Group Ownership

Listed here are individuals and companies with multiple station holdings. Included are all those controlling three or more radio stations and/or two or more television stations. FCC rules limit the number of stations a company can own in a particular market, depending on the size of the market. In markets with 45 or more commercial radio stations, a broadcaster may own eight stations, but no more than five of a kind (AM or FM). In markets with 30-44 stations, seven total, four of a kind. With 15-29 stations, six total, four of a kind. With 14 or fewer stations, five total, three of a kind (but no more than half the stations in the market). Ownership of cable TV systems, as reported by these stations, is also listed. Unless otherwise noted, the first station listed is the group headquarters.

Note: Dollar volume figures represent total considerations reported for all transactions with exception of minority interest transfers in which control of stations did not change hands and stations sold as part of larger company transactions. Although all sales have been approved by the FCC, they may not necessarily have reached final closing. Prior to 1978, combined AM-FM facilities were counted as one station in computing total number of stations traded. Now AM-FM combinations are counted as two stations.

*Starting in 1993, the Radio Only column includes only standalone AM and FM deals and the Groups column contains AM-FM combos and all other multiple station deals. In previous years, the AM-FM combos were included under Radio Only.

1999 Station Sales

The following are 1999 radio and television station sales with transactions of \$1 million and above. All transaction information is listed as reported in *Broadcasting & Cable* magazine's "Changing Hands" column and is current to December 20, 1999. For more detail on television sales, see *Television Ownership Transfers* in this section.
