, that the station's full-time radiotelephone first-class operator shall have previously instructed such person in the adjustments to the transmitter which are necessary to accomplish Conelrad operation.

(c) The licensee of a station which is operated by one or more operators holding other than a radiotelephone first-class operator license shall have one or more operators holding a radiotelephone first-class operator license in regular full-time employment at the station whose primary duties shall be to effect and insure the proper functioning of the transmitting equipment. In the event that the licensee also operates an fm broadcast station in the same community, a regular full-time radiotelephone first-class operator or operators employed in connection with the standard broadcast station may concurrently be employed to satisfy the requirements of §§ 3.265 (c) or 3.565 (c): Provided, that the duties of such operator or operators concerning the fm broadcast transmitting equipment shall in no wise interfere with the proper performance of his duties with respect to the standard broadcast transmitter.

(d) The licensed operator on duty and in charge of a standard broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of another radio station or stations in accordance with the class of operator's license which he holds and the rules and regulations governing such other stations: Provided, however, that such duties shall in no wise interfere with the proper operation of the standard broadcast transmitter.

In fm rules . . .

§3.265 Operator requirements.

[EDITOR'S NOTE: Substantially the same as §3.93.]

In tv rules . . .

§3.661. Operator requirements. One or more licensed radiotelephone first-class operators shall be on duty at the place where the transmitting apparatus of each station is located and in actual charge thereof whenever it is being operated. The original license (or FCC Form No. 759) of each station operator shall be posted at the place where he is on duty. The licensed operator on duty and in charge of a television broadcast transmitter may, at the discretion of the licensee, be employed for other duties or for the operation of an-

How many puffs in a station break— *or when does sales resistance become resentment?*

Here's another place where film comes into the picture . . . because pre-testing is easy with commercials on film—lets you test to your heart's content before you show them. Important, too—film gives you full control of time and station . . . keeps you in the driver's seat all the way.

Use black-and-white—or color . . . there's an Eastman Film for every purpose. For complete information write to:

other station or stations in accordance with the class of operator's license which he holds and by the rules and regulations governing such stations. However, such duties shall in no wise interfere with the operation of the broadcast transmitter.

FACSIMILE

§3.266 Facsimile broadcasting and multiplex transmission.—(a) Fm broadcast stations may transmit simplex facsimile in accordance with transmission standards set forth in §3.318 during periods not devoted to fm aural broadcasting. Such transmissions may not exceed one hour during the period between 7 a.m. and midnight (no limit for the hours between midnight and 7 a.m.) and may not be counted toward the minimum operation required by section 3.261. The Commission shall be notified by the licensee of the fm broadcast station of its intent to transmit such facsimile.

(b) Fm broadcast stations may, upon securing authorization from the Commission, transmit multiplex facsimile in accordance with transmission standards set forth in §3.318; provided that the transmission of such facsimile does not reduce the quality of aural programs simultaneously transmitted by the licensee below that required by the technical standards of this subpart and that no degradation of such aural programs will result from such facsimile transmissions when received on fm receivers not equipped with filter or other additional equipment.

NETWORK AFFILIATION

In am rules . . .

§3.131 Exclusive affiliation of station.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization. (The term "network organization" as used herein includes national and regional network organizations. See Chapter VII, J or Report on Chain Broadcasting.)

§3.132 Territorial exclusivity.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another station serving substantially the same area from broadcasting the network's programs not taken by the former station, or which prevents or hinders another station serving a substantially different area from broadcasting any program of the network organization. This section shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its primary service area upon the programs of the network organization.

§3.133 Term of affiliation.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original term, provisions for renewal, or otherwise for the affiliation of the station with the network organization for a period longer than two years; provided, that a contract, arrangement, or understanding for a period up to two years, may be entered into within six months prior to the commencement of such period.

§3.134 Option time.—No license shall be granted to a standard broadcast station which options for network programs any time subject to call on less than 56 days' notice, or more time than a total of three hours within each of four segments of the broadcast day, as herein described. The broadcast day is divided into four segments, as follows: 3:00 a.m. to 1:00 p.m.; 1:00 p.m. to 6:00 p.m.; 6:00 p.m. to 11:00 p.m.; 11:00 p.m. to 3:00 a.m. (These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.) Such option may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

NOTE: As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

NOTE: All time options permitted under this section must be for specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

§3.135 Right to reject programs.—No license

shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which (a) with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (b) with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

§3.136 Network ownership of stations.—No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control with a network organization, for more than one standard broadcast station where one of the stations covers substantially the service area of the other station, or for any standard broadcast station in any locality where the existing standard broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

NOTE: Effective date of this section with respect to any station may be extended from time to time in order to permit the orderly disposition of properties; and it shall be suspended indefinitely with respect to regional network organizations.

§3.137 Dual network operation.—No license shall be issued to a standard broadcast station affiliated with a network organization which maintains more than one network; provided, that this section shall not be applicable if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

§3.138 Control by networks of station rates.—No license shall be granted to a standard broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

In fm rules . . .

§3.231-3.238, Inclusive.—[EDITOR'S NOTE: Same as §§3.131-3.138, above, with the following exceptions: (1) references are to fm rather than standard stations and networks; and (2) the section on "Network Ownership of Stations" is changed to read as follows:

§3.236 Network ownership of stations.—No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control of a network organization, for an fm broadcast station in any locality where the existing fm broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used in this section, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

NOTE: The word "control" as used herein, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.

In tv rules . . .

§3.658. Affiliation agreements.—(a) Exclusive affiliation of station. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, broadcasting the programs of any other network organization.

(The term "network organization" as used herein includes national and regional network organizations. See ch. VII, J. of Report on Chain Broadcasting.)

(b) Territorial exclusivity. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which prevents or hinders another broadcast station in the same community from broadcasting the network's programs not taken by the former station, or which prevents or hinders another broadcast station located in a different community from broadcasting any program of the network organization. This regulation shall not be construed to prohibit any contract, arrangement, or understanding between a station and a network organization pursuant to which the station is granted the first call in its community upon the program of the network organization. As employed in this paragraph the term "community" is defined as the community specified in the instrument of authorization as the location of the station.

(c) Term of Affiliation. No license shall be granted to a television broadcast station having any contract, arrangement, or understanding, express or implied, with a network organization which provides, by original terms, provisions for renewal, or otherwise for the affiliation of the station with the network

organization for a period longer than 2 years; Provided, that a contract, arrangement, or understanding for a period up to 2 years may be entered into within 6 months prior to the commencement of such period.

(d) Option time. No license shall be granted to a television broadcast station which options for network programs any time subject to call on less than 56 days' notice, or more time than a total of 3 hours within each of four segments of the broadcast day, as herein described. The broadcast day is divided into four segments, as follows: 8 a.m. to 1 p.m.; 1 p.m. to 6 p.m.; 6 p.m. to 11 p.m.; 11 p.m. to 8 a.m. (These segments are to be determined for each station in terms of local time at the location of the station but may remain constant throughout the year regardless of shifts from standard to daylight saving time or vice versa.) Such options may not be exclusive as against other network organizations and may not prevent or hinder the station from optioning or selling any or all of the time covered by the option, or other time, to other network organizations.

NOTE 1: As used in this section, an option is any contract, arrangement, or understanding, express or implied, between a station and a network organization which prevents or hinders the station from scheduling programs before the network agrees to utilize the time during which such programs are scheduled, or which requires the station to clear time already scheduled when the network organization seeks to utilize the time.

NOTE 2: All time options permitted under this section must be specified clock hours, expressed in terms of any time system set forth in the contract agreed upon by the station and network organization. Shifts from daylight saving to standard time or vice versa may or may not shift the specified hours correspondingly as agreed by the station and network organization.

(e) Right to reject programs. No license shall be granted to a television broadcast station having any contract, arrangement or understanding, express or implied, with a network organization which, (1) with respect to programs offered pursuant to an affiliation contract, prevents or hinders the station from rejecting or refusing network programs which the station reasonably believes to be unsatisfactory or unsuitable; or which (2) with respect to network programs so offered or already contracted for, prevents the station from rejecting or refusing any program which, in its opinion, is contrary to the public interest, or from substituting a program of outstanding local or national importance.

(f) Network ownership of stations. No license shall be granted to a network organization, or to any person directly or indirectly controlled by or under common control of a network organization, for a television broadcast station in any locality where the existing television broadcast stations are so few or of such unequal desirability (in terms of coverage, power, frequency, or other related matters) that competition would be substantially restrained by such licensing. (The word "control" as used in this section, is not limited to full control but includes such a measure of control as would substantially affect the availability of the station to other networks.)

(g) Dual network operation. No license shall be issued to a television broadcast station affiliated with a network organization which maintains more than one network of television broadcast stations; Provided, That this section shall not be applicable, if such networks are not operated simultaneously, or if there is no substantial overlap in the territory served by the group of stations comprising each such network.

(h) Control by networks of station rates. No license shall be granted to a television broadcast station having any contract, arrangement or understanding, express or implied, with a network organization under which the station is prevented or hindered from, or penalized for, fixing or altering its rates for the sale of broadcast time for other than the network's programs.

[EDITOR'S NOTE: FCC proposed additional "temporary" rules, "to remain effective while the scarcity of television broadcast stations persists," designed to balance competition among tv networks. FCC suggested this might be done by limiting the number of program hours which stations in one-, two- and three- station markets might accept from any one network, or, affirmatively, by setting a minimum number of hours to be taken from each network. Following this proposal, the networks in conjunction with AT&T worked out an arrangement to share intercity networking facilities. But, as of July 15, the FCC's proposal was still pending.]

COMMON ANTENNA SITE

§3.635. Use of common antenna site. No television license or renewal of a television license will be granted to any person who owns, leases, or controls a particular site which is peculiarly suitable for television broadcasting in a particular area and (a) which is not available for use by other television licensees; and (b) no other comparable site is available in the area; and (c) where the exclusive use of such site by the applicant or licensee would unduly limit the number of television stations that can be authorized in a

461* KTR Systems in use for Television Relay Service

WHY ARE MORE RAYTHEON TELEVISION MICROWAVE RELAY SYSTEMS INSTALLED AND PLACED INTO SERVICE EACH YEAR THAN THOSE OF ANY OTHER MANUFACTURER?

*As of June 26, 1958

KTR-100—0.1 WATT, 6, 7, 13 Kmc
 KTR-1000—Standard 1 Watt, 6 and 7 Kmc
 KTR-1000G—Deluxe 1 Watt, 6 and 7 Kmc
 AUTOMATIC SWITCHING and alarm facilities
 and other accessories

Users of Television Microwave Relay Systems like the way Raytheon answers their microwave needs with:

- The most complete line available (see left, below)
- Complete systems engineering service
- Design facilities for special applications

Raytheon provides equipment for all Television Microwave Relay requirements from the simplest to the most complex, with systems of proven reliability and a complete line of accessories.

For help in solving *your* microwave problems or for information on Raytheon equipment and engineering facilities, please write to Dept. 6120 at the address below.

RAYTHEON MANUFACTURING COMPANY
 Commercial Equipment Division, Waltham 54, Mass.

FCC Rules CONTINUED

particular area or would unduly restrict competition among television stations.

REPORTS TO BE FILED

All broadcast stations . . .

§1.341 Financial report.—Each licensee or permittee of a commercially operated standard, FM, television, or international broadcast station (as defined in Part 3 of this chapter) shall file with the Commission on or before April 1 of each year, on FCC Form 324, broadcast revenue and expense statements for the preceding calendar year together with a statement as to investment in tangible broadcast property as of Dec. 31 of such calendar year.

§1.342 Filing of contracts.—Each licensee or permittee of a standard, FM, television, or international broadcast station (as defined in Part 3 of this chapter), whether operating or intending to operate on a commercial or non-commercial basis, shall file with the Commission copies of the following contracts, instruments, and documents together with amendments, supplements, and cancellations, within 30 days of execution thereof. The substance of oral contracts shall be reported in writing.

(a) Contracts relating to network service. All network affiliation contracts, agreements, or understandings between a station and a national, regional, or other network shall be filed. Transcription agreements or contracts for the supplying of film for the television stations which specify option time must be filed. This section does not require the filing of transcription agreements or contracts for the supplying of film for television stations which do not specify option time, nor contracts granting the right to broadcast music such as ASCAP, BMI, or SESAC agreements.

(b) Contracts relating to ownership or control. Contracts, instruments, or documents relating to the present or future ownership or control of the licensee or permittee or of the licensee's or permittee's stock, rights, or interests therein, or relating to changes in such ownership or control. This paragraph shall include but is not limited to the following:

(1) Articles of partnership, association, and incorporation, and changes in such instruments;

(2) Bylaws, and any instruments effecting changes in such bylaws;

(3) Any agreement, document, or instrument (i) providing for the assignment of a license or permit or (ii) affecting, directly or indirectly, the ownership or voting rights of the licensee's or permittee's stock (common or preferred, voting or non-voting), such as: (a) Agreements for transfer of stock; (b) Instruments for the issuance of new stock; or (c) Agreements for the acquisition of licensee's or permittee's stock by the issuing licensee or permittee corporation. Pledges, trust agreements, options to purchase stock and other executory agreements are required to be filed.

(4) Proxies with respect to the licensee's or permittee's stock running for a period in excess of one year; and all proxies, whether or not running for a period of one year, given without full and detailed instructions binding the nominee to act in a specified manner. With respect to proxies given without full and detailed instructions, a statement showing the number of such proxies, by whom given and received, and the percentage of outstanding stock represented by each proxy shall be submitted by the licensee or permittee within 30 days after the stockholders' meeting in which the stock covered by such proxies has been voted. Provided, however, that when the licensee or permittee is a corporation having more than 50 stockholders, such complete information need be filed only with respect to proxies given by stockholders who are officers or directors, or who have 1% or more of the corporation's voting stock; in cases where the licensee or permittee is a corporation having more than 50 stockholders and the stockholders giving the proxies are neither officers or directors nor hold 1% or more of the corporation's stock, the only information required to be filed is the name of any person voting 1% or more of the stock by proxy, the number of shares voted by proxy by such person, and the total number of shares voted at the particular stockholders' meeting in which the shares were voted by proxy;

(5) Mortgage or loan agreements containing provisions restricting the licensee's or permittee's freedom of operation, such as those affecting voting rights, specifying or limiting the amount of dividends payable, the purchase of new equipment, the maintenance of current assets, etc.; or

(6) Any agreement reflecting a change in the officers, directors, or stockholders of a corporation, other than the licensee or permittee, having an interest, direct or indirect, in the licensee or permittee as specified by §1.343.

(c) Contracts relating to the sale of broadcast time to "time brokers" for resale.

(d) Contracts relating to Subsidiary Communications Authorization Operation, except contracts granting licensees or permittees engaged in SCA the right to broadcast copyright music.

(e) Time sales contracts. Time sales contracts with the same sponsor for 4 or more

hours per day, except where the length of the events (such as athletic contests, musical programs, and special events) broadcast pursuant to the contract is not under control of the station.

(2) The following contracts, agreements, or understandings shall be filed: management consultant agreements with independent contractors; contracts relating to the utilization in a management capacity of any person other than an officer, director, or regular employee of the licensee or permittee station; management contracts with any persons, whether or not officers, directors, or regular employees which provide for both a percentage of profits and a sharing in losses, or any similar agreements.

(2) The following contracts, agreements, or understandings need not be filed: agreements with persons regularly employed as general or station managers or salesmen; contracts with program managers or program personnel; contracts with chief engineers or other engineering personnel; contracts with attorneys, accountants, or consulting radio engineers; contracts with performers; contracts with station representatives; contracts with labor unions; or any similar agreements.

§1.343 Ownership reports.—(a) Each licensee of a standard, FM, or television station (as defined in Part 3 of this chapter), whether operating or intending to operate on a commercial or non-commercial basis, shall file an Ownership Report (FCC Form 323) at the time the application for renewal of station license is required to be filed: Provided, however, that licensees owning more than one standard, FM, or television broadcast station need file only one Ownership Report at three-year intervals. Ownership Reports shall give the following information as of a date not more than 30 days prior to the filing of the Ownership Report:

(1) In the case of an individual, the name of such individual;

(2) In the case of a partnership, the names of the partners and the interest of each partner;

NOTE: Any change in partners or in their rights will require prior consent of the Commission upon an application for consent to assignment of license or permit. If such change involves less than a controlling interest, the application for Commission consent to such change may be made upon FCC Form 316 (Short Form).

(3) In the case of a corporation, association, trust, estate, or receivership, the data applicable to each:

(i) The name, residence, citizenship, and stock-holdings of officers, directors, stockholders, trustees, executors, administrators, receivers, and members of any association;

(ii) Full information as to family relationship or business association between two or more officers, and/or stockholders, trustees, executors, administrators, receivers, and members of any association;

(iii) Capitalization with a description of the classes and voting power of stock authorized by the corporate charter or other appropriate legal instrument and the number of shares of each class issued and outstanding; and

(iv) Full information on FCC Form 323 with respect to the interest, and identity of any person having any direct, indirect, fiduciary, or beneficiary interest in the licensee or any of its stock;

For example: (a) Where A is the beneficial owner or votes stock held by B, the same information should be furnished for A as is required for B.

(b) Where X corporation controls the licensee, or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of the licensee, the same information should be furnished with respect to X corporation (its capitalization, officers, directors, and stockholders and the amount of stock [by class] in X held by each) as is required in the case of the licensee, together with full information as to the identity and citizenship of the person authorized to vote licensee's stock, in case of voting stock.

(c) The same information should be furnished as to Y corporation if it controls X corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of X, and as to Z corporation if it controls Y corporation or holds 25% or more of the number of issued and outstanding shares of either voting or non-voting stock of Y and so on back to natural persons.

(4) A list of all contracts still in effect required to be filed with the Commission by §1.342 showing the date of execution and expiration of each contract; and

(i) Any interest which the licensee may have in any other broadcast station.

(b) A permittee shall file an Ownership Report (FCC Form 323) within 30 days of the date of grant by the Commission of an application for original construction permit. The Ownership Report of the permittee shall give the information required by the applicable portions of paragraph (a) of this section.

(c) A supplemental Ownership Report (FCC Form 323) shall be filed by each licensee or permittee within 30 days after any change occurs in the information required by the Ownership Report from that previously reported.

Such report shall include without limitation:

(1) Any change in capitalization or organization;

(2) Any change in officers and directors;

(3) Any transaction affecting the ownership, direct or indirect, or voting rights of licensee's or permittee's stock, such as:

(i) A transfer of stock;

(ii) Issuance of new stock or disposition of treasury stock; or

(iii) Acquisition of licensee's or permittee's stock by the issuing corporation; or

(4) Any change in the officers, directors, or stockholders of a corporation other than the licensee or permittee such as X, Y, or Z corporation described in the example in paragraph (a) (3) of this section.

NOTE: Before any change is made in the organization, capitalization, officers, directors, or stockholders of a corporation other than licensee or permittee, which results in a change in the control of the licensee or permittee, prior Commission consent must be received under Section 310(b) of the Communications Act and §1.829. A transfer of control takes place when an individual, or group in privacy, gains or loses affirmative or negative (50%) control. See instructions on FCC Form 323 "Ownership Report."

(d) Exceptions: Where information is required under paragraphs (a), (b), or (c) of this section with respect to a corporation or association having more than 50 stockholders or members, such information need be filed only with respect to stockholders or members who are officers or directors of the corporation or association, or to other stockholders or members who have 1% or more of either the voting or non-voting stock of the corporation or voting rights in the association.

LICENSE RENEWALS

General . . .

§1.326 Application for renewal of license.—(a) Unless otherwise directed by the Commission, an application for renewal of license shall be filed at least 90 days prior to the expiration date of the license sought to be renewed except that applications for renewal of license of an experimental or developmental broadcast station or a television broadcast translator station shall be filed at least 60 days prior to the expiration date of the license sought to be renewed.

(b) No application for renewal of license of any broadcast station will be considered unless there is on file with the Commission the information, if any, currently required by §§1.341 to 1.343, inclusive, for the particular class of station. The renewal application shall include a reference by date and file number to such information on file.

(c) Whenever the Commission regards an application for a renewal of license as essential to the proper conduct of a hearing or investigation, and specifically directs that it be filed by a certain date, such application shall be filed within the time thus specified. If the licensee fails to file such application within the prescribed time, the hearing or investigation shall proceed as if such renewal application had been received.

(d) The following application forms shall be used:

[EDITOR'S NOTE: There follows a list of forms to be used in filing for license renewals.]

In am rules . . .

§3.34 Normal license period.—(a) All standard broadcast station licenses will be issued for a normal license period of three years. Licenses will be issued to expire at the hour of 3:00 a.m., Eastern Standard Time, in accordance with the following schedule, and three-year intervals thereafter:

[EDITOR'S NOTE: Expiration dates for licenses are grouped geographically.]

In fm rules . . .

§3.218 Normal license period.—(a) All fm broadcast station licenses will be issued for a normal license period of three years. Licenses will be issued to expire at the hour of 3:00 a.m., Eastern Standard Time, in accordance with the following schedule and at three-year intervals thereafter:

[EDITOR'S NOTE: Expiration dates for licenses are grouped geographically.]

In tv rules . . .

§3.630 Normal license period. (a) All television broadcast station licenses will be issued for a normal license period of three years. Licenses will be issued to expire at the hour of 3:00 a.m., Eastern Standard Time, in accordance with the following schedule and at three year intervals thereafter.

(1) For stations located in Delaware and Pennsylvania, August 1, 1957.

(2) For stations located in Maryland, District of Columbia, Virginia, West Virginia, October 1, 1957.

(3) For stations located in North Carolina, South Carolina, December 1, 1957.

(4) For stations located in Florida, Puerto Rico and Virgin Islands, February 1, 1958.

(5) For stations located in Alabama and Georgia, April 1, 1958.

(6) For stations located in Arkansas, Louisiana and Mississippi, June 1, 1958.

(7) For stations located in Tennessee, Kentucky and Indiana, August 1, 1958.

EDITOR II

If you want the peak in performance—the maximum in dependability, here is your tape-recorder. This is MAGNECORD at its best. In more than 80% of all broadcasting stations coast to coast, both in radio and TV, Magnecord is the name that symbolizes **DEPENDABLE PERFORMANCE!**

new, rugged, wonderful!

quality and specifications guaranteed!

and the famous M-90

The aristocrat of the professional tape recorders. Supreme in its field—never excelled and seldom equalled in performance. Illustrated here you see rich and rugged "Maggie" in a brand new console.

In our new design, engineering and production facilities at Tulsa, Quality Control is the watchword. We are now able to place an absolute and irrevocable **GUARANTEE ON SPECIFICATIONS AS WE ISSUE THEM** and we invite you to **WRITE TODAY** to our authorized representative for full details on the **NEW ALL THROUGH P-75 EDITOR.**

No other tape-recorder on the market can satisfy the professional demand for rugged, day-to-day dependability with highest quality—that **MAGNECORD** now **GUARANTEES!** Catalogue and spec sheets available now . . .

STATION IDENTIFICATION

In am rules . . .

§3.117 Station identification.—(a) A licensee of a standard broadcast station shall make station identification announcement (call letters and location) at the beginning and ending of each time of operation and during operation (1) on the hour and (2) either on the half hour or at the quarter hour following the hour and at the quarter hour preceding the next hour: Provided,

(b) Such identification announcement need not be made on the hour when to make such announcement would interrupt a single consecutive speech, play, religious service, symphony concert, operatic production or forum of longer duration than 30 minutes. In such cases the identification announcement shall be made at the beginning of the program, at the first interruption of the entertainment continuity, and at the conclusion of the program.

(c) Such identification announcement need not be made on the half hour or quarter hours when to make such an announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or operatic production. In such cases an identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion of the program; provided, that an announcement within 5 minutes of the time specified in paragraph (a) (2) of this section will satisfy the requirements of identification announcements.

(d) In the case of variety show programs, baseball game broadcasts, or similar programs of longer duration than 30 minutes, the identification announcement shall be made within 5 minutes of the hour and of the times specified in paragraph (a) (2) of this section.

(e) In the case of all other programs the identification announcement shall be made within 2 minutes of the hour and of the times specified in paragraph (a) (2) of this section.

(f) In making the identification announcement the call letters shall be given only on the channel of the station identified thereby, except as otherwise provided in §3.287 of the Commission's Rules Governing Fm Broadcast Stations.

In fm rules . . .

§3.287 Station identification.—(a) A licensee of an fm broadcast station shall make separate station identification announcement (call letters and location) for such station; provided, however, that if the same licensee operates an fm radio broadcasting station and a standard broadcast station and simultaneously broadcasts the same programs over the facilities of both such stations, station identification announcements may be made jointly for both stations for periods of such simultaneous operation. If the call letters of the fm station do not clearly reveal that it is an fm station, the joint announcement shall state that one of the stations is an fm station. Station identification announcements shall be made at the beginning and ending of each time of operation and during operation (1) on the hour and (2) either on the half hour or at the quarter hour following the hour and at the quarter hour preceding the next hour: Provided,

[EDITOR'S NOTE: Remainder is identical with paragraphs (b), (c), (d), (e), and (f) of §3.117 above.]

In tv rules . . .

§3.652. Station identification.— (a) A licensee of a television broadcast station shall make station identification announcements (call letters and location) at the beginning and ending of each time of operation and during the operation on the hour. The announcement at the beginning and ending of each time of operation shall be by both aural and visual means. Other announcements may be by either aural or visual means.

(b) Identification announcements during operation need not be made when to make such

announcement would interrupt a single consecutive speech, play, religious service, symphony concert, or any type of production. In such cases, the identification announcement shall be made at the first interruption of the entertainment continuity and at the conclusion thereof.

SPONSORED PROGRAMS
(Announcement of)

In am rules . . .

§3.119 Sponsored programs, announcement of.—(a) In the case of each program for the broadcasting of which money, services, or other valuable consideration is either directly or indirectly paid or promised to, or charged or received by, any radio broadcast station, the station broadcasting such program shall make, or cause to be made, an appropriate announcement that the program is sponsored, paid for, or furnished, either in whole or in part.

(b) In the case of any political program or any program involving the discussion of public controversial issues for which any records, transcriptions, talent, scripts, or other material or services of any kind are furnished, either directly or indirectly, to a station as an inducement to the broadcasting of such program, an announcement shall be made both at the beginning and conclusion of such program on which such material or services are used that such records, transcriptions, talent, scripts, or other material or services have been furnished to such station in connection with the broadcasting of such program, provided, however, that only one such announcement need be made in the case of any such program of five minutes' duration or less, which announcement may be made either at the beginning or the conclusion of the program.

(c) The announcement required by this section shall fully and fairly disclose the true identity of the person or persons by whom or in whose behalf such payment is made or promised, or from whom or in whose behalf such services or other valuable consideration is received, or by whom the material or services referred to in subsection (b) hereof are furnished. Where an agent or other person contracts or otherwise makes arrangements with a station on behalf of another, and such fact is known to the station, the announcement shall disclose the identity of the person or persons in whose behalf such agent is acting instead of the name of such agent.

(d) In the case of any program, other than a program advertising commercial products or services, which is sponsored, paid for or furnished, either in whole or in part, or for which material or services referred to in subsection (b) hereof are furnished, by a corporation, committee, association or other unincorporated group, the announcement required by this section shall disclose the name of such corporation, committee, association or other unincorporated group. In each such case the station shall require that a list of the chief executive officers or member of the executive committee or of the board of directors of the corporation, committee, association or other unincorporated group shall be made available for public inspection at one of the radio stations carrying the program.

(e) In the case of programs advertising commercial products or services, an announcement stating the sponsor's corporate or trade name or the name of the sponsor's product, shall be deemed sufficient for the purposes of this section and only one such announcement need be made at any time during the course of the program.

In fm rules . . .

§3.289. [EDITOR'S NOTE: Identical with §3.119 above.]

In tv rules . . .

§3.654 [EDITOR'S NOTE: Identical with §3.119 above.]

[EDITOR'S NOTE: In a statement issued in 1950, the FCC warned that the sponsor or his product must be identified by a distinctive name and not by one merely descriptive of the type of business or product. The following are acceptable, the Commission said: "Henry Smith offers you . . ." or "Smith Stove Co. offers you . . ." or "Ajax Pens brings you . . ." The following are not acceptable: "Write to the Comb Man . . ." or "Send your money to Nylons, Box . . ." or "This program is sponsored by your Sink Man . . ."]

RECORDINGS and TRANSCRIPTIONS
(Identification of)

In am rules . . .

§3.118 Mechanical reproductions.—(a) No mechanically reproduced program consisting of a speech, news event, news commentator, forum, panel discussion, or special event in which the element of time is of special significance, or any other program in which the element of time is of special significance and presentation of which would create, either intentionally or otherwise, the impression or belief on the part of the listening audience that the event or program being broadcast is in fact occurring simultaneously with the broadcast, shall be broadcast without an appropriate announcement being made either at the beginning or end of such reproduction or at the beginning or end of the program in which such reproduction is used that it is a

mechanical reproduction or a mechanically reproduced program: Provided, however, That each such program of one minute or less need not be announced as such.

(b) The exact form of identifying announcement is not prescribed, but the language shall be clear and in terms commonly used and understood. Any other program mechanically reproduced or series of mechanical reproductions, including a mechanical reproduction used for background music, sound effects, station identification, program identification (theme music of short duration) or identification of sponsorship of the program proper, need not be announced as provided in subsection (a), but the licensee shall not attempt affirmatively to create the impression that any program being broadcast by mechanical reproduction consists of live talent.

(c) The requirements of subsection (a) are waived with respect to network programs, transcribed and rebroadcast at a later hour because of the time zone differentials between the place where the program originates and where it is rebroadcast, this waiver being applicable whether the off-the-line recording is made by the network itself at one of its key stations or by an individual station, but only when the off-the-line recording is for broadcast at an hour not exceeding the time zone differential between the place where the program originates and where it is rebroadcast. Each station which broadcasts network programs at a later hour in accordance with this waiver shall make an appropriate announcement at least once each day between the hours of 10:00 a.m. and 10:00 p.m., stating that some or all of the network programs which are broadcast by that station are delayed broadcasts by means of transcription. This waiver provision also applies during the annual period in which daylight saving time will be effective with respect to network programs transcribed and rebroadcast one hour later because of the time differential resulting from the adoption of daylight saving time in some areas.

POLITICAL BROADCASTS

For am, fm and tv . . .

§3.120 Definitions.—(a) A "legally qualified candidate" means any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special, or general election, municipal, county, state or national, and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who

- (1) has qualified for a place on the ballot or
- (2) is eligible under the applicable law to be voted by sticker, by writing in his name on the ballot, or other method, and (1) has been duly nominated by a political party which is commonly known and regarded as such, or (2) makes a substantial showing that he is a bona fide candidate for nomination or office, as the case may be.

(b) General requirements.—No station licensee is required to permit the use of its facilities by any legally qualified candidate for public office, but if any licensee shall permit any such candidate to use its facilities, it shall afford equal opportunities to all other such candidates for that office to use such facilities; provided that such licensee shall have no power of censorship over the material broadcast by any such candidate.

(c) Rates and practices.—(1) The rates, if any, charged all such candidates for the same office shall be uniform and shall not be rebated by any means direct or indirect. A candidate shall, in each case, be charged no more than the rate the station would charge if the candidate were a commercial advertiser whose advertising was directed to promoting its business within the same area as that encompassed by the particular office for which such person is a candidate. All discount privileges otherwise offered by a station to commercial advertisers shall be available upon equal terms to all candidates for public office.

(2) In making time available to candidates for public office no licensee shall make any discrimination between candidates in charges, practices, regulations, facilities, or services for or in connection with the service rendered pursuant to this part, or make or give any preference to any candidate for public office or subject any such candidate to any prejudice or disadvantage; nor shall any licensee make any contract or other agreement which shall have the effect of permitting any legally qualified candidate for any public office to broadcast to the exclusion of other legally qualified candidates for the same public office.

(d) Records: Inspections.—Every licensee shall keep and permit public inspection of a complete record of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the

REBROADCASTS

In am rules . . .

§3.121 Rebroadcast.—(a) The term "rebroadcast" means reception by radio of the program of a radio station, and the simultaneous or subsequent retransmission of such program by a broadcast station.

NOTE: As used in this section, program includes any complete program or part thereof, or any signals if other than A-3 emission. In case a program is transmitted from its point of origin to a broadcast station entirely by telephone facilities in which a section of such transmission is by radio, the broadcasting of this program is not considered a rebroadcast.

(b) The licensee of a standard broadcast station may, without further authority of the Commission, rebroadcast the program of a United States standard or high frequency broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.

NOTE: The notice and certification of consent shall be given within three (3) days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a standard broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for renewal of license, or at the beginning of such rebroadcast practice if begun during a license period.

(c) (1) The licensee of a standard broadcast station located within a state or the District of Columbia may, without further authority of the Commission, rebroadcast on a noncommercial basis a noncommercial program of a United States international broadcast station.

(2) The licensee of a standard broadcast station located in any territory or insular possession of the United States may, without further authority of the Commission, rebroadcast any program of a United States international broadcast station.

(3) In the case of any rebroadcast under the provisions of this paragraph (c), the Commission shall be notified of the call letters of each station whose programs are rebroadcast and the licensee shall certify that express authority has been received from the licensee of the station originating the program.

(d) No licensee of a standard or high frequency broadcast station shall rebroadcast the program of any other class of United States radio station without written authority having first been obtained from the Commission upon application accompanied by written consent or certification of consent of the licensee of the station originating the program.

NOTE: The broadcasting of a program relayed by a remote pickup broadcast station (section 4.401) is not considered a rebroadcast. Informal application may be employed. By Order No. 82, dated and effective June 24, 1941, until further order of the Commission, section 3.121 (d) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by U.S. Government radio stations.

(e) In case of a program rebroadcast by several standard broadcast stations, such as a chain broadcast, the person legally responsible for distributing the program or the network facilities may obtain the necessary authorization for the entire rebroadcast both from the Commission and from the person or licensee of the station originating the program.

Attention is directed to section 325(b) of the Communications Act of 1934, which reads as follows:

No person shall be permitted to locate, use, or maintain a radio broadcast studio or other place or apparatus from which or whereby sound waves are converted into electrical energy, or mechanical or physical reproduction of sound waves produced, and caused to be transmitted or delivered to a radio station in a foreign country for the purpose of being broadcast from any radio station there, having a power output of sufficient intensity, and/or being so located geographically that its emissions may be received consistently in the United States, without first obtaining a permit from the Commission upon proper application therefor. [See §1.327.]

In fm rules . . .

§3.291—[EDITOR'S NOTE: Identical in terms with §3.121, above, with two exceptions: Paragraph (e) of §3.121 is deleted in §3.291, and Paragraph (b) relates to rebroadcast of programs of U.S.: "standard, fm or noncommercial educational" stations.]

In tv rules . . .

§3.655. Rebroadcast.—(a) The term "rebroadcast" as used below means reception by radio of the program of a television broadcast station, and the simultaneous or subsequent re-

transmission of such programs by a broadcast station. The broadcasting of a program relayed by an auxiliary broadcast station licensed to the television broadcast station is not considered a rebroadcast. (As used in this section, program includes any complete program or part thereof.)

(b) The licensee of a television broadcast station may, without further authority of the Commission, rebroadcast the program of a United States television broadcast station, provided the Commission is notified of the call letters of each station rebroadcast and the licensee certifies that express authority has been received from the licensee of the station originating the program.

NOTE 1: The notice and certification of consent shall be given within 3 days of any single rebroadcast, but in case of the regular practice of rebroadcasting certain programs of a television broadcast station several times during a license period, notice and certification of consent shall be given for the ensuing license period with the application for such rebroadcast practice if begun during a license period.

NOTE 2: By Order No. 82, dated and effective June 24, 1941, until further order of the Commission, Section 3.655(c) is suspended only insofar as it requires prior written authority of the Commission for the rebroadcasting of programs originated for that express purpose by U. S. Government radio stations.

(c) No licensee of a television broadcast station shall rebroadcast the program of any United States radio station not designated in paragraph (b) of this section without written authority having first been obtained from the Commission upon application (informal) accompanied by written consent or certification of consent of the licensee of the station originating the program.

REVOCATIONS, MODIFICATIONS, SUSPENSIONS

(All Classes of Station Licenses)

§1.61 Notice of violations.—(a) Any licensee who appears to have violated any provision of the Communications Act or any provision of this chapter shall be served with a written notice calling the facts to his attention and requesting a statement concerning the matter. FCC Form 793 may be used for this purpose.

(b) Within 10 days from receipt of notice or such other period as may be specified, the licensee shall send a written answer, in duplicate, direct to the office of the Commission originating the official notice. If an answer cannot be sent nor an acknowledgment made within such 10-day period by reason of illness or other unavoidable circumstances acknowledgment and answer shall be made at the earliest practicable date with a satisfactory explanation of the delay.

(c) The answer to each notice shall be complete in itself and shall not be abbreviated by reference to other communications or answers to other notices. If the notice relates to violations that may be due to the physical or electrical characteristics of transmitting apparatus, the answer shall state fully what steps, if any, have been taken to prevent future violations, and, if any new apparatus is to be installed, the date such apparatus was ordered, the name of the manufacturer, and the promised date of delivery. If the installation of such apparatus requires a construction permit, the file number of the application shall be given, or if a file number has not been assigned by the Commission, such identification shall be given as will permit ready identification of the application. If the notice of violation relates to lack of attention to or improper operation of the transmitter, the name and license number of the operator in charge shall be given.

§1.62 Revocation of station licenses and construction permits and issuance of cease and desist orders.—(a) Whenever it appears that a station license or construction permit should be revoked for any of the reasons set forth in Section 312(a) of the Communications Act, or a cease and desist order should be issued for any of the reasons specified in Section 312(b) of the Communications Act, the Commission will, except in cases of willfulness or those in which the public health, interest, or safety require otherwise, either by notice of violation as provided for in §1.61 or by any other written warning, call to the attention of the licensee or permittee the facts or conduct which may warrant revocation of the license or construction permit or the issuance of a cease and desist order, and the Commission will accord to the licensee or permittee a reasonable opportunity to demonstrate or achieve compliance with the said warning. In case of failure to timely comply therewith or in cases of willfulness or those in which public health, interest or safety requires, the Commission will issue an order directing the licensee, permittee, or person to show cause why an order of revocation or a cease and desist order, as the case may be, should not be issued.

(b) Any order to show cause issued in accordance with paragraph (a) of this section will contain a statement of the matters with respect to which the Commission is inquiring and will call upon the licensee, permittee, or person to appear before the Commission at a time and place stated in the order, but in no event less than 30 days after the receipt of such order, and give evidence upon the matter specified therein: except, that where safety of life or property is involved, the Commission may provide in the order for a shorter period.

(c) In order to avail himself of the opportunity to appear and give evidence upon the matters specified in the order to show cause, the licensee or permittee, in person or by his attorney shall, within the period of time as may be specified in the order to show cause, file with the Commission a written statement stating that he requests a hearing and will appear at the hearing and present evidence on the matter specified in the order to show cause. Such written statement must contain a detailed response to the matter to show cause, the licensee or permittee or licensee shall be limited in the hearing to matters fairly encompassed within the issues raised by the response.

(d) The right to request a hearing shall, unless a good cause is shown in a petition to be filed not later than 5 days before the lapse of the time specified in paragraph (c) of this section, be deemed waived:

(1) In case of failure to timely file a written statement as required by paragraph (c) of this section.

(2) In case of filing the written statement provided for in paragraph (c) of this section but failure to appear at the hearing, either in person or by counsel.

(e) Where a hearing is waived and no written statement has been filed within 30 days of the receipt of the order to show cause or such shorter period of time as may be specified therein, the allegations of fact contained in the order to show cause will be deemed as correct and the Hearing Examiner will issue an initial decision invoking the sanctions specified in the order to show cause.

(f) Where a hearing is waived, a written statement in mitigation or justification may be submitted within 30 days of the receipt of the order to show cause or within such shorter period of time as may be specified therein. The Hearing Examiner may, if the statement contains, with particularity, factual allegations denying or, in the Hearing Examiner's opinion, justifying the facts upon which the show cause order is based, call upon the submitting party to furnish additional information, and the Hearing Examiner shall request all opposing parties to file an answer to the written statement and/or additional information. The Hearing Examiner will then, unless he orders that further pleadings be filed, close the record and issue, on basis of the procedure lineated in this paragraph, an initial decision.

(g) Corrections or promise to correct the condition complained of in the order to show cause shall not preclude the issuance of an order to cease and desist.

(h) Any order of revocation or cease and desist order issued pursuant to this section shall include a statement of findings and the grounds therefor, shall specify the effective date of the order, and shall be served on the licensee, permittee or person.

§1.63 Modification of licenses or construction permits on motion of the Commission.—(a) Whenever it appears that a station license or construction permit should be modified, the Commission will notify the licensee or permittee in writing of the proposed action and the grounds and reasons therefor and direct him to show cause why an order modifying the license or construction permit in the manner proposed by the Commission should not be issued.

(b) Any order to show cause issued in accordance with paragraph (a) of this section will notify the licensee or permittee that he may request, within a period of time to be stated in the order to show cause, that a hearing be held on the proposed modification. In case of timely request, a hearing will be held on the proposed modification, in no event less than 30 days after the receipt of the order to show cause, unless the Commission finds that safety of life or property require the fixing of a shorter period.

(c) In order to avail himself of the right to request a hearing and of the opportunity to appear and give evidence upon the matters specified in the order to show cause, the licensee or permittee, in person or by his attorney shall, within the period of time as may be specified in the order to show cause, file with the Commission a written statement stating that he requests a hearing and will appear at the hearing and present evidence on the matter specified in the order to show cause. Such written statement must contain a detailed response to the matter to show cause, the licensee or permittee or licensee shall be limited in the hearing to matters fairly encompassed within the issues raised by the response.

(d) The right to request a hearing shall, unless a good cause is shown in a petition to be filed not later than 5 days before the lapse of the time specified in paragraph (c) of this section, be deemed waived:

(1) In case of failure to timely file a written statement as required by paragraph (c) of this section.

(2) In case of filing the written statement provided for in paragraph (c) of this section but failure to appear at the hearing, either in person or by counsel.

(e) Where a hearing is waived and no written statement has been filed within 30 days of the receipt of the order to show cause or such shorter period of time as may be specified therein, the allegations of fact contained in the order to show cause will be deemed as correct and the Hearing Examiner will issue an initial decision invoking the sanctions specified in the order to show cause.

(f) Where a hearing is waived, a written statement in mitigation or justification may be submitted within 30 days of the receipt of the order to show cause or within such shorter period of time as may be specified therein. The Hearing Examiner may, if the statement contains, with particularity, factual allegations denying or, in the Hearing Examiner's opinion, justifying the facts upon which the show cause order is based, call upon the submitting party to furnish additional information, and the Hearing Examiner shall request all opposing parties to file an answer to the written statement and/or additional information. The Hearing Examiner will then, unless he orders that further pleadings be filed, close the record and issue, on basis of the procedure lineated in this paragraph, an initial decision.

839' self-supporting tower for WBNS-TV, Columbus, Ohio, supports RCA TF 12 AH antenna. Two outside platforms give easy access to microwave equipment.

**Reasons why
"It's good
business to buy
from an
experienced
tower
company"**

Look as long and as hard as you will at this tower—or the hundreds of others by Dresser-Ideco, serving broadcasting stations all over the country—and you just won't be able to see that really unique "something" that makes every Dresser-Ideco tower different from towers of any other make.

But there are many very real differences which add up to a safer tower, with lower maintenance costs than you'll find in other towers on the market. For example:

Dresser-Ideco uses *structural rib bolts* for connections throughout each tower. These bolts are specially designed to stay tight as the tower moves and vibrates in the wind. They won't work loose as other types of bolts tend to do, won't allow the tower and antenna to slip out of alignment.

Dresser-Ideco engineers *plan the layout* for the installation of broadcast equipment and supply detailed equipment installation drawings to the erection contractor. Long-experienced Dresser-Ideco tower engineers know this step in the erection process should not be left to extemporaneous "fitting up" on the job.

Complete final inspection is given every Dresser-Ideco tower by a field engineer, who makes certain that erection and equipment installation is carried out in accordance with the designer's specifications. Here again, experienced Dresser-Ideco tower builders know this final step is necessary to insure that you get a completely safe and satisfactory tower.

Just 3 examples . . . 3 details among many . . . that serve to illustrate the careful planning and attention to detail that goes into every Dresser-Ideco tower and that serve to illustrate why we think you'll agree "it's good business to buy from an *experienced tower company*."

So when your new tower is in the offing . . . look to experience you can believe in and results you can see. Better than 50% of all TV towers over 1,000 feet tall are towers by Dresser-Ideco . . . *twice as many* as the second tower company's total . . . *more than all* the rest of the tower companies combined.

Put Dresser-Ideco's unparalleled 38-year record of tower experience to work for you . . . write Dresser-Ideco, or contact your broadcast equipment representative.

Write for this new Dresser-Ideco Tower Catalog T-57—the first complete broadcast antenna tower story.

Radar Towers on the DEW line in northern Alaska—designed and fabricated by Dresser-Ideco. Keeping pace with the rapidly developing needs of radar and microwave — helping the broadcast industry meet its expanding needs — these are the challenges that keep Dresser-Ideco's thinking fresh and "alive", now and in the years ahead.

Dresser-Ideco Company

ONE OF THE DRESSER INDUSTRIES

TOWER DIVISION, DEPT. T-83, 875 MICHIGAN AVE., COLUMBUS 8, OHIO

Branch: 8909 S. Vermont Ave., Los Angeles 44, Calif.

(e) Where the right to request a hearing is waived and no written statement has been filed within the period of time specified in the order to show cause, the licensee or permittee will be deemed to consent to the modification as proposed in the order to show cause and a final decision will be issued by the Commission accordingly.

(f) Where the right to request a hearing has been waived, a written statement may be filed within the period of time to be specified in the order to show cause, showing with particularity why the license or construction permit should not be modified or not so modified as proposed in the order to show cause. In this case, the Commission may, depending upon the facts alleged and proof offered, either call upon the submitting party to furnish additional information under oath, designate the proceeding for hearing, or issue without further proceedings an order modifying the construction permit or license as proposed in the order to show cause or in said written statement. The order to show cause will advise the person against whom it is directed of procedure set forth in this paragraph.

(g) Any order of modification issued pursuant to this section shall include a statement of the findings and the grounds and reasons therefor, shall specify the effective date of the order and shall be served on the licensee or permittee.

(Of Operator Licenses)

§1.72 Suspension of operator licenses.—Whenever grounds exist for suspension of an operator license, as provided in Section 303(m) of the Communications Act, the Chief of the Safety and Special Radio Services Bureau, with respect to amateur operator licenses, or the Chief of the Field Engineering and Monitoring Bureau, with respect to commercial operator licenses, may issue an order suspending the operator license. No order of suspension in any operator's license shall take effect until 15 days' notice in writing of the cause for the proposed suspension has been given to the operator licensee, who may make written application to the Commission at any time within said 15 days for a hearing upon such order. The notice to the operator licensee shall not be effective until actually received by him, and from that time he shall have 15 days in which to mail the said application. In the event that physical conditions prevent mailing of the application before the expiration of the 15-day period, the application shall then be mailed as soon as possible thereafter, accompanied by a satisfactory explanation of the delay. Upon receipt by the Commission of such application for hearing, said order of suspension shall be designated for hearing by the Chief, Safety and Special Radio Services Bureau or the Chief, Field Engineering and Monitoring Bureau, as the case may be, and said order of suspension shall be held in abeyance until the conclusion of the hearing. Upon the conclusion of said hearing, the Commission may affirm, modify or revoke said order of suspension. If the license is ordered suspended, the operator shall send his operator license to the office of the Commission in Washington, D. C., on or before the effective date of the order, or, if the effective date has passed at the time notice is received, the license shall be sent to the Commission forthwith.

LOTTERIES

for all stations . . .

§1.122 Lotteries.—(a) An application for construction permit, license, renewal of license, or any other authorization for the operation of a broadcast station, will not be granted where the applicant proposes to follow or continue to follow a policy or practice of broadcasting or permitting "the broadcasting of any advertisement or of information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or chance or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise, or scheme, whether said list contains any part or all such prizes." (See 18 U.S.C. §1304.)

(b) The determination whether a particular program comes within the provisions of paragraph (a) of this section depends on the facts of each case. However, the Commission will in any event consider that a program comes within the provisions of paragraph (a) of this section if in connection with such program a prize consisting of money or thing of value is awarded to any person whose selection is dependent in whole or in part upon lot or chance, if as a condition of winning or competing for such prize, such winner or winners, are required to furnish any money or thing of value or are required to have in their possession any product sold, manufactured, furnished or distributed by a sponsor of a program broadcast on the station in question.

§1.304 (of U. S. Criminal Code) Broadcasting Lottery information.—Whoever broadcasts by means of any radio station for which a license is required by any law of the U. S., or whoever, operating any such station, knowingly permits the broadcasting of any advertisement of or information concerning any lottery, gift enterprise, or similar scheme, offering prizes dependent in whole or in part upon lot or

chance, or any list of the prizes drawn or awarded by means of any such lottery, gift enterprise or scheme, whether said list contains any part or all of such prizes, shall be fined not more than \$1,000 or imprisoned not more than one year, or both.

Each day's broadcasting shall constitute a separate offense.

CENSORSHIP

For all stations . . .

§326 (of Communications Act).—Nothing in this Act shall be understood to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication.

INDECENT LANGUAGE

§1464 (of U. S. Criminal Code) Broadcasting obscene language.—Whoever utters any obscene, indecent, or profane language by means of radio communication shall be fined not more than \$10,000 or imprisoned not more than two years, or both.

TRANSFERS and ASSIGNMENTS

Voluntary . . .

§1.329 Applications for voluntary assignment or transfer of control.—(a) Application for consent to the assignment of construction permit or license, or for consent to the transfer of control of a corporation holding such a construction permit or license, shall be filed with the Commission on FCC Form 314 (Assignment of License), FCC Form 315 (Transfer of Control), or FCC Form 316 (Short Form). Such application should be filed with the Commission at least 45 days prior to the contemplated effective date of assignment or transfer of control.

(b) The following assignment or transfer applications may be filed on FCC Form 316.

- (1) Assignment from an individual or individuals (including partnerships) to a corporation owned and controlled by such individuals or partnerships without any substantial change in their relative interests;
- (2) Assignment from a corporation to its individual stockholders without effecting any substantial change in the disposition of their interests;
- (3) Assignment or transfer by which certain stockholders retire and the interest transferred is not a controlling one;
- (4) Corporate reorganization which involves no substantial change in the beneficial ownership of the corporation;
- (5) Assignment or transfer from a corporation to a wholly owned subsidiary thereof or vice versa, or where there is an assignment from a corporation to a corporation owned or controlled by the assignor stockholders without substantial change in their interests; or
- (6) Assignment of less than a controlling interest in a partnership.

[EDITOR'S NOTE: In a statement issued by the FCC in 1948, licensees were warned that no transfers of station control are permitted until after Commission approval. The FCC also asked that licensees who are in doubt whether a transfer application is necessary bring ownership changes to the attention of the Commission to determine whether they are changes in control before consummating the transfer action.]

Involuntary transfers and assignments

§1.330 Application for involuntary assignment of license.—(a) The Commission shall be notified in writing promptly of the death or legal disability of an individual permittee or licensee, a member of a partnership, or a person directly or indirectly in control of a corporation which is a permittee or licensee.

(b) Within 30 days after the occurrence of such death or legal disability, an application on FCC Form 316 shall be filed requesting consent to involuntary assignment of such permit or license or for involuntary transfer of control of such corporation to a person or entity legally qualified to succeed to the foregoing interests under the laws of the place having jurisdiction over the estate involved.

Federal Communications Commission Executives and Staff Personnel

Headquarters: New Post Office Bldg., Washington 25, D. C. Executive 3-3620.

Commissioners and Assistants

JOHN CHARLES DOERFER, Chmn, Room 6107. Republican; assumed office April 15, 1953; term expires June 30, 1961. Joseph M. Sitrick, legislative assistant; Evelyn F. Epley, legal assistant; James B. McElroy, engineering assistant; Patricia C. Stiemlen, confidential assistant; Mary L. Moore, Nancy Maher and Margaret White, secretaries; Irene Cline, staff assistant.

ROSEL HERSCHEL HYDE, Comr, Room 6241. Republican; assumed office April 17, 1946;

term expires June 30, 1959. Dee W. Pincok, legal assistant; Vera F. Nordness, confidential assistant; Iona Wickham and Jane T. Hungerford, secretaries.

ROBERT TAYLOR BARTLEY, Comr, Room 6207. Democrat; assumed office March 6, 1952; term expires June 30, 1965. Max D. Paglin, legal assistant; Horace E. Slone, engineering assistant; Farrell McGonigal, confidential assistant; Isolene Corbett, Ethel Lonergan and Corinne Totten, secretaries.

TUNIS AUGUSTUS MACDONOUGH CRAVEN, Comr, Room 7241. Democrat; assumed office July 2, 1956; term expires June 30, 1963. Robert M. Koteen, legal assistant; William H. Watkins, engineering assistant; Margaret S. Preston, confidential assistant; Elizabeth Lindsley, Elizabeth N. Harris, secretaries.

ROBERT EMMETT LEE, Comr, Room 6407. Republican; assumed office Oct. 8, 1953; term expires June 30, 1960. Thomas J. Dougherty, legal assistant; Robert G. Weston, engineering assistant; K. Lois Welch, confidential assistant; Phyllis Hancock and Rose Marie Borda, secretaries.

FREDERICK WAYNE FORD, Comr, Room 7207. Republican; assumed office Aug. 29, 1957; term expires June 30, 1964. Daniel Jacobson, engineering assistant; George H. Revercomb, legal assistant; Emma C. Burke, confidential assistant; Helen Melnick, secretary.

JOHN STORRS CROSS, Comr, Room 7235. Democrat; assumed office May 23, 1958; term expires June 30, 1962. Louis C. Stephens, legal assistant; Bruce S. Longfellow, engineering assistant; Rose E. Hahlen, confidential assistant; Frankie Fox, Lillian Watson, secretaries.

Office of Hearing Examiners

JAMES D. CUNNINGHAM, chief hearing examiner, Room 6353. Anne Janco, administrative assistant; Helen E. Neil, secretary; Jav A. Kyle, assistant chief hearing examiner. Hearing examiners: J. D. Bond, Basil P. Cooper, Thomas H. Donahue, Charles J. Frederick, Millard F. French, Annie Neal Huntting, Hugh B. Hutchison, H. Gifford Irion, Herbert Shaffman, Elizabeth C. Smith, Forest L. McClenning, Isadore A. Honig.

Office of Opinions & Review

JOHN L. FITZGERALD, chief, Everett G. Henry, assistant chief for engineering, Room 7353. Staff: George K. Ashenden Jr., Donald J. Berkenmeyer, Charles S. Borum, Howard C. Equitz, Raymond L. Hodges, James A. Hudgens, Wallace E. Hutton, Forest L. McClenning, Edward J. McCormick Jr., Paul M. McDonough, Edward C. McKenzie, Sarah Ann Mobley, Ronald K. Mundy, Chester F. Naumowicz Jr., Hideyuke Noguchi, David W. Warren Jr.

Office of Reports and Information

GEORGE O. GILLINGHAM, chief, Room 7232. Salina M. Lindo, assistant chief. Reports Branch—Eva O. Melton, Lily M. Marshall.

Office of General Counsel

WARREN E. BAKER, general counsel, Room 7334. Edgar W. Holtz, associate general counsel, James T. Brennan, special liaison.

Legislation, Treaties and Rules Division

CHARLES E. SMOOT, assistant general counsel in charge, Room 7348. Attorneys: Erich Saxl, Anne A. Mooney, Edward W. Houtanen, Chester D. Roberts Jr., Robert D. Greenburg, Charles R. Escola, John H. Conlin, Upton K. Guthery.

Litigation Division

RICHARD A. SOLOMON, assistant general counsel in charge, Room 7334. Attorneys: John J. O'Malley, Mark E. Fields, Charles C. McCarter, Joel Rosenbloom, Ruth V. Reel, Richard M. Zwolinski.

Broadcast Bureau

HAROLD G. COWGILL, chief, Room 7530. James E. Barr, assistant chief; John C. Harrington, supervising general attorney; Room 7411. Estelle J. Bunn, administrative assistant; Frances R. Jarvis, Helena C. Osman, Gloria D. Simonetta, Florence I. Stretch, secretaries.

Broadcast Facilities Division

WALTHER W. GUENTHER, chief, Room 7454. Robert F. Braden, accountant; Dorothy S. Way, secretary. Record Unit: Vernald E. Kley, Nell Shehane, Betty Jo Lemmel. New and Changed Facilities Branch—Wallace E. Johnson, chief, Room 7445. Engineers: Edward H. Hackman, Ralph H. Garrett, Harold D. Russell, Cedric G. Morris, Bernard R. Segal, John A. Cheeks, Clinton M. Barrick, Nugent S. Sharp, Robert R. Burkhardt, Wilbert Mason, Irving McConnell, Jan A. Paternaster, Gerald M. Peake, Andrew J. Vaccarella, Nikita Wells, Paul M. Feinberg. Attorneys: E. Theodore Malley, Philip S. Cross, James E. Faust, Kenneth A. Finch. Aural Existing Facilities Branch—Harold L. Kassens, chief, Room 7447. Engineers: John Roseborough, Robert H. Deilar, Kenneth M. Hedrick. Attorney: Arthur J. Schissel. Accountant: Glenn F. Murphy. Technical and Allocations Branch—Room 7621. Engineers: Donald C. Kanode, C. Fred Heister, Robert A. Bell, George L. Morgan, Jr. Television Applications Branch—Martin I.

Levy, chief, Room 7437. Engineers: Harold G. Kelley, Clayton W. Hanson, Willard J. Beale, Rex Wilson, Paul B. Duncan, Al Ginkle. Attorneys: Isadore A. Honig, Samuel Saady, Allen Cordon, Donald MacDonald.

Hearing Division

ROBERT J. RAWSON, chief, Room 7312. Engineers: Louis Light, Jerome F. Padberg, John McCullin, Frank Toth, Earl Coston. Attorneys: David L. Kraushaar, P. W. Valcinti, Earl C. Walck, Ray R. Paul, Richard Ely, Thomas B. Fitzpatrick, Sol Schildhaue.

Renewal & Transfer Division

JOSEPH N. NELSON, chief, Room 7306. Robert D. J. Leahy, accountant, Harry A. Mills, engineer; Esther M. Iglesias, secretary. Transfer Branch—Robert H. Alford, chief, Room 7309. Attorneys: John P. Elliott, Richard J. Tarrant, Joseph Hanlon, Accountants: Guy E. Douglas, John D. Stephenson. Renewal Branch—Edward J. Brown, chief, Room 7315. Attorneys: Natalie R. Yeager, Max Aronson, John H. Bass Jr. Accountants: John B. Foret, George W. Phillips, Joseph J. Berezny. Compliance Branch—LeRoy Schaff, chief, Room 7319. Attorney: Maurice W. Whitton. Accountant: William H. Hunter Jr. Legal Examiners: Mildred K. Roberts, Helen K. Huber, Doris L. Nutt, Jean M. Kent, Jeanne C. Barrows, Thelma B. Miller. Control Section—Melba Z. Templeman, chief, Room 7302.

Rules & Standards Division

HART S. COWPERTHWAIT, chief, Room 7434. Herbert M. Schulkind, assistant chief. Mildred B. Nesterak, secretary. Attorneys: Gerald F. Hadlock, Lynne A. Kaufman and Leonidas P. B. Emerson. Engineers: McIvor L. Parker, Louis R. Rein, Irina B. Galane.

Economics Division

H. H. GOLDIN, chief, Room 6311; James B. Sheridan, assistant chief, Irwin Fine, economist; Pearl P. Cook, secretary.

Office of Network Study

WARREN BAUM, chief, Room 6420. Nina P. Magro, Jo Ann Speaks, secretaries; Ashbrook F. Bryant, James F. Tierney, attorneys; Ethel Wyant, statistical assistant; Roscoe Barrow, Louis H. Mayo, Jesse Markham, consultants.

License Division

CLARA M. IEHL, chief, Room 7010. Marguerite F. Hubbard, assistant chief. Am-Fm Branch—Quentin S. Proctor, chief. Examiners: Helen D. Donovan, Betty J. Proctor, Zell W. Bowers, Shirley Martin, Rose Mumaw, Carol McCombs. Miscellaneous Services Branch—David Tau, chief. Examiners: Kathryn M. Johnson, Bertha Eyer. Tv Branch—Marie Warren, chief. Examiners: Wynelle Leonardo, Olga F. Broderick. Records and Files—Lillian T. Ricker, chief.

Public Reference Room

For Am, Fm, Tv Dockets and Files, Room 7013. George N. Simcoe, Richard Harris, James L. Martin.

Office of the Chief Engineer

EDWARD W. ALLEN JR., chief engineer, Room 7515. Ralph J. Renton, associate chief engineer.

Conelrad

Kenneth W. Miller, U.S. supervisor, Room 7516. Otis T. Hanson, assistant U. S. supervisor. David C. Williams, attorney advocate. Ernest C. Thelemann, Robert D. Linx and David O. Cooper, field supervisors. Engineers: Carl A. Johnson, Roger B. Carey, Thomas Cave, Joseph Eichel, Vernon Esgar, James Fernane, Frank J. Burris, Donald Holaday, Frederick Holliday, Glenn Martin, Paul Gilligan, James Gilfoy, Paul Holloway, Timothy Apostolos.

Frequency Allocation & Treaty Division

ALBERT L. MCINTOSH, chief, Room 7509. William L. North, assistant chief. Engineers: William F. Bradley, E. Merle Glunt, Thomas L. Heron, Saul M. Myers, Robert C. Ochs, Emile Reniers, George Stelzenmuller, Robert L. Tosch and Ernest Herider.

Laboratory Division

EDWARD W. CHAPIN, chief. Willmar K. Roberts, assistant chief. Office: Laurel, Md. Parkway 5-1585. Engineers: Albert Craig, Andrew R. Gabor, Joseph Hanyok, John E. Knight, L. C. Middlekamp, Milton Mobley, Everett Shinn and Adolph W. Andersen.

Technical Research Div.

WILLIAM C. BOESE, chief, Room 7506. Arnold Skrivsveth, assistant chief. Engineers: Jack Darnell, Jules Deitz, Harry Fine, Herman Garlan, Elton Davis, Albert L. Kreis, John Taff, George Waldo, Glenn West, Julian Dixon, Louis M. Manning, Sydney R. Lines, John T. Robinson.

Office of the Secretary

MARY JANE MORRIS, secretary, Room 6144. Vacancy, assistant secretary. Catherine M. Lunders, administrative assistant; Peggy F. Matthews, Charlotte B. Gladden, secretaries. Dockets Div.—Jessie R. Blaine, chief, Room 7406. Ben Waple, assistant chief. Minutes Div.—Annette E. Hutterly, chief, Room

6526. Library Div.—Helen A. Clark, chief, Room 2334. Technical Assistance Div.—Gordon Kent, chief, Room 6408. International Telecommunications Settlements Div.—Charlotte S. Smith, chief, Room 6233. Mail & Files Div.—Clara A. Fairall, chief, Room 7226.

Safety & Special Radio Services Bureau

CURTIS B. PLUMMER, chief, Room 6447. Marshall S. Orr, assistant chief. Aviation Div.—John R. Evans, chief, Room 6435. Marine Div.—William N. Krebs, chief, Room 6519. Industrial Div.—Daniel H. Arnold, chief, Room 6507. Land Transportation Div.—Glen E. Nielsen, Chief, Room 6443. Public Safety and Amateur Div.—G. K. Rollins, chief, Room 6454.

Common Carrier Bureau

JOHN J. NORDBERG, chief, Room 7124. Fred W. Clayton, assistant chief. Telephone Div.—Bernard Strassburg, chief, Room 7119; Telegraph Div.—John R. Lambert, chief, Room 7120; International Div.—Marion H. Woodward, chief, Room 7110; Domestic Radio Facilities Div.—Arthur A. Gladstone, chief, Room 7147. License Branch—Betty Ferro, chief, Room 7215.

Office of Administration

ROBERT W. COX, executive officer, Room 1202. Richard Solan, assistant to executive officer. Organization and Methods Div.—Lavelle W. Hughes, acting planning officer, Room 1233. Walter S. Davis, records officer, Room 7416. Personnel Div.—Gilbert H. Hatfield, personnel officer, Room 1204.—Administrative Services Div.—Paul H. Sheehy, chief, Room 6148.

Members of Former Federal Radio Commission

Feb. 23, 1927—July 10, 1934

Admiral W. H. G. Bullard, Pennsylvania
March 15, 1927—November 24, 1927 (Deceased)
Orestes H. Caldwell, New York
March 15, 1927—February 23, 1929
Eugene O. Sykes, Mississippi
March 15, 1927—July 10, 1934 (Deceased)
Henry A. Bellows, Minnesota
March 15, 1927—October 31, 1927 (Deceased)
Colonel John F. Dillon, California
March 15, 1927—October 8, 1927 (Deceased)
Sam Pickard, Kansas
November 1, 1927—January 31, 1929
Harold A. Lafount, Utah
November 14, 1927—July 10, 1934 (Deceased)
Ira E. Robinson, West Virginia
March 23, 1928—January 15, 1932 (Deceased)
General C. McK. Saltzman, Iowa
May 2, 1929—July 19, 1932 (Deceased)
William D. L. Starbuck, New York
May 2, 1929—February 23, 1934 (Deceased)
Thad H. Brown, Ohio
January 21, 1932—July 10, 1934 (Deceased)
James H. Hanley, Nebraska

Collins - the one for *quality* broadcast

AM TRANSMITTING EQUIPMENT

Collins has developed the most advanced line of transmitting equipment available, built around time-tested transmitters ranging in power from 100 watts to 10 kw.

1000/500, 500/250, 250/100 WATT TRANSMITTERS

The 1 kw 20V, 500 watt 550A and 250 watt 300J are each housed in a single identical cabinet (pictured at left). They feature: full coverage, 540-1600 kc; instantly selectable power; simplified oscillator eliminates use of crystal ovens, assures dependability; tetrode tubes operate below rated dissipation levels;

precise metering; only 7 tube types; all controls on front, easy access to interior and all tubes visible at a glance; blower cooling; adaptability to remote control; a Collins power increase package makes possible overnight conversion of the 300J to a 550A or 20V, also overnight conversion of the 550A to a 20V.

5/10 KW TRANSMITTERS

Feature for feature, the 21E/M is the most economical transmitter available; no crystal ovens, no external equipment, easy access to all relays, forced air cooling, visible tubes, compact size with three bays similar to cabinet at left.

Circuitry is simplified, with only 9 tube types in the 5 kw 21E and 10 in the 10 kw 21M. Spurious radiation is held to a minimum. Collins power increase package allows overnight conversion from 5 kw to 10 kw.

DIRECTIONAL ANTENNA EQUIPMENT

Collins 81M Phasors are individually designed to each broadcaster's requirements as specified by his consulting engineer. Housed in cabinets to match Collins or other transmitters, the 81M features easily adjusted networks, highest stability, ease of maintenance, adequate voltage and current safety, and maximum economy. Collins 42E-7/8 Antenna Tuners are housed in weatherproof heavy-gauge welded steel cabinets and feature accessibility.

The equipment listed on these pages is but a cross section of the full Collins line — a combination of time-tested leaders and new designs. The full line is presented in a new fully illustrated catalog which also has reference charts and tables for use by station engineering and management personnel. If you have not yet received your copy or if you desire additional copies, contact the Collins office nearest you.

COLLINS RADIO COMPANY

SPEECH INPUT CONSOLES

Collins Consoles are designed for high fidelity AM, FM and TV service or program control in audio systems.

12F — Supplies complete control over simultaneous broadcasting and auditioning from any 5 of 12 inputs. The 212F also monitors remote lines, and controls speakers and warning lights.

2E — Dual channel unit provides simultaneous mixing of 9 of 22 inputs, including mikes, remote lines, high level line and network line. Also supplies monitoring of program lines and remote lines, and control of speakers and warning lights.

REMOTE AMPLIFIERS

212Z — The lightest full-function remote available, this 4-channel transistorized unit weighs only 22 lbs. with battery in carrying case. Other features: printed circuitry, automatic power changeover, typewriter-size carrying case.

MICROMOTE — This is the ideal unit for a one-man, one-mike situation. It weighs only 10 oz. complete with ear-plug headphone and mike connector and fits easily into a breast pocket or on belt. Contains 6 transistors and 4 mercury batteries (with average life of over 200 hours) and has built in battery test light.

TURNTABLE EQUIPMENT

TT-400/200 — These new tables feature simplicity with only 3 moving parts in the drive mechanism; heavy cast aluminum construction; gear shift (3) speed selector with neutral positions between speeds; unique indentation for 7" 45 rpm discs, eliminating spindle adapter; double-ball thrust bearing. Available in 16" 4-pole (TT-400) or synchronous (TT-400S) and 12" 4-pole (TT-200) or synchronous (TT-200S).

CUSTOM CONTROL DESKS

Collins now offers attractively styled custom-built control desks, individually designed to your requirements at a surprisingly low cost. Ask your Collins representative for a proposal.

Radio-Tv Equipment Manufacturers, Distributors; Construction Services

A

Acme Camera Corp. 2704 W. Olive Ave., Burbank, Calif. Victoria 9-3144. John Kiel, sales mgr.

Products (for tv): Recording cameras, kine-photo monitors.

Adler Electronics Inc. 1 Le Fevre Lane, New Rochelle, N. Y. 6-1620. Alfred Strogoff, vp (radio & tv).

Products (for radio): Studio control equipment, recording consoles.

Products (for tv): Low power vhf and uhf transmitters, translators, microwave relay equipment, studio control equipment, antennas and related power supplies.

Aerial Tower Manufacturing Co. 8300 Sunnyland Rd. Orange 7-3880. Earl Griffith, pres.

Products (radio & tv): Complete line of radio, communication, tv, community tv towers.

Affiliated Photographic Co. 21 W. 45th St., New York 36, N. Y. Judson 2-0522. Irwin Goldman, owner.

Products (for tv): Slides, telops, flip cards, ballops.

Alford Manufacturing Co. 299 Atlantic Ave., Boston 10, Mass. Hancock 6-2150. Harold H. Leach, senior engineer (tv).

Products (for tv): Antennas, diplexers, coaxial switches, vestigial sideband filters, impedance measuring equipment.

All Star Products Inc. Squire Ave., Defiance, Ohio. 2-1065. W. F. Reiter, vp, sales mgr.

Products (for radio): Variable gang condensers, air trimmer condensers.

Allied Radio Corp. 100 N. Western Ave., Chicago 80, Ill. Haymarket 1-6800. S. H. Levey, sales mgr.

Products (for radio & tv): Station equipment and supplies for immediate shipment, magé orthicons, iconoscopes and all transmitting tubes, audio equipment, amplifiers, condensers, CAA approved tower light control, attenuators, equalizers, disc and tape recording equipment, resistors, patch panels and cords, pick-ups and turntables, public address systems, receivers, microphones, noise and distortion measuring equipment, test equipment, transformers, transcription players, RCA camera cable, connectors.

Allied Recording Products Co. 32-32 Greenpoint Ave., Long Island City 1, N. Y. Stillwell 4-2318. J. Strauss, pres.

Products (for radio & tv): Professional recording discs.

Apur Manufacturing Corp. 2910 Spring St., Redwood City, Calif. Emerson 8-4701. R. V. Austrup, sales mgr.

Products (for radio): Towers, accessories, sociated equipment.

Arco Lansing Corp. 1515 S. Manchester Ave., Anaheim, Calif. Prospect 4-2900.

New York 13, N. Y.: 161 Sixth Ave. H. S. Aris, products sales mgr. (radio & tv)

Products (for radio & tv): Amplifiers, console mixers, microphones, tuners, loudspeakers, transformers.

American Electronics Inc. Audio Div., 655 W. Washington Blvd., Los Angeles, Calif. Richmond 9-5361. Howard Ladd.

Products (for radio & tv): Tape recording equipment.

American Ladder & Scaffold Co. 5507 N.W. Seventh Ave. Miami, Fla. Plaza 4-2663. M. Wolfstein, mgr.

Products (for radio & tv): Ladders, scaffolds.

Amperex Electronic Corp. 230 Duffy Ave., Hicksville, N. Y. Frank Randall, pres and gen-

eral sales mgr (radio & tv).

Products (for radio & tv): Electron tubes (power and rectifier tubes, thyratrons, magnetrons, transmitting and special purpose tubes).

Ampex Corp. Professional Products Div., 934 Charter St., Redwood City, Calif. Emerson 9-1481. C. R. Paulson, national sales mgr.

Products (for radio): Magnetic tape recorders (Models 601, 351 and 300), Model 620 monitor speaker-amplifiers, automatic programming equipment.

New York 17, N. Y.: 345 E. 48th St. Plaza 5-8405. Tom Merson.

Products (for tv): Model VR-1000 videotape recorders and color conversion accessories.

Amplifier Corp. of America. 398 Broadway, New York 13, N. Y. Worth 6-2929. A. J. Gillette.

Products (for radio): Battery-operated, spring-motor tape recorders; AVC amplifiers.

Andrew Corp. 363 E. 75th St. Chicago 19, Ill. Triangle 4-4400. Robert P. Lamons, director of marketing (radio & tv).

Claremont, Calif.: (Andrew California Corp.) 941 E. Maryland Ave. National 6-3505. Jeff D. Montgomery, mgr.

Westwood, Mass.: P. O. Box 296. Davis 6-6500. C. Robert Lane, eastern regional mgr.

Ridgewood, N. J.: P. O. Box 416. Gilbert 5-2500. Harold J. Detlefs, sales engineer.

Whitby, Ont.: (Andrew Antenna Corp. Ltd.) 606 Beech St. Mohawk 8-3348. John W. McLeod, gen mgr.

Products (for radio): Coaxial transmission line, coaxial switches, fm transmitting antennas.

Products (for tv): Coaxial transmission line, coaxial switches, waveguides, low power antennas.

Animation Equipment Corp. 38 Hudson St., New Rochelle, N. Y. 6-8138. A. Kip Livingston, vp and gen mgr.

Products (for tv): Motion picture optical printers, animation stands, process cameras, registration devices.

Anso Div., General Aniline & Film Corp. 405 Lexington Ave., New York 17, N. Y. Oxford 7-6161. Dr. Leopold Eckler, gen mgr; P. J. Daly, sales mgr.

Binghamton, N. Y.: 245 Clinton St. 2-4221. James P. Demaree.

Atlanta, Ga.: 12 Williams St., N. W. Trinity 6-0351. J. D. Coll.

Industrial Television. 7940 Fareholm Dr., Los Angeles 46, Calif. Oldfield 6-1000. Robert J. Myers, sales mgr (radio & tv).

Products (for radio): Fm transmitters, audio equipment.

Products (for tv): Flying spot scanners, video amplifiers, transmitters, translators, studio equipment, microwave relays, vidicon cameras, motor generator sets, antennas, transmission line, tv distribution systems.

International Rectifier Co. 2820 W. Washington Blvd., Chicago 12, Ill. Van Buren 6-4242. Howard H. Rosenheim, general sales mgr.

Long Island City 1, N. Y.: 41-14 24th St. Stillwell 6-5732. Robert N. Clark.

Products (for radio & tv): Clock timers.

International Telephone & Telegraph Corp. 67 Broad St., New York 4, N. Y. Perry R. Roehm, vp in charge of marketing.

Industrial Products Div., 15191 Biedsoe St., San Fernando, Calif.

Federal Telephone & Radio Co. (Div.), 100 Kingsland Rd., Clifton, N. J.

Kellogg Switchboard & Supply Co. (Div.), 6650 S. Cicero Ave., Chicago 38, Ill.

Farnsworth Electronics Co. (Div.), 3700 E. Pontiac St., Fort Wayne 1, Ind.

ITT Labs, (Div.), 500 Washington Ave., Nutley 10, N. J.

Components Div., 100 Kingsland Rd., Clifton, N. J.

Products: Mobile radio systems, closed-circuit tv systems, microwave and over-the-horizon equipment, power and high frequency tubes, traveling wave tubes, hydrogen thyatrons, special purpose tubes, power rectifiers, condensers, hermetic seals, other broadcast components.

International Telemeter Corp. 2000 Stoner Ave., Los Angeles 25, Calif. Granite 8-7751. Howard G. Minsky, eastern sales mgr; Will Baltin, western sales mgr.

New York 18, N. Y.: 1501 Broadway. Bryant 9-8700. Louis A. Novins, pres.

Products (for tv): Attachments for Telemeter pay tv system and closed-circuit tv equipment.

J

Jenfred Inc. 36 W. 57th St., New York 19, N. Y. Circle 7-1429. Claude Frederick Jr., pres.

Products (for tv): Rear and front (Scotch-lite) projection equipment, display equipment, slides and pictures, slide files.

Jennings Radio Manufacturing Corp. 970 McLaughlin Ave., San Jose 8, Calif. Cypress 2-4025. Roderick W. Nelbau, sales mgr.

Products (for radio & tv): Vacuum variable and fixed capacitors, vacuum relays.

Jensen Manufacturing Co. 6601 S. Laramie Ave., Chicago 38, Ill. Portsmouth 7-7600. Horace L. White, industrial sales mgr (radio & tv).

Products (for radio & tv): Loudspeakers.

Jerrold Electronics Corp. 23rd & Chestnut St., Philadelphia 3, Pa. Locust 4-0707. William Miller, sales mgr.

Have you noticed the difference?

During the past ten years, great strides have been made in the field of electronics. In step with these advances and without publicity . . .

CKRC

began broadcasting with a new transmitter* about two months ago. This transmitter, the first of its kind in commercial broadcast use, features a revolutionary system of modulation — a new concept in broadcast transmission that bears THE REAL SOUND to your radio. We wanted to know if the public would notice first class quality of broadcast. We are delighted to tell you that during these weeks, hundreds of people have telephoned and written to ask for an explanation of the excellent tone. The following is from one of the letters received:

"One evening some three weeks ago I tuned to '630' and noted a marked improvement in the signal quality of CKRC. My curiosity about this pleasing 'new sound' was aroused to the point where I called your station and learned from your very courteous control operator, Mr. Ron Place, that you were on the air with a new transmitter. I have since made a trip out to your transmitter station to have a look at this compact marvel of sound quality. As I hear it, your new transmitter must be working at about optimum — quiet carrier, beautiful modulation, and really 'clean' signal."

Listen today . . . a new excellence of sound plus news every half hour and music made up from the current hits and a liberal sprinkling of the all time great tunes — giving you . . .

an extra measure of listening pleasure

Specialists in Obstruction Lighting Equipment and Controls

BEACON OBSTRUCTION LIGHTS, designed to meet specifications of CAA, FCC, and Canadian DOT.

300MM Beacon Single Obstruction Light Double Obstruction Light

You'll find Hughey & Phillips have obstruction lights for every job. The engineering of each light offers maximum efficiency and simplified installation and maintenance. Whether you need bottom or side entrance conduit fitting types, there is a model to meet your requirements.

SPECIAL CAST ALUMINUM WATERTIGHT JUNCTION BOXES, offering a wide choice in types of terminals, cable support, and factory installed screw cap receptacles.

Hughey & Phillips have pioneered in the use of adequate junction boxes with proper terminals, and built in cable support to meet NEC requirements.

Box with terminals, cable support, and receptacle in cover. →

← Box with factory installed screw cap receptacles.

→ Box with special terminals and cable support.

SPECIAL CONTROL UNITS, designed for both indoor and outdoor installation.

- Photo-Electric Control Units
- Beacon Flashers
- Combination Photo Control & Beacon Flashers
- Lamp Failure Indicator System
- Controls with Autotransformer system . . . pioneered by Hughey and Phillips for tall towers . . . increases lamp life.

Photo Control, three circuit flasher, with autotransformers. (outdoor housing)

MICROWAVE TOWER LIGHTING CONTROL

Special control and alarm systems for unattended stations

- Photo-Electric Control
- Beacon Flasher
- Lamp Failure Alarm

Photo control, flasher and Lamp Failure Alarm

Complete kits for: Tower Obstruction Lighting, sleet melter power and control. **SPECIAL KITS** prepared to meet your individual requirements.

Prodelin Pioneers an All-American!

AND **Spir-O-line** FOR

Transmission Line Assembly with 90% Less Work • Consistent, Low VSWR

Here's Prodelin's revolutionary design approach to coaxial transmission line connectors . . . *Spir-O-lok!* Its unique construction makes assembly with the Prodelin combination many times faster than with any other line and connector assembly in the industry . . . while providing consistently reliable VSWR.

See how easy a Spir-O-lok installation is:

CUT — With a common tubing cutter, cut the outer conductor of the *Spir-O-line*. Remove. The soft aluminum tubing cuts cleanly and easily.

TRIM — With an ordinary jack knife, trim the six dielectric tubes flush to the outer conductor. This is Prodelin's unique construction that simplifies connector assembly while affording best broadband performance, highest power handling, lowest attenuation and VSWR. The 6 tubes keep the *Spir-O-line* inner conductor perfectly centered on bends.

ASSEMBLE — So simple, one man can do it in a few minutes. Slide the nut assembly on cable, hold body while tightening nut with wrench. This forms a pressure-tight joint that cannot distort outer aluminum sheath. The connection can be re-made repeatedly without redressing cable or affecting VSWR. Insert inner conductor connector.
MATE WITH ANY EIA (RETMA) OR MILITARY SPEC CONNECTORS

ELIMINATE TERMINAL CONNECTOR; SIMPLIFY CONNECTION PROCEDURE
Incorporate *Spir-O-lok* in original design of equipment panel or bulkhead to save time, trouble and expense later.

Spir-O-line and Spir-O-lok . . . ALL-AMERICAN FROM DESIGN TO MANUFACTURE

WRITE TODAY FOR TECHNICAL BULLETIN Dept. B-7, 307 Bergen Avenue, Kearny, N.J.

T

Tarc Electronics Inc. 48 Urban Ave., Westbury, N. Y. Edgewood 4-3900. George Gordon, general sales mgr.

Products (for radio): Power supplies.

Products (for tv): Color and monochrome

The general manager and his chief engineer both heard right...

Standard Electronics' completely new line of FM transmitting equipment makes multiplex service a thoroughly practical, profitable proposition.

Incorporating the spectacularly successful Serrasoid® modulator developed by REL*, Standard Electronics new FM transmitters deliver a strong, high-quality subcarrier signal, even in fringe areas. They practically eliminate cross-talk. In every other respect, too, these S-E transmitters set new high standards for FM broadcasting.

Make this achievement in FM transmission part of your planning for 1959...ask us for further information.

Rents (for tv): Background projectors, 4x5 slides including attachments for 3 1/4 x 4, 4 1/2 in. stripfilm and special effects; automatic 3 1/4 x 4 and 4x5 slide projectors with available remote control, stop-motion and variable speed controls; seamless translucent screens, wide viewing and camera pick-up angles, custom-cast to size and color type up to 42x92 ft.

Broadcast Equipment Specialties Corp., P. O. Box 149, Beacon, N. Y. 9-4587. Albert C. Travis Jr.

Rents (for radio & tv): Tapak spring-driven, self-powered tape recorders.

Browning Labs Inc., 100 Union Ave., Laconia, N. H. 2809. Gardner G. Greene, pres.

Rents (for radio): Fm-multiplex receivers, tuners.

Burke & James Inc., 321 S. Wabash Ave., Chicago 4, Ill. Harrison 7-8393. Edward W. Hoy, vp; Albert Drucker, mgr.

Rents (for tv): Lenses.

COLOR TV

ONLY **TELECHROME** INCORPORATED MAKES THEM ALL

COMPLETE FACILITIES FOR TV STATIONS, MANUFACTURERS & LABORATORIES

Finest color film chains, colorplexing, transmitting, analyzing, monitoring, testing equipment

617-BR AUTOMATIC BALANCE CONTROL FOR ALL COLORPLEXERS
(Regardless of Manufacture)

An ingenious circuit locks the entire encoding equipment in balance within 20 seconds after being turned on. Thereafter balance is held under even the most difficult operating conditions.

1003-A VIDEO TRANSMISSION TEST SIGNAL GENERATOR
Portable

Completely self-contained, portable. Produces multi-frequency burst, stairstep, modulated stairstep, white window, composite synch. Regulated power supply. 12 1/4" standard rack mounting or in carrying case.

700-A 3V COLOR FILM CHAIN

Finest in quality, lowest in price. 3V provides greatest latitude in selection of color films. Designed specifically for broadcast application, requires little space. Multiplexes 35 or 16mm film, slides, opaques.

1073-A SINE-SQUARED SQUARE WAVE GENERATOR

Newest test unit produces new type of wave forms for testing any part or all of a TV or pulse system for amplitude and phase characteristics. "Go-No-Go" indication simplicity.

1601-AR CHROMOSCOPE

Signal Certification Equipment. Accurately measures the performance alignment, and phase errors of color TV equipment. Presents on a cathode ray screen a continuous polar plot of the phase and amplitudes of all colors in a composite color video signal. Capable of a .2° accuracy with 1604-AR phase magnifier.

New secondary phase standard for accurate reading to .01°

1008-A VERTICAL INTERVAL TEST SIGNAL KEYS

Inserts any wave form into vertical interval during program time for correcting facilities manually or automatically.

TELEMETERING TRANSMITTERS • High Power in Small Packages

Direct FM Transmitters Crystal controlled 215-235 megacycles. 125kc deviation.

Model 1462
6" x 4 1/2" x 3 3/4"
50 to 80 Watts

Model 1463
5 1/2" x 3 1/2" x 4"
15 to 30 Watts

Model 1472
4" x 1.5" x 2.7"
2 Watts

Model 1460
5" x 4 1/4" x 3 1/2"
RF Amplifier
15 to 30 Watts

Model 800—4.5" x 1.3" x 1.4"

SUB-CARRIER OSCILLATOR. Deviation stability $\pm 1\%$ of band width. Deviation linearity less than 1% of band width under all conditions measured from a straight line drawn between end points.

636-B CHROMALYZER

Portable Precision Color Bar Generator for checking color broadcast studio and transmission facilities, receivers and monitors. Can be tied into a system. Provides complete composite color signals at 100 or 75% chroma.

1603-AR PHASE SLOPE (ENVELOPE DELAY) CURVE TRACER

Instantaneous scope or meter reading of the envelope delay and amplitude characteristics of any network, video amplifier, or system. Precise-time saving. Has separate transmitter and receiver units which allow one way or loop measurements.

DELIVERY 30 DAYS

Literature on these and more than 150 additional instruments by TELECHROME are available on request.

Here is TOWER ENGINEERING EXPERIENCE

MOBILE AND AMATEUR COMMUNICATIONS

MICROWAVE COMMUNICATIONS

The 100-foot Trylon tower (1948) is typical of

TRYLON BULLETIN 3-3

TRYLON TOWERS

SINCE 1932

"Lightweight" Series

For Vertical Radiators, Community TV Antenna Supports, Wire Antennas, Parabolas and a Host of Other Applications

From the first steel towers to depart from the old bridge design standards of the mid-30s, to highly engineered towers for today's commercial and military requirements, the Trylon "lightweight" series has proven outstandingly successful and economical for moderately-heavy antenna requirements. Starting far ahead, and carrying well beyond mere metal fabricating, Trylon carefully engineers each electrical and structural detail to easily withstand the requirements of the specific tower applications. Every Trylon tower is hot-dip galvanized after fabrication for maximum corrosion resistance and minimum maintenance. Moreover, Trylon maintains facilities by design for supervising or actually erecting any tower or complete antenna system, as you prefer.

TRYLON "HEAVYWEIGHT" SERIES TOWERS
The heavy and permanent type towers and antenna systems are available for jobs 24 feet and up.

Trylon towers are made only by:

WIND TURBINE COMPANY • WEST CHESTER, PA., U. S. A.
In Canada: THE WIND TURBINE COMPANY OF CANADA LTD. • TORONTO, ONTARIO

... at your fingertips

NEW TRYLON BULLETIN 3-3 is your handy guide of towers and antenna system design know-how culminating in the popular Trylon "Lightweight" Series for medium loadings. Write for your copy today!

Equipment for Rent CONTINUED

Camera Equipment Co., 315 W. 43rd St., New York 36, N. Y. Judson 6-1420. Burton H. Zucker.

Products (for tv): Ceco balanced "tv" heads, balanced vidicon heads, remote pan and tilt heads for vidicon cameras, GPL closed-circuit equipment.

Camera Mart Inc., 1845 Broadway, New York 23, N. Y. Plaza 7-6977.

Rents (for tv): Camera dollies, microphone booms, tripods, special optical effects prisms and lenses, tv film editing equipment.

Century Lighting Inc. 521 W. 43rd St., New York 36, N. Y. Chickerling 4-7050. Nathan J. Sonnenfeld, New York sales mgr.

Santa Monica, Calif.: 1820 Berkeley St. Lou Erhardt, branch mgr.

North Miami, Fla.: 1477 N.E. 129th St. Plaza 4-6675. George Gill, southern branch mgr.

Rents (for radio): Microphone booms.

Rents (for tv): Studio and location lighting fixtures, dimmer boards, cables, microphone booms.

Commercial Radio-Sound Corp. 652 First Ave., New York 16, N. Y. Oregon 9-0400. Arthur W. Schneider, gen mgr.

Rents (for radio): Broadcast audio systems.

Rents (for tv): RF distribution systems, video distribution systems.

Engineering Assoc. 434 Patterson Rd., Dayton 19, Ohio. Axminster 3-1662. Charles C. Littell Jr., pres.

Rents (for radio): Test equipment.

Jenfred Inc. 36 W. 57th St., New York 19, N. Y. Circle 7-1429. Claude Frederick Jr., pres.

Rents (for tv): Projection equipment, pictures, slides, display units.

Kilegl Bros. Lighting 321 W. 50th St., New York 19, N. Y. Columbus 5-0130. Herbert R. More, mgr., tv dept.

Rents (for tv): Lighting equipment for remotes.

Lambda-Pacific Engineering Inc. 14725 Armita St., Van Nuys, Calif. Stanley 3-2400. John Becker.

Rents (for tv): Portable tv relay equipment.

Ling Systems Inc. 11945 Vose St., North Hollywood, Calif. Poplar 5-9041. R. H. Goodwin, vp, sales.

San Diego, Calif.: 3703 Ingraham, Pacific Beach. R. V. Palmer.

Rents (for tv): Microwave relay systems for STL or remote, Microvan remote unit.

J. G. McAlister Inc. 1117 N. McCadden Pl. Hollywood 28, Calif. Hollywood 9-5317. L. M. Combs, vp.

Rents (for tv): Lighting equipment, camera dollies.

National Engineering & Manufacturing Inc. 1579 Morristown St., Orlando, Fla. Garden 4-9715. Don L. Dine, Robert D. Sidwell.

Rents (for radio & tv): Any size tower for any length time.

O'Connor Engineering Labs. 9862 Highland Ave., Alta Loma, Calif. Yukon 2-8341. Thomas W. O'Leary, sales mgr.

Rents (for tv): All models of O'Connor fluid pan and tilt tripod pan.

Pembrex Theatre Supply Corp. 1969 S. Vermont St., Los Angeles 7, Calif. Republic 1-3111. Louis M. Wutke.

Rents (for tv): GiantView projection, background projection and screens.

Precon Process & Equipment Corp. 900 Maryland Casualty Bldg., New Orleans 12, La. Tulane 3391. Hal C. Becker, vp.

Garden Grove, Calif., 8701 Adah St. Lehigh 9-8174. Dr. Robert E. Corrigan, vp.

Rents (for radio & tv): Precon insertion equipment (for subliminal communication).

Rangertone Inc. 73 Winthrop St., Newark 4, N. J. Humbolt 5-2550. R. H. Ranger, pres.

Rents (for radio and tv): Portable synchronous tape recorders.

Raven Screen Corp. 124 E. 124th St., New York 35, N. Y. Lehigh 4-8408. Ernest D. Reif, sec-treas.

Rents (for tv): Projection screens.

Rolab Labs Walnut Tree Hill, Sandy Hook Conn. Garden 6-2466. Henry Roger, owner.

Rents (for radio): Sound recording equipment (Magnasync, Ampex, disc recording apparatus).

Rents (for tv): Studio equipment for production of motion pictures and commercials, complete sound stage.

Schafer Custom Engineering. 235 S. Third St., Burbank, Calif. Thornwall 5-3561. Paul C. Schafer, pres.

Rents (for radio): Automation, automatic programming, automatic logging and remote control equipment.

S.O.S. Cinema Supply Corp. 602 W. 52nd St., New York 19, N. Y. Plaza 7-0440. Dom Capano, vp.

Rents (for tv): Motion picture cameras, tripods, dollies and perambulators, animation equipment, all types of lighting equipment, sound recording equipment, microphone booms, projection equipment, sound editors, etc.

Telechrome Manufacturing Corp. 28 Ranick Dr., Amityville, N. Y. Lincoln 1-3600. H. Charles Riker, vp.

Van Nuys, Calif: 13635 Victory Blvd. State 2-7479. S. S. Krinsky, director of western engineering div.

Chicago, Ill.: 670 N. Elizabeth St. Lombard 6026. David Chapman, engineer.

Rents (for tv): All Telechrome products and systems.

For Superior Performance

—it's Quality by *FOTO-VIDEO*

V-148 Image Orthicon Orbiter-Tracker

- New, All-transistor design
- Precise Centering Correction
- Miniaturized to fit inside most TV cameras
- Adjustable deflection amplitude
- Rugged: long life, stable performance
- No moving parts—no vacuum tubes

V-72A 800 Mil Regulated Power Supply (250-300 v.)

- Silicon Rectifiers
- 0.3% Regulation
- Less than 3 mv ripple
- Less than 0.5 ohm source impedance
- 5 1/4" rack space
- Meter function switch

V-31 Master Monitor

- 14" picture and 5" waveform display
- Picture: 8 mc. flat response
- Pulse cross (normal and expanded)
- Waveform response: flat, and IRE color
- Triggered by Video, Sync, or drive
- Keyed-clamp (picture) on "back porch"
- Switchable keyed-clamp (waveform)
- Push-button pulse calibration

V-7B 525 Line TV Sync Generator

- Pos. and Neg. signals
- ALL RETMA sync signals
- Binary counter
- No tube selection
- Color—converted by V-8A
- Built-in dot generator
- Dot output separate
- Computer tubes
- 5 lock-in sources
- terminal boarded
- many test points
- powered by one V-72A

SYSTEM FINAL TESTING
Part of Rigid Quality Control

V-42A 4-Channel Video Distribution Amplifier

- Designed for color
- 10 MC bandwidth
- Sending-end termination
- Input capacity compensation
- 3 1/2" Rack space

V-44A 4 In 8 Out Pulse Distribution Amplifier

- 4 Independent Inputs . . . May be paralleled
- 8 Independent Outputs
- Individual Level Controls of the 8 Outputs
- Sharpening and Squaring of the Pulses
- 75 Ohm Sending—End Impedance
- 3 1/2" x 19" Deep Dish Chassis

V-3B Keyed Video Signal Generator

- Response of Transmitter, Link, and Studio
- Full composite signal
- No disabling of clamps
- Direct response of Waveform monitor
- Direct resolution test of picture monitor
- Timing and pulse width measurements
- Differential gain and phase throughout color band
- Full-range 90 kc to 10 mc
- Built-in regulated power supply

From the Award-Winning MGM Library of Shorts...

3 great new program series

with *Extra Profit Potential*

for local TV stations!

OUR GANG COMEDIES

52 hilarious subjects never before shown on television. A perennially popular series that has enjoyed fabulous success everywhere and has a pre-sold viewer audience. Now start programming *newer* subjects than have ever been shown before—and watch the moppets skyrocket your ratings!

Extra Profit Potential

MGM-TV offers *unlimited runs* on these versatile films. Run singly as quarter-hour shows, or combined into half-hours... a natural any hour of the day... morning, noon or night.

CRIME DOES NOT PAY

48 exciting crime stories with a point-of-view that makes them ever-timely. Dramatized in a documentary staccato style that provides perfect entertainment for prime evening hours. Starring such famous MGM names as Laraine Day, Robert Taylor, J. Carroll Naish, Van Johnson and others!

Extra Profit Potential

MGM-TV suggests that since each film runs only 21 minutes, they can be programmed as a 25-minute series, offering stations an extra profit-making 5-minute segment in which to slot news or weather reports. Ideal for spotting just before joining or leaving the network.

JOHN NESBITT'S PASSING PARADE

69 breath-taking adventures in science, history, medicine or geography... scripted and narrated with the dramatic flair that made John Nesbitt famous. Designed for a family audience. Packed with prestige for bank, utility or insurance sponsorship.

Extra Profit Potential

MGM-TV considers these 10-minute films just right for the advertiser with a longer-to-tell message in a quarter-hour segment. Or follow these audience-winners with a 2-minute sponsored weather bulletin for extra profit pick-up.

* SEE ZIV AD PAGES A114-A115

A The United States of America has never won a war with professional soldiers. When the call to arms is sounded, it is answered by the butcher, the baker, the errand boy, the teacher, the advertising executive--- the **CITIZEN SOLDIER**.

Now for the first time, a new television series glorifying the heroic exploits of the American soldier has been filmed on actual battle fields in Europe, with the full cooperation of the Department of Defense and the Department of the Army.

Your audience? The more than 22,000,000 **CITIZEN SOLDIERS** of world war I and II and the 170,000,000 relatives and friends--- the **CITIZEN BUYERS**.

CITIZEN SOLDIER

*BIG RASCALS HATCH BIG NEW ADULT AUDIENCE

HERE ARE THE FACTS...

In the three station, Philadelphia market, WRCV-TV was trailing Susie in the 9-10 a.m. time slot during the early months of 1958.

With the introduction of the BIG RASCALS, WRCV-TV was lifted 269% to **FIRST PLACE** in the **FIRST MONTH**.

The ratings continued to climb to the point where a recent Nielsen survey showed BIG RASCALS reaching a 228% GREATER ADULT AUDIENCE than Susie, its nearest competitor.

BIG RASCALS not only brought WRCV-TV to first place but increased the *total viewership* of the 9-10 a.m. time slot.

*BIG RASCALS...133 RKO Comedies featuring Leon Errol.

What's on their minds ?

(**What's on yours?**)

There's a raft of laughter on TV in their area tonight, and they've got it firmly on their minds. They're not going to miss it!

For "I Married Joan", with Joan Davis and Jim Backus, is *now available*... a natural for the whole family to watch... including the family breadwinner, who's had to miss the day-time showings up to now.

Nothing sells better than laughter — and here are 98 wacky and ingeniously-plotted segments cram-packed full of laughs. Watch 'em, clock 'em —there's a laugh a minute!

For night-time showing... for strip showing... "I Married Joan" is a honey of a show, just right to make sponsors in your area awaken with interest.

Call your Interstate Television representative about "I Married Joan" now!

Stone, director of program services; Alice J. Heinecke, publicity and promotion services; S. B. Candlera, office administrator.

The 50 Advertising Agencies That Bill Most in Radio-Tv

McCann-Erickson led the nation's advertising agencies in combined television and radio billing in 1957 with a year-end figure of \$103 million, according to results of BROADCASTING's sixth annual survey of the top broadcast agencies in the U. S.

M-E drove to its dominance on the steam of a \$26.6 million increase over its 1956 billings, when the agency checked in as No. 3.

Young & Rubicam, three years the leader in the year-end tabulations, was bumped into the runner-up position in 1957 despite an \$18 million gain that raised its tv-radio expenditure to an even \$100 million.

J. Walter Thompson Co. emerged third with a broadcast billing total of \$92 million, a \$22 million advance over its 1956 outlay.

BBDO placed fourth in 1957 while adding \$5 million to bring its tv-radio billing total to \$85 million.

Ted Bates retained its No. 5 ranking on the strength of a \$21.5 million rise, lifting its billing figure to \$76.5 million.

The other leaders among the Top 10: Benton & Bowles, \$54.5 million; Leo Burnett, \$49 million; Dancer-Fitzgerald-Sample, \$47 million; Compton, \$42 million, and Foote, Cone & Belding, \$40 million.

Ted Bates for the third consecutive year held its dominance in tv-radio spot billing with a year-end tally of \$43.5 million, an advance of \$8.5 million over its 1956 total. McCann-Erickson registered \$42 million to place second in spot spending, well ahead of Y&R and BBDO which shared third rank with a spot total of \$27 million each.

In the "television only" category, McCann-Erickson led the standings with \$91 million, followed—as in the combined figures—by Young & Rubicam and J. Walter Thompson. The Y&R tv total: \$85 million; JWT: \$80 million.

Young & Rubicam edged BBDO by \$1 million in the "radio only" designation, finishing the year with \$15 million. McCann-Erickson and J. Walter Thompson shared third position with identical \$12 million outlays in radio.

The figures represent expenditures for time and talent, in both network and spot, during the 1957 calendar year.

Following is a summary of 1957 activity in each of the agencies listed in the compilation:

MCCANN-ERICKSON: Combined tv-radio billing \$103 million; \$91 million in television (\$61 million in network, \$30 million in spot); \$12 million in radio (all spot); tv-radio share of overall billing: 52%.

In registering its \$26.6 million increase over 1956, McCann-Erickson spent more than \$5 million on television specials alone for Standard Oil, Bulova, John Hancock and others.

New to the agency in '57: Helene Curtis (*What's My Line?* on CBS-TV), Tums (*Wagon Train*, NBC-TV) and John Hancock (*Producers Showcase*, NBC-TV).

Even more significant than the new entries was the formidable increase of tv spending among established clients at the agency.

Regular network sponsors at the agency included: Chrysler (*Climax*, *Shower of Stars*, both CBS-TV), Chesebrough-Ponds (*Bob Cummings Show*, NBC-TV), Derby Foods (*Disneyland*, ABC-TV), Liggett & Myers (*Dragnet*, *Club Oasis*, NBC-TV; *Frank Sinatra*, ABC-TV), Mennen Co. (*Wednesday*

famous on the local scene...

Spanning the Harbor at San Francisco, the Oakland Bay Bridge is an inspiring symbol of achievement. Storer, too, is recognized for achievement . . . in the world of broadcasting. This recognition has been earned through consistent sales results on Storer stations in the communities they serve. These individual achievements prove that a Storer station is a local station.

Top 50 Agencies CONTINUED

Night Fights, OSS, both ABC-TV) and Westinghouse (*Studio One*, CBS-TV).

YOUNG & RUBICAM: Combined tv-radio billing \$100 million; \$85 million in television (\$67 million in network, \$18 million in spot); \$15 million in radio (\$6 million in network, \$9 million in spot); tv-radio share of overall billing: 45%.

Up \$18 million from its 1956 total, the agency shares with McCann-Erickson the distinction of cracking the \$100 million mark in tv-radio billing. New business in 1957: Beechnut, from Kenyon & Eckhardt. Lost: Kent and Newport cigarettes to Lennen & Newell. New entrants to tv: Drackett (*Wagon Train*, NBC-TV); Royal Typewriter (*Sally*, NBC-TV). Among leading network advertisers: Goodyear (*Goodyear Anthology*, NBC-TV), Remington Rand (*Gunsmoke, What's My Line?*, both CBS-TV), Bristol-Myers (*Alfred Hitchcock Presents*, CBS-TV; *Tombstone Territory*, ABC-TV), Singer (*The Californians*, NBC-TV), General Electric (*Cheyenne*, ABC-TV), General Foods (*Disneyland*, ABC-TV); Procter & Gamble (*The Lineup*, CBS-TV), Kaiser (*Maverick*, ABC-TV), Borden and American Home Products (*People's Choice*, NBC-TV), Time Inc. (*Person to Person*, CBS-TV), Johnson & Johnson (*Robin Hood*, CBS-TV), Royal McBee (*Sally*, NBC-TV), Lipton (*Talent Scouts*, CBS-TV). Among top spot clients at agency: General Foods, Borden, General Electric, Johnson & Johnson, Procter & Gamble.

J. WALTER THOMPSON CO.: Combined tv-radio billing \$92 million; \$80 million in television (\$65 million in network, \$15 million in spot); \$12 million in radio (\$4 million in network, \$8 million in spot); tv-radio share of overall billing: 37%.

JWT's impressive roster of network tv sponsorships and a \$4 million-plus contract by Ford Div. on CBS Radio highlighted an upward climb in broadcast billing (up \$22 million)—the agency moving from fourth to third in ranking.

The bigger blue chips in network tv that JWT handled: Pharmcraft (*Steve Allen Show*, NBC-TV), Lever Bros. (*Eve Arden Show*, CBS-TV; *Rosemary Clooney Show*, NBC-TV), Scott Paper (*Father Knows Best* and *Giselle Mackenzie Show*, NBC-TV), Ford (*Tennessee Ernie Ford and Suspicion*, NBC-TV; *Zane Grey Theatre*, CBS-TV), Kraft Foods (*Kraft Television Theatre*, NBC-TV), Eastman Kodak (*Ozzie & Harriet*, ABC-TV; *Ed Sullivan Show*, CBS-TV), Sylvania (*The Real McCoys*, ABC-TV), Schlitz (*Schlitz Playhouse*, CBS-TV) and Seven Up (*Zorro*, ABC-TV).

Among the new accounts gained by JWT during the year were two airlines, Northeast and Continental, and Sealy Mattress.

BBDO: Combined tv-radio billing \$85 million; \$71 million in television (\$46 million in network, \$25 million in spot); \$14 million in radio (\$12 million in network, \$2 million in spot); tv-radio share of overall billing: 40%.

Symptomatic of the competitive pace in television, BBDO, with a respectable increase of \$5 million in billing over 1956, found itself back two places in the 1957 rankings, finishing fourth.

Chief defection in 1957 was the Revlon account, which transferred its business to Warwick & Legler and its other agencies (Mogul, LaRoche and Dowd, Redfield & Johnstone). Gains for the agency included Air France from Buchanan and part of the W. A. Sheaffer pen account. BBDO tied for

third place in the combined tv-radio spot billing. Accounting for part of the huge spot billing were activities on behalf of American Tobacco's Hit Parade cigarettes, Campbell's new soups, Bristol-Myers' Ban, Lever Bros. and General Mills, among others.

BBDO's roster of network activities included *Armstrong Circle Theatre* on CBS-TV for Armstrong Cork; *Jack Benny Show* and *Bachelor Father* on CBS-TV for American Tobacco; *Colt 45* on ABC-TV for Campbell Soups; *Burns and Allen* on CBS-TV for General Mills; *GE Theatre* on CBS-TV for General Electric; *Life of Riley* on NBC-TV for Lever Bros.; *Playhouse 90* on CBS-TV for Bristol-Myers; *Robin Hood* on CBS-TV for Wildroot Co.; *Trackdown* on CBS-TV and *Your Hit Parade* on NBC-TV for American Tobacco and *You Bet Your Life* on NBC-TV for DeSoto.

TED BATES & CO.: Combined tv-radio billing \$76.5 million; \$69.5 million in tv (\$33 million in network, \$36.5 million in spot); \$7 million in radio (all spot); tv-radio share of overall billing: 75%.

Ranking first in spot for the third year in succession, Ted Bates chalked up an overall tv-radio increase of \$21.5 million over its 1956 billing. Spot spending by the agency in 1957 came to \$43.5 million, with the entire radio outlay of \$7 million going to local stations. Product acquisitions by Bates in 1957 included Colgate's Fab and Rapid shave cream from William Esty and Uncle Ben's rice from Leo Burnett. Top spending client at the agency—and leading spot sponsor in the nation—was Brown & Williamson. B&W network efforts included sponsorship of *Lineup* on CBS-TV and *News on the Hour* on NBC Radio. Other Bates network broadcast activities included *Have Gun, Will Travel* for Lever Bros., *Millionaire* for Colgate-Palmolive and *Name That Tune* for American Home Products, all on CBS-TV; *Jim Bowie* and *Sugarfoot*, both on ABC-TV for American Chicle, and *Thin Man* on NBC-TV for C-P.

BENTON & BOWLES: Combined tv-radio billing \$54.5 million; \$51.5 million in tv (\$36 million in network, \$15.5 million in spot); \$3 million in radio (\$1 million in network, \$2 million in spot); tv-radio share of overall billing: 58%.

Benton & Bowles' combined billing rose \$700,000 over its 1956 total. Figuring importantly in the agency's strong stance was the acquisition from Procter & Gamble of several new products: Zest, Winterset and Summerset. In addition B & B acquired Schick from Warwick & Legler while losing French Government Tourist to Grey and the Studebaker account to Burke Dowling Adams.

The agency placed the following programs: *December Bride*, *Danny Thomas Show* and *Zane Grey Theatre*, all on CBS-TV for General Foods, and *Meet McGraw* and the *Loretta Young Show* on NBC-TV for Procter & Gamble.

LEO BURNETT: Combined tv-radio billing \$49 million; \$43 million in television (\$34 million in network, \$9 million in spot); \$6 million in radio (\$1 million in network, \$5 million in spot); tv-radio share of overall billing: 61%.

Burnett, up \$6 million over 1956 in combined broadcast billing, shifted a considerable number of radio-using accounts into television. Burnett lost \$8 million worth of Pabst Brewing Co. billing—\$7 million Blue Ribbon, Old Tankard Ale, Andeker Draught Supreme; \$1 million Eastside Brewing Co. subsidiary—to Norman, Craig & Kummel and Young & Rubicam. But Tea Council

allocated its entire \$2 million ad budget to tv spot (as against a sizeable print campaign supplemented by tv in 1956); All-State Insurance redistributed print money to participations in CBS-TV's *Playhouse 90*, which made up to some degree the loss of network commissions formerly accrued through Pabst and ABC's Wednesday night fights and NBC-TV's *Mystery Theatre*; Kellogg dropped Arthur Godfrey simulcasts and CBS-TV's *Lassie* and picked up an ABC-TV across-the-board children's strip of adventure reruns and continued in CBS-TV's *House Party* and *Name That Tune*, also buying into *The Big Record*. Bauer & Black used CBS Radio's "Impact" plan on *Gunsmoke*, CBS 'n' Andy, and also used ABC Radio's *Breakfast Club*; Procter & Gamble picked up alternate weeks of CBS-TV's *Phil Silvers Show*, some CBS-TV daytime serials, NBC-TV's *Matinee*, *The Web*, and renewed *Loretta Young*; Pure Oil and Philip Morris (Marlboro) expanded tv sports coverage (Marlboro continuing on *Playhouse 90*); Pillsbury also went in for CBS-TV daytime serials as well as *The Big Record* and bought into ABC-TV's *Mickey Mouse*; Campbell Soup stayed on CBS-TV and so did Hoover Co.

Most of the foregoing advertisers used radio-tv spot, as did Pfizer Co. in farm radio. **DANCER-FITZGERALD-SAMPLE:** Combined tv-radio billing \$47 million; \$39.5 million in television (\$29.5 million in network, \$10 million in spot); \$7.5 million in radio (\$3.5 million in network, \$4 million in spot); tv-radio share of overall billing: 55%.

The pickup in billing of \$9.5 million at D-F-S is traced to greater activity of existing accounts. With its radio billing strong, D-F-S increased in tv as well. Among the leading tv network accounts were: General Mills, for which D-F-S placed business in five network tv shows (*Wyatt Earp*, *The Lone Ranger*, *Disneyland*, *Mickey Mouse Club* and *American Bandstand*, all on ABC-TV); American Chicle (*Sugarfoot* and *Jim Bowie* on ABC-TV); Liggett & Myers' L & M cigarettes (*Gunsmoke* on CBS-TV; *Dragnet* and *George Gobel* on NBC-TV); Nestle's association with the *Garry Moore Show* on CBS-TV; Peter Paul on CBS-TV's *Arthur Godfrey*; Sterling Drug with a daytime show, and others.

COMPTON ADV.: Combined tv-radio billing \$42 million; \$39.9 million in television (\$24.3 million in network, \$15.6 million in spot); \$2.1 million in radio (\$0.5 million in network, \$1.6 million in spot); tv-radio share of overall billings: 50%.

Compton upped its billings by \$10.1 million in 1957. The agency gained G. H. P. Cigar Co. from Norman, Craig & Kummel and G. Heileman Brewing Co. from Earle Ludgin. The increase in billing came from additional expenditures of such major accounts as Procter & Gamble with *Wyatt Earp* on ABC-TV and *This Is Your Life* on NBC-TV, Remington-Rand's *Leave It to Beaver* on CBS-TV and such spot advertisers as American Can, Bond Clothes, Goodyear, Nehi, Socony Mobil Oil Co., Standard Brands, Sterling Drug and Sterling Brewers. **FOOTE, CONE & BELDING:** Combined tv-radio billing \$40 million; \$33.3 million in television (\$25.3 million in network, \$8 million in spot); \$6.7 million in radio (\$5.7 million in network, \$1 million in spot); tv-radio share of overall billing: 35%.

An increase of \$7.5 million in tv-radio business at FC&B was attributable in large part to its new blue chip accounts, including Edsel Div. of Ford Motor Co. (*Wagon Train* on NBC-TV, special on CBS-TV in October), Tidewater Oil Co., Hawaiian Pineapple

(Dole), Savarin coffee, Shulton's Pharmaceutical Div. and Norwich Pharmacal (Nebes and another product as yet untitled).

The following accounts also contributed to the billings rise: Lever Bros. (Imperial margarine) representation on NBC-TV's *Lux Show* with Rosemary Clooney, *Truth or Consequences* and *The Price Is Right*, and CBS-TV's *Eve Arden Show*; Gillette's Paper Mate pens (NBC-TV's *Cavalcade of Sports* and *You Bet Your Life*); Armour & Co., which dropped out of George Gobel, picked up participations for Dial Soap on NBC-TV's *It Could Be You* and CBS-TV's *The Big Record*; Kleenex on *Perry Como Show* on NBC-TV and *Playhouse 90* on CBS-TV; S. C. Johnson's wax on *Red Skelton Show* on CBS-TV; Hallmark Cards on its NBC-TV specials and Purex Ltd., together with Edward H. Weiss Co., on CBS-TV's *Perry Mason* and *Beat the Clock*.

WILLIAM ESTY: Combined tv-radio billing \$36 million; \$32 million in television (\$28 million in network, \$4 million in spot); \$4 million in radio (\$1.5 million in network, \$2.5 million in spot); tv-radio share of overall billing: 50%.

At William Esty & Co. the billing picture centered on its big account—R. J. Reynolds Tobacco Co. Reynolds, for example, was represented in these network shows: *Bob Cummings Show* and *People Are Funny* on NBC-TV; *Harbourmaster* (alternating weeks), *I've Got a Secret*, *Mr. Adams & Eve* and *Phil Silvers Show*, all CBS-TV.

Among its top spot advertisers were Thomas Leeming-Pacquin (radio spot), P. Ballantine & Sons (*Highway Patrol* in regional markets) and National Carbon Co. (Prestone antifreeze and Eveready flashlight batteries). Prestone also participated in a battery of network tv shows during October only and had a very active spot campaign in radio. Eveready is a heavy spot radio advertiser. The agency lost Colgate's Vel and Fab to Lennen & Newell and Ted Bates Inc., respectively.

KENYON & ECKHARDT: Combined tv-radio billing \$31.5 million; \$24.7 million in television (\$19 million in network, \$5.7 million in spot); \$6.8 million in radio (\$0.8 million in network, \$6 million in spot); tv-radio share of overall billing: 55%.

K & E dropped \$4.1 million in combined tv-radio billing under the 1956 total. Figuring significantly in the dip was the loss of the Warner-Lambert account, which sponsored *Your Hit Parade* on NBC-TV, to SSC&B and Norman, Craig & Kummel. K & E's network programming in 1957 included: *Perry Como Show*, *Tic Tac Dough*, *The Price Is Right* and *The George Gobel Show* on NBC-TV for RCA Whirlpool; *Rin Tin Tin* on ABC-TV for National Biscuit, and the *Ed Sullivan Show* on CBS-TV for Mercury. The agency also placed large spot schedules for Mercury, Ford and Lever Bros. among others.

N. W. AYER & SON: Combined tv-radio billing \$31 million; \$20 million in television (\$10 million in network, \$10 million in spot); \$11 million in radio (\$2 million in network, \$9 million in spot); tv-radio share of overall billing: 25%.

Ayer upped its billing by \$3 million from 1956's \$28 million by acquiring all food divisions of Armour & Co. (spot business plus CBS-TV's *Arthur Godfrey Time*) as well as the Corning Glass Works (Pyrex) and several new divisions of Johnson & Johnson, which brought spot tv-radio business to the agency. The gains were accomplished even though Ayer lost Bissell Carpet Sweeper to Leo Burnett and Hawaiian Pineapple to Foote, Cone & Belding.

Bell Telephone remained active through *Telephone Time* on CBS-TV, *Bell Telephone Hour* on NBC Radio and occasional science-education programs on CBS-TV. Philip Morris added to the network total with *Mike Wallace Show* on ABC-TV and *Suspicion* on NBC-TV and at year's end Plymouth agreed to sign as a sponsor of the *Bob Hope Show*. Active spot advertisers during the year were Gordon Baking, Hill Bros., Ohio Oil, Atlantic Refining, B-C Remedy and Howard Johnson restaurants.

SULLIVAN, STAUFFER, COLWELL & BAYLES: Combined tv-radio billing \$26.7 million; \$21.4 million in television (\$16.6 million in network, \$4.8 million in spot); \$5.3 million in radio (\$0.8 million in network, \$4.5 million in spot); tv-radio share of overall billing: 65%.

SSC&B in 1957 scored a gain of \$2.2 million over last year's billing. Accounting chiefly for the advance was the capture of four new clients during the year: Duffy-Mott from Young & Rubicam, Warner-Lambert from Kenyon & Eckhardt, Lever Bros.' Breeze from BBDO and Salada Tea from Hermon W. Stevens Agency.

The agency's 1957 network activity included: *Tales of Wells Fargo* and *M Squad*, both on NBC-TV for American Tobacco; *Restless Gun* and *Tic Tac Dough* on NBC-TV for Warner-Lambert; *Perry Como Show* on NBC-TV for Noxzema, and *West Point* on ABC-TV for Carter Products.

SSC&B continued actively in spot for Smith Bros., Carter Products, Lever Bros. and American Tobacco, among others.

CAMPBELL-EWALD: Combined tv-radio billing \$25 million; \$21 million in television (\$18 million in network, \$3 million in spot); \$4 million in radio (\$1.5 million in network, \$2.5 million in spot); tv-radio share of overall billing: 27%.

Campbell-Ewald's upward climb in broadcast business was a reflection, in large measure, of the stepping-up of the *Chevy Show* (with Dinah Shore three weeks out of four) to a weekly schedule on NBC-TV from its twice-a-month presentation in 1956. In addition, Chevrolet dropped *Crossroads* on ABC-TV but substituted the more costly *Pat Boone Chevy Showroom* on the same network. Another additional network tv effort this year—for GM's Delco-Remy and other divisions serviced by C-E—was the CBS-TV *High Adventure* one-hour program featuring Lowell Thomas. Chevrolet also continued its sponsorship of a CBS Radio news schedule on weekends.

Campbell-Ewald resigned the Flagg shoes account which had been active in spot, but acquired certain divisions of Kroger Co. (grocery chain), which sponsored half-hour programs in local markets. Goebel beer was a substantial tv-radio spot advertiser of professional baseball and football games.

LENNEN & NEWELL: Combined tv-radio billing \$24.5 million; \$21.1 million in television (\$17.1 million in network, \$4 million in spot); \$3.4 million in radio (\$0.5 million in network, \$2.9 million in spot); tv-radio share of overall billing: 54%.

Up \$3.5 million in broadcast billing over 1956, L&N scored with a rash of new broadcast accounts. Among them: consolidated P. Lorillard tobacco account (Kent and Newport) from Young & Rubicam, Gunther Brewing from SSC&B, Cinzano Inc. from Burke Dowling Adams and Colgate-Palmolive's Vel from William Esty. Emerson Drug Div., Warner-Lambert Pharmaceutical (Bromo-Seltzer), and Lorillard (Old Gold) took on a 130-station lineup of NTA Film Network for *Premiere Performances*. C-P,

for Vel and Lustre-Creme, picked up CBS-TV's *Mr. Adams & Eve*; American Gas Assn. picked up part of CBS-TV's *Playhouse 90*, and with the Lorillard consolidation, Old Gold bought NBC-TV's *Court of Last Resort* and CBS Television Film's *Assignment: Foreign Legion*. L&N also got alternate-week billing for Kent on CBS-TV's \$64,000 *Challenge*. Heavy spot users were Dromedary Div., National Biscuit; American Airlines; Benrus Watch; Consolidated Cigar; Stokely-Van Camp foods and Gunther Brewing.

CUNNINGHAM & WALSH: Combined tv-radio billing \$17 million; \$10 million in television (\$2.2 million in network, \$7.8 million in spot); \$7 million in radio (\$2 million in network; \$5 million in spot); tv-radio share of overall billing: 35%.

Although the last Chesterfield billing at C & W ended in 1956 (the account went to McCann-Erickson), the agency managed to increase its tv-radio billing about \$2.5 million.

Texas Co. (Texaco), which C&W started billing in 1957, was in spot radio and tv and also sponsored its *Command Performances* specials on NBC-TV. Another advertiser new to network tv was Sunshine Biscuit (*Garry Moore Show* and *Beat the Clock*, both CBS-TV). New accounts included American Cyanamid (spot user) and Colgate-Palmolive's Brisk, which was added to C&W's handling of Colgate's Super Suds. Among other big spot-spending accounts were Sunshine, Folger coffee, Chase Manhattan Bank, Narragansett Brewing and the *New York Daily News*.

CAMPBELL-MITHUN: Combined tv-radio billing \$16.8 million; \$15.3 million in television (\$9.8 million in network, \$5.5 million in spot); \$1.5 million in radio (\$0.5 million in network, \$1 million in spot); tv-radio share of overall billing: 48%.

Campbell-Mithun upped its billing in 1957 by \$2.8 million, assisted in part by addition of several divisions of Kroger Co. (grocery store chain). Its leading tv network advertisers were Pillsbury Mills, which sponsored Thursday segments of daytime serials including *As the World Turns*, *Edge of Night* and *Art Linkletter's House Party* on CBS-TV; the Gold Seal Co. for alternate weeks of *I Love Lucy* re-runs on CBS-TV; Hamm Brewing Co. for *Person to Person* on CBS-TV in the West and Midwest, and American Dairy Assn. for one-third sponsorship of the *Perry Como Show* on NBC-TV.

In network radio, Northwest Airlines was active in participation on NBC Radio's *Monitor* and American Dairy Assn. on various NBC participating shows. Prominent spot tv-radio advertisers included Hamm Brewing, Gold Seal, Malt-O-Meal Co., (cereals), Ballard Flour Co., Kroger Grocery, John Morrell Co. (Red Heart dog food), Top Value Stamps (trading stamps), McCormick spices, Armstrong Rubber Co. and Chicopee Mills.

MAXON: Combined tv-radio billing \$16.8 million; \$15.8 million in television (\$13.8 million in network, \$2 million in spot); \$1 million in radio (\$0.7 million in network, \$0.3 million in spot); tv-radio share of overall billing: 60%.

Maxon picked up in tv billings—about \$2.8 million, representing the first combined broadcast billing increase at the agency in more than two years. Active broadcast clients at Maxon included Gillette in both tv-radio sports events (*Cavalcade of Sports* on NBC-TV and NBC Radio, etc.); General Electric with *Cheyenne* on ABC-TV; Heinz

Top 50 Agencies CONTINUED

57 foods (*Captain Gallant* on NBC-TV and *Studio 57* tv film series in regional markets), and Pittsburgh Paint (*Garry Moore Show* on CBS-TV). Pittsburgh Paint was new to network tv. New accounts were Charles E. Hires, active in spot tv, and Climaline Co., active in tv-radio spot.

GRANT ADV.: Combined tv-radio billing \$16 million; \$13 million in tv (\$10 million in network, \$3 million in spot); \$3 million in radio (\$0.2 million in network, \$2.8 million in spot); tv-radio share of overall billing: 22%.

Grant broadcast business was up \$2 million over 1956, attributed largely to a bigger lineup of stations for the Chrysler Corp. sponsorship of the *Lawrence Welk Show* and *Top Tunes and New Talent*, both on ABC-TV, and an accompanying accentuated spot tv-radio drive for the Dodge Motors and Plymouth Divisions, which were advertised on the network shows. Plymouth also sponsored *A Date With the Angels*. Grant placed Tilford Toiletries on NBC-TV's *Queen for a Day* for participations on alternate weeks. Active spot advertisers were Dodge, Plymouth and the Florists' Telegraph Delivery Assn.

GREY ADV.: Combined tv-radio billing \$15.4 million; \$14.4 million in television (\$7 million in network, \$7.4 million in spot); \$1 million in radio (\$0.2 million in network, \$0.8 million in spot); tv-radio share of overall billing: 30%.

Grey bettered by \$4.4 million its 1956 broadcast billing. New business included Chunky Chocolates, Procter & Gamble's Pin It, Block Drug's Denturcream, Mennen Electric Preshave, Greyhound Corp. and Ronson shaver and appliances. The agency lost no accounts during the year.

Highlights of Grey's broadcast action in 1957: *Steve Allen Show* on NBC-TV for Greyhound; *West Point* on ABC-TV and *Shirley Temple* on NTA Network, both for Van Heusen shirts; *Masquerade Party* on NBC-TV and *Broken Arrow* on ABC-TV for Five Day Deodorant; *Meet McGraw* and *People's Choice* on NBC-TV for Procter & Gamble, and specials on NBC-TV for Exquisite Form Brassieres.

PARKSON ADV.: Combined tv-radio billing \$15 million; \$14.5 million in television (\$13.5 million in network, \$1 million in spot); \$0.5 million in radio (all spot); tv-radio share of overall billing: 95%.

Parkson Adv., formed last August as an outgrowth of Edward Kletter Assoc., placed its billing primarily in network tv. Parkson added J. B. Williams to its Pharmaceuticals Inc. account. Both are associated with *Twenty One* and *What's It For?* on NBC-TV and *To Tell the Truth* on CBS-TV. Spot tv activity was chiefly on behalf of Williams' Kreml, Conti and Skol, while spot radio was used for a number of products.

ERWIN WASEY, RUTHRAUFF & RYAN: Combined tv-radio billing \$15 million; \$10 million in television (\$3 million in network, \$7 million in spot); \$5 million in radio (\$1 million in network, \$4 million in spot); tv-radio share of overall billing: 20%.

The merger of Erwin, Wasey and Ruthrauff & Ryan took place in 1957 with broadcast billing of \$15 million, the same total R & R alone achieved last year.

Gains for EWR&R in 1957 include American Cyanamid, Cellulose Products, Safeway Stores, KLM Airlines and Roots Motors. Lost in 1957: American Home Products, Carling Brewery, Hamilton Beach Appliances and Penn Salt Co.

Broadcast activity over the year: *Burns & Allen* for Carnation on NBC-TV, and Bon Ami spot and regional buys.

D'ARCY ADV.: Combined tv-radio billing \$14 million; \$8.5 million in television (\$5.5 million in network, \$3 million in spot); \$5.5 million in radio (all spot); tv-radio share of overall billing: 28%.

D'Arcy's billing remained the same as 1956 despite a \$2.5 million cut in television, which was offset by an addition of \$2.5 million in radio. The agency stepped up its spot radio activity for such clients as Gerber's Foods, Anheuser-Busch Brewing Co. (Budweiser Beer), Standard Oil of Indiana and General Tire & Rubber Co., which also were active in spot tv. The bulk of the agency's business in network tv was for Gerber's, which used such CBS-TV daytime programs as *Captain Kangaroo* and *Garry Moore* and the early-evening *Beat the Clock*, also on CBS-TV. Patterson-Sargent (paints) used participations in *Today* on NBC-TV.

NEEDHAM, LOUIS & BROBBY: Combined tv-radio billing \$14 million; \$11.8 million in television (\$8.8 million in network, \$3 million in spot); \$2.2 million in radio (\$0.2 million in network, \$2 million in spot); tv-radio share of overall billing: 43%.

NL&B's gain was \$2 million. Its network shows included S. C. Johnson & Son on *Steve Allen* (NBC-TV), State Farm Insurance on *Red Barber's Corner* (NBC-TV) and Quaker Oats on *Jane Wyman Show* (NBC-TV).

GEOFFREY WADE ADV.: Combined tv-radio billing \$12.8 million; \$11.8 million in television (\$6.8 million in network, \$5 million in spot); \$1 million in radio (\$0.5 million in network, \$0.5 million in spot); tv-radio share of overall billing: 85%.

Wade's combined tv-radio billing showed a higher level for the first time in four years, the billing increasing \$1.8 million above 1956. But the agency continued the shift from radio to television (from \$2 million last year in radio to \$1 million this year). In network tv, Miles Labs was active in *Wednesday Night Fights* and *Broken Arrow* on ABC-TV and in daytime shows on NBC-TV. Also in the daytime programs (five in all) was Alberto-Culver Co.

TATHAM-LAIRD: Combined tv-radio billing \$11.2 million; \$11 million in television (\$10 million in network, \$1 million in spot); \$0.2 million in radio (all spot); tv-radio share of overall billing: 48%.

Broadcast billings at the agency dipped \$2.6 million from 1956, resulting largely from a decrease in spot spending. Network clients, who bought shared sponsorship or participations on a host of tv programs, included the Toni Co., Armour & Co., Wander Co. (Ovaltine), General Mills, Campbell Soup and Procter & Gamble. Spot advertisers were Campbell Soup, General Mills, Parker Pen, Wander Co., Toni and Procter & Gamble.

NORTH ADV.: Combined tv-radio billing \$11 million; \$10.5 million in television (\$8.4 million in network, \$2.1 million in spot); \$0.5 million in radio (all network); tv-radio share of overall billing: 88%.

North Adv. completed its second year of operation with a broadcast total of \$11 million, exceeding its 1956 total by \$2 million. Its billing reflects largely the Toni (Div. of Gillette Co.) account, which sponsored on alternate weeks *You Bet Your Life* and *People Are Funny* on NBC-TV and *Arthur Godfrey's Talent Scouts* on CBS-TV. Toni and Lanvin perfumes used various network radio shows for the summer only. A substantial spot tv advertiser during the year was Jewel Food Stores.

GARDNER ADV.: Combined tv-radio billing \$10.4 million; \$8.3 million in television (\$5.3 million in network, \$3 million in spot); \$2.1 million in radio (\$1 million in network, \$1.1 million in spot); tv-radio share of overall billing: 48%.

One account gained, none lost, was Gardner's record for 1957. From Benton & Bowles, Gardner gained Grove Labs' Bromo-Quinine, a heavy NBC Radio *Monitor* client. Monsanto, last in tv for "All" detergents (which was sold this past spring to Lever Bros.) and starehes, took a corporate plunge into network tv with a \$2 million CBS-TV *Conquest* project to last two years. Pet Milk co-sponsored Red Skelton's CBS-TV program, participated on that network's *Edge of Night* serial and was an advertiser on NBC Radio's *Grand Ole Opry*. Purina Dog Chow co-sponsored, with Miles Labs, ABC-TV's *Broken Arrow*, and Procter & Gamble's Duncan Hines Foods began testing spot tv late in the year. Anheuser-Busch's Busch-Bavarian beer again sponsored regional simulcasts of St. Louis Cardinals' home games.

NORMAN, CRAIG & KUMMEL: Combined tv-radio billing \$10.3 million; \$8 million in television (\$6 million in network, \$2 million in spot); \$2.3 million in radio (all in spot); tv-radio share of overall billing: 30%.

NC&K increased its billing \$700,000 over last year's tally. The agency acquired the Pabst Blue Ribbon account and suffered no losses in its client list. Action in 1957 included placement of Ronson Products in NBC-TV news shows; purchase of *Price Is Right* on NBC-TV for Spiedel; sponsorship of *Restless Gun* on NBC-TV for Warner-Lambert, and *Maverick* on ABC-TV for Willys Trucks. Warner-Lambert also is represented on *Tic Tac Dough* on NBC-TV.

DOHERTY, CLIFFORD, STEERS & SHENFIELD: Combined tv-radio billing \$10 million; \$9.1 million in television (\$7.5 million in network, \$1.6 million in spot); \$0.9 million in radio (all in spot); tv-radio share of overall billing: 50%.

A gain of \$3.3 million in billing in 1957 can be explained largely by increased use of network tv by Bristol-Myers, which shared sponsorship on a host of programs, including *Mickey Mouse Club* and *Tombstone Territory* on ABC-TV, *NCAA Football Game of the Week* on NBC-TV and *Playhouse 90* and *Alfred Hitchcock Presents* on CBS-TV. Bristol-Myers also was a frequent user of participations in NBC-TV's *Tonight*. Pharmaco Inc. utilized daytime network tv with sponsorship of *It Could Be You* and *Comedy Time* on NBC-TV. Spot tv-radio clients were McCormick & Co. (spices), Fulham Bros. (frozen foods) and Borden Co.

KUDNER AGENCY: Combined tv-radio billing \$10 million; \$7 million in television (\$6.5 million in network, \$0.5 million in spot); \$3 million in radio (\$0.3 million in network, \$2.7 million in spot); tv-radio share of overall billing: 35%.

Continued drop in tv-radio billing for Kudner in 1957, following a dip in 1956 from 1955, was attributed mainly to the loss of the Texaco account at the beginning of the year to Cunningham & Walsh and a reduction in activity for several General Motors accounts. Radio-conscious Texaco had been a sponsor of ABC Metropolitan Opera broadcasts, regional sports shows and news programs, but in 1957 Kudner's only billing in radio came from limited spot campaigns for several General Motors products. Kudner's broadcast business was overwhelmingly in network tv during the year, coming from the Fridgaire and Buick alternate week sponsorship of the *Patrice Munsel Show* on

Top 50 Agencies CONTINUED

ABC-TV, Buick's alternate week sponsorship of *Wells Fargo* on NBC-TV and General Motors' special two-hour program on NBC-TV Nov. 17.

BRYAN HOUSTON: Combined tv-radio billing \$9 million; \$8.3 million in television (\$6.3 million in network, \$2 million in spot); \$0.7 million in radio (all spot); tv-radio share of overall billing: 48%.

Bryan Houston was off nearly \$2 million in tv-radio billing in 1957 compared to 1956, the decrease showing up in both tv and radio. Among its network tv sponsors: Nestle in *Beat the Clock* and *Gale Storm Show* on CBS-TV, Colgate-Palmolive in *The Big Pay-off* on CBS-TV.

EDWARD H. WEISS CO.: Combined tv-radio billing \$8.3 million; \$8 million in television (\$7.2 million in network, \$0.8 million in spot); \$0.3 million in radio (all spot); tv-radio share of total billing: 45%.

Making its debut among the top 50, Weiss in 1957 experienced some shuffling in the Helene Curtis account structure, lost Lenthieric (which it gained last year from Grant) to Gordon Best, but gained Stopette from Earle Ludgin & Co. Curtis enlarged its network buys, adding to CBS-TV's *What's My Line?* the *Gale Storm Show* and alternate sponsorship of *Dick and the Duchess* (with Mogen David and Key wines). Key wine also participated in CBS-TV's *Beat the Clock*. Purex Ltd. picked up part of CBS-TV's *Perry Mason* series with Libby-Owens-Ford. Spot users included Corina Cigars, College Inn foods, Curtis' Ender shampoo, Perk dog food and the H. W. Gossard Co. (foundations), which went into spot this month after dropping out of NBC-TV's *Queen for a Day*. Weiss lost the \$1.3 million Sealy Mattress account. Weiss added Carling Brewing Co. from the former Erwin, Wasey, Chicago, and has placed Carling in sports shows.

FULLER & SMITH & ROSS: Combined tv-radio billing \$8.2 million; \$7 million in television (\$6.5 million in network, \$0.5 million in spot); \$1.2 million in radio (\$1 million in network, \$0.2 million in spot); tv radio share of overall billing: 24%.

F&S&R billing in tv and radio totaled \$8.2 million for 1957. The agency placed Libby-Owens-Ford Glass Co. in network television—*Perry Mason* on CBS-TV and football games on NBC-TV—for the first time this year. Alcoa sponsored *Alcoa Theatre* on NBC-TV. New accounts gained during the year: Pan American and Sterling Silver, both spot advertisers.

EMIL MOGUL CO.: Combined tv-radio billing \$8 million; \$5.9 million in television (\$3.2 million in network, \$2.7 million in spot); \$2.1 million in radio (all spot); tv-radio share of overall billing: 75%.

Mogul made no drastic strides forward in billing increase, but continued to fatten on accounts already in the shop. Although the biggest setback was the mid-summer loss of Monarch Wine Co. (Manischewitz) to Lawrence C. Gumbinner, it continued to prosper on Revlon. With approximately \$3 million worth of Revlon, Mogul introduced Top Brass (men's line) on the West Coast and gained Aquamarine as a new Revlon product; it also shared on commercial commissions on both CBS-TV *Question* quiz programs but lost out on Revlon's proposed ABC-TV *Guy Mitchell Show* on which it was to have been the agency of record. Mogul gained new broadcast accounts in Dr. Pierce's Proprietarys, Barracini candies and Bakers Franchise (Lite Diet bread). Ron-

zoni went in for syndicated tv film properties. Rayco enlarged its spot buys and Knomark Mfg. Co. (Esquire polishes) returned to NBC-TV on the *Perry Como Show*. Park & Tilford bought into the network's *Queen for a Day*. P&T expanded its toiletries but assigned the new products to Grant Adv. because of possible product conflict with Revlon at Mogul.

DONAHUE & COE: Combined tv-radio billing \$7.7 million; \$5.9 million in television (all spot); \$1.8 million in radio (all spot); tv-radio share of overall billing: 25%.

Making its debut among the top 50 agencies with a total tv-radio billing of \$7.7 million, Donahue & Co. gained several new accounts during the year. Among them: \$2 million worth of B. T. Babbitt Co. billing (Bab-O, Acme, Am-O, Cameo copper cleaner) from Dancer-Fitzgerald-Sample and Cohen & Aleshire, Pearson Pharmaceutical Co.'s Eye-Gene from Al Paul Lefton Co. and Chemway Corp.'s Lady Esther face creams and powders from D-F-S, Chicago. (D&C already serviced Chemway's Dunbar Labs and Pearson's Ennds and Sakrin when the new products were assigned.) No D&C advertiser spent money in network, but spot activity was considerable; it included Corn Products Refining Co.'s Bosco, which hit the western trail in 57 markets with CBS Tv Film Sales' *Annie Oakley*; Corn Products' Kasco dog food, spot announcements; E. F. Drew & Co.'s Tri-Nut margarine, tv spot; Loew's Inc. and Columbia Pictures Corp., radio-tv spot; Scholl Mfg. Co., radio spot, and Scripto Inc., tv spot.

MACMANUS, JOHN & ADAMS: Combined tv-radio billing \$7.7 million; \$5.6 million in television (\$3.8 million in network, \$1.8 million in spot); \$2.1 million in radio (\$0.7 million in network, \$1.4 million in spot); tv-radio share of overall billing: 19%.

MJ&A in 1957 increased its radio business, primarily for Pontiac, Dow Chemical Co. (Saran Wrap), and the New York accounts, such as S. B. Thomas bread. Medaglia d'Oro coffee, Good Humor Corp. and White Rock Corp. MJ&A inherited from Kudner Agency \$5.5 million worth of General Motors institutional tv billing for *Wide Wide World* (NBC-TV). Other network advertisers: Minnesota Mining & Mfg. Co. (new Scotchard stain repellent), using eight NBC-TV daytime shows for Christmas promotion; Pontiac Motors Div. of GM re-entered network tv with "specials" such as *Annie Get Your Gun* and radio sports coverage; Noxzema in *Perry Como Show* as well as NBC Radio's *Red Foley Show*; Dow Chemical in CBS-TV's *Garry Moore Show*, and Cadillac Motor Car Div., GM, which stepped up its radio network schedule. Big spot buyers: Good Humor, S. S. Kresge, Squirt Bottling, Minnesota Mining, White Rock and Pontiac.

KEYES, MADDEN & JONES: Combined tv-radio billing \$7.4 million; \$6.6 million in television (\$4.5 million in network tv, \$2.1 million in spot); \$0.8 million in radio (all spot); tv-radio share of overall billing: 49%.

Known until early fall as Russel M. Seeds Co., KM&J was formed by International Latex and former NBC executive Ed Madden, Grant Adv.'s Howard Jones and Seeds' President Freeman Keyes. The Seeds account structure was retained intact, except for the loss earlier in the year of the Lanolin Plus account to Kastor, Farrell, Chesley & Clifford. It gained several small broadcast accounts from Joseph Katz Co., New York-Baltimore along with that agency's vice president-general manager, David Hale

Halpern. W. A. Sheaffer Pen Co. signed for the *Lucy* re-runs on CBS-TV, and Brown & Williamson Tobacco, in addition to spot, bought participations for Raleigh cigarettes on NBC-TV's *It Could Be You* and *Queen for a Day*. Spot buyers included Pinex Co. and Tastee-Freeze Corp. of America.

GORDON BEST: Combined tv-radio billing \$7.3 million; \$6 million in tv (\$3.5 million in network, \$2.5 million in spot); \$1.3 million in radio (\$0.8 million in network, \$0.5 million in spot); tv-radio share of overall billing: 60%.

This was Gordon Best's first year among the top 50 agencies. New accounts included Comstock Foods, Lenthieric Lines, Curtis Pharmacal and Mystic Foam and Mystic Clean. The agency's network shows included *Dick and the Duchess* on NBC-TV for Helene Curtis and special events for Maybelline on both NBC-TV and CBS-TV.

GUILD, BASCOM & BONFIGLI: Combined tv-radio billing \$6.9 million; \$5.3 million in television (\$3.8 million in network, \$1.5 million in spot), \$1.6 million in radio (\$0.4 million in network, \$1.2 million in spot); tv-radio share of overall billing: 70%.

GB&B pushed into recognition with an imposing roster of acquisitions. New products included: Breast O' Chicken tuna, Best Foods' Nucoa, Heidelberg beer, Mary Ellen's jams and jelly and Max Factor cosmetics. The agency gave up one regional account, Regal Pale beer. The firm placed *You Asked for It* for Best Foods and *Bold Journey* for Skippy peanut butter, both on ABC-TV. In addition GB&B has placed spot campaigns for Nucoa and Breast O' Chicken tuna, among others.

COHEN & ALESHIRE: Combined tv-radio billing \$6.6 million; \$5.1 million in television (\$0.5 million in network, \$4.6 million in spot); \$1.5 million in radio (\$0.5 million in network, \$1 million in spot); tv-radio share of overall billing: 80%.

During the year, C&A lost Babbitt Co. and Doeskin Products accounts but picked up Dormin Inc. and Edro Products, among others, while handling a new Grove Labs product—4-Way liquid. The agency during the year changed its name from Harry B. Cohen Adv. to Cohen & Aleshire Inc. and also gained \$1.1 million over 1956. Grove Labs is the primary network sponsor at C&A, although it also is heavy in spot. Among shows: CBS Radio's "Impact" package and NBC Radio's *Monitor*; in tv, *Panorama Pacific* on CPTN and *Today* on NBC-TV.

DOYLE DANE BERNBACH: Combined tv-radio billing \$6.5 million; \$6.1 million in television (\$3.9 million in network, \$2.2 million in spot); \$0.4 million in radio (all spot); tv-radio share of overall billing: 32%.

DDB entered the ranks of top broadcast agencies for the first time in 1957 with several network placements. Chemstrand Corp. made its first network buys with NBC-TV's *Sally* and segments of that network's *Steve Allen Show*; Polaroid Land cameras continued participations in NBC-TV's *Tonight* and *Steve Allen*, while Max Factor of Hollywood dropped co-sponsorship of NBC-TV's *Panic* and continued on Polly Bergen and Dean Martin programs.

E. & J. Gallo Winery, heretofore spot tv only, entered tv film syndication sponsorship nationally. Dreyfus & Co. made its tv debut as an investment banking house. DDB picked up the Glim portion of the B. T. Babbitt account, began heavy radio spot and planned tv spot.

DDB also picked up American Export

Lines from Cunningham & Walsh, retaining it on local radio and entering AEL in local tv via WBAL-TV Baltimore and WTTG (TV) Washington. McCall Corp. began using more spot radio. Among other spot radio users: A. Goodman & Sons, Barton's, Henry S. Levy Sons and Fairmont Foods; tv spot: Venus Pen & Pencil and Gallo.

OGILVY, BENSON & MATHER: Combined tv-radio billing \$6.4 million; \$4 million in television (\$2.1 million in spot, \$1.9 million in network); \$2.4 million in radio (all spot); tv-radio share of overall billing: 38%.

OB&M experienced a "growth year" in 1957 as more of its advertisers expanded broadcast use and as Philip Morris' new menthol Spud cigarettes and Lever Bros.' Dove soap made their debuts. Network-wise, ODM shared billboard space and commissions for Lever on CBS-TV's *Art Linkletter's House Party* (Good Luck margarine), *Sir Lancelot*, *Private Secretary* re-runs and that program's fall substitution, *The Eve Arden Show*.

For Armstrong Cork Co.'s ceilings, OB&M sat in every third week on CBS-TV's *Armstrong Circle Theatre*. It resigned spot user Diamond Crystal Salt in summer, but expanded radio spot lineups (regionally) for Pepperidge Farm bread and Tetley tea. Nationally, Thom McAn shoes went after teenagers with d.j. shows and Schweppes USA Ltd. enlarged both tv-radio spot campaigns in major markets.

WARWICK & LEGLER: Combined tv-radio billing \$6.2 million; \$3.7 million in television (\$3 million in network, \$0.7 million in spot); \$2.5 million in radio (\$2.3 million in network, \$0.2 million in spot); tv-radio share of overall billing: 40%.

W&L closed out the year with more or less the same billing as in 1956, its gains for 1957 registering on par with its calendar-year losses. While it gained in excess of \$5 million worth of Revlon business from BBDO, only a very small part of the billing showed up last year; it lost \$5 million worth of Schick Inc. business in mid-year, but only about half of Schick billing was registered up to the time this account left for Benton & Bowles. With Revlon, it was agency of record on both CBS-TV \$64,000 quizzes and partook in C. J. La Roche's *Walter Winchell File* (ABC-TV). It lost \$200,000 worth of George W. Luff Co. (Tangee lipstick) business to Calkins & Holden but gained an additional \$1 million Seagram business (non-broadcast). Ex-Lax expanded its use of radio and Jacob Ruppert Brewery sponsored simulcasts of the New York baseball home games of the Giants.

D. P. BROTHER: Combined tv-radio billing \$6.2 million; \$6 million in television (\$5.5 million in network, \$0.5 million in spot); \$0.2 million in radio (all spot); tv-radio share of overall billing: 21%.

D. P. Brother showed up in the top 50 agencies for the first time with a combined tv-radio billing of \$6.2 million. Network activity for its clients included: A. C. Spark-plug's *Wide World* on NBC-TV and Oldsmobile's NBC-TV *Color Carnival*, two political conventions on NBC-TV and Sugar-howl football coverage on ABC-TV.

EARLE LUDGIN: Combined tv-radio billing \$6 million; \$5 million in television (\$3 million in network, \$2 million in spot); \$1 million in radio (all spot); tv-radio share of overall billing: 46%.

Earle Ludgin dropped \$1 million in combined tv-radio billing under the 1956 figure. The agency lost Helene Curtis to Gordon Best, Edward H. Weiss and McCann-Erickson and gained Tidy House products from

McCann-Erickson. Ludgin had portions of *Dick and the Duchess* and *What's My Line?* for Helene Curtis, both on CBS-TV, for a portion of the year.

GEYER ADV.: Combined tv-radio billing \$5.5 million; \$4 million in television (\$3 million in network, \$1 million in spot); \$1.5 million in radio (\$0.5 million in network, \$1 million in spot); tv-radio share of overall billing: 30%.

Geyer dropped \$2.5 million under its 1956 total. With the cancellation of ABC-TV's *Disneyland*, American Motors Corp. began pouring more allocations into network radio but did not compensate for its previous tv expenditures. American Home Products Corp. (Boyle-Midway and American Home Foods Divs.) picked up some network show-casing with CBS-TV's *Have Gun, Will Travel*, NBC-TV's *Tic Tac Dough* and some daytime serials. It resigned Paul Masson vineyards (an occasional broadcast user) and gained Doyle Packing Co. (New Jersey), which it promptly placed in spot throughout the East.

FITZGERALD ADV.: Combined tv-radio billing \$5.3 million; \$4.8 million in television (\$2.8 million in network, \$2 million in spot); \$0.5 million in radio (all spot); tv-radio share of overall billing: 35%.

Fitzgerald Adv. appeared among the first 50 agencies for the first time with a combined \$5.3 million in television and radio. The agency had Wesson Oil on *Caesar's Hour* on NBC-TV for the first part of the year. Fitzgerald also placed the following accounts in tv and radio spots: Jackson Brewing Co., Snowdrift Div. of Wesson Oil, Louisiana State Rice, Blue Plate Foods, Louisiana Coca-Cola, Pioneer Flour Mills and Austex.

RAYMOND SPECTOR: Broadcast billing \$5 million, all in television (\$4.7 million in network, \$0.3 million in spot); tv share of overall billing: 95%.

Spector, agency for Hazel Bishop, dropped \$600,000 under its 1956 billing. The cosmetic firm was represented over the year on *M Squad*, *Jane Wuman Show* and *Ted Mack Amateur Hour*, all on NBC-TV. END

Advertising Agencies Handling Radio and/or Television Accounts

A

Ackerman Assoc. Inc. Classen Terrace Bldg., Oklahoma City, Trinity 8-2113.

SEVENTH-DAY ADVENTIST INFORMATION SERVICES

The Seventh-day Adventist Church is a conservative Christian body of Protestant origins. It has a trained public relations staff with contacts in 185 countries—available to aid you with many types of information:

FEATURES

- Personalities at home and abroad**
Human-interest stories of doctors, educators, technicians, missionaries, laymen.
- Aid to underprivileged**
Orphanages, leper colonies, disaster aid, hospitals, air and amphibious services.
- World understanding**
Citizens of 185 lands, united in one faith, who call themselves brothers.
- Youth**
A program of guidance, recreation, centered in home, church and school.
A complete school system with an "earn while you learn" vocational plan.
- Health**
Advanced principles of personal health officially promoted by the church.

ISSUES

- Support for separation of church and state, rights of noncombatants. Protection of individual conscience. Duties of citizenship.
- Opposition to government aid for religious purposes, to enforcement of Sunday observance, to religious instruction in public schools.

FAITH AND PRACTICE

- Hope for the future based on belief in Christ's literal return.
- Current events in the framework of scriptural prophecy.
- Basis for church unity and cooperation; chances for world unity.
- Health education; history of Adventist influence on American medicine.
- Alcoholism; total abstinence.
- Fundamentalism and scholarship; creation and evolution; space science.

PRESS BOOK. Complete background information is available in an indexed, tabulated press book, giving details of Adventist history, practice and positions on current issues. For a free copy, write the Washington office listed below.

For further information about Seventh-day Adventists, contact public relations or administrative offices located in most of the major cities of the world, including the following:

- World headquarters:** Howard B. Weeks, Public Relations Director, General Conference of Seventh-day Adventists, 6840 Eastern Ave., Washington 12, D. C. Phone: RAndolph 3-0800.
- New York:** Helen F. Smith, N. Y. Center, 227 W. 46th St., N. Y. 36, N. Y. Phone: JUdson 6-2336.
- Atlanta:** Cecil Coffey, Box 849, Decatur, Ga. Telephone: DRake 3-3351.
- Los Angeles:** C. A. Olyphant, 1545 North Verdugo Road, Glendale. Telephone: CHapman 5-1047.
- Toronto:** Darren Michael, Box 396, Oshawa. Telephone: OShawa 3-3409.

GENERAL CONFERENCE OF SEVENTH-DAY ADVENTISTS
6840 Eastern Avenue, Washington 12, D. C.

U.S. Information Agency

Headquarters: 1776 Pennsylvania Ave., N.W., Washington, D. C. Republic 7-8340. George V. Allen, director; Abbott Washburn, deputy director; Eugene S. Staples, special assistant to the director; Richard G. Cushing, director, Office of Public Information; Henry Loomis, director, Broadcasting Service (Voice of America) (see below); Robert P. Speer, director, Press Service; Turner B. Shelton, director, Motion Picture Service; James L. Meader, director, Information Center Service; Conger Reynolds, director, Office of Private Cooperation; Seymour I. Nadler, director, Office of Research and Intelligence.

Voice of America

Health, Education & Welfare Bldg., 4th & Independence Ave., S.W., Washington, D. C. Republic 7-7500, Ext. 3363. Henry Loomis, director of broadcasting; Gordon A. Ewing, deputy director of broadcasting; Barry Zorthian, acting tv mgr; Edgar T. Martin, engineering mgr.

Voice of America Fact Sheet

The work of the Voice of America, a part of the U. S. Information Agency, is, in the words of President Eisenhower, "to submit evidence to the peoples of other nations . . . that the objectives and policies of the United States are in harmony with and will advance their legitimate aspirations for freedom, progress and peace." Equally the Voice exposes Soviet imperialism and the fraud of international communism, while combatting their anti-American slanders and lies.

Radio is the fastest, most effective day-by-day medium for achieving these objectives; it speaks directly to people abroad, instantaneously surmounting barriers of distance, censorship, illiteracy, foreign exchange, paper shortages and tariffs.

Facilities

The Voice has a network of 80 transmitters of which 30 are in the United States. These latter are shortwave stations, ranging in power from 25 thousand to 200 thousand watts, and operated under contract to VOA by private broadcasting companies. Government-owned or controlled relay stations are located at Munich, Saloniki, Tangier, Ceylon, Honolulu, the Philippines and Okinawa. These installations comprising short medium and longwave stations, include million-watt transmitters—the world's most powerful known broadcasting facilities—in the Philippines, Okinawa and Munich.

Relay facilities are also leased from BBC in England. Other relays or rebroadcasts are made through arrangements with local broadcasters of France, Italy, Germany, Austria, Switzerland, Trieste, Greece, Belgian Congo, Viet-Nam, Japan, Korea, the Philippines, Formosa and Latin America.

The Voice has a floating broadcasting station, the U. S. Coast Guard Cutter Courier, which uses high powered medium wave and

Voice of America CONTINUED

shortwave transmitters. The Courier provides VOA with a mobile and flexible relay station to meet the demands of the changing world situation and to combat Soviet jamming.

Program Content

Voice broadcasts consist of news, news analyses and features, which include political commentaries, press reviews, round-table discussions, documentaries and special events. Although the breakdown varies from area to area, the program content in general is balanced as follows: News: 50%; Analyses and Features: 50%.

Approximately 75% of VOA's total program effort is directed to the Iron Curtain countries and Communist China. In addition to direct shortwave programming, the Voice regularly broadcasts transcribed programs air shipped to its relay stations. Other transcribed programs, music recordings, script material, television kinescopes and films are also furnished to U. S. Information Service offices throughout the free world for local distribution and broadcast.

Audience Information

Programs are beamed to areas having a potential audience of over 400,000,000. Scientific surveys, letters from listeners, interviews with Iron Curtain defectors, efforts by the Communist press and radio to discredit the broadcasts, reports from United States missions, correspondents and travelers provide convincing evidence of a regular listening audience of many millions.

Operations Information

The Broadcasting Service is responsible for the planning, execution and content of programs. Programs are written, produced and broadcast from studios in Washington, D. C., Munich, Germany and Cairo.

Voice of America Daily Broadcasts

More than 85 separate programs, ranging up to two hours and amounting to about 108 broadcasting hours are broadcast via short-wave daily in 39 languages as follows:

The ABCs of radio and television

Even the most experienced radio and television executives would find it hard to answer all the questions of how these businesses came about, how they operate, what they consist of. This primer provides the answers. It was prepared by George O. Gillingham, FCC information chief.

HOW RADIO BEGAN

Radio communication was born of many minds and developments. In the 1860's, Maxwell predicted the existence of radio waves. Hertz later demonstrated that rapid variations of electric current can be projected into space in the form of waves similar to those of light and heat. In 1895, Marconi transmitted radio signals for a short distance and, at the turn of the century, conducted successful trans-Atlantic tests.

The first practical application of radio was for ship-to-ship and ship-to-shore telegraphic communication. Marine disasters early demonstrated the speed and effectiveness of radiotelegraphy for safeguarding life and property at sea.

This new communication medium was first known as "wireless." American use of the term "radio" is traced to about 1912 when the Navy, feeling that "wireless" was too inclusive, adopted the word "radiotelegraph." Though the British still cling to the older term, "radio" continues to be the American designation. The word "broadcast" likewise stems from early United States naval reference to "broadcast" of orders to the fleet.

There was some military radiotelephony in World War I—between ground and planes and ship and shore—but most early radio communication was confined to ships

at sea and to amateurs. The latter were highly instrumental in arousing popular interest in radio and otherwise contributing to its progress.

Broadcasting as we know it today was made possible largely by development of the vacuum tube by Fleming in 1904 and its improvement by De Forest in 1906.

The first voice broadcast is a subject for debate. Claims to that distinction range from "Hello, Rainey," said to have been sent by Stubblefield to a partner in a demonstration near Murray, Ky., in 1892, to an impromptu program from Brant Rock, Mass., by Fessenden in 1906, which was picked up by nearby ships.

There were other early experimental audio transmissions—such as De Forest putting Enrico Caruso on the air in 1910 and trans-Atlantic voice tests by the Navy station at Arlington, Va., in 1915—but it was not until after World War I that regular broadcasting began. But here, too, there is controversy. Some radio broadcasting stations developed from experimental operations going back to 1912. However, records of the Dept. of Commerce, which first supervised radio, show KDKA Pittsburgh as the first commercially licensed standard am (amplitude modulation) broadcast station, dating from November 1920.

There was experimental network operation over telephone lines as early as 1922. In that year WJZ Newark, N. J., and WGY Schenectady broadcast the World Series. Early in 1923 WEAJ New York and WNAC Boston picked up a football game from Chicago. Later that same year WEAJ and WGY were connected with KDKA Pittsburgh and KYW Chicago to carry talks made at a dinner in New York. President

Coolidge's message to Congress was broadcast by six stations in late 1923. In 1926 the National Broadcasting Co. started the first regular network with 24 stations. Its first coast-to-coast hookup, in 1927, broadcast a football game. In the latter year the Columbia Broadcasting System was organized. The first round-the-world broadcast was made from Schenectady in 1930. Today, thanks to telephone lines, coaxial cable, microwave and other relay facilities, it is possible to send the same program over many stations at the same time.

Fm (frequency modulation) and tv (television) broadcast emerged from their experimental stage just before World War II. Wartime restrictions retarded normal expansion of radio facilities but that emergency produced new techniques and apparatus which have invaluable peacetime application.

REGULATION OF BROADCASTING

There was a Wireless Ship Act of 1910 which applied to use of radio by ships, but the Radio Act of 1912 was the first domestic law for the control of radio in general. It made the then Secretary of Commerce & Labor responsible for licensing radio stations and operators.

Early broadcasting was experimental and, therefore, noncommercial. In 1919 broadcasters operated as "limited commercial stations." In 1922 the "wavelength" of 360 meters (approximately 830 kilocycles) was assigned for the transmission of "important news items, entertainment, lectures, sermons and similar matter."

Recommendations of the first National Radio Conference in 1922 resulted in further regulations by the Secretary of Com-

The ABCs of Radio and Television CONTINUED

merce. A new type of broadcast station came into being, with minimum power of 500 watts and maximum not to exceed 1,000 watts (1 kilowatt). Two frequencies (750 and 833 kilocycles) were assigned for program transmission.

So rapid was the development of aural broadcasting that, upon recommendation of subsequent National Radio Conferences (1923 and 1924), the Dept. of Commerce allocated 550 to 1500 kilocycles for standard broadcast (am being the only regular broadcast at that time), and authorized operating power up to 5,000 watts (5 kilowatts).

Increase in the number of am stations caused so much interference that, in 1925, a fourth National Radio Conference asked for a limitation on broadcast time and power. The Secretary of Commerce was unable to deal with the situation because court decisions held that the Radio Act of 1912 did not give him this authority. As a result, many broadcasters jumped their frequencies and increased their power and operating time at will, regardless of the effect on other stations. This caused bedlam on the air.

In 1926 President Coolidge urged Congress to remedy matters. The result was the Dill-White Radio Act of 1927.

Federal Radio Commission

The Radio Act of 1927 created a five-member Federal Radio Commission with certain regulatory powers over radio, including the issuance of station licenses, the allocation of frequency bands to various services, assignment of specified frequencies to individual stations and control of station power. The same act also delegated to the Secretary of Commerce authority to inspect radio stations, to examine and license radio operators and to assign radio call signals.

Much of the early efforts of the Federal Radio Commission were devoted to straightening out the confusion in the broadcast band. It was impossible to care for the 732 broadcast stations as then operating. New rules and regulations caused about 150 of them to surrender their licenses.

Communications Act of 1934

At the request of President Roosevelt, the Secretary of Commerce in 1933 appointed an interdepartmental committee to study the overall interstate and international electrical communications situation. The committee reported that "the communications service, as far as Congressional action is involved, should be regulated by a single body." Accordingly, it recommended the establishment of a new agency which would regulate all interstate and foreign communication by wire and radio, including telegraph, telephone and broadcast. The resultant Communications Act of 1934 created the present Federal Communications Commission for this unified regulation.

Federal Communications Commission

The Federal Communications Commission, an independent federal agency composed of seven commissioners appointed by the President, by and with the advice and consent of the Senate, began operating on July 1, 1934.

WHAT THE FCC DOES

One of the FCC's major activities is the general regulation of broadcasting—now visual as well as aural. This regulation, largely technical in nature, may be divided into two phases.

The first phase deals with the allocation of spectrum space to the different types of broadcast services in accordance with Commission policies and rules to carry out the intent of international agreements, the Communications Act and other domestic laws affecting broadcasting.

The second phase is concerned more directly with individual stations, and embraces consideration of applications to build and operate; the assignment of specific frequencies, power, time of operation and call letters; the periodic inspection of equipment and the engineering aspects of operation; passing upon transfers and assignments of facilities; also the many varied changes in existing authorizations; modifying and renewing construction permits and licenses; reviewing the general service of each particular station to determine whether it has been operating in the public interest; licensing radio operators, and otherwise discharging domestic regulatory responsibilities.

Broadcast stations are licensed to serve the public interest, convenience and necessity. Because radio channels are limited and are a part of the public domain, it is important that they be entrusted to licensees who have a high sense of public responsibility.

The Communications Act sets up certain basic requirements which must be met by broadcast applicants. In general, applicants must be legally, technically and financially qualified, and show that their proposed operation will be in the public interest.

The license privilege is limited by law to citizens of the United States. It is denied to corporations wherein any officer or director is an alien or of which more than one-fifth of the capital stock is owned or voted by aliens or their representatives or by any controlling foreign corporation or government or their representatives.

The Commission can issue cease and desist orders and institute revocation proceedings for violations of the act and its rules and regulations. The affected permittee or licensee is afforded opportunity to request a hearing.

Programs: Under the Communications Act it is the responsibility of each broadcast station licensee to arrange his program structure so that his operations will be in the public interest. Pursuant to duties imposed by the act, the Commission periodically reviews the overall performance of stations, usually when they apply for renewal of licenses, to determine whether they have lived up to their obligations and the promises they made in applying for facilities.

Censorship and free speech: This review of broadcast station performance does not, however, give the Commission authority to direct a station to put a particular program on or off the air. The Communications Act states: "Nothing in this Act shall be understood or construed to give the Commission the power of censorship over the radio communications or signals transmitted by any radio station, and no regulation or condition shall be promulgated or fixed by the Commission which shall interfere with the right of free speech by means of radio communication." The Commission has held that freedom of speech on the air must be broad enough to provide full and equal opportunity for the presentation of both sides of public issues. Under such conditions, licensees of broadcast stations have the right to editorialize.

Political broadcasts: The Communications Act (sec. 315) expressly provides: "If

any licensee shall permit any person who is a legally qualified candidate for any public office to use a broadcasting station, he shall afford equal opportunities to all other such candidates for that office in the use of such broadcasting station: Provided, that such licensee shall have no power of censorship over the material broadcast under the provisions of this section. No obligation is hereby imposed upon any licensee to allow the use of its station by any such candidate. The charges made for the use of any broadcasting station for any of the purposes set forth in this section shall not exceed the charges made for comparable use of such station for other purposes."

Lotteries, obscenity and fraud: The United States Criminal Code prohibits (1) broadcast of information concerning "any lottery, gift enterprise or similar scheme," (2) utterance of obscene, indecent or profane language, and (3) fraud by wire, radio or television.

Time charges and station management: The Communications Act declares that broadcasting is not a common carrier operation. Consequently, a broadcast station is not required to sell or to give time to all who seek to go on the air. Because programming is primarily the responsibility of broadcast station licensees, the Commission does not ordinarily monitor or pass upon individual programs, or require the filing of radio scripts. However, broadcast stations are required to keep a program log and a technical log, and a record of all requests for political broadcast time. The Commission does not maintain surveillance of the day-to-day internal management of broadcast stations.

Networks: The Commission does not license networks as such, but issues licenses to individual stations. However, stations are subject to the chain broadcasting regulations adopted by the Commission in 1941 to further competition in broadcasting. The major radio networks are: American Broadcasting Co., Columbia Broadcasting System, Mutual Broadcasting System and the National Broadcasting Co. Network operation is largely dependent upon common carrier facilities—telephone lines (including coaxial cable) and microwave relay. There is some pickup and rebroadcast of aural and visual radio programs (see "Relay Broadcast"). In 1955 the Commission initiated a special study of radio-tv networks. Dean Roscoe Barrow of the U. of Cincinnati was in charge. [The Barrow report was released in the fall of 1957 and subsequent hearings on its recommendations were concluded in July.]

Monopoly: There is Commission prohibition against the same interest or group from operating more than one network, or more than one am, fm or tv station in the same area, or more than seven am, seven fm or seven tv commercial stations throughout the country as a whole. Not more than five of these tv stations may be in the vhf band. Certain Commission rules with respect to chain broadcasting were promulgated to insure that the licensees of stations affiliated with networks do not surrender control of their operations to the networks. Persons whose licenses have been revoked by a court for antitrust violations are by law denied authorizations by the Commission.

Receivers: The Commission does not license sets that are for reception only, nor does it regulate their production or sale. However, it does impose limitations on their radiations which may interfere with radio or tv service. The advent of "wireless"

prompted the use of receiving sets by amateurs and others interested in listening-in on Morse code radiotelegraph transmission. Inexpensive crystal detectors boomed the production of home-made and manufactured receivers. The advent of broadcasting aroused public interest in sets (at first battery operated) to receive regular programs. Receiving sets operated by house current came on the market about 1928. A new development called "transistors" is now replacing tubes in many sets.

Call letters: International agreement provides for the national identification of a radio station by the first letter or first two letters of its assigned call signal, and for this purpose apportions the alphabet among different nations. United States stations use the initial letters K, N, and W, exclusively, and part of the A series. Broadcast stations are assigned call letters beginning with K or W. Generally speaking, those beginning with K are assigned to stations west of the Mississippi River and in the territories and possessions, while W is assigned to broadcast stations east of the Mississippi.

During radio's infancy, most of the broadcast stations were in the East. As inland stations developed, the Mississippi River was made the dividing line of K and W calls. KDKA Pittsburgh was assigned the K letter before the present system was put into effect. Most of the early broadcast assignments were three letters. This combination became exhausted, making it necessary to add a fourth letter.

Since many am broadcast licensees also operate fm and tv stations, a common practice is to authorize the use of the call letters of the am station followed by a dash and "fm" or "tv," as the case may be.

HOW RADIO WORKS

Without being too technical, here is how an aural (am or fm) broadcast station works:

A person talks into a microphone as if it were a telephone. His voice sets up vibrations of varying intensity and frequency. The lower the pitch the slower the vibration.

In the microphone these vibrations are converted into electrical impulses like those in the originating sound. At the transmitting station these electrical vibrations are greatly amplified—sometimes millions of times—before being put on the "carrier" wave. The intensity and frequency of the carrier wave are constant and this wave, by itself, does not transmit music or speech. So it is varied to correspond with the fluctuations of the speech or music received at the microphone. This is called "modulation."

In am broadcast the audio waves are impressed on the carrier wave in a manner to cause its amplitude (or power) to vary with the audio waves. The frequency of the carrier remains constant. This is known as "amplitude modulation." In "frequency modulation" (fm), the amplitude remains unchanged but the frequency is varied in a manner corresponding to the voice or music to be transmitted.

These modulated waves radiate from the antenna tower at approximately 186,000 miles per second (the speed of light). Some of them follow the contour of the ground and are called "ground waves." Others dart upward and are called "skywaves." Skywaves are often forced back to earth by a ceiling of electrical particles known as the ionosphere. This rebound gives the listener a choice of more distant am stations at night. Daytime reception is largely dependent upon ground waves.

Radio waves may pass through buildings and other objects but are subject to absorption and interference. As in the case of ripples on water, radio vibrations weaken with distance. Seasonal disturbances and sunspot periods can throw them off their course and cause "freak" reception.

Am broadcast stations use "medium waves." That is, they transmit 540,000 to 1,600,000 waves a second. At 540,000 waves a second, the distance between the crests is approximately 1,800 ft. This is known as "wave length." A station transmitting 540,000 waves a second is said to have a "frequency" of 540,000 cycles or 540 kilocycles.

The so-called "shortwave" (long distance) broadcast stations transmit from 6,000,000 to 25,000,000 waves per second. These waves are sent out one after another so rapidly that the distance between their crests (wave length) is only about 37 to 150 ft.

The modulated radio wave from the radio station is picked up by the home receiving antenna (exterior or set-inclosed). In other words, the wave sets up in the receiving antenna a current having the same frequency characteristics as the one transmitted. In the receiver the audio and carrier waves are separated by a device called a detector or demodulator. The carrier wave, no longer needed, is dissipated while the audio wave is relayed to the loud speaker where it is transformed back into the sound that you hear.

Relays

Relay broadcast depends upon common carrier or private interconnecting facilities. Most live-talent am network programs are sent over wires, many across the continent, for rebroadcast. Am and fm stations also use transcriptions (recordings), and tv stations show many films. Broadcast stations usually employ wire connections between studios and transmitters, but some use radio (see "Auxiliary Broadcast Services").

Besides being transmitted over wire, cable or microwave facilities, broadcast programs can be picked out of the air for rebroadcast. Because of its characteristics, tv cannot be sent over ordinary wire lines for any great distance but must depend upon coaxial cable or microwave relay, which can also handle am and fm transmission, as well as telephone, telegraph and facsimile communication.

Directional Antennas

Directional antennas are devices which enable radio stations to control their service patterns. As broadcast stations began to multiply on shared channels, it became necessary to employ directional antennas to prevent interference. Since 1937, directional antennas have been one factor in helping new stations squeeze into the congested am broadcast band. One complex array includes nine towers. Directional antennas are used also in international communication to beam transmissions to particular points.

Am Broadcasting

Amplitude modulation (am) is the oldest system of program transmission. Besides being used in the standard broadcast band it also is employed in most long-distance shortwave broadcast as well as for the visual part of tv programs.

The 535 to 1605 kilocycles portion of the radio spectrum is now used for am broadcast. This pioneer service started operation on the lower frequencies and, as a result, has continued to occupy the band in which it developed.

The am broadcast band consists of 107 channels, each 10 kilocycles in width. Individual stations are assigned to frequencies in the center of each channel, such as 540 kilocycles, 550 kilocycles, etc.

Am broadcast stations use power of from 100 watts up to 50 kilowatts (50,000 watts). The latter is the present maximum power prescribed by the Commission for this service.

There are four classes of am stations.

A Class I station operates on a clear channel and employs 10,000, 25,000 or 50,000 watts to serve remote rural areas as well as a large center of population.

A Class II station is a secondary station which operates on a clear channel with 250, 500, 1,000, 5,000, 10,000, 25,000 or 50,000 watts. It serves a population center and an adjacent rural area, and is so operated to not interfere with the extensive services rendered by dominant clear channel stations.

A Class III station, which shares a regional channel with several similar stations, uses power of 500, 1,000 or 5,000 watts and serves a center of population and adjacent rural area.

A Class IV station operates on a local channel (shared by many similar stations elsewhere) and employs 100 to 250 watts for purely local service.

"Clear channels" are set apart by international agreement for the operation of maximum-powered am stations to serve remote rural areas. The other channels are shared by so many regional and local stations that people living outside populous communities must at night depend largely upon the strong signals of distant clear channel stations which are protected against night-time interference.

Fm Broadcasting

Fm (frequency modulation) has several advantages over the older am (amplitude modulation). Fm has higher fidelity characteristics and is ordinarily free of static, fading and background overlapping of other station programs.

Fm's greater tonal range capability is due primarily to the fact that it uses a channel 20 times wider than that employed for am broadcast. Then, too, fm occupies a higher portion of the radio spectrum where static and other noise is less prevalent than at lower frequencies. Fm receivers have the peculiar ability to suppress weaker stations and other interference.

Since the frequencies on which fm operates do not ordinarily reflect back to earth from ionospheric layers ("skywaves"), it is possible for many scattered fm stations to use the same frequency without excessive interference with one another. Most fm stations serve areas within a radius of approximately 35 to 75 miles, although high powered fm stations sometimes reach out 100 miles or more. Low-power stations have a limited local coverage.

Fm and am broadcast do not interfere with each other since they are on widely separated bands. Because of the difference in their spectrum locations and the systems used, fm cannot be heard on am receivers without special adapters. Likewise, am broadcast cannot be heard on sets made to receive fm exclusively. However, combination sets cover both bands and systems.

The principle of frequency modulation has long been known but its advantages for broadcasting were not realized until shortly before World War II. Largely as a result of interest evoked by extensive fm develop-

ment work by Edwin H. Armstrong in the 1930's, the Commission authorized increased fm experimentation and, in 1940, after extensive public hearings, provided for commercial fm operation to start Jan. 1, 1941. It set apart 35 channels for commercial fm and 5 channels for noncommercial educational fm use.

There was no "first" individual commercial fm grant because, on Oct. 31, 1940, the Commission authorized construction permits to 15 such stations simultaneously. By the end of 1940 the number of authorizations had increased to 25. The first commercial fm station licensed by the Commission was WSM-FM Nashville (May 29, 1941), which operated until 1951.

Fm stations were initially assigned call letters with added numerals, but in 1943 the present letter system was adopted. There is optional use of the suffix "FM" to distinguish fm stations from am stations under joint operation.

Though all radio construction was frozen by World War II, more than 40 prewar fm stations continued to serve some 400,000 receivers.

Because of skywave interference experienced on the then fm band of 42-50 megacycles, the Commission in 1945, after public hearing, moved fm to its present higher and less vulnerable position in the radio spectrum—88 to 108 megacycles—and at the same time increased the number of channels to 100. This provided 80 channels for commercial fm and 20 channels for nonprofit educational broadcast (see "Educational Broadcast").

Fm commercial stations are of two classes: Class A for community service and Class B for metropolitan or rural coverage.

Commercial fm stations are licensed for unlimited time operation and are required to program a minimum of 36 hours a week.

Fm stations associated with am stations may use the same programs. In other words, am programs can be duplicated over fm stations, or vice versa.

The peak year for commercial fm was 1948, when more than 1,000 such authorizations were outstanding.

To aid fm broadcasters, the Commission in 1955 enabled them to apply for subsidiary authorizations to engage in certain types of nonbroadcast activities typified by "functional (background) music" operations. This service is tailored to business and other subscribers. Owned or rented special receivers are activated by an inaudible "beep" signal which cuts out or amplifies certain portions of the transmissions. Multiplex operation, which places the functional music programs on a separate carrier under conditions where they cannot be picked up on an ordinary home receiver, is the ultimate goal, but simplex operation (i. e., on the same carrier as the regular transmissions of the station) is permitted temporarily. Multiplexing may be done at any time, but simplexing is possible only when the regular fm program is not being broadcast.

The first subsidiary grants were made simultaneously on Oct. 12, 1955, to WPEN-FM Philadelphia and WWDC-FM Washington, D. C.

HOW TV WORKS

Television broadcasting involves transmission of visual and aural programs so synchronized that at the receiving set they are seen and heard in a manner resembling talking motion pictures.

The picture phase is accomplished by send-

ing a rapid succession of electrical impulses which the receiver transforms into scenes and images. The method is complex, but the following is a brief explanation of monochrome (black-and-white) video operation.

The scene to be televised is focused on a special tube in the television camera which has a small "screen" covered with approximately 367,000 microscopic dots of a special substance. This "screen" can be likened to a tiny motion picture screen and is called a "mosaic." The varying light from each part of the scene being televised falls upon these dots and charges them with an electrical charge the strength of which depends upon the amount of light falling upon the individual dots. Thus each dot becomes a tiny storage battery and the scene is formed in a pattern of electrical charges on the mosaic.

The mosaic is "scanned" by a tiny beam of electrons, no larger than the head of a pin, moving from left to right and progressing downward (just as the printed page is read by the human eye). This complete process is repeated 60 times per second, and the horizontal lines of alternate complete scanning are interlaced so that 30 complete pictures or "frames" composed of 525 horizontal lines are produced each second. As the electron beam strikes each dot on the mosaic, the dot is discharged through the electron beam and the electrical impulses produced are used to modulate the signals of the tv transmitter. Each time the dots are discharged by the electron beam they are recharged by the light produced by the succeeding scene falling upon them. The succession of individual "still" scenes creates the illusion of motion just as in the case of motion pictures made on film.

The reproduction by the tv receiver of the pictures transmitted is just the reverse of the transmission. The incoming succession of electrical impulses are separated from the "carrier" and, after amplification, impressed on the picture tube grid. The picture tube also has an electron "gun" which shoots out a tiny beam of electrons which moves from left to right and progresses downward on the face of the picture tube.

The face of the tube is coated with a material which fluoresces or gives off light at the point where it is struck by the electron beam. In the absence of a television signal the whole face of the picture tube is illuminated equally by a series of closely spaced horizontal lines. When a television signal is placed on the grid of the picture tube it controls the strength of the electron beam and hence the amount of light on the face of the tube. If the scanning of the electron beam in the picture tube is kept in perfect step with the scanning of the electron beam in the television camera, the picture tube will reproduce the lights and shadows of the subject scene and the succession of such scenes produces the illusion of motion.

In brief, the picture seen by the viewer is actually produced by a flickering spot of light moving rapidly across and down the face of the picture tube. The viewer sees the "whole" picture because the screen continues to glow for a tiny fraction of a second after the electron beam has passed, which coupled with the retentive ability of the eye creates the illusion that the picture is there all the time. The high rate of repetition minimizes flicker and lends smoothness to motion.

The tv transmitter is, in effect, two separate units. One sends out the picture and the other the sound. Visual transmission is by amplitude modulation (am). The sound portion employs frequency modulation (fm)

and operates much like the regular fm broadcast described elsewhere in this primer. The frequency space used for the combined video and sound transmission is about 600 times larger than for an am program.

In addition to live studio presentations, television uses films. The latter include "kinescope" recordings, a rapid filming process which makes it possible to show scenes of events soon after they occur. Magnetic wire and magnetic tape, which would carry both picture and sound, are now being used as a means of tv programming.

HOW TV BEGAN

Many persons in many lands contributed to the development of television. Like other forms of radio, tv was made possible by electronic discoveries in the late 19th century and early 20th century. In 1884 Nipkow, a German, patented a scanning disk for transmitting pictures by wireless. In our own country, Jenkins began his study of the subject about 1890. Rignoux and Fournier conducted "television" experiments in France in the 1900's. In 1915 Marconi predicted "visible telephone." In 1923 Zworykin applied for a patent on the iconoscope (tv camera tube). Two years later Jenkins demonstrated mechanical tv apparatus. There were experiments by Alexanderson, Farnsworth and Baird in 1926-1927. An experimental tv program was sent by wire between New York and Washington by the Bell Telephone Labs in 1927, in which Herbert Hoover, then Secretary of Commerce, participated. The next year the same laboratories experimentally televised outdoor programs.

The Federal Radio Commission (predecessor of the FCC) reported that "a few" broadcast stations were experimenting with video in 1928. In that year, WGY Schenectady experimentally broadcast the first drama by tv. Large-screen tv was demonstrated by RCA at a New York theater in 1930, and RCA tested outdoor tv pickup at Camden, N. J., in 1936.

Seventeen experimental tv stations were operating in 1937. The first experimental mobile tv station was placed in operation that year. The first President seen on tv was Franklin D. Roosevelt, when he opened the New York World's Fair in 1939. That year also saw the first telecast major league baseball game, college football game and professional boxing match. In 1940 the Republican and Democratic conventions were televised, that of the former making pioneer use of coaxial cable for long distance tv relay purposes. Previously, in the same year, WNBT New York and WRGB Schenectady were joined by radio relay for a rebroadcast test.

Meanwhile, in 1939, the *Milwaukee Journal* filed the first application to broadcast tv programs on a commercial basis. At a hearing held in 1940, the FCC found the industry divided on the question of whether tv was ready for commercial use and at odds on engineering standards. At that time various tv systems required different receivers. A National Television System Committee considered standardization and reported in 1941. Subsequent Commission hearings showed the industry to be in substantial agreement on commercialization and standards. The latter fixed the present line and frame frequencies at 525 and 30 respectively. On April 30, 1941, the Commission authorized commercial tv operation to start July 1 of that year.

Meanwhile, a number of tv stations which had been operating experimentally applied for commercial authorization. The first grant looking to regular tv operation was

issued to WNBT (TV) New York on June 17, 1941, effective July 1 of that year. On June 24, 1941, WCBW (now WCBS-TV) New York was authorized to commence program tests July 1 thereafter. By May of 1942, 10 commercial tv stations were on the air. Six of these continued to provide service during the war.

In 1945 the Commission allocated 13 vhf (very high frequency) channels between 44 and 216 megacycles for commercial television. In doing so, it pointed out that there was insufficient spectrum space below 300 megacycles for an adequate nationwide and competitive tv broadcasting system. Twelve of these channels were to be shared with certain nonbroadcast (fixed and mobile) services. At the same time, that portion of the uhf (ultra high frequency) spectrum between 480 and 920 megacycles was made available for experimental tv operation looking to future television expansion, and between 1245 and 1325 megacycles for tv relay.

In 1948, because of interference to commercial tv operation, the Commission stopped the sharing of television vhf channels with other services, and deleted tv channel No. 1 (44-50 mc) by assigning it to the nonbroadcast services affected.

THE TV FREEZE

As predicted by the Commission in 1945, it became increasingly evident that the few available vhf channels were inadequate to provide a truly nationwide competitive tv service. Also, operating stations developed interference which had not been anticipated when tv broadcasting began. As a result, the Commission on Sept. 30, 1948, stopped granting new tv stations pending a study of the situation. This was the so-called television "freeze" order.

The resultant study showed that, before additional stations could be authorized, it was necessary to determine various engineering and other questions which would govern tv operation for years to come. Consequently, on July 11, 1949, the Commission proposed comprehensive changes looking to the improvement and extension of tv service. These included new engineering standards; opening uhf channels for tv broadcasting; consideration of color systems; reservation of channels for noncommercial educational use, and a national assignment plan incorporating vhf and uhf channels.

On April 14, 1952, the Commission (in its Sixth Report and Order) announced the lifting of the tv "freeze," the addition of 70 uhf channels (between 470-890 megacycles) to the 12 vhf channels (between 54-216 megacycles) then in use, and the adoption of a table making more than 2,000 channel assignments (over 1,400 uhf and over 500 vhf) to nearly 1,300 communities throughout the United States and its territories, including 242 assignments for noncommercial educational use.

The first commercial tv grants following the lifting of the freeze were made July 11, 1952, simultaneously, to three Denver stations—KFEL-TV, KDEN (TV) and KBTW (TV). KFEL-TV began program operation on July 19 thereafter. The first uhf commercial tv station to go on the air was KPTV (TV) Portland, Ore., on Sept. 20, 1952.

The initial commercial grant to the territories and possessions was made on July 23, 1952, to WKAQ-TV San Juan, Puerto Rico.

Being in a higher part of the spectrum, uhf television broadcasts cannot be received on vhf sets without changes in the

set or the addition of an adapter. Sets are, however, available which will receive both vhf and uhf stations. In many cases, uhf reception requires some slight changes in home antennas which were installed for vhf use, or may require a new antenna and a more efficient type of antenna lead in.

Steps by the Commission to bring tv to yet unserved areas include authorizing "satellite" rebroadcast of programs of other stations, and "translator" stations to pick up programs and rebroadcast them on the upper 14 uhf channels and proposing "booster" stations to fill the "shadow" areas of uhf stations. Proposal for subscription (toll) tv service is also being considered. In 1955, the Commission initiated a general proceeding to consider possible solutions, on a nationwide basis, to certain problems hindering the expansion of tv service.

Tv Powers, Separations

The minimum effective radiated visual power of tv stations is fixed at 100 watts. No minimum antenna height above average terrain is specified. Tv stations operate in accordance with tables of maximum power which varies with antenna height. Maximum effective radiated power on vhf channels 2-6 is fixed at 100 kilowatts, on vhf channels 7-13 at 316 kilowatts and on uhf channels 14-83 at 5,000 kilowatts. With very high antennas these powers are reduced.

In the matter of interference, the human eye is much more critical than the human ear. A low order of interference which might pass unnoticed on an aural broadcasting station becomes annoying on a tv picture. Consequently, tv stations require greater protection than aural broadcasting stations. This protection is afforded by the geographic spacing between tv stations operating on the same and adjacent channels. (In the uhf television band certain receiver deficiencies preclude the use in a given area of other channels bearing various frequency relationships to an assigned channel.) The spacing required by rule is that which is considered necessary to protect the signals of one tv station from the signals of other tv stations in an area around each station within which its signals are of sufficient strength to provide an acceptable picture on an average tv receiver connected to a conventional roof-top antenna.

Reception is possible in favorable locations beyond this area if more elaborate and elevated receiving antennas are employed, but any attempt to protect such favored locations by means of greater spacing between tv stations would considerably reduce the possible assignments with a corresponding reduction in the total amount of tv service available. The fact that such reception is possible leads many people to attempt reception of distant tv stations. In most cases special precautions must be taken, such as the use of directive receiving antennas, to minimize interference. However, this is a matter of individual initiative.

Each tv station requires a wide band of frequencies (6 megacycles) to transmit the visual and accompanying aural program. Therefore, tv receivers are "wide band" receivers and cannot be made as selective as a radio receiver. Hence, they are more likely to pick up signals on frequencies other than the channel to which they are tuned and suffer interference. In most cases such interference can be reduced or eliminated by additional shielding or the use of external wave-traps connected across the antenna input terminals and tuned to the operating frequency of the interfering sta-

tion. Tv receivers may also be the source of serious interference to other radio services. The most common type of interference is produced by the horizontal sweep oscillator in the tv receiver which radiates an interfering signal in the standard broadcast band and on frequencies immediately above that band. Regulations governing the suppression of such interfering radiation are contained in the Commission's rules.

Station separations are determined by three geographic zones. Minimum co-channel separations are 170 miles for vhf channels and 155 miles for uhf channels in Zone I, which encompasses the entire states of Massachusetts, Rhode Island, Connecticut, New Jersey, Maryland, Pennsylvania, Delaware, District of Columbia, Ohio, Indiana, Illinois, and parts of Maine, New Hampshire, Vermont, New York, Virginia, West Virginia, Michigan and Wisconsin.

Minimum co-channel separations are 190 miles for vhf and 175 miles for uhf in Zone II, which includes the territories and possessions and the entire states of Kentucky, Tennessee, North Carolina, South Carolina, Missouri, Iowa, Minnesota, Arkansas, Kansas, Nebraska, Oklahoma, North Dakota, South Dakota, Utah, Idaho, Arizona, New Mexico, Montana, Wyoming, Nevada, Colorado, Oregon, Washington and California, and parts of Maine, New Hampshire, Vermont, New York, Virginia, West Virginia, Georgia, Alabama, Mississippi, Louisiana, Michigan, Wisconsin and Texas.

Minimum co-channel separations are 220 miles for vhf and 205 miles for uhf in Zone III, which includes Florida and parts of Georgia, Alabama, Louisiana, Mississippi and Texas.

Tv stations engaged in commercial operation are required normally to broadcast a minimum of 28 hours a week except in their initial stages when there is a graduated scale starting with 12 hours.

Tv Networks

Television is no longer limited by local talent and facilities. Network operation is made possible in large measure by the development of coaxial cable and microwave relay facilities. As early as 1937 motion pictures were televised and sent over the coaxial cable link between New York and Philadelphia. Network operation was begun by WNBT (TV) New York; WRGB (TV) Schenectady and WPTZ (TV) Philadelphia in 1944. Regular coaxial cable tv relay service was inaugurated between Washington and New York in 1946. The following year, microwave relay extended this service to Boston. A midwestern relay system, opened in 1948, was joined with the eastern system in 1949. The first link in the transcontinental relay system was opened between New York and Chicago in 1950. It was extended to San Francisco the following year and, on Sept. 4, 1951, carried telecasts of the Japanese peace treaty conference. In many fringe areas, so-called "community" antennas pick tv programs from the air and bring them to local subscribers' homes by means of special cable.

Color Tv

In color television a brightness component is transmitted in much the same manner as the black-and-white picture signal is sent in monochrome and, in addition, a color component is transmitted at the same time on a "subcarrier" frequency which is located between the visual and aural carrier frequencies.

Color tv had been the subject of study

and experimentation for a quarter of a century. In 1928 Baird, in England, demonstrated an early system. The next year color pictures were sent over wire in a test at the Bell Telephone Labs in New York. RCA gave an experimental color tv demonstration in February 1940, and CBS tested color tv broadcast the following August.

The question of color tv was considered initially by the FCC in 1941 when it proposed alternative standards for monochrome and color. In 1945 it allocated certain uhf frequencies for experimentation in developing color and high definition black-and-white tv. It was not until 1946 that it received a formal proposal for the adoption of color. In denying that CBS petition in 1947, the Commission urged further experimentation with particular reference to making color transmission possible in the 6-megacycle band width used by monochrome tv.

Three competitive color systems were offered for Commission consideration in the general tv proceedings which started in 1949. They were the CBS "field sequential" system, the RCA "dot sequential" system and the Color Television Inc. "line sequential" system. Each of these systems would require special or converted sets to receive color. The CBS system could not be received in black-and-white on existing receivers without adapters; the two others claimed they could.

On the basis of testimony and demonstrations, the Commission on Sept. 1, 1950, found that the field sequential system was the only system then presented which met its criteria for color operation. However, in view of the fact that this system could not be received in monochrome on existing receivers, and the possibility of improvements in tv color systems generally, the Commission proposed postponing a color decision and adopting monochrome "bracket standards" which would enable future black-and-white tv sets incorporating those standards to receive color transmissions in black-and-white. This proposal was conditioned upon receiver manufacturers agreeing to equip new tv sets with a switch and an appropriate circuit for that purpose.

But the response from manufacturers was insufficient and, in accordance with its September announcement, the Commission on Oct. 11, 1950, adopted the field sequential system for color tv broadcasting to become effective Nov. 20 thereafter. In so doing, it held the door open for consideration of development of a better system on the basis of practical tests and actual demonstrations.

Start of commercial color broadcasting was delayed when RCA obtained a preliminary injunction in the U. S. District Court at Chicago. On May 28, 1951, the Supreme Court of the United States upheld the validity of the Commission's action and CBS began limited color broadcasts on June 25 of that year. Because of the materials shortage, the National Production Authority on the following Nov. 20 prohibited the manufacture of color tv sets or attachments for general public use, and interest in the field sequential system lagged.

Thereafter, new tv color standards were developed and advocated by the industry through its National Television System Committee. They were adopted by the Commission on Dec. 17, 1953.

These present standards are based on the "simultaneous" system, which transmits three primary colors (red, green and blue)

at one and the same time. They are "compatible" in that they enable existing tv sets to receive color broadcasts in black and white. Color sets are necessary to receive colorcasts in color. Color sets can also receive monochrome transmissions.

EDUCATIONAL BROADCASTING

Educational institutions were among the pioneers in experimental broadcasting, and held a considerable proportion of the early am licenses.

By 1925, educational groups had 171 such licenses. For various reasons, notably the increased competition from commercial broadcasting, most of these stations were off the air when the Federal Communications Commission was created. However, about 35 educational stations still operate in the am broadcast band, a score of them on a voluntary noncommercial basis.

As directed by Sec. 307(c) of the Communications Act, the Commission made a study of the proposal that Congress should allocate fixed percentages of radio facilities for particular types of nonprofit radio programs and activities, including education. On Jan. 22, 1935, the Commission recommended that no such statutory allocation be made at that time. It held that there was "no need for a change in the existing law to accomplish the helpful purposes of the proposal," but recognized the need for extending broadcasting to education and expressed its intention "actively to assist the determination of the rightful place of broadcasting in education and to see that it is used in that place."

To further the development of noncommercial educational broadcasting, the Commission in 1938 set aside certain am channels between 41 and 42 megacycles for the exclusive use of educational institutions. Due, however, to the inability of the ordinary public-held radio set to receive broadcasts on these frequencies, only a few educational institutions secured licenses for such operation. Those which did later changed to frequency modulation operation when provision was made for fm educational broadcasting.

When regular fm broadcasting was authorized to start in 1941, five channels between 42 and 43 megacycles were allocated for noncommercial educational use, in lieu of the educational am facilities previously provided.

In 1945, as part of an extensive revision of frequency allocations, the Commission reserved 20 fm channels between 88 and 92 megacycles for noncommercial educational fm stations. This educational portion of the fm band is contiguous to that containing the commercial fm stations and present fm receivers are capable of tuning in both noncommercial and commercial stations within range. The number of these noncommercial educational fm stations has grown slowly but steadily.

In 1948 the Commission authorized low power (10 watt) operation on these educational fm channels. With such low power equipment easily installed and operated, schools may begin broadcasting to a limited area of from two to five miles in radius for an outlay of a few thousand dollars. Higher power equipment may be added when desired. In 1951, as a further aid, the Commission authorized remote control operation of low-power educational fm stations.

In 1950 the Commission reserved a non-

commercial educational frequency for the use of the United Nations.

Stations in the educational fm broadcast service are licensed principally to school systems, colleges and universities for furnishing educational programs to teachers and students, as well as for public educational and entertainment purposes.

The Commission, for the first time, allocated tv facilities for exclusive noncommercial educational use as a result of its lengthy study of this question in the general television proceedings (discussed under "Tv Broadcast"). The Commission determined therein that "the need for noncommercial educational stations has been amply demonstrated"; that "the record shows the desire and ability of education to make a substantial contribution to the use of television"; that "the actual process of formulating plans and of enacting necessary legislation or of making adequate financing available is one which will generally require more time for educational organizations than for commercial interests . . . and that to insure an extensive rather than a sparse and haphazard development of educational television, channels must be reserved by the Commission at this time." Consequently, in its Sixth Report and Order of April 14, 1952, the Commission made channel assignments to 242 communities exclusively for noncommercial educational purposes. Forty-six of these were made to "primarily educational centers." Of the total of 242 channels then assigned, 80 were vhf and 162 were uhf. There have since been additional assignments.

The Commission expects educational tv licensees to make their station facilities available to other local educational institutions, since such assignments are made to serve the educational and cultural needs of the community. Except in particular cases, tv educational eligibility is not extended to municipal authorities in places where an independent educational authority—such as a board of education—is established. Although there is no requirement that noncommercial educational stations broadcast a specified minimum number of hours, commercial and educational television stations are both subject to the same tv service requirements, such as station separation, antenna height and power, etc.

The first commercial educational tv grant was made July 23, 1952, to the Kansas State College of Agriculture and Applied Science (KSAC-TV) at Manhattan, Kan.

INTERNATIONAL BROADCASTING

Under international agreement, certain high frequency bands are allocated for broadcasts directed between nations. Frequencies used by international broadcast stations are in the bands between 6000 and 21700 kilocycles. Construction permits and licenses for international broadcast stations are issued by the FCC.

During World War II, our international broadcast stations were taken over by the Office of War Information and the Office of Inter-American Affairs of the Dept. of State which operated and programmed them in the interest of the war effort.

"The Voice of America" is the title given to the programs now sent out daily, in many languages, to various parts of the world by shortwave transmitters under the auspices of the United States Information Agency. Transmission is by amplitude modulation.

AUXILIARY BROADCAST SERVICES

In order to give greater flexibility in the program services offered by broadcast stations, the Commission authorizes several

classes of auxiliary broadcast stations. A brief description of these adjuncts follows:

Remote Pickup: Remote pickup broadcast stations are used to relay aural broadcast programs or the aural portion of video programs from temporary points of origination outside of the studio. Employing portable and mobile transmitters, these stations make it possible to broadcast on-the-spot news and other events. In time of disaster they provide emergency communication both in assisting relief and in keeping the public informed. Such stations operate in the 1.6, 26, 153, 166, 170 and 450 megacycle portions of the spectrum.

Studio-Transmitter Links: Studio-transmitter links (abbreviated STL) provide a program circuit by means of radio between the studio and the transmitter of a broadcast station where the transmitter is located in a remote or sparsely settled region and wire lines are not available or are not suitable to carry programs. STL stations permit broadcast stations to use the most desirable transmitting sites without regard to wire link to the studio. Thus, fm stations may be placed on mountain peaks for broader coverage and am stations may be located away from thickly populated areas so as to minimize interference or to permit erection of elaborate directional antenna systems.

Am and fm broadcast stations may use studio-transmitter links at secondary studios as well as at their main studios. This enables them to establish studios in small adjacent communities which are unable to support their own broadcast stations and where existing telephone circuits may be unsuitable for broadcast use.

STL stations operate in the band 925 to 952 megacycles with only a few watts of power. However, by employing highly directional antennas, they can concentrate this energy in the desired direction and communicate over reasonably long distances.

Television Auxiliaries: Three types of tv auxiliary stations are authorized by the Commission.

Tv pickup stations are similar in function to remote pickup stations and are used to pick up video programs or other events that occur outside the studio. Because wide channels are required to transmit tv signals, they operate in the so-called microwave region of the spectrum. Specific bands of frequencies in the vicinity of 2000, 7000, 10000 and 13000 megacycles are allocated for their use.

Television STL stations are used to provide a program circuit between the studio and transmitter. Ordinary wire lines cannot be used for this purpose, and the installation of special coaxial lines is often impractical. Television STL stations operate in the same bands as tv pickup stations. In addition, frequencies in the band 890 to 915 megacycles are available for television STL stations in carrying the aural portion of the video program.

Television intercity relay stations may be authorized to provide a program circuit between tv stations located in different cities in order to permit network programming.

During the present stage of television development, the operation of private intercity relay systems by tv broadcasters is permitted pending the availability of adequate common carrier facilities. Such systems operate in the tv pickup and STL bands on condition that they do not cause interference to pickup and STL stations.

EXPERIMENTAL BROADCAST SERVICES

Whenever an applicant has a program of

research and experimentation that promises substantial contribution to the broadcasting art, the Commission may authorize the operation of a station in one of the experimental broadcast services; i.e., experimental television, experimental facsimile or developmental broadcast.

Experimental Television: Experimental tv stations are used to obtain data or improve equipment that will benefit the tv broadcast industry. Manufacturers use this service from time to time for developing and testing transmitters and antennas for both tv broadcasting and tv auxiliaries. Authorizations are also granted for testing new means of tv broadcast such as tv transmission from aircraft, subscription television, booster operation, etc. The portable, self-contained tv camera popularly known as the "walkie-lookie" or "transceiver" was developed under an experimental tv authorization. Because of their temporary nature, the number of experimental tv stations fluctuates.

Experimental Facsimile: Facsimile broadcast concerns the transmission of black-and-white still pictures and printed or written text. An electronic eye scans the copy to be sent, which is mounted on a revolving drum, and converts each gradation of black into electric impulses. The latter modulate the transmitter in the same way that sound impulses do. At the receiver, these impulses are passed through chemically treated paper and deposit upon it reproductions of the gradations of black in the original copy. A special recorder must be used in conjunction with the radio receiver in order to re-

produce facsimile transmissions.

Facsimile has been employed for many years by common carriers—telephone and telegraph—and by nonbroadcast services, such as police, press and aeronautical.

Authorizations to broadcast "fax" experimentally were granted by the Commission as early as 1937. In the prewar years, facsimile was tested over am broadcast facilities. After the war, experimental facsimile broadcast shifted to fm operation because the latter gave improved fidelity of reproduction and freedom from atmospheric disturbances. The results caused the Commission to authorize commercial facsimile broadcasting by fm stations starting July 15, 1948. However, there has been little activity of this nature.

Facsimile transmission by fm stations can be on either a "simplex" or a "multiplex" basis. When using simplex facsimile, the regular aural fm program is not transmitted, but with multiplex operation both may be transmitted simultaneously. However, the multiplexing must be done so that there will be no degradation of the aural programs.

Developmental Broadcast: Developmental broadcast stations are utilized for gathering data or developing equipment that will be useful to am and fm broadcast. They are the aural counterpart of the experimental television stations and, as in the case of tv, manufacturers use them for the development and testing of aural broadcast equipment. Like experimental tv stations, they are temporary in nature and their number fluctuates.

HOW STATIONS HAVE MULTIPLIED

All information below is from records of the FCC

YOU MIGHT FIND THE TREASURE OF OAK ISLAND* —

**BUT . . . You Need the Fetzer Stations to
Uncover a Sales Treasure in Western Michigan!**

The Fetzer Stations are the *key* to *all* of Western Michigan BECAUSE: (1) All surveys show that this area is not available from any "outside" medium—either radio or TV. (2) No other stations *inside* the area combine the benefits of CBS and top local programming *and public service* which are the hallmarks of Fetzer operation.

You need WKZO-TV!

The newest ARB Report (March, 1958) shows WKZO-TV is first again in 55% more quarter hours than the next-best station—272 for WKZO-TV, 176 for the next station!

WKZO-TV telecasts on Channel 3 with 100,000 watts from a 1000' tower. It is the Official Basic CBS Television Outlet for Kalamazoo-Grand Rapids—serves over 600,000 television homes in one of America's top-20 TV markets!

You need WKZO Radio!

WKZO Radio is now and has always been top leader in Kalamazoo and Western Michigan! According to the new 7-County Pulse Report of the Kalamazoo-Battle

Creek Area WKZO Radio *averages* over 30% of the radio audience all day Monday through Friday (6 a.m. to Midnight). This is 43% more than the second-place station.

Many of WKZO's most impressive ratings are for local shows—with several giving up to 40% Share of Audience—or over twice the share of nearest competition!

You need WJEF Radio!

WJEF is the Fetzer key to the 120,000 radio homes in Metropolitan Grand Rapids. Fetzer programming excellence (plus CBS) has made WJEF a widely-respected and "listened-to" citizen in Grand Rapids. Ask your Avery-Knodel men today for the complete story on Fetzer coverage of Western Michigan!

The Fetzer Stations

WKZO-TV — GRAND RAPIDS-KALAMAZOO

*Oak Island, Nova Scotia, is reputed to be the hiding place of Captain Kidd's treasure.

The radio and television audiences

Radio set ownership extended to virtually 97% of all U.S. homes and television saturation was 85% in mid-Summer 1958.

Homes equipped with one or more radio sets numbered 48.9 million. Those with television numbered 43 million.

For latest information on radio and television homes in all U.S. counties, see Market Facts beginning on page A-17.

The county-by-county information beginning on page A-17 was as of March 1958. At that time radio homes totaled 48,699,676, or 96.3% of all U.S. homes. Television homes totaled 42,400,000, or 84% of all homes.

The figures appearing in the chart below are A. C. Nielsen estimates for the summer of 1958. They are updated versions of the March 1958 information.

None of the radio homes figures includes literally millions of other radio sets installed in automobiles or in public places outside the

home, or the portables increasingly hand-carried to beaches, amusement parks and the like. Radio Advertising Bureau estimated that as of July 1, 1958, some 37.2 million automobiles had radios in working order. In RAB's estimate, these would represent approximately 74% of all cars on the road. The percentage of new cars that come radio-equipped was placed at 87.5%.

In the following columns is presented basic information on the size and shape of both broadcasting audiences—at different times of the day and night and at different seasons of the year; the extent of looking and listening in terms of homes per minute and minutes per home; the composition of audiences; how audiences cumulate and duplicate; audience trends and some of what, in television, they watch most.

Information in these charts and tables was supplied by A. C. Nielsen Co. and its Nielsen Radio Index (NRI) or Nielsen Television Index (NTI) unless otherwise indicated.

TREND OF RADIO AND TELEVISION OWNERSHIP
MILLIONS OF HOMES
MAY-AUGUST OF EACH YEAR

THE WEEKLY RADIO AND TV AUDIENCE

	RADIO		TELEVISION	
	% Radio Homes	No. of Homes ('000)	% Tv Homes	No. of Homes ('000)
Monday-Friday—6 a.m.-12 noon	69.3	33,749	61.7	26,223
Monday-Friday—12 noon-6 p.m.	61.8	30,097	83.9	35,658
All nights, 6 p.m.-midnight	57.9	28,197	94.2	40,035
Seven days, 24 hours a day	89.5	43,587	94.5	40,163

HOW MANY LOOK AND LISTEN? The respective sizes of the radio and television audiences in the course of an average week are shown above, by day part and by full-week total.

In each case, the count is limited to different homes listening or viewing—duplication has been eliminated. Figures are from the 1958 Nielsen March Week I study.

HOMES USING RADIO BY COUNTY SIZE (During the Average Minute)

NRI March-April 1958

	% Homes Using Radio	A	B	C	D
Monday-Friday—9 a.m.-12 noon	13.5	14.1	12.5	14.3	12.9
Monday-Friday—12 noon-6 p.m.	10.8	10.8	9.9	10.9	11.9
All nights, 6-11 p.m.	7.1	7.9	7.1	6.3	6.4

HOMES USING RADIO BY TERRITORY (During the Average Minute)

	% Homes Using Radio	Northeast	East Central	West Central	South	Pacific
Monday-Friday—9 a.m.-12 noon	13.5	12.0	11.9	16.7	12.6	15.5
Monday-Friday—12 noon-6 p.m.	10.8	8.5	8.5	12.4	11.1	15.5
Sunday through Saturday, 6-11 p.m.	7.1	5.4	4.7	8.3	7.3	11.7

SIZE OF THE RADIO AUDIENCE is spelled out in further detail in the two foregoing tables. Here the measurement (Nielsen Radio Index) is in terms of homes listening during an average minute. The county-size classifications are as follows: Class A, all counties assigned to metro areas having

central cities with populations over 500,000; Class B, all other counties over 100,000 population, plus certain counties that are parts of metro areas whose central city has population less than 500,000; Class C, all other counties having population over 30,000; Class D, all remaining counties.

LISTENING IN RADIO-ONLY vs. LISTENING IN TV HOMES

	Mon.-Fri., 8 a.m.-12 noon		Mon.-Fri., 12 noon-6 p.m.		All nights, 6-11 p.m.	
	Avg. Aud.	No. of Homes (000)	Avg. Aud.	No. of Homes (000)	Avg. Aud.	No. of Homes (000)
All Homes Using Radio	14.2%	6,915	11.4%	5,552	7.4%	3,604
Radio-Only Homes Using Radio	18.4	1,147	19.0	1,195	19.7	1,252
Tv Homes Using Radio	13.5	5,768	10.1	4,357	5.4	2,352

HOW RADIO LISTENING DIFFERS IN TV HOMES. This table, based on Nielsen measurements in January-February 1958, gives the answer. It also shows the extent of radio listening

in all radio homes, those with as well as those without tv, thus providing a norm with which to compare the extent of listening in the sub-categories.

RADIO LISTENING PER HOME PER DAY

	6 a.m.-12 noon	12 noon-6 p.m.	6 p.m.-6 a.m.	Total
All days average	42 min.	41 min.	33 min.	1 hr. 56 min.
Monday-Friday Average	45 min.	41 min.	34 min.	2 hrs. 0 min.
Saturday	37 min.	47 min.	33 min.	1 hr. 57 min.
Sunday	29 min.	39 min.	27 min.	1 hr. 35 min.

EXTENT OF IN-HOME RADIO LISTENING, by day parts as well as by average day, is pointed up in this table (above), based on NRI measurements in January-February 1958. Not

counted: Listening to automobile radios and other out-of-home sets.

NUMBERS OF HOMES TUNED TO RADIO

IN-HOME LISTENING is shown in another way in the table at right depicting number of homes tuned in per average minute of each daytime hour, Monday through Friday. At night the tune-in, over a full week, is 5 million homes in the average minute between 6 and 7 p.m.; 4.1 million at 7-8, 3.3 million at 8-9, 3 million at 9-10, 2.8 million at 10-11 and 2.5 million at 11-12 midnight. Figures are for NRI January-February 1958.

6-7 a.m.	— 2.7 million
7-8	— 6.4 "
8-9	— 8.1 "
9-10	— 7.1 "
10-11	— 6.6 "
11-12 Noon	— 5.9 "
12-1 p.m.	— 6.6 "
1-2	— 6.6 "
2-3	— 5.5 "
3-4	— 5.1 "
4-5	— 4.8 "
5-6	— 4.9 "

RADIO LISTENING: SUMMER vs. WINTER

THE VARIATIONS between summer and winter radio audience sizes are demonstrated in the table at right. Note that afternoon and evening audiences are higher in summer than in winter. Figures represent millions of homes listening per average minute. Source: N.E.L.

	HOMES (000,000)		
	July 1957	January 1958	Annual Average
Monday-Friday Morning	4.8	5.9	5.8
Monday-Friday Afternoon	5.7	5.4	5.6
Night, All Week	3.8	3.3	3.7

TV VIEWING PER HOME PER DAY

	Monday-Friday	Saturday	Sunday	Full Week
Night	3 hrs. 35 min.	4 hrs. 3 min.	3 hrs. 46 min.	3 hrs. 41 min.
Afternoon	1 hr. 33 min.	1 hr. 52 min.	1 hr. 52 min.	1 hr. 38 min.
Morning	39 min.	47 min.	16 min.	37 min.
Total Hours Per Day	5 hrs. 47 min.	6 hrs. 42 min.	5 hrs. 54 min.	5 hrs. 56 min.

VIEWING PER HOME PER DAY. The time the average tv home spends watching television each day is depicted in the table above, which not only shows the daily average over the

full week but also breaks down the daily average by day part and days of the week. Data is NTI Nov.-Dec. 1957.

TV AUDIENCE COMPOSITION

	Homes Using Tv	Men	Women	Teens	Children
Monday-Friday 9 a.m.-12 Noon	17.6%	10%	49%	3%	38%
Monday-Friday 12 Noon-6 p.m.	25.3	15	46	9	30
All Nights 6-11 p.m.	56.8	30	36	12	22

WHO WATCHES WHEN?—The composition of the television audience during the average minute—morning, afternoon and evening—is reflected in the above table. Figures are for March-

April 1958. The number of homes using tv is a percentage of all U.S. tv homes. Source: NTI complete report.

Compiled for the 1958 BROADCASTING YEARBOOK by B. F. Osbahr, editor of "Electronic Industries."

Television time sales 1948-1957

These are total billings for all U.S. stations and networks after all frequency and promotional discounts but before payment of commissions to agencies, sales representatives, etc. Figures are those officially reported by the FCC except for 1957 radio figures which are Broadcasting estimates. The FCC radio financial report for 1957 will not be available until late 1958.

Year	National Network	% change from previous year	National non-network	% change from previous year	Local	% change from previous year	Total	% change from previous year
1948*	\$ 2,500,000	-----	-----	-----	\$ 6,200,000	-----	\$ 8,700,000	-----
1949	10,796,000	-----	\$ 7,275,000	-----	9,460,000	-----	27,530,000	-----
1950	35,210,000	226.1	25,034,000	244.1	30,385,000	221.2	90,629,000	229.2
1951	97,558,000	177.1	59,733,000	138.6	51,304,000	68.8	208,595,000	130.2
1952	137,664,000	41.1	80,235,000	34.3	65,171,000	27.0	283,070,000	35.7
1953	171,900,000	24.9	124,318,000	54.9	88,474,000	35.8	384,692,000	35.9
1954	241,224,000	40.3	176,766,000	42.2	120,131,000	35.8	538,122,000	39.9
1955	308,900,000	28.1	222,400,000	25.8	149,800,000	24.7	681,100,000	26.6
1956	367,700,000	19.0	281,200,000	26.4	174,200,000	16.3	823,100,000	20.8
1957	394,200,000	7.2	296,400,000	5.4	178,100,000	2.2	868,700,000	5.5

*In 1948 FCC reported only "total revenues" (from time, talent and services) from "network programs" and from business "sold directly by stations." Hence figures for that first year of television financial reporting are not comparable with figures for time sales in ensuing years.

Where television money goes

Here is a tabulation of FCC reports showing the volume of network, spot and local advertising time placed in individual television markets in 1956 and 1957. These figures represent time sales after all frequency and promotional discounts but before deduction of commissions to advertising agencies and station representatives.

Market (number of operating stations)	Network		Spot		Local

*Not all stations in this market operated a full year in 1957.
 #Data withheld because third station in this market operated too short a time in 1957.
 **Data not published for markets having fewer than three stations.

Where radio money goes

Here is a tabulation of FCC reports showing the volume of network, spot and local advertising time placed in individual radio markets in 1955 and 1956. These are the latest figures available. FCC radio financial data for 1957 will not be made public until the end of 1958. These figures represent time sales after all frequency and promotional discounts but before deduction of commissions to advertising agencies and station representatives.

Market (number of operating stations)	Network		Spot		Local	
	1955	1956	1955	1956	1955	1956
Akron, Ohio (4)	\$ 86,622	\$ 53,424	\$ 312,245	\$ 391,062	\$1,161,256	\$1,239,398

#Not all stations in this market operated a full year in 1956.

General television financial data

Note: The Federal Communications Commission annually compiles detailed financial information about networks and stations. The tables below are selected from the FCC's television financial report for the year 1957—the latest available.

BROADCAST FINANCIAL DATA OF 3 TV NETWORKS AND 501 TELEVISION STATIONS — 1957

Item	3 Networks and Their 16 Owned and Operated Tv Stations	485 Other Tv Stations	Total 3 Networks and 501 Tv Stations
A. Revenues from the sale of time:			
1. Network time sales:			
a. Nation-wide networks	\$287,700,000	\$106,500,000	\$394,200,000
b. Miscellaneous networks and stations	287,700,000	106,500,000	394,200,000
Total network time sales	287,700,000	106,500,000	394,200,000
2. Non-network time sales:			
a. Nation wide networks advertisers	\$287,700,000	\$106,500,000	\$394,200,000
b. Local advertisers	58,500,000	237,900,000	296,400,000
Total non-network time sales	23,400,000	154,700,000	178,100,000
Total Time Sales	81,900,000	392,600,000	474,500,000
3. Deduct — Commissions to agencies, representatives, etc.	369,600,000	499,100,000	868,700,000
Net Time Sales	75,900,000 ¹	66,500,000	142,400,000
Net Time Sales	293,700,000	432,600,000	726,300,000
B. Revenues from incidental broadcast activities:			
Talent	144,500,000	11,500,000	156,000,000
Sundry broadcast revenues	29,700,000	31,200,000	60,900,000
Total incidental broadcast activities	174,200,000	42,700,000	216,900,000
Total broadcast revenues	467,900,000	475,300,000	943,200,000
C. Total broadcast expenses of networks and stations	397,200,000	386,000,000	783,200,000
D. Broadcast income (before Federal income tax)	\$70,700,000	\$89,300,000	\$160,000,000

¹Of this amount \$59.6 million is applicable to the total sale of network time.

BROADCAST REVENUES, EXPENSES AND INCOME OF 3 TV NETWORKS AND 501 TV STATIONS

BROADCAST REVENUES	1957	1956 ²	1955 ¹
3 Networks (including 16 owned and operated stations*)	\$467,900,000	\$442,300,000	\$374,000,000

¹Excludes data for 32 stations as follows: 16 stations owned and operated by networks and 16 stations with less than \$25,000 in time sales which are not required to report detailed expense data.

General radio financial data

Note: The FCC annually compiles detailed financial information about radio networks and stations, but its radio tabulations are made public about a year late. Below are selected tables from the FCC's radio financial report for the year 1956. Information for the year 1957 will not be available until late 1958.

BROADCAST REVENUES, EXPENSES AND INCOME OF RADIO BROADCAST SERVICES — 1955-1956

Items	1956		1955		Per Cent Increase or (Decrease) 1956
	(\$ Millions)				
Total Broadcast Revenues					
4 nationwide networks and 3 regional networks (including owned and operated stations) ¹	\$ 70.2	\$ 78.3	(10.4)		
Other radio stations ²	410.4	375.0	9.4		
Total	\$480.6	\$453.3	6.0		
Total Broadcast Expenses					
4 nationwide networks and 3 regional networks (including owned and operated stations) ¹	\$ 69.8	\$ 72.4	(3.6)		
Other radio stations ²	361.6	335.0	7.9

Number Reporting a Loss in 1955	741	227	335	22	38	41	78	...
Per Cent Loss in 1955	27.5	26.6	25.3	26.8	27.1	26.8	56.5	...

¹Excludes 13 key stations of networks in 1955 and 1956.
²63 stations, licensed during the war years 1942-1945, are also included in this group.

FM STATIONS REPORTING LOSSES — 1955-1956

36 of 51 fm stations operated by non-am licensees reported losses from operations during 1956 and 31 of 38 such stations reported losses from operations during 1955.

COMPARATIVE FINANCIAL DATA OF AM RADIO STATIONS — 1955-1956 (\$ THOUSANDS)

Item	Amount 1956	Per Cent of Increase (Decrease)
Number of stations	2,896 ¹	
A. Revenues from the sale of time:		
1. Network time sales:		
a. Nationwide networks	\$ 7,302	(40.9)
b. Regional networks	2,348	2.8
c. Miscellaneous networks and stations	783	27.9
Total	10,433	(31.6)
2. Non-network time sales:		
a. National and regional advertisers and sponsors	125,530	20.2
b. Local advertisers and sponsors	287,522 ²	9.4
Total revenues from non-network time sales	413,052	12.4
Total time sale revenues	423,485	10.7
3. Deduct — Commissions to regularly established agencies, representatives, brokers and others	38,422	19.1
Net time sale revenues	385,063	9.9
B. Revenues from incidental broadcast activities:		
Talent	12,575	(4.4)
Sundry broadcast revenues	11,346	7.9
Total revenues from incidental broadcast activities	23,921	1.1
Total broadcast revenues	408,984	9.4
C. Total broadcast expenses of stations	359,793	7.9
D. Broadcast income (or loss) before federal income tax	\$ 49,191	21.6

¹2,696 stations reported in 1955.
²Some small amount of network and national non-network time sales may be included here since stations with less than \$25,000 time sales for the year do not report detailed revenue breakdown.
 Note: Excludes 51 independently operated fm stations.

BROADCAST REVENUES, EXPENSES AND INCOME OF FREQUENCY MODULATION (FM) STATIONS — 1955-1956

Industry Total	—	—	—	—

() Denotes loss.

¹In view of the difficulty in a joint am-fm operation in allocating fm operation expense separately from am station operation expense, licensees of such stations were not required to report fm station expense separately. As a result, fm industry totals for expense and income are not available. Am-fm licensees, however, were requested to report separately the revenues, if any, attributable to fm station operation if such data was readily available. In only a few instances did am-fm licensees state they were unable to segregate the fm revenues.

The radio-television payroll

There are 71,728 persons employed full-time at U.S. radio and television stations.

There are more than six times as many radio stations as television stations, but 40% of the total broadcast station personnel is employed in tv stations. The figures are: radio stations, 42,523; tv stations, 29,205. The typical television station employs more than five times as many full-time executives and staff people as the typical am station.

The employment figures were obtained in a BROADCASTING YEARBOOK survey of radio and television stations. Of the 3,271 am stations on the air at the time the survey was made, 2,427 reported. Of the 495 commercial television stations, 300 replied. The results were projected to total

operating stations.

A tabulation of the survey showed that the typical am station has 10 full-time employees; the typical television station has 51.

The employment data obtained in the BROADCASTING YEARBOOK survey showed a wide range of staff size in both radio and television.

Several radio stations have a full-time staff of one; 386 stations hire fewer than five persons; 1,706 have 10 or fewer; 758 have 16 or more; 223 have 25 or more. Four radio stations reported staffs of more than 100.

Only 80 tv stations employ 25 or fewer; 237 employ 50 or fewer; 258 employ 51 or more, and 58 employ more than 100. One tv station reported a full-time staff of 220;

two had 200, one 190, one 175, three 160 and three 150.

The YEARBOOK figures do not include the overlap in radio and television stations under common operation where employees work on both stations.

There are 14,620 full-time executives and employees at the national radio and tv networks. Here, as supplied by networks themselves, are the total staff of each (radio and tv combined for those networks having both: ABC 2,525, CBS 6,327, MBS 168 and NBC 5,600.

The employees of stations and networks add to 86,348 full-time staff members in broadcasting. The U. S. Dept. of Commerce estimated that the annual broadcasting payroll in 1957 was \$527,000,000.

RADIO-TELEVISION STATION EMPLOYMENT

In this table, groupings of full-time staffs have been made, and the percentage of total stations employing that number is shown. For example 1% of all television stations and 11.8% of all radio stations employ total full-time staffs of from one to five persons.

Number of Employees	1 to 5	6-10	11-15	16-20	21-25	26-30	31-35	36-40	41-45	46-50	51-60	61-70	71-80	81-90	91-100	Over 100
Television Stations	1.0%	1.0%	2.0%	8.0%	4.3%	10.0%	4.7%	8.0%	4.3%	4.7%	13.3%	12.0%	9.3%	2.7%	3.0%	11.7%
Radio Stations	11.8%	40.2%	24.9%	10.9%	5.4%	1.9%	2.0%	1.0%	0.7%	0.5%	0.2%	0.2%	..	0.1%	0.1%	0.1%

Specialty programming on radio and tv

Extent of Editorializing On Radio and Tv Stations

Radio stations do more editorializing on the air than television stations according to an industrywide survey conducted for the BROADCASTING YEARBOOK.

Based on answered questionnaires supplied by over three-fifths of all the am and tv stations on the air, the survey showed:

- 1,181 am stations, 36% of those on the air, are editorializing daily, weekly or occasionally.
- 131 tv stations reported they are editorializing, 26.4% of those on the air.

A summary of the YEARBOOK tabulation, based on an editorializing query appearing on questionnaires used in compiling station directory listings, is broken down by type of station (am radio and tv) and by frequency (daily, weekly, occasionally). The question read: "Does station editorialize? Yes _____; No _____. If Yes, how often? Daily _____; Weekly _____; Occasionally _____."

The am radio results follow:

Stations reporting they editorialize1,181
Total am stations on the air3,271
Percent editorializing36.0%
Of stations editorializing 17.9% do so daily,
9.4% weekly, 72.7% occasionally.

Tv results:

Stations reporting they editorialize131
Total tv stations on the air508
Percent editorializing26.4%
Of stations editorializing 8.4% do so daily,
9.2% weekly, 82.4% occasionally.

Foreign Language Programming On U. S. Radio Stations

Note: This list is arranged by languages and reports the stations broadcasting each tongue and the number of hours broadcast per week. Each station carrying foreign language programs is also listed in the Directory of Am and Fm Radio Stations in the U.S. beginning on page B-234. In that directory, the complete list of languages carried by each foreign-language station is reported. Asterisk (*) denotes non-commercial educational.

 KMCS Seattle, Wash., BMS, SC.

Fm Stereophonic Broadcasting

Note: The frequency modulation stations listed below have reported broadcasting stereophonic sound. Stereophonic broadcasts require the transmission of two signals. The combination of signals used by each of the following stations is indicated by symbols: Fm-Fm (the originating fm station operating in conjunction with another fm station), Fm-Am (the originating fm station operating in conjunction with an am station), Fm-M (the originating fm station using its main carrier and a multiplex signal), Fm-Tv (the fm station operating in conjunction with a television station).

WTBC-FM Tuscaloosa, Ala., Fm-Fm.
 KWJB-FM Gibe, Ariz., Fm-Am.
 KELE-FM Phoenix, Ariz., Fm-Am.

Film: how much is used

Analyses of the film and live programming, based on reports from U. S. television stations and networks, have been a continuing feature of BROADCASTING since 1953. Current year's statistics cover the week of June 8-14, 1958.

Prior to 1958, the surveys had been conducted semi-annually. With television enjoying a more stable status, the frequency of this live versus film report has been changed to once-a-year.

1. Total Non-Network Film

Radio and Tv Reference Books

Editor's Note: This bibliography supplements other listings that have been published in BROADCASTING YEARBOOK-MARKET-BOOK volumes. The word "Apply" does not guarantee that material is available. This bibliography is representative of publications of the broadcasting industry, and does not pretend to be all-inclusive. It was prepared by Louise K. Aldrich, librarian, NAB Research Dept.

GENERAL

BEHIND THE SCENES IN TELEVISION. By David C. Cooke. Dodd, Mead & Co., 432 Fourth Ave., New York 16. 1958. 64 p. \$2.25.

Behind the scenes in a large network television studio to show the work, departments, and people involved in producing a television show. Planned for ages 8-12. Well illustrated.

COMMUNICATIONS: KEY TO SO MUCH. John E. Drewry, Editor. U. of Georgia Press, Athens. 1957. 191 p. \$3.00.

Subtitled "press, radio, television, periodicals, public relations, and advertising as seen through institutes and special occasions of the Henry W. Grady School of Journalism."

EMPLOYMENT OUTLOOK IN RADIO AND TELEVISION BROADCASTING OCCUPATIONS. A reprint from the Occupational Outlook Handbook, 1957 edition. Bul. No. 1215-27. Government Printing Office, Washington 25, D. C. 1958. 15 p. 15c.

Describes employment outlook, training requirements, earnings and working conditions in radio and television industry.

ENCYCLOPAEDIA OF RADIO AND TELEVISION. 2nd ed. J. H. Reyner, technical consultant. Philosophical Library, 15 E. 40th St., New York 16. 1958. 736 p. \$12.

More than 3,000 entries and nearly 800 illustrations, plus a separate data reference section, are included in the volume designed to help the novice as well as the expert. New entries dealing with fm, vhf broadcasting, color television, and other advances are featured.

FILM MANUAL, 1957-58. National Assn. of Broadcasters, 1771 N St., N.W., Washington 6, D. C. 1958. 35 p. \$1.00.

Members of NAB Television Film Committee participated in preparation of fourth edition of this manual. All facets of film room procedure and film buying are covered.

FIRST DECADE OF TELEVISION IN VIDEOTOWN, 1948-1957. Cunningham & Walsh, Inc., 260 Madison Ave., New York 16. 1957. 44 p. Apply.

10th annual edition of continuing survey of representative community showing impact of television as an advertising medium and its influence on human behavior. Analysis of trends in tv viewing and radio listening, growth of television and radio ownership, etc.

MASS COMMUNICATORS. By Charles S. Steinberg. Harper & Bros., 49 E. 33rd St., New York 16. 1958. 470 p. \$6.

A useful tool for the public relations practitioner as well as any radio and television executive, the volume presents an historical and analytical evaluation of the mass media of communication.

MEASUREMENT OF MEANING. By Charles E. Osgood, George J. Suci, and Percy H. Tannenbaum. U. of Illinois, Urbana. 1957. 342 p. \$7.50.

This book is largely a progress report of seven year's research on the objective measurement of meaning. A thorough analysis of the theoretical background, the logic of semantic measurement, the basic factor research and a critical scientific evaluation of their measurement procedures. Includes a survey of tv viewers and non-viewers to a congressional hearing telecast; discusses effects of background music in broadcast drama and the application of color in advertising.

MIKE AND SCREEN PRESS DIRECTORY. 4th edition. Published by Radio-Newsreel-Television Working Press Assoc., Hotel Shelton, New York 17. 1958. 218 p. \$10.

Designed as a daily reference guide for newsmen in radio, television and newsreels, this volume follows the pattern of other editions in listing key contacts in the news, public relations and government fields.

RADIO AUDIENCE MEASUREMENT. Report of Radio Research Committee, January 1958. National Assn. of Broadcasters, 1771 N St., N.W., Washington 6, D. C. 23 p. Apply.

A re-examination of some of the basic methodological problems involved in radio audience research; description and evaluation of current rating methods; and, possible approaches to sound and fair estimates.

RESPONSIBILITY IN MASS COMMUNICATION. By Wilbur L. Schramm. Harper, 49 E. 33rd St., New York 16. 1957. 414 p. \$4.50.

Study of growth, philosophy, ethics and responsibility of the major mass communications groups, and especially valuable for its stress on the responsibility of the public. Mostly favorable to advertising.

TECHNIQUES FOR MEASURING TELEVISION STATION CIRCULATION. Prepared by

NAB Audit Television Circulation Research Committee. National Assn. of Broadcasters, 1771 N St., N.W., Washington 6, D. C. 1958. Apply.

Presents the results of exploratory research work in the field of circulation measurement which has been conducted under auspices of NAB for several years.

TELEVISION FOR CHILDREN. Foundation for Character Education, Boston U. School of Education. 1957. 56 p. Apply.

Discusses briefly the characteristics of children's programs, concerns of parents, problems of the broadcaster, children's reactions.

TELEVISION TALKS 1957. Transcribed from BMI Tv clinics. Channell Press, 159 Northern Blvd., Great Neck, N. Y. 1957. 429 p. \$12.50.

Report of regional meetings—subjects covered: special events, films, color tv, local service programming, station promotion and management.

THIRTY-YEAR HISTORY OF PROGRAMS CARRIED ON THE NATIONAL RADIO NETWORKS IN THE UNITED STATES, 1924-1956. Compiled under the supervision of Harrison B. Summers. Dept. of Speech, Ohio State U., Columbus, Ohio. 1958. 228 p. Apply.

A year-by-year record of programs from the first season of formally organized networks through that of 1955-56. Effort made to classify, note sponsorship, seasons on the air, and program length, day, hour.

WORLD RADIO HANDBOOK FOR LISTENERS. 12th edition. Published and edited by O. Lund Johansen, Copenhagen, Denmark. November 1957. 174 p. \$2. Available from Gilfer Assoc., P. O. Box 239, Grand Central Station, New York 17.

This 1958 handbook lists in English the broadcasting companies of the world, their stations, personnel and programming hours.

LEGAL ASPECTS & REGULATION

COPYRIGHT AND PERFORMING RIGHTS. By W. J. Leaper. Stevens & Sons, London, England. 1957. 231 p. 25 shillings.

Intended as a practical guide on the copyright and performing rights, this book deals with the British Copyright Act of 1956, which came into force on June 1, 1957. The new Act, which provides protection for literary, dramatic, musical and artistic works, sound recordings, cinematograph films, tv and sound broadcasts, is dealt with in a concise yet readable manner.

NETWORK BROADCASTING. U. S. 85th Congress, 2nd Session. Government Printing Office, Washington 25, D. C. 1958. 737 p. \$2.

Comprehensive network study report by special FCC staff, headed by Dean Roscoe L. Barrow of the U. of Cincinnati Law School.

RADIO AND TELEVISION. (Law and Contemporary Problems. Vol. 22, No. 4, Part I; Vol. 23, No. 1, Part II) Duke U. School of Law, Durham, N. C. 1957-58. \$2 each part.

A symposium on government regulation of radio and television, and operational problems of the industry. Contributors include Emmanuel Celler, Victor R. Hansen, Richard S. Saltant, Roscoe L. Barrow, Warren E. Baker, Ben C. Fisher, Harry P. Warner, Charles H. Tower, Robert W. Gilbert.

RADIO LAWS OF THE UNITED STATES. U. S. Congress. Government Printing Office, Washington 25, D. C. 1957. 204 p. 55c.

Contains text of the laws relating to broadcasting from June 24, 1910 to August 6, 1956.

STATISTICAL & FINANCIAL DATA

DIMENSIONS OF RADIO AND TELEVISION. The scope of a great industry. Research Dept., National Assn. of Broadcasters, 1771 N St., N.W., Washington 6, D. C. 1957. 15 p. Apply.

A compilation of data on broadcasting for use by broadcasters.

ELECTRONICS INDUSTRY FACTBOOK. 4th edition. Prepared by Marketing Data Dept., Electronics Industries Assn., 1721 De Sales St., N.W., Washington 6, D. C. 1958. 28 p. 50c.

Statistics for consumer products, military and industrial, parts and tubes, etc.

FINAL AM-FM BROADCAST FINANCIAL DATA—1956. Federal Communications Commission, Washington 25, D. C. 1958. 18 p. Apply.

(Public Notice 54034) Tables contain finan-

SPECIAL SERVICES

There are two companies which provide special publishing services of FCC actions and other engineering and legal matters pertaining to broadcasting. They are:

Fike & Fischer. 1735 DeSales St., N.W., Washington 6, D. C. Sterling 3-3660. Henry G. Fischer, pres; John W. Willis, vp; Irving R. M. Parzer, sec-treas. Publishers of "Fike & Fischer Radio Regulation," comprehensive reports of FCC rules, amendments, decisions and related radio and tv documentary services.

Broadcast Service Bureau Inc. P. O. Box 8, Silver Spring, Md. Juniper 7-7156. Supplies rules and standards to radio and tv stations.

cial data covering operations of am and fm stations and networks during calendar year 1956.

FINAL TV BROADCAST FINANCIAL DATA—1956. Federal Communications Commission, Washington 25, D. C. 1957. 2 p. Apply.

(Public Notice 40308) Tables contain financial data covering operations of television stations and networks during the calendar year 1956.

MASS COMMUNICATIONS: A Statistical Analysis. By Richard E. Chapin. Michigan State U. Press, E. Lansing, Mich. 1957. 156 p. \$5.75.

A compilation of 76 statistical tables of the communication field—newspapers, magazines, books, radio, television, motion pictures—and an analysis of the data.

RADIO 58, some salient dimensions of the medium—nationally and locally. A. C. Nielsen Co., 2101 Howard St., Chicago 45, Ill. 1958. 16 p. Apply.

Advertising, listening and audience coverage.

TELEVISION 58, some salient dimensions of the medium—nationally and locally. A. C. Nielsen Co., 2101 Howard St., Chicago 45, Ill. 1958. 16 p. Apply.

Booklet indicates seasonal variations in use, television program types attracting largest audiences and related facts.

23RD ANNUAL REPORT FOR THE FISCAL YEAR 1957. Federal Communications Commission. U. S. Government Printing Office, Washington 25, D. C. 1958. 166 p. 50c.

The FCC report with its introductory summary and notations of later important developments is an invaluable source of statistical and financial information; other data concerning the regulation of the broadcasting industry.

EDUCATION

AUDIENCE FOR EDUCATIONAL TELEVISION. Ryland W. Cray, Editor. Educational Television and Radio Center, 2320 Washtenaw Ave., Ann Arbor, Mich. 1957. 115 p. Apply.

Includes a summary statement and excerpts from research studies by Wilbur Schramm, Richard I. Evans, J. Stacy Adams, Irving Merrill, Stephen Withey, Kent Geiger and Robert Sokol.

DIRECTORY OF COLLEGE COURSES IN RADIO AND TELEVISION, 1957-58. By Gertrude G. Broderick. U. S. Dept. of Health, Education and Welfare, Washington 25, D. C. 1958. 44 p. Apply.

A mimeographed list of colleges reporting courses in radio and television, with special designation for those offering degrees in communications and the names of instructors in charge.

EMPIRE STATE FM SCHOOL OF THE AIR: Tenth Anniversary. Radio-Television Center, Syracuse U., Syracuse 10, N. Y. 1958. Apply.

Booklet describes the New York state broadcasting network. Additional information such as costs and programming may be secured from the Executive Secretary.

LIST OF EDUCATIONAL AM AND FM RADIO AND TELEVISION STATIONS BY STATE AND CITY, as of November 1957. Prepared by Gertrude G. Broderick. Office of Education, U. S. Dept. of Health, Education and Welfare, Washington 25, D. C. 1957. Apply.

The listing includes call letters, frequency and power, licensee, and name of general manager and/or program director.

MASS COMMUNICATION AND EDUCATION. Educational Policies Commission, National Education Assn. and American Assn. of School Administrators. 1201 16th St., N.W., Washington 6, D. C. 1958. 137 p. \$1.50.

The book is intended to serve as a guide to the educator in his thinking about, and study of, the field of mass communication.

TELEVISION IN EDUCATION. By Franklin Dunham and others. (U. S. Dept. of Health, Education and Welfare, Bulletin 1957, No. 21) Government Printing Office, Washington 25, D. C. 1954 p. 55c.

An over-all view of television as applied to education.

TWO-WAY CLOSED CIRCUIT EDUCATIONAL TELEVISION. By John R. Martin. Case Institute of Technology, Cleveland, Ohio. 1957. (Nos. 948-1 and 948-2) Apply.

The first two of a series concerned with the exploration of areas where closed circuit television can be used to improve the quality of instruction.

TV AND OUR SCHOOL CRISIS. By Charles A. Siepmann. Dodd, Mead, 432 Fourth Ave., New York 16. 198 p. \$3.50.

Extensive use of educational television in the classroom and on the campus is strongly urged by an educator who incorporates the results of several surveys in his discussion.

ADVERTISING & SELLING

ADVERTISING AND MARKETING TO YOUNG PEOPLE. By Eugene Gilbert. Printers' Ink Books, Pleasantville, N. Y. 1957. 382 p. \$7.50.

Study of how advertising influences or is

influenced by young people; the part children of various ages play as consumers is emphasized.

ADVERTISING COPY, LAYOUT AND TYPOGRAPHY. By Hugh G. Wales, Dwight L. Gentry, and Max Wales. Ronald Press Co., 15 E. 26th St., New York 10. 1958. 491 p. \$7.50. In stressing fundamentals and simplified procedures, this book should be of value to both the beginner and the veteran in advertising. It describes how closely copy, layout and typography are combined to achieve a single effect in the successful advertisement. There are separate chapters on the radio commercial and the television commercial.

AN AD MAN AD-LIBS ON TV. By Robert L. Foreman. Hastings House, Pub., 151 E. 50th St., New York 22. 1957. 173 p. \$4.50.

A collection of magazine articles based on the author's experiences in advertising and television.

MADISON AVE, U.S.A. By Martin Mayer. Harper, 49 E. 33rd St., New York 16. 1958. 332 p. \$4.95.

With wit and finesse, Mr. Mayer has written an uncommonly lucid story of advertising—how it is created, how it is placed, how it is researched and who does all the different jobs.

MAKING ADS PAY. By John Caples. Harper, 49 E. 33rd St., New York 16. 1957. 248 p. \$4.50. Practical advice for copy writers, manufacturers, teachers and students of advertising. Considers writing headlines, story, and advertising copy, ad appeal, etc.

NEW TECHNIQUES IN MARKETING TECHNIQUES. By Harry Simmons. Prentice-Hall, Englewood Cliffs, N. J. 1958. 264 p. \$7.50.

Covers sales forecasting, advertising, sales promotion, direct mail, public relations, radio selling, and other current sales and marketing management techniques. Discusses the progress of television and automation.

SPOT TELEVISION ADVERTISING EXPENDITURES. Annual Report 1957. Issued by TVB, Television Bureau of Advertising, 444 Madison Ave., New York 22. 1958. 41 p. Apply.

Contains estimates of dollar expenditures, also product and service classifications.

STORY OF ADVERTISING. By James P. Wood. Ronald Press, 15 E. 26th St., New York 10. 1958. 512 p. \$6.50.

The growth of magazine and newspaper advertising in the U. S., rise of the advertising agency and the advent of radio are detailed and illustrated by Mr. Wood. The book is neither a critique nor a defense, but does highlight advertising's contributions during the two great wars. Six page bibliography.

TECHNICAL BOOKS

BOYS' BOOK OF RADIO, TELEVISION AND RADAR. Roy Publishers, 30 E. 74th St., New York 21. 1958. 143 p. \$3.

Scientific principles are explained for the young reader in this book of radio, television, radar, the electron, electronic eye, the use of television in industry. Over 130 diagrams, line drawings and photographic illustrations.

BOYS' SECOND BOOK OF RADIO AND ELECTRONICS. By Alfred P. Morgan. Scribner, 597 Fifth Ave., New York 17. 1957. 287 p. \$3.

Detailed description of radio parts and the construction of radio receivers, from a relatively simple set to a more complicated miniature home broadcasting station. Sections on transducers, transistors, and the method of making phonograph records are included.

CLOSED CIRCUIT TELEVISION SYSTEM PLANNING. By Morris A. Mayers and Rodney D. Chipp. John F. Rider, Pub., 116 W. 14th St., New York 11. 1957. 262 p. \$10.

Designed to answer all evaluation and planning problems in the use of closed circuit television. Stresses the systems aspects rather than equipment design.

ELECTRONICS FOR EVERYONE. By Monroe Upton. Rev. ed. Devin-Adair, 23 E. 26th St., New York 10. 1958. 370 p. \$6.

The subtitle: "the story of electricity in action; transistors, television, radio, radar, high fidelity, and other phases, what they are and how they work."

ELEMENTS OF COLOR IN PROFESSIONAL MOTION PICTURES. Prepared by a special committee of the Society of Motion Picture and Television Engineers, 55 W. 42nd St., New York 36. 1957. 104 p. \$3.50.

An explanation of the fundamentals and characteristics of color photography, films and processes. Also discusses color photography outdoors and in the studio, special visual effects and color television.

ELEMENTS OF MAGNETIC TAPE RECORDING. By N. M. Haynes. Prentice-Hall, Englewood Cliffs, N. J. 1957. 404 p. \$7.95.

Comprehensive compilation of technical information on magnetic tape recording and recording systems. With sections on apparatus and circuits and many diagrams and illustrations.

ESSENTIALS OF TELEVISION. By Morris Sturzberg, William Osterheld, and Elmo N. Voegtlin. McGraw-Hill, 330 W. 42nd St., New York 36. 1958, 687 p. \$8.50.

Of special value to television servicemen, this book is a useful reference for information on the theory of electronic circuits and vacuum tubes and their application in television receivers. The first two chapters present basic principles of television; other chapters describe various sections of receivers.

MICROWAVE PRINCIPLES. By Herbert J. Reich and others. Van Nostrand, Princeton, N. J. 1957. 436 p. \$8.75.

Planned for one-semester course at the advanced student level, the book is essentially an abridgement of "Microwave Theory and Techniques" from which the mathematical details have been eliminated. The sections on vector notation and methods have been rewritten, and problems and laboratory experiments have been added.

SOUND. By Dr. Alexander Efron. John F. Rider, Pub., 116 W. 14th St., New York 11. 1958. 69 p. \$1.25.

Another volume in "Basic Science Series" being issued for students, study-at-home group, and those interested in elementary data on scientific subjects. Book covers hearing, speech, and music, with discussion of the wave nature of sound. Illustrated.

TECHNIQUES OF MAGNETIC RECORDING. By Joel Tall. Macmillan Co., 60 Fifth Ave., New York 11. 1958. 472 p. \$7.95.

There is a foreword by Edward R. Murrow; and Chapter 7, Recording Sound in Nature, is by Peter Paul Kellogg. Theory, general principles of operation, and special techniques of recording sound on wire, tape, and film. Individual chapters by recording experts are devoted to use in medicine, education, public entertainment, and advertising.

TELEVISION IN SCIENCE AND INDUSTRY. By V. K. Zworykin, E. G. Ramberg, and L. E. Fjory. John Wiley & Sons, 440 Fourth Ave., New York 16. 1958. 300 p. \$10.

The book explores the functions, present and potential, of closed circuit or industrial television. Various chapters, amply illustrated, outline the application of closed circuit tv in research, medicine, education, commerce, and many other fields.

TRANSISTOR CIRCUIT ENGINEERING. Edited by Richard F. Shea. John Wiley & Son, 440 Fourth Ave., New York 16. 1957. 468 p. \$12.

Written by eight staff members of General Electric, this work shows how transistor theory can be put to work in typical circuits. It provides necessary tools for doing actual circuit designs and developing usable circuits in all potential fields of application. In addition, the book provides data on the newest developments and their application in broad new fields.

TRANSISTOR MANUAL. Second edition. General Electric Co., Syracuse, New York. 1957. 112 p. 50c.

Contains expanded basic information on transistors and their use in electronic circuits. The application section of the manual has been tripled in size and the device circuit diagram section has been almost doubled. Available also from local GE transistor and tube distributors.

ULTRA HIGH FREQUENCY PERFORMANCE OF RECEIVING TUBES. By W. E. Benham and I. A. Harris. McGraw-Hill, 330 W. 42nd St., New York 36. 1958. 173 p. \$6.50.

Presents theory of the conventional valve as a circuit element, with linear circuit analysis to be applied to the problem of valve amplifiers for small signals at ultra high frequencies and a simple detailed account of the electronic processes in a valve. The U.H.F. theory of the valve and transit time theory of thermionic devices are offered.

TECHNIQUES AND CAREERS

BEST TELEVISION PLAYS 1957. Edited by William I. Kaufman. Harcourt, Brace, 750 Third Ave., New York 16. 1957. 310 p. \$5.75.

This collection of winners of the Harcourt, Brace Awards has the complete scripts of "Requiem for a Heavyweight," "Cracker Money," "The Five-Dollar Bill," "The Trial of Poznan," "Survival," "Lee at Gettysburg," and "Thank You, Edmondo." Also has sections dealing with the television script market.

BEST TV HUMOR OF 1957. Edited by Irving Settel. Ballantine Books, 101 Fifth Ave., New York 3. 1957. 176 p. 35c.

Scripts from thirteen popular television shows, including "The Steve Allen Show," "Private Secretary," and "Father Knows Best."

COMMERCIAL RADIO OPERATOR'S LICENSE GUIDE—Elements 1 and 2. By Martin Schwartz. American Electronics Co., 1203 Bryant Ave., New York. 1957. 47 p. 75c.

Sample FCC type practice exams are included.

HOW TO GET INTO TELEVISION. By Robert S. Solotaire. Sheridan House, 257 Fourth Ave., New York 10. 1957. 189 p. \$3.75.

Subtitled: A guide to careers in television advertising, management, writing, and acting. Describes the kind of jobs available, how to go about getting a job. Notes opportunities for women in television.

HOW TO WRITE TELEVISION COMEDY. By Irving Settel. The Writer, Inc., 8 Arlington St., Boston 16, Mass. 1958. 228 p. \$4.

The editor has compiled a number of chapters on various aspects of comedy. Leading script writers tell how to write jokes, dramatic comedy, how to sell the finished product.

HOW YOU CAN BROADCAST RELIGION. Compiled by Clayton Griswold and Charles H. Schmitz. Edited by Lois J. Anderson. National Council of the Churches of Christ in the U.S.A., 297 4th Ave., New York. 1957. 128 p. \$2.

This book outlines types of formats for religious purposes; lists organizations that would be helpful in planning religious programs, and suggests how religious programs can meet the requirements of the broadcast media.

INDEX TO ONE-ACT PLAYS FOR STAGE, RADIO AND TELEVISION. By Hannah Logasa Fourth Supplement. 1948-1957. Faxon, 83 Francis St., Boston 15. 1958. 245 p. \$7.00.

Over 2,000 plays are included in this latest supplement, some in collections, and some published separately. Both U. S. and English publications are covered. Many of the plays are for children.

PLAYWRIGHT'S ART; Stage, radio, television, motion pictures. By Roger M. Busfield. Harper, 49 E. 33rd St., New York 16. 1958. 260 p. \$4.

Sound advice offered by a teacher of dramatic writing on such problems as the development of playwriting ability, finding dramatic material, creation of characters, plot construction, writing of dialogue. Exercises and projects, bibliography.

RADIO AMATEUR'S HANDBOOK. 35th edition. American Radio Relay League, 38 La Salle Rd., West Hartford 7, Conn. 1958. 582 p. \$6.

Annual review of latest developments in equipment and operation for amateurs.

RADIO OPERATOR'S LICENSE Q & A MANUAL. By Milton Kaufman. John F. Rider, Pub., 116 W. 14th St., New York 11. 1957. 720 p. \$6.50.

This is the sixth edition of the manual and includes all the latest question revisions, renumbering and deletions made by the FCC. Discussion of many of the questions has been amplified to supply the reader with maximum background information.

TECHNIQUE OF FILM AND TELEVISION MAKE-UP. By Vincent J-R Kehoe. Communication Arts Books, Hastings House, 151 E. 50th St., New York 22. 1958. 260 p. \$9.

The comprehensive treatment of make-up techniques for both color and black-and-white processes makes this book a valuable addition to the practitioner's library. Lavishly illustrated, clearly written and excellently annotated as to specific materials suggested for various jobs.

TELEVISION AND RADIO WRITING. By Stanley Field. Foreword by Franklin Dunham. Houghton, Mifflin, 2 Park St., Boston 7. 1958. 559 p. \$5.

Suggestions for the novice television and radio script writer interested in writing non-dramatic continuity, drama, and special types of programs. Includes information on copyright and marketing.

TELEVISION PLAYS FOR WRITERS. Edited by Abraham S. Burak. The Writer, Inc., 8 Arlington St., Boston 16. 1957. 402 p. \$5.

Eight dramas of various types which have been presented on television, with comments by the authors. Herbert Brodwin has written a foreword. Writers include Gore Vidal, Rod Serling, Tad Mosel, Horton Foote.

TELEVISION PRODUCTION. The Creative Techniques and Language of Tv Today. By Harry W. McMahan. Hastings House, Pub., 151 E. 50th St., New York 22. 1957. 231 p. \$7.50.

For everyone concerned with the television industry, this dictionary-type handbook interprets the working procedures of sixteen basic operations in television, from the scientific facts about tv image formation to advertising agency services.

Major trends, events

Note: These are brief references, grouped by subject matter, to a few of the major stories appearing in BROADCASTING magazine from mid-1957 to mid-1958. Dates in parentheses refer to issue dates of the magazine.

Advertising: What public really thinks of it (4/28/58).

Advertiser-Agency Relations: Account changes in 1957 (12/30/57); how Max Factor picked an agency (5/12/58); ANA's report (6/2/58); Fry Report—previewed (11/4/57), extolled (12/2/57), commented upon (12/9/57), appraised (2/24/58), analyzed and conclusions condensed (3/3/58).

Who owns an idea when an account changes agencies? Warwick & Legler enjoined Schick (10/28/57); Schick called idea public domain (11/4/57); case continued (1/13/58); permanent injunction passed against Schick (5/19/58); Schick motion to reopen case denied (8/12/58).

Advertiser-Broadcaster Relations: ANA campaigns against firm 52-week tv contracts (8/19/57); Bowman Gray of R. J. Reynolds and Revlon's George Abrams recite advertiser's worries (9/30/57); tv prices debated (1/13/58); Lever's Sam Thrum says 52-week contracts must go (2/3/58); NBC finds tv not overpriced (2/10/58).

Spot tv program plan developed by SRA Chicago (6/16/58); studied by Burnett and Kellogg (6/23/58); accepted by Kellogg, which will shift \$7 million from ABC-TV (6/30/58).

Time-sharing plan for General Foods-Bristol-Myers feared (7/29/57); won SRA approval (8/26/57); explained (9/20/58).

Triple-spotting: Benton & Bowles' Lee Rich proposed control (11/11/57); ANA denounced (5/28/58); NAB TV Code Review Board reviewed (6/16/58); extent shown (6/23/58); Wade ruled out for its clients (6/30/58).

Allocations: Got much attention, few decisions. Some noteworthy developments: Military needs threaten to take ch. 2-6 from broadcasting (8/12/57); Manufacturers and broadcasters urge sweeping spectrum study (9/16/57); FCC starts review of 25-890 mc (11/11/57). Conflict between FCC and Airspace Panel rules blocks proposals for vhf drop-ins (1/13/58). FCC Comr. Craven proposes consolidation of tv broadcast band (6/2/58, 6/9/58, 6/23/58) and ABC asks FCC to add a third vhf station to 14 major markets (6/16/58).

Audience: Aside from ratings (see listing under that heading), radio and tv audience trends were reported in the following articles, among others: Radio—Peters, Griffin, Woodward reports on nighttime radio (7/1/57); so does NBC Spot Sales (12/18/57); Christal-Politz study shows who listens, when and where (2/24/58). Television—TvB reports on the network tv audience (7/1/57); Katz Agency study claims spot tv delivers more for less (10/21/57); John P. Cunningham, president of Cunningham & Walsh, warns that the "boredom factor" is sapping tv's strength (11/4/57); U.S. Tv Census analyzes tv households by types, classes and areas (11/4/57); C & W's 10th annual Videotown report shows tv accepted as a routine part of life, shorn of its former novelty and excitement (12/9/57); TvB finds network tv audiences at an all-time high (1/4/58) and Nielsen data shows tv responsible for rises in radio-tv use at home (2/24/58).

Barrow Report: (So-called because it was produced by the special FCC Network Study Staff headed by Roscoe L. Barrow, dean of the U. of Cincinnati Law School) Recommended putting networks under direct FCC regulation, outlawing option time and must-buy practices and other changes in network operation (10/7/57). Richard A. Moore, president of KTTV (TV) Los Angeles, who first proposed the reforms included in the Barrow Report, and Congressional leaders endorse the report (10/14/57); Dept. of Justice awaits FCC action (11/11/57); CBS executives attack it (11/18/57, 11/25/57); Barrow replies (12/2/57); Station representative Ed Petry defends option time as FCC asks for comments (1/6/58), sets hearing (1/13/58); Broadcasters deny Barrow conclusions (1/20/58, 2/17/58, 3/3/58, 3/10/58, 3/17/58, 3/24/58, 4/14/58); Station Representatives Assn. opposes network sales representation of non-owned stations (5/26/58); Dept. of Justice calls option time, must-buy illegal (6/9/58). Networks oppose Bricker bill to put them under FCC regulation (6/9/58). Preceding Barrow report, staff report of Senate Commerce Committee, made similar recommendations (7/1/57).

Barter: Became vogue (7/15/57); radio as well as tv (8/12/57); value seen as depending on advertiser's need (10/7/57); ANA survey found little used (1/6/58); debated (1/27/58).

Commercials: Live or film? BROADCASTING surveys agency preferences (6/23/58); package seen as backbone of tv commercial by designer Jim Nash (11/4/57).

Commercials used by broadcast advertisers as described in BROADCASTING, included these:

Radio: Automotive—Cadillac (9/2/57), Dodge (10/14/57), Ford (10/14/57); Beverages—Budweiser (10/14/57), Gluek (6/30/58), Hoffman (10/14/57); Confections—Beechnut Gum (10/14/57); Foods—Pepperidge Farm (bakery) (10/14/57), NuCCA (7/29/57); Gas & Oil—Texaco (10/14/57); Toiletries—Coty (11/4/57), Pepsodent (10/14/57); Tobacco—Dutch Masters (10/14/57), Hit Parade (10/14/57), Marlboro (10/14/57), Winston (10/14/57).

Television: Agricultural—American Cyanamid (1/20/58); Appliances & Accessories—Atlas (water softener) (9/9/57), Delco batteries (11/18/57), Utility Appliance Corp. (12/23/57); Automotive—Chevrolet (5/26/58), Dodge (11/11/57), Edsel (11/18/57), Ford (11/18/57), Pontiac (12/23/57, 2/17/58); Beverages—Balandine (8/5/57), Budweiser (12/16/57), Coca-Cola (1/13/58), Heideberg (6/2/58), Pabst (9/30/57), Pepsi-Cola (5/5/58); Foods—American Dairy Assn. (1/6/58), Breast O' Chicken Tuna (1/13/58), Hi-Pro (cereal) (5/26/58); Soaps & Toiletries—Avon (1/6/58), Chiffon (10/14/57), Coty (10/14/57), Dash (8/19/57); Travel—Greyhound (8/5/57), Western Airlines (11/11/57); Miscellaneous—AT&T (Yellow Pages) (4/21/58), Chemstrand (nylon) (5/19/58), Dreyfus Fund (mutual fund) (9/16/57), Prestone (antifreeze) (9/16/57), Prudential Insurance (12/2/57), Sergeant's (dog care products) (6/9/58), Spratts Dog Food (5/12/58), Union Carbide (institutional) (1/13/58).

Community Antenna Services: First seen as a boon to tv, by extending program coverage into otherwise inaccessible communities, community antenna operations are now viewed as competitors of broadcasters, operating without regulation to block entry of tv stations into CATV markets. FCC says it lacks authority to regulate CATV (4/7/58); BROADCASTING publishes special report (5/12/58); FCC asks questions (5/26/58); Gov. Johnson blasts FCC for inaction as western broadcasters petition FCC to take authority (6/2/58); FCC urged to get authority from Congress (6/9/58); CATV operators defend themselves (6/16/58, 6/30/58); NAB to support test legislation vs. CATV (6/23/58); Stations tell FCC of CATV troubles (6/30/58).

Conrad: Converted to storm-warning duty (12/9/57, 12/16/57); progress report (6/23/58).

Congressmen in Radio-Tv: Itemized list of radio-tv station interests of Senators and Representatives (4/14/58).

Copyright: Sen. George Smathers (D-Fla.) introduces bill to divest broadcast licensees from ownership of music publishing or recording firms or music licensing agencies (BMI) (8/28/57, 9/2/57); Illinois Broadcasters Assn. deplores bill (10/7/57); to be heard by Senate Commerce Committee (1/27/58, 3/10/58); hearing begins (3/17/58); continues (3/24/58, 4/14/58, 4/21/58, 5/12/58, 5/26/58).

BROADCASTING publishes "ASCAP's War on BMI," an editorial (9/9/57); Bing Crosby blames BMI for degrading American music (7/1/57); House Small Business Committee hears ASCAP and BMI attacked and defended (3/17/58, 3/24/58); sends ASCAP file to Dept. of Justice (5/12/58).

ASCAP tv contract tentatively set (12/23/57); stations favor terms (12/30/57); sign new contracts (1/27/58); radio stations prepare for negotiations with ASCAP (5/5/58); elect a negotiating committee (7/14/58).

BMI, networks, other defendants seek dismissal of \$150 million songwriters' suit, pending for four years (3/31/58).

Courtroom Access: Broadcasters last year continued to fight against Canon 35 of American Bar Assn., barring cameras and microphones from courtrooms. Major events in the struggle were: KCMC-TV Texarkana, Tex. covers murder trial with film (7/15/57); John Daly tells ABA facts of broadcast coverage (7/22/57); Charles Shaw (WCAU-AM-TV Philadelphia) says broadcasters must earn access to courts (9/23/57); Judge Pringle praises KOA-TV Denver trial coverage (10/14/57); American Bar Association committee recommends retention of Canon 35; NAB, Radio-TV News Directors Assn., American Society of Newspaper Editors protest ABA report (11/4/57); so does Radio-TV Newsreel-Working Press Assn.; Colorado Judge Moore tells ABA to wake up and live in 20th Century; WHAS-AM-TV Louisville gives year-long news-in-depth robbery coverage (11/11/57); Wisconsin judges question Canon 35 (1/20/58); ABA postpones action on Canon 35 until August convention (3/3/58); Judge Blair praises courtroom manners of KOMU-TV Columbia, Mo. (4/14/58); Illinois judges like Canon 35 (5/19/58); Oklahoma appeals court spurns Canon 35, upholds radio-tv right to enter courtrooms (9/8/58).

Daytime Broadcasters: Block Senate ratification of 1950 NARBA and Mexican radio treaties as endangering their quest for longer hours of operation (7/15/57, 8/19/57); Senate blasts FCC for lack of action on daytime problems (9/16/57); FCC Comr. Lee asks daytimers to drop opposition (12/9/57); FCC asks for comments on daytimers bid for longer hours (12/23/57); comments forecast battle (5/26/58).

Other radio allocations stories included: Local stations say FCC plan to increase their power from 250 w to 1 kw is not enough (12/9/57); FCC proposal to duplicate half of 24 Class 1-A clear channel frequencies (4/21/58) is opposed by 1-B and regional stations (6/16/58).

Editorializing: Urged by Gov. Robert D. Holmes of Oregon (10/21/57), at WBC program

clinic (3/10/58) and NAB convention (5/5/58); hits headlines (5/26/58).

Education: Tv helps build child character, association declared (9/9/57); educational television after five years—a BROADCASTING special report (11/11/57); California Commission commended radio (11/18/57); Ford Foundation gave ETV \$2.5 million in 1957 (1/13/58); "patron" plan for ETV (2/10/58); WOR-TV's daytime education plan (3/17/58); Senate hearings on ETV subsidy (4/28/58) won approval (6/2/58); New York ETV broke (5/26/58); Ford to the rescue (6/2/58).

Facts and Figures: Tv station week breakdown by programming and hours (7/29/57); FCC report on 1956 revenue for tv (8/26/57, 9/23/57, 2/17/58), for radio (1/6/58); radio income to hit \$794 million in 1965 (10/7/57); Commerce Dept. report on U.S. incomes, 1955-56 (10/14/57); top 50 radio-tv agencies and 1957 billings (11/25/57); 1957 time sales and where the money went (2/24/58); set sales for 1957 (2/10/58); spot tv 1957 billings (3/3/58); top 100 clients (3/17/58); top tv network clients and for network-spot combined (3/31/58).

Federal Communications Commission: It got a new chairman, John C. Doerfer (7/1/57), two new commissioners, Frederick W. Ford (7/8/57, 9/2/57) and John S. Cross (3/17/58, 3/31/58, 5/19/58); lost one member, Richard A. Mack, resigned (8/10/58) as result of charges made by House Legislative Oversight Subcommittee (see separate listing) during investigation of FCC, which itself stirred up broadcasters with its special staff report of network activities (see Barrow Report).

Film: Continued to grow in importance as a source of programming for tv (7/29/57); with all kinds of advertisers sponsoring all types of filmed programs (9/2/57). Films on tv seen as keeping people away from movie theatres (2/5/58). Economics of tv film syndication analyzed (6/5/58). How a pilot was made (5/12/58). A primer of film commercials (6/19/58). Filming a series in Africa (6/2/58). Sale of post-'48 movies to tv was hotly debated: Screen Producers Guild opposed as United Artists planned sale (12/16/57); guilds protested sale by Republic to NBC (1/27/58); UA curbs plans as Paramount's Balaban urges no sale (2/17/58); Screen Directors Guild asked 25% of proceeds (2/17/58), settled for right to hold individual negotiations on sales (7/7/58).

Films vs. Live: Live tv's the best, David Susskind declared (12/30/57); film's good too, responded Leslie Harris (1/13/58).

House Legislative Oversight Subcommittee: To investigate all government regulatory agencies, picks FCC as first target (7/8/57); asks NAB, networks and others for all records of communications with FCC (10/14/57); FCC says what ground it would like to have committee cover (10/21/57). Committee Chairman Morgan Moulder promises not to change FCC decisions (10/28/57). FCC agrees to answer questions on gifts (12/23/57), committee sets course of hearing (1/20/58). Committee Counsel Bernard Schwartz accuses FCC of skulduggery (1/27/58). FCC Chairman Doerfer is grilled about travel expenses (2/3/58). FCC Commissioner Mack denies charges of selling his vote in ch. 10 Miami case (2/10/58, 2/17/58, 2/24/58, 3/3/58), but resigns (3/10/58) while committee drops Schwartz and Rep. Oren Harris, chairman of House Commerce Committee, takes over subcommittee chairmanship from Rep. Moulder (2/17/58); Committee continues review of ch. 10 case (3/17/58, 3/24/58); gets new chief counsel, Robert W. Lishman (3/31/58); indicts FCC behavior in interim report (4/7/58) which arouses limited reaction (4/14/58). Rep. Harris introduces bill (HR11886) to require FCC to adopt a code of ethics (4/21/58). Committee attacks FCC policies on patents (4/28/58) and on license transfers (6/19/58); FCC defends patent practices (6/19/58). Committee looks at ch. 2 Springfield, Ill. grant (8/26/58) and at a grant for ch. 5 Boston (6/9/58, 6/16/58), where FCC is overshadowed by Adams-Goldfine relationship (6/23/58).

Following committee disclosures, U. S. Court of Appeals remands ch. 10 Miami case to FCC for further consideration (4/21/58); FCC asks for clarification of order (4/28/58); court replies for FCC to set its own procedure (5/19/58); FCC instructs staff to draft hearing order (5/26/58); selects Judge Stern as hearing examiner (6/23/58); he sets hearing for Sept. 8 (6/30/58). Dept. of Justice will sit in on hearing (6/2/58, 6/9/58).

In-Store Promotions by stations attacked in FTC examiner's recommendation (10/28/57); argument (4/14/58); FTC found plans discriminatory (5/26/58); NBC revamped "Chain Lighting" plan to comply (6/30/58).

International: Tv booming in Japan (9/2/57); Slam radio modeled on U.S. (10/21/57); British commercial tv's first two years (12/2/57); income doubles from 1956 to 1957 (3/31/58).

Investigations: High cost of being investigated—a BROADCASTING special report (3/31/58); Dept. of Justice (3/3/58, 4/14/58) (See also Barrow Report, House Legislative Oversight Subcommittee).

Junkets: Are they worth it? Timebuyers said yes (8/26/57).

Labor Relations: Status and outlook of radio and tv labor relations summarized (2/24/58). American Federation of Musicians had its veteran president, James C. Petrillo, resign (5/19/58) and elected Herman D. Kenin to succeed him (6/9/58); defended itself against suits brought by rebellious Hollywood musi-

clans to alter AFM's trust fund policies (8/5/57, 11/11/57, 1/13/58); struck against motion picture producers (2/14/58, 3/2/58, 3/10/58); was challenged by a new musicians union, Musicians Guild of America (3/31/58), which asked for NLRB election by musicians employed by major motion picture producers (5/12/58, 5/26/58, 6/16/58) and won it (7/14/58); reduced trust fund requirements in deals with Revue (6-16-58) and Desilu (6/30/58).

American Federation of Television & Radio Artists was charged with illegal boycott in connection with its strike against WKYC Cincinnati (11/18/57, 11/25/57, 1/6/58; disrupted VTR jurisdiction with SAG (See Videotape); struck against WINS New York (6/28/58).

International Brotherhood of Electrical Workers dispute with CBS over blackout of a New York CBS-TV program (11/11/57) found NLRB siding with CBS (12/2/57); struck CBS radio and tv networks (4/14/58, 4/21/58); respected AFTRA picket line at WINS New York (6/28/58).

National Assn. of Broadcast Employees and Technicians struck against KVOO Tulsa (10/14/57); dispute with RTDG caught NBC in the middle (11/11/57), AFL-CIO President Meany agreed to arbitrate (11/18/57) and decided in favor of RTDG (12/2/57); threatened to strike ABC, NBC (2/3/58), but finally negotiated new contracts without work stoppage (5/19/58).

Screen Actors Guild asked scale boosts of up to 100% for work on tv film commercials (1/20/58); negotiated with producers (3/10/58, 3/17/58); agreed on new contract (3/24/58).

Screen Directors Guild began negotiations for new contracts with producers of theatrical and tv films (2/17/58), resumed them after nearly resorting to a strike (5/12/58); signed new agreements (7/7/58).

Medical Advertising: Called distorted on tv (1/27/58); "white coat" commercials condemned by AMA (5/26/58), outlawed by NAB TV Code Review Board (6/23/58).

Music: How disc jockeys select it (3/17/58). Top 40 programming attacked by Ernest Hodges of Guild, Bascom & Bonfill (4/14/58); defended by Adam Young (6/2/58); disliked by timebuyers, according to NBC survey (6/30/58), which was called biased by station operators and representatives (7/7/58).

NAB 1958 Convention: Program and papers (4/21/58); preview (4/28/58); reported in full (5/5/58); what broadcasters thought of it (5/5/58, 5/12/58).

News: Must be kept free from censorship (7/8/57); little influenced by advertising (7/15/57); farmers depend on radio-tv for it (12/9/57); stations find it profitable (2/24/58); broadcast media get it to public first (3/17/58).

Networks: NBC President Robert Sarnoff explains how NBC charts the course of its radio and tv networks (9/9/57).

Television Networks: Schedules for 1957-58—evening (8/12/57)—daytime (9/16/57); were linked with Cuba (8/19/57); had summer schedules heavy on reruns (4/7/58); adjusted rates (4/21/58); were accused of going sterile (5/26/58). ABC-TV set its goal as evening leadership by April 1958 (11/25/57). CBS-TV divided into stations and network divisions (3/17/58); eased daytime rates (4/21/58).

Radio Networks were seen as on the upgrade by their presidents and by BEDO's director of network radio (12/2/57).

American Broadcasting Network's new look was explained by President Robert Eastman (9/16/57); ABN presented "All-American Package" programming (11/11/57); switched to record shows (1/27/58); modified live program ban (2/3/58); explored press association plan (3/7/58); was tempted to go out of business (3/17/58); James Riddell was made executive vice president of ABC-TV and ABN and ABN reorganized (3/24/58); Eastman resigned (3/31/58); Edward DeGray came in as ABN became ABC Radio (4/7/58).

CBS Radio Network had increased income for first time since 1950 (11/11/57).

Mutual Broadcasting System: Considered shutdown (7/15/57) or sale (7/22/57), was sold (7/29/57) and reorganized (8/5/57, 8/19/57); planned an fm network (12/30/57); eliminated bonus stations (1/27/58); formed East Coast auto network (2/3/58); shook up top executives (3/3/58); reassured affiliates (3/10/58); changed its operating head (6/9/58); was sold again (9/15/58).

NBC radio vice president Matthew Culligan saw it as a critical time for network radio (8/3/57); NBC Radio got a new rate structure (9/9/57); increased station compensation (10/28/57); increased sales for year (1/13/58).

Newspaper Strikes: Created special demands on broadcasters in Boston (9/2/57, 9/9/57) and Philadelphia (6/9/58).

Parodies: Feared endangered by Supreme Court ruling in Jack Benny "Gaslight" case (3/24/58).

Ratings: Were used and misused, "cussed and discussed," with more vehemence than understanding by their users, more competitive arguments than education by their makers. Worth recalling: ARB's introduction of Arbitron, instant rating service (12/23/57); J. Walter Thompson's primer on ratings (3/10/58); NBC's survey of what timebuyers think about ratings (3/24/58); Revlon Vice President

George Abram's proposal for a single uniform audience measurement and its chilly reception (3/31/58); the testimony of rating service principals to the Senate Commerce Committee (6/30/58).

Recession: How stations combated it (3/24/58, 3/31/58, 4/7/58, 4/28/58).

Sec. 315 of the Communications Act, forbidding broadcasters to censor political remarks despite their legal liability for those remarks in many states and demanding they give equal time to opposing candidates, continued to cause headaches. One, a \$100,000 libel suit against WDAY-TV Fargo, was assuaged when the North Dakota Supreme Court held the station not liable (4/7/58). WDSU-AM-FM-TV sought to avoid another hassle by asking FCC to clarify two troublesome points (6/23/58).

Stereophonic broadcasts became more numerous, more popular as manufacturers of hi-fi equipment added stereo tapes, records and reproducers. Some stereo highlights were: American Airlines tested stereo in its "Music til Dawn" broadcasts (7/1/57); Southern California has tv-am and fm-fm stereo as well as am-fm (12/23/57); semantics enter stereo competition (4/21/58); manufacturers go all-out with stereo apparatus (6/9/58).

Subliminal advertising, presented in bursts too short to be consciously observed but supposedly making an impression on the viewer's subconscious, hit Madison Ave. last fall (9/16/57, 9/30/57), alarming Congress (11/11/57) and the NAB TV Code Review Board (11/18/57); stations began experimenting (11/25/57); BROADCASTING made a special report (12/2/57); Donahue & Coe's Walter Weir commented (12/16/57); the Vicary system was shown to government officials in Washington and the Precon system to advertisers and agencies in Los Angeles (1/20/58) where KTLA (TV) made arrangements to install Precon equipment (1/27/58), later postponing project indefinitely (3/17/58).

Subscription Television: Made news in Bartlesville, Okla., where an in-home program service of theatrical motion pictures was offered via closed-circuit on a monthly rental basis (9/9/57); got 600 subscribers (10/28/57), was surveyed by Sen. William Langer (R-N.D.) (11/4/57, 11/18/57, 12/9/57), lost its manager (12/23/57), lost money (2/10/58), reduced its fee (2/17/58) and picked up subscribers (3/10/58), but losses continued to mount (5/12/58) and the experiment was halted (5/26/58).

In Los Angeles, Skiatron's application for a city franchise to install a closed circuit pay tv system (7/1/57) was heard by the public utilities board (7/8/57) and the City Council (7/15/57), whose decision to offer non-exclusive citywide franchises drew an application from International Telemeter (7/22/57) and opposition from Tele Movie Development, which proposed a plan of small integrated community systems (7/29/57); Harriscope also applied for an L.A. franchise (8/5/57) and hearings continued (8/12/57, 9/2/57, 9/9/57, 10/7/57), until three non-exclusive franchises were issued and the companies asked to submit \$100,000 performance bonds (10/21/57, 10/28/57). Citizens Committee started collecting signatures to force a public referendum (11/6/57); city accepted bonds from Skiatron and Telemeter (12/16/57) and legal formalities were over (12/23/57), but petitions were filed (1/27/58) and pay tv forced to referendum (2/17/58); companies decided to pull out franchisees rather than continue fight (3/3/58); city cancelled grants (3/10/58).

Government also kept an eye on pay tv. New York City Council President Abe Stark denounced the Brooklyn Dodgers plan to move west with a toll tv tieup (7/1/57); Rep Emanuel Celler (D-N.Y.) warned the FCC not to act on pay tv without Congressional authority (7/15/57) and his committee heard testimony on the subject (7/22/57); Sen. Charles E. Potter (R-Mich.) attacked toll tv (8/26/57); as did Sen. Strom Thurmond (D-S.C.) (9/2/57); Sen. Carl T. Curtis (R-Neb.) asked for hearings on control of wired tv (9/9/57); state regulation was pondered (9/16/57); FCC revealed plans to accept applications for toll tv tests in March 1958 (9/23/57) and gave specifications for applicants (10/21/57); WSBS (TV) Philadelphia is first to file (12/30/57); House Commerce Committee set hearings (1/20/58, 1/13/58); proponents testified (1/20/58) and network heads opposed (1/27/58); FCC was told to hold up action until Congress acts first (2/10/58); FCC hesitated (2/17/58); Senate Commerce Committee approved Thurmond resolution telling FCC not to act without Congressional blessing (2/24/58); Rep. Oren Harris (D-Ark.) warned FCC not to approve toll tv after Congress adjournment (4/14/58); FCC still undecided (6/16/58).

Among unions, AFTRA adopted an anti-toll tv resolution (8/5/57); Writers Guild asked 10% of proceeds from sale of films to toll tv (10/14/57). Pro football head preferred free tv (7/29/57); NBC President Robert Sarnoff said that networks would have to get into toll tv if it comes (10/28/57); ABC opposed it (11/4/58) and public (11/18/57) and Theatre Owners of America (11/25/57) and American Citizens Tv Committee (12/2/57) and NAB (12/16/57). Various systems were demonstrated: to New York advertisers and agencies

(7/1/57) and others (8/19/57, 9/2/57); to NCAA (2/3/58); Selectivision was announced (11/25/57), scheduled for trial operation (1/13/58) and charged with fraud (3/17/58). Skiatron signed Sol Hurok as head of cultural entertainment (12/18/57). Photographic Analysis proposed plan to use power lines (2/3/58). WERE Cleveland suggested a subscription service for radio as well as tv (4/14/58).

Success Stories from satisfied users of the broadcast media included:

Radio: Automotive—Luby Chevrolet (dealer) (12/2/57); Sinclair (gas & oil) (10/14/57); Beverages—Budweiser (10/14/57); No-Cal (10/14/57); Pepsi-Cola (10/7/57); Rheingold (8/19/57); Tea Council (3/3/58); Drugs & Toiletries—Grove Labs (10/14/57); Shulton (7/8/57); Financial—Bache (9/9/57); Mid-America National Bank (8/5/57); Seaboard Finance (7/22/57); Talman Federal Savings & Loan (12/2/57); Universal CIT Credit (10/14/57); Foods—Best Foods (10/14/57); Bimbo's Drive-In (restaurant) (9/9/57); Frish (restaurant) (12/2/57); Kitchens of Sara Lee (bakeries) (10/7/57); Red Owl Supermarket (10/7/57); Musical—Gough Industries (hi-fi) (12/2/57); Tobacco—Philip Morris (10/14/57); Miscellaneous—Bandini Fertilizer (7/22/57); Bekins Van & Storage (12/23/57); Cook County Mobile Homes (3/24/58); Farmland (farm equipment) (9/9/57); Ice Capades (6/2/58); Lehigh Lumber (8/5/57); Short Run Stamping (9/9/57); Solfo Paint (12/2/57); Tampa Tribune (9/9/57); Trans World Airlines (10/14/57); Whitman (candy) (10/14/57); Retail Stores—W. T. Grant (9/9/57, 10/7/57); McAlpin (12/2/57); retail shopping district pre-Christmas promotions in Duluth and Seattle (12/16/57); Spiegel's Carpet & Linoleum Co. (9/9/57); Wayside Country Store (8/5/57).

Television: Automotive—Belcher Buick (dealer) (10/7/57); Dodge (10/28/57); Right Motors (dealer) (9/9/57); Beverages—Tea Council (10/7/57, 3/3/58); Delaware Punch (8/5/57); Financial—McDonald, Holman & Co. (8/5/57); Talman Federal Savings & Loan (12/2/57); Foods—Hough Bakeries (8/5/57); Kitchens of Sara Lee (10/7/57); Raiston Furina (1/20/58); Furniture & Appliances—Riviera (2/10/58); Utility (12/23/57); Waldheim's Furniture Store (11/11/57); Soaps & Toiletries—Lestol (11/4/57); Shulton (7/8/57); Miscellaneous—Balaban & Katz (movie theatres) (9/9/57); Ice Capades (6/2/58); McCullough's Chain Saws (12/2/57); Myron McIntosh (real estate) (10/7/57); Pacific Gas & Electric (6/16/58); Ron's Cleaners (8/5/57); Tampa Tribune (9/9/57); U. S. Steel (1/20/58).

Talent Agents: A BROADCASTING special report (10/21/58); investigated by Dept. of Justice (3/3/58, 4/14/58).

Tall Towers reared their high heads when FCC proposed rule making on antenna farms (11/25/57). Assn. of FCC Consulting Engineers asked for a year's delay (2/3/58); so did NAB (2/17/58); AFCEE and Federal Communications Bar Assn. initiated a joint study of tall tower locations (5/12/58) and the FCC put the matter off until June 1959 (6/9/58).

Tax write-offs on network affiliation, local and spot advertising contracts, denied in Westinghouse-WPTZ ruling (3/26/57), text (9/2/57).

Tax on Advertising proposed by Baltimore (11/11/57); adopted (11/18/57); faces court test (11/25/57); stations file suits (12/2/57); St. Louis considers similar action (12/2/57); so does Virginia (12/23/57); Van Sant condemns (12/23/57); idea spreads (12/30/57); media groups oppose (1/6/58); Baltimore tax limited to local advertising (2/3/58) and to 1958 as Maryland acts to stop any future advertising taxes in state (2/17/58, 3/10/58); court finds tax unconstitutional (7/14/58). Internal Revenue Service plan to tax co-op advertising meets opposition (6/2/58).

Ultra High Frequency tv stations had their troubles last year as in previous years, received consideration and sympathy but little relief. Attempts to help included: Bills in both Senate and House to lift 10% excise taxes from all-channel receivers (8/5/57); proposal to delimit New England with varied reactions (11/11/57); Assn. of Maximum Service Telecasters urges FCC to wait for report of Television Allocations Study Organization before disrupting present station assignments (11/25/57); broadcasters also urge delay (12/2/57); NBC decision to drop its uhf station WBUF (TV) Buffalo spurs FCC to reappraise situation (6/16/58).

Videotape Recording: Moved into color with RCA's demonstration (10/28/57, 1/20/58) and NBC's announcement that it would begin taping color programs in the spring (11/11/57) and the first RCA color VTR unit for local use was sold to WBTW (TV) Charlotte. VTR moved into stations as Ampex started delivery of production units, the first to KING-TV Seattle (11/25/57) and promised to fill all orders by April (12/9/57). Howard Meighan left CBS to form VTR commercial companies (3/31/58). Networks prepared to tape programs to solve daylight time problems (4/7/58). Screen Actors Guild and AFTRA got into tape jurisdictional squabble (4/14/58, 5/12/58, 5/26/58, 8/16/58, 8/23/58, 6/30/58). Tape, both monochrome and color, was highspot of NAB convention (5/5/58).

Voice of America: A BROADCASTING special report (1/6/58).

And in Radio, it's the KMBC-KFRM Team

in Heart of America

KMBC of Kansas City—KFRM for the State of Kansas

Leadership...

SINCE television began—and every year thereafter—one brand of TV has been the consistent leader in public preference, sales, and technical achievements. That brand, of course, is RCA Victor. Again this year, RCA Victor is first. A recent impartial survey

by leading newspapers—the Consolidated Consumer Analysis—shows RCA Victor TV in first place in 21 out of 22 key markets. And tied for first in the 22nd. This continuing popularity has led to an amazing television milestone...

This year RCA Victor builds its 10 millionth TV set and puts that unequalled experience into TV's greatest advances

In the new RCA Victor TV sets, you'll find advances like "One-Set" electronic fine tuning . . . "Wireless Wizard" electronic remote control that lets you tune from your easychair . . . new Mark Series Color TV with performance-proved dependability, easy tuning, and

improved "Living Color" picture.

With constant advances like these, RCA Victor continues to play a major part in the growth of television. For RCA Victor has brought to Americans more of the 47,000,000 TV sets now in use than any other company.
