All in the From headend to tap-off,

No one's growing like we're growing.

We're on the grow. We're reaching out and broadening our capabilities in the CATV industry. And no one else can offer the combination of skills and expertise, the high quality hardware, the innovative approaches to problem-solving, the unique services, the most advanced opportunities in systems development. No one but Theta-Com.

We're the "before" company.

If you own or operate a CATV system, or if you are considering expanding and updating a system, or are planning a new system, you really should talk to us "before." Before you string another inch of cable. Before you buy one more amplifier. Before you make any decisions regarding microwave Local Distribution Systems. Before you get involved in any type of Subscriber Response Systems. Before you contract for any turn-key installations.

Read about some of the things we do.

Then let us tell you more. No obligation. Just the simple truth on how we can do more for your system than anybody else in the business.

Our largest division has been around a long time.

How many systems does it take to prove yourself? Hardly one. Perhaps ten? Maybe fifty? Our CATV division has proven its product's reliability in HUNDREDS of systems across the nation!

This division manufactures distribution equipment including our famed XR Extended Range and XR-2 Two-Way amplifiers.* Through the use of modular units, we can create any type of system you're after. And if you're not ready to spend the money on a two-way system,

our equipment still lets you pave the way today for the future that's coming tomorrow.

We're into all kinds of passive devices and test equipment, too. Line Splitters, for example. Directional and Terminating Taps. Broadband Detectors and Marker Oscillators. Even a Cross Mod Analyzer that costs thousands less than the competition's.

But then, you probably know all about us. Because we've been around for quite some time building our reputation with high quality equipment you've learned to rely on. And that hasn't changed. Only our name is new. THETA-COM CATV.

THETA-COM
CATV

Our newest division ties it all together.

With its beautiful modern plant turning out the finest cable products you can buy, we figured its time had come. So it can concentrate on producing cable worthy of its name, we've made it a full division all its own. Coaxial Cable. Drop Cable. Messengered Cable.

Only the finest carries the name, THETA-COM CABLE!

family.

We've got it coming AND going.

Our oldest division will get you off the ground.

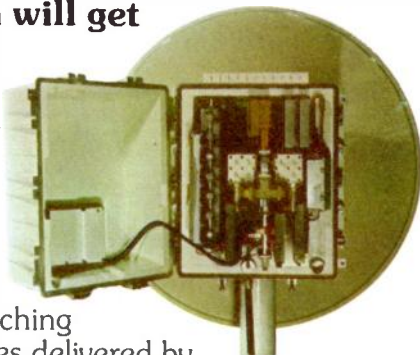

We were the first to put multi-channel microwave to work for a cable system. And ever since, we've led the industry in installations that work. At this very moment, people are watching Quality Television Pictures delivered by Theta-Com AML. AML? Amplitude Modulation Link. Our research determined that AML offered the best quality for CATV at lowest cost. And we ought to know, because we belong to the same family whose expertise created the sophisticated satellites used in global TV communications.

And system-proven AML is now available in FCC-approved single channel microwave for frequency conserving MARS band use. Consider its advantages for audio links, 2-way system return data and other commercial uses. Single or Multi-Channel, AML Microwave can give your system a lift.

THETA-COM™
AML

The future lies ahead.

We've built something in El Segundo, California, that brings the future into focus. It's our first Subscriber Response System (SRS), which is now in operation. Which means that the technology and equipment needed at both ends of broadband communications networks for

two-way TV systems is here. Now. Ready to go to work in a number of ways. Home shopping. Educational instruction. Reservation service. Data bank access. Premium entertainment. Restricted TV programming. Opinion polling. Emergency alarms.

The excitement of SRS stimulates the imagination. The future of television has really changed, thanks to two-way

CATV. And Theta-Com SRS is leading the way.

Interested?

Just ask us.

We'll tell you all we know.

THETA-COM™
SRS

What do you want from us, anyway?

We can just about fill any need your old OR new CATV system could desire. And our help doesn't end with the reliable equipment we build. Our field and in-house engineering services can design an entire system for you. We can supply the finest hardware available to build your system. And our training schools and expertise can keep your CATV system happily humming and worry-free.

Like we said,

we've got it coming AND going!

Now you know what we can do. And we humbly believe we can do it better than anybody else. One amp or a system full. Microwave LDS. CATV hardware. Passive devices. Cable. Subscriber response systems. Field surveys. Training schools. Whatever.

Our business is your business.

When it comes to CATV, we really know our business. And it's OUR business to know YOUR business. Ask us for help. We know what we're doing!

The 1801A CATV sweeper.

Star of screen and test bench.

Some sweepers are designed to be used on the air. Some are designed to be used on the bench. The 1801A is for both.

Its one to two millisecond sweep (with variable repetition rate) lets you simultaneously sweep operating systems without disturbing viewers. You can use the ultra-flat 75-ohm output to measure system flatness without anyone missing a bit of "HeeHaw." (Even though the 1801A sent out crystal-controlled frequency markers with the RF signal.) Nor will "All in the Family" viewers realize that the

90dB calibrated attenuator is giving you precise gain/loss readings, or that the electronic reference attenuator (± 0.05 dB to ± 0.5 dB) has allowed fast, accurate indication of return loss and tilt.

But the 1801A also performs well when nobody is watching. The 1 to 500 MHz frequency range and high output of +57 dBmV make it an ideal instrument for testing components or subassemblies in production lines or laboratories.

The 1801A sells for \$1,245 — \$1,445 with the additional optional 450 to 950 MHz band. Pretty

reasonable prices for an instrument that's been advertised on television.

Send for further details and application notes on the Model 1801A or contact a factory representative at the address below.

BIDIRECTIONAL CABLE TV SYSTEMS

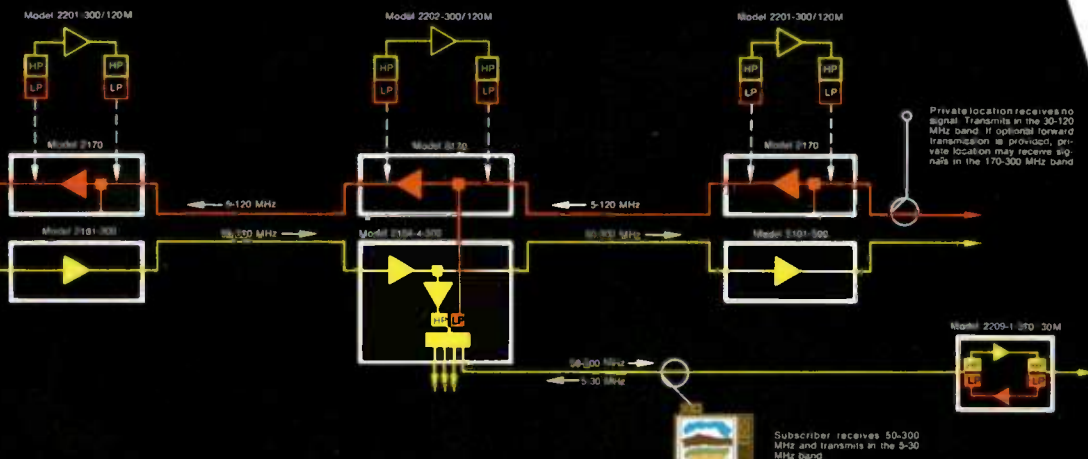

SINGLE TRUNK SINGLE FEEDER SUB-SPLIT

Bidirectional services can be provided via a single sub-split cable. Return signals are assigned to the 5 to 30 MHz band. The full 50 to 300 MHz band is retained for forward channels.

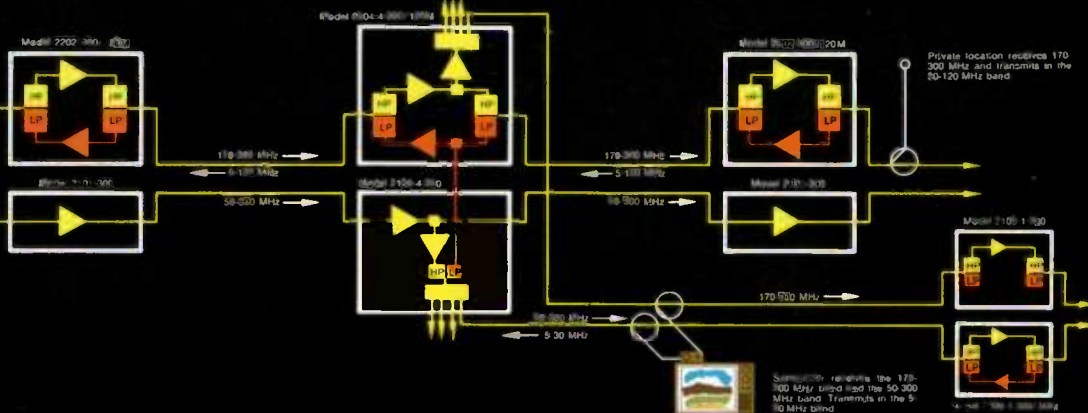

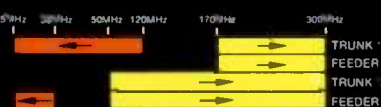

DUAL TRUNK SINGLE FEEDER MID-SPLIT with optional forward transmission on Cable B

The installation of dual trunks creates a physically separate trunk path for the 5 to 30 MHz subscriber-generated signals and can provide a 30 to 120 MHz capacity for specialized "return-only" applications. If the return trunk cable is mid-split for bidirectional transmission, the dual trunk system will allow private locations to receive signals in the 170 to 300 MHz band and generate signals in the 30 to 120 MHz band.

DUAL TRUNK DUAL FEEDER MID-SPLIT

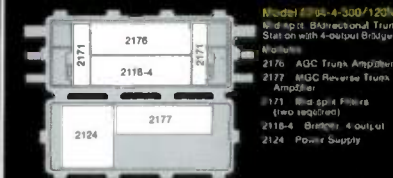

For the subscriber served by both feeder lines, the mid-split dual trunk, dual feeder system provides forward channels in the 50 to 300 MHz band of cable A and the 170 to 300 MHz band of cable B. The subscriber may generate signals in the 5 to 30 MHz band. Specialized locations may also receive the 170 to 300 MHz band and transmit in the 30 to 120 MHz band.

CENTURY AMPLIFIERS

*For a full-size poster,
please write to address
below.*

NEW 2109 LINE AMPLIFIER

The Century Model 2109 Line Amplifier can be used in both conventional and bidirectional systems. In either application it provides a full 50 to 300 MHz band for forward channels. Built-in duplex filters allow easy conversion to sub-split, bidirectional operation by inserting a reverse amplifier module. Other features include a built-in, four-output differential tap and a built-out option. The 2109 and the entire Century line achieve superior performance and reliability by the use of integrated design.

solid-state **CATV** test set.

The new Kay Series 9000 CATV test set offers a completely new approach to system testing: a basic storage scope main frame with low cost plug-ins for summation sweep testing, spectrum analysis, loss and return loss measurements and bench alignment.

The unique design permits the addition of future test modules at relatively low cost with no sacrifice in quality. Add whatever you want, whenever you want it.

The P9020A is a VHF summation sweep receiver. It features a 40 db post amp, a 42 db attenuator, harmonic markers, a built-in detector and a variable tilt control.

The P9030A plugs into the same main frame for measurement of gain, loss and return loss of active and passive devices. It includes precision .25 db attenuators, an electronic switcher, repeatable bridge and RF detector.

The P9040A is a low-cost spectrum analyzer plug-in, covering the range from 500 KHz-300MHz. It offers a 70 db dynamic range, digital IF attenuator, digital center frequency readout and built-in frequency and level calibration.

The P9059A is a low-cost solid-state sweeper plug-in covering the 1-300 MHz range. Designed primarily as a head end sweeper, it may be removed from the head end rack and installed in the main frame for amplifier alignment.

"On-the-spot" coverage for TV news and Documentary Film Makers.

The CP-16 16mm sound camera.

Crystal Controlled DC Motor
Incorporates high efficiency, low power use, high torque, solid state integrated circuitry and high accuracy.

Whether you're shooting a crowd scene, a person-to-person interview, fast moving action news while it's happening or a carefully planned assignment for television or documentary, your job is easier with the all-new CP-16 Single System/Double System Sound Camera. Made of lightweight magnesium (weighs only 9 lbs., including motor and battery). It combines maximum portability with comfortable hand-holding balance.

Designed and Manufactured by Cinema Products Corp.

Built-In Lightweight Battery Operation
NiCad rechargeable battery, will run at least ten 400 foot magazines per charge. No heavy external power packs or entangling cables.

We've brought to the CATV industry the same kind of quality and reliability we've supplied to the broadcast field for more than 20 years. Each of our CATV products is designed specifically for CATV head-end use or studio origination. These are not adaptations. And each Telemet CATV product undergoes extensive development and final field testing before it is available to the industry. So, they provide the kind of efficiency and long life successful CATV operations require.

These are some of the reasons our CATV customers continue to grow in greater numbers all the time.

For more information about these and other CATV products, write or call the Telemet sales office nearest you.

IT'S WHAT'S AHEAD OF THE HEADEND THAT COUNTS.

And BLONDER-TONGUE has
a series of products designed
to deliver a noise-free
signal to the headend.

Let's start at the top with the Y series 5 and 10-element high-gain yagis. They offer typically, 2dB more gain than competitive models. The reason: extra wide element spacing.

Then there's the SCMA series single-channel preamplifiers. They offer the lowest guaranteed noise figure (within the nearest 1/10th of a dB) because they're custom aligned for lowest noise figure at the channel on which they are being used. Each preamp is marked with the specified channel's noise figure. Typical SCMA series models are: the CMAU-LN for UHF and the SCMA for VHF.

Blonder-Tongue makes the finest custom-designed headends and makes sure that the signal that gets to the headend is in the best possible shape. For complete CATV product catalog, write: Blonder-Tongue Laboratories, Inc., Old Bridge, N.J. 08857. (201) 679-4010.

NO TWO BLONDER-TONGUE CATV HEADENDS ARE ALIKE.

There are more than 1000 Blonder-Tongue CATV headends delivering superior TV reception to subscribers from coast to coast. And no two headends are alike. That's because each headend is customized to meet the reception requirements of the area. Blonder-Tongue not only customizes its products and headends, but it also gives you a flexible headend approach to meet your needs—individual products, just what you need; a design based on a survey form; a headend assembled at the factory with guaranteed performance as a package, or an assembled headend and then turnkeyed over. And if you have a unique problem that can't be handled with existing equipment we'll design one to do the job. Blonder-Tongue keeps your cost down. The cost of a standard channel processor with all the automatic features you require is less than \$500. There is one area where Blonder-Tongue headends are alike, and that is in quality and performance, proven more than 1000 times over. Prove it to yourself. We'll send a Spectrum Analyzer photograph of a Blonder-Tongue processed channel and one of a popular competitor—no obligation, of course. Write on your letterhead or call our systems engineering dept: (201) 679-4010. Blonder-Tongue Laboratories, One Jake Brown Rd., Old Bridge, N.J. 08857.

VIDIFONT. The broadcasters' choice.

Vidifont has quality characters, in true upper and lower case, a selection of fonts, with proportional spacing. Big reasons why Vidifont has received wide acclaim and has become the broadcasters' choice, and the most widely used character generator.

And now Vidifont has a new

optional feature, Changeable Fonts, for even greater graphic programming capabilities. Vidifont also has a new bulk storage system, in convenient, removable cartridge format, with 100 times more storage capacity.

Wouldn't you like to see Vidifont used in actual on-air formats? For a free

demonstration of our Vidifont videotape, call (203) 327-2000.

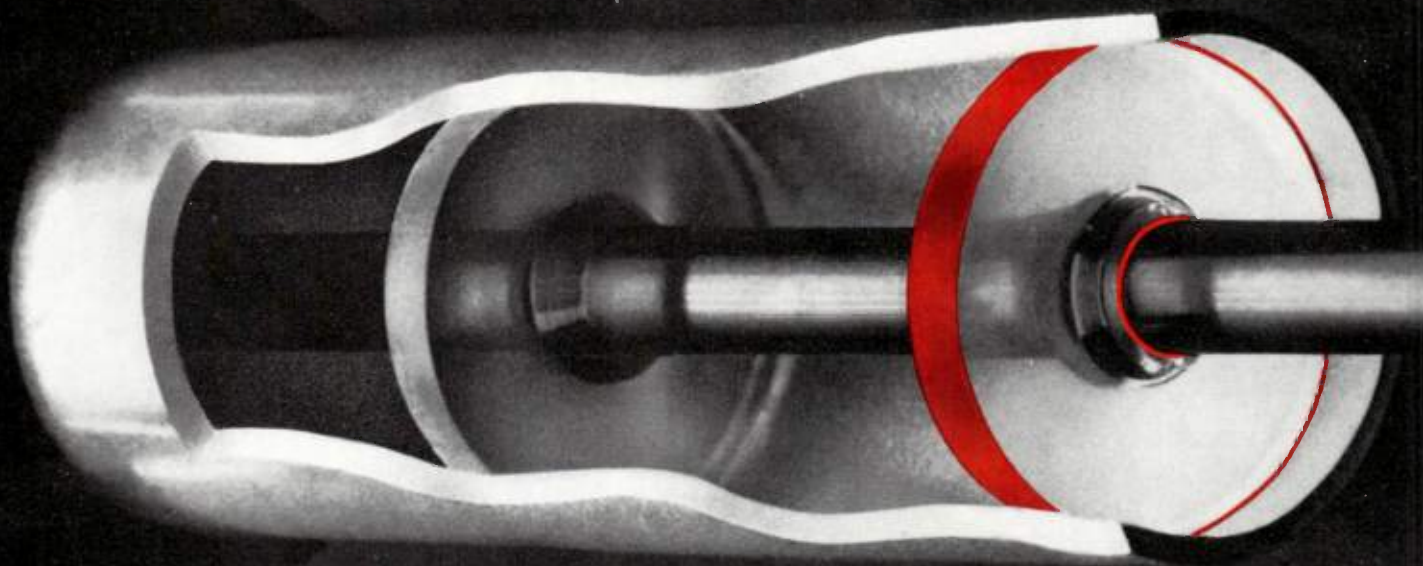

Vidifont. From CBS Laboratories, of course.

**OK. You've decided you can
save money with low loss cable,
but you're worried about
the performance of
foam polystyrene cables.**

FUSED DISC SOLVES YOUR PROBLEM

Fused Disc cables give you the benefit of low attenuation plus all-around high quality levels no other cable type can approach.

FACT: The Fused Disc design ensures that the center conductor is held in absolute alignment by the precision formed polyethylene discs. Conductor movement in any direction due to vibration, temperature cycling or forming bends and loops just can't happen.

Not true of foam polystyrene coaxial cables.

FACT: In Fused Disc cable, hermetically sealed compartments prevent moisture migration.

Not true of foam polystyrene types.

FACT: Fused Disc cable handles well. Ask any contractor who has installed it.

Not true of foam polystyrene cables. Foam does not provide good support. Special care is needed. Ask any contractor who has used it.

FACT: Fused Disc cable gives you remarkable electrical and mechanical uniformity that system designers can rely on.

Not true of any other coaxial cable.

AND MORE FACTS:

SPECIFICATION	FUSED DISC CABLES	FOAM POLY- STYRENE CABLES
Low attenuation for a given size	YES	YES
95% velocity of propagation	YES	NO
Guaranteed $\pm \frac{1}{2}$ ohm characteristic impedance tolerance	YES	NO
Guaranteed 35 dB SRL (worst case)	YES	NO
Less than 2% attenuation variation from reel to reel	YES	NO

And that's the story. Fused Disc gives you low loss plus all these other advantages. Available in .412", .500" and .750". Bare or jacketed for aerial. GP armored for direct earth burial.

For a brochure and specifications, please write: General Cable Corporation, Department 200-144, 730 Third Avenue, New York, New York, 10017.

UNICOM

**We've found over 100
different applications
for the versatile UNICOM.**

**If you find a new one
we'd love to hear about
it.**

We not only offer you the most reliable and versatile concept with the UNICOM but we extend this same reliability into our entire line of CATV equipment.

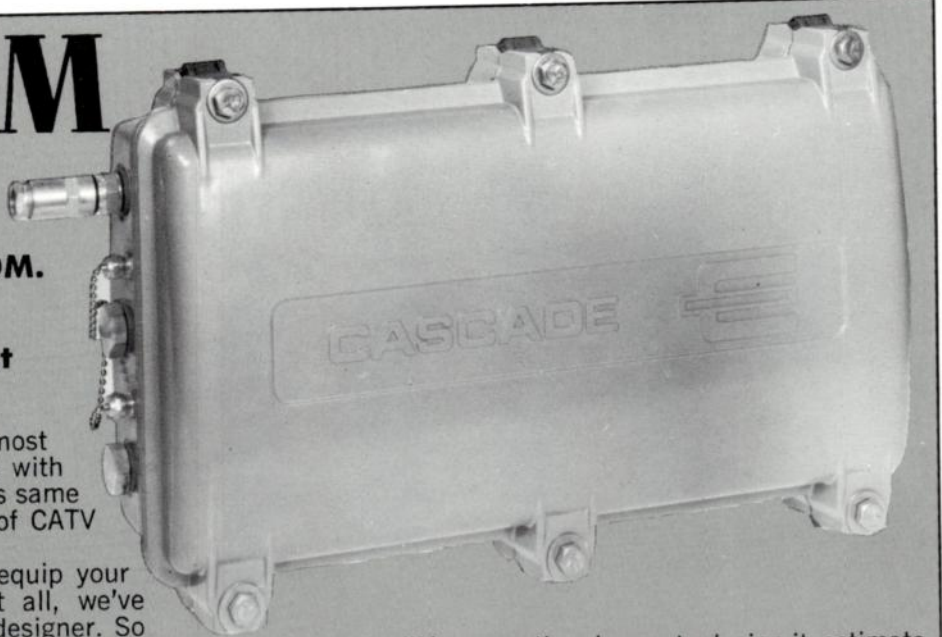

Now we can completely equip your entire system. But that's not all, we've added a little plus, a systems designer. So if you're planning a new system or adding to an existing one we'll be more than happy to design it, estimate your costs and, if you're pleased, equip it for you.

Write or call, Delta-Benco-Cascade Ltd., 124 Belfield Road, Rexdale, Ontario, Canada M9W 1G1 (416) 241-2651 we're waiting to serve you throughout the CATV industry.

The people we hire are different in a lot of ways. But the same in one.

Ours is a unique company. So the people we want working with us must be unusual, too.

And we don't care about their skin color. Or about their religion. Or what country they or their parents were born in. Or how old they are. Or whether they're men or women.

Our people are expected to handle each project right the first time.

But there's one thing that must be common to them all. Each must be the best there is for the available job, with the desire and drive always to handle each assignment or project right the first time, every time.

Our company is constantly growing. That means we always have need for experienced executives at the upper levels.

For the same reason, we always need people for middle management jobs. We want them to be innovative. And move ahead.

What does it take to work for us —and move ahead?

We have plants or facilities in 93 countries and sales outlets in 39 others. And we're in a wide variety of businesses—from telecommunications and food processing to hotels, community development and publishing.

It's a highly competitive, demanding world we live in. So we insist that our 428,000 employees, worldwide, do the best they can so we can do the best for them.

If you come with us, you'll

have a future with far more than ordinary promise.

A future with us holds more than ordinary promise.

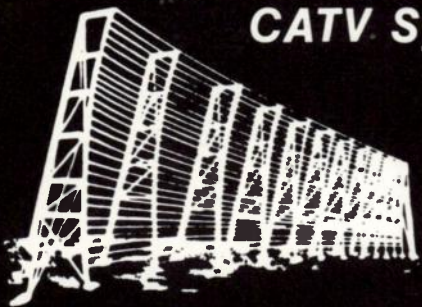

But you'll have to be the best there is for the job—and realize that you're consistently going to perform much better than you think you can now.

When we say interchangeability we mean interchangeability.

You can take one, or all, of the twenty modules and interchange them between cameras and maintain picture quality without additional adjustment, balancing, or fine tuning.

Our cameras were truly designed with interchangeability in mind.

You can take a module from one camera and put it in another camera. Or you can take a module from your parts stock and plug it in a camera. In fact, you can take a camera "shell" and put together a fully operative camera in about twenty minutes. The amount of time you save in adjustments and maintenance is remarkable.

Interchangeable modules are only a part of the Fernseh story. We have some other amazing features, too. For example, when you receive one of our cameras, it's ready for operation as soon as you unpack it. And, it'll perform to all specifications because each camera we make is pre-tested. We do something a little extra. We record actual performance characteristics for chromatic response and frequency response on each camera system.

There are a lot of things you should know about Fernseh cameras. Get detailed information by contacting your nearest Fernseh division representative at one of the offices listed below.

**We know what it's
like out there.**

That's why, at Southern Telephone Supply, speed, efficiency, and a complete inventory of CATV parts and supplies play such a large role in our day to day operations.

We understand things like storm damage and why a nine-to-five emergency service department just isn't enough. We understand things like workmen having to wait on slow shipments and warehouses that drain money needed in other areas.

And most of all, we understand the total picture of CATV systems and operations—and that's why we'll always be here when you need us.

Freedom of choice!

E Professional sound has entered a new era. It started with the Electro-Voice Model RE15. And now there are four E-V dynamic cardioid microphones that share its distinctive advantages — with some unique benefits of their own.

Unaffected by Distance . . . Angle

Basic to all of these microphones is Exclusive Electro-Voice Continuously Variable-D* construction. Now it offers something you've never heard before with any microphone: no matter what you do, microphone response never varies!

Whether performers almost swallow the microphone, wander far off-mike . . . or even move around to the back . . . you'll still get the same smooth response. Only the level changes.

Once you set equalization it remains constant. You have full assurance that tonal balance won't change between the dress rehearsal and the final performance, no matter what the talent does.

Improved Cardioid Pattern

Only acoustics and noise can limit you. Yet even here these new E-V microphones gain an advantage from the super-cardioid pattern that provides better sound control than ordinary cardioids. With maximum rejection 150° off axis, it is easier to eliminate unwanted sound while maintaining normal stand or boom microphone positions. There's also an integral bass-tilt circuit to cut rumble below 100 Hz. when needed.

Now Select from Four Models

In addition to the original RE15, we've added the RE16. The same fine microphone with an external "pop" filter to solve the problems of ultra-close miking.

The new RE10 is the economy version of the RE15. The same concept and quality, but for slightly less rigid requirements. And the RE11 is the lower cost twin to the RE16.

These four great cardioid microphones give you new freedom to head off sound problems before they start. Your E-V microphone headquarters has them waiting. Choose today.

No home should be without one.

For more than a year, Trans-World Communications, the closed-circuit television division of Columbia Pictures Industries, Inc., has been successfully putting premium programming into hotel rooms for pay. Today, in fact, we're in more than 30,000—from London to Honolulu, with New York, Atlanta, Toronto, Miami, Chicago and San Francisco in between. You are probably familiar with our system as Tele/Theatre.

Now—with the improved Tele/Theatre 26-channel home converter box—we can bring the same superior programming, engineering and marketing into homes on CATV systems.

Some important facts unique to Tele/Theatre that CATV operators should consider are:

Fact I Tele/Theatre provides the subscriber with very special programming, such as current motion pictures, on a *pay-per-program* basis.

Fact II The Tele/Theatre home converter has a capacity for 26 channels. Four of these channels are controllable from the mini-computer at the head end, affording pay-per-program capabilities on a one way system—now! It is also readily adapt-

able for two-way use and will not become obsolete.

Fact III The Tele/Theatre system incorporates a sophisticated origination console and monitor central computer which permits accurate "box office" measurements and billing.

Fact IV Tele/Theatre is the largest system of its kind because of its consistently high quality programming and its technically superior head-end equipment and converter.

The fact then is this: the Tele/Theatre system hits home. But for more information on why no CATV home should be without one, call our president, Mr. Wm. J. Butters. He can be reached at (212) 751-4400.

Equipment Division

Nationally-distributed wirephoto of Apollo 16 splashdown.

Because we were there, so were you.

Our portable microwave systems give your viewers a close look at the action when it happens, wherever it happens. And our fixed solid-state remodulating and heterodyne transmission systems will get your message across.

To find out why more and more people rely on us for their microwave systems, just write. We'll send you complete information.

Three questions every TV programmer should be able to answer.

1. Do early news viewers stay up late?

It's essential to know whether the people who watch your early news are substantially different from the ones who watch your late news.

If a real difference exists — in age composition, for example — then perhaps the style and content of your news shows should also differ.

ARB's Newscast Audience Analysis gives you the answer. It lets you make profitable news programming decisions on the basis of who's actually watching.

2. Where did your audience come from, and where will it go?

You know your audience comes and goes. But tracking down those elusive channel-switching viewers is another matter.

That's why the ARB Audience Flow Analysis is a programmer's dream. It tells you what they were watching before they tuned you in — information which has many practical applications in programming strategy and audience promotion.

The rate and pattern of audience tune-in/tune-out varies from program to program. But you can trace it for any time period based on the Metro, ADI, or Total Survey Area.

3. Who likes your anchorman?

If you don't have the number one news program, you need to know more about viewers' attitudes. You can use all the help you can get to improve your newscast's position.

And even if you *are* number one, you have to keep up on viewers' changing tastes to maintain your lead.

Most viewers develop strong loyalties to newscasts and newscasters. These news habits exist for a reason. But they *can* be broken by astute news programming decisions.

ARB's Newscaster Study probes beneath the surface to reveal the attitudes and opinions which affect choice of newscasts. It provides guidelines for improving your station's performance and competitive position.

These are only a few of the special ways ARB can help solve your programming problems. Whenever an important decision calls for more information, get in touch with an ARB representative.

Note: Revenues are net amounts received by stations and networks from all broadcast sources, including time, talent, programs; in case of TV, non-time revenues run as much as one-third.

¹ Parentheses denotes loss. ² No figures available for blank columns. ³ Three networks after Sept. 15, 1955 when DuMont ceased operations. ⁴ Includes one post-freeze station (UHF). ⁵ Includes 3 post-freeze stations (UHF). ⁶ Includes 3 post-freeze stations, 2 UHF & 1 VHF. The VHF stations were sold prior to Dec. 31, 1959. ⁷ Includes one post-freeze VHF station. ⁸ Breakdown between pre-freeze and post-freeze stations not supplied by FCC. ⁹ All three networks now report station representative fees as a deduction from revenue.

Note: ¹ National and regional spot and local spot sales are for time only. Excluded are revenues from programs, talent, materials, facilities and services sold in connection with the sale of time. These amounts totaled \$10,119,073 from national and regional advertisers, and \$26,045,871 from local advertisers. ² Before commissions to agencies, representatives and brokers. Because clarifying instructions were issued in 1969 regarding the classification of time sales into national and local, caution should be used in comparing these figures with figures for years prior to 1969. ³ Does not include 27 satellites that filed combined reports with their parent stations. ⁴ Total time sales less commissions to advertising agencies, representatives and brokers, plus sales of programs, materials, facilities and services, plus other broadcast revenue. ⁵ Before Federal income tax. ⁶ The Oak Hill, W. Va. station is no longer included in the Charleston-Huntington-Ashland market but has been combined with the Bluefield, W. Va. station to form a new 2 station market, Bluefield-Beckley. ⁷ The Mitchell, N.D. station has been added to Sioux Falls to create the Sioux Falls-Mitchell market. ⁸ The Jacksonville, Ill. station is included in the Springfield-Decatur-Champaign-Urbana-Danville market. ⁹ One or more stations did not report data for the full year. ¹⁰ Data withheld to maintain confidentiality of individual station figures. † Parenthesis () denote loss.

† Parentheses () denote loss. ¹National and regional spot and local spot sales are for time only. Excluded are revenues from programs, talent, materials, facilities and services sold in connection with the sale of time. These amounts totaled \$9,659,369 from national and regional advertisers, and \$28,620,387 from local advertisers. ² Before commissions to agencies, representatives and brokers. Because clarifying instructions were issued in 1969 regarding the classification of time sales into national and local, caution should be used in comparing these figures with figures for years prior to 1969. ³ Does not include 28 satellites that filed combined reports with their parent stations. ⁴ Total time sales less commissions to advertising agencies, representatives and brokers, plus sales of programs, materials, facilities and services, plus other broadcast revenue. ⁵ Before Federal income tax. * One or more stations did not report data for the full year. ** Data withheld to maintain confidentiality of individual station figures.

Population Estimates by Provinces, Counties & Subdivisions

Estimates as of January 1973 Provided by BBM Bureau of Measurement, Canada
Formulated on Data Supplied by the Statistics Department of the Canadian Broadcasting Corporation

Projected from Statistics Canada Data for 1971 Census
Reprinted by Permission from BBM Bureau of Measurement.

Census Metropolitan Areas (C.M.A.), Urban Areas (U.A.) and Cities are stated separately but are not additive since the population is included in Census Division (C.D.) or county totals. Census Agglomerations (C.A.) & Regional Districts (R.D.) are defined by Statistics Canada for the 1971 Census of Canada. In BBM areas composed of more than one county or census division, totals are shown. Total Persons & Children figures do not include those under 2.

CATV, Color, Multi-Set and UHF Penetration by U.S. Markets

Based on ARB Nationwide Sampling Sweep

February/March 1973

The following are the American Research Bureau's Arbitron estimates of CATV, Color Set, Multi-Set and UHF households penetration by ADI. The estimates are based on ARB's February 7-March 6, 1973 nation-wide sampling.

CATV estimates are based on ARB's annual survey of CATV systems taken in June-August 1972 combined with accepted industry sources and updated through February 1, 1973. The estimates for Color TV and Multi-Set households are derived from telephone placement calls to families selected for participation in ARB diary surveys. UHF estimates are based on in-tab households.

CATV, Color TV and Multi-Set households are based on each market's ADI (Area of Dominant Influence).¹ UHF household estimates are shown for both the ADI and Metro Rating Area as defined in ARB Television Market Reports. Since each ADI is geographically exclusive of another, the total of all ADI CATV, Color TV, Multi-Set and UHF households represents the total estimates for the United States.²

Household estimates for CATV, Color TV, Multi-Set and UHF are also shown as a percentage of Total TV households within each of the defined areas.

¹The ADI is an exclusive geographic area consisting of all counties in which the home-market stations receive a preponderance of total viewing hours. The user should be aware of potential market re-definitions when making comparisons with estimates from previous surveys. Please refer to the appropriate ARB Television Market Report or to the ARB *Description of Methodology* for information regarding survey areas, sample size, methodology, etc.
²CATV, Color TV, Multi-Set and UHF household estimates are also shown for a number of markets which, according to ARB surveys, have no ADI of county size or greater. These estimates are based on the Home County of the market and, therefore, are not directly comparable to the ADI estimates listed for other markets. Information for these markets is listed separately.

The following estimates are provided for those Television Markets which, according to ARB findings, have no geographic Area of Dominant Influence of county size or greater. They are based upon the Home County (ies) of the Market and therefore, are not directly comparable to the ADI Estimates listed previously. The Home County (ies) is shown in parentheses following each Non-ADI Market. Because the survey areas of the Markets listed below are composed of counties which are part of other Markets' ADI's, these estimates are not additive.

CBS TELEVISION NETWORK RATES

(Consult Network for Discounts, Specifications, etc.)

The CBS Television Network, as a national advertising medium, solicits those orders which will provide the largest nationwide circulation, the best program quality most suitable for a given time period, and which will leave no substantial portion of the nation without network service. While no minimum line-up of stations is required, the CBS Television Network in determining whether to accept a particular order, will consider the foregoing objectives. In the case of a program involving more than one advertiser, such consideration will include the stations otherwise ordered for and carrying the program.

NBC-TV NETWORK RATES

Effective Jan. 1, 1973

(Consult Network for Discounts, Specifications, etc.)

In order to serve the public interest in having NBC television programs available on a national basis and to maintain the network function as an effective national advertising medium, orders for NBC-TV Network facilities are subject to acceptability of the station line-up ordered.

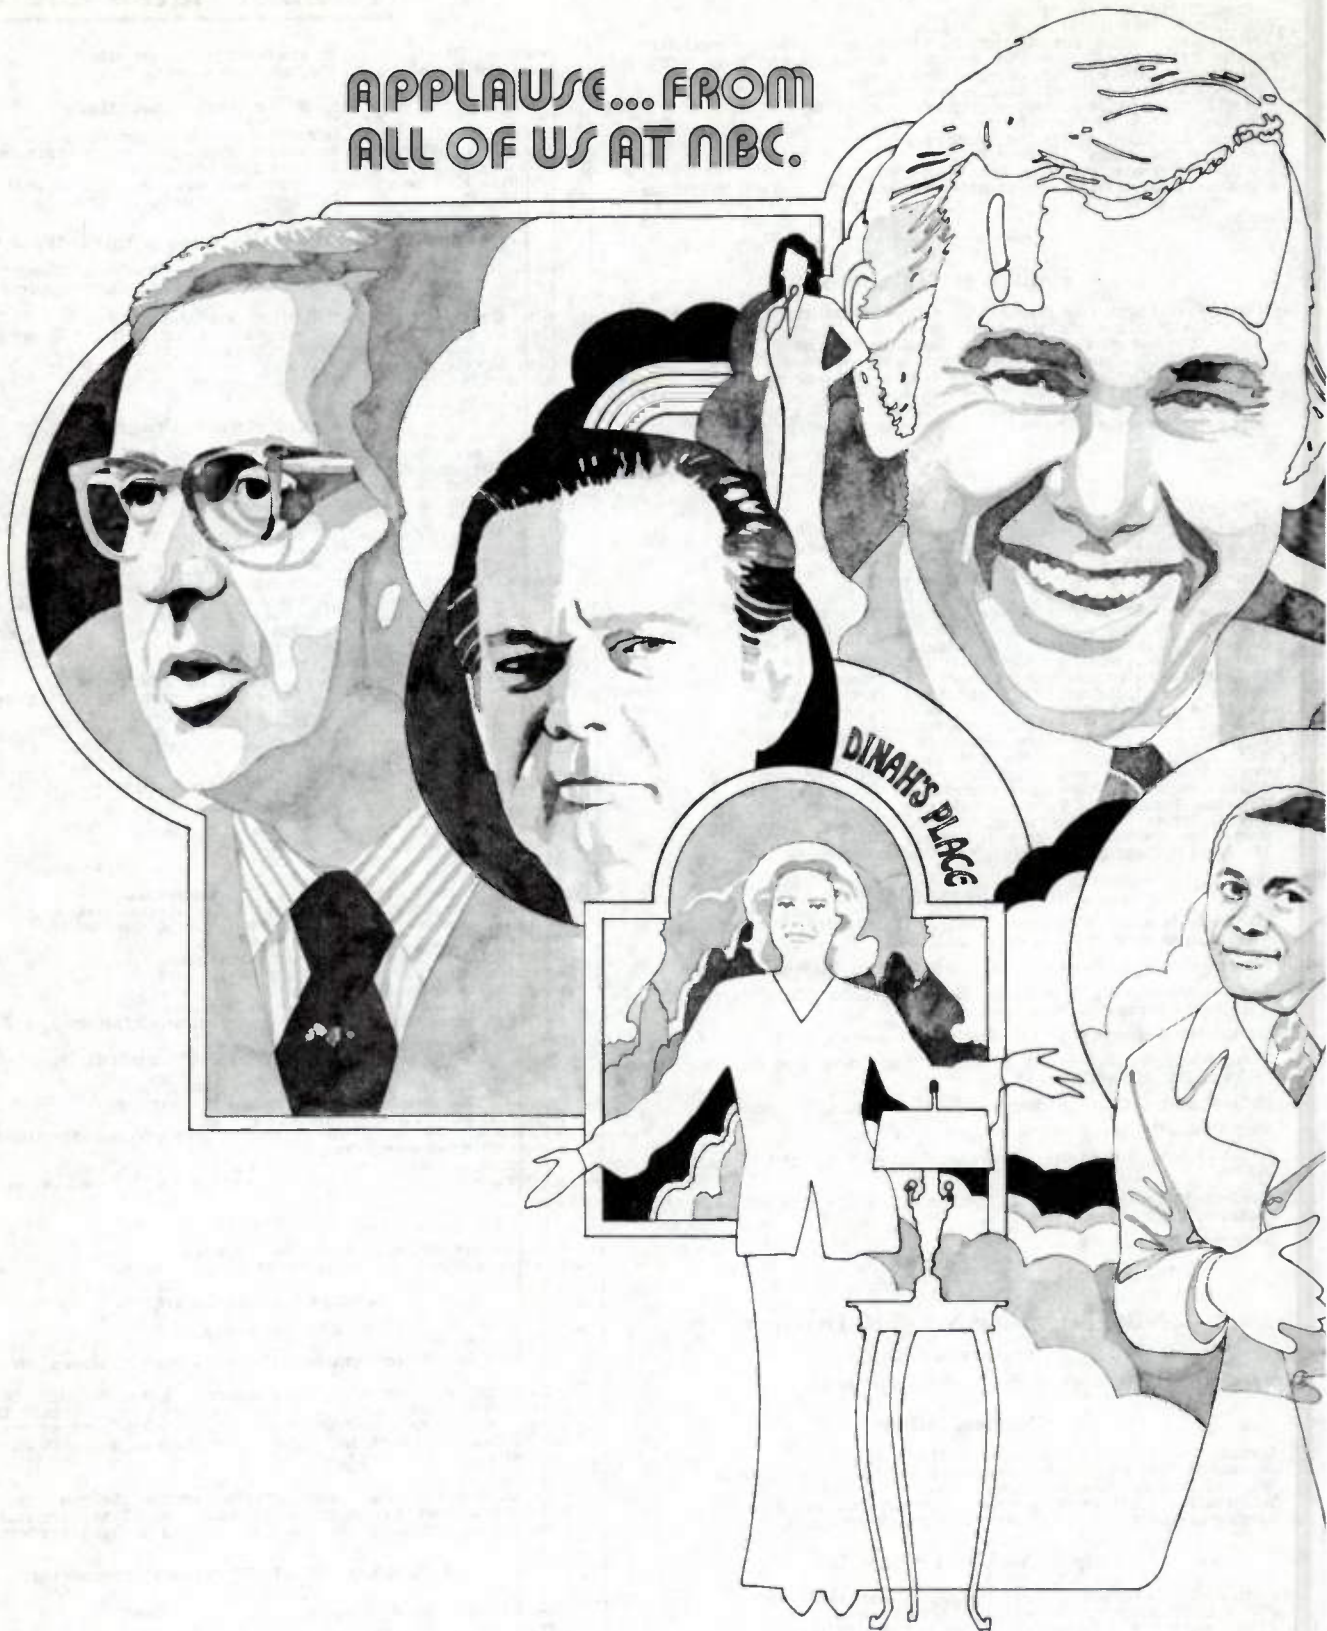

In connection with administering orders for participating or multi-sponsored programs, NBC may designate for each such program individually the basis of station order acceptability.

Corporate structure: The Canadian Broadcasting Corp. is a publicly owned corporation established by an Act of the Canadian Parliament to provide the national broadcasting service in Canada. The CBC is financed mainly by public funds voted annually by Parliament. Supplementary revenue is obtained from commercial advertising. As a publicly owned corporation the CBC is responsible to Parliament, and reports on its operations each year through a Cabinet Minister designated in the Broadcasting Act. The CBC head office is in Ottawa.

The CBC operates six major domestic services: two television networks, English and French; two AM radio networks, English and French; a number of FM radio stations in major cities; and a multilingual northern service (English, French, Indian and Eskimo languages) providing medium and shortwave broadcasting to the Canadian north.

CBC radio service is within reach of 98.7% of the Canadian population, and CBC television is available to 97.3%. Most television programming is in color, and about 32% of Canadian households have color sets. There are 421 outlets for the national radio service: 48 CBC-owned originating stations, 266 CBC-owned low power relay transmitters, and 107 privately-owned affiliated stations. In television, national service outlets total 368: 22 CBC-owned originating stations, 140 CBC-owned network relay and rebroadcasting stations, and 40 privately-owned affiliates with their 166 rebroadcasting stations.

For Present Ownership, see Station Directory

† Indicates FCC approval still pending as of March 31, 1973

ALABAMA

WAPI-TV, Birmingham (Ch. 13)—Purchased as WABT, part of Birmingham News Co. package (including, besides *Birmingham News* and *Huntsville Times*, radio stations WAPI, Birmingham & WHBS, Huntsville) by Samuel I. Newhouse interests for \$18,700,000 from Victor Hanson Trust. (1955-56 Vols. 11:49 & 12:4). Birmingham News Co. had previously acquired WABT with lease-hold on WAPI for \$2,400,000 from Edward L. Norton and Thad Holt. Former call letters WAFM-TV (1953 Vol. 9:15, 17, 24).

†**WBMG, Birmingham (Ch. 42)**—Sold by Birmingham TV Corp. to Roy H. Park Bcstg. Inc. for \$4,750,000.

WBRC-TV, Birmingham (Ch. 6)—Sold with AM & FM adjuncts for \$8,350,000 by Storer to Hulbert Taft family, following FCC approval of Storer's purchase of WVUE (formerly WFFH), Wilmington; for details, see WVUE (1957 Vol. 13:13-14, 19). Storer previously acquired WBRC-TV & WBRC from Mrs. Eloise Hanna for \$2,400,000 (1953 Vol. 9:13, 21).

WOWL-TV, Florence (Ch. 15)—Sale of stock by C. V. Green to Richard B. Biddle gave Biddle control. Earlier, stock reorganization resulted in John Thompson acquiring 12.5% interest for \$25,000 and O. B. Milley increasing holdings to 25%, taking over shares of James B. Gambill & G. W. McBurney and stock from corporation for \$37,500. Richard B. Biddle holds 50% (half in name of his radio WOWL), C. V. Green, 12.5% (1962).

WAAY-TV, Huntsville (Ch. 31)—Sold as WAFG-TV to Smith Bcstg. for \$509,775 by P. T. Gunn, James R. Cleary, John A. Higdon and associates (1963 Vol. 3:30, 46).

WALA-TV, Mobile (Ch. 10)—Sold to Universal Communications Corp. (Evening News Assn., WWJ-TV-AM-FM, Detroit) for \$4.75 million by Roywood Corp. (1969 Vol. 9:15). Previously sold with radio WALA to Roywood Corp. by W. O. Pape for \$3,000,000. Subsequently Roywood sold radio WALA to Stone Representatives for \$250,000 (1964 Vol. 4:23, 32, 48).

WKRG-TV, Mobile (Ch. 5)—Transferred with WKRG to new Giddens Television Inc. in deal involving \$1,180,000, with pres. Kenneth R. Giddens increasing holdings from 20% to 50%, other 50% owner being *Mobile Register and Press* (1957-58 Vols. 13:46; 14:8). Subsequently, *Mobile Register and Press* sold its 50% to Kenneth R. Giddens. (1966 Vol. 6:40).

WCOV-TV, Montgomery (Ch. 20)—Sold for \$1,250,000 to WLEX-TV, Lexington, Ky. by Oscar P. Covington and associates (1964 Vol. 4:28, 32, 41).

WKAB-TV, Montgomery (Ch. 32)—Sold as WCCB-TV to Montgomery Independent Telecasters Inc. (Cy N. Bahakel) by receiver Robert J. Thomas for \$100,000 (1963-64 *Addenda* 33-GG, 34-H). Receiver Thomas took over WCCB-TV after it went dark Feb. 15, 1963.

WSFA-TV, Montgomery (Ch. 12)—Sold for \$2,250,000 to owners of WIS-TV, Columbia by WKY Television System of Oklahoma City (1959 Vol. 15:30, 37). WKY acquired WSFA-TV & WSFA radio for \$562,598 (and assumed obligations), shortly after TV got on the air. Sellers, headed by Judge David E. Dunn, included R. F. Hudson, publisher of *Montgomery Advertiser & Journal* (1954-55 Vols. 10:38, 40, 50). Year later, WKY sold radio WSFA for \$175,000 (1956 Vol. 12:43, 50).

WSLA, Selma (Ch. 8)—Off-air station sold to Central Ala. Bcstrs. Inc. (Charles F. Grahame) by Selma TV Inc. for \$100,000.

WCFT-TV, Tuscaloosa (Ch. 33)—Transfer of all stock to owners of WDAM-TV, Hattiesburg-Laurel, for assumption of approx. \$185,000 in liabilities, approved by FCC Aug. 23, 1967.

ALASKA

KENI-TV, Anchorage (Ch. 2)—75% control of KENI-TV, KFAR-TV (Ch. 2), Fairbanks and radio stations KENI, KFAR & KTKN, Ketchikan, sold to All-Alaska Broadcasters Inc. (now Midnight Sun Bcstrs. Inc.) for \$1,200,000 by Midnight Sun Broadcasting Co. (1960 Vol. 16:8, 12). Midnight Sun acquired control of KENI-TV (then using KFIA call letters), along with CP for KFIF (Ch. 2), Fairbanks, for \$100,000 from Richard R. Rollins who retained 19%. At that time Midnight Sun (Lathrop Co.), also owned 4 AM stations in Alaska (1954-55 Vols. 10:47 & 11:1).

KIMO, Anchorage (Ch. 13)—80% of stock sold to Alaska-Hawaii Radio for approximately \$312,000 by Sourdough Bcstrs. Inc. Transfer included KHAR-AM-FM, Mrs. Patricia Harpel retained 20% (1969). Sale was not consummated (1970). Sold to Central Alaska Bcstg. Inc. as KHAR-TV for \$343,000 (1971).

* Editor's Note: This tabulation does not purport to cover all TV station ownership changes, particularly does not undertake to list hundreds of minority stockholder changes; this list includes only those deals involving changes of control or otherwise regarded as being of major importance. For present ownership of individual stations, see individual listings in the Television Station Directory.

KINY-TV, Juneau (Ch. 8)—Control acquired by Midnight Sun Bcstrs. (KENI-TV Anchorage & KFAR-TV Fairbanks) for \$79,240 (1968). Sold with radio KINY to Jerry W. McKinley and associates (now Juneau Bcstrs.) by Wm. J. Wagner (1959 Vol. 15:18).

ARIZONA

Assignments Affecting Borders

Channel Allocations for Canada and Mexico

Allocations within 250 miles of Canadian and Mexican borders are as agreed upon by U.S. and respective countries through exchange of diplomatic notes. Mexico reports VHF within 250 miles, UHF within 200 miles.

Plus (+) and Minus (—) symbols designate offset carrier positions of channels
(L) indicates limited allocation under "Working Arrangement" of Canadian-U.S.A.
Television Agreement of 1952 as modified.

Notes:

* Equipment listed herein is considered acceptable for use in television broadcast service, provided operation is in accordance with FCC's rules and that technical specifications as listed herein are not exceeded. "Type acceptance" is required for listing of transmitter & translators.

In most cases, type acceptance is based on measurements made when transmitter is used with certain external components specified by manufacturer. In such cases, type number listed identifies assembly, including transmitter & external components identical to those used for type acceptance measurements.

^a Power amplifier only.

^b Aural power can be reduced for operation within limit of Sec. 73.682(a)(15) without modification of transmitter.

^c This entry shows power ratings at upper extremity of frequency range indicated.

^d Acceptable for monochrome transmission only.

^e Acceptable for stereophonic operation.

^f Aural power can be reduced for operation within limit of Sec. 73.682(a)(15) by addition of RCA modification kit MI-34326-13.

^g Power amplifier for use only with Adler Electronics type UST-10AC, UST-10BC & UST-10C translators.

^h Not equipped for automatic transmission of call sign; refer to Sec. 74.750(c)(7).

ⁱ Type acceptance limited to use with Keith V. Anderson T-99 translator when equipped for automatic transmission of call sign.

^j Limited to use with Electronics, Missiles and Communications Inc. types TU-100-UA, TU-100-VA and U-HTU-100B-D translators only.

^k Usable with any type accepted UHF translator having at least .0015-kw peak visual output power and complying with the emission limits of Sec. 74.750 (c)(2)(ii).

WE FILL CAVITIES

Whatever your programming needs, Group W Productions can fill them. Early or late fringe, transitional, prime access time, weekend family entertainment, children's programming, special needs.

You name it, we'll meet it. Here are some colorful examples.

THE MIKE DOUGLAS SHOW: Eleven years young, fast moving, and going stronger than ever. 90 minute and 60 minute versions.

DOCTOR IN THE HOUSE: 30 hilarious minutes of medical mad-cap and mayhem. Great for young audiences, ideal for weekly or stripping.

ADVENTURES IN RAINBOW COUNTRY: Action, outdoor adventure. Half-hour series of fine family entertainment. Ideal for weekends.

EARTH LAB: One hour exploration and discovery series. Something new to think about in children's programming.

NORMAN CORWIN PRESENTS: Quality dramatic series. Big name stars, directors, writers. Critically acclaimed.

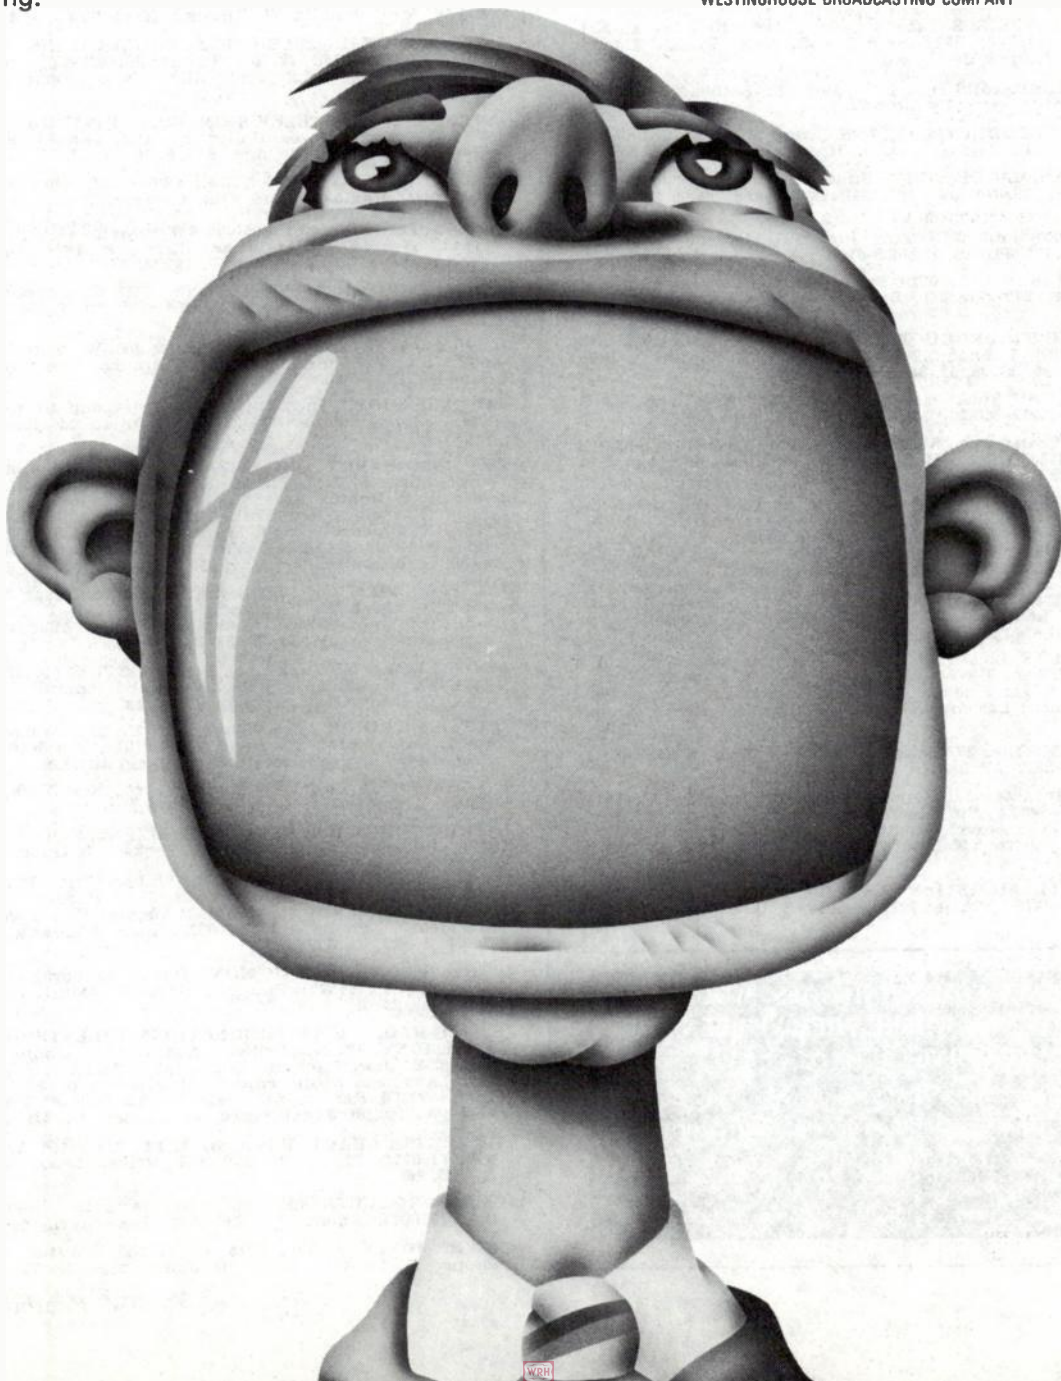

THE DAVID FROST REVUE: ½ hour series of Frost at his witty, satirical best. Celebrity headliners and guest stars like Lucille Ball, Art Carney, Burt Reynolds, and more.

URBAN AMERICA SPECIALS: Sizzling award-winning specials that key in on contemporary urban problems.

YOU ASKED FOR IT: All-time favorite ½ hour series is back—only newer, fresher, going more places, and enjoying even more popularity than before.

And more new things are happening all the time. So for programming for your every need, call us at (212) 983-6500.

Television Translator Stations

As of March 31, 1973

Vhf and Uhf Channels

Dagger (†) preceding a listing indicates station(s) are licensed. Asterisk (*) preceding a listing indicates construction permit(s). Absence of symbols indicates application only. When a community has a translator licensed and another with a construction permit only, these symbols precede call letters.

Transmitter power output (TPO) is given at end of each listing; all vhf's are one watt (1-w), unless otherwise indicated.

Channel numbers are contained in call letters: For example, Ch. 3 is indicated for Clearwater, Alaska by K03AB; symbols ## indicate call letters not yet assigned. Call letters and location of station repeated are in parentheses.

This listing includes all existing & proposed translator stations including those which are owned & operated by television stations.

The solid state, modular 100 watt UHF translator:

from the translator specialists,
of course!

If you want reliability and advanced design features in your translator system, you simply have to specify Emcee.

The modular, solid state 100-watt translator above is just one example. This FCC type-accepted unit adds optimum performance and ease of maintenance to the traditional Emcee reliability. It's available in models for VHF or UHF input and provides the ultimate color performance on any UHF channel or CCIR Bands IV and V.

And the same advanced, modular solid state design is now incorporated in the Emcee 1 watt and 10 watt UHF and VHF translators. Again, for that Emcee combination of reliability and performance.

Get complete information on the EMCEE line of solid state UHF and VHF translators. Ask for the latest data sheets.

BOTTLED GOODS

Sometimes a salesman stumbles onto something important. . .worth passing along. And, as Damon Runyon once said, "A story goes with it."

One of our representatives was making a presentation to the Vice President and Media Director of one of the Top 10 advertising agencies.

He noticed both volumes of **Television Factbook** on the agency executive's desk.

"How do you use the **Factbook**?" our salesman asked.

"To open, close or relocate bottling plants," was the answer.

The agency executive explained that among his shop's major clients was one of the nation's largest soft-drink bottlers. He went on to say:

"The TV station contour maps in the **Factbook**, along with your data on county-by-county TV penetration and audience flow, not only help us determine station selection, but also influence our client in opening, closing or relocating bottling plants and adjusting his marketing patterns."

"Can't you get this information direct from a station?"

"We save time. Your book is always here when we need it."

We're not in the agency or soft-drink bottling business, but we're prompted to ask:

"Is there a **Television Factbook** on your desk when you need it?"

Colortran Fresnels Save You Time and Money!

Berkey Colortran's Ring-Focus Fresnels are a major improvement in Fresnel spotlights.

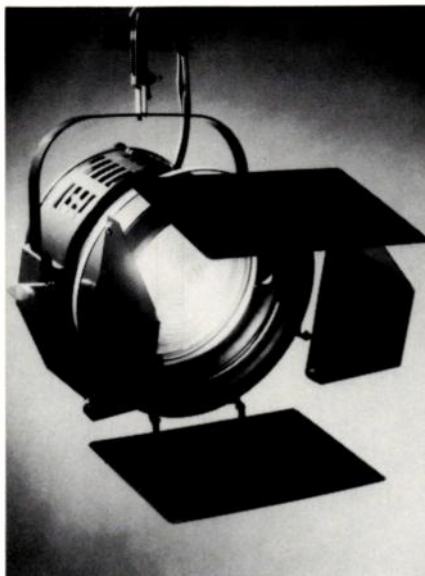

Lens Colortran's new lens designs provide highest optical performance coupled with incredibly smooth fields. Barndoor cutoff is sharp. You will find the optical performance of the Ring-Focus Fresnels to be superior to any other spotlight in the market. This is the new quality and performance standard for the industry, competitive comparisons are invited.

Focusing Focusing is accomplished by moving the lens, not the lamp carriage. A wrap-around cool focus ring permits fast easy focusing. Focusing may be done in any position. Focus ring is equipped with an adjustable drag to permit pole operation from the floor. The Ring-Focus Fresnel is the only spotlight that can be handled for focusing purposes after it has been on for hours. *The lamp doesn't move.* No flexing of feed wires, no fraying, no filament shock. The spot flood focus ring remains cool to the touch and its 360° access makes it convenient to use whether you're on a ladder or catwalk. With the cool pan and tilt handle, its easy focus all the time.

Relamping Colortran's Ring-Focus Fresnels offer unique *rear lamping* so that gel frames and barndoors don't have to be reset. Focus adjustments remain unchanged.

Socket The new *floating diamond* four-point contact socket

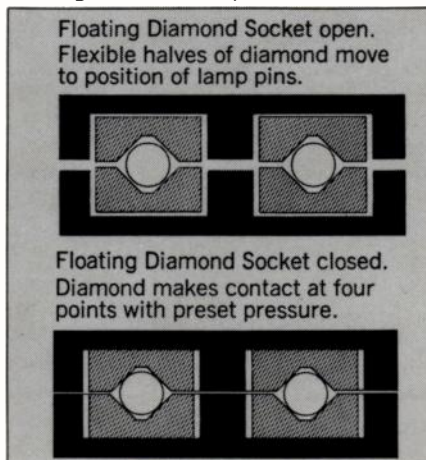

Ring-Focus Fresnel with rear lamping

(patented) doubles contact area and eliminates arcing and overheating. Pressure is constant and preset. Floating contacts are self aligning preventing lamp base, and seal failures.

Cooling and lamp life Improved cooling provides increased lamp life. New double wall construction, vented bottom housing, and a floating lens design permit cool air flow even in the critical 90° down position. Data from studios now using the Ring-Focus Fresnel indicate a lamp improvement in excess of 50%. Here's why: Focusing. Ring-Focus eliminates mechanical shock to the filament. Focusing the spotlight while hot is often the cause of premature lamp failure. With the Ring-Focus Fresnel, you move the lens — not the lamp.

Floating diamond four point contact socket

Lamp failures in spotlights are often caused by air leakage where the contact post goes into the lamp. This air leakage is due to heat build-up in the socket and uneven socket pressure against the contact posts. Colortran's floating diamond four-point contacts make contact at four points instead of two, improve cooling, insure against pressure leaks and assure uniform contact pressures.

Cooling Manufacturers' average rated lamp life is based on lamps burning in open air. When these lamps are used in conventional fixtures, lamp life is decreased. The better the cooling, the longer the lamp life.

Colortran's new unique air flow design improves lamp life. Double wall construction, vented bottom housing, and suspended lens combine to provide optimum air flow and increased lamp life.

Rugged mechanical design makes the Ring-Focus Fresnels easy to use in the studios or on the go. These rugged units will take more punishment with less up keep. The floating lens is less likely to crack, even when the unit is dropped. The patented bi-post socket will outlast any other.

Labor Colortran's Ring-Focus Fresnels save you production time because they're easy to focus when hot, focus in any position and are easy to relamp. Fewer relampings per year, and rear-access eliminates resetting barndoors, all this means money to you.

Mobilt

**Factory Fabricated
Communications Buildings**

Protect Your Electronic Equipment the Reliable Way

Designed expressly to house communications and microwave electronic equipment, Fort Worth Mobilt Communications Buildings withstand any climate or location problem... house electronic equipment according to the most rigid standards. Mobilts are available in popular sizes or custom-built... yet, surprisingly inexpensive.

● Installed in Minutes

Your Mobilt building can be ready to work for you in minutes. You have no rig-up delays on arrival because your building comes with supporting I-beams. Simply drop on your site, connect the service inlet, and you're in business.

● Reduced Cost and Waiting Time

Mobilts save you time and money because complete wiring is installed at the factory. Unlike conventional building, equipment can be delivered with it, at your option, rather than installed on location.

● Quality Construction

Mobilts are designed expressly to house electronic equipment. Result? Problems like inadequate tightness, poor ventilation and improper sealing of doors are non-existent.

And... an absolute minimum of maintenance is required.

Many options are available in size, outside finish, wiring and ventilation. You owe it to yourself to write for full specifications on these rugged, versatile equipment buildings. You'll find one exactly suited to your needs... at an economical price.

new LSC VEDETTE

16mm and 35mm PROFESSIONAL PROJECTORS

for fast, safe, high speed viewing and inspection of motion picture film

- The ideal machine for film quality control, timing and correction, and release print inspection. Handles negatives, fine grains and prints.
- Visual inspection of both picture and optical sound track. Solid state amplifier for simultaneous monitoring of picture and sound.
- Efficient revolving prism shutter and sharp optics produce bright, clear images without overheating film.

- Smooth, gentle film handling at up to 400 ft./min., without intermittent movement of usual claw or Geneva gear drive. Stable, positive focus. 2,000 foot film capacity.

Write for LSC Vedette literature or request a "no obligation" demonstration.

CF₂ ULTRASONIC CLEANER

for MOTION PICTURE FILM • MICROFILM • MAGNETIC TAPE

Presented The Academy of Motion Pictures Arts and Sciences Award of Merit for Outstanding Technical Achievement.

Ultrasonic energy is the most effective and economical way to completely clean motion picture film, microfilm and tape without mechanical scrubbing and wiping. Ultrasonic energy performs the entire cleaning operation.

- Restores clarity and sound to maximum quality.
- Enhances the entertainment value of motion picture film and improves commercials.
- Assures static free film with color balance undisturbed.
- Cuts projector maintenance costs... no dirt or dust carried into gates and orifices... less breakdowns.
- Completely automatic... requires only loading and unloading.

- Costs only 1/20 of a penny per running foot to operate.
- Used by every major motion picture lab in the world.

Question: What's New In Camera Automation?

Answer: The Power-Optics' Episcopo

Our latest system is applicable to both television and motion picture cameras. There are a variety of systems providing a traversing mechanism over an X-Y plot.

Movements of the camera and zoom lens may be pre-programmed either by "shots" or controlled by memory core-store and computer controls.

Illustrated is a unit suitable for: Studio Graphics, Animation, Lecture Illustrations, Medical & Scientific Displays, Aerial Mapping and Topography.
